INTRODUCTORY NOTE

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 about Solera National Bancorp, Inc. (the Company) and our subsidiary, Solera National Bank (the Bank, collectively with the Company, sometimes referred to as we, us and our) that are subject to risks and uncertainties. Forward-looking statements include information concerning future financial performance, business strategy, projected plans and objectives. Statements preceded by, followed by or that otherwise include the words anticipates, believes, estimates, expects, intends, plans, may increase, may fluctuate and similar expressions of future or c verbs such as will, should, would, and could are generally forward-looking in nature and not historical facts. Actual results may differ material from those projected, implied, anticipated or expected in the forward-looking statements. Readers of this quarterly report should not rely solely on the forward-looking statements and should consider all uncertainties and risks throughout this report. The statements are representative only as of the date they are made, and Solera National Bancorp, Inc. undertakes no obligation to update any forward-looking statement.

These forward-looking statements, implicitly and explicitly, include the assumptions underlying the statements and other information with respect to the Company s beliefs, plans, objectives, goals, expectations, anticipations, estimates, financial condition, results of operations, future performance and business, including management s expectations and estimates with respect to revenues, expenses, return on equity, return on assets, efficiency ratio, asset quality and other financial data and capital and performance ratios.

Although the Company believes that the expectations reflected in the forward-looking statements are reasonable, these statements involve risks and uncertainties that are subject to change based on various important factors, some of which are beyond the control of the Company. The following factors, among others, could cause the Company s results or financial performance to differ materially from its goals, plans, objectives, intentions, expectations and other forward-looking statements:

- the Company has a very limited operating history upon which to base an estimate of its future financial performance;
- the Company expects to incur losses during its initial years of operations;
- Solera National Bank s failure to implement its business strategies may adversely affect the Company s financial performance;
- the departures of key personnel or directors may impair Solera National Bank s operations;
- Solera National Bank s legal lending limits may impair its ability to attract borrowers;

- an economic downturn, especially one affecting Solera National Bank s primary service areas, may have an adverse effect on its financial performance;

- the Company could be negatively affected by changes in interest rates;

- the Company is subject to extensive regulatory oversight, which could restrain our growth and profitability;

- the Company may not be able to raise additional capital on terms favorable to it;

- the liquidity of the Company common stock will be affected by its limited trading market;

- monetary policy and other economic factors could adversely affect the Company s profitability;

- the Company s certificate of incorporation and bylaws, and the employment agreements of our Executive Officers, contain provisions that could make a takeover more difficult;

- management of Solera National Bank may be unable to adequately measure and limit credit risk associated with Solera National Bank s loan portfolio, which would affect the Company s profitability;

Table of Contents

- government regulation may have an adverse effect on the Company s profitability and growth;

- the Federal Deposit Insurance Corporation, (FDIC), has increased deposit insurance premiums to rebuild and maintain the federal deposit insurance fund, which could have a material affect on earnings;

- the Company cannot predict the effect of the recently enacted federal rescue plan;

- the effects of competition from other commercial banks, thrifts, mortgage banking firms, consumer finance companies, credit unions, securities brokerage firms, insurance companies, money market and other mutual funds, and other financial institutions operating in our market area and elsewhere, including institutions operating regionally, nationally, and internationally, together with such competitors offering banking products and services by mail, telephone, computer, and the Internet; and

- management s ability to manage these and other risks.

For a discussion of these and other risks and uncertainties that could cause actual results to differ from those contained in the forward-looking statements, see Risk Factors in Item 1A of the Company s 2008 Annual Report filed on Form 10-K with the Securities and Exchange Commission (SEC), which is available on the SEC s website at www.sec.gov. All forward-looking statements are qualified in their entirety by this cautionary statement, and the Company undertakes no obligation to revise or update this Quarterly Report on Form 10-Q to reflect events or circumstances after the date hereof. New factors emerge from time to time, and it is not possible for us to predict which factors, if any, will arise. In addition, the Company cannot assess the impact of each factor on the Company s business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements.

SOLERA NATIONAL BANCORP, INC.

UNAUDITED CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 SUMMARY OF ORGANIZATION

Solera National Bancorp, Inc. (the Company), is a Delaware corporation that was incorporated in 2006 to organize and serve as the holding company for Solera National Bank (the Bank), a national bank that opened for business on September 10, 2007. Solera National Bank is a full-service community, commercial bank headquartered in Lakewood, Colorado serving the Denver metropolitan area.

NOTE 2 BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements contain all adjustments (consisting only of normal recurring adjustments) which, in the opinion of management, are necessary to present fairly the financial position of the Company as of June 30, 2009, and the results of its operations for the three and six months ended June 30, 2009 and 2008. Cash flows are presented for the six months ended June 30, 2009 and 2008. Certain reclassifications have been made to the consolidated financial statements and related notes of prior periods to conform to the current presentation. These reclassifications had no impact on stockholders equity or net loss for the periods. Additionally, certain information and footnote disclosures normally included in financial statements have been condensed or omitted pursuant to rules and regulations of the U.S. Securities and Exchange Commission. The Company believes that the disclosures in the unaudited condensed consolidated financial statements are adequate to make the information presented not misleading. However, these unaudited condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and footnotes thereto included in the Company s Annual Report on Form 10-K as of and for the year ended December 31, 2008.

The Company received approval as a bank in organization in the first quarter of 2007, conducted an initial closing of its common stock offering and commenced banking operations during the third quarter of 2007. Successful completion of the Company s development program and, ultimately, the attainment of profitable operations are dependent on future events, including the successful execution of the Company s business plan and achieving a level of revenue adequate to support the Company s cost structure.

Critical Accounting Policies

Income taxes: Deferred taxes are provided on a liability method whereby deferred tax assets are recognized for deductible temporary differences and operating loss carryforwards, and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax basis. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of the enactment.

Securities available-for-sale: Securities available-for-sale are reported at fair value utilizing Level 2 inputs (see Note 11). For these securities, the Company obtains fair value measurements from independent pricing services. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bonds terms and conditions, among other things. Unrealized gains and losses are reported as a separate component of accumulated other comprehensive income.

Securities are also evaluated for impairment utilizing criteria such as the magnitude and duration of the decline, current market conditions, payment history, the credit worthiness of the obligator, the intent of the Company to retain the security or whether it is more-likely-than-not that the Company will be required to sell the security before recovery of the value, as well as other qualitative factors. If a decline in value below amortized cost is determined to be other-than-temporary, which does not necessarily indicate that the decline is permanent, but indicates that the prospects for a near-term recovery of value is not favorable, the security is reviewed in more detail in order to determine the portion of the impairment that relates to credit (resulting in a charge to earnings) versus the portion of

the impairment that is noncredit related (resulting in a charge to accumulated other comprehensive income). A credit loss is determined by comparing the present value of cash flows expected to be collected, computed using the original yield as the discount rate, to the amortized cost basis.

Stock-based compensation: The Company accounts for stock-based compensation to employees as outlined in FASB Statement No. 123(R), *Share-Based Payment*, (FAS 123R). The cost of employee services received in exchange for an award of equity instruments is based on the grant-date fair value of the award.

Provision for loan losses: The allowance for loan losses represents the Company s recognition of the risks of extending credit and its evaluation of the loan portfolio. The allowance for loan losses is maintained at a level considered adequate to provide for probable loan losses based on management s assessment of various factors affecting the loan portfolio, including a review of problem loans, business conditions, historical loss experience, evaluation of the quality of the underlying collateral, and holding and disposal costs. The allowance for loan losses is increased by provisions charged to expense and reduced by loans charged off, net of recoveries. Loan losses are charged against the allowance for loan losses when management believes the loan balance is uncollectible.

The Company has established a formal process for determining an adequate allowance for loan losses. The allowance for loan losses calculation process has two components. The first component represents the allowance for loan losses for impaired loans computed in accordance with FASB Statement No. 114, *Accounting by Creditors for Impairment of a Loan* (FAS 114 Component), as amended by FASB Statement No. 118, *Accounting by Creditors for Impairment of a Loan Income Recognition and Disclosures - an amendment of FASB Statement No. 114*. To determine the FAS 114 Component, collateral dependent impaired loans are evaluated using internal analyses as well as third-party information, such as appraisals. If an impaired loan is unsecured, it is evaluated using a discounted cash flow of the payments expected over the life of the loan using the loan s effective interest rate and giving consideration to currently existing factors that would impact the amount or timing of the cash flows. The second component is the allowance for loan losses calculated under FASB Statement No. 5, *Accounting for Contingencies* (FAS 5 Component), and represents the estimated probable losses inherent within the portfolio due to uncertainties in economic conditions, delays in obtaining information about a borrower s financial condition, delinquent loans that have not been determined to be impaired, results of internal and external loan reviews, and other factors. This component of the allowance for loan losses is calculated by assigning a probable loss range, to each identified risk factor. The recorded allowance for loan losses is the aggregate of the FAS 114 Component and FAS 5 Component.

Recently Issued Accounting Pronouncements

During the second quarter 2009, the Company adopted Financial Accounting Standards No. 165, *Subsequent Events* (FAS 165). FAS 165 establishes the accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. It requires the disclosure of the date through which an entity has evaluated subsequent events and the basis for that date, that is, whether that date represents the date the financial statements were issued or were available to be issued. See Note 12 Subsequent Events for the related disclosure. The adoption of FAS 165 did not have a material impact on our consolidated financial statements.

In April 2009, the FASB issued FSP FAS 115-2 and FAS 124-2, *Recognition and Presentation of Other-Than-Temporary Impairments* (FSP FAS 115-2/124-2). FSP FAS 115-2/124-2 requires entities to separate an other-than-temporary impairment of a debt security into two components when there are credit related losses associated with the impaired debt security for which management asserts that it does not have the intent to sell the security, and it is more likely than not that it will not be required to sell the security before recovery of its cost basis. The amount of the other-than-temporary impairment related to a credit loss is recognized in earnings, and the amount of the other-than-temporary impairment related to other factors is recorded in other comprehensive loss. FSP FAS 115-2/124-2 is effective for periods ending after June 15,

2009. The Company adopted FSP FAS 115-2/124-2 during the quarter ended June 30, 2009. Adoption of this Statement did not have a significant impact on the Company s financial position and results of operations.

In April 2009, the FASB issued FSP FAS 157-4, *Determining Fair Value When Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions that are Not Orderly* (FSP FAS 157-4). Under FSP FAS 157-4, if an entity determines that there has been a significant decrease in the volume and

Table of Contents

level of activity for the asset or the liability in relation to the normal market activity for the asset or liability (or similar assets or liabilities), then transactions or quoted prices may not accurately reflect fair value. In addition, if there is evidence that the transaction for the asset or liability is not orderly, the entity shall place little, if any, weight on that transaction price as an indicator of fair value. FSP FAS 157-4 is effective for periods ending after June 15, 2009. The Company adopted FSP FAS 157-4 during the quarter ended June 30, 2009. Adoption of this Statement did not have a significant impact on the Company s financial position and results of operations.

In April 2009, the FASB issued FSP FAS 107-1 and APB 28-1, *Interim Disclosures about Fair Value of Financial Instruments* (FSP FAS 107-1 and APB 28-1). FSP FAS 107-1 and APB 28-1 require disclosures about fair value of financial instruments in interim and annual financial statements. FSP FAS 107-1 and APB 28-1 are effective for periods ending after June 15, 2009. The Company adopted FSP FAS 107-1 and APB 28-1 during the quarter ended June 30, 2009. Adoption did not have an impact on the Company s financial position and results of operations.

In June 2009, the FASB issued Financial Accounting Standard No. 168, *The FASB Accounting Standards CodificationTM and the Hierarchy of Generally Accepted Accounting Principles a replacement of FASB Statement No. 162* (FAS 168). Under this Statement, *The FASB Accounting Standards Codification* (Codification) will become the source of authoritative U.S. generally accepted accounting principles (GAAP) recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the SEC under authority of federal securities laws are also sources of authoritative GAAP for SEC registrants. On the effective date of FAS 168, the Codification will supersede all then-existing non-SEC accounting and reporting standards. All other nongrandfathered, non-SEC accounting literature not included in the Codification will become nonauthoritative. After the effective date, the FASB will not issue new standards in the form of Statements, FASB Staff Positions, or Emerging Issues Task Force Abstracts. Instead, it will issue Accounting Standards Updates. FAS 168 is effective for financial statements issued for interim and annual periods ending after September 15, 2009. The Codification does not change GAAP, and, therefore, the Company does not expect that the adoption of FAS 168 will have a material impact on the Company s financial position or results of operations.

NOTE 3 INVESTMENTS

The amortized costs and estimated fair values of investment securities as of June 30, 2009 and December 31, 2008 are as follows:

	June 30, 2009			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Securities available-for-sale:				
U.S. government agencies	$ 2,696,148	$ 56,718	$ (4,952)	$ 2,747,914
Corporate	4,500,083	81,945	(9,109)	4,572,919
State and municipal	20,806,516	146,976	(322,548)	20,630,944
Residential mortgage-backed securities	25,311,526	472,530	(17,830)	25,766,226
Total securities available-for-sale	$ 53,314,273	$ 758,169	$ (354,439)	$ 53,718,003

	December 31, 2008			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Securities available-for-sale:				
U.S. government agencies	$ 5,700,100	$ 46,500	$ (866)	$ 5,745,734
Corporate	1,516,323	3,475	(16,236)	1,503,562
State and municipal	3,043,274	2,109	(115,545)	2,929,838
Residential mortgage-backed securities	31,149,728	345,360	(116,761)	31,378,327
Total securities available-for-sale	$ 41,409,425	$ 397,444	$ (249,408)	$ 41,557,461

Table of Contents

The amortized cost and estimated fair value of debt securities by contractual maturity at June 30, 2009 and December 31, 2008 are shown below. Mortgage-backed securities are classified in accordance with their contractual lives. Expected maturities may differ from contractual maturities because borrowers may have the right to prepay obligations with or without call or prepay penalties. Additionally, accelerated principal payments are commonly received on mortgage-backed securities making it common for them to mature prior to the contractual maturity date.

	Amortized Cost		Estimated Fair Value	
	June 30, 2009	**December 31, 2008**	**June 30, 2009**	**December 31, 2008**
Securities available-for-sale				
Due within one year	$ 1,527,158	$ 1,516,323	$ 1,549,402	$ 1,503,562
Due after one year through five years	3,910,169	497,361	3,976,092	499,470
Due after five years through ten years	12,077,430	6,167,986	12,033,820	6,160,151
Due after ten years	35,799,516	33,227,755	36,158,689	33,394,278
Total securities available-for-sale	$ 53,314,273	$ 41,409,425	$ 53,718,003	$ 41,557,461

The following tables shows the estimated fair value and gross unrealized losses, aggregated by investment category and length of time the individual securities have been in a continuous loss position as of June 30, 2009 and December 31, 2008.

	June 30, 2009					
	Less than 12 months		12 months or more		Total	
	Estimated Fair Value	**Unrealized Losses**	**Estimated Fair Value**	**Unrealized Losses**	**Estimated Fair Value**	**Unrealized Losses**
Description of securities:						
U.S. government agencies	$ 242,118	$ (4,952)	$	$	$ 242,118	$ (4,952)
Corporate	519,360	(9,109)			519,360	(9,109)

	Less than 12 months		12 months or more		Total	
	Estimated Fair Value	**Unrealized Losses**	**Estimated Fair Value**	**Unrealized Losses**	**Estimated Fair Value**	**Unrealized Losses**
Description of securities:						
U.S. government agencies	$ 453,254	$ (866)	$	$	$ 453,254	$ (866)
Corporate	1,010,852	(16,236)			1,010,852	(16,236)
State and municipal	2,430,368	(115,545)			2,430,368	(115,545)
Mortgage-backed securities	9,370,807	(102,508)	373,988	(14,253)	9,744,795	(116,761)
Total temporarily impaired	$ 13,265,281	$ (235,155)	$ 373,988	$ (14,253)	$ 13,639,269	$ (249,408)

Management evaluates investment securities for other-than-temporary impairment taking into consideration the extent and length of time the fair value has been less than cost, the financial condition of the issuer, whether the Company has the intent to retain the security and whether it is more-likely-than-not that the Company will be required to sell the security before recovery of the value, as well as other qualitative factors. The five individual securities that have been in a continuous unrealized loss position for 12 months or longer at June 30, 2009, have fluctuated in value since their purchase dates as a result of changes in market interest rates and not as a result of the underlying issuer s ability to repay. Management has reviewed the credit rating for all securities in a continuous unrealized loss position for 12 months or longer and determined that all securities are highly rated. Additionally, the Company has the intent to hold these securities and the Company does not anticipate that these securities will be required to be sold before recovery of value, which may be upon maturity. Accordingly, as of June 30, 2009, no declines in

value are deemed to be other than temporary. Only one security was in a continuous unrealized loss

Table of Contents

position at December 31, 2008, and management s evaluation of that security determined it was not other than temporarily impaired.

The Company recorded a net unrealized gain in the investment portfolio of $404,000 at June 30, 2009. This was an improvement over the $148,000 unrealized gain at December 31, 2008.

The Company sold nineteen securities for gross realized gains of $112,000 and one security for a loss of $5,000 during the first six months of 2009. The Company sold eleven securities for gross realized gains of $46,000 and one security for a loss of $1,000 during the first six months of 2008. Realized gains and losses on sales are computed on a specific identification basis based on amortized cost on the date of sale.

Securities with carrying values of $12.8 million at June 30, 2009 and $15.4 million at December 31, 2008, were pledged as collateral to secure public deposits, borrowings from the FHLB, repurchase agreements and for other purposes as required or permitted by law.

NOTE 4 LOANS

Loans consisted of the following:

	June 30, 2009	December 31, 2008
Real estate commercial	$ 19,335,581	$ 7,478,806
Real estate residential	5,975,755	5,043,352
Construction and land development	6,444,183	3,848,555
Commercial and industrial	6,479,888	4,083,633
Consumer	1,072,480	958,611
Gross loans	39,307,887	21,412,957
Less: Allowance for loan losses	(520,000)	(268,000)
Deferred loan (fees) / expenses, net	(102,977)	(56,747)
Loans, net	$ 38,684,910	$ 21,088,210

During the first six months of 2009 and all of 2008, no loans were impaired, transferred to foreclosed properties or past due more than 90 days.

In the ordinary course of business, and only if consistent with permissible exceptions to Section 402 of the Sarbanes- Oxley Act of 2002, the Bank may make loans to directors, executive officers, principal stockholders (holders of more than five percent of the outstanding common shares) and the businesses with which they are associated. In the Company s opinion, all loans and loan commitments to such parties are made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other persons.

There were approximately $2.6 million in loans receivable from related parties at June 30, 2009 and December 31, 2008.

NOTE 5 ALLOWANCE FOR LOAN LOSSES

Activity in the allowance for loan losses for the first six months of 2009 and 2008 is summarized as follows:

	Six-Month Period Ended	
	June 30, 2009	June 30, 2008
Balance, beginning of period	$ 268,000	$ 47,396
Loans charged off		
Recoveries on loans previously charged off		
Provision for loan losses	252,000	87,104
Balance, end of period	$ 520,000	$ 134,500

Table of Contents

NOTE 6 DEPOSITS

Deposits are summarized as follows:

	June 30, 2009		December 31, 2008	
	Amount	% of Total	Amount	% of Total
Noninterest-bearing demand	$ 5,637,098	9%	$ 3,910,236	10%
Interest-bearing demand	2,772,715	4	2,603,923	7
Money market accounts	3,651,495	6	6,488,427	17
Savings accounts	9,567,394	14	384,833	1
Certificates of deposit, less than $100,000	17,361,920	26	6,521,937	18
Certificates of deposit, greater than $100,000	27,268,285	41	17,752,870	47
Total deposits	$ 66,258,907	100%	$ 37,662,226	100%

In the ordinary course of business, certain officers, directors, stockholders, and employees of the Bank have deposits with the Bank. In the Bank s opinion, all deposit relationships with such parties are made on substantially the same terms including interest rates and maturities, as those prevailing at the time for comparable transactions with other persons. The balance of related party deposits at June 30, 2009 and December 31, 2008 was approximately $1.5 million and $2.7 million, respectively.

NOTE 7 STOCK-BASED COMPENSATION

The Company s 2007 Stock Incentive Plan (the Plan) was approved by the Company s Board of Directors (the Board) with an effective date of September 10, 2007 and was approved by the Company s stockholders at the annual meeting held on June 17, 2008. Under the terms of the Plan, officers and key employees may be granted both nonqualified and incentive stock options and directors and other consultants, who are not also officers or employees, may only be granted nonqualified stock options. The Board reserved 510,734 shares of common stock for issuance under the Plan. The Plan provides for options to purchase shares of common stock at a price not less than 100% of the fair market value of the stock on the date of grant. Stock options expire no later than ten years from the date of the grant and generally vest over four years. The Plan provides for accelerated vesting if there is a change of control, as defined in the Plan. The Company recognized stock-based compensation cost of approximately $102,000 and $125,000 during the six months ended June 30, 2009 and 2008, respectively. No tax benefit related to stock-based compensation will be recognized until the Company is profitable.

The Company accounts for its stock-based compensation under the provisions of FAS 123R. The fair value of each option grant is estimated on the date of grant using the Black-Scholes-Merton option pricing model. The Company granted 7,250 options during the second quarter 2009 as incentive compensation to new Bank employees. Similarly, the Company granted 1,250 options to new employees during the second quarter of 2008.

During the six months ended June 30, 2009, 54,279 options were forfeited and 16,499 vested options expired unexercised. No options were exercised during the three or six months ended June 30, 2009. The Company recognized expense for approximately 23,000 options, representing a pro-rata amount of the options earned during the second quarter 2009 that are expected to vest. As of June 30, 2009, there was approximately $329,000 of total unrecognized compensation cost related to the outstanding stock options that will be recognized over a

weighted-average period of 2.4 years.

Table of Contents

The following is a summary of the Company s outstanding stock options at June 30, 2009:

	Options		Weighted-Average Grant Date Fair Value
Outstanding at January 1, 2009	360,255	$	2.71
Granted	20,250		1.42
Exercised			
Forfeited	(54,279)		2.73
Expired	(16,499)		2.75
Outstanding at June 30, 2009	309,727	$	2.62

NOTE 8 NONINTEREST EXPENSE

The following table details the items comprising other general and administrative expenses:

	Three Months Ended June 30,				Six Months Ended June 30,			
		2009		2008		2009		2008
Data processing	$	63,862	$	51,742	$	130,151	$	98,652
FDIC Assessment		63,922		4,055		79,955		5,955
Marketing and promotions		35,012		58,739		55,581		125,897
Printing, stationery and supplies		24,669		23,462		31,535		32,898
Regulatory and reporting fees		23,668		11,493		41,959		23,349
Travel and entertainment		10,020		8,040		16,695		12,682
Telephone/communication		9,371		6,104		20,220		13,287

Total	$	264,011	$	189,276	$	444,745	$	356,488

Table of Contents

NOTE 9 INCOME TAXES

Deferred taxes are a result of differences between income tax accounting and generally accepted accounting principles with respect to income and expense recognition. The following is a summary of the components of the net deferred tax asset account recognized in the accompanying consolidated statements of financial condition:

	June 30, 2009	December 31, 2008
Deferred tax assets:		
Start-up and organizational expenses	$ 1,163,616	$ 1,207,526
Net operating loss carryforward	1,385,008	1,096,123
Allowance for loan losses	169,462	76,082
Non-qualified stock options	22,190	16,045
Other	53,284	40,651
Total deferred tax assets	2,793,560	2,436,427
Deferred tax liabilities:		
Net unrealized gain on securities available-for-sale	(149,605)	(54,856)
Federal Home Loan Bank stock dividend	(6,633)	(4,261)
Tax over book depreciation	(25,150)	(23,814)
Total deferred tax liabilities	(181,388)	(82,931)
Net deferred tax assets	2,612,172	2,353,496
Valuation allowance	(2,612,172)	(2,353,496)
Net deferred taxes	$	$

The Company has provided a 100% valuation allowance for its net deferred tax asset due to uncertainty of realization during the carryforward period. As of June 30, 2009, the Company has net operating loss carryforwards of approximately $3.7 million for federal income tax purposes. Federal net operating loss carryforwards, to the extent not used, will expire beginning in 2027.

The income tax provision differs from the amount of income tax determined by applying the U.S. federal income tax rate of 35% to pretax income from continuing operations for the three and six months ended June 30, 2009 and 2008 due to the following:

	June 30, 2009		June 30, 2008	
	Three Months Ended	Six Months Ended	Three Months Ended	Six Months Ended
Computed expected tax benefit	$ (183,187)	$ (351,985)	$ (186,530)	$ (386,937)
Change in income taxes resulting from:				
Change in valuation allowance	100,674	258,676	177,200	368,824
Other	82,513	93,310	9,330	18,113
Income tax provision	$	$	$	$

NOTE 10 COMMITMENTS AND CONTINGENCIES

The Company is a party to credit related financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and letters of credit. Such commitments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated balance sheets. The Company s exposure to credit loss is represented by the contractual amount of these commitments. The Company follows the same credit policies in making commitments as it does for on-balance-sheet instruments.

Table of Contents

At June 30, 2009 and December 31, 2008, the following financial instruments were outstanding whose contract amounts represent credit risk:

	June 30, 2009		December 31, 2008	
Financial instruments whose contractual amounts represent credit risk:				
Commitments to extend credit	$	5,387,415	$	6,715,658
Letters of credit				
Total commitments	$	5,387,415	$	6,715,658

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the commitments do not necessarily represent future cash requirements. The Company evaluates each customer s creditworthiness on a case-by-case basis. The amount of collateral obtained is based on management s credit evaluation. Collateral held varies, but may include accounts receivable, inventory, property, plant and equipment and income producing commercial properties.

Letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers.

NOTE 11 FAIR VALUE

The Company determines the fair market values of its financial instruments based on the fair value hierarchy established in FAS No. 157, *Fair Value Measurements* (FAS 157), which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs, as follows, that may be used to measure fair value.

Level 1 inputs are unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date.

Level 2 inputs are other than quoted prices included in Level 1 that are observable for the asset or liability either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or model-based valuation techniques for which all significant assumptions are observable in the market.

Level 3 valuation is generated from model-based techniques that use at least one significant assumption not observable in the market. These unobservable assumptions reflect estimates of assumptions that market participants would use in pricing the asset or liability. Valuation techniques include use of option pricing models, discounted cash flow models and similar techniques.

The Company carries its available-for-sale securities at fair value. Fair value measurement is obtained from independent pricing services which utilize observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bonds   terms and conditions, among other things.As of June 30, 2009 and December 31, 2008, all of the Company   s available-for-sale securities were valued using Level 2 inputs.

Table of Contents

Assets and Liabilities Measured on a Recurring Basis

Assets and liabilities measured at fair value on a recurring basis are summarized below:

	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Assets at June 30, 2009				
Investment securities, available-for-sale	$	$ 53,718,003	$	$ 53,718,003
Assets at December 31, 2008				
Investment securities, available-for-sale	$	$ 41,557,461	$	$ 41,557,461

There were no assets or liabilities measured at fair value on a non-recurring basis as of June 30, 2009 or December 31, 2008.

Fair Value of Financial Instruments

The fair value of a financial instrument is determined under the framework established by FAS 157. Fair value estimates are made at a specific point in time based on relevant market information and information about the financial instrument. Because no market value exists for a significant portion of the financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature, involve uncertainties and matters of judgment, and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

FAS 107 excludes certain financial instruments and all nonfinancial instruments for its disclosure requirements. Accordingly, the aggregate fair value amounts presented may not necessarily represent the underlying fair value of the Company. Fair value estimates are based on financial instruments both on and off the balance sheet without attempting to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments. Additionally, tax consequences related to the realization of the unrealized gains and losses can have a potential effect on fair value estimates and have not been considered in many of the estimates.

The following methods and assumptions were used to estimate the fair value of significant financial instruments:

Cash and cash equivalents: The carrying amounts of cash and due from banks and federal funds sold approximate their fair values.

Investment securities: Fair value measurement is obtained from independent pricing services which utilize observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bonds terms and conditions, among other things, in accordance with the framework provided by FAS 157.

Loans, net: The fair value of fixed rate loans is estimated by discounting the future cash flows using interest rates currently being offered for loans with similar terms to borrowers of similar credit quality. For variable rate loans that reprice frequently and with no significant change in credit risk, fair values are estimated to be equivalent to carrying values.

Investment in FHLB and Federal Reserve Bank stocks: It is not practical to determine the fair value of bank stocks due to the restrictions placed on the transferability of Federal Home Loan Bank stock and Federal Reserve Bank stock, which are the two types of stock that comprise the balance of investment in bank stocks.

Table of Contents

Interest receivable: The carrying value of interest receivable approximates fair value due to the short period of time between accrual and receipt of payment.

Deposits: The fair value of noninterest-bearing deposits, interest-bearing demand deposits and savings accounts is determined to be the amount payable on demand at the reporting date. The fair value of fixed rate time deposits is estimated using a discounted cash flow calculation that applies interest rates currently being offered for deposits of similar remaining maturities. Carrying value is assumed to approximate fair value for all variable rate time deposits.

Federal funds purchased and securities sold under agreements to repurchase: The carrying amount of federal funds purchased and securities sold under agreements to repurchase approximates fair value due to the short-term nature of these agreements, which generally mature within one to four days from the transaction date.

Capital lease liability: Management did not fair value the capital lease liability as it is specifically excluded from the provisions of FAS 107.

Federal Home Loan Bank advances: Fair value of the Federal Home Loan Bank advances is estimated using a discounted cash flow model based on current market rates for similar types of borrowing arrangements including similar remaining maturities.

Interest payable: The carrying value of interest payable approximates fair value due to the short period of time between accrual and payment.

Loan commitments and letters of credit: The fair values of commitments are estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. The difference between the carrying value of commitments to fund loans or stand by letters of credit and their fair values are not significant and, therefore, are not included in the following table.

The carrying amounts and estimated fair values of financial instruments are summarized as follows:

	June 30, 2009		December 31, 2008	
	Carrying Value	**Fair Value**	**Carrying Value**	**Fair Value**
Financial Assets:				
Cash and cash equivalents	$ 1,103,401	$ 1,103,401	$ 2,401,241	$ 2,401,241
Investment securities	53,718,003	53,718,003	41,557,461	41,557,461
Loans, net	38,684,910	39,100,605	21,088,210	21,126,635

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis presents the Company s consolidated financial condition as of June 30, 2009 and results of operations for the three and six months ended June 30, 2009 and 2008. The discussion should be read in conjunction with the financial statements and the notes related thereto which appear elsewhere in this Quarterly Report on Form 10-Q.

EXECUTIVE OVERVIEW

We are a Delaware corporation that was incorporated on January 12, 2006 to organize and serve as the holding company for Solera National Bank, a national bank that opened for business on September 10, 2007. Solera National Bank is a full-service community, commercial bank headquartered in Lakewood, Colorado serving the Denver metropolitan area. Our main banking office is located at 319 S. Sheridan Blvd., Lakewood, Colorado 80226. Our telephone number is (303) 209-8600.

We offer a broad range of commercial and consumer banking services to small and medium-sized businesses, licensed professionals and individuals who are particularly responsive to the personalized service that Solera National Bank provides to its customers. We believe that local ownership and control allows the Bank to serve customers more efficiently and effectively. Solera National Bank competes on the basis of providing a unique and personalized banking experience combined with a full range of services, customized and tailored to fit the individual needs of its clients. Solera National Bank serves the entire market area and, in addition, has a special niche focus on the local Hispanic population due to the significant growth of this demographic.

Comparative Results of Operations for the Three Months Ended June 30, 2009 and 2008

The following discussion focuses on the Company s financial condition and results of operations for the three months ended June 30, 2009 compared to the financial condition and results of operations for the three months ended June 30, 2008. The Company s principal operations for each of these periods consisted of the operations of Solera National Bank, which opened for business September 10, 2007.

Net loss for the quarter ended June 30, 2009 was $523,000, or ($.20) per share, compared with a $533,000 loss, or ($.21) per share for the second quarter of 2008. Net loss for the second quarter 2009 was impacted by higher deposit insurance premiums. The FDIC adopted a revised risk-based deposit insurance assessment schedule on February 27, 2009, which raised deposit insurance premiums. On May 22, 2009, the FDIC also implemented a five basis point special assessment of each insured depository institution s assets minus Tier 1 capital as of June 30, 2009, but no more than 10 basis points times the institution s assessment base for the second quarter of 2009, to be collected on September 30, 2009. This special assessment resulted in a second quarter charge of approximately $41,000. Additional special assessments may be imposed by the FDIC in future periods.

As of June 30, 2009, the Company had total assets of $96.4 million, an increase of $28.6 million, or 42%, from December 31, 2008. Net loans increased $17.6 million, or 83%, from $21.1 million at December 31, 2008 to $38.7 million at June 30, 2009. Similarly, the Company s total deposits grew $28.6 million, or 76%, from $37.7 million at December 31, 2008 to $66.3 million as of June 30, 2009. This growth was achieved

as a result of our successful business development program.

The following table presents, for the periods indicated, average assets, liabilities and stockholders equity, as well as the net interest income from average interest-earning assets and the resultant annualized yields expressed in percentages.

Table of Contents

The following table presents the dollar amount of changes in interest income and interest expense for the major categories of interest-earning assets and interest-bearing liabilities. The information details the changes attributable to a change in volume (i.e. change in average balance multiplied by the prior-period average rate) and changes attributable to a change in rate (i.e. change in average rate multiplied by the current-period average balance).

Table 2

	Three Months Ended June 30, 2009 Compared to Three Months Ended June 30, 2008		
	Net Change	Rate	Volume
Interest income:			
Gross loans, net of unearned fees	$ 327,224	$ (55,782)	$ 383,006

Total interest expense	$ 316,769	$ (106,055)	$ 422,824
Net interest income	$ 314,565	$ 58,165	$ 256,400

Net Interest Income and Net Interest Margin

Net interest income is the difference between interest income, principally from loan and investment security portfolios, and interest expense, principally on customer deposits and borrowings. Net interest income is our principal source of earnings. Changes in net interest income result from changes in volume, spread and margin. Volume refers to the average dollar level of interest-earning assets and interest-bearing liabilities. Spread refers to the difference between the average yield on interest-earning assets and the average cost of interest-bearing liabilities. Margin refers to net interest income divided by average interest-earning assets, and is influenced by the level and relative mix of interest-earning assets and interest-bearing liabilities.

The Federal Reserve Board influences the general market rates of short-term interest, including the deposit and loan rates offered by the Bank. The Bank s loan portfolio is significantly affected by changes in the prime interest rate. The prime interest rate, which is the rate offered on loans to borrowers with strong credit, was 5.25% at the start of the second quarter 2008 and fell 25 basis points to end the quarter at 5.00%. During the last six months of 2008, it fell another 175 basis points to end the 2008 year at 3.25%. The prime interest rate has remained at 3.25% for the first six months of 2009.

The federal funds rate, which is the cost of immediately available, overnight funds, has moved in a similar manner. It averaged 2.11% during the second quarter of 2008 compared to 0.17% during the second quarter of 2009.

The impact of declining interest rates can be seen in the Company s decreasing net interest margin, which declined 48 basis points, or 13%, from the second quarter 2008 to the second quarter 2009. As evident in Table 2, the reason for this decline is due to the declining rate environment; however, the impact has been mitigated by the fact that the Company s volumes have increased significantly.   Since a considerable portion of the Bank s loan portfolio is tied

23

Table of Contents

to the prime interest rate, the average yield on loans has decreased from 6.19% at June 30, 2008 to 5.53% at June 30, 2009. However, the Bank s average yield on total interest-earning assets has increased from 5.03% during the second quarter of 2008 to 5.22% during the first quarter of 2009, due primarily to a change in the asset mix from lower-yielding assets (federal funds sold) to higher-yielding assets (loans and investments). Higher yields on the investment portfolio also contributed to the increase. Since the second quarter 2008, the Company has invested a larger portion of its investment portfolio in longer-term, higher-yielding, state and municipal bonds. The Company s balance sheet is currently asset sensitive, meaning that interest-earning assets generally reprice more quickly than interest-bearing liabilities. Therefore, the Company could experience expansion in its net interest margin during periods of rising short-term interest rates.

Total interest income was $1.1 million for the second quarter of 2009, consisting primarily of interest on investment securities of $650,000 and interest and fees on loans of $469,000. This compared to total interest income of $497,000 during the second quarter of 2008, consisting primarily of interest on investment securities of $322,000, interest and fees on loans of $141,000 and interest on federal funds sold of $16,000. Average loans, net of unearned fees, increased $24.8 million from $9.2 million during the second quarter ended June 30, 2008 to $34.0 million during the second quarter ended June 30, 2009. Average investment securities increased $25.3 million from $26.1 million during the second quarter ended June 30, 2008 to $51.4 million during the second quarter ended June 30, 2009. As more of the Company s resources were deployed in loans and investment securities, average federal funds sold decreased $2.8 million from $3.0 million during the second quarter ended June 30, 2008 to $253,000 during the second quarter ended June 30, 2009.

Total interest expense was $462,000 in the second quarter of 2009, an increase of $317,000 from $145,000 during the second quarter of 2008. $269,000 of this increase was due to higher average deposits which increased $38.7 million from $15.2 million during the second quarter 2008 to $53.9 million during the second quarter 2009. An additional $44,000 of this increase was due to interest expense on $10.3 million of average Federal Home Loan Bank advances. Overall, the interest rate on total interest-bearing liabilities decreased from 2.86% at June 30, 2008 to 2.79% at June 30, 2009, primarily due to the falling interest rate environment, partly offset by higher interest rates on the Bank s savings and tiered interest-bearing checking accounts in order to attract new deposits to support the Bank s growth.

Net interest income was $666,000 in the second quarter of 2009, an increase of $314,000, or 89%, from $352,000 during the second quarter of 2008. This increase was primarily the result of increased volumes. Our annualized net interest margin was 3.08% for the three months ended June 30, 2009 compared to 3.56% for the three months ended June 30, 2008. The net interest margin compression was partially due to lower interest rates which negatively impacted the Bank given its asset sensitive balance sheet, and partially due to changes in the Bank s funding mix which shifted from federal funds sold (money not yet deployed from the initial capital raise) to higher-cost customer deposits and FHLB advances.

Provision for Loan Losses

We determine a provision for loan losses that we consider sufficient to maintain an allowance to absorb probable losses inherent in our portfolio as of the balance sheet date. For additional information concerning this determination, see the section of this discussion and analysis captioned *Allowance for Loan Losses.*

During the second quarter of 2009, our provision for loan losses was $134,500 relating to the growth of our loan portfolio and the estimated probable losses inherent within the portfolio due to uncertainties in economic conditions. There were no loans specifically reserved for under the FAS 114 Component of the loan loss reserve. Furthermore, there were no charge-offs or non-performing loans during this period.

Noninterest Income

The noninterest income for the quarter ended June 30, 2009 was $101,000, an increase of $79,000 from $22,000 for the quarter ended June 30, 2008. The Company sold seven securities for a gain of $30,000 during the second quarter of 2009, compared to a net gain of $6,000 during the second quarter of 2008 for the sale of securities. Service charges on deposits increased $59,000 from $12,000 during the second quarter of 2008 to $71,000 during the second quarter of 2009, due to the significant increase in customer relationships and the addition of a money-services-business deposit customer. Sublease income decreased from $5,000 during the second quarter of 2008 to only $200 during the second quarter of 2009 as the Bank s lease agreement with a third party tenant expired.

Table of Contents

Noninterest Expense

Our total noninterest expense was $1.2 million for the quarter ended June 30, 2009, a 35%, or $300,000, increase from $857,000 at June 30, 2008. This consisted of an increase in salaries and employee benefits of $205,000, or 43%, primarily due to the separation agreement of an employee who also served as a director and secondarily due to an increase in the number of full-time equivalent employees, which increased from 18 to 22 as of June 30, 2009. Occupancy expense increased $26,000, or 23%, quarter-over-quarter primarily due to the re-occupancy of the Bank s administrative offices resulting in increased rent expense. Professional fees remained substantially unchanged quarter-over-quarter, decreasing 8%, or $6,000.

Other general and administrative expenses increased $75,000, or 39%, quarter-over-quarter. This increase was primarily the result of a $60,000 increase in Federal Deposit Insurance Corporation (FDIC) fees due primarily to the special assessment of $41,000 to help build insurance reserves and secondarily due to increases in average deposit volumes, as well as increases in FDIC rates. Regulatory and reporting fees increased $12,000, or 106%, due in part to increased Office of the Comptroller of the Currency (OCC) assessment fees and increased correspondent bank fees due to increased activity. Data processing increased $12,000, or 23%, primarily due to increased fees from our core banking processor as a result of increased loan and deposit volume. These increases were partially offset by a $24,000, or 40%, decrease in marketing and promotions as the Company focused its marketing expenditures on more cost-effective programs.

Income Taxes

No federal or state tax expense has been recorded for the quarters ended June 30, 2009 and 2008, based upon net operating losses. Since it is uncertain that the Company will become profitable, the deferred tax benefit accumulated to date has a full valuation allowance so that the net deferred tax benefit at June 30, 2009 is $0.

Comparative Results of Operations for the Six Months Ended June 30, 2009 and 2008

The following discussion focuses on the Company s financial condition and results of operations for the six months ended June 30, 2009 compared to the financial condition and results of operations for the six months ended June 30, 2008. The Company s principal operations for each of these periods consisted of the operations of Solera National Bank, which opened for business September 10, 2007.

Net loss for the six months ended June 30, 2009 was $1,006,000, or ($.39) per share, compared with a $1,106,000 loss, or ($.43) per share for the six months ended June 30, 2008. Net loss for the six months ended June 30, 2009 was impacted by higher deposit insurance premiums, as discussed earlier, as well as higher operating expenses. Since June 30, 2008, the Company has hired additional staff and re-occupied administrative offices to support the Bank s significant growth. The Company expects this infrastructure investment to support the continued growth anticipated over the next several quarters.

The following table presents, for the periods indicated, average assets, liabilities and stockholders equity, as well as the net interest income from average interest-earning assets and the resultant annualized yields expressed in percentages.

Net Interest Income and Net Interest Margin

Net interest income is the difference between interest income, principally from loan and investment security portfolios, and interest expense, principally on customer deposits and borrowings. Net interest income is our principal source of earnings. Changes in net interest income result from changes in volume, spread and margin. Volume refers to the average dollar level of interest-earning assets and interest-bearing liabilities. Spread refers to the difference between the average yield on interest-earning assets and the average cost of interest-bearing liabilities. Margin refers to net interest income divided by average interest-earning assets, and is influenced by the level and relative mix of interest-earning assets and interest-bearing liabilities.

The Federal Reserve Board influences the general market rates of short-term interest, including the deposit and loan rates offered by the Bank. The Bank s loan portfolio is significantly affected by changes in the prime interest rate. The prime interest rate, which is the rate offered on loans to borrowers with strong credit, was 7.25% on January 1, 2008. During the first six months of 2008, the prime interest rate fell 225 basis points to end the second quarter at 5.00%. During the second half of 2008, it fell another 175 basis points to end the 2008 year at 3.25%. The prime interest rate has remained at 3.25% for the first six months of 2009.

The federal funds rate, which is the cost of immediately available, overnight funds, has moved in a similar manner. The average rate the Bank has been able to earn on federal funds sold averaged 2.89% during the first six months of 2008 compared to 0.26% during the same period of 2009.

The impact of these decreases in interest rates can be seen in the Company s decreasing net interest margin, which declined 68 basis points, or 18%, from the six months ended June 30, 2008 to the six months ended June 30, 2009. As evident in Table 3, the reason for this decline is due to the declining rate environment; however, the impact has

27

been mitigated by the fact that the Company s volumes have drastically increased. Since a considerable portion of the Bank s loan portfolio is tied to the prime interest rate, the average yield on loans has decreased from 6.33% at June 30, 2008 to 5.38% at June 30, 2009. However, the Bank s average yield on total interest-earning assets has increased 9 basis points, from 5.08% during the six months ended June 30, 2008 to 5.17% for the same period in 2009, due primarily to a change in the Company s asset mix from lower-yielding assets (federal funds sold) to higher-yielding assets (loans and investments). Higher yields on the investment portfolio also contributed to the increase. Since the second quarter 2008, the Company has invested a larger portion of its investment portfolio in longer-term, higher-yielding, state and municipal bonds. The Company s balance sheet is currently asset sensitive, meaning that interest-earning assets generally reprice more quickly than interest-bearing liabilities. Therefore, the Company could experience expansion in its net interest margin during periods of rising short-term interest rates.

Total interest income was $2.1 million for the six months ended June 30, 2009, consisting primarily of interest on investment securities of $1.2 million and interest and fees on loans of $782,000. This compared to total interest income of $866,000 during the six months ended June 30, 2008, consisting primarily of interest on investment securities of $553,000, interest and fees on loans of $229,000 and interest on federal funds sold of $53,000. Average gross loans, net of unearned fees, increased $22.1 million, from $7.3 million at June 30, 2008 to $29.3 million at June 30, 2009. Average investment securities increased $26.7 million from $22.1 million at June 30, 2008 to $48.8 million at June 30, 2009. As more of the Company s resources were deployed in loans and investment securities, average federal funds sold decreased $2.9 million from $3.7 million at June 30, 2008 to $835,000 at June 30, 2009.

Total interest expense was $855,000 in the six months ended June 30, 2009, an increase of $617,000 from $238,000 during the same period of 2008. $476,000 of this increase was due to interest expense on higher average deposits which increased $35.9 million from $12.2 million at June 30, 2008 to $48.1 million at June 30, 2009. An additional $136,000 of this increase was due to interest expense on $10.2 million of average Federal Home Loan Bank advances. Overall, the interest rate on total interest-bearing liabilities decreased from 3.21% during the six months ended June 30, 2008 to 2.88% for the same period of 2009; primarily due to the falling interest rate environment.

Net interest income was $1.2 million for the first six months of 2009, an increase of $568,000, or 90%, from $628,000 during the same period of 2008. This increase was primarily the result of increased volumes. Our annualized net interest margin was 3.01% for the six months ended June 30, 2009 compared to 3.69% for the six months ended June 30, 2008. The net interest margin compression was partially due to lower interest rates which negatively impacted the Bank given its asset sensitive balance sheet and partially due to changes in the Bank s funding mix which shifted from federal funds sold (money not yet deployed from the initial capital raise) to higher-cost customer deposits and FHLB advances.

Provision for Loan Losses

We determine a provision for loan losses that we consider sufficient to maintain an allowance to absorb probable losses inherent in our portfolio as of the balance sheet date. For additional information concerning this determination, see the section of this discussion and analysis captioned *Allowance for Loan Losses.*

During the first six months of 2009, our provision for loan losses was $252,000 relating to the growth of our loan portfolio and the estimated probable losses inherent within the portfolio due to uncertainties in economic conditions. There were no loans specifically reserved for under the FAS 114 Component of the loan loss reserve. Furthermore, there were no charge-offs or non-performing loans during this period.

Noninterest Income

Noninterest income for the six months ended June 30, 2009 was $251,000, an increase of $180,000 from $71,000 for the six months ended June 30, 2008. The increase was due, in-part, to the $123,000 increase in service charges and fees on deposits a direct result of the increased number of deposit accounts, as well as the addition of a significant money-services-business deposit customer. The remainder of the increase in noninterest income was due to realized gains on the sale of investment securities, which increased $62,000. Investment securities are sold for a gain when it is in the Company s best interest, which might include replacing lower-yielding bonds with higher-yielding bonds, or modifying the cash flow streams from bond payments to coincide with the Bank s expected liquidity needs. Sublease income decreased $4,000, as the Bank s lease agreement with a third-party tenant expired.

Table of Contents

Noninterest Expense

Our total noninterest expense was $2.2 million for the six months ended June 30, 2009, a 28%, or $483,000, increase from $1.7 million for the six months ended June 30, 2008. This consisted of an increase in salaries and employee benefits of $312,000, or 32%, related primarily due to the separation agreement of an employee who also served as a director and secondarily due to an increase in the number of full-time equivalent employees, which increased from 18 to 22 as of June 30, 2009. Occupancy expense increased $44,000, or 19%, primarily due to the re-occupancy of the Bank s administrative offices resulting in increased rent expense. Professional fees increased $38,000, or 26%, primarily due to increased fees for our external audit.

Other general and administrative expenses increased $88,000, or 25%, from the six months ended June 30, 2008 to the same period in 2009. This increase was primarily the result of a $74,000 increase in Federal Deposit Insurance Corporation (FDIC) fees due primarily to the special assessment of $41,000 to help build insurance reserves and secondarily due to increases in average deposit volumes, as well as increases in FDIC rates. Regulatory and reporting fees increased $19,000, or 80%, due in part to increased OCC assessment fees and increased correspondent bank fees due to increased activity. Data processing increased $31,000, or 32%, primarily due to increased fees from our core banking processor as a result of increased loan and deposit volumes. Dues and memberships increased $8,000 as the Bank joined more community groups to help build relationships. Telephone and communication expense increased $7,000, or 52%, primarily due to additional data and telephone lines for our administrative offices that were occupied throughout 2009, but only during the last quarter of 2008. Postage and shipping increased $7,000 primarily due to increased armored courier expenses related to our money-services business clients. These increases were partially offset by a $70,000, or 56%, decrease in marketing and promotions as the Company focused its marketing expenditures on more cost-effective programs.

Income Taxes

No federal or state tax expense has been recorded for the six months ended June 30, 2009 and 2008, based upon net operating losses. Since it is uncertain that the Company will become profitable, the deferred tax benefit accumulated to date has a full valuation allowance so that the net deferred tax benefit at June 30, 2009 is $0.

Federal Home Loan Bank (FHLB) and Federal Reserve Bank Stocks

At June 30, 2009, the Bank had a total of $1.1 million invested in FHLB and Federal Reserve Bank stocks carried at cost consisting of $440,000 in Federal Reserve Bank stock and $624,000 in FHLB stock. These investments allow Solera National Bank to conduct business with these entities. As of June 30, 2009, the Federal Reserve Bank stock is yielding an average of 6.0% and the FHLB stock is yielding an average rate of 2.1%.

Investment Securities

Our investment portfolio serves as a source of interest income and, secondarily, as a source of liquidity and a management tool for our interest rate sensitivity. We manage our investment portfolio according to a written investment policy established by our Board of Directors.

At June 30, 2009, Solera National Bank s securities consisted of available-for-sale securities of $53.7 million. The following table provides additional detail on the Company s investment securities as of June 30, 2009 and December 31, 2008:

	June 30, 2009		December 31, 2008	
	Estimated Fair Value	Weighted Average Yield	Estimated Fair Value	Weighted Average Yield
Securities available-for-sale				
U.S. government agencies	$ 2,747,914	4.95%	$ 5,745,734	5.38%
Corporate	4,572,919	5.82	1,503,562	5.99
State and municipal	20,630,944	5.65	2,929,838	5.59
Residential mortgage-backed securities	25,766,226	4.75	31,378,327	5.20
Total securities available-for-sale	$ 53,718,003	5.19%	$ 41,557,461	5.28%

Table of Contents

Loan Portfolio

Our primary focus is income from interest on loans. The following table presents the composition of our loan portfolio by category as of the dates indicated:

		June 30, 2009		December 31, 2008	
		Amount	% of Total	Amount	% of Total
Real estate commercial		$ 19,335,581	49%	$ 7,478,806	35%
Real estate residential		5,975,755	15	5,043,352	24
Construction and land development		6,444,183	16	3,848,555	18
Commercial and industrial		6,479,888	17	4,083,633	19
Consumer		1,072,480	3	958,611	4
Gross loans		39,307,887	100%	21,412,957	100%
Less:	Allowance for loan losses	(520,000)		(268,000)	
	Deferred loan (fees) / expenses, net	(102,977)		(56,747)	
Loans, net		$ 38,684,910		$ 21,088,210	

As of June 30, 2009, net loans were $38.7 million, a $17.6 million, or 83%, increase from $21.1 million at December 31, 2008. Net loans as a percentage of total assets were 40% as of June 30, 2009, compared to 31% at December 31, 2008.

The real estate commercial loan portfolio consists primarily of lines of credit or term loans to businesses that are secured by real estate. At June 30, 2009, there were $19.3 million commercial real estate loans in the loan portfolio, an increase of 159%, or $11.9 million, from $7.5 million at December 31, 2008.

The real estate residential loan portfolio consists of residential second mortgage loans, home equity loans and lines of credit and home improvement loans. At June 30, 2009, $6.0 million was outstanding for residential real estate loans, an increase of 18% from $5.0 million outstanding at December 31, 2008.

The construction and land development loan portfolio is comprised of construction loans for owner-occupied construction and development loans for property being constructed and sold to third parties. At June 30, 2009, construction and land development loans totaled $6.4 million, an increase of $2.6 million, or 67%, from $3.8 million at December 31, 2008.

The commercial and industrial loan portfolio consists of loans to businesses primarily for working capital lines of credit. At June 30, 2009, commercial and industrial loans totaled $6.5 million, a $2.4 million, or 59%, increase from $4.1 million at December 31, 2008.

The consumer and other loan portfolio consists of personal lines of credit, loans to acquire personal assets such as automobiles and boats and overdraft protection balances for our deposit customers. As of June 30, 2009, consumer loans totaled $1.1 million, an increase of $114,000 from December 31, 2008.

Loan concentrations are considered to exist when there are amounts loaned to a multiple number of borrowers engaged in similar activities that would cause them to be similarly impacted by economic or other conditions. The Bank s loan portfolio generally consists of loans to borrowers within Colorado. Although the Bank seeks to avoid concentrations of loans to a single industry or based upon a single class of collateral, the Bank s loan portfolio consists primarily of real estate loans secured by real estate located in Colorado, making the value of the portfolio more susceptible to declines in real estate values and other changes in economic conditions in Colorado. Although the Colorado economy has outperformed the majority of other metropolitan areas nationally, it too has shown signs of weakness in recent quarters with unemployment rates and foreclosures rising. However, other economic indicators show positive trends for the Colorado economy, but, at this point, extrapolating trends is premature given the fragile nature of the current economic environment. Management is diligently monitoring the impact the economic environment may have on our Colorado loan portfolio. At this time, management believes the allowance for loan losses is adequate to absorb potential losses as a result of the overall weakness in the Colorado economy.

Table of Contents

Additional loan concentrations exist because the Bank s loan portfolio is still developing. As of June 30, 2009, the Bank s loan portfolio contained only 103 funded loans, with the five largest loans comprising approximately 26% of the portfolio s gross value. However, management expects this concentration to diminish over time as the Bank s loan portfolio continues to grow. No single borrower can be approved for a loan over the Bank s current legal lending limit of approximately $2.3 million. This regulatory requirement helps to ensure the Bank s exposure to one individual customer is limited.

Management may renew loans at maturity when requested by a customer whose financial strength appears to support such a renewal or when such a renewal appears to be in the best interest of Solera National Bank. Solera National Bank requires payment of accrued interest in such instances and may adjust the rate of interest, require a principal reduction, or modify other terms of the loan at the time of renewal.

Loan terms vary according to loan type. The following table shows the contractual maturity distribution of loans as of June 30, 2009 and December 31, 2008:

	As of June 30, 2009					
		Over 1 Year through 5 Years		Over 5 Years		
	One Year or Less	Fixed Rate	Floating or Adjustable Rate	Fixed Rate	Floating or Adjustable Rate	Total
Real estate commercial	$ 3,670,641	$ 6,699,355	$ 600,000	$ 6,265,585	$ 2,100,000	$ 19,335,581
Real estate residential		39,036			5,936,719	5,975,755
Construction and land development	5,495,208	729,795	219,180			6,444,183
Commercial and industrial	3,356,968	1,675,540	328,017	1,119,363		6,479,888

Nonperforming Loans, Leases and Assets

Nonperforming assets consist of loans and leases on nonaccrual status, loans 90 days or more past due and still accruing interest, loans that have been restructured resulting in a reduction or deferral of interest or principal, OREO, and other repossessed assets.

An internal list of classified and criticized loans is maintained to help management assess the overall quality of the loan portfolio and the adequacy of the allowance for loan losses. Loans classified as substandard are those loans with well defined weaknesses, such that future capacity to repay the loan has been negatively impacted. Loans classified as doubtful are those loans that have characteristics similar to substandard loans, but the weaknesses have declined to the point where complete collection of the obligation from all sources is unlikely and a portion of the principal may be charged-off. Although loans classified as substandard do not duplicate loans classified as doubtful, both substandard and doubtful loans may include some loans that are past due at least 90 days, are on

Table of Contents

nonaccrual status or have been restructured. Loans classified as loss are those loans that are in the process of being charged-off. At June 30, 2009, Solera National Bank had no nonperforming assets, no loans classified as doubtful or loss and no loans at least 90 days past due.

Allowance for Loan Losses

Implicit in Solera National Bank s lending activities is the fact that loan losses will be experienced and that the risk of loss will vary with the type of loan being made and the creditworthiness of the borrower over the term of the loan. To reflect the currently perceived risk of loss associated with the loan portfolio, additions are made to the allowance for loan losses in the form of direct charges against income to ensure that the allowance is available to absorb possible loan losses. The factors that influence the amount include, among others, the remaining collateral and/or financial condition of the borrowers, historical loan loss, changes in the size and composition of the loan portfolio, and general economic conditions.

The amount of the allowance equals the cumulative total of the provisions made from time to time, reduced by loan charge-offs and increased by recoveries of loans previously charged-off. Until management has adequate historical data upon which to base the estimate of the allowance for loan losses, information regarding the ability of the borrower to repay the loan, current economic conditions and other pertinent factors will be considered. The allowance was $520,000, or 1.32% of outstanding principal as of June 30, 2009 compared to $268,000, or 1.25% of outstanding principal as of December 31, 2008.

Credit and loan decisions are made by management and the Board of Directors in conformity with loan policies established by the Board of Directors. Solera National Bank s practice is to charge-off any loan or portion of a loan when the loan is determined by management to be uncollectible due to the borrower s failure to meet repayment terms, the borrower s deteriorating or deteriorated financial condition, the depreciation of the underlying collateral, the loan s classification as a loss by regulatory examiners, or other reasons. During the six months ended June 30, 2009 and 2008, there were no charge-offs.

Off-Balance-Sheet Arrangements

In the ordinary course of business, the Company enters into various off-balance-sheet commitments and other arrangements to extend credit that are not reflected in the consolidated balance sheets of the Company. The business purpose of these off-balance-sheet commitments is the routine extension of credit. The total amounts of off-balance-sheet financial instruments with credit risk were as follows:

	June 30, 2009	December 31, 2008
Commitments to extend credit	$ 5,387,415	$ 6,715,658
Letters of credit		
Total commitments	$ 5,387,415	$ 6,715,658

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Commitments also include revolving lines of credit arrangements and unused commitments for commercial and real estate secured loans. Since many of the commitments

are expected to expire without being drawn upon, the commitments do not necessarily represent future cash requirements.

Letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers and, therefore, the Company applies the same rigorous underwriting standards to letters of credit.

The Company faces the risk of deteriorating credit quality of borrowers to whom a commitment to extend credit has been made; however, no significant credit losses are expected from these commitments and arrangements.

Table of Contents

Borrowings

As of June 30, 2009, the Bank had $9.5 million in borrowings from the Federal Home Loan Bank of Topeka. Of this amount, $1.7 million was in variable-rate, overnight borrowings at an average rate of 0.28% and $7.8 million was in term-advances with varying maturity dates between April 2010 and June 2013 at a weighted-average fixed interest rate of 3.97%.

The Bank has also established unsecured Federal Funds lines-of-credit totaling $11.3 million with Bankers Bank of the West, First Tennessee Bank N.A., the Independent Bankers Bank, and Wells Fargo. Additionally, the Bank has access to a secured Federal Funds line with Bankers Bank of the West and the ability to borrow at the Federal Reserve Bank Discount Window, on a secured basis. As of June 30, 2009, the Company had no amount outstanding on these lines.

Loan Commitments

At June 30, 2009, the Company had $5.4 million in outstanding loan origination commitments. Management believes Solera National Bank has sufficient funds available to meet current origination and other lending commitments.

Capital Resources and Capital Adequacy Requirements

The risk-based capital regulations established and administered by the banking regulatory agencies are applicable to Solera National Bank. Risk-based capital guidelines are designed to make regulatory capital requirements more sensitive to differences in risk profiles among banks, to account for off-balance-sheet exposure, and to minimize disincentives for holding liquid assets. Under the regulations, assets and off-balance-sheet items are assigned to broad risk categories, each with appropriate weights. The resulting capital ratios represent capital as a percentage of total risk-weighted assets and off-balance-sheet items. Under the prompt corrective action regulations, to be adequately capitalized a bank must maintain minimum ratios of total capital to risk-weighted assets of 8.0%, Tier 1 capital to risk-weighted assets of 4.0%, and Tier 1 capital to total average assets of 4.0%. Failure to meet these capital requirements can initiate certain mandatory, and possibly additional discretionary, actions by regulators that, if undertaken, could have a direct material effect on Solera National Bank s financial statements.

As of June 30, 2009, Solera National Bank was categorized as well-capitalized. A well-capitalized institution must maintain a minimum ratio of total capital to risk-weighted assets of at least 10.0%, a minimum ratio of Tier 1 capital to risk-weighted assets of at least 6.0%, and a minimum ratio of Tier 1 capital to total average assets of at least 5.0% and must not be subject to any written order, agreement, or directive requiring it to meet or maintain a specific capital level.

The following table summarizes the ratios of the Bank and the regulatory minimum capital requirements at June 30, 2009:

As of June 30, 2009	Actual		For Capital Adequacy Purposes		To Be Well-Capitalized Under Prompt Corrective Action Problems	
($ in thousands)	Amount	%	Amount	%	Amount	%
Total capital (to risk-weighted assets)	$ 15,572	26.9%	$ 4,631	>8.0%	$ 5,789	>10.0%
Tier 1 capital (to risk-weighted assets)	$ 15,052	26.0%	$ 2,316	>4.0%	$ 3,473	>6.0%
Tier 1 capital (to average assets)	$ 15,052	16.9%	$ 3,553	>4.0%	$ 4,442	>5.0%

Table of Contents

Liquidity

The primary source of liquidity for the Company will be dividends paid by Solera National Bank. Solera National Bank is currently restricted from paying dividends without regulatory approval that will not be granted until the accumulated deficit has been eliminated. During the second quarter 2009, the Company purchased $1.0 million of Solera National Bank stock. The Bank utilized these funds to increase its capital ratios, thereby enabling the Bank to maintain its legal lending limits.

Solera National Bank s liquidity is monitored by its staff, the Asset Liability Committee and the Board of Directors, who review historical funding requirements, current liquidity position, sources and stability of funding, marketability of assets, options for attracting additional funds, and anticipated future funding needs, including the level of unfunded commitments.

Solera National Bank s primary sources of funds are retail and commercial deposits, loan and securities repayments, other short-term borrowings, and other funds provided by operations. While scheduled loan repayments and maturing investments are relatively predictable, deposit flows and early loan prepayments are more influenced by interest rates, general economic conditions, and competition. Solera National Bank will maintain investments in liquid assets based upon management s assessment of the need for funds, expected deposit flows, yields available on short-term liquid assets, and objectives of the asset/liability management program.

As loan demand increases, greater pressure will be exerted on Solera National Bank s liquidity. However, it is management s intention to maintain a conservative loan to deposit ratio in the range of 80 - 90% over time. Given this goal, Solera National Bank will not aggressively pursue lending opportunities if sufficient funding sources (*e.g.*, deposits, Federal Funds, etc.) are not available, nor will Solera National Bank seek to attract transient, volatile, non-local deposits with above market interest rates. As of June 30, 2009, the loan to deposit ratio was 59%, a slight increase from 57% at December 31, 2008.

Solera National Bank had cash and cash equivalents of $1.1 million, or 1.1% of total Bank assets, at June 30, 2009. Management feels Solera National Bank should have adequate liquidity to meet anticipated future funding needs.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

As a smaller reporting company, the Company is not required to provide the information required by this Item.

ITEM 4(T). CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Management is responsible for maintaining effective disclosure controls and procedures. As of the end of the period covered by this Quarterly Report on Form 10-Q, management evaluated the effectiveness and operation of the Company s disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)). Based on that evaluation, both the Company s Principal Executive Officer and Principal Accounting and Chief Financial Officer have concluded that the Company s disclosure controls and procedures are effective to ensure that the information required to be disclosed by the Company in reports that are filed or submitted under the Exchange Act are recorded, processed, summarized and reported to management within the time periods specified in the Securities and Exchange Commission s rules and forms and that such information is accumulated and communicated to management as appropriate to allow timely decisions regarding disclosure.

Changes in Internal Control over Financial Reporting

There have been no changes in internal controls over financial reporting during the Company s last fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company s internal controls over financial reporting.

2. Stockholders voted to ratify the selection of McGladrey & Pullen, LLP as Solera National Bancorp Inc. s independent registered public accounting firm for the fiscal year ending December 31, 2009. The results of the vote were as follows: votes cast for the proposal were 1,359,817; votes cast against the proposal were 5,152; and abstentions were 61,750.

ITEM 5. OTHER INFORMATION

On August 7, 2009, the Company, the Bank and Douglas Crichfield, our current President and Chief Executive Officer, entered into an Executive Employment Agreement (the Agreement) with the following terms and

Table of Contents

conditions of employment as approved by the Company s Board of Directors, effective August 1, 2009 (the Effective Date).

The Agreement will expire and terminate by its own terms three years after the Effective Date. Following the initial three year term, unless either party gives written notice ninety days prior to the end of the initial three year term, the Agreement shall automatically renew annually for additional one year terms.

Pursuant to the Agreement, Mr. Crichfield will continue to serve as President and Chief Executive Officer of the Company and the Bank and will receive an annual base salary of $175,000 and is eligible for a bonus of up to 100% of his base salary depending on meeting or exceeding certain thresholds and goals as set forth in the Agreement and in the 2009 CEO short term incentive comp program adopted in connection with the Agreement as follows:

0-10% if meets goals

10-25% if exceeds goals by 10%

25-50% if exceeds goals by 25%

50-100% if exceeds goals by 50%

In connection with executing the Agreement, Mr. Crichfield was granted options to purchase up to 40,000 shares of the Company s common stock, exercisable at $6.40 per share, which was the closing market price on the date of grant. The options vest ratably on a monthly basis over four years and expire ten years from the date of grant. Mr. Crichfield is also entitled to receive employee and dependent health insurance, dental insurance, paid sick leave and four weeks of paid vacation per year, and any additional benefits provided to all Bank employees. The Bank also shall provide Mr. Crichfield with term life insurance coverage at the Bank s expense in an initial amount of two times his annual base salary, and having a term not less than one year.

In addition to the compensation as set forth above and provided for in the Agreement, Mr. Crichfield will continue to receive a monthly housing allowance of $2,000 and reimbursement for mileage according to the current IRS stated rate for weekend travel to and from his residence in Eagle, Colorado through December 31, 2009.

The Bank may terminate the Agreement at any time for Cause. In the event of termination for Cause, the Bank shall have no liability for any additional payments of salary or any benefits beyond the termination date, except as otherwise required by law. Also, the Bank may terminate the Agreement at any time if, in the reasonable discretion of the Board of Directors, it is determined that the Agreement or the employment of Mr. Crichfield may prevent or otherwise encumber the Bank s ability to enter into any agreement or transaction that is in the best interest of the Bank. In the event of termination of the Agreement in the best interest of the Bank, Mr. Crichfield shall be entitled to receive a severance payment in an amount equal to one hundred twenty days of his then-current base salary. Finally, the Bank may terminate the Agreement at any time for any or no reason. In the event that the Agreement is terminated for no reason, Mr. Crichfield shall be entitled to receive a severance payment in an amount equal to the payment of his then-current base salary for the lesser of the remaining term of the Agreement or six months.

The Bank or Mr. Crichfield may terminate the Agreement at any time for a Change of Control and, in such an event, he shall be entitled to receive a severance payment in an amount equal to 1.99 times his then-current annual base salary. All options which have not vested as of the

termination date shall automatically vest as of the termination date. A Change of Control shall mean (i) a sale of substantially all of the assets of the Bank to a third party, or (ii) a sale, or acquisition, by merger or otherwise, of a controlling interest of the equity securities of the Bank or the Company.

The Agreement also contains customary non-solicitation and non-competition provisions that are effective during the term of the Agreement and for a period of one year following termination of the Agreement.

The above description of the Agreement is qualified in its entirety by reference to the Agreement, a copy of which is attached to this Form 10-Q as Exhibit 10.2.
