Bank of Hawaii Retirement Savings Plan

We have audited the accompanying statements of net assets available for benefits of Bank of Hawaii Retirement Savings Plan (the Plan) as of December 31, 2009 and 2008, and the related statements of changes in net assets available for benefits for the years then ended. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of the Plan's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of the Plan at December 31, 2009 and 2008, and the changes in its net assets available for benefits for the years then ended, in conformity with U.S. generally accepted accounting principles.

Our audits were performed for the purpose of forming an opinion on the financial statements taken as a whole. The accompanying supplemental schedule of assets (held at end of year) as of December 31, 2009, is presented for purposes of additional analysis and is not a required part of the financial statements but is supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. This supplemental schedule is the responsibility of the Plan's management. The supplemental schedule has been subjected to the auditing procedures applied in our audits of the financial statements and, in our opinion, is fairly stated in all material respects in relation to the financial statements taken as a

whole.

Bank of Hawaii Retirement Savings Plan

Notes to Financial Statements

December 31, 2009

1. Description of the Plan and Summary of Significant Accounting Policies

Description of the Plan

The following description of the Bank of Hawaii Retirement Savings Plan (the Plan) provides only general information. Participants should refer to the Plan Document for a more complete description of the Plan's provisions.

The Plan is a defined contribution plan for employees of Bank of Hawaii Corporation and certain of its subsidiaries (collectively, the Company) who have fulfilled the Plan's participation requirements. The Plan is subject to the reporting and disclosure, fiduciary, vesting, and administration and enforcement provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

The Plan is administered by Bank of Hawaii (the Plan Administrator), a subsidiary of the Company. All assets of the Plan are held in trust by Vanguard Fiduciary Trust Company, as trustee, and all benefits are provided by such trust fund.

Effective April 1, 1998, the portion of the Plan consisting of the Bank of Hawaii Corporation Stock Fund converted to an employee stock ownership plan (ESOP). As an ESOP, any cash dividends on Bank of Hawaii Corporation stock are passed through to the participants unless the participant elects against receiving the dividend in cash. The cash dividend on shares of Bank of Hawaii Corporation stock paid as a dividend pass-through is not treated as a distribution from the Plan; rather, it is accounted for as if the participant receiving the dividend was the direct owner of the shares of Bank of Hawaii Corporation stock. For participants electing not to receive the dividend pass-through, the dividend is allocated to the participant's account as income and is invested in additional shares.

Table of Contents

Bank of Hawaii Retirement Savings Plan

Notes to Financial Statements (continued)

1. Description of the Plan and Summary of Significant Accounting Policies (continued)

Under prior plan provisions, certain balances were unvested and subject to forfeiture. Forfeitures may be credited against employer contributions required for the calendar year. In July 2009, the forfeiture balance of approximately \$344,000 was credited against the employer contributions required for the plan year. As of December 31, 2009 and 2008, the cumulative forfeited unvested amounts available to be used for future employer contributions were approximately \$144,000 and \$442,000, respectively. In the event that the Board of Directors terminates the Plan, each member's interest in the Plan will remain fully vested and non-forfeitable. The Board of Directors may require all participants and beneficiaries to withdraw such amounts in cash, in kind, in any other form or any combination thereof, as it may determine in its sole discretion.

Basis of Accounting

The accounting records of the Plan are maintained on the accrual basis.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results may differ from those estimates.

Expenses

Fees paid to the Plan's trustee and other administrative expenses incurred in connection with the operation of the Plan are paid by the Company. Brokerage commissions and other expenses incurred in connection with the purchase or sale of investments are paid by the Plan.

Table of Contents

Bank of Hawaii Retirement Savings Plan

Notes to Financial Statements (continued)

1. Description of the Plan and Summary of Significant Accounting Policies (continued)

Investments

Investments are stated at fair value. Shares of mutual funds are valued at quoted market prices which represent the net asset value (NAV) of shares held by the Plan at year-end. The Vanguard Retirement Savings Trust is a collective trust investing primarily in synthetic investment contracts backed by high-credit-quality fixed income investments and traditional investments issued by insurance companies and commercial banks. These investment contracts are recorded at fair value; however, since these contracts are fully benefit-responsive, an adjustment is reflected in the statements of net assets available for benefits to present these investments at contract value. Contract value is the relevant measurement attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the Plan. The contract value represents contributions plus earnings, less participant withdrawals and administrative expenses. The units of the collective trust fund are valued at NAV established by the fund's sponsor on the last business day of the plan year based on the fair value of the underlying assets. Shares of Bank of Hawaii Corporation stock are valued at the quoted market price at year-end. Participant loans are valued at their outstanding balances which approximates fair value.

The collective trust fund seeks to provide current and stable income while maintaining a stable share value of \$1 per share net asset value. The fund seeks to achieve its objective by diversifying among high-credit-quality investments and investment contracts that are structured to smooth market gains and losses over time. The balance in the collective trust fund can be transferred into a stock fund, a balanced fund, or a bond fund with an average duration of more than four years as often as the participant chooses; however, it must remain there for 90 days before transferring it into a short-term bond or money market fund. Direct shifts from the collective trust fund into short-term bond or money market funds are limited to the greater of \$500 or 25% of the participant's account balance in the collective trust fund and can only be done in January of each year.

Purchases and sales of investments are recorded on a trade-date basis. Interest income is recorded on the accrual basis and dividends are recorded on the ex-dividend date.

The net realized gain or loss on investments sold during the year and the unrealized gain or loss on investments held at year-end are reflected in the statements of changes in net assets available for benefits as net appreciation (depreciation) in fair value of investments. The net realized gain and loss on investments sold is computed using the average cost method.

Table of Contents

Bank of Hawaii Retirement Savings Plan

Notes to Financial Statements (continued)

1. Description of the Plan and Summary of Significant Accounting Policies (continued)

Concentration of Market and Credit Risk

The Plan's exposure to credit loss in the event of nonperformance of investments is limited to the carrying value of such instruments. The Plan's concentration of credit risk and market risk are dictated by the Plan's provisions as well as those of ERISA and the participant's investment preference. Due to the level of risk associated with certain investments, it is at least reasonably possible that changes in risks in the near term could materially affect participant account balances and the amounts reported in the statements of net assets available for benefits and the statements of changes in net assets available for benefits.

Contributions

Contributions from the Company and participants are accrued through December 31 in the statements of net assets available for benefits.

Participating employees are allowed to contribute up to 50% of their eligible compensation (within federal limits) to the Plan. The Company makes matching contributions on behalf of participants equal to \$1.25 for each \$1.00 contributed by participants up to 2% of the participants' eligible compensation and \$0.50 for every \$1.00 contributed by participants over 2% up to 5% of the participants' eligible compensation. A 3% fixed contribution and a discretionary value-sharing contribution, that is linked to the Company's financial goals, are made regardless of whether the participating employee contributes to the Savings Plan and are invested in accordance with the participant's selection of investment options available under the Plan. Value sharing contributions for the years ended December 31, 2009 and 2008, were approximately \$1,500,000 and \$2,100,000, respectively. Total employer and employee contributions are limited to certain maximum annual amounts, including those imposed under the Internal Revenue Code.

Table of Contents

Bank of Hawaii Retirement Savings Plan

Notes to Financial Statements (continued)

1. Description of the Plan and Summary of Significant Accounting Policies (continued)

Benefit Payments

Benefits are recorded when paid.

Withdrawals are permitted for participants demonstrating immediate financial need. Participants are allowed to borrow a minimum of \$1,000 up to a maximum equal to the lesser of \$50,000 or 50% of the current value of their account balance. Loan transactions are treated as a transfer from (to) the investment fund to (from) the loan fund. Loan terms do not exceed five years unless the loan is used for the purchase of a primary residence. The loans are secured by the balance in the participant's account or other security deemed to be sufficient by the Benefit Plans Committee and are made at a reasonable rate of interest. Principal and interest is repaid ratably into the participant's account through payroll deductions. No loans are permitted from the Bank of Hawaii Corporation Stock Fund.

For termination of employment, a participant or their beneficiary is entitled to receive an allocation of the employer matching contribution. A participant is also entitled to a pro-rata allocation of the Company's fixed and value sharing contributions for the calendar year in which the participant terminated employment due to retirement, disability or death. For termination of employment prior to retirement (normal and early), disability or death, the participant's vested account will be distributed as soon as practicable. For all accounts under the Plan that exceed \$5,000, a distribution can only be made if the participant consents in writing to such a distribution. Participants are entitled to receive the vested portion of their Money Purchase Plan (MPP) account, a plan option available in a previous plan provision, in the form of a joint and survivor or life annuity, unless elected otherwise. Participants may elect to waive distribution of MPP benefits in such a manner and elect to receive distribution in the form of a single lump sum payment. In case of death, beneficiaries may elect to receive distributions from the MPP account as a lump sum or as an annuity contract. Participants may also elect to defer distributions.

Notes to Financial Statements (continued)

1. Description of the Plan and Summary of Significant Accounting Policies (continued)

Fair Value Measurements

The current accounting standards establish the fair value hierarchy which prioritizes the use of inputs used in valuation methodologies into the following three levels:

- Level 1: Inputs to the valuation methodology are quoted prices, unadjusted, for identical assets or liabilities in active markets. A quoted price in an active market provides the most reliable evidence of fair value and shall be used to measure fair value whenever available.
- Level 2: Inputs to the valuation methodology include quoted prices for similar assets or liabilities in active markets; inputs to the valuation methodology include quoted prices for identical or similar assets or liabilities in markets that are not active; or inputs to the valuation methodology that are derived principally from or can be corroborated by observable market data by correlation or other means.
- Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement. Level 3 assets and liabilities include financial instruments whose value is determined using discounted cash flow methodologies, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

An asset or liability's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

New Accounting Pronouncements

In April 2009, the Financial Accounting Standards Board (FASB) issued an accounting standard that addressed estimating fair value when the volume and level of activity for the asset or liability have significantly decreased and in

identifying transactions that are not orderly. In such instances, this accounting standard provides that management must determine whether recent quoted prices are associated with distressed transactions. If management concludes that quoted prices are associated with distressed sales, an adjustment to the quoted prices may be necessary or management may conclude that a change in valuation technique or the use of multiple valuation techniques may be appropriate to estimate an asset or liability's fair value. The Plan adopted this accounting standard on April 1, 2009. The adoption of this accounting standard, which was subsequently codified into Accounting Standards Codification (ASC) Topic 820, *Fair Value Measurements and Disclosures*, did not result in significant changes to the Plan's valuation techniques.

Table of Contents

Bank of Hawaii Retirement Savings Plan

Notes to Financial Statements (continued)

1. Description of the Plan and Summary of Significant Accounting Policies (continued)

In September 2009, the FASB issued ASU No. 2009-12, *Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)*, which provides amendments to ASU 820, *Fair Value Measurements and Disclosures*. This provision provides guidance on estimating the fair value of a company's investments in investment companies when the investment does not have a readily determinable fair value. It permits the use of the investment's net asset value as a practical expedient to determine fair value. This provision also requires additional disclosure of the attributes of these investments such as: (i) the nature of any restrictions on the reporting entity's ability to redeem its investment; (ii) unfunded commitments; and (iii) investment strategies of the investees. This provision is effective for periods ending after December 15, 2009. The adoption did not have a material impact on the Plan's financial statements.

In January 2010, the FASB issued ASU No. 2010-06, *Improving Disclosures About Fair Value Measurements*, which adds disclosure requirements about transfers into and out of Levels 1, 2, and 3, clarifies existing fair value disclosure requirements about the appropriate level of disaggregation, and clarifies that a description of the valuation technique (e.g., market approach, income approach, or cost approach) and inputs used to measure fair value is required for recurring, nonrecurring, and Level 2 and 3 fair value measurements. These provisions of the ASU are effective for reporting periods ending on or after March 31, 2010. The ASU also requires that Level 3 activity about purchases, sales, issuances, and settlements be presented on a gross basis rather than as a net number as currently required. This provision of the ASU amends only the disclosure requirements for fair value measurements and is effective for the Plan's reporting period ending on or after March 31, 2011. As this ASU amends only the disclosure requirements for fair value measurements, the adoption will have no impact on the Plan's financial statements.

Subsequent Events

The company adopted ASC 855, *Subsequent Events*, which establishes general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or available to be issued. It is effective for financial periods ending after June 15, 2009, and is to be applied prospectively. Management has evaluated all events and transactions that occurred subsequent to December 31, 2009. There were no material

subsequent events that require recognition or disclosure in the financial statements for the year ended December 31, 2009.

Table of Contents

Bank of Hawaii Retirement Savings Plan

Notes to Financial Statements (continued)

2. Investments

During the years ended December 31, the Plan's investments appreciated (depreciated) in fair value as follows:

	2009	2008
	<i>(In Thousands)</i>	
Mutual funds	\$ 42,313	\$ (93,963)
Common stock	1,766	(5,683)
Net appreciation (depreciation) in fair value of investments	\$ 44,079	\$ (99,646)

The fair value of individual investments representing 5% or more of the Plan's net assets at December 31 are as follows:

	2009	2008
	<i>(In Thousands)</i>	
Vanguard Retirement Savings Trust	\$ 65,315	\$ 58,731
Bank of Hawaii Corporation Common Stock	48,015	48,050
Vanguard Wellington Fund	46,964	39,132
Vanguard 500 Index Fund	43,681	33,870
Vanguard Windsor Fund	34,097	28,081

The Plan invests in a collective trust, Vanguard Retirement Savings Trust, which owns fully benefit-responsive investment contracts. The Plan reflected the Vanguard Retirement Savings Trust at fair value and recognized an adjustment from fair value to contract value for the fully benefit-responsive investment contract of \$(1,412,000) and \$768,000 as of December 31, 2009 and 2008, respectively, in the statements of net assets available for benefits.

3. Fair Value of Assets

The following describes the valuation methodologies used for assets recorded at fair value.

Common stocks: Valued at the closing price reported on the active market on which the individual securities are traded.

Mutual funds: Valued at the quoted net asset value (NAV) of shares held by the plan at year-end.

Participant loans: Valued at amortized cost, which approximates fair value.

Common collective trust: Valued at the NAV of unit shares held by the plan at year-end. The NAV is based on the fair value of the underlying investments supported by observable purchases and sales from independent sources.

Table of Contents

Bank of Hawaii Retirement Savings Plan

Notes to Financial Statements (continued)

3. Fair Value of Assets (continued)

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables set forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31:

Assets Measured at Fair Value on a Recurring Basis as of December 31, 2009:

<i>(Dollars in Thousands)</i>	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total as of Dec 31, 2009

Table of Contents

Bank of Hawaii Retirement Savings Plan

Notes to Financial Statements (continued)

4. Transactions and Agreements With Parties-in-Interest

Plan investments include shares of mutual funds managed by Vanguard. Vanguard is the trustee of the Plan. Accordingly, transactions involving shares of such mutual funds are considered party-in-interest transactions.

Plan investments include shares of mutual funds advised by the Asset Management Group of Bank of Hawaii, a subsidiary of Bank of Hawaii Corporation. Accordingly, transactions involving shares of such mutual funds are considered party-in-interest transactions.

Transactions in shares of Bank of Hawaii Corporation common stock qualify as party-in-interest transactions under the provisions of ERISA. During the years ended December 31, 2009 and 2008, the Plan made purchases of \$2,173,000 and \$2,675,000, respectively, and sales of \$5,921,045 and \$12,473,000, respectively, of Bank of Hawaii Corporation common stock on behalf of its participants. At December 31, 2009 and 2008, the Plan held 1,020,565 and 1,065,491 shares of Bank of Hawaii Corporation common stock, respectively, representing 14% and 17%, respectively, of the total net assets of the Plan.

5. Income Tax Status

The Plan last received a determination letter from the Internal Revenue Service dated October 30, 2002, stating that the Plan is qualified under Sections 401(a) and 401(k) of the Internal Revenue Code (the Code) and, therefore, the related trust is exempt from taxation. Once qualified, the Plan is required to operate in conformity with the Code to maintain its qualification. The Plan Administrator believes the Plan is being operated in compliance with the applicable requirements of the Code and, therefore, believes that the Plan is qualified and the related trust is tax exempt. There have been amendments to the Plan since the last determination letter from the Internal Revenue Service. Subsequent amendments are structured to, and are intended to, maintain the Plan's tax-exempt status.
