UNITED NATURAL FOODS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

April 27, 2013 (unaudited)

1. SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of Presentation

United Natural Foods, Inc. and subsidiaries (the "Company") is a leading distributor and retailer of natural, organic and specialty products. The Company sells its products primarily throughout the United States and Canada.

The accompanying unaudited condensed consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. All significant intercompany transactions and balances have been eliminated in consolidation.

The accompanying unaudited condensed consolidated financial statements have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (the "SEC") for interim financial information, including the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, certain information and footnote disclosures normally required in complete financial statements prepared in conformity with accounting principles generally accepted in the United States have been condensed or omitted. In the Company's opinion, these financial statements include all adjustments necessary for a fair presentation of the financial position, results of operations and cash flows for the interim periods presented. The results of operations for interim periods, however, may not be indicative of the results that may be expected for a full year. These financial statements should be read in conjunction with the consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the fiscal year ended July 28, 2012.

Net sales consists primarily of sales of natural, organic and specialty products to retailers, adjusted for customer volume discounts, returns and allowances. Net sales also includes amounts charged by the Company to customers for shipping and handling, and fuel surcharges. The principal components of cost of sales include the amount paid to manufacturers and growers for product sold, plus the cost of transportation necessary to bring the product to the Company's distribution facilities. Cost of sales also includes amounts incurred by the Company's manufacturing subsidiary, United Natural Trading LLC, which does business as Woodstock Farms Manufacturing, for inbound transportation costs and depreciation for manufacturing equipment offset by consideration received from suppliers in connection with the purchase or promotion of the suppliers' products. Operating expenses include salaries and wages, employee benefits (including payments under the Company's Employee Stock Ownership Plan), warehousing and delivery, selling, occupancy, insurance, administrative, share-based compensation and amortization expense. Operating expenses also include depreciation expense related to the wholesale and retail divisions. Other expense (income) includes interest on outstanding indebtedness, interest income and miscellaneous income and expenses. During the nine months ended April 27, 2013, other expense also includes a pre-tax charge of \$4.9 million related to an agreement reached during the first quarter of fiscal 2013 to settle a multi-state unclaimed property audit. The condensed consolidated statement of cash flows for the nine months ended April 28, 2012 has been adjusted to properly present proceeds and borrowings related to the Company's revolving credit facility on a gross basis. These amounts were previously presented on a net basis. The revisions were not material to the Company's consolidated financial statements as a whole.

As noted above, the Company includes shipping and handling fees billed to customers in net sales. Shipping and handling costs associated with inbound freight are generally recorded in cost of sales, whereas shipping and handling costs for selecting, quality assurance, and outbound transportation are recorded in operating expenses. Outbound

shipping and handling costs totaled \$89.9 million and \$75.7 million for the three months ended April 27, 2013 and April 28, 2012, respectively. For the nine months ended April 27, 2013 and April 28, 2012, outbound shipping and handling costs totaled \$264.7 million and \$219.7 million, respectively. Outbound shipping and handling costs for the three and nine months ended April 27, 2013 include employee benefit expenses which are now allocated.

2. RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

In February 2013, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2013-02, Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income ("ASU No. 2013-02"). This update supersedes the presentation requirements for reclassifications out of accumulated other comprehensive income in ASU No. 2011-05, Presentation of Comprehensive Income, and ASU No. 2011-12, Deferral of the Effective Date for Amendments to the Presentation of Reclassification of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05. ASU No. 2013-02 requires an entity to provide information about amounts reclassified out of accumulated other comprehensive income by component and to present, either on the face of the financial statements or in a single note, any significant amount reclassified out of accumulated other comprehensive income in its entirety in the period, and the income statement line item affected by the reclassification. For other amounts that are not required under U.S. GAAP to be reclassified in their entirety to net income, an entity is required to cross-reference to other disclosures required under U.S. GAAP that provide additional detail about those amounts. ASU No. 2013-02 is effective for annual reporting periods that begin after December 15, 2012, which will be the first quarter of the Company's fiscal year ending August 2, 2014. The adoption of ASU No. 2013-02 is not expected to have a material impact on the presentation of the Company's consolidated financial statements.

In July 2012, the FASB issued ASU No. 2012-02, Intangibles - Goodwill and Other (ASC Topic 350): Testing Indefinite-Lived Intangible Assets for Impairment ("ASU No. 2012-02"). ASU No. 2012-02 permits an entity to first assess qualitative factors to determine whether it is more likely than not that an indefinite-lived intangible asset is impaired as a basis for determining whether it is necessary to perform the quantitative impairment test in accordance with Subtopic 350-30, Intangibles-Goodwill and Other-General Intangibles Other than Goodwill. ASU No. 2012-02 is effective for fiscal years that begin after September 15, 2012, though early adoption is permitted. The Company's adoption of ASU No. 2012-02 effective July 29, 2012 did not have a material impact on the presentation of the Company's consolidated financial statements.

3. ACQUISITIONS

During the first quarter of fiscal 2013, the Company, within its wholesale segment, completed three business combinations related to the acquisition of certain assets of three distribution companies. The total cash consideration related to these acquisitions was approximately \$9.2 million. In addition, certain of the asset purchase agreements related to these acquisitions provide for future contingent consideration payments of up to \$3.7 million through February 2017. Furthermore, in connection with one of the acquisitions, the Company granted restricted stock units which have pro-rata time-based vesting over four years similar to the structure of the majority of the awards of restricted stock units granted to employees, but for which the vesting may be fully accelerated after two years if net sales of the acquired business, as defined in the applicable asset purchase agreement, meets or exceeds a targeted amount in either of the first two years following consummation of our acquisition of the business.

The preliminary fair value of the identifiable intangible assets acquired in the three acquisitions was determined by using an income approach. The identifiable intangible assets recorded based on the provisional valuations include customer lists of \$3.1 million, which are being amortized on a straight-line basis over estimated useful lives of approximately 5 - 10 years. Significant assumptions utilized in the income approach were based on company-specific information and projections, which are not observable in the market and are considered Level 3 measurements as defined by authoritative guidance.

These three acquisitions were financed through borrowings under the Company's amended and restated revolving credit facility. The Company is still completing the final valuations of the acquired intangibles for these acquisitions and therefore the Company's estimates and assumptions are subject to change within the measurement period. Acquisition costs related to these purchases were insignificant, have been expensed as incurred and are included within "Operating Expenses" in the Consolidated Statements of Income. Each of these businesses were absorbed by the operations of the Company's broadline distribution business, therefore the Company does not record the expenses for these businesses separately from the rest of the broadline distribution business and it is not possible to provide complete financial results for each acquisition separately or in total. Net sales resulting from these three acquisitions totaled approximately \$12.5 million and \$38.0 million for the three and nine months ended April 27, 2013, respectively.

4. RESTRUCTURING ACTIVITIES AND ASSET IMPAIRMENTS

Divestiture of conventional non-foods and general merchandise lines of business

In June 2011, the Company entered into an asset purchase agreement with L&R Distributors, Inc. ("L&R Distributors"), a leading national distributor of non-food products and general merchandise, to divest the Company's conventional non-foods and general merchandise lines of business. In connection with this divestiture, the Company ceased operations at its Harrison, Arkansas distribution center, and during the fourth quarter of fiscal 2011, the Company recognized a non-cash impairment charge on long-lived assets including land, building and equipment of \$5.8 million. In addition, the Company incurred \$0.5 million during the fourth quarter of fiscal 2011 to transition the specialty food line of business into the Company's other distribution centers. Upon the closure of the Harrison, Arkansas distribution center during the first quarter of fiscal 2012, the carrying value of \$2.6 million in long-term property and equipment was reclassified to assets held for sale. During the first quarter of fiscal 2012, the Company recognized \$5.1 million in severance and other expenses related to the completion of the divestiture. During the fourth quarter of fiscal 2012, the land, buildings and equipment associated with the Harrison, Arkansas distribution center were sold to a third party, resulting in a nominal gain.

Impairment of an intangible asset

During fiscal 2007, the Company made several asset acquisitions under its Blue Marble Brands division, one of which included a licensing agreement under which the Company was permitted to sell products under the seller's existing trademark in exchange for royalty payments. The fair value of the intangible asset at the time of acquisition was \$2.1 million, and was being amortized over a life of 27 years, the maximum life of the licensing agreement including renewal periods. In October 2012, the Company entered into an agreement to terminate its licensing agreement with the former owners. In connection with this termination agreement, during the three months ended October 27, 2012 the Company recognized an impairment of \$1.6 million representing the remaining unamortized balance of the intangible asset.

5. EARNINGS PER SHARE

The following is a reconciliation of the basic and diluted number of shares used in computing earnings per share:

(In thousands)	Three months ended		Nine months ended	
	April 27, 2013	April 28, 2012	April 27, 2013	April 28, 2012
Basic weighted average shares outstanding	49,303	48,848	49,200	48,717
Net effect of dilutive stock awards based upon the treasury stock method	264	359	283	300
Diluted weighted average shares outstanding	49,567	49,207	49,483	49,017

There were 105,698 and 41,759 anti-dilutive share-based payment awards outstanding for the three months ended April 27, 2013 and April 28, 2012, respectively. For the nine months ended April 27, 2013 and April 28, 2012, there were 120,969 and 217,096 anti-dilutive stock awards outstanding, respectively. These anti-dilutive share-based payment awards were excluded from the calculation of diluted earnings per share.

6. FAIR VALUE MEASUREMENTS OF FINANCIAL INSTRUMENTS

Fuel Supply Agreements

The Company is a party to several fixed price fuel supply agreements. During the first quarter of fiscal 2013, the Company entered into several agreements which require it to purchase a portion of its diesel fuel each month at fixed prices through July 2013. These fixed price fuel agreements qualify for, and the Company has elected to utilize, the “normal purchase” exception under FASB ASC 815, Derivatives and Hedging (“ASC 815”) as physical deliveries will occur rather than net settlements, and therefore the fuel purchases under these contracts are expensed as incurred and included within operating expenses. During the nine months ended April 28, 2012, the Company was a party to several similar agreements which required it to purchase a portion of its diesel fuel each month at fixed prices through July 2012 and which also qualified and were accounted for using the “normal purchase” exception under ASC 815, and therefore the fuel purchases under those contracts were expensed as incurred and included within operating expenses.

Financial Instruments

With the settlement of an interest rate swap during fiscal 2012, there were no financial assets and liabilities measured on a recurring basis as of April 27, 2013 or July 28, 2012.

The fair value of the Company's other financial instruments including cash, cash equivalents, accounts receivable, notes receivable, accounts payable and certain accrued expenses approximate carrying amounts due to the short-term nature of these instruments. We believe the Company's credit risk is similar to the overall market and variable rates have not moved significantly since we initiated the underlying borrowings, therefore the fair value of notes payable approximate carrying amounts.

The following estimated fair value amounts for long term debt have been determined by the Company using available market information and appropriate valuation methodologies including the discounted cash flow method, taking into account the instruments' interest rate, terms, maturity date and collateral, if any, in comparison to market rates for similar financial instruments and are therefore deemed Level 2 inputs. However, considerable judgment is required in interpreting market data to develop the estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts that the Company could realize in a current market exchange.

(In thousands)	April 27, 2013		July 28, 2012	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Liabilities:				
Long term debt, including current portion	\$1,127	\$1,142	\$985	\$988

7. BUSINESS SEGMENTS

The Company has several operating divisions aggregated under the wholesale segment, which is the Company's only reportable segment. These operating divisions have similar products and services, customer channels, distribution methods and historical margins. The wholesale segment is engaged in national distribution of natural, organic and specialty foods, produce and related products in the United States and Canada. The Company has additional operating divisions that do not meet the quantitative thresholds for reportable segments and are therefore aggregated under the caption of "Other". "Other" includes a retail division, which engages in the sale of natural foods and related products to the general public through retail storefronts on the east coast of the United States, a manufacturing division, which engages in importing, roasting and packaging of nuts, seeds, dried fruit, trail mixes, granola, natural and organic snack items, confections and the Company's Blue Marble Brands product lines. "Other" also includes certain corporate operating expenses that are not allocated to operating divisions and are necessary to operate the Company's headquarters located in Providence, Rhode Island, which include depreciation, salaries, retainers, and other related expenses of officers, directors, corporate finance (including professional services), information technology, governance, legal, human resources and internal audit. As the Company continues to expand its business and serve its customers through a national platform, these corporate expense amounts have increased. These unallocated corporate expenses are the primary driver behind the operating losses within the "Other" category below. Non-operating expenses that are not allocated to the operating divisions are under the caption of "Unallocated Expenses". The Company does not record its revenues for financial reporting purposes by product group, and it is therefore impracticable for the Company to report them accordingly.

The following table reflects business segment information for the periods indicated (in thousands):

	Wholesale	Other	Eliminations	Unallocated	Consolidated
Three months ended April 27, 2013:					
Net sales	\$1,548,419	\$49,146	\$(31,348)		\$1,566,217

8. SUPPLEMENTAL CASH FLOW INFORMATION

Non-cash financing activities during the nine months ended April 27, 2013 include approximately \$27.9 million of payments made directly to contractors by the landlord under the terms of a lease agreement. During the construction period, these amounts are recorded within property and equipment, net, with a corresponding amount within accrued expenses and other current liabilities at April 27, 2013.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, that involve substantial risks and uncertainties. In some cases you can identify these statements by forward-looking words such as "anticipate," "believe," "could," "estimate," "expect," "intend," "may," "plans," "planned," "seek," "should," "will," and similar words. You should read statements that contain these words carefully because they discuss future expectations, contain projections of future results of operations or of financial positions or state other "forward-looking" information.

Forward-looking statements involve inherent uncertainty and may ultimately prove to be incorrect or false. You are cautioned not to place undue reliance on forward-looking statements. Except as otherwise may be required by law, we undertake no obligation to update or revise forward-looking statements to reflect changed assumptions, the occurrence of unanticipated events or actual operating results. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of various factors, including, but not limited to:

- our dependence on principal customers;
- our sensitivity to general economic conditions, including the current economic environment, changes in disposable income levels and consumer spending trends;
- our ability to reduce our expenses in amounts sufficient to offset our increased focus on sales to conventional supermarkets and the resulting lower gross margins on these sales;
- our reliance on the continued growth in sales of natural and organic foods and non-food products in comparison to conventional products;
- our ability to timely and successfully deploy our new warehouse management system throughout our distribution centers and our transportation management system Company-wide;
- increased fuel costs;
- our sensitivity to inflationary and deflationary pressures;
- the relatively low margins and economic sensitivity of our business;
- the potential for disruptions in our supply chain by circumstances beyond our control;
- the ability to identify and successfully complete acquisitions of other natural, organic and specialty food and non-food products distributors; and
- management's allocation of capital and the timing of capital expenditures.

This list of risks and uncertainties, however, is only a summary of some of the most important factors and is not intended to be exhaustive. You should carefully review the risks described under "Part I. Item 1A. Risk Factors" of our Annual Report on Form 10-K for the fiscal year ended July 28, 2012 and any cautionary language in this Quarterly Report on Form 10-Q or our other reports filed with the SEC from time to time, as the occurrence of any of these events could have an adverse effect on our business, results of operation and financial condition.

Overview

We believe we are the leading distributor based on sales of natural, organic and specialty foods and non-food products in the United States and Canada, and that our twenty-six distribution centers, representing approximately 6.2 million square feet of warehouse space, provide us with the largest capacity of any North American-based distributor in the industry. We offer more than 65,000 high-quality natural, organic and specialty foods and non-food products, consisting of national brands, regional brands, private label and master distribution products, in six product categories: grocery and general merchandise, produce, perishables and frozen foods, nutritional supplements and sports nutrition, bulk and food service products and personal care items. We serve more than 27,000 customer locations primarily located across the United States and Canada, the majority of which can be classified into one of the following categories: independently owned natural products retailers, which include buying clubs; supernatural chains, which consist solely of Whole Foods Market Inc. (“Whole Foods Market”); conventional supermarkets, which include mass market chains; and other which includes foodservice and international customers.

Our operations are comprised of three principal operating divisions. These operating divisions are:

- our wholesale division, which includes our broadline natural, organic and specialty distribution business in the United States, UNFI Canada, which is our natural, organic and specialty distribution business in Canada, Albert’s, which is a leading distributor within the United States of organically grown produce and non-produce perishable items, and Select Nutrition, which distributes vitamins, minerals and supplements;
- our retail division, consisting of Earth Origins Market, which operates our 14 natural products retail stores within the United States; and
- our manufacturing division, consisting of Woodstock Farms Manufacturing, which specializes in the international importation, roasting, packaging and distribution of nuts, dried fruit, seeds, trail mixes, granola, natural and organic snack items, and confections, and our Blue Marble Brands product lines.

In recent years, our sales to existing and new customers have increased through the continued growth of the natural and organic products industry in general; increased market share as a result of our high quality service and a broader product selection, including specialty products, and the acquisition of, or merger with, natural and specialty products distributors; the expansion of our existing distribution centers; the construction of new distribution centers; the introduction of new products and the development of our own line of natural and organic branded products. Through these efforts, we believe that we have been able to broaden our geographic penetration, expand our customer base, enhance and diversify our product selections and increase our market share. Beginning in fiscal 2009, our strategic plan has focused on increasing market share, particularly in our conventional supermarket channel. This channel typically generates lower gross margins than our independent retailer channel, but also typically has lower operating expenses. As part of our “one company” approach, we are in the process of rolling out a national warehouse management and procurement system to convert our existing facilities into a single warehouse management and supply chain platform. We launched this system upgrade at our Lancaster, Texas facility in September 2010 and we converted our Ridgefield, Washington facility in July 2012. We plan to go live on our third facility in fiscal 2013 and expect to complete the roll out of this system upgrade in all of our existing, broadline distribution centers by the end of fiscal 2016. These steps and others are intended to promote operational efficiencies and further reduce our operating expenses as we attempt to offset the lower gross margins we expect to generate by increased sales to the supernatural and conventional supermarket channels.

During fiscal 2012, we made pivotal changes including completing the divestiture of our conventional non-foods and general merchandise lines of business that began in the fourth quarter of fiscal 2011. In connection with the divestiture, we moved the remaining organic and natural specialty product inventory from our Harrison, Arkansas

facility to other distribution centers across the United States, and closed the Harrison, Arkansas facility. We were also successful in bringing onboard the single largest national customer at one time in our history.

Inflation continued to impact our financial results for the first nine months of fiscal 2013, albeit at lower levels than in fiscal 2012. For the quarter ended April 27, 2013, inflation in food prices was approximately 1.8% when compared to price levels in the three months ended April 28, 2012. We believe that based on the recent trend that levels are stabilizing near 2-3%. Moderate levels of annual inflation, which we generally consider to be between 2% and 4%, are beneficial to our results as the majority of our pricing is on a cost plus structure, and price changes in this range are more easily passed through the supply chain. We believe the current trend of moderate inflation will continue over the next 12 months.

We have been the primary distributor to Whole Foods Market for more than 14 years. Effective June 2010, we amended our distribution agreement with Whole Foods Market to extend the term of the agreement for an additional seven years. Under the terms of the amended agreement, we will continue to serve as the primary wholesale natural grocery distributor to Whole Foods Market in its United States regions where we were serving as the primary distributor at the time of the amendment. The amendment extended the expiration date of the agreement from September 25, 2013 to September 25, 2020. On July 28, 2010,

we announced that we had entered into an asset purchase agreement under which we agreed to acquire certain assets of Whole Foods Distribution Inc. (“Whole Foods Distribution”) previously used for their self-distribution of non-perishables in their Rocky Mountain and Southwest regions, and to become their primary distributor in these regions. We closed this transaction in late September 2010 in the case of the Southwest region and early October 2010 in the case of the Rocky Mountain region. We now serve as the primary distributor to Whole Foods Market in all of its regions in the United States, and have amended our distribution agreement with Whole Foods Market effective October 11, 2010 to include these regions. Whole Foods Market accounted for approximately 37% of our net sales for the three and nine months ended April 27, 2013 and 36% of our net sales for the three and nine months ended April 28, 2012.

We expanded our operations into Canada with the acquisition of certain Canadian food distribution assets of the SunOpta Distribution Group business of SunOpta Inc. through our wholly-owned subsidiary, UNFI Canada, for cash consideration of \$65.8 million in June 2010. With the acquisition, we became the largest distributor of natural, organic and specialty foods, including kosher foods, in Canada. During fiscal 2012, we utilized our UNFI Canada platform to further expand in the Canadian market, including through our purchase of substantially all of the assets of a specialty food distribution business in the Ontario market in November 2011. During the first quarter of fiscal 2013, we also utilized this platform for our August 2012 acquisition of substantially all of the assets of a dairy distribution business in the central Canada market.

The ability to distribute specialty food items (including ethnic, kosher and gourmet) has accelerated our expansion into a number of high-growth business markets and allowed us to establish immediate market share in the fast-growing specialty foods market. We have now integrated specialty food products and natural and organic specialty non-food products into most of our broadline distribution centers across the country. Due to our expansion into specialty foods, we were awarded new business with a number of conventional supermarkets since fiscal 2010 that we previously had not done business with because we did not distribute specialty products. We believe that distribution of these products enhances our conventional supermarket business channel and that our complementary product lines continue to present opportunities for cross-selling. On June 9, 2011, we entered into an asset purchase agreement with L&R Distributors pursuant to which we agreed to sell our conventional non-foods and general merchandise lines of business, including certain inventory related to these product lines. This divestiture was completed in the first quarter of fiscal 2012, and has allowed us to concentrate on our core business of the distribution of natural, organic, and specialty foods and non-food products.

To maintain our market leadership and improve our operating efficiencies, we seek to continually:

- expand our marketing and customer service programs across regions;
- expand our national purchasing opportunities;
- offer a broader product selection;
- offer operational excellence with high service levels and a higher percentage of on-time deliveries than our competitors;
- centralize general and administrative functions to reduce expenses;
- consolidate systems applications among physical locations and regions;
- increase our investment in people, facilities, equipment and technology;

- integrate administrative and accounting functions; and
- reduce the geographic overlap between regions.

Our continued growth has allowed us to expand our existing facilities and open new facilities in an effort to achieve increasing operating efficiencies. We have made significant capital expenditures and incurred considerable expenses in connection with the opening and expansion of our facilities. At April 27, 2013 our distribution capacity totaled approximately 6.2 million square feet. In September 2010, we began shipping products from our distribution center in Lancaster, Texas, which serves customers throughout the Southwestern United States, including Texas, Oklahoma, New Mexico, Arkansas and Louisiana. In October 2010, in connection with the acquisition of the Rocky Mountain distribution business of Whole Foods Distribution, we took over the operations, including the assumption of an operating lease, at a distribution center in Aurora, Colorado, augmenting our existing Aurora, Colorado facility which was at capacity, in serving customers in Colorado, Utah, Arizona, and New Mexico. In April 2012, we entered into a lease for a new 540,000 square foot distribution center in Aurora, Colorado which became operational in May 2013 and will replace our existing two broadline distribution centers, an Albert's distribution center and an off-site storage location. In May 2013, we began operations at our new Albert's distribution center in Logan, New Jersey. We have also announced a multi-year expansion project with an additional distribution center planned for the United States in Sturtevant, Wisconsin, Montgomery, New York, and Northern California.

Our net sales consist primarily of sales of natural, organic and specialty products to retailers, adjusted for customer volume discounts, returns and allowances. Net sales also consist of amounts charged by us to customers for shipping and handling and fuel surcharges. The principal components of our cost of sales include the amounts paid to manufacturers and growers for product sold, plus the cost of transportation necessary to bring the product to our distribution facilities, offset by any consideration received from suppliers in connection with the purchase or promotion of the suppliers' products. Cost of sales also includes amounts incurred by us at our manufacturing subsidiary, Woodstock Farms Manufacturing, for inbound transportation costs and depreciation for manufacturing equipment. Our gross margin may not be comparable to other similar companies within our industry that may include all costs related to their distribution network in their costs of sales rather than as operating expenses. We include purchasing and outbound transportation expenses within our operating expenses rather than in our cost of sales. Total operating expenses include salaries and wages, employee benefits (including payments under our Employee Stock Ownership Plan), warehousing and delivery, selling, occupancy, insurance, administrative, share-based compensation, depreciation and amortization expense. Other expenses (income) include interest on our outstanding indebtedness, interest income, unrealized foreign exchange gains or losses and other miscellaneous income and expenses. During the nine months ended April 27, 2013 other expense also includes a pre-tax charge of \$4.9 million in the first quarter related to an agreement to settle a multi-state unclaimed property audit.

Critical Accounting Policies

The preparation of our consolidated financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. The SEC has defined critical accounting policies as those that are both most important to the portrayal of our financial condition and results of operations and require our most difficult, complex or subjective judgments or estimates. Based on this definition and as further described in our Annual Report on Form 10-K for the year ended July 28, 2012, we believe our critical accounting policies include the following: (i) determining our allowance for doubtful accounts, (ii) determining our reserves for the self-insured portions of our workers' compensation and automobile liabilities and (iii) valuing goodwill and intangible assets. For all financial statement periods presented, there have been no material modifications to the application of these critical accounting policies or estimates since our most recently filed Annual Report on Form 10-K.

Results of Operations

The following table presents, for the periods indicated, certain income and expense items expressed as a percentage of net sales:

	Three months ended		Nine months ended				
	April 27, 2013	April 28, 2012	April 27, 2013	April 28, 2012			
Net sales	100.0	% 100.0	% 100.0	% 100.0			%
Cost of sales	83.2	% 82.4	% 83.3	% 82.4			%

Net income	2.0	%	2.1	%	1.7	%	1.7	%

* Total reflects rounding

Three Months Ended April 27, 2013 Compared To Three Months Ended April 28, 2012

Net Sales

Our net sales for the three months ended April 27, 2013 increased approximately 12.8%, or \$178.2 million, to \$1.6 billion from \$1.4 billion for the three months ended April 28, 2012. This increase was primarily due to organic growth (sales growth excluding the impact of acquisitions) in our wholesale division from our supernatural chain customer as well as increased sales within our conventional supermarket channel. Our organic growth is due to the continued growth of the natural and organic products industry in general, increased market share as a result of our focus on service and value added services and broader selection of products, including specialty foods. In addition to net sales growth attributable to our organic growth, we also benefited from the inclusion of \$12.5 million in incremental sales during the three months ended April 27, 2013 related to our acquisitions of certain assets of three distributors completed during the first quarter of fiscal 2013. Net sales for the quarter ended April 27, 2013 also benefited from food price inflation of approximately 1.8% compared to price levels in the third quarter of the prior fiscal year.

Our net sales by customer type for the three months ended April 27, 2013 and April 28, 2012 were as follows (in millions):

Customer Type	Net Sales for the Three Months Ended				
	April 27, 2013	% of Net Sales	April 28, 2012	% of Net Sales	
Independently owned natural products retailers	\$528	34	% \$487	35	%
Supernatural chains	573	37	% 496	36	%
Conventional supermarkets	381	24	% 336	24	%
Other	84	5	% 69	5	%
Total	\$1,566	100	% \$1,388	100	%

Net sales to our independent retailer channel increased by approximately \$41 million, or 8%, during the three months ended April 27, 2013 compared to the three months ended April 28, 2012. While net sales in this channel have increased, they have grown at a slower rate than net sales in our supernatural and conventional supermarket channels, and therefore, represent a lower percentage of our total net sales in the third quarter of fiscal 2013 compared to the third quarter of fiscal 2012.

Whole Foods Market is our only supernatural chain customer, and net sales to Whole Foods Market for the three months ended April 27, 2013 increased by approximately \$77 million, or 16%, as compared to the three months ended April 28, 2012, and accounted for approximately 37% and 36% of our total net sales for the three months ended April 27, 2013 and April 28, 2012, respectively. The increase in net sales to Whole Foods Market is primarily due to increases in same-store sales, as well as new store openings.

Net sales to conventional supermarkets for the three months ended April 27, 2013 increased by approximately \$45 million, or 13%, from the three months ended April 28, 2012, and represented approximately 24% of our total net sales in each of the three months ended April 27, 2013 and April 28, 2012. The increase in net sales to conventional supermarkets is due to continued success in our strategy to be the sole supplier of natural, organic and specialty products to our conventional supermarket customers.

Other net sales, which include sales to foodservice customers and sales from the United States to other countries, as well as sales through our retail division, manufacturing division, and our branded product lines, increased by approximately \$15 million, or 22%, during the three months ended April 27, 2013 compared to the three months ended April 28, 2012, and accounted for approximately 5% of total net sales for both the three months ended April 27,

2013 and April 28, 2012.

As we continue to aggressively pursue new customers and expand relationships with existing customers, we expect net sales for the remainder of fiscal 2013 to grow over net sales for fiscal 2012. We believe that the integration of our specialty business into our national platform has allowed us to attract customers that we would not have been able to attract without that business and will continue to allow us to pursue a broader array of customers as many customers seek a single source for their natural, organic and specialty products. We believe that our projected net sales growth will come from both sales to new customers and an increase in the number of products that we sell to existing customers. We expect that most of this net sales growth will occur in our lower gross margin supernatural and conventional supermarket channels. Although sales to these customers typically generate lower gross margins than sales to customers within our independent retailer channel, they also typically carry a lower average cost to serve than sales to our independent customers. We also believe that food price inflation similar to the levels experienced during the first three quarters of fiscal 2013 will contribute to our projected net sales growth for the remainder of fiscal 2013.

Cost of Sales and Gross Profit

Our gross profit increased approximately 7.6%, or \$18.5 million, to \$263.0 million for the three months ended April 27, 2013, from \$244.5 million for the three months ended April 28, 2012. Our gross profit as a percentage of net sales was 16.8% for the three months ended April 27, 2013 and 17.6% for the three months ended April 28, 2012. The decline in gross profit as a percentage of net sales between the third quarter of fiscal 2013 and the comparable period in fiscal 2012 is primarily due to the continued shift in our customer mix towards the supernatural and conventional supermarket channels, lower inflation, increased sales of customers' private label brands, which carry a lower gross margin, and increased in-bound freight expenses. Changes in the product mix, including the acquisition of a produce brokerage business, which has lower gross margins, also negatively impacted gross margin in the quarter ended April 27, 2013.

Our gross profits are generally higher on net sales to independently owned retailers and lower on net sales in the supernatural and conventional supermarket channels. For the three months ended April 27, 2013, approximately 69%, or \$122 million of our \$178 million total net sales growth was from increased net sales in the supernatural and conventional supermarket channels. As a result, approximately 61% of our total net sales in the three months ended April 27, 2013 were to the supernatural and conventional supermarket channels compared to approximately 60% in the three months ended April 28, 2012.

We anticipate net sales growth in the supernatural and conventional supermarket channels will continue to outpace growth in the independent retailer and other channels. We expect that our distribution relationship with Whole Foods Market and our opportunities in the conventional supermarket channel will continue to generate lower gross profit percentages than our historical rates. We will seek to fully offset these reductions in gross profit percentages by reducing our operating expenses as a percent of net sales primarily through improved efficiencies in our supply chain and improvements to our information technology infrastructure, including our ongoing national warehouse management and procurement system upgrade.

Operating Expenses

Our total operating expenses increased approximately 6.8%, or \$13.2 million, to \$209.1 million for the three months ended April 27, 2013, from \$195.9 million for the three months ended April 28, 2012. The increase in total operating expenses for the three months ended April 27, 2013 was primarily due to higher sales volume, \$0.9 million in non-cash straight-line rent expense associated with our new Denver, Colorado area facility and \$1.5 million in labor action related costs at our Auburn, Washington facility. The labor action was resolved in February 2013 and our labor-related operating expenses at our Auburn facility have returned to normalized levels.

Total operating expenses for the three months ended April 27, 2013 included share-based compensation expense of \$3.1 million, compared to \$2.5 million in the three months ended April 28, 2012. Share-based compensation expense was higher during the three months ended April 27, 2013 primarily due to increases in the grant date fair value of awards in recent years as our stock price has appreciated, as well as the expense from our granting two-year performance-based vesting equity awards to our senior executives as part of a new component to their compensation arrangements that began in fiscal 2012.

As a percentage of net sales, total operating expenses decreased to approximately 13.4% for the three months ended April 27, 2013, from approximately 14.1% for the three months ended April 28, 2012. The decrease in total operating expenses as a percentage of net sales was primarily attributable to the growth in the supernatural and conventional supermarket channels which in general have lower operating expenses and higher fixed cost coverage due to higher sales. We were also able to partially manage our fuel costs despite rising prices as a result of our continued efforts to

lock in the price of a portion of our expected fuel usage through fixed price fuel supply agreements. We expect that we will be able to continue to reduce our operating expenses as a percentage of net sales as we continue the roll-out of our national warehouse management and procurement system upgrade. We first launched this system upgrade at our Lancaster, Texas facility in September 2010, and we converted our Ridgefield, Washington facility in July 2012. We expect to install this system in our Auburn, Washington facility in the fourth quarter of fiscal 2013 and to complete the roll out of this system upgrade in all of our distribution centers by the end of fiscal 2016.

Operating Income

Operating income increased approximately 10.7%, or \$5.2 million, to \$53.9 million for the three months ended April 27, 2013, from \$48.6 million for the three months ended April 28, 2012. The increase in operating income is primarily attributable to the net sales growth and operating expense controls discussed above. As a percentage of net sales, operating income was 3.4% for the three months ended April 27, 2013 compared to 3.5% for the three months ended April 28, 2012. The decrease in operating income as a percentage of net sales is partially attributable to the \$1.5 million in Auburn, Washington-related labor action costs incurred in the three months ended April 27, 2013.

Other Expense (Income)

Other expense (income) increased \$0.8 million to \$1.6 million for the three months ended April 27, 2013, from \$0.7 million for the three months ended April 28, 2012. Interest expense for the three months ended April 27, 2013 was \$1.6 million compared to \$1.1 million for the three months ended April 28, 2012. Interest income was \$0.1 million for the three months ended April 27, 2013 compared to \$0.2 million for the three months ended April 28, 2012.

Provision for Income Taxes

Our effective income tax rate was 39.5% and 39.4% for the three months ended April 27, 2013 and April 28, 2012, respectively. The increase in the effective income tax rate for the three months ended April 27, 2013 was driven by an unfavorable discrete item of \$1.0 million primarily related to adjustments of the return to provision and changes in unrecognized benefits, offset by a benefit for a reduction in effective state tax rates.

Net Income

Reflecting the factors described in more detail above, net income increased \$2.6 million to \$31.6 million, or \$0.64 per diluted share, for the three months ended April 27, 2013, compared to \$29.0 million, or \$0.59 per diluted share, for the three months ended April 28, 2012.

Nine Months Ended April 27, 2013 Compared To Nine Months Ended April 28, 2012

Net Sales

Our net sales increased approximately 13.6%, or \$529.6 million, to \$4.4 billion for the nine months ended April 27, 2013, from \$3.9 billion for the nine months ended April 28, 2012. This increase was primarily due to the same factors that contributed to our sales growth for the quarter ended April 27, 2013, including growth in our wholesale segment of \$525.7 million. Our net sales growth is due to the continued growth of the natural products industry in general, increased market share as a result of our focus on service and value added services, and the inclusion of a broader selection of products, including specialty food products, in our distribution centers. We also benefited from the inclusion of \$38.0 million in net sales for the nine months ended April 27, 2013 resulting from the three asset acquisitions we completed during the first quarter of fiscal 2013. Net sales also benefited from food price inflation of approximately 2.0% that we experienced in the nine months ended April 27, 2013 compared to price levels in the prior year comparable period.

Our net sales by customer type for the nine months ended April 27, 2013 and April 28, 2012 were as follows (in millions):

Customer Type	Net Sales for the Nine Months Ended					
	April 27, 2013	% of Net Sales	April 28, 2012	% of Net Sales		
Independently owned natural products retailers	\$1,485	34	% \$1,368	35		%
Supernatural chains	1,618	37	% 1,401	36		%
Conventional supermarkets	1,094	25	% 931	24		%
Other	225	4	% * 192	5		%
Total	\$4,422	100	% \$3,892	100		%

*Total reflects rounding

Net sales to the supernatural chain channel for the nine months ended April 27, 2013 increased by approximately \$217 million, or 15%, as compared to the prior fiscal year's comparable period, and accounted for approximately 37% of our total net sales for the nine months ended April 27, 2013 compared to 36% for the nine months ended April 28, 2012. The increase in net sales to Whole Foods Market is due to increases in same-store sales, as well as new store openings.

Net sales to conventional supermarkets for the nine months ended April 27, 2013 increased by approximately \$163 million, or 18%, from the nine months ended April 28, 2012, and represented approximately 25% of total net sales in the nine months ended April 27, 2013 compared to 24% in the nine months ended April 28, 2012. The increase in net sales to conventional supermarkets is primarily due to our newest national customer we began servicing during the first quarter of fiscal 2012 as part of our strategy to be the sole supplier of natural, organic and specialty products to our conventional supermarket customers.

Net sales to our independent retailer channel increased by approximately \$117 million, or 9% during the nine months ended April 27, 2013 compared to the nine months ended April 28, 2012. While net sales in this channel have increased, they have grown at a slower rate than net sales in our supernatural and conventional supermarket channels, and therefore represent a lower percentage of our total net sales.

Other net sales, which include sales to foodservice and international customers, as well as sales through our retail division, manufacturing division, and the Company's branded product lines, increased by approximately \$33 million, or 17% during the nine months ended April 27, 2013 and accounted for approximately 4% of total net sales for the nine months ended April 27, 2013 and 5% for the nine months ended April 28, 2012. This growth is due to expanded sales with our existing foodservice partners, and strong sales from our Earth Origins Market retail division.

Cost of Sales and Gross Profit

Our gross profit increased approximately 8.2%, or \$55.8 million, to \$740.6 million for the nine months ended April 27, 2013, from \$684.8 million for the nine months ended April 28, 2012. Our gross profit as a percentage of net sales was 16.7% for the nine months ended April 27, 2013, compared to 17.6% for the nine months ended April 28, 2012. The decline in gross profit as a percentage of net sales is due to the continued change in the mix of net sales by channel that began during the second fiscal quarter of 2010, as well as a reduced number of promotional opportunities and the increased sales of customers' private label brands, which carry a lower gross margin, combined with higher inbound freight costs. Our decision to maintain higher service levels despite greater supplier out of stocks also negatively impacted our gross margin in the first nine months of fiscal 2013 due to increased costs to move freight between our facilities.

Our gross profits are generally higher on net sales to independently owned retailers and lower on net sales in our conventional supermarket and supernatural channels. For the nine months ended April 27, 2013 approximately \$380 million of our \$530 million total net sales growth was from increased net sales in the conventional supermarket and supernatural channels. As a result, approximately 62% of our total net sales in the nine months ended April 27, 2013 were to the conventional supermarket and supernatural channels compared to approximately 60% in the nine months ended April 28, 2012. This change in sales mix contributed to the decline in gross profit as a percentage of net sales during the nine months ended April 27, 2013.

Operating Expenses

Our total operating expenses increased approximately 6.7%, or \$38.6 million, to \$611.2 million for the nine months ended April 27, 2013, from \$572.6 million for the nine months ended April 28, 2012. The increase in total operating expenses for the nine months ended April 27, 2013 was primarily due to higher sales volume, approximately \$6.1 million in labor action related costs at our Auburn, Washington facility, approximately \$1.6 million related to the termination of a licensing agreement and write-off of the associated intangible asset, and \$2.5 million in non-cash straight-line rent expense associated with our new Denver, Colorado area distribution facility. The nine months ended April 28, 2012 was impacted by \$5.3 million in severance and other costs related to the divestiture of our conventional non-food and general merchandise lines of business and approximately \$1.7 million in start-up expenses incurred in connection with onboarding a large national conventional supermarket customer. In addition, our bad debt expense for the nine months ended April 28, 2012 included \$1.4 million associated with a bankruptcy filing by one of our customers and a default on a note receivable with one of our customers.

Total operating expenses for the nine months ended April 27, 2013 include share-based compensation expense of \$11.0 million, compared to \$9.0 million in the nine months ended April 28, 2012. Share-based compensation expense was higher during the nine months ended April 27, 2013 primarily due to expense recognized for new two-year performance-based equity awards for our senior executives.

As a percentage of net sales, total operating expenses decreased to approximately 13.8% for the nine months ended April 27, 2013, from approximately 14.7% for the nine months ended April 28, 2012. The decrease in total operating expenses as a percentage of net sales was primarily attributable to higher leverage on fixed costs, the growth in the supernatural and conventional supermarket channels which in general have lower operating expenses, as well as expense control programs across all of our divisions. Our operating expenses as a percentage of net sales were also negatively impacted by certain items in each period which are specifically noted above. We were able to manage our fuel costs despite rising prices as a result of our continued efforts to lock in the price of a portion of our expected fuel usage through fixed price fuel supply agreements.

Operating Income

Operating income increased approximately 15.3%, or \$17.2 million, to \$129.4 million for the nine months ended April 27, 2013, from \$112.2 million for the nine months ended April 28, 2012. As a percentage of net sales, operating income was 2.9% for each of the nine months ended April 27, 2013 and April 28, 2012.

We anticipate net sales growth in our conventional supermarket and supernatural channels will continue to outpace growth in the independent and other channels. We expect that our expansion with Whole Foods Market and our opportunities in the conventional supermarket channel will continue to generate lower gross profit percentages than our historical rates. We will seek to fully offset these reductions in gross profit percentages by reducing our operating expenses as a percent of net sales primarily through improved efficiencies in our supply chain and improvements to our IT infrastructure.

Other Expense (Income)

Other expense was \$8.6 million and \$3.0 million for the nine months ended April 27, 2013 and April 28, 2012, respectively. Interest expense was \$3.9 million and \$3.6 million for the nine months ended April 27, 2013 and April 28, 2012, respectively. Interest income was \$0.5 million in the nine months ended April 27, 2013 compared to \$0.6 million in the nine months ended April 28, 2012. During the nine months ended April 27, 2013, other expense includes \$4.9 million recorded in connection with an agreement to settle a multi-state unclaimed property audit.

Provision for Income Taxes

Our effective income tax rate was 37.3% and 39.4% for the nine months ended April 27, 2013 and April 28, 2012, respectively. The decrease in the effective income tax rate for the nine months ended April 27, 2013 was primarily driven by a net benefit of \$1.9 million from certain discrete tax items. Of this amount, a net \$2.9 million benefit was recorded during the first quarter of fiscal 2013 and consisted of a tax benefit from the net reversal of uncertain tax positions of \$3.7 million, primarily due to audit resolutions during the first quarter of fiscal 2013, offset by other adjustments of \$0.8 million. During the third quarter of fiscal 2013, we recorded an unfavorable discrete item of \$1.0 million primarily related to adjustments of the return to provision and changes in unrecognized tax benefits. Absent these discrete tax items, the nine months ended April 27, 2013 annual effective tax rate would have been 38.9%.

Net Income

Reflecting the factors described in more detail above, net income increased approximately \$9.6 million to \$75.8 million, or \$1.53 per diluted share, for the nine months ended April 27, 2013, compared to \$66.2 million, or \$1.35 per diluted share, for the nine months ended April 28, 2012.

Liquidity and Capital Resources

We finance our day to day operations and growth primarily with cash flows from operations, borrowings under our amended and restated revolving credit facility, operating leases, trade payables and bank indebtedness. In addition, from time to time, we may issue equity and debt securities to finance our operations and acquisitions. We believe that our cash on hand and available credit through our amended and restated revolving credit facility as discussed below is sufficient to finance our operations and planned capital expenditures over the next twelve months. The condensed consolidated statement of cash flows present proceeds and borrowings related to the Company's revolving credit facility on a gross basis. We expect to generate between \$50 million to \$100 million in cash flow from operations in each of fiscal 2013 and fiscal 2014. We intend to continue to utilize this cash generated from operations to fund acquisitions, fund investment in working capital and capital expenditure needs, and reduce our debt levels. We intend to manage capital expenditures to no more than approximately 1.3% of net sales for fiscal 2013. We expect to finance these requirements with cash generated from operations and borrowings under our amended and restated revolving credit facility. Our planned capital projects will provide both new and expanded facilities as well as technology that we believe will provide us with increased efficiency and the capacity to continue to support the growth of our customer base. Future investments and acquisitions may be financed through equity, long-term debt negotiated at the time of the potential acquisition or borrowings under our amended and restated revolving credit facility.

The Company has not recorded a tax provision for U.S. tax purposes on UNFI Canada profits as they have no assessable profits arising in or derived from the United States and we intend to indefinitely reinvest accumulated earnings in the UNFI Canada operations for the foreseeable future.

In May 2012, we amended and restated our revolving credit facility, pursuant to which we now have a \$500 million amended and restated revolving credit facility which matures on May 24, 2017, of which up to \$450.0 million is available to the Company's U.S. subsidiaries and up to \$50.0 million is available to UNFI Canada. This amended and restated revolving credit facility also provides a one-time option, subject to approval by the lenders under the amended and restated revolving credit facility, to increase the borrowing base by up to an additional \$100 million. The borrowings of the U.S. portion of the amended and restated revolving credit facility accrue interest, at our option, at either (i) a base rate (generally defined as the highest of (x) the Bank of America Business Capital prime rate, (y) the average overnight federal funds effective rate plus one-half percent (0.50%) per annum and (z) one-month LIBOR plus one percent (1%) per annum plus an initial margin of 0.50%), or (ii) LIBOR for one, two, three or six months or, if approved by all affected lenders, nine months plus an initial margin of 1.50%. The borrowings on the Canadian portion of the amended and restated revolving credit facility for Canadian swing-line loans, Canadian overadvance loans or Canadian protective advances accrue interest, at our option, at either (i) a prime rate (generally defined as the highest of (x) 0.50% over 30-day Reuters Canadian Deposit Offering Rate for bankers' acceptances, (y) the prime rate of Bank of America, N.A.'s Canada branch, and (z) a bankers' acceptance equivalent rate for a one month interest period plus 1.00% plus an initial margin of 0.50%), or (ii) the CDOR rate, and an initial margin of 1.50%. All other borrowings on the Canadian portion of the amended and restated revolving credit facility must exclusively accrue interest under the CDOR rate plus the applicable margin. The amended and restated revolving credit facility supports our working capital requirements in the ordinary course of business and provides capital to grow our business organically or through acquisitions. Our borrowing base is determined as the lesser of (1) \$500 million or (2) the fixed percentages of our previous fiscal month-end eligible accounts receivable and inventory levels. As of April 27, 2013, our borrowing base, which was calculated based on our eligible accounts receivable and inventory levels, was \$484.9 million. As of April 27, 2013, we had \$174.8 million of borrowings outstanding under our amended and restated revolving credit facility and \$34.1 million in letter of credit commitments and reserves which reduced our available borrowing capacity under our amended and restated revolving credit facility on a dollar for dollar basis. Our resulting remaining availability was \$275.9 million as of April 27, 2013. The amended and restated revolving credit facility subjects us to a springing minimum fixed charge coverage ratio (as defined in the underlying credit agreement) of 1.0 to 1.0 calculated at the end of each of our fiscal quarters on a rolling four quarter basis when aggregate availability (as

defined in the underlying credit agreement) is less than the greater of (i) \$35.0 million and (ii) 10% of the aggregate borrowing base. We were not subject to the fixed charge coverage ratio covenant during the three months ended April 27, 2013.

In connection with our entering into the amended and restated revolving credit facility described above, we used a portion of our availability to pay off our term loan agreement, which was to mature on July 28, 2012. Concurrently, we settled our interest rate swap entered into in July 2005 by paying \$0.3 million during the fourth quarter of fiscal 2012. Our amended and restated revolving credit facility includes borrowing rates that are approximately 50 to 100 basis points higher than our prior revolving credit facility, depending on remaining availability. However, we do not expect our overall interest expense to increase significantly if rates remain relatively stable as we have terminated our higher fixed rate interest rate swap, which covered our term loan that we repaid in May 2012.

Net cash used in operations was \$36.0 million for the nine months ended April 27, 2013, an increase of \$1.1 million from the \$34.9 million used in operations for the nine months ended April 28, 2012. The primary reasons for the net cash used in operations for the nine months ended April 27, 2013 were an increase in inventories of \$143.6 million and an increase in accounts receivable of \$58.5 million due to sales growth during the year, partially offset by an increase in accounts payable of \$51.6 million and net income of \$75.8 million. The primary reasons for the net cash used in operations for the nine months ended April 28, 2012 were an increase in inventories of \$123.3 million and an increase in accounts receivable of \$81.5 million due to our sales growth during the year, partially offset by an increase in accounts payable of \$30.5 million and net income of \$66.2 million. Days in inventory decreased slightly to 49 days at April 27, 2013, compared to 50 days at July 28, 2012. Days sales outstanding decreased slightly to 21 days at April 27, 2013 compared to 22 days at July 28, 2012. Working capital increased by \$103.1 million, or 16.8%, to \$715.8 million at April 27, 2013, compared to working capital of \$612.7 million at July 28, 2012.

Net cash used in investing activities increased \$18.9 million to \$41.9 million for the nine months ended April 27, 2013, compared to \$23.0 million for the nine months ended April 28, 2012. The increase from the fiscal nine months ended April 28, 2012 was primarily due to an increase in capital spending associated with our Logan, New Jersey and Denver, Colorado distribution centers coupled with our three acquisitions during the first quarter of fiscal 2013.

Net cash provided by financing activities was \$75.4 million for the nine months ended April 27, 2013. As noted above, we present proceeds and borrowings related to the Company's revolving credit facility on a gross basis. The net cash provided by financing activities was primarily due to gross borrowings under our revolving credit line of \$478.7 million, partially offset by repayments of our revolving credit line of \$418.6 million, as well as increases in bank overdrafts of \$17.4 million. Net cash provided by financing activities was \$55.6 million for the nine months ended April 28, 2012, primarily due to gross borrowings under our revolving credit line of \$888.2 million, partially offset by repayments of our revolving credit line of \$838.2 million, as well as increases in bank overdrafts of \$5.4 million.

From time-to-time we enter into fixed price fuel supply agreements. As of April 27, 2013, we had entered into agreements which require us to purchase a total of approximately 5.2 million gallons of diesel fuel at prices ranging from \$3.33 to \$3.99 per gallon through July 2013. As of April 28, 2012, we had entered into agreements which required us to purchase a total of approximately 3.6 million gallons of diesel fuel for the period August 2011 through July 2012 at prices ranging from \$3.56 to \$3.90 (including taxes) per gallon. All of these fixed price fuel agreements qualified and are accounted for using the "normal purchase" exception under ASC 815, Derivatives and Hedging as physical deliveries will occur rather than net settlements, and therefore the fuel purchases under these contracts have been and will be expensed as incurred and included within operating expenses.

Contractual Obligations

There have been no material changes to our contractual obligations and commercial commitments during the three months ended April 27, 2013 from those disclosed in our Annual Report on Form 10-K for the year ended July 28, 2012.

Seasonality

While we have historically seen an increase in our inventory during the first quarter of our fiscal year, generally, we do not experience any material seasonality. However, our sales and operating results may vary significantly from quarter to quarter due to factors such as changes in our operating expenses, management's ability to execute our operating and growth strategies, personnel changes, demand for natural products, supply shortages and general economic conditions.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Our exposure to market risk results primarily from fluctuations in interest rates on our borrowings and price increases in diesel fuel. As more fully described in Note 6 to the condensed consolidated financial statements, we previously used an interest rate swap agreement to modify variable rate obligations to fixed rate obligations for a portion of our debt. In May 2012, we terminated this swap agreement in connection with repaying our outstanding term loan. In addition, from time to time we have used fixed price purchase contracts to lock the pricing on a portion of our expected diesel fuel usage. There have been no material changes to our exposure to market risks from those disclosed in our Annual Report on Form 10-K for the year ended July 28, 2012.

Item 4. Controls and Procedures

(a) Evaluation of disclosure controls and procedures. We carried out an evaluation, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended) as of the end of the period covered by this quarterly report on Form 10-Q (the "Evaluation Date"). Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of the Evaluation Date, our disclosure controls and procedures were effective.

(b) Changes in internal controls. There has been no change in our internal control over financial reporting that occurred during the third quarter of fiscal 2013 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

From time to time we are involved in routine litigation that arises in the ordinary course of our business. In the opinion of management, the outcome of pending litigation is not expected to have a material adverse effect on our results of operations or financial condition.

Item 1A. Risk Factors

There have been no material changes to our risk factors contained in Part I, Item 1A, "Risk Factors," of our Annual Report on Form 10-K for the fiscal year ended July 28, 2012.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information

None.
