Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Table of Contents

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act:

None

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report.

Class A Ordinary Shares, nominal value P\$1.00 each	502,034,299
Class B Ordinary Shares, nominal value P\$1.00 each	477,753,405
Class C Ordinary Shares, nominal value P\$1.00 each	4,593,274

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes  No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

Yes  No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days.

Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP

International Financial Reporting Standards as issued  
by the International Accounting Standards Board

Other

If  Other has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow.

Item 17  Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes  No

**PRESENTATION OF FINANCIAL INFORMATION**

Telecom Argentina S.A. is a company incorporated under the laws of Argentina. As used in this Annual Report on Form 20-F (the "Form 20-F" or "Annual Report"), the terms "the Company," "Telecom," "Telecom Group," "we," "us," and "our" refer to Telecom Argentina S.A. and its consolidated subsidiaries as of December 31, 2011. Unless otherwise stated, references to the financial results of "Telecom" are to the consolidated financial results of Telecom Argentina and its consolidated subsidiaries. The Telecom Group is engaged in the provision of fixed and mobile telecommunications services.

The term "Telecom Argentina" refers to Telecom Argentina S.A. excluding its subsidiaries, as of December 31, 2011, Telecom Personal S.A., Núcleo S.A., Springville S.A., Telecom Argentina USA, Inc. and Micro Sistemas S.A. Telecom Argentina is engaged in the provision of fixed telecommunication services in Argentina. The terms "Telecom Personal" or "Personal" refer to Telecom Personal S.A., our subsidiary engaged in the provision of mobile telecommunication services in Argentina. The term "Núcleo" refers to Núcleo S.A., Personal's consolidated subsidiary engaged in the provision of mobile telecommunication services in Paraguay.

Our Consolidated Financial Statements as of December 31, 2011 and 2010 and for the years ended December 31, 2011, 2010 and 2009, and the notes thereto (the "Consolidated Financial Statements") are set forth on pages F-1 through F-67 of this Annual Report.

Our Consolidated Financial Statements are prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and have been approved by resolution of the Board of Directors' meeting held on March 22, 2012.

The mandatory adoption of IFRS for public companies in Argentina is effective for fiscal years beginning January 1, 2012. Therefore, the consolidated financial statements as of December 31, 2011 for filing with the Argentine National Securities Commission ("CNV") were prepared in accordance with Generally Accepted Accounting Principles in Argentina ("Argentine GAAP"). Argentine GAAP differs in certain respects from IFRS. According to the CNV regulations, financial statements under IFRS for the year 2011 can be presented as "additional information" to the consolidated financial statements prepared under Argentine GAAP.

Our Consolidated Financial Statements as of December 31, 2011 and 2010 and for the years ended December 31, 2011, 2010 and 2009, as included in this report, have been audited by our independent registered public accounting firm.

Telecom Argentina and our Argentine subsidiaries maintain their accounting records and prepare their financial statements in Argentine Pesos, which is their functional currency. Our subsidiaries Núcleo, Telecom USA and Springville, however, maintain their accounting records and prepare their financial statements in Guaraníes, U.S. dollars and Uruguayan pesos, respectively. Our Consolidated Financial Statements include the results of these subsidiaries translated into Argentine Pesos. Assets and liabilities are translated at year-end exchange rates and revenue and expense accounts at average exchange rates for the year.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Certain financial information contained in this Annual Report has been presented in U.S. dollars. This Annual Report contains translations of various Argentine Peso amounts into U.S. dollars at specified rates solely for convenience of the reader. You should not construe these translations as representations by us that the Argentine Peso amounts actually represent these U.S. dollar amounts or could be converted into U.S. dollars at the rates indicated. Except as otherwise specified, all references to US\$, U.S. dollars or dollars are to United States dollars and references to P\$, Argentine Pesos or pesos are to Argentine Pesos. Unless otherwise indicated, we have translated the Argentine Peso amounts using a rate of P\$4.304 = US\$1.00, the U.S. dollar ask rate published by the Banco de la Nación Argentina (Argentine National Bank) on December 31, 2011. On April 27, 2012, the exchange rate was P\$ 4.417 = US\$1.00.

For the purpose of this Annual Report, billion means a thousand million.

Table of Contents

Certain amounts and ratios contained in this Annual Report (including percentage amounts) have been rounded up or down to facilitate the summation of the tables in which they are presented. The effect of this rounding is not material. These rounded amounts are also included within the text of this Annual Report.

The contents of our website are not part of this Annual Report.

This Annual Report contains certain terms that may be unfamiliar to some readers. You can find a glossary of these terms on page 4 of this Annual Report.

Table of Contents

**FORWARD-LOOKING STATEMENTS**

The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking statements. Certain information included in this Annual Report contains information that is forward-looking, including, but not limited to:

- our expectations for our future performance, revenues, income, earnings per share, capital expenditures, dividends, liquidity and capital structure;
- the implementation of our business strategy;
- the discussion of the changing dynamics and growth in the telecommunications market;
- our outlook for new and enhanced technologies;
- the effects of operating in a competitive environment;
- industry conditions;
- the outcome of certain legal proceedings;
- the impact of the emergency laws and subsequent related laws enacted by the Argentine government;
- regulatory and legal developments; and
- other factors identified or discussed under Item 3 Key Information Risk Factors.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

This Annual Report contains certain forward-looking statements and information relating to the Telecom Group that are based on current expectations, estimates and projections of our Management and information currently available to the Telecom Group. These statements include, but are not limited to, statements made in Item 3 Key Information Risk Factors, Item 5 Operating and Financial Review and Prospects under the captions Critical Accounting Policies and Trend Information, Item 8 Financial Information Legal Proceedings and other statements about the Telecom Group's strategies, plans, objectives, expectations, intentions, capital expenditures, and assumptions and other statements contained in this Annual Report that are not historical facts. When used in this document, the words anticipate, believe, estimate, expect, intend, plan, will and should and other similar expressions are generally intended to identify forward-looking statements.

These statements reflect the current views of the Telecom Group Management with respect to future events. They are not guarantees of future performance and involve certain risks and uncertainties that are difficult to predict. In addition, certain forward-looking statements are based upon assumptions as to future events that may not prove to be accurate.

Many factors could cause actual results, performance or achievements of the Telecom Group to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements. These factors include, among others:

- our ability to successfully implement our business strategy;
- our ability to introduce new products and services that enable business growth;
- uncertainties relating to political and economic conditions in Argentina;
- inflation, the devaluation of the peso and exchange rate risks;
- restrictions on the ability to exchange pesos into foreign currencies and transfer funds abroad;
- the final results of the contract renegotiation process with the Argentine government regarding the adjustment to our regulated rates charged for public services;

Table of Contents

- the creditworthiness of our actual or potential customers;
- nationalization, expropriation and/or increased government intervention in companies;
- technological changes;
- the impact of legal or regulatory matters or reform and changes in the legal or regulatory environment in which we operate; and
- the effects of increased competition.

Many of these factors are macroeconomic in nature and therefore beyond the control of the Telecom Group's Management. Should one or more of these risks or uncertainties materialize, or underlying assumptions prove incorrect, actual results may vary materially from those described herein as anticipated, believed, estimated, expected, intended, planned or projected. The Telecom Group does not intend and does not assume any obligation to update the forward-looking statements contained in this Annual Report.

These forward-looking statements are based upon a number of assumptions and other important factors that could cause our actual results, performance or achievements to differ materially from our future results, performance or achievements expressed or implied by such forward-looking statements. Readers are encouraged to consult the Telecom Group's filings made on Form 6-K, which are periodically filed with or furnished to the United States Securities and Exchange Commission.

**GLOSSARY OF TERMS**

The following explanations are not provided as or intended to be technical definitions, but only to assist the general reader to understand certain terms used in this Annual Report.

*2G (second-generation mobile system):* Second-generation protocols using digital encoding and including GSM, D-AMPS (TDMA) and CDMA. 2G networks are in current use all over Argentina and other parts of the world. These protocols support high bit rate voice and limited data communications. 2G networks technology offers auxiliary services such as data, fax and SMS. Most 2G protocols offer different levels of encryption.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

*3G (third-generation mobile system):* Third-generation mobile service, designed to provide high speed data, always-on data access, and greater voice capacity. 3G networks allow the transfer of both voice data services (telephony, messaging) and non-voice data (such as downloading Internet information, exchanging email, and instant messaging). The high data speeds, measured in Mbps, are significantly higher than 2G, and 3G networks technology enable full motion video, high-speed Internet access and video-conferencing. 3G technology standards include UMTS, based on WCDMA technology (quite often the two terms are used interchangeably), and CDMA2000.

*Access charge:* Amount charged per minute by national operators for the use of their network by operators of other networks.

*Access deficit:* The portion of costs related to the access network that are not covered by the revenues generated by the use or availability of subscribers connected to such network.

*Access network:* The elements that allow the connection of each subscriber to the corresponding local switch. They consist of the termination point, elements of outside plant and specific parts of the local switching equipment that make available the permanent connection from the termination point to the local switch.

*ADS:* Telecom Argentina's American Depositary Share, listed on the New York Stock Exchange, each representing 5 Class B Shares.

*ADSL (Asymmetric Digital Subscriber Line):* A modem technology that converts existing twisted-pair telephone lines into access paths for multimedia and high-speed data communications. ADSL can receive Mbps and transmit over 832 Kbps in both directions. Such rates expand existing access capacity by a factor of 50 or more without new cabling.

Table of Contents

*AFIP (Administración Federal de Ingresos Públicos)*: The Argentine federal tax authority.

*AFJP (Administradoras de Fondos de Jubilaciones y Pensiones)*: Private entities in charge of managing the funds of the Retirement and Pension System contributions in the individual capitalization regime established by Law 24,241, enacted in 1993.

*AMBA (Area Metropolitana Buenos Aires)*: The area of the Federal District (or Buenos Aires city) and greater Buenos Aires (Gran Buenos Aires), which extends to the city of La Plata to the South, the city of Campana to the North, the city of General Rodríguez to the West and the city of Monte Grande to the Southwest.

*Analog*: A mode of transmission or switching that is not digital, e.g., the representation of voice, video or other not in digital form.

*ANSES*: The Argentine administrator of social security pension and retirement benefits.

*Argentina*: Republic of Argentina.

*Argentine Bankruptcy Law*: Law No. 24,522, as amended.

*Argentine GAAP*: Generally Accepted Accounting Principles in Argentina.

*ARBU (Average Revenue Billed per User)*: Calculated by dividing total monthly basic charges and traffic revenue excluding public telephony revenue by weighted-average number of fixed lines in service during the period.

*ARPU (Average Revenue per User)*: Calculated by dividing total revenue excluding mainly handset, out collect (wholesale) roaming, cell site rental and activation fee revenue by weighted-average number of subscribers during the period.

*ATM (Asynchronous Transfer Mode)*: A Broadband switching technology that permits the use of one network for different kinds of information (e.g., voice, data and video).

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

*Backbone:* Portion of telecommunication network with the highest traffic intensity and from which the connections for services in the local areas depart.

*Basic telephone services:* The supply of fixed telecommunications links that form part of the public telephone network, or are connected to such network, and the provision of local and long-distance telephone service (domestic and international).

*BCBA (Bolsa de Comercio de Buenos Aires):* The Buenos Aires Stock Exchange.

*BCRA (Banco Central de la República Argentina):* The Central Bank of Argentina.

*Broadband services or Broadband:* Services characterized by a transmission speed of 2 Mbps or more. These services include interactive services such as videotelephone/videoconferencing (both point-to-point and multipoint); videomonitoring; interconnection of local networks; file transfer; high-speed fax; e-mail for moving images or mixed documents; Broadband videotex; video on demand and retrieval of sound programs or fixed and moving images.

*Broadcast:* Simultaneous transmission of information to all nodes and terminal equipment of a network.

*Bundle:* Commercial offer including different telecommunication services (voice, Broadband Internet, IPTV, other) by an operator under the same brand.

*Carrier:* Company that makes available the physical telecommunication network.

*CAT:* Compañía Argentina de Teléfonos S.A.

*CDMA (Code Division Multiple Accesses):* A digital wireless technology used in radio communication for transmission between a mobile handset and a radio base station. It enables the simultaneous transmission and reception of several messages, each of which has a coded identity to distinguish it from the other messages.

Table of Contents

*Cell:* Geographical portion of the territory illuminated by a BTS: 850 MHz/1900 MHz.

*Cellular:* A technique used in mobile radio technology to use the same spectrum of frequencies in one network multiple times. Low power radio transmitters are used to cover a cell (i.e., a limited area) so that the frequencies in use can be reused without interference for other parts of the network.

*CER (Coeficiente de Estabilización de Referencia):* The reference stabilization coefficient as calculated by the BCRA or any successor thereto, in accordance with the formula set forth in Annex I of Argentine Law No. 25,713. If the CER is abrogated, found to be inapplicable or not published, references to CER shall refer to any replacement measure adopted under Argentine law or, in the absence of any such replacement measure, any adjustment that shall be necessary to provide a substantially equivalent rate of return on the notes denominated in pesos (the Peso Notes ) in comparison with similar notes issued in dollars.

*Channel:* The portion of a communications system that connects a source to one or more destinations. Also called circuit, line, link or path.

*CNC (Comisión Nacional de Comunicaciones):* The Argentine National Communications Commission.

*CNDC (Comisión Nacional de Defensa de la Competencia):* Argentine Antitrust Commission.

*CNV (Comisión Nacional de Valores):* The Argentine National Securities Commission.

*Concurso preventivo:* A voluntary reorganization proceeding governed by Argentine law.

*Convertibility Law:* Law No. 23,928 and its Regulatory Decree No. 529/91. The Convertibility Law fixed the exchange rate at one peso per U.S. dollar during the period from April 1, 1991 through January 6, 2002. The Convertibility Law was partially repealed on January 6, 2002 by the enactment of the Public Emergency Law.

*CPCECABA (Consejo Profesional de Ciencias Económicas de la Ciudad Autónoma de Buenos Aires):* The Professional Council of Economic Sciences of the City of Buenos Aires.

*CPP (Calling Party Pays):* The system whereby the party placing a call to a mobile handset rather than the mobile subscriber pays for the air time charges for the call.

*D-AMPS (Digital-Advanced Mobile Phone Service):* It is a digital version of AMPS (Advanced Mobile Phone Service), the original analog standard for mobile telephone service in the United States.

*Digital:* A mode of representing a physical variable such as speech using digits 0 and 1 only. The digits are transmitted in binary form as a series of pulses. Digital networks are rapidly replacing the older analog ones. Digital networks allow for higher capacity and higher flexibility through the use of computer-related technology for the transmission and manipulation of telephone calls. Digital systems offer lower noise interference and can incorporate encryption as a protection from external interference.

*DWDM (Dense Wavelength Division Multiplexing):* Technology for multiplying and transmitting different wavelengths along a single optical fiber contemporaneously.

*EDGE (Enhanced Data for GSM Evolution):* Powerful technology that increases the data transmission rate of the GPRS standard from rates of 30-40 Kbps/s to more than 100 Kbps/s and even up to 200 Kbps/s with optimal radio conditions.

*FCR:* France Cables et Radio S.A.

*France Telecom Group:* FCR and Atlas Services Belgium S.A., collectively referred to as the France Telecom Group.

*February Agreement:* An agreement entered into on February 28, 1992 and subsequently ratified by Decree No. 506/92 between the Argentine government and Telecom Argentina. This agreement provides for the reduction of domestic long-distance rates from their then-current level. The reduction became effective on May 1, 1992.

Table of Contents

*Fiber Optic:* A transmission medium that permits extremely high capacities. It consists of a thin strand of glass that provides a pathway along which waves of light can travel for telecommunications purposes.

*Flat rate:* The rate applied by providers to users surfing the web. It is usually a fixed monthly rate for a subscription to a specific Internet Service Provider, aside from the number of connection hours to the Net.

*Frame Relay:* A data transmission service using fast protocols based on direct use of transmission lines.

*Free Pulses:* The number of Free Pulses included in the monthly basic charge before the issuance of Decree No. 92/97.

*FTT HOME, FTT CURB, FTT (Fiber to the )* It is the term used to indicate any network architecture that uses fiber optic cables in partial or total substitution of traditional copper cables used in telecommunications networks. The various technological solutions differ in the point of the distribution network where the fiber connection is made, with respect to the end-user's location. In the case of FTT Curb (Fiber to the Curb or Fiber to the Cabinet), the fiber connection reaches the equipment (distribution cabinet) located on the pavement, from where copper connections are run to the customer; in the case of FTT Home (Fiber to the Home), the fiber connection terminates inside the customer premises.

*GDP:* Gross Domestic Product.

*GPRS (General Packet Radio Service):* An enhanced second-generation mobile technology used to transmit data over mobile networks. GPRS transmits and receives packets of data in bursts instead of using continuous open radio channels, and it is used to add faster data transmission speed to GSM networks. GPRS is packet-based rather than circuit-based technology.

*GSM (Global System for Mobile Communications):* A standard for digital mobile technology used in the world and working on 900 MHz and 1,800 MHz band.

*HSDPA (High-Speed Downlink Packet Access):* Enhanced third-generation mobile telephony communications protocol in the High-Speed Packet Access ( HSPA ) family, which allows networks based on UMTS to have higher data transfer speeds and capacity.

*ICT (Information and communication(s) technology):* Broad area concerned with information technology, telecommunications networking and services and other aspects of managing and processing information, especially in large organizations.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

*IFRS*: International Financial Reporting Standards as issued by the International Accounting Standards Board.

*INDEC (Instituto Nacional de Estadísticas y Censos)*: The Argentine National Statistics and Census Institute.

*Interactive*: Allowing the user to change some aspect of the program.

*Internet*: The world's best-known data network. Initially used by the U.S. Department of Defense, the Internet now provides an interface for networks based on different technologies (LANs, WANs, data networks, etc.), but with the use of the TCP/IP protocol platform.

*IP (Internet Protocol)*: A set of communications protocols for exchanging data over the Internet.

*IPTV (Internet Protocol Television)*: The service provides the distribution of television channels over Internet connections using the IP protocol. More than just duplicating a distribution means, IPTV enables interactive services so that the viewer can interact with the show as it is broadcast.

*ISP (Internet Service Provider)*: A vendor who provides access to the Internet and World Wide Web.

*Law No. 25,561: Ley de Emergencia Económica y Reforma del Régimen Cambiario* (see *Public Emergency Law* ).

Table of Contents

*List of Conditions:* The Privatization Regulations, including the *Pliego de Bases y Condiciones*, was approved by Decree No. 62/90, as amended. Pursuant to the List of Conditions, Telecom Argentina was required to comply with rate regulations and meet certain minimum annual standards regarding the expansion of its telephone system and improvements in the quality of its service to maintain and extend the exclusivity of its non-expiring license to provide fixed-line public telecommunications services and Basic telephone services in the northern region of Argentina. After the market was opened to competition, the outstanding obligations that continue in force are the rate regulations and those related to the quality of service; the obligations related to the expansion of the network are no longer required.

*Local Loop:* Copper wire-couple, through which the telephone connection reaches users; it is the foundation of traditional telephone lines and it is often called last mile.

*Micro Sistemas:* Micro Sistemas S.A.

*MMS (Mobile Multimedia Services):* Represent an evolution of the SMS and the Enhanced Messaging Service ( EMS ) using various mono-medial elements (text, design, photos, video-clips and audio), which are synchronized and combined allowing them to be packed together and sent to GSM-GPRS platforms.

*Mobile service:* A mobile telephone service provided by means of a network of interconnected low-powered base stations, each of which covers one small geographic cell within the total cellular system service area.

*Modem:* Modulator/Demodulator. A device that modulates digital data to allow their transmission on analog channels, generally consisting of telephone lines.

*MPLS-TP:* Functionality and management coincident with the operation of circuit-oriented transmission networks.

*MPM:* Best maintenance practices methodology.

*Multimedia:* A service involving two or more communications media (e.g., voice, video, text, etc.) and hybrid products created through their interaction.

*NDF (Non Deliverable Forward):* A generic term for a set of derivatives that cover national currency transactions including foreign exchange forward swaps, cross currency swaps and coupon swaps in nonconvertible or highly restricted currencies. The common characteristics of these contracts are that they involve no exchange of principal, are fixed at a predetermined price and are typically settled in U.S. dollars (or sometimes in Euros) at the prevailing spot exchange rate taken from an agreed source, time, and future date.

*Network:* An interconnected collection of elements. In a telephone network, these consist of switches connected to each other and to customer equipment. The transmission equipment may be based on fiber optic or metallic cable or point-to-point radio connectors.

*NGN (Next Generation Networks):* A packet-based network able to provide services including telecommunication services and able to make use of multiple Broadband, QoS (Quality of Service)-enabled transport technologies and in which service-related functions are independent from underlying transport-related technologies.

*Node:* Topological network junction, commonly a switching center or station.

*Nortel:* Nortel Inversora S.A., the parent company of Telecom Argentina S.A.

*November Agreement:* An agreement between Telecom Argentina and the Argentine government providing for rates to be dollar-based and, at the election of each of Telecom Argentina and Telefónica, adjusted semiannually according to the U.S. consumer price index. The November Agreement was ratified by Decree No. 2,585/91 and became effective on December 18, 1991. Subsequently, in accordance with the Public Emergency Law, these rates were pesified at the exchange rate of US\$1.00 = P\$1.00. See Item 4 Information on the Company Regulatory Framework Regulatory Environment Rates.

Table of Contents

*Optical fiber:* Thin glass, silica or plastic wires, building the infrastructure base for data transmission. An optical fiber cable contains several individual fibers, and each of them is capable of driving a signal (light impulse) at unlimited bandwidth. Optical fibers are usually employed for long-distance communication: they can transfer heavy data loads, and the signal reaches the recipient, protected from possible disturbances along the way. The driving capacity of optical fibers is higher than the traditional cable ones.

*Outsourcing:* Hiring outsiders to perform various telecommunications services, which may include planning, construction, or hosting of a network or specific equipment belonging to a company.

*PCS (Personal Communications Service):* A mobile communications service with systems that operate in a manner similar to cellular systems.

*Penetration:* The measurement of the take-up of services. As of any date, the penetration is calculated by dividing the number of subscribers by the population to which the service is available and expressed as a percentage.

*Personal:* Telecom Personal S.A.

*Pesification:* Modification of the exchange rate by the Argentine government pursuant to the Public Emergency Law.

*Platform:* The total input, including hardware, software, operating equipment and procedures, for producing (production platform) or managing (management platform) a particular service (service platform).

*Presubscription of Long-Distance Service:* The selection by the customer of international and domestic long-distance telecommunications services from a long-distance telephone service operator.

*Price Cap:* Rate regulation mechanism applied to determine rate discounts based on a formula made up by the U.S. Consumer Price Index and an efficiency factor. The mentioned factor was established initially in the List of Conditions and afterwards in different regulations by the SC.

*Privatization Regulations:* The Argentine government's privatization program as set forth in the State Reform Law approved in August 1989 and subsequent decrees.

*Public Emergency Law:* The Public Emergency and Foreign Exchange System Reform Law No. 25,561 adopted by the Argentine government on January 6, 2002, as amended by Law No. 25,790, Law No. 25,820, Law No. 25,972, Law No. 26,077, Law No. 26,204, Law No. 26,339, Law No. 26,456, Law No. 26,563 and Law No. 26,729. Among others, the Public Emergency Law grants the executive branch of the Argentine

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

government the power to set the exchange rate between the peso and foreign currencies and to issue regulations related to the foreign exchange market and to renegotiate public service agreements.

*Pulse:* Unit on which the rate structure of the regulated fixed line services is based.

*Rate Agreement:* The November Agreement, as supplemented by the February Agreement. The Rate Agreement, among other things, permits Telecom Argentina to effect aggregate rate reductions required pursuant to the List of Conditions by lowering rates for some or all categories of service, *provided* that the net reductions meet applicable targets.

*Rate Rebalancing:* The Rate Rebalancing established by Decree No. 92/97, of January 31, 1997, which provides for a significant reduction in domestic and international long-distance rates, an increase in basic telephone charges, the elimination of Free Pulses and an increase in urban rates.

*Regulatory Bodies:* Collectively, the SC and the CNC.

*Roaming:* A function that enables mobile subscribers to use the service on networks of operators other than the one with which they signed their initial contract. The roaming service is active when a mobile device is used in a foreign country (included in the GSM network).

Table of Contents

*Satellite*: Satellites are used, among other things, for links with countries that cannot be reached by cable to provide an alternative to cable and to form closed user networks.

*SC (Secretaría de Comunicaciones)*: The Argentine Secretary of Communications.

*SCI (Secretaría de Comercio Interior)*: Secretary of Internal Commerce.

*SDH (Synchronous Digital Hierarchy)*: Standardized multiplexing protocols that transfer multiple digital bit streams over optical fiber.

*SEC*: Securities and Exchange Commission of the United States of America.

*Service Provider*: The party that provides end users and content providers with a range of services, including a proprietary, exclusive or third-party service center.

*SMS (Short Message Service)*: Short text messages that can be received and sent through GSM-network connected mobile phones. The maximum text length is 160 alpha-numerical characters.

*Sofora*: Sofora Telecomunicaciones S.A.

*Springville*: Springville S.A.

*SRMC (Servicios de Radiocomunicaciones Móviles Celular)*: Mobile Cellular Radiocommunications Service.

*STM (Servicio Telefónico Móvil)*: Mobile Telephone Service.

*Switch*: These are used to set up and route telephone calls either to the number called or to the next switch along the path. They may also record information for billing and control purposes.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

*Synchronous*: Type of data transmission in which there is permanent synchronization between the transmitter and the receiver.

*TDM (Time-Division Multiplexing)*: A type of digital (or rarely analog) multiplexing in which two or more bit streams or signals are transferred apparently simultaneously as sub-channels in one communication channel, but are physically taking turns on the channel.

*TDMA (Time Division Multiple Accesses)*: A technology for digital transmission of radio signals between, for example, a mobile handset and a radio base station. TDMA breaks signals into sequential pieces of defined length, places each piece into an information conduit at specific intervals and then reconstructs the pieces at the end of the conduit.

*Telco S.p.A.*: A joint company made up of Assicurazioni Generali S.p.A., Intesa San Paolo S.p.A., Mediobanca S.p.A., Sintonia S.A. and Telefónica, S.A. (of Spain).

*Telecom Argentina USA*: Telecom Argentina USA, Inc.

*Telecom Italia*: Telecom Italia S.p.A.

*Telecom Italia Group*: Telecom Italia and its consolidated subsidiaries.

*Telefónica*: Telefónica de Argentina S.A.

*Telefónica de España*: Telefónica, S.A. (of Spain).

*Telintar*: Telecomunicaciones Internacionales de Argentina Telintar S.A.

*TLRD (Terminación Llamada Red Destino)*: Termination charges from third parties mobile networks.

*Transfer Date*: November 8, 1990, the date on which Telecom Argentina commenced operations upon the transfer from the Argentine government of the telecommunications system in the northern region of Argentina that was previously owned and operated by *Empresa Nacional de Telecomunicaciones*.

Table of Contents

*UMTS (Universal Mobile Telecommunications System):* Third-generation mobile communication standard. It is composed of a Broadband system in which data travels at 2 Mbps; communication is faster, quality is better and multimedia contents can travel through the Net.

*Unbundling:* A process that allows telephone carriers (other than Telecom Argentina) to lease the last part of the telephone loop that is to say, the copper wire-cable, connecting Telecom Argentina central station to the user's home, by disconnecting the user from Telecom Argentina terminals and connecting him/her to the telephone carrier's terminals.

*UNIREN (Unidad de Renegociación y Análisis de Contratos de Servicios Públicos):* Renegotiation and Analysis of Contracts of Public Services Division.

*Universal Service:* The availability of Basic telephone service, or access to the public telephone network via different alternatives, at an affordable price to all persons within a country or specified area.

*Value Added Services:* Services that provide a higher level of functionality than the basic transmission services offered by a telecommunications network for the transfer of information among its handsets, which include wired or mobile switched-circuit analog voice communications; direct unrestricted digital point-to-point service at 9,600 bit/s; packet switching (virtual call); direct Broadband analog transmission of TV signals, and supplementary services, such as closed user groups; call waiting; collect calls; call forwarding, and identification of number called. Value Added Services performed by the network, the handsets or the specialized centers include message handling services (MHS) (which can be used, among other things, for commercial documents in predetermined formats); electronic directories listing users, network addressees and terminals; e-mail; fax; teletex; videotex and videotelephone.

*VoIP (Voice over IP):* Transmission of voice communications over Internet Protocol (IP) data networks, such as IP-based LANs, intranets or the Internet.

*W de Argentina Inversiones:* W de Argentina Inversiones S.L.

*WAN (Wide Area Network):* A private network that covers a wide geographic area using public telecommunications services.

*WAP (Wireless Application Protocol):* A technology that allows access to the Internet using mobile handsets, even without the use of a computer.

*Wi-Fi:* A service for mobile Internet connection and high-speed access.

*Wi-Max (Worldwide Interoperability for Microwave Access):* A technology that allows mobile access to Broadband telecommunications networks. It is defined by the Wi - Max Forum, a global consortium formed by major companies in the field of fixed and mobile telecommunications, which has the purpose to develop, test and promote the interoperability of systems.

**Selected Financial Data**

The following table presents our summary financial data for each of the years in the three-year period ended December 31, 2011. Our audited consolidated financial statements as of December 31, 2010 and for the year then ended were the first annual audited financial statements that are fully compliant with IFRS, as issued by the IASB. Before December 31, 2010, our consolidated financial statements were prepared in accordance with Argentine GAAP.

The mandatory adoption of IFRS for public companies in Argentina is effective for fiscal years beginning January 1, 2012. Therefore, the consolidated financial statements as of December 31, 2010 for filing with the Argentine National Securities Commission ( CNV ) were prepared in accordance with Argentine GAAP, which differs in certain respects from IFRS. According to the CNV regulations, financial statements under IFRS for the year 2011 and 2010 can be presented as additional information to the consolidated financial statements prepared under Argentine GAAP.

The selected consolidated income statement data for the years ended December 31, 2011, 2010 and 2009 and the selected consolidated balance sheet data as of December 31, 2011 and 2010 have been prepared in accordance with IFRS and have been derived from our Consolidated Financial Statements included elsewhere in this Annual Report. The selected consolidated balance sheet data as of December 31, 2009 prepared in accordance with IFRS have been derived from our consolidated financial statements as of December 31, 2010 and 2009 and for the years ended December 31, 2010 and 2009 included in our Annual Report on Form 20-F for the year ended December 31, 2010, filed on June 29, 2011.

Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

You should read the information below in conjunction with our Consolidated Financial Statements and the notes thereto, as well as Presentation of Financial Information and Item 5 Operating and Financial Review and Prospects.

**Risk Factors**

*This section is intended to be a summary of more detailed discussions contained elsewhere in this Annual Report. The risks described below are not the only ones that we face. Additional risks that we do not presently consider material, or of which we are not currently aware, may also affect us. Our business, results of operations, financial condition and cash flows could be harmed if any of these risks materialize and, as a result, the market price of our shares and our ADSs could decline. You should consider these risks with respect to an investment in Telecom and investments in Argentine corporations that are not normally associated with investments in the securities of issuers in the United States and other jurisdictions.*

***Risks Relating to Argentina***

**Overview**

Substantially all of our property, operations and customers are located in Argentina, and a portion of our assets and liabilities are denominated in foreign currencies. Accordingly, our financial condition, results of operations and cash flows depend to a significant extent on economic and political conditions prevailing in Argentina and on the exchange rates between the peso and foreign currencies. In 2001 and 2002, the Argentine economy experienced a severe recession as well as a political crisis. The abandonment of dollar-peso parity in 2002 led to the significant devaluation of the peso against major international currencies. Although Argentina has experienced economic growth and political conditions have shown improvement in the last decade, uncertainty remains as to whether the current growth is sustainable, as well as the Argentine government's ability to reduce high inflation rates and to improve trade balance and fiscal surplus, since it has depended to a significant extent on favorable exchange rates, high commodity prices, low international interest rates and a period of opening international commercial markets.

**Devaluation of the peso may adversely affect our results of operations, our capital expenditure program and the ability to service our liabilities and transfer funds abroad.**

Since we realize a substantial portion of our revenues in Argentina in pesos (our functional currency), any devaluation in the peso may negatively affect the U.S. dollar value of our earnings while increasing, in peso terms, our expenses and capital costs denominated in foreign currency. A depreciation in the Argentine Peso against major foreign currencies may also have an adverse impact on our capital expenditure program and increase the peso amount of our trade liabilities denominated in foreign currencies. Telecom seeks to manage the risk of devaluation of the peso by entering from time to time into certain NDF contracts to purchase U.S. dollars at a fixed rate to partially hedge its exposure to foreign currency fluctuations caused by its liabilities denominated in foreign currencies. The Company also has cash and cash equivalents denominated in U.S. dollars that contribute to reduce the exposure to trade payables in foreign currencies. See Item 11 Quantitative and Qualitative Disclosures About Market Risk.

The Argentine Peso has been subject to significant devaluation in the past and may be subject to fluctuations in the future. In the three-month period ended March 31, 2012, the devaluation of the peso against the U.S. dollar was 1.7%, according to the exchange rate published by the Banco de la Nación Argentina. However, during October and November 2011, new measures were implemented to limit the purchase of foreign currency. As a result, the implied exchange rate in the quotation of the Argentine Securities that trade in foreign markets and Argentina increased by approximately 11.7% in the three month period ended March 31, 2012. Given the economic and political conditions in Argentina, it

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

is impossible to predict whether, and to what extent, the value of the peso may depreciate or appreciate against the U.S. dollar, the euro or other foreign currencies. We cannot predict how these conditions will affect the consumption of services provided by the Telecom Group or our ability to meet our liabilities denominated in currencies other than the peso. Moreover, we cannot predict whether the Argentine government will further modify its monetary, fiscal, and exchange rate policy and, if so, what impact any of these changes could have on the value of the peso and, accordingly, on our financial condition, results of operations and cash flows, and on our ability to transfer funds abroad in order to comply with commercial or financial obligations or dividend payments to shareholders located abroad.

Table of Contents

**Inflation could accelerate, causing adverse effects on the economy and negatively impacting Telecom's margins.**

In the past, Argentina has experienced periods of high levels of inflation. More recently, levels of inflation have increased since 2005 and have remained relatively high from 2006 to 2011. The recent economic recovery has led to higher inflation, resulting in increased costs, which may continue or even increase in the future.

The INDEC estimates that the Argentine consumer price increased by 7.2% in 2008, 7.7% in 2009, 10.9% in 2010 and 9.5% in 2011; and the wholesale price index increased by 8.8% in 2008, 10.0% in 2009, 14.6% in 2010 and 12.7% in 2011. In the three months ending March 31, 2012, the consumer price index in Argentina increased 2.6% and the wholesale price index increased 3.0%. There is a substantial disparity between the inflation indexes published by the INDEC and those higher estimated by private consulting firms.

The Argentine government has implemented several actions to monitor and control prices for the most relevant goods and services. Despite such actions, the Argentine economy continues to experience levels of annual consumer index of inflation close to 10%, according to the INDEC, which is substantially lower than private estimates. If the BCRA issues significant amounts of currency to finance public sector spending, to service public debt, to intervene in the foreign exchange market or to assist financial institutions in distress, or if the value of the peso cannot be stabilized through strict fiscal and monetary policies, a significant increase in inflation rates could be expected.

Moreover, high inflation may also undermine Argentina's foreign competitiveness in international markets, negatively affecting the level of economic growth, exports, balance of payments and employment. In addition, public sector spending has increased over the past years, as reducing fiscal surplus, a trend that if continued, may cause the government to incur a fiscal deficit and lead to higher inflation or higher government debt.

Since the majority of our revenues are denominated in pesos, any further increase in the rate of inflation not accompanied by a parallel increase in our prices would decrease our revenues in real terms and adversely affect our results of operations. As discussed below under Risks Associated with Telecom and its Operations, Telecom Argentina's ability to increase its regulated rates is subject to approval of regulatory authorities. We cannot guarantee that any possible rate increase will be sufficient to counter the effect of inflation, and we cannot assure you that the results of any future rate negotiations will be favorable to us and to our financial condition.

Also, higher inflation leads to a reduction in the purchasing power of the population, mainly those unemployed and with low salary levels, thus increasing the risk of a lower level of service consumption from our fixed and mobile customers in Argentina.

**Future policies of the Argentine government may affect the economy as well as the operations of the telecommunications industry.**

The Argentine government has historically exercised significant influence over the economy, and telecommunications companies in particular have operated in a highly regulated environment. Due to the Argentine economic crisis of 2001 and 2002, the Argentine government promulgated numerous, far-reaching regulations affecting the economy and telecommunications companies in particular. In this context, the CNC adopted new interpretations of applicable regulations and imposed fines on telecommunications companies, particularly incumbent

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

operators such as our company. See Item 8 Financial Information Legal Proceedings Regulatory Proceedings for more information. In addition, local municipalities in the regions where we operate have also introduced regulations and proposed various taxes and fees for the installation of infrastructure, equipment and expansion of fixed line and mobile networks. Provinces have increased, and are continuing to increase, their tax rates, particularly the turnover tax rates, resulting in the highest rates in history. Municipal, provincial and federal tax authorities have also brought an increasing number of claims against us. We disagree with these proceedings and we are contesting them. See Item 8 Financial Information Legal Proceedings Tax Matters for more information. However, we cannot assure you that the laws and regulations currently governing the economy or the telecommunications industry will not change, that the claims will be resolved in our favor, or that any changes to the existing laws and regulations will not adversely affect our business, financial condition, results of operations and cash flows.

Table of Contents

Also, in recent years the Argentine government has taken several actions reverting concessions and public services contracts that were privatized in the 90 s, such as Aguas Argentinas S.A., Aerolíneas Argentina S.A. and recently YPF S.A. In April 2012, Decree 530/12 from National Executive Branch established the intervention of YPF S.A., Argentina s largest company and the main oil and gas producer. In addition, a bill was presented to the Argentine Congress to declare the public interest of exploitation, production, transport and commercialization of oil and gas and also to declare the expropriation of 51% of the YPF S.A. s shares. There is no certainty about the consequences that the expropriation of YPF S.A. would have in Argentina s economy, on the confidence of local and international investors, on the business environment in Argentina and what reaction it will cause from other countries or international organizations or economic blocs. We cannot assure that these kinds of actions of the National government will not be extended to other companies and or other sectors in the future.

**The Argentine government may exercise greater intervention in private sector companies, including Telecom Argentina.**

The global economic and financial crisis in the recent years has resulted in a significant reduction in global GDP and a loss in consumer confidence in the financial sectors of many countries. To improve the countries financial condition and assist certain troubled industries, certain governments have responded with extraordinary intervention in the private sector. Certain governments of the leading industrialized nations have implemented various financial rescue plans outlining new regulatory frameworks that would be expected to remain in effect at least until market conditions and investor and consumer confidence have stabilized.

In November 2008, Argentina nationalized, through Law No. 26,425, its private pension and retirement system, which had been previously administered by the AFJP, and appointed ANSES as its administrator. Argentina s nationalization of its pension and retirement system constitutes a significant change in the government s approach to exercising influence over Argentina s main publicly traded companies. A significant portion of the public float of these companies was owned by the AFJP and is currently held by ANSES.

The government could exercise influence over corporate governance decisions of companies in which it owns shares by combining its ability to exercise its shareholder voting rights to designate board and supervisory committee members with its ability to dictate tax and regulatory matters. Additionally, since the AFJP were significant institutional investors in Argentina, the nationalization of the private retirement system affected the way to access of financing in capital markets for publicly traded companies. The role that the government will play, acting through ANSES, in making investments in new issuances of equity and debt in capital markets, is unclear due to the absence of clearly established policies. This has reduced the volume of trading and the liquidity of Argentina s capital markets. Until the government s practices and policies are clearly established, these matters could create uncertainties for investors of public companies in Argentina, including Telecom Argentina.

On April 13, 2011, the Presidential Decree No. 441/11 was published in the Argentine Official Bulletin annulling Article 76(f) of Law No. 24,241, which limited ANSES voting power to 5% of the company s total voting shares, even if ANSES held a greater ownership position. Unless the Presidential Decree and/or its effects are reversed by a competent Authority or Court, ANSES would be able to exercise the total voting power corresponding to its shares in all resolutions to be adopted at those companies shareholders meetings where it has share participation, including decisions related to the allocation of retained earnings and the election of directors and Supervisory Committee members, among others.

**Argentina s economy may not continue to grow at current rates or may contract in the future.**

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

The effects of the global economic and financial crisis in recent years and the general weakness in the global economy may negatively affect emerging economies like Argentina. Although Argentina has experienced economic growth in the most recent years, current global financial instability has impacted and may continue to impact the Argentine economy and cause Argentina to return to a period of recession, fiscal deficit, higher inflation, increased unemployment and greater social unrest.

Although the current state of the international financial markets in terms of volatility, liquidity and access to credit has improved as compared to 2008 and 2009, several international economic, social and political factors could affect the global financial markets, such as, among other factors, a growing concern regarding government deficits, governments' abilities to honor their respective sovereign debts, social unrest and general uncertainty about the global economic recovery.

Table of Contents

Moreover, the growth trend that the Argentine economy has experienced in the most recent years might be negatively affected by several domestic factors such as an appreciation of the real exchange rate, which could affect its competitiveness, diminish or even reverse the country's positive trade balance and, if coupled with an increase in capital outflows, reduce consumption and investment levels as a result of increased pressure on and volatility of exchange rates. Additionally, abrupt changes in monetary and fiscal policies could rapidly affect local economic output, while lack of appropriate levels of investment in certain economy sectors could reduce long term growth. Moreover, limited access to the international financial market could cause an increase in public spending not correlated with an increase in public revenues, which could affect the country's fiscal results and generate uncertainties that might affect the economy's level of growth.

If international and domestic economic conditions for Argentina were to worsen, Argentina could be negatively affected as a result of lower international demand and lower prices for its products and services, higher international interest rates, lower capital inflows and higher risk aversion, which may also adversely affect our business, results of operations, financial condition and cash flows.

**Argentina continues to face economic and legal uncertainty.**

Although general economic conditions have shown improvement, and political protests and social disturbances have diminished considerably since the economic crisis of 2001 and 2002, the rapid and radical nature of the changes in the Argentine social, political, economic and legal environment over the past several years has given rise to uncertainties about the country's business environment.

In the event of further economic, social or political crises, companies in Argentina may face the risk of civil and social unrest, strikes, expropriation, nationalization, forced renegotiation or modification of existing contracts, and changes in taxation policies including tax increases and retroactive tax claims. In addition, Argentine courts have issued rulings changing existing jurisprudence on labor matters and requiring companies to assume increasing responsibility for and assumption of costs and risks associated with utilizing sub-contracted labor and how to calculate salaries, severance payments and social security contributions. Also, there was an increase in claims regarding compensations for work accidents over the cap established by the current relevant legislation. Since we operate in a context in which the governing law and applicable regulations change frequently, it is difficult to predict whether our commercial activities will be affected positively, negatively or at all by such changes.

Substantially all of our operations, properties and customers are located in Argentina, and, as a result, our business is, to a large extent, dependent upon economic conditions prevailing in Argentina. If economic conditions in Argentina were to deteriorate, they would be expected to have an adverse effect on our financial condition, results of operations and cash flows.

**Argentina's past fiscal problems and the incomplete restructuring of Argentina's sovereign debt may negatively affect the macroeconomic environment.**

Although Argentina has shown a fiscal surplus in recent years, it has a history of fiscal deficits. Since almost all of the financial obligations of the Argentine government were denominated in foreign currencies at the time the dollar-peso parity was eliminated in early 2002, there was an increase in the cost of financial services (in terms of Argentine Pesos) of the debt of the Argentine government. Also, since the Argentine government's fiscal revenues were denominated in large part in Argentine Pesos, the Argentine government was severely affected in its ability to carry out its payment obligations using foreign currency and defaulted on a significant part of its public debt in 2002. The Argentine

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

government's sovereign debt default and its consequences may continue to negatively affect the ability of private companies, including Telecom, to access the capital markets or other forms of financing.

The Argentine government implemented a debt restructuring effort mainly through two debt exchange offers. The first and largest was closed on February 25, 2005 and the second took place in 2010. Nonetheless, a number of bondholders who held out from the exchange offers have initiated legal actions against the Argentine government. A judgment against the Argentine government in these pending cases could reduce sources of funding and investment capital and could potentially impact the government's ability to adopt measures that promote economic growth.

Table of Contents

After the economic crisis in 2002, the Argentine government has maintained a policy of fiscal surplus. To be able to repay its debt, the Argentine government may be required to continue adopting austere fiscal measures that could adversely affect economic growth.

As of September 30, 2011, the outstanding principal amount of Argentina's public debt was equivalent to US\$175.5 billion (of which approximately 61% was denominated in foreign currency) of which US\$11.1 billion were not presented to the exchange offers and are still pending for restructuring.

There can be no assurance that the Argentine government will not default on its obligations under its bonds if it experiences another economic crisis. A new default by the Argentine government could lead to a new recession, higher inflation, restrictions on Argentine companies to access funds, higher unemployment and social unrest, which would negatively affect our financial condition, results of operations and cash flows.

**The Argentine banking system may be subject to instability.**

The Argentine banking system collapsed in 2001 and 2002, when the Argentine government restricted bank withdrawals and required mandatory conversion of dollar deposits to pesos. From 2005 to 2007, a period of economic growth coupled with relative stability of the country's exchange rate and inflation resulted in the restoration of public confidence, a gradual accumulation of deposits in Argentine financial institutions, and improved liquidity of the financial system. However, in 2008 and 2009, certain events such as conflicts between the Argentine government and certain sectors of the economy, together with the international financial crisis, decreased depositors' confidence, led to a slowdown in the growth of deposits, increased the dollarization of certain deposits and increased interest rates on loans granted to the nonfinancial sector.

Despite improvements in stability since 2002, and after the Argentine economic recovery experienced in 2010, we cannot be certain that another collapse will not occur in the future.

A new crisis of the Argentine banking system or the consequent instability of one or more of the larger banks, public or private, could have a material adverse effect on the prospects for economic growth and political stability in Argentina, resulting in a loss of consumer confidence, lower disposable income and fewer financing alternatives for consumers. These conditions would have a material adverse effect on us by resulting in lower usage of our services and the possibility of a higher level of uncollectible accounts or increase the credit risk of the counterparties regarding the Company investments in local financial institutions.

In March 2012, Law No. 26,739 was enacted establishing the modification of the Organic Charter of the BCRA modifying the relationship between the monetary base and the level of reserves. The modification also changes the mission of the BCRA. According to this new law, the BCRA obtained more flexibility to attend the financial system's needs, issue Argentine pesos and finance the public sector, among others.

**Shareholders may be liable under Argentine law for actions that are determined to be illegal or ultra vires.**

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Under Argentine law, a shareholder's liability for losses of a company is limited to the value of his or her shareholdings in the company. Under Argentine law, however, shareholders who vote in favor of a resolution that is subsequently declared void by a court as contrary to Argentine law or a company's bylaws (or regulations, if any) may be held jointly and severally liable for damages to such company, to other shareholders or to third parties resulting from such resolution. In connection with recommending any action for approval by shareholders, Telecom Argentina's Board of Directors occasionally obtains and plans to obtain opinions of counsel concerning the compliance of its actions with Argentine law and Telecom Argentina's bylaws (or regulations if any). Although the issue is not free from doubt, based on advice of counsel, Telecom Argentina believes that a court in Argentina in which a case has been properly presented would hold that a noncontrolling shareholder voting in good faith and without a conflict of interest in favor of such a resolution and based on the advice of counsel that such resolution is not contrary to Argentine law or the Company's bylaws or regulations, would not be liable under this provision.

Table of Contents

**Delays in the attribution and allocation of radio spectrum can adversely affect Argentina's mobile industry.**

The SECOM is the authority responsible for administering the use of radio electric spectrum and, consequently, for the attribution of new segments of frequencies and the reallocation of the existing ones for the mobile service. Possible delays in the allocation of new frequencies, the reallocation of the existing ones and their subsequent auction could affect the future development of the sector and the implementation and commercialization of new advanced services, among others, such as mobile broadband and its applications.

***Risks Associated with Telecom and its Operations***

**The Pesification and freezing of rates may continue to adversely affect Telecom Argentina's revenues.**

In accordance with the Public Emergency Law, in January 2002, rates for Basic telephone services and long distance services were converted to pesos and fixed at an exchange rate of P\$1.00=US\$1.00. The rates that Telecom Argentina may charge in the future will be determined by negotiations between Telecom Argentina and the Argentine government. According to the Public Emergency Law, while undertaking these negotiations, the Argentine government must consider the effect of these rates on the competitiveness of the general economy, the quality of service and investment plans of service providers, as contractually agreed. The Argentine government must also consider consumer protection, accessibility of the services and the profitability of public service providers such as Telecom Argentina. The Public Emergency Law has been subsequently extended through December 31, 2013. See Item 4 Information on the Company Regulatory Framework Regulatory Environment Rates.

On March 6, 2006, Telecom Argentina executed a Letter of Understanding (the Letter of Understanding 2006) with the Argentine government pursuant to which Telecom Argentina will be permitted to raise certain rates and incorporate certain modifications to the current regulatory framework. Under the Letter of Understanding 2006, the only agreed-upon adjustments to the rate structure were the rate increases to the termination charge for international incoming calls and the extension of the time bands for peak-hour rates applied to local and domestic long distance calls. See Item 4 Information on the Company Regulatory Framework Regulatory Environment Rates.

The Letter of Understanding 2006 contemplated the signing and effectiveness of the Minutes of Agreement of the Renegotiation upon the fulfillment of certain necessary steps. As of the date of this Annual Report, such fulfillment has yet to occur. Although we expect such fulfillment to occur, we cannot guarantee if or when this will happen. We are unable to predict the outcome of the negotiations that are continuing with regard to further rate increases and the rate scheme which will be applied in the future. Moreover, we are unable to predict whether the Argentine government, as a result of the current rate renegotiations, will impose additional conditions or requirements, and if these conditions or requirements are imposed, whether we will be able to satisfy them.

Rate restrictions for regulated services may continue for a number of years and may affect revenues from fixed line and other services. While we intend to continue to strive to control operating costs and capital expenditures and improve productivity, these efforts has not offset the significant decline in profit margins and operating results that resulted from mandatory rate freezing and the increase in costs due to high levels of investment in capital expenditures and higher operating costs.

**We must comply with conditions in our license, and regulations and laws related thereto, and such compliance may at times be outside of our control.**

We are subject to a complex series of laws and regulations with respect to most of the telecommunications services that we provide. Such laws and regulations are often governed by considerations of public policy. We provide telecommunications services pursuant to licenses that are subject to regulation by various regulatory bodies. Any partial or total revocation of the licenses would likely have a material adverse impact on our financial condition, results of operations and cash flows. Our dissolution and the declaration of bankruptcy, among others, are events that may lead to a revocation of our licenses.

Table of Contents

Certain license conditions are not within our control. For example, any transfer of shares resulting in a direct or indirect loss of control in Telecom Argentina without prior approval of the regulatory authorities may result in the revocation of Telecom Argentina's license. Pursuant to the provisions of Telecom Argentina's List of Conditions as amended by Resolutions SC No. 111/03 and No. 29/04: (i) any reduction of ownership of Nortel in our capital stock to less than 51% without prior approval of the Regulatory Bodies; or (ii) any reduction of ownership of currently common shareholders in the capital stock with voting power of Nortel to less than 51% without prior approval of the Regulatory Bodies, may result in the revocation of Telecom Argentina's telecommunications license.

Nortel owns all of our Class A Ordinary Shares (51% of our total capital stock) and approximately 7.66% (7.71 % as of December 31, 2011) of our Class B Ordinary Shares (3.74% of our total capital stock) which, in the aggregate, represents approximately 54.74% of our total capital stock. We are directly controlled by Nortel by virtue of Nortel's ownership of a majority of our capital stock; however, Nortel's controlling interest is subject to certain agreements among Sofora's shareholders. In addition, the Telecom Italia Group and W de Argentina Inversiones (a company that is part of the Argentine Wertheim Group) are each required to maintain direct ownership of at least 15% of the common stock of Sofora.

Compliance with conditions in our license and related regulations and laws may be affected by events or circumstances outside of our control, and therefore we cannot predict whether such events or circumstances will occur and if any do occur, this could result in an adverse effect on our financial condition, our operations and cash flows.

**We operate in a competitive environment that may result in a reduction in our market share in the future.**

We compete with licensed provider groups, composed of, among others, independent fixed line service providers, mobile and cable operators, as well as individual licensees, some of which are affiliated with major service providers outside Argentina. As of December 31, 2011, more than 1000 licenses for local and/or long distance services, payphones and Value Added Services had been granted since the end of the exclusivity period.

Internet and mobile services, which we expect will continue to account for an increasing percentage of our revenues in the future, are characterized by rapidly changing technology, evolving industry standards, changes in customer preferences and the frequent introduction of new services and products. To remain competitive in the fixed telecommunications market, we must invest in our fixed-line network and information technology. Specifically, in the Internet services market, we must constantly upgrade our access technology and software in order to increase the speed, embrace emerging transmission technologies and improve the responsiveness, functionality, coverage and features of our services. Also, to remain competitive in the mobile telecommunications market, we must enhance our mobile networks by expanding our network infrastructure and extending 3G technology and bandwidth in mobile data transmission. In addition, a key factor for Personal's competitiveness is to be awarded with new mobile frequency bands. Future technological developments may result in decreased customer demand for certain of our services or even render them obsolete. In addition, as new technologies develop, equipment may need to be replaced or upgraded or network facilities (in particular, mobile and Internet network facilities) may need to be rebuilt in whole or in part, at substantial cost, to remain competitive. These enhancements and the implementation of new technologies will continue requiring increased capital expenditures.

We also anticipate that we will have to devote significant resources to the refurbishment and maintenance of our existing network infrastructure to comply with regulatory obligations particularly regarding fixed line services and to remain competitive with the quality of our services in both Internet and mobile segments. We also expect to continue to devote resources to customer retention and loyalty in such segments.

An increase in competition between service providers could be expected as a result of the implementation of the Number Portability Regulation that took place in March 2012 for Personal Mobile Services segment, which could also result in higher customer retention costs and increased churn amongst high value customers in the Argentinean mobile market. Our market share may be affected positively, negatively or not at all by the number portability.

Table of Contents

In addition, Personal will participate in the spectrum auction and hopes to acquire spectrum to complete its Spectrum cap throughout Argentina. We cannot ensure that Personal will be awarded spectrum in the tender. If the auction is delayed or the spectrum is awarded to other existing or new competitors, it could adversely affect its competitive position or ability to offer mobile services to its customers on a competitive basis, and may require higher capital expenditures regarding the construction of additional cell sites.

Also, the macroeconomic situation in Argentina may adversely affect our ability to successfully invest in, and implement, new technologies, coverage and services in a timely fashion. Accordingly, we cannot assure you that we will have the ability to make needed capital expenditures and operating expenses. If we are unable to make these capital expenditures, or if our competitors are able to invest in their businesses to a greater degree and/or faster than we are, our competitive position will be adversely impacted.

Moreover, the products and services that we offer may fail to generate revenues or attract and retain customers. If our competitors present similar or better responsiveness, functionality, services, speed, plans or features, our customer base and our revenues may be materially affected.

We also expect that the level of competition in our markets will continue to increase in the future, particularly as a result of the possible inclusion of new mobile virtual network operators. Competition is and will continue to be affected by our competitors' business strategies and alliances. Accordingly, we may face additional pressure on the rates that we charge for our services or experience a loss of market share particularly in the Internet and mobile services. In addition, the general business and economic climate in Argentina may affect us and our competitors differently; thus our ability to compete in the market could be adversely affected.

Even though the Company grew and developed in recent years in a highly competitive market, because of the range of regulatory, business and economic uncertainties we face, as discussed in this Risk Factors section, it is difficult for us to predict with meaningful precision and accuracy our future market share in relevant geographic areas and customer segments, the drop in our customer's consumption which could result in a reduction of our revenue market share, the speed with which change in our market share or prevailing prices for services may occur or the effects of competition. Those effects could be material and adverse to our overall financial condition, results of operations and cash flows.

**Changes in the laws and regulations of the mobile industry could adversely affect us.**

The mobile industry is currently subject to an important set of regulations that has enabled the development of a high competitive and intense capital expenditure environment. Notwithstanding that, in 2011 a bill was presented to the lower Congress Chamber proposing a substantial change through the declaration of the mobile industry as a public service. That bill did not obtain the necessary support to be treated at the lower Congress Chamber. We cannot assure that similar initiatives will not be proposed in the future and will not obtain the approval of the National Congress.

**Future allocations of mobile frequency bands may affect the competitiveness of the Argentine mobile industry and could impact Personal's competitive position within it.**

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Telefónica Móviles Argentina S.A. returned to the Argentine government the frequency bands exceeding an aggregate 50 MHz, as a result of the combination of operations of Unifón and Movicom in 2004, in accordance with the current laws and pursuant to a plan to be subsequently issued. In 2005, the SC issued its plan relating to the return of those frequency bands although it did not stipulate how the returned bands would be reallocated or assigned to other operators.

The launch of the auction to reassign the 850 MHz and 1900 MHz frequency bands returned by Telefónica Móviles Argentina S.A. because they exceeded their 50 MHz spectrum cap was postponed several times. Finally, SECOM launched the auction; which is expected to take place in May 2012.

Personal is participating in the spectrum auction process and expects to acquire additional spectrum to complete its Spectrum cap throughout Argentina.

If Personal is not one of the tenders awarded, it could adversely affect its competitive position and may require higher tangible capital expenditures to offer mobile services to its customers on a competitive basis in comparison with other operators that would obtain additional spectrum resulting from the auction. See Item 4 Information on the Company Regulatory Framework Other Regulatory Regulations Regulations Applicable to PCS Services for a detailed description of Personal's license.

Table of Contents

**Actual or perceived health risks or other problems relating to mobile handsets or transmission masts could lead to litigation or decreased mobile communications usage.**

The effects of, and any damage caused by, exposure to an electromagnetic field were and are the subject of careful evaluations by the international scientific community, but until now there is no scientific evidence of harmful effects on health. We cannot rule out that exposure to electromagnetic fields or other emissions originating from mobile handsets will finally not be identified as a health risk.

Although Argentine mobile operators comply with the international security standards established by the World Health Organization and Argentine regulations, which are similar, our mobile business may be harmed as a result of these alleged health risks. For example, the perception of these health risks could result in a lower number of customers, reduced usage per customer or potential consumer liability. In addition, these concerns may cause regulators and municipalities to impose restrictions on the construction of base station towers or other infrastructure, which may hinder the completion of network build-outs and the commercial availability of new services and may require additional investments.

**Nortel, as our controlling shareholder, and Sofora, as Nortel's controlling shareholder, exercise control over significant matters affecting us.**

Nortel is our direct controlling shareholder. Sofora owns 100% of the common stock of Nortel, which currently represents 74.01% of the total capital stock of Nortel. Sofora is 68% owned by Telecom Italia Group and 32% owned by W de Argentina Inversiones.

Through their ownership of Sofora and the Shareholders' Agreement between them, the Telecom Italia Group and W de Argentina Inversiones have, as a general matter, the ability to determine the outcome of any action requiring our shareholders' approval, including the ability to elect a majority of directors and members of the Supervisory Committee. In addition, we have been informed that, pursuant to the shareholders' agreement entered into between the Telecom Italia Group and the Wertheim Group, the Telecom Italia Group and W de Argentina Inversiones have agreed among themselves to certain matters relating to the election of our directors and those of Nortel and Sofora and have given W de Argentina Inversiones veto power with respect to certain matters relating to us. See Item 7 Major Shareholders and Related Party Transactions Shareholders' Agreement.

We have engaged in and will continue to engage in transactions with these shareholders of Nortel and, at the present time, of Sofora, and their affiliates. Certain decisions concerning our operations or financial structure may present conflicts of interest between these shareholders as direct or indirect owners of Telecom Argentina's capital stock and as parties with interests in these related party contracts.

Nevertheless, all related parties' transactions were made on an arm's length basis and those which exceed 1% of Telecom Argentina's shareholders' equity are subjected to a prior approval process established by Decree No. 677/01 and requiring involvement of the Audit Committee and/or an opinion of two independent valuation firms as well as subsequent approval by the Board of Directors to verify that the agreement could reasonably be considered to be in accordance with normal and habitual market practice. See Item 7 Major Shareholders and Related Party Transactions Related Party Transactions.

**Our operations and financial condition could be affected by union negotiations.**

In Argentina, labor organizations have substantial support and have considerable political influence. In recent years, the demands of our labor organizations have increased mainly as a result of the increase in the cost of living (which was affected by the increased level of inflation) and a decline in the population's purchasing power.

In addition to the recategorization process expected in 2012 for Telecom Argentina's nonunionized employees, certain labor organizations have advocated that some of our nonunionized employees should be represented by trade unions. Unions have also requested that we delegate currently outsourced tasks to Company's employees. See Item 6 Directors, Senior Management and Employees Employees and Labor Relations.

If the number of employees covered by trade unions increases or Personal's employees (currently included in the collective bargain agreement of the Argentine Federation of Commercial and Service Employees

Table of Contents

FAECyS ) are included in the new collective bargain agreement for the mobile industry, we may incur increased costs for the higher compensation that we may need to pay.

**The Argentine government may order salary increases to be paid to employees in the private sector or changes in labor regulations, which would increase our cost of doing business.**

The Argentine government has in the past and may in the future promulgate laws, regulations and decrees requiring companies in the private sector to maintain minimum wage levels and provide specified benefits to employees (including higher levels of severance payments to former employees dismissed without proper cause). We cannot guarantee that the government will not adopt measures, as it did in the past, which will increase salaries or require us to provide additional benefits, which would increase our costs and, among other things, in the absence of an adjustment of regulated rates in our fixed services segments, continue reducing our profit margins.

Moreover, there are certain bills pending in the Argentine Congress regarding modifications to labor regulations such as considering amounts paid to employees that are currently not subject to social security contributions as part of the normal and usual employees' salaries, increasing liability of the companies for the sub-contractor's employees in outsourced tasks and the implementation of a regime that would entitle employees to participate in the profits of companies that employ them.

If such bills are approved, the modifications in current labor regulations and conditions could materially impact our relationship with our employees by increasing the labor cost and in some cases decreasing the flexibility to provide services to our clients.

**We are involved in various legal proceedings which could result in unfavorable decisions and financial penalties for us.**

We are party to a number of legal proceedings, some of which have been pending for several years. We cannot be certain that these claims will be resolved in our favor, and responding to the demands of litigation may divert management's time and attentions and financial resources.

In addition, in recent years, certain changes in the treatment of employment matters under Argentine law have created new incentives for individuals to pursue employment-related litigation in Argentine courts. These changes include holdings that an employee of a subcontractor may file a direct action against the firm contracting the work, that any cap on severance pay in cases of dismissal without cause is unconstitutional, that an employee may bring a civil action in the event of an occupational accident, and that an employee can bring a lawsuit against the employer because of changes in working conditions. Additionally, the Company is exposed to claims of employees of subcontractors and commercial agents claiming direct or indirect responsibility of Telecom based on a broad interpretation of the rules of labor law.

Also, the Company is subject to various lawsuits initiated by some employees and former employees who claim wage differences caused by the impact of the concepts non-remunerative sums (amounts not subject to social security contributions) and food vouchers over the settlement of items such as overtime, productivity, vacation, supplementary annual salary and other additional benefits provided by the Collective Bargaining Agreement and, in certain cases, have obtained favorable rulings for these claims.

In the past, Personal was subject, and currently is subject, to claims by former representatives (commercial agents) who end their business relationship by making claims for reasons that are not always justified by contract terms.

As a result, Telecom Argentina and Personal may face increased risk of employment and commercial litigation. If this occurs, we cannot guarantee that this litigation will not have an adverse effect on our results of operations, financial condition and cash flows, despite the provisions that the Company has recorded to cover from these matters, as it is described in Item 8 Financial Information .

The CNC is the authority to control telecommunications services in Argentina and in its capacity is empowered to apply economic sanctions against licensees for breaches of the current regulatory framework. Recently, there has been a growing trend of imposing sanctions on Telecom Argentina for technical reasons, mainly related to the delay in repairing defective lines and/or installing new lines. Although penalties are

Table of Contents

appealed in the administrative stage, if the appeals are not solved in our favor or the penalties imposed by the CNC increased, it could have an adverse effect on our financial situation, results of our operations and cash flows.

Moreover, in 2009, the environmental agency required Telecom Argentina to be registered in the National Registry of Generators and Operators of Hazardous Waste as a result of alleged problems with our liquid drainage at an underground chamber (as it had been previously required to do in 1999). This registration would require Telecom Argentina to pay an annual fee calculated in accordance with a formula that takes into consideration the extent of the hazard and the quantity of the waste. Telecom Argentina filed a request for administrative review seeking to obtain rejection of the environmental agency's ordinance. We cannot guarantee that the rejection will be obtained. In addition, changes in environmental legislation or the evolution of products and services we offer could require us to be registered in the National Registry of Generators and Operators of Hazardous Waste. In that case or if the rejection of the environmental agency's ordinance is not obtained, Telecom Argentina would face increased costs which may include retroactive fees.

See Item 8 Financial Information Legal Proceedings Civil, commercial, labor, regulatory, tax and other matters proceedings.

**The enforcement of regulations aimed at protecting consumers may have an adverse effect on us.**

The Consumer Protection Act No. 24,240 (the Consumer Protection Act) establishes a series of principles and rules for the protection of consumers and users. The Consumer Protection Act applies to the telecommunications industry and to any other industry in which consumers and users are involved.

Telecom Argentina and Personal have received several customer complaints in connection with the provisions of the Consumer Protection Act that were filed with different law enforcement bodies (national, provincial or municipal) and, in the last few years, there was also an increase in legal actions brought by consumer associations. See Item 8 Financial Information Legal Proceedings Civil, commercial, labor, regulatory, tax and other matters proceedings General Proceedings Consumer Trade Union Proceedings.

This situation may entail risks for Telecom Argentina and Personal concerning, among others, the prices charged for its services, or the obligation to return amounts charged for its services. If such were the case, any of such consequences could have an adverse effect on our financial situation, results of our operations and cash flows.

**The BCRA has imposed restrictions on the transfer of funds outside of Argentina in the past; some restrictions currently exist and may increase in the future, which could prevent us from making payments on dividends and liabilities.**

In the past, the Argentine government has imposed a number of monetary and currency exchange control measures, including temporary restrictions on the free disposition of funds deposited with banks and restrictions or limitations on the access to foreign exchange markets and transfers of funds abroad, including for purposes of paying principal and interest on debt, trade liabilities to foreign suppliers and dividend payments to foreign shareholders. Although significant restrictions or limitations have been eliminated over the years, certain restrictions imposed by the BCRA on the access to foreign exchange markets and transfer of funds continues to apply to us. In addition, during the months

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

of October and November 2011, new measures were implemented to control and limit the purchase of foreign currency, such as the prior approval of the AFIP for any purchase of foreign currency. There can be no assurance that the BCRA or other government agencies will not increase controls and restrictions for making payments to our foreign creditors, dividend payments to foreign shareholders or require its prior authorization for such purposes, which would limit our ability to timely comply with payments related to our liabilities with foreign creditors or non-resident shareholders. See Item 10 Additional Information Foreign Investment and Exchange Controls in Argentina.

In addition, in October 2011, Decree No. 1,722 eliminated an exception for oil and mining companies, and thus requires these companies to settle in the foreign exchange market all their export receipts. Moreover, the National Insurance Bureau, issued in October 2011, Resolution No. 36,162 imposing the obligation for insurance companies to have all investments and liquid assets allocated in Argentina. We cannot ensure that similar measures will not be taking for other companies and or other sectors in the future.

Table of Contents

Starting in January 2012, the AFIP and the SCI must be notified in advance and must approve all import operations of goods and services. This new procedure could negatively affect the provision of imported products and services. Such procedure could also negatively affect our supply chain, as some raw materials, equipment and handsets are imported by our suppliers.

**Fluctuations in Telecom Argentina's share price depend on various factors, some of which are outside of our control.**

The market price of our shares is subject to change due to various factors which are outside of our control such as changes in market expectations, changes in the economic and political situation in Argentina, the way ANSES will exercise its political rights and manage its share ownership in Telecom Argentina, and changes in measures used by investors or analysts to value our stock or market trends unrelated to our performance and operations. We cannot predict when such external factors will affect our stock price or whether their effects will be positive or negative.

Finally, currency fluctuations could impact the value of an investment in Telecom Argentina. Although Telecom Argentina's ADSs listed on the New York Stock Exchange are U.S. dollar-denominated securities, they do not eliminate the currency risk associated with an investment in an Argentine company.

**ITEM 4. INFORMATION ON THE COMPANY**

**INTRODUCTION**

**The Company**

Telecom is one of the largest private-sector companies in Argentina in terms of revenues, net income and number of employees. Telecom Argentina has a non-expiring license (the License) to provide fixed-line telecommunications services in Argentina and it also provides other telephone-related services such as international long-distance service, data transmission, IT solutions outsourcing and Internet services. Through our subsidiaries, we also provide mobile telecommunications services and international wholesale services.

As of December 31, 2011, we had approximately 4.1 million fixed lines in service. This is equivalent to approximately 21 lines in service per 100 inhabitants in the Northern Region of Argentina and 373 lines in service per employee.

As of December 31, 2011, our Internet business reached approximately 1.6 million accesses and our mobile business had approximately 18.2 million subscribers in Argentina and approximately 2.1 million subscribers in Paraguay.

*Business Strategy*

The Telecom Group pursues a business strategy focused on increasing its profitability and maximizing value generation for its customers, shareholders, employees and the broader community it serves. In order to promote the achievement of its goals in a sustainable and consistent manner, the Telecom Group develops business plans according to the market and macroeconomic environment and invests in products and services innovation aimed at improving its customers' user experience by adding content, interactivity and convenience to communication.

Our priority focuses on operational efficiency and the effectiveness of planning and control processes. We view these as key competitive factors for our Company and its long-term corporate sustainability.

We invest in our human resources through communication, training and development programs, promoting work-life balance, enabling telecommuting and providing open and transparent relationships with individual employees and trade unions. We conduct our activities in accordance with the principles and values in our Code of Business Conduct and Ethics, which applies to all managers and employees in the Telecom Group, and which our suppliers must also comply with.

Table of Contents

We also consider the integrated vision of processes and technology to be a key factor of efficiency in our corporate management and market competitiveness, thereby enabling us to provide high-value service options to the individual and business consumer.

Our investments in technology are designed to continuously adapt our coverage and capacity of our infrastructure and implement new service platforms. We aim to provide quality service to our increasing traffic volumes and demand for bandwidth, caused by the expansion of our customer base, the access to the network applications, new Value Added Services, access to social networks and content distribution.

Through our Broadband and mobile Internet, we offer our customers continuous Internet access, regardless of the users' physical location. We also provide our consumers with mobile equipment and applications that enhance personal communication, social relations, entertainment and professional performance.

For the corporate segment, we integrate communication solutions with information technology services by providing virtual access to applications and platforms at our datacenters.

For those services not subject to rate freeze since 2001 as a result of the Pesification, we maintain affordable prices commensurate with the market's purchasing power, focusing on achieving our revenue growth by expanding and developing our customer base and by offering new services and products. We simplified our price structure by developing service packages targeted to different consumer profiles, which provide customers with a clear view and control over their communication expenses.

The penetration of communication services in the Argentine market has continued to show sustained growth positioning above the regional average. Our growth rate is currently positioned above the market rate. New market development opportunities could result from a more favorable environment for investment and competition in the sector.

We also developed a new identity for our mobile operations under the Personal brand, which has been increasing its market share. We believe our new identity represents the values in which we trust to successfully conduct our Number Portability activities in 2012.

We believe that the strategy implemented by our Management sets the foundations for the Telecom Group to reach its goals of continuous service quality improvement, strengthening its market position and increasing its operating efficiency.

***Organizational Structure***

The following chart shows our subsidiaries as of December 31, 2011, and jurisdiction of organization.

---

(\*) Dormant entity as of December 31, 2011.

Table of Contents

*Consolidated Subsidiary Information*

The following table presents information relating to our consolidated subsidiaries for the year ended as of December 31, 2011:

Subsidiary(1)	Activity	Segment	Percentage of Ownership	Percentage of Telecom s Total Consolidated Revenues(4)
Telecom Personal S.A.	Mobile Services	Personal Mobile Services	99.99	67.2

(1) Personal and Micro Sistemas are incorporated in Argentina while Núcleo, Springville and Telecom Argentina USA are incorporated in Paraguay, Uruguay and the United States, respectively.

(2) Interest held indirectly through Personal.

(3) Dormant subsidiary as of December 31, 2011.

(4) Includes service revenues, equipment sales and other income with third parties.

Our principal executive offices are located at Alicia Moreau de Justo 50, C1107AAB, Buenos Aires, Argentina, telephone number: 54-11-4968-4000.

Our authorized agent in the United States for SEC reporting purposes is Puglisi & Associates, 850 Library Avenue, Suite 204, P.O. Box 885, Newark, Delaware 19715.

**Recent Developments**

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Telecom Argentina's shareholders, at their meeting held on April 27, 2012, approved, among other items:

- The allocation of retained earnings as of December 31, 2011, in accordance with the new requirements established by Resolution No. 593/11 (See Item 8 Financial Information Dividend Policy ) as follows: (i) P\$121 million to the legal reserve, (ii) distribution of cash dividends of P\$807 million (P\$0.82 per share) to be paid on May 10, 2012, and (iii) the constitution of a voluntary reserve for future capital expenditures of P\$2,553 million.
- The number of members of the Supervisory Committee for the year 2012 and their appointment as follows: the shareholders decided to elect five members and five alternate members of the Supervisory Committee for the year 2012, in accordance with the provisions of Telecom Argentina's bylaws. As a result, one member and one alternate member were appointed at the request of ANSES through the exercise of cumulative voting procedures (See Item 10 Additional Information Memorandum and Articles of Association- Telecom Argentina's capital stock Voting Rights ) and the remaining four members and four alternate members were elected by ordinary vote.

### *Personal Annual shareholders' meeting*

Personal's shareholders, at their meeting held on April 19, 2012, approved, in accordance with the new requirements established by Resolution No. 593/11 (See Item 8 Financial Information Dividend Policy ) among other items, the allocation of retained earnings as of December 31, 2011 as follows: (i) distribution of cash dividends of P\$800 million (P\$2.58 per share) in two installments, the first one on April 26, 2012 and the second one on June 18, 2012 in the amount of P\$250 million and P\$550 million, respectively, (ii) the constitution of a reserve for future cash dividends by P\$910 million, and (iii) the constitution of a voluntary reserve for the finance of working capital and capital expenditures in Argentina by P\$1,237 million. The shareholders also approved the delegation of authority in Personal's Board of Directors to determine the amount, time, terms and conditions to release the reserve for future cash dividends and the voluntary reserve for the finance of working capital and capital expenditures in Argentina.

### **History**

Telecom Argentina was created by Decree No. 60 of the executive branch dated January 5, 1990, and incorporated as Sociedad Licenciataria Norte S.A. on April 23, 1990. In November 1990, its legal name was changed to Telecom Argentina STET-France Telecom S.A. and on February 18, 2004, it was changed to Telecom Argentina S.A.

Telecom Argentina is organized as a corporation (*sociedad anónima*) under Argentine law. The duration of Telecom Argentina is 99 years from the date of registration with the Buenos Aires Public Registry of Commerce (July 13, 1990). Telecom Argentina conducts business under the commercial name Telecom.

Telecom Argentina commenced operations on November 8, 1990 (the Transfer Date ), upon the transfer from the Argentine government of the telecommunications system in the Northern Region previously owned and operated by Empresa Nacional de Telecomunicaciones ( ENTel ). This transfer was made pursuant to the Argentine government's privatization program as set forth in the State Reform Law approved in August 1989 and subsequent decrees (the Privatization Regulations ), which specified the privatization procedure for ENTel.

Table of Contents

The Privatization Regulations provided for:

- the division of the Argentine telecommunications network operated by ENTel into two regions, the Northern Region and the Southern Region of Argentina;
- the granting to Telecom Argentina and Telefónica of non-expiring licenses to provide basic telecommunication services in the Northern Region and Southern Region, respectively;
- the granting to Telintar and Startel, each joint subsidiaries of Telecom Argentina and Telefónica, of non-expiring licenses to provide international long distance and data transmission, respectively; and
- the transfer by ENTel of substantially all of its assets and certain contracts into Telecom Argentina, Telefónica, Telintar and Startel.

On the Transfer Date, pursuant to the terms and conditions of a transfer contract (the Transfer Agreement), the Argentine government sold 60% of the common stock to Nortel, a holding company formed by a consortium of investors including Telecom Italia, among others. In 2003, Nortel's common stock was transferred to an Argentine company named Sofora. As of the date of this Annual Report, Sofora is held 68% by the Telecom Italia Group and 32% by W de Argentina Inversiones, a holding company incorporated in the Kingdom of Spain, and a company of the Wertheim Group. See Item 7 Major Shareholders and Related Party Transactions Shareholders of Nortel.

Pursuant to the Privatization Regulations, 10% of Telecom Argentina's common stock was transferred to a Share Ownership Plan for certain former employees of ENTel and CAT by the Argentine government, and the remaining 30% of Telecom Argentina's common stock was sold to investors, principally in Argentina, the United States and Europe, in an offering completed in March 1992. A portion of the shares in the Share Ownership Plan has been sold in the public market, and the remaining shares in the Share Ownership Plan are being gradually sold in the public market. See Item 6 Directors, Senior Management and Employees Share Ownership Share Ownership Plan.

On the Transfer Date, Telecom Argentina entered into a management agreement (the Management Agreement) with Telecom Italia and FCR, a subsidiary of France Telecom S.A. (jointly, the Operators). In December 2003, the Telecom Italia Group became the sole operator (the Operator) of Telecom Argentina. In October 2010, the SC decided, through Resolution No. 136, that the figure of the Operator established under the Bidding Terms and Conditions (Decree No. 62/90 as amended) was no longer effective for Telecom Argentina.

Through September 30, 1999, Telecom Argentina provided domestic and international communication services in the Northern Region on an exclusive basis. Commencing in October 1999, the Argentine government implemented a deregulation plan introducing competition into the Basic telephone services market. See Regulatory Framework Liberalization of the Argentine Telecommunications Industry below. The Argentine telecommunications market was opened to full competition beginning in November 2000. As a result, Telecom Argentina now offers services throughout Argentina and competes with Telefónica and with a number of additional local operators.

**THE BUSINESS**

**General**

As of the date of this Annual Report, we conduct our business through six legal entities which represent six operating segments. We aggregate these operating segments into three segments: Fixed Telecommunications Services ( Fixed Services ), Personal Mobile Telecommunications Services ( Personal Mobile Services ) and Núcleo Mobile Telecommunications Services ( Núcleo Mobile Services ) according to the type of products and services provided and taking into account the regulatory and economic framework under which each entity operates.

Table of Contents

The companies we aggregated to create the segments are as follows:

Segment	Consolidated Company / Operating Segment
Fixed Services	Telecom Argentina Telecom Argentina USA Micro Sistemas (1)
Personal Mobile Services	Personal Springville (1)
Núcleo Mobile Services	Núcleo

(1) Dormant entity as of December 31, 2011.

**Fixed Services.** Telecom Argentina owns a local telephone line network, public long-distance telephone transmission facilities and a data transmission network in the Northern Region since the market was open to competition. Telecom Argentina expanded its network in the Southern Region of Argentina providing nationwide services. Fixed services are comprised of the following:

- *Basic telephone services.* Telecom Argentina provides Basic telephone services, including local, domestic and international long-distance telephone services and public telephone services. As of December 31, 2011, Telecom Argentina had approximately 4.1 million lines in service;
- *Interconnection services.* Telecom Argentina provides interconnection services, which primarily include access, termination and long-distance transport of calls;
- *Data transmission and Internet services.* Telecom Argentina provides data transmission and Internet services, including traditional Broadband and mobile Internet, Internet dedicated lines, private networks, national and international video streaming, transportation of radio and TV signals and videoconferencing services. As of December 31, 2011, Telecom Argentina had approximately 1.6 million Internet accesses;
- *Information and Communication Technology Services.* Telecom Argentina provides ICT services, datacenter services, telecommunications consulting and value-added solutions;
- *Other telephone services.* Other services provided by Telecom Argentina include supplementary services such as call waiting, call forwarding, conference calls, caller ID, voice mail, itemized billing and maintenance services; and
- *Sale of equipment.*

***Personal Mobile Services and Núcleo Mobile Services.*** We provide mobile services through our subsidiaries in Argentina and Paraguay. Our subsidiary, Personal, provides mobile telephone service throughout Argentina via cellular and PCS networks. Personal's service offerings include:

- *Voice, data and Internet services.* Voice communications, GSM and 3G mobile communications over UMTS / HSDP / HSDPA+ networks (including high-speed mobile Internet, content and applications download, multimedia messaging, online streaming, corporate e-mail, social network access and cloud backup services); and
- *Sale of mobile communication devices* (handsets, 3G modems, and tablets).

We also provide mobile services in Paraguay through Núcleo, a subsidiary of Personal. As of December 31, 2011, Personal had approximately 18.2 million mobile subscribers in Argentina and Núcleo had approximately 2.1 million in Paraguay.

See Note 28 to our Consolidated Financial Statements and Item 5 Operating and Financial Review and Prospects Years ended December 31, 2011, 2010 and 2009 Results of Operations by Segment for additional information as to our results of operations by segment.

Table of Contents**Fixed Services**

Telecom Argentina is the principal provider of Basic telephone services in the Northern Region, and since late 1999 has also provided Basic telephone services in the Southern Region.

Since November 2000, the telecommunications sector in Argentina is completely open to competition. Our operations are subject to a complex series of laws and regulations of the Argentine government. In addition, we are subject to the supervision of the Regulatory Bodies. See Regulatory Framework Rate Regulations below.

The Argentine government has taken certain measures that have affected revenues from the services we provide. By the enactment of the Public Emergency Law since January 6, 2002, the rates charged by Telecom Argentina for fixed line services such as measured service, monthly basic charges, public telephone service, domestic, national and international long-distance, installation charges and most of supplementary services (except for lines and equipment maintenance) have been pesified (regulated services since the Transfer Date). We cannot predict when the Public Emergency Law will cease to be effective or how these or other government regulations may affect our future revenues. See Regulatory Framework Rate Regulations below and Item 5 Operating and Financial Review and Prospects Economic and Political Developments in Argentina.

On the other hand, interconnection services, data transmission, Internet services, ICT services and sale of equipment are not regulated services subject to a price cap regulation.

*Telecom Argentina's Telephone Network*

Telecom Argentina's fixed-line telephone network includes installed telephones and switchboards, a network of access lines connecting customers to exchanges and trunk lines connecting exchanges and long-distance transmission equipment. The following table illustrates the deployment of Telecom Argentina's telephone network:

	December 31, 2011	December 31, 2010	December 31, 2009	December 31, 2008	December 31, 2007
Number of installed lines (1)	4,792,530	4,688,977	4,595,043	4,442,629	4,238,542
Net lines installed (during each year)	103,553	93,934	152,414	204,087	341,905
Net lines installed cumulative (2)	3,221,566	3,118,013	3,024,079	2,871,665	2,667,578
Number of lines in service (3)	4,141,135	4,107,082	4,060,260	4,010,056	3,917,530
Net lines in service added for the year	34,053	46,822	50,204	92,526	96,124
Net lines in service added cumulative	2,739,166	2,705,113	2,658,291	2,608,087	2,515,561
Lines in service per 100 inhabitants (4)	21	21	21	21	20
Pending applications (5)	133,977	83,984	77,172	67,429	65,700
Public phones installed	40,079	44,846	50,275	58,375	70,550

- (1) Reflects total number of lines available in Switches.
- (2) Cumulative net lines installed since the Transfer Date.
- (3) Includes lines customers, own usage, public telephony and ISDN channels.
- (4) Corresponds to the Northern Region of Argentina.
- (5) Corresponds to lines requested by clients, but not yet installed.

***Revenues***

Fixed services include, among other charges, monthly basic charges, measured service charges, installation charges, public telephone services and interconnection services related to essential facilities. The rates for these charges are regulated by rules governing our license, which establish maximum prices that can be charged to clients. Telecom Argentina is able to charge prices below the maximum regulated prices as long as the discount is applied equally to clients who share the same characteristics (under the so-called principle of non-discrimination). In accordance with this ability, Telecom Argentina charges lower prices than the maximum regulated prices for certain of the services offered.

The remaining services included in the Fixed Services segment are not subject to regulation and, as a result, Telecom Argentina is able to set the corresponding rates. Market conditions limit rate increases.

Table of Contents

a) *Retail Residential and Business Customers*

*Monthly Basic Charges.* Telecom Argentina bills a monthly basic charge to its customers. The charge is based on pulses, valued at the price per pulse prevailing during the periods included in the invoice. The number of pulses varies depending on the type of customer. As of December 31, 2011 and 2010, approximately 83% of lines in service were for residential customers and public telephony and approximately 17% were for professional, commercial and government customers. Additionally, due to the regulatory regime, Telecom Argentina is obliged to offer discounts to certain retired individuals and low-consumption residential customers.

*Measured Service Charges.* In addition to a monthly basic charge, Telecom Argentina bills a monthly measured service charge from almost all of its customers which is based on telephone usage. Measured service is billed at the price per unit of time. Charges for local and domestic long-distance measured service vary with the price per unit of usage. The number of units of usage depends on the time of day, the day of the week, the distance traveled and the duration of calls. During the summer months (December through March), there is decreased consumption due to the fact that many customers are on vacation. Additionally, due to competition, Telecom Argentina offers discounts to customers mainly for domestic long-distance service as semi-flat rate plans that include a set quantity of minutes for a fixed charge.

Local minutes were approximately 11.5 billion in 2011, 12.2 billion in 2010 and 12.5 billion in 2009. During the past three years, despite increased economic activity in Argentina and the growth in our fixed line customer base, the volume of local minutes has decreased slightly due to the strong growth in mobile telephony and the resulting migration of traffic to mobile service. During 2011, revenues from local traffic continued to increase leveraged by the growth of lines with minutes included in the plan and subscription plans, despite the slight drop in traffic volume. Also, and to adjust the portfolio to customers' needs, new local calling plans were launched to lower-consumption customers.

Domestic long-distance minutes were approximately 2.8 billion in 2011 and 2.9 billion in 2010 and 2009. Ever since the Northern Region was opened to competition in 1997, Telecom Argentina has maintained its position as the regional market leader for domestic long-distance traffic. During 2011, deploying a similar strategy to that which was adopted for local traffic, we maintained sales of targeted and selective flat-rate plans positioned to maintain average revenues generated by customers.

In the year ended December 31, 2011 and 2010, approximately 80% of measured service revenue was generated by residential and professional customers, and approximately 20% was generated by business and government customers.

*International Long-Distance Service.* International long-distance traffic minutes increased to 156 million in 2011 from 145 million in 2010, mainly due to an increase in the MOU (Minutes of Use) of residential customers, while in 2010 it had decreased from 151 million in 2009. The decrease in 2010 was mainly due to strong competition and the introduction of VoIP.

Since 1992, international rates have been reduced annually as a consequence of the application of the Price Cap described in Regulatory Framework Rate Regulations Price Cap. Telecom Argentina also has reduced international long-distance rates in order to compete with the new providers of long-distance calling services.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

*Installation Charges.* Revenues from installation charges consist primarily of fees levied for installation of new fixed lines. Telecom Argentina offers discounts in multiple localities to reduce the rate authorized by the government, with the aim of stimulating demand in those areas. The penetration of fixed-line telephony has continued to demonstrate a slow growth in Argentina, whereas it is decreasing in various other parts of the world.

*Public Telephone Services.* As of December 31, 2011, there were 40,079 public lines installed of which 2,942 are in the Southern Region. Local and domestic long-distance traffic experienced a systematic reduction as a result of a strong development in the mobile industry in Argentina. As a result, public telephony traffic for 2011 fell to 202 million compared to 247 million minutes for 2010 and to 300 million minutes for 2009. The traffic in domestic long-distance public telephony was 120 million minutes for 2011, 139 million minutes for 2010 and 150 million minutes for 2009. The traffic in international long-distance public telephony has experienced a slight increase in 2011 growing to 70 million minutes from 68 million in 2010 and 67 million minutes in 2009.

Table of Contents

*Other National Telephone Services.* Telecom Argentina provides dedicated lines to businesses. Dedicated lines are dedicated point-to-point leased lines. In addition to installation fees, Telecom Argentina receives revenues from dedicated analog urban/inter-urban lines. These revenues are calculated according to the price for long-distance codes of urban/interurban calls. Additionally, other national telephone services include charges for supplementary services (such as call waiting, call forwarding, conference calls, caller ID, voicemail and itemized billing).

*Data Transmission Services.* The data services business includes nationwide data transmission services, virtual private networks, symmetric Internet access, national and international signal transport and videoconferencing services. These services are provided mainly to corporations and governmental agencies. Telecom Argentina also provides certain Value Added Services, including electronic standard documents telecommunication software exchange and fax storage and delivery service. The data services business also includes the lease of networks to other providers, telecommunications consulting services, operation and maintenance of telecommunications systems, supply of telecommunications equipment and provision of related services. Corporate data transmission services are provided mainly through frame relay and ATM networks.

During 2011, we maintained our focus on ICT solutions and the sale of data services and dedicated Internet accesses. This strategy is supported by the World Class multi-site network of Datacenters focused on communications, with over 7,000 square meters used to keep computer technology services throughout Argentina. Through this infrastructure, we offer a broad services portfolio including dedicated hosting and housing, connectivity, cloud services which enable our customers to optimize their costs by increasing the security of their information and avoiding hardware and software obsolescence issues. All the services are provided with support, security, connectivity and the ability to engage further management, professional, monitoring, storage and backup services.

In addition, we continued making additional investments at the major data center in Pacheco, consolidating its position as leader in the market and enhancing the level of services supplied. Such investments will enable Telecom Argentina to support business growth in the next few years with the highest market standards.

*Internet.* Telecom Argentina has been providing residential Internet services under the brand name Arnet since 1998. Telecom Argentina mainly offers this service in the major cities of Argentina. In recent years, Telecom Argentina's Internet service has experienced higher demand and usage in less populated areas of the country. The Internet services include access, Arnet service and Dial-Up. However, during the past several years we have seen a constant decrease in Dial-Up access that has been more than offset by increased Broadband accesses. As a result, Dial-up access represents a marginal percentage of Telecom Argentina's revenues.

The following table illustrates the evolution of Internet services:

	<b>2011</b>	<b>December 31, 2010</b>	<b>2009</b>
Fixed access lines (1)	1,550,000	1,380,000	1,214,000
Arnet subscribers (2)	1,540,000	1,377,000	1,184,000

---

(1) Includes accesses in the Northern Region and the Southern Region. Accesses refer to connections to Internet services offered by Telecom Argentina.

(2) Includes Arnet GO and Mobile Arnet services. Arnet subscribers refer to customers to which Telecom Argentina provides Internet service.

The market for Broadband has experienced significant growth in 2009, 2010 and 2011 throughout the country, increasing 16%, 17% and 15%, respectively. Broadband can be delivered through three technologies: cable modem, ADSL and mobile; cable modem and ADSL being the most widely used. In the local market, ADSL connections exceeded the number of cable modem and mobile connections. Telecom Argentina markets its ADSL service through its Arnet brand and in partnership with other ISPs.

During the last four years, Telecom Argentina continued to increase its customer base in line with or exceeding the market's expansion. As of December 31, 2011, we reached approximately 1.6 million accesses. During 2011, our efforts to communicate effectively with our customers and special offers with competitive prices according to segment helped us to maintain the leadership of our products under the brand Arnet.

Table of Contents

In November 2011, we launched a value-added broadband access service called Arnet Play , the first video streaming service for residential customers of Telecom Argentina. The service provides customers, through the payment of a monthly fee, the ability to access a vast library of content. Another important value-added service introduced in 2011 was Arnet Móvil, which provides access to Internet through the Personal 3G network. This service is aimed to broaden the service already offered to customers with a fixed broadband connection.

In December 2011, with the launch of 10 mega Arnet , the portfolio of access speeds available was expanded, creating a new alternative in terms of average speed.

Internet revenues include both Internet access services and the provision of Internet service.

A small portion of Internet access services is provided by Telecom Argentina s 0610, 0611 and 0612 services. The 0610 service is provided at rates reflecting up to a 30% discount compared to regular urban rates for connections lasting 30 minutes, depending on the time and day of the connection. After the implementation of an agreement reached with the Argentine government, by the end of fiscal year 2009, Telecom Argentina offered Internet dial-up access to 100% of the users of fixed lines located in its coverage region. Although Internet dial-up service represents a marginal percentage of Telecom Argentina s revenues, we continue to provide this service to a small market where Broadband service is not available.

*b) Corporate Customers*

The large customer segment includes leading companies in the Argentine market as well as the National Government, Provincial Governments and Municipalities. These customers demand cutting-edge technology and solutions tailored to their needs, including voice, data, Internet and Value-Added services.

As response to the constant changes demanded by the market, Telecom Argentina maintained its strategy to position itself as the integrated provider for large customers through the offer of convergence ICT solutions, including fixed and mobile voice, data, Internet, multimedia, ICT, datacenter and application services through a sales consulting management and specialized and targeted post-sale customer services.

The main solutions and businesses developed during 2011 included:

- implementing and deploying an integrated core communication system accessing mobile radios for individual safety in the City of Buenos Aires;
- implementing a hospital management system connecting several health care centers in the province of Salta,

- developing virtual desks and servers to implement internal IT solutions on a comprehensively virtualized platform for a multinational information technology company; and
- implementing a solution that consists of installing, training and maintaining an innovative digital billboard system for the major airport in Argentina.

Additionally, the following projects have been carried out and are expected to be completed in 2012:

- entering into a contract to control content in the country-wide school connectivity program;
- entering into a contract to control access to soccer stadiums;
- entering into a contract to supply, install and maintain a comprehensive 911 public safety; and system in the city of Paraná.

*c) Wholesale*

*Interconnection Revenues.* Telecom Argentina collects fees from other operators for interconnection services. These fees primarily include local access, termination and long-distance transport of calls, rentals of network capacity and commissions calling party pays fees. These fees are payable by mobile operators as well as fixed-line operators.

Table of Contents

Additionally, Telecom Argentina remained one of the leading providers of wholesale telecommunications solutions for various fixed and mobile operators, independent operators, local operators, public telephony licensees, cable operators, ISP, TV and radio channels, production companies and other service providers. The services marketed by Telecom Argentina include, among others, traffic and interconnection resources, third-party billing, dedicated Internet access services, transport of video signals in standard definition and high definition, streaming audio and video, dedicated links, backhaul links for mobile operators, Internet Protocol Virtual Private Network and data center hosting services.

Telecom Argentina continued to strengthen its position as a provider of solutions for the broadcasting segment by offering transportation solutions for audio and video signals both as dedicated private links and on the Internet. We provided solutions to cable operators and TV channels for the distribution of video signals. During 2011, we continued to increase the number of clients connected to Telecom Argentina's video matrix located in the city of Buenos Aires. In 2011, Telecom Argentina provided the national and international video signal transport in standard and high definition for Latin America's Football Cup. The transport of video signals covered twenty-six calendar days and was distributed to several Argentine channels and producers.

*International Long-Distance Service.* Telecom Argentina holds a non-expiring license to provide international telecommunications services in Argentina, including voice and data services and international point-to-point leased circuits.

Revenues from wholesale international long-distance service reflect payments under bilateral agreements between Telecom Argentina and foreign telecommunications carriers, covering virtually all international long-distance calls into or out of Argentina using our network. Revenues from international long-distance service therefore consist mainly of:

- amounts earned from foreign telecommunications carriers for connection to the Argentine telephone network;
- bandwidth capacity under an Indefeasible Right of Use ( IRU ) basis;
- international point-to-point leased circuits; and
- international data services.

Operating revenues from international long-distance service depend on the volume of traffic, the rates charged to local customers and the rates charged by each party under agreements between the Argentine provider and foreign telecommunications carriers. Settlements among carriers are usually made on a net basis. Incoming traffic with carriers measured in minutes accounted for 727 million in 2011, 607 million minutes in 2010 and 643 million minutes in 2009.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Telecom Argentina is connected to international telecommunications networks mainly through the following submarine Fiber Optic cables: Unisur (Argentina Brazil Uruguay), Americas 2 (USA), Columbus 3 (Europe), Atlantis 2 (Brazil Europe), Sea-Me-We (Europe Asia), Latin American Nautilus (LAN), a company of the Telecom Italia Group, and other minor cables.

In order to meet the growth in our Internet access base, Telecom Argentina has acquired several IRUs on a submarine facility of Latin America Nautilus (LAN) (a subsidiary of Telecom Italia), which connects Argentina with the U.S. (Miami) in a submarine fiber optic ring. These rights, which last for 15 years, allow the interconnection of the IP backbone of Telecom Argentina with IP Transit providers in the U.S.

Through our wholly owned subsidiary in the United States, Telecom Argentina USA, Inc., a corporation organized under the laws of the State of Delaware, we were granted an FCC 214 license by the Federal Communications Commission, or the FCC, which allows us to provide international long-distance telecommunications services in the United States. Telecom Argentina USA, routes the majority of its traffic through its own switching capabilities. Its business, at the moment, is focused mainly on wholesale long-distance international traffic. Additionally, it serves the retail market through sales of prepaid cards and A.N.I. recognition services (a technology similar to caller ID that allows customer identification of a particular prepaid card). In 2011, Telecom Argentina USA, Inc., began to operate a node of high-definition video in Miami, thus extending the Telecom video matrix to the international market. This development has allowed the first international video transmissions in high definition to U.S. broadcasters during the 2011 Latin America s

Table of Contents

Football Cup held in Argentina. This node also presents future opportunities for video transmission of international events.

*Network and Equipment*

In line with the previous years, coverage, capacity, quality and availability have been the focus of the development of our network strategy in 2011.

Within this context, we continued the deployment of fiber optic connections to ensure that Broadband availability in each city satisfies our customers' increasing demands. By the end of 2011, over 93% of our customers were served through premises interconnected by fiber optic networks, which ensure a lower cost per bit and increase future availability, based upon adding new electronic equipment. For 7% of our customers in small areas where fiber optic service is not available, we provided them with high-capacity SDH radio links and used the new adaptive modulation IP radios, which permits Ethernet connectivity.

We continued our strategy of having a single transmission backbone for the fixed, mobile, Broadband and mobile Internet and corporate connectivity services. Also, we continued to deploy DWDM on the national long-distance network as the main supplier of transmission capacity in order to avoid the use of SDH equipment. This reduces the number of layers and keeps the network as simple as practicable to address the existing Ethernet flows on DWDM and release existing SDH capacity.

With regard to the fixed access network, we have identified two overlapping needs: (i) the need to maintain 100% digitalized TDM lines in operational status, in coordination with the deployment of NGN networks to satisfy the demand for new lines and (ii) the need to reach customers' homes with an increasingly higher capacity. In order to ensure proper TDM equipment operation, we continued with a Service Level Agreement (SLA) with the TDM technology providers, which expire in 2015.

Over 23% of our active customers use NGN technology, which enables us to attend to the demand for new voice services.

In response to our customers' need for more bandwidth, we implemented a plan to shorten the loop, which consists of installing outdoor cabinets with the capability to provide services consistent with the competitive Broadband market. Shortening the loop is a strategic project for Telecom Argentina, as it will provide fixed Broadband customers with world-class performance services, positioning Arnet among the best suppliers in the market. This project not only enhances current Broadband capacity, but also allows us to provide customers with fiber optic technology at even greater speeds. Additionally, it will allow us to offer value-added services that will require greater bandwidth, such as high-definition videos available from the Arnet Play portfolio. Also, the FTTC strategy has continued in areas with saturated copper cabinets and the FTTB strategy has continued in certain major buildings. During 2011, we installed the first building with FTTH.

Beginning in 2012, our strategy will be to provide FTTB for most new buildings and FTTC/FTTH for new neighborhoods to satisfy the demand for higher Internet access speed, which is expected to develop in the near future.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

In 2011 we installed the first multiservice network node in the Buenos Aires Metropolitan Area, which includes MPLS-TP technology and enables the same connection site to provide various services with high-capacity levels.

During 2011, we continued to replace the main Backbone IP nodes in Argentine provinces with new-generation nodes. As a result, smaller-capacity nodes were moved to the network's periphery, allowing Telecom Argentina to meet the growing needs of present and future systems. In addition, we have completed the work to connect every provincial capital in the original exclusive zone to the secured Fiber Optic rings.

Regarding operations, MPM continued to be implemented on the access network. When a cabinet area needs to be restored due to its high claim rate, MPM helps maintain the improvements achieved over time. In 2011, about 1,500 areas were restored, reaching a cumulative 4,000 restored areas using all the restoration methodologies available.

Work also continued to replace telephone posts. We intend to replace all older posts in the next five years.

Table of Contents

**Personal Mobile Services and Núcleo Mobile Services**

We provide mobile services via cellular and PCS networks through our subsidiaries in Argentina and Paraguay.

***Mobile Telecommunication Services in Argentina Personal***

The market for mobile telecommunications services in Argentina is characterized by rapid growth and intense competition. Operators are generally free from regulation to determine the pricing of services, with the limited exception of calling party pays ( CPP ) charges for termination of calls originating on a fixed line network. See Regulatory Framework Other Regulatory Regulations Calling Party Pays CPP. There are currently three mobile operators offering nationwide service. The penetration of mobile service in Argentina has increased from approximately 117.7% of the population as of December 31, 2009, to approximately 126.7% in 2010 and to 134.2% in 2011, respectively. This information regarding penetration of mobile service is an estimate, as there are no official statistics published in Argentina.

Service providers in Argentina are making significant capital expenditures in new network infrastructure for the deployment of 3G technology, which allows for the higher transmission speeds required for Value Added Services such as data transfer, video calling and Internet browsing.

Our mobile telecommunications services in Argentina are provided through our subsidiary, Personal. We provide mobile services throughout Argentina via STM, SRMC and PCS networks. Personal utilizes GSM and 3G technologies in its networks and primarily offers its services of STM and SRMC services on the 850 MHz frequency band and PCS service on the 1900 MHz frequency band.

Personal's business is growing rapidly. From December 31, 2010, to December 31, 2011, its subscriber base in Argentina grew approximately 11%. As of December 31, 2011, Personal had approximately 18.2 million subscribers compared to approximately 16.3 million subscribers as of December 31, 2010, and approximately 14.5 million subscribers as of December 31, 2009.

a) *Residential and Business Customers*

Personal subscribers are offered a variety of flexible pricing options for mobile services. These options include prepaid, post-paid and mixed plans.

*Prepaid Plans.* Under prepaid plans, the subscriber pays in advance for telephone calls and Value Added Services using a prepaid card. When the card runs out of credit, the subscriber can recharge the prepaid card using a prepaid system or can purchase virtual prepaid phone cards on Personal's website, by phone, at ATMs and drugstores, or through authorized agents. Since there are no monthly bills, prepaid plans allow subscribers to communicate with maximum flexibility while maintaining control over their consumption. A subscriber can add credit to the card and make and receive local, national and international calls.

*Post-Paid Plans.* Personal offers a National Flat Rate post-paid plan and a Local Flat Rate post-paid plan. Post-paid plans include caller ID, voicemail and a personalized greeting, call forwarding, data services, a multimedia personalized greeting, telephone technical support and call waiting. The plans deploy Personal Digital Invoicing, enabling subscribers to view, download and print their invoices from the web. Depending on the plan, and the monthly fee, they might include Value Added Services such as social network access, e-mail or data allowance for browsing the Internet, as well as specific contacts (on-net numbers) that can be contact by voice or SMS for free.

Under both plans, a subscriber pays a monthly bill consisting of a monthly user fee plus Value Added Services and a charge for minutes used in excess of the amount included in the plan. These plans generally offer a specified number of free minutes per month. Once the free minutes have been used, the subscriber can continue using the mobile service at a set price per minute. The charges for additional minutes will be added to the next month's bill. Under the National Flat Rate Plan, a subscriber can make calls to and from any location within Argentina at a constant rate because the per minute rate includes the local public network, national long-distance and national roaming. Under the Local Flat Rate Plan, where the per minute rate includes the Local Public Network and Roaming, a subscriber can make local calls within any locality in the country but calls from one locality to another are charged at an extra rate.

Table of Contents

*Mixed Plans ( Cuentas Claras )*. Under the *Cuentas Claras* plans, a subscriber pays a set monthly bill and, once the contract minutes per month have been used, the subscriber can obtain additional credit by recharging the phone card through the prepaid system. Under this plan, a subscriber can use its monthly minutes or its pre-paid credits for Value Added Services, such as social network access, e-mail or data allowance for browsing the Internet, as well as specific contacts (on-net numbers) that can be contacted by voice or SMS on a free basis.

The following table presents information regarding Personal's post-paid, prepaid, *Cuentas Claras* and total mobile subscriber bases for the periods indicated:

	2011		As of December 31, 2010		2009	
		% of Total		% of Total		% of Total
<u>Mobile subscribers:(1)</u>						
Prepaid	12,414,000	68.2	11,426,000	70.0	10,051,000	69.5
Post-paid	2,640,000	14.5	2,111,000	12.9	1,715,000	11.8
<i>Cuentas Claras</i>	3,139,000	17.3	2,796,000	17.1	2,709,000	18.7
Total	18,193,000	100.0	16,333,000	100.0	14,475,000	100.0

(1) Mobile subscribers mean total registered and active mobile subscribers at the end of the relevant period. An active mobile subscriber is a mobile subscriber who made or received three phone calls within the last 90 days of such relevant period.

*New products and services*. Personal continued to deepen its strategy of innovation and leadership with the launch of various products, promotions and benefits to meet the diverse communication needs of different types of customers. The consolidation of third-generation coverage (3G and HSPA+), together with the evolution of Value Added Services powered by smartphones and tablets, defined the kind of offers developed over 2011.

Regarding innovation, the presentation of a new mobile Internet offer called Internet P\$1 per day allowed an 80% increase in the number of Personal's customers who access the Internet through their mobile devices for a fixed charge per day. Another relevant development was the launch of *SIM Facebook* before a similar launch by any other operator worldwide. *SIM Facebook* enables Personal's customers to access social networks through its handsets, regardless of the device or the plan they have.

Personal continued to expand its *Todo Incluido* plans, which include free voice minutes, SMS and data transmission, along with Personal Black, the premium customer care service platform for mobile subscribers in Argentina. For a fixed rate, the plan includes unlimited data services, a portfolio of exclusive smartphones at discounted prices and additional preferential benefits. As a result of this strategy, one in two smartphones sold in the Argentine market is Personal.

In 2011, Personal also increased the granting of benefits in recharges and service packages for its customers, as well as special benefits for Club Personal members repositioning Personal in terms of convenience.

Personal's ARPU was approximately P\$51 per month for 2011 and P\$44 per month for 2010.

b) *Wholesale*

*International Business.* During 2011, Personal continued to expand roaming data coverage to provide better 3G coverage to its customers. We entered into over 242 data agreements (GPRS/EDGE) reaching over than 110 3G launchings of a total of 288 international roaming agreements, which provide service in 155 countries.

With the main purpose of increasing the number of destinations reached by the international roaming service, a roaming Hub was engaged, which facilitated the process of integration to about 60 new destinations.

Finally, Personal expanded the destinations reached by international SMS, via SMS Hub, to ensure both the delivery and reception of messages. This solution benefited over 200,000 customers using the service. With regard to coverage growth in 2011, our clients can use services in over 150 countries, and in 20 of them they can benefit from full coverage, with integrated message exchange on both GSM and CDMA technology.

Table of Contents

*Domestic Business.* During 2011, Personal continued to strengthen its relationship with operators and suppliers of telecommunication services, Cooperatives Federations and clearing house services suppliers (information distribution centers). We continued to renew expired contracts with existing operators of such services with positive impact in our business due to the recovery of a historic number of bad debts since certain Cooperatives paid their overdue debts in the negotiation process.

In 2011, Personal also negotiated space on the Buenos Aires subway network and added other significant sites to improve the service provision.

In addition, Personal expanded agreements with other operators of resources and facilities, who contributed to the development of our mobile network, with a positive effect in the quality and quantity of the services offered to its customers. Such resources and facilities include data link and transmission, interconnection resources, origination, termination, minute transport, site leases and domestic roaming.

***Personal's Network and Equipment***

Personal is the operator of mobile networks at a national level, and uses world-class technology providing GSM and third-generation services.

Personal's network infrastructure supplements the infrastructure of Telecom Argentina's fixed network. Therefore, the development strategy for Personal's network aims to maximize the synergies of investments of the Telecom Group as an integrated operator group (both fixed and mobile).

To this end, Personal's radio access network is supported by a regional transmission network that is shared with the fixed telephony business. To the extent possible, the switching core shares the facilities with other switches in the Telecom Group, and all data services are supported by the public backbone of the Group.

The coverage of this access network is constantly undergoing improvements in breadth, depth and capacity. Improvements in breadth address the number of cities covered; improvements in depth address continuity of coverage, and lastly, improvements in capacity address strategies to meet simultaneous customer demands. In order to continuously guide this process, Personal measures relevant parameters and benchmarks its network against those of its competitors.

By the end of 2011, we had over 2,900 2G network radio access bases distributed throughout the country. The 2G network continued growing primarily in terms of capacity to accompany the increase in customer traffic, especially the increase in data traffic as a result of various marketing actions.

We continued to deploy a 3G access network that enables a general roll-out of mobile Internet services. This network operates in coordination with our GSM accessibility and is tailored to provide customers with adequate resources for the type of services it demands. As of December 31, 2011 there were more than 2,400 new-generation access nodes installed.

During 2011, a plan was instituted to modernize equipment in the mobile network through a technological swap that enables GSM and 3G equipment to be replaced by equipment consistent with both technologies, which can be further upgraded to a new version with LTE technology using an specific software.

The capacity increase required to satisfy the growing demand for mobile bandwidth in 2011, and the bandwidth that will have to be attended to in 2012, is based on a substantial increase in the number of radio base sites, and on the implementation of six sectors technology, an innovative technology that allows a more effective use of the spectrum. In order to ensure bandwidth availability to address current and future needs, our strategy is to maximize the display of fiber optic to the radio bases.

With regards to the core network, we consolidated the migration to a split or distributed architecture. This migration and network redistribution will lower Personal's transmission costs and improve its awareness of service availability in areas distant from the switching equipment, which were previously monolithic. This also provides a convergent core network for GSM or 3G services and ensures the future benefit of the investments made.

Table of Contents

As to the operation, the MPM began to be used on the mobile network. During 2011, the MPM was used on ten sites throughout the country, with an increase in radio base availability. The expansion process is expected to begin in 2012.

Also, Personal's mobile network began to be deployed based on the use of sites with low height, on posts of Telecom Argentina or third parties, or on urban roofs. This allows Personal to make a substantial improvement in the use of tower structures commonly used to deploy mobile networks (by shortening the height of the facilities needed on the post, and also optimizing the capillarity and reach of the B nodes).

***Mobile Telecommunications Services in Paraguay Núcleo***

We provide nationwide mobile telecommunications services in Paraguay through our subsidiary, Núcleo, under the commercial name of Personal. Núcleo is 67.5% owned by Personal and 32.5% owned by ABC Telecomunicaciones S.A., a Paraguayan corporation. Núcleo has been granted licenses to provide commercial mobile services, Internet access and videoconference and data transmission services in Paraguay.

The market for mobile telecommunications services in Paraguay continued experiencing a significant level of competition in 2011 due to aggressive rate competition, new product and service launches, and marketing promotions. As of December 31, 2011, Núcleo had approximately a 32% share of the market for mobile telecommunications services in Paraguay (an increase of 2% compared to 2010). The subscriber base for its core mobile services increased 15% as compared to the previous year. As of December 31, 2011, Núcleo had 1,792,000 pre-paid subscribers, 220,000 subscribers with the service plan Control Plan and 129,000 post-paid subscribers.

During 2011, Núcleo focused its offers and promotions in obtaining a better perception of its prices in the market. To satisfy the needs of its customer base with more alternatives, Núcleo migrated from an offer of unlimited packages to more varied and accessible packages as a way of maintaining a positive perception by its customers.

New customer care channels were put in place such as mail, SMS, chat and social networks (Facebook, Twitter, Google+, Foursquare and YouTube).

In addition, Núcleo consolidated its brand for retail customers, highlighting closeness, youth and convenience and continued to be the leader in preference among the young segment.

Also, Núcleo achieved leadership in mobile Internet reaching more than 50% of the market's top of mind, based on speed and mobility attributes.

***Núcleo's Network and Equipment***

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

During 2011, Núcleo commissioned 36 new cell sites in four departments in Paraguay, adding 68 new locations to its GSM network. As a result, Núcleo became the leader in coverage in the western region of Paraguay. Further to these sites, in 2011, Núcleo installed another 43 sites in different regions in Paraguay, finishing 2011 with an increase of 20% in the number of cell sites installed.

With regard to its 3G network, in 2011, Núcleo commissioned 158 B nodes, representing an increase of 53% in the number of B nodes in the 3G network compared to 2010. Also, Núcleo has doubled the browsing bandwidth from 5 Mhz to 10 Mhz, with connection speeds in excess of 1 Mbps.

Also in 2011, Núcleo continued expanding the circuit core and the package core, updating hardware and software of all the nodes in Asunción and Ciudad del Este and commissioning two new controllers in the Northern area and in Asunción which enabled Núcleo to meet the data traffic increase experienced by its 3G network.

Finally, in relation to Value-Added Services, Núcleo updated and expanded all its service platforms, especially by implementing the second *SMS Gateway* (the platform that controls SMS interconnection so they can be sent to and received from other operators and service providers), resulting in ensuring and providing SMS traffic redundancy outside the network. Also, Núcleo performed adjustments and migrations in the nodes controlling network signal traffic, which saved 30% of the processing capacity for this type of traffic, which is highly sensitive to the data growth experienced by the network in the last few years.

Table of Contents

**Competition**

*Fixed Services*

*Basic Telephony and International Long-Distance Services.* Before November 1999, Telecom Argentina held an exclusive license to provide Basic telephone services to the Northern Region. The Argentine telecommunications market has been open to full competition since November 2000. As of the date of this Annual Report, the main licensees providing local and/or fixed long-distance telephone service are Techtel (commercially known as Telmex), Telephone2, Impsat (commercially known as Global Crossing), IPlan, Comsat, Telecentro, Telefónica (principally in the Southern Region) and Telecom Argentina (principally in the Northern Region). Telefónica has the dominant market share for provision of telecommunications service in the Southern Region. Some of these competitors may be better capitalized than us and have substantial telecommunications experience. Accordingly, if economic conditions in Argentina improve and competitors increase their presence in the Northern Region, Telecom Argentina expects that it will face additional pressure on the rates it charges for its services and experience limited loss in market share in the Northern Region.

*Internet and Data Services.* We face nationwide competition in the Internet service market in Argentina from Telefónica, Netizen, Gigared, UOL, Cablevisión (Fibertel) and Telecentro (providing a triple-play offer), among others. Our data services business faces competition from Telefónica, Comsat, Grupo Telmex Argentina and from several providers of niche data services such as Impsat, IPlan and others.

*Mobile Telecommunications Services*

*Mobile Telecommunications Services in Argentina.* The mobile telecommunications market in Argentina has been open to competition since 1993 and was expanded to include PCS services in 1999. During recent years, GSM technology has created intense competition for subscribers among the various service providers, including giving rise to severe pricing pressure, significant handset subsidies and increased sales incentives provided to dealers. The introduction of 3G technology since May 2008 has allowed operators to focus competition on Value Added Services.

Currently, there are three operators providing nationwide mobile telecommunications services. These three operators are Personal, Telefónica Móviles Argentina and América Móvil. Nextel competes on a limited level, offering trunking telephony services in Buenos Aires and selected cities in the interior, in addition to offering mobile telecommunication services in those cities.

América Móvil, operating in Argentina under the trade name Claro (formerly CTI), is one of the country's largest mobile operators in terms of number of subscribers and has provided STM cellular services in the Northern and Southern Regions outside of the AMBA since 1994 through the 850 MHz band (25 MHz in each region). Claro also holds a 40 MHz license for its PCS services in the AMBA and a 20 MHz license for PCS in each of the Northern and Southern Regions.

Telefónica Móviles, operating in Argentina under the trade name Movistar, is another of the largest mobile operators in Argentina in terms of number of subscribers. Movistar is the result of Telefónica's merger of Unifón and Movicom in 2005. Movistar operates in the AMBA through the 850 MHz band with a total of 37.5 MHz (25 MHz + 12.5 MHz), and a total of 50 MHz (20 MHz + 30 MHz) for PCS. It also holds a total of

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

80 MHz (40 MHz + 40 MHz) for its PCS licenses for the Northern Region, and a total of 60 MHz (20 MHz + 40 MHz) for its PCS license in the Southern Region. This Southern Region is Unifon's original service area, where it also holds a 25 MHz license for STM. The economic concentration that resulted from Unifon and Movicom's merger exceeded the maximum limit of the 50 MHz of spectrum assignment (for the services of STM-SRMC-PCS and SRCE) permitted by Article 4 of the Annex to Article 1 of Decree 266/1998. In Regulation No. 343/05, regulatory authorities approved the merger on the condition that the resulting entity decreases its spectrum holdings to the permitted levels in accordance with a schedule ending at year-end 2008. Movistar has completed the required decrease in its spectrum.

Nextel Argentina provides trunking telephony services in Buenos Aires. Nextel Argentina's service currently focuses on business subscribers in the principal cities of Argentina.

With the introduction of Number Portability in 2012, competition is expected to intensify. The acquisition and retention of high-value customers will continue to be a key factor to Personal's strategy, which will be

Table of Contents

focused on maintaining customer's consumption through the launch of new products and services that will enable retention of existing customers and take advantage of the opportunities that Number Portability is expected to generate.

See Regulatory Framework Regulatory Environment Decree No. 764/00 for a description of Number Portability and also Regulatory Framework Other Regulatory Regulations Regulations Applicable to PCS Services for additional details on Personal's license.

*Mobile Telecommunications Services in Paraguay.* Currently, there are four participants in the mobile telecommunications services market in Paraguay. As of December 31, 2011, Nucleo's major competitor was Telefónica Celular del Paraguay S.A. (a Millicom International Cellular subsidiary).

## **REGULATORY FRAMEWORK**

### **Regulatory Bodies and General Legal Framework**

Telecom Argentina and Personal operate in a regulated industry. Regulation not only covers rates and service terms, but also the terms on which various licensing and technical requirements are imposed.

The activities of Telecom Argentina and Personal are supervised and controlled by the CNC, a governmental agency under the supervision of the SC (which is presently supervised by the Ministry of Federal Planning, Public Investments and Services). The CNC is in charge of general oversight and supervision of telecommunications services. The SC has the power to develop, suggest and implement policies, which are applicable to telecommunications services, to ensure that these policies are applied, to review the applicable legal regulatory framework, to act as the enforcing authority with respect to the laws governing the relevant activities, to approve major technical plans and to resolve administrative appeals filed against CNC resolutions.

The principal features of the regulatory framework in Argentina have been created by:

- the Privatization Regulations, including the List of Conditions;
- the Transfer Agreement;
- the Licenses granted to Telecom Argentina and its subsidiaries;

- the Rate Agreements; and
- various governmental decrees, including Decree No. 764/00, establishing the regulatory framework for licenses, interconnection, universal service and radio spectrum management.

Núcleo, Personal is Paraguayan controlled company, is supervised by the Comisión Nacional de Telecomunicaciones de Paraguay, the National Communications Commission of Paraguay ( CONATEL ). Telecom Argentina USA, Telecom Argentina is subsidiary, is supervised by the Federal Communications Commission ( FCC ).

**Licenses granted as of December 31, 2011**

As of December 31, 2011, Telecom Argentina has been granted the following non-expiring licenses to provide the following services in Argentina:

- local fixed telephony;
- public telephony;
- domestic and international long-distance telephony;
- domestic and international point-to-point link services;
- domestic and international telex services;

Table of Contents

- Value Added Services, data transmission, videoconferencing and transportation of audio and video signals; and
- Internet access.

As of December 31, 2011, the Company's subsidiaries have been granted the following licenses:

- Personal has been granted a non-exclusive, non-expiring license to provide mobile telecommunication services (STM) in the Northern Region of Argentina and data transmission and Value Added Services throughout the country. In addition, Personal owns licenses to provide mobile radio communication services (SRMC) in the Federal District and Greater Buenos Aires areas, as well as a non-expiring license to provide PCS services throughout the country, and it is registered to provide national and international long-distance telephone services; and
- Núcleo has been granted a renewable five-year period license to provide mobile telecommunication services (STM) in Paraguay as well as PCS services in certain areas of that country. In addition, Núcleo has been granted a five-year renewable license to provide Internet services, data transmission and videoconferencing throughout the country.

**Revocation of the License**

Telecom Argentina's license is revocable in the case of non-compliance with certain obligations, including but not limited to:

- an interruption of all or a substantial portion of service;
- a modification of corporate purpose or change of domicile to a jurisdiction outside Argentina;
- a sale or transfer of the license to third parties without prior approval of the Regulatory Bodies;
- any sale, encumbrance or transfer of assets which has the effect of reducing services supplied without the prior approval of the Regulatory Bodies;

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

- a reduction of ownership of Nortel in the capital stock of Telecom Argentina to less than 51%, or the reduction of ownership of Sofora in the capital stock with voting power of Nortel to less than 51%, in either case without prior approval of the Regulatory Bodies;
- any transfer of shares resulting in a direct or indirect loss of control in Telecom Argentina without prior approval of the Regulatory Bodies; and
- a bankruptcy of Telecom Argentina.

Personal s licenses are revocable in case of non-compliance with certain obligations, including but not limited to:

- repeated interruptions of Personal s services;
- any transfer of the license and/or the related rights and obligations, without the prior approval of the Regulatory Authority;
- any encumbrance of the license;
- any voluntary insolvency proceedings or bankruptcy of Personal; and
- a liquidation or dissolution of Personal, without the prior approval of the Regulatory Authority.

Núcleo s licenses are revocable mainly in the case of:

- repeated interruptions of the services;
- any voluntary insolvency proceedings or bankruptcy of Núcleo; and
- non-compliance with certain obligations.

Table of Contents

**Liberalization of the Argentine Telecommunications Industry**

In March 1998, the Argentine government issued Decree No. 264/98, introducing a plan for the liberalization of the Argentine telecommunications industry, or the Plan. Decree No. 264/98 provided for the extension of the period of exclusivity with respect to the provision of Basic telephone services until sometime between October 8, 1999, and November 8, 1999, depending on the particular region. The Plan also provided for: (i) the immediate liberalization of paid telephone services and (ii) during July 1998, the liberalization of telephone service in rural areas. In addition, the Plan contemplated that in January 1999, data transmission services within the countries included in Mercosur would be open to competition, subject to the following conditions: (i) each of the Mercosur countries enters into agreements providing for the liberalization of these services and establishing similar regulatory bodies and (ii) reciprocity exists between countries with respect to the granting of licenses. Finally, the full liberalization of local, domestic and international long-distance services took place in November 2000. See Decree No. 764/00 below. Beginning in late 1999, two new operators, formed by independent operators, mobile operators and cable television operators were permitted to offer services. These new operators, together with the existing licensees of Basic telephone services, allowed customers to choose from four operators until the full liberalization of services occurred. The Plan also granted data transmission operators existing before the privatization of ENTel the right to operate domestic and international long-distance services by the end of 2000.

During the Transition Period (1998-1999), new regulatory obligations were also introduced with respect to quality and service targets applicable to both Telecom Argentina and Telefónica. For example, all localities with more than 80 inhabitants had to be incorporated into the network by means of the installation of semi-public long-distance services and all localities with more than 500 inhabitants had to be incorporated into the residential network by means of fixed-line or mobile services. During the Transition Period, 640,000 new lines had to be installed, of which 15% of these new lines were required to be installed for customers in suburban areas; 19,000 new public telephones had to be added to the existing network (50% of which are to be coin-operated telephones), and 2,000 telephones were required to be installed in low-income areas.

As long-distance services were liberalized, competition was introduced by Pre-subscription of Long-Distance Service for locations with more than 5,000 clients. Following the introduction of Presubscription of Long-Distance Service, a call-by-call selection service will be installed. These requirements obligate the telephone companies to make significant investments and modifications to their networks.

During 1999, competition in local, national and international long-distance services was established among Telecom Argentina and Telefónica and Compañía Telefónica del Plata (CTP, Movicom Bell South) and Compañía de Telecomunicaciones Integrales S.A. (CTI, now Claro), the two new national operators permitted to offer services by Decree No. 264/98. Some provisions of Decree No. 264/98 and related resolutions were modified by Decree No. 764/00, mainly provisions related to licensing conditions, interconnection and Universal Service. Decree No. 764/00 established the general regulation of licenses and provided that each licensed company was allowed to launch its services in November 2000 when the full liberalization of the telecommunications market began. As of the date of this Annual Report, the main licensees providing local and/or fixed long-distance telephone service are Techtel (Telmex), Telephone2, Impsat (Global Crossing), Comsat, IPlan, Telecentro, Telefónica and Telecom Argentina.

Pursuant to the Plan, the liberalization of public telephone services began. On December 9, 1998, Telecom Argentina was granted (upon the subsequent issuance of SC General Resolution No. 2,627/98) a license to provide public telephone services in the Southern Region.

**Regulatory Environment**

*Decree No. 764/00*

On September 5, 2000, the Argentine executive branch issued Decree No. 764/00 which enacted four new regulations:

- the regulation of licenses for telecommunications services;
- the interconnection regulation;
- the regulation governing the administration, management and control of the radioelectric spectrum; and
- the Universal Service regulation.

Table of Contents

The basic guidelines for these regulations are as follows:

*General Regulation of Licenses.* This regulation establishes a single nationwide license for the provision of all telecommunication services to the public, including fixed-line, mobile, national and international, irrespective of whether these services are provided through telecommunications infrastructure owned by the service provider. Under the regulation, a licensee's corporate purpose does not need to be exclusively the provision of telecommunications services and there are no restrictions on participation by foreign companies. This regulation governs the license through which Telecom Argentina offers services in the Southern Region and is complementary to Telecom Argentina's obligations pursuant to its preexisting licenses.

*Interconnection Regulation.* Compared to the prior interconnection regulation (Decree 266/98), this regulation provides for a reduction of approximately 50% in the reference interconnection prices in effect at the time. The regulation also increases the number of infrastructure elements and services that the dominant operator is required to provide, including interconnection at the local exchange level, billing services and unbundling of local loops. This regulation also introduces interconnection for number translation services (NTS) such as Internet, audiotext, collect calling and the implementation of number portability, all of which were subject to future regulations.

Regarding the number portability, on January 22, 2009, the SC issued Resolution No. 8/09 through which it created a Working Commission composed of members of the SC and the CNC to prepare a draft of the Number Portability Regulation.

Subsequently, on August 19, 2010, through Resolution SC No. 98/10, the SC approved the Number Portability Regime ( NP ), covering the STM, SRMC, PCS and SRCE (trunking) mobile services, defined in the resolution as portable services.

The implementation timetable was approved by Resolutions No. 8/2011 and 3/2011 jointly issued by the SC and the Ministry of Domestic Trade.

The resolution also provides for the creation of a Portability Committee, formed with representatives of mobile operators and, among other responsibilities, is in charge of coordinating and supervising the NP's implementation process and functioning, reporting to the SC about fulfillment of the objectives included in the timetable, defining the NP's technical and operative procedures and specifications, and preparing the Bidding Specifications for the hiring of the Database Administrator, all of the above being subject to the SC's approval.

At the beginning of 2011, the Portability Committee sent for the SC's approval the agreed Portability processes and specifications for the selection of the Database Administrator.

On June 14, 2011, the SC issued Resolution No. 67/11 replacing several sections of the NP regime. It also approved the processes and technical and operational specifications relating to the implementation and proper application of the NP, the bidding specifications and model contract for the selection of the Database Administrator, and the network technical specification for the implementation of the NP in the mobile communication networks.

On July 7, 2011, the Portability Committee convened companies with extensive international experience to participate in the private tender for the selection of the Database Administrator. Telcordia Technologies Inc. together with its Argentine partner, Telmark S.A. (hereinafter the Administrator of the Portability ), were the companies selected in the process.

The results of the proceedings were reported to the SC on October 12, 2011, and under the provisions of SC Resolution No. 98/10 and No. 67/11, the contract for the integration and management of the Database between the four service providers and the Administrator of the Portability was formalized.

Mobile providers made the adjustments to their respective networks, as well as developments and testing of the necessary information technology applications. The NP was implemented during March 2012.

*Regulation Governing the Administration, Management and Control of the Radioelectric Spectrum.* This regulation establishes the principles and requirements governing the administration, management and control of the radioelectric spectrum. According to the regulation, authorizations or permissions will be granted subject to SC's right to substitute, modify or cancel them without any grantee right to indemnification. New grants of

Table of Contents

authorizations will have a minimum duration of five years. The authorizations or permissions for use of frequencies may not be transferred, leased or assigned, in whole or in part, without prior authorization by the SC.

In May 2011, the SC, through Resolution No. 57/11, launched an auction to reassign the 850 MHz and 1900 MHz frequency bands returned by Telefónica Móviles Argentina S.A. because this company had exceeded its 50 MHz spectrum cap. The total spectrum to be auctioned in each region is: 30 MHz in Region I ( North ); 37.5 in Region II ( AMBA ); and 35 MHz in Region III ( South ).

Personal is participating in the spectrum auction process and expects to acquire additional spectrum to complete its Spectrum cap along throughout Argentina. For such purpose, Personal can expect to acquire up to 5 MHz in the first Region, up to 7.5 MHz in the second Region and up to 10 MHz in the third Region.

As of the date of this Annual Report, the SC has postponed the auction and it is expected to take place in May 2012.

*Universal Service ( SU ) Regulation.* The Universal Service regulation requires entities that receive revenues from telecommunications services to contribute 1% of these revenues (net of taxes) to the Universal Service Fiduciary Fund ( the SU Fund ). The regulation, issued by Decree No. 764/00, adopted a pay or play mechanism for compliance with the mandatory contribution to the SU fund. On June 8, 2007, the SC issued Resolution No. 80/07 which stipulated that until the SU Fund was effectively implemented, telecommunication service providers, such as Telecom Argentina and Personal, were required to deposit any contributions accrued since the issuance of such Resolution into a special individual account held in their name at Banco Nación. CNC Resolution No. 2,713/07, issued in August 2007, established how these contributions are to be calculated.

*New Universal Service Regulation*

Decree No. 558/08, published on April 4, 2008, replaced the SU Fund regime created by Decree No. 764/00, and approved a new Universal Service regime. Decree No. 558/08 established that the SC would assess the value of service providers direct program contributions made in compliance with obligations promulgated by Decree No. 764/00. It would also determine the level of funding required in the SU Fund for programs pending implementation. In the same manner, in order to guarantee the continuity of certain projects, the SC was given the choice to consider as SU contributions certain other undertakings made by telecommunication services providers and compensate providers for these undertakings.

The Decree requires telecommunications service providers to contribute 1% of their revenues (from telecommunications services, net of taxes) to the SU Fund and keeps the pay or play mechanism for compliance with the mandatory monthly contribution to the SU Fund or, to claim the correspondent receivable, as the case may be.

In defining Universal Service, the new regulation established two categories: (a) areas with uncovered or unsatisfied needs and (b) customer groups with unsatisfied needs. It also determined that the SC would have exclusive responsibility for the issuance of general and specific resolutions regarding the new regulation, as well as for its interpretation and application. The regulation establishes that the SC will review SU

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

programs which were established under the previous regulation, guaranteeing the continuity of SU programs already being administered and implementing programs that had been under review.

The Decree requires Telecom Argentina and Telefónica to extend the coverage of their fixed line networks, within their respective original region of activity, within 60 months from the effective date of the Decree's publication. The SC will determine on a case-by-case basis if the providers will be compensated with funds from the SU Fund.

The level of financing of Universal Service ongoing programs established under the previous regulation will be determined by the SC, whereas telecommunications providers appointed to participate in future SU programs will be selected by competitive bidding.

Under Decree No. 558/08, providers of telecommunications services shall rely on the assistance of a Technical Committee made up of seven members (two members appointed by the SC, one member appointed by the CNC, three members appointed by the telecommunication services providers - one each appointed by

Table of Contents

Telecom Argentina and Telefónica and one by the rest of the providers and another member appointed by independent local operators). This Technical Committee is informed by the SC of the programs to be financed and is responsible for managing and controlling the SU Fund, carrying out technical-economic evaluations of existing projects and supervising the process of competitive bidding and adjudication of new SU programs, with prior approval by the SC. The Technical Committee has been created in a timely manner and is in full operation of the functions derived from its responsibilities.

The Decree also requires telecommunications service providers to create, subject to SC approval, a procedure to select the fiduciary institution and to provide a proposed fiduciary agreement within 60 days from its effective date of publication. Telecom Argentina and Personal selected Banco Itaú as the fiduciary institution. The fiduciary institution and the proposed fiduciary agreement were approved by the SC in January 2009 through SC Resolution No. 7/09.

On April 4, 2009, by means of SC Resolution No. 88/09, the SC created a new program denominated Telephony and Internet for towns without provision of Basic telephone services that will be subsidized with funds from the SU Fund. The new program seeks to provide local telephony, domestic long-distance services, international long-distance services and Internet services in towns that currently do not provide Basic telephone services. SC Resolution No. 88/09 specifies the methodology that licensees will have to follow for proposals to render these services in several of the 1,491 towns and 1,496 schools identified in the Resolution's Annex. The bases for the bidding process for 400 localities under this program were published in March 2012.

On December 1, 2010, the SC issued Resolutions No. 147/10 and No. 148/10, approving Internet for educational institutions and Internet for public libraries programs, respectively. These programs aim to provide the Broadband Internet service to state-run educational institutions and public libraries, respectively, and will be implemented using SU Fund resources, through public biddings. As of the date of this Annual Report, the first bidding for the Internet for educational institutions program has already been conducted and the bidding for the Internet for public libraries program is under development.

On November 11, 2010, the SC issued Resolution No. 154/10 adopting the methodology for the deposit of the SU contributions to the trustee's escrow account. The Resolution includes several provisions related to the determination of the contributions that correspond to the periods before and after Decree No. 588/08 was issued. It also states that telecommunication providers may discount the amounts incurred in the implementation of the SU Initial Programs from the contributions to the SU Fund until the SC determines if those Initial Programs qualify as such. However, if as a result of the SC's verification some amounts are not recognized as Initial Programs, those amounts would have to be contributed into the SU Fund or would have to be allocated to develop SU projects previously approved by the SC. As of the date of this Annual Report, SU Initial Programs are still pending the approval of the SC.

On December 30, 2010, the trustee notified Telecom Argentina and Personal of the trustee's escrow account number in which they shall deposit the SU contributions under the provisions of SC Resolution No. 154/10.

On January 26, 2011, the SC issued Resolution No. 9/11 establishing the Infrastructure and Equipment Program. The Resolution provides that telecommunication service providers can contribute to the projects in this program only the amounts corresponding to their pending SU contributions under Annex III of Decree No. 764/00, before the effective date of Decree No. 558/08.

*In Telecom Argentina*

Over ten years after the deregulation of the market and effectiveness of the SU regulations, superseded by Decree No. 558/08, incumbent operators have not received any set-offs for the services rendered under the SU regime.

Pursuant to Resolutions SC No. 80/07, SC No. 154/10 and CNC No. 2,713/07, Telecom Argentina has estimated a receivable for the period initiated in July 2007 through December 31, 2011, and has filed its calculations for approval by the SC. This receivable has not yet been recorded since it is subject to approval of the SU programs, review of the SC and availability of funds in the SU Fund.

Table of Contents

On April 8, 2011, the SC issued Resolution No. 43/11 notifying Telecom Argentina that investments associated with High-Cost Areas valued at approximately P\$829 million since July 2007 and included in the above-mentioned receivables are not an Initial Indicative Program. Such resolution was appealed by Telecom Argentina. As of the date of this Annual Report, the outcome of this appeal is still pending.

*In Personal*

Since January 2001, Personal has been recording a liability related to its obligation to make contributions to the SU Fund. In addition, since July 2007 and in compliance with SC Resolution No. 80/07 and No. 154/10 and CNC Resolution No. 2,713/07, Personal deposited the correspondent contributions into an account held under their name at the Banco de la Nación Argentina. As of December 31, 2010, these contributions amounted to P\$112 million and were recorded as a receivable in the caption Other receivables of the consolidated balance sheet.

During the first quarter of 2011, the abovementioned funds were transferred to the trustee's escrow account for the SU Fund, in compliance with the provisions of SC Resolution No. 154/10. Since January 2011, the SU Fund monthly contributions are now being made into such escrow account.

In March 2011, Personal submitted to the SC a P\$70 million investment project, pursuant to Resolution SC No. 9/11, for the development of network infrastructure in locations in the Northern Region of Argentina with no mobile coverage. As of the date of this Annual Report, this program is still pending the approval of the SC.

In June 2011, under the provisions of Resolution SC No. 88/09, Personal submitted to the SC a new SU project for the rendering of Basic telephone services, Broadband Internet access and mobile services in almost 150 cities included under the scope of this resolution. This project, in addition to the ones submitted by other service providers, will cause the SC to order to the SU Technical Committee to launch a new tender process.

*Rates*

The Price Cap was a rate regulation mechanism applied to calculate changes in Telecom Argentina's basic services rates using the U.S. Consumer Price Index (the U.S. C.P.I.) and an efficiency factor. However, in October 2001, a preliminary injunction prohibited Telecom Argentina from applying rate increases by applying the U.S. C.P.I.

Public Emergency Law No. 25,561 explicitly prohibited rate adjustments. As of the date of this Annual Report, the pesification and the freeze of regulated rates remain in force. Therefore, the Price Cap regime is suspended and it is unknown if and when it will come back into effect or be replaced by other rate regulation procedures.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

In accordance with the Public Emergency Law, in January 2002, rates for Basic telephone services and long-distance services were converted to pesos and fixed at an exchange rate of P\$1.00=US\$1.00. The rates Telecom Argentina may charge in the future will be determined by negotiations between Telecom Argentina and the Argentine government. The Public Emergency Law has been subsequently extended through December 31, 2013.

On March 6, 2006, Telecom Argentina executed a Letter of Understanding (the Letter of Understanding 2006 ) with the Argentine government pursuant to which Telecom Argentina will be permitted to raise the termination charge for international incoming calls, increase the time bands for peak-hour rates applied to local and domestic long-distance calls and incorporate certain modifications to the current regulatory framework.

The Letter of Understanding 2006 contemplated the signing and effectiveness of the Minutes of Agreement of the Renegotiation upon the fulfillment of certain necessary administrative steps. As of the date of this Annual Report, such fulfillment has yet to occur. Although Telecom Argentina's Management believes that the contract renegotiation process will be satisfactorily completed, they are unable to predict the outcome of the negotiations that are continuing with regard to further rate increases and the future rate scheme. Also, they are unable to predict whether the Argentine government, as a result of the current rate renegotiations, will impose additional conditions or requirements.

Table of Contents**Rate Regulations**

*Rate Rebalancing.* At the time of ENTel's privatization, the need for a future amendment of rates to rebalance the pricing of domestic and international charges was foreseen. Subsequent agreements established the right of licensees to a Rate Rebalancing and set forth some methods to implement a new rate structure.

Decree No. 92/97 provided for a significant reduction in domestic and international long-distance rates, an increase in basic telephony charges, the elimination of Free Pulses and an increase in urban rates. The Rate Rebalancing was undertaken as part of the Argentine government's plan to create a competitive environment in the Argentine telecommunications industry. One of the main principles of the Rate Rebalancing was to have a neutral effect on the licensee's revenues.

The new rate schedule was intended to reduce cross-subsidies (particularly those existing between urban and long-distance services) to create a competitive environment beginning in the year 2000. Decree No. 2,585/91 established that the Rate Rebalancing should have a neutral effect on the licensees' revenues. In developing the rate structure implemented by Decree No. 92/97, the Argentine government relied on studies which demonstrated that because of the elasticity of demand for telephone service, an increase in demand for lower-priced services would compensate for the rate reductions. Decree No. 92/97 established corrective methods to facilitate neutral results on revenues. The *Banco Interamericano de Reconstrucción y Fomento*, or InterAmerican Bank for Reconstruction and Development, was responsible for making measurements on a semi-annual basis, over a two-year period, to determine the effects of the Rate Rebalancing. Decree No. 92/97 provides a method to offset changes in revenue resulting from the Rate Rebalancing at the time of applying the Price Caps.

The variation in revenues resulting from the Rate Rebalancing for the two-year period beginning February 1997 was determined to amount to an increase of P\$9.5 million in accordance with SC Resolution No. 4,269/99. In December 2007, the regulatory authority notified the Company of its intention to offset this amount with the Resolution No. 41/07 receivables. As a result, during fiscal year 2007, Telecom Argentina recorded a liability on the CNC final results, which was shown as a deduction from the Resolution No. 41/07 receivables. In April 2009, the CNC notified the offsetting of the P\$9.5 million Rate Rebalancing amount with the Resolution No. 41/07 receivables (See Tax Stability: Social Security Contribution Variations ), thus ratifying the registration made by Telecom Argentina.

*Historical Rates.* The following table sets forth certain of our maximum monthly rates for various components of local service and domestic long-distance service which have been in effect since 1999:

	Maximum rate(1)
<b>Residential:</b>	
Installation charge per line	150
Monthly Basic Charge per line	U.S. Dollars (2) 13.23
<b>Commercial:</b>	
Installation charge per line	U.S. Dollars (2) 150
Monthly Basic Charge per line	U.S. Dollars (2) 27.30
<b>Prices:</b>	
Price per pulse (nominal)	U.S. Dollars (2) 0.0469

Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

- (1) Figures shown do not include value added tax charged to customers.
- (2) In accordance with Public Emergency Law, these rates were pesified at the exchange rate US\$1.00 to P\$1.00.

The Letter of Understanding 2006 described under Rates above is intended to serve as a foundation for a forthcoming negotiation agreement and contemplates the increase in rates for incoming international calls and the extension of peak-rate calling periods. The new rate agreement contemplated by the Letter of Understanding 2006 has not yet been completed.

*Price Cap.* The List of Conditions required that rates undergo an annual reduction until the Regulatory Bodies determine that there is effective competition in the markets we serve. The Price Cap was a regulation method applied in order to calculate changes in Telecom Argentina's rates, based on changes in the U.S. C.P.I. and an efficiency factor. A 2% (measured in real dollar terms) reduction in the prior year's rates was required for each of the third through the seventh year following the Transfer Date (through November 7, 1997). In

Table of Contents

addition, following the extension of the exclusivity period, rates were required to be 4% lower (measured in real dollar terms) than the prior year's rates. This requirement was maintained pursuant to the Rate Agreement, whereby Telecom Argentina was permitted to effect aggregate rate reductions by lowering rates for some or all categories of service, provided that net reductions meet the applicable targets. The application of annual reductions to the general level of rates established in the List of Conditions (price cap) has been implemented mainly by reducing the long-distance rates and (in Price Cap 1998) discounts to certain public entities, including the fire departments and public libraries. The CNC notified Telecom Argentina of the completion of the Price Cap 1998 audit which did not show any balance that needed to be applied. As a result of the 1999 Price Cap audit process and Telecom Argentina's reviews, the Regulatory Authority notified us, in August 2009, of the existence of an outstanding balance of P\$3.1 million plus interest which has yet to be applied. This amount was offset with the credit resulting from SC Resolution No. 41/07. See Tax Stability: Social Security Contribution Variations.

On April 6, 2000, the Argentine government, Telefónica and Telecom Argentina signed an agreement ( Price Cap 2000 ) that set the price cap efficiency factor at 6.75% (6% set by the SC and 0.75% set by Telecom Argentina and Telefónica) for the period of November 2000 to October 2001.

The 2000 Price cap audit results are still pending. Should the outcome of these audit results yield a payable by Telecom Argentina, this payable can be offset with the receivables generated by Resolution No. 41/07. See Tax Stability: Social Security Contributions Variation.

In April 2001, the Argentine government, Telefónica and Telecom Argentina signed an agreement ( 2001 Price Cap ) that set an efficiency factor for reduction of rates at 5.6% for the period from November 2001 to October 2002.

However, in October 2001, a preliminary injunction against Telecom Argentina disallowed Telecom Argentina to apply rate increases by reference to the U.S. C.P.I. Telecom Argentina appealed this injunction arguing that if one part of the formula could not be applied, the Price Cap system should be nullified. Finally, Public Emergency Law No. 25,561 explicitly prohibited rate adjustments. As of the date of this Annual Report, the pesification and the freeze of the regulated rates are still in force, therefore the price cap regime is suspended and it is unknown if and when it will come back into effect or be replaced by other rate regulation procedures. See Item 8 Financial Information Legal Proceedings Civil, tax, commercial, labor and regulatory proceedings General Proceedings Consumer Trade Union Proceedings.

*Installation Charges.* Under the Rate Agreement, Telecom Argentina was required to gradually reduce installation charges so as to achieve pricing levels equal to those for internationally mature networks (estimated in the Rate Agreement to be US\$250) and to eliminate distinctions between residential and commercial users. Decree No. 92/97 established that, beginning in November 1997, installation charges could not exceed the amount charged in mature international markets. According to this decree, the current maximum permitted charge is US\$150 (pursuant to the Public Emergency Law, this charge was pesified at the exchange rate of US\$1.00=P\$1.00). Telecom Argentina has been applying several promotions to installation charges. Average levels of promotional installation charges in 2011 were P\$62.

*Monthly Basic Charges.* Until the effective date of Decree No. 92/97, customers were entitled to a certain number of Free Pulses per line depending on the category of each customer and the number of lines in the area. As a result of the application of Decree No. 92/97 and in order to offset rate reductions for domestic and international long-distance services, Free Pulses were eliminated for all categories of customers and monthly basic charges were equalized throughout the country. Decree No. 92/97, however, provided for a special reduced rate that is available to certain retired people and low-consumption residential customers.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

*Long-Distance Rates.* Decree No. 92/97 reduced the average weighted domestic long-distance rate by approximately 33%. Under this revised rate schedule, interurban rates were significantly reduced, with maximum long-distance rates reduced by 56%. Calls within Provincial Code 1 (up to 30 Km) made within provincial cities are billed at an urban rate.

*Letter of Understanding Relating to Basic Services.* Pursuant to the Letter of Understanding 2006, described under Rates, the Government has agreed that Telecom Argentina can increase the termination charges applied to incoming international calls and reduce the time bands for off-peak local rates. As of the date of this Annual Report, Telecom Argentina is expecting the completion of certain administrative steps required for the

Table of Contents

National Executive to submit to the National Congress a proposed Memorandum of Agreement for Renegotiation. See *Rates* for a description of the status of the letter of understanding 2006.

*Tax on Deposits to and Withdrawals from Bank Accounts ( IDC )*. On February 6, 2003, the Ministry of Economy, through Resolution No. 72/03, defined the method to allow, going forward, rate increases on Basic telephone services reflecting the impact of the IDC. The amount of tax charged must be shown separately in customers' bills. Telecom Argentina has determined the existence of a remaining unrecovered amount of approximately P\$23 million that arose before the issuance of Resolution No. 72/03. Telecom Argentina planned to claim such amount within the rate renegotiation process (See *Rates*). In April 2007, Telecom Argentina provided the CNC with supporting documentation about this amount for its audit. Telecom Argentina had access to the CNC's audit documentation which corroborates the amounts claimed by Telecom Argentina and its application of a similar offsetting method pursuant to Resolution No. 41/07. As a result, the Company recorded as *Other receivable* a total of P\$23 million.

*Tax Stability: Social Security Contribution Variations*. On March 23, 2007, the SC issued Resolution No. 41/07 relating to the impact of variations in social security contributions occurring over the past several years and the proposed use for the resulting savings and increases in contribution rates that have occurred. Pursuant to Resolution No. 41/07, Telecom Argentina may offset the impact of costs caused by increases in social security contribution rates that have been implemented in accordance with the applicable regulations against the savings caused by reductions in the levels of social security contributions initially earmarked for the *argentina@internet.todos* Program.

Telecom Argentina's implementation of Resolution No. 41/07 was subject to CNC audits, which were carried out during the third quarter of 2007. Telecom Argentina gained access to the documentation related to the CNC's audits and it showed no significant differences as compared to the net amounts that Telecom Argentina had determined.

Consequently, Telecom Argentina recorded a receivable from increases in social security contributions and canceled payables stemming from reductions in social security contribution rates and other fines due by the Company. As of December 31, 2011, Telecom Argentina has a net receivable of P\$67 million which, in addition to the receivable of P\$23 million corresponding to the IDC, is included in the line item *Other receivables* as non-current receivables.

Since Resolution No. 41/07 gives Telecom Argentina the right to offset receivables with existing and/or future regulatory duties and, given its intention to exercise this right, the receivable was recorded net of allowances. As of December 31, 2011, the allowances corresponding to these regulatory duties amounted to P\$90 million.

In 2011, Telecom Argentina continued billing customers the increases in its social security contribution rate accrued from October 2008, applying the same method used to bill the IDC.

***Other Regulatory Regulations***

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

*Regulation for the Call-by-Call Selection of the Providers of Long-Distance Services.* On December 28, 2001, the former Ministry of Infrastructure and Housing issued General Resolution No. 613/01, approving a system that allows callers to select their preferred long-distance provider for each call. This call-by-call selection system is referred to as SPM.

Subsequently, as a result of claims submitted by several carriers objecting to General Resolution No. 613/01, the Ministry of Economy issued General Resolution No. 75/03, which introduced several changes to the regulations setting forth the SPM. The main changes relate to the following: long-distance carriers' freedom to provide SPM, changes in blockage modality due to delinquency, changes in the service connection modality and greater flexibility of obligations related to service promotion and advertising. General Resolution No. 75/03 also provides that origin providers, both fixed and mobile, must have their equipment and networks available to provide the SPM service within 120 days of February 6, 2003. Our equipment and networks have been able to provide this service since 2002. As of the date of this Annual Report, this long-distance service modality has not been implemented.

Table of Contents

*Buy Argentine Act.* In December 2001, the Argentine government passed Public Law No. 25,551 (the *Compre Trabajo Argentino* or Buy Argentine Act), and in August 2002, Decree No. 1,600/02 approved and brought such Act into effect.

The Act requires Telecom Argentina to give priority to national goods and services, as defined in Public Laws No. 25,551 and No. 18,875, in any procurement related to the rendering of Basic telephone services. Priority must be given to national goods and services as long as the price of such goods is equal to or lesser than the price of a foreign good (including customs duties, taxes and other expenses that are linked to the nationality of goods) increased by 7% (when the Argentine offeror is a small-or medium-size company) or 5% (when the Argentine offeror is any other company).

The Buy Argentine Act also mandates that Telecom Argentina publish any bid for services in the Official Bulletin in order to provide any and all prospective offerors with information necessary for them to participate. This mandatory publication requires considerable lead time before the issuance of the purchase order and has had the result of extending the period needed to complete certain purchases. Non-compliance with the Act is subject to criminal sanctions.

Public Law No. 18,875 establishes the obligation to exclusively contract services, as defined by such law, with local companies and professionals. Any exception must receive the prior approval of the relevant Ministry.

In August 2004, CNC Resolution No. 2,350/04 enacted the Procedure for the fulfillment of the Buy Argentine Act, which requires Telecom Argentina to present biannual returns addressing its compliance with these rules. Non-compliance with this obligation is subject to administrative sanctions. Since this regulation requires Telecom Argentina to make bids for goods and services and/or to obtain any necessary approvals by a relevant authority, and given the higher administrative expenses derived from the obligation to present biannual returns, this regulation reduces Telecom Argentina's operating flexibility.

*Rendering of Fixed Telephony Through Mobile Telephony Access Infrastructure.* In August 2007, through SC Resolution No. 151/07, fixed telephony was granted access to particular frequency bands, with the purpose of providing Basic telephone services in rural and suburban areas through the mobile access infrastructure used for the provision of mobile telephony service. Telecom Argentina and Telefónica provide this service within their respective fixed telephony service original regions. Telecom Argentina has installed fixed lines based on this technology in order to satisfy service demand in rural and suburban areas.

*Calling Party Pays CPP.* As from April 15, 1997, pursuant to Decree No. 92/97 and SC General Resolutions No. 263/97 and No. 344/97, mobile telephone services apply the calling party pays, or CPP, system, whereby the party placing a call from a fixed-line to a mobile phone pays for the air-time charges for the call. As an exception to this rule, traffic originating from public telephones does not pay CPP, and is instead charged according to the Mobile Party Pays or MPP system, whereby the mobile party pays for the call received.

In March 2002, Personal started entering into agreements with the telephone operators to charge CPP for calls made by calling cards. Mobile operators have also agreed to pay for traffic terminated in each other's networks at agreed prices.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

In accordance with SC General Resolution No. 124/02, since January 2003, mobile operators can charge the CPP for international calls whereby overseas calls that terminate in mobile telephones in Argentina pay for CPP charges. In order to identify these calls, customers dialing from outside must add a prefix 54 + 9 + area code to the mobile number.

The price per minute for the CPP (for fixed-line to mobile calls) is regulated by the SC based on average traffic volume and costs, as reported by the mobile operators under Resolution SC No. 623/02 which approved the calculation mechanism for the reference value of the TLRD costs for CPP modality. Resolution SC No. 48/03 fixed the values for the TLRD at P\$0.335 per minute for peak-hours and P\$0.22 per minute for off-peak hours, but these values had to be revised by the SC a month after their approval, with a second revision during the subsequent six months that was to be in turn followed by quarterly revisions. However, the SC has yet to complete these revisions.

Table of Contents

The CPP price per minute for international calls has been agreed upon by the mobile operators and currently stands at US\$0.18.

*Law No. 25,891.* Law No. 25,891 was adopted on April 2, 2004, but material regulations under this law are still pending. This regulation intends to regulate the commercial distribution of mobile services and includes mandated registration of personal data for all customers, creating a Public Registry in the SC named *Registro Público Nacional de Clientes y Usuarios de Comunicaciones Móviles*.

*Regulations Applicable to PCS Services*

*PCS.* Personal has licenses for PCS in all areas in Argentina.

*AMBA.* In June 1999, Personal and Unifón were jointly awarded a license of 40 MHz in the PCS Band for the region including the AMBA. Miniphone and Movicom each exercised the right to acquire a license of 20 MHz in the PCS Band. Personal and Unifón have divided the 40 MHz license awarded to the two companies and the additional 20 MHz license granted to Miniphone (10 per company).

*Interior Regions.* Personal holds licenses of 40 MHz in the PCS Band in the Southern Region. Personal also holds a license of 20 MHz in the PCS Band in the Northern Region.

In August 2006, the CNC issued Resolution No. 2,528/06 declaring that Personal had fulfilled its obligations under the *Pliego de Bases y Condiciones* for the acquisition of the licenses for the provision of PCS. In addition, the SC issued Note No. 1,040/06 which enabled Personal to recover the promissory notes used to guarantee the granted PCS licenses and, therefore, all such notes have been recovered.

Personal also has licenses for Data Transmission and Value Added Services (granted by Resolution SC No. 18/96 and confirmed by Resolution SC No. 55/96), and for National and International Long Distance Telephony Service (Registered by Resolution SC No. 502/01).

In connection with Telefónica Móviles' acquisition and combination of operations of Unifón and Movicom, in 2004, the SC authorized a change in shareholder control of stakes held in Compañía de Radiocomunicaciones Móviles S.A. and in Compañía de Teléfonos del Plata in Telefónica Móviles' favor. This authorization was conditioned upon the return, without charge, of frequency bands exceeding an aggregate 50 MHz in accordance with the current laws and pursuant to a plan to be subsequently issued.

See Regulatory Framework Regulatory Environment Decree No. 764/00 Regulation Governing the Administration, Management and Control of the Radioelectric Spectrum for a description of the auction launched by the SC to reassign the 850 Mhz and 1900 Mhz frequency bands returned by Telefónica Móviles Argentina S.A.

Table of Contents**CAPITAL EXPENDITURES**

Capital expenditures (investment in Property, Plant and Equipment - PP&E, intangible assets and asset retirement obligations) plus materials amounted to P\$3,359 million in the year ended December 31, 2011, P\$2,534 million in the year ended December 31, 2010, and P\$2,213 million in the year ended December 31, 2009.

The following table sets forth our consolidated capital expenditures for the years ended December 31, 2011, 2010 and 2009.

	2011	Year ended December 31, 2010 (P\$ millions)(1)	2009
Land and buildings	184	143	94
Switching and transmission	621	548	453
Access and outside plant	728	595	491
Computer equipment and software	610	496	463
Other	175	139	162
<b>Subtotal tangible capital expenditures(2)(3)</b>	<b>2,318</b>	<b>1,921</b>	<b>1,663</b>
Rights of use, exclusivity agreements and licenses	106	20	23
Service connection or habilitation costs	22	18	19
Subscribers acquisition costs	746	534	400
<b>Subtotal intangible capital expenditures</b>	<b>874</b>	<b>572</b>	<b>442</b>
<b>Total capital expenditures</b>	<b>3,192</b>	<b>2,493</b>	<b>2,105</b>
Materials	167	41	108
<b>Total additions in PP&amp;E and intangible assets</b>	<b>3,359</b>	<b>2,534</b>	<b>2,213</b>

(1) The allocation of work in progress among items is estimated.

(2) Includes capitalized interest on fixed assets of P\$15 million as of December 31, 2009. There was no capitalized interest recorded during years 2011 and 2010.

(3) Includes materials transferred amounting to P\$231 million, P\$282 million and P\$179 million as of December 31, 2011, 2010 and 2009, respectively.

In addition, the following table shows capital expenditures for the years ended December 31, 2011, 2010 and 2009 broken down by Fixed Services and Mobile Services:

Table of Contents

	2011	Year ended December 31, 2010 (P\$ millions)	2009
<b><u>Fixed Services</u></b>			
Land and buildings	74	70	36

Computer equipment and software	395	334	313
Other	42	47	50
<b>Subtotal tangible capital expenditures</b>	<b>1,131</b>	<b>1,003</b>	<b>879</b>
Rights of use, exclusivity agreements and licenses	1	4	2
Subscribers acquisition costs	697	492	358
<b>Subtotal intangible capital expenditures</b>	<b>698</b>	<b>496</b>	<b>360</b>
<b>Total Personal Mobile Services and Núcleo Mobile Services capital expenditures(1)</b>	<b>1,829</b>	<b>1,499</b>	<b>1,239</b>
<b>Total capital expenditures</b>	<b>3,192</b>	<b>2,493</b>	<b>2,105</b>

(1) Includes P\$171 million, P\$209 million and P\$105 million of capital expenditures in Paraguay as of December 31, 2011, 2010 and 2009, respectively.

During 2011, capital expenditures in the Fixed Services segment were focused on the expansion of fiber optic and DWDM technology in the long-distance national network to improve transmission capacity and access speed assigned to customers and on the IP Backbone evolution through the installation of new-generation routers to cope with traffic growth. Such investments are shown in the lines of Outside plant and Switching and transmission. Additionally, focusing on the need for greater bandwidth, the deployment of a loop shortening plan was begun. This plan involves the installation of outdoor cabinets with DSLAM of VDSL2 technology and will allow us to provide competitive services.

With respect to the Personal Mobile Services and Núcleo Mobile Services segments, capital expenditures have been made to extend 3G network capacity and coverage to many cities in the interior of Argentina and to expand Value Added Services platforms included in the Mobile network access and Switching. The deployment of Personal s mobile network based in low-altitude sites, in Telecom Argentina s telephone post or third parties telephone posts, or on urban roofs was also initiated. In addition, investments were allocated to direct and incremental costs incurred for the acquisition of new post-paid and Cuentas Claras subscribers with a minimum contractual period, which are included in the item subscriber acquisition costs. As a result of the expected evolution in our services, we expect to increase our capital expenditures in order to maintain the quality of our services and competitive position. Our capital expenditure plan is set annually and is based on regulatory, commercial, technical and economic factors such as rates, demand and availability of equipment and buildings. These costs are estimates and remain subject to the finalization of services and other contracts relating to these expenditures.

Table of Contents

We estimate that our capital expenditures will be approximately P\$4.0 billion for 2012 (P\$3.0 billion in tangible assets and P\$1.0 billion in intangible assets, particularly SAC). See Item 5 Operating and Financial Review and Prospects Liquidity and Capital Resources Capital Expenditures.

The Company continues to make significant investments designed to take advantage of growth opportunities in our businesses. In the Fixed Services segment, we invest to sustain the growth in Broadband services, to supply mobile operators with the necessary infrastructure and to continue updating commercial and support systems. In the Personal Mobile Services and Núcleo Mobile Services segments, we are in the process of expanding the network infrastructure and extending the 3G technology coverage and bandwidth for mobile data transmission and in acquiring subscribers to remain in a competitive position and to increase our post-paid and Cuentas Claras customer base.

We expect to finance these expenditures through operating cash flows and financing provided by our vendors.

**PROPERTY, PLANT AND EQUIPMENT**

As detailed below, our principal physical properties consist of transmission equipment, access facilities, outside plant (external wiring) and switching equipment. These properties are, at present, mainly located throughout the Northern Region. We believe that these assets are, and for the foreseeable future will be, adequate and suitable for their respective uses.

	Fixed Services	As of December 31, 2011 Personal Mobile Services and Núcleo Mobile Services (P\$ millions)(*)	Total
Land and buildings	866	177	1,043
Switching and transmission	1,299	1,267	2,566
Access and outside plant	1,887	930	2,817
Computer equipment and software	542	865	1,407
Materials	187	38	225
Other	105	84	189
<b>Total PP&amp;E, net carrying value</b>	<b>4,886</b>	<b>(**) 3,361</b>	<b>(***) 8,247</b>

(\*) The allocation of work in progress among items is estimated.

(\*\*) Includes P\$621 million located in Paraguay.

(\*\*\*) Net of valuation allowance for materials for P\$15 million.

All of the above-mentioned assets were used to provide service to our clients as described below.

2011

(thousands)

2009

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Fixed lines in service	4,141	4,107	4,060
Fixed Internet access lines	1,550	1,380	1,214
Mobile subscribers (*)	20,342	18,211	16,281

---

(\*) In 2011, 2010 and 2009, includes 2,149, 1,878 and 1,806 thousands of Núcleo mobile subscribers, respectively, of which 8, 10 and 12 thousands were Internet (Wi-Max) customers.

As of December 31, 2011, we have entered into purchase commitments relating to PP&E totaling P\$244 million primarily for switching equipment, external wiring, infrastructure works, inventory and other services. In general, the contracts were financed, directly or indirectly, by domestic and foreign vendors.

Our current major suppliers of fixed assets are Cía. Ericson S.A.C.I, Brightstar Argentina S.A., BGH S.A., IATEC S.A., Huawei Tech Investment Co. Ltd. Argentina, Nokia Siemens Networks Argentina S.A., L.G. Electronics Argentina S.A., Tel 3 S.A., Sofrecom Argentina S.A. and Italtel Argentina S.A.

**ITEM 4A. UNRESOLVED STAFF COMMENTS**

None.

**ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS**

You should read the following discussion in conjunction with our Consolidated Financial Statements, including the notes to those financial statements, which appear elsewhere in this Annual Report. Our Consolidated Financial Statements have been prepared in accordance with IFRS. See Item 3 Key Information Selected Financial Data. The following discussion and analysis is presented by the Management of our company and provides a view of our financial condition, operating performance and prospects from Management's perspective. The strategies and expectations referred to in this discussion are considered forward-looking statements and may be strongly influenced or changed by shifts in market conditions, new initiatives that we implement and other factors. Since much of this discussion is forward-looking, you are urged to review carefully the factors referenced elsewhere in this Annual Report that may have a significant influence on the outcome of such forward-looking statements. We cannot provide assurance that the strategies and expectations referred to in this discussion will come to fruition. Forward-looking statements are based on current plans, estimates and projections, and therefore, you should not place too much reliance on them. Forward-looking statements speak only as of the date they are made, and we undertake no obligation to update any forward-looking statements in light of new information or future events. Forward-looking statements involve inherent risks and uncertainties, most of which are difficult to predict and are generally beyond our control. We caution you that a number of important factors could cause actual results or outcomes to differ materially from those expressed in, or implied by, the forward-looking statements. Please refer to Forward-Looking Statements and Item 3 Key Information Risk Factors for descriptions of some of the factors relevant to this discussion and other forward-looking statements in this Annual Report.

**Management Overview**

The Telecom Group ended the 2011 fiscal year in a solid financial situation as well as with a strong market position. The Telecom Group has continued to expand its customer base, reaching 4.1 million fixed lines in service, 1.6 million fixed Internet accesses, and 20.3 million mobile subscribers (including Personal and Núcleo subscribers). To promote the expansion of business and the growth of the customer base in every business segment, total additions in PP&E and intangible assets were increased by 33% from 2010, amounting to P\$3,359 million in 2011, and increased by 15% from 2009 amounting to P\$2,534 million in 2010. Total additions in PP&E and intangible assets represented 18% and 17% of consolidated total revenues in 2011 and 2010, respectively.

Telecom is considered one of the leading companies in the Argentine telecommunications sector. The Company has attained this position without neglecting its commitment to generate economic value for its shareholders, demonstrating improvements in revenues and profitability. Telecom Argentina had consolidated net financial assets of P\$2,684 million as of December 31, 2011, compared to consolidated net financial assets of P\$1,224 million and P\$469 million as of December 31, 2010 and 2009, respectively. The strong cash flow generation has allowed Personal and Telecom Argentina to increase the level of capital expenditures and has allowed Telecom Argentina to pay P\$915 million in cash dividends during 2011 without incurring in financial indebtedness.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

The following discussion and analysis summarizes relevant measures of results of operations presenting items by nature. The Company believes that the presentation of the measure operating income before depreciation and amortization provides investors and financial analysts with appropriate information that is relevant to understanding the Company's past, present and future performance. Moreover, operating income before depreciation and amortization is one of the key performance measures used by Telecom's management for monitoring the Company's profitability and financial position, at each segment and at consolidated levels.

Continuing the trend of prior years, revenues in 2011 grew by 26% compared to 2010, reaching P\$18,498 million, and grew by 20% in 2010 compared to 2009, reaching P\$14,627 million. Operating income before depreciation and amortization in 2011 increased P\$1,141 million as compared to 2010, reaching P\$6,015 million (equivalent to 32% of total revenues), while in 2010 it increased P\$713 million as compared to 2009, reaching P\$4,874 million (equivalent to 33% of total revenues). Operating income increased P\$695 million in 2011 as compared to 2010, reaching P\$3,857 million (equivalent to 21% of total revenues) while in 2010 it increased P\$546 million as compared to 2009, reaching P\$3,162 million (equivalent to 22% of total revenues). Net income increased P\$593 million in 2011 as compared to 2010, reaching P\$2,542 million (equivalent to 14% of total revenues), while it increased P\$532 million in 2010 as compared to 2009, reaching P\$1,949 million (equivalent to 13% of total revenues).

Table of Contents

Our results of operations continue to be affected by the Pesification and freeze of regulated rates in the Fixed Services segment and macroeconomic factors. For a discussion of these and other factors that may affect our results of operations. See Years ended December 31, 2011, 2010 and 2009 Factors Affecting Results of Operations and Trend Information below.

For a detailed analysis of our results of operations for fiscal year 2011, see Years ended December 31, 2011, 2010 and 2009 below.

**Economic and Political Developments in Argentina**

Beginning in the second half of 2001 and through the first half of 2002, Argentina experienced a deep economic recession together with an overwhelming financial and political crisis. The rapid and radical nature of changes in the Argentine social, political, economic and legal environment created a very unstable macroeconomic environment. In January 2002, the Argentine government abandoned the Convertibility regime which had fixed the peso / U.S. dollar exchange rate at 1:1 and adopted emergency economic measures which converted and froze our rates for the voice-regulated services in the Fixed Services segment into pesos at a 1:1 peso / U.S. dollar ratio (referred to herein as Pesification ), among other measures. Capital outflows increased sharply, leading to a massive devaluation of the peso and an upsurge in inflation. By the end of 2002, the peso had devalued by 237% (having devalued 280% as of June 30, 2002) while the wholesale price index increased 118% and the consumer price index increased 41%.

After the abovementioned crisis, the Argentine economy began a new period of rapid growth. Argentina's GDP increased for six years in a row from 2003 to 2008, at an average rate of 8.5%. However, the international financial crisis affected the country and its growth rate decreased significantly to 0.9% in 2009. In 2010, the economy showed a rapid and strong recovery growing at a 9.2% rate, and this expansion continued through 2011 with an estimated growth rate of 8.9%. Inflation emerged as a main concern for the economy. According to official statistics reported by the INDEC, the consumer price index rose 8.5% in 2007, 7.2% in 2008, 7.7% in 2009, 10.9% in 2010 and 9.5% in 2011, while the wholesale price index increased 13.9% in 2007, 9.0% in 2008, 10.0% in 2009, 14.6% in 2010 and 12.7% in 2011. Nonetheless, since 2007, the public credibility of the INDEC as a reference for reporting Argentine economic statistics has been challenged. For further detail regarding Argentine economic conditions see Item 3 Key Information Risk Factors Risks relating to Argentina Inflation could accelerate, causing adverse effects on the economy and negatively impacting Telecom's margins.

During the period between 2005 and 2007, the peso remained relatively stable against the U.S. dollar, with US\$1.00 trading within a range of P\$2.86 to P\$3.16. However, the international financial crisis created uncertainty that affected the Argentine exchange rate, as reflected by a peso/dollar exchange rate increase of 9.5% and 10.1% in 2008 and 2009 per year, respectively. In the past two years, the peso/dollar exchange rate was relatively stable, ending 2010 at P\$3.98 per US\$1.00 and 2011 at P\$4.30 per US\$1.00, increasing 4.7% and 8.0% respectively.

In 2011, private consumption continued to be the main driver of economic expansion, along with good performance from the industrial and construction sectors. Expansive fiscal policies negatively affected fiscal surplus, and by the end of the 2011, the government started to tackle the problem by tightening its fiscal policy, mainly through the reduction of subsidies. Inflation remained at high levels, although slightly lower than 2010, and remains to be the major challenge for the future.

The most significant event of 2011 was the reelection of President Cristina Fernández de Kirchner with almost 54% of the votes. The elections were held in October 2011, amid a strong capital outflow with substantial international reserve losses. The government intended to attack this

problem with new measures to restrict access to foreign currency. These measures were especially directed to those whose only purpose was

Table of Contents

accumulating foreign currency. Initially, the measures hurt public confidence and intensified reserve losses. However, by the end of 2011, the macroeconomic scenario was calmer.

The combination of several factors led Argentina's economy to continue its growth trend during 2011. Among others, the most important factors were:

- The global economy experienced a high level of growth, but with a minor deceleration from 2010 impacted by the financial and fiscal crisis in the euro zone and the natural disasters that occurred in Japan in the beginning of 2011. The financial uncertainty generated by European economic problems strongly increased investor risk aversion and motivated a capital outflow from emerging markets. The Argentine market was not excluded from this situation. A positive factor was the substantial rise in the price of commodities, despite a slight decrease by the end of 2011.
- Private consumption continued driving demand at a fast level, mainly prompted by expansive fiscal policies, which increased the population's disposable income, coupled with a lax monetary policy that maintained real interest rates at low levels and promoted lending to the private sector. Consumption also increased as a result of an increase in salaries above consumer price growth. However, inflation remained at high levels and, according to INDEC, the annual inflation as of December 31, 2011 was 9.5%, which substantially differed from private estimates.
- Exports grew by 24%, amounting to US\$ 84.3 billion due to higher prices (up 16%) and higher export volumes (up 6%). Record commodities prices and an increased demand of industrial goods from Brazil gave support to this expansion. The trade surplus amounted to US\$ 10.3 billion, a decrease of 11% as compared to 2010. The trade surplus decline was caused partially by an increase of 31% in imports. This growth was due to higher prices (up 10%) and higher volumes of imported goods (up 19%). The energy sector led imports growth, more than doubling its imports from 2010.
- The primary fiscal surplus totaled P\$4.921 million, showing a decrease of 80% compared to 2010, representing approximately 0.3% of the GDP. The deterioration of fiscal results was due to the growth in public spending, which was mainly consigned to public subsidies to the energy and transport sectors and social transfers. The economic recovery based in consumption, exports increase and inflation led to an annual growth in public spending of 33%, while public revenues increased 27% annually. As a result, public spending reached a record level of 30% of the GDP. Also, a significant portion of the government revenues came from extraordinary transfers from the BCRA and national pension funds.
- The exchange rate remained relatively stable throughout 2011 with a depreciation of 8.0%, ending 2011 at P\$4.30 per US\$1.00 dollar. The BCRA intervened in the exchange market acquiring and selling foreign currency when supply and demand grew strongly, avoiding a nominal appreciation and high volatility on the exchange rate. The Government also implemented measures to increase control over the exchange market requiring an authorization from the AFIP when acquiring foreign currency. While this measure generated uncertainty in the beginning, by the end of 2011 the situation seemed controlled.
- Monetary indicators continued to show signs of expansion during 2011, supporting the economic activity with low real interest rates. Also, the BCRA lent the Government international reserves to serve public debt, maintained a floating policy for foreign exchange and

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

participated in the spot and futures exchange market. Loans to the private sector expanded by 48%, largely due to higher private consumption. The monetary base grew by approximately 39%, whereas foreign reserves totaled US\$ 46,376 million, decreasing 11% compared to 2010.

- The labor market evolution benefited from the economic performance, with an unemployment rate of 6.7% in the fourth quarter of 2011. Salaries expanded 29% annually according to INDEC.

- Argentina holds a solid position in terms of public indebtedness. Gross National Public Debt amounted to approximately US\$175 billion in September 2011, which represented approximately 42.7% of Argentina's GDP, not including securities that were eligible for, but not tendered in, 2005 and 2010. More than half of the total debt stock is held by National Public Sector Agencies (for example, the ANSES); 10.4% are bilateral performing debts and loans from multilateral credit organizations; 3.7% are debts in arrears, eligible for renegotiation within the Paris Club; and the remaining 33.4% are debts

Table of Contents

owed by the private sector, most of them in the form of public bonds or guaranteed loans. As a result, the portion of public debt exposed to market risk represents nearly one third of the total debt.

The Argentine economy ended 2011 with a high level of growth. The Argentine government is moving to consolidate fiscal surplus by reducing subsidies and stabilizing its debt financial condition, although inflation remains the major challenge. The international context remains a key factor to the Argentine economic performance for the following years, with commodities prices and a final resolution to the European financial problems being the main concerns.

The telecommunications sector had a satisfactory performance, taking advantage of the increase in public consumption to expand its customer base and increase the usage level of services provided to its customers, both in mobile and fixed businesses.

Because the substantial majority of our property and operations are located in Argentina, macroeconomic and political conditions in Argentina will continue to affect us. The Argentine government has exercised and continues to exercise significant influence over many aspects of the Argentine economy. Accordingly, Argentine governmental actions concerning the economy could significantly affect private sector entities in general and our operations in particular, as well as affect market conditions, prices and returns on Argentine securities, including ours. While the key factors of our business were strong in 2011, and our operating results have increased as a result of growth in our mobile and Internet business, our operating results, financial condition and cash flows remain vulnerable to fluctuations in the Argentine economy.

**Critical Accounting Policies**

Our Consolidated Financial Statements, prepared in accordance with IFRS, are dependent upon and sensitive to accounting methods, assumptions and estimates that we use as a basis for its preparation. We have identified the following critical accounting estimates and related assumptions and uncertainties inherent in our accounting policies, which we believe are essential to an understanding of the underlying financial reporting risks and the effect that these accounting estimates, assumptions and uncertainties have on our Consolidated Financial Statements.

Our accounting policies are fully described in Note 3 to our Consolidated Financial Statements. We believe that the following are the most critical judgment areas in the application of policies that currently affect our financial condition, results of operations and cash flows.

*Use of estimates*

IFRS involves the use of assumptions and estimates that may significantly affect the reported amounts of assets and liabilities and any accompanying financial information.

Management considers financial projections in the preparation of the financial statements as further described below. These financial projections anticipate scenarios deemed both likely and conservative based upon macroeconomic, financial and industry-specific assumptions. However, actual results may differ significantly from such estimates.

Variations in the assumptions regarding exchange rates, rates of inflation, level of economic activity and consumption, creditworthiness of our actual and potential customers, aggressiveness of our actual or potential competitors and technological, legal or regulatory changes could also result in significant differences from financial projections used by the Company for valuation and disclosure of items under IFRS.

The most important accounting estimates, those which require a high degree of subjective assumptions and judgments, are the following:

***Revenue recognition***

Revenues are recognized to the extent that it is probable that economic benefits will flow to the Telecom Group and their amount can be measured reliably. Revenues are stated net of estimated discounts and returns.

Table of Contents

Revenues from upfront connection fees for fixed, data and Internet services that are non-separable from the service are accounted for as a single transaction and deferred over the term of the contract or, in the case of indefinite period contracts, over the average period of the customer relationship (approximately nine years for the fixed telephony customers). Therefore, these revenues are influenced by the estimated expected duration of customer relationships for indefinite period contracts.

Revenues are also subject to estimations of the traffic measures. Unbilled revenues from the billing cycle dating to the end of each month are calculated based on the traffic and are accrued at the end of the month. In addition, revenues from unexpired prepaid calling cards are recognized on the basis of the minutes used, at the contract price per minute.

***PP&E and intangible assets***

*Useful lives and residual value*

We record PP&E and intangible assets at acquisition or construction cost. PP&E and intangible assets, except for indefinite useful life intangibles, are depreciated or amortized on a straight-line basis over their estimated useful lives. The determination of the depreciable amount of the assets and their useful lives involves significant judgment. The Company periodically reviews, at least at each financial year-end, the estimated useful lives of its PP&E and amortizing intangible assets.

*Recoverability assessment of PP&E and intangible assets with finite useful life*

At least at every annual closing date, we assess, whenever events or changes in circumstances indicate that PP&E and amortizing intangible assets may be impaired.

Under IFRS, the carrying value of a long-lived asset is considered impaired by the Company when the recoverable amount of such asset is less than its carrying value. In such event, a loss would be recognized based on the amount by which the carrying value exceeds the recoverable amount of the long-lived asset. The recoverable amount is the higher of the fair value (less costs to sell) and its value in use (present value of the future cash flows expected to be derived from the asset or cash generating unit). Once an impairment loss is identified and recognized, future reversal of impairment loss is permitted only if the indicators of the impairment no longer exist or have decreased.

The identification of impairment indicators and the estimation of the value in use for assets (or groups of assets or cash generating units) require management to make significant judgments concerning the validation of impairment indicators, expected cash flows and applicable discount rates. Estimated cash flows are based on significant Management's assumptions about the key factors that could affect future business performance such as the future market share, competition level, capital expenditures, salary increases, foreign exchange rates evolution, capital structure, capital cost, etc.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

For the years presented, the Company estimated that there are no indicators of impairment of assets that are subject to amortization.

However, changes in our current expectations and operating assumptions, including changes in our business strategy, technology, competition and/or changes in market conditions, and the outcome of the rates negotiations for regulated fixed services with the Argentine government, could significantly impact these judgments and could require future adjustments to the recorded assets.

### *Intangible assets with indefinite useful life PCS license*

The Company determined that Personal's PCS license met the definition of an indefinite-lived intangible asset for the years presented. Therefore, Personal does not amortize the cost of its license; however, Personal tests it annually for impairment. An impairment loss is recognized when the carrying amount exceeds the recoverable amount. The recoverability assessment of an indefinite-lived intangible asset such as the PCS license requires our Management to make assumptions about the future cash flows expected to be derived from such asset.

Table of Contents

Such estimated cash flows are based on significant Management's assumptions about the key factors that could affect future business performance such as the future market share, competition level, capital expenditures, salary increases, foreign exchange rates evolution, capital structure, discount rate, etc.

Personal's net cash flows projection is denominated in Argentine Pesos, its functional currency. However, due to the fact that there is no prevailing long-term discount rate in pesos available in the market, Personal: (a) has converted such peso-denominated cash flows into US dollars using future estimated exchange rates applicable to each period; and (b) has discounted these US dollar denominated cash flows at an annual US dollar rate of approximately 14% in order to obtain the recoverable value of intangible assets with indefinite useful life. Future cash flows estimates are based on Management's projections for a period not to exceed five years and then taken to perpetuity assuming a growth rate of 2% per annum.

Through this evaluation, it was determined that the carrying amount of the PCS license did not exceed the recoverable amount of the asset. As a result, no impairment has been recognized.

Our judgments regarding future cash flows may change due to future market conditions, competition, business strategy, the evolution of technology and other factors. These changes, if any, may require material adjustments to the carrying amount of the PCS license.

***Income Taxes and Recoverability assessment of deferred income tax assets***

We are required to estimate our income taxes (current and deferred) in each of the companies of the Telecom Group according to a reasonable interpretation of the tax law in effect in each jurisdiction where the companies operate. This process may involve complex estimates to determine taxable income and deductible and taxable temporary differences between the carrying amounts and the taxable amounts. In particular, deferred tax assets are recognized to the extent that future taxable income will be available against which they can be utilized. The measurement of the recoverability of deferred tax assets requires estimating future taxable income based on the Company's projections and takes into account conservative tax planning. If actual results differ from these estimates due to changes in tax authority's interpretations and the new fiscal jurisprudence, or we adjust those estimates in future periods, our financial position, results of operation and cash flows may be materially affected.

The measurement of current and deferred tax liabilities and assets is based on provisions of the enacted tax law and the effects of future changes in tax laws or rates are not anticipated.

***Receivables and payables valued at amortized cost***

Receivables and payables valued at amortized cost are initially recorded at their fair value, which is generally determined by using a discounted cash flow valuation method. The fair value under this method is estimated as the present value of all future cash flows discounted using an estimated discount rate, especially for long-term receivables and payables. The estimated discount rate used to determine the discounted cash flow of long-term receivables and payables is an annual rate in pesos ranging between 18% and 23% for years 2010 and 2009 and an annual rate

in pesos ranging between 19% and 28% for 2011. Additionally, an annual U.S. dollars rate of approximately 8% was used for discounting long-term receivables denominated in U.S. dollars during 2011. The difference between the initial fair value and the nominal amount of receivables and payables is recognized as finance income or expense using the effective interest method over the relevant period.

*Provisions*

We are subject to proceedings, lawsuits and other claims related to labor, civil, tax, regulatory and other matters. In order to determine the proper level of provisions relating to these contingencies, we assess the likelihood of any adverse judgments or outcomes related to these matters as well as the range of probable losses that may result from the potential outcomes. We consult with internal and external legal counsel on these matters. A determination of the amount of provisions required, if any, is made after careful analysis of each individual issue. Our determination of the required provisions may change in the future due to new developments in each matter, changes in jurisprudential precedents and tribunal decisions or changes in our method of resolving such matters, such as changes in settlement strategy.

Table of Contents

*Allowance for Doubtful Accounts*

We maintain an allowance for doubtful accounts to account for estimated losses resulting from the inability of our customers to make required payments. We base our estimates on the aging of our accounts receivable balances, our historical write-offs, customer creditworthiness and changes in our customer payment terms when evaluating the adequacy of our allowance for doubtful accounts. If the financial condition of our customers were to deteriorate, our actual write-offs could be higher than expected.

*Pension Benefits*

Collective bargaining agreements in Telecom Argentina provide benefits to union employees who retire upon reaching normal retirement age, or at an earlier time due to disability. These benefits consist of payments of a single lump sum equal to a one-month salary for every five years of service to the Company. There is no vested benefit obligation until the occurrence of these conditions. Actuarial assumptions and demographic data, as applicable, are used to measure the Company's obligation to provide these benefits. The Company does not make plan contributions or maintain separate assets to fund the benefits at retirement.

The actuarial assumptions used are based on market interest rates, expected levels of inflation and salary increases, past experience and Management's best estimate of future economic conditions. Changes in these assumptions may impact future benefit costs and obligations. These changes, if any, may require adjustments to the recorded liabilities.

**Years ended December 31, 2011, 2010 and 2009**

For purposes of these sections, the fiscal years ended December 31, 2011, 2010 and 2009 are called 2011, 2010 and 2009, respectively.

Our results of operations are determined in accordance with IFRS. The Telecom Group provides customers with a broad range of telecommunication services. To fulfill its purpose, it conducts different activities that are distributed among the companies in the Group. Each company represents an operating segment. These operating segments have been aggregated into the following segments according to the nature of the products and services provided and economic characteristics:

Segment	Company of the Telecom Group / Operating Segment
Fixed Services	Telecom Argentina S.A.
	Telecom Argentina USA, Inc.
	Micro Sistemas S.A. (i)
Personal Mobile Services	Telecom Personal S.A.

Núcleo Mobile Services      Springville S.A. (i)  
   Núcleo S.A.

---

(i) Dormant entity at December 31, 2011.

The main products and services in each segment are:

- Fixed Services: local area, national long-distance and international communications, supplementary services (including call waiting, itemized invoicing, voicemail, etc.), interconnection with other operators, data transmission (including private networks, point-to-point traffic, radio and TV signal transmission), Internet services (Broadband and Arnet Mobile), IT solution outsourcing and sales of equipment.
- Personal Mobile Services and Núcleo Mobile Services: voice communications, GSM and 3G mobile communications over UMTS / HSDPA / HSDPA+ networks (including high-speed mobile Internet content and applications download, multimedia messaging, online streaming, corporate e-mail, social network access and contacts save services) and sale of mobile communication devices (handsets, 3G modems and tablets).

Table of Contents

The following table shows our total revenues as a percentage of total consolidated revenues within our segments for the year ended December 31, 2011:

Segment	Total Revenues(1) (P\$ million)	Percentage of Consolidated Total Revenues
Fixed Services	5,369	28.9
Personal Mobile Services	12,470	67.2
Núcleo Mobile Services	714	3.9
<b>TOTAL</b>	<b>18,553</b>	<b>100.0</b>

(1) Includes service revenues, equipment sales and other income with third parties.

Management's explanations under (B) Results of Operations by Segment below regarding changes in financial condition and results of operations for years 2011, 2010 and 2009 related to segments of the Company have been provided based on financial information under IFRS as disclosed in Note 28 to our Consolidated Financial Statements. For the year 2011, the CEO assessed the operating segments performance both under Argentina GAAP and IFRS. During the years 2010 and 2009, the financial information provided to the CEO was based on Argentine GAAP. However, we believe that Management discussion based on IFRS provides a more useful and easier understanding of the Company's business and represents the measurement principles most consistent with those used in measuring the corresponding amounts in our Consolidated Financial Statements.

### ***Factors Affecting Results of Operations***

Described below are certain factors that may be helpful in understanding our operating results. These factors are based on the information currently available to our Management and may not represent all of the factors that are relevant to an understanding of our current or future results of operations. Additional information regarding trends expected to influence our results of operations in 2012 are analyzed below under Trend Information.

*Impact of Political and Economic Environment in Argentina.* Levels of economic activity affect our customers' consumption of local and long-distance traffic, the demand for new fixed lines, Broadband and mobile services and the levels of uncollectible accounts and disconnections. Demand for our services and the amount of revenues we collect is also affected by inflation, exchange rate variations and the rate of unemployment, among others. The same factors, but to a lower degree, affect the activity of Núcleo, that operates in Paraguay.

*Rate Regulation.* Revenue from our Fixed Services segment will depend principally on the number of lines in service, the minutes of use or traffic for local and long-distance services and the rates charged for services. The rates that Telecom Argentina charges in its fixed telephony service (including both monthly basic charges and measured service charges), installation charges, public telephone charges and charges for Internet Dial-Up traffic are subject to regulation. These rates were pesified and rate increases were frozen by the Argentine government in 2002. Telecom Argentina has been in discussions with regulators with respect to rate adjustments and, on March 6, 2006, Telecom Argentina signed the Letter of Understanding 2006 with the Argentine government which permits Telecom Argentina to raise certain of its regulated rates. However, the agreement is still subject to the implementation of certain administrative steps and the pending approval by the legislative branch.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Although the Company's Management expects that the contract renegotiation process will be satisfactorily completed, to date there is no certainty regarding either the outcome of the negotiations or the timing of such outcome. The impact of the rates pesification on Telecom Argentina's results of operations has been particularly relevant in recent years as a result of inflationary pressures on Telecom Argentina's costs structure. See Risk Factors and Economic and Political Developments in Argentina.

*Competition.* The Argentine telecommunications market has become increasingly competitive. Competition is mainly focused on fixed services for large customers, small enterprises and government, Internet and mobile services. To remain competitive, we must devote significant resources to capital expenditures, subscriber acquisitions costs and trade expenses (including advertising and selling commissions).

Table of Contents

Personal and Núcleo subscribers bases are expected to continue expanding in 2012 although at more moderate rates than those of recent years, especially in Broadband and mobile Internet subscribers. We aim to obtain high-value mobile subscribers and encourage consumption through the launch of new products and services. Value Added Services will continue to be one of the main drivers of revenue growth in the mobile services business.

In addition, Personal will participate in the spectrum auction and hopes to acquire spectrum to complete its Spectrum cap along throughout Argentina. We cannot ensure that Personal will be awarded the tender. If the spectrum is awarded to other existing or new competitors, it could adversely affect its competitive position or ability to offer mobile services to its customers on a competitive basis, and may require higher costs on capital expenditures regarding the construction of additional cell sites.

Also, an increase in competition between mobile service providers could be expected as a result of the implementation of the Number Portability Regulation that took place in March 2012, which could also result in higher subscriber retention costs in the future.

*Technology Developments and Capital Expenditures.* Improvements in technology influence demand for services and equipment by our customers. For example, demand for fixed-line telecommunications services has been affected by continued significant growth in mobile business. Growth in the fixed-services business at present is being driven by the expansion of Broadband for individuals and corporations and our continuous updating of commercial and support systems. The increase in Broadband adoption has also proven to be a critical factor in facilitating the offering of Value Added Services to customers and the bundling of services. In the fixed-services business, we must invest in our fixed-line network and information technology. Specifically, in Internet services, we must constantly upgrade our access technology and software, embrace emerging transmission technologies and improve the responsiveness, functionality, coverage and features of our services.

In the mobile business, we have seen an increase in the number of subscribers due to the implementation of 3G technology, a wider offer of smartphones and related services supported by this technology. To provide its subscribers with new and better services, Personal has to enhance its mobile networks by expanding the network infrastructure 3G technology and bandwidth for mobile data transmission.

*Devaluation of the peso.* The peso has been subject to significant devaluations in the past. The majority of our revenues are received in pesos whereas a portion of the materials and supplies related to the construction and maintenance of our networks and services are incurred in foreign currencies. Consequently, the Pesification of our regulated rates in the fixed services and the high level of competition is a limitation to transfer to our customers the fluctuations in the exchange rates between the peso and the U.S. dollar and other currencies. In addition, any devaluation of the peso against foreign currencies may increase operating costs and capital expenditures, which will adversely affect our results of operations, considering the net effect on revenues and costs.

*Increase in inflation.* In the past, Argentina has experienced periods of high inflation. In recent years, inflation levels have been increasing and have remained relatively high. The economic recovery, a higher increase in public spending or a fast devaluation of the Argentine peso could lead to higher inflation. Any increase in inflation levels not accompanied by an increase in the rates we charge our customers could adversely affect our results of operations in nominal and real terms.

*Tax pressures and litigation.* Local municipalities in the regions where we operate have introduced regulations and proposed various taxes and fees for the installation of infrastructure, equipment and expansion of fixed-line and mobile networks. Local and federal tax authorities have

brought an increasing number of claims against us. We disagree with these proceedings and we are contesting them. Also, jurisprudential changes in labor and pension matters have generated higher claims from employees and former employees and also increased claims from employees of a subcontractor alleging joint liability. We cannot assure you that the laws and regulations currently governing the economy or the telecommunications industry will not change, that the claims will be resolved in our favor, or that any changes to the existing laws and regulations will not adversely affect our business, financial condition, results of operations and cash flows as well.

Table of Contents**(A) Consolidated Results of Operations**

In the year ended December 31, 2011, we reported net income of P\$2,542 million, compared to net income of P\$1,949 million for the year ended December 31, 2010, and net income of P\$1,417 million for the year ended December 31, 2009.

Consolidated net revenues in 2011 were P\$18,553 million compared to P\$14,659 million in 2010 and P\$12,204 million in 2009. The increase of P\$3,894 million in 2011 (a 27% increase) can be largely attributed to the growth in the Personal Mobile Services segment and in Internet services included in the Fixed Services segment.

In 2011, operating expenses (including depreciation and amortization) totaled P\$14,696 million, representing an increase of P\$3,199 million, or 28%. The most significant changes in operating expenses included increases in employee benefit expenses and severance payments, taxes and fees with the Regulatory Authority (mainly caused by the increase in revenues), cost of equipment and handsets (due to an expansion of the subscriber base and customer upgrade of mobile handsets), commissions (as a result of the increase in the prepaid subscriber base), advertising (mainly as a result of Personal's rebranding and other promotional campaigns) and in fees for services, maintenance, materials and supplies (attributable to increased service costs related to call centers, higher supplies consumption and the effect of inflation on prices).

In 2010, operating expenses (including depreciation and amortization) totaled P\$11,497 million, representing an increase of P\$1,909 million, or 20% compared to 2009. The most significant changes in operating expenses included increases in employee benefit expenses and severance payments, taxes and fees with the Regulatory Authority (mainly caused by the increase in revenues), cost of equipment and handsets (due to an expansion of the subscriber base and customer upgrade of mobile handsets), commissions (as a result of the increase in the prepaid subscriber base), provisions (due to higher regulatory and tax claims) and fees for services, maintenance, materials and supplies (attributable to increased hired services, higher supplies consumption and the effect of inflation on prices).

Although the Argentine economy ended 2011 with a healthy level of growth, our fixed telephony service is still affected by the Pesification and freezing of regulated rates in early 2002; as a result, the increase in the 2011 structure of operating expenses for the Fixed Services segment (24%) is higher than the increase in total revenues (15%).

**(A.1) 2011 Compared to 2010**

	Year Ended December 31,				Change by segment(1)

(1) Includes the effect of eliminations of Intersegment transactions.

Table of Contents**Total revenues**

During 2011, total consolidated revenues increased by 27% to P\$18,553 million from P\$14,659 million in 2010, mainly driven by our mobile, Broadband and data transmission businesses.

Total consolidated revenues for 2011 and 2010 are comprised as follows:

	Years Ended December 31,			Change by segment(1)			Núcleo Mobile Services
	2011 (P\$ millions)	2010	Total Change %	Fixed Services	Personal Mobile Services (P\$ millions)		
Voice	9,184	8,247	11	937	206	632	99
Data	5,316	3,641	46	1,675	95	1,485	95
Internet	2,411	1,643	47	768	349	383	36
<b>Service Revenues</b>	<b>16,911</b>	<b>13,531</b>	<b>25</b>	<b>3,380</b>	<b>650</b>	<b>2,500</b>	<b>230</b>

Other income	55	32	72	23	20	3	
<b>Total Revenues</b>	<b>18,553</b>	<b>14,659</b>	<b>27</b>	<b>3,894</b>	<b>689</b>	<b>2,957</b>	<b>248</b>

(1) Net of the Intersegment revenues effect.

(2) This item is composed of voice, data and Internet equipment in each year.

**Voice**

Revenues from voice services increased 11% to P\$9,184 million in 2011 from P\$8,247 million in 2010. Such increase is largely due to a growth in the mobile subscriber base, as well as an increase in (i) the number of lines in service and (ii) the prices of our services in the Personal Mobile Services segment. Revenues from voice services represented 50% of our total consolidated revenues for 2011 compared to 56% of our total consolidated revenues for 2010.

*Fixed services*

Revenues from voice services represented 58% of our total Fixed Services segment revenues for 2011 compared to 62% of our total segment revenues for 2010.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Voice services mainly include revenues from monthly basic charges, charges for supplementary services, measured service (national and international calls) and public telephone service. Charges for supplementary services include call waiting, call forwarding, three-way calling, caller ID, direct inwards dialing, toll-free service and voicemail, among others. Measured service charges are based on the number and duration of calls. Measured service revenues depend on the number of lines in service, the volume of usage, the number of new lines installed and applicable rates. Most of our customers are billed monthly. They also include interconnection services (which primarily include access, termination and long-distance transport of calls), international long-distance service (which reflect payments made under bilateral agreements between the Company and foreign telecommunications carriers covering inbound international long-distance calls) and revenues related to billing and collection services charged to other operators.

Monthly basic charges and charges for supplementary services increased 8% to P\$1,017 million in 2011 from P\$944 million in 2010. Such growth was due to an increase in the number of lines in service and in the level of service packages sold as well as increased prices for non-regulated services during the period.

Measured service charges increased 6% to P\$1,182 million in 2011 from P\$1,110 million in 2010. Such increase was due to higher local calls and an increase in the number of lines in service. However, some fixed services rates remained unchanged since 2002 as a result of the Pesification and freeze of rates imposed by the Argentine government.

Public telephone service and other services increased 1% to P\$158 million in 2011 from P\$157 million in 2010.

Table of Contents

Interconnection services increased 10% to P\$422 million in 2011 from P\$382 million in 2010. The increase in 2011 was due to higher fixed traffic transported and terminated on Telecom's fixed-line network.

International long-distance services increased 11% to P\$103 million in 2011 from P\$93 million in 2010. The increase in 2011 was due to higher international long-distance incoming traffic.

Revenues related to billing and collection services charged to other operators increased 3% to P\$104 million in 2011 from P\$101 million in 2010. Such increase is mainly a consequence of a growth in CPP billing and collected.

Other wholesale revenues increased 6% to P\$118 million in 2011 from P\$111 million in 2010.

*Personal Mobile services*

Revenues from voice services represented 46% of our total Personal Mobile Services segment revenues for 2011 compared to 54% for 2010.

Voice services mainly include revenues from monthly basic charges, airtime usage charges and roaming charges to our customers for their use of our and other carriers' networks, CPP, TLRD and roaming charges to other mobile service providers whose customers use our network.

Monthly basic charges increased 30% to P\$1,698 million in 2011 from P\$1,307 million in 2010. Airtime usage charges increased 4% to P\$2,022 million in 2011 from P\$1,947 million in 2010. Roaming charges and other services to our customers increased 41% to P\$281 million in 2011 from P\$199 million in 2010. Such increases were mainly due to an increase in the subscriber base, an increase in the volume of total traffic and an increase in prices of our services.

CPP and TLRD increased 8% to P\$1,503 million in 2011 from P\$1,392 million in 2010. Such increases were mainly due to an increase in the volume of traffic in Argentina.

Roaming charges and other services decreased 11% to P\$223 million in 2011 from P\$250 million in 2010 mainly due to a reduction in the volume of traffic in Argentina.

In *Núcleo Mobile Services* segment, voice revenues increased 39% to P\$353 million in 2011 compared to P\$254 million in 2010 mainly due to an increase in the subscriber base and the appreciation of the Paraguayan currency with respect to the Argentine Peso.

**Data and Internet**

Revenues from data and Internet services increased 46% to P\$7,727 million in 2011 from P\$5,284 million in 2010. Revenues from data and Internet represented 42% of our total consolidated revenues for 2011 compared to 36% of our total consolidated revenues for 2010.

Internet revenues in the Fixed segment increased 29% to P\$1,553 million in 2011 from P\$1,204 million in 2010. The increase was mainly due to the growth in the number of Internet accesses and to the increase in the average price of fixed charge services as a result of the completion of promotions granted to customers in the first months of subscription. As of December 31, 2011, the number of Internet accesses reached approximately 1,550,000 compared to 1,380,000 as of December 31, 2010, increasing by 12%.

Revenues from data services in the Fixed segment increased 19% to P\$583 million in 2011 from P\$488 million in 2010. The increase was mainly due to an increase in virtual private network services, private data network services replacing the point-to-point service, leases of circuits, dedicated lines and the growth in data center services. The majority of our revenues from data transmission services is denominated in U.S. dollars and, consequently, in 2011 and 2010, was affected by the fluctuations in the exchange rate between the peso and the U.S. dollar resulting in an increase in data transmission revenues.

In the Mobile Services segments, data and Internet services mainly include SMS, MMS, GPRS and Internet. Revenues from data and Internet in the Personal Mobile segment increased 55% to P\$5,256 million in 2011 from P\$3,388 million in 2010. The increase was largely due to Personal's efforts to create value added services which featured technological innovation. In particular, revenues of SMS increased 53% to P\$3,847 million in 2011 from P\$2,519 million in 2010 (the monthly average number of SMS grew 20% to 5,559 million

Table of Contents

in 2011 from 4,614 million in 2010). Also, mobile Internet revenues in the Personal Mobile segment increased 98% to P\$774 million in 2011 from P\$391 million in 2010. Such increases were mainly due to an increase in the subscriber base.

Equipment

Revenues from equipment increased by 45% to P\$1,587 million in 2011 from P\$1,096 million in 2010. In the Fixed Services segment, the increase was mainly due to higher sales of Aladino telephone sets and data equipment. In the Mobile Services segments, the increases were primarily due to the expansion of the subscriber base and a higher selling price of handsets sold. Additionally, as a result of technological advances and our provision of state-of-the-art services, more subscribers upgraded their mobile handsets.

Other income

Other income mainly includes penalties collected from suppliers, as a result of delays in deliveries of goods or matters related to the quality of the services provided, and gain on the sale of PP&E. During 2011, other income increased 72% to P\$55 million from P\$32 million in 2010 mainly due to an increase in penalties collected from suppliers and gain on sale of PP&E.

For a further breakdown of our consolidated total revenues, see Results of Operations by Segment below.

**Operating expenses (without depreciation and amortization)**

Total operating expenses increased by P\$2,753 million totaling P\$12,538 million in 2011, representing a 28% increase as compared to 2010. The increase was mainly due to increases in employee benefit expenses and severance payments, fees for services, maintenance, materials and supplies, taxes and fees with the Regulatory Authority, commissions and cost of equipments and handsets.

	Years Ended December 31,			Change by segment(1)			
	2011 (P\$ millions)	2010	Total Change %	Fixed Services	Personal Mobile Services	Núcleo Mobile Services

---

(1) Net of the Intersegment transactions effect.

Table of Contents

*Employee benefit expenses and severance payments*

During 2011, employee benefit expenses and severance payments were P\$2,609 million, representing a 32% increase from 2010. This was primarily due to salary increases that Telecom implemented across all segments and the increase in Telecom's headcount. In the Fixed Services segment, the increases were mainly due to salary increases and severance payments and termination benefits, as a result of an increase in the number of employees who retired or were dismissed. In the Personal Mobile Services segment there was a 10% increase in the number of employees (from 4,370 employees in 2010 to 4,820 employees in 2011).

*Interconnection costs and other telecommunications charges*

Interconnection costs and other telecommunications charges includes interconnection costs, lease of circuits and costs of international outbound calls, which reflect payments made under bilateral agreements between Telecom Argentina and international carriers in connection with outgoing calls made by our customers. Additionally, the cost of roaming and TLRD is included in the Mobile Services segments. In 2011, interconnection costs and other telecommunications charges amounted to P\$1,503 million compared with P\$1,377 million in 2010. In the Fixed Services segment, the increase was mainly due to higher traffic volume in Telecom Argentina's network and price increases resulting from inflation and an increase in traffic of outgoing calls originated in our network that required the payment of fees to transport such calls across international lines. In the Mobile Services segments, the increase was mainly due to higher traffic volume resulting from Personal's network and higher costs of roaming due to an increase in mobile traffic among mobile operators as a consequence of a growth in the total subscriber base.

*Fees for services, maintenance, materials and supplies*

Expenses related to fees for services, maintenance, materials and supplies increased 28% to P\$1,702 million in 2011 from P\$1,326 million in 2010. This increase was mainly due to higher maintenance costs across all segments (maintenance costs for network equipment, buildings and vehicles, maintenance costs of radio base systems and maintenance of BlackBerry equipment) due to inflation and devaluation of the Argentine Peso against the U.S. dollar which amounted to P\$133 million, and also to higher fees for services related to call centers (a P\$157 million increase from 2010 to 2011).

*Taxes and fees with the Regulatory Authority*

Taxes and fees with the Regulatory Authority increased 27% to P\$1,595 million in 2011 from P\$1,254 million in 2010, mainly due to charges of turnover tax (P\$166 million increase from 2010 to 2011) as a result of the increase in total revenues during 2011 and from taxes with the Regulatory Authority (an increase of P\$95 million from 2010).

*Commissions*

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Commissions increased by P\$374 million, or 33%, to P\$1,515 million in 2011 from P\$1,141 million in 2010. The increase was mainly due to the growth in the subscriber base, higher commissions for the distribution of prepaid cards and higher commissions for collections as a result of the increase in revenues and a higher transaction cost for collection services.

### *Cost of equipments and handsets*

During 2011, the cost of equipment and handsets increased to P\$1,657 million from P\$1,207 million in 2010, representing a 37% increase. The increase in costs of mobile handsets in both Mobile Services segments was P\$446 million and was primarily attributable to an expansion of the subscriber base and the number of customers that upgraded their handsets as a result of technological advances and new service offerings, especially smartphones. The increase in costs in the Fixed Services segment was P\$4 million and it was primarily attributable to an increase in sales of Aladino telephone sets and data equipment.

### *Advertising*

Costs related to advertising increased by P\$158 million, or 36%, to P\$599 million in 2011. During 2011, Telecom Argentina continued its focus on advertising campaigns as a result of competition in the Internet

Table of Contents

services market while Personal recorded higher media advertising expenses including the effects of the rebranding in 2011.

*Provisions*

During 2011, we recorded P\$225 million in provisions compared to P\$130 million recorded in 2010, representing a 73% increase. The increase in 2011 was mainly due to an increase in labor claims amounting to P\$78 million and the increase of civil and commercial proceedings amounting to P\$10 million.

*Bad Debt Expense*

In 2011, bad debt expense amounted to P\$169 million, an increase of 42% as compared to 2010, representing less than 1% of consolidated total revenues in both years. The increase was mainly due to higher revenues in 2011 (+ 27%) as compared to 2010 and higher aging of the accounts receivables of voice retail customers.

*Other Operating Expenses*

Other operating expenses, which include costs associated with Value Added Services, transportation costs, insurance, energy and rentals, among others, increased 18% to P\$964 million in 2011 from P\$815 million in 2010 primarily as a result of the increase in the prices of transportation, fuel and electricity used to provide Telecom Argentina's services. Other operating expenses also were higher due to higher costs associated with the provision of Value Added Services to Personal and Núcleo's subscribers, higher costs of site leases and international and satellite connectivity.

**Operating income before depreciation and amortization**

Our consolidated operating income before depreciation and amortization was P\$6,015 million in 2011 and P\$4,874 million in 2010, representing 32% and 33% of total consolidated revenues, respectively.

**Depreciation of PP&E and Amortization of Intangible Assets**

Depreciation of PP&E and amortization of intangible assets increased by P\$446 million, or 26%, to P\$2,158 million during 2011. This increase was the result of higher investment in PP&E and intangible assets and higher amortization of subscriber acquisitions costs ( SAC ) in the Personal

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Mobile Services segment, partially offset by a reduction in the level of depreciation due to the end of the amortization period for certain assets.

For a further breakdown of our consolidated operating expenses, see [Results of Operations by Segment](#) below.

### Operating income

During 2011, consolidated operating income was P\$3,857 million, representing an increase of P\$695 million or 22% from 2010. Operating income represented 21% of consolidated total revenues in 2011 versus 22% in 2010.

	Years Ended December 31,		% of Change 2011-2010 Increase

<b>Operating income</b>	<b>3,857</b>	<b>3,162</b>	<b>22</b>
<i>As % of total revenues</i>	21	22	

Table of Contents

**Financial results, net**

During 2011, Telecom recorded a net financial gain of P\$80 million compared to a net financial loss of P\$137 million in 2010. The positive change in the net financial results was mainly due to lower net foreign currency exchange losses by P\$88 million as compared to 2010 (including the effect of loss on derivatives), lower interest on financial debt of P\$60 million and higher interest on cash equivalents, investments and receivables by P\$77 million partially offset by higher interest on provisions by P\$42 million.

**Income tax expense**

The Company's income tax charge includes three effects: (i) the current tax payable for the year pursuant to fiscal legislation applicable to each company in the Telecom Group; (ii) the effect of applying the deferred tax method on temporary differences arising out of the asset and liability valuation according to fiscal versus accounting criteria; and (iii) the analysis of recoverability of deferred tax assets.

(i) Regarding current tax expenses, Telecom Argentina, Personal and Núcleo generated tax profit in fiscal year 2011, resulting in an income tax payable of P\$1,434 million versus P\$1,067 million in 2010. Telecom Argentina's income tax expense assessed in 2011 amounted to P\$379 million as compared to P\$408 million in 2010; Personal's, in 2011, amounted to P\$1,039 million compared to P\$655 million in 2010; and Núcleo's, in 2011, amounted to P\$16 million compared to P\$4 million in 2010.

(ii) Regarding the deferred tax, in 2011 and 2010, Telecom Argentina recorded a deferred tax benefit of P\$99 million and P\$79 million, respectively; Personal recorded a deferred tax loss of P\$58 million and P\$79 million in 2011 and 2010, respectively; and Núcleo generated a P\$2 million gain in 2011 and a P\$6 million loss in 2010, totaling P\$44 million of deferred tax benefit in 2011 and P\$6 million of deferred tax expense in 2010.

(iii) Regarding the analysis of recoverability of deferred tax assets, Personal recorded a valuation allowance for deferred tax assets of P\$5 million and P\$3 million in 2011 and 2010, respectively, while no charges were recorded for Telecom Argentina and Núcleo in those years.

**Net income**

For 2011, we recorded net income of P\$2,542 million (14% of total consolidated revenues), of which P\$2,513 million is attributable to the owners of the Parent. The Fixed Services segment accounted for a gain of P\$516 million, the Personal Mobile Services segment accounted for a P\$1,937 million gain and the Núcleo Mobile Services segment accounted for a gain of P\$89 million, representing 8%, 15% and 12% of the total segment revenues, respectively.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

For 2010, we recorded net income of P\$1,949 million (13% of total consolidated revenues), of which P\$1,935 million are attributable to the owners of the Parent. The Fixed Services segment accounted for a gain of P\$592 million, the Personal Mobile Services segment accounted for a P\$1,315 million gain and the Núcleo Mobile Services segment accounted for a gain of P\$42 million, representing 11%, 14% and 9% of the total segment revenues, respectively.

**Total revenues**

During 2010, total consolidated revenues increased by 20% to P\$14,659 million from P\$12,204 million in 2009, mainly driven by our mobile, Broadband and data transmission businesses.

Total consolidated revenues for 2010 and 2009 are comprised as follows:

	Years Ended December 31,			Total Change %	Fixed Services (P\$ millions)	Change by segment(1)		Núcleo Mobile Services
	2010 (P\$ millions)	2009				Personal Mobile Services (P\$ millions)

- 
- (1) Net of the Intersegment revenues effect.
- (2) This item is composed of voice, data and Internet equipment in each year.

**Voice**

Revenues from voice services increased 9% to P\$8,247 million in 2010 from P\$7,545 million in 2009. Such increase is largely due to a growth in the mobile subscriber base, as well as an increase in (i) the number of lines in service and (ii) the prices of our services in the Personal Mobile Services segment. Revenues from voice services represented 56% of our total consolidated revenues for 2010 compared to 62% of our total consolidated revenues for 2009.

Table of Contents

The breakdown of revenues from voice services by segment is the following:

*Fixed services*

Revenues from voice services represented 62% of our total Fixed Services segment revenues for 2010 compared to 67% of our total segment revenues for 2009.

Monthly basic charges and charges for supplementary services increased 12% to P\$944 million in 2010 from P\$844 million in 2009. Such growth was due to an increase in the number of lines in service and in the level of service packages sold that also raised their prices during the period.

Measured service charges increased 1% to P\$1,110 million in 2010 from P\$1,095 million in 2009. Such increases were due to higher local calls and an increase in the number of lines in service. However, some fixed services rates remained unchanged since 2002 as a result of the Pesification and freeze of rates imposed by the Argentine government.

Public telephone service and other services decreased 2% to P\$157 million in 2010 from P\$161 million in 2009 mainly due to a reduction in use of public telephone service.

Interconnection services decreased 2% to P\$382 million in 2010 from P\$389 million in 2009. Such decreases were due to lower fixed traffic transported and terminated on Telecom's fixed-line network.

International long-distance services decreased 8% to P\$93 million in 2010 from P\$101 million in 2009. Such decreases were due to lower international long-distance incoming traffic.

Revenues related to billing and collection services charged to other operators increased 3% to P\$101 million in 2010 from P\$98 million in 2009. Such increases are mainly a consequence of a growth in CPP billing and collected.

Other wholesale revenues remained stable at P\$111 million and P\$109 million during 2010 and 2009, respectively.

*Personal Mobile services*

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Revenues from voice services represented 54% of our total Personal Mobile Services segment revenues for 2010 compared to 59% for 2009.

Monthly basic charges increased 18% to P\$1,307 million in 2010 from P\$1,109 million in 2009. Airtime usage charges increased 15% to P\$1,947 million in 2010 from P\$1,690 million in 2009. Roaming charges and other services to our customers increased 45% to P\$199 million in 2010 from P\$137 million in 2009. Such increases were mainly due to an increase in the subscriber base, an increase in the volume of total traffic and an increase in prices of our services.

CPP and TLRD increased 4% to P\$1,392 million in 2010 from P\$1,343 million in 2009. Roaming charges and other services to the operators increased 10% to P\$250 million in 2010 from P\$228 million in 2009. Such increases were mainly due to an increase in the volume of traffic in Argentina.

In the *Núcleo Mobile Services* segment, voice revenues increased P\$13 million to P\$254 million in 2010.

### **Data and Internet**

Revenues from data and Internet services increased 40% to P\$5,284 million in 2010 from P\$3,780 million in 2009. Revenues from data and Internet represented 36% of our total consolidated revenues for 2010 compared to 31% of our total consolidated revenues for 2009.

Revenues from Internet services in the Fixed Services segment increased mainly due to the increase in the number of Internet accesses and average price of fixed charge services, as a result of the completion of promotions granted to customers in the first months of subscription. As of December 31, 2010, the number of Internet accesses reached approximately 1,380,000, compared to 1,214,000 as of December 31, 2009, increasing by 14%. Revenues from data services in the Fixed Services segment increased mainly due to an increase in virtual private network services, private data network services replacing the point-to-point service, leases of circuits, dedicated lines and growth in data center services. The majority of our revenues from data transmission services is denominated in U.S. dollars and, consequently, in 2010, was affected by the fluctuations in the exchange rate between the peso and the U.S. dollar resulting in an increase in data transmission revenues.

Table of Contents

In the Mobile Services segments, data and Internet services mainly include SMS, MMS, GPRS and Internet services. The increase of P\$1,131 million was largely due to Personal and Núcleo's efforts to create Value Added Services which feature technological innovations. The total number of Personal's subscribers was approximately 6,333,000 as of December 31, 2010, representing an increase of approximately 13% as compared to 2009. The increase was driven by increased penetration in the mobile services market in Argentina. As of December 31, 2010, the subscriber base in Argentina amounted to approximately 11,426,000 prepaid subscribers, or 70% of the total subscriber base, approximately 2,111,000 post-paid subscribers, or 13% of the total subscriber base and approximately 2,796,000 Cuentas Claras plan subscribers, or 17% of the total subscriber base. Núcleo had approximately 1,868,000 mobile subscribers as of December 31, 2010, which represented an increase of approximately 4% as compared to 2009. As of December 31, 2010, Núcleo had approximately 1,604,000 prepaid subscribers, representing 86% of Núcleo's total mobile subscriber base.

Equipment

During 2010, revenues from equipment increased by 30%, to P\$1,096 million in 2010 from P\$845 million in 2009. In the Fixed Services segment, the increase in 2010 was mainly due to higher sales of Aladino telephone sets (which, depending on the model, permit SMS services or video calls from fixed lines), data equipment and higher sales of modems as a result of the expansion of our Internet services. In the Mobile Services segments, handset sales increased due to the expansion of the subscriber base and a higher selling price of handsets sold. Additionally, as a result of technological advances and the increased quality of our services, more customers upgraded their mobile handsets.

Other income

Other income mainly includes penalties collected from suppliers, as a result of delays in deliveries of goods or matters related to the quality of the services provided, and gain on the sale of PP&E. During 2010, other income decreased 6% to P\$32 million from P\$34 million in 2009 mainly due to a reduction in the sales of PP&E.

For a further breakdown of our consolidated total revenues, see Results of Operations by Segment below.

**Operating expenses (without depreciation and amortization)**

Total operating expenses increased by P\$1,742 million totaling P\$9,785 million in 2010, representing a 22% increase as compared to 2009. The increase was mainly due to increases in employee benefit expenses and severance payments, fees for services, maintenance, materials and supplies, taxes and fees with the Regulatory Authority, commissions and cost of equipment and handsets.

(1) Net of the Intersegment transactions effect

Table of Contents

*Employee benefit expenses and severance payments*

During 2010, employee benefit expenses and severance payments were P\$1,975 million, representing a 26% increase from 2009. This was primarily due to salary increases that Telecom implemented across all segments and the increase in Telecom's headcount. In the Fixed Services segment, severance payments and termination benefits grew as a result of an increase in the number of employees who retired or were dismissed in 2010, partially offset by a 2% decrease in the number of employees (from 11,079 employees in 2009 to 10,845 employees in 2010). On the other hand, in the Personal Mobile Services segment, there was a 15% increase in the number of employees (from 3,799 employees in 2009 to 4,370 employees in 2010).

*Interconnection costs and other telecommunications charges*

Interconnection costs and other telecommunications charges includes interconnection costs, lease of circuits and costs of international outbound calls, which reflect payments made under bilateral agreements between Telecom Argentina and international carriers in connection with outgoing calls made by our customers. Additionally, the cost of roaming and TLRD is included in the Mobile Services segments. In 2010, interconnection costs and other telecommunications charges amounted to P\$1,377 million compared with P\$1,361 million in 2009. The increase was mainly due to higher traffic volume in Telecom Argentina's and Personal's network and price increases as a result of inflation, partially offset by lower traffic of outgoing calls originated in our network, requiring fees to transport calls across international lines.

*Fees for services, maintenance, materials and supplies*

Expenses related to fees for services, maintenance, materials and supplies increased 24% to P\$1,326 million in 2010 from P\$1,071 million in 2009. This increase was mainly due to higher maintenance costs across all segments due to inflation and devaluation of the Argentine peso against the U.S. dollar (maintenance costs for network equipment, buildings and vehicles, maintenance costs of radio base systems and maintenance of BlackBerry equipment), which amounted to P\$91 million and also to higher service costs related to call centers (a P\$119 million increase from 2009 to 2010).

*Taxes and fees with the Regulatory Authority*

Taxes and fees with the Regulatory Authority expenses increased 24% to P\$1,254 million in 2010 from P\$1,011 million in 2009, mainly due to charges of turnover tax (P\$138 million increase from 2009 to 2010) as a result of the increase in total revenues during 2010 and from taxes with the Regulatory Authority (an increase of P\$70 million from 2009).

*Commissions*

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Commissions increased by P\$199 million, or 21%, to P\$1,141 million in 2010 from P\$942 million in 2009. The increase was mainly due to the growth in the subscriber base, higher commissions for the distributions of prepaid cards and higher commissions for collections as a result of the increase in revenues and a higher transaction cost for collection services.

### *Cost of equipment and handsets*

During 2010, the cost of equipment and handsets increased to P\$1,207 million from P\$906 million in 2009, representing a 33% increase. The increase in costs of mobile handsets in both Mobile Services segments was P\$292 million and it was primarily attributable to an expansion of the subscriber base and the number of customers that upgraded their handsets as a result of technological advances and new service offerings. The increase in costs in the Fixed Services segment was P\$9 million and it was primarily attributable to an increase in sales of Aladino telephone sets, data equipment and higher sales of modems as a result of the growth in the Internet business.

### *Advertising*

Costs related to advertising increased by P\$84 million, or 24%, to P\$441 million in 2010. During 2010, Telecom Argentina continued its focus on advertising campaigns as a result of competition in the Internet services market while Personal recorded higher media advertising expenses as a result of efforts to retain and expand its subscriber base.

Table of Contents

*Provisions*

During 2010, we recorded P\$130 million in provisions compared to P\$48 million recorded in 2009, representing a 171% increase. The increase in 2010 was due to an increase in regulatory and tax claims amounting to P\$70 million (including the effect of 2009 reversal of P\$36 million related to Law No. 26,476 Tax Regularization Regime), an increase in labor claims amounting to P\$6 million and the increase of civil and commercial proceedings amounting to P\$6 million.

*Bad Debt Expense*

In 2010, bad debt expense amounted to P\$119 million, a decrease of 9% as compared to 2009, representing less than 1% of consolidated total revenues. The decrease was mainly due to an improvement in the collection of receivables in both Fixed Services and Personal Mobile Services segments.

*Other Operating Expenses*

Other operating expenses, which include costs associated with Value Added Services, transportation costs, insurance, energy and rentals, among others, increased 27% to P\$815 million in 2010 from P\$644 million in 2009 primarily as a result of the increase in the prices of transportation, fuel and electricity used to provide Telecom Argentina's services. Other operating expenses also were higher due to higher costs associated with the provision of Value Added Services to Personal and Núcleo's subscribers, higher costs of site leases and international and satellite connectivity.

**Operating income before depreciation and amortization**

Our consolidated operating income before depreciation and amortization was P\$4,874 million in 2010 and P\$4,161 million in 2009, representing 33% and 34% of total consolidated revenues, respectively. The increase was primarily due to the increase of operating expenses by 22% versus higher consolidated revenues of 20%.

**Depreciation of PP&E and Amortization of Intangible Assets**

Depreciation of PP&E and amortization of intangible assets increased by P\$167 million, or 11%, to P\$1,712 million during 2010. This increase was the result of higher investment in PP&E and intangible assets, partially offset by a reduction in the level of depreciation due to the end of the amortization period for certain assets and by a reduction in the amortization of subscriber acquisitions costs ( SAC ) in the Personal Mobile Services segment.

For a further breakdown of our consolidated operating expenses, see Results of Operations by Segment below.

**Operating income**

During 2010, consolidated operating income was P\$3,162 million, representing an increase of P\$546 million, or 21%, from 2009. Operating income represented 22% of consolidated total revenues in 2010 versus 21% in 2009. This increase was mainly due to growth in operating income before depreciation and amortization by 17%, net of the increase of 11% in depreciation and amortization.

	Years Ended December 31,		% of Change
	2010	2009	2010-2009
	(P\$ million / %)		Increase

<i>As % of total revenues</i>	22	21	

Table of Contents

**Financial results, net**

During 2010, Telecom recorded a net financial loss of P\$137 million compared to a net financial loss of approximately P\$414 million in 2009, representing a 67% decrease as compared to 2009. The decrease in the net financial loss was mainly due to lower net foreign currency exchange losses by P\$204 million as compared to 2009 (including the effect of loss on derivatives), lower interest on financial debt of P\$69 million (as a consequence of the total cancellation of Personal's financial debt in 2010 and of Telecom Argentina's financial debt in 2009) and to higher interest on cash equivalents, investments and receivables by P\$32 million.

**Income tax expense**

The Company's income tax charge includes three effects: (i) the current tax payable for the year pursuant to fiscal legislation applicable to each company in the Telecom Group; (ii) the effect of applying the deferred tax method on temporary differences arising out of the asset and liability valuation according to fiscal versus accounting criteria; and (iii) the analysis of recoverability of deferred tax assets.

(i) Regarding current tax expenses, Telecom Argentina, Personal and Núcleo generated tax profit in fiscal year 2010 resulting in an income tax payable of P\$1,067 million versus P\$818 million in 2009. Telecom Argentina's income tax expense assessed in 2010 amounted to P\$408 million as compared to P\$301 million in 2009; Personal's, in 2010, amounted to P\$655 million compared to P\$511 million in 2009; and Núcleo's, in 2010, amounted to P\$4 million compared to P\$6 million in 2009.

(ii) Regarding the deferred tax, in 2010 and 2009, Telecom Argentina recorded a deferred tax benefit of P\$79 million and P\$29 million, respectively; Personal recorded a deferred tax loss of P\$79 million and P\$6 million in 2010 and 2009, respectively, and Núcleo generated a P\$6 million loss in 2010, and no deferred tax was recorded in 2009 for Núcleo, totaling P\$6 million of deferred tax expense in 2010 and a P\$22 million deferred tax benefit in 2009.

(iii) Regarding the analysis of recoverability of deferred tax assets, Personal recorded a valuation allowance for deferred tax assets of P\$3 million and P\$2 million in 2010 and 2009, respectively, while no charges were recorded for Telecom Argentina and Núcleo in those years.

**Net income**

For 2010, we recorded net income of P\$1,949 million (13% of total consolidated revenues), of which P\$1,935 million are attributable to the owners of the Parent. The Fixed Services segment accounted for a gain of P\$592 million, the Personal Mobile Services segment accounted for a P\$1,315 million gain and the Núcleo Mobile Services segment accounted for a gain of P\$42 million, representing 11%, 14% and 9% of the total segment revenues, respectively.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

For 2009, we recorded net income of P\$1,417 million (12% of consolidated total revenues), of which P\$1,405 million is attributable to the owners of the Parent. The Fixed Services segment accounted for a gain of P\$478 million, the Personal Mobile Services segment accounted for a P\$906 million gain and the Núcleo Mobile Services segment accounted for a gain of P\$33 million, representing 10%, 12% and 9% of the total segment revenues, respectively.

Table of Contents**(B) Results of Operations by Segment****(B.1) Fixed Services Segment**

Results of operations for our Fixed Services segment for 2011, 2010 and 2009 are comprised as follows:

	2011	Years Ended December 31,		% of Change	
		2010 (P\$ millions)	2009	2011-2010 Increase/(Decrease)	2010-2009
Total revenues	6,254	5,419	4,873	15	11
Operating expenses (without depreciation and amortization)	(4,614)	(3,725)	(3,154)	24	18

<b>Net income</b>	<b>516</b>	<b>592</b>	<b>478</b>	<b>(13)</b>	<b>24</b>

**Total revenues**

During 2011, total revenues from our Fixed Services segment increased by 15% to P\$6,254 million from P\$5,419 million in 2010. During 2010, total revenues from our Fixed Services segment increased by 11% to from P\$4,873 million in 2009. Regulated voice services are still affected by rate Pesification. The increase in each year was due to several factors, including a 12% and 14% growth in Internet accesses in 2011 and 2010, respectively, and a 1% growth in the number of lines in service in both years, which increased the monthly consumption of the offered services.

Total revenues from our Fixed Services segment for 2011, 2010 and 2009 are comprised as follows:

	2011	Years Ended December 31,		% of Change	
		2010 (P\$ millions)	2009	2011-2010 Increase/(Decrease)	2010-2009

--------------------------------------	--------------	--------------	--------------	-----------	-----------

---

(1) This item is composed of voice, data and Internet equipment in each year.

*Voice - retail*

Revenues from voice - retail represented 38% of our total segment revenues for 2011 compared to 41% of our total segment revenues for 2010 and 43% of our total segment revenues for 2009. Revenues from voice - retail increased 7% to P\$2,357 million in 2011 from P\$2,211 million in 2010 and increased 5% in 2010 from P\$2,100 million in 2009.

Table of Contents

Voice - retail mainly includes revenues from monthly basic charges (which differ for residential, professional and commercial customers), charges for supplementary services, measured service (national and international calls) and public telephone service. Charges for supplementary services include call-waiting, call-forwarding, three-way calling, caller ID, direct inwards dialing, toll-free service and voicemail, among others. Measured service charges are based on the number and duration of calls. Measured service revenues depend on the number of lines in service, the volume of usage, the number of new lines installed and applicable rates. Most of our customers are billed monthly.

Monthly basic charges and charges for supplementary services increased 8% to P\$1,017 million in 2011 from P\$944 million in 2010 and increased 12% from P\$844 million in 2009. Such growth was due to an increase in the number of lines in service and in the level of service packages as well as increased prices in non-regulated services during the periods.

Measured service charges increased 6% to P\$1,182 million in 2011 from P\$1,110 million in 2010 and increased 1% from P\$1,095 million in 2009. Such increases were due to higher local calls and an increase in the number of lines in service. However, some fixed services rates remained unchanged since 2002 as a result of the Pesification and freeze of rates imposed by the Argentine government.

Public telephone service and other services increased 1% to P\$158 million in 2011 from P\$157 million in 2010 and decreased 2% from P\$161 million in 2009.

*Voice - wholesale*

Revenues from voice - wholesale represented 12% of our total segment revenues for 2011 compared to 13% and 14% in 2010 and 2009, respectively. Revenues from voice-wholesale increased 9% to P\$747 million in 2011 from P\$687 million in 2010 and decreased 1% from P\$697 million in 2009.

Voice-wholesale mainly includes interconnection services (which primarily include access, termination and long-distance transport of calls), international long-distance services (which reflect payments made under bilateral agreements between the Company and foreign telecommunications carriers covering inbound international long-distance calls) and revenues related to billing and collection services charged to other operators.

Interconnection services increased 10% to P\$422 million in 2011 from P\$382 million in 2010 and decreased 2% from P\$389 million in 2009. The increase in 2011 was due to higher fixed traffic transported and terminated on Telecom's fixed line network while the decrease in 2010 was due to a reduction of such traffic.

International long-distance service services increased 11% to P\$103 million in 2011 from P\$93 million in 2010 and decreased 8% from P\$101 million in 2009. The increase in 2011 was due to higher international long-distance incoming traffic while the decrease in 2010 was due to a reduction of such traffic.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Revenues related to billing and collection services charged to other operators increased 3% to P\$104 million in 2011 from P\$101 million in 2010 and increased 3% from P\$98 million in 2009. Such increases are mainly consequence of a growth in CPP billing and collected.

Other wholesale revenues increased 6% to P\$118 million in 2011 from P\$111 million in 2010, which were similar to P\$109 million in 2009.

### *Data and Internet*

Revenues from data and Internet represented 34% of our total segment revenues in 2011 compared to 31% and 27% in 2010 and 2009, respectively. Revenues from data and Internet services increased 26% to P\$2,136 million in 2011 from P\$1,692 million in 2010 and increased 28% from P\$1,319 million in 2009.

Revenues from Internet increased 29% to P\$1,553 million in 2011 from P\$1,204 million in 2010 and increased 30% from P\$926 million in 2009. The increase was mainly due to the growth in the number of Internet accesses and to the increase in the average price of fixed charge services as a result of the completion of promotions granted to customers in the first months of subscription. As of December 31, 2011, the number of Internet accesses increased approximately 12% to 1.6 million from 1.4 million as of December 31, 2010 and increased 14% from 1.2 million as of December 31, 2009.

Table of Contents

Revenues from data services increased 19% to P\$583 million in 2011 from P\$488 million in 2010 and increased 24% from P\$393 million in 2009. The increase was mainly due to an increase in virtual private network services, private data network services replacing the point-to-point service, leases of circuits, dedicated lines and the growth in data center services. The majority of our revenues from data transmission services is denominated in U.S. dollars and, consequently, in 2011 and 2010, was affected by the fluctuations in the exchange rate between the peso and the U.S. dollar resulting in an increase in data transmission revenues.

*Equipment*

Revenues from equipment increased by 27%, to P\$89 million in 2011 from P\$70 million in 2010 and increased 63% from P\$43 million in 2009. The increase was mainly due to higher sales of Aladino telephone sets and data equipment. In particular, we recorded P\$25 million and P\$14 million due to construction contracts during 2011 and 2010, respectively.

*Intersegment*

Intersegment revenues mainly includes interconnection services, which primarily include access, termination and transport of calls, leases of circuits, revenues related to billing and collection services charged.

During 2011, our intersegment revenues increased 20% to P\$885 million from P\$739 million in 2010 and increased 8% from P\$687 million in 2009. This increase was mainly due to higher revenues on leases of circuits to Personal as part of the growth of its network traffic. The intersegment revenues are eliminated at consolidated level.

*Other Income*

Other income mainly includes penalties collected from suppliers, as a result of delays in deliveries of goods or matters related to the quality of the services provided, and gain on sale of PP&E. During 2011, other income increased 100% to P\$40 million from P\$20 million, mainly due to an increase in penalties collected from suppliers and gain on sale of PP&E. In 2010, other income decreased 26% from P\$27 million in 2009 mainly due to a reduction in sales of PP&E.

**Operating Expenses (without depreciation and amortization)**

During 2011, total operating expenses for the Fixed Services segment increased 24% to P\$4,614 million in 2011 from P\$3,725 million in 2010 and increased 18% from P\$3,154 million in 2009. The increase was mainly due to increases in employee benefit expenses and severance payments, fees for services, maintenance, materials and supplies, taxes and fees with the Regulatory Authority and provisions.

Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Detailed below are the major components of our operating expenses for the years ended December 31, 2011, 2010 and 2009 related to our Fixed Services segment:

	2011	Year Ended December 31, 2010 (P\$ millions)	2009	% of Change 2011-2010 2010-2009 Increase/(Decrease)	
Employee benefit expenses and severance payments	1,949	1,502	1,213	30	24
Interconnection costs and other telecommunications charges	497	456	430	9	6
Fees for services, maintenance, materials and supplies	815	679	601	20	13
Taxes and fees with the Regulatory Authority	367	304	270	21	13
Commissions	139	100	89	39	12
Cost of equipment	59	55	46	7	20
Advertising	154	142	118	8	20
Provisions	164	71	16	131	344
Bad debt expenses	28	24	33	17	(27)
Other operating expenses	442	392	338	13	16
<b>Total Fixed Services</b>	<b>4,614</b>	<b>3,725</b>	<b>3,154</b>	<b>24</b>	<b>18</b>

Table of Contents

*Employee benefit expenses and severance payments*

During 2011, employee benefit expenses and charges for severance payments were approximately P\$1,949 million, representing a 30% increase from P\$1,502 million in 2010. In 2010, these charges increased 24% from P\$1,213 million in 2009. The increase was mainly due to salary increases and severance payments and termination benefits, as a result of an increase in the number of employees who retired or were dismissed, and an increase in the number of employees in this segment in 2011. The Fixed Services segment had 11,092, 10,845 and 11,079 employees as of December 31, 2011, 2010 and 2009, respectively.

*Interconnection costs and other telecommunications charges*

Interconnection costs and other telecommunications charges includes interconnection costs, lease of circuits and costs of international outbound calls, which reflect payments made under bilateral agreements between Telecom Argentina and international carriers in connection with outgoing calls made by our customers.

In 2011 interconnection costs and other telecommunications charges amounted to P\$497 million, representing an increase of 9% from P\$456 million in 2010. In 2010 these charges increased 6% from P\$430 million in 2009. The increase was mainly due to higher traffic volume resulting from Telecom Argentina's network and price increases resulting from inflation and an increase in outgoing traffic originated in our network that required the payment of fees to transport such calls across international lines.

*Fees for Services, Maintenance, Materials and Supplies*

During 2011, fees for services, maintenance, materials and supplies increased 20% to P\$815 million from P\$679 million in 2010 and increased 13% from P\$601 million in 2009. The increase was mainly due to higher maintenance costs for network equipment, buildings and utility vehicles, the increase in the prices of certain supplies due to the effects of inflation and higher costs of services, especially those related to call centers (a P\$28 million increase from 2010 to 2011 and a P\$11 million increase from 2009 to 2010), as a result of an increase in the commercial activity, as well as cleaning and security fees (a P\$17 million increase from 2010 to 2011 and a P\$12 million increase from 2009 to 2010).

*Taxes and fees with the Regulatory Authority*

Expenses related to taxes and fees with the Regulatory Authority increased 21% to P\$367 million in 2011 from P\$304 million in 2010 and increased 13% from P\$270 million in 2009, mainly due to charges of turnover tax (a P\$33 million increase from 2010 to 2011 and a P\$28 million increase from 2009 to 2010) as a result of the increase in total revenues during both years.

*Commissions*

During 2011, costs relating to commissions amounted to approximately P\$139 million, representing an increase of 39% as compared to P\$100 million in 2010. In 2010, these charges increased 12% from P\$89 million in 2009. The increase in both years was mainly due to higher commissions for collections as a result of increased sales and higher transaction cost for collection services.

*Cost of Equipment*

During 2011, 2010 and 2009 we recorded P\$59 million, P\$55 million and P\$46 million in cost of equipment, respectively. The increases in costs incurred were primarily attributable to increased sales of Aladino telephone sets and data equipment (including P\$14 million and P\$10 million due to construction contracts in 2011 and 2010, respectively).

Table of Contents

*Advertising*

During 2011, we recorded P\$154 million in costs of advertising representing an increase of 8% as compared to P\$142 million recorded in 2010. In 2010, these charges increased 20% from P\$118 million in 2009. Telecom Argentina continued its advertising campaigns as a result of competition in the Internet services market.

*Provisions*

During 2011, we recorded P\$164 million in provisions compared to P\$71 million recorded in 2010 and P\$16 million recorded in 2009. The increase in 2011 was mainly due to the higher labor claims for approximately P\$75 million and higher regulatory and tax claims for approximately P\$19 million, partially offset by a reduction in trade claims. In 2010 the increase was mainly due to the higher trade claims for approximately P\$8 million and higher regulatory and tax claims for approximately P\$48 million (including the effect of 2009 reversal P\$36 million related to Law No. 26,476 Tax Regularization Regime), partially offset by a reduction in labor claims.

*Bad Debt Expenses*

In 2011, bad debt expenses amounted to P\$28 million, representing an increase of 17% from P\$24 million in 2010. The increase was mainly due to higher aging in accounts receivables of voice wholesale and data customers, partially offset by lower aging in accounts receivables of voice retail customers. In 2010 these charges decreased 27% from P\$33 million in 2009. The charges in each year represented less than 1% of the Fixed Services segment total revenues.

*Other Operating Expenses*

Other operating expenses include accrued expenses such as transportation costs, insurance, international and satellite connectivity, energy and rentals.

During 2011, our other operating expenses amounted to P\$442 million compared to P\$392 million in 2010 and P\$338 million in 2009. The increase in both years was primarily due to the increase in prices of transportation, fuel and electricity used to provide Telecom Argentina's services.

**Operating Income before depreciation and amortization**

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Our operating income before depreciation and amortization from the Fixed Services segment was P\$1,640 million in 2011, P\$1,694 million in 2010 and P\$1,719 million in 2009, representing 26%, 31% and 35% of total segment revenues, respectively. The decrease was mainly due to the fact that the annual increase in operating costs exceeded the increase in total revenues which are still affected by rate Pesification.

### **Depreciation of PP&E and Amortization of Intangible Assets**

Depreciation expenses were P\$818 million in 2011, P\$776 million in 2010 and P\$721 million in 2009. The increase was mainly due to assets acquired during 2011 and 2010, partially offset by a reduction in the level of depreciation due to the end of the amortization period for certain assets.

### **Operating Income**

Operating income represented 13%, 17% and 20% of total segment revenues in 2011, 2010 and 2009, respectively. In 2011, the operating income from our Fixed Services segment decreased 10% to P\$822 million from P\$918 million in 2010. In 2010, operating income decreased 8% from P\$998 million in 2009. The decrease in both years was mainly due to a reduction in our operating income before depreciation and amortization and an increase in depreciation and amortization as explained above.

Table of Contents

The following table shows our operating income from the Fixed Services segment in 2011, 2010 and 2009 and its percentage of total revenues in each year.

	2011	Years Ended December 31,		% of Change	
		2010	2009	2011-2010	2010-2009
		(P\$ million / %)		Increase / (Decrease)	
Operating income before depreciation and amortization	1,640	1,694	1,719	(3)	(1)
<i>As % of total revenues</i>	26	31	35		
Depreciation and amortization	(818)	(776)	(721)	5	8
<i>As % of total revenues</i>	(13)	(14)	(15)		
<b>Operating income</b>	<b>822</b>	<b>918</b>	<b>998</b>	<b>(10)</b>	<b>(8)</b>
<i>As % of total revenues</i>	13	17	20		

**Financial results, net**

During 2011, we recorded a net financial loss of P\$27 million compared to a net financial income of P\$3 million in 2010. The decrease in our financial results was mainly attributed to lower interest from investments of approximately P\$17 million and higher interest of approximately P\$21 million related to provisions for legal claims and severance payments and termination benefits. In addition, during 2011, a net foreign currency exchange gain of P\$4 million was recorded.

During 2010, we recorded a net financial income of P\$3 million compared to a net financial loss of P\$247 million in 2009. In addition, interest from current investments increased by P\$6 million compared to 2009. During 2010 no interest on financial debt was recorded, whereas interest on financial debt in 2009 amounted to P\$73 million. Additionally, in 2010, the devaluation of the peso against the U.S. dollar was approximately 5%. This situation generated a net foreign currency exchange loss of P\$1 million. In 2009, the devaluation of the peso against the U.S. dollar was approximately 10% and 14% against the euro. This situation generated a net foreign currency exchange loss in 2009 of P\$199 million (including the effect of derivative financial instruments entered into to hedge foreign exchange exposure). The decrease in net foreign currency exchange loss was mainly due to the total cancellation of our total debt during the last quarter of 2009.

**Income tax expense**

As previously mentioned, the income tax charge includes three effects (See Years ended December 31, 2011, 2010 and 2009 Income Tax ).

During 2011, our Fixed Services segment recorded an income tax expense of P\$279 million compared to P\$329 million in 2010 and P\$273 million in 2009. The decrease in 2011 was mainly due to the decrease in our pre-tax income compared to 2010. The increase in 2010 was mainly due to the increase in our pre-tax income compared to 2009.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

The income tax expense in 2011 was mainly attributable to the recognition of current income tax expense (amounting to P\$379 million), partially offset by income generated by a deferred tax on temporary differences arising out of the asset and liability valuations according to fiscal versus accounting criteria (amounting to P\$100 million). The income tax expense in 2010 was mainly attributable to the recognition of current income tax expense (amounting to P\$408 million), partially offset by income generated by a deferred tax on temporary differences arising out of the asset and liability valuations according to fiscal versus accounting criteria (amounting to P\$79 million). The income tax expense in 2009 was mainly attributable to the recognition of current income tax expense (amounting to P\$301 million), partially offset by income generated by a deferred tax on temporary differences arising out of the asset and liability valuations according to fiscal versus accounting criteria (amounting to P\$28 million).

### **Net Income**

For 2011, 2010 and 2009, the Fixed Services segment recorded net income of P\$516 million, P\$592 million and P\$478 million, respectively. The decrease in 2011 was mainly due to a reduction in our operating income and the loss recorded in our financial results, net compared to the gain recorded in 2010, partially offset by a reduction in the income tax expense as detailed above. The increase in 2010 was mainly due to the gain

Table of Contents

recorded in our financial results, net compared to the loss recorded in 2009 partially offset by a reduction in our operating income and the increase of the income tax expense as detailed above.

**(B.2) Personal Mobile Services Segment**

Results of operations from our Personal Mobile Services segment for 2011, 2010 and 2009 are comprised as follows:

	2011	Years Ended December 31, 2010 (P\$ millions)	2009	% of Change 2011-2010 2010-2009 Increase/(Decrease)	
Total revenues	12,563	9,571	7,674	31	25
Operating expenses (without depreciation and amortization)	(8,452)	(6,549)	(5,364)	29	22
<b>Operating income before depreciation and amortization</b>	<b>4,111</b>	<b>3,022</b>	<b>2,310</b>	<b>36</b>	<b>31</b>
Depreciation and amortization	(1,190)	(841)	(740)	41	14
<b>Operating income</b>	<b>2,921</b>	<b>2,181</b>	<b>1,570</b>	<b>34</b>	<b>39</b>
Other income from investments			13	n/a	n/a
Financial results, net	118	(129)	(158)	n/a	(18)
Income tax expense	(1,102)	(737)	(519)	50	42
<b>Net income</b>	<b>1,937</b>	<b>1,315</b>	<b>906</b>	<b>47</b>	<b>45</b>

**Total revenues**

During 2011, total revenues from our Personal Mobile Services segment increased by 31% to P\$12,563 million from P\$9,571 million in 2010 and increased 25% from P\$7,674 million in 2009. The increase in each year was mainly due to the growth in the subscriber base, the increase in prices of our services and the increase in the monthly consumption of the offered services, primarily data and Internet services.

An important monthly operational measure used in the Personal Mobile Services segment is ARPU, which we calculate by dividing adjusted total service revenues excluding outcollect wholesale roaming, cell site rental and reconnection fee revenues (divided by 12 months) by the average number of subscribers during the period. ARPU is not a measure calculated in accordance with IFRS and our measure of ARPU may not be calculated in the same manner as similarly titled measures used by other companies. In particular, certain components of service revenues are excluded from Personal's ARPU calculations presented in this Annual Report. Our Management believes that this measure is helpful in assessing the development of the subscriber base in the Personal Mobile Services segment. The following table shows the reconciliation of total service revenues to such revenues included in the ARPU calculations:

	2011	Years Ended December 31, 2010 (P\$ millions)	2009
<b>Total service revenues(1)</b>	<b>11,076</b>	<b>8,541</b>	<b>6,871</b>

Components of service revenues not included in the ARPU calculation:

Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Outcollect wholesale roaming	(210)	(229)	(216)
Cell sites rental	(18)	(24)	(14)
Reconnection fees	(82)	(57)	(31)
<b>Adjusted total service revenues included in the ARPU calculation</b>	<b>10,766</b>	<b>8,231</b>	<b>6,610</b>
Average number of subscribers during the year (thousands)	17,433	15,426	13,562

---

(1) Certain components of service revenues are not included in the ARPU calculation. Includes Intersegment revenues for P\$93 million in 2011, P\$58 million in 2010 and P\$41 million in 2009.

Table of Contents

During 2011, ARPU increased 16% to approximately P\$51 per customer per month compared to approximately P\$44 per customer per month in 2010. ARPU reached P\$41 per customer per month in 2009.

The total number of Personal s subscribers increased approximately 1% to 18,193,000 as of December 31, 2011 from 16,333,000 as of December 31, 2010 and increased 13% from 14,475,000 as of December 31, 2009. The increase in both years was fueled by increased penetration in the mobile services market in Argentina. As of December 31, 2011, the subscriber base in Argentina amounted to approximately 12,414,000 prepaid subscribers, or 68% of the total subscriber base, approximately 2,640,000 post-paid subscribers, or 15% of the total subscriber base and approximately 3,139,000 Cuentas Claras plan subscribers, or 17% of the total subscriber base.

Revenues from our Personal Mobile Services segment for 2011, 2010 and 2009 are comprised as follows:

	Years Ended December 31,			% of Change	
	2011	2010 (P\$ millions)	2009	2011-2010 Increase	2010-2009
Voice - retail	4,001	3,453	2,936	16	18
Voice - wholesale	1,726	1,642	1,571	5	5
Data	4,482	2,997	2,150	49	39
Internet	774	391	173	98	126
<b>Services Revenues</b>	<b>10,983</b>	<b>8,483</b>	<b>6,830</b>	<b>29</b>	<b>24</b>

Other income	15	12	7	25	71
<b>Subtotal third party revenues</b>	<b>12,470</b>	<b>9,513</b>	<b>7,633</b>	<b>31</b>	<b>25</b>
Intersegment	93	58	41	60	41
<b>Total Personal Mobile Services Revenues</b>	<b>12,563</b>	<b>9,571</b>	<b>7,674</b>	<b>31</b>	<b>25</b>

*Voice-retail*

Revenues from voice - retail represented 32% of our total segment revenues in 2011 compared to 36% and 38% of our total segment revenues in 2010 and 2009, respectively. Revenues from voice - retail increased 16% to P\$4,001 million in 2011 from P\$3,453 million in 2010 and increased 18% from P\$2,936 million in 2009.

Voice - retail mainly includes revenues from monthly basic charges, airtime usage charges and roaming charges billed to our customers for their use of our and other carriers networks.

Monthly basic charges increased 30% to P\$1,698 million in 2011 from P\$1,307 million in 2010 and increased 18% from P\$1,109 million in 2009. Airtime usage charges increased 4% to P\$2,022 million in 2011 from P\$1,947 million in 2010 and increased 15% from P\$1,690 million in 2009. Roaming charges billed and other services increased 41% to P\$281 million in 2011 from P\$199 million in 2010 and increased 45% from P\$137 million in 2009. Such increases were mainly due to an increase in the subscriber base, an increase in the volume of total traffic and an increase in the prices of our services.

*Voice-wholesale*

Revenues from voice - wholesale represented 14% of our total segment revenues in 2011 compared to 17% and 20% of our total segment revenues in 2010 and 2009, respectively. Revenues from voice - wholesale increased 5% to P\$1,726 million in 2011 from P\$1,642 million in 2010 and increased 5% from P\$1,571 million in 2009.

Voice - wholesale mainly includes revenues from CPP, TLRD and roaming charges billed to other mobile service providers whose customers use our network.

CPP and TLRD increased 8% to P\$1,503 million in 2011 from P\$1,392 million in 2010 and increased 4% from P\$1,343 million in 2009. Such increases were mainly due to increased traffic volume in Argentina.

Table of Contents

Roaming charges billed and other services decreased 11% to P\$223 million in 2011 from P\$250 million in 2010 while these charges increased 10% from P\$228 million in 2009. The decrease in 2011 was due to a reduction in the traffic volume in Argentina while the increase in 2010 was mainly due to an increase in such traffic volume.

*Data and Internet*

Data and Internet services mainly include SMS, MMS, GPRS and Internet. Data and Internet represented 42%, 35% and 30% of our total segment revenues for 2011, 2010 and 2009, respectively.

Revenues from data mainly include SMS, MMS and other value added services. Revenues from data increased 49% to P\$4,482 million in 2011 from P\$2,997 million in 2010. Revenues from data increased 39% in 2010 from P\$2,150 million in 2009. The increase was largely due to Telecom Personal's efforts to create value added services which featured technological innovation.

In particular, revenues of SMS increased 53% to P\$3,847 million in 2011 from P\$2,519 million in 2010 (the monthly average number of SMS growth 20% to P\$5,559 million in 2011 from P\$4,614 million in 2010). Revenues of SMS increased 38% in 2010 from P\$1,821 million in 2009 (the monthly average number of SMS growth 52% in 2010 from 3,034 million in 2009).

Revenues from Internet increased 98% to P\$774 million in 2011 from P\$391 million in 2010. Revenues from Internet increased 126% in 2010 from P\$173 million in 2009. Such increases were mainly due to an increase in the subscriber base.

*Equipment*

Equipment revenues consist primarily of revenues from the mobile handsets sold to new and existing subscribers and to agents and other third-party distributors. The revenues associated with the sale of mobile handsets and related expenses are recognized when the products are delivered and accepted by the subscribers, agents and other third-party distributors.

During 2011, handset revenues increased 45% to P\$1,472 million from P\$1,018 million in 2010 and increased 28% from P\$796 million in 2009. The increases were primarily due to the expansion of the subscriber base and a higher selling price of handsets sold. Additionally, as a result of technological advances and our provision of state-of-the-art services, more subscribers upgraded their mobile handsets.

*Intersegment*

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Intersegment revenues mainly include services rendered to Telecom Argentina and primarily consist in monthly basic charges, airtime usage charges and Value Added Services. During 2011, our intersegment revenues increased 60% to P\$93 million in 2011 from P\$58 million in 2010 and increased 41% from P\$41 million in 2009. The intersegment revenues are eliminated at the consolidated level.

### *Other Income*

Other income mainly includes penalties collected from suppliers, as a result of delays in deliveries of goods or matters related to the quality of the services provided. During 2011, other income was P\$15 million, representing an increase of 25% from P\$12 million in 2010 and increased 71% from P\$7 million in 2009.

### **Operating Expenses (without depreciation and amortization)**

Total operating expenses in our Personal Mobile Services segment increased 29% to P\$8,452 million in 2011 from P\$6,594 million in 2010 and increased 22% from P\$5,364 million in 2009. In line with our increases in revenues, during 2011 and 2010, all items in the cost structure of the Personal Mobile Services segment experienced material increases, except for bad debt expenses in 2010. This trend reflects increases in certain costs related to acquiring and retaining customers, taxes, commissions associated with sales and expansion of the customer service staff.

Table of Contents

Detailed below are the major components of the operating expenses for the years ended December 31, 2011, 2010 and 2009 in the Personal Mobile Services segment:

	2011	Years Ended December 31, 2010 (P\$ millions)	2009	% of Change 2011-2010 2010-2009 Increase/(Decrease)	
Employee benefit expenses and severance payments	605	433	324	40	34
Interconnection costs and other telecommunications charges	1,618	1,428	1,381	13	3
Fees for services, maintenance, materials and supplies	949	691	523	37	32
Taxes and fees with the Regulatory Authority	1,205	934	726	29	29
Commissions	1,353	1,051	869	29	21
Cost of equipment	1,585	1,139	851	39	34
Advertising	400	266	216	50	23
Provisions	61	59	31	3	90
Bad debt expenses	134	92	96	46	(4)
Other operating expenses	542	456	347	19	31
<b>Total Personal Mobile Services(1)</b>	<b>8,452</b>	<b>6,549</b>	<b>5,364</b>	<b>29</b>	<b>22</b>

(1) Includes intersegment cost from Fixed Services Segment of P\$880 million, P\$733 million and P\$686 million in 2011, 2010 and 2009, respectively, in Interconnection costs and other telecommunications charges, fees for services, maintenance, materials and supplies, commissions and other operating expenses. These costs are eliminated at the consolidated level.

*Employee benefit expenses and severance payments*

During 2011, employee benefit expenses and severance payments charges increased 40% to P\$605 million from P\$433 million in 2010 and increased 34% from P\$324 million in 2009. The increase was mainly due to the salary increases that Personal implemented and the increase in the number of full-time employees. The Personal Mobile Services segment had 4,820, 4,370 and 3,799 employees as of December 31, 2011, 2010 and 2009, respectively.

*Interconnection Costs and other telecommunications charges*

During 2011, interconnection costs and other telecommunications charges increased 13% to P\$1,618 million in 2011 from P\$1,428 in 2010 and increased 3% from P\$1,381 million in 2009. The increase was mainly due to higher traffic volume resulting from Personal's network and higher costs of roaming due to an increase in mobile traffic among mobile operators as a consequence of a growth in the total subscriber base. Interconnection costs and other telecommunications charges includes intersegment costs from Fixed Services Segment of P\$648 million, P\$540 million and P\$505 million in 2011, 2010 and 2009, respectively, that are eliminated at consolidated level.

*Fees for services, Maintenance, Materials and Supplies*

In 2011, fees for services, maintenance, materials and supplies expenses increased 37% to P\$949 million from P\$691 million in 2010 and increased 32% from P\$523 million in 2009. The increase was mainly due to an increase in the rates for the principal services received caused by the effects of inflation, higher service costs related to call centers (a P\$106 million increase from 2010 to 2011 and a P\$111 million increase from 2009 to 2010), as a result of an increase in the commercial activity and higher maintenance costs of radio base systems and maintenance of BlackBerry equipment. Fees for services, maintenance, materials and supplies expenses includes intersegment costs from Fixed Services Segment of P\$122 million, P\$92 million and P\$86 million in 2011, 2010 and 2009, respectively, that are eliminated at consolidated level.

Table of Contents

*Taxes and fees with the Regulatory Authority*

During 2011, taxes and fees with the Regulatory Authority increased 29% to P\$1,205 million from P\$934 million in 2010 and increased 29% from P\$726 million in 2009. The increase in each year was mainly attributable to the increase in total segment revenues.

*Commissions*

In 2011, commissions increased 29% to P\$1,353 million from P\$1,051 million in 2010 and increased 21% from P\$869 million in 2009. These increases were mainly due to a growth in commercial activity and a growth in the subscriber base. Commissions include intersegment cost from Fixed Services Segment of P\$61 million, P\$55 million and P\$52 million in 2011, 2010 and 2009, respectively, that are eliminated at consolidated level.

*Cost of Equipment*

During 2011, the cost of equipments and handsets sold increased 39% to P\$1,585 million from P\$1,139 million in 2010 and increased 34% from P\$851 million in 2009. The increase was mainly due to an increase of approximately 18% and 12% in the quantity of handsets sold in 2011 and 2010, respectively, as a consequence of an expansion of the subscriber base, and an increase in customer upgrades of mobile handsets, as a result of technological advances and new service offerings, especially smartphones. Also, the increase in the cost of equipments and handsets sold was due to an increase in the average handset unit costs, primarily due to the effect of the excise taxes not charged to the customers (known as the Technological Tax).

*Advertising*

During 2011, advertising expenses including media, promotional and institutional campaigns, amounted to P\$400 million, representing an increase of 50% from P\$266 million in 2010. During 2010, these costs increased 23% from P\$216 million in 2009. This variation was mainly due to higher media advertising expenses for approximately P\$91 million and P\$23 million in 2011 and 2010, respectively, including in 2011 the effects of the Personal rebranding, and other promotional campaigns for approximately P\$43 million and P\$27 million, as a result of efforts to retain and expand the mobile subscriber base.

*Provisions*

During 2011, we recorded P\$61 million in provisions compared with P\$59 million and P\$31 million recorded in 2010 and 2009, respectively. The increase in 2011 was mainly due to higher claims recorded, in particular an increase in labor claims for P\$29 million, partially offset by lower trade claims for P\$19 million and regulatory and tax claims for P\$8 million. The increase in 2010 was mainly due to the higher claims

recorded, in particular an increase in labor claims for P\$7 million, trade claims for P\$16 million and regulatory and tax claims for P\$5 million.

*Bad Debt Expenses*

In 2011 bad debt expenses amounted to P\$134 million, representing an increase of 46% from P\$92 million in 2010. The increase was mainly due to higher revenues in 2011 (+31 %) as compared to 2010 and higher aging in accounts receivables in voice retail customers. In 2010, bad debt expenses decreased 4% from P\$96 million in 2009. These charges in each year represented approximately 1% of the Personal Mobile Services segment total revenues.

*Other Operating Expenses*

Other operating expenses include accrued expenses such as costs associated with the provision of Value Added Services, transportation costs, insurance, energy and costs of site leases.

Other operating expenses increased 19% to P\$542 million in 2011 from P\$456 million in 2010 and increased 31% from P\$347 million in 2009. The increase was mainly due to higher costs associated with the provision of Value Added Services to subscribers for approximately P\$36 million and P\$24 million in 2011 and 2010, respectively, and higher costs of transportation, freight and travel for P\$36 million and P\$10 million in

Table of Contents

2011 and 2010, respectively. Other operating expenses include intersegment costs from Fixed Services Segment of P\$49 million, P\$46 million and P\$43 million in 2011, 2010 and 2009, respectively, that are eliminated at consolidated level.

**Operating Income before depreciation and amortization**

Our operating income before depreciation and amortization from the Personal Mobile Services segment reached P\$4,111 million in 2011, P\$3,022 million in 2010 and P\$2,310 million in 2009, representing 33%, 32% and 30% of total segment revenues in 2011, 2010 and 2009, respectively. The increase in each year was mainly due to higher growth in total revenues, partially offset by lower increases as percentage in operating costs (before depreciation and amortization).

**Depreciation of PP&E and Amortization of Intangible Assets**

During 2011 depreciation of PP&E and amortization of intangible assets increased 41% to P\$1,190 million from P\$841 million in 2010 and increased 14% from P\$740 million in 2009. The increase was the result of higher investment in PP&E and intangible assets, partially offset by a reduction in the level of depreciation due to the end of the amortization period for certain assets. In particular, during 2011 amortization of SAC increased P\$192 million and depreciation of PP&E and other intangible assets increased P\$157 million compared to 2010. During 2010 amortization of SAC decreased P\$48 million, while depreciation of PP&E and other intangible assets increased P\$149 million compared to 2009.

**Operating Income**

In 2011, our operating income from the Personal Mobile Services segment was P\$2,921 million, representing an increase of 34% from P\$2,181 million in 2010, and increased 39% from P\$1,570 million in 2009. Operating income represented 23% of total revenues for this segment in 2011 and 2010, and 20% in 2009. The increase in operating income was mainly due to the growth in service and equipment revenues, partially offset by increases in operating expenses and depreciation and amortization as explained above.

The following table shows our operating income from the Personal Mobile Services segment in 2011, 2010 and 2009 and its percentage of total revenues in each year:

	2011	Year Ended December 31,		% of Change	
		2010	2009	2011-2010	2010-2009
	(P\$ million / %)			Increase / (Decrease)	
<b>Operating income before depreciation and amortization</b>	<b>4,111</b>	<b>3,022</b>	<b>2,310</b>	<b>36</b>	<b>31</b>
<i>As % of total revenues</i>	33	32	30		
<b>Depreciation and amortization</b>	<b>(1,190)</b>	<b>(841)</b>	<b>(740)</b>	<b>41</b>	<b>14</b>
<i>As % of total revenues</i>	9	9	10		

<b>Operating income</b>	<b>2,921</b>	<b>2,181</b>	<b>1,570</b>	<b>34</b>	<b>39</b>
<i>As % of total revenues</i>	23	23	20		

**Financial results, net**

During 2011, the Personal Mobile Services segment recorded a net financial gain of P\$118 million compared to a net financial loss of P\$129 million in 2010 and a net financial loss of P\$158 million in 2009. The gain recorded in 2011 was mainly attributed to interest from investments of approximately P\$136 million. In addition, the devaluation of the peso against the U.S. dollar was approximately 8% and generated a net foreign currency exchange loss of P\$24 million (including the effect of derivative financial instruments entered into to hedge foreign exchange exposure) in 2011. The decrease in net financial loss in 2010 was mainly attributed to lower financial interest losses of approximately P\$11 million due to the total cancellation of Personal's financial debt and higher interest from investments of approximately P\$21 million. In addition, the devaluation of the peso against the U.S. dollar was approximately 5% and 10% in 2010 and 2009 and generated a net foreign currency exchange loss of P\$105 million and P\$112 million (including the effect of derivative financial instruments entered into to hedge foreign exchange exposure) in 2010 and 2009, respectively.

Table of Contents**Income Tax Expense**

As previously mentioned, the income tax charge includes three effects (See Years ended December 31, 2011, 2010 and 2009 Income Tax ).

During 2011, our Personal Mobile Services segment recorded an income tax expense of P\$1,102 million compared to P\$737 million in 2010 and P\$519 million in 2009 mainly due to the increase in our pre-tax income in each year. The income tax expense in 2011 was mainly attributable to the recognition of current income tax expense amounting to P\$1,039 million, the loss generated by the deferred tax on the temporary differences arising out of the asset and liability valuations according to fiscal versus accounting criteria amounting to P\$58 million and the P\$5 million increase in the allowance for net deferred tax assets.

The income tax expense in 2010 was mainly attributable to the recognition of current income tax expense amounting to P\$655 million, the loss generated by the deferred tax on the temporary differences arising out of the asset and liability valuations according to fiscal versus accounting criteria amounting to P\$79 million and the P\$3 million increase in the allowance for net deferred tax assets.

The income tax expense in 2009 was mainly attributable to the recognition of current income tax expense amounting to P\$511 million, the loss generated by the deferred tax on the temporary differences arising out of the asset and liability valuations according to fiscal versus accounting criteria amounting to P\$6 million and the P\$2 million increase in the allowance for net deferred tax assets.

**Net Income**

During 2011, our Personal Mobile Services segment reported net income of P\$1,937 million as compared to P\$1,315 million during 2010 and P\$906 million in 2009. The increase in net income in 2011 was mainly due to higher operating income and financial results, partially offset by higher income tax expense, as explained above. The increase in net income in 2010 was mainly due to higher operating income and lower financial losses, partially offset by higher income tax expense, as explained above.

**(B.3) Núcleo Mobile Services Segment**

Results of operations from our Núcleo Mobile Services segment for 2011, 2010 and 2009 are comprised as follows:

	2011	Years Ended December 31, 2010 (P\$ millions)	2009	% of Change 2011-2010 Increase	2010-2009
Total revenues	718	469	388	53	21

**Total revenues**

During 2011, total revenues from Núcleo increased by 53% to P\$718 million from P\$469 million in 2010. This increase was mainly due to higher Value Added Services sales (included in Data and Internet services), which grew by 48% in 2011 as compared to 2010. Other factors contributing to the increase in total revenues were the increase in the volume of traffic, as a consequence of the growth in the subscriber base, and the increase in the number of handsets sold as a result of technological advances. Núcleo had approximately 2,141,000 mobile subscribers as of December 31, 2011, which represented an increase of approximately 15% as

Table of Contents

compared to 2010. As of December 31, 2011, Núcleo had approximately 1,792,000 prepaid subscribers, representing 84% of Núcleo's total mobile subscriber base.

During 2010, total revenues from Núcleo increased by 21% to P\$469 million from P\$388 million in 2009. This increase was mainly due to higher Value Added Services sales (included in Data and Internet services), which grew by 46% in 2010 as compared to 2009. Other factors contributing to the increase in total revenues were the increase in the volume of traffic, as a consequence of the growth in the subscriber base, and the increase in the number of handsets sold as a result of technological advances. Núcleo had approximately 1,868,000 mobile subscribers as of December 31, 2010, which represented an increase of approximately 4% as compared to 2009. As of December 31, 2010, Núcleo had approximately 1,604,000 prepaid subscribers, representing 86% of Núcleo's total mobile subscriber base.

Revenues from our Núcleo Mobile Services segment for 2011, 2010 and 2009 are comprised as follows:

	2011	Years Ended December 31,		% of Change	
		2010	2009	2011-2010	2010-2009
	(P\$ millions)			Increase

<b>Total revenues</b>	<b>718</b>	<b>469</b>	<b>388</b>	<b>53</b>	<b>21</b>

(1) The intersegment revenues are eliminated at the consolidated level.

**Operating Expenses (without depreciation and amortization)**

Total operating expenses in our Núcleo Mobile Services segment increased 46% to P\$454 million in 2011 from P\$311 million in 2010. In that year operating expenses increased 21% from P\$256 million in 2009. In line with our increases in revenues, during 2011 and 2010, all items in the cost structure of the Núcleo Mobile Services segment experienced increases, except for provisions. This trend reflected increases in certain costs of acquiring and retaining subscribers, and commissions directly associated with sales and expansions of the customer service staff.

Detailed below are the major components of the operating expenses for the years ended December 31, 2011, 2010 and 2009 related to Núcleo Mobile Services segment:

	2011	Years Ended December 31,		% of Change	
		2010	2009	2011-2010	2010-2009

Table of Contents

*Employee benefit expenses and severance payments*

During 2011, employee benefit expenses and severance payments increased 38% to P\$55 million from P\$40 million in 2010. During that year, these costs increased 14% from P\$35 million in 2009. The increase was mainly due to salary increases that Núcleo implemented and an increase in the number of employees in 2011. Núcleo had 433 employees as of December 31, 2011. As of December 31, 2010 and 2009 it had 414 and 422, respectively.

*Interconnection Costs and Other Telecommunication Charges*

During 2011, interconnection costs and other telecommunication charges increased 53% to P\$118 million from P\$77 million in 2010. During 2010, those charges increased 4% from P\$74 million in 2009. The increase was mainly due to higher traffic volume resulting from Núcleo's network.

*Fees for Services, Maintenance, Materials and Supplies*

During 2011, fees for services and maintenance, materials and supplies totaled P\$64 million, representing an increase of 23% from P\$52 million in 2010. During 2010, they increased 41% from P\$37 million in 2009. The increase was mainly due to higher costs related to the installation of the new Customer Contact Centers, higher maintenance costs of the fiber-optic network between some cities of Paraguay (like Asunción, Ciudad del Este and Encarnación) and higher maintenance costs related to the expansion of the 3G network (covering 62 new locations).

*Taxes and fees with the Regulatory Authority*

During 2011, taxes and fees with the Regulatory Authority increased 44% to P\$23 million from P\$16 million in 2010 and increased 7% from P\$15 million in 2009. The increase in the year was attributable to the increase in total segment revenues.

*Commissions*

During 2011, commissions increased to P\$84 million from P\$45 million in 2010, representing an increase of 87%. During 2010, commissions increased 25% from P\$36 million in 2009. The increases were mainly due to the growth in the subscriber base.

*Cost of Equipment*

During 2011 and 2010, the cost of handsets sold was P\$13 million. During 2010, the cost of handsets sold increased 44% from P\$9 million in 2009. The increase was mainly due to an expansion of the subscriber base and increased customer upgrade of mobile handsets as a result of technological advances and new service offerings.

*Advertising*

During 2011, advertising expenses including media, promotional and institutional campaigns, amounted to P\$45 million, representing an increase of 36% from 2010. During 2010, these expenses amounted to P\$33 million, representing an increase of 43% from P\$23 million in 2009. This variation was mainly due to campaigns related to Internet 3G, the Interconnection Network and to strengthening the Personal brand position in Paraguay.

*Other Operating Expenses*

Other operating expenses include accrued expenses such as costs associated with the provision of Value Added Services, transportation costs, insurance, energy and costs of site leases.

Other operating expenses increased 41% to P\$45 million in 2011 and 33% to P\$32 million in 2010 from P\$24 million in 2009. The increase was mainly due to the increase in costs associated with the provision of Value Added Services to customers and higher costs of site leases.

Table of Contents**Operating Income before depreciation and amortization**

Operating income before depreciation and amortization was P\$264 million in 2011 and P\$158 million in 2010, representing 37% and 34% of total revenues, respectively. Operating income before depreciation and amortization was P\$132 million in 2009, representing 34% of total revenues in that year. The increase was mainly due to growth in service revenues, partially offset by increases in costs, such as fees for services and maintenance, materials and supplies, cost of handsets, advertising and commissions.

**Depreciation of PP&E and Amortization of Intangible Assets**

During 2011 depreciation of PP&E and amortization of intangible assets increased 58% to P\$150 million from P\$95 million in 2010. During 2010 depreciation and amortization increased 13% from P\$84 million in 2009. The increase was the result of higher investment in PP&E and intangible assets (especially SAC in 2011), partially offset by a reduction in the level of depreciation due to the end of the amortization period for certain assets.

**Operating Income**

In 2011, our operating income from the Núcleo Mobile Services segment was P\$114 million, representing an increase of 81% from P\$63 million in 2010, which represent 16% and 13% of total revenues for this segment in 2011 and 2010, respectively. In 2009, our operating income was P\$48 million, representing 12% of total revenues for this segment.

The following table shows our operating income from the Núcleo Mobile Services segment in 2011, 2010 and 2009 and its percentage of total revenues in each year:

	2011	Year Ended December 31,		2009	% of Change	
		2010	(P\$ million / %)		2011-2010	2010-2009
					Increase / (Decrease)	
<b>Operating income before depreciation and amortization</b>	<b>264</b>	<b>158</b>		<b>132</b>	<b>67</b>	<b>20</b>
<i>As % of total revenues</i>	37	34		34		
Depreciation and amortization	(150)	(95)		(84)	58	13
<i>As % of total revenues</i>	(21)	(20)		(22)		
<b>Operating income</b>	<b>114</b>	<b>63</b>		<b>48</b>	<b>81</b>	<b>31</b>
<i>As % of total revenues</i>	16	13		12		

**Financial results, net**

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

During 2011 and 2010, the Núcleo Mobile Services segment recorded a net financial loss of P\$11 million, compared to a net financial loss of P\$9 million in 2009. The increase was mainly due to higher interest on financial debt.

### **Income Tax Expense**

As previously mentioned, the income tax charge includes three effects (See Years ended December 31, 2011, 2010 and 2009 Income Tax ).

During 2011, our Núcleo Mobile Services segment recorded an income tax expense of P\$14 million compared to P\$10 million in 2010. The income tax expense in 2011 was mainly attributable to the recognition of current income tax expense amounting to P\$16 million partially offset by the gain generated by the deferred tax on the temporary differences arising out of the asset and liability valuations according to fiscal versus accounting criteria amounting to P\$2 million.

During 2010, our Núcleo Mobile Services segment recorded an income tax expense of P\$10 million compared to P\$6 million in 2009. The income tax expense in 2010 was mainly attributable to the recognition of current income tax expense amounting to P\$4 million and the loss generated by the deferred tax on the

Table of Contents

temporary differences arising out of the asset and liability valuations according to fiscal versus accounting criteria amounting to P\$6 million.

**Net Income**

During 2011, our Núcleo Mobile Services segment reported net income of P\$89 million as compared to P\$42 million during 2010, representing 12% and 9% of total revenues in 2011 and 2010, respectively. In 2009, our net income was P\$33 million, representing 9% of total revenues. The increase in net income was mainly due to higher operating income.

**Liquidity and Capital Resources**

*Sources and Uses of Funds*

We expect that the principal source of Telecom Argentina's liquidity in the near term will be cash flows from Telecom Argentina's operations and the dividends that Personal may pay to it. Telecom Argentina's principal uses of cash flows are expected to be for capital expenditures and operating expenses and the payment of dividends to its shareholders. Telecom Argentina expects working capital and funds generated from operations to be sufficient for its present requirements.

We expect that the principal source of Personal's liquidity in the near term will be cash flows from operations. Personal's principal uses of cash flows are expected to be for capital expenditures, operating expenses and dividend payments to Telecom Argentina.

The Ordinary and Extraordinary Shareholders' Meeting of Telecom Argentina held on December 15, 2011, approved the creation of a Medium-Term Notes Global Program for a maximum outstanding amount of US\$ 500 million or its equivalent in other currencies for a term of five years. As of the date of this Annual Report, Telecom Argentina is preparing the documentation required by the CNV to approve this program.

The Ordinary and Extraordinary Shareholders' Meeting of Personal held on December 2, 2010, approved the creation of a Medium-Term Notes Global Program for a maximum outstanding amount of US\$500 million or its equivalent in other currencies for a term of five years. On October 13, 2011, the CNV has approved this program.

The table below summarizes, for the years ended December 31, 2011, 2010 and 2009, the Telecom's cash flows:

**Years Ended December 31,**

Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

	2011	2010 (P\$ millions)	2009
Cash flows from operating activities	5,396	4,244	3,687
Cash flows used in investing activities	(3,020)	(2,327)	(1,696)
Cash flows used in financing activities	(965)	(1,832)	(1,681)
Net foreign exchange differences on cash and cash equivalents	31	18	61
<b>Increase in cash and cash equivalents</b>	<b>1,442</b>	<b>103</b>	<b>371</b>
<b>Cash and cash equivalents at the beginning of the year</b>	<b>1,376</b>	<b>1,273</b>	<b>902</b>
<b>Cash and cash equivalents at the end of the year</b>	<b>2,818</b>	<b>1,376</b>	<b>1,273</b>

As of December 31, 2011, 2010 and 2009 we had P\$2,818 million, P\$1,376 million and P\$1,273 million in cash and cash equivalents, respectively.

*Cash flows from operating activities* were P\$5,396 million, P\$4,244 million and P\$3,687 million in 2011, 2010 and 2009, respectively. The increase of P\$1,152 million in 2011 was mainly due to an increase in the collection of trade receivables, resulting from an increase in revenues, partially offset by higher employee benefit expenses and severance payments and higher income tax paid. The increase of P\$557 million in 2010 was mainly due to an increase in the collection of trade receivables, resulting from an increase in revenues,

Table of Contents

partially offset by higher employee benefit expenses and severance payments, higher payments for the acquisition of goods and services and higher income tax paid.

*Cash flows used in investing activities* were P\$3,020 million, P\$2,327 million and P\$1,696 million in 2011, 2010 and 2009, respectively. The increase of P\$693 million in 2011 was mainly due to a higher acquisition of PP&E (amounting to P\$421 million) and intangible assets (especially SAC and service connection costs) amounting to P\$306 million principally in the Personal Mobile Services segment. The increase of P\$631 million in 2010 was mainly due to a reduction in the cash flows generated by investments not considered cash and cash equivalents (amounting to P\$230 million) and a higher acquisition of PP&E (amounting to P\$314 million) and intangible assets (especially SAC and service connection costs) amounting to P\$82 million, principally in the Personal Mobile Services segment.

*Cash flows used in financing activities* were P\$965 million, P\$1,832 million and P\$1,681 million in 2011, 2010 and 2009, respectively. The decrease in 2011 of P\$867 million was mainly due to lower payments of debt and related interest amounting to P\$826 million. The increase of P\$151 million in 2010 was mainly due to the P\$1,053 million dividends paid by Telecom Argentina in 2010, substantially offset by a decrease in the amount of debt payments made during 2010 as a consequence of the total cancellation of Telecom Argentina's debt during 2009 (amounting to P\$959 million).

***Debt Obligations and Debt Service Requirements***

*Non-Deliverable Forward ( NDF ) Contracts to Purchase U.S. Dollars at Fixed Rates*

During October 2011, Personal entered into several NDF contracts to purchase a total amount of US\$40 million (maturing December 2011) to hedge its exposure to U.S. dollar fluctuations related to accounts payable. However, as the terms of the NDF did not perfectly match the terms of the foreign currency-denominated obligations, these hedges were regarded as ineffective.

Also during October 2011, Personal entered into several NDF contracts amounting to US\$12.7 million (maturing December 2011 and March 2012), to hedge its exposure to U.S. dollar fluctuations related to accounts payable. The Company designated these NDF contracts as effective cash flow hedges. As of December 31, 2011, US\$6.4 million was outstanding.

In January 2010, and in accordance with its Notes' hedging policy, Personal entered into several NDF contracts amounting to US\$72 million to hedge its exposure to U.S. dollar fluctuations with respect to its Notes (maturing December 2010). Personal designated these NDF contracts as effective cash flow hedges.

In addition, in January 2010, Personal entered into several NDF contracts amounting to US\$30.2 million (maturing January through December 2010), to hedge its exposure to U.S. dollar fluctuations related to accounts payable. Personal designated these NDF contracts as effective cash flow hedges.

*Indebtedness of Subsidiaries*

*Personal.* In December 2010, Personal amortized its outstanding Series 3 Notes for an amount of approximately US\$173 million, according to the terms and conditions of the related indenture. As of December 31, 2011, Personal had no outstanding financial debt.

*Núcleo.* As of December 31, 2011, Núcleo's outstanding debt amounted to an equivalent amount of US\$31 million. Additional information is set forth in Note 12 to our Consolidated Financial Statements.

*Liquidity*

The liquidity position for each of Telecom Argentina, Personal and Núcleo is and will be significantly dependent on each individual company's operating performance, its indebtedness, capital expenditure programs and receipt of dividends, if any, from its subsidiaries, if any.

In addition, the terms and conditions of Nortel's Class A and Class B Preferred Shares contain covenants which require Nortel to restrict Telecom Argentina's ability to borrow if the ratio of Telecom Argentina's total liabilities (as calculated pursuant to Section 9 of the terms and conditions of Nortel's Class A and Class B Preferred Shares) to shareholders' equity is 1.75 or higher. If Nortel does not satisfy these covenants, Nortel's

Table of Contents

Class A and Class B Preferred Shares will acquire certain voting rights which will enable Nortel's preferred shareholders to elect one director and one alternate director of Nortel. From March 2002 until December 31, 2006, Telecom Argentina's ratio of total liabilities to shareholders' equity exceeded the limit and Nortel's preferred shareholders acquired the voting rights.

We expect that our cash flow from operations will be sufficient to permit Telecom Argentina and its subsidiaries to satisfy their respective indebtedness and other cash requirements in the near to medium term. However, Personal may use short-term funding to cover occasional negative operational cash flows.

Our ability to generate sufficient cash from our operations in order to satisfy our indebtedness and capital expenditure needs may be affected by macroeconomic factors influencing our business, including, without limitation: the exchange rate of Argentine Pesos to U.S. dollars; rates of inflation; and the achievement of ultimate rates adjustments for basic charges and measured service charges, among others. These factors are not within our control. The statements expressed in the preceding paragraphs constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 and involve risks and uncertainties, including those described in this Annual Report in Item 3 Key Information Risk Factors. Actual results may differ materially from our expectations described above as a result of various factors.

The Company is able to distribute dividends up to the limit of retained earnings determined under Argentine Corporations Law, which must be calculated under Argentine GAAP until our adoption of IFRS for statutory financial reporting as from January 1, 2012.

At Telecom Argentina's shareholders' meeting held on April 7, 2011, the shareholders approved the allocation of Company retained earnings, which included a cash dividend distribution in the amount of approximately P\$915 million (equivalent to P\$0.93 per share). The cash dividend was paid on April 19, 2011. In addition, Telecom Argentina's Annual Shareholders meeting held on April 27, 2012 approved the allocation of the Company retained earnings, which included a cash dividend distribution of P\$807 million (P\$0.82 per share) to be paid on May 10, 2012. See Item 4 Information of the Company Introduction Recent Developments.

As of December 31, 2011, Telecom Argentina and its consolidated subsidiaries had approximately P\$2,818 million in cash and cash equivalents. Of this amount, approximately P\$829 million of cash and cash equivalents was held by Telecom Argentina on a stand-alone basis. Telecom Group has approximately P\$46 million of restricted cash in connection with legal proceedings. Such restricted cash has been classified as Other Receivables on our balance sheet.

Although the Company had negative working capital as of December 31, 2011, we don't believe that this situation represents a concern as regards the Company's ability to continue its operational activities in the foreseeable future considering its high level of cash flow generation and the lack of financial indebtedness.

***Capital Expenditures***

We estimate that our capital expenditures will be approximately P\$4.0 billion for 2012 (P\$3.0 billion in tangible assets and P\$1.0 billion in intangible assets, particularly SAC). We expect that Telecom Argentina will invest primarily to sustain the growth in Broadband services, to

supply mobile operators with the necessary infrastructure and to continue with the updating of commercial and support systems. Regarding Personal, the expansion of its network infrastructure will continue, and special effort will be made to extend 3G technology coverage and bandwidth for mobile data transmission and to acquire subscribers in order to remain in a competitive position and to increase our customer base. See Item 3 Key Information Risk Factors We operate in a competitive environment which may result in a reduction of our market share in the future. We expect to finance our capital expenditures through cash generation through our operations and cash on hand; therefore, our ability to fund these expenditures is dependent on, among other factors, our ability to generate sufficient funds internally. Telecom Argentina's ability to generate sufficient funds for capital expenditures is also dependent on its ability to increase its regulated rates, since the cost of imported materials may increase in peso terms (as a result of the decline in the peso/U.S. dollar exchange rate and higher inflation).

***Related Party Transactions***

During 2011, we entered into certain transactions with our indirect shareholders Telecom Italia and W de Argentina Inversiones or their affiliates in the ordinary course of business. For a description of these transactions see Item 7 Major Shareholders and Related Party Transactions.

Table of Contents

*Taxes*

*Turnover Tax*

Under Argentine tax law, Telecom is subject to a tax levied on gross revenues. Rates differ depending on the jurisdiction where revenues are earned for tax purposes. Rates in effect ranged from 2.5% to 6.5% for the years ended December 31, 2011, 2010 and 2009, depending on the jurisdiction or goods and services subject to the tax.

*Income Tax*

Our income tax rate is currently 35% of taxable net income for the companies located in Argentina, 10% for Núcleo, 25% for Springville and 34% for Telecom USA. The amount of income subject to tax is calculated according to tax regulations which contain a different methodology for calculating net taxable income than the methodology used for the preparation of our Consolidated Financial Statements under IFRS. The differences between the methodology of computing income under the tax regulations and under IFRS make it difficult to determine the taxable net income from our income statements. For instance, some deductions from income normally accepted for accounting purposes are not deductible and, accordingly, must be added back to income for tax purposes.

Cash dividends, property or capital stock of Telecom Argentina are, in general, exempt from Argentine withholding tax and other taxes. Nevertheless, under Argentine Income Tax Law, a corporation that makes a distribution of dividends to its shareholders in excess of the amount of its accumulated taxable net income at the close of the previous taxable year, as determined by application of the Argentine Income Tax Law, shall have to withhold a 35% tax from such excess. This withholding income tax is known as the equalization tax. See Item 10 Additional Information Taxation Argentine Taxes Taxation of Dividends.

Tax on cash dividends received from a foreign subsidiary is calculated according to the statutory income tax rate. As per Paraguayan tax law, an additional income tax rate of 5% is imposed on dividends that are paid. Additionally, when dividends are being paid to foreign shareholders, there is an additional income tax rate of 15%, which is deducted from the amounts which are paid to such shareholders. As per Argentine tax law, income tax paid abroad is recognized as tax credit.

Net losses can generally be carried forward and applied against future taxable income for five years.

*Costs Associated with Income Taxes Paid by Foreign Lenders*

Pursuant to the terms and conditions of our loans outstanding during 2010 and 2009, we were required to reimburse our foreign lenders for Argentine income taxes payable by the lenders with respect to the interest on the loans by increasing or grossing up the amount of interest paid

to these lenders such that, after payment of the Argentine taxes, the lenders have received the contractual interest rate. The withholding rate on interest payments to foreign beneficiaries is 15.05% (17.7163% with gross-up) if the lenders are banks or financial entities located in jurisdictions that are neither tax-free nor subject to taxation according to Argentine income tax rulings or have entered into treaties with Argentina providing for exchange of information upon request by the respective authority. Furthermore, unless their internal rulings provide otherwise, requests for banking, stock exchange or other secret information cannot be challenged. In order to be eligible for the 15.05% withholding rate, the financial entity must be under the supervision of a respective central bank or equivalent authority. If the lender did not meet the aforementioned requirements, the withholding rate would be 35% (53.8462% with gross-up). Interest payments on notes (*obligaciones negociables*) that met the requirements of Section 36 of the Negotiable Obligations Law and are held by foreign beneficiaries remained income tax-exempt.

*Thin Capitalization Rules*

Argentine Law No. 25,784, which was published in the Official Bulletin in October 2003, modified the limitation on the deduction of interest expense by stating that the limit will only be applied to interest expense on debt owed to non-resident entities that control the borrowing entity (except for interest expense subject to the 35% withholding tax) in proportion to the amount of debt that exceeds by two times the company's equity, and the excess of interest over this ratio will be treated as dividend payments. During fiscal years 2011, 2010 and

Table of Contents

2009, Telecom's deduction of interest expenses was not limited because Telecom was able to satisfy the conditions required for such deduction.

*Tax on Minimum Presumed Income*

Our companies located in Argentina are required to pay an amount equal to the greater of the income tax or the tax on minimum presumed income. The tax on minimum presumed income is computed based on 1% of the value of our assets. The value of our assets is determined in accordance with the criteria established under the tax laws. The amount of any income tax paid during the year may be applied against the tax on minimum presumed income that would be payable in such year. The amount of tax on minimum presumed income in excess of the income tax for such year may be carried forward for a period of up to ten years. This excess may be treated as a credit that may be applied against the income tax payable in a future year to the extent the tax on minimum presumed income for the year does not exceed income tax payable for such future year. During fiscal years 2011, 2010 and 2009, income tax was higher than tax on minimum presumed income. Shares and other equity participations in companies subject to the tax on minimum presumed income are exempt from the tax on minimum presumed income.

*Value Added Tax (VAT)*

VAT does not have a direct impact on our results of operations. VAT paid by us to our suppliers is applied as a credit toward the amount of VAT charged by Telecom to its customers and the net amount is passed through to the Argentine government. VAT rates are 21%, 27% and 10.5%, depending on the type of the transaction and tax status of the customer.

The import of services (including financial services) by Argentine VAT taxpayers registered for VAT purposes, or *responsables inscriptos*, such as the Company, is subject to VAT. In the case of loans, if the lender is a bank or a financial entity located in a country whose central bank has adopted the Banking Supervision Standards of the Basel Committee, the rate is 10.5%. If the foreign lender is one other than those mentioned above, the rate is 21%.

The burden of paying VAT is borne by the Argentine taxpayer.

*Tax on Deposits to and Withdrawals from Bank Accounts*

The tax on deposits to and withdrawals from bank accounts under Law No. 21,526 applies to certain deposits to and withdrawals from bank accounts opened in Argentine financial entities and to other transactions that, due to their special nature and characteristics, are similar or could be used in lieu of a deposit to or withdrawal from a bank account. Therefore, any deposit to or withdrawal from a bank account opened in an entity regulated by Law No. 21,526, or any transaction deemed to be used in lieu of a deposit to or withdrawal from a bank account, is subject to the tax on deposits and withdrawals unless a particular exemption is applicable. The tax rate in effect since August 1, 2001 has been 0.6% of the transaction volume.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

During 2011, 2010 and 2009, we charged to our income statement P\$166 million, P\$135 million and P\$107 million, respectively, of this tax.

On February 6, 2003, the Ministry of Economy, through General Resolution No. 72/03, authorized us to increase the Basic telephone services rates by the amount of the tax on deposits to and withdrawals from bank accounts as provided for in General Resolution No. 72/03. The amount of the tax charged must be shown in detail on the customers' bills. The amounts charged before General Resolution No. 72/03 were approximately P\$23 million. This amount was subsequently corroborated by CNC audits, resulting in a receivable for the Company for P\$23 million which was recorded under "Other receivables" during 2007. That receivable can be offset with existing and/or future regulatory duties. See Item 4 Information on the Company Regulatory Framework Regulatory Environment Rate Regulations Tax on deposit to and withdrawals from bank accounts ( IDC ).

Decree No. 534/2004 provides that owners of bank accounts subject to the general tax rate of 0.6% may take into account as a tax credit 34% of the tax originated in credits on such bank accounts. This amount may be computed as a credit for the Income Tax and Tax on Minimum Presumed Income. The amount computed as a credit is not deductible for income tax purposes.

Table of Contents

*Tax on Personal Property*

Argentine Law No. 25,585, as amended by Law No. 26,317, imposes a tax on shares of stock corporations, such as Telecom Argentina's ADSs and the Class A, B and C Shares. See Item 10 Additional information Taxation Argentine Taxes Tax on Personal Property.

The tax rate applied is 0.50%. This tax is computed based on the value of the shareholders' equity as stated on the most recent annual balance sheet of Telecom Argentina. Although Telecom Argentina is required to pay this tax on behalf of the holders of its ADSs, Class A, B and C Shares, it has the right to obtain reimbursement of the amounts paid from its shareholders, even if this requires holding and/or foreclosing the property on which the tax is due. As a result, until shareholders reimburse Telecom Argentina for the amounts paid on their behalf, the payment of this tax constitutes a receivable for Telecom Argentina.

Telecom Argentina has, from time to time, requested that its shareholders reimburse the amounts of tax on personal property paid on their behalf and has received partial reimbursement of such taxes. The amount paid by Telecom Argentina and pending collection from its shareholders as of December 31, 2011, was approximately P\$17 million and an allowance was recorded for such amount. Whenever applicable, tax on personal property paid on behalf of Telecom Argentina's shareholders is deducted from the cash dividend payment.

*Other Taxes and Levies*

We are subject to a levy of 0.5% of our monthly revenues from telecommunications services. The proceeds of this levy are used to finance the activities of the Regulatory Bodies. The amount of this levy is included in our consolidated income statement within Taxes and fees with the Regulatory Authority.

Law No. 25,239 imposes a tax on Personal of 4% (tax on mobile and satellite services) of amounts invoiced excluding VAT but including the excise tax, which results in an effective tax rate of up to 4.167%.

Law No. 26,539 amends the excise tax and establishes that the importation and sale of technological and computer goods, including mobile phones, is subject to the excise tax at a rate of 17%, resulting in an effective tax rate of up to 20.48%, effective from December 1, 2009.

Since the beginning of 2001, telecommunication services companies have been required to pay a Universal Service tax to fund Universal Service requirements. The Universal Service tax is calculated as a percentage of the total revenues received from the rendering of telecommunication services, net of taxes and levies applied on such revenues, excluding the Universal Service tax. The rate is 1% of total billed revenues. See Item 4 Information on the Company Regulatory Framework Decree No. 764/00.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Law No. 26,573, which was regulated in 2010, imposes a levy of 1% of the monthly revenues from telecommunication services, excluding prepaid services, which must be collected from the customers. The proceeds of this levy are used to finance the activities of the Ente Nacional de Alto Rendimiento Deportivo ENARD (National Board of High Performance Sport).

### **Research and Development, Patents and Licenses, etc.**

None.

### **Trend Information**

In 2011 we consolidated our position in each of our business segments. In particular, we highlight the following:

- An expansion of the customer base, reaching 4.1 million fixed lines in service, 1.6 million Internet accesses (equivalent to 37% of fixed lines in service) and 20.3 million mobile subscribers. As a result, our consolidated net revenues increased by 27% reaching P\$18,553 million. Our service revenues represented 91% of consolidated net sales and grew by 25% as compared to 2010.
- A 33% increase in total additions in PP&E and intangible assets compared to 2010, amounting to P\$3,359 million in 2011, equivalent to 18% of consolidated net revenues. These investments consisted of 54% for mobile business and 46% for fixed business.

Table of Contents

- An improvement in economic results and financial indicators as compared to 2010: +22% in operating income and +30% in net income. The return on Shareholders' Equity at the beginning of the year was 39% annually.

Cash from operating activities allowed Telecom to increase the level of capital expenditures without incurring in financial indebtedness, even after paying dividends in the amount of P\$915 million.

In 2012 we expect the growth prospects for fixed line services to continue in line with the evolution experienced in recent years as a result of the market maturity and international industry trends. Our Arnet Broadband business is well-positioned to continue to capture market opportunities. Also, the launch of Arnet Play in 2011 enabled us to operate in the video streaming content access market.

With regard to prices, in the Fixed Services segment, the implementation of the Letter of Understanding of March 6, 2006 executed with the National Government is still pending and the rate adjustments of regulated services is also yet to be implemented. Both would restore Telecom Argentina's financial and economic equation and allow the Company to introduce development and technological innovation in network infrastructure. Constant pressures on the cost structure accentuate this need.

In 2012 we expect the SU Fund to be operational to offset economic and financial losses incurred in services rendered since 2001 for incumbent operators to give access to basic services to low-income individuals and those in areas not currently covered by fixed and mobile telecommunication services.

The mobile business is expected to continue expanding, although at more moderate rates than those of recent years. We expect mobile Internet to continue to gain further presence among our customer base. Value Added Services are expected to continue to be one of the key sources of revenues growth (in 2011, Value Added Services accounted for about 48% of Personal service revenues). Personal will continue to work on expanding the mobile Internet experience. Coverage expansion and speed access improvement to 3G and HSDPA+ networks, and the more complete portfolio of advanced mobile devices will be the drivers to success in our operation in the Argentine market.

An additional radio electric spectrum for mobile service is also a key factor to develop the industry.

Our mobile operation, which has consistently increased its share in the Argentine market, has developed a new identity of the Personal brand in lines with values in which we trust so as to successfully implement Number Portability in 2012.

To provide customers with newer and better services, the Telecom Group will implement investment plans that are expected to require expenditures of approximately P\$4.0 billion for 2012 (P\$3.0 billion in tangible assets and P\$1.0 billion in intangible assets, particularly SAC). Telecom Argentina's investments will focus on growth of Broadband, new Value Added Services initiatives in the fixed business, provision of infrastructure to mobile operators and modernization of commercial and customer service systems. Personal will enhance its network infrastructure by expanding coverage of its 3G technology and bandwidth for mobile data transmissions and commercial systems improvements.

The strategy implemented by the Company's Management and described in this Annual Report sets forth the basic standards that Management believes will enable the Telecom Group to reach its objectives of improving quality in service, strengthening its market position and increasing operating efficiency to meet the growing demands of the dynamic telecommunication market in which it operates. Our investment plans are based on this future vision and on the commitment of the Telecom Group to our country and its people.

The statements expressed in the preceding paragraphs constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 and involve risks and uncertainties, including those described in this Annual Report in Item 3 Key Information Risk Factors. Actual results may differ materially from our expectations described above as a result of various factors.

Table of Contents**Contractual Obligations**

Our consolidated contractual obligations and purchase commitments as of December 31, 2011 were as follows:

	Less than 1 year	1-3 years	3-5 years (in millions of Argentine Pesos)	More than 5 years	Total
Debt obligations (1)	29	125	8		162
Operating lease obligations	214	305	104	90	713
Purchase obligations (2)	1,924	43	51	179	2,197
Other long-term liabilities (3)	59	110	62	60	291
<b>Total</b>	<b>2,226</b>	<b>583</b>	<b>225</b>	<b>329</b>	<b>3,363</b>

---

(1) Includes P\$28 million of future interest.

(2) Other than operating lease obligations.

(3) Includes voluntary retirement program, pension benefits and other long-term payables.

**Off-Balance Sheet Arrangements**

None.

**Safe Harbor**

See the discussion at the beginning of this Item 5 and Forward-Looking Statements in the introduction of this Annual report, for forward-looking statement safe harbor provisions.

**ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES**

**The Board of Directors**

Management of the business of the Telecom Group is vested in the Board of Directors. Telecom Argentina's bylaws provide for a Board of Directors consisting of no fewer than three and no more than eleven directors and up to the same or a lower number of alternate directors. Currently, Telecom Argentina has seven directors and seven alternate directors. Three of the directors and three of the alternate directors qualify as independent directors under SEC regulations. Two of the directors and three of the alternate directors also qualify as independent directors under CNV rules. According to Telecom Argentina's bylaws, the Board of Directors has all of the required authority to administer the corporation, including those for which the law requires special powers. The Board operates with a quorum of the absolute majority of its members and resolves issues by simple majority of votes present. According to Telecom Argentina's bylaws, the Chairman has a double vote in the case of a tie. Under CNV regulation, in order to be independent, a director must neither be employed by, nor affiliated with, Telecom Argentina, Nortel, Sofora, the Telecom Italia Group or W de Argentina Inversiones. Directors and alternate directors are normally elected at annual ordinary general meetings of the shareholders and serve a renewable three year term.

Because a majority of shares are owned by Nortel, Nortel as a practical matter may have the ability to elect the majority of directors and alternate directors. In the absence of a director, the corresponding alternate director may attend and vote at meetings of the Board of Directors.

See Item 7 Major Shareholders and Related Party Transactions Shareholders Agreement for a description of certain agreements relating to the appointment of members of the Board of Directors.

The following table lists the directors and alternate directors of Telecom Argentina as of December 31, 2011 and, otherwise mentioned, as of the date of this Annual Report:

Table of Contents

<b>Name</b>	<b>Position</b>	<b>Date Director became a Member of the Board</b>
Enrique Garrido	Chairman of the Board of Directors	April 27, 2007
Gerardo Werthein	Vice Chairman of the Board of Directors	December 19, 2003

He graduated from the Universidad Nacional de Mar del Plata (Argentina) and from Purdue University (Indiana USA) with an MSEE and PhD, both in electrical engineering. He also holds an MBA from CEMA Buenos Aires. He joined Telecom Argentina in 1998 as Wholesale Marketing Director. He previously worked at Telintar S.A. (International Business Director), Entel S.A. (International Director) and Purdue University (Image Processing Research). He was born on October 6, 1956.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

*Mario F. Capalbo* is a mechanical engineer from Universidad Nacional de Buenos Aires. He previously worked for Pirelli Group in different areas in Argentina, Brazil and also in Italy. He was formerly General Manager of Pirelli Cables & Systems South America in São Paulo, Brazil. Mr. Capalbo returned to Argentina in April 2006 as Network Director of Telecom Argentina. He was born on May 7, 1952.

Table of Contents

*Stefano Core* is an economist. He holds an MBA from the Catolica del Sacro Cuore University and an MBA from the SDA Bocconi and the University of Michigan Business School. He has extensive experience in management consulting and commercial/marketing management, developed through a broad geographic spectrum (Italy, UK, Germany, Latin America, Far East) and various industries (telecommunications, automotive, durable goods). Since 2010, he is the Director of Fixed Telephony Unit at Telecom Argentina. Before joining Telecom Argentina, he worked for Telecom Italia as Marketing Vice Chairman. Between 1998 and 2008, he worked in Value Partners Management Consulting, where he was responsible for many European, Asian and Latin American telecommunications companies. Before joining Value Partners, he worked from 2000 to 2001 in SAPIENT & Co. as Director of the E-Business Strategy Group, where he was responsible for clients operating in telecommunications and the Internet industry. Between 1995 and 1997, he worked in the Corporate Finance Division of the London office of PriceWaterhouse & Coopers. He was born on December 23, 1971.

*Mariano Cornejo* holds a degree in advertising. He joined Telecom in June 2007. Previously, he served for twelve years as General Manager in Marketing at La Caja de Ahorro y Seguro S.A. He was also Director of Brands for the Werthein Group for the same period. He was born on December 20, 1963.

*Guillermo P. Desimoni* holds a bachelor's degree in systems engineering, a master's degree in management (MBA- IAE) and has completed postgraduate studies in finance (UDESA). He joined the Telecom Group in February 2005. He was formerly a Manager of Operations and Administration at Banco Galicia, and before that, a Vice Chairman at COELSA. He previously worked at Argencard, where he held the position of Manager of Technology and Systems and at Posnet, where he was General Manager. He also served as Senior Manager in Consulting at Accenture. He was born on August 20, 1960.

*María P. Levati* is an accountant. She joined the Telecom Group in August 2008, as Director of Real Estate. She completed her studies at the Universidad Nacional de Buenos Aires. Prior to her employment at the Telecom Group and since 2000, Ms. Levati worked at La Caja de Ahorro y Seguro S.A. where she held several positions, the most recent of which was Manager of Administration. Before 2000, she worked at several financial entities such as JPMorgan, Bank of America and Continental Illinois National Bank with responsibilities in various areas of finance. She began her career at Price Waterhouse & Coopers. She was born in Buenos Aires on August 15, 1962.

*Gonzalo A. Marti nez* is a telecommunications engineer, graduated from La Plata University. He joined Telecom Argentina in 1991. Mr. Martinez has been responsible for different areas of Telecom, such as Products and Services Development Manager, Corporate and Large Customers Manager and Support Manager on Regulation for Operative and Commercial Direction. In 2001, he was appointed Manager of Regulatory Affairs for fixed telecommunication operation and in 2007 as Regulatory Assurance Director of mobile and fixed operations. In 2012 he was appointed Regulatory Affairs Director of Telecom Argentina. Before joining Telecom Argentina, Mr. Marti nez worked at the SADE-Perez Compac Group, in areas of engineering and construction telecommunications projects until 1987, when he was appointed as Business Manager of Micro Sistemas S.A. In 1988, he became Plant Manager of this informatics technology company. He was born on February 12, 1954.

**Supervisory Committee**

Argentine law requires any corporation with share capital in excess of P\$10,000,000 or which provides a public service or which is listed on any stock exchange or is controlled by a corporation that fulfills any of the aforementioned requirements, to have a Supervisory Committee. The Supervisory Committee is responsible for overseeing Telecom Argentina's compliance with its bylaws and Argentine law and, without prejudice to the role of external auditors, is required to present a report on the accuracy of the financial information presented to the shareholders by the Board of Directors at the annual ordinary shareholders' meeting. The members of the Supervisory Committee are also authorized:

- to call ordinary or extraordinary shareholders' meetings;
- to place items on the agenda for meetings of shareholders;
- to attend meetings of shareholders; and
- generally to monitor the affairs of Telecom Argentina.

Table of Contents

Telecom Argentina's bylaws provide that the Supervisory Committee is to be formed by three or five members and three or five alternate members, elected by the majority vote of all shareholders. Members of the Supervisory Committee are elected to serve one year terms and may be reelected.

The following table lists the members and alternate members of the Supervisory Committee as of December 31, 2011:

<b>Name</b>	<b>Position</b>	<b>Profession</b>
Diego Serrano Redonnet	Chairman of the Supervisory Committee	Lawyer
Adela Alicia Codagnone	Member of the Supervisory Committee	Lawyer
Gerardo Prieto	Member of the Supervisory Committee	Accountant
Luis Miguel Incera	Alternate Member of the Supervisory Committee	Lawyer
Lautaro Damián Ferro	Alternate Member of the Supervisory Committee	Lawyer
Guillermo Feldberg	Alternate Member of the Supervisory Committee	Accountant

*Diego Serrano Redonnet* is a lawyer. He holds a law degree from the Argentine Catholic University and a Master of Laws from Harvard Law School. He is a member of the Supervisory Committees of Personal, Sofora, Nortel, Micro Sistemas, Banco Santander Río S.A., BJ Services S.R.L., BRS Investment S.A., America Latina Tecnología S.A., Santander Río Servicios S.A., Perevent Empresa de Servicios Eventuales S.A., Prestamos de Consumo S.A., Santander Río Trust S.A., Santander Sociedad de Bolsa S.A., Gas Argentino S.A. and Metrogas S.A. He was born on September 18, 1966.

She holds a bachelor's degree in law (1989) and a law degree (1991) from the Universidad de Buenos Aires. She also completed a postgraduate course on business law (1994) at the Universidad Argentina de la Empresa and completed a postgraduate course on corporate law (2003) at the Universidad de Buenos Aires. She has also attended several courses on commercial and corporate law. She is a member of the Buenos Aires City Bar Association and of the Bar Association of San Martín, Province of Buenos Aires. She is a member of the Supervisory Committee of Sofora, Nortel, Telecom Argentina, Personal and Micro Sistemas. She is an alternate member of the Supervisory Committee of Lan Argentina S.A., Inversora Cordillera S.A. and Santander Río Asset Management Gerente de Fondos Comunes de Inversión S.A. She was born on December 20, 1966.

*Gerardo Prieto* is an accountant. He has been a member of the Supervisory Committee since 2004. He is also a member of the Supervisory Committees of Sofora, Nortel, Personal and Micro Sistemas. He is Chairman of Campofin S.A., Polifin S.A., Pluria Productores de Seguros S.A., La Caja Aseguradora de Riesgos del Trabajo ART S.A. and Cabaña Doble G del Litoral S.A. He is a director of Standard Bank Argentina S.A., Caja de Seguros S.A., Gregorio, Numo y Noel Werthein SAAGCeI and Ritenere S.A. He is also an alternate director of La Caja de Seguros de Retiro S.A., Caja de Ahorro y Seguro S.A. and La Estrella S.A. Compañía de Seguros de Retiro. He was born on March 3, 1951.

*Luis Miguel Incera* is a lawyer. He is a member of the Advisory Committee of Alpargatas S.A.I.C. and a member of the Supervisory Committees of Alpargatas Textil S.A., Alpargatas Calzados S.A., Alpargatas Textil Exportadora S.A., Calzado Catamarca S.A., Textil Catamarca S.A., Confecciones Textiles S.A., Alpaline S.A., and Fiduciaria del Sur S.A. He is a director and Chairman of the Board of Directors of Viñas Don Martín S.A. and an alternate director of Arbumasa S.A. He is an alternate member of the Supervisory Committees of Personal, Telecom Argentina, Micro Sistemas, Nortel and Sofora. He was born on March 16, 1957.

Table of Contents

*Lautaro Damián Ferro* is a lawyer. He graduated from the Universidad de Buenos Aires in 1999, with honors. During the years 2007 and 2008 he studied for a Master in Business Law at the Universidad de San Andres. He is the author of Prescription Concursal vs Tribuntaria, La Ley, Supl. Economico, June 17, 2008. Since May 2004, he has been a senior associate at Pérez Alati, Grondona, Benites, Arntsen & Martínez de Hoz (h) in Buenos Aires, Argentina. Previously, he was an associate with Chehtman & Asociados in Buenos Aires, Argentina where he developed a large experience in insolvency proceedings. He specializes in complex litigation matters, where he works with several firm departments, including corporate law, bankruptcy, banking, capital markets, energy and antitrust. He is an alternate member of the Supervisory Committee of Telecom Argentina and Alpargatas. He was born on October 25, 1972.

*Guillermo Feldberg* is a public accountant. He has been an alternate member of the Supervisory Committee since 2004. He is also an alternate member of the Supervisory Committees of Personal, Micro Sistemas, Nortel and Sofora. He is Chairman of Agropecuaria La Victoria S.A., Caroline Establecimientos Agropecuarios S.A., Ineba S.A., Izzalini Trade S.A., GWF. S.A., Majuida S.A., Asociacion ORT Argentina and Pintarko S.A. He is Vice Chairman of Doble G del Litoral S.A., Fundación Ineba (Instituto de Neurociencias Buenos Aires) and Cachay S.A. He was born on February 20, 1951.

Telecom Argentina's shareholders, at their meeting held on April 27, 2012, decided to elect five members and five alternate members of the Supervisory Committee for the year 2012, in accordance with the provisions of Telecom Argentina's bylaws. As a result, Silvia A. Rodríguez and Martín E. Scotto were appointed as member and alternate member, respectively, at the request of ANSES through the exercise of cumulative voting procedures (See Item 10 Additional Information Memorandum and Articles of Association Telecom Argentina's capital stock Voting Rights). The remaining members Diego Serrano Redonnet, Adela Alicia Codagnone, Gerardo Prieto and Fernando Saúl Zoppi and the remaining alternate members Cristian Krüger, Pablo Rueda, María G. Grigioni and Guillermo Feldberg were elected by ordinary vote.

There is no family relationship between any director, alternate director, member of the Supervisory Committee or executive officer and any other director, alternate director, member of the Supervisory Committee or executive officer.

**Compensation**

The compensation of the members for the Board of Directors and the Supervisory Committee is established for each fiscal year at the annual meeting of shareholders.

The aggregate compensation paid by Telecom Argentina and its subsidiaries to the members of Telecom Argentina's Board of Directors, the members of Telecom Argentina's Supervisory Committee and the executive officers described under Senior Management above, was approximately P\$29.4 million for the year ended December 31, 2011. During the year ended December 31, 2011, Telecom Argentina was not required to set aside or accrue any amounts to provide pension, retirement or similar benefits.

Accrued compensation for fiscal year 2011 for the members of the Board of Directors and Supervisory Committee was approximately P\$8.3 million and approximately P\$2.5 million, respectively, of which P\$5.8 million and P\$1.4 million remained unpaid as of December 31, 2011, respectively.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Compensation for the executive officers described under "Senior Management" above, amounted to approximately P\$54.2 million during the year ended December 31, 2011 (including fixed and variable compensation, retention plan benefits and, in some cases, severance payments and non-compete agreements), of which P\$28.4 million remained unpaid as of December 31, 2011.

The Company's managers (including Senior Management) receive fixed and variable compensation. A manager's fixed compensation reflects the level of responsibility required for his or her position and the market rate for similar positions. Variable compensation is tied to annual performance goals. Certain managers are beneficiaries of retention plan benefits.

Also, Telecom Argentina implemented a *Long-Term Incentive Program* (LTI), with the purpose of providing Senior Management members with incentives to create value in the medium/long term, invest such members in the Group's success and as an element for retaining key personnel at the organization. For the fiscal year 2010 results, bonuses were paid to the LTI program participants in April 2011. LTI program bonuses for fiscal year 2011 results are expected to be paid in May 2012.

Telecom has no stock option plans for its personnel, or for its members of the Board of Directors or the Supervisory Committee.

Table of Contents

**Board Practices**

Under Argentine law, directors have the obligation to perform their duties with loyalty and the diligence of a prudent business person. Directors are jointly and severally liable to Telecom Argentina, our shareholders and third parties for the improper performance of their duties, for violations of law, our bylaws or regulations and for any damage caused by fraud, abuse of authority or gross negligence. Under Argentine law, specific duties may be assigned to a director by the bylaws or regulations or by resolution of the shareholders' meeting. In these cases, a director's liability will be determined with reference to the performance of these duties, provided that certain recording requirements are met. Under Argentine law, directors are prohibited from engaging in activities in competition with Telecom Argentina without express authorization of a shareholders' meeting. Certain transactions between directors and Telecom Argentina are subject to ratification procedures established by Argentine law.

The Supervisory Committee is responsible for overseeing our compliance with our bylaws and Argentine law and, without prejudice to the role of external auditors, is required to present to the shareholders at the annual ordinary general meeting a report on the accuracy of the financial information presented to the shareholders by the Board of Directors. See Supervisory Committee for further information regarding the Supervisory Committee.

On May 22, 2001 the Argentine government issued Decree No. 677/01, entitled Regulation of Transparency of the Public Offering, or the Transparency Decree. The intention of this decree was to move towards the creation of an adequate legal framework that may strengthen the level of protection of investors in the market. The main objectives of the Transparency Decree are to promote the development, liquidity, stability, solvency and transparency of the market, generating procedures to guarantee the efficient reallocation from savings to investments and good practices in the administration of corporations.

The Transparency Decree has vested in members of the Board of Directors:

- the duty to disclose certain events, such as any fact or situation which is capable of affecting the value of the securities or the course of negotiation;
- the duty of loyalty and diligence;
- the duty of confidentiality; and
- the duty to consider the general interests of all shareholders over the interest of the controlling shareholder.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

A director will not be liable if, notwithstanding his presence at a meeting at which a resolution was adopted or his knowledge of the resolution, a written record exists of his opposition thereto and he reports his opposition to the Supervisory Committee before any complaint against him is brought before the Board of Directors, the Supervisory Committee, the shareholders' meeting, the competent governmental agency or the courts. Any liability of a director vis-à-vis Telecom Argentina terminates upon approval of the directors' performance by the shareholders' meeting, provided that shareholders representing at least 5% of our capital stock do not object and provided further that this liability does not result from a violation of the Company's bylaws, the law or the regulations.

Additionally, the Transparency Decree provides that those who infringe its provisions shall be subject, in addition to civil and criminal liability (as applicable), to certain sanctions including warnings, fines, disqualification, suspension or prohibition from acting under the public offering regime.

Telecom Argentina maintains an officers' and directors' insurance policy covering claims brought against the officers and/or directors relating to the performance of their duties. At present, the total amount covered by this insurance is US\$50,000,000.

In May 2004, the Board of Telecom Argentina resolved to create the Consejo de Dirección, or Steering Committee, which served as an internal body of the Board of Directors and was comprised of four members of the Board of Directors.

Table of Contents

In March 2009, the Board of Directors of Telecom Argentina resolved to dissolve the Steering Committee. However, on April 7, 2010, the Board of Directors of Telecom Argentina resolved to reestablish this Committee, maintaining the same pre-dissolution structure. The Steering Committee, consisting of four members or alternate members of the Board of Directors of Telecom Argentina and Personal, resumed its duties on October 26, 2010. On such date, the Board of Directors issued a new *Regulation of Authority and Operation of the Steering Committee*. The Steering Committee's duties, among others, are: (i) to approve the Business Plan of Telecom Argentina and its subsidiaries, (ii) to approve the general compensation policy of Telecom Argentina and Personal, (iii) to review the bids to be submitted under public bidding processes for any amount over P\$5 million and the marketing plans to determine that they do not violate the Argentine Antitrust Law and (iv) to prepare the Advertising Budget to be submitted to the Board of Directors.

Pursuant to the *Regulation of Authority and Operation of the Steering Committee*, a quorum shall consist of the majority of members of the Steering Committee who attend the meeting or who attend by teleconference or videoteleconference. All members shall adopt decisions unanimously. In the event no resolution is adopted on any of the issues submitted for consideration of the Steering Committee, the matter shall be referred to the Board of Directors.

As of the date of this Annual Report, the members of the Steering Committee are: Gerardo Werthein, Adrián Werthein, Guglielmo Noya and Nicola Verdicchio.

The Company's Bylaws grant the Board of Directors the power to appoint an Executive Committee formed by some of its members, to be in charge of the Company's day to day affairs, under the supervision of the Board of Directors. The Board of Directors decided not to appoint an Executive Committee.

*Regulatory Compliance Committee*

According to the New Shareholders' Agreement and to the TI-W Commitment (See Item 7 Major Shareholders and Related Party Transactions Telco and TI-W Commitments and Shareholders' Agreement), in October 2010, a Regulatory Compliance Committee was created consisting of three members or alternate members of the Board of Directors of Telecom Argentina and Personal not taking into account those members appointed at the request of Telecom Italia and those members appointed jointly by Telecom Italia and W de Argentina, if any. It should be noted that the directors of Telecom Argentina appointed at the request of Telecom Italia or those appointed jointly by W de Argentina and Telecom Italia are not allowed to vote in the appointment of the Regulatory Compliance Committee members.

The major duty of the Regulatory Compliance Committee is to verify the Telecom Argentina and Personal compliance with the requirements (hereinafter, the Requirements) assumed or derived for both companies from the Telco and the TI-W Commitment.

The Regulatory Compliance Committee has the following rights and duties:

- To prepare quarterly reports to be submitted to the Board of Directors of Telecom Argentina and Personal regarding Requirements compliance.

- To audit Telecom Argentina and Personal s Requirements compliance.
- To verify all the information required by Telecom Italia according to the Telecom Italia S.p.A. audit rights under the New Shareholders Agreement of Sofora.
- To approve any agreement to be executed or amended between Telefónica, S.A. and/or any of its affiliates, and Telecom Argentina and/or any of its subsidiaries.
- To prepare annual reports on Requirements compliance, for submittal to the Board of Directors of Telecom Argentina and Personal ten days before their filing with the CNDC.

As of the date of this Annual Report, the members of the Regulatory Compliance Committee are Adrián Werthein (Chairman); Eduardo Federico Bauer and Esteban Gabriel Macek.

Table of Contents

*Audit Committee*

The Transparency Decree also provides that companies with publicly-listed shares shall appoint an audit committee, or the Audit Committee, to be formed by three or more members of the Board of Directors. The majority of the members of the Audit Committee must be independent under CNV rules. In order to qualify as independent, the director must be independent with respect to the company, any controlling shareholders or any shareholders that are significant participants in the company and cannot carry out executive duties for the company. A member of the Board of Directors cannot qualify as an independent director if he or she is a relative of a person who would not qualify as an independent director if such relative were appointed as a member of the Board of Directors.

Among the duties of the Audit Committee shall be:

- providing the market with complete information on transactions with which there might be a conflict of interest with the members of the corporate bodies or controlling shareholders;
  
- giving an opinion on the fulfillment of legal requirements and reasonableness of the conditions for the issuance of shares or securities convertible into shares, in the case of capital increases where preemptive rights have been excluded or limited;
  
- giving an opinion regarding transactions with related parties in certain cases;
  
- supervising internal control systems and verifying norms of conduct; and
  
- reviewing the plans of external auditors and evaluating their performance and their independence, among others.

Pursuant to General Resolution No. 400/02 of the CNV, published in the Official Bulletin on April 5, 2002, the provisions of the Transparency Decree relating to the Audit Committee are applicable for the financial years beginning on or after January 1, 2004.

At the Board of Directors meeting held on April 29, 2004, the Board of Directors resolved the final composition of the Audit Committee, and the Audit Committee came into effect.

According to the Normativa de Implementación del Comité de Auditoría, (a set of guidelines for the Audit Committee filed with the CNV) in case of resignation, dismissal, death or lack of capacity of any of the members of the Audit Committee, the Board of Directors shall immediately

appoint a replacement, who shall remain in such position until the following annual shareholders meeting.

At its meeting on December 1, 2010, the Board of Directors elected Mr. Enrique Garrido, Mr. Esteban Gabriel Macek and Mr. Norberto Carlos Berner as members of the Audit Committee for fiscal year 2010. At its meeting on April 7, 2011, the Board of Directors reelected Mr. Garrido, Mr. Macek and Mr. Berner as members of the Audit Committee. The Board furthermore determined that Mr. Macek qualifies as an audit committee financial expert under SEC guidelines. Under SEC and New York Stock Exchange regulations the three members of the Committee qualify as independent directors. Under CNV regulations, two members of the Audit Committee (Mr. Macek and Mr. Berner) qualify as independent directors.

Pursuant to the Argentine government's Decree No. 677/01, the Audit Committee may seek the advice of lawyers and other outside professionals at Telecom Argentina's expense, so long as the shareholders have approved expenditures for the services of such professionals. For fiscal years 2011 and 2012, a budget of P\$1,000,000 and P\$1,250,000 respectively, was approved for Audit Committee expenditures.

#### *Disclosure Committee*

Telecom Argentina has also established a Disclosure Committee, which is responsible for monitoring the gathering, processing and submission to the CEO and CFO of consolidated financial and non-financial information that is required to be included in disclosure reports in order to ensure timely and accurate disclosure of material information. The duties of the Disclosure Committee include the following:

- assisting the CEO and the CFO in evaluating the effectiveness of Telecom Argentina's disclosure controls and procedures prior to the filing of Annual Reports both in Argentina and the US;

Table of Contents

- suggesting any improvements in disclosure procedures as a result of this evaluation;
- verifying that Telecom Argentina's processes for information collection, processing and control are in compliance with its disclosure procedures such that the accuracy of its disclosures can be verified; and
- providing assistance in determining what information may be considered material to Telecom Argentina.

**Employees and Labor Relations**

As of December 31, 2011, our total number of employees was 16,345, of which approximately 66% belonged to unions. All management and senior positions are held by non-union employees.

Telecom Argentina and Personal have 8,118 and 2,612 unionized employees, respectively, representing an increase of approximately 3% and 10%, respectively, compared to 2010. The union which has the largest number of employees is the Federation of Telephone Workers and Employees of Argentina ( FOETRA ) in Buenos Aires, which is currently included in the Argentine Telecommunications Federation ( FATEL ), representing 4,571 Telecom Argentina employees. The Argentine Federation of Telephone Workers and Employees ( FOESITRA ) represents 2,105 employees. Two remaining unions, the Technical and Supervisory Telephone Personnel Federation ( FOPSTTA ) and the Telecommunications Union ( UPJET ), represent 1,442 middle management employees of Telecom Argentina. Personal has 2,607 employees represented by the FAECyS and 5 employees represented by the Single Argentine Federation of Travelers ( FUVA ).

Salary agreements with labor organizations are reviewed annually or from time to time, in a context of increased social claims and an increased cost of living.

In this scenario, telecommunication activity labor organizations of Telecom Argentina continued negotiating with *Mesa de Unidad Sindical de las Telecomunicaciones* (the MUS - Board of Trade Union Unity), which bring together FOESITRA, FATEL, FOPSTTA and UPJET. The negotiations resulted in an agreement to implement a gradual increase in salaries, which amounted to 20.1% in 2011. Furthermore, another salary increase of 11.4% was agreed and granted in January and February 2012.

With respect to Personal, employees covered by union agreements are represented by the FAECyS, and, as a result, the related salary agreements apply. These agreements contemplated a 30% salary increase in 2011 in amounts not subject to social security contributions. This salary increase was granted gradually: 15% in May 2011, 8% in September 2011 and 7% in December 2011. It was also agreed that, by April 2012, such amounts became subject to social security contributions. This situation contemplates grossing up the original salary increase granted to the employees to 37.5%.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

However, in the near future, Personal's union employees represented by the FAECyS will be represented by the telecommunications labor organizations as they have achieved recognition both in the administrative and judicial field to represent them, at the expense of the FAECyS. Personal has fulfilled all the formalities with the intent to involve the rest of Personal's peer mobile operators in any collective bargaining process in order to achieve symmetrical conditions for all operators in the new collective agreement for the mobile industry. Personal will endeavor to preserve competitive market conditions in the agreement.

With respect to the non-unionized employees of the Telecom Argentina whose representation is claimed by various labor organizations, in September 2010 the Company entered into a *Program Agreement* with the MUS undertaking to follow a review and recategorization process of the employees involved. During January and February 2012, a general agreement was reached with all labor organizations (unions, health associations and the Compensation Fund) establishing grounds for the recategorization process, which involves approximately 1,400-1,500 employees. Such recategorization started in March 2012 and is expected to be finished during 2012.

With respect to the Center for Professionals of Telecommunication Companies ( CEPETEL ), there were negotiations with Telecom Argentina in 2011, as the MTEySS ordered the Company to resume negotiations with this labor organization. During 2012, we will continue negotiating an agreement with this labor organization regarding its scope of representation and employees recategorization.

Table of Contents

See Item 8 Financial Information Legal Proceedings Civil, commercial, labor, regulatory, tax and other matters proceedings Labor Claims for more detail on labor claims filed against Telecom Argentina and Personal.

*Employees by Segment*

The table below shows the number of our employees as of December 31, 2011, 2010 and 2009 by segment:

	December 31, 2011	December 31, 2010	December 31, 2009
Fixed Services	11,092	10,845	11,079
Personal Mobile Services	4,820	4,370	3,799
Núcleo Mobile Services	433	414	422
<b>Total</b>	<b>16,345</b>	<b>15,629</b>	<b>15,300</b>

**Share Ownership**

*Share Ownership by directors, executive officers, and Supervisory Committee members*

Enrique Garrido holds 231 Class B Shares of Telecom Argentina. No other member of the Board of Directors holds obligations or capital stock of Telecom Argentina.

María Delia Carrera Sala holds 3,192 Class B Shares of Telecom Argentina, of which 2,961 were assigned to her as a result of the liquidation of the Guaranty and Repurchase Fund on February 29, 2012 (See Share Ownership Plan for further information regarding the Guaranty and Repurchase Fund).

No other senior executive officer of Telecom Argentina holds obligations or capital stock of Telecom Argentina.

No director, executive officer or member of the Supervisory Committee of Telecom Argentina holds more than 1% of their respective class of shares.

*Share Ownership Plan*

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

At the time of the privatization of ENTEL in 1990, the Argentine government created a Share Ownership Plan, or SOP, for the employees of ENTEL and CAT acquired by Telecom Argentina, Telintar, and Startel. Pursuant to the Privatization Regulations, 10% of Telecom Argentina's then-outstanding shares, consisting of 98,438,098 Class C Shares, was transferred by the Argentine government to Telecom Argentina, Telintar, and Startel employees previously employed by ENTEL and CAT. This transfer was made through a general transfer agreement signed on December 29, 1992 (the General Transfer Agreement). Our Class C Shares consist exclusively of shares originally sold in connection with the SOP. According to applicable law, to be eligible to continue to participate in the SOP, the employees had to remain employed by Telecom Argentina, Telintar, and Startel. Employees who terminated their employment with Telecom Argentina, Telintar, and Startel before the deferred purchase price was fully paid were required to sell their Class C Shares to another employee under the SOP or, if no other employee was available to purchase these shares, to a guaranty and repurchase fund (the Guaranty and Repurchase Fund), at a price calculated according to a formula provided in the General Transfer Agreement.

On December 9, 1999, Decree No. 1,623/99 was issued, authorizing the accelerated repayment of the outstanding balance of the deferred purchase price for all Class C Shares, and lifting the transfer restrictions on the Class C Shares upon the satisfaction of certain conditions precedent. However, the shares held in the Guaranty and Repurchase Fund were still subject to transfer restrictions until an injunction prohibiting trading or selling of these shares was lifted. The decree provides that once the injunction is lifted, the sale of an amount of shares in the Guaranty and Repurchase Fund, will take place in order to cancel the debt owed to the former employees for the acquisition of shares transferred to the Guaranty and Repurchase Fund. The remaining shares held in the Guaranty and Repurchase Fund will then be distributed in accordance with the decision of the majority of the employees taken in a special meeting of the SOP.

In accordance with Decree No. 1,623/99, at the extraordinary and special Class C shareholders' meeting held on March 14, 2000, Telecom Argentina's shareholders approved the conversion of up to 52,505,360 Class C Shares into Class B Shares in one or more tranches from time to time, as determined by the trustee of the

Table of Contents

SOP, Banco de la Ciudad de Buenos Aires, based on the availability of Class C Shares that were not affected by judicial restrictions on conversion.

A first tranche of 50,978,833 Class C Shares was converted into Class B Shares for public resale. This transaction was authorized in Argentina by the CNV and was registered in the United States with the SEC on May 3, 2000. The rest of the Class C Shares authorized for conversion were converted into Class B Shares in four more tranches ending in 2005.

As requested by the Executive Committee of the SOP, the ordinary, extraordinary and special Class C shareholders' meetings held on April 27, 2006 approved the delegation of authority to Telecom Argentina's Board of Directors for the conversion of up to 41,339,464 ordinary Class C Shares into an equal quantity of Class B Shares, in one or more conversions. As of December 31, 2011, all the 41,339,464 shares were converted into Class B Ordinary Shares in eleven tranches.

The remaining 4,593,274 Class C shares were affected by an injunction measure recorded in file *Garcías de Vicchi, Amerinda y otros c/ Sindicación de Accionistas Clase C del Programa de Propiedad Participada s/nulidad de acto jurídico*, which has been lifted. Therefore, the General Ordinary and Extraordinary and Special Class C Shares Meetings held on December 15, 2011, approved the delegation of authority to Telecom Argentina's Board of Directors for the conversion of up to 4,593,274 Class C ordinary shares into an equal quantity of Class B ordinary shares in one or more tranches. As a result, 3,281,265 Class C Shares have been converted to Class B Shares in a first tranche, on March 16, 2012. As of the date of this Annual Report, the outstanding number of Class C Shares is 1,312,009.

## **ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS**

### **Major Shareholders**

Our principal shareholder is Nortel. As of December 31, 2011, Nortel owned all of Telecom Argentina's Class A Ordinary Shares (51% of Telecom Argentina's total capital stock) and approximately 7.71% (7.66% as of the date of this Annual Report) of the Class B Ordinary Shares (3.74% of Telecom Argentina's total capital stock) which, in the aggregate, represented approximately 54.74% of the total capital stock. Telecom Argentina is directly controlled by Nortel by virtue of Nortel's ownership of a majority of Telecom Argentina's capital stock; however, Nortel's controlling interest is subject to certain agreements among Sofora's shareholders. See Shareholders of Nortel below.

Nortel was incorporated in Buenos Aires, Argentina on October 19, 1990 and registered with the Buenos Aires Public Registry of Commerce on October 31, 1990 under No. 8,025, book 108, Volume A of Corporations. Nortel is a holding company that was formed in 1990 by a consortium including the Telecom Italia Group and FCR in connection with the privatization of ENTel and formation of Telecom Argentina.

In the event of certain payment defaults or breaches of covenants, holders of Nortel's preferred stock collectively have the right to elect one director of Nortel and obtain voting rights.

Nortel's offices are located at Alicia Moreau de Justo 50, 11th floor, Buenos Aires, Argentina.

**Shareholders of Nortel**

All of Nortel's ordinary shares are owned by Sofora. Sofora's shares are owned by the Telecom Italia Group (68%) and W de Argentina Inversiones S.L. (32%).

As of December 31, 2011, Nortel's capital stock was represented by ordinary shares (74.01% of the capital stock), Preferred Class A shares (5.58% of the capital stock) and Preferred Class B shares (20.41% of the capital stock). According to IFRS, Nortel's payment obligations under the terms of issuance of the Class A Preferred Shares are classified as a liability. As of December 31, 2011, the valuation of the Preferred Class A Shares was approximately P\$422 million

During 2011, Telecom Italia International N.V. (a company of the Telecom Italia Group) acquired 8% of Nortel's total Class B Preferred Shares (without voting rights) and also made a public announcement together with Telecom Italia S.p.A. regarding the acquisition of Class B Shares representing 1.58% of Telecom Argentina's capital stock through the local company Inversiones Milano S.A. (in the process of changing its name to Tierra Argentea S.A.).

Table of Contents

After the above-mentioned acquisitions and as of the date of this Annual Report, the Telecom Italia Group direct and indirect stake in Telecom Argentina amounts to 22.7% of its economic rights.

W de Argentina - Inversiones S.L., Telecom Italia S.p.A. and Telecom Italia International N.V. have signed a shareholders agreement for the joint management of Sofora, Nortel, Telecom Argentina and its subsidiaries, including Personal which was amended in August 2010, October 2010 and March 2011. See Shareholders Agreement below.

*The Telecom Italia Group*

The Telecom Italia Group operates mainly in Europe, South America and the Mediterranean Basin.

The Telecom Italia Group is engaged principally in the communications sector and, particularly, the fixed and mobile national (Italy) and international telecommunications sector, the television sector and the office products sector.

As of December 31, 2011, the Telecom Italia Group had approximately 14.7 million physical accesses (consumer and business) in Italy, a decrease of 0.7 million compared to December 31, 2010. The wholesale customer portfolio in Italy reached approximately 7.1 million accesses for telephone services as of December 31, 2011, an increase of approximately 0.3 million compared to December 31, 2010.

The broadband portfolio in Italy reached 9.1 million accesses as of December 31, 2011 (consisting of approximately 7.1 million retail accesses and 2.0 million wholesale accesses), stable compared to December 31, 2010 (a market share of 53%).

In addition, the Telecom Italia Group had approximately 32.2 million mobile telephone lines as of December 31, 2011 in Italy, an increase of 1.2 million mobile telephone lines compared to December 31, 2010.

As of December 31, 2011, the Telecom Italia Group had 64.1 million mobile telephone lines in Brazil (51.0 million as of December 31, 2010).

*W de Argentina - Inversiones S.L.*

W de Argentina Inversiones, a company of the Werthein Group, is a company owned by Daniel Werthein, Adrián Werthein, Gerardo Werthein and Darío Werthein. The Werthein Group's main lines of business include farming and oil operations, insurance and financial activities and real estate activities, as described below:

• *Farming and Oil Operations.* Gregorio, Numo y Noel Werthein S.A.A.G.C. e I. ( GNNW ) is the name of the company that handles the businesses of the Werthein Group, mainly related to agribusiness activities and food products. The company owns more than 217,576 acres in the primary farming areas of Argentina, harvesting more than 57,675 tons of different crops and with more than 27,439 heads of cattle dedicated to meat production. It is also involved in the manufacturing of processed fruits as well as teas and other infusions. Most of its products are aimed at the international markets with important exports worldwide. GNNW is also carrying out, through joint ventures, studies, exploration and exploitation of hydrocarbon in Province of La Pampa, Argentina.

• *Insurance Activities.* The Werthein Group controls Los W S.A., which has an interest in Caja de Ahorro y Seguro S.A., or CAYSSA, a leading insurance company in Argentina. CAYSSA controls, directly or indirectly, several subsidiaries that offer general, personal, life, accident, work risk insurance products and retirement insurance and life insurance products that complement retirement insurance. CAYSSA also has shareholdings in companies that provide marketing services and travelers assistance services.

• *Financial Activities.* The Werthein Group controls Holding W-S de Inversiones S.A., which has a minority interest in Standard Bank Argentina S.A. (an Argentine commercial bank), Standard Investments S.A. Sociedad Gerente de Fondos Comunes de Inversión (a mutual fund management company) and Inversora Diagonal S.A. (which provides cash and collection management services).

• *Real Estate Activities.* The Werthein Group conducts real estate, construction, consulting, public works and other real estate related activities through its interests in other companies.

Table of Contents*Ownership of Telecom Argentina Common Stock*

The following table sets forth, as of March 31, 2012, based upon information available to us, each beneficial owner of 5% or more of each class of Telecom Argentina's shares. However, current holdings may be different.

	Number of Shares Owned	Percent of Class	Percent of Total Voting Power(1)
<b>Class A Ordinary Shares:</b>			
Nortel	502,034,299	100.0%	51.00%
<b>Class B Ordinary Shares (listed in NYSE and BCBA):</b>			
ANSES	205,152,019	42.6%	(2) 20.84%
Nortel	36,832,408	7.7%	3.74%
Others	239,050,243	49.7%	24.29%
<b>Class C Ordinary Shares:</b>			
Others	1,312,009	100.0%	0.13%

(1) Represents percentage of total of all our ordinary shares, regardless of class.

(2) On April 13, 2011, a Presidential Decree was published in the Argentine Official Bulletin which annulled Article 76(f) of Law 24,241 that limited ANSES' voting power to 5% of the company's total voting shares, even if ANSES held a greater ownership position. Unless the Presidential Decree and/or its effects are reversed by a competent Authority or Court, ANSES would be able to exercise the total voting power corresponding to its shares in all resolutions to be adopted at Telecom Argentina shareholders meetings, including decisions related to the election of Board members and Supervisory Committee members.

As of March 31, 2012, there were approximately 31.8 million American Depositary Shares outstanding (representing 159.2 million Class B Shares or 35.8% of total Class B Shares excluding those held by Nortel). Moreover, as of that date, there were approximately 90 registered holders of Class B Shares represented by American Depositary Shares in the United States and approximately 28,000 depositaries of Class B Shares in Argentina. Because some Class B Shares are held by representatives, the number and domicile of registered shareholders may not exactly reflect the number and domicile of beneficial shareholders.

All shares have equal voting rights.

The Telecom Group is not aware of any arrangements that would result in a change of control of Telecom Group.

**Telco and TI-W Commitments**

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

On October 25, 2007, a consortium made up of Assicurazioni Generali S.p.A., Intesa Sanpaolo S.p.A., Mediobanca S.p.A., Sintonia S.A. (Benetton) and Telefónica, S.A. (of Spain) bought Olimpia S.p.A.'s entire stock through the Italian company Telco S.p.A., which held approximately 23.6% of Telecom Italia S.p.A.'s voting shares (the Telco Transaction). On December 22, 2009, Sintonia S.A. (Benetton) left the consortium and its participation was assumed by the remaining shareholders of Telco S.p.A. on a pro rata basis. As of December 31, 2011, Telco holds 22.4% of Telecom Italia S.p.A.'s voting shares. As a result of the Telco Transaction, since October 2007, Pirelli & C. S.p.A., its controlled subsidiaries and its related parties have ceased to be related parties of Telecom Argentina and its subsidiaries.

The Telco Transaction has generated different opinions with respect to its impact on Argentina's telecommunications market in light of the Argentine Antitrust Act and the existing regulatory framework.

Consequently, the Telco Transaction led to the intervention of various administrative bodies whose decisions have been subject to various presentations and complaints before administrative and judicial courts.

Table of Contents

On August 5, 2010, Telecom Italia S.p.A., Telecom Italia Internacional N.V. and W de Argentina agreed to:

- A settlement agreement to end all legal proceedings existing between the parties as direct shareholders of Sofora and indirect shareholders of the remaining companies of the Telecom Argentina Group (Sofora, Nortel, Telecom Argentina and its subsidiaries and Personal and its subsidiaries), which had been originated as a result of the Telco Transaction.
- Amend the 2003 Shareholders Agreement. The amendment includes, among other things, certain measures to guarantee a more efficient corporate governance of the Telecom Argentina Group companies. As part of the agreement, a Telecom Argentina and Personal's Regulatory Compliance Committee was created and will remain in place for as long as Telefónica, S.A. (of Spain) owns any subsidiaries in Argentina and concurrently maintains any direct or indirect participation in the Telecom Italia Group and maintains corporate rights similar to those provided by the Telco Transaction.
- The transfer of 8% of the capital stock of Sofora from W de Argentina to Telecom Italia Internacional N.V., subject to the applicable authorizations. This increased Telecom Italia Group's participation to 58% of the capital stock of Sofora (the TI-W Transaction).

On October 6, 2010, Telefónica, S.A. (of Spain), Assicurazioni Generali S.p.A., Intesa Sanpaolo S.p.A., Mediobanca S.p.A. Telco S.p.A, and, as intervening parties, Telecom Italia S.p.A., Telecom Italia Internacional N.V., Sofora, Nortel, Telecom Argentina, Personal, Telefónica de Argentina S.A. and Telefónica Móviles Argentina S.A., submitted before the CNDC an agreement (the Telco Commitment). The Telco Commitment ensures the separation and independence of the activities in the Argentine telecommunications market, of Telefónica, S.A. (of Spain) and its controlled subsidiaries, on one hand, and Telecom Italia S.p.A., Telecom Italia Internacional N.V., Sofora, Telecom Argentina and Personal, on the other, preserving and encouraging the competition conditions of such companies' activities in the national market.

In addition, in connection with the TI-W Transaction, Sofora's shareholders submitted before the CNDC an agreement with respect to the administration and governance of the Telecom Argentina Group (the TI-W Commitment).

On October 12, 2010, the CNDC issued Opinions No. 835 and 836 in connection with the Telco Transaction and the TI-W Transaction, respectively. In Opinion No. 835, the CNDC advised, among other things, the Secretary of Economic Policy of the Economy Ministry to accept the Telco Commitment with the clarifications and specifications made in Title XIV of such Opinion, and, consequently, subject the approval of the Telco Transaction, pursuant to Section 13, paragraph b) of the Argentine Antitrust Act and to the irrevocable and effective fulfilling of the Telco Commitment with the clarifications and specifications as mentioned. In addition, the CNDC made some pro-competition recommendations to the SC and to the CNC, which are included as Annex I to such Opinion.

The terms and conditions of the Telco Commitment offered by the abovementioned companies are detailed in Title XIV of the abovementioned Opinion, together with the clarifications and specifications made by the CNDC.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

In Opinion No. 836, the CNDC advised, among other things, to accept the TI-W Commitment, with the clarifications and specifications made in Title V.2 of the same Opinion and, consequently, to authorize the TI-W Transaction, pursuant to Section 13, paragraph b) of the Argentina Antitrust Act. The terms and conditions of the TI-W Commitment are described in Title V of the Opinion, together with the observations made by the CNDC.

On October 13, 2010, the Secretary of Economic Policy of the Economy Ministry issued Resolution No. 148/10 which, in its operative part, among other issues, authorizes the Telco Transaction subject to the irrevocable and effective fulfillment of the Telco Commitment with the clarifications and specifications made in Title XIV of CNDC Opinion No. 835/10. On the same date, the Secretary of Economic Policy of the Economy Ministry issued its Resolution No. 149/10, in which it accepted the TI-W Commitment and approved the TI-W Transaction in the terms of Section 13 paragraph b) of the Argentine Antitrust Act.

Table of Contents

On October 13, 2010, the SC issued Resolution No. 136/10 which, among other issues, in its operative part authorizes the change of control that happened at Telecom Argentina and Personal as a consequence of the TI-W Transaction. On the same resolution, the legal figure of the Operator included in the List of Conditions, Decree No. 62/90 as amended, was left without effect with respect to Telecom Argentina.

On October 13, 2010, the transfer of 8% of the shares of Sofora in favor of Telecom Italia International N.V. was perfected. Based on information provided by Sofora's shareholders, the consideration was (i) US\$1 (one U.S. dollar w/o cents) and (ii) the execution of certain agreements dated as of August 5, 2010, between the Telecom Italia Group and the Wertheim Group. Thus, the Telecom Italia Group reached a participation of 58% of the shares and possible votes in Sofora while W de Argentina reached the remaining 42% of such shares and votes.

On October 26, 2010, Telecom Argentina's Board of Directors ratified the execution by Telecom Argentina of the Telco Commitment, accepted all the obligations and commitments that Telecom Argentina has assumed in the Telco Commitment, with the clarifications and specifications relating to them, made by the CNDC in Chapter XIV of its Opinion No. 835, and adopted a number of measures for its effective implementation, including the creation of a Regulatory Compliance Committee. In addition, it accepted Telecom Argentina's obligations arising from the TI-W Commitment submitted to the CNDC, in the file referring to the TI-W Transaction, with the clarifications and specifications that are referred to them, made by the CNDC in Paragraph V.2 of its Opinion No. 836 dated October 12, 2010, and adopted a series of measures for their effective implementation.

The Telco Commitment and the TI-W Commitment are available to the public in Spanish at [www.telecom.com.ar/compromisos](http://www.telecom.com.ar/compromisos) and a summary of them is available in English at the SEC website ([www.sec.gov](http://www.sec.gov)).

On March 9, 2011, Telecom Italia International NV, Telecom Italia S.p.A and certain entities of the Wertheim Group entered into a share purchase agreement under which the Wertheim Group agreed to sell common shares of Sofora representing 10% of Sofora's share capital, to Telecom Italia International NV. Following this share transfer, Telecom Italia S.p.A and Telecom Italia International N.V. hold an aggregate of 68% of the Sofora shares. The Wertheim Group owns the remaining 32% of the Sofora shares.

**Shareholders Agreement**

On August 5, 2010, Telecom Italia S.p.A. and Telecom Italia International N.V. (jointly, the Telecom Italia Group) and W de Argentina Inversiones (jointly with the Telecom Italia Group, the Parties), have entered into the *2010 Amended and Restated Shareholders Agreement*, as amended on October 13, 2010 as a consequence of the TI-W Commitment and on March 9, 2011 (the *New Shareholders Agreement*) that amended the provisions and terms of the *2003 Amended and Restated Shareholders Agreement* (the *2003 Shareholders Agreement*).

Below is a brief summary of the main terms and conditions of the *New Shareholders Agreement* and the principal amendments to the *2003 Shareholders Agreement*, considering the new composition of capital stock of Sofora (68% for Telecom Italia Group and 32% for W de Argentina Inversiones):

With respect to Sofora:

- W de Argentina shall have the right to appoint four out of nine Board members and the Telecom Italia Group shall have the right to appoint the remaining five Board members. Decisions will be made by the majority of directors present at each meeting.

- W de Argentina shall have the right to nominate the Chairman of the Supervisory Committee.

With respect to Nortel:

- W de Argentina shall have the right to appoint two out of seven Board members and the Telecom Italia Group shall have the right to appoint four Board members. The seventh director will be nominated by the Preferred Class A and Preferred Class B Shareholders of Nortel, as long as they have such rights in

Table of Contents

accordance with the terms and conditions of issuance of the preferred shares. Decisions will be made by the majority of directors present at each meeting. In case of a tie, the Chairman shall cast the deciding vote.

- W de Argentina shall be entitled to nominate the Chairman of the Audit Committee of Nortel.

With respect to Telecom Argentina:

- As a general rule, Nortel shall have the right to nominate six directors and the minority shareholders shall have the right to nominate one director. Four of the abovementioned six Board members to be nominated by Nortel shall be nominated by the Telecom Italia Group and the remaining two shall be nominated by W de Argentina. Decisions will be made by the majority of directors present at each meeting. In case of a tie, the Chairman shall cast the deciding vote.

- W de Argentina shall be entitled to nominate the Chairman of the Audit Committee of Telecom Argentina. The New Shareholders Agreement also provides that the resolutions of the Audit Committee shall be taken by the unanimous vote of its members.

- The Chairman of Telecom Argentina's Board of Directors shall meet the following requirements: (i) be an Argentine professional of recognized reputation and (ii) shall not have served as member of the Board of Directors or officer at any direct or indirect competitor of Telecom Argentina in the Argentine telecommunications market within the previous twelve months from his appointment.

The New Shareholders Agreement provides for the establishment of a Regulatory Compliance Committee for Telecom Argentina, composed of three members to be selected among the members of Telecom Argentina's and Personal's Boards of Directors, other than those members nominated exclusively by the Telecom Italia Group or jointly with W de Argentina.

The New Shareholders Agreement also provides for the establishment of a Steering Committee for Telecom Argentina, which shall be composed of two members appointed by the Telecom Italia Group and two members appointed by W de Argentina. The Steering Committee shall be in charge of resolving matters concerning Telecom Argentina's business plan, annual budget and general employee compensation policy for Telecom Argentina, among others. The Steering Committee shall validly resolve any matter with the affirmative vote of the majority of the members. In case any matter is not approved by the majority of its members, the Board of Directors shall resolve such matter.

The New Shareholders Agreement still provides for meetings between the Telecom Italia Group and W de Argentina (set forth in Section 4 of the New Shareholders Agreement) before Shareholders or Board of Directors meetings of Sofora, Nortel, Telecom Argentina or its subsidiaries regarding matters that must be treated by Shareholders meetings or those related to preferred Shareholders of Nortel, but it excludes resolutions to be adopted by certain non-executive committees. Therefore, the resolutions to be adopted at the Audit Committee, the Supervisory Committee and the Regulatory Compliance Committee will not be dealt with in such prior meetings, but following the rules of majority of each of those committees.

Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Similar to the 2003 Shareholders Agreement, two members of the Telecom Italia Group and one member of W de Argentina shall attend the meetings and the decisions will be taken through the affirmative vote of the majority of its members.

W de Argentina shall maintain substantially similar veto rights as provided for in the 2003 Shareholders Agreement, upon the following matters:

- the approval of any amendment to the bylaws, other than the amendments expressly set forth in the New Shareholders Agreement;
- dividend policy;
- any capital increase or decrease, except for any capital increase or decrease connected to any possible debt restructuring;

Table of Contents

- changing the location of the headquarter offices;
  
- any acquisition of subsidiaries and/or creation of subsidiaries;
  
- the sale, transfer, assignment or any other disposition of all or substantially all of the assets or any of its subsidiaries;
  
- decisions relating to the establishment of joint ventures;
  
- constitution of any charges, liens, encumbrance, pledge or mortgage over assets, exceeding the amount of US\$20,000,000 (twenty million U.S. dollars);
  
- any change of external auditors, to be chosen among auditors of international reputation;
  
- any related party transaction which is not carried out according to usual market conditions, exceeding the amount of US\$5,000,000, with the exception of (i) any correspondent relationships, traffic agreement and/or roaming agreements with any national and/or international telecommunications carriers/operators, including the establishment, expansion or amendment of such correspondent relationships with any new telecommunications carriers; and (ii) any transaction connected with the debt restructuring;
  
- any extraordinary transaction involving the Telecom Argentina Group, exceeding the amount of US\$30,000,000, except for any operation connected with the debt restructuring of the Telecom Argentina Group; and
  
- any change to the rules of the Steering Committee, the Regulatory Compliance Committee or the Audit Committee; and the creation, changes or dissolution of any committee of the Telecom Argentina Group with similar functions.

**Related Party Transactions**

We have been involved in a number of transactions with our related parties since the Transfer Date.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Our policy is to make transactions with related parties on an arm's-length basis. In addition, Section 73 of Law No. 17,811, as amended by the Transparency Decree, provides that before a publicly-listed company may enter into an act or contract involving a relevant amount with a related party or parties, the publicly-listed company must obtain approval from its Board of Directors and obtain a valuation report from its Audit Committee or two independent valuation firms that demonstrates that the terms of the transaction are consistent with those that could be obtained at an arm's-length basis. For the period that Telecom Argentina's Audit Committee was not yet operational, the valuation report from two independent firms was optional. If the Audit Committee or two independent valuation firms do not find that the terms of the contract are consistent with those that could be obtained on an arm's-length basis, approval must be obtained from the shareholders. For the purpose of section 73 of the Transparency Decree as amended by Decree No. 1,020/03, relevant amount means an amount which exceeds 1% of the issuer's shareholders' equity as contained in the latest approved financial statements, provided this amount exceeds P\$300,000.

Transactions with related parties of Sofora (including Telecom Italia and W de Argentina Inversiones and/or their respective affiliates) resulted in expenses or purchases of approximately P\$330 million for the year ended December 31, 2011. Of that amount, P\$289 million was incurred with Telecom Italia and its affiliates for telecommunications services received by Telecom, international capacity hiring, purchases of equipment and materials and other services provided to Telecom, and P\$41 million incurred with W de Argentina Inversiones' affiliates for insurance costs.

Transactions with related parties of Sofora resulted in income for services rendered by us of approximately P\$111 million for the year ended December 31, 2011, corresponding to payments from Telecom Italia and its affiliates of P\$32 million and from W de Argentina Inversiones of P\$79 million for telecommunications services provided by Telecom.

Table of Contents

Among the above-mentioned transactions with related parties of Sofora were included P\$40,347 of income for services rendered to Etec S.A and P\$544,194 of expenses incurred with Etec S.A. during January 2011, both for international outbound calls. On January 31, 2011, Telecom Italia completed the sale of its 27% stake in Etec S.A. to the Cuban company Rafin S.A. After that transaction, Etec S.A. ceased to be a related party of Telecom Italia.

In addition, transactions with related parties of Sofora for the year 2011 resulted in P\$4 million gain in finance income corresponding to transactions with W de Argentina Inversiones.

See Note 27 to our Consolidated Financial Statements for more detail regarding related parties transactions for the year ended December 31, 2011.

During 2011, Telecom Argentina and Personal entered into technical services agreements with Telecom Italia which expired in December 2011. These agreements were submitted to an independent firm for evaluation, which found them to be reasonable and in accordance with market practice in all material respects, in accordance with the procedure established by Decree No. 677/01 for contracts with related parties. These technical services agreements were also submitted and approved by Telecom Argentina's Audit Committee and its Board of Directors. Under these agreements, Telecom Argentina and Personal incurred in expenses of P\$14 million and P\$12 million for the year ended December 31, 2011, respectively.

In January 2012, Telecom Argentina and Personal entered into new technical services agreements with Telecom Italia which expire in December 2012. Under these agreements, Telecom Argentina and Personal will incur costs of 2.4 million and 1.7 million, respectively, for the duration of the contract.

As of December 31, 2011, we had no loans outstanding to the executive officers of Telecom Argentina.

**Interests of Experts and Counsel**

Not applicable.

**ITEM 8. FINANCIAL INFORMATION**

**Consolidated Statements and Other Financial Information.**

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

See Item 18 for the Company's Financial Statements. For a description of events that have occurred since the date of the Company's Financial Statements, see Item 4 Information on the Company Introduction Recent Developments.

### **Legal Proceedings**

#### **Civil, commercial, labor, regulatory, tax and other matters proceedings**

We are parties to several civil, tax, commercial, labor and regulatory proceedings and other claims that have arisen in the ordinary course of business. As of December 31, 2011, Telecom has established provisions, excluding asset retirement obligations, in an aggregate amount of P\$984 million to cover potential losses related to these claims and proceedings in its Consolidated Financial Statements (P\$90 million for regulatory deducted from assets and P\$894 million included under liabilities). In addition, as of December 31, 2011, P\$46 million deposited in the Company's bank account have been restricted to be used due to some judicial proceedings.

See Note 17 to our Consolidated Financial Statements for additional information.

#### ***Labor Claims***

##### ***Labor Claims for which ENTel is Liable***

The Transfer Agreement provides that ENTel, and not Telecom Argentina, is liable for all amounts owing in connection with claims based upon ENTel's contractual and statutory obligations to former ENTel employees, whether or not these claims are made prior to the Transfer Date, if the events giving rise to these claims occurred prior to the Transfer Date. Certain former employees of ENTel have brought claims against Telecom Argentina, arguing that notwithstanding the Transfer Agreement or an executive act of the Argentine

Table of Contents

government, Telecom Argentina should be held jointly and severally liable for claims made prior to the Transfer Date. The Supreme Court concluded that transferees under privatizations may be held jointly and severally liable for obligations arising from employment contracts prior to the Transfer Date.

As of December 31, 2011, the total amount of these labor claims filed against Telecom Argentina, including accrued interest and expenses, was approximately P\$5 million. Interest and expenses will continue to accrue on any pending amount until it is paid in full. Telecom Argentina believes that the pending claims will not have a significant effect on our results of operations or financial position for two reasons: (1) under the Transfer Agreement, ENTel has expressly agreed to indemnify Telecom Argentina in respect of these claims and (2) the Argentine government has agreed to be jointly and severally liable with ENTel in respect of these indemnity obligations and has authorized Telecom Argentina to debit an account of the Argentine government at *Banco Nación* for any amounts payable by the Argentine government under this indemnity. Under the Debt Consolidation Act, ENTel and the Argentine government may discharge their above-described obligations to Telecom Argentina by issuing 16-year bonds to Telecom Argentina. In its ruling, the Supreme Court recognized the right of licensees to demand that the Argentine government comply with its Transfer Agreement obligations.

Although we cannot guarantee the outcome of these proceedings, in the opinion of our Management and internal legal counsel, the final outcome of these proceedings will not have a material effect on our financial position, results of operations and cash flows.

*Profit Sharing Bonds*

Various legal actions were brought, mainly by former employees of Telecom Argentina, against the Argentine government and Telecom Argentina, requesting that Decree No. 395/92 which expressly exempts Telecom Argentina from issuing the profit sharing bonds provided in Law No. 23,696 be struck down as unconstitutional. The plaintiffs also claimed compensation for damages they had suffered because such bonds had not been issued. In August 2008, the Argentine Supreme Court of Justice found Decree No. 395/92 unconstitutional when resolving a similar case against Telefónica and ordered that the proceedings be remanded back to the court of origin so that said court could decide which defendant was compelled to pay the licensee and/or the Argentine government- and the parameters that were to be taken into account in order to quantify the remedies requested (percent of profit sharing, dismissals of claims due to expiration of the applicable statute of limitations, and distribution method between the program beneficiaries). The Supreme Court of Justice has deemed that the resolution against Telefónica case is applicable to Telecom Argentina when resolving the appeals filed by Telecom Argentina. That criterion has been followed by lower courts.

The Supreme Court has left the determination of incidental issues to the lower courts and asked to take into account that it was the Argentine government who issued the legal rule found to be unconstitutional. On that basis, most of the appellate courts have also found the Argentine government liable and established different methods to calculate the compensation. The Company has filed motions in support of its rights, as regards the statute of limitations and the method to calculate the compensation.

As of the date of this Annual Report, Telecom Argentina's Management, based on the advice of its legal counsel, has recorded provisions that it estimates are adequate to hedge the risks associated with these claims.

Table of Contents

*Subcontractors Employees Labor Claims*

During 2011, certain subcontractors employees have brought lawsuits against subcontractors and Telecom Argentina claiming for direct or indirect responsibility based on a broad interpretation of the rules of labor law. The plaintiffs claimed for the application of the telecommunication bargain collective agreement instead of the telecommunication section of construction collective agreement, resulting in wage differences. As of the date of this Annual Report, Telecom Argentina's Management, based on the advice of its legal counsel, has recorded provisions that it estimates are adequate to hedge the risks associated with these claims.

*Labor and Union Organization Claims*

In recent years, certain labor organizations have filed complaints against Telecom Argentina objecting to the differences in the calculation of social contributions made by Telecom Argentina and have obtained favorable rulings for these claims. Despite Telecom Argentina having appealed these decisions, the appellate courts have affirmed the rulings in many cases. As a result, Telecom Argentina, based on the advice of legal counsel, has recorded provisions to cover the increased risk associated with this type of litigation.

In February 2012, Telecom Argentina reached several agreements with the Compensation Fund, FOETRA and Ospetelco related to the legal actions and claims regarding non-unionized employees' salaries social security contributions. These agreements have been settled for approximately P\$97 million, resulting in: (i) a consumption of the provisions timely made by the Company and, (ii) social security contributions for the period January 2012 to June 2013.

Also, the Company is subject to various lawsuits initiated by some employees and former employees who claim wage differences caused by the impact of the concepts nonremunerative sums (amounts not subject to social security contributions) and food vouchers over the settlement of items such as overtime, productivity, vacation, supplementary annual salary and other additional benefits provided by the Collective Bargaining Agreement. In this regard, the Supreme Court of Justice has recognized that food vouchers are remunerative and are part of the employees' compensations, declaring the unconstitutionality of Sect. 103 bis, inc. C of the Argentine Employment Contract Act (which gives them the character of social benefits). Considering these judicial precedents, as of the date of this Annual Report, the Company's Management, based on the advice of legal counsel, has recorded a provision that it estimates is sufficient to cover the risks associated with these claims.

*Other*

In addition, former sales representatives of Personal have brought legal actions for alleged untimely termination of their contracts and have submitted claims for payment of different items such as commission differences, seniority bonuses and lost profit. While decisions on some of these claims are still pending, most of the claims have been settled by the parties, while others have obtained a favorable partial judgment. Additionally, during 2011, new former sales representatives of Personal have initiated claims for similar reasons to those mentioned above. As of the date of this Annual Report, the Company's Management, based on the advice of legal counsel, has recorded provisions that it estimates are sufficient to cover the risks associated with these claims.

**Tax Matters**

*Tax Matters Relating to Telecom Argentina*

In December 2008, the National Congress approved Law No. 26,476, the Law on Tax Regularization and Repatriation of Capital establishing a regime for the regularization of tax liabilities, the repatriation of funds and the registration of employees. Title I of the law provides taxpayers with a complete exemption for penal responsibilities in tax matters, for fines and a partial exemption for interest arising out of tax or social security liabilities prior to December 31, 2007.

As discussed in previous Annual Reports, Telecom Argentina was party to various legal proceedings arising from claims by AFIP with regards to:

Table of Contents

(a) AFIP's claim for income tax for fiscal years 1993 to 1999 arising from its disagreement with Telecom Argentina's calculation of the depreciation of its fiber optic network.

(b) AFIP's claims for income tax for fiscal years 1997 to 2000 challenging Telecom Argentina's certain deductions it made for bad debt expenses.

(c) AFIP's claims regarding invoices for certain kinds of services.

Upon detailed analysis of the Regularization Regime, on April 30, 2009 Telecom Argentina decided to settle the AFIP's claims in the time frame established by Title I of the above-mentioned law. The settlement for the above-mentioned tax claims was complete except for item b) which was partially settled.

In order to qualify for the Regularization Regime, Telecom Argentina had to voluntarily dismiss legal proceedings previously initiated against AFIP's claims. As a result of the Regularization Regime, regarding the matter mentioned in (c) above, Telecom Argentina has requested the Court to suspend the penal proceedings and dismiss the claims against officers and employees who had been called to give testimony, since the law provides for the suspension of penal proceedings upon adoption of the Regularization Regime, and complete extinguishment of a penal case upon cancellation of all amounts due under the payment plan pursuant to this Regime. As of the date of this Annual Report, a decision of the Court on this matter is still pending.

Telecom Argentina's compliance with the Regularization Regime generated recognition of a debt owed to AFIP in the amount of P\$38 million (nominal value) payable in 120 monthly installments at an annual interest rate of 9%. The Company also recognized a debt for legal fees in connection with these regularized processes in the amount of P\$14 million (nominal value). The value of both liabilities has been estimated at net present value according to IFRS and has been set forth under the captions "Income Tax Payables" and "Other Liabilities" classified by the nature and due date of each liability. As of December 31, 2011 such liabilities amounted to P\$16 million and P\$11 million, respectively.

In December 2001, the AFIP asserted an additional income tax claim regarding the amortization period utilized by Telintar to depreciate its fiber optic network in submarine cables. Subsequently, Telintar was dissolved and merged in equal parts into Telecom Internacional S.A. and Telefónica Larga Distancia de Argentina S.A., entities controlled by Telecom Argentina and Telefónica, respectively. Telecom Internacional S.A. was subsequently merged with and into Telecom Argentina in September 1999. In July 2005, the National Fiscal Court decided against Telecom Argentina by ratifying the tax assessment relating to additional taxes, although it did not require Telecom Argentina to pay interest or penalties. As a result, during the third quarter of 2005, Telecom Argentina recorded a current tax liability amounting to P\$0.5 million against income taxes in its income statement. Telecom Argentina and Telefónica have appealed this judgment before the corresponding Federal Court. In June 2009, this Federal Court rejected the National Fiscal Tribunal Resolution and AFIP's claim. AFIP has appealed this judgment before the Argentine Supreme Court of Justice. Telecom Argentina believes that the final outcome of these cases will not result in an incremental adverse impact on Telecom Argentina's results of operations, financial condition and cash flows.

*Tax Matters Relating to Personal*

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

In December 2006, the AFIP assessed an additional income tax and tax on minimum presumed income for the 2000 and 2001 tax years claiming that Personal incorrectly deducted certain uncollectible receivables. Personal appealed this assessment before the National Fiscal Tribunal. The AFIP's claim is contrary to certain legal precedents issued by the National Fiscal Tribunal. Consequently, Personal and its legal counsel believe that the matter will be resolved in its favor when the appeal process is finalized.

### *Tax Matters Relating to Micro Sistemas*

On December 4, 2000, our subsidiary, Micro Sistemas, received a notice from the Secretary of Treasury Resolution No. 468/00 requesting Micro Sistemas to pay P\$1.1 million (approximately P\$6.7 million as of March 31, 2012) in fines with respect to its failure to comply, prior to its acquisition by Telecom Soluciones, with the terms and conditions of a special tax regulation applicable to Micro Sistemas and requesting payment of the claimed tax compounded with interest. Having exhausted the administrative appeals, on October 3, 2007, Micro Sistemas filed an appeal before the Federal Court of Appeals for Administrative Matters. Because the administrative ruling is being appealed before a judicial court, the Argentine government cannot require

Table of Contents

payment of a disputed fine or tax until a final decision has been issued, therefore, this matter will be clarified when the court reaches a decision on the merits of the appeal. The appeal was admitted by the Court and in November 2008 the Chamber Prosecutor recommended to reject the petition of prescription made by Micro Sistemas.

On February 24, 2012, the Fifth Contentious and Administrative Chamber rendered a final judgment, which was ratified on April 12, 2012 by a motion to clarify the decision, through which the appeal brought by Micro Sistemas was sustained and declared invalid the resolution 468/00, which imposed the fine, as well as full payment of taxes and / or fees not paid under the special tax regulation, compounded with interest, included in such resolution. Following the judgment of the Fifth Chamber, the Argentine Federal Government filed an extraordinary federal appeal against that judgment.

Micro Sistemas' legal counsel for this claim believes that there are strong defense arguments based on which the Chamber will affirm the decision rendered. Furthermore, if Micro Sistemas were to be required to pay these amounts, Telecom Argentina may be able to seek reimbursement for these pursuant to indemnification provisions agreed to by the former owners of Micro Sistemas in the 1997 contract for the purchase of Micro Sistemas. Taking into account the facts above mentioned, Telecom Argentina's Management considers that the possibility that Micro Sistemas will be forced to comply with the Secretary of the Treasury's demand for payment of fines is remote.

*Provincial Taxes*

Some provincial tax authorities have filed claims regarding turnover tax and stamp tax. As of the date of this Annual Report, the Company's Management has recorded provisions that it estimates are adequate to hedge the risks associated with the turnover tax claims. However, regarding stamp tax claims, no provisions were recorded because the Company's management understands that they are contrary to certain legal precedents issued by our National Supreme Court. As a result, Telecom Argentina and Personal are contesting them based in those judicial precedents.

*Municipal Fees*

Since 2005, the Company has seen a noticeable increase in legal and extrajudicial claims seeking the collection of various municipal fees in the City of Buenos Aires and various municipalities. As of the date of this Annual Report the Company has recorded provisions that estimate sufficient to cover these claims.

*Regulatory Proceedings*

There are several proceedings that have been initiated against us with respect to alleged regulatory violations between 2000 and 2011. If the outcomes of these proceedings are unfavorable to us, they could result in fines for the Company. For each of these proceedings, we are challenging the CNC's imposition of fines before administrative authorities and/or the courts. The most significant proceedings relate to damage claims, theft of telephone cables, installation delays, failures with the presubscription process, the printing of telephone directories in small font sizes which were allegedly not legible enough and the non-compliance with certain terms for remedying this.

For a description of certain administrative appeals filed by the Telecom Group with respect to certain regulatory actions, see Item 4 Information on the Company Regulatory Framework. In addition, see Note 17 to our Consolidated Financial Statements for a breakdown of provisions as of December 31, 2011.

***General Proceedings***

*Environmental Proceedings*

In 1999, the Argentine national environmental agency (*Secretaría de Medio Ambiente y Desarrollo Sustentable*) initiated an administrative proceeding against us in connection with our waste management. This agency alleged problems with our liquid drainage at an underground chamber in violation of Argentine environmental law. The agency sought to require Telecom Argentina's registration with the National Register of Generators and Operators of Hazardous Waste. This registration would require Telecom Argentina to pay an annual fee calculated in accordance with a formula that takes into consideration the hazard's extent and the

Table of Contents

waste quantity. Telecom Argentina believes that its activities did not generate this waste, and that the waste in the underground chamber was generated by other parties. Telecom Argentina nonetheless removed the liquid drainage in accordance with environmental law. We have filed the requisite official responses and we believe that we will not have to register with any environmental agency as a result of this liquid drainage. In February 2009, Telecom Argentina received a notification from the environmental agency once again requesting that Telecom Argentina be registered in the National Registry of Generators and Operators of Hazardous Waste. In March 2009, Telecom Argentina filed a request for administrative review seeking to obtain rejection of the environmental agency's ordinance. As of the date of this Annual Report, there has yet to be a resolution on the matter.

*Consumer Trade Union Proceedings*

In November 1995, Telecom Argentina was served with notice of a complaint filed by a consumer trade union, *Consumidores Libres Cooperativa Limitada de Provisión de Servicios Comunitarios*, against Telecom Argentina, Telefónica, Telintar and the Argentine government. The suit seeks to declare null, illegal and unconstitutional all rate rules and agreements related to the Transfer Agreement and to reduce the rates of the licensees so as to obtain a rate of return not in excess of an annual 16% on fixed assets as described in the List of Conditions. Furthermore, the complaint seeks reimbursement of sums allegedly received in excess of the 16% rate of return as well as sums resulting from the reduction in the rate of turnover tax for the city of Buenos Aires. The case is currently in the discovery phase.

In October 2001, the Federal Court of Appeals for Contentious and Administrative Matters issued a precautionary measure suspending the ability of telecommunications companies to increase rates by reference to the U.S. consumer price index. However, the Public Emergency Law and the reformation of the exchange regime have had an analogous result to that proposed by the precautionary measure, since they have prohibited, as of January 6, 2002, contracts with the public administration, including public works and services contracts, from being adjusted to dollars or other foreign currencies. The Public Emergency Law was subsequently extended through December 31, 2013. See Item 4 Information on the Company Regulatory Framework Regulatory Environment Rates.

Additionally, upon the extension of the exclusivity period for the provision of telecommunication services, *Consumidores Libres Cooperativa Limitada de Provisión de Servicios Comunitarios* filed a new lawsuit in Argentine federal courts against the service providers and the Argentine government. Plaintiffs are seeking damages, an injunction revoking the licenses granted to telecommunication service providers and termination of the exclusivity period. This case is currently in discovery.

In addition, on August 14, 2003, Telecom Argentina was served notice of a legal action brought by the *Union of Users and Consumers* against Telecom Argentina, Telefónica and the SC before the Federal Court in Administrative Litigation Matters No. 8. The plaintiffs request reimbursement of certain additional charges included in monthly fixed-line service fees billed by Telecom Argentina. On August 22, 2003, Telecom Argentina opposed this claim on the grounds that the charges are valid since they were expressly provided for under applicable administrative rules and regulations. The legal action brought by the *Union of Users and Consumers* was rejected by the Court of First Instance in October 2011 alleging that the plaintiffs could not demonstrate the damage suffered. The first instance resolution was appealed by the plaintiffs while judicial and expert's fees were appealed by Telecom Argentina. As of the date of this Annual Report, the appeal presented by Telecom Argentina is pending of resolution.

In December 2005, the entity *Asociación Protección Consumidores Del Mercado Común Del Sur Proconsumer* brought an action against the mobile companies, including Personal. The plaintiffs seek to obtain reimbursement for any amounts billed to Personal customers in connection with an investment contribution to the Universal Service Fiduciary Fund. They estimated their claim for reimbursement based on charges made to Personal customers for total billed amounts, plus compensatory interest on any awarded damages. The interest was estimated at the late

payment rate applied by each company to its customers. In its answer to the complaint, one of Personal's main arguments relied on the fact that the complaint should be dismissed, since Personal's reimbursements to its customers had already begun. The full reimbursement of the amounts received by Personal in connection with the investment contribution and corresponding interest were listed separately in customer bills and furnished in accordance with the CNC's report dated December 2006. The report also specified the applicable interest rate. In March 2011, Personal was notified of the first instance resolution, which

Table of Contents

rejected the Proconsumer's claim. The resolution considered the claim to be an unnecessary and an excessive use of judicial time and resources because the reimbursement identified in the complaint had already been made by the defendants. In October 2011, the National Civil and Commercial Federal Court, Chamber No. II confirmed the rejection of the legal action against Personal. The plaintiffs filed an extraordinary appeal, which has already been answered by Personal. As of the date of this Annual Report, a resolution on this matter is still pending.

Although we cannot guarantee the outcome of these proceedings, in our opinion, based on the information available to us and the opinion of our legal counsel, the possibility that these consumer trade union proceedings will have a significant impact on our financial position and cash flows is remote.

In November 2011, Personal was notified of a lawsuit filed by the Financial Consumers Defense Association (*Consumidores Financieros Asociación Civil para su defensa*) claiming that Personal made allegedly abusive charges to its customers by implementing per-minute billing and setting an expiration date for prepaid telecommunication cards.

The lawsuit demands: Personal to (i) cease such practices and bill its customers only for the exact time of telecommunication services used; (ii) reimburse the amounts collected in excess in the ten years preceding the date of the lawsuit; (iii) credit its customers for unused minutes on expired prepaid cards in the ten years preceding the date of the lawsuit; iv) pay interest equal to the lending rate charged by the Banco de la Nación Argentina in addition to the claims mentioned in (i) and (ii); and (v) pay punitive damages provided by article 52 bis of Law No. 24,240.

Personal responded in a timely manner, arguing the grounds by which the lawsuit should be dismissed, with particular emphasis on the regulatory framework that explicitly endorse Personal's practices, now challenged by the plaintiff in disregard of such regulations.

The plaintiffs are seeking damages for unspecified amounts. Currently, Personal is quantifying the risk involved in this contingency. Although Personal believes there are strong defense arguments for which the claim should not succeed, in the absence of jurisprudence on the matter, Personal's Management (with the assistance of its legal counsel) has classified the claim as possible until a judgment is rendered.

**Dividend Policy**

The declaration, amount and payment of dividends are determined by a majority vote of all holders of Telecom Argentina's capital stock. Under the Argentine Corporations Law, dividends may only be declared out of liquid and realized profits determined based on non-consolidated financial statements prepared in accordance with Argentine GAAP and other applicable regulations issued by the CNV and other regulatory bodies. Furthermore, liquid and realized profits can only be distributed when all accumulated losses from past periods have been absorbed and the legal reserve has been constituted (or reconstituted).

Resolution No. 593/11, issued in November 2011 by the CNV, established that a shareholders' meeting that approves financial statements in which retained earnings are positive must make a specific determination on the use of such earnings in accordance with the Law No. 19,550 and, as a result, must resolve on its distribution as cash dividends, capitalization with issuance of paid-in shares, use to create reserves other than statutory reserves, or a combination of such alternatives. As a result of the implementation of the new procedure established by the Resolution

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

No. 593/11, the balance of retained earnings after the allocation approved by the annual shareholders' meeting should be zero.

Under the above-described restrictions, the legal ability of shareholders at any annual meeting of Telecom Argentina to vote to distribute dividends depends on: (i) the existence of liquid and realized profits and (ii) satisfaction of the financial conditions necessary to distribute dividends without negatively affecting the interests of Telecom Argentina.

In preparing the Annual Report in compliance with Argentine requirements, at the end of each fiscal year, the Board of Directors analyzes Telecom Argentina's economic and financial position and its compliance with the abovementioned restrictions. The Board of Directors also takes into account the funds needed for operative purposes for the following fiscal year. The Board of Directors then proposes a course of action with respect to retained earnings, which may or may not include a dividend distribution. The decision with regards to the Board's proposal is made by the Telecom Argentina's shareholders at the Shareholders Meeting.

Table of Contents

At its meeting held on April 7, 2011, Telecom Argentina's shareholders approved the distribution of a cash dividend of P\$915,474,310, which was paid on April 19, 2011. A tax on personal property of P\$6 million paid on behalf of Telecom Argentina's shareholders for the year 2010 was deducted from such dividend payment.

Telecom Argentina's Annual Shareholders meeting held on April 27, 2012 approved a cash dividend distribution of P\$807 million (P\$0.82 per share) to be paid on May 10, 2012. See Item 4 Information of the Company Introduction Recent Developments.

Beginning in 2012, distributable profits will be determined based on nonconsolidated financial statements prepared in compliance with RT 26, as amended by RT 29. RT 26 Adoption of International Financial Reporting Standards of the FACPCE, as amended by RT 29, was approved in December 2009 by the CNV through Resolution No. 562/09, which is mandatory for companies making public offering of securities (such as Telecom Argentina) beginning on January 1, 2012.

**Significant Changes**

No undisclosed significant changes have occurred since the date of the Consolidated Financial Statements.

**ITEM 9. THE OFFER AND LISTING**

As of December 31, 2011, the capital stock of Telecom Argentina was divided into three classes: Class A Ordinary Shares, nominal value P\$1.00 each ( Class A Shares ), representing 51.00% of the outstanding capital stock of Telecom Argentina, Class B Ordinary Shares, nominal value P\$1.00 each ( Class B Shares ), representing approximately 48.53% of the outstanding capital stock of Telecom Argentina, and Class C Ordinary Shares, nominal value P\$1.00 each ( Class C Shares ), representing approximately 0.47% of Telecom Argentina's outstanding capital stock.

The number of shares authorized and outstanding as of December 31, 2011 was as follows:

Class A Shares	502,034,299
Class B Shares (1)	477,753,405
Class C Shares (1)	4,593,274
<b>Total</b>	<b>984,380,978</b>

---

(1) On March 16, 2012, 3,281,265 Class C Shares were converted into Class B Shares.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

The Class B Shares are currently listed on the Buenos Aires Stock Exchange. The ADSs representing Class B Shares are currently listed on the New York Stock Exchange under the symbol TEO. Each ADS currently represents 5 Class B Shares.

The table below shows the high and low closing prices of the Class B Shares in pesos for the periods indicated on the *Mercado de Valores de Buenos Aires* (the Buenos Aires Stock Market or BASM), the current principal non-U.S. trading market for such securities. See The Argentine Securities Market. See Item 3 Key Information Exchange Rates for the exchange rates applicable during the periods set forth below.

Not applicable.

**The Argentine Securities Market**

There are twelve securities exchanges in Argentina, of which six (including the Buenos Aires Stock Exchange) have affiliated stock markets and are authorized to quote publicly-offered securities. The oldest and largest of these exchanges is the Buenos Aires Stock Exchange, founded in 1854, on which approximately 90% of all equity trades are executed. For the year ended December 31, 2011, the ten most actively traded equity issues represented approximately 78% of the total volume of equity traded on the market. Trading in securities listed on an exchange is conducted through a *Mercado de Valores* ( Stock Market ) affiliated with such exchange.

Securities may also be listed and traded on the *Mercado Abierto Electrónico S.A.* (the MAE ), an electronic over-the-counter market trading system that functions independently from the Buenos Aires Stock Exchange and the Buenos Aires Stock Market. However, in March 1992, the Buenos Aires Stock Exchange, the Buenos Aires Stock Market and representatives of the dealers on the MAE implemented an agreement that causes trading in equity and equity-related securities to be conducted exclusively on the Buenos Aires Stock Market, while all corporate debt securities listed on the Buenos Aires Stock Exchange may also be traded on the MAE. Trading in Argentine government securities, which are not covered by the agreement, is expected to be conducted principally on the MAE. The agreement does not extend to other Argentine stock exchanges.

The CNV is responsible for the regulation and supervision to ensure the correct application of the rules governing the Argentine Securities Market.

The CNV has passed a set of resolutions establishing a system of self-regulatory entities, under which each self-regulatory entity (which currently includes each exchange and the MAE, among others) is responsible for developing and implementing regulations governing its respective stock market, subject to the approval and oversight of the CNV. Since March 1, 1993, in addition to CNV authorization, listing on an exchange or the MAE has been required in order to offer to the public within the territory of Argentina securities other than negotiable obligations (*obligaciones negociables*) or other notes of private sector issuers. Internal rules of each exchange for its affiliated Stock Market establish conditions for listing securities, admitting brokers, conducting trades and controlling the truthfulness of any information which is required to be reported in connection therewith.

Changes to the legal framework have been introduced permitting issuance and trading of new financial products in the Argentine capital markets, including commercial paper, futures, options and new types of corporate bonds. The Argentine government deregulated brokerage fees and eliminated transfer taxes and stamp taxes on publicly offered securities transactions in November 1991.

On May 22, 2001, the Argentine government issued the Transparency Decree, which provides a legal framework to strengthen the level of protection of the investor in the market and promotes the development, liquidity, stability, solvency and transparency of the market by generating procedures to guarantee the efficient distribution of savings and good practices in the administration of corporations. The Transparency Decree applies to individuals and entities that participate in public offering of securities, as well as to stock exchanges. Among its key provisions, the decree broadens the definition of a security and governs the treatment of negotiable securities. It seeks to improve transparency by imposing certain disclosure obligations on administrators and members of Supervisory Committees, among others, requiring publicly-listed companies to form audit committees composed of three or more members of the Board of Directors (the majority of whom must be independent under CNV regulations), governing insider trading, market manipulation and securities fraud and regulating going-private transactions and acquisitions of voting shares, including controlling stakes in public companies.

Table of Contents**The Buenos Aires Stock Market**

The Buenos Aires Stock Market, which is affiliated with the Buenos Aires Stock Exchange, is the largest stock market in Argentina. The Buenos Aires Stock Market is a corporation, whose approximately 135 shareholder members are the only individuals and entities authorized to trade in the securities listed on the Buenos Aires Stock Exchange. Trading on the Buenos Aires Stock Market is conducted by continuous open outcry, from 11:00 a.m. to 5:00 p.m. each business day. The Buenos Aires Stock Market also operates an electronic continuous market system each business day, on which privately arranged trades are registered and made public.

Although the Buenos Aires Stock Exchange is one of Latin America's largest securities exchanges in terms of market capitalization, it remains relatively small and illiquid compared to major world markets, and therefore, is subject to greater volatility. To control price volatility, the Buenos Aires Stock Market operates a system which suspends dealing in a particular issuer's shares for fifteen minutes when the price changes 10% with respect to that day's opening price. Once trading resumes, the trading is then suspended for another fifteen minutes if the price changes more than 15% with respect to that day's opening price. If the price then changes 20% with respect to that day's opening price, and for every 5% fluctuation in price thereafter, the trading of such shares is interrupted for an additional ten minutes. Investors in the Argentine securities market are mostly individuals, mutual funds and companies. Institutional investors that trade securities on the Buenos Aires Stock Market, which represent a relatively small percentage of trading activity, consist of a limited number of investment funds.

Certain historical information regarding the Buenos Aires Stock Exchange is set forth in the table below.

	2011	2010	2009	2008	2007
Market capitalization (P\$ billions) (1)	1,611	1,900	2,175	1,234	1,773

**ITEM 10. ADDITIONAL INFORMATION**

**MEMORANDUM AND ARTICLES OF ASSOCIATION**

**Register**

Telecom Argentina's bylaws were registered in the *Inspección General de Justicia* (General Board of Corporations) on July 13, 1990 under number 4,570, book 108, volume A of Corporations. The bylaws with all amendments thereto were registered in the General Board of Corporations on March 31, 2011 under number 5,982, book 53 of Corporations.

Table of Contents

**Objects and Purposes**

Article I, Section 3 of the bylaws states that the object of Telecom Argentina is to render, either on its own account or on account of, or in association with, third parties, telecommunications public services, except for radio broadcasting, under the terms, if any, of the licenses granted by relevant authorities. The bylaws authorize Telecom Argentina to take all actions permitted by law to fulfill its aforementioned objects.

On March 1, 2001, the SC authorized Telecom Argentina to expand its corporate purpose, to include the marketing of equipment, infrastructure and goods of any type related or complementary to telecommunications, and the performance of works and provision of all types of services, including consulting and security related to telecommunications, as well as the development of telecommunications technology and information processing systems. This expansion of the corporate purpose has been approved by the CNV. As a result, the bylaws which reflect this change have been approved and registered in their final form.

On April 30, 2003, Telecom Argentina's shareholders voted not to adhere to the regime established by Decree 677/01 (the Statutory Regime of Public Offer of Mandatory Acquisition) and approved the consequent modification of Article 1° of Telecom Argentina's bylaws. On February 18, 2004, Telecom Argentina's shareholders voted to change the company's name to Telecom Argentina S.A.

**Telecom Argentina's capital stock**

The following is a summary of the rights of the holders of Telecom Argentina shares. These rights are set out in Telecom Argentina's *estatutos sociales* (bylaws) or are provided for by applicable Argentine law, and may differ from those typically provided to shareholders of U.S. companies under the corporations laws of some states of the United States.

*Limited Liability of Shareholders*

Under Argentine law, a shareholder's liability for losses of a company is generally limited to the value of his or her shareholdings in the company. Under Argentine law, however, a shareholder who votes in favor of a resolution that is subsequently declared void by a court as contrary to Argentine law or a company's bylaws (or regulations, if any) may be held jointly and severally liable for damages to such company, to other shareholders or to third parties resulting from such resolution. In connection with recommending certain actions for approval by shareholders, the Board of Directors of Telecom Argentina obtained opinions of internal and/or external counsel concerning the compliance of the actions with Argentine law and our bylaws (or regulations, if any). We currently intend to obtain similar opinions in the future as the circumstances require it. Although the issue is not free from doubt, based on advice of counsel, we believe that a court in Argentina in which a case has been properly presented would hold that a noncontrolling shareholder voting in good faith and without a conflict of interest in favor of such a resolution based on the advice of counsel that such resolution is not contrary to Argentine law or our bylaws or regulations, would not be liable under this provision.

*Voting Rights*

In accordance with the bylaws, each share entitles the holder thereof to one vote at meetings of the shareholders of Telecom Argentina. All of Telecom Argentina's directors are appointed jointly by shareholders in an ordinary general shareholders' meeting.

Under Argentine law, shareholders are entitled to cumulative voting procedures for the election of up to one-third of the vacancies to be filled on the Board of Directors and the Supervisory Committee. If any shareholder notifies a corporation of its decision to exercise its cumulative voting rights not later than three business days prior to the date of a shareholders' meeting, all shareholders are entitled, but not required, to exercise their cumulative voting rights. Under cumulative voting, the aggregate number of votes that a shareholder may cast is multiplied by the number of vacancies to be filled in the election, and each shareholder may allocate the total number of its votes among a number of candidates not exceeding one-third of the number of vacancies to be filled. Shareholders not exercising cumulative voting rights are entitled to cast the number of votes represented by their shares for each candidate. The candidates receiving the most votes are elected to the vacancies filled by cumulative and noncumulative voting. If no candidate for a particular vacancy receives an absolute majority of votes, the two candidates that received the most votes will participate in a run-off election, and the candidate receiving the most votes in the run-off election will be deemed elected.

Table of Contents

In addition, any person who enters into a voting agreement with other shareholders in a public company must inform the CNV of that voting agreement and must file a copy of that voting agreement with the CNV.

*Meetings of Shareholders*

Shareholders' meetings may be ordinary meetings or extraordinary meetings. Telecom Argentina is required to hold an annual ordinary meeting of shareholders in each fiscal year to consider the matters outlined in Article 234 of the Argentine Corporations Law, Article 72 of Law No. 17,811 (as amended by the Transparency Decree) and CNV rules, including but not limited to:

- approval of Telecom Argentina's financial statements and general performance of the directors and members of the Supervisory Committee for the preceding fiscal year;
- election, removal and remuneration of directors and members of the Supervisory Committee;
- allocation of profits; and
- appointment of external auditors.

Matters which may be considered at these or other ordinary meetings include consideration of the responsibility of directors and members of the Supervisory Committee, as well as capital increases and the issuance of negotiable obligations. Extraordinary shareholders' meetings may be called at any time to consider matters beyond the scope of the ordinary meeting, including amendments to the bylaws, issuances of certain securities that permit profit sharing, anticipated dissolution, merger and transformation from one type of company to another, etc. Shareholders' meetings may be convened by the Board of Directors or the members of the Supervisory Committee. The Board of Directors or the members of the Supervisory Committee are also required to convene shareholders' meetings upon the request of any shareholder or group of shareholders holding at least 5% in the aggregate of Telecom Argentina's capital stock. If the Board of Directors or the members of the Supervisory Committee fail to do so, the meeting may be called by the CNV or by the courts.

Notice of the shareholders' meeting must be published in the Official Bulletin of the Republic of Argentina and in a widely circulated newspaper in Argentina at least twenty days before the meeting. In order to attend a meeting, shareholders must submit proper evidence of their ownership of shares via book-entry account held at the Caja de Valores S.A. If so entitled to attend the meeting, a shareholder may be represented by proxy.

Class B Shares represented by ADSs will be voted by the Depositary in accordance with instructions of the holders of the ADSs. In order for voting instructions to be valid, the Depositary must receive them on or before the date specified in the relevant notice. There is no guarantee that an ADS holder will receive voting materials in time to instruct the Depositary to vote.

The quorum for ordinary meetings consists of a majority of the stock entitled to vote and resolutions may be adopted by the affirmative vote of a majority of the shareholders present that have issued a valid vote, without counting voluntary abstentions. If no quorum is present at the meeting, a second meeting may be called at which shareholders present, whatever their number, shall constitute a quorum and resolutions may be adopted by a majority of the shareholders present. The quorum for extraordinary meetings is 60% of the stock entitled to vote. However, if a quorum is not present at the first meeting, the quorum requirement for the second meeting will be 30% of the stock entitled to vote. In both cases, decisions are adopted by a majority of valid votes, except for certain fundamental matters such as:

- mergers and spin-offs, when Telecom Argentina is not the surviving entity and the surviving entity is not listed on any stock exchange;
  
- anticipated liquidation;
  
- change of our domicile to outside Argentina;
  
- total or partial repayment of capital; or
  
- a substantial change in the corporate purpose.

Each of these actions requires a favorable vote of more than 50% of all the stock entitled to vote.

Table of Contents

In some of these cases, a dissenting shareholder is entitled to appraisal rights.

Any resolution adopted by the shareholders at ordinary or extraordinary shareholders' meetings that affects the rights of one particular class of stock must also be ratified by a special meeting of that class of shareholders governed by the rules for ordinary meetings.

*Dividends*

Dividends can be lawfully paid and declared only out of our realized and liquid profit.

The Board of Directors submits to the shareholders for approval at an ordinary meeting of shareholders our financial statements for the previous fiscal year, together with a report thereon by the Board of Directors. The shareholders, upon approving the financial statements, determine the allocation of Telecom Argentina's net profits (if any). Under CNV Resolution No. 593/11, a shareholders' meeting convened to approve the financial statements in which retained earnings are positive must make a specific decision on the use of such earnings in accordance with Law No. 19,550 and, as a result, must resolve on its distribution as cash dividends, capitalization with issuance of paid-in shares, use to create reserves other than statutory reserves, or a combination of such alternatives. In addition, the Argentine Corporations Law requires Argentine companies to allocate 5% of any net profits to legal reserve, until the amount of this reserve equals 20% of our capital stock. The legal reserve is not available for distribution. The remainder of net profits may be paid as dividends on common stock or retained as a voluntary reserve or other account, or a combination thereof, all as determined by the shareholders. Dividends may not be paid if the legal reserve has been impaired, nor until it has been fully rebuilt. Notwithstanding, the obligation to pay declared dividends expires three years after the distribution date pursuant to Section 17 of Telecom Argentina's bylaws, as amended by the shareholders' meeting held on April 24, 2002.

Argentine law permits the Board of Directors of certain companies (such as Telecom Argentina) to approve the distribution of anticipated dividends on the basis of a quarter balance or a balance sheet especially prepared for the purpose of paying such dividends, provided that both the external auditors and the Supervisory Committee have issued an opinion report. The actual payment of these dividends, and the perfection of the obligation to pay them remains subject to the availability of sufficient disposable income as determined in the financial statements for the year.

See Note 29 to our Consolidated Financial Statements regarding restrictions on distributions of profits and dividends.

*Capital Increase and Reductions*

Telecom Argentina may increase its capital upon authorization of the shareholders at an ordinary meeting. All capital increases must be registered with the CNV, published in the Official Bulletin and registered with the Public Registry of Commerce. Capital reductions may be voluntary or mandatory. Shares issued in connection with any increase in capital must be divided among the various classes in proportion to the number of shares of each class outstanding at the date of the issuance, provided that the number of shares of each class actually issued may vary based on the exercise of preemptive rights and additional preemptive rights in accordance with the procedure described under Preemptive Rights.

A voluntary reduction of capital must be approved by an extraordinary meeting of the shareholders and may take place only after notice thereof is published and creditors are given an opportunity to obtain payment or collateralization of their claims, or attachment.

In accordance with Article 206 of the Argentine Corporations Law, suspended by successive decrees until December 10, 2005, reduction of a company's capital stock is mandatory when losses have exceeded reserves and at least 50% of the stated capital (capital stock plus inflation adjustment of capital stock).

Currently, Telecom Argentina is not required to reduce its capital stock.

*Preemptive Rights*

Under Argentine law, holders of a company's common shares of any given class have preferential or preemptive rights, proportional to the number of shares owned by each holder, to subscribe for any shares of capital stock of the same class as the shares owned by the shareholder or for any securities convertible into such shares issued by the company.

Table of Contents

In the event of an increase in capital, shareholders of Telecom Argentina of any given class have a preemptive right to purchase any issue of shares of such class in an amount sufficient to maintain their proportionate ownership of Telecom Argentina's capital stock. For any shares of a class not preempted by any holder of that class, the remaining holders of the class will assume pro rata the non-preempting shareholders' preemptive rights. Pursuant to the bylaws, if any Class B or Class C Shares are not preempted by the existing holders of each such class, the other classes may preempt such class. However, if any shares of Class A are not preempted by the existing holders of such class, holders of Class B or Class C Shares shall have no preemptive rights with respect to such shares of Class A unless otherwise approved by the regulatory authorities. Preemptive rights must be exercised within thirty days following the time when notices to the shareholders of their opportunity to preempt the capital increase are published for three days in the Official Bulletin of the Republic of Argentina and a widely circulated newspaper in Argentina.

Pursuant to the Argentine Corporations Law, preemptive rights could only be restricted or suspended in certain particular and exceptional cases by a resolution of an extraordinary meeting of shareholders when required by the interest of the company.

*Conflicts of Interest*

A shareholder that votes on a business transaction in which its interest conflicts with that of Telecom Argentina may be liable for damages under Argentine law, but only if the transaction would not have been approved without its vote. See Item 3 Key Information Risk Factors Risks Relating to Argentina Shareholders may be liable under Argentine law for actions that are determined to be illegal or ultra vires. See also Power of Directors below for a description of conflict of interest regarding Directors.

*Redemption or Repurchase*

Telecom Argentina's stock is subject to redemption in connection with a reduction of capital by a majority vote of shareholders at an extraordinary shareholders' meeting. Pursuant to the Argentine Corporations Law, Telecom Argentina may repurchase the stock with retained earnings or available reserves, upon a determination of the Board of Directors that the repurchase is necessary in order to avoid severe damage to our business (subject to shareholder ratification) or in connection with a merger or acquisition. In addition, Telecom Argentina can purchase up to 10% of its capital stock in the Buenos Aires stock exchange pursuant to the Transparency Decree complying with the requirements and procedures stated therein. If the purchase is made pursuant to the Transparency Decree, Telecom Argentina must resell the repurchased shares within three years and must give shareholders a preemptive right to purchase the shares. If the purchase is made according to the Argentine Corporations Law, the repurchased shares must be sold within one year, unless the shareholders extend the term.

*Appraisal Rights*

Whenever certain extraordinary resolutions are adopted at shareholders' meetings such as a merger of Telecom Argentina into another entity, a change of corporate purpose, transformation from one type of corporate form to another, or Telecom Argentina's shares cease to be traded publicly, any shareholder dissenting from the adoption of any resolution may withdraw from Telecom Argentina and receive the book value per share determined on the basis of Telecom Argentina's annual financial statements (as approved by the annual ordinary shareholders' meeting), provided that the shareholder exercises its appraisal rights within five days following the meeting at which the resolution was adopted in the case of a dissenting shareholder. This right must be exercised within fifteen days following the meeting if the dissenting shareholder was absent and

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

can prove that he was a shareholder on the day of the meeting. In the case of a merger of Telecom Argentina or a spin-off of Telecom Argentina, no appraisal rights may be exercised if Telecom Argentina is the surviving company.

Appraisal rights are extinguished if the resolution is subsequently overturned at another shareholders meeting held within sixty days of the expiration of the time period during which absent shareholders may exercise their appraisal rights.

Payment on the appraisal rights must be made within one year of the date of the shareholders meeting at which the resolution was adopted. If the resolution was to cease to publicly offer Telecom Argentina's stock, the payment period is reduced to sixty days from the date of the resolution.

Table of Contents

Notwithstanding the foregoing, should Telecom Argentina decide to cease trading its shares publicly, pursuant to Section 31 of the Transparency Decree, a tender offer by Telecom Argentina must be conducted before the exercise of appraisal rights by any shareholder. According to Decree 677/01 redemption value is not the book value but is determined based on market value of shares.

*Liquidation*

Upon liquidation of Telecom Argentina, one or more liquidators may be appointed to wind up its affairs. All outstanding shares of common stock will be entitled to participate equally in any distribution upon liquidation.

In the event of liquidation, the assets of Telecom Argentina shall be applied to satisfy its debts and liabilities. If any surplus remains, it shall be distributed to the holders of shares in proportion to their holdings.

*Acquisitions of 5% or More of the Voting Stock of a Public Company*

Under Argentine law, any person acquiring 5% or more of the voting stock of a public company must inform the CNV in writing of the acquisition of such voting stock. Additionally, such person must inform the CNV in writing of each additional acquisition of 5% of the voting stock of that particular company, until such person acquires control of that company.

**Powers of the Directors**

The bylaws of Telecom Argentina do not contain any provision regarding the ability to vote on a proposal, arrangement or contract where a director is an interested party. Under Argentine law, a director may sign contracts with the company that is related to the company's activities so long as the conditions are on an arm's-length basis. If such contract does not meet such conditions, the agreement may only be subscribed with the prior approval of the Board of Directors or, in absence of quorum, with the approval of the Supervisory Committee. Such transactions must be dealt with at the following shareholders' meeting, and if such meeting does not approve them, the Board of Directors or the Supervisory Committee (as the case may be) are jointly responsible for any damages caused to the company. Argentine law also requires that if a director has a personal interest contrary to Telecom Argentina's, this must be noted to the Board of Directors and to the Supervisory Committee. The director must refrain from participating in any deliberations or risk becoming jointly and severally liable for all damages caused to Telecom Argentina as a result of the conflict.

Additionally, the Transparency Decree dictates that the contracts between a company and a director (that qualifies as a related party) when they exceed 1% of the shareholders' equity of the company, must be submitted to prior approval of the Audit Committee or of two independent evaluation firms to ensure that the transaction is in accordance with market conditions. Such transactions must also be approved by the Board of Directors and reported to the CNV and the markets where the shares of the company are listed. If the Audit Committee or the independent evaluation firms have not determined the terms of the transaction to be according to market conditions, then the contract in question must be submitted for consideration at a shareholders' meeting.

Section 10 of the bylaws of Telecom Argentina establishes that the remuneration of the members of the Board of Directors is to be determined by the shareholders at their annual meeting. The Audit Committee is to issue a prior opinion on the reasonability of the proposed remuneration, which the Board of Directors submits for approval to the shareholders. Therefore, the Directors do not have the ability to vote on compensation for themselves nor for any other director.

The bylaws of Telecom Argentina do not contain any provision regarding the possibility of granting loans to members of the Board of Directors or Company executives.

Members of the Board of Directors of Telecom or its subsidiaries or parent company cannot be appointed as members of the Supervisory Committee.

The bylaws of Telecom Argentina do not establish a maximum age to be member of the Board of Directors.

Neither the bylaws of Telecom Argentina nor any Argentine law require that members of the Board be shareholders.

Table of Contents

**Limitations on Foreign Investment in Argentina**

Under the Argentine Foreign Investment Law, as amended (the "FIL"), the purchase of stock by an individual or legal entity domiciled abroad or by a local company of foreign capital (as defined in the FIL) constitutes a foreign investment subject to the FIL. Foreign investments generally are unrestricted. However, foreign investments in certain industries, such as broadcasting, are restricted as to percentage. No approval is necessary to purchase the Class B Shares. The FIL does not limit the right of nonresident or foreign owners to hold or vote the Class B Shares, and there are no restrictions in Telecom Argentina's bylaws limiting the rights of nonresidents or non-Argentines to hold or to vote Telecom Argentina's Class B Shares. Notwithstanding the foregoing, regulations implemented by the CNV require that all shareholders that are companies who register to participate at a shareholders' meeting should provide details of their registration in the Republic of Argentina. To acquire participation in a company in Argentina, non-Argentine companies are required to comply with the share ownership registration requirements as provided for under Section 123 of the Argentine Corporations Law.

**Change of Control**

There are no provisions in the bylaws of Telecom Argentina which may have the effect of delaying, deferring or preventing a change in control of Telecom Argentina and that would only operate with respect to a merger, acquisition or corporate restructuring involving Telecom Argentina or any of its subsidiaries, except for the regulatory authorization required for the transfer of Nortel's Class A Shares discussed below. Moreover, the Privatization Regulations and the List of Conditions as modified by Resolutions SC No. 111/03 and No. 29/04 prohibit, without prior SC approval, (i) any transfer of our capital stock that reduces Nortel's ownership of Telecom Argentina to less than 51%, or (ii) any transfer of shares of Nortel that reduces the shareholding of the actual ordinary shareholders to less than 51% of the voting stock of Nortel, except with prior authorization of the SC.

Under the Transparency Decree and General Resolution No. 401/02 of the CNV, a party that wishes to obtain either a majority or a significant equity ownership interest in a corporation must offer the same price offered to the majority shareholder to all of the corporation's shareholders. This regulation applies to all Argentine corporations with listed securities unless the corporation's shareholders specifically vote not to adopt the regime, in which case the corporation is required to publicly disclose that its shareholders have voted not to be subject to the regime. On April 30, 2003, Telecom Argentina's shareholders voted not to adopt the regime established by the Transparency Decree and General Resolution No. 401/02, under which Telecom Argentina is currently classified as a *Sociedad No Adherida al Régimen Estatutario Optativo de Oferta Pública de Adquisición Obligatoria* or a Corporation Not Adhering to the Optional Statutory Regime of Public Offer of Mandatory Acquisition.

**MATERIAL CONTRACTS**

For information regarding the shareholders' agreement, see Item 7 Major Shareholders and Related Party Transactions Shareholders' Agreement. We are not a party to the shareholders' agreement.

**FOREIGN INVESTMENT AND EXCHANGE CONTROLS IN ARGENTINA**

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Due to the deterioration of the economic and financial situation in Argentina throughout 2001, the difficulties in dealing with the servicing of the public foreign debt and the decrease of the total level of deposits in the financial system, the Argentine government issued Decree No. 1,570/01, which, as of December 3, 2001, established a number of monetary and currency exchange control measures that included restrictions on the free disposition of funds with banks and restrictions on transferring funds abroad, with certain exceptions for transfers related to foreign trade and certain other transfers subject to the prior authorization of the BCRA.

On February 8, 2002, the BCRA issued tight restrictions on the transfer of funds abroad in order to make payments of principal and/or interest by requiring prior authorization from the BCRA. Since 2003, these restrictions have been progressively curbed. However, there can be no assurances that the BCRA or other governmental agencies will not increase restrictions for making transfers of funds abroad.

Table of Contents

Having completed its debt restructuring as of August 2005, Telecom Argentina is no longer subject to certain significant BCRA restrictions. However, restrictions imposed by the BCRA or other government agencies will not increase restrictions for making transfers of funds abroad:

- (i) subject to certain exceptions and formal requirements, the acquisition of foreign currency as an investment or to apply it to foreign portfolio investments is limited, on a monthly basis, to US\$2 million, *provided* that as of the date of acquisition, Telecom Argentina does not hold due and unpaid principal or interest foreign debt;
- (ii) the acquisition of foreign currency to pay principal maturities on foreign debt obligations can be made on the day of such maturities or:
  1. within the 30 days preceding the maturity date, provided that the acquirer complies with the Minimum Holding Term (as defined below);
  2. within a certain period of time before the maturity date, as a result of the occurrence of specific conditions established under foreign refinancing agreements executed after February 11, 2002; or
  3. before the 30-day period immediately preceding the maturity date *provided* that the acquirer complies with the Minimum Holding Term and the following conditions: (a) the foreign currency amount to be used to prepay non-Argentine debt must not be higher than the present value of the portion of the debt being canceled (as determined using a discount rate by the BCRA) *or* (b) if the prepayment is financed totally or partially with new indebtedness or is part of a restructuring process with foreign creditors, the new debt terms and conditions and the prepayment made must not imply an increase in the present value of the outstanding debt.

In June 2005, the Argentine government imposed certain restrictions on inflows and outflows of foreign currency to the local foreign exchange market that remain in effect. New indebtedness entered into the foreign exchange market and debt renewals with non-Argentine residents from the private sector entered in the local foreign exchange market shall be agreed upon and canceled in terms not shorter than 365 calendar days (the Minimum Holding Term), whatever the form of cancellation thereof. The following transactions, among others, are exempted from this restriction: (i) foreign trade financings (i.e., exports advance payments, prefinancing of exports and imports financing); (ii) balances of foreign exchange transactions with correspondent exchange entities (which are not credit lines); and (iii) primary debt security issuances with a public offering and listing.

Any inflow of funds to the local foreign exchange market arising from, but not limited to, (i) foreign indebtedness, other than the cases described in the following paragraph; (ii) primary stock issuances of companies residing in Argentina not under a public offering and that are not listed in self-governed markets, to the extent they do not create direct investment funds; (iii) portfolio investments of non-residents intended to hold local currency and assets and liabilities of the financial sector and nonfinancial private sector, to the extent they are not arising from the primary subscription of debt securities under a public offering and listed in self-governed markets and/or the primary subscription of stock of companies residing in Argentina under a public offering and listed in self-governed markets; and (iv) portfolio investments of nonresidents intended for the purchase of any right in secondary markets regarding securities issued by the public sector; shall be subject to the creation of a nominative, nontransferable and noncompensated deposit, for 30% of the amount involved in the relevant transaction (the Mandatory Deposit), for a term of 365 calendar days, pursuant to the terms and conditions established in the regulations.

Any inflow of funds to the local foreign exchange market arising from, but not limited to, the following transactions are not subject to the 30% mandatory deposit: (a) foreign indebtedness of Argentine residents under foreign trade financings; (b) primary debt security issuances with a public offering and listed; (c) foreign indebtedness with Multilateral and Bilateral Credit Institutions and Official Credit Agencies, directly or through their related agencies; (d) investments of non-Argentine residents in Argentina under (i) primary subscription of securities issued by the public sector (except for securities issued by the BCRA); and (ii) direct investments, including capital contributions to local companies of direct

investment (namely, a company set up or not as legal entity in which the foreign direct investor holds at least 10% of common shares or voting rights or its

Table of Contents

equivalent), and foreign funds transferred into Argentina by non-Argentine residents for the purpose of purchasing local assets that qualify as direct investment (such as real estate located in Argentina); and (e) foreign financial indebtedness provided: (i) the proceeds from the exchange settlement, net of taxes and expenses, are applied to the purchase of foreign currencies to cancel foreign debt principal and/or to the creation of long-term foreign assets; or (ii) they are incurred and canceled in an average life of not less than two years, including payments of principal and interest in the calculation, and to the extent they are applied to investments in nonfinancial assets. In this context, nonfinancial assets investments mean, among others, investments of assets capable of being registered in the financial statements of the borrower either as fixed assets or as inventory.

There can be no assurance that the BCRA will not once again require its prior authorization for, or restrict in some other way, the transfer of funds abroad for principal and/or interest payments by Telecom to its foreign creditors or for dividend payments by Telecom to its foreign shareholders.

Argentine companies may keep and spend outside Argentina any capital contributions that they have received abroad. Conversely, if a non-Argentine resident sends its capital contribution to the Argentine company in Argentina or the Argentine company repatriates a contribution received abroad, that transfer will be subject to certain requirements under foreign exchange regulations. Those requirements will vary depending on whether the capital contribution is classified as a portfolio or a direct investment. Direct investments are participations in Argentine companies reaching at least a holding of 10% of their common stock or voting rights (and subsequent contributions of a foreign investor who has already reached that level), and portfolio investments are participations that fall below that minimum. Portfolio investments also include holdings of cash and bank deposits on local currency, as well as debt securities, among others.

Funds of direct investments transferred to Argentina as capital contributions are not subject to the Mandatory Deposit, provided that certain requirements are met and the Argentine company receiving such funds completes and registers with the Public Registry of Commerce the related capital increase by the applicable deadline. Portfolio investments are subject to the Mandatory Deposit.

The impact of foreign exchange regulations on the repatriation rights of non-Argentine resident investors (i.e., the right to use Argentine Pesos received in Argentina by a nonresident due to a sale, liquidation or capital reduction to buy foreign currency and transfer it abroad) also varies depending on whether the investment is a direct or a portfolio investment.

In any case, both types of investment must be maintained in Argentina for at least 365 days before repatriation.

Communication A 5,237 of the BCRA, effective from October 28, 2011, added a new requirement for non-Argentine direct investors to repatriate Argentine Pesos collected in Argentina as a consequence of a sale or liquidation of the direct investment, capital reduction and reimbursement of capital contributions in Argentina (the Communication ). As from the effective date of Communication A 5,237, for such purpose, the funds originally paid for such investment or disbursement for the capital contribution, as applicable, must be transferred to Argentina and sold for pesos in the local foreign exchange market (the Transfer Requirement ). Prior to the Communication, non-Argentine investors were not obliged to demonstrate that the funds paid for its investments or disbursements for its capital contributions had been transferred and sold in the exchange market in order to be allowed to repatriate its investment.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

The Communication applies to all the direct investments made on and since October 28, 2011. Therefore, all direct investments made before that date are exempt from the Transfer Requirement.

In addition, repatriation of a portfolio investment requires evidence that the original investment involved the transfer of funds to Argentina and is subject to an aggregate maximum limit of US\$500,000 per calendar month.

Table of Contents

**TAXATION**

**Argentine Taxes**

The following summary of certain Argentine tax matters is based upon the tax laws of Argentina, and regulations thereunder, in effect as of the date of this Annual Report on Form 20-F and is subject to any subsequent change in Argentine laws and regulations which may come into effect after such date. This summary does not purport to be a comprehensive description of all of the tax considerations that may be relevant to a holder of such securities.

*Taxation of Dividends*

Pursuant to Argentine Law No. 25,063 passed by the Argentine Congress on December 7, 1998, dividends of cash, property or capital stock of Telecom Argentina on the Class A, B and C Shares or ADSs are, in general, exempt from Argentine withholding tax and other taxes. Nevertheless, under such law, a corporation that makes a distribution of dividends to its shareholders in excess of the amount of its accumulated taxable net income at the close of the previous taxable year, as determined by application of the Argentine Income Tax Law (the "Income Tax Law"), must withhold a 35% tax from such excess. For purposes of this rule, the amount of income to be considered shall be determined by (1) deducting from taxable income (calculated under the general rules of the Income Tax Law) the income tax paid by the company and (2) adding the dividends and profits not subject to tax received as distributions from other corporations. If the distribution is in kind, then the corporation must pay the tax to the tax authorities and will be entitled to seek reimbursement from the shareholders.

*Taxation of Capital Gains*

Capital gains earned by non-resident individuals or foreign companies from the sale, exchange or other disposition of ADSs or Class A, B and C Shares are not subject to tax.

*Tax on Personal Property*

Argentine Law No. 25,585, as amended by Law No. 26,317, imposes a Tax on Personal Property. According to this tax, the following persons are subject to an annual tax on certain assets, which is levied at rates ranging from 0.50% to 1.25% depending on the value of such assets as of December 31 of each year: (i) individuals domiciled in Argentina for assets located in Argentina and abroad and (ii) individuals domiciled outside of Argentina for assets located in Argentina. For purposes of this tax, shares of stock of Argentine corporations, such as Telecom Argentina's ADSs and Class A, B and C Shares are considered assets located in Argentina.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Although the Tax on Personal Property does not explicitly apply to individuals or entities domiciled outside Argentina, pursuant to Argentine Law No. 25,585, shares of stock corporations or other equity interests in companies regulated by Argentine Corporations Law 19,550, as amended, such as the ADSs (held in book entry form or evidenced by ADRs) and Class A, B and C Shares, and whose holders are individuals and/or undivided estates domiciled in Argentina or in a foreign country, shall be subject to the Tax on Personal Property.

The tax rate to be applied is 0.50% and the taxable base is the value of the shareholders' equity as stated in the most recent balance sheet of the company as of December 31 of each year. Such tax shall be assessed on and paid by the corresponding Argentine company issuer of the shares, such as Telecom Argentina. The tax so paid shall be considered as a definite payment.

The abovementioned rules include an irrebuttable presumption that shares of stock corporations and other equity interests of companies regulated by Argentine Corporations Law 19,550, as amended, such as the ADSs (held in book entry form or evidenced by ADRs) and the Class A, B and C Shares, whose holders are companies, any other legal entities, enterprises, permanent establishments and trusts, domiciled, settled or located in a foreign country, belong indirectly to individuals or individual estates domiciled in a foreign country.

Although Telecom Argentina is required to pay this tax on behalf of the holders of the ADSs and Class A, B and C Shares, it has the right to obtain reimbursement of the amounts paid from its shareholders even if this requires holding and/or foreclosing the property on which the tax is due.

Table of Contents

Therefore, Telecom Argentina's ADSs (held in book entry form or evidenced by ADRs) and Class A, B and C Shares held by individuals, irrespective of their place of residence, and legal entities domiciled outside of Argentina are subject to the Tax on Personal Property, which, as mentioned above, shall be paid by Telecom Argentina on behalf of such holders of ADSs (held in book entry form or evidenced by ADRs) and Class A, B and C Shares.

Telecom Argentina has, from time to time, requested that its shareholders reimburse the amounts of tax on personal property paid on their behalf and has received partial reimbursement of such taxes, however no assurances can be made that Telecom Argentina will be successful in seeking reimbursement of all such taxes paid from holders of ADSs and Class A, B, and C shares. Therefore, as of December 31, 2011, Telecom Argentina has recorded an allowance of P\$17 million for the amounts pending collection. Whenever applicable, tax on personal property paid on behalf of Telecom Argentina's shareholders is deducted from the cash dividend payment.

*Value Added Tax*

The sale or disposition of ADSs or Class A, B and C Shares is not subject to value added tax.

*Other Taxes*

There are no national Argentine inheritance or succession taxes applicable to the ownership, transfer or disposition of ADSs or Class A, B and C Shares. There are no Argentine stamp, issue, registration or similar taxes or duties payable by holders of ADSs or Class A, B and C Shares.

*Deposit and Withdrawal of Class B Shares in Exchange for ADSs*

No Argentine tax is imposed on the deposit or withdrawal of Class A, B and C Shares in exchange for ADSs.

*Tax Treaties*

Argentina has entered into tax treaties with several countries. There is currently no income tax treaty or convention in effect between Argentina and the United States.

**United States Federal Income Taxes**

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

The following discussion is a summary of the material U.S. federal income tax consequences to the U.S. Holders described below of the ownership and disposition of ADSs or Class B Shares, but it does not purport to be a comprehensive description of all of the tax considerations that may be relevant to a holder of such securities. This summary applies only to U.S. Holders (as defined below) that hold ADSs or Class B Shares as capital assets for U.S. federal income tax purposes and does not address the tax consequences applicable to all categories of investors, some of which may be subject to special rules, such as:

- certain financial institutions;
- dealers and traders in securities who use a mark-to-market method of tax accounting;
- persons holding ADSs or Class B Shares as part of a hedging transaction, straddle, wash sale, conversion transaction or integrated transaction or persons entering into a constructive sale with respect to the ADSs or Class B Shares;
- persons whose functional currency for U.S. federal income tax purposes is not the U.S. dollar;
- persons liable for the alternative minimum tax;
- tax-exempt entities, including an individual retirement account or Roth IRA ;
- entities classified as partnerships for U.S. federal income tax purposes;

Table of Contents

- persons that own or are deemed to own 10% or more of any class of Telecom Argentina stock;
- persons who acquired our ADSs or Class B Shares pursuant to the exercise of an employee stock option or otherwise as compensation; or
- persons holding ADSs or Class B shares in connection with a trade or business conducted outside of the United States.

If an entity that is classified as a partnership for U.S. federal income tax purposes holds ADSs or Class B Shares, the U.S. federal income tax treatment of a partner will generally depend on the status of the partner and the activities of the partnership. Partnerships holding ADSs or Class B Shares and partners in such partnerships should consult their tax advisers as to the particular U.S. federal income tax consequences of holding and disposing of the ADSs or Class B Shares.

This summary is based upon the tax laws of the United States, including the Internal Revenue Code of 1986, as amended to the date hereof (the Code ), administrative pronouncements, judicial decisions and final, temporary and proposed Treasury regulations, all as of the date hereof, changes to any of which may affect the tax consequences described herein, possibly with retroactive effect. As mentioned above, there is currently no income tax treaty or convention in effect between Argentina and the United States. U.S. Holders should consult their tax advisers as to the U.S., Argentine or other tax consequences of the acquisition, ownership and disposition of ADSs or Class B Shares in their particular circumstances, including the effect of any state or local tax laws.

In addition, this summary is based in part on representations of the Depositary and assumes that each obligation provided for in, or otherwise contemplated by, the Deposit Agreement or any other related document will be performed in accordance with its terms.

As used herein, the term "U.S. Holder" means for U.S. federal income tax purposes, a beneficial owner of ADSs or Class B Shares that is:

- an individual citizen or resident of the United States;
- a corporation, or other entity taxable as a corporation, created or organized in or under the laws of the United States, any state therein or the District of Columbia; or
- an estate or trust the income of which is subject to U.S. federal income taxation regardless of its source.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

In general, for U.S. federal income tax purposes, holders of ADSs will be treated as the owners of the underlying Class B Shares. Accordingly, no gain or loss will be recognized if a U.S. Holder exchanges ADSs for the underlying Class B Shares represented by those ADSs.

The U.S. Treasury has expressed concerns that parties to whom American depositary shares are released before delivery of shares to the depositary ( pre-release ), or intermediaries in the chain of ownership between holders and the issuer of the security underlying the American depositary shares, may be taking actions that are inconsistent with the claiming of foreign tax credits by holders of American depositary shares. Such actions would also be inconsistent with claiming the reduced rate of tax, described below, applicable to dividends received by certain noncorporate holders. Accordingly, the creditability of Argentine taxes, and the availability of the reduced rate of tax for dividends received by certain noncorporate holders described below, could be affected by actions taken by such parties or intermediaries.

This discussion assumes that Telecom Argentina is not, and will not become, a passive foreign investment company, as described below.

### *Taxation of Distributions*

To the extent paid out of current or accumulated earnings and profits of Telecom Argentina (as determined in accordance with U.S. federal income tax principles), distributions made with respect to ADSs or Class B Shares will be included in the income of a U.S. Holder as ordinary dividend income. Because we do not maintain calculations of our earnings and profits under U.S. federal income tax principles, it is expected that distributions will generally be reported to U.S. Holders as dividends. Subject to applicable limitations and the

Table of Contents

discussion above regarding concerns expressed by the U.S. Treasury, under current law, dividends paid to certain noncorporate U.S. Holders in taxable years beginning before January 1, 2013 will be taxable at a maximum rate of 15% if the dividends represent qualified dividend income.

Qualified dividend income means dividends received from qualified foreign corporations, and a foreign corporation is generally treated as a qualified foreign corporation with respect to dividends paid on stock which is readily tradable on a securities market in the United States (such as the New York Stock Exchange, where our ADSs are traded). U.S. Holders should consult their tax advisers regarding the availability of the reduced dividend tax rate in light of their particular circumstances. The amount of this dividend will include any amounts withheld by us or our paying agent in respect of Argentine income taxes. Dividends will generally be treated as foreign source dividend income to U.S. Holders and will not be eligible for the dividends received deduction generally allowed to U.S. corporations under the Code. Dividends will be included in a U.S. Holder's income on the date of the U.S. Holder's (or in the case of ADSs, the Depositary's) receipt of the dividend. See *Taxation Argentine Taxes*. The amount of the distribution will equal the U.S. dollar value of the pesos received, calculated by reference to the exchange rate in effect on the date such distribution is received (which, for holders of ADSs, will be the date such distribution is received by the Depositary), whether or not the Depositary or U.S. Holder in fact converts any pesos received into U.S. dollars. If the distribution is converted into U.S. dollars on the date of receipt, U.S. Holders should not be required to recognize foreign currency gain or loss in respect of the dividend income. Any gains or losses resulting from the conversion of pesos into U.S. dollars after the date on which the distribution is received will be treated as ordinary income or loss, as the case may be, of the U.S. Holder and will be U.S.-source income or loss.

Subject to applicable limitations and conditions that may vary depending upon the circumstances and subject to the discussion above regarding concerns expressed by the U.S. Treasury, Argentine income taxes withheld from dividends on ADSs or Class B Shares will be creditable against a U.S. Holder's U.S. federal income tax liability. However, amounts paid on account of the Tax on Personal Property will not be eligible for credit against a U.S. Holder's federal income tax liability. See *Taxation Argentine Taxes*. The rules governing foreign tax credits are complex, and U.S. Holders should consult their tax advisers regarding the creditability of foreign taxes in their particular circumstances and to determine the tax consequences applicable to them as a result of amounts paid on account of the Argentine Tax on Personal Property, including whether such amounts are includible in income or deductible for U.S. federal income tax purposes. Instead of claiming a credit, U.S. Holders may elect to deduct otherwise creditable Argentine taxes in computing taxable income, subject to generally applicable limitations under U.S. law. An election to deduct foreign taxes instead of claiming foreign tax credits applies to all taxes paid or accrued in the taxable year to foreign countries and possessions of the United States.

*Sale, Exchange or Other Disposition of ADSs or Class B Shares*

Gain or loss realized by a U.S. Holder on the sale, exchange or other disposition of ADSs or Class B Shares will be subject to U.S. federal income tax as capital gain or loss, and will be long-term capital gain or loss if the U.S. Holder has held the ADSs or Class B Shares for more than one year. The amount of the gain or loss will be equal to the difference between the U.S. Holder's tax basis in the ADSs or Class B Shares disposed of and the amount realized on the disposition, in each case as determined in U.S. dollars. Gain or loss, if any, will generally be U.S.-source gain or loss for foreign tax credit purposes. U.S. Holders should consult their tax advisers regarding the U.S. federal tax treatment of capital gains, which may be taxed at lower rates than ordinary income for individuals, and capital losses, the deductibility of which is subject to limitations.

Deposits and withdrawals of Class B Shares in exchange for ADSs will not result in taxable gain or loss for U.S. federal income tax purposes.

*Passive Foreign Investment Company Rules*

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Telecom Argentina believes that it was not a passive foreign investment company ( PFIC ) for U.S. federal income tax purposes for the taxable year 2011. However, because PFIC status depends upon the composition of a company's income and assets and the market value of its assets from time to time, there can be no assurance that Telecom Argentina will not be a PFIC for any taxable year.

If Telecom Argentina were a PFIC for any taxable year during which a U.S. Holder held an ADS or a Class B Share, gain recognized by a U.S. Holder on a sale, exchange or other disposition (including certain pledges) of the ADS or Class B Share would be allocated ratably over the U.S. Holder's holding period for the ADS or

Table of Contents

Class B Share sold, exchanged or disposed of. The amounts allocated to the taxable year of the sale, exchange or other disposition and to any year before Telecom Argentina became a PFIC would be taxed as ordinary income. The amount allocated to each other taxable year would be subject to tax at the highest rate in effect for individuals or corporations, as appropriate, for that taxable year, and an interest charge would be imposed on the amount allocated to such taxable year. Further, any distribution in respect of the ADS or Class B Share to the extent in excess of 125 percent of the average of the annual distributions on ADS or Class B Share received by the U.S. Holder during the preceding three years or the U.S. Holder's holding period, whichever is shorter, would be subject to taxation in the same manner as gain, described immediately above. Certain elections may be available that would result in alternative treatments (such as mark-to-market treatment) of the ADS or Class B Share. U.S. Holders should consult their tax advisers to determine whether any of these elections would be available and, if so, what the consequences of the alternative treatments would be in their particular circumstances.

If Telecom Argentina were a PFIC for any year during which a U.S. Holder held ADSs or Class B Shares, it generally would continue to be treated as a PFIC with respect to that holder for all succeeding years during which the U.S. Holder held ADSs or Class B Shares, even if Telecom Argentina ceased to meet the threshold requirements for PFIC status.

In addition, if Telecom Argentina were a PFIC or, with respect to a particular U.S. Holder, were treated as a PFIC in a taxable year in which Telecom Argentina pays a dividend or for the prior taxable year, the 15% dividend rate discussed above with respect to dividends paid to certain noncorporate holders would not apply.

If a U.S. holder owns ADSs or Class B shares during any year in which Telecom Argentina is a PFIC, the holder may be required to file an annual report with the Internal Revenue Service containing such information as the U.S. Treasury may require.

*Information Reporting and Backup Withholding*

Payments of dividends and sales proceeds that are made within the United States or through certain U.S.-related financial intermediaries generally are subject to information reporting, and may be subject to backup withholding, unless (i) you are an exempt recipient or (ii) in the case of backup withholding, you provide a correct taxpayer identification number and certify that you are not subject to backup withholding.

The amount of any backup withholding from a payment to you will be allowed as a credit against your U.S. federal income tax liability and may entitle you to a refund, provided that the required information is timely furnished to the Internal Revenue Service.

Certain U.S. Holders who are individuals may be required to report information relating to their ownership of an interest in certain foreign financial assets, including stock of a non-U.S. person, subject to certain exceptions (including an exception for stock held in custodial accounts maintained by a U.S. financial institution). Certain U.S. Holders who are entities may be subject to similar rules in the future. U.S. Holders are urged to consult their tax advisers regarding the effect, if any, of this requirement on their ownership and disposition of ADSs or Class B shares.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Telecom Argentina files annual and special reports and other information with the SEC. You may read and copy any document that Telecom Argentina files at the Public Reference Room of the SEC at 100 F Street NE, Washington, D.C. 20549. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. In addition, the SEC maintains an Internet site at <http://www.sec.gov> that contains reports and other information regarding issuers that file electronically with the SEC.

You may request a copy of these filings by writing or telephoning the offices of Telecom Argentina, Alicia Moreau de Justo 50, (C1107AAB) Buenos Aires, Argentina. Telecom Argentina's telephone number is 011-54-11-4968-4000.

Telecom Argentina maintains a website at [www.telecom.com.ar](http://www.telecom.com.ar). The contents of the website are not part of this Annual Report.

Table of Contents

**ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

Summarized below are the financial instruments we held as of December 31, 2011 that are sensitive to changes in foreign exchange rates and interest rate, if any. As a matter of policy, we may enter into forward exchange contracts, foreign currency swaps or other derivatives to manage the exposure attributed to foreign exchange rate and interest rate fluctuations associated with the principal amount of our liabilities in foreign currencies. We use these instruments to reduce risk by creating offsetting market exposures. The instruments we hold are not held for financial trading purposes. No foreign exchange forward or other derivatives for speculative purposes were outstanding during the reporting periods covered by this Annual Report.

We do not have any other material market risk exposure.

(a) Foreign Exchange Rate Risk

Foreign exchange exposure arises from our funding operations and, to a lesser extent, our capital expenditures and expenses denominated in foreign currencies. Since the Convertibility Law pegged the peso at a value of P\$1.00 per US\$1.00, exchange rate risks before 2002 were mainly related to changes in the value of the U.S. dollar in comparison with currencies other than the Argentine peso. In January 2002, the Argentine government devalued the Argentine peso and currently the peso/U.S. dollar exchange rate is determined by a free market with certain controls. See Item 10 Additional information Foreign Investment and Exchange Controls in Argentina.

Our results of operations are sensitive to changes in the peso/dollar exchange rates because our primary assets are in Argentina and most of our revenues are denominated in pesos (our functional currency) while some part of our liabilities are denominated in foreign currencies. As of December 31, 2011, Telecom Argentina and Personal have no financial debt outstanding. However, Nucleo's debt obligations are denominated in guaraníes, Paraguay's local currency and Telecom Argentina, Personal and Nucleo have commercial debt nominated in U.S. dollars.

Additionally the Company has cash and cash equivalents denominated in U.S. dollars (approximately 29% of total investments time deposits and mutual funds ) that are also sensitive to changes in peso/dollar exchange rates and contribute to reduce the exposure to trade payables in foreign currency. As of December 31, 2011, Personal had US\$6.4 million outstanding in NDF contracts, in order to hedge its exposure to US dollar fluctuations related to accounts payable.

Actions taken by the Argentine government could cause future exchange rates to vary significantly from current or historical exchange rates. Fluctuations in exchange rates may adversely affect the value, translated or converted into U.S. dollars, of our net assets, earnings and any declared dividends. We cannot give any assurance that any future movements in the exchange rate of the Argentine peso against the U.S. dollar and other foreign currencies will not adversely affect our results of operations, financial condition and cash flows. However, we believe that a significant depreciation in the Argentine peso against major foreign currencies may have a material adverse impact on our capital expenditure program and in our operating expenses denominated in foreign currencies.

(b) Interest Rate Risk

As of December 31, 2011 the Company had no outstanding floating rate borrowings. Therefore, the Company is not currently exposed to significant cash flow fluctuations in this connection.

(c) Sensitivity to Exchange Rates

We estimate, based on the composition of the statement of financial position as of December 31, 2011, that every variation in the exchange rate of P\$0.10 against the U.S. dollar and proportional variations in other foreign currencies against the Argentine peso, plus or minus, would result in a variation of approximately P\$20 million of the consolidated amounts of foreign currency position. This analysis is based on the assumption that this variation of the Argentine peso occurred at the same time against all other currencies.

Table of Contents

This sensitivity analysis provides only a limited, point-in-time view of the market risk sensitivity of certain of our financial instruments. The actual impact of market foreign exchange rate changes on our financial instruments may differ significantly from the impact shown in the sensitivity analysis.

See Note 26 to our Consolidated Financial Statements for a description of financial risk management.

**ITEM 12. DESCRIPTION OF SECURITIES OTHER THAN EQUITY SECURITIES**

**D.3 Depositary Fees and Charges**

JPMorgan Chase Bank, N.A. (formerly Morgan Guaranty Trust Company of New York), as depositary for the ADSs (the "depositary") collects its fees for delivery directly from investors depositing shares or surrendering ADSs for the purpose of withdrawal. The depositary also collects taxes and governmental charges from the holders of ADSs. The depositary collects these fees and charges by deducting those fees from the amounts distributed or by selling a portion of distributable property to pay the fees (after attempting by reasonable means to notify the holder prior to such sale).

Persons depositing or withdrawing shares must pay US\$5.00 for each 100 ADSs or portion thereof for issuances of ADSs, including issuances resulting from a distribution, sale or exercise of shares or rights or other property. Investors depositing shares or holders withdrawing deposited securities are charged fees and expenses in connection with stock transfers, taxes and other governmental charges, cable, telex and facsimile transmission and delivery charges imposed at such person's request, transfer or registration fees for the registration of transfer of ADSs on any applicable register in connection with the deposit or withdrawal of ADSs and the depositary's expenses in connection with the conversion of foreign currency.

The depositary reimburses Telecom Argentina for certain expenses we incur in connection with the ADR program, subject to the agreement between us and the depositary from time to time. These reimbursable expenses currently include listing fees, investor relations expenses and fees payable to service providers for the distribution of material to ADR holders. For the year ended December 31, 2011, the depositary reimbursed Telecom Argentina approximately US\$ 157.8 thousand (gross amount of withholding tax) in connection with the ADR program.

Table of Contents

**PART II**

**ITEM 13. DEFAULTS, DIVIDEND ARREARAGES AND DELINQUENCIES**

None of Telecom Argentina, Personal, Núcleo or Telecom Argentina USA are currently in default on any outstanding indebtedness.

**ITEM 14. MATERIAL MODIFICATIONS TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS**

None.

**ITEM 15. CONTROLS AND PROCEDURES**

**Evaluation of disclosure controls and procedures**

Telecom's Management, with the participation of our chief executive and financial officers, evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of December 31, 2011 (the Evaluation Date). Based upon that evaluation, our chief executive and financial officers have concluded that as of the Evaluation Date, the Company's disclosure controls and procedures were effective.

**Management's Report on Internal Control Over Financial Reporting**

Telecom's Management is responsible for establishing and maintaining adequate internal control over financial reporting for Telecom as defined in Exchange Act Rule 13a-15(f) and 15d-15(f). Our internal control over financial reporting was designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS.

Management conducted an evaluation of the effectiveness of Telecom's internal control over financial reporting based on the framework in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this evaluation and as set forth in its report dated March 22, 2012, and included in Item 18, Management concluded that Telecom's internal control over financial reporting was effective as of December 31, 2011. The effectiveness of Telecom's internal control over financial reporting as of December 31, 2011 has been audited by Price Waterhouse & Co. S.R.L., an independent registered public accounting firm, as stated in their report which is included herein. See the complete Management's Report on Internal Control Over Financial Reporting in Item 18.

**Changes in Internal Control Over Financial Reporting**

There were no changes in the Company's internal control over financial reporting that occurred during the period covered by this Annual Report on Form 20-F that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

**ITEM 16A. AUDIT COMMITTEE FINANCIAL EXPERT**

On April 7, 2011, the Board of Directors of Telecom Argentina appointed the members of the Audit Committee for fiscal year 2011 and determined that Esteban Gabriel Macek qualifies as an Audit Committee financial expert. In conducting this evaluation, the Board took into account that Mr. Macek is an accountant from the Universidad de Buenos Aires (1982). He was a partner at Coopers & Lybrand /PriceWaterhouseCoopers until 2002, where he was an auditor and tax consultant. He assisted companies in the private (domestic and international) and public sector in tax matters related to company restructuring and business development. He participated in many professional training activities and attended graduate courses at the Universidad Austral and the West Ontario University Business School (Canada), among others. He was an accounting and law professor at the Universidad de Buenos Aires and at the Universidad Catolica Argentina. He is Chairman of Fiduciaria Internacional Argentina S.A. He was a member of the Board of Directors and of the Supervisory Committee of several domestic corporations. He served as an alternate director of Telecom Argentina during 2007 and since 2008 he has been serving as a director of Telecom Argentina.

Table of Contents

Based on Mr. Macek's professional background and training, the Board of Directors of Telecom Argentina has determined for the year 2011 that he meets the criteria for an Audit Committee financial expert. Mr. Macek is an independent director under CNV and SEC rules and under the New York Stock Exchange listing standards.

The Board of Directors' meeting appointing the Audit Committee members will be held on May 3, 2012. As a result, the members of the Audit Committee appointed at the Board of Directors' meeting of April 7, 2011 continue to hold their positions.

**ITEM 16B. CODE OF ETHICS**

The Board of Directors of Telecom Argentina has approved a Code of Business Conduct and Ethics which applies to directors, members of the Supervisory Committee, officers and employees of the Telecom Group. No waivers, express or implicit, have been granted to any senior officer or member of the Board of Directors of Telecom Argentina with respect to any provision of the Code.

It is also encouraged that suppliers, contractors, advisers and consultants of Telecom, accept the ethical principles of the Code.

The Boards of Directors of Telecom Argentina and Personal, at the meetings held by each on October 26, 2010, decided to include an additional chapter to the Code of Business Conduct and Ethics, which includes the general duties and responsibilities of directors, members of the Supervisory Committee and all personnel of either company, which arise from the Telco Commitment and the TI-W Commitment, pursuant to Resolutions No. 148/10 and No. 149/10 issued by the Secretary of Economic Policy of the Economy Ministry, with certain clarifications and details made by CNDC. The Code of Business Conduct and Ethics is available on our website at [www.telecom.com.ar](http://www.telecom.com.ar).

**ITEM 16C. PRINCIPAL ACCOUNTANT FEES AND SERVICES**

The following table provides information on the aggregate fees for services rendered by our principal accountants (in millions of pesos) for the years ended December 31, 2011 and 2010.

<b>Services Rendered</b>	<b>2011</b>	<b>2010</b>
Audit Fees (1)	7.0	5.9
Audit-Related Fees (2)	0.4	1.5
Tax Fees (3)	0.6	0.5
All Other Fees (4)	0.1	0.1
<b>Total</b>	<b>8.1</b>	<b>8.0</b>

---

(1) Includes fees related to the integrated audit of the Consolidated Financial Statements as of December 31, 2011 and 2010, limited reviews of interim financial statements presented during 2011 and 2010, SEC filing reviews and other attestation services.

- (2) Includes fees for permitted internal control advice and accounting consultations regarding the preparation of financial statements in conformity with IFRS.
- (3) Includes fees for permitted tax compliance and tax advisory services.
- (4) Includes fees for subscription to business publications.

***Audit Committee Pre-Approval Policies and Procedures***

On March 22, 2004, Telecom Argentina's Board of Directors approved policies and procedures relating to the pre-approval of auditors' services and other permitted services (collectively, "Pre-Approval Procedures") for the engagement of any service provided by external auditors to Telecom Argentina and its subsidiaries. Telecom Argentina's Board performed Pre-Approval Procedures until April 2004 (the date on which the Audit Committee came into effect), after which Pre-Approval Procedures were performed by the Audit Committee. Consequently, since that date, all auditors' services were pre-approved by the Audit Committee.

Table of Contents

The Pre-Approval Procedures provide for services that require:

- specific pre-approval to be approved on a case-by-case basis; and
- general pre-approval any category or general kind of service that come within the guidelines established to safeguard auditor independence and come within the maximum amounts set by the Audit Committee.

The Pre-Approval Procedures also provide for the following categorization of services:

Prohibited services are those services that external auditors are not allowed to provide based on prohibitions contained in the statutory rules of Argentina and the United States (i.e., bookkeeping; financial information system design and implementation; appraisal or valuation services, fairness opinions or contribution-in-kind reports; actuarial services; internal audit outsourcing services; management functions; broker/dealer, investment adviser, or investment banking services; expert services unrelated to the audit).

Permitted Services include (a) audit services; (b) audit-related services; (c) tax services, and (d) other services. Moreover, the services included in each category were also detailed, and, where appropriate, any limits imposed on the provision thereof to ensure external auditors' independence.

The Pre-Approval Procedures also require pre-approval for the following services:

- Annual audit and quarterly reviews of Telecom's financial statements: the Audit Committee is required to approve the terms for the engagement and remuneration of such services.
- Other Audit Services : the Audit Committee is required to define the services that will be subject to general pre-approval on an annual basis, setting the annual service fee amount, or the annual amount allocated to each individual service category, or to each service, within which fee caps the provision shall receive general pre-approval.
- Audit-related Services and Tax Services : the Audit Committee is required to define the categories or types of services that will receive general pre-approval, provided that they fall within the annual fee cap set for that service, and establish the guidelines for prior engagement of these services.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

- **Other Permitted Services:** are not subject to general pre-approval, and any other services require specific pre-approval by the Audit Committee for each service.
- **Delegation:** the Audit Committee may solely delegate the specific pre-approval of services with any of its members that qualify as an Independent Director. An Independent Director must immediately report to the Audit Committee after engaging any service by delegation. Under no circumstances may the authority to either approve or pre-approve services be delegated to Telecom's Management.
- **Disclosure of overall billed fees:** external auditors shall include in their audit reports the information about the relationship between the overall fees paid in respect of Audit Services and of services other than audit services. In addition, the Audit Committee shall, on a yearly basis, prepare a report to the Board of Directors which will be included in Form 20-F, providing a detailed account of all fees invoiced by external auditors to Telecom Argentina and to its subsidiaries, grouped into four categories, namely, audit fees, audit related fees, tax consultation fees and all other fees described in the first three bullet points above.
- **Additional Requirements:** the Audit Committee is required to adopt additional measures to fulfill its supervisory obligations related to external auditors' duties, in order to ensure the independence from Telecom, such as the review of a formal written statement by the external auditors outlining all relations existing between them and Telecom, in accordance with Rule No. 1 of the Independence Standards Board, and discussions with the external auditors and the methods and procedures that have been designed to ensure their independence.
- **Amendments:** the Audit Committee has authority to amend the Pre-Approval Procedures, rendering an account of any such amendment to the Board of Directors during the first meeting of the Board of Directors held after making the amendments.

Table of Contents

If Telecom's external auditors are to provide any service, the service must either be granted general pre-approval or specific pre-approval under the Pre-Approval Procedures. The Pre-Approval Procedures require the Audit Committee to consider whether the services to be provided are consistent with the legal and professional rules in effect in Argentina and the United States relating to external auditors' independence. Every six months, the Audit Committee is required to report to the Board of Directors on all services provided by external auditors to Telecom Argentina and its subsidiaries according to the policy and procedure for pre-approval of services rendered by external auditors.

**ITEM 16F. CHANGE IN REGISTRANT'S CERTIFYING ACCOUNTANT**

Not applicable.

**ITEM 16G. CORPORATE GOVERNANCE**

Telecom Argentina's corporate governance practices differ from corporate governance practices of U.S. companies. Telecom Argentina maintains a detailed description of the significant differences in corporate governance practices on its website at [www.telecom.com.ar](http://www.telecom.com.ar), last updated in February 2011.

The following is a summary of the material aspects in which Telecom Argentina's corporate governance policies differ from those followed by U.S. companies under New York Stock Exchange listing standards.

- **Composition of the Board of Directors:** The NYSE requires each Board of Directors to be composed of a majority of independent directors. Although this is not required under Argentine law, as of the date of this summary, the seven-member Board of Directors of Telecom Argentina has three directors who qualify as "independent" according to SEC Rules.
- **Board of Directors Annual Self-Evaluation:** The NYSE requires Boards of Directors of listed companies to conduct a self-evaluation at least annually, and report thereon, determining whether it and its committees are functioning effectively. Under Argentine law, the Board of Directors' performance is evaluated at the Annual Ordinary Shareholders Meeting.
- **Nominating/Corporate Governance Committee:** NYSE listed companies are required to have a nominating/corporate governance committee. Neither Argentine law nor Telecom Argentina's Bylaws require the creation of a nominating/corporate governance committee. In Argentina, it is unusual (though possible) for the Board to nominate new directors and the Board of Directors of Telecom Argentina refrains from making such proposals. The right to nominate and appoint directors is vested in the shareholders who nominate and appoint regular and alternate directors at the Shareholders' meetings. On certain occasions, the Argentine Corporations Law delegates the right to designate directors to the Supervisory Committee.

Table of Contents

- **Compensation Committee:** NYSE listed companies are required to have a compensation committee composed entirely of independent directors. Neither Argentine law nor Telecom Argentina's Bylaws require the creation of a compensation committee. Telecom Argentina's executive compensation matters are undertaken by the Board of Directors and the Steering Committee. The compensation of the members of Telecom Argentina's Board of Directors is determined by the shareholders at the Annual Shareholders' meeting.
- **Audit Committee Hiring Policies:** The NYSE requires listed companies to have an audit committee which sets clear hiring policies for employees or former employees of the independent auditors. There is no such provision regarding the hiring of external auditors' employees contained in Argentine law or Telecom Argentina's bylaws.

According to the provisions of General Resolution No. 516/07 of the CNV, which is effective for fiscal years beginning on or after January 1, 2008, Telecom Argentina prepares and submits to the CNV, on an annual basis, a report which indicates and details the CNV's recommended corporate governance practices as set forth in the CNV Public Offer Regime, explains the practices followed by Telecom Argentina, and the reasons for any variation from practices recommended by the CNV. Telecom Argentina's 2011 Corporate Governance Report was submitted to the CNV as part of the Statutory Annual Report dated February 16, 2012. Telecom Argentina's Corporate Governance Reports submitted to the CNV up to date can be accessed through the CNV's website, [www.cnv.gob.ar](http://www.cnv.gob.ar) and Telecom's website, [www.telecom.com.ar](http://www.telecom.com.ar).

**Report of Independent Registered Public Accounting Firm**

To the Board of Directors and Shareholders of Telecom Argentina S.A.

In our opinion, the accompanying consolidated statements of financial position, the related consolidated statements of income, comprehensive income, shareholders' equity and cash flows present fairly, in all material respects, the financial position of Telecom Argentina S.A. and its subsidiaries (the Company) at December 31, 2011 and 2010, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2011 in conformity with International Financial Reporting Standards as issued by the International Accounting Standards Board. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting appearing on page F2. Our responsibility is to express opinions on these financial statements and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

**Management's Report on Internal Control Over Financial Reporting**

Telecom Group's Management is responsible for establishing and maintaining adequate internal control over financial reporting for Telecom Group as defined in Exchange Act Rule 13a-15(f) and 15d-15(f). Our internal control over financial reporting was designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with International Financial Reporting Standards issued by the International Accounting Standards Board ( IFRS ). Internal control over financial reporting includes those policies and procedures that:

- pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of Telecom Group;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with IFRS and that receipts and expenditures of Telecom Group are being made only in accordance with authorizations of Management and directors of Telecom Group; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of Telecom Group's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management conducted an evaluation of the effectiveness of Telecom Group's internal control over financial reporting based on the framework in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission ( COSO ). Based on our evaluation, Management concluded that the Telecom Group's internal control over financial reporting was effective as of December 31, 2011. The effectiveness of Telecom Group's internal control over financial reporting as of December 31, 2011 has been audited by Price Waterhouse & Co S.R.L., an independent registered public accounting firm, as stated in their report which is included herein.

Table of Contents

Glossary of terms

The following explanations are not intended as technical definitions, but to assist the general reader to understand certain terms as used in these consolidated financial statements.

*ADS*: Telecom Argentina's American Depositary Share, listed on the New York Stock Exchange, each representing 5 Class B Shares.

*AFIP (Administración Federal de Ingresos Públicos)*: The Argentine federal tax authority.

*Argentine GAAP*: Generally Accepted Accounting Principles in force in Argentina through December 31, 2011 for the Company.

*ARO*: Asset Retirement Obligation.

*CNC (Comisión Nacional de Comunicaciones)*: The Argentine National Communications Commission.

*CNV (Comisión Nacional de Valores)*: The Argentine National Securities Commission.

*Company*: Telecom Argentina S.A. and its consolidated subsidiaries.

*CPP (Calling Party Pays)*: The system whereby the party placing a call to a wireless phone rather than the wireless subscriber pays for the air time charges for the call.

*D&A*: Depreciation and amortization.

*FACPCE (Federación Argentina de Consejos Profesionales en Ciencias Económicas)*: Argentine Federation of Professional Councils of Economic Sciences.

Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

*IAS*: International Accounting Standards.

*IFRIC*: International Financial Reporting Interpretations Committee.

*IFRS*: International Financial Reporting Standards, as issued by the International Accounting Standards Board.

*Micro Sistemas*: Micro Sistemas S.A.

*NDF (Non Deliverable Forward)*: A generic term for a set of derivatives which cover national currency transactions including foreign exchange forward swaps, cross currency swaps and coupon swaps in non-convertible or highly restricted currencies. The common characteristics of these contracts are that they involve no exchange of principal, are fixed at a pre-determined price and are typically settled in US dollars (or sometimes in Euros) at the prevailing spot exchange rate taken from an agreed source, time, and future date.

*Nortel*: Nortel Inversora S.A.

*Núcleo*: Núcleo S.A.

*OCI*: Other Comprehensive Income.

*PCS (Personal Communications Service)*: A wireless communications service with systems that operate in a manner similar to cellular systems.

*Personal*: Telecom Personal S.A.

*PP&E*: Property, plant and equipment.

*Publicom*: Publicom S.A.

Table of Contents

*Regulatory Bodies:* Collectively, the SC and the CNC.

*RT:* Technical resolutions issued by the FACPCE.

*SAC:* Subscriber Acquisition Costs. See Note 3.i).

*SC (Secretaría de Comunicaciones):* The Argentine Secretary of Communications.

*SCI (Secretaría de Comercio Interior):* Secretary of Internal Commerce.

*SEC:* Securities and Exchange Commission of the United States of America.

*SIC:* Standing Interpretation Committee.

*SMS:* Short message systems.

*Sofora:* Sofora Telecomunicaciones S.A.

*Springville:* Springville S.A.

*SRMC (Servicios de Radiocomunicaciones Móviles Celular):* Mobile Cellular Radiocommunications Service.

*STM (Servicio Telefónico Móvil):* Mobile Telephone Service.

*Telco S.p.A.:* A joint company made up of Assicurazioni Generali S.p.A., Intesa San Paolo S.p.A., Mediobanca S.p.A., Sintonia S.A. and Telefónica, S.A. (of Spain).

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

*Telecom Group:* Telecom Argentina and its consolidated subsidiaries.

*Telecom Argentina:* Telecom Argentina S.A.

*Telecom Italia:* Telecom Italia S.p.A.

*Telecom Italia Group:* Telecom Italia and its consolidated subsidiaries, except where referring to the Telecom Italia Group as Telecom Argentina's operator in which case it means Telecom Italia and Telecom Italia International, N.V.

*Telecom USA:* Telecom Argentina USA Inc.

*Telefónica:* Telefónica de Argentina S.A.

*Telefónica de España:* Telefónica, S.A. (of Spain).

*Telintar:* Telecomunicaciones Internacionales de Argentina Telintar S.A.

*TLRD (Terminación Llamada Red Destino):* Termination charges from third parties' wireless networks.

*UNIREN (Unidad de Renegociación y Análisis de Contratos de Servicios Públicos):* Renegotiation and Analysis of Contracts of Public Services Division.

*Universal Service or SU:* The availability of Basic telephone service, or access to the public telephone network via different alternatives, at an affordable price to all persons within a country or specified area.

*Value-Added Services (VAS):* Services that provide additional functionality to the basic transmission services offered by a telecommunications network such as voicemail, message signaling, caller-ID, call transferring, call waiting, call conferencing, IVR dialing, ring back tones, personal e-cards, SMS, national and international roaming, automatic call routing, access to wireless internet and access to email via BlackBerry.

*W de Argentina Inversiones:* W de Argentina Inversiones S.L.

Table of Contents

**Note 1 Description of business and basis of preparation of the consolidated financial statements**

a) **The Company and its operations**

Telecom Argentina was created by a decree of the Argentine Government in January 1990 and organized as a *sociedad anónima* under the name Sociedad Licenciataria Norte S.A. in April 1990.

Telecom Argentina commenced operations on November 8, 1990, upon the transfer to the Company of the telecommunications network of the northern region of Argentina previously owned and operated by the state-owned company, Empresa Nacional de Telecomunicaciones ( ENTel ).

Telecom Argentina's license, as originally granted, was exclusive to provide telephone services in the northern region of Argentina through October 10, 1999. As from such date, the Company also began providing telephone services in the southern region of Argentina and competing in the previously exclusive northern region.

The Company provides fixed-line public telecommunication services, international long-distance service, data transmission and Internet services in Argentina and through its subsidiaries, mobile telecommunications services in Argentina and Paraguay and international wholesale services in the United States of America. Information on the Telecom Group's licenses and the regulatory framework is described in Note 2.

Entities included in consolidation and the respective equity interest owned by Telecom Argentina is presented as follows:

<b>Subsidiaries</b>	<b>Percentage of capital stock owned and voting rights (i)</b>	<b>Indirect control through</b>	<b>Date of acquisition</b>
Telecom USA	100.00%		09.12.00
Micro Sistemas (ii)	99.99%		12.31.97
Personal	99.99%		07.06.94
Springville (ii)	100.00%	Personal	04.07.09
Núcleo (iii)	67.50%	Personal	02.03.98

(i) Percentage of equity interest owned has been rounded.

(ii) Dormant entity at December 31, 2011, 2010 and 2009.

(iii) Non-controlling interest of 32.50% is owned by the Paraguayan company ABC Telecomunicaciones S.A.

b) **Segment reporting**

An operating segment is defined as a component of an entity that engages in business activities from which it may earn revenues and incur expenses, and whose financial information is available, held separately, and evaluated regularly by the Chief Executive Officer ( CEO ).

Operating segments are reported in a consistent manner with the internal reporting provided to the CEO, who is responsible for allocating resources and assessing performance of the operating segments. The CEO assesses the performance of the operating segments at the net income (loss) level and under the accounting principles effective at each time for reporting to the Regulatory Bodies. The accounting policies applied for segment information are the same for all operating segments.

During the years 2010 and 2009 the financial information provided to the CEO was based on Argentine GAAP. For year 2011 the CEO assessed the operating segments performance both under Argentine GAAP and IFRS. Given that IFRS amounts are the measurement principles most consistent with those used in measuring the corresponding amounts in these financial statements, the Company has presented the segment information under IFRS for all years presented. As a result, segment information for the years 2010 and 2009 previously presented under Argentine GAAP and reconciliated with IFRS - was modified to report figures under IFRS to conform to the current year presentation. Figures under IFRS for the years 2010 and 2009 were also reported as additional segment information in Note 30 to the Company's consolidated financial statements under IFRS as of December 31, 2010 and 2009.

Information regarding segment reporting is included in Note 28.

c) **Basis of preparation**

These consolidated financial statements have been prepared in accordance with IFRS as issued by the International Accounting Standards Board. IFRS comprises all effective IAS together with all the SIC and all interpretations issued by the IFRIC.

Table of Contents

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires Management to exercise its judgment in the process of applying the Telecom Group's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 3.

The Company has split certain items in the current and noncurrent liabilities of the statement of financial position in order to enable users of the financial statements to better understand the information contained therein. As a result a new item "Deferred revenues" was added in the statement of financial position. In addition asset retirement obligation liabilities previously reported under "Other liabilities" were classified under the "Provisions" item line. Information for year 2010 was also reclassified to conform to the current year presentation.

The financial statements (except for cash flow information) are prepared on an accrual basis of accounting. Under this basis, the effects of transactions and other events are recognized when they occur. Therefore income and expenses are recognized at fair value on an accrual basis regardless of when they are perceived or paid. When significant, the difference between the fair value and the nominal amount of income and expenses is recognized as finance income or expense using the effective interest method over the relevant period.

The accompanying consolidated financial statements have also been prepared on a going concern basis (further details are provided in Note 3).

Publication of these consolidated financial statements for the year ended December 31, 2011 was approved by resolution of the Board of Directors' meeting held on March 22, 2012.

**d) Financial statement formats**

The financial statement formats adopted are consistent with IAS 1. In particular:

- the consolidated statements of financial position have been prepared by classifying assets and liabilities according to current and non-current criterion. Current assets and liabilities are those that are expected to be realized/settled within 12 months after the year-end;
- the consolidated income statements have been prepared by classifying operating expenses by nature of expense as this form of presentation is considered more appropriate and representative of the specific business of the Group, and are in line with the industrial sector of reference;
- the consolidated statements of comprehensive income include the profit or loss for the year as shown in the consolidated income statement and all components of other comprehensive income;

- the consolidated statements of changes in equity have been prepared showing separately (i) profit (loss) for the year, (ii) other comprehensive income (loss) for the year, and (iii) transactions with owners in their capacity as owners;
- the consolidated statements of cash flows have been prepared by presenting cash flows from operating activities according to the indirect method , as permitted by IAS 7.

These consolidated financial statements contain all material disclosures required under IFRS. Some additional disclosures required by the Argentine Corporations Law have been included in the accompanying consolidated financial statements.

## **Note 2 - Regulatory framework**

### **(a) Regulatory bodies and general legal framework**

Telecom Argentina and Personal operate in a regulated industry. Regulation not only covers rates and service terms, but also the terms on which various licensing and technical requirements are imposed.

The provision of telecommunication services is regulated by the SC and supervised by the *Comisión Nacional de Comunicaciones*, the National Communications Commission ( CNC ). The CNC is in charge of general oversight and supervision of telecommunications services. The SC has the power to develop, suggest and implement policies which are applicable to telecommunications services; to ensure that these policies are applied; to review the applicable legal regulatory framework; to act as the enforcing authority with respect to the laws governing the relevant activities; to approve major technical plans and to resolve administrative appeals filed against CNC resolutions.

Table of Contents

The principal features of the regulatory framework in Argentina have been created by:

- The Privatization Regulations, including the List of Conditions;
- The Transfer Agreement;
- The Licenses granted to Telecom Argentina and its subsidiaries;
- The Tariff Agreements; and
- Various governmental decrees, including Decree No. 764/00, establishing the regulatory framework for licenses, interconnection, universal service and radio spectrum management.

Núcleo, Personal s Paraguayan controlled company, is supervised by the *Comisión Nacional de Telecomunicaciones de Paraguay*, the National Communications Commission of Paraguay ( CONATEL ). Telecom USA, Telecom Argentina s subsidiary, is supervised by the Federal Communications Commission (the FCC ).

**(b) Licenses granted as of December 31, 2011**

As of December 31, 2011, Telecom Argentina has been granted the following non-expiring licenses to provide the following services in Argentina:

- Local fixed telephony;
- Public telephony;
- Domestic and international long-distance telephony;
- Domestic and international point-to-point link services;
- Domestic and international telex services;
- VAS, data transmission, videoconferencing and broadcasting signal services; and
- Internet access.

As of December 31, 2011, the Company s subsidiaries have been granted the following licenses:

- Personal has been granted non-exclusive, non-expiring licenses to provide mobile telecommunication services (STM) in the northern region of Argentina, data transmission and VAS throughout the country, mobile radio communication services (SRMC) in the Federal District and Greater Buenos Aires areas, PCS services throughout the country and it is registered to provide national and international long-distance telephone services; and
- Núcleo has been granted a renewable five-year period license to provide mobile telecommunication services in Paraguay as well as PCS services, data transmission and videoconferences services and Internet access in certain areas of that country.

#### **Auction to reassign frequency bands**

In May 2011, the SC through Resolution No. 57/11 launched an auction to reassign the 850 MHz and 1900 MHz frequency bands returned by Telefónica Móviles Argentina S.A. because this company had exceeded its 50 MHz spectrum cap. The total spectrum to be auctioned in each region is: 30 MHz. in Region I ( North ); 37.5 in Region II ( Amba ) and 35 MHz in Region III ( South ).

Personal will participate in the spectrum auction and expects to acquire additional spectrum to complete its Spectrum cap along throughout Argentina. Personal can expect to acquire, respectively, up to 5 MHz in the first Region, up to 7.5 MHz in the second and up to 10 MHz in the third.

As of the date of issuance of these consolidated financial statements, the SC has postponed the auction for April 2012.

#### **(c) Revocation of the licenses**

Telecom Argentina's license is revocable in the case of non-compliance with certain obligations, including but not limited to:

- an interruption of all or a substantial portion of the service;
- a modification of its corporate purpose or change of domicile to a jurisdiction outside Argentina;
- a sale or transfer of the license to third parties without prior approval of the Regulatory Bodies;
- any sale, encumbrance or transfer of assets which has the effect of reducing services provided, without the prior approval of the Regulatory Bodies;
- a reduction of Nortel Inversora S.A.'s (Nortel, the parent company of the Company) interest in Telecom Argentina to less than 51%, or the reduction of Nortel's common shareholders' interest in Nortel to less than 51%, in either case without prior approval of the Regulatory Bodies;
- any transfer of shares resulting in a direct or indirect loss of control in Telecom Argentina without prior approval of the Regulatory Bodies;

- the Company's bankruptcy.

Table of Contents

Personal s licenses are revocable in the case of non-compliance with certain obligations, including but not limited to:

- repeated interruptions of the services;
- any transfer of the license and/or the related rights and obligations, without the prior approval of the Regulatory Authority;
- any encumbrance of the license;
- any voluntary insolvency proceedings or bankruptcy of Personal;
- a liquidation or dissolution of Personal, without the prior approval of the Regulatory Authority.

Núcleo s licenses are revocable mainly in the case of:

- repeated interruptions of the services;
- any voluntary insolvency proceedings or bankruptcy of Núcleo;
- non-compliance with certain obligations.

**(d) Decree No. 764/00**

Decree No. 764/00 substantially modified three regulations:

- **General Regulation of Licenses**

This regulation establishes a single nationwide license for the provision of all telecommunication services to the public, including fixed-line, mobile, national and international, irrespective of whether these services are provided through telecommunications infrastructure owned by the service provider. Under the regulation, a licensee s corporate purpose does not need to be exclusively the provision of telecommunications services. In addition, the regulation does not establish any minimum investment or coverage requirements. Broadcasting service companies may also apply for a license to provide telecommunications services. The regulation further authorizes the resale of telecommunications services subject to the receipt of a license, and there are no restrictions on participation by foreign companies.

- **Interconnection Regulation**

This regulation provides for an important reduction in the reference interconnection prices in effect at the time. The regulation also increases the number of infrastructure elements and services that the dominant operator is required to provide, including interconnection at the local exchange level, billing services and unbundling of local loops. This regulation also introduces interconnection for number translation services (NTS) such as Internet, audiotext, collect calling and the implementation of number portability, all of which shall be subject to future regulations.

Related to the Regulation for the call by call selection of the providers of long-distance services, the former Ministry of Infrastructure and Housing issued General Resolution No. 613/01 which approved this Regulation, subsequently modified by Resolution No. 75/03 of the Ministry of Economy, which introduced several changes related to the service mandatory, habilitation and blockage modality and the availability of the service on December 6, 2003. Nevertheless and having the Company fulfilled with all its obligations, as of the date of these consolidated financial statements, this long-distance service modality is not implemented.

Related to the number portability, on January 22, 2009, the SC issued Resolution No. 08/09 pursuant to which an ad hoc Working Commission was created with representatives of the SC and the CNC, for the purpose of preparing a draft of the Number Portability Regime.

On August 19, 2010, through SC Resolution No. 98/2010, the SC approved the Number Portability Regime ( NP ), covering the STM, SRMC, PCS and SRCE (trunking) mobile services, defined in the resolution as portable services.

The implementation timetable was approved by Resolutions No. 8/2011 and 3/2011 jointly issued by the SC and the Ministry of Domestic Trade.

The resolution also provides for the creation of a Portability Committee, which has already been formed with representatives of mobile operators and, among other responsibilities, is in charge of coordinating and supervising the NP s implementation process and functioning, reporting to the SC about fulfillment of the objectives included in the timetable, defining the NP s technical and operative procedures and specifications, and preparing the Bidding Specifications for the hiring of the Database Administrator, being all of the above subject to the SC s approval.

The Portability Committee sent earlier this year for SC approval, the agreed Portability processes and specification of the Database Administrator.

Table of Contents

On June 14, 2011, the SC issued Resolution No. 67/11 replacing several sections of the NP regime. It also approved the Processes and Technical and Operational Specifications relating to the implementation and correct application of the NP, the Bidding Specifications for the selection of the Database Administrator and the model contract, and the Network Technical Specification for the implementation of the NP in the Networks Mobile Communications.

On July 7, 2011, the Portability Committee convened companies with extensive international experience to participate in the private tender for the selection of the Database Administrator, resulting selected the company Telcordia Technologies Inc. together with his argentine partner Telmark S.A. (hereinafter the Administrator of the Portability ).

Having reported the proceedings to the SC, on October 12, 2011, and under the provisions of SC Resolution No. 98/10 and No. 67/11, the contract for the integration and management of the Database, between the four service providers and the Administrator of the Portability, was formalized.

Mobile service providers are finalizing the adaptations of their respective networks and the development and testing of software applications necessary to implement the NP during March 2012.

- **Universal Service Regulation ( RGSU )**

The RGSU required entities that receive revenues from telecommunications services to contribute 1% of these revenues (net of taxes) to the Universal Service Fiduciary Fund ( the SU fund ). The regulation adopted a pay or play mechanism for compliance with the mandatory contribution to the SU fund. The regulation established a formula for calculating the subsidy for the SU liability which takes into account the cost of providing this service and any foregone revenues. Additionally, the regulation created a committee responsible for the administration of the SU fund and the development of specific SU programs.

The SC issued Resolution No. 80/07 which stipulated that until the SU Fund was effectively implemented, telecommunication service providers, such as Telecom Argentina and Personal, were required to deposit any contributions accrued since the issuance of such Resolution into a special individual account held in their name at the Banco de la Nación Argentina. CNC Resolution No. 2,713/07, issued in August 2007, established how these contributions are to be calculated.

**New SU Regulation**

Decree No. 558/08, published on April 4, 2008, caused certain changes to the SU regime.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

The Decree established that the SC will assess the value of service providers direct program contributions in compliance with obligations promulgated by Decree No. 764/00. It will also determine the level of funding required in the SU Fund for programs pending implementation. In the same manner, in order to guarantee the continuity of certain projects, the SC was given the choice to consider as SU contributions certain other undertakings made by telecommunication services providers and compensate providers for these undertakings.

The new regulation established two SU categories: a) areas with uncovered or unsatisfied needs; and b) customer groups with unsatisfied needs. It also determined that the SC would have exclusive responsibility for the issuance of general and specific resolutions regarding the new regulation, as well as for its interpretation and application.

It also established that the SC will review SU programs which were established under the previous regulation, guaranteeing the continuity of those already being administered and implementing those that had been under review. The financing of SU ongoing programs which were recognized as such will be determined by the SC, whereas telecommunications providers appointed to participate in future SU Programs will be selected by competitive bidding.

The Decree requires Telecom Argentina and Telefónica to extend the coverage of their fixed line networks, within their respective original region of activity, within 60 months from the effective date of publication of the Decree. The SC will determine on a case by case basis if the providers will be compensated with funds from the SU Fund.

The Decree requires telecommunications service providers to contribute 1% of their revenues (from telecommunication services, net of taxes) to the SU Fund and keeps the pay or play mechanism for compliance with the mandatory monthly contribution to the SU Fund or, to claim the correspondent receivable, as the case may be.

Table of Contents

Providers of telecommunications services shall rely on the assistance of a Technical Committee made up of seven members (two members shall be appointed by the SC, one member shall be appointed by the CNC, three members shall be appointed by the telecommunication services providers two of which shall be appointed by Telecom Argentina and Telefónica and one by the rest of the providers and another member will be appointed by independent local operators). This Technical Committee is informed by the SC of the programs to be financed and is responsible for managing and controlling the SU Fund, carrying out technical-economic evaluations of existing projects and supervising the process of competitive bidding and adjudication of new SU programs, with the prior approval by the SC.

The Technical Committee has been created and it is fully operative. Additionally, telecommunications service providers had already sent the proposed Fiduciary agreement to the SC. The SC approved it in January 2009 through Resolution No. 7/09.

On December 9, 2008, the SC issued Resolution No. 405/08 which was objected by the Company and Personal. These objections were resolved by the SC through its Resolution No.154/10.

On April 4, 2009, by means of SC Resolution No. 88/09, the SC created a program denominated Telephony and Internet for towns without provision of basic Telephone services that will be subsidized with funds from the SU Fund. The program seeks to provide local telephony, domestic long distance, international long distance and Internet in towns that currently do not provide basic telephone services. The proposed projects approved by the SC will be sent to the Technical Committee of the SU Fund so that availability of funds can be evaluated and they can be included in a bidding process provided for in Decree No. 558/08.

On December 1st, 2010, the SC issued Resolutions No. 147/10 and 148/10, approving Internet for educational institutions and Internet for public libraries programs, respectively. These programs aim to reclaim the Broadband Internet service to state-run educational institutions and public libraries, respectively, and will be implemented through the use of the FFSU resources. At the date of issuance of these consolidated financial statements, it has been conducted the first auction of the Internet for educational institutions program and it is developing the bidding of the Internet for public libraries program.

On November 11, 2010, the SC issued Resolution No. 154/10 adopting the methodology for the deposit of the SU contributions to the trustee's escrow account. The resolution includes several provisions related to the determination of the contributions that correspond to previous and posterior periods to the dictation of the Decree No. 558/2008. It also provides that until the SC determines the existence of programs, the amounts that may correspond to their implementation may be discounted by the telecommunication providers when determining their contribution to the SU Fund. If completed the verification from the SC there were unrecognized amounts, they must be contributed into the FFSU or for the development of new works of the SU, with the approval of the SC.

At the date of issuance of these consolidated financial statements, the SU programs are still pending approval by the SC.

On December 30, 2010, the trustee notified Telecom Argentina and Personal the trustee's escrow account number in which they shall deposit the SU contributions under the provisions of SC Resolution No. 154/10.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

On January 26, 2011 the SC issued Resolution No. 9/11 determining the Infrastructure and Facilities Program . The resolution provides that telecommunications services providers may affect to investment projects under this program, exclusively the amounts corresponding to their pending obligations of investment contributions born under Annex III of Decree No. 764/00, prior to Decree No. 558/08.

### *In Telecom Argentina*

By the end of 2002, the SC formed a working group responsible for analyzing the method to be applied for measuring the net costs of SU performance particularly, the application of the Hybrid Cost Proxy Model (the HCPM Model ), based on the incremental cost of a theoretical network. The working group was also tasked with defining non-monetary benefits and determining the methodology for its calculation, in order to assess the costs that would be offset due to performance of SU obligations. The working group decided that, given the complexity of this methodology, efforts should be made to continue the initial programs independently from application of the HCPM Model, and that there was a need to carry out a comprehensive review of the present general regulations relating to SU to ensure that these regulations were operative in the near term considering the existing social needs.

Table of Contents

Several years after the market's liberalization and the effectiveness of the first SU regulations, service providers affected by these regulations have not received set-offs for providing services as required by the SU regime.

In compliance with SC Resolution No. 80/07 and No. 154/10 and CNC Resolution No. 2,713 /07, Telecom Argentina has estimated a receivable of \$1,027 (unaudited) for the period initiated in July 2007 and filed its calculations for review by the regulatory authority. This receivable has not yet been recorded since it is subject to the approval of the SU programs, the review of the SC and the availability of funds in the SU Trust.

On April 8, 2011, the SC issued Resolution No. 43/11 notifying Telecom Argentina that investments associated with High-Cost Areas amounting approximately to \$829 and which are included in the abovementioned receivable - do not qualify as an Initial Indicative Program. Telecom Argentina filed a claim on this resolution. As of the date of these consolidated financial statements, the resolution of this appeal is still pending.

***In Personal***

Since January 2001, Personal recorded a provision related to its obligation to make contributions to the SU fund. In addition, since July 2007 and in compliance with SC Resolution No. 80/07 and No. 154/10 and CNC Resolution No. 2,713/07, Personal deposited the correspondent contributions into an account held under their name at the Banco de la Nación Argentina. As of December 31, 2010 these contributions amounted to \$112 and were recorded as a receivable in the caption Other receivables of the consolidated balance sheets.

During the first quarter of 2011, the above mentioned funds were transferred to the trustee's escrow account, in compliance with the provisions of SC Resolution No. 154/10 previously described. Since January 2011, FFSU contributions are now being made into such escrow account.

In March 2011, Personal submitted to the SC a \$70 investment project, pursuant to SC Resolution No. 9/11, for the development of a network infrastructure in locations in the Northern Region of Argentina with no mobile coverage. At the date of issuance of these consolidated financial statements, the project is still pending approval by the Regulatory Authority.

In June 2011, under the provisions of SC Resolution No. 88/09, Personal submitted to the SC a new SU project for the rendering of basic telephone services, Broadband Internet access and mobile services in almost 150 cities included under the scope of this resolution. This project, in addition with the ones submitted by other service providers, will cause the SC to order to the SU Technical Committee the completion of a new tender.

**(e) Tax Stability principle: impact of variations in Social Security contributions**

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

On March 23, 2007, the SC issued Resolution No. 41/07 relating to the impact of variations in Social Security contributions occurring over the past several years.

Subsequent to November 8, 1990, there were several increases in the rates of Social Security Contributions, which were duly paid by Telecom Argentina. At the same time, and under the framework of the argentina@internet.todos Program, the Company paid, mostly during fiscal year 2000, reduced social security contribution rates.

Pursuant to Resolution No. 41/07, Telecom Argentina may offset the impact of costs borne as a result of increases in Social security contribution rates.

The Company made the required presentations to the SC of the net receivable under Resolution No. 41/07, which were subject to audits by the Regulatory Authority.

During the third quarter of 2007, the CNC performed the audits on the information given by the Company. The Company had access to documentation of the CNC's audits, which resulted in no significant differences from the net amounts it had determined. Consequently, the Company recorded a receivable from increases in social security contributions and cancelled payables from reduction in social security contribution rates and other fines due by the Company.

At December 31, 2011, the Company has a net receivable of \$67 which, in addition with the receivable of \$23 corresponding to the tax on deposits to and withdrawals from bank accounts ( IDC ), is included in the non-current caption Other receivables .

Since the resolution allows the Company to offset the receivables with existing and/or future regulatory duties and the intention of the Company is to exercise its offsetting rights, the receivable was recorded net of reserves. At December 31, 2011, the reserves corresponding to these regulatory duties amounted to \$90.

Since December 2008, the Company has begun the billing to the customers of the increases in the rates of its social security contributions accrued from October 2008, applying the same mechanism used to bill the IDC.

Table of Contents

**(f) Tariff structure of the national and international regulated fixed line services**

**Rate Rebalancing**

The variation in revenues resulting from the Rate Rebalancing for the two-year period beginning February 1997 was determined to amount to an increase of \$9.5, by means of SC Resolution No. 4,269/99.

In December 2007, the Regulatory Authority notified the Company that it will offset this difference with the Resolution No. 41/07 receivables. As a consequence, during fiscal year 2007, the Company recorded a reserve on this matter on behalf of the CNC final results. In April 2009, the CNC notified the offsetting of the \$9.5 Rate Rebalancing amount with the Resolution No. 41/07 receivables. So, the Company has reduced the receivable with the corresponding reserve.

**Price Cap**

The Price Cap was a regulation mechanism applied in order to calculate changes in Telecom Argentina tariffs, based on changes in the U.S. Consumer Price Index ( U.S. C.P.I. ) and an efficiency factor.

In August 2009, the Regulatory Bodies finalized the 1999 Price Cap audit resulting in a payable by the Company of \$3.1 plus interest. The Company has offset this balance with the credit resulting from SC Resolution No. 41/07, described in (e) above.

On April 6, 2000, the Argentine Government, Telefónica and Telecom Argentina signed an agreement ( Price Cap 2000 ) that set the price cap efficiency factor at 6.75% (6% set by the SC and 0.75% set by Telecom Argentina and Telefónica) for the period from November 2000 to November 2001.

The 2000 Price cap audit results are still pending. Should the outcome is a payable by the Company it can be offset with the Resolution No. 41/07 receivables.

In April 2001, the Argentine Government, Telefónica and Telecom Argentina signed an agreement ( 2001 Price Cap ) that set the efficiency factor for reduction of tariffs at 5.6% for the period from November 2001 to October 2002.

However, a preliminary injunction against Telecom Argentina disallowed Telecom Argentina to apply tariff increases by reference to the U.S. C.P.I. Telecom Argentina appealed this injunction arguing that if one part of the formula cannot be applied, the Price Cap system should be

nullified. Finally, Public Emergency Law No. 25,561 explicitly prohibited tariff adjustments, so, at the date of issuance of these consolidated financial statements, the pesification and the freeze of the regulated tariffs are still in force.

**Tax on deposits to and withdrawals from bank accounts ( IDC ) charged to customers**

On February 6, 2003, the Ministry of Economy, through Resolution No. 72/03, defined the mechanism to allow, going forward, tariff increases on basic telephony services reflecting the impact of the IDC. The amount of tax charged must be shown separately in customers' bills. The Company has determined the existence of a remaining unrecovered amount of approximately \$23 that arose before the issuance of Resolution No. 72/03, which will be claimed within the tariff renegotiation process (see (g) below).

In April 2007, the Company provided the CNC with supporting documentation on this amount for its audit. The Company had access to documentation of the Regulatory Authority's audits that corroborates the amounts claimed by the Company and the application of a similar offsetting mechanism pursuant to Resolution No. 41/07. Therefore, as of December 31, 2011 and 2010, the Company recorded as Other receivable a total of \$23.

**(g) Renegotiation of agreements with the Argentine Government**

Telecom Argentina's tariff scheme and procedures are detailed in the Tariff Agreement entered into by Telecom Argentina and the Argentine Government in November 1991, as amended in February 1992. Pursuant to the Tariff Agreement, all rates were to be calculated in US dollars and converted into Argentine pesos at the time the customer was billed using the exchange rate prevailing at that time. Under the Convertibility law that was effective until January 2002, the applicable exchange rate was \$1 to US\$1. Rates were to be adjusted twice a year in April and October based on the variation of the U.S. C.P.I. These adjustments were not applied since 2000 according to a resolution of the SC.

However, in January 2002, the Argentine Government enacted Law No. 25,561, *Ley de Emergencia Pública y Reforma del Régimen Cambiario* (the Public Emergency Law), which provided, among other aspects, for the following:

Table of Contents

- The pesification of rates;
- The elimination of dollar or other foreign-currency adjustments and indexing provisions for rates;
- The establishment of an exchange rate for dollar-denominated prices and rates of \$1 =US\$1; and
- The renegotiation of the conditions of the contractual agreements entered into between privatized companies and the Argentine Government.

The Argentine Government is entitled to renegotiate these agreements based on the following criteria:

- The overall impact of rates for public services on the economy and income levels;
- Service quality and investment plans, as contractually agreed;
- The customers' interests and access to the services;
- The security of the systems; and
- The profitability of the service providers.

Decree No. 293/02, dated February 12, 2002, entrusted the Ministry of Economy with the renegotiation of the agreements. Initially, the contractual renegotiation proposals were to be submitted to the Argentine Government within 120 days after the effective date of the Decree, although this term was further extended for an additional 180-day period. Telecom Argentina filed all information as required by the Argentine Government, which included information on the impact caused by the economic crisis on the Company's financial position and its revenues, the pre-existing mechanisms for tariff adjustments, operating costs, indebtedness, payment commitments with the Argentine Government and future and on-going investment commitments.

Furthermore, in July 2003, Decree No. 311/03 created the *Unidad de Renegociación y Análisis de Contratos de Servicios Públicos* ( UNIREN ), (Division for the Renegotiation and Analysis of Contracts of Public Utilities Services), a special division within the Ministry of Economy and the Ministry of Federal Planning, Public Investments and Services, pursuant to which the contractual relationships between the Argentine Government and the service providers were to be revised and renegotiated. In October 2003, the Argentine Government enacted Law No. 25,790 pursuant to which the original term to renegotiate the contracts was extended through December 31, 2004. As from that date, the Argentine Government enacted subsequent laws pursuant to which this term was extended through December 31, 2013.

In May 2004, the Company signed a Letter of Understanding ( LOU ) with the Argentine Government pursuant to which the Company committed not to modify the current rate structure through December 31, 2004 and to continue with the tariff renegotiation process, which the Company expected to have concluded before December 31, 2004. The Company also committed to offer phone services to beneficiaries of governmental welfare programs and to extend internet services in the interior of the country at reduced prices.

Even though the Company fulfilled its commitments under the LOU, the Argentine Government did not make a specific offer related to the renegotiation of the rates at the date set in the LOU.

#### **New Letter of Understanding with the UNIREN**

On March 6, 2006, Telecom Argentina signed a new LOU (the Letter ) with the UNIREN. Upon the fulfillment of the procedures set forth in the rules and regulations presently in effect, the Letter will provide the framework for the signing of the *Acta Acuerdo de Renegociación del Contrato de Transferencia de Acciones* or Minutes of Agreement of the Renegotiation of the Transfer Agreement (the Minutes of Agreement of the Renegotiation ) approved by Decree No. 2,332/90, as stated in Section 9 of the Public Emergency Law.

The main terms and conditions of the Letter include:

- The CNC and UNIREN have determined that Telecom Argentina satisfactorily complied with most of the requirements contemplated in the Transfer Agreement and by the regulatory framework. Isolated violations were satisfactorily remedied through fines and/or sanctions. Other matters arising in the normal course of business are still pending resolution, which was originally expected by June 30, 2006 (some of these matters are described below). Despite such expectation, the Regulatory Authority continues to analyze such open issues, the outcome of which will be disclosed when the analysis is completed;
- Telecom Argentina's commitments to invest in the technological development and updating of its network;
- Telecom Argentina's commitment to the achievement of its long-term service quality goals;
- The signing parties' commitment to comply with and maintain the terms set forth in the Transfer Agreement, and in the regulatory framework in effect;

Table of Contents

- The Argentine Government's commitment to create an appropriate and standardized regulatory framework for telecommunications services and to give Telecom Argentina fair and equivalent treatment to that given to other telecommunications providers that shall take part in the process;
- Telecom Argentina's commitment and the commitment of its indirect shareholders Telecom Italia S.p.A. and W de Argentina - Inversiones S.L., to suspend for a period of 210 working days any and all claims, appeals and petitions already filed or in the process of being filed, in administrative, arbitral or judicial offices, in Argentina or in any other country, that are founded in or related to any act or measure taken after the issuance of the Public Emergency Law with respect to the Transfer Agreement and the License. The suspension will take effect after the 30th day from the end of the public hearing convened to deal with the Letter. Once the Minutes of Agreement of the Renegotiation is ratified, any and all claims, appeals and/or proceedings will be disregarded;
- An adjustment shall be made to increase the termination charge of international incoming calls to a local area to be equivalent to international values, which are at present strongly depreciated;
- Off-peak telephone hours corresponding to reduced rates shall be unified with regards to local calls, long distance domestic and international calls.

On May 18, 2006, the Letter was subject to a public hearing procedure, with the purpose of encouraging the participation of the users and the community in general, taking into consideration that the Letter's terms and conditions will provide the framework for the signing of the Minutes of Agreement of the Renegotiation. These Minutes of Agreement of Renegotiation shall be in effect once all the requirements stipulated in the regulatory framework are complied with, which among other things, requires that a Telecom Argentina Shareholders' Meeting be held to approve said Minutes. Both Telecom Argentina and its indirect stockholders Telecom Italia S.p.A. and W de Argentina - Inversiones S.L. have timely fulfilled the Agreement's commitments.

At the date of issuance of these financial statements, the Company continues to await completion of the administrative steps required for the National Executive to submit to the National Congress a proposed Memorandum of Agreement for Renegotiation.

Although there can be no assurance as to the ultimate outcome of these matters, it is the opinion of the Management of the Company that the renegotiation agreement process will be satisfactorily completed.

**(h) Buy Argentine Act**

In December 2001, the Argentine Government passed Public Law No. 25,551 (Compre Trabajo Argentino or the Buy Argentine Act) and in August 2002, passed Decree No. 1,600/02 which approved and brought into effect the Compre Trabajo Argentino. The law requires Telecom Argentina to give preference to national goods and services, as defined in Public Laws No. 25,551 and No. 18,875, in any procurement related to the rendering of public telephony services (sect.1 & 2).

Preference must be given so long as the price of such goods is equal to or lesser than the price of a foreign good (including customs duties, taxes and other expenses that are linked to the nationality of goods) increased by 7% (when the Argentine offeror is a small or medium size company) or 5% (when the Argentine offeror is any other company) (sect.3).

Compre Trabajo Argentino also mandates that Telecom Argentina publish any bid for services in the Official Bulletin in order to provide any and all prospective offerors with the information necessary for them to participate. This mandatory publication requires considerable lead-time prior to the issuance of the purchase order and has had the result of extending the period needed to complete certain purchases. Non-compliance with Compre Trabajo Argentino is subject to criminal sanctions.

Public Law No. 18,875 establishes the obligation to exclusively contract services with local companies and professionals, as defined in such law. Any exception must receive the prior approval of the relevant Ministry.

In August 2004, CNC Resolution No. 2,350/04 enacted the Procedure for the fulfillment of the Buy Argentine Act , including the obligation for the Company to present half-year affidavits addressing the fulfillment of these rules. Non-compliance with this obligation is subject to administrative sanctions.

This regulation, thus, reduces the operating flexibility of Telecom Argentina due to the time required to request bids for services and/or to obtain an approval of the relevant authority when necessary, and the higher administrative expenses derived from the obligation to present half-year affidavits.

Table of Contents

**Note 3 Significant accounting policies**

**a) Going concern**

The consolidated financial statements for the years ended December 31, 2011 and 2010 have been prepared on a going concern basis as there is a reasonable expectation that Telecom Argentina will continue its operational activities in the foreseeable future (and in any event with a time horizon of more than 12 months).

In particular, consideration has been given to the following factors, among others:

- a strong economic performance shown during the last years, with growing levels in the Company's operating and net results;
- current high levels of cash flow generation;
- the growth of the Company's customer base and the strength of the Company's market shares in all business segments; and
- objectives, policies and processes for managing capital and financial risk as described in Note 26.

**b) Foreign currency translation**

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the functional currency). The consolidated financial statements are presented in Argentine pesos (\$), which is the functional currency of all Telecom Group's companies located in Argentina. The functional currency for the foreign subsidiaries of the Telecom Group is the respective legal currency of each country.

The financial statements of the Company's foreign subsidiaries (Núcleo, Telecom USA and Springville) are translated using the exchange rates in effect at the reporting date (the current method); income and expenses are translated at the average exchange rates for the year. Exchange differences resulting from the application of this method are recognized in Other Comprehensive Income. The cash flows of foreign consolidated subsidiaries expressed in foreign currencies included in the consolidated statement of cash flows are translated at the average exchange rates for the year.

**c) Foreign currency transactions**

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Transactions in foreign currencies are translated into the functional currency using the foreign exchange rate prevailing at the date of the transaction or valuation where items are re-measured. Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the foreign exchange rate prevailing at the reporting date. Exchange differences arising from the settlement of monetary items or from their conversion at rates different from those at which they were initially recorded during the year or at the end of the prior year, are recognized in the consolidated income statement and are included in Financial income/expenses as Foreign currency exchange gains or losses.

### **d) Consolidation**

These consolidated financial statements include the accounts of Telecom Argentina and its subsidiaries over which it has effective control (Personal, Núcleo, Springville, Micro Sistemas and Telecom USA) as of December 31, 2011 and 2010.

Control exists when the Parent (Telecom Argentina) has the power to determine the financial and operating policies of a subsidiary. Subsidiaries are fully consolidated from the date on which control is transferred to the Company. They are deconsolidated from the date that control ceases.

In the preparation of the consolidated financial statements, assets, liabilities, revenues and expenses of the consolidated companies are consolidated on a line-by-line basis and non-controlling interests in the equity and in the profit (loss) for the year are disclosed separately under appropriate captions, respectively, in the consolidated statement of financial position, in the consolidated income statement and in the consolidated statement of comprehensive income.

All intercompany accounts and transactions have been eliminated in the preparation of the consolidated financial statements.

Financial year-end of all the subsidiaries financial statements coincides with that of the Parent.

Table of Contents

e) **Revenues**

Revenues are recognized to the extent that it is considered probable that economic benefits will flow to the Company and their amount can be measured reliably. Final outcome may differ from those estimates.

Revenues are stated net of discounts and returns.

The Company discloses its revenues into two groups: services and equipment. Service revenues are the main source of income for the Company and are disclosed by nature: Voice services and Data transmission and Internet services. This classification of revenues is given by different commercial offers and products, type of contracts and kind of customers. Equipment sales represent a precursor of service revenues; therefore, from time to time, the Management of Personal and Núcleo decide to sell mobile handsets at prices lower than their respective costs in order to acquire new contracts with a minimum non-cancelable period of permanence.

Other income mainly includes penalties collected from suppliers and gains on the sale of PP&E, which are realized in the ordinary course of business but are not the main business objective.

The Company's principal sources of revenues by reportable segments are:

**Fixed telecommunication services and products**

Domestic services revenues consist of monthly basic fees, measured service, long-distance calls and monthly fees for additional services, including call forwarding, call waiting, three-way calling, itemized billing and voicemail.

Revenues are recognized when services are rendered. Unbilled revenues from the billing cycle dating to the end of each month are calculated based on traffic and are accrued at the end of the month.

Basic fees are generally billed monthly in advance and are recognized when services are provided. Billed basic fees for which the related service has not yet been provided are deducted from corresponding accounts receivable. Revenues derived from other telecommunications services, principally network access, long distance and airtime usage, are recognized on a monthly basis as services are provided.

Traffic revenues from interconnection and roaming are reported gross of the amounts due to other telecommunication operators.

Revenues from the sale of prepaid calling cards are recognized on the basis of the minutes used, at the contract price per minute, or when the card expires, whichever happens first. Remaining unused traffic for unexpired calling cards is shown as Deferred revenue on prepaid calling cards under Deferred revenues line item in the statement of financial position.

Interconnection charges represent amounts received by the Company from other local service providers and long-distance carriers for calls that are originated on their networks and transit and/or terminate on the Company's network. Revenue is recognized as services when they are provided.

Non-refundable up-front connection fees for fixed telephony, data and Internet services that are non-separable from the service are accounted for as a single transaction and deferred (as well as the related costs not in excess of the amount of revenues) over the term of the contract or, in the case of indefinite period contracts, over the average period of the customer relationship (approximately 9 years in the case of fixed telephony).

Rehabilitation fees charged to customers when resuming service after suspension are deferred and recognized ratably over the average life for those customers who are assessed a rehabilitation fee. Associated direct expenses are also deferred over the estimated customer relationship period up to an amount equal to or less than the amount of deferred revenues. Generally, rehabilitation revenues are higher than its associated direct expenses.

Revenues from sales of goods, such as telephone and other equipment, are recognized when the significant risks and rewards of ownership are transferred to the buyer.

Table of Contents

Revenues on construction contracts are recognized based on the stage of completion (percentage of completion method). When the outcome of a construction contract can be estimated reliably, contract revenue and contract costs associated with the construction contract are recognized as revenue and expenses respectively by reference to the stage of completion of the contract activity at the end of the reporting period. When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognized as an expense immediately. When the outcome of a construction contract cannot be estimated reliably, contract revenue is recognized only to the extent of contract costs incurred that are likely to be recoverable.

Revenue on construction contracts recognized in the years ended December 31, 2011, 2010 and 2009 total \$25, \$14 and \$nil, respectively.

- **International long-distance services**

The Company provides international telecommunications services in Argentina including voice and data services and international point-to-point leased circuits.

Revenues from international long-distance service reflect payments under bilateral agreements between the Company and foreign telecommunications carriers, covering inbound international long-distance calls.

Revenues are recognized as services when they are provided.

- **Data transmission and Internet services**

Data and Internet revenues mainly consist of fixed monthly fees received from residential and corporate customers for data transmission (including private networks, dedicated lines, broadcasting signal transport and videoconferencing services) and Internet connectivity services (dial-up and broadband). These revenues are recognized as services when they are rendered.

**Mobile telecommunication services and products**

The Company provides mobile services throughout Argentina via cellular and PCS networks. Cellular fees consist of monthly basic fees, airtime usage charges, roaming, charges for TLRD, CPP charges and additional charges for VAS, including call waiting, call forwarding, three-way calling, voicemail, SMS, GPRS, Mobile Internet and for other miscellaneous cellular services. These revenues are recognized as services when they are rendered.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Basic fees are generally billed monthly in advance and are recognized when services are provided. Billed basic fees for which the related service has not yet been provided are deducted from the corresponding accounts receivable.

Revenues from the sale of prepaid calling cards are recognized on the basis of the minutes used, at the contract price per minute, or when the card expires, whichever happens first. Remaining unused traffic for unexpired calling cards is shown as Deferred revenue on prepaid calling cards under Deferred revenues line item in the statement of financial position.

Revenues from sales of goods, such as handsets, sim cards, tablets, smartphones and other equipment are recognized when the significant risks and rewards of ownership are transferred to the buyer.

Personal and Núcleo offer to their subscribers a customer loyalty program. Under such program Personal and Núcleo grant award credits as part of the sales transactions which can be subsequently redeemed for goods or services provided by Personal and Núcleo or third parties. The fair value of the award credits is accounted for as deferred revenue, and recognized as revenue when the award credits are redeemed or expire, whichever occurs first. Those revenues are classified as service or goods revenues depending on the goods or services redeemed by the customers.

Applicable to both fixed telephony and mobile telephony, for offerings including separately identifiable components (as equipment and service), the Company recognizes revenues related to the sale of the equipment when it is delivered to the final customer whereas service revenues are recorded when rendered. The total revenue generated by this type of transactions is allocated to the separately identifiable units of accounting based on their fair values, provided that the total amount of revenue to be recognized does not exceed the contract revenue. IFRS does not prescribe a specific method for such allocation of revenue. However, telecommunications industry practice generally applies the method known as residual method. The residual method requires identifying all the components that comprise a transaction and allocating its fair value on an individual basis to each of them. Under this method, the fair value of a delivered item (which could not be individually determined) is determined as the difference between the total arrangement consideration and the sum of the fair values of those elements for which fair value can be estimated on a stand-alone basis.

Table of Contents

**f) Financial instruments**

**f.1) Financial assets**

Upon acquisition, in accordance with IFRS 9, financial assets are subsequently measured at either *amortized cost*, or *fair value*, on the basis of both:

(a) the entity's business model for managing the financial assets; and

(b) the contractual cash flow characteristics of the financial asset.

A financial asset shall be measured at *amortized cost* if both of the following conditions are met:

(a) the asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows, and

(b) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Additionally, for assets that met the abovementioned conditions, IFRS provides for an option to designate, at inception, those assets as measured at *fair value* if doing so eliminates or significantly reduces a measurement or recognition inconsistency (sometimes referred to as an accounting mismatch) that would otherwise arise from measuring assets or liabilities or recognizing the gains and losses on them on different bases.

A financial asset that is not measured at *amortized cost* according to the paragraphs above is measured at *fair value*.

Financial assets include:

**Cash and cash equivalents**

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Cash equivalents are short-term and highly liquid investments that are readily convertible to known amounts of cash, subject to an insignificant risk of changes in value and their original maturity or the remaining maturity at the date of purchase does not exceed 3 months.

Cash and cash equivalents are recorded, according to their nature, at fair value or amortized cost.

### **Trade and other receivables**

Trade and other receivables classified as either current or non-current assets are initially recognized at fair value and subsequently measured at amortized cost using the effective interest method, less allowances for doubtful accounts.

### **Investments**

Time deposits are valued at their amortized cost.

Investments in mutual funds are carried at fair value. Unrealized gains and losses are included in financial income/expenses in the consolidated statements of income.

The 2003 Telecommunications Fund is recorded at fair value.

As of December 31, 2010, the Company had investments in certain government bonds. The Company valued these securities at amortized cost as Management had the intent and ability to hold those securities to maturity (November 2011).

### **Impairment of financial assets**

At every annual or interim closing date, assessments are made as to whether there is any objective evidence that a financial asset or a group of financial assets may be impaired. If any such evidence exists, an impairment loss is recognized in the consolidated income statement for financial assets measured at cost or amortized cost.

Table of Contents

Certain circumstances of impairment of financial assets that the Group assesses to determine whether there is objective evidence of an impairment loss could include: delay in the payments received from customers; customers that enter bankruptcy; the disappearance of an active market for that financial asset because of financial difficulties; observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of financial assets, significant financial difficulty of the obligor, among others.

**f.2) Financial liabilities**

Financial liabilities comprise trade payables, financial debt (excluding Derivatives), salaries and social security payables (see n) below) and certain other liabilities.

Financial liabilities other than derivatives are initially recognized at fair value and subsequently measured at amortized cost. Amortized cost represents the initial amount net of principal repayments made, adjusted by the amortization of any differences between the initial amount and the maturity amount using the effective interest method.

**f.3) Derivatives**

Derivatives are used by the Company to manage its exposure to exchange rate and sometimes interest rate risks and to diversify the parameters of debt so that costs and volatility can be reduced to pre-established operational limits.

All derivative financial instruments are measured at fair value in accordance with IFRS 9, when they do not qualify for hedge accounting or in accordance with IAS 39 when they meet the conditions for hedge accounting.

In accordance with IAS 39, derivative financial instruments qualify for hedge accounting only when:

- a) at the inception of the hedge, the hedging relationship is formally designated and documented;
- b) the hedge is expected to be highly effective;
- c) its effectiveness can be reliably measured;
- d) the hedge is highly effective throughout the financial reporting periods for which it is designated.

When a derivative financial instrument is designated as a cash flow hedge (the hedge of the exposure to variability in cash flows of an asset or liability or a highly probable forecasted transaction) the effective portion of any gain or loss on the derivative financial instrument is recognized

directly in OCI. The cumulative gain or loss is removed from OCI and recognized in the consolidated income statement at the same time as the hedged transaction affects the consolidated income statement. The gain or loss associated with the ineffective portion of a hedge is recognized in the consolidated income statement immediately. If the hedged transaction is no longer probable, the cumulative gains or losses included in OCI are immediately recognized in the consolidated income statement.

If hedge accounting is not appropriate, gains or losses arising from the fair value measurement of derivative financial instruments are directly recognized in the consolidated income statement.

For additional information about derivatives operations during 2011 and 2010 and related balances see Note 20.

**g) Inventories**

Inventories are measured at the lower of cost and estimated net realizable value. Cost is determined on a weighted average cost basis. Net realizable value is the estimated selling price in the ordinary course of business, less applicable variable selling expenses. Allowances are made for obsolete and slow-moving inventories.

Table of Contents

From time to time, the Management of Personal and Núcleo decide to sell mobile handsets at prices lower than their respective costs. This strategy is aimed at achieving higher service revenues or at retention of high value customers by reducing customer access costs while maintaining the companies' overall mobile business profitability since the customer subscribes a service contract for a minimum non-cancelable period. For the estimation of the net realizable value in these cases the Company considers the estimated selling price less applicable variable selling expenses plus the expected margin from the service contract during the minimum non-cancelable term.

**h) PP&E**

PP&E is stated at acquisition or construction cost. Subsequent expenditures are capitalized only when they represent an improvement, it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably.

All other subsequent costs are recognized as expense in the period in which they are incurred. When a tangible fixed asset comprises major components having different useful lives, these components are accounted for as separate items if they are significant.

PP&E cost also includes the expected costs of dismantling the asset and restoring the site if a legal or constructive obligation exists. The corresponding liability is recognized in the statement of financial position under Provisions line item at its present value. These capitalized costs are depreciated and charged to the income statement over the useful life of the related tangible assets in the Depreciation and amortization item line.

The accounting estimates for dismantling costs, including discount rates, and the dates in which such costs are expected to be incurred are reviewed annually, at each financial year-end. Changes in the above liability are recognized as an increase or decrease of the cost of the relative asset and are depreciated prospectively.

Until the date of cancellation of its financial debt, the Company had also capitalized interest on long-term construction projects as part of its cost. No interest was capitalized during 2011 and 2010. Interest capitalized during 2009 amounted to \$15.

Depreciation of PP&E owned is calculated on a straight-line basis over the ranges of estimated useful lives of the assets; the ranges of the estimated useful lives of the main PP&E are the following:

Asset	Estimated useful life (in years)
Buildings received from ENTel	35
Buildings	50
Tower and pole	15
Transmission equipment	3-20
Wireless network access	5-10
Switching equipment	5-13

Power equipment	7-15
External wiring	10-20
Computer equipment and software	3-5
Telephony equipment and instruments	5-10
Installations	3-10

The depreciation rates are reviewed annually and revised if the current estimated useful life is different from that estimated previously taking into account, among others, technological obsolescence, maintenance and condition of the assets and different intended use from previous estimates. The effect of such changes is recognized in the consolidated income statement prospectively.

**i) Intangible assets**

Intangible assets are recognized when the following conditions are met: the asset is separately identifiable, it is probable that the expected future economic benefits that are attributable to the asset will flow to the entity; and the cost of the asset can be measured reliably.

Intangible assets with a finite useful life are stated at cost, less accumulated amortization and impairment losses, if any.

Intangible assets with an indefinite useful life are stated at cost, less accumulated impairment losses, if any.

Table of Contents

Intangible assets comprise the following:

- *Subscriber acquisition costs ( SAC )*

Direct and incremental costs incurred for the acquisition of new subscribers with a minimum contractual period are capitalized when the conditions for the recognition of an intangible asset are met. The cost of acquiring postpaid and *cuentas claras* subscribers in mobile telephony and broadband customers in fixed telephony meet the conditions established by IFRS for its recognition as intangible asset, since these contracts establish a minimum contractual period, include an enforceable termination penalty and provide for fixed monthly billing for services. SAC are mainly related to the mobile services; and are mainly comprised of upfront commissions paid to third parties and subsidies granted to customers on the sale of handsets.

In all other cases, subscriber acquisition costs are expensed when incurred.

Capitalized SAC are amortized on a straight-line basis over the term of the contract with the customer acquired.

- *Service connection or habilitation costs*

Direct costs incurred for connecting customers to the network are accounted for as intangible assets and then amortized over the term of the contract with the customer if required conditions are met. For indefinite period contracts, the deferral of these costs is limited to the amount of non contingent revenue from the customer and expensed over the average period life of the customer relationship. Costs exceeding that amount are expensed as incurred. Connection costs are generated mainly for the installation of fixed lines and amortized over an average period of 9 years.

- *PCS license (Argentina)*

The Company, based on an analysis of all of the relevant factors, has considered the license having an indefinite useful life since there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows for the entity.

- *PCS and Band B licenses (Paraguay)*

Initial acquisition costs of *Núcleo s* PCS and Band B licenses were amortized under the straight-line method over 10 years through financial year 2007. Renewal costs are being amortized over 5 years.

- *Internet and data transmission license (Paraguay)*

Núcleo's license is amortized over 5 years through fiscal year 2016.

- *Rights of use*

The Company purchases network capacity under agreements which grant the exclusive right to use a specified amount of capacity for a specified period of time. Acquisition costs are capitalized as intangible assets and amortized over the terms of the respective capacity agreements, generally 15 years.

- *Exclusivity agreements*

Exclusivity agreements were entered into with certain retailers and third parties relating to the promotion of the Company's services and products. Amounts capitalized are being amortized over the life of the agreements, with expiration ranging from financial year 2009 to financial year 2028.

- *Customer relationships*

Customer relationships identified as part of the purchase price allocation performed upon the acquisition of Cubecorp Argentina S.A. (a company engaged in data center business) in financial year 2008, are being amortized over the estimated duration of the relationship for customers in the data center business (15 years).

- *Software obtained or developed for internal use*

The Company capitalized certain costs associated with the development of computer software for internal use. These costs were fully amortized as of December 31, 2010.

- *Debt issue costs*

Expenses incurred in connection with the issuance of financial debt were deferred and amortized under the interest method over the life of the related debts. These costs were fully amortized as of December 31, 2010.

Table of Contentsj) **Leases**Finance leases

Leases that transfer substantially all the risks and rewards incidental to ownership of the leased asset are classified as finance leases. The Company recognizes finance leases as assets and liabilities in its statements of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments, each determined at the inception of the lease. Subsequently, minimum lease payments are apportioned between a finance charge and the reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability. Contingent rents, if any, are charged as expenses in the periods in which they are incurred.

The depreciation policy for depreciable leased assets is consistent with that for depreciable assets that are owned.

At December 31, 2011 the Telecom Group holds finance leases which represent current liabilities in the amount of \$5. A summary by major class of fixed assets covered by finance leases at December 31, 2011 is as follows:

	<b>Book value</b>	<b>Lease terms</b>	<b>Amortization period</b>
Computer equipment	17	2 years	3 years
Accumulated depreciation	(6)		
<b>Net value</b>	<b>11</b>		

As of December 31, 2010 the Company had no finance leases.

Operating leases

Lease payments under an operating lease are recognized as an expense on a straight-line basis over the lease term unless another systematic basis is more representative.

In the normal course of business, the Company leases cell sites, switch sites, satellite capacity and circuits under various non-cancellable operating leases that expire on various dates through 2020. Rental expense is included under Other operating expenses item line in the consolidated income statements.

k) **Impairment of intangible assets and PP&E**

At every annual or interim closing date, the Company assesses whether there are any indicators of impairment of assets that are subject to amortization. Both internal and external sources of information are used for this purpose. Internal sources include obsolescence or physical damage, and significant changes in the use of the asset and the economic performance of the asset compared to estimated performance. External sources include the market value of the asset, changes in technology, markets or laws, increases in market interest rates and the cost of capital used to evaluate investments, and an excess of the carrying amount of the net assets of the Group over market capitalization.

The carrying value of an asset is considered impaired by the Company when it is higher than its recoverable amount. In that event, a loss would be recognized in the statement of income.

The recoverable value of an asset is the higher of its fair value less costs to sell and its value in use. In calculating the value in use, the estimated future cash flows are discounted to present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

Where it is not possible to estimate the recoverable value of an individual asset, the Company estimates the recoverable value of the cash-generating unit to which the asset belongs. The Company considers each legal entity of the Group as a cash-generating unit.

When the conditions that gave rise to an impairment loss no longer exist, the carrying amount of the asset or cash-generating unit is increased to the revised estimate of its recoverable amount, up to the carrying amount that would have been recorded if no impairment loss had been recognized. The reversal of an impairment loss is recognized as income in the consolidated income statement.

The Company has made certain assumptions in the determination of its estimated cash flows to evaluate a potential impairment of its long-lived assets in relation to each legal entity. In the preparation of such estimates and in connection with the fixed-line business, the Company has considered different scenarios, some of which contemplate the increase of Telecom Argentina's regulated rates that remain affected by the freeze of the rates established by Law No. 25,561 (see Note 2.g).

Table of Contents

Intangible assets with an indefinite useful life (including intangible assets not ready to use) are not subject to amortization and are tested at least annually for impairment. The only intangible asset with an indefinite useful life held by the Company at December 31, 2011 and 2010 is the PCS license (Argentina), which is entirely allocated to the Personal Mobile Service operating segment. Its recoverable amount is determined based on the value in use, which is estimated using discounted net cash flows projections.

Such estimated cash flows are based on significant Management's assumptions about the key factors that could affect future business performance such as the future market share, competition level, capital expenditures, salary increases, foreign exchange rates evolution, capital structure, discount rate, etc. Actual results could differ from those estimates, due to future market conditions, business strategy and the evolution of technology among other factors. Such differences, if any, may significantly affect the estimated future cash flows and, therefore require material adjustments to the carrying value of the intangible assets with indefinite useful lives.

Personal's net cash flows projection is denominated in Argentine pesos, its functional currency. However, due to the fact that there is no prevailing long-term discounting rate in pesos available in the market, the Company: a) has converted such peso-denominated cash flows into US dollars using future estimated exchange rates applicable to each period; and b) has discounted these US dollar-denominated cash flows at an annual US dollar rate of approximately 14% in order to obtain the recoverable value of intangible assets with indefinite useful life. Future cash flows estimates are based on management's projections for a period not to exceed five years and then taken to perpetuity assuming a growth rate of 2% per annum.

Based on the foregoing, for the years presented the Company estimated that: i) there are no indicators of impairment of assets that are subject to amortization and ii) no impairment charge is necessary for the intangible asset with indefinite useful life.

Additionally, the Company has made other sensitivity analysis considering different reasonable business performance scenarios. Even considering more conservative scenarios, the recoverable amount of the Group's long lived assets is higher than its carrying amount.

**l) Other liabilities**

• **Pension benefits**

Argentine laws provide for pension benefits to be paid to retired employees from government pension plans and/or privately managed fund plans to which employees may elect to contribute. Amounts payable to such plans are accounted for on an accrual basis. The Company does not sponsor any stock option plan.

Pension benefits shown under Other liabilities represent benefits under collective bargaining agreements for employees who retire upon reaching normal retirement age, or earlier due to disability in Telecom Argentina. Benefits consist of the payment of a single lump sum equal to the salary of one month for each five years of service. There is no vested benefit obligation until the occurrence of those conditions. The collective bargaining agreements do not provide for other post-retirement benefits such as life insurance, health care, and other welfare benefits. The net

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

periodic pension costs are recognized as employees render the services necessary to earn pension benefits. Actuarial assumptions and demographic data, as applicable, were used to measure the benefit obligation as required by IAS 19. The Company does not make plan contributions or maintain separate assets to fund the benefits at retirement.

The actuarial assumptions used are based on market interest rates, past experience and Management's best estimate of future economic conditions. Changes in these assumptions may impact future benefit costs and obligations. The main assumptions used in determining expense and benefit obligations are as follows:

	2011	2010	2009
Discount rate (1)	5.6 - 12.1%	1.2-7.4%	10.3-12.3%
Projected increase rate in compensation (2)	15 - 25.7%	15.3-22%	12.6-16.7%

---

(1) Represents estimates of real rate of interest rather than nominal rate in \$.

(2) In line with an estimated inflationary environment for the next three financial years.

Additional information on pension benefits is given in Note 16.

- **Legal fee**

Pursuant to Law No. 26,476 - Tax Regularization Regime ( Régimen de Regularización Impositiva Ley N° 26,476 ), the Company is subject to a legal fee which shall be paid in twelve monthly consecutive installments without interest as from final judgment. It is carried at amortized cost.

Table of Contents

**m) Deferred revenues**

Deferred revenues include:

- Deferred revenues on prepaid calling cards

Revenues from unused traffic for unexpired calling cards are deferred and recognized as revenue when the minutes are used or when the card expires, whichever happens first. See Note 3.e. Revenues – Fixed telecommunication services and products.

- Deferred revenues on connection fees

Non-refundable up-front connection fees for fixed telephony, data and Internet services that are non-separable from the service are accounted for as a single transaction and deferred over the term of the contract, or in the case of indefinite period contracts, over the average period of customer relationship. See Note 3.e. Revenues – Fixed telecommunication services and products.

- Customer Loyalty Programs

The fair value of the award credits regarding Personal and Núcleo s customer loyalty program is accounted for as deferred revenue, and recognized as revenue when the award credits are redeemed or expire, whichever occurs first. See Note 3.e. Revenues – Mobile telecommunication services.

- Deferred revenue on sale of capacity and related services

Under certain network capacity purchase agreements, the Company sells excess purchased capacity to other carriers. Revenues are deferred and recognized as services are provided. Those revenues are recorded under Data and Internet item line in the Fixed services segment.

**n) Salaries and social security payables**

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Include unpaid salaries, vacation and bonuses and its related social security contributions, as well as termination benefits. See f.2) above for a description of the accounting policy regarding the measurement of financial liabilities.

Termination benefits represent severance indemnities that are payable when employment is terminated in accordance with labor regulations and current practices, or whenever an employee accepts voluntary redundancy in exchange for these benefits. In the case of severance compensations resulting from agreements with employees leaving the Company upon acceptance of voluntary redundancy, the compensation is usually comprised of a special cash bonus paid upon signing the severance agreement, and in certain cases may include a deferred compensation, which is payable in monthly installments calculated as a percentage of the prevailing wage at the date of each payment ( *prejubilaciones* ). The employee's right to receive the monthly installments mentioned above starts on the date they leave the Company and ends either when they reach the legal mandatory retirement age or upon the decease of the beneficiary, whichever occurs first.

### **o) Taxes payables**

The Company is subject to different taxes and levies such as municipal taxes, tax on deposits to and withdrawals from bank accounts, turnover taxes, regulatory fees (including SU) and income taxes, among others, that represent an expense for the Group. It is also subject to other taxes over its activities that generally do not represent an expense (internal taxes, VAT, ENARD tax).

The principal taxes that represent an expense for the Company are the following:

- *Income taxes*

Income taxes are recognized in the consolidated income statement, except to the extent that they relate to items directly recognized in Other comprehensive income or directly in equity. In this case, the tax is also recognized in Other comprehensive income or directly in equity, respectively. The tax expense for the period comprises current and deferred tax.

As per Argentinean Tax Law, income taxes payables have been computed on a separate return basis (i.e., the Company is not allowed to prepare a consolidated income tax return). All income tax payments are made by each of the subsidiaries as required by the tax laws of the countries in which they operate. The Company records income taxes in accordance with IAS 12.

Table of Contents

Deferred taxes are recognized using the liability method. Temporary differences arise when the tax base of an asset or liability differs from their carrying amounts in the consolidated financial statements. A deferred income tax asset or liability is recognized on those differences, except for those differences related to investments in subsidiaries where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred tax assets relating to unused tax loss carryforwards are recognized to the extent that it is probable that future taxable income will be available against which they can be utilized. Current and deferred tax assets and liabilities are offset when the income taxes are levied by the same tax authority and there is a legally enforceable right of offset. Deferred tax assets and liabilities are determined based on enacted tax rates in the respective jurisdictions in which the Group operates that are expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled.

The statutory income tax rate in Argentina was 35% for all years presented. Cash dividends received from a foreign subsidiary are computed on the statutory income tax rate. As per Argentinean Tax Law, income taxes paid abroad may be recognized as tax credits.

The statutory income tax rate in Paraguay was 10% for all years presented. As per Paraguayan Tax Law, dividends paid are computed with an additional income tax rate of 5% (this is the criterion used by Núcleo for the recording of its deferred tax assets and liabilities, representing an effective tax rate of 14.75%). However, the effect of the additional income tax rate according to the Argentine tax law in force on the undistributed profits of Núcleo is fully recognized as it is considered probable that those results will flow to Personal in the form of dividends.

• *Turnover tax*

Under Argentine tax law, the Company is subject to a tax levied on revenues and other income, net of certain deductible expenses. Rates differ depending on the jurisdiction where revenues are earned for tax purposes and on the nature of revenues (services and equipment). Average rates were approximately 4.4%, 4.6% and 4.4% for the years ended December 31, 2011, 2010 and 2009, respectively.

• *Other taxes*

Since the beginning of 2001, telecommunication services companies have been required to pay a SU tax to fund SU requirements. The SU tax is calculated as a percentage of the total revenues received from the rendering of telecommunication services, net of taxes and levies applied on such revenues, excluding the SU tax and other deductions stated by regulations. The rate is 1% of total billed revenues (See Note 2.d).

Congress passed Law No. 26,539 which amends the excise tax and establishes that the importation and sale of technological and computer goods, including mobile phones, will be subject to the excise tax at a rate of 17%, resulting in an effective tax rate of up to 20.48%, applicable beginning on December 1, 2009. The Company has the right to transfer this tax to its customers but this is not always possible. Such cost is included in the item line Cost of equipments and handsets.

**p) Provisions**

The Group records provisions for risks and charges when it has a present obligation, legal or constructive, to a third party, as a result of a past event, when it is probable that an outflow of resources will be required to satisfy the obligation and when the amount of the obligation can be estimated reliably.

If the effect of the time value of money is material, and the payment date of the obligations can be reasonably estimated, provisions to be accrued are the present value of the expected cash flows, taking into account the risks associated with the obligation. The increase in the provision due to the passage of time is recognized as Finance expenses . Additional information is given in Note 17.

Provisions also include the expected costs of dismantling assets and restoring the site if a legal or constructive obligation exists, as mentioned in Note 3.h). The accounting estimates for dismantling costs, including discount rates, and the dates in which such costs are expected to be incurred are reviewed annually, at each financial year-end.

**q) Dividends**

Dividends payable to third parties are reported as a change in equity in the year in which they are approved by the shareholders meeting.

Table of Contents

**r) Finance income and expenses**

Finance income and expenses are recognized on an accrual basis and include:

- interest accrued on the related financial assets and liabilities using the effective interest rate method;
- changes in fair value of derivatives and other financial instruments measured at fair value through profit or loss;
- gains and losses on foreign exchange and financial instruments (including derivatives);
- other financial results (repurchase of financial debt, etc.).

**s) Earnings per share**

Basic earnings per share are calculated by dividing the net income or loss attributable to owners of the Parent by the weighted average number of ordinary shares outstanding during the year (see Note 25).

**t) Use of estimates**

The preparation of consolidated financial statements and related disclosures in conformity with IFRS requires Management to make estimates and assumptions based also on subjective judgments, past experience and hypotheses considered reasonable and realistic in relation to the information known at the time of the estimate.

Such estimates have an effect on the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements as well as the amount of revenues and costs during the year. Actual results could differ, even significantly, from those estimates owing to possible changes in the factors considered in the determination of such estimates. Estimates are reviewed periodically.

The most important accounting estimates which require a high degree of subjective assumptions and judgments are addressed below:

**Financial statement item / area**

**Accounting estimates**

Revenues

Revenue recognition is influenced by:

	<ul style="list-style-type: none"> <li>• the expected duration of the relationship with the customer for revenues from upfront connection fees;</li> <li>• the estimation of traffic measures.</li> </ul>
Useful lives and residual value of PP&E and Intangible assets	<p>PP&amp;E and intangible assets, except for indefinite useful life intangibles, are depreciated or amortized on a straight-line basis over their estimated useful lives. The determination of the depreciable amount of the assets and their useful lives involves significant judgment. The Company periodically reviews, at least at each financial year-end, the estimated useful lives of its PP&amp;E and amortizable intangible assets.</p>
Recoverability of PP&E and intangible assets with finite useful life	<p>At least at every annual closing date, an assessment is made regarding whenever events or changes in circumstances indicate that PP&amp;E and amortizing intangible assets may be impaired.</p> <p>The recoverable amount is the higher of the fair value (less costs to sell) and its value in use. The identification of impairment indicators and the estimation of the value in use for assets (or groups of assets or cash generating units) require management to make significant judgments concerning the validation of impairment indicators, expected cash flows and applicable discount rates. Estimated cash flows are based on significant Management's assumptions about the key factors that could affect future business performance such as the future market share, competition level, capital expenditures, salary increases, foreign exchange rates evolution, capital structure, capital cost, etc.</p> <p>For the years presented the Company estimated that there are no indicators of impairment of assets that are subject to amortization. However, changes in our current expectations and operating assumptions, including changes in our business strategy, technology, competition and/or changes in market conditions, and the outcome of the rates negotiations for regulated fixed services with the Argentine government, could significantly impact these judgments and could require future adjustments to the recorded assets.</p>
Intangible assets with indefinite useful life PCS license	<p>The Company determined that Personal's PCS license met the definition of an indefinite-lived intangible asset for the years presented and tests it annually for impairment. The recoverability assessment of an indefinite-lived intangible asset such as the PCS license requires our Management to make assumptions about the future cash flows expected to be derived from such asset.</p> <p>Such estimated cash flows are based on significant Management's assumptions about the key factors that could affect future business performance such as the future market share, competition level, capital expenditures, salary increases, foreign exchange rates evolution, capital structure, discount rate, etc. The discount rate used to determine the discounted cash flow is an annual US dollar rate of approximately 14%.</p> <p>Our judgments regarding future cash flows may change due to future market conditions, business strategy, the evolution of technology and other factors. These changes, if any, may require material adjustments to the carrying amount of the PCS license.</p>

Table of Contents

<b>Financial statement item / area</b>	<b>Accounting estimates</b>
Income taxes and recoverability assessment of deferred tax assets	Income taxes (current and deferred) are calculated in each company of the Telecom Group according to a reasonable interpretation of the tax laws in effect in each jurisdiction where the companies operate. The recoverability assessment of deferred tax assets sometimes involves complex estimates to determine taxable income and deductible and taxable temporary differences between the carrying amounts and the taxable amounts. In particular, deferred tax assets are recognized to the extent that future taxable income will be available against which they can be utilized. The measurement of the recoverability of deferred tax assets takes into account the estimate of future taxable income based on the Company's projections and on conservative tax planning.
Receivables and payables valued at amortized cost	Receivables and payables valued at amortized cost are initially recorded at their fair value, which is generally determined by using a discounted cash flow valuation method. The fair value under this method is estimated as the present value of all future cash flows discounted using an estimated discount rate, especially for long term receivables and payables. The estimated discount rate used to determine the discounted cash flow of long term receivables and payables is an annual rate in pesos ranging between 18% and 23% for years 2010 and 2009 and an annual rate in pesos ranging between 19% and 28% for 2011. Additionally, an annual U.S. dollars rate of approximately 8% was used for discounting long term receivables denominated in U.S dollars during 2011.
Provisions	The Company is subject to proceedings, lawsuits and other claims related to labor, civil, tax, regulatory and other matters. In order to determine the proper level of provisions, Management assesses the likelihood of any adverse judgments or outcomes related to these matters as well as the range of probable losses that may result from the potential outcomes. Internal and external legal counsels are consulted on these matters. A determination of the amount of provisions required, if any, is made after careful analysis of each individual issue. The determination of the required provisions may change in the future due to new developments in each matter, changes in jurisprudential precedents and tribunal decisions or changes in its method of resolving such matters, such as changes in settlement strategy.
Allowance for Doubtful Accounts	The recoverability of receivables is measured by considering the aging of the accounts receivable balances, historical write-offs, customer creditworthiness and changes in the customer payment terms when evaluating the adequacy of the allowance for doubtful accounts. If the financial condition of the customers were to deteriorate, the actual write-offs could be higher than expected.
Pension Benefits	Actuarial assumptions and demographic data, as applicable, are used to measure the Company's obligation to provide these benefits. The actuarial assumptions used are based on market interest rates, expected levels of inflation and salary increases, past experience and Management's best estimate of future economic conditions. Changes in these assumptions may impact future benefit costs and obligations. These changes, if any, may require adjustments to the recorded liabilities.

In the absence of a Standard or an Interpretation that specifically applies to a particular transaction, Management carefully considers the IFRS general framework and valuation techniques generally applied in the telecommunication industry and uses its judgment to evaluate the accounting methods to adopt with a view to providing financial statements which faithfully represent the financial position, the results of operations and the cash flows of the Group, reflect the economic substance of the transactions, be neutral, be prepared on a prudent basis and be completed in all material respects.

**New Standards and Interpretations issued by the IASB not yet in force**

As required by IAS 8, the IFRS issued by the IASB not yet in force are reported below and briefly summarized.

**Amendments to IAS 32 (Classification of Rights Issues)**

On October 8, 2009, the IASB published some amendments to IAS 32 regarding the accounting of rights issues (rights, options or warrants) that are denominated in a currency other than the functional currency of the issuer. Previously such rights issues were accounted for as derivative liabilities. The amendments require that, provided certain conditions are met, such rights issues are classified as equity regardless of the currency in which the exercise price is denominated.

The amendments to IAS 32 are effective for annual periods beginning on or after February 1, 2011, but earlier application is permitted. The application of these amendments is not expected to have a material impact on the financial statements of the Company.

**IFRS 10 (Consolidated Financial Statements)**

On May 12, 2011 the IASB published IFRS 10. This standard establishes principles for the presentation and preparation of consolidated financial statements when an entity controls one or more other entities. It provides additional new guidance to assist in determining control where this is difficult to assess. This new standard might impact the entities that a group consolidates as its subsidiaries.

Table of Contents

IFRS 10 supersedes IAS 27 *Consolidated and Separate Financial Statements* and SIC-12 *Consolidation - Special Purpose Entities* and is effective for annual periods beginning on or after January 1, 2013. Earlier application is permitted.

The application of this standard is not expected to have a material impact on the Company's financial position and results of operations.

**IFRS 11 (Joint Arrangements)**

On May 12, 2011 the IASB published IFRS 11. International Financial Reporting Standard 11 *Joint Arrangements* establishes principles for financial reporting by parties to a joint arrangement.

The IFRS supersedes IAS 31 *Interests in Joint Ventures* and SIC-13 *Jointly Controlled Entities - Non-Monetary Contributions by Venturers* and is effective for annual periods beginning on or after January 1, 2013. Earlier application is permitted.

The application of this standard is not expected to have a material impact on the Company's financial position and results of operations.

**IFRS 12 (Disclosure of Interests in Other Entities)**

On May 12, 2011 the IASB published IFRS 12. This is a new standard on disclosure requirements for all forms of interests in other entities, including joint arrangements, associates, special purpose vehicles and other off balance sheet vehicles.

The IFRS is effective for annual periods beginning on or after January 1, 2013. Earlier application is permitted.

As a result of the adoption of IFRS 12 since January 1, 2013 additional disclosure regarding summarized financial information about each subsidiary could be required if its noncontrolling interest is material to the Company.

**IFRS 13 (Fair value measurement)**

On May 12, 2011 the IASB published IFRS 13. This standard contains new guidance on fair value measurement and disclosure requirements. The requirements do not extend the use of fair value accounting but provide guidance on how it should be applied where its use is already required or permitted by other standards within IFRS.

IFRS 13 is to be applied for annual periods beginning on or after January 1, 2013. Earlier application is permitted. The application of this standard is not expected to have a material impact on the Company's financial position and results of operations.

**IAS 19 revised (Employee benefits)**

On June 16, 2011 the IASB published IAS 19 revised. The amendments make important improvements by:

- eliminating an option to defer the recognition of gains and losses, known as the corridor method, improving comparability and faithfulness of presentation;
- streamlining the presentation of changes in assets and liabilities arising from defined benefit plans, including requiring remeasurements to be presented in other comprehensive income (OCI), thereby separating those changes from changes that many perceive to be the result of an entity's day-to-day operations;
- enhancing the disclosure requirements for defined benefit plans, providing better information about the characteristics of defined benefit plans and the risks that entities are exposed to through participation in those plans.

IAS 19 revised is effective for annual periods beginning on or after January 1, 2013. Earlier application is permitted. The application of these amendments is not expected to have a material impact on the Company's financial position and results of operations.

**Amendments to IAS 1 (Presentation requirements for Other Comprehensive Income)**

On June 16, 2011 the IASB published amendments to IAS 1. The amendments require companies to group together items within OCI that may be reclassified to the profit or loss section of the income statement. The amendments also reaffirm existing requirements that items in OCI and profit or loss should be presented as either a single statement or two consecutive statements.

These amendments are effective for financial years beginning on or after July 1, 2012. The application of these amendments is not expected to have a material impact on the Company's financial position and results of operations.

Table of Contents

**Amendments to IAS 32 (Requirements for offsetting financial instruments)**

On December 16, 2011 the IASB published amendments to IAS 32.

The amendments clarify the meaning of currently has a legally enforceable right of set-off and also clarify the application of the IAS 32 offsetting criteria to settlement systems which apply gross settlement mechanisms that are not simultaneous.

These amendments are effective for annual periods beginning on or after January 1, 2014 and are required to be applied retrospectively. Early application is permitted. The Company is currently analyzing the impact that the adoption of these amendments will have on the Company's financial position and results of operations.

**Amendments to IFRS 7 (Offsetting financial assets and financial liabilities)**

On December 16, 2011 the IASB published amendments to IFRS 7. These amendments require disclosure to evaluate the effect or potential effect of netting arrangements, including rights of set-off associated with the entity's recognized financial assets and recognized financial liabilities, on the entity's financial position.

These amendments are effective for annual reporting periods beginning on or after January 1, 2013, and interim periods within those annual periods. The required disclosures should be provided retrospectively.

The Company is currently analyzing the impact that the adoption of these amendments will have on the Company's financial position and results of operations.

**Note 4 Cash and cash equivalents and Investments. Additional information on the consolidated statements of cash flows**

a) **Cash and cash equivalents and Investments**

Cash and cash equivalents consist of the following:

Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

	As of December 31,	
	2011	2010
<b>Cash and cash equivalents</b>		
Cash	8	8
Banks	94	111
Time deposits	2,638	1,266
Time deposits Related parties (Note 27.c)	69	
Mutual funds	9	
<b>Total cash and cash equivalents</b>	<b>2,818</b>	<b>1,385</b>

Investments consist of the following:

	As of December 31,	
	2011	2010
<b>Current investments</b>		
Government bonds		2
<b>Total other investments</b>		<b>2</b>

	As of December 31,	
	2011	2010

**Note 12 Financial debt**

Financial debt (which fully belongs to Núcleo) consists of the following:

	As of December 31,	
	2011	2010
<b><u>Current financial debt</u></b>		
Bank loans	17	31
Bank overdrafts		9
Accrued interest	2	2
	<b>19</b>	<b>42</b>
<b><u>Non-current financial debt</u></b>		
Bank loans	115	121
	<b>115</b>	<b>121</b>
<b>Total financial debt</b>	<b>134</b>	<b>163</b>

Table of ContentsBank loans

The following table shows the outstanding loans with local banks in Paraguay and their main terms as of December 31, 2011:

Principal nominal value (in million of Guaraníes)	Amortization term	Book value (in million of \$)		Total
		Current	Non-current	
36,000	3.5 years	4	30	34
37,500	3 years	3	32	35
47,500	3 years	3	42	45
18,750	2 years	7	11	18
<b>139,750</b>		<b>17</b>	<b>115</b>	<b>132</b>

The weighted average annual rate of these loans is 9.61% in Guaraníes and the weighted average amortization term of these loans is approximately 3 years.

The terms and conditions of Núcleo s loans provide for certain events of default which are considered standard for these kinds of operations.

Global Programs for the issuance of NotesTelecom Argentina

The Ordinary and Extraordinary Shareholders Meeting of Telecom Argentina held on December 15, 2011, approved the creation of a Medium Term Notes Global Program for a maximum outstanding amount of US\$ 500 million or its equivalent in other currencies for a term of five years. At the date of issuance of these financial statements, Telecom Argentina is preparing the documentation required by the CNV to approve this program.

Personal

The Ordinary and Extraordinary Shareholders Meeting of Personal held on December 2, 2010, approved the creation of a Medium Term Notes Global Program for a maximum outstanding amount of US\$ 500 million or its equivalent in other currencies for a term of five years. On October 13, 2011, the CNV has approved this program.

**Note 13 Salaries and social security payables**

Salaries and social security payables include unpaid salaries, vacation and bonuses and its related social security contributions, as well as termination benefits

As of December 31, 2011, the total number of employees was 16,345, of which approximately 66% were unionized. All Management and senior positions are held by non-unionized employees.

In the field of compensation policy for Directors and Managers, the Company and its subsidiaries have a scheme that includes fixed and variable components. While fixed compensation is dependent upon the level of responsibility required for the position and its market competitiveness, variable compensation is comprised of compensation driven by the goals established on an annual basis and also by compensation regarding the fulfillment of long term goals.

The Company and its subsidiaries have no stock option plans for their employees.

Salaries and social security payables consist of the following:

	As of December 31,	
	2011	2010
<b><u>Current</u></b>		
Vacation and bonuses	359	261
Social security payables	113	83
Termination benefits	64	46
	<b>536</b>	<b>390</b>
<b><u>Non-current</u></b>		
Termination benefits	136	110
	<b>136</b>	<b>110</b>
<b>Total salaries and social security payables</b>	<b>672</b>	<b>500</b>

Compensation for the Key Managers for the years ended December 31, 2011, 2010 and 2009 is shown in Note 27.e).

Table of Contents**Note 14 Income tax payables and deferred income tax**

Interest cost (*)	5	2
Actuarial loss (gain) (*)	(6)	7
<b>At December 31,</b>	<b>23</b>	<b>22</b>

(\*) Included in Employee benefit expenses and severance payments.

**Note 17 Provisions**

The Company is a party to several civil, tax, commercial, labor and regulatory proceedings and claims that have arisen in the ordinary course of business. In order to determine the proper level of provisions, Management of the Company, based on the opinion of its internal and external legal counsel, assesses the likelihood of any adverse judgments or outcomes related to these matters as well as the range of probable losses that may result from the potential outcomes. A determination of the amount of provisions required, if any, is made after careful analysis of each individual case.

Table of Contents

The determination of the required provisions may change in the future due to new developments or unknown facts at the time of the evaluation of the claims or changes as a matter of law or legal interpretation. Consequently, as of December 31, 2011, the Company has established provisions in an aggregate amount of \$1,045 to cover potential losses under these claims (\$90 for regulatory contingencies deducted from assets and \$955 included under provisions) and certain amounts deposited in the Company's bank accounts have been restricted as to their use due to some judicial proceedings. As of December 31, 2011, these restricted funds totaled \$46 (included under Other receivables, net item line in the consolidated statement of financial position).

Provisions consist of the following:

	Balances as of December 31, 2009				Balances as of December 31, 2010				Balances as of December 31, 2011					
	Capital	Interest	Reclassifications	Uses	Capital	Interest	Reclassifications	Uses	Capital	Interest	Reclassifications	Uses		
<b>Current</b>

(i) \$2 was reclassified from Other receivables, net Allowance for regulatory proceedings.

(ii) Includes a reclassification of \$13 from current liabilities.

(iii) The breakdown of the additions (including the allowances for regulatory contingencies detailed in Note 6) is the following:

	Years ended December 31,		
	2011	2010	2009
Provisions - capital	225	117	78

Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Provisions - capital (included in PP&E)	12	3	3
Provisions - capital (reversal related to Law No. 26,476)			(36)
Allowance for regulatory contingencies - capital (Note 6)		13	6
<b>Subtotal</b>	<b>237</b>	<b>133</b>	<b>51</b>
Interest on Provisions (Note 24)	112	70	80
Interest on asset retirement obligations	4	4	4
<b>Total</b>	<b>353</b>	<b>207</b>	<b>135</b>

Below is a summary of the most significant claims and legal actions for which provisions have been established:

- Profit sharing bonds

In August 2008, the Supreme Court of Justice, when resolving a case against Telefónica, found the Decree No. 395/92 unconstitutional. Different legal actions were brought, mainly by former employees of the Company against the National Government and the Company, requesting that Decree No. 395/92 which expressly exempted the Company from issuing the profit sharing bonds provided in Law No. 23,696 be struck down as unconstitutional and, therefore, claiming compensation for the damages they had suffered because such bonds had not been issued.

In those suits for which judgment has already been rendered, the trial court judges hearing the matter resolved to dismiss the actions brought relying on arguments made by each case's respective prosecutors pointing that such rule was valid and constitutional. However, and based on the National Supreme Court of Justice's judgment on this matter, the three Divisions of the Courts of Appeal ruled that Decree No. 395/92 was unconstitutional.

In order to defend its rights, the Company filed various appeals against these unfavorable decisions. Up to date, the National Supreme Court of Justice has denied the first extraordinary appeals. It should be noted that the abovementioned ruling of the Supreme Court on the case against Telefónica has created a judicial precedent that, in the opinion of the legal counsel of the Company, increases the probability that the Company has to face certain contingencies as a result of an adverse ruling, notwithstanding the right of reimbursement that attends Telecom Argentina against the National State.

Said Court decision found the abovementioned decree unconstitutional and ordered to send the proceedings back to the court of origin so that said court could decide on which was the subject compelled to pay licensee and/or National Government- and the parameters that were to be taken into account in order to quantify the condemnation amounts (percentage of profit sharing, status of limitation, distribution method between the beneficiaries of the program). It should be mentioned that there is no uniformity of opinion in the Courts in relation to each of those concepts.

Table of Contents

As of December 31, 2011, the management of the Company, with the aid of its legal counsel, has recorded provisions for contingencies that it estimates are sufficient to cover the risks associated with these claims, having considered the legal background up to the date of issuance of these consolidated financial statements.

- Wage differences by food vouchers and non-remunerative lump sum

The Company is subject to various lawsuits initiated by some employees and former employees who claim wage differences caused by the impact of the concepts non-remunerative lump sum and food vouchers over the settlement of items such as overtime, productivity, vacation, supplementary annual salary and other additional benefits provided by the Collective Bargaining Agreement.

In this regard, the Supreme Court of Justice has recognized that food vouchers are remunerative and are part of the employees' compensations, declaring the unconstitutionality of Sect. 103 bis, inc. C of the Employment Contract Act (which gives them the character of social benefits). Considering these judicial precedents, at December 31, 2011, the Management of the Company, with the aid of its legal counsel, has recorded a provision for contingencies that it estimates is sufficient to cover the risks associated with these claims at the date of issue of these consolidated financial statements.

In addition, the Company is subject to other claims and legal actions that have arisen in the ordinary course of business. Although there can be no assurance as to the ultimate disposition of these matters, it is the opinion of the Management of the Company, based upon the information available at this time and consultation with external and internal legal counsel, that the expected outcome of these other claims and legal actions, individually or in the aggregate, will not have a material effect on the Company's financial position, liquidity or results of operations. In accordance with IAS 37, no provisions have been established for the outcome of these actions.

***Contingent liabilities other than remote***

In November 2011, Personal was notified of a lawsuit filed by the Financial Consumers Defense Association (*Consumidores Financieros Asociación Civil para su defensa*) claiming that Personal made allegedly abusive charges to its customers by implementing per-minute billing and setting an expiration date for prepaid telecommunication cards.

The lawsuit demands: Personal to i) cease such practices and bill its customers only for the exact time of telecommunication services used; ii) reimburse the amounts collected in excess in the ten years preceding the date of the lawsuit; iii) credit its customers for unused minutes on expired prepaid cards in the ten years preceding the date of the lawsuit; iv) pay interest equal to the lending rate charged by the Banco de la Nación Argentina in addition to the claims mentioned in i) and ii); and v) pay punitive damages provided by article 52 bis of Law No. 24,240.

Personal responded in a timely manner, arguing the grounds by which the lawsuit should be dismissed, with particular emphasis on the regulatory framework that explicitly endorses Personal's practices, now challenged by the plaintiff in disregard of such regulations.

The plaintiffs are seeking damages for unspecified amounts. Currently, Personal is quantifying the risk involved in this contingency. Although Personal believes there are strong defense arguments for which the claim should not succeed, in the absence of jurisprudence on the matter, Personal's Management (with the assistance of its legal counsel) has classified the claim as possible until a judgment is rendered.

**Note 18 Commitments**

**(a) Purchase commitments**

The Company has entered into various purchase orders amounting in the aggregate to approximately \$2,910 as of December 31, 2011 (of which \$244 and \$1 corresponds to PP&E and intangible assets commitments, respectively), primarily related to the supply of switching equipment, external wiring, infrastructure agreements, inventory and other service agreements. This amount also includes the commitments mentioned in c) and d) below.

**(b) Investment commitments**

In August 2003, Telecom Argentina was notified by the SC of a proposal for the creation of a \$70-million fund (the Complejo Industrial de las Telecomunicaciones 2003 or 2003 Telecommunications Fund ) to be funded by the major telecommunication companies and aimed at developing the telecommunications sector in Argentina. Banco de Inversion y Comercio Exterior ( BICE ) was designated as Trustee of the Fund.

Table of Contents

In November 2003, the Company contributed \$1.5 at the inception of the Fund. In addition, Management announced that it is the Company's intention to promote agreements with local suppliers which would facilitate their access to financing.

**(c) Commitments assumed by Telecom Argentina from the sale of Publicom**

On March 29, 2007, Telecom Argentina's Board of Directors approved the sale of its equity interest in Publicom (a company engaged in directories publishing business) to Yell Publicidad S.A. (a company incorporated in Spain, member of the Yell Group- *Grupo Yell*), which was executed on April 12, 2007 (the Closing Date).

A series of declarations and guarantees, standard for this type of transactions, assumed by Telecom Argentina towards the buyer with respect to Publicom and to itself and others assumed by the buyer towards Telecom Argentina and towards itself are included in the contract. Reciprocal obligations and commitments are also set forth, between Telecom Argentina and the buyer.

It has been ruled that Telecom Argentina shall indemnify and shall hold the buyer harmless from any and all damages that might result from:

(i) Any claim addressed to the buyer by third parties in which the owner's equity, entitlement to inherent rights and /or unrestricted disposal of shares is successfully objected;

(ii) Damages and losses of equity derived from incorrectness or inaccuracy of the declarations and guarantees;

(iii) Damages and losses of equity derived from the non-fulfillment of the obligations and commitments undertaken by Telecom Argentina.

These indemnities granted by Telecom Argentina have time as well as economic limits.

On Closing Date and after the stock transfer was actually performed, Publicom accepted a proposal from Telecom Argentina. According to said proposal, Telecom Argentina:

- engages Publicom to publish Telecom Argentina's directories (white pages) for a 5-year period, which may be extended upon expiry date;

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

- engages Publicom to distribute Telecom Argentina's white pages for a 20-year period, which may be extended upon expiry date;
- engages Publicom to maintain the Internet portal, which allows to access the white pages through the web, for a 20-year period, term which may be extended upon expiry date;
- grants Publicom the right to lease advertising spaces on the white pages for a 20-year period, which may be extended upon expiry date; and
- authorizes the use of certain trademarks for the distribution and/or consultation on the Internet and/or advertising spaces agreements for the same specified period.

Telecom Argentina reserves the right to supervise certain matters associated with white pages publishing and distribution activities that allow Telecom Argentina to assure the fulfillment of its regulatory obligations during the term of the proposal. The terms and conditions of the proposal include usual provisions that allow Telecom Argentina to apply economic sanctions in the case of non-compliance, and in the case of serious non-compliance, allow Telecom Argentina to require an early termination. In the latter case, the Company could enter into an agreement with other providers.

The proposal set prices for the publishing, printing and distribution of the 2007 directories, and provided clauses for the subsequent editions in order to ensure Telecom Argentina that said services will be contracted at market price.

Telecom Argentina shall continue to include in its own invoices the amounts to be paid by its customers to Publicom for the contracted services or those that may be contracted in the future, and subsequently collect the amounts for said services on behalf and to the order of Publicom, without absorbing any delinquency.

### **(d) Commitments assumed by Núcleo**

During 2010, the CONATEL awarded Núcleo a public bidding for the implementation of the expansion of the infrastructure of networks used as platform for the mobile telephony access services and the basic service in areas of public or social interest in Paraguay.

Núcleo committed to install and render satisfactorily functioning all the assets and services covered by the bidding, by means of an approximate investment of \$18 (which was fully completed), of which \$12 were subsidized by the CONATEL. The CONATEL has disbursed approximately \$9. The works were completed and the CONATEL is conducting the final inspection, without having yet given its report.

Table of Contents

Additionally, in August 2011, the CONATEL awarded Núcleo a new public bidding for the implementation of the expansion of the infrastructure of networks as a platform for the mobile telephony access services and the basic service in the Department of Caaguazú. Núcleo committed to install and render satisfactorily functioning all the assets and services covered by the bidding within six months from the date of signing of the contract, by means of an approximate investment of \$7(which, at the date of issuance of these consolidated financial statements, are completed over than 70%), of which \$5 will be subsidized by the CONATEL. The CONATEL has disbursed approximately \$1 related to this bidding.

CONATEL s disbursements amounting to \$10 were included under Deferred revenues item line, corresponding \$8 and \$2 to current and non-current deferred revenues, respectively.

**Note 19 Equity**

Equity includes:

	As of December 31,	
	2011	2010
Equity attributable to owners of the Parent	8,021	6,404
Equity attributable to non-controlling interest	144	107
<b>Total equity (*)</b>	<b>8,165</b>	<b>6,511</b>

(\*) Additional information is given in the consolidated statements of changes in equity.

**(a) Capital information**

The composition of the capital stock at December 31, 2011 is the following:

	Authorized, issued and outstanding shares
Class A Shares	502,034,299
Class B Shares	477,753,405
Class C Shares	4,593,274
Total	<b>984,380,978</b>

At December 31, 2011, all the shares are fully paid. Common shareholders are entitled to one vote for each share held of record on all matters submitted to a vote of shareholders.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

The Company's shares are authorized by the CNV, the Buenos Aires Stock Exchange (the BCBA) and the New York Stock Exchange (the NYSE) for public trading. Only 440,920,997 of Class B shares are traded since Nortel owns all of the outstanding Class A shares and 36,832,408 Class B shares; and Class C shares are dedicated to the employee stock ownership program, as described below.

Each ADS represents 5 Class B shares and are traded on the NYSE under the ticker symbol TEO.

### **(b) Share ownership program**

In 1992, a decree from the Argentine Government, which provided for the creation of the Company upon the privatization of ENTel, established that 10% of the capital stock then represented by 98,438,098 Class C shares was to be included in the *Programa de Propiedad Participada* or PPP (an employee share ownership program sponsored by the Argentine Government). Pursuant to the PPP, the Class C shares were held by a trustee for the benefit of former employees of the state-owned company who remained employed by the Company and who elected to participate in the plan.

In 1999, Decree No. 1,623/99 of the Argentine Government eliminated the restrictions on some of the Class C shares held by the PPP, although it excluded Class C shares of the Fund of Guarantee and Repurchase subject to an injunction against their use. In March 2000, the shareholders meeting of the Company approved the conversion of up to unrestricted 52,505,360 Class C shares into Class B shares (these shares didn't belong to the Fund of Guarantee and Repurchase), most of which was sold in a secondary public offering in May 2000.

The Annual General and Extraordinary Meetings held on April 27, 2006, approved that the power for the additional conversion of up to 41,339,464 Class C ordinary shares into the same amount of Class B ordinary shares, be delegated to the Board of Directors. As granted by the Meetings, the Board transferred the powers to convert the shares to some of the Board's members and/or the Company's executive officers. At December 31, 2011, all the 41,339,464 shares were converted into Class B ordinary shares in eleven tranches.

Table of Contents

The remaining 4,593,274 Class C shares were affected by an injunction measure recorded in file *Garcías de Vicchi, Amerinda y otros c/ Sindicación de Accionistas Clase C del Programa de Propiedad Participada s/nulidad de acto jurídico*, which was released. The General Ordinary and Extraordinary and Special Class C Shares Meetings held on December 15, 2011, approved that the power for the additional conversion of up to 4,593,274 Class C ordinary shares into the same amount of Class B ordinary shares in one or more tranches, be delegated to the Board of Directors.

By means of this, Telecom Argentina requested from the CNV and the BCBA the transfer of authorization for public offering and trading due to conversion, in a first Tranche, of 3,281,265 Class C shares into an equal amount of Class B shares. As of the date of issuance of these consolidated financial statements, the CNV has granted the authorization.

**Note 20 Financial instruments***Categories of financial assets and financial liabilities*

The following tables set out, for financial assets and liabilities as of December 31, 2011 and 2010, in accordance with the categories established by IFRS 9, the supplementary disclosures on financial instruments required by IFRS 7 and the schedules of gains and losses.

<b>Total</b>	<b>(61)</b>	<b>40</b>

***Fair value hierarchy and other disclosures***

IFRS 7 establishes a hierarchy of fair value, based on the information used to measure the financial assets and liabilities and also establishes different valuation techniques. According to IFRS 7, valuation techniques used to measure fair value shall maximize the use of observable inputs.

The measurement at fair value of the financial instruments of the Group is classified according to the three levels set out in IFRS 7. The fair value hierarchy introduces three levels of input:

- Level 1: Fair value determined by quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: Fair value determined based on inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: Fair value determined by unobservable inputs where the reporting entity is required to develop its own assumptions.

Financial assets and liabilities recognized at fair value as of December 31, 2011 and 2010, their inputs, valuation techniques and the level of hierarchy are listed below:

**Mutual Funds:** These funds are included in Cash and cash equivalents. The amount as of December 31, 2011 is \$9. As of December 31, 2010 the Company had no mutual funds. The fair value is based on information obtained from active markets and corresponds to quoted market prices as of year-end; therefore its valuation is classified as Level 1.

**Trade payables - Derivative financial instruments (Forward contracts to purchase US dollars at fixed exchange rates):** During October 2011, Personal entered into several Non-Deliverable Forward ( NDF ) contracts to purchase US dollars amounting to US\$12.7 million, maturing December 2011 and March 2012, in order to hedge its exposure to US dollar fluctuations related to trade payables. The Company designated these NDF contracts as effective cash flow hedges. As their fair value was determined by information obtained in the most representative financial institutions in Argentina, the derivative financial instruments valuation was classified as Level 2.

During 2011 and 2010 there were no significant transfers between Level 1 and Level 2 of the fair value hierarchy.

According to IFRS 7, it is also required to disclose fair value information about financial instruments whether or not recognized at fair value in the balance sheet, for which it is practicable to estimate fair value. The financial instruments which are discussed in this section include, among others, cash and cash equivalents, accounts receivable, accounts payable and other instruments.

Derived fair value estimates cannot be substantiated by comparison to independent markets and, in many cases, could not be realized in an immediate sale of the instrument. Also, because of differences in methodologies and assumptions used to estimate fair value, the Company's fair values should not be compared to those of other companies.

The methods and assumptions used to estimate the fair values of each class of financial instrument falling under the scope of IFRS 7 as of December 31, 2011 and 2010 are as follows:

Cash and banks

Carrying amounts approximate its fair value.

Time deposits (included in Cash and cash equivalents and Investments)

The Company considers all short-term and highly liquid investments that are readily convertible to known amounts of cash, subject to an insignificant risk of changes in value and their original maturity or the remaining maturity at the date of purchase does not exceed 3 months, to be cash and cash equivalents. The carrying amount reported in the statement of financial position approximates fair value.

Table of Contents

Investments

Carrying amounts approximate its fair value.

Trade receivables, net

Carrying amounts are considered to approximate fair value due to the short term nature of these accounts receivables. All amounts that are assumed to be uncollectible within a reasonable period are written off and/or reserved.

Trade payables

The carrying amount of accounts payable reported in the statement of financial position approximates its fair value due to the short term nature of these accounts payable.

Financial debt (except for NDF)

As of December 31, 2011 and 2010, the fair value of the Company's financial debt approximates its fair value and it was \$134 and \$163, respectively.

Salaries and social security payables

The carrying amount of Salaries and social security payables reported in the statement of financial position approximates its fair value.

Other receivables, net and other liabilities (except for NDF)

The carrying amount of other receivables, net and other liabilities reported in the statement of financial position approximates its fair value.

*Hedge accounting*

For transactions designated and qualifying for hedge accounting, Telecom Argentina documents at inception the relationship between hedging instruments and hedged items, as well as its risk management objectives and strategy for undertaking various hedge transactions. The Company also documents its assessment, both at hedge inception and on an ongoing basis, of whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values or cash flows of hedged items.

As part of its hedging policy, the Telecom Group has entered into the following derivatives:

1) **NDF contracts to purchase foreign currency for accounts payable during 2011 and 2010**

During October 2011, Personal entered into several NDF contracts to purchase a total amount of US\$40 million maturing December 2011 in order to hedge its exposure to US dollar fluctuations related to accounts payable. However, as the terms of the NDF did not perfectly match the terms of the foreign currency-denominated obligations, these hedges were regarded as ineffective.

During October 2011, Personal also entered into several NDF contracts amounting to US\$12.7 million (maturing December 2011 and March 2012), in order to hedge its exposure to US dollar fluctuations related to accounts payable. The Company designated these NDF contracts as effective cash flow hedges. As of December 31, 2011, US\$6.4 million were outstanding and the changes in the fair value of these NDF (a debt amounting to \$0.1 and included in Trade payables) were recognized in Other comprehensive income.

During January 2010, Personal entered into several NDF contracts amounting to US\$30.2 million (maturing January through December 2010), in order to hedge its exposure to US dollar fluctuations related to accounts payable. The Company designated these NDF contracts as effective cash flow hedges.

2) **NDF contracts to purchase foreign currency for Notes during 2010**

During January 2010, Personal entered into several NDF contracts amounting to US\$72 million in order to hedge its exposure to US dollar fluctuations with respect to its Notes, maturing in December 2010. Personal designated these NDF contracts as effective cash flow hedges.

Table of Contents**Note 21 Revenues**

The Company discloses its service revenues in three groups by nature: Voice, Data and Internet. At December 31, 2011, 2010 and 2009, the customers by segment (unaudited) were the following:

	2011	December 31, 2010	2009
Fixed customer lines	4,057,000	4,019,000	3,967,000
ADSL subscribers	1,550,000	1,380,000	1,214,000
Personal mobile services customers	18,193,000	16,333,000	14,475,000
Núcleo mobile services customers	2,149,000	1,878,000	1,806,000

In addition to service revenues, the table below also discloses the equipment sales and other income:

	2011	Years ended December 31, 2010	2009
Voice	3,104	2,898	2,797
Data	583	488	393
Internet	1,553	1,204	926
Equipment (excluding network construction contracts)	64	56	43
Network construction contracts	25	14	
<b>Total Fixed services</b>	<b>5,329</b>	<b>4,660</b>	<b>4,159</b>
Voice	5,727	5,095	4,507
Data	4,482	2,997	2,150
Internet	774	391	173
Equipment	1,472	1,018	796
<b>Total Personal mobile services</b>	<b>12,455</b>	<b>9,501</b>	<b>7,626</b>
Voice	353	254	241
Data	251	156	106
Internet	84	48	32
Equipment	26	8	6
<b>Total Núcleo mobile services</b>	<b>714</b>	<b>466</b>	<b>385</b>
	<b>18,498</b>	<b>14,627</b>	<b>12,170</b>

Other income consists of the following:

	2011	Years ended December 31, 2010	2009
Penalties collected from suppliers	27	15	16
Gain on the sale of PP&E	22	7	13
Other	6	10	5
	<b>55</b>	<b>32</b>	<b>34</b>

**Note 22 Operating expenses**

Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Operating expenses disclosed by nature of expense amounted to \$14,696, \$11,497 and \$9,588 for the years ended December 31, 2011, 2010 and 2009, respectively.

The main components of the operating expenses are the following:

**Employee benefit expenses and severance payments**

	Years ended December 31,		
	2011	2010	2009
Wages and salaries	(1,857)	(1,429)	(1,153)
Social security expenses	(538)	(417)	(327)
Severance indemnities and termination benefits	(153)	(94)	(65)
Training costs	(8)	(9)	(10)
Other employee benefits	(53)	(26)	(17)
	<b>(2,609)</b>	<b>(1,975)</b>	<b>(1,572)</b>

**Interconnection costs and other telecommunication charges**

	Years ended December 31,		
	2011	2010	2009
Fixed telephony interconnection costs	(190)	(196)	(180)
Cost of international outbound calls	(150)	(134)	(152)
Lease of circuits	(169)	(143)	(139)
Mobile services - charges for roaming	(241)	(199)	(167)
Mobile services - charges for TLRD	(753)	(705)	(723)
	<b>(1,503)</b>	<b>(1,377)</b>	<b>(1,361)</b>

Table of Contents**Fees for services, maintenance, materials and supplies**

	Years ended December 31,		
	2011	2010	2009
Maintenance of hardware and software	(235)	(157)	(110)

**Note 25 Earnings per share**

The Company computes net income per common share by dividing net income for the year attributable to owners of the Parent by the weighted average number of common shares outstanding during the year. Diluted net income per share is computed by dividing the net income for the year by the weighted average number of common and dilutive potential common shares then outstanding during the year. Since the Company has no dilutive potential common stock outstanding, there are no dilutive earnings per share amounts.

For financial years 2011, 2010 and 2009, the weighted average of shares outstanding totaled 984,380,978 shares.

**Note 26 Financial risk management**

**Financial risk factors**

Telecom Group is exposed to the following financial risks in the ordinary course of its business operations:

- market risk: stemming from changes in exchange rates in connection with financial assets that have been originated and financial liabilities that have been assumed. As regards to changes in interest rates, as of December 31, 2011 the Company had no outstanding floating rate borrowings. Therefore, the Company is not currently exposed to significant fluctuations in the cash flows of its debt obligations.
- credit risk: representing the risk of the non-fulfillment of the obligations undertaken by the counterpart with regard to the liquidity investments of the Group;
- liquidity risk: connected with the need to meet short-term financial commitments.

Table of Contents

These financial risks are managed by:

- the definition of guidelines for directing operations;
- the activity of the Board of Directors and Management which monitors the level of exposure to market risks consistently with prefixed general objectives;
- the identification of the most suitable financial instruments, including derivatives, to reach prefixed objectives;
- the monitoring of the results achieved;
- the exclusion of the use of financial instruments for speculative purposes.

The policies to manage and the sensitivity analyses of the above financial risks by Telecom Group are described below.

- **Market risk**

The main Telecom Group's market risks are its exposure to changes in foreign currency exchange rates in the markets in which it operates principally Argentina and Paraguay.

Foreign currency risk is the risk that the future fair values or cash flows of a financial instrument may fluctuate due to exchange rate changes. The Company's exposure to exchange variation risks is related mainly to its operating activities (when income or expenses are denominated in a currency other than the Company's functional currency).

The financial risk management policies of the Group are directed towards diversifying market risks by the acquisition of goods and services in the functional currency and minimizing interest rate exposure by an appropriate diversification of the portfolio. This may also be achieved by using carefully selected derivative financial instruments to mitigate long-term positions in foreign currency.

As of December 31, 2011 and 2010, Telecom Argentina and Personal have no financial debt outstanding. However, both companies and Núcleo have commercial debt nominated in USD. Additionally, Núcleo's financial debt is denominated in guaraníes, its functional currency at fixed rates.

Additionally the Company has cash and cash equivalents denominated in USD (approximately 29% of total investments) that are also sensitive to changes in peso/dollar exchange rates and contribute to reduce the exposure to trade payables in foreign currency. As of December 31, 2011, Personal had US\$6.4 million outstanding in NDF contracts, in order to hedge its exposure to US dollar fluctuations related to accounts payable.

Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

The following table shows a breakdown of Telecom Argentina's assessed financial position exposure to currency risk as of December 31, 2011 and 2010.

**12.31.11**

	Amount of foreign currency (1)	Amount in local currency
US\$	(136)	(592)
G	(182,167)	(171)
EURO	(16)	(90)
SDR	2	14
\$U	2	1
	<b>Net debt</b>	<b>(838)</b>

**12.31.10**

	Amount of foreign currency (1)	Amount in local currency
US\$	(219)	(863)
G	(219,789)	(194)
EURO	(12)	(64)
SDR	1	8
\$U	9	2
	<b>Net debt</b>	<b>(1,111)</b>

---

(1) US\$ = United States dollar; G= Guaraníes; SDR= Special Drawing Rights; \$U= Uruguayan peso.

The exposure to the various market risks can be measured by sensitivity analyses, as set forth in IFRS 7. These analyses illustrate the effects produced by a given and assumed change in the levels of the relevant variables in the various markets (exchange rates, interest rates and prices) on finance income and expenses and, at times, directly on Other comprehensive income. A description on the sensitivity analysis of exchange rate and interest rate risks is given below:

Table of Contents

**Exchange rate risk    Sensitivity analysis**

Management estimates, based on the composition of the statement of financial position as of December 31, 2011, that every variation in the exchange rate of \$0.10 peso against the U.S. dollar and proportional variations for Euros and guaraníes against the Argentine peso, plus or minus, would result in a variation of approximately \$20 of the consolidated amounts of foreign currency position. This analysis is based on the assumption that this variation of the Argentine peso occurred at the same time against all other currencies.

This sensitivity analysis provides only a limited, point-in-time view of the market risk sensitivity of certain of the financial instruments. The actual impact of market foreign exchange rate changes on the financial instruments may differ significantly from the impact shown in the sensitivity analysis.

**Interest rate risk    Sensitivity analysis**

As of December 31, 2011 and 2010, the Company had no outstanding floating rate borrowings. Therefore, the Company is not currently exposed to significant cash flow risk in this connection.

- **Credit risk**

Credit risk represents Telecom Group's exposure to possible losses arising from the failure of commercial or financial counterparts to fulfill their assumed obligations. Such risk stems principally from economic and financial factors, or from the possibility that a default situation of a counterpart could arise or from factors more strictly technical, commercial or administrative.

Credit risk arises from cash and cash equivalents, deposits with banks and financial institutions, as well as credit exposures to customers, including outstanding receivables and committed transactions.

Telecom Group's maximum theoretical exposure to credit risk is represented by the carrying amount of the financial assets and trade receivables, net recorded in the financial statements.

Date due	Banks and cash equivalents	Investments	Trade receivables, net	Other receivables, net	Total
<b>Total due</b>			516		516
<b>Total not due</b>	2,818	1	1,304	131	4,254

<b>Total as of December 31, 2011</b>	<b>2,818</b>	<b>1</b>	<b>1,820</b>	<b>131</b>	<b>4,770</b>
--------------------------------------	--------------	----------	--------------	------------	--------------

The accruals to the allowance for doubtful accounts are recorded: (i) for an exact amount on credit positions that present an element of individual risk (bankruptcy, customers under legal proceedings with the Company); (ii) on credit positions that do not present such characteristics, by customer segment considering the aging of the accounts receivable balances, historical write-offs, customer creditworthiness and changes in the customer payment terms. Total overdue balances not covered by the allowance for doubtful accounts amount to \$516 at December 31, 2011 (\$385 at December 31, 2010). Further details are provided in Note 5.

Regarding the credit risk relating to the asset included in the Net financial debt or asset, it should be noted that the Company evaluates the outstanding credit of the counterparty and the levels of investment, based on their credit rating and the equity size of the counterparty. Deposits are made with leading high-credit-quality banking and financial institutions and generally for periods of less than three months.

The Company serves a wide range of customers, including residential customers, businesses and governmental agencies. As such, the Company's account receivables are not subject to significant concentration of credit risk.

In order to minimize credit risk, the Group also pursues a diversification policy for its investments of liquidity and allocation of its credit positions among different banking counterparts. Consequently, there are no significant positions with any one single counterpart.

Table of Contents

- **Liquidity risk**

Liquidity risk represents the risk that the Company has no funds to meet its obligations of any nature (financial, labor, commercial).

The Company manages its cash and cash equivalents and its financial assets, matching the term of investments with those of its obligations. The average term of its investments may not exceed the average term of its obligations. This cash and cash equivalents position is invested in highly-liquid short-term instruments through first-class financial entities.

The Company maintains a liquidity policy that translates into a significant volume of available cash through its normal course of business as it is shown in the consolidated statement of cash flows. The Company has consolidated cash and cash equivalents amounting to \$2,818 (equivalent to US\$660 million) as of December 31, 2011 (in 2010, \$1,385 equivalent to US\$352 million).

The table below contains a breakdown of financial liabilities into relevant maturity groups based on the remaining period at the date of the statement of financial position to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows.

<b>Maturity Date</b>	<b>Trade payables</b>	<b>Debt</b>	<b>Salaries and social security payables</b>	<b>Other liabilities</b>	<b>Total</b>
Due	(*) 115				115
First quarter 2012	3,282	5	344	20	3,651
Second quarter 2012	10	8	111	9	138
Third quarter 2012		5	67	1	73
Fourth quarter 2012		11	15		26
January 2013 thru December 2013		57	45	51	153
January 2014 thru December 2014		68	38	2	108
January 2015 and thereafter		8	82		90
	<b>3,407</b>	<b>162</b>	<b>702</b>	<b>83</b>	<b>4,354</b>

(\*) At the date of issuance of these consolidated financial statements, \$56 was paid.

Capital management

The primary objective of the Group's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximize shareholder value.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

The Group manages its capital structure and makes adjustments to it in light of changes in economic conditions.

To maintain or adjust the capital structure, the Group may adjust the dividend payment to shareholders and the level of indebtedness.

No changes were made in the objectives, policies or processes for managing capital during the years ended December 31, 2011 and 2010.

The Company does not have to comply with regulatory capital adequacy requirements.

### **Note 27 Related party transactions**

#### **(a) Controlling group**

As of December 31, 2011, Nortel is the controlling shareholder of Telecom Argentina. Nortel owns all of the outstanding Class A shares and 36,832,408 Class B shares of Telecom Argentina, representing 54.74% of the total common stock of Telecom Argentina.

As of December 31, 2011 Nortel's ordinary shares (74% of the capital stock) were owned by Sofora.

During 2003, a Shareholders' Agreement between W de Argentina - Inversiones S.L., Telecom Italia S.p.A. and Telecom Italia International N.V. for the joint management of Sofora, Nortel and Telecom Argentina, including Personal, was executed. On August 5, 2010, such Shareholders' Agreement was modified as a consequence of the TI-W Commitment assumed by the shareholders of Sofora before the Argentine Antitrust Commission (or the CNDC), that introduced, on October 13, 2010 and on March 9, 2011, new modifications. Additional information on this New Shareholders' Agreement can be reviewed at [www.cnv.gov.ar](http://www.cnv.gov.ar) (section Autopista de Información Financiera).

Table of Contents

During the first quarter of 2011, the Telecom Italia Group entered into two share purchase agreements which consist of the following:

1) In January 2011, Telecom Italia International N.V. (a company of the Telecom Italia Group) finalized the purchase of the 8% of Nortel's total Class B Preferred Shares (without voting rights).

2) In March 2011, W de Argentina - Inversiones S.L. agreed to sell common shares of Sofora representing 10% of Sofora's share capital, to Telecom Italia International NV. Consequently, as of December 31, 2011, 68% of Sofora's shares are owned by the Telecom Italia Group and 32% by W de Argentina - Inversiones S.L.

As a result of these transactions plus subsequent purchases of the Company's shares in the public market, the economic interest of Telecom Italia Group in Telecom Argentina increased from 16.2% to 22.7%.

The transaction abovementioned in 2) does not alter or modify (i) the governance rights of the Telecom Group set forth in the shareholders agreement between the Telecom Italia Group and W de Argentina - Inversiones S.L., nor (ii) the commitments assumed by the Telecom Italia Group before the Argentine antitrust authorities (see b) below). However, the Telecom Italia Group and W de Argentina - Inversiones S.L. made presentations to the CNDC and the SC in connection with this transaction.

**(b) Changes in the equity stocks of the indirect shareholders of Telecom Italia**

On October 25, 2007, a consortium made up of Assicurazioni Generali S.p.A., Intesa Sanpaolo S.p.A., Mediobanca S.p.A., Sintonia S.A. (Benetton) and Telefónica, S.A. (of Spain) bought Olimpia S.p.A.'s entire stock through the Italian company Telco S.p.A., which held approximately 23.6% of Telecom Italia S.p.A.'s voting shares (the Telco Transaction). It must be mentioned that on December 22, 2009, Sintonia S.A. (Benetton) retired from the referred consortium and its participation was assumed by the remaining shareholders of Telco S.p.A. on a pro rata basis. In accordance with the last public statement available as of September 30, 2011, such participation is currently 22.4% of Telecom Italia S.p.A.'s voting shares. After the Telco Transaction, since October 2007, Pirelli & C. S.p.A., its controlled subsidiaries and its related parties have ceased to be related parties of Telecom Argentina and its subsidiaries.

The Telco Transaction has generated different opinions with respect to its impact on Argentina's telecommunications market in light of the Law for Defense of the Competition (Ley de Defensa de la Competencia or LDC) and the existing regulatory framework.

Consequently, the Telco Transaction required the intervention of various administrative bodies whose decisions have been subject to various presentations and complaints before administrative and judicial courts.

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

On August 5, 2010, Telecom Italia S.p.A., Telecom Italia International N.V. and W de Argentina- Inversiones S.L. reached a settlement agreement pursuant to which they agreed, among others, to end all their differences relating to their direct shareholding of Sofora and indirect shareholding of Telecom Argentina and other companies of the Telecom Group, which had been originated as a result of the Telco Transaction having been entered into in Europe and other controversial issues. Pursuant to the above referred settlement agreement, the parties agreed to:

a) Put an end to all the legal proceedings existing among the parties;

b) Amend the 2003 Sofora's Shareholders Agreement, including, among others, certain measures to guarantee a more efficient corporate governance of the Telecom Group. For such purposes a Telecom Argentina and Personal's Regulatory Compliance Committee was created and it will exercise its functions for as long as Telefónica, S.A. (of Spain) owns any subsidiaries in our country and maintains any direct or indirect participation in the Telecom Italia Group and hold similar rights to those provided in the Telco Transaction;

c) Subject to the applicable authorizations, the transfer of 8% of the capital stock of Sofora from W de Argentina Inversiones S.L. to Telecom Italia International N.V., increasing Telecom Italia Group's participation to 58% of the capital stock of Sofora (the latter hereinafter referred to as the TI-W Transaction ).

On October 6, 2010, Telefónica, S.A. (of Spain), Assicurazioni Generali S.p.A., Intesa Sanpaolo S.p.A., Mediobanca S.p.A. Telco S.p.A. and as parties involved, Telecom Italia S.p.A., Telecom Italia International N.V., Sofora, Nortel, Telecom Argentina, Personal, Telefónica de Argentina S.A. and Telefónica Móviles de Argentina S.A., submitted before the CNDC a document pursuant to which they assumed a commitment (hereinafter, the Telco Commitment ) for the purpose of ensuring the separation and independence of the activities in the Argentina telecommunications market, of Telefónica, S.A. (of Spain) and its controlled subsidiaries, on one hand, and Telecom Italia S.p.A., Telecom Italia International N.V., Sofora, Telecom Argentina and Personal, on the other, preserving and encouraging the competition conditions of such companies in the national market.

Table of Contents

In addition, in connection with the file relating to the TI-W Transaction, Sofora's shareholders submitted before the CNDC a commitment pursuant to which they assumed a number of obligations with respect to the administration and governance of the Telecom Group (hereinafter, the TI-W Commitment).

On October 12, 2010, the CNDC issued its Opinions No. 835 and 836 in connection with the Telco Transaction and the TI-W Transaction, respectively, which are available to the public at [www.mecon.gov.ar/cndc](http://www.mecon.gov.ar/cndc). In its first Opinion, the CNDC advised among others- the Secretariat of Economic Policy of the Ministry of Economy and Public Finances (hereinafter, the Secretariat of Economic Policy) to accept the Telco Commitment with the clarifications and specifications made in Title XIV of such CNDC Opinion No. 835, and subject the approval of the Telco Transaction, pursuant to Section 13, paragraph b) of the LDC, to the irrevocable and effective fulfilling of the Telco Commitment, with the clarifications and points made in Title XIV of the CNDC Opinion No. 835. In addition, the CNDC made some pro competition recommendations to the SC and to the CNC, which are included like Annex I to such Opinion.

The terms and conditions of the Telco Commitment offered by the above mentioned companies are detailed in Title XIV of the above mentioned Opinion, together with the clarifications and specifications made by the CNDC.

Through its Opinion No. 836, the CNDC advised among others- to accept the TI-W Commitment, with the clarifications and specifications made in Title V.2 of the same Opinion and to authorize the TI-W Transaction, in the terms of Section 13 paragraph b) of the LDC. The terms and conditions of the TI-W Commitment are described in Title V of Opinion No. 836, together with the observations made by the CNDC.

On October 13, 2010, the Secretariat of Economic Policy issued its Resolution No. 148/10 which, in its operative part, among other issues, decided to subordinate the authorization of the Telco Transaction to the irrevocable and effective fulfillment of the Telco Commitment offered with the clarifications and specifications made in Title XIV of Opinion CNDC No. 835. On the same date, the Secretariat of Economic Policy issued its Resolution No. 149/10, in which it accepted the TI-W Commitment and approved the TI-W Transaction in the terms of Section 13 paragraph b) of the LDC.

On the same date, the SC issued its Resolution No. 136/10 which, among other issues, in its operating part authorizes the change of control that happened at Telecom Argentina and Personal as a consequence of the TI-W Transaction. On the same resolution, the legal figure of the Operator included in the List of Conditions, Decree No. 62/90 as amended, was left without effect with respect to Telecom Argentina.

On October 13, 2010, the transfer of 8% of the shares of Sofora in favor of Telecom Italia International N.V. was perfected. Based on information provided by Sofora's shareholders, such 8% transfer's consideration was (i) US\$ 1 (one US dollar w/o cents) and (ii) the execution of certain agreements dated as of August 5, 2010, between the Telecom Italia Group and the Wertheim Group. Thus, the Telecom Italia Group has now reached a participation of 58% of the possible shares and votes in Sofora and W de Argentina Inversiones S.L. holds the remaining 42% of such possible shares and votes.

On October 26, 2010, Telecom Argentina's Board of Directors ratified the execution by Telecom Argentina of the Telco Commitment, accepted all the obligations and commitments that Telecom Argentina has assumed in the Telco Commitment, with the clarifications and specifications relating to them, made by the CNDC in Chapter XIV of its Opinion No. 835 dated October 12, 2010, and adopted a number of measures for its effective implementation; including the creation of a Regulatory Compliance Committee. In addition, it accepted Telecom Argentina's

## Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

obligations arising from the TI-W Commitment submitted to the CNDC, in the file referring to the TI-W Transaction, with the clarifications and specifications that are referred to them, made by the CNDC in Paragraph V.2 of its Opinion No. 836 dated October 12, 2010, and adopted a series of measures for their effective implementation.

The Telco Commitment and the TI-W Commitment are available to the public at [www.telecom.com.ar/compromisos](http://www.telecom.com.ar/compromisos).

Telecom Argentina and Personal have filed, in accordance with the applicable regulations referred to the disclosure of Relevant Facts, various notes and reports on the questions described in this section, which are available to the public at [www.cnv.gob.ar](http://www.cnv.gob.ar) (financial information section) for further review of the above.

### **(c) Balances and transactions with related parties**

Related parties (as described in IAS 24) are those legal entities or individuals which are related to the entity that is preparing its financial statements. Related party transactions and balances are disclosed in an entity's financial statements. The transactions between the companies controlled by Telecom Argentina (Telecom USA, Micro Sistemas, Personal, Núcleo and Springville) are eliminated in the preparation of the consolidated financial statements of the Group.

Edgar Filing: TELECOM ARGENTINA SA - Form 20-F

Table of Contents

Under IAS 24, Telefónica, S.A. (of Spain) and its controlled companies, including Telefónica and Telefónica Móviles de Argentina S.A. are not considered related parties. As of the date of issuance of these consolidated financial statements, such situation has been confirmed by the commitments assumed before the CNDC to ensure the separation and independence between the Telecom Italia Group and the Telecom Group, on one hand, and Telefónica S.A. (of Spain) and its controlled companies, on the other, with respect to their activities in the Argentine telecommunications market, such as it has been corroborated by the applicable authorities, as explained in paragraph b) above.

The Company has transactions in the normal course of business with certain related parties. For the years presented, the Company has not conducted any transactions with executive officers and/or persons related to them.

The following is a summary of the balances and transactions with related parties as of December 31, 2011 and 2010 and for the years ended December 31, 2011, 2010 and 2009, respectively:

(a) Such companies relate to W de Argentina - Inversiones S.L.

(b) Such companies relate to Telecom Italia Group.

(c) Since June 2010, Telecom Italia Sparkle S.p.A. has assigned to Latin American Nautilus Ltd. all existing agreements with Telecom Argentina.

(d) This company ceased to be related party from January 2009 to September 2010.

(e) This entity is no longer related party as from January 2011.

The transactions discussed above were made on terms no less favorable to the Company than would have been obtained from unaffiliated third parties. The Board of Directors approved transactions representing more than 1% of the total shareholders' equity of the Company, after being approved by the Audit Committee in compliance with Decree No. 677/01.

**(d) Núcleo s voluntary capital reduction and reimbursement**

On June 5, 2009, Núcleo s General Extraordinary Shareholders' Meeting approved the voluntary capital reduction in an amount of \$21, which was reimbursed to the shareholders in October 2009. This reduction resulted in a gain of \$13 included in the item line "Other income from investments" corresponding to the realization of the foreign currency translation adjustments originally included in the item line "Currency

translation adjustments in Other comprehensive income.

**(e) Key Managers**

Compensation for the Key Managers, including social security contribution, amounted to \$54, \$47 and \$33 for the years ended December 31, 2011, 2010 and 2009, respectively, and were recorded as expenses under the item line Employee benefits expenses and severance payments. The total expense remuneration is comprised as follows:

	Years ended December 31,		
	2011	2010	2009
Salaries (*)	19	15	14
Variable compensation (*)	22	20	11
Social security contributions	11	9	6
Termination benefits	2	3	2
	<b>54</b>	<b>47</b>	<b>33</b>

(\*) Gross compensation. Social security and income tax retentions are in charge of the employee.

As of December 31, 2011, 2010 and 2009, respectively, an amount of \$28, \$21 and \$13 remained unpaid.

**Note 28 Segment information**

The Company conducts its business through six legal entities each one has been identified as an operating segment.

The Company has combined the operating segments into three reportable segments: Fixed services, Personal Mobile Services and Núcleo Mobile Services based on the nature of products provided by the entities and taking into account the regulatory and economic framework in which each entity operates.

Segment financial information for the years 2011, 2010 and 2009 was as follows:

Table of Contents

Table of Contents**Note 29 Restrictions on distribution of profits and dividends****(a) Restrictions on distribution of profits**

The Company is subject to certain restrictions on the distribution of profits. Under the Argentine Corporations Law, the by-laws of the Company and rules and regulations of the CNV, a minimum of 5% of net income for the year in accordance with the statutory books, plus/less previous years adjustments and accumulated losses, if any, must be appropriated by resolution of the shareholders to a legal reserve until such reserve reaches 20% of the outstanding capital (common stock plus inflation adjustment of common stock). When a company uses the legal reserve to absorb accumulated losses, it will not be able to distribute dividends until it restores the legal reserve.

Telecom Argentina's Annual General and Extraordinary Shareholders Meeting held on April 28, 2010, approved the restoring of the legal reserve that has been absorbed in the financial year 2006.

In December 2009, the CNV through its Resolution No. 562/09 approved RT 26 Adoption of International Financial Reporting Standards of the FACPCE, which will be fully effective for companies making public offering of securities (such as the Company) as from January 1, 2012, while early adoption is permitted for financial years beginning January 1, 2011. Consequently, until IFRS are adopted by the Company, for legal purposes the distributable profits must be determined under Argentine GAAP. In accordance with the Argentine Corporate Law and CNV Resolutions, the distributions must be realized in a separate basis though the consolidated financial statements are to be included as supplementary information.

**(b) Dividends**

The Company is able to distribute dividends up to the limit of retained earnings determined under the Argentine Corporate Law, as abovementioned in a).

	2011	2010	2009
Dividends declared and paid by Telecom Argentina during the year (\$0.93 and \$1.07 peso per share, respectively)	915	1,053	
Proposed for approval at the Annual General Meeting (not recognized as a liability as at December 31)		915	1,053
