HERSHA HOSPITALITY TRUST ANNOUNCES 2ND QUARTER 2003 RESULTS

HARRISBURG, PA, August 12, 2003--Hersha Hospitality Trust (AMEX:HT), owner of nationally franchised mid-priced hotels, today announced results for the second quarter and six months ended June 30, 2003.

Percentage lease revenues during the six month period ended June 30, 2003 were \$7,295,537, an increase of \$401,648, or 5.5%, as compared to percentage lease revenues of \$6,893,889 for the same period during 2002. Percentage lease revenues during the three month period ended June 30, 2003 were \$4,061,784, an increase of \$86,842, or 2.2%, as compared to percentage lease revenues of \$3,974,942 for the same period during 2002.

The increase in lease revenues is primarily attributable to an increase in fixed lease revenue from several properties acquired in prior periods. This increase in fixed lease revenue was slightly offset by a decrease in the percentage lease revenues from properties previously leased to Noble Investment Group, Ltd. ("Noble"), an independent third party management company.

The Company had previously entered into leases with Noble to lease and manage four hotels in the metropolitan Atlanta market. Noble elected not to renew these

Edgar Filing: HERSHA HOSPITALITY TRUST - Form 8-K

leases upon expiration of the current terms. The leases for the Hampton Inn Newnan, GA and Hampton Inn Peachtree City, GA expired on April 20, 2003 and the leases for the Comfort Suites Duluth, GA and Holiday Inn Express Duluth, GA expired on May 20, 2003.

On the respective lease termination dates, the Company leased these properties to its wholly owned taxable REIT subsidiary, 44 New England Management Company (the "TRS Lessee") and engaged Hersha Hospitality Management, L.P. to operate the hotels under management contracts. The consolidated financial statements as of June 30, 2003 include the operating results of these four hotels under the TRS structure. Previously, revenues on the consolidated financial statements were derived primarily from lease payments which were made out of the net operating income of the properties pursuant to percentage leases. Under the TRS structure, total revenues from these hotel properties and the related operating expenses are also being reported in the consolidated statements of operations.

Net income allocated to common shareholders decreased by approximately \$279,504 for the six months that ended June 30, 2003 to \$338,544, as compared to net income of \$618,048 for the same period during 2002. Net income allocated to common shareholders decreased by \$273,417 for the three months that ended June 30, 2003 to \$34,338, as compared to net income of \$307,755 for the same period during 2002. These decreases in net income are primarily attributable to distributions with respect to our Series A Preferred Units, during the three and six month periods ended June 30, 2003, which units were not outstanding during the prior periods.

On April 21, 2003, CNL Hospitality Properties, L.P. ("CHPLP") purchased from Hersha Hospitality Limited Partnership ("HHLP"), the Company's operating partnership subsidiary, \$10.0 million of convertible preferred units of limited partnership interest in HHLP ("Series A Preferred Units"). At the same time, HHLP and CHPLP agreed to form a joint venture investment partnership to acquire hotel real estate assets utilizing up to an additional \$40.0 million of joint venture funding from CHPLP. CHPLP purchased an additional \$5.0 million of Series A Preferred Units on May 21, 2003.

A summary of the three and six months ended June 30, 2003 is presented below:

Funds from Operations. The National Association of Real Estate Investment Trusts (NAREIT) developed FFO as a relative non-GAAP financial measure of performance and liquidity of an equity REIT in order to recognize that income-producing real

estate historically has not depreciated on the basis determined under GAAP. FFO, as defined under the definition adopted by NAREIT in April 2002 and as presented by us, is net income (loss) (computed in accordance with generally accepted accounting principles), excluding gains (or losses) from debt restructuring or sales of property, plus depreciation and amortization, and after adjustments for unconsolidated partnerships and joint ventures. FFO does not represent cash flows from operating activities in accordance with GAAP (which, unlike FFO, generally reflects all cash effects of transactions and other events in the determination of net income) and should not be considered an alternative to net income as an indication of our performance or to cash flow as a measure of liquidity or ability to make distributions. We consider FFO a meaningful, additional measure of operating performance because it primarily excludes the effects of the assumption that the value of real estate assets diminishes predictably over time, and because it is widely used by industry analysts as a performance measure. Comparison of our presentation of FFO to similarly titled measures for other REITs may not necessarily be meaningful due to possible differences in the application of the NAREIT definition used by such REITs or the use of other definitions of that term.

Funds from Operations ("FFO") were \$2,500,059 for the three months ended June 30, 2003, which was an increase of \$173,218, or 7.4% over FFO in the comparable period in 2002, which was \$2,326,841. The increase in FFO for the three months ended June 30, 2003 was primarily a result of increased percentage lease revenues, increased interest revenue from development line funding and lower borrowing costs during the quarter. FFO was partially offset due to the recognition of hotel operating expenses in excess of income from hotel operations. These income and expense items were recognized during the quarter due to the TRS structure implemented to lease the assets previously leased to Noble. Although total FFO increased for the period, FFO per diluted share and unit decreased to \$0.27 for the quarter ending June 30, 2003 from \$0.30 for the similar period in 2002 due to the issuance of 150,000 Series A Preferred Units during the current period.

Funds from Operations were \$4,005,843 for the six months ended June 30, 2003, which was an increase of approximately \$344 or 9.4% over FFO in the comparable period in 2002, which was \$3,662,027. The increase in FFO during the six months ending June 30, 2003 was primarily due to the reasons mentioned above. FFO per diluted share and unit remained consisted at \$0.48 per share during the six months ending June 30, 2003.

The following table reconciles FFO and FFO per weighted average diluted share/unit for the three and six months ended June 30, 2003 and 2002 to their most directly comparable GAAP measures, net income and net income per weighted
