Item 8.01 Other Events.

As previously reported, two of the four taconite production lines at the plant of Northshore Mining Company (Northshore) in Silver Bay have been idled since January 5, 2013.

Cliffs Natural Resources Inc. (Cliffs), Northshore s parent company, announced Friday, October 25, 2013 that it will reopen those two production lines at the plant in Silver Bay because of new customer contracts and the expected customer volume increase in 2014 related thereto. Cliffs did not, however, disclose a date for when production on the two lines will resume.

The Trustees have no information regarding the planned reopening of the two production lines of Northshore other than that announced publicly by Cliffs on October 25, 2013. The Trustees have not been informed by Cliffs of, and are not able to predict, exactly when these production lines will resume operation or how the resumption of these production lines will affect, if any, the total production and shipment of iron ore pellets by Northshore at its Silver Bay facilities.
