EURONET WORLDWIDE, INC. AND SUBSIDIARIES  
NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

(1) GENERAL

Organization

Euronet Worldwide, Inc. (together with its subsidiaries, the “Company” or “Euronet”) is a leading electronic payments provider. Euronet offers payment and transaction processing and distribution solutions to financial institutions, retailers, service providers and individual consumers. Euronet’s primary product offerings include comprehensive automated teller machine (“ATM”), point-of-sale (“POS”), card outsourcing, card issuing and merchant acquiring services; electronic distribution of prepaid mobile airtime and other electronic payment products; and global money transfer services.

Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared from the records of the Company, in conformity with accounting principles generally accepted in the U.S. (“U.S. GAAP”) and pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”). In the opinion of management, such unaudited consolidated financial statements contain all adjustments (consisting of normal interim closing procedures) necessary to present fairly on a consolidated basis the financial position of the Company as of June 30, 2015, the results of its operations for the three and six months ended June 30, 2015 and 2014 and cash flows for the six months ended June 30, 2015 and 2014. The unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements of the Company for the year ended December 31, 2014, including the notes thereto, set forth in the Company’s 2014 Annual Report on Form 10-K. Certain amounts in prior years have been reclassified to conform to the current year’s presentation.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the reported period. Significant items subject to such estimates and assumptions include computing income taxes, estimating the useful lives and potential impairment of long-lived assets and goodwill, as well as allocating the purchase price to assets acquired and liabilities assumed in acquisitions and revenue recognition. Actual results could differ from those estimates. The results of operations for interim periods are not necessarily indicative of the results to be expected for the full year ending December 31, 2015.

Seasonality

Euronet’s EFT Processing Segment experiences its heaviest demand for dynamic currency conversion services during the third quarter of the fiscal year, coinciding with tourism season. Additionally, the EFT Processing and epay Segments are impacted by seasonality during the fourth quarter and first quarter of each year due to higher transaction levels during the holiday season and lower levels following the holiday season. Seasonality in the Money Transfer Segment varies by regions of the world. In most markets, Euronet usually experiences increased demand for money transfer services from the month of May through the fourth quarter of each year, coinciding with the increase in worker migration patterns and various holidays, and experiences its lowest transaction levels during the first quarter of each year.

(2) RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

Recently Issued

In July 2015, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update No. 2015-11, Inventory (“ASU 2015-11”), which simplifies the valuation of inventory by using the lower of cost or net realizable value. ASU 2015-11 will become effective for the Company on January 1, 2017 and early adoption is permitted. The guidance is to be applied on a prospective basis. The adoption of ASU 2015-11 is not expected to have a significant impact on the Company’s financial position, results of operations or cash flows.

In April 2015, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update No. 2015-03, Interest - Imputation of Interest ("ASU 2015-03"), which requires that transaction costs related to the issuance of debt be deducted from the carrying value of the financial liability and not recorded as separate assets. ASU 2015-03 will become effective for the Company on January 1, 2016 and early adoption is permitted. The guidance is to be applied on a retrospective basis. Euronet has debt issuance costs which will be reclassified upon adoption of the guidance, but it is not expected to have a significant impact on the Company's financial position and it will have no impact upon the Company's results of operations or cash flows.

In May 2014, the FASB issued Accounting Standards Update No. 2014-09, Revenue from Contracts with Customers ("ASU 2014-09"), which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of

Table of Contents

promised goods or services to customers. ASU 2014-09 will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective. In July 2015, the FASB approved a one-year deferral of the effective date of the new revenue recognition standard. The new standard will become effective for the Company on January 1, 2018 and the Company has the option to adopt it effective January 1, 2017. The standard permits the use of either the retrospective or cumulative effect transition method. The Company is evaluating the effect that ASU 2014-09 will have on its consolidated financial statements and related disclosures. The Company has not yet selected an adoption date, a transition method nor has it determined the effect of the standard on its ongoing financial reporting.

**(3) STOCKHOLDERS' EQUITY****Earnings Per Share**

Basic earnings per share has been computed by dividing earnings available to common stockholders by the weighted average number of common shares outstanding during the respective period. Diluted earnings per share has been computed by dividing earnings available to common stockholders by the weighted average shares outstanding during the respective period, after adjusting for any potential dilution of options to purchase the Company's common stock, assumed vesting of restricted stock and the assumed conversion of the Company's convertible debentures. The following table provides the computation of diluted weighted average number of common shares outstanding:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
Computation of diluted weighted average shares outstanding:				
Basic weighted average shares outstanding	51,935,757	51,675,775	51,804,459	51,231,997
Incremental shares from assumed exercise of stock options and vesting of restricted stock	1,722,747	2,097,984	1,688,121	2,047,785
Diluted weighted average shares outstanding	53,658,504	53,773,759	53,492,580	53,279,782

The table includes the impact of all stock options and restricted stock that are dilutive to the Company's weighted average common shares outstanding during the three and six months ended June 30, 2015 and 2014. The calculation of diluted earnings per share excludes stock options or shares of restricted stock that are anti-dilutive to the Company's weighted average common shares outstanding of approximately 620,000 and 888,000 for the three and six months ended June 30, 2015, respectively, and approximately 674,000 for both the three and six months ended June 30, 2014.

During the six months ended June 30, 2015, the Company had convertible notes outstanding that, if converted, would have had a potentially dilutive effect on its common stock. At issuance, the Company stated its intent to settle any conversion of these notes by paying cash for the principal value and issuing common stock for any conversion value in excess of the principal value. As of June 30, 2015, and currently, the Company maintains the intent and ability to settle any conversion as stated. Accordingly, the convertible notes would only have a dilutive effect if the market price per share of common stock exceeds the conversion price per share of common stock. Therefore, according to Accounting Standards Codification ("ASC") Topic 260, Earnings per Share, these notes were not dilutive to earnings per share for the three and six months ended June 30, 2015. See Note 7, Debt Obligations, for more information about the convertible notes.

**Accumulated Other Comprehensive Loss**

Accumulated other comprehensive loss consists entirely of foreign currency translation adjustments. The Company recorded a foreign currency translation gain of \$20.4 million and a loss of \$34.9 million for the three and six months ended June 30, 2015, respectively, and gains of \$4.1 million and \$7.3 million for the three and six months ended June 30, 2014, respectively. There were no reclassifications of foreign currency translation into the consolidated statements of income for the three and six months ended June 30, 2015 and 2014.

Table of Contents

## (4) ACQUISITION

On June 17, 2015, the Company completed the acquisition of all of the capital stock of IME (M) Sdn Bhd and certain affiliated companies ("IME") pursuant to a Share Purchase Agreement (the "Purchase Agreement") among the Company and the selling shareholders of IME (the "Sellers"). IME is a leading Malaysian-based money transfer provider and provides the Money Transfer Segment with immediate entry into the Asian and Middle East send markets.

Under the terms of the Purchase Agreement, the Sellers received purchase consideration (the "Purchase Consideration") of \$79.6 million in cash and 49,941 shares of Euronet common stock, with a fair value at date of acquisition of \$3.0 million. A portion of the Purchase Consideration was placed in escrow at closing as security for the Sellers' indemnification and other obligations under the Purchase Agreement. Any Purchase Consideration remaining in escrow will be released to the Sellers at various defined dates over five years following the closing date, net of any pending indemnification or other claims under the Purchase Agreement.

The Purchase Consideration was allocated to the assets acquired and liabilities assumed, including identifiable intangible assets, based on their respective fair values at the date of acquisition. The valuation of the acquired net assets remains preliminary while management completes its valuation, particularly the valuation of acquired intangible assets. None of the goodwill or intangible asset amounts are expected to be deductible for income tax purposes. Pro-forma results of operations, assuming this acquisition was made at the beginning of the earliest period presented, have not been presented because the effect of this acquisition was not material to the Company's results. The net assets of the IME and its results from operations are included in the Money Transfer Segment's results. The following table summarizes the estimated fair values of the assets acquired and liabilities assumed as of the acquisition date.

(in thousands)	As of June 17, 2015
Cash and cash equivalents	\$33,229
Other current assets	17,052
Intangible assets	35,130
Other long-term assets	5,253
Total assets acquired	90,664
Trade accounts payable	(1,894 )
Accrued expenses and other current liabilities	(1,555 )
Settlement obligations and customer deposits	(27,700 )
Deferred tax liabilities	(9,122 )
Other long-term liabilities	(858 )
Total liabilities assumed	(41,129 )
Goodwill	33,092
Net assets acquired	\$82,627

The intangible assets of IME are being amortized on a straight-line basis, and the estimated fair values consist of the following:

(in thousands)	Fair Value	Estimated Useful Life
Customer relationships	\$33,940	8 years
Trade names	650	2 years
Non-compete agreements	540	5 years
Total intangible assets	\$35,130	

Table of Contents**(5) GOODWILL AND ACQUIRED INTANGIBLE ASSETS, NET**

A summary of acquired intangible assets and goodwill activity for the six months ended June 30, 2015 is presented below:

(in thousands)	Acquired Intangible Assets	Goodwill	Total Intangible Assets
Balance as of December 31, 2014	\$ 158,267	\$ 599,863	\$ 758,130
Increases (Decreases):			
Acquisition	35,130	33,092	68,222
Amortization	(11,446 )	—	(11,446 )
Other (primarily changes in foreign currency exchange rates)	(5,899 )	(27,690 )	(33,589 )
Balance as of June 30, 2015	\$ 176,052	\$ 605,265	\$ 781,317

Estimated amortization expense on intangible assets with finite lives, before income taxes, as of June 30, 2015, is expected to total \$14.3 million for the remainder of 2015, \$19.0 million for 2016, \$17.1 million for 2017, \$15.0 million for 2018, \$14.3 million for 2019 and \$13.9 million for 2020.

The Company's annual goodwill impairment test is performed during the fourth quarter of its fiscal year. The annual impairment test for the year ended December 31, 2014 resulted in no impairment charge.

Determining the fair value of reporting units requires significant management judgment in estimating future cash flows and assessing potential market and economic conditions. It is reasonably possible that the Company's operations will not perform as expected, or that the estimates or assumptions included in the 2014 annual impairment test could change, which may result in the Company recording material non-cash impairment charges during the year in which these changes take place.

**(6) ACCRUED EXPENSES AND OTHER CURRENT LIABILITIES**

Accrued expenses and other current liabilities consist of the following:

(in thousands)	As of June 30, 2015	December 31, 2014
Accrued expenses	\$ 112,689	\$ 97,115
Money transfer settlement obligations	184,934	137,285
Accrued amounts due to mobile operators and other content providers	46,751	64,839
Derivative liabilities	47,422	36,439
Deferred income taxes	1,275	683
Total	\$ 393,071	\$ 336,361

Table of Contents

## (7) DEBT OBLIGATIONS

A summary of debt obligation activity for the six months ended June 30, 2015 is presented below:

(in thousands)	Revolving Credit Facilities	Other Debt Obligations	Capital Leases	1.5% Convertible Debentures Due 2044	Term Loan A	Total
Balance as of December 31, 2014	\$5,316	\$ 6,035	\$4,364	\$ 337,986	\$72,187	\$425,888
Increases (decreases):						
Net borrowings (repayments)	1,743	3,807	1,719	—	(2,344)	4,925
Accretion	—	—	—	4,882	—	4,882
Capital lease interest	—	—	173	—	—	173
Foreign currency exchange gain	962	(466)	(276)	—	—	220
Balance as of June 30, 2015	8,021	9,376	5,980	342,868	69,843	436,088
Less — current maturities	—	(8,559)	(2,241)	—	(6,094)	(16,894)
Long-term obligations as of June 30, 2015	\$8,021	\$ 817	\$3,739	\$ 342,868	\$63,749	\$419,194

## Credit Facility

As of June 30, 2015, the Company had a \$675 million senior secured credit facility (the "Credit Facility") consisting of a \$600 million revolving credit facility and a \$75 million term loan ("Term Loan A"), which had been reduced to \$69.8 million through principal amortization payments. The Credit Facility expires April 9, 2019.

Interest on borrowings under the revolving credit facility and Term Loan A varies based upon the Company's consolidated total leverage ratio, as defined in the Company's credit agreement, and during the second quarter of 2015 was based on a margin over the London Inter-Bank Offered Rate ("LIBOR") rate or a margin over a base rate, as selected by the Company, with the applicable margin ranging from 1.375% to 2.375% for LIBOR loans or 0.375% to 1.375% for base rate loans. Accordingly, the weighted average interest rate for borrowings outstanding under the Company's revolving credit facility and Term Loan A was 10.75% and 1.81%, respectively, as of June 30, 2015, excluding amortization of deferred financing costs.

## Convertible Debt

On October 30, 2014, the Company completed the sale of \$402.5 million of Convertible Senior Notes due 2044 ("Convertible Notes"). The Convertible Notes have an interest rate of 1.5% per annum payable semi-annually in April and October, and are convertible into shares of Euronet Common Stock at a conversion price of approximately \$72.18 per share if certain conditions are met (relating to the closing prices of Euronet Common Stock exceeding certain thresholds for specified periods). Holders of the Convertible Notes have the option to require the Company to purchase their notes at par on October 1, 2020, and have additional options to require the Company to purchase their notes at par on October 1, 2024, 2029, 2034, and 2039, or upon a change in control of the Company. In connection with the issuance of the Convertible Notes, the Company recorded \$10.7 million in debt issuance costs, which are being amortized through October 1, 2020.

In accordance with Accounting Standards Codification ("ASC") 470-20-30-27, proceeds from the issuance of convertible debt are allocated between debt and equity components so that debt is discounted to reflect the Company's nonconvertible debt borrowing rate. ASC 470-20-35-13 requires the debt discount to be amortized over the period the convertible debt is expected to be outstanding as additional non-cash interest expense. The allocation resulted in an increase to additional paid in capital of \$66.1 million.

Contractual interest expense was \$1.5 million and \$3.0 million for the three and six months ended June 30, 2015. Accretion expense was \$2.5 million and \$4.9 million for the three and six months ended June 30, 2015. The effective interest rate was 4.7% for the three and six months ended June 30, 2015. As of June 30, 2015, the unamortized discount was \$59.6 million, and will be amortized through October 1, 2020.

## (8) DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

The Company is exposed to foreign currency exchange risk resulting from (i) the collection of funds or the settlement of money transfer transactions in currencies other than the U.S. Dollar, (ii) derivative contracts written to its customers in connection with providing cross-currency money transfer services and (iii) short-term borrowings that are payable in currencies other than the U.S. dollar. The Company enters into foreign currency derivative contracts, primarily foreign currency forwards and cross-

Table of Contents

currency swaps, to minimize its exposure related to fluctuations in foreign currency exchange rates. As a matter of Company policy, the derivative instruments used in these activities are economic hedges and are not designated as hedges under ASC Topic 815, Derivatives and Hedging, primarily due to either the relatively short duration of the contract term or the effects of fluctuations in currency exchange rates are reflected concurrently in earnings for both the derivative instrument and the transaction and have an offsetting effect.

## Foreign currency exchange contracts - Ria Operations

In the United States, the Company uses short-duration foreign currency forward contracts, generally with maturities up to 14 days, to offset the fluctuation in foreign currency exchange rates on the collection of money transfer funds between initiation of a transaction and its settlement. Due to the short duration of these contracts and the Company's credit profile, the Company is generally not required to post collateral with respect to these foreign currency forward contracts. Most derivative contracts executed with counterparties in the U.S. are governed by an International Swaps and Derivatives Association agreement that includes standard netting arrangements; therefore, asset and liability positions from forward contracts and all other foreign exchange transactions with the same counterparty are net settled upon maturity.

As of June 30, 2015, the Company had foreign currency forward contracts outstanding in the U.S. with a notional value of \$158 million, primarily in Australian dollars, Canadian dollars, British pounds, euros and Mexican pesos.

## Foreign currency exchange contracts - HiFX Operations

HiFX writes derivative instruments, primarily foreign currency forward contracts and cross-currency swaps, mostly with counterparties comprised of individuals and small-to-medium size businesses and derives a currency margin from this activity as part of its operations. HiFX aggregates its foreign currency exposures arising from customer contracts and hedges the resulting net currency risks by entering into offsetting contracts with established financial institution counterparties. Foreign exchange revenues from HiFX's total portfolio of positions were \$15.9 million and \$31.6 million for the three and six months ended June 30, 2015, respectively, and \$7.1 million for the three months ended June 30, 2014. All of the derivative contracts used in the Company's HiFX operations are economic hedges and are not designated as hedges under ASC Topic 815, Derivatives and Hedging. The duration of these derivative contracts is generally less than one year.

The fair value of HiFX's total portfolio of positions can change significantly from period to period based on, among other factors, market movements and changes in customer contract positions. HiFX manages counterparty credit risk (the risk that counterparties will default and not make payments according to the terms of the agreements) on an individual counterparty basis. It mitigates this risk by entering into contracts with collateral posting requirements and/or by performing financial assessments prior to contract execution, conducting periodic evaluations of counterparty performance and maintaining a diverse portfolio of qualified counterparties. HiFX does not expect any significant losses from counterparty defaults.

The aggregate equivalent U.S. dollar notional amounts of foreign currency derivative customer contracts held by the Company in its HiFX operations as of June 30, 2015 was approximately \$770 million. The majority of customer contracts are written in major currencies such as the euro, Canadian dollar, British pound, and Australian dollar.

## Balance Sheet Presentation

The following table summarizes the fair value of the derivative instruments as recorded in the Consolidated Balance Sheets as of the dates below:

	Asset Derivatives		Liability Derivatives			
	Balance Sheet Location	Fair Value June 30, 2015	December 31, 2014	Balance Sheet Location	Fair Value June 30, 2015	December 31, 2014

## Income Statement Presentation

The following tables summarize the location and amount of gains and losses of derivatives in the Consolidated Statements of Income for the three and six months ended June 30, 2015 and 2014:

(in thousands)	Location of Gain (Loss) Recognized in Income on Derivative Contracts	Amount of Loss Recognized in Income on Derivative Contracts (a)			
		Three Months Ended		Six Months Ended	
		June 30, 2015	2014	June 30, 2015	2014
		\$(1,923 )	\$(406 )	\$(34 )	\$(1,153 )

Foreign currency exchange contracts - Ria Operations      Foreign currency exchange loss, net

(a) The Company enters into derivative contracts such as foreign currency exchange forwards and cross-currency swaps as part of its HiFX operations. These derivative contracts are excluded from this table as they are part of the broader disclosure of foreign currency exchange revenues for this business discussed above. See Note 9, Fair Value Measurements, for the determination of the fair values of derivatives.

Table of Contents**(9) FAIR VALUE MEASUREMENTS**

Fair value measurements used in the unaudited consolidated financial statements are based upon the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value hierarchy distinguishes between (1) market participant assumptions developed based on market data obtained from independent sources (observable inputs) and (2) an entity's own assumptions about market participant assumptions developed based on the best information available in the circumstances (unobservable inputs). The fair value hierarchy consists of three broad levels, which gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are described below:

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2 – Valuations based on quoted prices for similar assets or liabilities, quoted prices in markets that are not active, or other inputs that are observable or can be corroborated by observable data for substantially the full term of the assets or liabilities.

Level 3 – Unobservable inputs in which little or no market activity exists, therefore requiring an entity to develop its own assumptions about the inputs that market participants would use in pricing.

The following table details financial assets and liabilities measured and recorded at fair value on a recurring basis:

As of June 30, 2015					
(in thousands)	Balance Sheet Classification	Level 1	Level 2	Level 3	Total
Assets					
Foreign currency exchange contracts	Other current assets	\$—	\$50,881	\$—	\$50,881
Liabilities					
Foreign currency exchange contracts	Other current liabilities	\$—	\$(47,422)	\$—	\$(47,422)
As of December 31, 2014					
(in thousands)	Balance Sheet Classification	Level 1	Level 2	Level 3	Total
Assets					
Foreign currency exchange contracts	Other current assets	\$—	\$41,151	\$—	\$41,151
Liabilities					
Foreign currency exchange contracts	Other current liabilities	\$—	\$(36,439)	\$—	\$(36,439)

**Other Fair Value Disclosures**

The carrying amounts of cash and cash equivalents, accounts receivable, trade accounts payable, accrued expenses and other current obligations approximate their fair values because of the relatively short-term maturities of these financial instruments. The carrying values of the Company's long-term debt (other than the Convertible Notes), including the current portion, approximate fair value because interest is primarily based on LIBOR, which resets at various intervals of less than one year. The Company estimates the fair value of the Convertible Notes using quoted prices in inactive markets for identical liabilities (Level 2). As of June 30, 2015 and December 31, 2014, the fair values of the convertible notes were \$448.5 million and \$408.0 million, respectively, with carrying values of \$342.9 million and \$338.0 million, respectively.

Table of Contents

## (10) SEGMENT INFORMATION

The Company's reportable operating segments have been determined in accordance with ASC Topic 280, Segment Reporting. The Company currently operates in the following three reportable operating segments:

1) Through the EFT Processing Segment, the Company processes transactions for a network of ATMs and POS terminals across Europe, the Middle East and Asia Pacific. The Company provides comprehensive electronic payment solutions consisting of ATM cash withdrawal services, ATM network participation, outsourced ATM and POS management solutions, credit and debit card outsourcing, dynamic currency conversion and other value added services. Through this segment, the Company also offers a suite of integrated electronic financial transaction software solutions for electronic payment and transaction delivery systems.

2) Through the epay Segment, the Company provides distribution, processing and collection services for prepaid mobile airtime and other electronic payment products in Europe, the Middle East, Asia Pacific, the United States and South America.

3) Through the Money Transfer Segment, the Company provides global money transfer services under the brand names Ria and HiFX. Ria provides global consumer-to-consumer money transfer services through a network of sending agents, Company-owned stores and a Company-owned website, disbursing money transfers through a worldwide correspondent network. HiFX offers account-to-account international payment services to high-income individuals and small-to-medium sized businesses. The Company also offers customers bill payment services, payment alternatives such as money orders and prepaid debit cards, comprehensive check cashing services, foreign currency exchange services and mobile top-up. The Company provides cash management solutions and foreign currency risk management services to small-to-medium sized businesses under the brand name HiFM.

In addition, the Company accounts for non-operating activity, most share-based compensation expense, certain intersegment eliminations and the costs of providing corporate and other administrative services in its administrative division, "Corporate Services, Eliminations and Other." These services are not directly identifiable with the Company's reportable operating segments.

The following tables present the Company's reportable segment results for the three and six months ended June 30, 2015 and 2014:

(in thousands)	For the Three Months Ended June 30, 2015				
	EFT Processing	epay	Money Transfer	Corporate Services, Eliminations and Other	Consolidated

Table of Contents

(11) INCOME TAXES

The Company's effective income tax rates were 28.1% and 29.8% for the three months ended June 30, 2015 and 2014, respectively, and 34.0% and 28.4% for the six months ended June 30, 2015 and 2014, respectively.

The Company's effective income tax rates for the three and six months ended June 30, 2015 and 2014 were lower than the applicable statutory income tax rate of 35% primarily because of the Company's U.S. income tax positions. The Company does not have a history of significant taxable income in the U.S.; therefore, the Company has recorded a valuation allowance against its U.S. federal tax net operating loss carryforwards. Accordingly, in instances when the Company's U.S. legal entities generate pre-tax U.S. GAAP income, no income tax expense is recognized to the extent there are net operating loss carryforwards to offset pre-tax U.S. GAAP income. Additionally, the effective income tax rate for the six months ended June 30, 2015 was significantly influenced by foreign currency exchange losses, most of which are not currently deductible for income tax purposes, resulting in a higher effective income tax rate.

(12) COMMITMENTS

As of June 30, 2015, the Company had \$74.9 million of stand-by letters of credit/bank guarantees issued on its behalf, of which \$42.5 million are outstanding under the revolving credit facility. The remaining stand-by letters of credit/bank guarantees are collateralized by \$2.9 million of cash deposits held by the respective issuing banks.

Under certain circumstances, Euronet grants guarantees in support of obligations of subsidiaries. As of June 30, 2015, the Company had granted off balance sheet guarantees for cash in various ATM networks amounting to \$14.5 million over the terms of the cash supply agreements and performance guarantees amounting to approximately \$24.4 million over the terms of agreements with the customers.

Once each of Euronet's subsidiaries reaches a certain size, it is required under the Credit Agreement to provide a guarantee of all or a portion of the outstanding obligations under the Credit Agreement depending upon whether the subsidiary is a domestic or foreign entity.

From time to time, the Company enters into agreements with commercial counterparties that contain indemnification provisions, the terms of which may vary depending on the negotiated terms of each respective agreement. The amount of such potential obligations is generally not stated in the agreements. Euronet's liability under such indemnification provisions may be mitigated by relevant insurance coverage and may be subject to time and materiality limitations, monetary caps and other conditions and defenses. Such indemnification obligations include the following:

In connection with contracts with financial institutions in the EFT Processing Segment, the Company is responsible for damage to ATMs and theft of ATM network cash that is not recorded on the Company's Consolidated Balance Sheets. As of June 30, 2015, the balance of ATM network cash for which the Company was responsible was approximately \$420 million. The Company maintains insurance policies to mitigate this exposure;

- In connection with contracts with financial institutions in the EFT Processing Segment, the Company is responsible for losses suffered by its customers and other parties as a result of the breach of its computer systems, including in particular, losses arising from fraudulent transactions made using information stolen through its processing systems. The Company maintains insurance policies to mitigate this exposure;

In connection with the license of proprietary systems to customers, the Company provides certain warranties and infringement indemnities to the licensee, which generally warrant that such systems do not infringe on intellectual property owned by third parties and that the systems will perform in accordance with their specifications;

Euronet has entered into purchase and service agreements with vendors and consulting agreements with providers of consulting services, pursuant to which the Company has agreed to indemnify certain of such vendors and consultants, respectively, against third-party claims arising from the Company's use of the vendor's product or the services of the vendor or consultant;

In connection with acquisitions and dispositions of subsidiaries, operating units and business assets, the Company has entered into agreements containing indemnification provisions, which can be generally described as follows: (i) in connection with acquisitions of operating units or assets made by Euronet, the Company has agreed to indemnify the seller against third-party claims made against the seller relating to the operating unit or asset and arising after the closing of the transaction, and (ii) in connection with dispositions made by Euronet, Euronet has agreed to indemnify the buyer against damages incurred by the buyer due to the buyer's reliance on representations and warranties relating

to the subject subsidiary, operating unit or business assets in the disposition agreement if such representations or warranties were untrue when made; and

17

---

Table of Contents

Euronet has entered into agreements with certain third parties, including banks that provide fiduciary and other services to Euronet or to the Company's benefit plans. Under such agreements, the Company has agreed to indemnify such service providers for third-party claims relating to carrying out their respective duties under such agreements. The Company is also required to meet minimum capitalization and cash requirements of various regulatory authorities in the jurisdictions in which the Company has money transfer operations. The Company has obtained surety bonds in compliance with money transfer licensing requirements of the applicable governmental authorities. To date, the Company is not aware of any significant claims made by the indemnified parties or third parties to guarantee agreements with the Company and, accordingly, no liabilities were recorded as of June 30, 2015 or December 31, 2014.

(13) LITIGATION AND CONTINGENCIES

Contingencies

Unclaimed property compliance - In September 2013, the Company entered into a voluntary disclosure agreement with the Secretary of State of the State of Delaware to determine compliance with Delaware unclaimed property laws. Types of property under examination include, but are not limited to, certain unmatched receipts from money transfer agents, payroll checks, accounts payable checks and accounts receivable credits for the period 1996 through 2007. In June 2015, the Company reached an agreement with the State of Delaware regarding unclaimed property for this period and through periods ending in 2009 and remitted an amount which was not material to the Company's consolidated financial condition or results of operations.

Legal Proceedings

From time to time, the Company is a party to legal or regulatory proceedings arising in the ordinary course of its business. Currently, there are no legal proceeding or regulatory findings that management believes, either individually or in the aggregate, would have a material adverse effect on the Company's consolidated financial condition or results of operations. In accordance with U.S. GAAP, the Company records a liability when it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. These provisions are reviewed at least quarterly and adjusted to reflect the impacts of negotiations, settlements, rulings, advice of legal counsel, and other information and events pertaining to a particular case.

(14) SUBSEQUENT EVENT

On July 2, 2015, the Company completed the acquisition of all of the capital stock of XE Corporation, a global leader in digital foreign exchange information. XE Corporation is a Canadian company which operates the XE.com and x-rates.com websites, providing currency-related data and international payments services.

Under the terms of the purchase, the Company paid purchase consideration of \$90.6 million in cash and 642,912 shares of Euronet common stock, with a fair value at date of acquisition of \$40.1 million.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The terms "Euronet," the "Company," "we" and "us" as used herein refer to Euronet Worldwide, Inc. and its subsidiaries.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This report contains statements that constitute forward-looking statements within the meaning of section 27A of the Securities Act of 1933 and section 21E of the Securities Exchange Act of 1934 ("Exchange Act"). Generally, the words "believe," "expect," "anticipate," "intend," "estimate," "will" and similar expressions identify forward-looking statements. However, the absence of these words or similar expressions does not mean the statement is not forward-looking. All statements other than statements of historical facts included in this document are forward-looking statements, including, but not limited to, statements regarding the following:

- our business plans and financing plans and requirements;
- trends affecting our business plans and financing plans and requirements;
- trends affecting our business;
- the adequacy of capital to meet our capital requirements and expansion plans;
- the assumptions underlying our business plans;
- our ability to repay indebtedness;
- our estimated capital expenditures;
- the potential outcome of loss contingencies;
- our expectations regarding the closing of any pending acquisitions;
- business strategy;
- government regulatory action;
- technological advances; and
- projected costs and revenues.

Although we believe that the expectations reflected in these forward-looking statements are reasonable, we can give no assurance that these expectations will prove to be correct.

Investors are cautioned that any forward-looking statements are not guarantees of future performance and involve risks and uncertainties. Actual results may materially differ from those in the forward-looking statements as a result of various factors, including, but not limited to, conditions in world financial markets and general economic conditions, including economic conditions in specific countries and regions; technological developments affecting the market for our products and services; our ability to successfully introduce new products and services; foreign currency exchange rate fluctuations; the effects of any breach of our computer systems, including our financial processing networks; our ability to renew existing contracts at profitable rates; changes in fees payable for transactions performed for cards bearing international logos or over switching networks such as card transactions on ATMs; our ability to comply with increasingly stringent regulatory requirements, including anti-money laundering, anti-terrorism and anti-bribery requirements; changes in laws and regulations affecting our business, including immigration laws; changes in our relationships with, or in fees charged by, our business partners; competition; the outcome of claims and other loss contingencies affecting Euronet; and those other factors referred to above and as set forth and more fully described in Part I, Item 1A — Risk Factors of our Annual Report on Form 10-K for the year ended December 31, 2014. Our Annual Report on Form 10-K is available on the SEC's EDGAR website at [www.sec.gov](http://www.sec.gov), and a copy may also be obtained by contacting the Company. All forward-looking statements made in this Form 10-Q speak only as of the date of this report. We do not intend, and do not undertake any obligation, to update any forward-looking statements to reflect future events or circumstances after the date of such statements.

## Table of Contents

### OVERVIEW

#### COMPANY OVERVIEW, GEOGRAPHIC LOCATIONS AND PRINCIPAL PRODUCTS AND SERVICES

We are a leading electronic payments provider. We offer payment and transaction processing and distribution solutions to financial institutions, retailers, service providers and individual consumers. Our primary product offerings include comprehensive automated teller machine (“ATM”), point-of-sale (“POS”), card outsourcing, card issuing and merchant acquiring services, software solutions, electronic distribution of prepaid mobile airtime and other electronic payment products, and global money transfer services. We operate in the following three segments:

The EFT Processing Segment, which processes transactions for a network of 21,980 ATMs and approximately 89,000 POS terminals across Europe, the Middle East and Asia Pacific. We provide comprehensive electronic payment solutions consisting of ATM cash withdrawal and deposit services, ATM network participation, outsourced ATM and POS management solutions, credit and debit card outsourcing, dynamic currency conversion, and other value added services. Through this segment, we also offer a suite of integrated electronic financial transaction software solutions for electronic payment and transaction delivery systems.

The epay Segment, which provides distribution, processing and collection services for prepaid mobile airtime and other electronic payment products. We operate a network of approximately 676,000 POS terminals providing electronic processing of prepaid mobile airtime top-up services and other electronic payment products in Europe, the Middle East, Asia Pacific, the United States and South America. We also provide vouchers and physical gift fulfillment services in Europe.

The Money Transfer Segment, which provides global consumer-to-consumer money transfer services, primarily under the brand name Ria and global account-to-account money transfer services under the brand name HiFX. We offer services under the brand name Ria, through a network of sending agents, Company-owned stores (primarily in North America and Europe) and our Ria website ([riamoneytransfer.com](http://riamoneytransfer.com)), disbursing money transfers through a worldwide correspondent network that includes approximately 272,000 locations. We offer services under the brand name HiFX through our HiFX websites ([www.hifx.co.uk](http://www.hifx.co.uk) and [www.hifx.com.au](http://www.hifx.com.au)) and HiFX customer service representatives. In addition to money transfers, we also offer customers bill payment services (primarily in the U.S.), payment alternatives such as money orders and prepaid debit cards, comprehensive check cashing services for a wide variety of issued checks, along with competitive foreign currency exchange services and mobile top-up. Through our HiFM brand, we offer cash management solutions and foreign currency risk management services to small-to-medium sized businesses.

We have five processing centers in Europe, four in Asia Pacific and two in North America. We have 30 principal offices in Europe, 12 in Asia Pacific, seven in North America, three in the Middle East, two in South America and one in Africa. Our executive offices are located in Leawood, Kansas, USA. With approximately 70% of our revenues denominated in currencies other than the U.S. dollar, any significant changes in foreign currency exchange rates will likely have a significant impact on our results of operations.

#### SOURCES OF REVENUES AND CASH FLOW

Euronet primarily earns revenues and income based on ATM management fees, transaction fees, commissions and foreign currency exchange margin. Each operating segment’s sources of revenues are described below.

EFT Processing Segment — Revenues in the EFT Processing Segment, which represented approximately 22% and 20% of our total consolidated revenues for the second quarter and first half of 2015, respectively, are primarily derived from fees charged for transactions made by cardholders on our proprietary network of ATMs, fixed management fees and transaction fees we charge to customers for operating ATMs and processing debit and credit cards under outsourcing and cross-border acquiring agreements, foreign currency exchange margin on dynamic currency conversion transactions, and fees received for other value added services such as advertising, prepaid telecommunication recharges, bill payment, and money transfers provided over ATMs. Revenues in this segment are also derived from license fees, professional services and maintenance fees for proprietary application software and sales of related hardware.

Table of Contents

epay Segment — Revenues in the epay Segment, which represented approximately 39% and 42% of our total consolidated revenues for the second quarter and first half of 2015, respectively, are primarily derived from commissions or processing fees received from mobile phone operators for the processing and distribution of prepaid mobile airtime and commissions earned from the distribution of other electronic payment products, vouchers, and physical gifts. Due to certain provisions in our mobile phone operator agreements, the operators have the ability to reduce the overall commission paid on top-up transactions. However, by virtue of our agreements with retailers (distributors where POS terminals are located) in certain markets, not all of these reductions are absorbed by us because we are able to pass a significant portion of the reductions to retailers. Accordingly, under certain retailer agreements, the effect is to reduce revenues and reduce our direct operating costs, resulting in only a small impact on gross profit and operating income. In some markets, reductions in commissions can significantly impact our results as it may not be possible, either contractually or commercially in the concerned market, to pass a reduction in commissions to the retailers. In certain markets, retailers may negotiate directly with the mobile phone operators and prepaid content providers for their own commission rates, which also limits our ability to pass through reductions in commissions. Agreements with mobile operators and prepaid content providers are important to the success of our business. These agreements permit us to distribute prepaid mobile airtime and other electronic payment products to the end consumer. Other electronic payment products offered by this segment include prepaid long distance calling card plans, prepaid Internet plans, prepaid debit cards, gift cards, vouchers, transport payments, lottery payments, bill payment, money transfer and digital content such as music, games and software.

Money Transfer Segment — Revenues in the Money Transfer Segment, which represented approximately 39% and 38% of our total consolidated revenues for the second quarter and first half of 2015, respectively, are primarily derived from transaction fees, as well as the margin earned from purchasing foreign currency at wholesale exchange rates and selling the foreign currency to customers at retail exchange rates. We have a sending network in place comprised of agents, customer service representatives, Company-owned stores, primarily in North America and Europe, and our websites [riamoneytransfer.com](http://riamoneytransfer.com), [www.hifx.co.uk](http://www.hifx.co.uk) and [www.hifx.com.au](http://www.hifx.com.au), along with a worldwide network of correspondent agents, consisting primarily of financial institutions in the transfer destination countries. Sending and correspondent agents each earn fees for cash collection and distribution services, which are recognized as direct operating costs at the time of sale.

Corporate Services, Eliminations and Other - In addition to operating in our principal operating segments described above, our “Corporate Services, Eliminations and Other” category includes non-operating activity, certain inter-segment eliminations and the cost of providing corporate and other administrative services to the operating segments, including most share-based compensation expense. These services are not directly identifiable with our reportable operating segments.

OPPORTUNITIES AND CHALLENGES

Our expansion plans and opportunities are currently focused on eight primary areas:

- increasing the number of ATMs in our independent ATM networks;
- increasing transactions processed on our network of owned and operated ATMs and POS devices;
- signing new outsourced ATM and POS terminal management contracts;
- expanding value added services in our EFT Processing Segment, including the sale of dynamic currency conversion services to banks and retailers;
- expanding our epay processing network and portfolio of electronic payment products;
- expanding our money transfer services, cross-currency payment products and bill payment network;
- expanding our cash management solutions and foreign currency risk management services; and
- developing our credit and debit card outsourcing business.

EFT Processing Segment — The continued expansion and development of our EFT Processing Segment business will depend on various factors including, but not necessarily limited to, the following:

- the impact of competition by banks and other ATM operators and service providers in our current target markets;
- the demand for our ATM outsourcing services in our current target markets;

our ability to develop products or services, including value added services, to drive increases in transactions and revenues;  
the expansion of our various business lines in markets where we operate and in new markets;  
our entry into additional card acceptance and ATM management agreements with banks;

21

---

Table of Contents

- our ability to obtain required licenses in markets we intend to enter or expand services;
- our ability to enter into and renew ATM network cash supply agreements with financial institutions;
- the availability of financing for expansion;
- our ability to efficiently install ATMs contracted under newly awarded outsourcing agreements;
- our ability to renew existing contracts at profitable rates;
- our ability to maintain pricing at current levels or mitigate price reductions in certain markets;
- the impact of reductions in ATM interchange fees;
- our ability to expand and sign additional customers for the cross-border merchant processing and acquiring business;
- and
- the continued development and implementation of our software products and their ability to interact with other leading products.

We consistently evaluate and add prospects to our list of potential ATM outsourcing customers. However, we cannot predict any increase or decrease in the number of ATMs we manage under outsourcing agreements because this depends largely on the willingness of banks to enter into outsourcing contracts with us. Due to the thorough internal reviews and extensive negotiations conducted by existing and prospective banking customers in choosing outsource vendors, the process of entering into or renewing outsourcing agreements can take several months. The process is further complicated by legal and regulatory considerations in local countries. These agreements tend to cover large numbers of ATMs, so significant increases and decreases in our pool of managed ATMs could result from the acquisition or termination of one or more of these management contracts. Therefore, the timing of both current and new contract revenues is uncertain and unpredictable.

Software products are an integral part of our product lines, and our investment in research, development, delivery and customer support reflects our ongoing commitment to an expanded customer base.

epay Segment — The continued expansion and development of our epay Segment business will depend on various factors, including, but not necessarily limited to, the following:

- our ability to maintain and renew existing agreements, and to negotiate new agreements in additional markets with mobile phone operators, content providers, agent financial institutions and retailers;
- our ability to use existing expertise and relationships with mobile operators, content providers and retailers to our advantage;
- the continued use of third-party providers such as ourselves to supply electronic processing solutions for existing and additional content;
- the development of mobile phone networks in the markets in which we do business and the increase in the number of mobile phone users;
- the overall pace of growth in the prepaid mobile phone market, including consumer shifts between prepaid and postpaid services;
- our market share of the retail distribution capacity;
- the development of new technologies that may compete with POS distribution of prepaid mobile airtime and other products;
- the level of commission that is paid to the various intermediaries in the electronic payment distribution chain;
- our ability to fully recover monies collected by retailers;
- our ability to add new and differentiated products in addition to those offered by mobile operators;
- our ability to develop and effectively market additional value added services;
- our ability to take advantage of cross-selling opportunities with our EFT Processing and Money Transfer Segments, including providing money transfer services through our distribution network; and
- the availability of financing for further expansion.

Table of Contents

In all of the markets in which we operate, we are experiencing significant competition which will impact the rate at which we may be able to grow organically. Competition among prepaid mobile airtime distributors results in the increase of commissions paid to retailers and increases in retailer attrition rates. To grow, we must capture market share from other prepaid mobile airtime distributors, offer a superior product offering and demonstrate the value of a global network. In certain markets in which we operate, we believe that many of the factors that may contribute to rapid growth (growth in electronic payment products, expansion of our network of retailers and access to all mobile operators' products) remain present.

Money Transfer Segment — The continued expansion and development of our Money Transfer Segment business will depend on various factors, including, but not necessarily limited to, the following:

- the continued growth in worker migration and employment opportunities;
- the mitigation of economic and political factors that have had an adverse impact on money transfer volumes, such as changes in the economic sectors in which immigrants work and the developments in immigration policies in the U.S.;
- the continuation of the trend of increased use of electronic money transfer and bill payment services among high-income individuals, immigrant workers and the unbanked population in our markets;
- our ability to maintain our agent and correspondent networks;
- our ability to offer our products and services or develop new products and services at competitive prices to drive increases in transactions;
- the development of new technologies that may compete with our money transfer network;
- the expansion of our services in markets where we operate and in new markets;
- our ability to strengthen our brands;
- our ability to fund working capital requirements;
- our ability to recover from agents funds collected from customers and our ability to recover advances made to correspondents;
- our ability to maintain compliance with the regulatory requirements of the jurisdictions in which we operate or plan to operate;
- our ability to take advantage of cross-selling opportunities with our e-pay Segment, including providing prepaid services through Ria's stores and agents worldwide;
- our ability to leverage our banking and merchant/retailer relationships to expand money transfer corridors to Europe, Asia and Africa, including high growth corridors to Central and Eastern European countries;
- the availability of financing for further expansion;
- the ability to maintain banking relationships necessary for us to service our customers; and
- our ability to successfully expand our agent network in Europe using our payment institution licenses under the Payment Services Directive and in the United States.

For all segments, our continued expansion may involve additional acquisitions that could divert our resources and management time and require integration of new assets with our existing networks and services. Our ability to effectively manage our growth has required us to expand our operating systems and employee base, particularly at the management level, which has added incremental operating costs. Any inability to continue to effectively manage expansion could have a material adverse effect on our business, growth, financial condition and results of operations. Inadequate technology and resources would impair our ability to maintain current processing technology and efficiencies, as well as deliver new and innovative services to compete in the marketplace.

Total	\$47,180	\$34,128	\$13,052	38 %		\$79,343	\$58,510	\$20,833	36 %	

Impact of changes in foreign currency exchange rates

Our revenues and local expenses are recorded in the functional currencies of our operating entities and translated into U.S. dollars for financial reporting purposes; therefore, amounts we earn outside the U.S. are negatively impacted by the stronger U.S. dollar and positively impacted by the weaker U.S. dollar. On average, the U.S. dollar was considerably stronger in the second quarter and first half of 2015 than the same periods of 2014 compared to currencies of most markets in which we operate. Considering the results by country and the associated functional currency, we estimate that our reported consolidated operating income for the second quarter and first half of 2015 was 17% and 16% less, respectively, due to the changes in foreign currency exchange rates when compared to the same periods of 2014.

To provide further perspective on the impact of foreign currency exchange rates, the following table shows the changes in values relative to the U.S. dollar of the currencies of the countries in which we have our most significant operations:

Average Translation Rate Three Months Ended June 30, 2015	Decrease Percent	Average Translation Rate Six Months Ended June 30, 2015	Decrease Percent
2014		2014

Average ATMs	21,649	18,993	2,656	14	%	21,132	18,702	2,430	13	%

## Revenues

Our revenues for the second quarter and first half of 2015 increased when compared to the same periods of 2014 primarily due to an increase in the number of ATMs under management being largely offset by the impact of the U.S. dollar strengthening against key foreign currencies. The increase in ATMs and POS devices under management also contributed to an increase in dynamic currency conversion ("DCC") revenues which were partly offset by a decrease in rates charged for certain debit and credit card outsourcing services as a result of our actions to amend and extend a contract with a large European customer during the first quarter of 2015.

Our EFT Processing business in Greece has been affected by the recent sovereign debt crisis in that country. First, due to capital controls on Greek banks, we have not been able to obtain the full amount of cash from them needed to fill our ATMs which potentially results in lost transactions when ATMs become empty. However, we have arranged alternative sources of cash to supplement those supplied by Greek banks which has largely mitigated ATM cash supply risks. Second, due to the uncertainty in Greece, tourist traffic is lower than usual which reduces the number of ATM withdrawals and DCC transactions processed. Further, some tourists who are concerned about their ability to withdraw cash from ATMs in Greece bring additional cash with them on their travels which results in fewer withdrawals from our ATMs, including DCC transactions. These circumstances are likely to continue to impact our operations in the near term, reducing the number of transactions processed and revenues recognized from what would otherwise be expected. Current developments appear to keep Greece as a member of the European Union and the Eurozone which allays the immediate risk of any currency conversion of our cash in Greece; however, the longer term risk of Greece exiting the European Union is still uncertain and any related currency conversion risk remains. Average monthly revenues per ATM were \$1,433 for the second quarter and \$1,323 for the first half of 2015 compared to \$1,570 for the second quarter and \$1,462 for the first half of 2014. The decreases were primarily due to the strengthening of the U.S. dollar against key foreign currencies, partly offset by revenue growth from an increase in ATMs under management and DCC transactions. Revenues per transaction were \$0.28 for the second quarter and

\$0.27 for the first half of 2015 compared to \$0.28 for the second quarter and \$0.26 for the first half of 2014. Revenue growth from DCC, which earns higher revenues per transaction than other ATM or card based services, was largely offset by the impact of the U.S. dollar strengthening against key foreign currencies.

Table of Contents

Direct operating costs

Direct operating costs consist primarily of site rental fees, cash delivery costs, cash supply costs, maintenance, insurance, telecommunications, data center operations-related personnel, as well as the processing centers' facility-related costs and other processing center-related expenses and commissions paid to retail merchants, banks and card processors involved with POS DCC transactions. Direct operating costs increased for the second quarter and first half of 2015 compared to the same periods of 2014, primarily due to an increase in the number of ATMs under management, partly offset by the impact of the U.S. dollar strengthening against key foreign currencies.

Gross profit

Gross profit, which is calculated as revenues less direct operating costs, was \$48.0 million for the second quarter and \$83.6 million for the first half of 2015 compared to \$47.6 million for the second quarter and \$84.9 million for the first half of 2014. The slight variances in gross profit were primarily due to the impact of the U.S. dollar strengthening against key foreign currencies and decreases in rates charged for certain debit and credit card outsourcing services being largely offset by the growth in revenues from DCC transactions and the increase in ATMs under management. Gross profit as a percentage of revenues ("gross margin") was 51.6% for the second quarter and 49.8% for the first half of 2015 compared to 53.3% for the second quarter and 51.8% for the first half of 2014. The decreases in gross margin were primarily due to the decrease in rates charged for certain debit and credit card outsourcing services.

Salaries and benefits

The slight decreases in salaries and benefits for the second quarter and first half of 2015 compared to the same periods of 2014 were primarily due to the impact of the U.S. dollar strengthening against key foreign currencies being largely offset by additional headcount to support an increase in the number of ATMs and POS devices under management. As a percentage of revenues, these costs decreased to 12.5% for the second quarter and 13.5% for the first half of 2015 from 13.3% for first quarter and 14.0% for the first half of 2014. These decreases were primarily due to the growth in revenues earned from DCC and other value added service transactions on our ATMs under management, which require minimal incremental support costs.

Selling, general and administrative

Selling, general and administrative expenses were largely unchanged for the second quarter of 2015 compared to the same period of 2014. The slight decrease in these expenses for the first half of 2015 compared to the same period of 2014 was primarily due to the impact of the U.S. dollar strengthening against key foreign currencies, partly offset by increased support costs as a result of the increase in the number of ATMs under management. As a percentage of revenues, these expenses decreased to 7.1% for the second quarter and 7.4% for the first half of 2015 from 7.3% for the first quarter and 7.7% for the first half of 2014. These decreases were primarily due to the growth in revenues earned from DCC and other value added service transactions on our ATMs and POS devices under management, which require minimal incremental support costs.

Depreciation and amortization

The minor increases in depreciation and amortization expense for the second quarter and first half of 2015 compared to the same periods of 2014 were primarily due to an increase in depreciation on our ATMs under management and software assets, largely offset by the impact of the U.S. dollar strengthening against key foreign currencies. As a percentage of revenues, depreciation and amortization expense decreased slightly to 8.3% for the second quarter and 9.0% for the first half of 2015 from 8.5% for the first quarter and 9.1% for the first half of 2014, primarily due to revenue growth slightly outpacing the growth in our ATMs under management and the increase in software capitalization.

Operating income

The slight increase in operating income for the second quarter of 2015 compared to the same period of 2014 was primarily due to the increase in the number of ATMs under management and growth in revenues earned from DCC and other value added service transactions, largely offset by the impact of the U.S. dollar strengthening against key foreign currencies and the decrease in rates charged for certain debit and credit card management services. The slight decrease in in operating income for the first half of 2015 compared to the same period of 2014 is due to the impact of the strengthening U.S. dollar exceeding the operating improvements described above as seasonally fewer transactions are processed during the first quarter of the year, particularly DCC transactions.

Operating income as a percentage of revenues (“operating margin”) decreased to 23.7% for the second quarter and 19.9% for the first half of 2015 from 24.1% for the first quarter and 20.9% for the first half of 2014. The decreases in operating margin were primarily due to the decrease in rates charged for certain debit and credit card management services. Operating income per transaction remained at \$0.07 for the second quarter of 2015 and 2014 and decreased slightly to \$0.05 for the first half of 2015 from \$0.06 for the same period of 2014.

## Revenues

The decreases in revenues for the second quarter and first half of 2015 compared to the same periods of 2014 were primarily due to the impact of the U.S. dollar strengthening against key foreign currencies, a decrease in prepaid mobile transactions processed in Brazil and the U.K. and lower rates charged for certain transactions in the U.S. Partially offsetting the decreases in revenues for the second quarter and first half of 2015 was an increase in the number of non-mobile transactions processed in Germany and certain emerging markets and an increase in voucher redemptions in our cadooz subsidiary following strong year-end holiday sales.

We currently expect most of our future revenue growth in the epay segment to be derived from: (i) additional electronic payment products sold over the base of POS terminals, (ii) value added services, (iii) developing markets or markets in which there is organic growth in the electronic top-up sector overall, and (iv) acquisitions, if available and commercially appropriate.

Revenues per transaction decreased to \$0.49 for the second quarter and \$0.52 for the first half of 2015 from \$0.61 for the first quarter and \$0.63 for the first half of 2014, primarily due to the impact of the U.S. dollar weakening against key foreign currencies and growth in the number of prepaid mobile transactions processed in India, where revenues per transaction are considerably lower than average. The decrease in revenues per transaction was partly offset by the increase in the number of non-mobile transactions processed in Germany and certain emerging markets, for which we generally earn higher revenues per transaction than mobile transactions.

## Direct operating costs

Direct operating costs in our epay Segment include the commissions we pay to retail merchants for the distribution and sale of prepaid mobile airtime and other prepaid products, expenses required to operate POS terminals and the cost of vouchers sold and physical gifts fulfilled. The decreases in direct operating costs for the second quarter and first half of 2015 compared to the same periods of 2014 were primarily due to the net impact of the U.S. dollar strengthening against key foreign currencies and the decrease in prepaid mobile transactions processed in the U.K. and Brazil, partly offset by the increases in vouchers redeemed in our cadooz subsidiary and non-mobile transactions processed in Germany and certain emerging markets.

## Gross profit

Gross profit was \$40.3 million for the second quarter and \$79.0 million for the first half of 2015 compared to \$43.5 million for the second quarter and \$85.2 million for the first half of 2014. The decreases in gross profit were primarily due to the net impact of the U.S. dollar strengthening against key foreign currencies and the decreases in revenues in Brazil and the U.K., partly offset by growth in non-mobile transactions processed in Germany and certain emerging markets and the increase in vouchers redeemed in our cadooz subsidiary.

Table of Contents

Gross margin was 24.2% for the second quarter and 23.1% for the first half of 2015 compared to 23.9% and 23.2% for the same periods of 2014. The increase in the second quarter was primarily due to the increase in non-mobile transactions processed. First half gross margin was also impacted by a decrease in revenues in Brazil and lower gross margins realized on voucher redemptions.

Salaries and benefits

The decreases in salaries and benefits for the second quarter and first half of 2015 compared to the same periods of 2014 were primarily due the U.S. dollar strengthening against key foreign currencies, partly offset by an increase in bonus expense related to the improved results.

As a percentage of revenues, salaries and benefits decreased to 7.4% for the second quarter and 7.1% for the first half of 2015 compared to 7.6% and 7.5% for the same periods of 2014, respectively, primarily due to transaction growth exceeding headcount growth.

Selling, general and administrative

The decreases in selling, general and administrative expenses for the second quarter and first half of 2015 compared to the same periods of 2014 were primarily due to the net impact of the U.S. dollar strengthening against key foreign currencies.

As a percentage of revenues, selling, general and administrative expenses decreased to 5.4% for the second quarter and 5.0% for the first half of 2015 compared to 6.1% and 5.5% for the same periods of 2014, respectively. The decreases for the second quarter and first half of 2015 compared to same periods of 2014 were due to transaction growth with little increase in support costs.

Depreciation and amortization

Depreciation and amortization expense primarily represents depreciation of POS terminals we place in retail stores and the amortization of acquired intangible assets. Depreciation and amortization expense decreased for the second quarter and first half of 2015 compared to the same periods of 2014 primarily due to the net impact of the U.S. dollar strengthening against key foreign currencies and certain assets becoming fully depreciated without yet being replaced. As a percentage of revenues, depreciation and amortization expense decreased to 1.6% for the second quarter and 1.7% for the first half of 2015 from 2.3% for both the second quarter and first half of 2014 mainly as a result of the fully depreciated assets not being replaced.

Operating income

The increases in operating income for the second quarter and first half of 2015 compared to the same periods of 2014 were primarily due to the growth in transactions processed exceeding the growth in support costs, partly offset by the net impact of the U.S. dollar strengthening against key foreign currencies.

Operating margin increased to 9.7% for the second quarter and 9.3% for the first half of 2015 from 7.8% and 7.9% for the same periods of 2014, primarily due to the growth in transactions processed while keeping costs stable. Operating income per transaction remained at \$0.05 for the second quarters and first six months of 2015 and 2014.

Table of Contents

## MONEY TRANSFER SEGMENT

The following table presents the results of operations for the three and six months ended June 30, 2015 and 2014 for the Money Transfer Segment:

(dollar amounts in thousands)	Three Months Ended June 30,		Year-over-Year Change			Six Months Ended June 30,		Year-over-Year Change		
	2015	2014	Increase Amount	Increase Percent		2015	2014	Increase Amount	Increase Percent	
Total revenues	\$ 165,651	\$ 124,318	\$ 41,333	33	%	\$ 310,457	\$ 218,318	\$ 92,139	42	%
Operating expenses:

Transactions processed (millions)	16.5	11.5	5.0	43	%	30.4	20.3	10.1	50	%

## Revenues

The increases in revenues for the second quarter and first half of 2015 compared to the same periods of 2014 were primarily due to increases in the number of money transfers processed, driven by growth in our U.S and foreign agent and correspondent payout networks, the April 2014 launch of the domestic Walmart money transfer product and the impact of our May 2014 acquisition of EIM (FX) Limited, which owns subsidiaries that operate under the brand name HiFX. Our June 2015 acquisition of IME (M) Sdn Bhd ("IME"), a Malaysian money transfer operation, also contributed to the second quarter revenue growth. The increases were partly offset by the U.S. dollar strengthening against key foreign currencies.

Revenues per transaction decreased to \$10.04 for the second quarter and \$10.21 for the first half of 2015 from \$10.81 for the second quarter and \$10.75 for the first half of 2014, primarily due to the impact of the U.S. dollar strengthening against key foreign currencies and the launch of our Walmart money transfer product during the second quarter of 2014, which earns lower revenues per transaction than other money transfer services. Partly offsetting these decreases in revenues per transaction was the impact of the HiFX transactions which earn higher revenues per transaction than other money transfer services.

## Direct operating costs

Direct operating costs in the Money Transfer Segment primarily represent commissions paid to agents who originate money transfers on our behalf and correspondent agents who disburse funds to the customers' destination beneficiaries, together with less significant costs, such as bank depository fees. The increases in direct operating costs for the second quarter and first half of 2015 compared to the same periods of 2014 were primarily due to growth in the number of money transfer transactions processed in both the U.S. and non-U.S. locations. Partly offsetting the increases in direct operating costs was the impact of the U.S. dollar strengthening against key foreign currencies.

## Gross profit

Gross profit was \$78.8 million for the second quarter and \$148.4 million for the first half of 2015 compared to \$61.8 million for the second quarter and \$109.8 million for the first half of 2014. The increases in gross profit were primarily due to growth in the number of money transfer transactions processed in both the U.S. and foreign markets and the impact of our acquisitions of HiFX and IME. Partly offsetting the increases in gross profit was the impact of the U.S. dollar strengthening against key foreign currencies.

Gross margin decreased to 47.6% for the second quarter and 47.8% for the first half of 2015 from 49.7% for second quarter and 50.3% for the first half of 2014, primarily due to the launch of our Walmart money transfer product in the U.S., which earns a lower gross profit per transaction than other money transfer services, partly offset by the impact of

our acquisition of HiFX, which has higher margin transactions.

29

---

Table of Contents

Salaries and benefits

The increases in salaries and benefits for the second quarter and first half of 2015 compared to the same periods of 2014 were primarily due to the impact of our acquisitions of HiFX and IME, an increase in headcount as a result of the launch of our Walmart money transfer product, the development of our online money transfer service and expansion of our operations in foreign markets. As a percentage of revenues, salaries and benefits improved to 20.1% for the second quarter and 20.7% for the first half of 2015 from 22.5% for second quarter and 23.5% for the first half of 2014, primarily due to the increase in the number of money transfers processed in the U.S, which did not require a similar increase in support costs.

Selling, general, and administrative

The increases in selling, general and administrative expenses for the second quarter and first half of 2015 compared to the same periods of 2014 were primarily due to the impact of our acquisitions of HiFX and IME and expenses incurred to support the expansion of our money transfer products in both the U.S. and foreign markets. Partly offsetting the increases in selling, general and administrative expenses was the impact of the U.S. dollar strengthening against key foreign currencies and the write-down of certain customer acquisition costs in the first quarter of 2014. As a percentage of revenues, selling, general and administrative expenses decreased to 13.1% for the second quarter and 12.8% for the first half of 2015 from 14.1% and 15.4% for the same periods of 2014, respectively, primarily due to an increase in the number of money transfers processed in the U.S., which did not require a similar increase in support costs, and the first quarter 2014 write-down of certain customer acquisition costs.

Depreciation and amortization

Depreciation and amortization primarily represents amortization of acquired intangible assets and depreciation of money transfer terminals, computers and software, leasehold improvements and office equipment. The increases in depreciation and amortization for the second quarter and first half of 2015 compared to the same periods of 2014 was primarily due to the amortization of intangible assets related to the acquisitions of HiFX and IME and investments made to support the growth in the business. Partly offsetting these increases was the the impact of the U.S. dollar strengthening against key foreign currencies. As a percentage of revenues, depreciation and amortization decreased to 3.6% for the second quarter and 4.1% for the first half of 2015 from 4.4% and 4.6% for the same periods of 2014, respectively. These decreases were primarily due to the revenues earned from our Walmart money transfer product, which required less capital investment than other money transfer products.

Operating income

The increases in operating income for the second quarter and first half of 2015 compared to the same periods of 2014 were primarily due to the increase in the number of money transfers processed, the impact of our acquisitions of HiFX and IME and the write-down of certain customer acquisition costs during the first quarter of 2014, partly offset by an increase in salaries and benefits and other costs to support the growth in the business. Also partly offsetting the increase in operating income was the impact of the U.S. dollar strengthening against key foreign currencies. As a percentage of revenues, operating margin increased to 10.7% for the second quarter and 10.2% for the first half of 2015 from 8.7% and 6.8% for same periods of 2014, respectively, primarily due to the increase in the number of money transfers processed in the U.S., the acquisitions of HiFX and IME and the write-down of certain customer acquisition costs in the first quarter of 2014.

Operating income per transaction increased to \$1.08 for the second quarter and \$1.04 for the first half of 2015 from \$0.94 and \$0.73 for the same periods of 2014, respectively, primarily due to the increase in the number of money transfers processed, which did not require a similar increase in support costs, along with the impact of the higher margin HiFX transactions and the first quarter 2014 write-down of customer acquisition costs, partly offset by the impact of the U.S. dollar strengthening against key foreign currencies.

Table of Contents

## CORPORATE SERVICES

The following table presents the operating expenses for the three and six months ended June 30, 2015 and 2014 for Corporate Services:

(dollar amounts in thousands)	Three Months Ended June 30,		Year-over-Year Change			Six Months Ended June 30,		Year-over-Year Change		
	2015	2014	Increase (Decrease) Amount	Increase (Decrease) Percent	%	2015	2014	Increase (Decrease) Amount	Increase (Decrease) Percent	%
Salaries and benefits	\$7,479	\$6,642	\$837	13	%	\$13,663	\$12,217	\$1,446	12	%
Selling, general and administrative	1,246	5,741	(4,495)	(78)	%	3,576	7,319	(3,743)	(51)	%
Depreciation and amortization	67	66	1	2	%	137	141	(4)	(3)	%
Total operating expenses	\$8,792	\$12,449	\$(3,657)	(29)	%	\$17,376	\$19,677	\$(2,301)	(12)	%

## Corporate operating expenses

Overall, operating expenses for Corporate Services decreased for the second quarter and first half of 2015 compared to the same periods of 2014. The increases in salaries and benefits were primarily due to increased headcount, employee raises and an increase in bonus expense related to the timing of meeting higher bonus targets. The decreases in selling, general and administrative expense were primarily due to the settlement during the second quarter of 2014 of a dispute related to a prior period potential acquisition.

## OTHER EXPENSE, NET

(dollar amounts in thousands)	Three Months Ended June 30,		Year-over-Year Change			Six Months Ended June 30,		Year-over-Year Change

n/m — Not meaningful

## Interest income

The decreases in interest income for the second quarter and first half of 2015 compared to the same periods of 2014 were primarily due to a decrease in interest earned on funds held in Australia and the impact of the U.S. dollar strengthening against key foreign currencies, partly offset by an increase in interest earned on customer funds held on deposit related to money transfer operations.

## Interest expense

The increases in interest expense for the second quarter and first half of 2015 compared to the same periods of 2014 were the result of the issuance of the Convertible Notes in the fourth quarter of 2014, partly offset by lower average borrowings outstanding under our revolving credit facility during the periods.

Table of Contents

## Foreign currency exchange loss, net

Assets and liabilities denominated in currencies other than the local currency of each of our subsidiaries give rise to foreign currency exchange gains and losses. Foreign currency exchange gains and losses that result from re-measurement of these assets and liabilities are recorded in determining net income. The majority of our foreign currency exchange gains or losses are due to the re-measurement of intercompany loans which are not considered a long-term investment in nature and are in a currency other than the functional currency of one of the parties to the loan. For example, we make intercompany loans based in euros from our corporate division, which is comprised of U.S. dollar functional currency entities, to certain European entities that use the euro as the functional currency. As the U.S. dollar strengthens against the euro, foreign currency exchange losses are recognized by our corporate entities because the number of euros to be received in settlement of the loans decreases in U.S. dollar terms. Conversely, in this example, in periods where the U.S. dollar weakens, our corporate entities will record foreign currency exchange gains.

We recorded net foreign currency exchange losses of \$5.1 million and \$3.1 million for the second quarters of 2015 and 2014, respectively, and \$18.1 million and \$4.4 million for the first six months of 2015 and 2014, respectively. These realized and unrealized net foreign currency exchange losses reflect the fluctuation in the value of the U.S. dollar against the currencies of the countries in which we operated during the respective periods.

## Other gains

The second quarter 2015 gain was the result of the sale of a minor line of business by one of our subsidiaries.

## INCOME TAX EXPENSE

The Company's effective income tax rates were 28.1% and 29.8% for the second quarter of 2015 and 2014, respectively, and 34.0% and 28.4% for the first half of 2015 and 2014, respectively. The effective income tax rate for the first half of 2015 was significantly influenced by foreign currency exchange losses. Excluding this item from pre-tax income, as well as the related tax effect, the effective income tax rate was 24.9% for 2015.

The Company's effective income tax rates for the second quarter of 2015 and 2014 and the first half of 2015, as adjusted for foreign currency exchange losses, and 2014 were lower than the applicable statutory income tax rate of 35% primarily because of the Company's U.S. income tax positions. The Company does not have a history of significant taxable income in the U.S.; therefore, the Company has recorded a valuation allowance against its U.S. federal tax net operating loss carryforwards. Accordingly, in instances when the Company's U.S. legal entities generate pre-tax U.S. GAAP income, no income tax expense is recognized to the extent there are net operating loss carryforwards to offset pre-tax U.S. GAAP income. The decreases in the effective tax rates for the second quarter of 2015 and the first half of 2015, as adjusted for foreign currency exchange losses, compared to the same periods of 2014 were largely due to an increase in the portion of earnings generated in the U.S.

## NET INCOME OR LOSS ATTRIBUTABLE TO NONCONTROLLING INTERESTS

Noncontrolling interests represents the elimination of net income or loss attributable to the minority shareholders' portion of the following consolidated subsidiaries that are not wholly owned:

Subsidiary	Percent Owned	Segment - Country
Movilcarga	95%	epay - Spain
Euronet China	75%	EFT - China
Euronet Pakistan	70%	EFT - Pakistan
Universal Solutions Partners	51%	EFT - UAE

## NET INCOME ATTRIBUTABLE TO EURONET

Net income attributable to Euronet was \$26.8 million for the second quarter and \$34.0 million for the first half of 2015 compared to \$20.5 million for the second quarter and \$36.5 million for the first half of 2014. As more fully discussed above, the \$2.5 million decrease in net income for the first half of 2015 compared to the same period of 2014 was primarily due to an increase in net foreign currency exchange loss of \$13.7 million, an increase in interest expense of \$7.4 million and an increase in income tax expense of \$2.9 million. These decreases to net income were partly offset by an increase in operating income of \$20.8 million and a decrease in other non-operating costs of \$0.7 million.

Table of Contents

## LIQUIDITY AND CAPITAL RESOURCES

## Working capital

As of June 30, 2015 and December 31, 2014, we had working capital, which is calculated as the difference between total current assets and total current liabilities, of \$242.6 million and \$257.0 million, respectively. Our ratio of current assets to current liabilities at June 30, 2015 and December 31, 2014 was 1.29 and 1.30, respectively.

We require substantial working capital to finance operations. In the Money Transfer Segment, we fund the payout of the majority of Ria's consumer-to-consumer money transfers services before receiving the benefit of amounts collected from customers by agents. Working capital needs increase due to weekends and international banking holidays. As a result, we may report more or less working capital for the Money Transfer Segment based solely upon the day on which the reporting period ends. The epay Segment produces positive working capital, but much of it is restricted in connection with the administration of its customer collection and vendor remittance activities. In our EFT Processing Segment, we obtain the majority of the cash required to operate our ATMs through various cash supply arrangements, the amount of which is not recorded on Euronet's Consolidated Balance Sheets. In certain countries, we fund the cash required to operate our ATM network from borrowings under the revolving credit facility and cash flows from operations. As of June 30, 2015, we had approximately \$173 million of our own cash in use or designated for use in our ATM network, which is recorded in cash and cash equivalents on Euronet's Consolidated Balance Sheet. We had cash and cash equivalents of \$538.1 million at June 30, 2015, of which \$490.7 million was held outside of the United States and is expected to be indefinitely reinvested for continued use in foreign operations. Repatriation of these assets to the U.S. could have negative tax consequences.

The following table identifies cash and cash equivalents provided by/(used in) our operating, investing and financing activities for the six-month periods ended June 30, 2015 and 2014 (in thousands):

	Six Months Ended	
	June 30, 2015	2014
Liquidity		
Cash and cash equivalents provided by (used in):		
Operating activities	\$ 156,928	\$ 103,124
Investing activities	(66,208 )	(115,392 )
Financing activities	198	209,378
Effect of foreign currency exchange rate changes on cash and cash equivalents	(20,853 )	1,434
Increase in cash and cash equivalents	\$ 70,065	\$ 198,544

## Operating activity cash flow

Cash flows provided by operating activities were \$156.9 million for the first half of 2015 compared to \$103.1 million for the first half of 2014. The increase is primarily due to fluctuations in working capital mainly associated with the timing of the settlement processes with mobile operators in the epay Segment and with correspondents in the Money Transfer Segment and improved operating results.

## Investing activity cash flow

Cash flows used in investing activities were \$66.2 million for the first half of 2015 compared to \$115.4 million for the first half of 2014. Cash used for acquisitions was \$29.3 million for the first half of 2015 compared to \$83.4 million for the first half of 2014. During the first six months of 2015, we used \$34.4 million for purchases of property and equipment compared to \$29.3 million during the first six months of 2014; the increase was primarily related to ATM network expansion. Cash used for software development and other investing activities totaled \$2.5 million for the first half of 2015 compared to \$2.7 million for the same period of 2014.

Table of Contents

## Financing activity cash flow

Cash flows provided by financing activities were \$0.2 million for the first half of 2015 compared to \$209.4 million for the first half of 2014. Our financing activities for the first six months of 2015 consisted of net borrowings of \$1.9 million compared to \$207.6 million for the first six months of 2014. The decrease in net borrowings during the first half of 2015 compared to the same period of 2014 was the result of having adequate cash on hand from the fourth quarter 2014 issuance of the Convertible Notes compared to borrowings needed for acquisitions and working capital purposes in the first half of 2014. Additionally, we used \$1.7 million and \$1.2 million during the first six months of 2015 and 2014, respectively, for capital lease repayments. During the first half of 2015, we paid \$5.0 million for the amount of payroll taxes represented by the common stock withheld on restricted stock vestings and stock option exercises compared to \$0.8 million for the same period of 2014; we also purchased \$0.1 million of our stock in the open market during the first half of 2015. We received proceeds from stock option exercises of \$4.6 million and \$5.9 million for the first six months of 2015 and 2014, respectively. During the first half of 2014, we paid \$2.5 million for debt issuance costs.

## Other sources of capital

## Credit Facility

As of June 30, 2015, we had a \$675 million senior secured credit facility (the "Credit Facility") consisting of a \$590 million revolving credit facility, a \$10 million India revolving credit facility and an \$75 million term loan ("Term Loan A"), which had been reduced to \$69.8 million through principal amortization payments. The revolving credit facility allows for borrowings in U.S. dollars, euros, British pounds, Australian dollars and/or Indian rupees and contains a \$200 million sublimit for the issuance of letters of credit and a \$25 million sublimit for swingline loans. The Credit Facility expires April 9, 2019. We use the revolving credit facility primarily to fund working capital requirements which are expected to increase as we expand the Money Transfer business and our independent ATM network. Based on our current projected working capital requirements, we anticipate that our revolving credit facility will be sufficient to fund our working capital needs.

As of June 30, 2015, fees and interest on borrowings varied based upon the Company's consolidated total leverage ratio (as defined in the Company's Amended and Restated Credit Agreement) (the "Credit Agreement") and are based, in the case of letter of credit fees, on a margin, and in the case of interest, on a margin over LIBOR or a margin over the base rate, as selected by us, with the applicable margin ranging from 1.375% to 2.375% for LIBOR loans and 0.375% to 1.375% for base rate loans.

As of June 30, 2015, we had borrowings of \$69.8 million outstanding under Term Loan A. We had \$8.0 million of borrowings and \$42.5 million of stand-by letters of credit outstanding under the revolving credit facility as of June 30, 2015. The remaining \$549.5 million under the revolving credit facility was available for borrowing. As of June 30, 2015, our weighted average interest rates under the revolving credit facility and Term Loan A were 10.75% and 1.81%, respectively, excluding amortization of deferred financing costs.

Convertible debt — On October 30, 2014, we completed the sale of \$402.5 million of Convertible Senior Notes due 2044 ("Convertible Notes"). The Convertible Notes have an interest rate of 1.5% per annum payable semi-annually in April and October, and are convertible into shares of Euronet Common Stock at a conversion price of approximately \$72.18 per share if certain conditions are met (relating to the closing prices of Euronet Common Stock exceeding certain thresholds for specified periods). Holders of the Convertible Notes have the option to require us to purchase their notes at par on October 1, 2020, and have additional options to require us to purchase their notes at par on October 1, 2024, 2029, 2034, and 2039, or upon a change in control of the Company. In connection with the issuance of the Convertible Notes, we recorded \$10.7 million in debt issuance costs, which are being amortized through October 1, 2020.

Short-term debt obligations - Short-term debt obligations as of June 30, 2015 were primarily comprised of \$6.1 million of payments due in the next twelve months under Term Loan A. Certain of our subsidiaries also have available credit lines and overdraft facilities to supplement short-term working capital requirements, when necessary, and there was \$9.4 million outstanding under these facilities as of June 30, 2015.

## Other uses of capital

Capital expenditures and needs - Total capital expenditures for the first half of 2015 were \$38.1 million. These capital expenditures were made primarily for the purchase of ATMs in Poland and India, as well as for office, data center and company store computer equipment and software, and POS terminals for the epay Segment. Total capital expenditures for 2015 are currently estimated to range from approximately \$55.0 million to \$65.0 million.

## Table of Contents

At current and projected cash flow levels, we anticipate that cash generated from operations, together with cash on hand and amounts available under our revolving credit facility and other existing and potential future financing sources, will be sufficient to meet our debt, leasing and capital expenditure obligations. If our capital resources are not sufficient to meet these obligations, we will seek to issue additional debt and/or equity under terms acceptable to us. However, we can offer no assurances that we will be able to obtain favorable terms for the refinancing of any of our debt or other obligations or for the issuance of additional equity.

### Acquisitions

On June 17, 2015, the Company completed the acquisition of all of the capital stock of IME (M) Sdn Bhd and certain affiliated companies ("IME") pursuant to a Share Purchase Agreement (the "Purchase Agreement") among the Company and the selling shareholders of IME (the "Sellers"). IME is a leading Malaysian-based money transfer provider and provides the Money Transfer Segment with immediate entry into the Asian and Middle East send markets.

Under the terms of the Purchase Agreement, the Sellers received purchase consideration (the "Purchase Consideration") of \$79.6 million in cash and 49,941 shares of Euronet common stock, with a fair value at date of acquisition of \$3.0 million. A portion of the Purchase Consideration was placed in escrow at closing as security for the Sellers' indemnification and other obligations under the Purchase Agreement. Any Purchase Consideration remaining in escrow will be released to the Sellers at various defined dates over five years following the closing date, net of any pending indemnification or other claims under the Purchase Agreement.

On July 2, 2015, the Company completed the acquisition of all of the capital stock of XE Corporation, a global leader in digital foreign exchange information. XE Corporation is a Canadian company which operates the XE.com and x-rates.com websites, providing currency-related data and international payments services.

Under the terms of the purchase, the Company paid purchase consideration of \$90.6 million in cash and 642,912 shares of Euronet common stock, with a fair value at date of acquisition of \$40.1 million.

### Share repurchase plan

In September 2013, the Board of Directors authorized a stock repurchase program ("2013 Program") allowing Euronet to repurchase up to \$100 million in value or 5 million shares of its common stock through September 19, 2015.

Repurchases under the 2013 Program may take place in the open market or in privately negotiated transactions, including derivative transactions, and may be made under a Rule 10b5-1 plan. We purchased 1,600 shares for \$85 thousand during the first quarter of 2015 and none in the second quarter of 2015.

### Inflation and functional currencies

Generally, the countries in which we operate have experienced low and stable inflation in recent years. Therefore, the local currency in each of these markets is the functional currency. Currently, we do not believe that inflation will have a significant effect on our results of operations or financial position. We continually review inflation and the functional currency in each of the countries where we operate.

## OFF BALANCE SHEET ARRANGEMENTS

On occasion, we grant guarantees of the obligations of our subsidiaries and we sometimes enter into agreements with commercial counterparties that contain indemnification provisions, the terms of which may vary depending on the negotiated terms of each respective agreement. Our liability under such indemnification provisions may be subject to time and materiality limitations, monetary caps and other conditions and defenses. As of June 30, 2015, there were no material changes from the disclosure in our Annual Report on Form 10-K for the year ended December 31, 2014. To date, we are not aware of any significant claims made by the indemnified parties or parties to whom we have provided guarantees on behalf of our subsidiaries and, accordingly, no liabilities have been recorded as of June 30, 2015. See also Note 12, Commitments, to the unaudited consolidated financial statements included elsewhere in this report.

## CONTRACTUAL OBLIGATIONS

As of June 30, 2015, our future contractual obligations have not changed significantly from the amounts reported within our 2014 Form 10-K.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest rate risk

As of June 30, 2015, our total debt outstanding was \$436.1 million. Of this amount, \$342.9 million, 79% of our total debt obligations, relates to our Convertible Notes having a fixed coupon rate. Our \$402.5 million principal amount of Convertible Notes, issued in October 2014, accrue cash interest of 1.5% of the principal amount per annum. Based on quoted market prices, as of June 30, 2015, the fair value of our fixed rate Convertible Notes was \$448.5 million, compared to a carrying value of \$342.9 million. Interest expense for these notes, including accretion and amortization of deferred debt issuance costs, has a weighted average interest rate of 4.7% annually. Additionally, \$87.2 million, or 20% of our total debt obligations, relates to debt that accrues interest at variable rates. If we were to maintain these borrowings for one year and maximize the potential borrowings available under the revolving credit facility for one year, a 1% (100 basis points) increase in the applicable interest rate would result in additional annual interest expense to the Company of approximately \$6.3 million.

The remaining \$6.0 million, or 1% of our total debt obligations, relates to capitalized leases with fixed payment and interest terms that expire between 2015 and 2019.

Our excess cash is invested in instruments with original maturities of three months or less or in certificates of deposit that may be withdrawn at any time without penalty; therefore, as investments mature and are reinvested, the amount we earn will increase or decrease with changes in the underlying short-term interest rates.

Foreign currency exchange rate risk

For the first half of 2015, approximately 70% of our revenues were generated in non-U.S. dollar countries and we expect to continue generating a significant portion of our revenues in countries with currencies other than the U.S. dollar.

We are particularly vulnerable to fluctuations in exchange rates of the U.S. dollar to the currencies of countries in which we have significant operations, primarily the Australian dollar, Brazilian real, British pound, euro, Indian Rupee, Hungarian forint and Polish zloty. As of June 30, 2015, we estimate that a 10% fluctuation in these foreign currency exchange rates would have the combined annualized effect on reported net income and working capital of approximately \$50 million to \$55 million. This effect is estimated by applying a 10% adjustment factor to our non-U.S. dollar results from operations, intercompany loans that generate foreign currency exchange gains or losses and working capital balances that require translation from the respective functional currency to the U.S. dollar reporting currency.

Additionally, we have other non-current, non-U.S. dollar assets and liabilities on our balance sheet that are translated to the U.S. dollar during consolidation. These items primarily represent goodwill and intangible assets recorded in connection with acquisitions in countries other than the U.S. We estimate that a 10% fluctuation in foreign currency exchange rates would have a non-cash impact on total comprehensive income of approximately \$70 million to \$75 million as a result of the change in value of these items during translation to the U.S. dollar. For the fluctuations described above, a strengthening U.S. dollar produces a financial loss, while a weakening U.S. dollar produces a financial gain.

We believe this quantitative measure has inherent limitations and does not take into account any governmental actions or changes in either customer purchasing patterns or our financing or operating strategies. Because a majority of our revenues and expenses are incurred in the functional currencies of our international operating entities, the profits we earn in foreign currencies are positively impacted by the weakening of the U.S. dollar and negatively impacted by the strengthening of the U.S. dollar. Additionally, our debt obligations are primarily in U.S. dollars; therefore, as foreign currency exchange rates fluctuate, the amount available for repayment of debt will also increase or decrease.

We are also exposed to foreign currency exchange rate risk in our Money Transfer Segment. A majority of the money transfer business involves receiving and disbursing different currencies, in which we earn a foreign currency spread based on the difference between buying currency at wholesale exchange rates and selling the currency to customers at retail exchange rates. We enter into foreign currency forwards and cross-currency swaps, to minimize exposure related to fluctuations in foreign currency exchange rates. As of June 30, 2015, we had foreign currency derivative contracts outstanding with a notional value of \$928 million, primarily in Australian dollars, British pounds, euros and Mexican pesos, that were not designated as hedges and mature within the next twelve months. See Note 8, Derivative

Instruments and Hedging Activities to our unaudited consolidated financial statements for additional information.

ITEM 4. CONTROLS AND PROCEDURES

Our executive management, including our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rule 13a-15(b) under the Exchange Act as of June 30, 2015. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that the design and operation of these disclosure controls and procedures were effective as of such date to provide reasonable assurance that information required to be disclosed in our reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures.

Change in Internal Controls

There have not been any changes in internal control over financial reporting during the three months ended June 30, 2015 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II—OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The Company is, from time to time, a party to legal or regulatory proceedings arising in the ordinary course of its business.

The discussion regarding contingencies in Part I, Item 1 — Financial Statements (unaudited), Note 13, Litigation and Contingencies, to the unaudited consolidated financial statements in this report is incorporated herein by reference. Currently, there are no other legal or regulatory proceedings that management believes, either individually or in the aggregate, would have a material adverse effect on the Company's consolidated financial condition or results of operations. In accordance with U.S. GAAP, we record a liability when it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. These liabilities are reviewed at least quarterly and adjusted to reflect the impacts of negotiations, settlements, rulings, advice of legal counsel, and other information and events pertaining to a particular case or proceeding.

ITEM 1A. RISK FACTORS

You should carefully consider the risks described in Part I, Item 1A. Risk Factors in our Annual Report on Form 10-K for the fiscal year ended December 31, 2014, as may be updated in our subsequent filings with the SEC, before making an investment decision. Our operations are subject to a number of risks and uncertainties, including the risks and uncertainties described in our Annual Report on Form 10-K, as may be updated by any subsequent Quarterly Reports on Form 10-Q, including this Form 10-Q. If any of the risks identified in our Annual Report on Form 10-K, as may be updated by any subsequent Quarterly Reports on Form 10-Q, actually occurs, our business, financial condition or results of operations could be materially adversely affected. In that case, the trading price of our common stock could decline substantially. This Quarterly Report also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in the forward-looking statements as a result of a number of factors, including the risks described in our Risk Factors and elsewhere in this Quarterly Report. There have been no material changes from the risk factors previously disclosed in the Company's Annual Report on Form 10-K for the year ended December 31, 2014, as filed with the SEC.

Table of Contents

**ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS**

On June 17, 2015, the Company completed the acquisition of all of the capital stock of IME (M) Sdn Bhd and certain affiliated companies ("IME") pursuant to a Share Purchase Agreement (the "Purchase Agreement") among the Company and the selling shareholders of IME (the "Sellers"). Under the terms of the Purchase Agreement, one of the Sellers received purchase consideration which included 49,941 shares of Euronet common stock with a fair value at date of acquisition of \$3.0 million. The shares of Euronet common stock were not registered under the Securities Act of 1933, as amended ("Securities Act"), in reliance on the private offering exemption of Section 4(a)(2) of the Securities Act, and Rule 506 of Regulation D promulgated thereunder, and in addition with respect to the non-U.S. resident shareholder of IME pursuant to Regulation S promulgated under the Securities Act. Euronet issued the shares of its common stock in a private transaction to the shareholder of IME, who represented to Euronet that he is an accredited investor. In addition, the non-U.S. resident shareholder of IME represented to Euronet that he is located outside of the United States and is not a "U.S. Person." The shareholder of IME receiving Euronet common stock has agreed to customary restrictions on resale under applicable securities laws and additional transfer restrictions in the Purchase Agreement.

\* Filed herewith.

\*\* Pursuant to Item 601(b)(32) of Regulation S-K, this Exhibit is furnished rather than filed with this Form 10-Q.

PLEASE NOTE: Pursuant to the rules and regulations of the Securities and Exchange Commission, we have filed or incorporated by reference the agreements referenced above as exhibits to this Quarterly Report on Form 10-Q. The agreements have been filed to provide investors with information regarding their respective terms. The agreements are not intended to provide any other factual information about the Company or its business or operations. In particular, the assertions embodied in any representations, warranties and covenants contained in the agreements may be subject to qualifications with respect to knowledge and materiality different from those applicable to investors and may be qualified by information in confidential disclosure schedules not included with the exhibits. These disclosure schedules may contain information that modifies, qualifies and creates exceptions to the representations, warranties and covenants set forth in the agreements. Moreover, certain representations, warranties and covenants in the agreements may have been used for the purpose of allocating risk between the parties, rather than establishing matters as facts. In addition, information concerning the subject matter of the representations, warranties and covenants may have changed after the date of the respective agreement, which subsequent information may or may not be fully reflected in the Company's public disclosures. Accordingly, investors should not rely on the representations, warranties and covenants in the agreements as characterizations of the actual state of facts about the Company or its business or operations on the date hereof.
