**Item 2.05 Costs Associated with Exit or Disposal Activities**

On November 1, 2005, Raytech Corporation announced the planned relocation of a subsidiary's conventional automotive assembly operations from Crawfordsville, Indiana to a more cost competitive location.

The subsidiary, Raybestos Products Company, is in the process of estimating the costs of this strategic initiative, as well as the costs associated with its previously announced plans to transition its steel stamping business to outside suppliers and move the related heavy-duty paper assembly plant to a location near the outside suppliers. These costs will be impacted by the results of future negotiations with the union representatives.

Although the Company anticipates that material charges will be incurred under generally accepted accounting principles, due to the uncertainty of labor negotiations and the details and timing of the relocation, the Company is at this time unable in good faith to make a determination of the estimates required by paragraphs (b), (c) and (d) of Item 2.05 of Form 8-K. The Company will file an amended Report on Form 8-K within four business days after it makes a determination of such estimates or range of estimates.
