The Malaysia Fund, Inc.

Letter to Stockholders

Overview

Performance

For the six months ended June 30, 2005, The Malaysia Fund, Inc. (the Fund) had a total return, based on net asset value per share, of -6.25%, net of fees, compared to -2.11% for the Kuala Lumpur Stock Exchange Composite (KLSE) Index (the Index) expressed in U.S. dollars. On June 30, 2005, the closing price of the Fund's shares on the New York Stock Exchange was \$5.64, representing a 0.9% discount to the Fund's net asset value per share.

Factors Affecting Performance

The market was generally lackluster during the period. However, the small and mid-cap stocks, where the Fund was overweight, suffered from significant sell downs in the second quarter of the year. The sell down was triggered by margin calls from several brokerage firms following the collapse of a small capitalization stock. The large-cap stocks were generally unscathed.

The economy registered a faster than expected 5.7% year-on-year growth during the first quarter of the year, driven mainly by higher private consumption. On a sector basis, the services sector has overtaken the manufacturing sector as the growth driver for the economy.

Corporate earnings during the first six months were mostly in line with expectations with the exception of property stocks, which suffered from higher raw material prices and slower sales. Banks also saw higher provisions in general.

Management Strategies

Following the recent weakness in the market, we see value in various mid-cap stocks that we believe continue to be well run and have strong balance sheets. As such, we may use this as a buying opportunity to increase weightings in such stocks in the Fund.

Sincerely,

Ronald E. Robison
Executive Vice President
Principal Executive Officer

July 2005

Investment Advisory Agreement Approval

June 30, 2005 (unaudited)

Nature, Extent and Quality of Services

The Board reviewed and considered the nature and extent of the investment advisory services provided by the Investment Adviser under the Advisory Agreement, including portfolio management, investment research and equity and fixed income securities trading. The Board reviewed similar information and factors regarding the Sub-Adviser, to the extent applicable. The Board also reviewed and considered the nature and extent of the non-advisory, administrative services provided by the Fund's Administrator under the Administration Agreement, including accounting, clerical, bookkeeping, compliance, business management and planning, and the provision of supplies, office space and utilities. (The Investment Adviser, Sub-Adviser and the Administrator together are referred to as the Adviser and the Advisory, Sub-Advisory and Administration Agreements together are referred to as the Management Agreement.) The Board also compared the nature of the services provided by the Adviser with similar services provided by non-affiliated advisers as reported to the Board by Lipper Inc. (Lipper).

The Board reviewed and considered the qualifications of the portfolio managers, the senior administrative managers and other key personnel of the Adviser who provide the administrative and investment advisory services to the Fund. The Board determined that the Adviser's portfolio managers and key personnel are well qualified by education and/or training and experience to perform the services in an efficient and professional manner. The Board concluded that the nature and extent of the advisory and administrative services provided were necessary and appropriate for the conduct of the business and investment activities of the Fund. The Board also concluded that the overall quality of the advisory and administrative services was satisfactory.

Performance Relative to Comparable Funds Managed by Other Advisers

The Board reviewed the Fund's performance for the one-, three- and five-year periods ended November 30, 2004, as shown in reports (the Lipper Reports) provided by Lipper Inc. (Lipper), compared to the performance of comparable funds selected by Lipper (the performance peer group), and noted that the Fund's performance was lower than its performance peer group average for the one- and three-year periods but better for the five-year period. The Board discussed with the Adviser possible steps to improve performance. The Adviser informed the Board that in an effort to improve performance the Adviser was changing its investment strategy from a top-down to a bottom-up approach to stock selection and believes that this should help improve performance. The Board noted that the Fund's performance, relative to its performance peer group had improved during the last year compared to the three-year period. The Board concluded that the actions taken by the Adviser were reasonably designed to improve performance.

Fees and Expenses Relative to Comparable Funds Managed by Other Advisers

The Board reviewed the advisory and administrative fees (together, the management fee) paid by the Fund under the Management Agreement and the total expense ratio of the Fund. The Board noted that: (i) the Fund's management fee rate was lower than the average management fee rate for funds, selected by Lipper (the expense peer group), managed by other advisers with investment strategies comparable to those of the Fund, as shown in the Lipper Report for the Fund; and (ii) the Fund's total expense ratio was also lower than the average total expense ratio of the funds included in the Fund's expense peer group. The Board concluded that the Fund's management fee and total expense ratio were competitive with those of its expense peer group.

Breakpoints and Economies of Scale

The Board reviewed the structure of the Fund's management fee schedule under the Management Agreement and noted that it includes breakpoints. The Board also reviewed the level of the Fund's management fee and noted that the fee, as a percentage of the Fund's net assets, would decrease as net assets increase because the management fee includes breakpoints. The Board concluded that the Fund's management fee would reflect economies of scale as assets increase.

Profitability of Adviser and Affiliates

The Board considered and reviewed information concerning the costs incurred and profits realized by the Adviser and its affiliates during the last two years from their relationship with the Fund and the Morgan Stanley Fund Complex and reviewed with the Controller of the Adviser the cost allocation methodology used to determine the Adviser's profitability. Based on their review of the information they

The Malaysia Fund, Inc.

Investment Advisory Agreement Approval (cont d)

June 30, 2005 (unaudited)

received, the Board concluded that the profits earned by the Adviser and its affiliates were not excessive in light of the advisory, administrative and other services provided to the Fund.

Fall-Out Benefits

The Board considered so-called "fall-out benefits" derived by the Adviser and its affiliates from their relationship with the Fund and the Morgan Stanley Fund Complex, such as "float" benefits derived from handling of checks for purchases and sales of Fund shares through a broker-dealer affiliate of the Adviser and "soft dollar" benefits (discussed in the next section). The Board also considered that an affiliate of the Adviser, through a joint venture, receives revenue in connection with trading done on behalf of the Fund through an electronic trading system network ("ECN"). The Board considered the float benefits and the above-referenced ECN-related revenue and concluded that they were relatively small.

Soft Dollar Benefits

The Board considered whether the Adviser realizes any benefits as a result of brokerage transactions executed through "soft dollar" arrangements. Under such arrangements, brokerage commissions paid by the Fund and/or other funds managed by the Adviser would be used to pay for research that a securities broker obtains from third parties, or to pay for both research and execution services from securities brokers who effect transactions for the Fund. The Adviser informed the Board that it does not use Fund commissions to pay for third party research. It does use commissions to pay for research which is bundled with execution services. The Board recognized that the receipt of such research from brokers may reduce the Adviser's costs but concluded that the receipt of such research strengthens the investment management resources of the Adviser, which may ultimately benefit the Fund and other funds in the Morgan Stanley Fund Complex.

Adviser Financially Sound and Financially Capable of Meeting the Fund's Needs

The Board considered whether the Adviser is financially sound and has the resources necessary to perform its obligations under the Management Agreement. The Board noted that the Adviser's operations remain profitable, although increased expenses in recent years have reduced the Adviser's profitability. The Board concluded that the Adviser has the financial resources necessary to fulfill its obligations under the Management Agreement.

Historical Relationship Between the Fund and the Adviser

The Board also reviewed and considered the historical relationship between the Fund and the Adviser, including the organizational structure of the Adviser, the policies and procedures formulated and adopted by the Adviser for managing the Fund's operations and the Board's confidence in the competence and integrity of the senior managers and key personnel of the Adviser. The Board concluded that it is beneficial for the Fund to continue its relationship with the Adviser.

Other Factors and Current Trends

The Board considered the controls and procedures adopted and implemented by the Adviser and monitored by the Fund's Chief Compliance Officer and concluded that the conduct of business by the Adviser indicates a good faith effort on its part to adhere to high ethical standards in the conduct of the Fund's business.

General Conclusion

After considering and weighing all of the above factors, the Board concluded it would be in the best interest of the Fund and its stockholders to approve renewal of the Management Agreement for another year.

The Malaysia Fund, Inc.

Notes to Financial Statements

June 30, 2005 (unaudited)

The Malaysia Fund, Inc. (the Fund) was incorporated on March 12, 1987 and is registered as a diversified, closed-end management investment company under the Investment Company Act of 1940 (the 1940 Act), as amended. The Fund's investment objective is long-term capital appreciation through investment primarily in equity securities.

A. Accounting Policies: The following significant accounting policies are in conformity with U.S. generally accepted accounting principles for investment companies. Such policies are consistently followed by the Fund in the preparation of its financial statements. U.S. generally accepted accounting principles may require management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results may differ from those estimates.

1. Security Valuation: Equity securities listed on a U.S. exchange are valued at the latest quoted sales price on the valuation date. Equity securities listed or traded on NASDAQ, for which market quotations are available, are valued at the NASDAQ Official Closing Price. Securities listed on a foreign exchange are valued at their closing price. Unlisted securities and listed securities not traded on the valuation date for which market quotations are readily available are valued at the mean between the current bid and asked prices obtained from reputable brokers. Debt securities purchased with remaining maturities of 60 days or less are valued at amortized cost, if it approximates value.

All other securities and investments for which market values are not readily available, including restricted securities, and those securities for which it is inappropriate to determine prices in accordance with the aforementioned procedures, are valued at fair value as determined in good faith under procedures adopted by the Board of Directors, although the actual calculations may be done by others. Factors considered in making this determination may include, but are not limited to, information obtained by contacting the issuer, analysts, or the appropriate stock exchange (for exchange-traded securities), analysis of the issuer's financial statements or other available documents and, if necessary, available information concerning other securities in similar circumstances.

Most foreign markets close before the New York Stock Exchange (NYSE). Occasionally, developments that could affect the closing prices of securities and other assets may occur between the times at which valuations of such securities are determined (that is, close of the foreign market on which the securities trade) and the close of business on the NYSE. If these developments are expected to materially affect the value of the securities, the valuations may be adjusted to reflect the estimated fair value as of the close of the NYSE, as determined in good faith under procedures established by the Board of Directors.

2. Repurchase Agreements: The Fund may enter into repurchase agreements under which the Fund lends excess cash and takes possession of securities with an agreement that the counterparty will repurchase such securities. In connection with transactions in repurchase agreements, a bank as custodian for the Fund takes possession of the underlying securities (collateral), with a market value at least equal to the amount of the repurchase transaction, including principal and accrued interest. To the extent that any repurchase transaction exceeds one business day, the value of the collateral is marked-to-market on a daily basis to determine the adequacy of the collateral. In the event of

default on the obligation to repurchase, the Fund has the right to liquidate the collateral and apply the proceeds in satisfaction of the obligation. In the event of default or bankruptcy by the counterparty to the agreement, realization and/or retention of the collateral or proceeds may be subject to legal proceedings.

The Fund, along with other affiliated investment companies, may utilize a joint trading account for the purpose of entering into one or more repurchase agreements.

3. Foreign Currency Translation: The books and records of the Fund are maintained in U.S. dollars. Foreign currency amounts are translated into U.S. dollars at the mean of the bid and asked prices of such currencies against U.S. dollars last quoted by a major bank as follows:

investments, other assets and liabilities at the prevailing rates of exchange on the valuation date;

investment transactions and investment income at the prevailing rate of exchange on the dates of such transactions.

Although the net assets of the Fund are presented at the foreign exchange rates and market values at the close of the period, the Fund does not isolate that portion of the results of operations arising as a result of changes in the foreign exchange rates from the fluctuations arising from

The Malaysia Fund, Inc.

Notes to Financial Statements (cont d)

June 30, 2005 (unaudited)

changes in the market prices of the securities held at period end. Similarly, the Fund does not isolate the effect of changes in foreign exchange rates from the fluctuations arising from changes in the market prices of securities sold during the period. Accordingly, realized and unrealized foreign currency gains (losses) due to securities transactions are included in the reported net realized and unrealized gains (losses) on investment transactions and balances.

Net realized gains (losses) on foreign currency transactions represent net foreign exchange gains (losses) from sales and maturities of foreign currency exchange contracts, disposition of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amount of investment income and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent amounts actually received or paid. Net unrealized currency gains (losses) from valuing foreign currency denominated assets and liabilities at period end exchange rates are reflected as a component of unrealized appreciation (depreciation) on investments and foreign currency translations in the Statement of Assets and Liabilities. The change in net unrealized currency gains (losses) on foreign currency translations for the period is reflected in the Statement of Operations.

A significant portion of the Fund's net assets consist of Malaysian equity securities and foreign currency. Future economic and political developments in Malaysia could adversely affect the liquidity or value, or both, of securities in which the Fund is invested. Changes in currency exchange rates will affect the value of and investment income from such investments. Foreign securities may be subject to greater price volatility, lower liquidity and less diversity than equity securities of companies based in the United States. In addition, foreign securities may be subject to substantial governmental involvement in the economy and greater social, economic and political uncertainty.

The Fund may use derivatives to achieve its investment objectives. The Fund may engage in transactions in futures contracts on foreign currencies, stock indices, as well as in options, swaps and structured notes. Consistent with the Fund's investment objectives and policies, the Fund may use derivatives for non-hedging as well as hedging purposes.

Following is a description of derivative instruments that the Fund has utilized and their associated risks:

4. Foreign Currency Exchange Contracts: The Fund may enter into foreign currency exchange contracts generally to attempt to protect securities and related receivables and payables against changes in future foreign exchange rates and, in certain situations, to gain exposure to a foreign currency. A foreign currency exchange contract is an agreement between two parties to buy or sell currency at a set price on a future date. The market value of the contract will fluctuate with changes in currency exchange rates. The contract is marked-to-market daily and the change in market value is recorded by the Fund as unrealized gain or loss. The Fund records realized gains or losses when the contract is closed equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. Risk may arise upon entering into these contracts from the potential inability of counterparties to meet the terms of their contracts and is generally limited to the amount of unrealized gain on the contracts, if any, at the date of default. Risks may also arise from unanticipated movements in the value of a foreign currency relative to the U.S. dollar.

5. **Other:** Security transactions are accounted for on the date the securities are purchased or sold. Realized gains and losses on the sale of investment securities are determined on the specific identified cost basis. Interest income is recognized on the accrual basis. Dividend income and distributions are recorded on the ex-dividend date (except certain dividends which may be recorded as soon as the Fund is informed of such dividends) net of applicable withholding taxes.

B. Investment Advisory Fees: Morgan Stanley Investment Management Inc. (the U.S. Adviser or MS Investment Management) provides investment advisory services to the Fund under the terms of an Investment Advisory Agreement (the Agreement). Under the Agreement, the U.S. Adviser is paid a fee computed weekly and payable monthly at an annual rate of 0.90% of the Fund's first \$50 million of average weekly net assets, 0.70% of the Fund's next \$50 million of average weekly net assets and 0.50% of the Fund's average weekly net assets in excess of \$100 million.

AMMB Consultant Sdn Bhd (the Malaysian Adviser) provides investment advice, research and assistance on behalf of the Fund to Morgan Stanley Investment Management Inc.

The Malaysia Fund, Inc.

Notes to Financial Statements (cont d)

June 30, 2005 (unaudited)

under terms of a contract. Under the contract, the Malaysian Adviser is paid a fee computed weekly and payable monthly at an annual rate of 0.25% of the Fund's first \$50 million of average weekly net assets, 0.15% of the Fund's next \$50 million of average weekly net assets and 0.10% of the Fund's average weekly net assets in excess of \$100 million.

C. Administration Fees: MS Investment Management also serves as Administrator to the Fund pursuant to an administration agreement for a monthly fee, computed weekly and payable monthly, which on an annual basis equals to 0.08% of the average weekly net assets of the Fund. As approved by the Board of Directors, MS Investment Management has agreed to limit the administration fee so that it will be no greater than the old administration fee of 0.02435% of the Fund's average weekly net assets plus \$24,000 per annum. This waiver is voluntary and may be terminated at any time. For the six months ended June 30, 2005, \$4,000 of administration fees were waived pursuant to this arrangement. Under a sub-administration agreement between the Administrator and J.P. Morgan Investor Services Co. (JPMIS), a corporate affiliate of JPMorganChase Bank, JPMIS provides certain administrative services to the Fund. For such services, the Administrator pays JPMIS a portion of the fee the Administrator receives from the Fund. An employee of JPMIS is an officer of the Fund. Administration costs (including out-of-pocket expenses) incurred in the ordinary course of providing services under the agreement, except pricing services and extraordinary expenses, will be covered under the administration fee.

D. Custodian Fees: JPMorgan Chase Bank serves as custodian for the Fund. The Custodian holds cash, securities, and other assets of the Fund as required by the 1940 Act. Custody fees are payable monthly based on assets held in custody, investment purchases and sales activity and account maintenance fees, plus reimbursement for certain out-of-pocket expenses.

The Fund has entered into an arrangement with its custodian whereby credits realized on uninvested cash balances were used to offset a portion of the Fund's expenses. These custodian credits are shown as Expense Offset on the Statement of Operations.

E. Federal Income Taxes: It is the Fund's intention to continue to qualify as a regulated investment company and distribute all of its taxable income. Accordingly, no provision for Federal income taxes is required in the financial statements. The Fund may be subject to taxes imposed by countries in which it invests. The Fund is currently not subject to Malaysian withholding taxes on dividends and/or capital gains.

The tax character of distributions paid may differ from the character of distributions shown on the Statements of Changes in Net Assets due to short-term capital gains being treated as ordinary income for tax purposes. The tax character of distributions paid during 2004 and 2003 were as follows:

Edgar Filing: MALAYSIA FUND INC - Form N-CSRS

2004 Distributions Paid From: (000)		2003 Distributions Paid From: (000)	
Ordinary Income	Long-term Capital Gain	Ordinary Income	Long-term Capital Gain
\$ 618	\$	\$ 1,495	\$

The amount and character of income and capital gain distributions to be paid by the Fund are determined in accordance with Federal income tax regulations, which may differ from U.S. generally accepted accounting principles. The book/tax differences are considered either temporary or permanent in nature.

Temporary differences are generally due to differing book and tax treatments for the timing of the recognition of gains and losses on certain investment transactions and the timing of the deductibility of certain expenses.

Permanent differences are generally due to differing treatments of gains and losses related to foreign currency transactions and gains on certain equity securities designated as issued by passive foreign investment companies. Permanent book and tax basis differences may result in reclassifications among undistributed (distributions in excess of) net investment income (or accumulated net investment loss), accumulated net realized gain (loss) and paid-in capital.

At December 31, 2004, the components of distributable earnings on a tax basis were as follows:

Undistributed Ordinary Income (000)	Undistributed Long-term Capital Gain (000)
\$ 188	\$

At June 30, 2005, the U.S. Federal income tax cost basis of investments was \$48,964,000 and, accordingly, net unrealized appreciation for U.S. Federal income tax purposes was \$6,314,000, of which \$12,786,000 related to appreciated securities and \$6,472,000 related to depreciated securities.

The Malaysia Fund, Inc.

Notes to Financial Statements (cont d)

June 30, 2005 (unaudited)

At December 31, 2004, the Fund had a capital loss carryforward for U.S. Federal income tax purposes of approximately \$70,903,000 available to offset future capital gains of which \$495,000 will expire on December 31, 2005, \$65,683,000 will expire on December 31, 2006, \$2,720,000 will expire on December 31, 2007, and \$2,005,000 will expire on December 31, 2009. During the year ended December 31, 2004, the Fund utilized capital loss carryforward for U.S. Federal income tax purposes of approximately \$2,905,000.

To the extent that capital loss carryforwards are used to offset any future capital gains realized during the carryover period as provided by U.S. Federal income tax regulations, no capital gains tax liability will be incurred by the Fund for gains realized and not distributed. To the extent that capital gains are offset, such gains will not be distributed to the stockholders.

Net capital, currency and passive foreign investment company losses incurred after October 31, within the taxable year are deemed to arise on the first day of the Fund's next taxable year. For the year ended December 31, 2004, the Fund deferred to January 1, 2005, for U.S. Federal income tax purposes, post-October currency losses of \$2,000.

F. Contractual Obligations: The Fund enters into contracts that contain a variety of indemnifications. The Fund's maximum exposure under these arrangements is unknown. However, the Fund has not had prior claims or losses pursuant to these contracts and expects the risk of loss to be remote.

G. Other: During the six months ended June 30, 2005, the Fund made purchases and sales totalling approximately \$6,926,000 and \$4,639,000, respectively, of investment securities other than long-term U.S. Government securities and short-term investments. There were no purchases or sales of long-term U.S. Government securities.

On July 15, 2002, the Fund commenced a share repurchase program for purposes of enhancing stockholder value and reducing the discount at which the Fund's shares traded from their net asset value. During the six months ended June 30, 2005, the Fund did not repurchase any of its shares. Since the inception of the program, the Fund has repurchased 53,103 of its shares at an average discount of 16.78% from net asset value per share. The Fund expects to continue to repurchase its outstanding shares at such time and in such amounts as it believes will further the accomplishment of the foregoing objectives, subject to review by the Board of Directors.

On June 20, 2005, the Officers of the Fund, pursuant to authority granted by the Board of Directors declared a distribution of \$0.0195 per share, derived from net investment income, payable on July 15, 2005 to stockholders of record on June

30, 2005.

Reporting to Stockholders

Each Morgan Stanley Fund provides a complete schedule of portfolio holdings in its semi-annual and annual reports within 60 days of the end of the Fund's second and fourth fiscal quarters by filing the schedule electronically with the Securities and Exchange Commission (SEC). The semi-annual reports are filed on Form N-CSRS and the annual reports are filed on Form N-CSR. Morgan Stanley also delivers the semi-annual and annual reports to Fund stockholders and makes these reports available on its public website, www.morganstanley.com. Each Morgan Stanley Fund also files a complete schedule of portfolio holdings with the SEC for the Fund's first and third fiscal quarters on Form N-Q. Morgan Stanley does not deliver the reports for the first and third fiscal quarters to stockholders, nor are the reports posted to the Morgan Stanley public website. You may, however, obtain the Form N-Q filings (as well as the Form N-CSR and N-CSRS filings) by accessing the SEC's website, www.sec.gov. You may also review and copy them at the SEC's Public Reference Room in Washington, DC. Information on the operation of the SEC's Public Reference Room may be obtained by calling the SEC at 1(800) SEC-0330. You can also request copies of these materials, upon payment of a duplicating fee, by electronic request at the SEC's email address (publicinfo@sec.gov) or by writing the Public Reference section of the SEC, Washington, DC 20549-0102.

Proxy Voting Policies and Procedures and Proxy Voting Record

A copy of (1) the Fund's policies and procedures with respect to the voting of proxies relating to the Fund's portfolio securities; and (2) how the Fund voted proxies relating to portfolio securities during the most recent twelve-month period ended June 30 is available without charge, upon request, by calling 1(800) 548-7786 or by visiting our website at www.morganstanley.com/im. This information is also available on the SEC's website at www.sec.gov.

The Malaysia Fund, Inc.

Dividend Reinvestment and Cash Purchase Plan

Pursuant to the Dividend Reinvestment and Cash Purchase Plan (the Plan), each stockholder will be deemed to have elected, unless American Stock Transfer & Trust Company (the Plan Agent) is otherwise instructed by the stockholder in writing, to have all distributions automatically reinvested in Fund shares. Participants in the Plan have the option of making additional voluntary cash payments to the Plan Agent, annually, in any amount from \$100 to \$3,000, for investment in Fund shares.

Dividend and capital gain distributions will be reinvested on the reinvestment date in full and fractional shares. If the market price per share equals or exceeds net asset value per share on the reinvestment date, the Fund will issue shares to participants at net asset value or, if net asset value is less than 95% of the market price on the reinvestment date, shares will be issued at 95% of the market price. If net asset value exceeds the market price on the reinvestment date, participants will receive shares valued at market price. The Fund may purchase shares of its Common Stock in the open market in connection with dividend reinvestment requirements at the discretion of the Board of Directors. Should the Fund declare a dividend or capital gain distribution payable only in cash, the Plan Agent will purchase Fund shares for participants in the open market as agent for the participants.

The Plan Agent's fees for the reinvestment of dividends and distributions will be paid by the Fund. However, each participant's account will be charged a pro rata share of brokerage commissions incurred on any open market purchases effected on such participant's behalf. A participant will also pay brokerage commissions incurred on purchases made by voluntary cash payments. Although stockholders in the Plan may receive no cash distributions, participation in the Plan will not relieve participants of any income tax which may be payable on such dividends or distributions.

In the case of stockholders, such as banks, brokers or nominees, that hold shares for others who are the beneficial owners, the Plan Agent will administer the Plan on the basis of the number of shares certified from time to time by the stockholder as representing the total amount registered in the stockholder's name and held for the account of beneficial owners who are participating in the Plan.

Stockholders who do not wish to have distributions automatically reinvested should notify the Plan Agent in writing. There is no penalty for non-participation or withdrawal from the Plan, and stockholders who have previously withdrawn from the Plan may rejoin at any time. Requests for additional information or any correspondence concerning the Plan should be directed to the Plan Agent at:
