Notes to Condensed Consolidated Financial Statements (Unaudited)

1. Basis of Presentation

The accompanying condensed consolidated financial statements of the Company and its wholly-owned subsidiaries are unaudited and have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America are not required in these interim financial statements and have been condensed or omitted. All significant intercompany accounts and transactions have been eliminated in consolidation. Certain prior year amounts have been reclassified to conform to current year presentation.

In the opinion of management, the accompanying condensed consolidated financial statements contain all normal and recurring adjustments necessary to present fairly the financial position of the Company as of September 30, 2007 and the results of operations for the three and nine month periods ended September 30, 2007 and 2006, cash flows for the nine month periods ended September 30, 2007 and 2006 and changes in shareholders' equity for the nine month period ended September 30, 2007. The December 31, 2006 condensed consolidated balance sheet has been derived from the audited consolidated financial statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2006.

These condensed consolidated financial statements should be read in conjunction with the Company's audited consolidated financial statements as of December 31, 2006 and for the year then ended included in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2006. The results for the three and nine months ended September 30, 2007 are not necessarily indicative of the results for an entire year.

Adoption of New Accounting Standard

Effective January 1, 2007 the Company adopted the provisions of FASB Interpretation 48, Accounting for Uncertainty in Income Taxes (FIN 48). FIN 48 clarifies the accounting and reporting for uncertainties in income tax law. This interpretation prescribes a comprehensive model for the financial statement recognition, measurement, presentation and disclosure of uncertain tax positions taken or expected to be taken in income tax returns. For those benefits to be recognized, a tax position must be more-likely-than-not to be sustained upon examination by taxing authorities. At January 1, 2007, the Company had a liability for unrecognized tax benefits of \$3,379,000 (including interest and penalties of \$731,000) of which \$284,000 was charged to retained earnings at January 1, 2007. Of this total, \$2,586,000 (net of the federal benefit on state issues) represents the amount of unrecognized tax benefits that, if recognized, would favorably affect the effective income tax rate in any future periods.

The Company or one of its subsidiaries file U.S. federal income tax returns and tax returns in various state and foreign jurisdictions in Canada and Western Europe. The Company's U.S. federal income tax returns have been examined by the Treasury Department through 2001. State and local tax returns have been examined through various dates from 2001 to 2005 with ongoing tax examinations pending in several states. Included in the Company's FIN 48 liability is a current liability of \$2,264,000 for the expected taxes and interest and penalties relating to pending state tax examinations involving disputed allocations of income; no issues have been raised to date with respect to the other pending state tax examinations. The Company has classified this as a current liability because payment of cash is anticipated within one year. The income tax returns of the Company's principal foreign subsidiaries have been audited by local taxing authorities for years ended in 2001 through 2004.

Edgar Filing: SYSTEMAX INC - Form 10-Q

With the exception of the current liability of \$2,264,000, the Company's remaining tax liabilities and interest with respect to unrecognized tax benefits have been reclassified to other non-current liabilities on the balance sheet because payment of cash is not anticipated within one year. This amount at January 1, 2007 aggregates to approximately \$1,115,000, including \$305,000 for interest and penalties. The Company's continuing practice is to record interest and penalties related to tax positions in income tax expense in its consolidated statement of operations.

During the nine months ended September 30, 2007, the Company resolved a state tax increase issue by paying an assessment of approximately \$1,901,000 (including \$169,000 in interest) to a state taxing authority. As of September 30, 2007 the Company's liability for unrecognized tax benefits was approximately \$1,539,000 (including interest and penalties of approximately \$624,000).

The impact of FIN 48 on the results for the three months ended September 30, 2007 was not material.

Other than the aforementioned FIN 48 adoption, since the date of the Company's annual report on Form 10-K there have been no material changes to the Company's significant accounting policies.

2. Stock-based Compensation Plans

Pre-tax stock-based employee compensation expense for the nine months ended September 30, 2007 and 2006 was approximately \$2,353,000 and \$1,228,000 respectively.

3. Net Income per Common Share

Net income per common share - basic was calculated based upon the weighted average number of common shares outstanding during the respective periods presented. Net income per common share - diluted was calculated based upon the weighted average number of common shares outstanding and included the equivalent shares for dilutive options outstanding during the respective periods. The dilutive effect of outstanding options issued by the Company is reflected in net income per share - diluted using the treasury stock method. Under the treasury stock method, options will only have a dilutive effect when the average market price of common stock during the period exceeds the exercise price of the options. The weighted average number of stock options outstanding excluded from the computation of diluted earnings per share was 100,000 and 23,000 shares for the three months ended September 30, 2007 and 2006 and zero and 53,000 shares for the nine months ended September 30, 2007 and 2006, respectively, due to their antidilutive effect.

4. Comprehensive Income

Comprehensive income consists of net income and foreign currency translation adjustments, net of tax, and is included in the Condensed Consolidated Statement of Shareholders' Equity. For the three month periods ended September 30, 2007 and 2006, comprehensive income was \$20,847,000 and \$12,218,000, respectively. For the nine month periods ended September 30, 2007 and 2006, comprehensive income was \$50,831,000 and \$41,351,000, respectively.

5. Credit Facilities

The Company maintains a \$120 million (which may be increased by up to \$30 million, subject to certain conditions) secured revolving credit agreement with a group of financial institutions which provides for borrowings in the United States and United Kingdom. The borrowings are secured by all of the Company's domestic and United Kingdom accounts receivable, the domestic inventories of the Company, general

Edgar Filing: SYSTEMAX INC - Form 10-Q

intangibles, the Company's shares of stock in its domestic subsidiaries and the Company's United Kingdom headquarters building. The credit facility expires and the outstanding borrowings thereunder are due on October 26, 2010. The revolving credit agreement contains certain financial and other covenants, including maintaining a minimum level of availability and restrictions on capital expenditures and payments of dividends. The Company was in compliance with all of the covenants as of September 30, 2007. As of September 30, 2007, eligible collateral under the agreement was \$120 million and total availability was \$110.2 million. There were outstanding letters of credit of \$9.8 million, and there were no outstanding advances, as of September 30, 2007.

The Company's Netherlands subsidiary maintains a 5.0 million (\$7.1 million at the September 30, 2007 exchange rate) credit facility with a local financial institution. At September 30, 2007 there were no borrowings outstanding. Borrowings under the facility are secured by the subsidiary's accounts receivable and are subject to a borrowing base limitation of 85% of the eligible accounts. The facility expires in September 2008.

6. Accrued Restructuring Costs

The Company periodically assesses its operations to ensure that they are efficient, aligned with market conditions and responsive to customer needs. During the years ended December 31, 2005 and 2004, management approved and implemented restructuring actions which included workforce reductions and facility consolidations.

The following table summarizes the components of the accrued restructuring charges and the movements within these components during the nine months ended September 30, 2007 (in thousands).

	Nine months ended September 30, 2007	
Balance, beginning of year	\$	89
Amounts paid		(89)
Balance, end of period	\$	

7. Product Warranties

Provisions for estimated future expenses relating to product warranties for the Company's assembled personal computers are recorded as cost of sales when revenue is recognized. Liability estimates are determined based on management judgment considering such factors as the number of units sold, historical and anticipated rates of warranty claims and the likely current cost of corrective action. The changes in accrued product warranties were as follows (in thousands):

	Nine months ended September 30, 2007	
Balance, beginning of year	\$	1,061
Charged to expense		1,066
Deductions		(1,162)
Balance, end of period	\$	965

8. Segment Information

The Company operates and is internally managed in three operating segments- Technology Products, Industrial Products and Hosted Software. Our Technology Products segment sales include computer, computer supplies and consumer electronics. We assemble PCs and sell them under the trademarks *Systemax* and *Ultra*. In addition, we market and sell computers, computer supplies and consumer electronics manufactured by other leading companies. Our Industrial Products segment sells a wide array of material handling equipment, storage equipment, and consumable industrial products. Our Hosted Software segment participates in the emerging market for on-demand, web-based business software applications through the marketing of our PCS Profitability Suite of hosted software.

Edgar Filing: SYSTEMAX INC - Form 10-Q

The Company's chief operating decision-maker is its Chief Executive Officer. The Company evaluates segment performance based on revenues, operating income before net interest, foreign exchange gains and losses, restructuring and other charges and income taxes. Corporate costs not identified with the disclosed segments and restructuring and other charges are grouped as Corporate and other expenses. The chief operating decision-maker reviews assets and makes capital expenditure decisions for the Company on a consolidated basis only. The accounting policies of each of the segments are the same as those of the Company.

Edgar Filing: SYSTEMAX INC - Form 10-Q

Revenues are attributed to countries based on the location of the selling subsidiary.

9. Recent Accounting Pronouncements

Edgar Filing: SYSTEMAX INC - Form 10-Q

In September 2006, the Financial Accounting Standards Board (FASB) issued FASB Statement No. 157 Fair Value Measurements which is effective for fiscal years beginning after November 15, 2007. This statement was issued to increase consistency and comparability in fair value measurements and for expanded disclosures about fair value measurements. The Company is currently evaluating the potential impact, if any, of this pronouncement.

In February 2007, the Financial Accounting Standards Board (FASB) issued FASB Statement No. 159 The Fair Value Option for Financial Assets and Financial Liabilities (including an amendment of FASB Statement No. 115) which is effective for fiscal years beginning after November 15, 2007. This interpretation was issued to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. The Company is currently evaluating the potential impact, if any, of this pronouncement.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Forward Looking Statements

This report contains forward looking statements within the meaning of that term in the Private Securities Litigation Reform Act of 1995 (Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934). Additional written or oral forward looking statements may be made by the Company from time to time, in filings with the Securities and Exchange Commission or otherwise. Statements contained in this report that are not historical facts are forward looking statements made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward looking statements may include, but are not limited to, projections of revenue, income or loss and capital expenditures, statements regarding future operations, financing needs, compliance with financial covenants in loan agreements, plans for acquisition or sale of assets or businesses and consolidation of operations of newly acquired businesses, and plans relating to products or services of the Company, assessments of materiality, predictions of future events and the effects of pending and possible litigation, as well as assumptions relating to the foregoing. In addition, when used in this discussion, the words anticipates, believes, estimates, expects, intends, plans and variations thereof and similar expressions are intended to identify forward looking statements.

Forward-looking statements in this report are based on the Company's beliefs and expectations as of the date of this report and are subject to risks and uncertainties which may have a significant impact on the Company's business, operating results or financial condition. Investors are cautioned that these forward-looking statements are inherently uncertain. Should one or more of the risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results or outcomes may vary materially from those described herein. Statements in this report, particularly in Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations and the Notes to Condensed Consolidated Financial Statements, describe certain factors, among others, that could contribute to or cause such differences.

Readers are cautioned not to place undue reliance on any forward looking statements contained in this report, which speak only as of the date of this report. We undertake no obligation to publicly release the result of any revisions to these forward looking statements that may be made to reflect events or circumstances after the date hereof or to reflect the occurrence of unexpected events.

Critical Accounting Policies and Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, and revenues and expenses during the period. Significant accounting policies employed by the Company, including the use of estimates, were presented in the Notes to Consolidated Financial Statements of the Company's 2006 Annual Report on Form 10-K.

Critical accounting policies are those that are most important to the presentation of our financial condition and results of operations, require management's most difficult, subjective and complex judgments, and involve uncertainties. The accounting policies that have been identified as critical to our business operations and understanding the results of operations pertain to revenue recognition, accounts receivable and allowance for doubtful accounts, inventories, long-lived assets, income taxes and restructuring charges and accruals. The application of each of these critical accounting policies and estimates was discussed in Item 7 of the Company's Annual Report on Form 10-K for the year ended December 31, 2006. There have been no significant changes in the application of critical accounting policies or estimates during 2007, with the exception

Edgar Filing: SYSTEMAX INC - Form 10-Q

of any tax estimates or adjustments related to the adoption of FIN 48. Management believes that full consideration has been given to all relevant circumstances that we may be subject to, and the condensed consolidated financial statements of the Company accurately reflect management's best estimate of the consolidated results of operations, financial position and cash flows of the Company for the periods presented. Because of the uncertainty in these estimates, actual results could differ from estimates used in applying the critical accounting policies. We are not aware of any reasonably likely events or circumstances which would result in different amounts being reported that would materially affect its financial condition or results of operations.

Overview

We are a direct marketer of brand name and private label products. Our operations are organized in three primary reportable segments Technology Products, Industrial Products and Hosted Software. Our Technology Products segment markets personal desktop computers, notebook computers and computer related products in North America and Europe. We assemble our own PCs and sell them under our own trademarks, which we believe gives us a competitive advantage. We also sell personal computers, computer supplies and consumer electronics manufactured by other leading companies. Our Industrial Products segment markets material handling equipment, storage equipment and consumable industrial items in North America. We offer more than 100,000 products and continuously update our product offerings to address the needs of our customers, which include large, mid-sized and small businesses, educational and government entities as well as individual consumers. We reach customers by multiple channels, utilizing relationship marketers, e-commerce web sites, mailed catalogues and retail outlet stores. We also participate in the emerging market for on-demand, web-based software applications through the marketing of our PCS Profitability Suite of hosted software, which we began during 2004, and in which we have not yet recognized sizable revenues and have incurred considerable losses to date. For the nine months ended September 30, 2007, Technology Products account for 92% of our net sales, and, as a result, we are dependent on the general demand for such products. The Technology Products segment has historically experienced seasonal fluctuations in sales, with the first and fourth calendar quarters experiencing higher product demand than the second and third quarters.

The market for Technology Products is subject to intense price competition and is characterized by narrow gross profit margins. The North American industrial products market is highly fragmented and we compete against multiple distribution channels. Distribution is working capital intensive, requiring us to incur significant costs associated with the warehousing of many products, including the costs of leasing warehouse space, maintaining inventory and inventory management systems, and employing personnel to perform the associated tasks. We supplement our on-hand product availability by maintaining relationships with major distributors and manufacturers, utilizing a combination of stocking and drop-shipment fulfillment.

The primary component of our operating expenses historically has been employee-related costs, which includes items such as wages, commissions, bonuses, and employee benefits. We have made substantial reductions in our workforce and closed or consolidated several facilities over the past several years. Our restructuring actions and other cost savings measures implemented over the last several years resulted in reducing our consolidated selling, general and administrative expenses. We will continue to monitor our costs and evaluate the need for additional actions.

The discussion of our results of operations and financial condition that follows will provide information that will assist in understanding our financial statements, the factors that we believe may affect our future results and financial condition as well as information about how certain accounting principles and estimates affect the consolidated financial statements. This discussion should be read in conjunction with the condensed consolidated financial statements included herein.

Results of Operations

Three and Nine Months Ended September 30, 2007 compared to the Three and Nine Months Ended September 30, 2006

Key Performance Indicators (in thousands):

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2007	2006	% Change	2007	2006	% Change
<i>Net sales by segment:</i>						
Technology products	\$ 625,683	\$ 522,661	19.7%	\$ 1,840,922	\$ 1,550,096	18.8%

Net income	\$ 17,644	\$ 12,451	41.7%	\$ 45,301	\$ 37,114	22.1%
Net margin	2.6%	2.2%	.4%	2.3%	2.2%	.1%

The Technology Products sales increase was driven by increased internet and retail store sales, private label product sales and expanded product offerings. The Industrial Products sales increase resulted from the Company increasing its market share through competitive pricing advantages and increased internet sales. Both North America sales and Europe sales increased in the third quarter and for the first nine months as compared to the same periods in the prior year. European sales increased primarily as a result of growth in business to business sales. Movements in foreign exchange rates positively impacted the European sales comparison by approximately \$15 million in the third quarter and \$57 million for the first nine months of 2007. Excluding the movements in foreign exchange rates, European sales would have increased 19% from the prior quarter and 16% from the prior year. Sales as measured in local currencies increased in all of the European markets we serve for the first nine months of 2007. The increase in our North American sales resulted from sales growth in both our Technology Products and Industrial Products groups. This increase was primarily a result of our continuing internet initiatives and expansion of our product offerings. Consolidated gross margin increased slightly due to decreased competitive pricing pressures. Third quarter gross margin improved by over 180 basis points as compared to the first quarter of 2007 due primarily to less price discounting for technology products. Gross margin is dependent on variables such as product mix, vendor price protection and other sales incentives, competition, pricing strategy, cooperative advertising funds required to be classified as a reduction to cost of sales and other variables, any or all of which may result in fluctuations in gross margin.

Selling, general and administrative expenses for the third quarter of 2007 increased 17.3% from the same period in 2006, primarily the result of \$7.0 million of increased salaries and \$6.4 million of increased advertising costs. For the first nine months of 2007 selling, general and

Edgar Filing: SYSTEMAX INC - Form 10-Q

administrative expenses increased by 14.4% compared to the same period in 2006, primarily the result of \$18.0 million of increased salaries and \$17.3 million of increased advertising costs offset by settlement proceeds of approximately \$2.4 million from a lawsuit that was settled favorably in the first quarter of 2007.

During the first quarter of 2006 we sold a warehouse facility and recognized a gain of approximately \$6.7 million net of a prepayment penalty incurred upon the repayment of the underlying mortgage loan, which is included in Interest and other

income, net. The facility was replaced by a larger, leased building.

The Company's estimated effective tax rate for the third quarter of 2007 was 34.5% compared to 36.2% in 2006. The reduction in the rate for third quarter of 2007 was primarily attributable to higher income in locations with lower effective tax rates. For the first nine months of 2007 the Company's effective tax rate was 35.5% down slightly from 35.7% in 2006.

Financial Condition, Liquidity and Capital Resources

Our primary liquidity needs are to support working capital requirements in our business, to fund capital expenditures, and to fund minimal acquisitions. We rely principally upon operating cash flow and borrowings under our credit facilities to meet these needs. We believe that cash flow available from these sources will be sufficient to meet our working capital requirements as well as any interest and debt repayments in the next twelve months and thereafter.

Selected liquidity data (in thousands):

	September 30, 2007		December 31, 2006		\$ Change
Cash and cash equivalents	\$ 97,784	\$	86,964	\$	10,820
Accounts receivable, net	\$ 181,259	\$	164,615	\$	16,644
Inventories, net	\$ 234,877	\$	233,136	\$	1,741
Prepaid expenses and other current	\$ 26,952	\$	26,919	\$	33
Accounts payable	\$ 220,977	\$	201,486	\$	19,491
Accrued expenses	\$ 74,271	\$	75,688	\$	(1,417)
Short term debt	\$ 494	\$	12,788	\$	(12,294)
Working capital	\$ 252,909	\$	229,399	\$	23,510

Our working capital increased in the first nine months of 2007, primarily the result of an increase in accounts receivable and inventory in Europe and an increase in accounts payable, offset by a reduction in short term debt in Europe and a decrease in accrued expenses. Our inventory turnover decreased from 10 to 9 times on an annual basis. Future accounts receivable and inventory balances will continue to fluctuate with changes in sales volume and the mix of our net sales between consumer and business customers.

The increase in cash provided by operations in 2007 resulted from changes in our working capital accounts, which provided \$5.1 million in cash compared to \$45.9 million of cash used in 2006, primarily the result of an increase in accounts payable and accrued expenses and a decrease in inventories and prepaids and other current assets. Cash generated from net income adjusted by other non-cash items provided \$58.3 million for the nine months ended September 30, 2007 compared to \$42.2 million provided by these items, excluding a gain on the sale of a warehouse facility in 2006, for the nine months ended September 30, 2006.

Edgar Filing: SYSTEMAX INC - Form 10-Q

Cash flows from investing activities provided cash of \$14.5 million in 2006, primarily the result of \$18.6 million of proceeds from the sale of a warehouse facility. Capital expenditures in 2007 and 2006 consisted primarily of upgrades and enhancements to our information and communications systems hardware and facilities costs for the opening of new retail outlet stores.

Net cash of \$46.8 million was used in financing activities for the nine months ended September 30, 2007. We repaid \$12.5 million in short-term loans in Europe and we paid \$36.6 million for a special dividend. Proceeds and excess tax benefits from stock option exercises provided approximately \$4.5 million of cash. In the first nine months of 2006, we used cash of \$12.4 million to repay long-term debt obligations, primarily for the mortgage on a warehouse facility, we used \$8.1 million to repay short-term borrowings in Europe and we received \$1.0 million of proceeds from stock option exercises and excess tax benefits.

Under our \$120 million (which may be increased by up to \$30 million, subject to certain conditions) secured revolving credit agreement for borrowings in the United States and United Kingdom, as of September 30, 2007, eligible collateral was \$120 million and total availability was \$110.2 million. There were outstanding letters of credit of \$9.8 million and there were no

outstanding advances as of September 30, 2007. The borrowings are secured by all of the domestic and United Kingdom accounts receivable, the domestic inventories of the Company, general intangibles, the Company's shares of stock in its domestic subsidiaries and the Company's United Kingdom headquarters building. The credit facility expires and the outstanding borrowings thereunder are due on October 26, 2010. The revolving credit agreement contains certain financial and other covenants, including maintaining a minimum level of availability and restrictions on capital expenditures and payments of dividends. We were in compliance with all of the covenants under this facility as of September 30, 2007.

Under our Netherlands 5 million (\$7.1 million at the September 30, 2007 exchange rate) credit facility, at September 30, 2007 there were no borrowings outstanding under this line. This facility expires in September 2008.

We also have certain obligations with various parties that include commitments to make future payments. Our principal commitments at September 30, 2007 consisted of repayments of borrowings under our credit agreements, payments under operating leases for certain of our real property and equipment and payments under employment and other service agreements. In connection with the adoption of FIN 48, as of September 30, 2007 the Company had a \$1.5 million liability related to uncertain tax positions. During the second quarter of 2007 the Company paid approximately \$1.9 million to a state taxing authority related to the settlement of a previously uncertain tax position. No other material changes occurred in the Company's contractual obligations during the nine months ended September 30, 2007.

Our current and anticipated needs for cash include funding growth in working capital and capital expenditures necessary for future growth in sales and potential expansion through acquisitions. We believe that our cash balances and our availability under credit facilities will be sufficient to fund our working capital and other cash requirements for the next twelve months.

We maintain our cash and cash equivalents primarily in money market funds or their equivalent. As of September 30, 2007, all of our investments had maturities of less than three months. Accordingly, we do not believe that our investments have significant exposure to interest rate risk.

Off-balance Sheet Arrangements

The Company currently leases its facility in Port Washington, NY from Addwin Realty Associates, an entity owned by Richard Leeds, Bruce Leeds, and Robert Leeds, Directors of the Company and the Company's three senior executive officers and principal stockholders.

The Company has not created, and is not party to, except as described above, any special-purpose or off-balance sheet entities for the purpose of raising capital, incurring debt or operating the Company's business. The Company does not have any arrangements or relationships with entities that are not consolidated into the financial statements that are reasonably likely to materially affect the Company's liquidity or the availability of capital resources.

Item 3. Quantitative and Qualitative Disclosure About Market Risk.

We are exposed to market risks, which include changes in U.S. and international interest rates as well as changes in currency exchange rates (principally Pounds Sterling, Euros and Canadian dollars) as measured against the U.S. dollar and each other.

The translation of the financial statements of our operations outside of the United States is impacted by movements in foreign currency exchange rates. Changes in currency exchange rates as measured against the U.S. dollar may positively or negatively affect sales, gross margins, operating expenses and retained earnings as expressed in U.S. dollars. We have limited involvement with derivative financial instruments and do not use them for trading purposes. We may enter into foreign currency options or forward exchange contracts aimed at limiting in part the impact of certain currency fluctuations, but as of September 30, 2007 we had no outstanding forward exchange contracts.

Our exposure to market risk for changes in interest rates relates primarily to our variable rate debt. Our variable rate debt includes short-term borrowings in Europe under our credit facilities. As of September 30, 2007, we did not have any balance

outstanding on our variable rate debt. Based on our market sensitive instruments as of September 30, 2007, a hypothetical change in average interest rates of one percentage point is not expected to have a material effect on our financial position, results of operations or cash flows for the fiscal year.

Item 4. Controls and Procedures

The Company establishes and maintains disclosure controls and procedures that are intended to provide reasonable assurance that information required to be disclosed by the Company in the reports it files under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls are also intended to provide reasonable assurance that such information is accumulated and reported to management, including the Chief Executive Officer and the Chief Financial Officer, to allow timely decisions regarding required disclosure.

Our management, including our Chief Executive Officer and Chief Financial Officer, does not expect that our disclosure controls and procedures will prevent all errors and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in control systems, misstatements due to error or fraud may occur and not be detected. These limitations include the circumstances that breakdowns can occur as a result of error or mistake, the exercise of judgment by individuals or that controls can be circumvented by acts of misconduct. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our management, including the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and the operation of our disclosure controls and procedures pursuant to Exchange Act Rules 13a-15 and 15d-15 of the Securities Exchange Act of 1934. As part of this evaluation we identified certain significant deficiencies, as previously defined under Auditing Standard No. 2: An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements, in our internal controls over financial reporting as of September 30, 2007. These significant deficiencies are:

The Company has internal control deficiencies in its information technology area including the lack of adequate general controls. The Company lacks program change and project management controls, has inadequate segregation of duties between information technology department development and production functions, needs formal information technology strategic planning, needs formal documentation of information security procedures, needs security around user rights to certain application systems and needs to implement formal help desk procedures.

The Company has disparate operating and financial information systems at certain of the Company's locations that have inherent limitations resulting in a control environment heavily reliant upon manual review procedures and adjustments. These deficiencies include inadequate or lack of systems interfaces and the preparation of numerous manual journal entries. In addition, there are additional adjustments entered into the general ledger from subsidiaries after submission by the subsidiary.

Edgar Filing: SYSTEMAX INC - Form 10-Q

These significant deficiencies do not, in our judgment, rise to the level of a material weakness in internal controls over financial reporting. The Chief Executive Officer and the Chief Financial Officer have concluded, based on our evaluation as of September 30, 2007, that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) were effective.

We have applied compensating procedures and processes as necessary to ensure the reliability of our financial reporting. Accordingly, management believes, based on its knowledge, that (i) this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which they were made, not misleading with respect to the period covered by this report and (ii) the financial statements, and other

financial information included in this report, fairly reflect the form and substance of transactions and fairly present in all material respects our financial condition, results of operations and cash flows as at, and for, the periods presented in this report.

Section 404 of the Sarbanes-Oxley Act

For the year ended December 31, 2006 and the period ended September 30, 2007, we were not subject to the internal controls certification and attestation requirements of Section 404 of the Sarbanes-Oxley Act of 2002 because we were not an accelerated filer as defined by the SEC. For the year ending December 31, 2007, as an accelerated filer we will be subject to the requirements of Section 404 that management provide an assessment of the effectiveness of the Company's internal control over financial reporting and the Company's independent registered public accounting firm will be required to audit that assessment.

We are working to achieve compliance with the requirements of Section 404. We are dedicating substantial time and resources to documentation and testing of our internal controls and have engaged outside consultants to assist us. We have increased headcount of qualified financial personnel. We have made substantive (though not material) changes to our internal controls, including developing estimation processes to appropriately calculate fairly stated inventory in transit, vendor drop shipments, sales returns and allowances, cooperative advertising and customer rebate reserves, and other vendor and employee related costs. We continue to perform and put in place extensive detect controls in areas where we have had significant deficiencies. We have formed a disclosure committee for purposes of ensuring that disclosures made by the Company in its filings with the SEC or to its security holders or the investment community are accurate and complete.

We have a significant amount of work to do to remediate the items we have identified. In the course of completing our evaluation and testing we may identify further deficiencies and weaknesses that will need to be addressed and will require remediation. We may not be able to correct all such internal control deficiencies in a timely manner and may find that a material weakness or weaknesses exist. As a result, management may not be able to issue an unqualified opinion on the effectiveness of the Company's internal control over financial reporting as of December 31, 2007.

Changes in Internal Control Over Financial Reporting

There have been no changes in the Company's internal controls over financial reporting during the quarterly period ended September 30, 2007 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

Systemax is a party to various pending legal proceedings and disputes arising in the normal course of business, including those involving commercial, employment, tax and intellectual property related claims, none of which, in management's opinion, is anticipated to have a material adverse effect on our consolidated financial statements.

Item 6. Exhibits

31 Certifications of the Chief Executive Officer and Chief Financial Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002

32 Certifications of the Chief Executive Officer and Chief Financial Officer pursuant to Section 906 of the Sarbanes-Oxley Act of 2002

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
