Appendix A

USE OF NON-GAAP FINANCIAL MEASURES

Sally Beauty Holdings, Inc. (the Company) occasionally utilizes financial measures and terms not calculated in accordance with generally accepted accounting principles in the United States (GAAP) in order to provide investors with an alternative method for assessing our operating results in a manner that enables investors to more thoroughly evaluate our current performance as compared to past performance. We also believe these non-GAAP measures provide investors with a more informed baseline for modeling the Company's future financial performance. Our management uses these non-GAAP measures for the same purpose. We believe that our investors should have access to, and that we are obligated to provide, the same set of tools that we use in analyzing our results. These non-GAAP measures should be considered in addition to results prepared in accordance with GAAP, but should not be considered a substitute for or superior to GAAP results. We have provided definitions below for certain non-GAAP financial measures, together with an explanation of why management uses these measures and why management believes that these non-GAAP financial measures are useful to investors. In addition, in our Earnings Release we have provided tables to reconcile the non-GAAP financial measures utilized to GAAP financial measures. We have provided adjusted net earnings and adjusted EPS metrics for the purpose of adjusting for (i) a 2012 charge related to a potential settlement of litigation, and (ii) losses on extinguishment of debt, interest expense on redeemed debt and unamortized deferred financing costs which we expensed related to the redemption and repayment of certain debt. Excluding these adjustments provides investors with a better depiction of the Company's core operating results and provides a more informed baseline for modeling future earnings expectations. We also intend to adjust for all share-based compensation expense recognized in accordance with FAS 123R, including stock option expense and expense related to restricted shares, in addition to the foregoing adjustments, when calculating certain cash flow measures such as Adjusted EBITDA. The Company believes adjusting for all share-based compensation expense is appropriate, as it is a non-cash expense, and adjusting is consistent with how a number of debt and equity analysts track that measure.

ADJUSTED EBITDA

We define the measure Adjusted EBITDA as GAAP Net Earnings before depreciation and amortization, share-based compensation, interest expense, and income taxes. We have also adjusted Adjusted EBITDA to exclude (i) a 2012 charge related to a potential settlement of litigation, and (ii) losses on extinguishment of debt, interest expense on redeemed debt and unamortized deferred financing costs which we expensed related to the redemption and repayment of certain debt. Our management uses Adjusted EBITDA as a supplemental measure in the evaluation of our businesses and believes that Adjusted EBITDA provides a meaningful

measure of our ability to meet our future debt service, capital expenditures and working capital requirements. Adjusted EBITDA is not a financial measure under GAAP. Accordingly, it should not be considered in isolation or as a substitute for net income, operating income, cash flow provided by (used in) operating activities or other income or cash flow data prepared in accordance with GAAP. When evaluating Adjusted EBITDA, investors should consider, among other factors, (i) increasing or decreasing trends in Adjusted EBITDA, (ii) whether Adjusted EBITDA has remained at positive levels historically, and (iii) how Adjusted EBITDA compares to levels of interest expense. We provide a reconciliation of Adjusted EBITDA to GAAP Net Earnings. Because Adjusted EBITDA excludes some, but not all, items that affect net earnings and may vary among companies, the Adjusted EBITDA presented by the Company may not be comparable to similarly titled measures of other companies. Although we believe that Adjusted EBITDA may provide additional information with respect to our ability to meet our future debt service, capital expenditures and working capital requirements, our functional or legal requirements may require us to utilize available funds for other purposes.

ADJUSTED NET EARNINGS

This measure consists of GAAP Net Earnings, which is then adjusted for (i) a 2012 charge related to a potential settlement of litigation, and (ii) losses on extinguishment of debt, interest expense on redeemed debt and unamortized deferred financing costs which we expensed related to the redemption and repayment of certain debt. Excluding these adjustments provides investors with a better depiction of the Company's core operating results and provides a more informed baseline for modeling future earnings expectations. Adjusted Net Earnings does not provide a complete position of our results of operations, as the historical items excluded in the related reconciliation are included in net earnings presented under GAAP. We recommend a review of net earnings on both a non-GAAP basis and GAAP basis be performed to get a comprehensive view of our results. We provide a reconciliation of Adjusted Net Earnings to GAAP Net Earnings.

ADJUSTED EARNINGS PER SHARE (ADJUSTED EPS)

We define this non-GAAP financial measure as the portion of the Company's GAAP Net Earnings assigned to each share of stock, excluding (i) a 2012 charge related to a potential settlement of litigation, and (ii) losses on extinguishment of debt, interest expense on redeemed debt and unamortized deferred financing costs which we expensed related to the redemption and repayment of certain debt. Excluding these adjustments provides investors with a better depiction of the Company's core operating results and provides a more informed baseline for modeling future earnings expectations. We recommend a review of diluted EPS on both a non-GAAP basis and GAAP basis be performed to get a comprehensive view of our results. We provide a reconciliation of Adjusted Net Earnings to GAAP Net Earnings, as well as information on how these share calculations are made.
