ARMONK, N.Y. (BUSINESS WIRE) xx IBM (NYSE:IBM) today announced third-quarter 2008 diluted earnings of \$2.05 per share from continuing operations, an increase of 22 percent, compared with diluted earnings of \$1.68 per share in the third quarter of 2007. The company also reported net income of \$2.8 billion, an increase of 20 percent. Revenue increased 5 percent, including 3 points of currency benefit, to \$25.3 billion, compared with the third quarter of 2007.

IBM said it continues to expect full-year 2008 earnings per share of at least \$8.75, or year-to-year growth of 22 percent.

The company's gross profit margin in the third quarter was 43.3 percent compared with 41.3 percent in the third quarter of 2007. Pre-tax income was \$3.9 billion, an increase of 19 percent compared with the third quarter of 2007.

At the end of the third quarter, IBM's year-to-date free cash flow was approximately \$6.4 billion and its cash balance was \$9.8 billion.

Our results demonstrate that the combination of a steady base of recurring revenue and profits, investments for growth in emerging markets, a range of products and services that deliver value to clients, and a strong and flexible financial foundation give IBM a competitive edge in good times and tough times, said Samuel J. Palmisano, IBM chairman, president and chief executive officer. We remain confident in our full-year outlook.
