UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10-Q

Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the 13 weeks ended September 29, 2018

OR

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the Transition period from _____ to _____

Commission file number 1-11657

TUPPERWARE BRANDS CORPORATION

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of
incorporation or organization)

36-4062333

(I.R.S. Employer
Identification No.)

14901 South Orange Blossom Trail, Orlando, Florida 32837

(Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code: (407) 826-5050

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of October 29, 2018, 48,580,895 shares of the common stock, \$0.01 par value, of the registrant were outstanding.

TUPPERWARE BRANDS CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Note 1: Summary of Significant Accounting Policies

Basis of Presentation: The condensed consolidated financial statements include the accounts of Tupperware Brands Corporation and its subsidiaries, collectively “Tupperware” or the “Company”, with all intercompany transactions and balances having been eliminated. These condensed consolidated financial statements and related notes should be read in conjunction with the audited 2017 financial statements included in the Company's Annual Report on Form 10-K for the year ended December 30, 2017.

Certain prior year amounts have been reclassified to conform with current year presentation. This includes changes to the presentation of pension costs in other expense in the Company's Consolidated Statement of Income under ASU 2017-07, Improving the Presentation of Net Periodic Pension Costs and Net Periodic Post-Retirement Benefit Costs. For applying the retrospective presentation requirements under this standard, the Company used the practical expedient that allows for the use of amounts disclosed in its retirement benefit plans note for the year ended December 30, 2017 as the estimation basis.

These condensed consolidated financial statements are unaudited and have been prepared following the rules and regulations of the United States Securities and Exchange Commission and, in the Company's opinion, reflect all adjustments, including normal recurring items that are necessary for a fair statement of the results for the interim periods. Certain information and note disclosures normally included in the balance sheet, statements of income, comprehensive income and cash flows prepared in conformity with accounting principles generally accepted in the United States of America have been condensed or omitted as permitted by such rules and regulations. Operating results of any interim period presented herein are not necessarily indicative of the results that may be expected for a full fiscal year.

Use of Estimates: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the reporting period. Actual results could differ materially from these estimates.

Revenue Recognition: On December 31, 2017, the Company adopted new guidance on revenue from contracts with customers using the modified retrospective method. There was no impact on beginning retained earnings from the adoption as of December 31, 2017. Results for reporting periods beginning December 31, 2017 are presented under the new guidance, while prior period amounts continue to be reported in accordance with previous guidance without revision.

Under the new guidance, the contract is defined as the order received from the Company's customer who, in most cases, is one of the Company's independent distributors or a member of its independent sales force. Revenue is recognized when control of the product passes to the customer, which is upon shipment, and is recognized at the amount that reflects the consideration the Company expects to receive for the products sold, including various forms of discounts. Generally, payment is either received in advance or in a relatively short period of time following shipment. When revenue is recorded, estimates of returns are made and recorded as a reduction of revenue. Contracts with customers are evaluated to determine if there are separate performance obligations that are not yet met. These obligations generally relate to product awards to be subsequently fulfilled. When that is the case, revenue is deferred until each performance obligation is met. The impact as of the end of the third quarter of 2018 from deferred revenue was not material.

Compared with historical accounting under the previous guidance, the Company estimates revenue would have been \$2 million higher and \$4 million lower in the third quarter and the year-to-date period of 2018, respectively. This primarily reflects, under previous guidance in 2017, certain operating units recording revenue upon delivery that are now recording revenue upon shipment under the new guidance. The impact to the Company's consolidated balance sheet as a result of adopting the new guidance was not significant.

The Company primarily disaggregates revenue based on geography. Refer to disaggregation information included in Note 9 to the Consolidated Financial Statements.

Table of Contents

TUPPERWARE BRANDS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

Foreign Currency Translation: Inflation in Argentina has been at relatively high levels over the past several years. The Company uses a blended index of the Consumer Price Index and National Consumer Price Index for determining highly inflationary status in Argentina. This blended index is expected to reach cumulative three-year inflation in excess of 100 percent in 2018. The Company transitioned to highly inflationary status for Argentina as of July 1, 2018. Gains and losses resulting from the translation of monetary assets in the financial statements of subsidiaries operating in highly inflationary economies are recorded in earnings. As of the September 29, 2018, the Company had approximately \$0.1 million of net monetary liabilities in Argentina, which are of a nature that will generate income or expense for the change in value associated with exchange rate fluctuations versus the U.S. dollar.

Note 2: Shipping and Handling Costs

The cost of products sold line item includes costs related to the purchase and manufacture of goods sold by the Company. Among these costs are inbound freight charges, duties, purchasing and receiving costs, inspection costs, depreciation expense, internal transfer costs and warehousing costs of raw material, work in process and packing materials. The warehousing and distribution costs of finished goods are included in delivery, sales and administrative expense (“DS&A”). Distribution costs are comprised of outbound freight and associated labor costs. Fees billed to customers associated with the distribution of products are classified as revenue. The distribution costs included in DS&A expense were \$32.5 million and \$35.0 million for the third quarters of 2018 and 2017, respectively, and \$103.8 million and \$105.5 million for the respective year-to-date periods.

Note 3: Promotional Costs

The Company frequently makes promotional offers to members of its independent sales force to encourage them to fulfill specific goals or targets for sales levels, party attendance, addition of new sales force members or other business-critical functions. The awards offered are in the form of product awards, special prizes or trips. The Company accrues for the costs of these awards during the period over which the sales force qualifies for the award and reports these costs primarily as a component of DS&A expense. These accruals require estimates as to the cost of the awards, based upon estimates of achievement and actual cost to be incurred. During the qualification period, actual results are monitored, and changes to the original estimates are made when known. Promotional and other sales force compensation expenses included in DS&A expense totaled \$73.0 million and \$86.4 million for the third quarters of 2018 and 2017, respectively, and \$244.1 million and \$274.0 million for the respective year-to-date periods.

Note 4: Inventories

(In millions)	September 29, 2018	December 30, 2017
Finished goods	\$ 221.8	\$ 203.5
Work in process	25.9	26.0
Raw materials and supplies	31.9	32.7
Total inventories	\$ 279.6	\$ 262.2

Note 5: Net Income Per Common Share

Basic per share information is calculated by dividing net income by the weighted average number of shares outstanding. Diluted per share information is calculated by also considering the impact of potential common stock on both net income and the weighted average number of shares outstanding.

Table of ContentsTUPPERWARE BRANDS CORPORATION

Net current-period other comprehensive income (loss)	(63.0)	1.4	1.2	(60.4)
Balance at September 29, 2018	\$(564.9)	\$ 3.0	\$ (27.9)	\$(589.8)

(In millions, net of tax)	Foreign Currency Items	Cash Flow Hedges	Pension and Other Post-retirement Items	Total
Balance at December 31, 2016	\$(544.3)	\$ 4.9	\$ (32.1)	\$(571.5)
Other comprehensive income (loss) before reclassifications	55.1	(5.4)	(5.2)	44.5
Amounts reclassified from accumulated other comprehensive income (loss)	—	(0.6)	0.7	0.1
Net current-period other comprehensive income (loss)	55.1	(6.0)	(4.5)	44.6
Balance at September 30, 2017	\$(489.2)	\$ (1.1)	\$ (36.6)	\$(526.9)

Pretax amounts reclassified from accumulated other comprehensive loss that related to cash flow hedges consisted of net gains of \$4.2 million and \$1.0 million for the year-to-date periods ended September 29, 2018 and September 30, 2017, respectively. Associated with these items were tax provisions of \$1.1 million and \$0.4 million, respectively. See Note 11 for further discussion of derivatives.

Table of ContentsTUPPERWARE BRANDS CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(Unaudited)

For the year-to-date periods ended September 29, 2018 and September 30, 2017, pretax amounts reclassified from accumulated other comprehensive loss related to pension and other post-retirement items consisted of prior service benefits of \$0.6 million and \$1.1 million, actuarial losses of \$0.3 million and \$1.1 million, and pension settlement costs of \$0.6 million and \$0.9 million, respectively. Associated with these items was a tax provision of \$0.1 million in 2018 and benefit of \$0.2 million in 2017. See Note 13 to the Consolidated Financial Statements for further discussion of pension and other post-retirement benefit costs.

Note 7: Re-engineering and Impairment Costs

The Company recorded \$3.0 million and \$9.0 million in re-engineering charges during the third quarters of 2018 and 2017, respectively, and \$12.7 million and \$43.9 million for the respective year-to-date periods.

In 2018 and 2017, the re-engineering and impairment charges incurred were primarily related to severance costs and restructuring actions taken in connection with the Company's plans, through 2019, to rationalize its supply chain and to adjust the cost base of several marketing units. The restructuring charges also relate to the Company's decision to wind-down the Beauticontrol reporting unit in 2017. In the year-to-date periods of 2018 and 2017, the Company recorded \$1.0 million and \$3.2 million, respectively, in cost of sales for inventory obsolescence in connection with its re-engineering program.

The total cost of the restructuring actions is estimated to be \$90 million to \$100 million from the second quarter of 2017 forward. This excludes the benefit of selling fixed assets that have, or will become excess in light of the re-engineering actions. The Company expects about 90 percent of second quarter 2017 and forward re-engineering costs to require cash outflows, and for these to be funded with cash flow from operations as well as asset sales as a result of the restructuring actions, notwithstanding the timing during each fiscal year in which the Company generates the majority of its cash. Of the total costs, the Company estimates that about 65 percent relates to severance and benefits related to headcount reductions, while the balance is predominantly related to costs to exit leases and other contracts, mainly related to wind-down of Beauticontrol and closure of the French manufacturing facility, as well as write-offs of excess assets for which there are not expected to be disposal proceeds.

The re-engineering charges by segment during the third quarter and year-to-date period ended September 29, 2018 were as follows:

	Third Quarter	Year-to-Date
(In millions)	2018	2018
Europe	\$ 0.5	\$ 7.0
Asia Pacific	—	0.8
North America	1.8	3.8
South America	0.7	1.1
Total re-engineering charges	\$ 3.0	\$ 12.7

Table of ContentsTUPPERWARE BRANDS CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(Unaudited)

The balances included in accrued liabilities related to re-engineering and impairment charges as of September 29, 2018 and December 30, 2017 were as follows:

(In millions)	September 29, 2018	December 30, 2017
Beginning of the year balance	\$ 45.4	\$ 1.6
Provision	12.7	63.7
Non-cash charges	(0.5)	(0.4)
Adjustments	5.5	—
Cash expenditures:		
Severance	(20.4)	(12.7)
Other	(11.6)	(6.8)
Currency translation adjustment	(0.3)	—
End of period balance	\$ 30.8	\$ 45.4

The accrual balance as of September 29, 2018, related primarily to severance payments to be made through the second quarter of 2019. Adjustments to the re-engineering accrual in the table above relate to short-term pension obligations extinguished and re-classified in connection with severance obligations to be paid as part of the closure of the supply chain facility in France.

Note 8: Goodwill and Intangible Assets

The Company's goodwill and intangible assets relate primarily to the December 2005 acquisition of the direct-to-consumer businesses of Sara Lee Corporation. In the third quarters of 2018 and 2017, the Company completed the annual assessments for all of its reporting units and indefinite-lived intangible assets, concluding there were no impairments.

In the second quarter of 2017, as part of its on-going assessment of goodwill and intangible assets, the Company noted that the sales, profitability and cash flow of Fuller Mexico had fallen below their recent trend lines and were expected to fall significantly short of previous expectations for the year. As a result, the Company performed an interim impairment test as of the end of May 2017, recording an impairment charge of \$62.9 million. The remaining goodwill in Fuller Mexico is \$17.8 million.

Note 9: Segment Information

The Company manufactures and distributes a broad portfolio of products, primarily through independent direct sales consultants. Certain operating segments have been aggregated based upon geography, consistency of economic substance, products, production process, class of customers and distribution method.

Effective in the fourth quarter of 2017, in connection with the closure of its Beauticontrol business, the Company changed its segment reporting. The change was to combine its previous Beauty North America and Tupperware North America segments into one North America segment. Comparable information from all historical periods presented has been revised to conform with the new presentation.

The Company's reportable segments primarily sell design-centric preparation, storage and serving solutions for the kitchen and home through the Tupperware® brand. Europe includes Avroy Shlain® in South Africa and Nutrimetics® in France, which sell beauty and personal care products. Some units in Asia Pacific also sell beauty and personal care products under the NaturCare®, Nutrimetics® and Fuller® brands. North America also includes the Fuller Mexico beauty and personal care products business and sells products under the Fuller Cosmetics® brand in that unit and in Central America. South America also sells beauty products under the Fuller®, Nutrimetics® and Nuvo® brands. Worldwide sales of beauty and personal care products totaled \$66.6 million and \$86.8 million in the third quarters of 2018 and 2017, respectively, and \$214.9 million and \$253.1 million in the respective year-to-date periods.

Other	—	0.1
Total debt obligations	\$ 936.1	\$ 738.1

(a) \$250.6 million and \$96.1 million denominated in euros as of September 29, 2018 and December 30, 2017, respectively.

Credit Agreement

As of September 29, 2018, the Company had a weighted average interest rate on outstanding LIBOR-based borrowings of 2.0 percent under its multicurrency Amended and Restated Credit Agreement (“Credit Agreement”) that has a final maturity date of June 9, 2020.

At September 29, 2018, the Company had \$350.6 million of unused lines of credit, including \$268.0 million under the committed, secured Credit Agreement, and \$82.6 million available under various uncommitted lines around the world. The Credit Agreement has customary financial covenants related to interest coverage and leverage. These restrictions are not expected to impact the Company's operations. As of September 29, 2018, and currently, the Company had considerable cushion under its financial covenants.

Note 11: Derivative Instruments and Hedging Activities

The Company is exposed to fluctuations in foreign currency exchange rates on the earnings, cash flows and financial position of its international operations. Although this currency risk is partially mitigated by the natural hedge arising from the Company's local manufacturing in many markets, a strengthening U.S. dollar generally has a negative impact on the Company. In response, the Company uses financial instruments to hedge certain of its exposures and to manage the foreign exchange impact to its financial statements. At its inception, a derivative financial instrument is designated as a fair value, cash flow or net equity hedge.

Fair value hedges are entered into with financial instruments such as forward contracts, with the objective of limiting exposure to certain foreign exchange risks primarily associated with accounts payable and non-permanent intercompany transactions. For derivative instruments that are designated and qualify as fair value hedges, the gain or loss on the derivative, as well as the offsetting gain or loss on the hedged item attributable to the hedged risk, are recognized in current earnings. In assessing hedge effectiveness, the Company excludes forward points, which are considered to be a component of interest expense. The forward points on fair value hedges resulted in pretax gains of \$4.3 million and \$5.9 million in the third quarters of 2018 and 2017, respectively, and \$15.1 million and \$16.1 million for the respective year-to-date periods.

The Company also uses derivative financial instruments to hedge foreign currency exposures resulting from certain forecasted purchases and classifies these as cash flow hedges. At initiation, the Company's cash flow hedge contracts are generally for periods ranging from one to fifteen months. The effective portion of the gain or loss on the hedging instrument is recorded in other comprehensive income and is reclassified into earnings as the transactions being hedged are recorded. As such, the balance at the end of the current reporting period in other comprehensive income, related to cash flow hedges, will generally be reclassified into earnings within the next twelve months. The associated asset or liability on the open hedges is recorded in other current assets or accrued liabilities, as applicable. In assessing hedge effectiveness, the Company excludes forward points, which are included as a component of interest expense.

Table of Contents

TUPPERWARE BRANDS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

The Company also uses financial instruments, such as forward contracts and certain euro denominated borrowings under its Credit Agreement, to hedge a portion of its net equity investment in international operations and classifies these as net equity hedges. Changes in the value of these financial instruments, excluding any ineffective portion of the hedges, are included in foreign currency translation adjustments within accumulated other comprehensive loss. The Company recorded, net of tax, in other comprehensive income a net loss of \$1.1 million and gain of \$12.9 million associated with these hedges in the third quarter and year-to-date period of 2018 and losses of \$3.8 million and \$35.9 million for the respective periods of 2017. Due to the permanent nature of the investments, the Company does not anticipate reclassifying any portion of these amounts to the income statement in the next twelve months. In assessing hedge effectiveness, the Company excludes forward points, which are included as a component of interest expense. While the forward contracts used for net equity and fair value hedges of non-permanent intercompany balances mitigate its exposure to foreign exchange gains or losses, they result in an impact to operating cash flows as they are settled, whereas the hedged items do not generate offsetting cash flows. The net cash flow impact of these currency hedges for the year-to-date periods ended September 29, 2018 and September 30, 2017 were inflows of \$3.5 million and \$5.8 million, respectively.

The Company considers the total notional value of its forward contracts as the best measure of the volume of derivative transactions. As of September 29, 2018 and December 30, 2017, the notional amounts of outstanding forward contracts to purchase currencies were \$121.3 million and \$111.1 million, respectively, and the notional amounts of outstanding forward contracts to sell currencies were \$101.1 million and \$112.1 million, respectively. As of September 29, 2018, the notional values of the largest positions outstanding were to purchase \$57.1 million of U.S. dollars and \$29.1 million of euros and to sell \$29.5 million of Mexican pesos.

The following table summarizes the Company's derivative positions, which are the only assets and liabilities recorded at fair value on a recurring basis, and the impact they had on the Company's financial position as of September 29, 2018 and December 30, 2017. Fair values were determined based on third party quotations (Level 2 fair value measurement):

Derivatives designated as hedging instruments (in millions)	Asset derivatives		Liability derivatives			
	Balance sheet location	Fair value		Balance sheet location	Fair value	
		Sep 29, 2018	Dec 30, 2017		Sep 29, 2018	Dec 30, 2017
Foreign exchange contracts	Non-trade amounts receivable	\$ 19.7	\$ 32.2	Accrued liabilities	\$ 14.8	\$ 29.6

The following table summarizes the impact of the Company's fair value hedging positions on the results of operations for the third quarters of 2018 and 2017:

Derivatives designated as fair value hedges (in millions)	Location of gain or (loss) recognized in income on derivatives	Amount of gain or (loss) recognized in income on derivatives		Location of gain or (loss) recognized in income on related hedged items	Amount of gain or (loss) recognized in income on related hedged items	
		2018	2017		2018	2017
		Foreign exchange contracts	Other expense		\$ 3.4	\$ 2.1

TUPPERWARE BRANDS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

Note 12: Fair Value Measurements

Due to their short maturities or their insignificance, the carrying amounts of cash and cash equivalents, accounts and notes receivable, accounts payable, accrued liabilities and short-term borrowings approximated their fair values at September 29, 2018 and December 30, 2017. The Company estimates that, based on current market conditions, the value of its 4.75%, 2021 senior notes was \$611.6 million at September 29, 2018, compared with the carrying value of \$599.6 million. The higher fair value resulted from changes, since issuance, in the corporate debt markets and investor preferences. The fair value of debt is classified as a Level 2 liability, and is estimated using quoted market prices as provided in secondary markets that consider the Company's credit risk and market related conditions. See Note 11 to the Consolidated Financial Statements for discussion of the Company's derivative instruments and related fair value measurements.

Note 13: Retirement Benefit Plans

Components of net periodic benefit cost for the third quarters and year-to-date periods ended September 29, 2018 and September 30, 2017 were as follows:

	Third Quarter				Year-to-Date			
	Pension benefits		Post-retirement benefits		Pension benefits		Post-retirement benefits	
(In millions)	2018	2017	2018	2017	2018	2017	2018	2017
Service cost	\$1.4	\$2.7	\$—	\$—	\$6.4	\$8.1	\$0.1	\$0.1
Interest cost	1.4	1.4	0.1	0.2	4.2	4.2	0.3	0.5
Expected return on plan assets	(0.9)	(1.2)	—	—	(3.3)	(3.6)	—	—
Settlement/curtailment	0.2	0.1	—	—	0.6	0.9	—	—
Net amortization	0.4	0.4	(0.4)	(0.4)	0.7	1.0	(1.0)	(1.0)
Net periodic benefit cost	\$2.5	\$3.4	\$(0.3)	\$(0.2)	\$8.6	\$10.6	\$(0.6)	\$(0.4)

During the year-to-date periods ended September 29, 2018 and September 30, 2017, approximately \$0.3 million and \$0.9 million of pretax expense, respectively, were reclassified from other comprehensive income to a component of net periodic benefit cost. As they relate to non-U.S. plans, the Company uses current exchange rates to make these reclassifications. The impact of exchange rate fluctuations is included on the net amortization line of the table above. The Company included \$1.5 million and \$2.0 million related to the components of net periodic benefit cost, excluding service cost, in other expense in the year-to-date periods ended September 29, 2018 and September 30, 2017, respectively.

Note 14: Income Taxes

The effective tax rates for the third quarter and year-to-date periods of 2018 were 31.6 percent and 32.1 percent compared with 44.3 percent and 43.4 percent for the comparable 2017 periods. The tax rate for the second quarter of 2018 was 28.1 percent. The increase in the rate from the second quarter to the third quarter of 2018, was the result of a change in the mix of income and an increase in the estimated valuation allowance needed for certain deferred tax assets that were partially offset by actions taken by the Company resulting in a reduction of the estimated full-year provision for the Global Intangible Low-Taxed income (GILTI) tax.

The Company continues to evaluate the impact of the GILTI provisions under the newly enacted U.S. Tax Cuts and Jobs Act of 2017 (Tax Act) which are complex and subject to continuing regulatory interpretation by the U.S. Internal Revenue Service (“IRS”). The Company is required to make an accounting policy election of either (1) treating taxes due on future U.S. inclusions in taxable income related to GILTI as a current period expense when incurred (the “period cost method”) or (2) factoring such amounts into the Company’s measurement of its deferred taxes (the “deferred method”). The Company’s accounting policy election with respect to the new GILTI Tax rules will depend, in part, on further guidance issued by the IRS, and on analyzing its global income to determine whether it can reasonably estimate the tax impact. While the Company has included an estimate of GILTI in its estimated effective tax rate for 2018, it has not completed its analysis and is not yet able to determine which method to elect. Adjustments related to

the amount of GILTI Tax recorded in its Consolidated Financial Statements may be required based on the outcome of this election.

Table of Contents

TUPPERWARE BRANDS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

As of September 29, 2018 and December 30, 2017, the Company's accrual for uncertain tax positions was \$14.9 million and \$19.8 million, respectively. The decrease in the accrual for uncertain tax positions was primarily due to expired statute of limitation and audit closures in various jurisdictions. The Company estimates that as of September 29, 2018, approximately \$14.6 million of the unrecognized tax benefits, if recognized, will impact the effective tax rate. Interest and penalties related to uncertain tax positions in the Company's global operations are recorded as a component of the provision for income taxes. Accrued interest and penalties were \$6.7 million and \$7.3 million as of the periods ended September 29, 2018 and December 30, 2017, respectively.

The Company estimates that it may settle one or more audits in the next twelve months that may result in cash payments decreasing the amount of accrual for uncertain tax positions by up to \$2.0 million. For the remaining balance as of September 29, 2018, the Company is not able to reliably estimate the timing or ultimate settlement amount. While the Company does not currently expect material changes, it is possible that the amount of unrecognized benefit with respect to the uncertain tax positions will significantly increase or decrease related to audits in various foreign jurisdictions that may conclude during that period or new developments that could also, in turn, impact the Company's assessment relative to the establishment or reversal of valuation allowances against certain existing deferred tax assets. These valuation allowances relate to tax assets in jurisdictions where it is management's best estimate that there is not a greater than 50 percent probability that the benefit of the assets will be realized in the associated tax returns. The likelihood of realizing the benefit of deferred tax assets is assessed on an ongoing basis. This assessment requires estimates as to future operating results, as well as an evaluation of the effectiveness of the Company's tax planning strategies. At this time, the Company is not able to make a reasonable estimate of the range of impact on the balance of unrecognized tax benefits or the impact on the effective tax rate related to these items.

Note 15: Statement of Cash Flow Supplemental Disclosure

Under the Company's stock incentive programs, in certain jurisdictions, employees are allowed to use shares retained by the Company to satisfy minimum statutorily required withholding taxes. In the year-to-date periods ended September 29, 2018 and September 30, 2017, 22,494 and 9,256 shares, respectively, were retained to fund withholding taxes, with values totaling \$1.1 million and \$0.6 million, respectively, which were included as stock repurchases in the Condensed Consolidated Statements of Cash Flows.

Restricted cash is recorded in either prepaid and other current assets or in long-term other assets.

Note 16: Stock Based Compensation

Stock option activity for 2018 is summarized in the following table:

	Shares subject to option	Weighted average exercise price per share	Aggregate intrinsic value (in millions)
Outstanding at December 30, 2017	3,045,316	\$ 58.96	
Granted	69,736	47.05	
Expired / Forfeited	(6,594)	58.12	
Exercised	(19,047)	25.46	
Outstanding at September 29, 2018	3,089,411	\$ 58.90	\$ —
Exercisable at September 29, 2018	1,784,764	\$ 59.92	\$ —

The intrinsic value of options exercised totaled \$0.4 million and \$4.0 million for the year-to-date periods of 2018 and 2017, respectively, and was not material in the third quarters of 2018 and 2017.

Table of ContentsTUPPERWARE BRANDS CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(Unaudited)

The Company also has time-vested, performance-vested and market-vested share awards. The activity for such awards in 2018 is summarized in the following table:

	Shares outstanding	Weighted average grant date fair value
December 30, 2017	635,507	\$ 58.59
Time-vested shares granted	57,420	43.55
Market-vested shares granted	24,571	63.48
Performance shares granted	92,621	50.51
Performance share adjustments	(97,084)	53.99
Vested	(95,406)	70.97
Forfeited	(36,458)	59.02
September 29, 2018	581,171	\$ 54.73

Compensation expense related to the Company's stock-based compensation for the third quarter and year-to-date periods ended September 29, 2018 and September 30, 2017 were as follows:

(In millions)	Third Quarter		Year-to-Date	
	2018	2017	2018	2017
Stock options	\$0.9	\$0.7	\$ 2.6	\$ 2.2
Time, performance and market vested share awards	2.8	4.2	8.1	11.9

As of September 29, 2018, total unrecognized stock-based compensation expense related to all stock based awards was \$18.3 million, which is expected to be recognized over a weighted average period of 1.7 years.

Note 17: Allowance for Long-Term Receivables

As of September 29, 2018, \$17.2 million of long-term receivables from both active and inactive customers were considered past due, the majority of which were reserved through the Company's allowance for uncollectible accounts. The balance of the allowance for long-term receivables as of September 29, 2018 was as follows:

(In millions)	
Balance at December 30, 2017	\$ 16.5
Write-offs	(0.5)
Provision and reclassifications	2.1
Currency translation adjustment	(0.3)
Balance at September 29, 2018	\$ 17.8

Note 18: Guarantor Information

The Company's payment obligations under its senior notes due in 2021 are fully and unconditionally guaranteed, on a senior secured basis, by Dart Industries Inc. (the "Guarantor"). The guarantee is secured by certain "Tupperware" trademarks and service marks owned by the Guarantor.

Condensed consolidated financial information as of September 29, 2018 and December 30, 2017 and for the quarter and year-to-date periods ended September 29, 2018 and September 30, 2017 for the Company (the "Parent"), the Guarantor and all other subsidiaries (the "Non-Guarantors") is as follows.

Table of Contents

TUPPERWARE BRANDS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

Each entity in the consolidating financial information follows the same accounting policies as described in the consolidated financial statements, except for the use by the Parent and Guarantor of the equity method of accounting to reflect ownership interests in subsidiaries that are eliminated upon consolidation. The Guarantor is 100% owned by the Parent, and there are certain entities within the Non-Guarantors' classification that the Parent owns directly. There are no significant restrictions on the ability of either the Parent or the Guarantor to obtain adequate funds from their respective subsidiaries by dividend or loan that should interfere with their ability to meet their operating needs or debt repayment obligations.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

Note 19: New Accounting Pronouncements

In August 2018, the FASB issued an amendment to existing guidance on the accounting for implementation, setup, and other upfront costs incurred in a cloud computing arrangement that is hosted by the vendor that is a service contract. Under the amendment, the requirement for capitalizing implementation costs incurred in a hosting environment that is a service contract is aligned with the requirements for capitalizing implementation costs incurred for an internal-use software license. This guidance is effective for fiscal years beginning after December 15, 2019, and interim periods within those fiscal years. Early adoption is permitted. The Company does not expect the adoption of this amendment to have a significant impact on the Company's Consolidated Financial Statements.

In August 2018, the FASB issued an amendment to existing guidance on disclosure requirements for employers that sponsor defined benefit pension or other postretirement plans. Under the amendment, the entity is required to disclose the weighted-average interest crediting rates used, reasons for significant gains & losses affecting the benefit obligation and an explanation of any other significant changes in the benefit obligation or plan assets. The amendment also removed certain required disclosures that no longer are considered cost beneficial. This guidance is effective for fiscal years beginning after December 15, 2020. Early adoption is permitted. The Company is currently evaluating the impact of the adoption of this amendment on its disclosure and does not expect any impact on its Consolidated Financial Statements.

In August 2018, the FASB issued an amendment to existing guidance on disclosure requirements on fair value measurement as part of its broader disclosure framework project, which aims to improve the effectiveness of disclosures in the notes to financial statements. Under this amendment, certain disclosure requirements for fair value measurement were eliminated, modified and added. This guidance is effective for fiscal years beginning after December 15, 2019, and interim periods within those fiscal years. Early adoption of either the entire standard or only the provisions that eliminate or modify requirements is permitted. The Company is currently evaluating the impact of the adoption of this amendment on its Consolidated Financial Statements.

In February 2018, the FASB issued an amendment to existing guidance on reclassification of certain tax effects from Accumulated Other Comprehensive Income. Under the amendment, the stranded tax effects resulting from the Tax Act are to be reclassified from accumulated other comprehensive income to retained earnings. This guidance is effective for fiscal years beginning after December 15, 2018, and interim periods within those fiscal years. Early adoption is permitted. The Company is currently evaluating the impact of the adoption of this amendment on its Consolidated Financial Statements.

In August 2017, the FASB issued an amendment to existing guidance on hedge accounting. Under the amendment, the impact of both the effective and ineffective components of a hedging relationship is required to be recorded in the same income statement line as the item being hedged. After initial qualification, a qualitative assessment of effectiveness is permitted instead of a quantitative test for certain hedges. This guidance is effective for fiscal years beginning after December 15, 2018, and interim periods within those fiscal years. Early adoption is permitted. The Company estimates that based on how it has operated historically between \$7 million and \$10 million in annual interest expense would have been reclassified into other line items of the Consolidated Statement of Income if the provisions of this amendment had been followed in prior years.

In February 2016, the FASB issued an amendment to existing guidance on lease accounting that requires the assets and liabilities arising from operating leases be presented in the balance sheet. This guidance is effective for fiscal years beginning after December 15, 2018. Early adoption is permitted. In July 2018, the FASB added a transition option that allows entities to not apply the new standard in the comparative periods presented in the financial statements. The Company is in the process of gathering information to enable adoption, and identifying changes to its business processes and controls to support required reporting. As part of this, the Company is evaluating the specific impact of the adoption of this amendment on its Consolidated Financial Statements, though it does expect a significant increase in both assets and liabilities upon adoption due to recognition of right of use assets and related liabilities.

Note 16 to Consolidated Financial Statements included in the Company's 2017 Annual Report on Form 10-K provides

further details regarding the Company's undiscounted minimum rental commitments under non-cancelable operating leases.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following is a discussion of the results of operations for the 13 and 39 weeks ended September 29, 2018, compared with the 13 and 39 weeks ended September 30, 2017, and changes in financial condition during the 39 weeks ended September 29, 2018.

The Company's primary means of distributing its products is through independent sales organizations and individuals, which in many cases are also its customers. The vast majority of the Company's products are, in turn, sold to end consumers who are not members of its sales force. The Company is largely dependent upon these independent sales organizations and individuals to reach end consumers, and any significant disruption of this distribution network would have a negative financial impact on the Company and its ability to generate sales, earnings and operating cash flows. The Company's primary business drivers are the size, activity, diversity and productivity of its independent sales organizations.

As the impacts of foreign currency translation are an important factor in understanding period-to-period comparisons, the Company believes the presentation of results on a local currency basis, as a supplement to reported results, helps improve readers' ability to understand the Company's operating results and evaluate performance in comparison with prior periods. The Company presents local currency information that compares results between periods as if current period exchange rates had been used to translate results in the prior period. The Company uses results on a local currency basis as one measure to evaluate performance. The Company generally refers to such amounts as calculated on a "local currency" basis, or "excluding the impact of foreign currency." These results should be considered in addition to, not as a substitute for, results reported in accordance with generally accepted accounting principles in the United States ("GAAP"). Results on a local currency basis may not be comparable to similarly titled measures used by other companies.

Effective in the fourth quarter of 2017, in connection with the closure of its Beauticontrol business, the Company changed its segment reporting. The change was to combine its previous Beauty North America and Tupperware North America segments into one North America segment. Comparable information from all historical periods presented has been revised to conform with the new presentation.

The Company defines established market economies as those in Western Europe (including Scandinavia), Australia, Canada, Japan, New Zealand, and the United States. All other countries are classified as having emerging market economies.

pppercentage points

Reported sales decreased 10 percent compared with the third quarter of 2017. Excluding the impact of changes in foreign currency exchange rates, sales decreased 2 percent. Excluding a 3 percentage point negative impact from the closure of Beauticontrol in 2017 and the combination of the NaturCare and Tupperware businesses in Japan as of the beginning of 2018, sales were even in local currency. The Company's businesses operating in emerging market economies increased sales in local currency by 2 percent. The significant sales increases were in China, Tupperware Mexico and Tupperware South Africa. The most significant sales decrease was in Indonesia. Local currency sales in the Company's businesses that operate in established economy markets, as a group, decreased 11 percent, primarily driven by the impact from the closure of Beauticontrol in 2017, as well as sales decreases in Tupperware Australia and New Zealand, France and Italy. The most significant sales increase was in Germany, from a significant business-to-business arrangement.

In the third quarter, operating income decreased 2 percent and net income increased 24 percent. Excluding the impact of changes in foreign currency exchange rates, operating and net income increased 17 percent and 60 percent, respectively. The increases primarily reflected lower re-engineering costs, in connection with the Company's restructuring plan announced in July 2017, and lower corporate costs. Net income was also positively impacted by a lower income tax rate.

Reported sales for the year-to-date period decreased 6 percent. Excluding the impact of changes in foreign currency exchange rates, sales decreased 4 percent. Excluding a 2 percentage point negative impact from the closure of Beauticontrol in 2017 and the combination of the businesses in Japan, sales were down 2 percent in local currency. The factors impacting the year-to-date sales comparisons were largely the same as those impacting the third quarter, except in Germany, which had a significant decline in sales year-to-date. The net income comparisons were similar to those impacting the third quarter comparisons, along with the benefit in 2018 of not having the \$62.9 million impairment of goodwill related to Fuller Mexico that was recorded in the second quarter of 2017, as well as higher income taxes on increased pretax income versus 2017.

Net cash flow from operating activities for the periods ending September 29, 2018 and September 30, 2017 were inflows of \$13.6 million and \$82.0 million, respectively. The unfavorable comparison was primarily due to higher cash outflows related to accounts payable and accrued liabilities, most significantly related to amounts due at the beginning versus end of the periods for non-income taxes and amounts due for recurring purchases in light of a lower level of business in certain units. Lower profit by the segments and higher amounts paid in connection with the Company's re-engineering program announced in 2017, most significantly in connection with the French supply chain facility also negatively impacted the year-over-year comparison.

Table of Contents

Net Sales

Reported sales decreased 10 percent in the third quarter. Excluding the impact of changes in foreign currency exchange rates, sales decreased 2 percent. Excluding a 3 percentage point negative impact from the closure of Beauticontrol in 2017 and the combination of the businesses in Japan, sales were even in local currency. The average impact of higher prices was 2 percent.

The Company's emerging market units accounted for 72 percent and 71 percent of sales in the third quarters of 2018 and 2017, respectively. In 2018, reported sales in these units decreased \$33.6 million, or 9 percent, which included a negative \$39.0 million impact from foreign currency exchange rates. Excluding the impact of changes in foreign currency exchange rates, sales increased 2 percent. The most significant local currency sales increase was in China due to the net addition of experience studios. Other units with meaningful increases were Tupperware Mexico due to higher prices and Tupperware South Africa from more active sellers in connection with higher sales force additions. The sales growth in these units was partially offset by Indonesia, from a smaller sales force due to lower additions. The average impact of higher prices in the emerging market units was 2 percent.

Reported sales in the established market units decreased 13 percent. Excluding a negative \$2.7 million impact of changes in foreign currency exchange rates, sales decreased 11 percent, which included a negative 9 percent impact from the Beauticontrol closure and the combination of the businesses in Japan. The local currency sales decrease was mainly due to lower productivity in Tupperware Australia and New Zealand and lower core business sales in Germany, as well as in France and Italy, due to less active sellers from lower sales force additions. These decreases were partially offset by the benefit of significant business-to-business sales in Germany. While the Company actively pursues business-to-business opportunities, sales from this channel are based on reaching agreements with business partners and their product needs, along with consideration of how the arrangements will be integrated with the Company's primary sales channel. Consequently, activity in one period may not be indicative of future trends. The impact of changes in pricing in the established market units was 1 percent.

On a year-to-date basis, emerging markets accounted for 71 percent and 69 percent of total Company sales in 2018 and 2017, respectively. Total sales on a reported basis in the emerging markets decreased \$42.0 million or 4 percent, including a negative \$54.4 million impact from changes in foreign currency exchange rates. Excluding the impact of changes in foreign currency exchange rates, sales increased in these units by 1 percent. Total sales on a reported basis in the established markets decreased \$61.4 million, or 12 percent, for the year-to-date period of 2018, compared with the same period of 2017, which included a positive \$18.7 million impact from changes in foreign currency exchange rates. Excluding the impact of changes in foreign currency exchange rates, sales decreased in these units by 15 percent, which included a negative 6 percent impact from the Beauticontrol closure and the combination of the businesses in Japan. The sources of the year-to-date fluctuations largely followed those of the third quarter comparison, except in Germany, which had a significant decline in sales year-to-date.

Compared with historical accounting under the previous guidance, the Company estimates revenue would have been \$2 million higher and \$4 million lower in the third quarter and the year-to-date period of 2018, respectively.

A more detailed discussion of the sales results by reporting segment is included in the segment results section in this Part I, Item 2.

As discussed in Note 3 to the Consolidated Financial Statements in Part I, Item 1 of this Report, the Company includes certain promotional costs in delivery, sales and administrative expense (DS&A). As a result, the Company's net sales may not be comparable with other companies that treat these costs as a reduction of revenue.

Table of Contents**Gross Margin**

Gross margin as a percentage of sales was 66.2 percent and 66.1 percent in the third quarters of 2018 and 2017, respectively. The increase of 0.1 percentage point ("pp") primarily reflected lower obsolescence expense (0.7 pp), a benefit from the Beauticontrol closure (0.3 pp), less of an impact from inventory in Argentina and Venezuela being included in cost of goods sold in 2018 at its stronger, historical exchange rate rather than the rate used to translate its sales compared with the impact in 2017 (0.2 pp), a favorable mix impact from relatively higher sales in certain units with higher than average gross margins (0.1 pp) and a positive translation impact of changes in foreign currency exchange rates (0.1 pp). This was partially offset by the impact of higher resin costs (0.5 pp), an unfavorable mix of products sold and increased sales incentives, mainly in Brazil (0.4 pp), and higher manufacturing costs, net of re-engineering program benefits (0.4 pp).

For the year-to-date periods, gross margin as a percentage of sales was 67.0 percent in 2018, compared with 67.4 percent for the same period of 2017. The factors leading to the 0.4 pp decrease primarily reflected an unfavorable mix of products sold and increased sales incentives, mainly in Brazil and Europe (0.6 pp), higher manufacturing costs, mainly in Europe and South America (0.4 pp) and higher resin costs (0.4 pp). This was partially offset by lower obsolescence expense (0.4 pp), favorable mix impact from relatively higher sales in certain units with higher than average gross margins (0.3 pp), a positive translation impact of changes in foreign currency exchange rates (0.2 pp) and less of an impact from inventory in Argentina and Venezuela being included in cost of goods sold in 2018 at its stronger, historical exchange rate rather than the rate used to translate its sales compared with the impact in 2017 (0.1 pp).

As discussed in Note 2 to the Consolidated Financial Statements in Part I, Item 1 of this Report, the Company includes costs related to the distribution of its products in DS&A. As a result, the Company's gross margin may not be comparable with other companies that include these costs in costs of products sold.

Costs and Expenses

DS&A as a percentage of sales was 52.1 percent in the third quarter of 2018, compared with 52.5 percent in 2017. The comparison reflected lower administrative expenses, mainly in Brazil and Corporate, primarily due to lower expense for management incentives (1.4 pp), a favorable mix impact from relatively higher sales in certain units with lower than average DS&A (0.8 pp) and more efficient promotional spending, primarily in Brazil and Germany, due to the contribution from business-to-business sales (0.8 pp). This was partially offset by a negative impact from the translation effect of changes in foreign currency exchange rates (1.1 pp), higher distribution costs, mainly in Brazil, Europe and Tupperware United States and Canada (0.7 pp), increased commissions, primarily in Japan and the Philippines (0.4 pp) and higher bad debt expense, including distributor financing costs, mainly in France (0.4 pp).

For the year-to-date periods, DS&A as a percentage of sales decreased to 52.1 percent from 52.8 percent in 2017, primarily reflecting lower administrative expenses, mainly in Brazil and Corporate, primarily due to lower expense for management incentives (0.9 pp), a favorable mix impact from relatively higher sales in certain units with lower than average DS&A (0.7 pp) and more efficient promotional spending primarily in Brazil and Fuller Mexico (0.7 pp) and a favorable impact of the 2017 closure of Beauticontrol, which had higher than average DS&A as a percentage of sales (0.3 pp). This was partially offset by higher distribution costs, mainly in Brazil, Europe and Tupperware United States and Canada (0.7 pp), increased commissions primarily in Japan and Europe (0.4 pp), a negative impact from the translation effect of changes in foreign currency exchange rates (0.3 pp) and higher bad debt expense, mainly in France (0.5 pp).

Specific segment impacts are discussed in the segment results section in this Part I, Item 2.

Table of Contents

Re-engineering Costs

Refer to Note 7 to the Consolidated Financial Statements in Part I, Item 1 of this Report, for a discussion of re-engineering activities and accruals.

The Company recorded \$3.0 million and \$9.0 million in re-engineering charges during the third quarters of 2018 and 2017, respectively.

In 2018 and 2017, the re-engineering and impairment charges incurred were primarily related to severance costs and restructuring actions taken in connection with the Company's plans, through 2019, to rationalize its supply chain and to adjust the cost base of several marketing units. The restructuring charges also relate to the Company's decision to wind-down the Beauticontrol reporting unit in 2017. In the year-to-date periods of 2018 and 2017, the Company recorded \$1.0 million and \$3.2 million, respectively, in cost of sales for inventory obsolescence in connection with its re-engineering program.

Under the Company's re-engineering program announced in July 2017, it expects to incur a total of \$90 to \$100 million in pretax costs, of which \$78 million has been recorded starting in the second quarter of 2017 through the third quarter of 2018. The Company expects to incur an additional \$3 million of pretax re-engineering costs in the remainder of 2018. The Company's estimates reflect that about 65 percent of the total program cost will relate to severance and benefits, while the balance will predominantly relate to costs to exit leases and other contracts, mainly related to wind-down of Beauticontrol and closure of the French manufacturing facility, as well as the write-off of excess assets for which there are not expected to be disposal proceeds. Cash outflows associated with the overall program are expected to total \$80 to \$90 million, including \$44 million paid through the third quarter of 2018, and an additional \$11 million expected to be paid in the remainder of 2018. Both the cost and cash flow are before related asset sales that could bring proceeds of up to \$35 to \$45 million over time, including \$28 million received in connection with the sale of assets in the first half of 2018. The annualized benefit of these actions, once fully implemented, is estimated to be \$35 million with a small amount realized in 2017, about two-thirds of the annualized benefit to be realized in 2018, mainly in the second half, and the remainder in 2019 or 2020. While the expected savings are being realized, other factors are more than offsetting these amounts in the second half of 2018. The benefits realized in 2018 will be reflected most significantly through lower cost of products sold than would otherwise be achieved, as well as through lower DS&A.

Goodwill and Indefinite-lived Intangible Assets

The Company's goodwill and intangible assets relate primarily to the December 2005 acquisition of the direct-to-consumer businesses of Sara Lee Corporation. In the third quarters of 2018 and 2017, the Company completed the annual assessments for all of its reporting units and indefinite-lived intangible assets, concluding there were no impairments.

In the second quarter of 2017, as part of its on-going assessment of goodwill and intangible assets, the Company noted that the sales, profitability and cash flow of Fuller Mexico had fallen below their recent trend lines and were expected to fall significantly short of previous expectations for the year. As a result, the Company performed an interim impairment test as of the end of May 2017, recording an impairment charge of \$62.9 million. The remaining goodwill in Fuller Mexico is \$17.8 million.

The estimated fair value of Fuller Mexico equaled its carrying value as of May 2017 in light of the impairment charge recorded at that time. Having the carrying value equal the fair value represents an elevated future risk of future impairment. Since May 2017, Fuller Mexico's local currency sales and cash flows have exceeded those projected in the May 2017 step 1 valuation, which has significantly reduced the risk of impairment at Fuller Mexico.

Table of Contents

Net Interest Expense

Net interest expense was \$10.7 million in the third quarter of 2018, the same as in 2017. There was a decrease in interest expense related to forward points from the Company's hedging activities that was offset by the impact of higher average borrowings in the year-over-year comparisons.

Tax Rate

The effective tax rates for the third quarter and year-to-date periods of 2018 were 31.6 percent and 32.1 percent compared with 44.3 percent and 43.4 percent for the comparable 2017 periods. The tax rate for the second quarter of 2018 was 28.1 percent. The increase in the rate from the second quarter to the third quarter of 2018, was the result of a change in the mix of income and an increase in the estimated valuation allowance needed for certain deferred tax assets that were partially offset by actions taken by the Company resulting in a reduction of the estimated full-year provision for the Global Intangible Low-Taxed income (GILTI) tax.

The Company continues to evaluate the impact of the GILTI provisions under the Tax Act, which are complex and subject to continuing regulatory interpretation by the IRS. The Company is required to make an accounting policy election of either (1) treating taxes due on future U.S. inclusions in taxable income related to GILTI as a current period expense when incurred or (2) factoring such amounts into the Company's measurement of its deferred taxes. The Company's accounting policy election with respect to the new GILTI Tax rules will depend, in part, on further guidance issued by the IRS, and on analyzing its global income to determine whether it can reasonably estimate the tax impact. While the Company has included an estimate of GILTI in its estimated effective tax rate for 2018, it has not completed its analysis and is not yet able to determine which method to elect. Adjustments related to the amount of GILTI Tax recorded in its Consolidated Financial Statements may be required based on the outcome of this election.

As discussed in Note 14 to the Consolidated Financial Statements in Part I, Item 1 of this Report, the Company's uncertain tax positions increase the potential for volatility in its tax rate. As such, it is reasonably possible that the effective tax rates in any individual quarter will vary from the full year expectation. At this time, the Company is unable to estimate what impact that may have on any individual quarter.

Net Income

Net income increased \$7.7 million in the third quarter of 2018 compared with 2017, which included a \$7.0 million negative impact on the comparison from changes in foreign currency exchange rates. The increase primarily reflected the \$6.0 million lower pre-tax re-engineering costs in connection with the Company's restructuring plan announced in July 2017, lower corporate costs and lower income tax expense versus 2017.

For the year-to-date period, net income increased \$77.5 million, compared with 2017, including a negative \$6.3 million translation impact from changes in foreign currency exchange rates. The factors impacting the comparison were largely the same as for the quarter including a much bigger decrease in pretax re-engineering costs, along with the absence of a \$62.9 million impairment of goodwill related to Fuller Mexico that was recorded in the second quarter of 2017, and higher income taxes on increased pretax income versus 2017.

A more detailed discussion of the sales results by reporting segment is included in the segment results section below in this Part I, Item 2.

International operations generated 92 percent and 91 percent of sales in the third quarter and year-to-date periods of 2018 and 2017, respectively. These units generated 98 percent and 100 percent of net segment profit in the third quarter of 2018 and 2017, respectively, and 97 percent and 98 percent in the year-to-date periods of 2018 and 2017, respectively.

The sale of beauty products generated 14 percent of sales in the third quarter and year-to-date periods of 2018, and 16 percent and 15 percent in the third quarter and year-to-date period of 2017, respectively.

Reported sales increased 1 percent compared with the third quarter of 2017. Excluding the impact of changes in foreign currency exchange rates, sales increased 6 percent compared with the third quarter of 2017, reflecting higher sales in the segment's emerging market units. On average, the impact of changes in pricing was 1 percent in the third quarter of 2018. Due to the new revenue recognition guidance adopted in 2018, there was a 1 percentage point negative impact in the third quarter of 2018.

Emerging markets accounted for \$49.7 million and \$47.7 million, or 44 percent and 43 percent of the reported sales in the segment in the third quarters of 2018 and 2017, respectively. Excluding the impact of changes in foreign currency exchange rates, the emerging market units' sales increased by 13 percent, primarily reflecting more active sellers from higher additions in Tupperware South Africa and Commonwealth of Independent States (CIS), as well as enhanced merchandising in Tupperware South Africa.

The established market units' reported sales decreased 1 percent. Excluding the impact of changes in foreign currency exchange rates, these units were even, reflecting the benefit of relatively large business-to-business sales in Germany, offset by lower core business sales in Germany, as well as in France and Italy, due to less active sales forces in connection with lower sales force additions.

Segment profit increased \$3.4 million in the third quarter of 2018 versus 2017. Excluding the impact of changes in foreign currency exchange rates, segment profit increased \$3.0 million, reflecting higher sales with improved gross margin, profitability on the increased business-to-business sales, lower promotional spending and reduced operating costs from the Company's re-engineering efforts beginning in 2017.

On a year-to-date basis, reported sales decreased 2 percent compared with 2017. Excluding the impact of changes in foreign currency exchange rates, sales in 2018 were down 6 percent compared with 2017. The decrease was primarily due to lower volumes in the segment's established markets.

Table of Contents

Year-to-date segment profit decreased 3 percent on a reported basis, and was down 13 percent in local currency. The decrease was primarily due to the lost contribution margin, in light of lower sales in the first half of 2018, most significantly in France and Germany, as well as higher bad debt expense in France.

The South African rand and the Turkish lira impacted the third quarter year-over-year sales comparison. The euro impacted the year-to-date sales and profit comparison.

pppercentage points

Reported sales decreased 8 percent compared with the third quarter of 2017. Excluding the impact of changes in foreign currency exchange rates, sales decreased 4 percent. On average, prices were even in the third quarter compared with 2017.

Emerging markets accounted for \$149.2 million and \$157.9 million, or 88 percent and 86 percent of reported sales in the third quarters of 2018 and 2017, respectively. Excluding the negative \$5.9 million impact from changes in foreign currency exchange rates, sales in these units decreased 2 percent compared with 2017. The most significant decrease was in Indonesia from less active sellers from lower sales force additions and poor response to the Company's product and promotional programs. India also had lower sales due to a less productive, smaller sales force from lower additions. This was partially offset by China, primarily related to the net addition of experience studios. China ended the quarter with 6,700 experience studios, which was 14 percent more than at the end of the third quarter of 2017. The units operating in the established markets decreased 22 percent and 17 percent in reported and local currency sales, respectively, primarily reflecting lower sales force productivity in Tupperware Australia and New Zealand and the combination of the Tupperware and NaturCare businesses in Japan as of the beginning of 2018.

Segment profit decreased 12 percent compared with the third quarter of 2017. Excluding the impact of changes in foreign currency exchange rates, segment profit was down 9 percent compared with 2017, primarily reflecting the drop-through on lower sales, along with increased spending to boost sales force additions and activity in Indonesia and Tupperware Australia and New Zealand. The decrease was partially offset by increased profit on higher sales in China.

On a year-to-date basis, reported sales decreased 4 percent compared with the same period of 2017. Excluding the impact of foreign currency exchange rates, sales decreased 5 percent compared with 2017. Local currency sales and

segment profit variances largely mirrored those of the quarter.

34

Table of Contents

The Chinese renminbi and the Indonesian rupiah had the most meaningful impact on year-over-year sales and profit comparisons.

pppercentage points

Reported sales in the third quarter of 2018 decreased 11 percent compared with the third quarter of 2017. Excluding the impact of changes in foreign currency exchange rates, sales decreased 9 percent. Also excluding a 10 percentage point negative impact from the closure of Beauticontrol in 2017, sales increased 1 percent in local currency. The average impact of higher prices was 4 percent. Due to the new revenue recognition guidance adopted in 2018, there was a 1 percentage point negative impact in the third quarter of 2018.

Emerging markets accounted for \$72.0 million and \$74.1 million, or 58 percent and 53 percent of the reported sales in the segment in the third quarters of 2018 and 2017, respectively. On a local currency basis, the emerging market units' sales increased 2 percent, primarily reflecting higher prices.

The established markets' reported sales decreased 21 percent. Excluding the impact from the closure of Beauticontrol, sales decreased 3 percent due to a less active sales force in the United States and Canada.

Reported segment profit increased 12 percent in the third quarter of 2018. Excluding the impact of foreign currency exchange rates, profit increased 18 percent, reflecting the absence of the 2017 loss by Beauticontrol, and higher drop-through from higher sales in Tupperware Mexico.

Year-to-date reported and local currency sales decreased 4 percent. This included an 8 percentage point negative impact from the closure of Beauticontrol in 2017, and a 1 percentage point positive impact from changes in revenue recognition due to the new guidance adopted in 2018. Year-to-date reported and local currency segment profit increased 13 percent and 15 percent, respectively. Local currency sales variances largely mirrored those of the quarter, except in the United States and Canada, which had an increase in sales year-to-date. Segment profit variances largely mirrored those of the quarter, along with the absence of the 2017 loss by Beauticontrol.

The Mexican peso was the main foreign currency that impacted the year-over-year comparisons.

pppercentage points

Reported sales for the segment decreased 24 percent in the third quarter of 2018. Excluding the impact of changes in foreign currency exchange rates, sales increased 1 percent, mainly from higher prices due to inflation, partially offset by lower sales force activity and productivity in Brazil reflecting knock-on effects from political and macro-economic instability that included a 10-day road blockade by truck drivers in May 2018. The average impact of higher prices was 2 percent, mainly due to inflation in Argentina, partially offset by a higher level of promotional pricing in Brazil. Due to the new revenue recognition guidance adopted in 2018, there was a 2 percentage point positive impact in the third quarter of 2018. All of the businesses in this segment operate in emerging market economies.

Reported segment profit decreased \$8.0 million or 34 percent in the third quarter of 2018. Excluding the impact of changes in foreign currency exchange rates, segment profit decreased 11 percent, reflecting the impact on product cost in Brazil of lower production volume and of addressing product availability connected with a customs strike there and elevated costs from inflation in Argentina. This was partially offset by \$1.1 million less of an impact from inventory in Argentina and Venezuela being included in cost of goods sold in 2018 at its stronger, historical exchange rate rather than the rate used to translate its sales compared with the impact in 2017.

The year-to-date sales and profit comparisons largely mirrored the quarter.

The Argentine peso, the Brazilian real and the Venezuelan bolivar had the most significant impacts on the year-over-year sales and profit comparisons.

Inflation in Argentina has been at relatively high levels over the past several years. The Company uses a blended index of the Consumer Price Index and National Consumer Price Index for determining highly inflationary status in Argentina. This blended index is expected to reach cumulative three-year inflation in excess of 100 percent in 2018. The Company transitioned to highly inflationary status for Argentina as of July 1, 2018. Gains and losses resulting from the translation of monetary assets in the financial statements of subsidiaries operating in highly inflationary economies are recorded in earnings. As of the September 29, 2018, the Company had approximately \$0.1 million of net monetary liabilities in Argentina, which are of a nature that will generate income or expense for the change in value associated with exchange rate fluctuations versus the U.S. dollar.

Table of Contents

Financial Condition

Liquidity and Capital Resources: The Company's net working capital position decreased by \$125.2 million compared with the end of 2017. Excluding the impact of changes in foreign currency exchange rates, working capital decreased \$106.7 million, primarily reflecting a \$213.2 million increase in short-term borrowings, net of cash and cash equivalents partially offset by a \$36.1 million net decrease in accounts payable and accrued liabilities due to the timing of payments around year-end, as well as payments during the year under the Company's restructuring program, a \$37.8 million increase in inventory, related to expectations for future sales and lower than expected sell through, a \$22.6 million increase in accounts receivable due to the level and timing of sales around the end of each period, as well as increased past dues, and a \$1.8 million increase related to amounts on the balance sheet for hedging activities. The Company continues to carry debt in connection with the \$600 million senior notes due in 2021.

As of September 29, 2018, the Company had total borrowings of \$330.7 million outstanding under its Credit Agreement, including \$250.6 million denominated in euro.

Loans taken under the Credit Agreement bear interest under a formula that includes, at the Company's option, one of three different base rates, plus an applicable spread. The Company normally chooses LIBOR as its base rate. Although the Company's euro LIBOR base rate was below zero throughout the first nine months of 2018, the base rate cannot be below zero under the Credit Agreement. As of September 29, 2018, the Credit Agreement dictated a spread of 150 basis points, which gave the Company a weighted average interest rate on LIBOR-based borrowings of 2.0 percent. The Company routinely increases its revolver borrowings under the Credit Agreement during each quarter to fund operating, investing and financing activities, and uses cash available at the end of each quarter to reduce borrowing levels. As a result, the Company incurs more interest expense and has higher foreign exchange exposure on the value of its cash during each quarter than would relate solely to the quarter end cash and debt balances.

The Credit Agreement contains customary covenants, including financial covenants requiring a minimum level of interest coverage and allowing a maximum amount of leverage. As of September 29, 2018, and currently, the Company had considerable cushion under its financial covenants. However, economic conditions, adverse changes in foreign exchange rates, lower than foreseen sales, profit and/or cash flow generation, including from restructuring actions, the payment of dividends, share repurchases or the occurrence of other events discussed under "Forward Looking Statements" in this Part I, Item 3 and in the Company's other reports filed with the SEC could impact the Company's ability to comply with these covenants.

At September 29, 2018, the Company had \$350.6 million of unused lines of credit, including \$268.0 million under the committed, secured Credit Agreement, and \$82.6 million available under various uncommitted lines around the world. If necessary, with the agreement of its lenders, the Company is permitted to increase its borrowing capacity under the Credit Agreement by a total of up to \$200 million.

See Note 10 to the Consolidated Financial Statements in Part I, Item 1 of this Report for further details regarding the Company's debt.

The Company monitors the third-party depository institutions that hold its cash and cash equivalents and diversifies its cash and cash equivalents among counterparties, which minimizes exposure to any one of these entities. Furthermore, the Company is exposed to financial market risk resulting from changes in interest rates, foreign currency rates and the possible liquidity and credit risks of its counterparties. The Company believes that it has sufficient liquidity to fund its working capital, capital spending needs, current and anticipated restructuring actions, as well as its current dividend. This liquidity includes to the extent that it is accessible, its cash and cash equivalents, which totaled \$117.6 million as of September 29, 2018, cash flows from operating activities, and access to its Credit Agreement, as well as access to other various uncommitted lines of credit around the world. The Company has not experienced any limitations on its ability to access its committed facility.

Table of Contents

Cash and cash equivalents (“cash”) totaled \$117.6 million as of September 29, 2018. Of this amount, \$113.3 million was held by foreign subsidiaries. Of the cash held outside of the United States, approximately 12 percent was not eligible for repatriation due to the level of past statutory earnings by the foreign units in which the cash was held or other local restrictions. The Company is in the process of evaluating the impact of the Tax Act on its indefinite reinvestment assertion with respect to accumulated earnings of certain foreign subsidiaries. Other than for the one-time mandatory repatriation transition tax charge, no U.S. federal income taxes or foreign withholding taxes have been recorded related to earnings for which there is an indefinite reinvestment assertion. The Company expects to complete its assessment within the measurement period allowed by SAB 118 that extends to the fourth quarter of 2018, and when that assessment is completed, it is possible that additional expense will be recorded, and that amount may be significant. Withholding taxes would be due in some jurisdictions when foreign earnings are repatriated.

The Company’s most significant foreign currency exposures are to the Brazilian real, Chinese renminbi, euro, Indonesian rupiah and the Mexican peso. Business units in which the Company generated at least \$100 million of sales in 2017 included Brazil, China, Fuller Mexico, Germany, Indonesia, Tupperware Mexico and Tupperware United States and Canada. Of these units, sales by China and Tupperware United States and Canada exceeded \$200 million, while sales in Brazil exceeded \$300 million. Downturns in the Company's business in these units, including but not limited to, difficulties in making additions to, retention and activity of the Company's independent sales force or the success of new products and/or promotional programs and weakening of applicable foreign currency exchange rates versus the U.S. dollar, could adversely impact the Company's ability to generate operating cash flows.

Operating Activities: Net cash from operating activities in the year-to-date periods ended September 29, 2018 and September 30, 2017 were inflows of \$13.6 million and \$82.0 million, respectively. The unfavorable comparison was primarily due to higher cash outflows related to accounts payable and accrued liabilities, most significantly related to amounts due at the beginning versus end of the periods for non-income taxes and amounts due for recurring purchases in light of a lower level of business in certain units. Lower profit by the segments and higher amounts paid in connection with the Company's re-engineering program announced in 2017, most significantly in connection with the French supply chain facility also negatively impacted the year-over-year comparison.

Investing Activities: During the year-to-date periods ended September 29, 2018 and September 30, 2017, the Company had \$55.2 million and \$52.6 million, respectively, of capital expenditures. In both 2018 and 2017, the most significant capital expenditures were related to molds. In 2018 and 2017, capital expenditures included \$11.3 million and \$13.7 million, respectively, related to supply chain capabilities, excluding molds, and \$13.2 million and \$7.3 million, respectively, on various global information technology projects and \$7.8 million and \$5.2 million, respectively, for land development near its Orlando headquarters. There were proceeds from the sale of long-term assets of \$36.5 million and \$11.7 million in 2018 and 2017, respectively.

Financing Activities: Dividends paid to shareholders were \$104.1 million and \$103.9 million in the first nine months of 2018 and 2017, respectively. Proceeds received from the exercise of stock options were \$0.3 million and \$9.9 million in the first nine months of 2018 and 2017, respectively. The Company also increased revolver borrowings under its Credit Agreement by \$200.7 million and \$76.1 million in the first nine months of 2018 and 2017, respectively for the funding of operating, investing and financing activities.

Open market share repurchases by the Company are permitted under an authorization that runs until February 1, 2020 and allows up to \$2.0 billion to be spent. Under this program, the company repurchased 1.4 million shares for \$50.2 million in the third quarter of 2018. There were no share repurchases under this program in 2017. Since 2007, the Company has spent \$1.39 billion to repurchase 23.8 million shares under this program. Going forward, in setting share repurchase amounts, the Company expects to target, over time, a debt-to-EBITDA ratio of 1.75 times (as defined in the Company's Credit Agreement).

Repurchases under the Company’s stock incentive programs are made when employees use shares to satisfy the minimum statutorily required withholding taxes. In the first nine months of 2018 and 2017, 22,494 and 9,256 shares were retained to fund withholding taxes, totaling \$1.1 million and \$0.6 million, respectively.

New Pronouncements

Refer to Note 19 to the Consolidated Financial Statements in Part I, Item 1 of this Report for a discussion of new pronouncements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

One of the Company's market risks is its exposure to the impact of interest rate changes on its borrowings. The Company has elected to manage this risk through the maturity structure of its borrowings and the currencies in which it borrows.

Interest Rate Risk

Loans taken under the Credit Agreement are of a short duration and bear interest under a formula that includes, at the Company's option, one of three different base rates, plus an applicable spread. The Company normally chooses LIBOR as its base rate. Although the Company's euro LIBOR base rate was below zero throughout the first nine months of 2018, the base rate cannot be below zero under the Credit Agreement. As of September 29, 2018, the Credit Agreement dictated a spread of 150 basis points, which gave the Company a weighted average interest rate on its U.S. dollar and euro denominated LIBOR based borrowings under the Credit Agreement of 2.0 percent.

As of September 29, 2018, the Company had total borrowings of \$330.7 million outstanding under its Credit Agreement, with \$250.6 million denominated in euro. If short-term interest rates varied by 10 percent, which in the Company's case would mean short duration U.S. dollar and euro LIBOR, with all other variables remaining constant, the Company's annual interest expense would not be significantly impacted.

The Company routinely increases its revolver borrowings under the Credit Agreement during each quarter to fund operating, investing and financing activities, and uses cash available at the end of each quarter to reduce borrowing levels. As a result, the Company incurs more interest expense and has higher foreign exchange exposure on the value of its cash during each quarter than would relate solely to the quarter end cash and debt balances.

Foreign Exchange Rate Risk

The majority of the Company's sales and profit come from its international operations. Although these operations are geographically dispersed, which partially mitigates the risks associated with operating in particular countries, the Company is subject to the usual risks associated with international operations. These risks include local political and economic environments and relations between foreign and U.S. governments.

Another economic risk of the Company is exposure to changes in foreign currency exchange rates on the earnings, cash flows and financial position of its international operations. The Company is not able to project, in any meaningful way, the effect of these possible fluctuations on translated amounts or future earnings. This is due to the Company's constantly changing exposure to various currencies, the fact that all foreign currencies do not react in the same manner in relation to the U.S. dollar and the large number of currencies involved, although the Company's most significant income and cash flow exposures are to the Brazilian real, Chinese renminbi, euro, Indonesian rupiah, Mexican peso and South African rand.

Although this currency risk is partially mitigated by the natural hedge arising from the Company's local product sourcing in many countries, a strengthening U.S. dollar generally has a negative impact on the Company. In response to this fact, the Company uses financial instruments, such as forward contracts, to hedge its exposure to certain foreign exchange risks associated with a portion of its investment in international operations. In addition to hedging against the balance sheet impact of changes in exchange rates, the hedge of investments in international operations also has the effect of hedging cash flow generated by those operations. The Company also hedges, with these instruments, certain other exposures to various currencies arising from amounts payable and receivable, non-permanent intercompany transactions and a portion of purchases forecasted for generally up to the following 15 months. The Company does not seek to hedge the impact of currency fluctuations on the translated value of the sales, profit or cash flow generated by its operations.

While the Company's derivatives that hedge a portion of its equity in its foreign subsidiaries and its fair value hedges of balance sheet risks all work together to mitigate its exposure to foreign exchange gains or losses, they result in an impact to operating cash flows as they are settled. For the year-to-date periods ended September 29, 2018 and September 30, 2017, the cash flow impact of these currency hedges were inflows of \$3.5 million and \$5.8 million, respectively.

Table of Contents

The U.S. dollar equivalent of the Company's most significant net open forward contracts as of September 29, 2018 were to buy \$57.1 million of U.S. dollars and \$29.1 million of euros and to sell \$29.5 million of Mexican pesos. In agreements to sell foreign currencies in exchange for U.S. dollars, for example, an appreciating dollar versus the opposing currency would generate a cash inflow for the Company at settlement, with the opposite result in agreements to buy foreign currencies for U.S. dollars. The notional amounts change based upon changes in the Company's outstanding currency exposures. Based on rates existing as of September 29, 2018, the Company was in a net receivable position of approximately \$4.9 million related to its currency hedges under forward contracts. Currency fluctuations could have a significant impact on the Company's cash flow upon the settlement of its forward contracts. The Company records the impact of forward points in net interest expense.

A precise calculation of the impact of currency fluctuations is not practical since some of the contracts are between non-U.S. dollar currencies. The Company continuously monitors its foreign currency exposure and expects to enter into additional contracts to hedge exposure in the future. See further discussion regarding the Company's hedging activities for foreign currency in Note 11 to the Consolidated Financial Statements.

The Company is subject to credit risks relating to the ability of counterparties of hedging transactions to meet their contractual payment obligations. The risks related to creditworthiness and non-performance have been considered in the determination of fair value for the Company's foreign currency forward exchange contracts. The Company continues to closely monitor its counterparties and will take action, as appropriate and possible, to further manage its counterparty credit risk.

Commodity Price Risk

The Company is also exposed to rising material prices in its manufacturing operations and, in particular, the cost of oil and natural gas-based resins, including the fact that in some cases resin prices are actually in, or are based on, currencies other than that of the unit buying the resin, which introduces a currency exposure that is incremental to the exposure to changing market prices. Resins are the primary material used in production of most Tupperware® products, and the Company estimates that 2018 cost of sales will include approximately \$130 million for the cost of resin in the Tupperware® brand products it produces and has contract manufactured. The Company uses many different kinds of resins in its products. About three-fourths of the value of its resin purchases are “polyolefins” (simple chemical structure, easily refined from oil and natural gas), and as such, the price of these is typically strongly affected by the underlying price of oil and natural gas. The remaining one-fourth of the value of its resin purchases is more highly engineered, where the price of oil and natural gas plays a less direct role in determining price. With a comparable product mix and exchange rates, a 10 percent fluctuation in the cost of resin would impact the Company's annual cost of sales by approximately \$13 million compared with the prior year. In the third quarter of 2018, there was a \$2 million negative impact on its gross margin, on a local currency basis, related to sales of the Tupperware® products it produced and had contract manufactured due to resin cost changes, as compared with 2017. For full year 2018 compared with 2017, there will be an estimated \$9 million negative impact of resin cost changes, on a local currency basis, on the Company's gross margin related to sales of the Tupperware® products it produces and has contract manufactured. In addition to the impact of the price of oil and natural gas, the price the Company pays for its resins is also impacted by the relative changes in supply and demand. The Company partially manages its risk associated with rising resin costs by utilizing a centralized procurement function that is able to take advantage of bulk discounts while maintaining multiple suppliers and also enters into short-term pricing arrangements. It also manages its margin through cash flow hedges in some cases, when it purchases resin in currencies, or effectively in currencies, other than that of the purchasing unit, through the pricing of its products, with price increases on its product offerings generally in line with consumer inflation in each market, and its mix of sales through its promotional programs and promotionally priced offers. It also, on occasion, makes advance material purchases to take advantage of current favorable pricing. At this point in time, the Company has determined that entering into forward contracts for resin is not practical or cost beneficial and has no such contracts in place. However, the Company is considering using such contracts in the future.

Table of Contents

Real Estate Risk

The Company has a program to sell land held for development around its Orlando, Florida headquarters. This program is exposed to the risks inherent in the real estate development process. Included among these risks is the ability to obtain all necessary government approvals, the success of attracting tenants for commercial or residential developments in the Orlando real estate market, obtaining financing and general economic conditions, such as interest rate increases. Based on the variety of factors that impact the Company's ability to close sales transactions, it cannot predict when the program will be completed.

Data Privacy Regulations

The Company is subject to a number of U.S. federal and state and foreign laws and regulations regarding data use and privacy. Many of these laws and regulations are still evolving and being tested in courts and elsewhere, and could be interpreted in ways that could harm the Company's business. These laws and regulations involve data protection and personal information, rights of publicity, content, intellectual property, advertising, marketing, data security, and data retention and deletion. Data protection, privacy, content, and other laws and regulations can be more restrictive in certain jurisdictions than in others. U.S. federal and state and foreign laws and regulations are constantly evolving and can be subject to significant change. As a result, the application, interpretation, and enforcement of these laws and regulations are often uncertain, and may be interpreted and applied inconsistently from jurisdiction to jurisdiction, and conflict with the Company's then current policies and practices. Proposed or new legislation and regulations could also significantly affect the Company's business. There currently are a number of new regulations, as well as proposals pending before federal, state, and foreign legislative and regulatory bodies. For example, the European General Data Protection Regulation (GDPR) took effect in May 2018, and includes new operational requirements for companies that receive or process personal data of residents of the European Union (and the European Economic Area), with significant penalties for non-compliance. In addition, some countries are considering or have passed legislation implementing data protection requirements or requiring local storage and processing of data or similar requirements that could increase the cost and complexity of the Company's business operations. Violations of data privacy and use regulations could subject the Company to substantial monetary fines and other penalties that could negatively affect its financial condition and results of operations.

Forward-Looking Statements

Certain statements made or incorporated by reference in this report are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Statements that are not based on historical facts or information are forward-looking statements. Statements that include the words "believes," "expects," "anticipates," "intends," "projects," "estimates," "plans" and similar expressions or future tense or conditional verbs such as "will," "should," "would," and "could" are generally forward-looking in nature and not historical facts. Where, in any forward-looking statement, the Company expresses an expectation or belief as to future results or events, such expectation or belief is based on the current plans and expectations at the time this report is filed with the SEC or, with respect to any documents or statements incorporated by reference, on the then current plans and expectations at the time such document was filed with the SEC, or statement was made. Such forward-looking statements involve risks and uncertainties that may cause actual results to differ materially from those projected in forward-looking statements. Except as required by law, and as outlined below, the Company undertakes no obligation to update or revise any forward-looking statements to reflect changed assumptions, the occurrence of anticipated or unanticipated events, new information or changes to future results over time or otherwise. Such risks and uncertainties include, among others, the following:

- successful recruitment, retention and productivity levels of the Company's independent sales forces;
- disruptions caused by the introduction of new or revised distributor operating models or sales force compensation systems or allegations by equity analysts, former distributors or sales force members, government agencies or others as to the legality or viability of the Company's business model, particularly in India;

Table of Contents

• disruptions caused by restructuring activities, including facility closure, and the combination and exit of business units, impacting business models, the supply chain, as well as not fully realizing expected savings from actions taken;

• success of new products and promotional programs;

• the ability to implement appropriate product mix and pricing strategies;

• governmental regulation of materials used in products coming into contact with food (e.g. polycarbonate and polyethersulfone), as well as beauty, personal care and nutritional products;

• governmental regulation and consumer tastes related to the use of plastic in products and/or packaging material;

• the ability to procure and pay for at reasonable economic cost, sufficient raw materials and/or finished goods to meet current and future consumer demands at reasonable suggested retail pricing levels in certain markets, particularly Argentina, Ecuador and Egypt due to government regulations and restrictions;

• the impact of changes in consumer spending patterns and preferences, particularly given the global nature of the Company's business;

• the value of long-term assets, particularly goodwill and indefinite and definite-lived intangibles associated with acquisitions, and the realizability of the value of recognized tax assets;

• changes in plastic resin prices, other raw materials and packaging components, the cost of converting such items into finished goods and procured finished products and the cost of delivering products to customers;

• the introduction of Company operations in new markets outside the United States;

• general social, economic and political conditions in markets, such as in Argentina, Brazil, Ecuador, Egypt, Greece, India, Kazakhstan, Russia, Turkey and Ukraine and other countries impacted by such events;

• issues arising out of the sovereign debt in the countries in which the Company operates, such as in Argentina and those in the Euro zone, resulting in potential economic and operational challenges for the Company's supply chains,

• heightened counterparty credit risk due to adverse effects on customers and suppliers, exchange controls (such as in Argentina and Egypt) and translation risks due to potential impairments of investments in affected markets;

• disruptions resulting from either internal or external labor strikes, work stoppages, or similar difficulties, particularly in Brazil, France, India and South Africa;

• changes in cash flow resulting from changes in operating results, including from changes in foreign exchange rates, restructuring activities, working capital management, debt payments, share repurchases and hedge settlements;

• the impact of currency fluctuations on the value of the Company's operating results, assets, liabilities and commitments of foreign operations generally, including their cash balances during and at the end of quarterly reporting periods, the results of those operations, the cost of sourcing products across geographies and the success of foreign hedging and risk management strategies;

• the impact of natural disasters, terrorist activities and epidemic or pandemic disease outbreaks;

• the ability to repatriate, or otherwise make available, cash in the United States and to do so at a favorable foreign exchange rate and with favorable tax ramifications, particularly from Brazil, China, India, Indonesia, Korea, Malaysia, Mexico and South Africa;

• the ability to obtain all government approvals on, and to control the cost of infrastructure obligations associated with, property, plant and equipment;

• the ability to timely and effectively implement, transition, maintain and protect necessary information technology systems and infrastructure;

Table of Contents

- cyberattacks and ransomware demands that could cause the Company to not be able to operate its systems and/or access or control its data, including private data;
- the ability to attract and retain certain executive officers and key management personnel and the success of transitions or changes in leadership or key management personnel;
- the success of land buyers in attracting tenants for commercial and residential development and obtaining financing;
- the Company's access to, and the costs of, financing and the potential for banks with which the Company maintains lines of credit to be unable to fulfill their commitments; the costs and covenant restrictions associated with the Company's credit arrangements;
- integration of non-traditional product lines into Company operations;
- the effect of legal, regulatory and tax proceedings, as well as restrictions imposed on the Company's operations or Company representatives by foreign governments, including changes in interpretation of employment status of the sales force by government authorities, exposure to tax responsibilities imposed on the sales force and their potential impact on the sales force's value chain and resulting disruption to the business and actions taken by governments to set or restrict the freedom of the Company to set its own prices or its suggested retail prices for product sales by its sales force to end consumers and actions taken by governments to restrict the ability to convert local currency to other currencies in order to satisfy obligations outside the country generally, and in particular in Argentina and Egypt;
- the effect of competitive forces in the markets in which the Company operates, particularly related to sales of beauty, personal care and nutritional products, where there are a greater number of competitors;
- the impact of counterfeit and knocked-off products and programs in the markets in which the Company operates and the effect this can have on the confidence of the Company's sales force members;
- the impact of changes, changes in interpretation of or challenges to positions taken by the Company with respect to U.S. federal, state and foreign tax or other laws, including with respect to the Tax Act in the United States and non-income taxes issues in Brazil and India;
- other risks discussed in Part I, Item 1A, Risk Factors, of the Company's 2017 Annual Report on Form 10-K, as well as the Company's Consolidated Financial Statements, Notes to Consolidated Financial Statements, other financial information appearing elsewhere in this Report and the Company's other filings with the United States Securities and Exchange Commission.

Other than updating for changes in foreign currency exchange rates through its monthly website updates, the Company does not intend to update forward-looking information, except through its quarterly earnings releases, unless it expects diluted earnings per share for the current quarter, excluding items impacting comparability and changes versus its guidance of the impact of changes in foreign exchange rates, to be significantly below its previous guidance.

Investors should also be aware that while the Company does, from time to time, communicate with securities analysts, it is against the Company's policy to disclose to them any material non-public information or other confidential commercial information. Accordingly, it should not be assumed that the Company agrees with any statement or report issued by any analyst irrespective of the content of the confirming financial forecasts or projections issued by others.

Table of Contents

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15(d)-15(e)) that are designed to ensure that information required to be disclosed in the Company's reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to the Company's management, including the Chief Executive Officer and the Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognized that controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

As of the end of the period covered by this report, management, under the supervision of the Company's Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the design and operation of the disclosure controls and procedures were effective.

Changes in Internal Controls

There have been no significant changes in the Company's internal control over financial reporting during the Company's third quarter that have materially affected or are reasonably likely to materially affect its internal control over financial reporting, as defined in Rule 13a-15(f) promulgated under the Securities Exchange Act of 1934, as amended (the "Exchange Act").

PART II

OTHER INFORMATION

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares that May yet be Purchased Under the Plans or Programs (a)
7/1/18 - 8/4/18	253,328	\$ 36.30	253,328	\$ 653,953,182
8/5/18 - 9/1/18	1,189,089	34.50	1,189,089	612,929,683
9/2/18 - 9/29/18	—	—	—	612,929,683
	1,442,417	\$ —	1,442,417	\$ 612,929,683

(a) Open market repurchases are being made under an authorization that runs until February 1, 2020 and allows up to \$2.0 billion to be spent, of which \$612.9 million remained unspent as of September 29, 2018.

Item 5. Other Information

By-laws

On November 1, 2018, the Company's board of directors (the "Board") approved an amendment and restatement of the Company's by-laws (as amended and restated, the "By-laws"), which became effective as of the date of approval. The amendments contained in the By-laws do the following:

More fully develop the advance notice provisions for stockholder nominations for director and stockholder business proposals, including as they relate to the information required to be disclosed by the stockholder making the proposal, any proposed nominees for director and any persons controlling, or acting in concert with, such stockholder, and the period during which notice of stockholder nominations and stockholder business proposals must be given to the Company to be timely.

- Eliminate the default rule that the annual meeting of stockholders be held on the first Thursday in May.
- Provide the Board with the authority to cancel a previously scheduled stockholder meeting.
- Eliminate the power of stockholders to adjourn a stockholder meeting.
- Allow the chairman of a shareholder meeting to regulate conduct at the meeting.
- Eliminate references to the classification of directors.
- Make other revisions to clarify and update certain corporate procedures and conform language and style.

The foregoing summary description of the amendments contained in the By-laws does not purport to be complete and is subject to, and qualified in its entirety by reference to, the full text of the By-laws, which are attached hereto as Exhibit 3.2 to this Quarterly Report on Form 10-Q and incorporated herein by reference.

Principal Accounting Officer

On November 1, 2018, the Board appointed Madeline Otero as Vice President and Controller and designated her as the Company's principal accounting officer, effective November 5, 2018. Ms. Otero, age 42, has served as the Company's Vice President, Internal Audit and Enterprise Risk Management since November 2015 and prior to that, as its Vice President and Chief Financial Officer for its Beauticontrol business since January 2011.

Table of Contents

Ms. Otero will participate in the Company's compensation program for executive officers at the Vice President level. The Company did not enter into any material plan, contract or arrangement with Ms. Otero in connection with her appointment other than: (a) a one-time grant of \$100,000 in restricted stock units representing the Company's common stock, with a grant date of November 5, 2018, and which will vest on the third anniversary of the grant date, and (b) a Change in Control Employment Agreement ("Agreement"), under which, in the event Ms. Otero's employment is terminated in connection with a change in control of the Company, depending on the reason for the termination and when it occurs, she would receive severance benefits at two times salary and bonus multiple, as set forth in Section 5(a) of the Agreement. The foregoing description of the Agreement does not purport to be complete and is subject to, and qualified in its entirety by reference to, the full text of the form of Agreement, which was attached as Exhibit 10.11 to Form 10-K, filed with the Commission on February 27, 2018 and is incorporated herein by reference.

There are no family relationships between Ms. Otero and any of the Company's directors or executive officers, and the Company has not entered into any transactions with Ms. Otero that are required to be disclosed pursuant to Item 404(a) of Regulation S-K.

In connection with Ms. Otero's appointment, the Board has appointed Nicholas K. Poucher to the position of Senior Vice President, Business Transformation, effective November 5, 2018. Mr. Poucher has been the Company's Senior Vice President & Controller since November 2014, after having been its Vice President & Controller since September 2007, when he also became the Company's principal accounting officer.

Item 6. Exhibits

(a) Exhibits

3.2 Amended and Restated By-laws of the Registrant as amended November 1, 2018

31.1 Rule 13a-14(a)/15d-14(a) Certification of the Chief Executive Officer

31.2 Rule 13a-14(a)/15d-14(a) Certification of the Chief Financial Officer

32.1 Certification Pursuant to Section 1350 of Chapter 63 of Title 18 of the United States Code by the Chief Executive Officer

32.2 Certification Pursuant to Section 1350 of Chapter 63 of Title 18 of the United States Code by the Chief Financial Officer

The following financial statements from Tupperware Brands Corporation's Quarterly Report on Form 10-Q for the quarter ended September 29, 2018, filed on November 2, 2018, formatted in XBRL (eXtensible Business Reporting Language): (i) Consolidated Statements of Income, (ii) Consolidated Statements of Comprehensive Income, (iii) Consolidated Balance Sheets, (iv) Consolidated Statements of Cash Flows and (v) Notes to Consolidated Financial Statements, tagged in detail.
