UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549
FORM 10-K

Annual Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the Fiscal Year Ended December 31, 2015

Or

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the transition period from _____ to _____

Commission file number 0-10592

TRUSTCO BANK CORP NY
(Exact name of registrant as specified in its charter)

NEW YORK 14-1630287
(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

5 SARNOWSKI DRIVE, GLENVILLE, NEW YORK 12302
(Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code: (518) 377-3311

Securities registered pursuant to Section 12(b) of the Act:

<u>Title of each class</u>	<u>Name of exchange on which registered</u>
Common Stock, \$1.00 Par Value	The NASDAQ Global Select Market

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes. No.

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.
Yes. No.

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes. No.

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if

Edgar Filing: TRUSTCO BANK CORP N Y - Form 10-K

any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for shorter period that the registrant was required to submit and post such files). Yes. No.

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer Accelerated Filer Non-Accelerated Filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes. No.

The aggregate market value of the common stock held by non-affiliates as of June 30, 2015 was approximately \$641,249,401 (based upon the closing price of \$7.03 on June 30, 2015, as reported on the NASDAQ Global Select Market).

The number of shares outstanding of the registrant's common stock as of March 1, 2016 was 95,368,575.

Documents Incorporated by Reference: Portions of registrant's Proxy Statement filed for its 2016 Annual Meeting of Shareholders to be filed within 120 days of the registrant's fiscal year end.

USE OF NON-GAAP FINANCIAL MEASURES

The Securities and Exchange Commission (“SEC”) has adopted certain rules with respect to the use of “non-GAAP financial measures” by companies with a class of securities registered under the Securities Exchange Act of 1934, such as TrustCo. GAAP is generally accepted accounting principles in the United States of America. Under the SEC rules, companies making disclosures containing non-GAAP financial measures must also disclose, along with each non-GAAP financial measure, certain additional information, including a reconciliation of the non-GAAP financial measure to the closest comparable GAAP financial measure and a statement of the company’s reasons for utilizing the non-GAAP financial measure as part of its financial disclosures.

A discussion of certain non-GAAP financial measures, including taxable equivalent net interest income and net interest margin, tangible book value per share and efficiency ratio, used in this report and in the Annual Report to Shareholders included as Exhibit 13 to this Form 10-K, as well as a reconciliation of these measure to the closest comparable GAAP financial measures, is set forth in the Annual Report to Shareholders included as Exhibit 13 to this Form 10-K and is incorporated herein by reference.

PART I

Item 1. Business

General

TrustCo Bank Corp NY (“TrustCo” or the “Company”) is a savings and loan holding company having its principal place of business at 5 Sarnowski Drive, Glenville, New York 12302. TrustCo was incorporated under the laws of New York in 1981 to be the parent holding company of The Schenectady Trust Company, which subsequently was renamed to Trustco Bank New York and, later, to Trustco Bank, National Association. The Company’s principal subsidiary, Trustco Bank (also referred to as the “Bank”), is the successor by merger to Trustco Bank, National Association.

Through policy and practice, TrustCo continues to emphasize that it is an equal opportunity employer. There were 787 full-time equivalent employees of TrustCo at year-end 2015. TrustCo had 12,463 shareholders of record as of December 31, 2015 and the closing price of the TrustCo common stock on that date was \$6.14.

Subsidiaries

Trustco Bank

Trustco Bank is a federal savings bank engaged in providing general banking services to individuals, partnerships, and corporations. At year end 2015, the Bank operated 156 automatic teller machines and 146 banking offices in Albany, Columbia, Dutchess, Greene, Montgomery, Orange, Rensselaer, Rockland, Saratoga, Schenectady, Schoharie, Ulster, Warren, Washington and Westchester counties of New York, Brevard, Charlotte, Hillsborough, Lake, Manatee, Martin, Orange, Osceola, Palm Beach, Polk, Sarasota, Seminole, and Volusia counties in Florida, Bennington County in Vermont, Berkshire County in Massachusetts and Bergen County in New Jersey. The largest part of such business consists of accepting deposits and making loans and investments. The Bank provides a wide range of both personal and business banking services. The Bank is supervised and regulated by the federal Office of the Comptroller of the Currency (“OCC”) and is a member of the Federal Reserve System. Its deposits are insured by the Federal Deposit Insurance Corporation (“FDIC”) to the extent permitted by law. The Bank’s subsidiary, Trustco Realty Corp., is a real estate investment trust (or “REIT”) that was formed to acquire, hold and manage real estate mortgage assets, including residential mortgage loans and mortgage backed securities. The income earned on these assets, net of expenses, is distributed in the form of dividends. Under current New York State tax law, 60% of the dividends received by the Bank from Trustco Realty Corp. are excluded from total taxable income for New York State income tax purposes. The Bank accounted for substantially all of TrustCo’s 2015 consolidated net income and average assets. The Bank’s other

active subsidiaries, Trustco Insurance Agency, Inc. and ORE Property, Inc., did not engage in any significant business activities during 2015 and 2014. On July 21, 2015 Trustco Bank, entered into a formal agreement with the OCC. The agreement relates to the findings of the OCC following an examination of the Bank; additional information regarding the agreement is contained in TrustCo's Annual Report to Shareholders for the year ended December 31, 2015, which is filed as Exhibit 13 hereto and incorporated herein by reference, under the caption Management's Discussion and Analysis of Financial Condition and Results of Operations, and in the accompanying consolidated financial statements and the notes thereto.

Index

Trustco Financial Services, the name under which Trustco Bank's trust department operates, serves as executor of estates and trustee of personal trusts, provides asset and wealth management services, provides estate planning and related advice, provides custodial services, and acts as trustee for various types of employee benefit plans and corporate pension and profit sharing trusts. The aggregate market value of the assets under trust, custody, or management of the trust department of the Bank was approximately \$842 million as of December 31, 2015.

The daily operations of the Bank remain the responsibility of its officers, subject to the oversight of its Board of Directors and overall supervision by TrustCo. The activities of the Bank are included in TrustCo's consolidated financial statements.

ORE Subsidiary Corp.

In 1993, TrustCo created ORE Subsidiary Corp., a New York corporation, to hold and manage certain foreclosed properties acquired by the Bank. The accounts of this subsidiary are included in TrustCo's consolidated financial statements.

Competition

TrustCo faces strong competition in its market areas, both in attracting deposits and making loans. The Company's most direct competition for deposits, historically, has come from commercial banks, savings associations, and credit unions that are located or have branches in the Bank's market areas. The competition ranges from other locally based commercial banks, savings banks and credit unions to branch offices of the largest financial institutions in the United States. In its principal market areas, the Capital District area of New York State and Central Florida, TrustCo's principal competitors are local branch operations of super-regional banks, branch offices of money center banks, and locally based commercial banks and savings institutions. The Bank is the largest depository institution headquartered in the Capital District area of New York State. The Company also faces competition for deposits from national brokerage houses, short-term money market funds, and other corporate and government securities mutual funds.

Factors affecting the acquisition of deposits include pricing, office locations and hours of operation, the variety of deposit accounts offered, and the quality of customer service provided. While loan demand has moderated, competition for loans has remained strong over the last several years. Commercial banks, savings institutions, traditional mortgage brokers affiliated with local offices and nationally franchised real estate brokers are all active and aggressive competitors. The Company competes in this environment by providing a full range of financial services based on a tradition of financial strength and integrity dating from its inception. The Company competes for loans principally through the interest rates and loan fees it charges and the efficiency and quality of services it provides to borrowers.

Supervision and Regulation

Banking is a highly regulated industry, with numerous federal and state laws and regulations governing the organization and operation of banks and their affiliates. As a savings and loan holding company, TrustCo and its non-bank subsidiaries are supervised and regulated by the Board of Governors of the Federal Reserve System ("Federal Reserve Board"). The OCC is the Bank's primary federal regulator and supervises and examines the Bank. Under the Home Owners' Loan Act of 1934, Trustco Bank must obtain prior OCC approval for acquisitions, and its business operations and activities are restricted. Because the FDIC provides deposit insurance to the Bank, the Bank is also subject to its supervision and regulation even though the FDIC is not the Bank's primary federal regulator.

The following summary of laws and regulations applicable to the Company and the Bank is not intended to be a complete description of those laws and regulations or their effects on the Company and the Bank, and it is qualified in its entirety by reference to the particular statutory and regulatory provisions described.

Index

Dodd-Frank Wall Street Reform and Consumer Protection Act

On July 21, 2010, the president signed the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”) into law. The Dodd-Frank Act has created, and will likely continue to create, dramatic changes across the financial regulatory system. Implementation of the Dodd-Frank Act required many new rules to be made by various federal regulatory agencies, including TrustCo’s and the Bank’s regulatory agencies, and the effect of many of the Dodd-Frank Act’s provisions has been, and will continue to be, determined through the rulemaking process. We cannot predict the ultimate effect of the Dodd-Frank Act on TrustCo or Trustco Bank at this time, including the extent to which the act could increase costs, limit our ability to efficiently pursue business opportunities or otherwise adversely affect our business, financial condition or results of operations. At a minimum, we expect that the Dodd-Frank Act will increase our operating and compliance costs.

The Dodd-Frank Act included provisions that, among other effects, created a new agency, the Consumer Financial Protection Bureau (the “CFPB”), to centralize responsibility for consumer financial protection and be responsible for implementing, examining and enforcing compliance with major federal consumer financial laws, imposed new consumer protection requirements in mortgage loan transactions and increased the maximum amount of deposit insurance for banks, savings institutions and credit unions to \$250,000 per depositor.

Dividends

Most of TrustCo's revenues consist of cash dividends paid to TrustCo by the Bank, payment of which is subject to various regulatory limitations. The payment of dividends by the Bank to TrustCo is subject to continued compliance with minimum regulatory capital requirements, the Bank’s compliance with the capital plan required under the terms of the Bank’s July 21, 2015 formal agreement with the OCC, and the receipt of regulatory approval (or non-objection) from the Bank’s and the Company’s regulators. Under the agreement with the OCC, the Bank may declare or pay a dividend or make a capital distribution only (a) when the Bank is in compliance with its approved written capital plan, and would remain in compliance with such Capital Plan immediately following the declaration or payment of any dividend or capital distribution and (b) following OCC approval under OCC capital distribution rules.

OCC regulations impose limitations upon all capital distributions by Trustco Bank, including cash dividends, payments to repurchase its shares and payments to stockholders of another institution in a cash-out merger. Under the regulations, an application to and the prior approval of the OCC is required prior to any capital distribution if the institution does not meet the criteria for “expedited treatment” of applications under OCC regulations (generally, examination ratings in the two top categories), the total capital distributions for the calendar year exceed net income for that year plus the amount of retained net income for the preceding two years, the institution would be undercapitalized following the distribution or the distribution would otherwise be contrary to a statute, regulation or agreement with the OCC. If an application is not required, the institution must still provide prior notice to the OCC and the Federal Reserve Board of the capital distribution if, like the Bank, it is a subsidiary of a holding company. The OCC may disapprove a dividend if the Bank would be undercapitalized following the distribution, the proposed capital distribution raises safety and soundness concerns, or the capital distribution would violate a prohibition contained in any statute, regulation or agreement between the bank and a regulator or a condition imposed in a previously approved application or notice.

Further, a savings institution, such as the Bank, that is a subsidiary of a savings and loan holding company and that proposes to make a capital distribution must also submit written notice to the Federal Reserve Board prior to such distribution, and Federal Reserve Board may object to the distribution based on safety and soundness or other concerns. The Federal Reserve Board has stated that it expects to issue regulations implementing review standards for dividend notices and that the applicable regulation will provide that a dividend notice may be denied by the Federal Reserve Board if following the dividend, the savings association will be less than adequately capitalized, the proposed dividend raises safety or soundness concerns or the proposed dividend violates a prohibition contained in any statute,

regulation, enforcement action or agreement between the thrift or holding company and an appropriate federal banking agency, a condition imposed on the savings association or holding company in an application or notice approved by an appropriate federal banking agency or any formal or informal enforcement action involving the savings association or holding company.

Compliance with regulatory standards regarding capital distributions could also limit the amount of dividends that TrustCo may pay to its shareholders.

Index

See Note 14 to the consolidated financial statements contained in TrustCo's Annual Report to Shareholders for the year ended December 31, 2015 for information concerning the Bank's regulatory capital requirements.

Regulatory Capital Requirements and Prompt Corrective Action.

New Regulatory Capital Rules. The Company and the Bank are subject to regulatory capital requirements. In July 2013, the Federal Reserve Board, FDIC and OCC published final rules establishing a new comprehensive capital framework for all U.S. banking organizations that are designed to implement the "Basel III" regulatory capital reforms and changes required by the Dodd-Frank Act. The new rules were effective for the Company and the Bank on January 1, 2015, with full compliance with all of the final rule's requirements being phased in over a multi-year schedule. The Company has not previously been subject to consolidated regulatory capital requirements.

The new capital rules, among other things, introduce a new capital measure, "Common Equity Tier 1" ("CET1"). CET1 capital is generally defined as common stock instruments that meet the eligibility criteria in the final capital rule (generally, instruments representing the most subordinated claim upon liquidation, having no maturity date and being redeemable via discretionary purchases only with regulatory approval, not being subject to any expectations that the stock will be repurchased, redeemed or cancelled and not being secured by the banking organization or any related entity), retained earnings, accumulated other comprehensive income and common equity Tier 1 minority interests, subject to certain limitations. Tier 1 capital for the Company and the Bank consists of common stock, plus related surplus and retained earnings. The new capital rules also increased the Tier 1 capital ratio requirement, changed the total assets utilized in the Tier 1 leverage ratio calculation from total assets at quarter end to average total assets during the quarter, changed the risk-weightings of certain assets for purposes of risk-based capital ratios, created an additional capital conservation buffer over the required capital ratios, and changed what qualifies as capital for purposes of meeting the various capital requirements.

Under the new capital rules, the minimum capital ratios as of January 1, 2015 are:

4.5% CET1 to risk-weighted assets;

6.0% Tier 1 capital to risk-weighted assets;

8.0% Total capital to risk-weighted assets; and

4% Tier 1 capital to average consolidated assets as reported on consolidated financial statements (the "leverage ratio").

At December 31, 2015, the Bank had a Tier 1 leverage ratio (Tier 1 capital to total average assets) of 8.6%, CET1 capital ratio (CET1 capital to risk-weighted assets) of 17.2%, a Tier 1 capital ratio (Tier 1 capital to risk-weighted assets) of 17.2%, and a total capital ratio (total capital to risk-weighted assets) of 18.5%. Also at December 31, 2015, the Company had a Tier 1 leverage ratio (Tier 1 capital to total average assets) of 8.9%, CET1 capital ratio (CET1 capital to risk-weighted assets) of 17.7%, a Tier 1 capital ratio (Tier 1 capital to risk-weighted assets) of 17.7%, and a total capital ratio (total capital to risk-weighted assets) of 19.0%.

The new capital rules will require the Company and the Bank to meet a capital conservation buffer requirement in order to avoid constraints on dividends, equity repurchases and certain compensation. To meet the requirement when it is fully phased in, the organization must maintain an amount of CET1 capital that exceeds the buffer level of 2.5% above each of the minimum risk-weighted asset ratios. The requirement will be phased in over a four year period, starting January 1, 2016, when the amount of such capital must exceed the buffer level of 0.625%. The buffer level will increase by 0.625% each year until it reaches 2.5% on January 1, 2019. When the capital conservation buffer requirement is fully phased in, to avoid constraints, a banking organization must maintain the following capital ratios: (i) CET1 to risk-weighted assets more than 7.0%, (ii) Tier 1 capital to risk-weighted assets more than 8.5%, and (iii)

total capital (Tier 1 plus Tier 2) to risk-weighted assets more than 10.5%.

The OCC has the ability to establish an individual minimum capital requirement for a particular institution, which varies from the capital levels that would otherwise be required under the capital regulations, based on such factors as concentrations of credit risk, levels of interest rate risk, and the risks of non-traditional activities as well as others. The OCC has not imposed any such requirement on the Bank.

Index

The new capital rules require a number of changes to regulatory capital deductions and adjustments, subject to a transition period. Among other changes, the new capital rules provide for a one-time, permanent opt-out from the treatment under the new rules of certain items of accumulated other comprehensive income. The new rules generally require the recognition in regulatory capital calculations of unrealized gains and losses. If an institution elects to opt-out, then the institution may continue treating AOCI items in a manner consistent with the prior regulatory capital rules. The Company has made this opt-out election. The new capital rules modify the calculation of risk-weighted assets, although they generally continue the treatment of residential mortgages under the prior rules. Under the rules, a bank may assign a 50% risk weight to a first-lien residential mortgage exposure that:

Is secured by property that is owner-occupied or rented,

Is made in accordance with "prudent underwriting standards,"

Is not 90 days or more past due or in nonaccrual status, and

Is not restructured or modified.

Other first-lien residential exposures, as well as junior-lien exposures, are assigned a 100% risk weight.

The exposure amount for on-balance sheet assets is generally the carrying value of the exposure as determined under GAAP. If a banking organization has elected to opt out of the accumulated other comprehensive income provisions discussed above, the exposure amount for available for sale or held-to-maturity debt securities is the carrying value (including accrued but unpaid interest and fees) of the exposure, less any net unrealized gains plus any unrealized losses. Further, the new rules retain the prior risk-weighting rules for exposures to debt directly and unconditionally guaranteed by U.S. federal government and its agencies. Such exposures receive a 0% risk weight. Exposures conditionally guaranteed by the federal government, Federal Reserve Board or a federal government agency would receive a 20% risk weight. Further, the capital rules assign a 20% risk weight to non-equity exposures to government-sponsored entities ("GSEs") and a 100% risk weight to preferred stock issued by a GSE. The new rules define a GSE as an entity established or chartered by the federal government to serve public purposes but whose debt obligations are not "explicitly guaranteed" by the full faith and credit of the federal government. Banking organizations must assign a 20% risk weight to general obligations of a public sector entity (for example, a state, local authority or other governmental subdivision below the sovereign level) that is organized under U.S. law and a 50% risk weight for a revenue obligation of such an entity.

Prompt Corrective Action. Federal banking regulations also establish a "prompt corrective action" capital framework for the classification of insured depository institutions, such as Trustco Bank, into five categories: well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized, and critically undercapitalized. The federal banking agencies are required to take certain supervisory actions (and may take additional discretionary actions) with respect to an undercapitalized institution or its holding company. Such actions could have a direct material effect on an institution's or its holding company's financial condition and activities. Under the prompt corrective action rules currently in effect, an institution is deemed to be (a) "well-capitalized" if it has total risk-based capital of 10.0% or more, has a Tier 1 risk-based capital ratio of 8.0% or more, has a CET1 risk based capital ratio of 6.5% or more, and has leverage capital ratio of 5.0% or more and is not subject to any order or final capital directive to meet and maintain a specific capital level for any capital measure; (b) "adequately capitalized" if it has a total risk-based capital ratio of 8.0% or more, a Tier 1 risk-based capital ratio of 6.0% or more, a CET1 risk based capital ratio of 4.5% or more and has a leverage capital ratio of 4.0% or more (3.0% under certain circumstances) and does not meet the definition of well-capitalized; (c) "undercapitalized" if it has a total risk-based capital ratio that is less than 8.0%, a Tier 1 risk-based capital ratio that is less than 6.0%, a CET1 capital ratio less than 4.5% or a Tier 1 leverage capital ratio that is less than 4.0%; (d) "significantly undercapitalized" if it has a total risk-based capital ratio that is less than 6.0%, a Tier 1 risk-based capital ratio that is less than 4.0%, a CET1 capital ratio less than 3% or a Tier 1 leverage capital ratio that is

less than 3.0%; and (e) “critically undercapitalized” if it has a ratio of tangible equity to total assets that is equal to or less than 2.0%. In certain situations, a federal banking agency may reclassify a well-capitalized institution as adequately capitalized and may require an adequately capitalized or undercapitalized institution to comply with supervisory actions as if the institution were in the next lower category.

Index

A depository institution is generally prohibited from making any capital distributions (including payment of a dividend) or paying any management fee to its parent holding company if the depository institution would thereafter be undercapitalized. Undercapitalized institutions also are subject to growth limitations and are required to submit a capital restoration plan to the regulatory agencies. The agencies may not accept such a plan without determining, among other things, that the plan is based on realistic assumptions and is likely to succeed in restoring the depository institution's capital. In addition, for a capital restoration plan to be acceptable, the depository institution's parent holding company must guarantee that the institution will comply with such capital restoration plan. The aggregate liability of the parent holding company is limited to the lesser of (i) an amount equal to 5.0% of the depository institution's total assets at the time it became undercapitalized and (ii) the amount which is necessary (or would have been necessary) to bring the institution into compliance with all capital standards applicable with respect to such institution as of the time it fails to comply with the plan. If a depository institution fails to submit an acceptable plan, it is treated as if it is "significantly undercapitalized."

"Significantly undercapitalized" depository institutions may be subject to a number of requirements and restrictions, including orders to sell sufficient voting stock to become "adequately capitalized," requirements to reduce total assets, and cessation of receipt of deposits from correspondent banks. "Critically undercapitalized" institutions are subject to the appointment of a receiver or conservator.

As of December 31, 2015 and 2014, each of TrustCo and Trustco Bank met all capital adequacy requirements to which it was subject and were considered well-capitalized under OCC and FRB regulations.

Holding Company Activities

The activities of savings and loan holding companies are governed, and limited, by the Home Owners' Loan Act and the Federal Reserve Board's regulations. In general, TrustCo's activities are limited to those permissible for "multiple" savings and loan holding companies (that is, savings and loan holding companies owning more than one savings association subsidiary) as of March 5, 1987, activities permitted for bank holding companies as of November 12, 1999 and activities permissible for "financial holding companies" (which are described below). Activities permitted to multiple savings and loan holding companies include certain real estate investment activities, and other activities permitted to bank holding companies under the Bank Holding Company Act. Activities permissible for a financial holding company are those considered financial in nature (including securities and insurance activities) or those incidental or complementary to financial activities.

A savings and loan holding company is prohibited from, directly or indirectly, acquiring more than 5% of the voting stock of another financial institution or savings and loan holding company without the prior written approval of the Federal Reserve Board. In evaluating applications by holding companies to acquire savings institutions, the Federal Reserve Board considers the financial and managerial resources and future prospects of the company and institution involved, the effect of the acquisition on the risk to the deposit insurance fund, the convenience and needs of the community and competitive factors.

The Federal Reserve may not approve any acquisition that would result in a multiple savings and loan holding company controlling savings institutions in more than one state, subject to two exceptions: (i) the approval of interstate supervisory acquisitions by savings and loan holding companies and (ii) the acquisition of a savings institution in another state if the laws of the state of the target savings institution specifically permit such acquisitions. The states vary in the extent to which they permit interstate savings and loan holding company acquisitions.

Beginning in 2015, TrustCo became subject to formal regulatory capital requirements and is now obligated to hold capital in the same amount and type that is required for insured depository institutions such as the Bank. Please refer to the discussion above under "Regulatory Capital Requirements and Prompt Corrective Action -- New Regulatory Capital Rules."

In addition, the financial impact of a holding company on its subsidiary institution is a matter that is evaluated by the Federal Reserve Board, and the agency has authority to order cessation of activities or divestiture of subsidiaries deemed to pose a threat to the safety and soundness of the institution. The Dodd-Frank Act, moreover, codifies the Federal Reserve's long-standing "source of strength" doctrine and thus requires that bank or thrift holding companies serve as a source of financial strength for their depository institution subsidiaries. The phrase "source of financial strength" is defined in the Dodd-Frank Act as "the ability of a company that directly or indirectly owns or controls an insured depository institution to provide financial assistance to such insured depository institution in the event of the financial distress of the insured depository institution." The federal banking agencies are authorized to adopt regulations with respect to this requirement, although they have not yet done so.

Index

Securities Regulation and Corporate Governance

The Company's common stock is registered with the SEC under Section 12(b) of the Securities Exchange Act of 1934, and the Company is subject to restrictions, reporting requirements and review procedures under federal securities laws and regulations. The Company is also subject to the rules and reporting requirements of The Nasdaq Stock Market LLC, on which its common stock is traded.

Like other issuers of publicly traded securities, the Company must also comply with provisions of the Dodd-Frank Act that require publicly traded companies to give stockholders a non-binding vote on executive compensation and so-called "golden parachute" payments, and the Company will also be subject to the Dodd-Frank Act provisions that authorize the SEC to promulgate rules that would allow stockholders to nominate their own candidates using a company's proxy materials.

Further, the Sarbanes-Oxley Act of 2002 ("Sarbanes-Oxley") implemented legislative reforms intended to address corporate and accounting fraud and contained reforms of various business practices and numerous aspects of corporate governance. For example, Sarbanes-Oxley addresses accounting oversight and corporate governance matters, including the creation of a five-member oversight board appointed by the Securities and Exchange Commission to set and enforce auditing, quality control and independence standards for accountants and have investigative and disciplinary powers; increased responsibilities and codified requirements relating to audit committees of public companies and how they interact with a company's public accounting firm; the prohibition of accounting firms from providing various types of consulting services to public clients and requiring accounting firms to rotate partners among public client assignments every five years; expanded disclosure of corporate operations and internal controls and certification by chief executive officers and chief financial officers to the accuracy of periodic reports filed with the SEC; and prohibitions on public company insiders from trading during retirement plan "blackout" periods, restrictions on loans to company executives and enhanced controls on and reporting of insider trading.

Although the Company has and will continue to incur additional expense in complying with the corporate governance provisions of the Dodd-Frank Act and Sarbanes-Oxley and the resulting regulations, management does not expect that such compliance will have a material impact on the Company's financial condition or results of operations.

Federal Savings Institution Regulation

Business Activities. Federal law and regulations govern the activities of federal savings banks such as the Bank. These laws and regulations delineate the nature and extent of the activities in which federal savings banks may engage. In particular, certain lending authority for federal savings banks, e.g., commercial, non-residential real property loans and consumer loans, is limited to a specified percentage of the institution's capital or assets.

Insurance of Deposit Accounts. Deposits of Trustco Bank are insured by the Deposit Insurance Fund ("DIF") of the FDIC, and the Bank is subject to deposit insurance assessments to maintain the DIF. The FDIC determines insurance premiums based on a number of factors, primarily the risk of loss that insured institutions pose to the DIF. Deposit insurance assessments are based on average consolidated total assets minus average tangible equity. Under the FDIC's risk-based assessment system, insured institutions with less than \$10 billion in assets, such as the Bank, are assigned to one of four risk categories based on supervisory evaluations, regulatory capital level, and certain other factors, with less risky institutions paying lower assessments. Well-capitalized institutions that are financially sound with only a few minor weaknesses are assigned to Risk Category I. Risk Categories II, III and IV present progressively greater risks to the DIF. A range of initial base assessment rates applies to each Risk Category, adjusted downward based on unsecured debt issued by the institution and, except for an institution in Risk Category I, adjusted upward if the institution's brokered deposits exceed 10% of its domestic deposits, to produce total base assessment rates. Total base assessment rates currently range from 2.5 to 9 basis points for Risk Category I, 9 to 24 basis points for Risk Category II, 18 to 33 basis points for Risk Category III, and 30 to 45 basis points for Risk Category IV, all subject to further

adjustment upward if the institution holds more than a limited amount of unsecured debt issued by another FDIC-insured institution. When the reserve ratio of the DIF reaches 1.15%, which is expected to occur in 2016, total base assessment rates are scheduled to be reduced to ranges of 1.5 to 7 basis points for Risk Category I, 7 to 22 basis points for Risk Category II, 14 to 29 basis points for Risk Category III and 25 to 40 basis points for Risk Category IV, subject to the same adjustments as apply to current rates.

Index

The FDIC has the authority to raise or lower assessment rates, subject to limits, and to impose special additional assessments. The Dodd-Frank Act eliminated the previous statutory maximum limit on the FDIC's reserve ratio (which is generally the ratio of the DIF balance to the estimated amount of deposits insured by the DIF) and set the minimum reserve ratio to not less than 1.35% of estimated insured deposits or the comparable percentage of the FDIC's assessment base. The act also required the FDIC to take the steps necessary to attain the 1.35 percent ratio by September 30, 2020, subject to an offsetting requirement for certain institutions.

FDIC deposit insurance expense totaled \$5.0 million, \$2.6 million, and \$2.7 million in 2015, 2014, and 2013, respectively. FDIC deposit insurance expense includes deposit insurance assessments and Financing Corporation ("FICO") assessments related to outstanding bonds issued by FICO in the late 1980s to recapitalize the now defunct Federal Savings & Loan Insurance Corporation. The FICO assessments will continue until the bonds mature in 2017 to 2019.

Future changes in insurance premiums could have an adverse effect on the operating expenses and results of operations of Trustco Bank, and the Bank cannot predict what insurance assessment rates will be in the future.

Insurance of deposits may be terminated by the FDIC upon a finding that the institution has engaged in unsafe or unsound practices, is in an unsafe or unsound condition to continue operations or has violated any applicable law, regulation, rule, order or condition imposed by the FDIC or the OCC. The Bank does not know of any practice, condition or violation that might lead to termination of its deposit insurance.

Assessments. The Bank is required to pay assessments to the OCC to fund the agency's operations. The general assessments, paid on a semi-annual basis, is computed upon the Bank's total assets, including consolidated subsidiaries, as reported in the Bank's latest quarterly financial report. The OCC's assessment schedule includes a surcharge for institutions that require increased supervisory resources. The assessments paid by the Bank for the year ended December 31, 2015 totaled approximately \$1.0 million.

Community Reinvestment Act. The Community Reinvestment Act ("CRA") requires each savings institution, as well as commercial banks and certain other lenders, to identify the communities served by the institution's offices and to identify the types of credit the institution is prepared to extend within those communities. The CRA also requires the OCC to assess an institution's performance in meeting the credit needs of its identified communities as part of its examination of the institution, and to take such assessments into consideration in reviewing applications with respect to branches, mergers and other business combinations, including acquisitions by savings and loan holding companies. An unsatisfactory CRA rating may be the basis for denying such an application and community groups have successfully protested applications on CRA grounds. In connection with its assessment of CRA performance, the OCC assigns CRA ratings of "outstanding," "satisfactory," "needs to improve" or "substantial noncompliance." The Bank was rated "satisfactory" in its last CRA examination. Institutions are evaluated based on (i) its record of helping to meet the credit needs of its assessment area through lending activities; (ii) its qualified investments; and (iii) the availability and effectiveness of the institution's system for delivering retail banking services. An institution that is found to be deficient in its performance in meeting its community's credit needs may be subject to enforcement actions, including cease and desist orders and civil money penalties.

Qualified Thrift Lender Test. As a savings institution regulated by the OCC, the Bank must be a "qualified thrift lender" under either the Qualified Thrift Lender ("QTL") test under the Home Owners' Loan Act or the Internal Revenue Code's Domestic Building and Loan Association ("DBLA") test to avoid certain restrictions on its and the Company's operations and activities. A savings institution may use either test to qualify and may switch from one test to the other; however, the institution must meet the time requirements of the respective test, that is, nine out of the preceding 12 months for the QTL test and at the close of the taxable year for the DBLA test.

Index

Under the QTL test, the savings institution must hold qualified thrift investments equal to at least 65% of the institution's portfolio assets. The savings institution's actual thrift investment percentage is the ratio of its qualified thrift investments divided by its portfolio assets. Portfolio assets are total assets minus goodwill and other intangible assets, office property, and liquid assets not exceeding 20% of total assets. An institution ceases to meet the QTL test when its actual thrift investment percentage, falls below 65% of portfolio assets for four months within any 12-month period. To be a qualified thrift lender under the DBLA test, a savings association must meet a "business operations test" and a "60% of assets test." The business operations test requires the business of a DBLA to consist primarily of acquiring the savings of the public and investing in loans. An institution meets the public savings requirement when it meets one of two conditions: (i) the institution acquires its savings accounts in conformity with OCC rules and regulations and (ii) the general public holds more than 75% of its deposits, withdrawable shares, and other obligations. An institution meets the investing in loans requirement when more than 75% of its gross income consists of interest on loans and government obligations, and various other specified types of operating income that financial institutions ordinarily earn. The 60% of assets test requires that at least 60% of a DBLA's assets must consist of assets that thrifts normally hold, except for consumer loans that are not educational loans.

The Dodd-Frank Act enhanced the severity of the consequences for failing the QTL Test. Among other restrictions, the Dodd-Frank Act imposes certain activities limitations and branching restrictions upon an institution's failure to satisfy the QTL Test. In addition, such an institution would be prohibited from paying dividends, except under circumstances that are permissible for a national bank, are necessary to meet the obligations of the institution's holding company and are specifically approved by both the OCC and Federal Reserve Bank after a written request submitted by the thrift at least 30 days in advance of the proposed payment. Finally, failure of the QTL Test will subject the institution to enforcement action. If the Bank fails the qualified thrift lender test, within one year of such failure the Company must register as, and will become subject to, the activities restrictions applicable to bank holding companies, unless the Bank requalifies within the year. The activities authorized for a bank holding company are generally more limited than are the activities authorized for a savings and loan holding company. If the Bank fails the test a second time, the Company must immediately register as, and become subject to, the restrictions applicable to a bank holding company. The Bank is currently, and expects to remain, in compliance with the qualified thrift lender test.

Transactions with Related Parties. The Bank's transactions with "affiliates" (generally, any company that controls or is under common control with the Bank, including TrustCo) is limited by Sections 23A and 23B of the Federal Reserve Act and the Federal Reserve's implementing Regulation W. Under these laws, the aggregate amount of "covered transactions" between the Bank and any one affiliate is limited to 10% of the Bank's capital stock and surplus, and the aggregate amount of covered transactions by the Bank with all of its affiliates is limited to 20% of capital stock and surplus. Certain covered transactions (primarily credit-related transactions) are required to be secured by collateral in an amount and of a type described in Section 23A and Regulation W. Transactions by the Bank with its affiliates must be on terms and under circumstances that are at least as favorable to the Bank as those prevailing at the time for comparable transactions with non-affiliates. In addition, savings institutions are prohibited from lending to any affiliate that is engaged in activities that are not permissible for bank holding companies, and no savings institution may purchase the securities of any affiliate other than a subsidiary.

The Dodd-Frank Act expanded the definition of "covered transactions" as used in Section 23A to include credit exposure on derivatives transactions and securities lending and borrowing transactions, as well as the acceptance of affiliate-issued debt obligations as collateral for a loan or an extension of credit. The Dodd-Frank Act also revised Section 23A to require that collateral must be maintained at all times for covered transactions, rather than only at the time of the transaction, and restricted the use of debt obligations issued by an affiliate to satisfy collateral obligations. Finally, the Dodd-Frank Act also authorizes the OCC (with respect to federal savings associations such as the Bank), in conjunction with the Federal Reserve, to grant exemptions under Section 23A, subject to the FDIC's determination (or non-objection within a 60-day notice period) that the exemption does not present an unacceptable risk to the DIF.

The Bank also is restricted in its ability to extend credit to its directors, executive officers and 10% shareholders, as well as to entities controlled by such persons. Extensions of credit to those insiders must be made on terms that are substantially the same as, and follow credit underwriting procedures that are not less stringent than, those prevailing for comparable transactions with unaffiliated persons; may not involve more than the normal risk of repayment or present other unfavorable features and may not exceed certain limitations on the amount of credit extended to such persons, individually and in the aggregate. In addition, extensions of credit in excess of certain limits must be approved by the Bank's Board of Directors.

Index

The Dodd-Frank Act imposed changes to the insider lending rules by, among other matters, prohibiting non-credit transactions between an insured depository institution and its insiders unless the transaction is on market terms and, if the transaction represents more than 10% of the capital stock and surplus of the institution, has been approved in advance by a majority of the disinterested members of the board of directors of the institution. The Dodd-Frank Act also imposed new limits on loans to insiders with respect to derivatives transactions, repurchase and reverse-repurchase agreements and securities lending and borrowing transactions.

Safety and Soundness Regulations. The federal banking agencies (including the OCC) have adopted certain safety and soundness standards for all insured depository institutions. These standards relate to, among other things, internal controls, information systems and internal audit systems; loan documentation; credit underwriting; interest rate risk exposure; asset growth; asset quality; earnings and compensation, fees and benefits, as well as other operational and managerial standards as the agency deems appropriate. Interagency Guidelines Establishing Standards for Safety and Soundness set forth the safety and soundness standards that the federal banking agencies use to identify and address problems at insured depository institutions before capital becomes impaired. If the appropriate federal banking agency (the OCC in the case of the Bank) determines that an institution fails to meet any standard prescribed by the guidelines, the agency may require the institution to submit to the agency an acceptable plan to achieve compliance with the standard.

Enforcement. The Federal Reserve and the OCC have extensive enforcement authority over savings institutions and their holding companies, including the Bank and TrustCo. This includes enforcement authority with respect to the actions of the Bank's and TrustCo's directors, officers and other "institution-affiliated parties," including attorneys and auditors. This enforcement authority also includes, among other things, the ability to assess civil money penalties, issue cease-and-desist or removal orders and initiate injunctive actions. In general, these enforcement actions may be initiated for violations of laws and regulations and unsafe or unsound practices. Public disclosure of final enforcement actions by the OCC and the Federal Reserve is required.

Institutions in Troubled Condition. Certain events, including entering into a formal written agreement with a bank's regulator or being informed by the regulator that the bank is in troubled condition, will require that a bank give prior notice to their primary regulator before adding or replacing any member of the board of directors, employing any person as a senior executive officer, or changing the responsibilities of any senior executive officer so that the person would assume a different senior executive position. Troubled condition banks are prohibited from making, or agreeing to make, certain "golden parachute payments" to institution affiliated parties, subject to certain exceptions.

Consumer Laws and Regulations. In addition to the other laws and regulations discussed above, the Bank is subject to consumer laws and regulations designed to protect consumers in transactions with financial institutions. These laws and regulations include, among others, the Truth in Lending Act, the Truth in Savings Act, the Electronic Funds Transfer Act, the Expedited Funds Availability Act, the Equal Credit Opportunity Act, the Fair Housing Act, the Fair Credit Reporting Act and the Real Estate Settlement Procedures Act. These laws and regulations mandate certain disclosure requirements and regulate the manner in which financial institutions must deal with customers when taking deposits from, making loans to, or engaging in other types of transactions with such customers.

In January 2013, the CFPB issued a series of final rules related to mortgage loan origination and mortgage loan servicing. In particular, on January 10, 2013, the CFPB issued a final rule implementing the ability-to-repay and qualified mortgage ("QM") provisions of the Truth in Lending Act, as amended by the Dodd-Frank Act (the "QM Rule"). The ability-to-repay provision requires creditors to make reasonable, good faith determinations that borrowers are able to repay their mortgages before extending the credit based on a number of factors and consideration of financial information about the borrower from reasonably reliable third-party documents. Under the Dodd-Frank Act and the QM Rule, loans meeting the definition of "qualified mortgage" are entitled to a presumption that the lender satisfied the ability-to-repay requirements. The presumption is a conclusive presumption/safe harbor for prime loans meeting the QM requirements, and a rebuttable presumption for higher-priced/subprime loans meeting the QM requirements. The

definition of a “qualified mortgage” incorporates the statutory requirements, such as not allowing negative amortization or terms longer than 30 years. The QM Rule also adds an explicit maximum 43% debt-to-income ratio for borrowers if the loan is to meet the QM definition, though some mortgages that meet GSE, FHA and VA underwriting guidelines may, for a period not to exceed seven years, meet the QM definition without being subject to the 43% debt-to-income limits. The QM Rule became effective on January 10, 2014.

Anti-Money Laundering and Customer Identification. The Bank is subject to extensive anti-money laundering provisions and requirements, which generally require that it implement a comprehensive customer identification program and an anti-money laundering program and procedures. All financial institutions, including the Company and the Bank, are required to take certain measures to identify their customers, prevent money laundering, monitor certain customer transactions and report suspicious activity to U.S. law enforcement agencies, and scrutinize or prohibit altogether certain transactions of special concern. Financial institutions also are required to respond to requests for information from federal banking regulatory agencies and law enforcement agencies concerning their customers and their transactions. Information-sharing among financial institutions concerning terrorist or money laundering activities is encouraged by an exemption provided from the privacy provisions of the GLB Act (described below) and other laws. Further, the effectiveness of a financial institution in combating money laundering activities is a factor to be considered in applications submitted by a financial institution for merger or acquisition proposals. The Company has in place a Bank Secrecy Act compliance program, and it engages in very few transactions of any kind with foreign financial institutions or foreign persons.

Consumer Privacy. The Gramm-Leach-Bliley Act of 1999 (the "GLB Act") generally provided for sweeping financial modernization for commercial banks, savings banks, securities firms, insurance companies, and other financial institutions operating in the United States. Among other matters, the GLB Act established a federal rule regarding the confidential treatment of nonpublic personal information about consumers. These provisions of the GLB Act require disclosure of privacy policies to consumers and, in some circumstances, allow consumers to prevent disclosure of certain personal information to a nonaffiliated third party. The privacy rules affect how consumer information is transmitted through diversified financial companies and conveyed to outside vendors. Because the Company does not sell customer information or give customer information to outside third parties or its affiliates except under limited circumstances (e.g., providing customer information to the Company's data processing provider), the rules have not had a significant impact on the Company's results of operations or financial condition.

Federal Reserve System

Federal Reserve Board regulations require savings institutions to maintain reserves against their transaction accounts. The reserve for transaction accounts effective as of December 22, 2015 was as follows:

<u>Amount of transaction accounts</u>	<u>Reserve Requirement</u>
\$0 to \$15.2 million	0% of amount.
Over \$15.2 million and up to \$110.2 million	3% of amount.
Over \$110.2 million	10% of amount over \$110.2 million.

The Bank is in compliance with these requirements.

Federal Home Loan Bank of New York. The Bank is a member of Federal Home Loan Bank ("FHLB") of New York, which is one of 12 regional FHLBs that serve as reserve or central banks for their members. The FHLBs are funded primarily from proceeds derived from the sale of consolidated obligations of the FHLB system and makes loans or advances to members. The Bank is also required to purchase and maintain stock in the FHLB of New York at or above levels specified in the FHLB of New York capital plan. As of December 31, 2015, the Bank owned \$5.4 million in FHLB of New York stock, which was in compliance with its obligations.

Foreign Operations

Neither TrustCo nor the Bank engage in any operations in foreign countries or have outstanding loans to foreign debtors.

Index

Statistical Information Analysis

The "Management's Discussion and Analysis of Financial Condition and Results of Operations" are included in TrustCo's Annual Report to Shareholders for the year ended December 31, 2015, which contains a presentation and discussion of statistical data relating to TrustCo, is hereby incorporated by reference. This information should not be construed to imply any conclusion on the part of the management of TrustCo that the results, causes, or trends indicated therein will continue in the future. The nature and effects of governmental monetary policy, supervision and regulation, future legislation, inflation and other economic conditions and many other factors which affect interest rates, investments, loans, deposits, and other aspects of TrustCo's operations are extremely complex and could make historical operations, earnings, assets, and liabilities not indicative of what may occur in the future.

Critical Accounting Policies

Pursuant to recent SEC guidance, management of the Company is encouraged to evaluate and disclose those accounting policies that are judged to be critical policies, or those most important to the portrayal of the Company's financial condition and results of operations, and that require management's most difficult subjective or complex judgments. Management considers the accounting policy relating to the allowance for loan losses to be a critical accounting policy given the inherent subjectivity and uncertainty in estimating the levels of the allowance required to cover credit losses in the portfolio and the material effect that such judgments can have on the results of operations. Included in Note 1 to the Consolidated Financial Statements contained in TrustCo's Annual Report to Shareholders for the year ended December 31, 2015, is a description of this critical policy and the other significant accounting policies that are utilized by the Company in the preparation of the Consolidated Financial Statements.

Availability of Reports

TrustCo's annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to those reports can be obtained free of charge from its Internet site, www.trustcobank.com under the "Investor Relations" tab. These reports are available on the Internet site as soon as reasonably practicable after they are electronically filed with or furnished to the SEC. The information found on the Company's website is not incorporated by reference in this or any other report the Company files or furnishes to the SEC. These reports are also available on the SEC's website at <http://www.sec.gov>.

Forward-Looking Statements

Statements included in this report and in future filings by TrustCo with the SEC, in TrustCo's press releases, and in oral statements made with the approval of an authorized executive officer, which are not historical or current facts, are "forward-looking statements" made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, and are subject to certain risks and uncertainties that could cause actual results to differ materially from historical earnings and those presently anticipated or projected. Forward-looking statements can be identified by the use of such words as may, will, should, could, would, estimate, project, believe, intend, anticipate, plan, seek, expect and similar expressions. TrustCo wishes to caution readers not to place undue reliance on any such forward-looking statements, which speak only as of the date made.

TrustCo's 2015 Annual Report to Shareholders, which is included as Exhibit 13 hereto, contains a list of certain important factors, in addition to the factors described under Item 1A. Risk Factors, that in some cases have affected and in the future could affect TrustCo's actual results, and could cause TrustCo's actual financial performance to differ materially from that expressed in any forward-looking statement. The list should not be construed as exhaustive, and TrustCo disclaims any obligation to subsequently revise any forward-looking statements to reflect events or circumstances after the date of such statements, or to reflect the occurrence of anticipated or unanticipated events.

Investors should not rely upon forward-looking statements as predictions of future events. Although TrustCo believes that the expectations reflected in the forward-looking statements are reasonable, it cannot guarantee that the future results, levels of activity, performance or events and circumstances reflected in the forward-looking statements will be achieved or occur.

Item 1A. Risk Factors

The following are general risk factors affecting the Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially and adversely affect our business operations. Any of these risks could materially and adversely affect our business, financial condition or results of operations. In such cases, you may lose all or part of your investment.

Index

We have entered into a Formal Agreement under which our regulators will require us to take certain actions.

On July 21, 2015, Trustco Bank entered into a Formal Agreement with its primary regulator, the OCC. The Formal Agreement requires the Bank to take various actions, within prescribed time frames, with respect to certain areas of the Bank including, among others, (i) establishing a board committee to monitor and coordinate the response to the Agreement; (ii) adopting compliance plans to respond to the Agreement; (iii) evaluating and implementing improvements in corporate governance; (iv) evaluating and implementing improvements in internal audit; (v) developing a strategic plan; (vi) developing a revised capital plan consistent with the strategic plan; (vii) developing and implementing improvements to the loan review system; and (viii) other necessary steps to address the issues and questions noted in the agreement. We intend to take all actions necessary to enable the Bank to comply with the requirements of the Formal Agreement, and as the date hereof we have submitted all documentation required as of this date to the OCC. There can be no assurance that the Bank will be able to continue to comply fully with the provisions of the Formal Agreement, and the determination of our compliance will be made by the OCC. Failure to meet the requirements of the Formal Agreement could result in additional supervisory and enforcement actions against the Bank and/or its directors and senior executive officers, including the issuance of a cease and desist order or the imposition of civil money penalties. In addition, compliance efforts related to the Formal Agreement have an adverse impact on our non-interest expense and results of operations.

Certain interest rate movements may hurt earnings and asset values.

Like other financial institutions, we are subject to interest rate risk. Our primary source of income is net interest income, which is the difference between interest earned on loans and investments, and interest paid on deposits and borrowings. Over any specific period of time, our interest-earning assets may be more sensitive to changes in market interest rates than our interest-bearing liabilities, or vice-versa. In addition, the individual market interest rates underlying our loan and deposit products may not change to the same degree over a given time period. In any event, if market interest rates should move contrary to our position, earnings may be negatively affected. Interest rates have in recent years hit historical low levels. From December 2008 through December 2015, the U.S. Federal Reserve Bank (FRB) has held its target for the federal funds rate at a range of 0.00% to 0.25%. On December 16, 2015, the FRB increased the target range to 0.25% to 0.50%, although the likelihood of further increases in the rate is uncertain. Lower rates have helped lead to a lower cost of funds, but have also lowered the yields we earn on loans, securities and short-term investments. If and when the Federal Reserve begins raising rates further, our cost of funds may rise faster than the rates we earn on loans and investments, potentially causing a compression of our interest rate spread and net interest margin, which would have a negative effect on Trustco Bank's profitability.

We also are subject to reinvestment risk associated with changes in interest rates. Changes in interest rates may affect the average life of loans and mortgage-related securities. Decreases in interest rates often result in increased prepayments of loans and mortgage-related securities, as borrowers refinance their loans to reduce borrowings costs. Under these circumstances, we are subject to reinvestment risk to the extent that we are unable to reinvest the cash received from such prepayments in loans or other investments that have interest rates that are comparable to the interest rates on existing loans and securities. Additionally, increases in interest rates may decrease loan demand and/or may make it more difficult for borrowers to repay adjustable rate loans.

Changes in interest rates also affect the value of the Bank's interest-earning assets, and in particular the Bank's securities portfolio. Generally, the value of fixed-rate securities fluctuates inversely with changes in interest rates. Unrealized gains and losses on securities available for sale are reported as a separate component of equity, net of tax. Decreases in the fair value of securities available for sale resulting from increases in interest rates could have an adverse effect on shareholders' equity.

We are exposed to credit risk in our lending activities.

There are inherent risks associated with our lending and trading activities. Loans to individuals and business entities, our single largest asset group, depend for repayment on the willingness and ability of borrowers to perform as contracted. A material adverse change in the ability of a significant portion of our borrowers to meet their obligation to us, due to changes in economic conditions, interest rates, natural disaster, acts of war, or other causes over which we have no control, could adversely impact the ability of borrowers to repay outstanding loans or the value of the collateral securing these loans, and could have a material adverse impact on our earnings and financial condition.

Index

If our allowance for loan losses is not sufficient to cover actual loan losses, our earnings could decrease.

Our borrowers may not repay their loans according to the terms of the loans, and, as a result of the declines in home prices, the collateral securing the payment of these loans may be insufficient to pay any remaining loan balance. We may experience significant loan losses, which could have a material adverse effect on our operating results. When determining the amount of the allowance for loan and lease losses (“ALLL”), we make various assumptions and judgments about the collectability of our loan portfolio, including the creditworthiness of our borrowers and the value of the real estate and other assets serving as collateral for the repayment of many of our loans. In deciding on the adequacy of the allowance for loan losses, management reviews past due information, historical charge-off and recovery data, and nonperforming loan activity. Also, there are a number of other factors that are taken into consideration, including: the magnitude, nature and trends of recent loan charge-offs and recoveries, the growth in the loan portfolio and the implication that it has in relation to the economic climate in the Bank’s market territories, and the economic environment in the Upstate New York territory primarily (the Company’s largest geographical area) over the last several years, as well as in the Company’s other market areas. If our assumptions and analysis prove to be incorrect, our ALLL may not be sufficient to cover losses inherent in our loan portfolio, resulting in additions to our allowance which is maintained through provisions for loan losses. Material additions to our allowance would materially decrease our net income.

The new regulatory capital rules, when fully phased in, will effectively increase our capital requirements and could slow our growth, cause us to seek to raise additional capital, or both.

As discussed under “Regulation and Supervision – Regulatory Capital Requirements and Prompt Corrective Action,” the Company and the Bank became subject to new capital requirements in 2015. The new capital rules impose more stringent capital requirements on the Company and the Bank and generally require banking organizations to hold more and higher-quality capital to act as a financial cushion to absorb losses and help banking organizations better withstand periods of financial stress. The final rule increases the required minimum capital ratios for all banking organizations and introduces a “capital conservation buffer” that is in addition to each capital ratio. Further, savings and loan holding companies such as the Company have not previously been subject to capital requirements but have now become subject to the same capital requirements as bank holding companies.

The application of more stringent capital requirements for us could, among other things, result in lower returns on equity, require us to limit the growth we may otherwise seek, require the raising of additional capital, and result in regulatory actions such as a prohibition on the payment of dividends, the payment of bonuses to employees or the repurchase of shares if we were unable to comply with such requirements. If Trustco Bank fails to comply with the new capital standards, the OCC will have the authority to take “prompt corrective action,” depending on the Bank’s capital level. Currently, the Bank is considered “well-capitalized” for prompt corrective action purposes. If it were to be designated by the OCC in one of the lower capital levels - “undercapitalized,” “significantly undercapitalized” and “critically undercapitalized” – the Bank would be required to raise additional capital and also would be subject to progressively more severe restrictions on operations, management and capital distributions; replacement of senior executive officers and directors; and, if it became “critically undercapitalized,” to the appointment of a conservator or receiver.

Although we continue to evaluate the impact the new capital rules will have on us, we currently anticipate that we will continue to be well-capitalized in accordance with the regulatory standards.

The Dodd-Frank Act resulted, and will continue to result, in new laws and regulations that are expected to increase our costs of operations.

The Dodd-Frank Act significantly changed bank regulatory structure and affected the lending, deposit, investment, trading and operating activities of financial institutions and their holding companies and will continue to do so. The

Dodd-Frank Act required various federal agencies to adopt a broad range of new implementing rules and regulations and to prepare numerous studies and reports for Congress. The federal agencies were given significant discretion in drafting the implementing rules and regulations, and many of the details and much of the impact of the Dodd-Frank Act may not be known for months or years.

Index

These new and revised rules have and may continue to increase our regulatory compliance burden and costs and restrict the financial products and services we offer to our customers. Moreover, states may now adopt stricter consumer protection laws, and state attorneys general may enforce consumer protection rules issued by the CFPB. Compliance with new consumer protection rules will likely increase our overall regulatory compliance costs and may require changes to our underwriting practices with respect to mortgage loans. Moreover, these rules may adversely affect the volume of mortgage loans that we underwrite and may subject us to increased potential liabilities related to such residential loan origination activities.

The Dodd-Frank Act also contained provisions that may limit the scope of the federal preemption of state consumer protection laws enjoyed by federal savings associations, such as the Bank, and national banks by (1) requiring that a state consumer financial law prevent or significantly interfere with the exercise of a federal savings association's or national bank's powers before it can be preempted, (2) mandating that any preemption decision be made on a case by case basis rather than a blanket rule, and (3) ending the applicability of preemption to subsidiaries and affiliates of national banks and federal savings associations.

It remains difficult to predict the ultimate impact of the Dodd-Frank Act on us, including the extent to which it could increase costs or limit our ability to pursue business opportunities in an efficient manner, or otherwise adversely affect our business, financial condition and results of operations. We expect, however, that at a minimum, the new rules imposed by or under the Dodd-Frank Act will increase our operating and compliance costs.

A prolonged economic downturn, especially one affecting our geographic market area, will adversely affect our operations and financial results.

Our primary lending emphasis is the origination of one-to-four family first mortgage loans on residential properties; therefore we are particularly exposed to downturns in the U.S. housing market. The primary risks inherent in our one-to four-family loan portfolio are declines in economic conditions, elevated levels of unemployment or underemployment, and declines in residential real estate values. Any one or a combination of these events may have an adverse impact on borrowers' ability to repay their loans, which could result in increased delinquencies, non-performing assets, loan losses, and future loan loss provisions.

Additionally, we have a concentration of loans secured in New York and Florida. Approximately 80.5% of our loan portfolio is comprised of loans secured by property located in our markets in and around of New York, and approximately 19.5% is comprised of loans secured by property located in Florida. This makes us vulnerable to a downturn in the local economy and real estate markets. Adverse conditions in the local economy such as inflation, unemployment, recession, natural disasters, or other factors beyond our control could impact the ability of our borrowers to repay their loans. Decreases in local real estate values could adversely affect the value of the property used as collateral for our loans, which could cause us to realize a loss in the event of a foreclosure. Currently, there is not a single employer or industry in the area on which the majority of our customers are dependent.

The Company operates in a highly regulated environment and may be adversely affected by changes in laws, regulations and tax policies.

As described above, the Bank is subject to extensive regulation, supervision and examination by the OCC, its primary federal regulator, and by the FDIC, as insurer of our deposits. In addition, the Company is subject to regulation and supervision by the Federal Reserve Board. Such regulation and supervision govern the activities in which an institution and its holding company may engage and are intended primarily for the protection of the insurance fund and the depositors and borrowers of the Bank rather than for holders of the Company's common stock. Regulatory authorities have extensive discretion in their supervisory and enforcement activities, including the imposition of restrictions on operations, the classification of the Bank's assets and determination of the level of allowance for loan losses. Any change in such regulation and oversight, whether in the form of regulatory policy, regulations, legislation

or supervisory action, may have a material impact on operations.

Likewise, the Company operates in an environment that imposes income taxes on its operations at both the federal and state levels to varying degrees. Strategies and operating routines have been implemented to minimize the impact of these taxes. Consequently, any change in tax legislation could significantly alter the effectiveness of these strategies.

Index

Our ability to pay dividends is subject to regulatory limitations and other limitations which may affect our ability to pay dividends to our stockholders or to repurchase our common stock.

TrustCo is a separate legal entity from its subsidiary, Trustco Bank, and does not have significant operations of its own. The availability of dividends from Trustco Bank is limited by various statutes and regulations. It is possible, depending upon the financial condition of the Bank and other factors that the OCC or the Federal Reserve Board could assert that payment of dividends or other payments may result in an unsafe or unsound practice. In addition, under the Dodd-Frank Act, TrustCo will be subjected to consolidated capital requirements and will be required to serve as a source of strength to Trustco Bank. If the Bank is unable to pay dividends to TrustCo, or if TrustCo is required to retain capital or contribute capital to the Bank, we may not be able to pay dividends on our common stock or to repurchase shares of common stock.

Changes in laws and regulations and the cost of regulatory compliance with new laws and regulations may adversely affect our operations and our income.

We are subject to extensive regulation, supervision, and examination by the OCC, FRB, and the FDIC. These regulatory authorities have extensive discretion in connection with their supervisory and enforcement activities, including the ability to impose restrictions on a bank's operations, reclassify assets, determine the adequacy of a bank's loss allowances and determine the level of deposit insurance premiums assessed. Any change in these regulations and oversight, and the regulation of other agencies, such as the CFPB and the U.S. Department of Housing and Urban Development, whether in the form of regulatory policy, new regulations or legislation, or additional deposit insurance premiums, could have a material impact on our operations.

Further, there may be additional laws and regulations, or changes in policy, affecting lending and funding practices, regulatory capital limits, interest rate risk management, and liquidity standards. The federal bank regulatory agencies may require us to maintain capital ratios in excess of regulatory requirements, and new laws and regulations may increase our costs of regulatory compliance and of doing business, and otherwise affect our operations. New laws and regulations may significantly affect the markets in which we do business, the markets for and value of our loans and investments, the products we offer, the fees we can charge and our ongoing operations, costs, and profitability.

Our business could be adversely affected by third-party service providers, data breaches and cyber-attacks.

We face the risk of operational disruption, failure or capacity constraints due to our dependency on third-party vendors for components of our business infrastructure. While we have selected these third-party vendors through our vendor management process, it does not control their operations. As such, any failure on the part of these business partners to perform their various responsibilities could also adversely affect our business and operations.

Our assets which are at risk for cyber-attacks include financial assets and non-public information belonging to customers. We use several third-party vendors who have access to our assets via electronic media. Certain cyber security risks arise due to this access, including cyber espionage, blackmail, ransom, and theft. We employ many preventive and detective controls to protect our assets, and provide recurring information security training to all employees. To date, we have not experienced any material losses relating to cyber-attacks or other information security breaches, but there can be no assurance that we will not suffer such attacks or attempted breaches, or incur resulting losses in the future. Our risk and exposure to these matters remains heightened because of, among other things, the evolving nature of these threats, our plans to continue to implement internet and mobile banking to meet customer demand, and the current economic and political environment. As cyber and other data security threats continue to evolve, we may be required to expend significant additional resources to continue to modify and enhance our protective measures or to investigate and remediate any security vulnerabilities.

Unauthorized disclosure of sensitive or confidential client or customer information, whether through a breach of our computer systems or otherwise, could severely harm our business.

As part of our financial institution business, we collect, process and retain sensitive and confidential customer information. Despite the security measures we have in place, our facilities and systems, and those of our third-party service providers, may be vulnerable to security breaches, acts of vandalism, computer viruses, misplaced or lost data, programming and/or human errors or other similar events. If information security is breached, information can be lost or misappropriated, resulting in financial loss or costs to us. Any security breach involving confidential customer information, whether by us or by our vendors, could severely damage our reputation, expose us to the risks of litigation and liability or disrupt our operations and have a material adverse effect on our business.

Index

We could suffer a material adverse impact from interruptions in the effective operation of, or security breaches affecting, our computer systems.

We rely heavily on information systems to conduct our business and to process, record, and monitor our transactions. Risks to the systems result from a variety of factors, including the potential for bad acts on the part of hackers, criminals, employees and others. As one example, in recent years, some banks have experienced denial of service attacks in which individuals or organizations flood the bank's website with extraordinarily high volumes of traffic, with the goal and effect of disrupting the ability of the bank to process transactions. We are also at risk for the impact of natural disasters, terrorism and international hostilities on our systems or for the effects of outages or other failures involving power or communications systems operated by others. These risks also arise from the same types of threats to businesses with which we deal.

Potential adverse consequences of attacks on our computer systems or other threats include damage to our reputation, loss of customer business, litigation and increased regulatory scrutiny, which might also result in financial loss and require additional efforts and expense to attempt to prevent such adverse consequences in the future.

Market volatility levels have experienced significant variations in recent years and a return to very high volatility levels could adversely affect us.

The stock and credit markets have been experiencing significant variations in volatility levels in recent years. In some cases, the markets have produced downward pressure on stock prices and credit availability for certain issuers without regard to those issuers' underlying financial strength. Current volatility levels have diminished significantly from the peak, but a return to higher levels could cause the Company to experience an adverse effect, which may be material, on our ability to access capital and on our business, financial condition and results of operations.

The soundness of other financial institutions could adversely affect us.

Our ability to engage in routine funding transactions could be adversely affected by the actions and commercial soundness of other financial institutions. Financial services institutions are interrelated as a result of trading, clearing, counterparty or other relationships. We have exposure to many different counterparties and we routinely execute transactions with counterparties in the financial services industry, including brokers and dealers, banks, investment banks, mutual funds, and other institutional entities. As a result, defaults by, or even rumors or questions about, one or more financial services institutions, or the financial services industry generally, have led to market-wide liquidity problems and could lead to losses or defaults by us or by other institutions. Many of these transactions expose us to credit risk in the event of default of our counterparty or client. Any such losses could be material and could materially and adversely affect our business, financial condition and results of operations.

We are subject to claims and litigation pertaining to fiduciary responsibility and lender liability.

Some of the services we provide, such as trust and investment services, require us to act as fiduciaries for our customers and others. In addition, loan workout and other activities may expose us or Trustco Bank to legal actions, including lender liability or environmental claims. From time to time, third parties make claims and take legal action against us pertaining to the performance of our fiduciary responsibilities or loan-related activities. If these claims and legal actions are not resolved in a manner favorable to us, we may be exposed to significant financial liability and/or our reputation could be damaged. Either of these results may adversely impact demand for our products and services or otherwise have a harmful effect on our business and, in turn, on our financial condition, results of operations and prospects.

Index

We may not be able to meet the cash flow requirements of our depositors or borrowers or meet our operating cash needs to fund corporate expansion and other activities.

Liquidity is the ability to meet cash flow needs on a timely basis at a reasonable cost. The liquidity of Trustco Bank is used to make loans and to repay deposit liabilities as they become due or are demanded by customers. Liquidity policies and limits have been established by our board of directors, and our management monitors the overall liquidity position of Trustco Bank to ensure that various alternative strategies exist to cover unanticipated events that could affect liquidity. Trustco Bank is also a member of the Federal Reserve System and Federal Home Loan Bank System, each of which provides funding to members through advances and other extensions of credit that are typically collateralized with securities or mortgage-related assets. Our securities portfolio can be used as a secondary source of liquidity, and additional liquidity could be obtained from securities sold under repurchase agreements, non-core deposits and debt or equity securities issuances in public or private transactions. If we were unable to access any of these funding sources when needed, we might not be able to meet the needs of our customers, which could adversely affect our financial condition, our results of operations, cash flows and our level of regulatory capital.

New lines of business or new products and services may subject us to additional risks.

From time to time, we may develop and grow new lines of business or offer new products and services within our existing lines of business. There are substantial risks and uncertainties associated with these efforts, particularly in instances where the markets are not fully developed. In developing and marketing new lines of business and/or new products and services we may invest significant time and resources. Initial timetables for the introduction and development of new lines of business and/or new products or services may not be achieved and price and profitability targets may not prove feasible. External factors, such as compliance with regulations, competitive alternatives and shifting market preferences, may also impact the successful implementation of a new line of business or a new product or service. Furthermore, any new line of business and/or new product or service could have a significant impact on the effectiveness of our system of internal controls. Failure to successfully manage these risks in the development and implementation of new lines of business or new products or services could have a material adverse effect on our business, results of operations and financial condition. All service offerings, including current offerings and those which may be provided in the future may become more risky due to changes in economic, competitive and market conditions beyond our control.

We may be subject to a higher effective tax rate if Trustco Realty Corp. (“Trustco Realty”) fails to qualify as a real estate investment trust (“REIT”).

Trustco Realty, a subsidiary of Trustco Bank, operates as a REIT for tax purposes. Trustco Realty was established to acquire, hold and manage mortgage assets and other authorized investments to generate net income for distribution to its shareholders.

For an entity to qualify as a REIT, it must meet certain organizational tests and it must satisfy the following six asset tests under the Internal Revenue Code each quarter: (1) at least 75% of the value of the REIT’s total assets must consist of real estate assets, cash and cash items, and government securities; (2) not more than 25% of the value of the REIT’s total assets may consist of securities, other than those includible under the 75% test; (3) not more than 5% of the value of its total assets may consist of securities of any one issuer, other than those securities includible under the 75% test or securities of a taxable REIT subsidiary; (4) not more than 10% of the outstanding voting power of any one issuer may be held, other than those securities includible under the 75% test or securities of a taxable REIT subsidiary; (5) not more than 10% of the total value of the outstanding securities of any one issuer may be held, other than those securities includible under the 75% test or securities of a taxable REIT subsidiary; and (6) a REIT cannot own securities in one or more taxable REIT subsidiaries which comprise more than 25% of the value of its total assets. At December 31, 2015, Trustco Realty met all six quarterly asset tests.

Also, a REIT must satisfy the following two gross income tests each year: (1) at least 75% of its gross income must be from qualifying income closely connected with real estate activities; and (2) 95% of its gross income must be derived from sources qualifying for the 75% test and dividends, interest, and gains from the sale of securities. In addition, a REIT must distribute at least 90% of its taxable income for the taxable year, excluding any net capital gains, to maintain its non-taxable status for federal income tax purposes. For 2015, Trustco Realty met the two annual income tests and the distribution test.

If Trustco Realty fails to meet any of the required provisions and, therefore, does not qualify to be a REIT, our effective tax rate would increase.

Index

We may be subject to a higher effective tax rate if New York State enacts legislation that would eliminate the partial dividends received exclusion currently available to the Bank for New York State income tax purposes for dividends it receives from Trustco Realty.

Current New York State tax law allows a 60% exclusion for dividends received from a greater than 50%-owned REIT subsidiary of a bank, provided the REIT was in existence on April 1, 2014 and the total assets of the bank's affiliated group is less than \$8 billion. Trustco Bank qualifies for this exclusion for dividends it receives from Trustco Realty. If New York State enacts legislation that would eliminate this exclusion, Trustco Bank would instead be entitled to a subtraction modification for 50% of its net loan interest from certain loans secured by residential real property located in New York and certain commercial loans to New York customers. However, the exclusion for this loan interest might be smaller than the 60% dividend exclusion the Bank currently receives for dividends from Trustco Realty. Consequently, a change in tax law that would eliminate the 60% dividend exclusion may increase our effective tax rate. We are not aware of any such proposed legislation at this time.

The trust wealth management fees we receive may decrease as a result of poor investment performance, in either relative or absolute terms, which could decrease our revenues and net earnings.

Our Trustco Financial Services department derives its revenues primarily from investment management fees based on assets under management. Our ability to maintain or increase assets under management is subject to a number of factors, including investors' perception of our past performance, in either relative or absolute terms, market and economic conditions, and competition from investment management companies. Financial markets are affected by many factors, all of which are beyond our control, including general economic conditions, securities market conditions, the level and volatility of interest rates and equity prices, competitive conditions, monetary and fiscal policy and investor sentiment. A decline in the value of the assets under management would decrease our income. Further certain of our investment advisory and wealth management clients can terminate, with little or no notice, their relationships with us, reduce their aggregate assets under management, or shift their funds to other types of accounts with different rate structures.

Strong competition within the Bank's market areas could hurt profits and slow growth.

The Bank faces intense competition both in making loans and attracting deposits. This competition comes principally from other banks, savings and loan associations, credit unions, mortgage companies, other lenders, and institutions offering uninsured investment alternatives. Many of our competitors have competitive advantages, including greater financial resources and higher lending limits, a wider geographic presence, more accessible branch office locations, more aggressive marketing campaigns and better brand recognition, and the ability to offer a wider array of services or more favorable pricing alternatives, as well as lower origination and operating costs. Competition has made it more difficult for the Bank to make new loans and at times has forced the Bank to offer higher deposit rates. Price competition for loans and deposits might result in the Bank earning less on loans and paying more on deposits, which would reduce net interest income. Competition also makes it more difficult to grow loans and deposits and to hire and retain experienced employees. Management expects competition to increase in the future as a result of legislative, regulatory and technological changes and the continuing trend of consolidation in the financial services industry. The Bank's profitability depends upon its continued ability to compete successfully in its market areas.

We are dependent upon the services of our management team.

We are dependent upon the ability and experience of a number of our key management personnel who have substantial experience with our operations, the financial services industry and the markets in which we offer our services. It is possible that the loss of the services of one or more of our senior executives or key managers would have an adverse effect on our operations. Our success also depends on our ability to continue to attract, manage and retain other qualified middle management personnel as we grow. We cannot assure you that we will continue to attract

or retain such personnel.

21

Index

Provisions in our articles of incorporation and bylaws and New York law may discourage or prevent takeover attempts, and these provisions may have the effect of reducing the market price of our stock.

Our articles of incorporation and bylaws include several provisions that may have the effect of discouraging or preventing hostile takeover attempts, and therefore, making the removal of incumbent management difficult. The provisions include staggered terms for our board of directors and requirements of supermajority votes to approve certain business transactions. In addition, New York law contains several provisions that may make it more difficult for a third party to acquire control of us without the approval of the board of directors, and may make it more difficult or expensive for a third party to acquire a majority of our outstanding stock. To the extent that these provisions are effective in discouraging or preventing takeover attempts, they may tend to reduce the market price of our stock.

Changes in accounting standards could impact reported earnings.

The accounting standard setting bodies, including the Financial Accounting Standards Board, the Securities and Exchange Commission and other regulatory bodies, periodically change financial accounting and reporting standards that govern the preparation of our consolidated statements. These changes can be hard to predict and can materially impact how the Company records and reports its financial condition and results of operations. In some cases, we could be required to apply a new or revised accounting standard retroactively, which could affect beginning of period financial statement amounts.

Our disclosure controls and procedures may not prevent or detect all errors or acts of fraud.

Our disclosure controls and procedures are designed to reasonably assure that information required to be disclosed by TrustCo in reports we file or submit under the Securities Exchange Act of 1934 is accumulated and communicated to management, and recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms. We believe that any disclosure controls and procedures or internal controls and procedures, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met.

These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistakes. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people or by an unauthorized override of the controls. Accordingly, because of the inherent limitations in our control system, misstatements due to error or fraud may occur and not be detected.

The preparation of financial statements requires the use of estimates that may vary from actual results.

Preparation of consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make significant estimates that affect the financial statements. One of our most critical estimates is the level of the allowance for loan losses. Due to the inherent nature of this estimate, we cannot provide absolute assurance that we will not significantly increase the allowance for loan losses higher than the current balance.

We rely on communications, information, operating and financial control systems, and technology from third-party service providers, and we may suffer an interruption in those systems that may result in lost business. Further, we may not be able to substitute providers on terms that are as favorable if our relationships with our existing service providers are interrupted.

We rely heavily on third-party service providers for much of our communications, information, operating and financial controls systems, and technology. Any failure or interruption or breach in security of these systems could result in failures or interruptions in our customer relationships management, general ledger, deposit, servicing and/or

loan origination systems. We cannot assure you that such failures or interruptions will not occur or, if they do occur, that they will be adequately addressed by us or the third parties on which we rely. The occurrence of any failure or interruption could have a material adverse effect on our business, financial condition, results of operations and cash flows. If any of our third-party service providers experience financial, operational or technological difficulties, or if there is any other disruption in our relationships with them, we may be required to locate alternative sources of such services, and we cannot assure you that we could negotiate terms that are as favorable to us, or could obtain services with similar functionality as found in our existing systems, without the need to expend substantial resources, if at all. Any of these circumstances could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Index

If the business continuity and disaster recovery plans that we have in place are not adequate to continue our operations in the event of a disaster, the business disruption can adversely impact our operations.

External events, including terrorist or military actions, or an outbreak of disease, and resulting political and social turmoil could cause unforeseen damage to our physical facilities or could cause delays or disruptions to operational functions, including information processing and financial market settlement functions. Additionally, our customers, vendors and counterparties could suffer from such events. Should these events affect us, or our customers, or vendors or counterparties with which we conduct business, our results of operations could be adversely affected.

The Company's risk-management framework may not be effective in mitigating risk and loss.

The Company maintains an enterprise risk management program that is designed to identify, quantify, monitor, report, and control the risks that it faces. These risks include: interest-rate, credit, liquidity, operations, reputation, compliance and litigation. While the Company assesses and improves this program on an ongoing basis, there can be no assurance that its approach and framework for risk management and related controls will effectively mitigate all risk and limit losses in its business. If conditions or circumstances arise that expose flaws or gaps in the Company's risk-management program, or if its controls break down, the performance and value of its business could be adversely affected.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

TrustCo's executive offices are located at 5 Sarnowski Drive, Glenville, New York, 12302. The Company operates 146 offices, of which 25 are owned and 121 are leased from others. The asset value of these properties, when considered in the aggregate, is not material to the operation of TrustCo.

In the opinion of management, the physical properties of TrustCo and the Bank are suitable and adequate and are being fully utilized.

Item 3. Legal Proceedings

The nature of TrustCo's business generates a certain amount of litigation against TrustCo and its subsidiaries involving matters arising in the ordinary course of business. In the opinion of management of TrustCo, there are no proceedings pending to which TrustCo or any of its subsidiaries is a party, or of which its property is the subject which, if determined adversely to TrustCo or such subsidiaries, would be material in relation to TrustCo's consolidated shareholders' equity and financial condition.

Item 4. Mine Safety Disclosure

Not applicable.

PART II

Item 5. Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

TrustCo's common stock is traded on The Nasdaq Stock Market, LLC under the symbol "TRST." Information with respect to the range of high and low sales prices for TrustCo's common stock, and with respect to the frequency and amount of cash dividends declared on the common stock, is set forth on page 1 of TrustCo's Annual Report to Shareholders for the year ended December 31, 2015, which is filed as Exhibit 13 hereto and incorporated by reference herein. TrustCo had 12,447 shareholders of record as of February 10, 2016, and the closing price of TrustCo's common stock on that date was \$5.46.

The following table provides information, as of December 31, 2015, regarding securities authorized for issuance under TrustCo's equity compensation plans.

Plan category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted-average exercise price of outstanding options, warrants and rights (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a)) (c)
Equity compensation plans approved by security holders	2,324,971	7.34	1,061,000
Total	2,324,971	\$ 7.34	1,061,000

The following details the purchase of shares of TrustCo's common stock made by or on behalf of TrustCo in the fourth quarter of the year ended December 31, 2015.

Issuer Purchases of Equity Securities

Period	(a) Total Number of Shares Purchased*	(b) Average Price Paid Per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
November 1 to November 30, 2015	7,483	\$ 6.47	—	—
Total	7,483	\$ 6.47	—	—

*Purchase relates to an employee exercise of incentive stock options.

The TrustCo Annual Report to Shareholders for the year ended December 31, 2015, which is filed as Exhibit 13 hereto, contains a graph comparing the yearly percentage change in the Company's cumulative total shareholder return on its common stock with the cumulative return of the Russell 2000 and the SNL Bank and Thrift indices. Such graph is incorporated herein by reference.

Item 6 . Selected Financial Data

The information required by this this Item 6 is incorporated herein by reference from the table captioned "FIVE YEAR SUMMARY OF FINANCIAL DATA" in TrustCo's Annual Report to Shareholders for the year ended December 31, 2015, which is filed as Exhibit 13 hereto.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The information required by this this Item 7 is contained in TrustCo's Annual Report to Shareholders for the year ended December 31, 2015, which is filed as Exhibit 13 hereto and incorporated herein by reference.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

The information required by this this Item 7A is contained in TrustCo's Annual Report to Shareholders for the year ended December 31, 2015, which is filed as Exhibit 13 hereto and incorporated herein by reference.

Item 8. Financial Statements and Supplementary Data

The consolidated financial statements, together with the report thereon of Crowe Horwath LLP, and the required supplementary financial data are included in TrustCo's Annual Report to Shareholders for the year ended December 31, 2015, which is filed as Exhibit 13 hereto and incorporated herein by reference.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

An evaluation was carried out under the supervision and with the participation of the Company's management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Company's disclosure controls and procedures as of the end of the period covered by this report. Disclosure controls and procedures are procedures that are designed with the objective of ensuring that information required to be disclosed in the Company's reports filed under the Securities Exchange Act of 1934, such as this Form 10-K, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures are effective to satisfy the objectives for which they are designed.

Management's Report on Internal Control over Financial Reporting, together with the report thereon of Crowe Horwath LLP is included in TrustCo's Annual Report to Shareholders for the year ended December 31, 2015, which is filed as Exhibit 13 hereto, are incorporated herein by reference.

There have been no changes in the Company's internal control over financial reporting (as defined in Rule 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934) that occurred during the Company's quarter ended December 31, 2015 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 9B. Other Information

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The information required by this Item 10 is incorporated herein by reference to the disclosure under the headings “Information on TrustCo Directors and Nominees” and “Information on TrustCo Executive Officers” and “Section 16(a) Beneficial Ownership Reporting Compliance” in the Company’s Proxy Statement (Schedule 14A) for its 2016 Annual Meeting of Shareholders to be filed with the SEC within 120 days of the Company’s fiscal year-end. TrustCo has adopted a code of conduct that applies to all employees, including its principal executive, financial and accounting officers. A copy of this code of conduct will be provided without charge upon written request. Requests and inquiries should be directed to: Robert M. Leonard, Executive Vice President, TrustCo Bank Corp NY, P.O. Box 1082, Schenectady, New York 12301-1082. The required information regarding TrustCo's executive officers is contained in PART I in the item captioned "Executive Officers of TrustCo."

Item 11. Executive Compensation

The information required by this Item 11 is incorporated herein by reference to the Company’s Proxy Statement (Schedule 14A) for its 2016 Annual Meeting of Shareholders to be filed with the SEC within 120 days of the Company’s fiscal year-end.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information required by this Item 12 is incorporated herein by reference to the Company’s Proxy Statement (Schedule 14A) for its 2016 Annual Meeting of Shareholders to be filed with the SEC within 120 days of the Company’s fiscal year-end. Additional information concerning the Company’s equity compensation plans is set forth in Part II, Item 5 hereof.

Item 13. Certain Relationships, Related Transactions and Director Independence

The information required by this Item 13 is incorporated herein by reference to the Company’s Proxy Statement (Schedule 14A) for its 2016 Annual Meeting of Shareholders to be filed with the SEC within 120 days of the Company’s fiscal year-end.
