The information in this prospectus is not complete and may be changed. We may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and is not soliciting an offer to buy these securities in any state where the offer or sale is not permitted.

PRELIMINARY PROSPECTUS

SUBJECT TO COMPLETION , 2011

\$500,000,000

GOLUB CAPITAL BDC, INC.

Common Stock

Preferred Stock

Warrants

Subscription Rights

Debt Securities

We are an externally managed, closed-end, non-diversified management investment company that has elected to be regulated as a business development company under the Investment Company Act of 1940. Our investment objective is to provide our stockholders with current income and capital appreciation through debt and minority equity investments in middle-market companies.

GC Advisors LLC serves as our investment adviser. GC Service Company, LLC serves as our administrator. GC Advisors LLC and GC Service Company, LLC are affiliated with Golub Capital, a leading lender to middle-market companies that had over \$5.0 billion of capital under management as of September 30, 2011.

We may offer, from time to time, in one or more offerings or series, together or separately, up to \$500,000,000 of our common stock, preferred stock, warrants representing rights to purchase shares of our common stock, preferred stock or debt securities, subscription rights or debt securities, which we refer to, collectively, as the securities. We may sell our common stock through underwriters or dealers, at-the-market to or through a market maker into an existing trading market or otherwise directly to one or more purchasers or through agents or through a combination of methods of sale. The identities of such underwriters, dealers, market makers or agents, as the case may be, will be described in one or more supplements to this prospectus. The securities may be offered at prices and on terms to be described in one or more supplements to this prospectus. In the event we offer common stock, the offering price per share of our common stock exclusive of any underwriting commissions or discounts will not be less than the net asset value per share of our common stock at the time we make the offering except (1) in connection with a rights offering to our existing stockholders, (2) with the consent of the majority of our common stockholders and approval of our board of directors, or (3) under such circumstances as the Securities and Exchange Commission, or the SEC, may permit. See

Risk Factors for more information.

Our common stock is traded on The NASDAQ Global Select Market under the symbol GBDC . The last reported closing price for our common stock on December 21, 2011 was \$15.88 per share. The net asset value of our common stock on September 30, 2011 (the last date prior to the date of this prospectus on which we determined net asset value) was \$14.56 per share.

Shares of closed-end investment companies, including business development companies, frequently trade at a discount to their net asset value. If our shares trade at a discount to our net asset value, it will likely increase the risk of loss for purchasers in this offering. Investing in our securities involves a high degree of risk. Before buying any securities, you should read the discussion of the material risks of investing in our securities, including the risk of leverage, in Risk Factors beginning on page 14 of this prospectus.

This prospectus contains important information you should know before investing in our securities. Please read it before you invest and keep it for future reference. We file annual, quarterly and current reports, proxy statements and other information about us with the SEC. We maintain a website at <http://www.golubcapitalbdc.com> and make all of our annual, quarterly and current reports, proxy statements and other publicly filed information available, free of charge, on or through our website. You may also obtain such information and make shareholder inquiries by contacting us at 150 South Wacker Drive, Suite 800, Chicago, Illinois 60606, Attention: Investor Relations, or by calling us collect at (312) 205-5050. The SEC also maintains a website at <http://www.sec.gov> that contains such information.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

This prospectus may not be used to consummate sales of securities unless accompanied by a prospectus supplement.

The date of this prospectus is _____, 2011.

ABOUT THIS PROSPECTUS

This prospectus is part of a registration statement that we have filed with the SEC using the shelf registration process.

Under the shelf registration process, we may offer from time to time up to \$500,000,000 of our common stock, preferred stock, warrants representing rights to purchase shares of our common stock, preferred stock or debt securities, subscription rights or debt securities on the terms to be determined at the time of the offering. We may sell our common stock through underwriters or dealers, at-the-market to or through a market maker, into an existing trading market or otherwise directly to one or more purchasers or through agents or through a combination of methods of sale. The identities of such underwriters, dealers, market makers or agents, as the case may be, will be described in one or more supplements to this prospectus. The securities may be offered at prices and on terms described in one or more supplements to this prospectus. This prospectus provides you with a general description of the securities that we may offer. Each time we use this prospectus to offer securities, we will provide a prospectus supplement that will contain specific information about the terms of that offering. The prospectus supplement may also add, update or change information contained in this prospectus, and the prospectus and prospectus supplement will together serve as the prospectus. Please carefully read this prospectus and any prospectus supplement, together with any exhibits, before you make an investment decision. Any exhibits will nonetheless be summarized in the prospectus or applicable prospectus supplement.

TABLE OF CONTENTS

PROSPECTUS SUMMARY

This summary highlights some of the information in this prospectus. It is not complete and may not contain all of the information that you may want to consider. You should read the more detailed information set forth under Risk Factors and the other information included in this prospectus carefully.

Except as otherwise indicated, the terms:

we, us, our and Golub Capital BDC refer to Golub Capital BDC, Inc., a Delaware corporation, and its consolidated subsidiaries, including the Securitization Issuer and Holdings, and, for the periods prior to consummation of the BDC Conversion (as defined below), Golub Capital BDC LLC, a Delaware limited liability company, and its consolidated subsidiaries;

Holdings refers to Golub Capital BDC 2010-1 Holdings LLC, our direct subsidiary, and Securitization Issuer refers to Golub Capital BDC 2010-1 LLC, our indirect subsidiary;

Controlling Class refers to the most senior class of notes of the Securitization Issuer then outstanding;

Debt Securitization refers to the \$300 million term debt securitization that we completed on July 16, 2010;

GC Advisors refers to GC Advisors LLC, our investment adviser;

GC Service refers to GC Service Company, LLC, an affiliate of GC Advisors and our administrator; and Golub Capital refers, collectively, to the activities and operations of Golub Capital Incorporated and Golub Capital Management LLC, which entities employ all of Golub Capital's investment professionals, as well as GC Advisors, GC Service, associated investment funds and their respective affiliates.

On April 13, 2010, we converted from a limited liability company into a corporation. In this conversion, Golub Capital BDC, Inc. succeeded to the business of Golub Capital BDC LLC and its consolidated subsidiary, and the members of Golub Capital BDC LLC became stockholders of Golub Capital BDC, Inc. In this prospectus, we refer to such transactions as the BDC Conversion. Prior to the BDC Conversion, Golub Capital BDC LLC held all of the outstanding limited liability company interests in our predecessor, Golub Capital Master Funding LLC, or GCMF.

Golub Capital BDC

We are an externally managed, closed-end, non-diversified management investment company that has elected to be regulated as a business development company under the Investment Company Act of 1940, as amended, or the 1940 Act. In addition, for tax purposes, we have elected to be treated as a regulated investment company, or RIC, under Subchapter M of the Internal Revenue Code of 1986, as amended, or the Code. We were formed in November 2009 to continue and expand the business of our predecessor, GCMF, which commenced operations in July 2007, to make investments in senior secured, unitranche (a loan that combines characteristics of traditional first lien senior secured loans and second lien or subordinated loans), mezzanine (a loan that ranks senior only to a borrower's equity securities and ranks junior to all of such borrower's other indebtedness in priority of payment), second lien loans and equity securities of middle-market companies that are, in most cases, sponsored by private equity firms. In this prospectus, the term middle-market generally refers to companies having earnings before interest, taxes, depreciation and amortization, or EBITDA, of between \$5 million and \$50 million annually.

Our investment objective is to maximize the total return to our stockholders in the form of current income and capital appreciation through debt and minority equity investments. We intend to achieve our investment objective by (1) accessing the established loan origination channels developed by Golub Capital, a leading lender to middle-market companies with over \$5.0 billion of capital under management as of September 30, 2011, (2) selecting investments within our core middle-market company focus, (3) partnering with experienced private equity firms, or sponsors, in

many cases with whom we have invested alongside in

1

TABLE OF CONTENTS

the past, (4) implementing the disciplined underwriting standards of Golub Capital and (5) drawing upon the aggregate experience and resources of Golub Capital.

As of September 30, 2011, our portfolio at fair value was comprised of 44.3% senior secured loans, 38.7% unitranche loans, 4.8% second lien loans, 10.2% mezzanine loans and 2.0% equity. Over time we expect that senior secured loans will represent a smaller percentage of our investment portfolio as we grow our business, these investments are repaid and we invest in a different mix of assets.

We seek to create a diverse portfolio that includes senior secured, unitranche, mezzanine and second lien loans and warrants and minority equity securities by primarily investing approximately \$5 million to \$25 million of capital, on average, in the securities of U.S. middle-market companies. We may also selectively invest more than \$25 million in some of our portfolio companies and generally expect that the size of our individual investments will vary proportionately with the size of our capital base.

In the current environment, we continue to focus on unitranche investments given the greater principal protection from the first lien nature of these loans. However, we have recently seen some compelling risk/reward opportunities in mezzanine debt.

Our Adviser

Our investment activities are managed by our investment adviser, GC Advisors. GC Advisors is responsible for sourcing potential investments, conducting research and due diligence on prospective investments and equity sponsors, analyzing investment opportunities, structuring our investments and monitoring our investments and portfolio companies on an ongoing basis. GC Advisors was organized in September 2008 and is a registered investment adviser under the Investment Advisers Act of 1940, as amended, or the Advisers Act. Under our amended and restated investment advisory agreement with GC Advisors, or the Investment Advisory Agreement, we pay GC Advisors a base management fee and an incentive fee for its services. See [Management Agreements](#) [Management Fee](#) for a discussion of the base management fee and incentive fee, including the cumulative income incentive fee and the income and capital gains incentive fee, payable by us to GC Advisors. Unlike most closed-end funds whose fees are based on assets net of leverage, our base management fee is based on our average-adjusted gross assets (including assets purchased with borrowed funds and securitization-related assets, leverage, unrealized depreciation or appreciation on derivative instruments and cash collateral on deposit with custodian but adjusted to exclude cash and cash equivalents so that investors do not pay the base management fee on such assets) and, therefore, GC Advisors benefits when we incur debt or use leverage. For purposes of the Investment Advisory Agreement, cash equivalents means U.S. government securities and commercial paper instruments maturing within 270 days of purchase (which is different than the definition under U.S. Generally Accepted Accounting Principles, or GAAP, which defines cash equivalents as U.S. government securities and commercial paper instruments maturing within 90 days of purchase). Additionally, under the incentive fee structure, GC Advisors benefits when capital gains are recognized and, because it determines when a holding is sold, GC Advisors controls the timing of the recognition of capital gains. Our board of directors is charged with protecting our interests by monitoring how GC Advisors addresses these and other conflicts of interest associated with its management services and compensation. While not expected to review or approve each borrowing, our independent directors periodically review GC Advisors' services and fees as well as its portfolio management decisions and portfolio performance. In connection with these reviews, our independent directors consider whether our fees and expenses (including those related to leverage) remain appropriate. See [Management Agreements](#) [Board Approval of the Investment Advisory Agreement](#).

GC Advisors is an affiliate of Golub Capital and has entered into a staffing agreement, or the Staffing Agreement, with two Golub Capital affiliates, Golub Capital Incorporated and Golub Capital Management LLC. Under the Staffing Agreement, these companies make experienced investment professionals available to GC Advisors and provide access to the senior investment personnel of Golub Capital and its affiliates. The Staffing Agreement provides GC Advisors with access to investment opportunities, which we refer to in the aggregate as deal flow, generated by Golub Capital and its affiliates in the ordinary course of their businesses and commits the members of GC Advisors investment committee to serve in that capacity. As our investment adviser, GC Advisors is obligated to allocate investment opportunities among us and its other clients fairly and equitably over time in accordance with its allocation policy. See Related Party Transactions and Certain

2

TABLE OF CONTENTS

Relationships. However, there can be no assurance that such opportunities will be allocated to us fairly or equitably in the short-term or over time. GC Advisors seeks to capitalize on the significant deal origination, credit underwriting, due diligence, investment structuring, execution, portfolio management and monitoring experience of Golub Capital's investment professionals.

An affiliate of GC Advisors, GC Service, provides the administrative services necessary for us to operate. See Management Agreements Administration Agreement for a discussion of the fees and expenses we are required to reimburse to GC Service.

About Golub Capital

Golub Capital, founded in 1994, is a leading lender to middle-market companies, with a long track record of investing in unitranche and junior capital financings, which is our long-term investment focus. Golub Capital invested more than \$2.6 billion in unitranche and mezzanine transactions across a variety of market environments and industries between 2001 and September 30, 2011. From 2005 through 2010, Golub Capital invested in more than 250 middle-market companies and, as of September 30, 2011, it held debt investments in more than 160 middle-market companies.

Golub Capital's middle-market lending group is managed by a four-member senior management team consisting of Lawrence E. Golub, David B. Golub, Gregory W. Cashman and Andrew H. Steerman. As of September 30, 2011, Golub Capital's 52 investment professionals had an average of over 11 years of investment experience and were supported by 75 administrative and back office personnel that focus on operations, finance, legal and compliance, accounting and reporting, marketing, information technology and office management.

Market Opportunity

We intend to pursue an investment strategy focused on investing in senior secured, unitranche, mezzanine and second lien loans of, and warrants and minority equity securities in, U.S. middle-market companies.

Target Market. We believe that small and middle-market companies in the United States with annual revenues between \$10 million and \$2.5 billion represent a significant growth segment of the U.S. economy and often require substantial capital investments to grow. Middle-market companies have generated a significant number of investment opportunities for investment funds managed or advised by Golub Capital and we believe that this market segment will continue to produce significant investment opportunities for us.

Specialized Lending Requirements. We believe that several factors render many U.S. financial institutions ill-suited to lend to U.S. middle-market companies. For example, based on the experience of our management team, lending to U.S. middle-market companies (1) is generally more labor intensive than lending to larger companies due to the smaller size of each investment and the fragmented nature of information for such companies, (2) requires due diligence and underwriting practices consistent with the demands and economic limitations of the middle-market and (3) may also require more extensive ongoing monitoring by the lender.

Demand for Debt Capital. We believe there is a large pool of uninvested private equity capital for middle-market companies. We expect private equity firms will seek to leverage their investments by combining equity capital with senior secured loans and mezzanine debt from other sources.

Pricing and Deal Structures. We believe that as a result of current macroeconomic issues such as the downgrade of U.S. debt, a weakened U.S. economy and the European sovereign debt crisis, there has been reduced access to, and availability of, debt capital to middle-market companies, which has resulted in a widening of interest spreads, more conservative deal structures and stronger covenants. We believe these market conditions may continue to create favorable opportunities to invest at attractive risk-adjusted returns.

Competitive Strengths

Deep, Experienced Management Team. We are managed by GC Advisors, which has access through the Staffing Agreement to the resources and expertise of Golub Capital's 127 employees, led by our chairman, Lawrence E. Golub, and our chief executive officer, David B. Golub. As of September 30, 2011, the 52 investment professionals of Golub Capital had an average of over 11 years of investment experience and were

TABLE OF CONTENTS

supported by 75 administrative and back office personnel that focus on operations, finance, legal and compliance, accounting and reporting, marketing, information technology and office management. Golub Capital seeks to hire and retain high-quality investment professionals and reward those personnel based on investor returns. In 2009, *Buyouts Magazine* named Golub Capital Middle-Market Lender of the Year for the second consecutive year and *M&A Advisor* named Golub Capital the Mezzanine Financing Agent of the Year in 2009. These awards do not constitute an endorsement by any such publication or organization of the securities being offered by this prospectus.

Leading U.S. Debt Platform Provides Access to Proprietary Relationship-Based Deal Flow. GC Advisors gives us access to the deal flow of Golub Capital, one of the leading middle-market lenders in the United States. Reuters Loan Pricing Corporation ranked Golub Capital as the leading senior lender for middle-market leveraged buyouts (total debt financing of under \$100 million) for 2009, based both on deal volume and number of deals. Since its inception, Golub Capital has closed deals with over 170 middle-market sponsors and repeat transactions with over 80 sponsors. We believe that Golub Capital receives relationship-based early looks and last looks at many investment opportunities in the U.S. middle-market market, allowing it to be highly selective in the transactions it pursues.

Disciplined Investment and Underwriting Process. GC Advisors utilizes the established investment process of Golub Capital for reviewing lending opportunities, structuring transactions and monitoring investments. Using its disciplined approach to lending, GC Advisors seeks to minimize credit losses through effective underwriting, comprehensive due diligence investigations, structuring and the implementation of restrictive debt covenants.

Regimented Credit Monitoring. Following each investment, GC Advisors implements a regimented credit monitoring system. This careful approach, which involves ongoing review and analysis by teams of professionals, has enabled us to identify problems early and to assist borrowers before they face difficult liquidity constraints.

Concentrated Middle-Market Focus. Because of our focus on the middle-market, we understand the following general characteristics of middle-market lending:

middle-market companies are generally less leveraged than large companies and, we believe, offer more attractive investment returns in the form of upfront fees, prepayment penalties and higher interest rates;
middle-market issuers are more likely to have simple capital structures;
carefully structured covenant packages enable middle-market lenders to take early action to remediate poor financial performance; and
middle-market lenders can undertake thorough due diligence investigations prior to investment.

TABLE OF CONTENTS

Organizational Structure

The following shows a simplified organizational chart reflecting our relationship with our investment adviser and administrator and our direct and indirect ownership interests in certain of our subsidiaries, including the membership interests of the Securitization Issuer, as of the date of this prospectus:

Recent Developments

Revolving Credit Facility. On July 21, 2011, Golub Capital BDC Funding LLC, our wholly owned subsidiary, or Funding, entered into a \$75 million senior, secured revolving credit facility, or the Credit Facility, with Wells Fargo Securities, LLC, as administrative agent and Wells Fargo Bank, N.A., as lender.

Under the Credit Facility, which matures on October 21, 2015, the lender has agreed to extend credit to Funding in an aggregate principal amount of \$75 million. The Credit Facility is secured by all of the assets held by Funding. Funding's ability to draw under the Credit Facility is scheduled to terminate on October 20, 2012. The period from the closing date until October 20, 2012 is referred to as the reinvestment period. All amounts outstanding under the Credit Facility are required to be repaid by October 21, 2015. Through the reinvestment period, the Credit Facility bears interest at an annual interest rate equal to LIBOR plus 2.25%. After the reinvestment period, the annual interest rate will reset to LIBOR plus 2.75% for the remaining term of the Credit Facility. See Management's Discussion and Analysis of Financial Condition, Results of Operations and Cash Flows Liquidity and Capital Resources Revolving Credit Facility.

Exemptive Application to Own an Asset Manager. We applied for exemptive relief from the SEC on May 19, 2011 and filed an amended application on November 4, 2011 to permit us to continue to hold up to 100% of the outstanding voting interest of a portfolio company at such time as such portfolio company is required to register as an investment adviser under the Advisers Act. We have not yet formed such a subsidiary. In addition, there is no assurance that such relief will be granted or, if granted, the relief would be acceptable to us if the terms under which the SEC grants relief differ from those we proposed.

Follow-On Equity Offering. On April 6, 2011, we completed a public offering in which we sold an aggregate of 3,500,000 shares of our common stock at a price per share of \$15.75, resulting in proceeds, net of offering costs but before expenses, to us of approximately \$52.6 million. On May 2, 2011, we issued an additional 453,257 shares of our common stock at the public offering price to cover over-allotments resulting in additional proceeds, net of offering costs but before expenses, of approximately \$6.8 million.

SBIC License. On August 24, 2010, our wholly owned subsidiary, GC SBIC IV, L.P., received approval for a license from the U.S. Small Business Administration, or the SBA, to operate as a Small Business Investment Company, or an SBIC. As a wholly owned subsidiary, GC SBIC IV, L.P. may rely on an exclusion from the definition of investment company under the 1940 Act. As such, this subsidiary will not elect to be regulated as a business development company under the 1940 Act. GC SBIC IV, L.P. has an investment objective substantially similar to ours and makes similar types of investments in accordance with SBIC regulations.

TABLE OF CONTENTS

Prior to GC SBIC IV, L.P. obtaining approval from the SBA, Golub Capital managed two SBICs licensed by the SBA for more than 14 years. The SBIC license allows GC SBIC IV, L.P. to incur leverage by issuing SBA-guaranteed debentures, subject to the issuance of a capital commitment and certain approvals by the SBA and customary procedures. SBA-guaranteed debentures carry long-term fixed rates that are generally lower than rates on comparable bank and other debt. Under the regulations applicable to SBICs, an SBIC may have outstanding debentures guaranteed by the SBA generally in an amount of up to twice its regulatory capital, which generally equates to the amount of its equity capital. SBIC regulations currently limit the amount that an SBIC subsidiary may borrow to a maximum of \$150 million, assuming that it has at least \$75 million of equity capital. GC SBIC IV, L.P. will be subject to regulation and oversight by the SBA, including requirements with respect to maintaining certain minimum financial ratios and other covenants.

As of September 30, 2011, we had committed and funded \$50.0 million of equity capital to GC SBIC IV, L.P. and had SBA debentures of \$61.3 million outstanding, which mature between March 2021 and March 2022. For the year ended September 30, 2011, the effective annualized average interest rate, which includes amortization of fees paid on the debentures, was 3.0%. The interest rate on \$20.0 million of outstanding debentures was fixed on March 29, 2011 at an interest rate of 4.5%. The interest rate on \$35.3 million was fixed on September 21, 2011 at an interest rate of 3.3%. Prior to this date, we were charged an interim financing rate of approximately 1.0%. We were also charged an interim financing rate of approximately 1.3% on the remaining \$6.0 million of outstanding debentures.

As of September 30, 2011, we had available commitments of \$38.7 million from the SBA.

Under present SBIC regulations, the maximum amount of SBA-guaranteed debentures that may be issued by multiple licensees under common management is \$225 million. It is possible that GC SBIC IV, L.P. will be constrained in its ability to issue SBA-guaranteed debentures in the future if other Golub Capital SBICs have already issued such debentures. As of September 30, 2011, the two other SBIC licensees operated by Golub Capital had an aggregate of \$123.8 million of SBA-guaranteed debentures outstanding, leaving aggregate borrowing capacity of a maximum of \$39.9 million of SBA-guaranteed debentures for GC SBIC IV, L.P. and the two other SBIC licensees, none of which is required to be allocated to us. The borrowing capacity of GC SBIC IV, L.P. could be expanded if any other Golub Capital SBICs retire their SBA-guaranteed debentures, and the other two SBIC licensees are limited to only making add-on investments in existing portfolio companies, making the majority of the incremental borrowing capacity available to GC SBIC IV, L.P. As of September 30, 2010, GC SBIC IV, L.P. did not have any outstanding SBA-guaranteed debentures. Unless specifically approved by the SBA, the other two licensees were prohibited by the SBA from making new investments when GC SBIC IV, L.P. received its license on August 24, 2010.

On September 13, 2011, we received exemptive relief from the SEC allowing us to modify the asset coverage requirement under the 1940 Act to exclude SBA debentures from this calculation. As such, our ratio of total consolidated assets to outstanding indebtedness may be less than 200%. This provides us with increased investment flexibility, but also increases our risks related to leverage.

Debt Securitization. On July 16, 2010, we completed a \$300 million term Debt Securitization in which the Securitization Issuer issued \$300 million of notes and, in connection with such issuance, received \$300 million of consideration, consisting of \$62.1 million of cash as well as senior secured and second lien loans (or participations therein) with an aggregate outstanding loan balance of \$237.9 million, which served as the initial collateral for the notes issued by the Securitization Issuer. We use the term debt securitization in this prospectus to describe a form of secured borrowing under which an operating company (sometimes referred to as an originator or sponsor) acquires or originates mortgages, receivables, loans or other assets that earn income, whether on a one-time or recurring basis (collectively, income producing assets), and borrows money on a non-recourse basis against a legally separate pool of loans or other income producing assets. In a typical debt securitization, the originator transfers the loans or income

producing assets to a single-purpose, bankruptcy-remote subsidiary (also referred to as a special purpose entity), which is established solely for the purpose of holding loans and income producing assets and issuing debt secured by these income producing assets. The formation of a special purpose entity and subsequent issuance of debt is referred to in this prospectus as a structured finance transaction. The special purpose entity completes the borrowing through the issuance of notes secured by the loans or other assets. The special purpose entity may

TABLE OF CONTENTS

issue the notes in the capital markets to a variety of investors, including banks, non-bank financial institutions and other investors. In the Debt Securitization, an institutional investor purchased the notes issued by the Securitization Issuer in a private placement.

The notes offered in the Debt Securitization were issued by the Securitization Issuer, and the Class A Notes and Class B Notes are secured by the assets held by the Securitization Issuer. The Debt Securitization was executed through a private placement of \$174 million of Aaa/AAA Class A Notes, or the Class A Notes, which bear interest at the three-month London Interbank Offered Rate, or LIBOR, plus 2.40%. The \$10 million face amount of Class B Notes, or Class B Notes, bear interest at a rate of three-month LIBOR plus 2.40%, and the \$116 million face amount of Subordinated Notes, or Subordinated Notes, do not bear interest. All of the notes are scheduled to mature on July 20, 2021. In partial consideration for the loans transferred to the Securitization Issuer as part of the Debt Securitization, Holdings retained all of the Class B Notes and Subordinated Notes issued by the Securitization Issuer, which together totaled \$126 million, and it retained all of the membership interests in the Securitization Issuer, which Holdings initially purchased for \$250. All of the notes are scheduled to mature on July 20, 2021. We use the term retained in this prospectus to describe the acquisition by Holdings of the Class B Notes, the Subordinated Notes and the membership interests issued by the Securitization Issuer. Specifically, Holdings acquired the membership interests in the Securitization Issuer in connection with the initial capitalization of the Securitization Issuer. Holdings then acquired the Class B Notes and the Subordinated Notes from the Securitization Issuer as part of the Debt Securitization in partial consideration for the portfolio loans transferred from Holdings to the Securitization Issuer in the combination sale and contribution transaction described below. These transactions were all completed in reliance on exemptions from the registration requirements of the Securities Act of 1933, as amended, or the Securities Act.

There are risks associated with the Debt Securitization, including:

We hold the Subordinated Notes, the most junior class of notes issued by the Securitization Issuer, which are subordinated in priority of payment to every other class of notes issued by the Securitization Issuer and are subject to certain payment restrictions set forth in the indenture governing the notes;

As the holder of the membership interests in the Securitization Issuer, we are the residual claimant on distributions, if any, made by the Securitization Issuer after holders of all other classes of notes issued by the Securitization Issuer have been paid in full on each payment date or upon maturity of such notes; and

If an event of default has occurred and acceleration occurs in accordance with the terms of the indenture, the most senior class of notes then outstanding will be paid in full before any further payment or distribution on the notes, including the Subordinated Notes and residual interests we hold.

For a more detailed discussion of the Debt Securitization, see [Risk Factors](#) [Risks Relating to Our Business and Structure](#) [We are subject to risks associated with the Debt Securitization](#) and [Management's Discussion and Analysis of Financial Condition, Results of Operations and Cash Flows](#) [Liquidity and Capital Resources](#) [Debt Securitization](#).

Operating and Regulatory Structure

Our investment activities are managed by GC Advisors and supervised by our board of directors, a majority of whom are independent of us, GC Advisors and its affiliates.

As a business development company, we are required to comply with certain regulatory requirements. For example, while we are permitted to finance investments using leverage, which may include the issuance of shares of preferred stock, or notes and other borrowings, our ability to use leverage is limited in significant respects. See [Regulation](#). Any decision on our part to use leverage will depend upon our assessment of the attractiveness of available investment opportunities in relation to the costs and perceived risks of such leverage. GC Advisors makes recommendations to

our board of directors with respect to leverage policies. Our board of directors determines our leverage policy, including approving in advance the incurrence of material indebtedness and the execution of material contracts, and directs GC Advisors to implement such

7

TABLE OF CONTENTS

policies. The use of leverage to finance investments creates certain risks and potential conflicts of interest. See Risk Factors Risks Relating to our Business and Structure There are significant potential conflicts of interest that could affect our investment returns Our management and incentive fee structure may create incentives for GC Advisors that are not fully aligned with the interests of our stockholders, Risks Relating to our Business and Structure Regulations governing our operation as a business development company affect our ability to, and the way in which we, raise additional capital. As a business development company, the necessity of raising additional capital exposes us to risks, including the typical risks associated with leverage and Risks Relating to our Business and Structure We intend to finance our investments with borrowed money, which will magnify the potential for gain or loss on amounts invested and may increase the risk of investing in us.

Also, as a business development company, we are generally prohibited from acquiring assets other than qualifying assets unless, after giving effect to any acquisition, at least 70% of our total assets are qualifying assets. Qualifying assets generally include securities of eligible portfolio companies, cash, cash equivalents, U.S. government securities and high-quality debt investments maturing in one year or less from the time of investment. Under the rules of the 1940 Act, eligible portfolio companies include (1) private domestic operating companies, (2) public domestic operating companies whose securities are not listed on a national securities exchange (*e.g.*, the New York Stock Exchange, NYSE Amex Equities and The NASDAQ Global Market) or registered under the Securities Exchange Act of 1934, as amended, or the Exchange Act, and (3) public domestic operating companies having a market capitalization of less than \$250 million. Public domestic operating companies whose securities are quoted on the over-the-counter bulletin board and through Pink Sheets LLC are not listed on a national securities exchange and therefore are eligible portfolio companies. See Regulation.

Conflicts of Interests

Subject to certain 1940 Act restrictions on co-investments with affiliates, GC Advisors offers us the right to participate in all investment opportunities that it determines are appropriate for us in view of our investment objective, positions, policies, strategies and restrictions as well as regulatory requirements and other relevant factors. Such offers are subject to the exception that, in accordance with GC Advisors code of ethics and allocation policies, we might not participate in each individual opportunity but will, on an overall basis, be entitled to participate equitably with other entities sponsored or managed by GC Advisors and its affiliates.

To the extent that we compete with entities sponsored or managed by GC Advisors or its affiliates for a particular investment opportunity, GC Advisors will allocate investment opportunities across the entities for which such opportunities are appropriate, consistent with (1) its internal conflict of interest and allocation policies, (2) the requirements of the Advisers Act and (3) certain restrictions under the 1940 Act regarding co-investments with affiliates. GC Advisors allocation policies are intended to ensure that, over time, we may generally share equitably in investment opportunities with other investment funds, accounts or other investment vehicles, together referred to as accounts, sponsored or managed by GC Advisors or its affiliates, particularly those involving a security with limited supply or involving differing classes of securities of the same issuer which may be suitable for us and such other accounts.

GC Advisors has historically sponsored or managed, and currently sponsors or manages, accounts with similar or overlapping investment strategies and has put in place a conflict-resolution policy that addresses the co-investment restrictions set forth under the 1940 Act. GC Advisors seeks to ensure the equitable allocation of investment opportunities when we are able to invest alongside other accounts sponsored or managed by GC Advisors and its affiliates. When we invest alongside such other accounts, such investments are made consistent with GC Advisors allocation policy. Under this allocation policy, GC Advisors will determine separately the amount of any proposed

investment to be made by us and similar eligible accounts. We expect that these determinations will be made similarly for other accounts sponsored or managed by GC Advisors and its affiliates. If sufficient securities or loan amounts are available to satisfy our and each such account's proposed investment, the opportunity will be allocated in accordance with GC Advisor's pre-transaction determination. Where there is an insufficient amount of an investment opportunity to fully satisfy us and other accounts sponsored or managed by GC Advisors or its affiliates, the allocation policy further provides that allocations among us and other accounts will generally be made pro rata based on the amount that each such

8

TABLE OF CONTENTS

party would have invested if sufficient securities or loan amounts were available. In situations in which co-investment with other entities sponsored or managed by GC Advisors or its affiliates is not permitted or appropriate, such as when, in the absence of exemptive relief described below, we and such other entities would be making different investments in the same issuer, GC Advisors will need to decide whether we or such other entity or entities will proceed with the investment. GC Advisors will make these determinations based on its policies and procedures, which generally require that such opportunities be offered to eligible accounts on a basis that will be fair and equitable over time, including, for example, through random or rotational methods. We and GC Advisors have submitted an exemptive application to the SEC to permit greater flexibility to negotiate the terms of co-investments if our board of directors determines that it would be advantageous for us to co-invest with other accounts sponsored or managed by GC Advisors or its affiliates in a manner consistent with our investment objectives, positions, policies, strategies and restrictions as well as regulatory requirements and other pertinent factors. See Related Party Transactions and Certain Relationships.

GC Advisors and its affiliates have other clients with similar or competing investment objectives, including several private funds that are pursuing an investment strategy similar to ours, some of which are continuing to seek new capital commitments. In serving these clients, GC Advisors may have obligations to other clients or investors in those entities. Our investment objective may overlap with such affiliated accounts. GC Advisors' allocation procedures are designed to allocate investment opportunities among the accounts sponsored or managed by GC Advisors and its affiliates in a manner consistent with its obligations under the Advisers Act. If two or more accounts with similar investment strategies are actively investing, GC Advisors will seek to allocate investment opportunities among eligible accounts in a manner that is fair and equitable over time and consistent with its allocation policy. See Risk Factors - Risks Relating to our Business and Structure - Conflicts related to obligations GC Advisors' investment committee, GC Advisors or its affiliates have to other clients. Additionally, under our incentive fee structure, GC Advisors benefits when we recognize capital gains and, because GC Advisors determines when a holding is sold, GC Advisors controls the timing of the recognition of such capital gains. See Risk Factors - Risks Relating to our Business and Structure - Our incentive fee structure may create incentives for GC Advisors that are not fully aligned with the interests of our stockholders. In addition, because the base management fee that we pay to GC Advisors is based on our average adjusted gross assets, including those assets acquired through the use of leverage, GC Advisors has a financial incentive to incur leverage.

Our principal executive offices are located at 150 South Wacker Drive, Suite 800, Chicago, Illinois 60606, and our telephone number is (312) 205-5050. Our corporate website is located at www.golubcapitalbdc.com. Information on our website is not incorporated into or a part of this prospectus.

TABLE OF CONTENTS**FEEES AND EXPENSES**

The following table is intended to assist you in understanding the costs and expenses that an investor in shares of our common stock will bear directly or indirectly. However, we caution you that some of the percentages indicated in the table below are estimates and may vary. The following table excludes one-time fees payable to third parties not affiliated with GC Advisors that were incurred in connection with the Debt Securitization but includes all of the applicable ongoing fees and expenses of the Debt Securitization. Whenever this prospectus contains a reference to fees or expenses paid by us or Golub Capital BDC, or that we will pay fees or expenses, our common stockholders will indirectly bear such fees or expenses.

Stockholder transaction expenses:		
Sales load (as a percentage of offering price)	(1)	
Offering expenses (as a percentage of offering price)		(2)
Dividend reinvestment plan expenses	None	(3)
Total stockholder transaction expenses (as a percentage of offering price)		
Annual expenses (as a percentage of net assets attributable to common stock):		
Management fees	1.83%	(4)
Incentive fees payable under the Investment Advisory Agreement (20%)	0.11%	(5)
Interest payments on borrowed funds	2.07%	(6)
Other expenses	1.15%	(7)
Total annual expenses	5.16%	(8)

- (1) In the event that the securities to which this prospectus relates are sold to or through underwriters or agents, a corresponding prospectus supplement will disclose the applicable sales load.
- The related prospectus supplement will disclose the estimated amount of total offering expenses (which may include offering expenses borne by third parties on our behalf), the offering price and the offering expenses borne by us as a percentage of the offering price.
- (2) The expenses associated with the dividend reinvestment plan are included in Other expenses. See Dividend Reinvestment Plan.
- (3) Our management fee is calculated at an annual rate equal to 1.375% and is based on the average adjusted gross assets (including assets purchased with borrowed funds and securitization-related assets, leverage, unrealized depreciation or appreciation on derivative instruments and cash collateral on deposit with custodian but adjusted to exclude cash and cash equivalents so that investors do not pay the base management fee on such assets) at the end of the two most recently completed calendar quarters and is payable quarterly in arrears. See Management Agreements Management Fee. The management fee referenced in the table above is based on actual amounts incurred during the year ended September 30, 2011 by GC Advisors in its capacity as investment adviser to us and collateral manager to the Securitization Issuer.
- (4) GC Advisors, as collateral manager for the Securitization Issuer under the collateral management agreement, is entitled to receive an annual fee in an amount equal to 0.35% of the adjusted principal balance of the portfolio loans held by the Securitization Issuer at the beginning of the collection period relating to each payment date, which is payable in arrears on each payment date. This fee, which is less than the management fee payable under the Investment Advisory Agreement, is paid directly by the Securitization Issuer to GC Advisors and offset against such management fee. Accordingly, the 1.375% management fee paid by us to GC Advisors under the Investment Advisory Agreement on all of our assets, including those indirectly held through the Securitization Issuer, is reduced, on a dollar-for-dollar basis, by an amount equal to such 0.35% fee paid to GC Advisors by the Securitization Issuer. This fee may be waived by the collateral manager. The collateral management agreement does not include any incentive

fee payable to GC Advisors.

For purposes of this table, the SEC requires that the Management fees percentage be calculated as a percentage of net assets attributable to common stockholders, rather than total assets, including assets that have been funded with borrowed monies because common stockholders bear all of this cost. If the base management fee portion of the Management fees percentage were calculated instead as a percentage of

10

TABLE OF CONTENTS

our total assets, our base management fee portion of the Management fees percentage would be approximately 1.38% of total assets. The base management fee in the table above is based on net assets of \$316.5 million and leverage of \$237.7 million as of September 30, 2011.

The incentive fee referenced in the table above is based on actual amounts incurred during the year ended September 30, 2011. We have structured the calculation of the incentive fee to include a fee limitation such that no (5) incentive fee will be paid to GC Advisors for any quarter if, after such payment, the cumulative incentive fees paid to GC Advisors since the effective date of our election to become a business development company would be greater than 20.0% of our Cumulative Pre-Incentive Fee Net Income.

We accomplish this limitation by subjecting each quarterly incentive fee payable under the Income and Capital Gain Incentive Fee Calculation to a cap (the Incentive Fee Cap). The Incentive Fee Cap in any quarter is equal to the difference between (a) 20.0% of Cumulative Pre-Incentive Fee Net Income and (b) cumulative incentive fees of any kind paid to GC Advisors by Golub Capital BDC since April 13, 2010, the effective date of our election to become a business development company. To the extent the Incentive Fee Cap is zero or a negative value in any quarter, no incentive fee would be payable in that quarter. Cumulative Pre-Incentive Fee Net Income is equal to the sum of (a) Pre-Incentive Fee Net Investment Income for each period since April 13, 2010, the effective date of our election to be regulated as a business development company, and (b) cumulative aggregate realized capital gains, cumulative aggregate realized capital losses, cumulative aggregate unrealized capital depreciation and cumulative aggregate unrealized capital appreciation since April 13, 2010, the effective date of our election to be regulated as a business development company.

The income and capital gain incentive fee calculation (the Income and Capital Gain Incentive Fee Calculation) has two parts. The income component is calculated quarterly in arrears based on our Pre-Incentive Fee Net Investment Income for the immediately preceding calendar quarter. For purposes of the computation of the incentive fee, we treat the interest spread between the interest received on the reference assets underlying the total return swap, or the TRS, between GCMF and Citibank, N.A., or Citibank, and the interest paid to Citibank on the settled notional value of the TRS as part of the income component of the incentive fee.

Pre-Incentive Fee Net Investment Income does not include any realized capital gains, realized capital losses or unrealized capital appreciation or depreciation. Because of the structure of the income component, it is possible that an incentive fee may be calculated under this formula with respect to a period in which we have incurred a loss. For example, if we receive Pre-Incentive Fee Net Investment Income in excess of the hurdle rate (as defined below) for a calendar quarter, the income component will result in a positive value and an incentive fee will be paid unless the payment of such incentive fee would cause us to pay incentive fees on a cumulative basis that exceed 20.0% of our Cumulative Pre-Incentive Fee Net Income.

Pre-Incentive Fee Net Investment Income, expressed as a rate of return on the value of our net assets (defined as total assets less indebtedness and before taking into account any incentive fees payable during the period) at the end of the immediately preceding calendar quarter, is compared to a fixed hurdle rate of 2.0% quarterly. If market interest rates rise, we may be able to invest our funds in debt instruments that provide for a higher return, which would increase our Pre-Incentive Fee Net Investment Income and make it easier for GC Advisors to surpass the fixed hurdle rate and receive an incentive fee based on such net investment income. Our Pre-Incentive Fee Net Investment Income used to calculate this part of the incentive fee is also included in the amount of our total assets (excluding cash and cash equivalents but including assets purchased with borrowed funds and securitization-related assets, unrealized depreciation or appreciation on derivative instruments and cash collateral on deposit with custodian) used to calculate the 1.375% base management fee.

We calculate the income component of the Income and Capital Gain Incentive Fee Calculation with respect to our Pre-Incentive Fee Net Investment Income quarterly, in arrears, as follows:

zero in any calendar quarter in which the Pre-Incentive Fee Net Investment Income does not exceed the hurdle rate;

11

TABLE OF CONTENTS

100.0% of our Pre-Incentive Fee Net Investment Income with respect to that portion of such Pre-Incentive Fee Net Investment Income, if any, that exceeds the hurdle rate but is less than 2.5% in any calendar quarter. We refer to this portion of our Pre-Incentive Fee Net Investment Income (which exceeds the hurdle rate but is less than 2.5%) as the catch-up provision. The catch-up is meant to provide GC Advisors with 20.0% of the Pre-Incentive Fee Net Investment Income as if a hurdle rate did not apply if this net investment income exceeds 2.5% in any calendar quarter; and
20.0% of the amount of our Pre-Incentive Fee Net Investment Income, if any, that exceeds 2.5% in any calendar quarter.

The sum of these calculations yields the Income Incentive Fee. This amount is appropriately adjusted for any share issuances or repurchases during the quarter.

The second part of the Incentive Fee Calculation (the Capital Gain Incentive Fee) equals (a) 20.0% of our Capital Gain Incentive Fee Base, if any, calculated in arrears as of the end of each calendar year (or upon termination of the Investment Advisory Agreement, as of the termination date), commencing with the calendar year ending December 31, 2010, less (b) the aggregate amount of any previously paid Capital Gain Incentive Fees. Our Capital Gain Incentive Fee Base equals the sum of (1) our realized capital gains (including realized capital gains on the reference assets underlying the TRS as well as capital gains on futures contracts), if any, on a cumulative positive basis from April 13, 2010, the effective date of our election to become a business development company, through the end of each calendar year, (2) all realized capital losses (including realized capital losses on the reference assets underlying the TRS as well as capital losses on futures contracts) on a cumulative basis and (3) all unrealized capital depreciation (including unrealized capital depreciation on the reference assets underlying the TRS as well as unrealized capital depreciation on futures contracts) on a cumulative basis.

The cumulative aggregate realized capital losses are calculated as the sum of the amounts by which (a) the net sales price of each investment in our portfolio when sold is less than (b) the accreted or amortized cost base of such investment.

The cumulative aggregate realized capital gains are calculated as the sum of the differences, if positive, between (a) the net sales price of each investment in our portfolio when sold and (b) the accreted or amortized cost basis of such investment.

The aggregate unrealized capital depreciation is calculated as the sum of the differences, if negative, between (a) the valuation of each investment in our portfolio as of the applicable Capital Gain Incentive Fee calculation date and (b) the accreted or amortized cost basis of such investment.

As described above, the incentive fee will not be paid at any time where after such payment the cumulative incentives fees paid to date would be greater than 20.0% of the Cumulative Pre-Incentive Net Income since April 13, 2010. We will accrue the Capital Gain Incentive Fee if, on a cumulative basis, the sum of net realized gains/(losses) plus net unrealized appreciation/(depreciation) is positive. The Capital Gain Incentive Fee is calculated on a cumulative basis from the date we elected to become a business development company through the end of each calendar year. For the year ended September 30, 2011, the Capital Gain Incentive Fee was zero. For a more detailed discussion of the calculation of the incentive fee, see Management Agreements Management Fee.

(6) Interest payments on borrowed funds represents our annualized interest expense as of September 30, 2011 and includes interest payable on the notes issued by the Securitization Issuer. For the year ended September 30, 2011, the effective annualized average interest rate, which includes all interest and amortization of debt issuance costs on the Debt Securitization, was 3.2%. Debt issuance costs represent fees and other direct incremental costs incurred in connection with the Debt Securitization. These fees include a \$1.74 million one-time structuring and placement fee paid to Wells Fargo Securities, LLC as well as legal fees, accounting fees, rating agency fees, and all other costs associated with the Debt Securitization. We do not currently anticipate issuing debt securities or preferred stock in the next 12 months.

Includes our overhead expenses, including payments under the Administration Agreement based on our allocable (7) portion of overhead and other expenses incurred by GC Service and any acquired fund fees and expenses that are not required to be disclosed separately. See Management Agreements Administration

12

TABLE OF CONTENTS

Agreement. Other expenses are based on actual amounts incurred during the year ended September 30, 2011. Other expenses also includes the ongoing administrative expenses to the trustee, collateral manager, independent accountants, legal counsel, rating agencies and independent managers in connection with developing and maintaining reports and providing required services in connection with the administration of the Debt Securitization. The administrative expenses are paid by the Securitization Issuer on each payment date in two parts: (1) a component that is paid in a priority to other amounts distributed by the Securitization Issuer, subject to a cap equal to the sum of 0.04% per annum on the adjusted principal balance of the portfolio loans and other assets held by the Securitization Issuer on the last day of the collection period relating to such payment date, plus \$150,000 per annum, and (2) a component that is paid in a subordinated position relative to other amounts distributed by the Securitization Issuer, equal to any amounts that exceed the aforementioned administrative expense cap.

All of our expenses, including all expenses of the Debt Securitization, are disclosed in the appropriate line items under Annual Expenses (as a percentage of net assets attributable to common stock). Total annual expenses as a percentage of consolidated net assets attributable to common stock are higher than the total annual expenses percentage would be for a company that is not leveraged. We borrow money to leverage our net assets and increase (8)our total assets. The SEC requires that the Total annual expenses percentage be calculated as a percentage of net assets (defined as total assets less indebtedness and after taking into account any incentive fees payable during the period), rather than the total assets, including assets that have been funded with borrowed monies. The reason for presenting expenses as a percentage of net assets attributable to common stockholders is that our common stockholders bear all of our fees and expenses.

Example

The following example demonstrates the projected dollar amount of total cumulative expenses that would be incurred over various periods with respect to a hypothetical investment in our common stock. **This example and the expenses in the table above should not be considered a representation of our future expenses, and actual expenses (including the cost of debt, if any, and other expenses) may be greater or less than those shown.**

	1 year	3 years	5 years	10 years
You would pay the following expenses on a \$1,000 investment, assuming a 5% annual return	\$ 52	\$ 155	\$ 257	\$ 512

While the example assumes, as required by the SEC, a 5% annual return, our performance will vary and may result in a return greater or less than 5%. The incentive fee under the Investment Advisory Agreement, which, assuming a 5% annual return, would either not be payable or have an immaterial impact on the expense amounts shown above, is not included in the example. Under our Investment Advisory Agreement, no incentive fee would be payable if we have a 5% annual return. If we achieve sufficient returns on our investments, including through the realization of capital gains, to trigger an incentive fee of a material amount, our expenses, and returns to our investors, would be higher.

The example assumes that all dividends and other distributions are reinvested at net asset value. Under certain circumstances, reinvestment of dividends and other distributions under our dividend reinvestment plan may occur at a price per share that differs from net asset value. See Dividend Reinvestment Plan for more information.

TABLE OF CONTENTS

RISK FACTORS

Investing in our securities involves a number of significant risks. Before you invest in our securities, you should be aware of various risks, including those described below. You should carefully consider these risk factors, together with all of the other information included in this prospectus and the applicable prospectus supplement, before you decide whether to make an investment in our securities. The risks set out below are not the only risks we face. Additional risks and uncertainties not presently known to us or not presently deemed material by us may also impair our operations and performance. If any of the following events occur, our business, financial condition, results of operations and cash flows could be materially and adversely affected. In such case, our net asset value and the trading price of our common stock could decline, and you may lose all or part of your investment. The risk factors described below are the principal risk factors associated with an investment in us as well as those factors generally associated with an investment company with investment objectives, investment policies, capital structure or trading markets similar to ours.

Risks Relating to Our Business and Structure

We have a limited operating history as a business development company.

Our predecessor, GCMF, was formed in June 2007 and commenced operations in July 2007. Prior to the completion of our initial public offering in April 2010, we did not operate as a business development company. As a result of our limited operating history, we are subject to the business risks and uncertainties associated with recently formed businesses, including the risk that we will not achieve our investment objective and that the value of your investment could decline substantially. In addition, we have elected to be treated as a RIC under the Code.

The 1940 Act and the Code impose numerous constraints on the operations of business development companies and RICs that do not apply to other accounts sponsored or managed by GC Advisors and its affiliates. Business development companies are required, for example, to invest at least 70% of their total assets in qualifying assets. Moreover, qualification for taxation as a RIC requires satisfaction of source-of-income, asset diversification and distribution requirements. Neither we nor GC Advisors has significant experience operating under these constraints, which may hinder our ability to take advantage of attractive investment opportunities and to achieve our investment objective.

We are dependent upon key personnel of GC Advisors for our future success and upon their access to the investment professionals and partners of Golub Capital and its affiliates.

We do not have any internal management capacity or employees. We depend on the diligence, skill and network of business contacts of the senior professionals of GC Advisors to achieve our investment objective. We expect that GC Advisors will evaluate, negotiate, structure, close and monitor our investments in accordance with the terms of the Investment Advisory Agreement. We can offer no assurance, however, that the senior professionals of GC Advisors will continue to provide investment advice to us. If these individuals do not maintain their existing relationships with Golub Capital and its affiliates and do not develop new relationships with other sources of investment opportunities, we may not be able to grow our investment portfolio. In addition, individuals with whom the senior professionals of GC Advisors have relationships are not obligated to provide us with investment opportunities. Therefore, we can offer no assurance that such relationships will generate investment opportunities for us.

GC Advisors is an affiliate of Golub Capital and depends upon access to the investment professionals and other resources of Golub Capital and its affiliates to fulfill its obligations to us under the Investment Advisory Agreement. GC Advisors also depends upon Golub Capital to obtain access to deal flow generated by the professionals of Golub Capital and its affiliates. Under the Staffing Agreement, Golub Capital provides GC Advisors with the resources necessary to fulfill these obligations. The Staffing Agreement provides that Golub Capital makes available to GC Advisors experienced investment professionals and provides access to the senior investment personnel of Golub Capital for purposes of evaluating, negotiating, structuring, closing and monitoring our investments. We are not a party to the Staffing Agreement and cannot assure you that Golub Capital will fulfill its obligations under the agreement. If Golub Capital fails to perform, we cannot assure you that GC Advisors will enforce the Staffing Agreement, that such agreement will not be terminated by either party or that we will continue to have access to the investment professionals of Golub Capital and its affiliates or their information and deal flow.

TABLE OF CONTENTS

GC Advisors' investment committee provides oversight over our investment activities. GC Advisors' investment committee consists of two members of our board of directors and two employees of Golub Capital. The loss of any member of GC Advisors' investment committee or of other senior professionals of GC Advisors and its affiliates would limit our ability to achieve our investment objective and operate as we anticipate. This could have a material adverse effect on our financial condition, results of operations and cash flows.

Our business model depends to a significant extent upon strong referral relationships with sponsors. Any inability of GC Advisors to maintain or develop these relationships, or the failure of these relationships to generate investment opportunities, could adversely affect our business.

We depend upon GC Advisors to maintain Golub Capital's relationships with sponsors, and we intend to rely to a significant extent upon these relationships to provide us with potential investment opportunities. If GC Advisors fails to maintain such relationships, or to develop new relationships with other sponsors or sources of investment opportunities, we will not be able to grow our investment portfolio. In addition, individuals with whom the principals of GC Advisors have relationships are not obligated to provide us with investment opportunities, and, therefore, we can offer no assurance that these relationships will generate investment opportunities for us in the future.

We may not replicate the historical results achieved by our predecessor, GCMF, or other entities managed or sponsored by members of GC Advisors' investment committee, or by GC Advisors or its affiliates.

Our investments may differ from those of our predecessor, GCMF, and existing accounts that are or have been sponsored or managed by members of GC Advisors' investment committee, GC Advisors or affiliates of GC Advisors. Investors in our securities are not acquiring an interest in any accounts that are or have been sponsored or managed by members of GC Advisors' investment committee, GC Advisors or affiliates of GC Advisors. We may consider co-investing in portfolio investments with other accounts sponsored or managed by members of GC Advisors' investment committee, GC Advisors or its affiliates. Any such investments will be subject to regulatory limitations and approvals by directors who are not interested persons, as defined in the 1940 Act. We can offer no assurance, however, that we will obtain such approvals or develop opportunities that comply with such limitations. We also cannot assure you that we will replicate the historical results achieved by members of the investment committee, and we caution you that our investment returns could be substantially lower than the returns achieved by them in prior periods. Additionally, all or a portion of the prior results may have been achieved in particular market conditions which may never be repeated. Moreover, current or future market volatility and regulatory uncertainty may have an adverse impact on our future performance.

Our financial condition, results of operations and cash flows will depend on our ability to manage our business effectively.

Our ability to achieve our investment objective will depend on our ability to manage our business and to grow. This will depend, in turn, on GC Advisors' ability to identify, invest in and monitor companies that meet our investment criteria. The achievement of our investment objectives on a cost-effective basis will depend upon GC Advisors' execution of our investment process, its ability to provide competent, attentive and efficient services to us and, to a lesser extent, our access to financing on acceptable terms. GC Advisors will have substantial responsibilities under the Investment Advisory Agreement, as well as responsibilities in connection with the management of other accounts

Our business model depends to a significant extent upon strong referral relationships with sponsors. Any inability of

sponsored or managed by GC Advisors, members of GC Advisors' investment committee or Golub Capital and its affiliates. The personnel of GC Advisors and its affiliates, including GC Service, may be called upon to provide managerial assistance to our portfolio companies. These activities may distract them or slow our rate of investment. Any failure to manage our business and our future growth effectively could have a material adverse effect on our business, financial condition, results of operations and cash flows.

There are significant potential conflicts of interest that could affect our investment returns.

As a result of our arrangements with GC Advisors and its affiliates and GC Advisors' investment committee, there may be times when GC Advisors or such persons have interests that differ from those of our securityholders, giving rise to a conflict of interest.

TABLE OF CONTENTS

Conflicts related to obligations GC Advisors investment committee, GC Advisors or its affiliates have to other clients.

The members of GC Advisors investment committee serve or may serve as officers, directors or principals of entities that operate in the same or a related line of business as we do, or of accounts sponsored or managed by GC Advisors or its affiliates. Similarly, GC Advisors or its affiliates currently manage and may have other clients with similar or competing investment objectives. In serving in these multiple capacities, they may have obligations to other clients or investors in those entities, the fulfillment of which may not be in the best interests of us or our stockholders. For example, Lawrence E. Golub and David B. Golub have management responsibilities for other accounts sponsored or managed by GC Advisors or its affiliates. Our investment objective may overlap with the investment objectives of such affiliated accounts. For example, GC Advisors currently manages several private funds that are pursuing an investment strategy similar to ours, some of which are continuing to seek new capital commitments, and we may compete with these and other accounts sponsored or managed by GC Advisors and its affiliates for capital and investment opportunities. As a result, those individuals may face conflicts in the allocation of investment opportunities among us and other accounts advised by or affiliated with GC Advisors. GC Advisors will seek to allocate investment opportunities among eligible accounts in a manner that is fair and equitable over time and consistent with its allocation policy. However, we can offer no assurance that such opportunities will be allocated to us fairly or equitably in the short-term or over time. If sufficient securities or loan amounts are available to satisfy our and each such account's proposed investment, the opportunity will be allocated in accordance with GC Advisor's pre-transaction determination. Where there is an insufficient amount of an investment opportunity to fully satisfy us and other accounts sponsored or managed by GC Advisors or its affiliates, the allocation policy further provides that allocations among us and other accounts will generally be made pro rata based on the amount that each such party would have invested if sufficient securities or loan amounts were available. However, there can be no assurance that we will be able to participate in all investment opportunities that are suitable to us.

GC Advisors investment committee, GC Advisors or its affiliates may, from time to time, possess material nonpublic information, limiting our investment discretion.

Principals of GC Advisors and its affiliates and members of GC Advisors investment committee may serve as directors of, or in a similar capacity with, companies in which we invest, the securities of which are purchased or sold on our behalf. In the event that material nonpublic information is obtained with respect to such companies, or we become subject to trading restrictions under the internal trading policies of those companies or as a result of applicable law or regulations, we could be prohibited for a period of time from purchasing or selling the securities of such companies, and this prohibition may have an adverse effect on us.

Our management and incentive fee structure may create incentives for GC Advisors that are not fully aligned with the interests of our stockholders.

In the course of our investing activities, we pay management and incentive fees to GC Advisors. These fees are based on our average adjusted gross assets, which include assets purchased with borrowed funds and securitization-related assets, leverage, unrealized depreciation or appreciation on derivative instruments and cash collateral on deposit with custodian but adjusted to exclude cash and cash equivalents so that investors do not pay the base management fee on such assets. As a result, investors in our common stock will invest on a gross basis and receive distributions on a net basis after expenses, resulting in a lower rate of return than one might achieve through direct investments. Because these fees are based on our average adjusted gross assets, GC Advisors benefits when we incur debt or use leverage.

Although GC Advisors makes recommendations to our board of directors with respect to leverage policies, our board of directors determines our leverage policy, including approving in advance the incurrence of material indebtedness and the execution of material contracts. Additionally, under the incentive fee structure, GC Advisors benefits when we recognize capital gains and, because GC Advisors determines when a holding is sold, GC Advisors controls the timing of the recognition of such capital gains. Our board of directors is charged with protecting our interests by monitoring how GC Advisors addresses these and other conflicts of interests associated with its management services and compensation. While they are not expected to review or approve each borrowing, our independent directors periodically review GC Advisors' services and fees as well as its portfolio management

TABLE OF CONTENTS

decisions and portfolio performance. In connection with these reviews, our independent directors consider whether our fees and expenses (including those related to leverage) remain appropriate. As a result of this arrangement, GC Advisors or its affiliates may from time to time have interests that differ from those of our securityholders, giving rise to a conflict.

The part of the incentive fee payable to GC Advisors that relates to our net investment income is computed and paid on income that may include interest income that has been accrued but not yet received in cash. This fee structure may be considered to involve a conflict of interest for GC Advisors to the extent that it may encourage GC Advisors to favor debt financings that provide for deferred interest, rather than current cash payments of interest. GC Advisors may have an incentive to invest in deferred interest securities in circumstances where it would not have done so but for the opportunity to continue to earn the incentive fee even when the issuers of the deferred interest securities would not be able to make actual cash payments to us on such securities. This risk could be increased because GC Advisors is not obligated to reimburse us for any incentive fees received even if we subsequently incur losses or never receive in cash the deferred income that was previously accrued.

Our incentive fee may induce GC Advisors to make certain investments, including speculative investments.

The incentive fee payable by us to GC Advisors may create an incentive for GC Advisors to make investments on our behalf that are riskier or more speculative than would be the case in the absence of such compensation arrangement.

The way in which the incentive fee payable to GC Advisors is determined may encourage GC Advisors to use leverage to increase the return on our investments. Under certain circumstances, the use of leverage may increase the likelihood of default, which would disfavor our stockholders.

The incentive fee payable by us to GC Advisors also may create an incentive for GC Advisors to invest on our behalf in instruments that have a deferred interest feature. Under these investments, we would accrue the interest over the life of the investment but would not receive the cash income from the investment until the end of the term. Our net investment income used to calculate the income portion of our investment fee, however, includes accrued interest. Thus, a portion of this incentive fee would be based on income that we have not yet received in cash, such as market discount, debt instruments with payment-in-kind, or PIK, interest, preferred stock with PIK dividends and zero coupon securities.

Additionally, the incentive fee payable by us to GC Advisors may create an incentive for GC Advisors to cause us to realize capital gains or losses (including realized capital gains or losses on derivative instruments) that may not be in the best interests of us or our stockholders. Under the incentive fee structure, GC Advisors benefits when capital gains are recognized and, because GC Advisors determines when a holding is sold, GC Advisors controls the timing of the recognition of capital gains. Our board of directors is charged with protecting our interests by monitoring how GC Advisors addresses these and other conflicts of interest associated with its management services and compensation. While they are not expected to review or approve each borrowing, our independent directors periodically review GC Advisors' services and fees. In connection with these reviews, our independent directors consider whether our fees and expenses (including those related to leverage) remain appropriate.

The valuation process for certain of our portfolio holdings creates a conflict of interest.

The majority of our portfolio investments are expected to be made in the form of securities that are not publicly traded. As a result, our board of directors will determine the fair value of these securities in good faith as described

Our incentive fee may induce GC Advisors to make certain investments, including speculative investments

below in Many of our portfolio investments are recorded at fair value as determined in good faith by our board of directors and, as a result, there may be uncertainty as to the value of our portfolio investments. In connection with that determination, investment professionals from GC Advisors may provide our board of directors with portfolio company valuations based upon the most recent portfolio company financial statements available and projected financial results of each portfolio company. In addition, Lawrence E. Golub and David B. Golub have an indirect pecuniary interest in GC Advisors. The participation of GC Advisors investment professionals in our valuation process, and the indirect pecuniary interest in GC Advisors by Lawrence E. Golub and David B. Golub, could result in a conflict of interest as

17

TABLE OF CONTENTS

GC Advisors' management fee is based, in part, on our average adjusted gross assets (including leverage but excluding cash) and our incentive fees will be based, in part, on unrealized gains and losses.

Conflicts related to other arrangements with GC Advisors or its affiliates.

We have entered into a license agreement with Golub Capital Management LLC under which Golub Capital Management LLC has agreed to grant us a non-exclusive, royalty-free license to use the name Golub Capital. See Management Agreements License Agreement. In addition, we rent office space from GC Service, an affiliate of GC Advisors, and pay to GC Service our allocable portion of overhead and other expenses incurred by GC Service in performing its obligations under the Administration Agreement, such as rent and our allocable portion of the cost of our chief financial officer and chief compliance officer and their respective staffs. This creates conflicts of interest that our board of directors must monitor.

The Investment Advisory Agreement with GC Advisors and the Administration Agreement with GC Service were not negotiated on an arm's-length basis and may not be as favorable to us as if they had been negotiated with an unaffiliated third party.

The Investment Advisory Agreement and the Administration Agreement were negotiated between related parties. Consequently, their terms, including fees payable to GC Advisors, may not be as favorable to us as if they had been negotiated with an unaffiliated third party. In addition, we may choose not to enforce, or to enforce less vigorously, our rights and remedies under these agreements because of our desire to maintain our ongoing relationship with GC Advisors, GC Service and their respective affiliates. Any such decision, however, would breach our fiduciary obligations to our stockholders.

Our ability to enter into transactions with our affiliates will be restricted, which may limit the scope of investments available to us.

We are prohibited under the 1940 Act from participating in certain transactions with our affiliates without the prior approval of our independent directors and, in some cases, of the SEC. Any person that owns, directly or indirectly, five percent or more of our outstanding voting securities will be our affiliate for purposes of the 1940 Act, and we are generally prohibited from buying or selling any security from or to such affiliate, absent the prior approval of our independent directors. We consider GC Advisors and its affiliates to be our affiliates for such purposes. The 1940 Act also prohibits certain joint transactions with certain of our affiliates, which could include investments in the same portfolio company, without prior approval of our independent directors and, in some cases, of the SEC. We are prohibited from buying or selling any security from or to, among others, any person who owns more than 25% of our voting securities or certain of that person's affiliates, or entering into prohibited joint transactions with such persons, absent the prior approval of the SEC.

We may, however, invest alongside GC Advisors and its affiliates' other clients in certain circumstances where doing so is consistent with applicable law and SEC staff, or Staff, interpretations. For example, we may invest alongside such accounts consistent with guidance promulgated by the SEC Staff permitting us and such other accounts to purchase interests in a single class of privately placed securities so long as certain conditions are met, including that GC Advisors, acting on our behalf and on behalf of its other clients, negotiates no term other than price. We may also invest alongside GC Advisors' other clients as otherwise permissible under regulatory guidance, applicable regulations and GC Advisors' allocation policy. Under this allocation policy, GC Advisors determines separately the amount of

any proposed investment to be made by us and similar eligible accounts. We expect that these determinations will be made similarly for other accounts sponsored or managed by GC Advisors and its affiliates. If sufficient securities or loan amounts are available to satisfy our and each such account's proposed investment, the opportunity will be allocated in accordance with GC Advisors' pre-transaction determination. Where there is an insufficient amount of an investment opportunity to fully satisfy us and other accounts sponsored or managed by GC Advisors or its affiliates, the allocation policy further provides that allocations among us and other accounts will generally be made pro rata based on the amount that each such party would have invested if sufficient securities or loan amounts were available. However, we can offer no assurance that investment opportunities will be allocated to us fairly or equitably in the short-term or over time.

In situations in which co-investment with other accounts sponsored or managed by GC Advisors or its affiliates is not permitted or appropriate, such as when, in the absence of exemptive relief described below, we

TABLE OF CONTENTS

and such other entities may make investments in the same issuer or where the different investments could be expected to result in a conflict between our interests and those of other GC Advisors clients, GC Advisors will need to decide whether we or such other entity or entities will proceed with such investments. GC Advisors will make these determinations based on its policies and procedures, which generally require that such investment opportunities be offered to eligible accounts on a basis that is fair and equitable over time, including, for example, through random or rotational methods. Moreover, except in certain circumstances, we will be unable to invest in any issuer in which an account sponsored or managed by GC Advisors or its affiliates has previously invested. Similar restrictions limit our ability to transact business with our officers or directors or their affiliates. These restrictions may limit the scope of investment opportunities that would otherwise be available to us.

We may also be prohibited under the 1940 Act from knowingly participating in certain transactions with our affiliates without the prior approval of our board of directors who are not interested persons and, in some cases, without the prior approval of the SEC. The SEC has interpreted the business development company regulations governing transactions with affiliates to prohibit certain joint transactions between entities that share a common investment adviser.

We and GC Advisors have submitted an application for exemptive relief from the SEC to permit greater flexibility to negotiate the terms of co-investments if our board of directors determines that it would be advantageous for us to co-invest with other accounts sponsored or managed by GC Advisors or its affiliates in a manner consistent with our investment objectives, positions, policies, strategies and restrictions as well as regulatory requirements and other pertinent factors. We believe that co-investments by us and other accounts sponsored or managed by GC Advisors and its affiliates may afford us additional investment opportunities and an ability to achieve greater diversification.

Accordingly, our application for exemptive relief seeks an exemptive order permitting us to invest with accounts sponsored or managed by GC Advisors or its affiliates in the same portfolio companies under circumstances in which such investments would otherwise not be permitted under the 1940 Act. We expect that such exemptive relief permitting co-investments, if granted, would apply only if our independent directors review and approve each co-investment.

We operate in a highly competitive market for investment opportunities, which could reduce returns and result in losses.

A number of entities compete with us to make the types of investments that we plan to make. We compete with public and private funds, commercial and investment banks, commercial financing companies and, to the extent they provide an alternative form of financing, private equity and hedge funds. Many of our competitors are substantially larger and have considerably greater financial, technical and marketing resources than we do. For example, we believe some of our competitors may have access to funding sources that are not available to us. In addition, some of our competitors may have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments and establish more relationships than us. Furthermore, many of our competitors are not subject to the regulatory restrictions that the 1940 Act imposes on us as a business development company or the source of income, asset diversification and distribution requirements we must satisfy to maintain our qualification as a RIC. The competitive pressures we face may have a material adverse effect on our business, financial condition, results of operations and cash flows. As a result of this competition, we may not be able to take advantage of attractive investment opportunities from time to time, and we may not be able to identify and make investments that are consistent with our investment objective.

With respect to the investments we make, we do not seek to compete based primarily on the interest rates we offer, and we believe that some of our competitors may make loans with interest rates that will be lower than the rates we

offer. In the secondary market for acquiring existing loans, we compete generally on the basis of pricing terms. With respect to all investments, we may lose some investment opportunities if we do not match our competitors' pricing, terms and structure. However, if we match our competitors' pricing, terms and structure, we may experience decreased net interest income, lower yields and increased risk of credit loss. We may also compete for investment opportunities with accounts managed or sponsored by GC Advisors or its affiliates. Although GC Advisors allocates opportunities in accordance with its policies and procedures, allocations to such other accounts will reduce the amount and frequency of opportunities available to us and may not be in the best interests of us and our securityholders. Moreover, the performance of investments will

TABLE OF CONTENTS

not be known at the time of allocation. See Risk Factors Risks Relating to Our Business and Structure There are significant potential conflicts of interest that could affect our investment returns, Conflicts related to obligations GC Advisors investment committee, GC Advisors or its affiliates have to other clients and Related Party Transactions and Certain Relationships.

We will be subject to corporate-level income tax if we are unable to qualify as a RIC.

To qualify as a RIC under the Code, we must meet certain source-of-income, asset diversification and distribution requirements. The distribution requirement for a RIC is satisfied if we distribute at least 90% of our net ordinary income and net short-term capital gains in excess of net long-term capital losses, if any, to our stockholders on an annual basis. We are subject, to the extent we use debt financing, to certain asset coverage ratio requirements under the 1940 Act and financial covenants under loan and credit agreements that could, under certain circumstances, restrict us from making distributions necessary to qualify as a RIC. If we are unable to obtain cash from other sources, we may fail to qualify as a RIC and, thus, may be subject to corporate-level income tax. To qualify as a RIC, we must also meet certain asset diversification requirements at the end of each calendar quarter. Failure to meet these requirements may result in our having to dispose of certain investments quickly in order to prevent the loss of our qualification as a RIC. Because most of our investments will be in private or thinly traded public companies, any such dispositions could be made at disadvantageous prices and may result in substantial losses. If we fail to qualify as a RIC for any reason and become subject to corporate-level income tax, the resulting corporate taxes could substantially reduce our net assets, the amount of income available for distributions to stockholders and the amount of our distributions and the amount of funds available for new investments. Such a failure would have a material adverse effect on us and our securityholders. See Material U.S. Federal Income Tax Considerations Taxation as a RIC.

We may need to raise additional capital to grow because we must distribute most of our income.

We may need additional capital to fund new investments and grow our portfolio of investments. We intend to access the capital markets periodically to issue debt or equity securities or borrow from financial institutions in order to obtain such additional capital. Unfavorable economic conditions could increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. A reduction in the availability of new capital could limit our ability to grow. In addition, we are required to distribute at least 90% of our net ordinary income and net short-term capital gains in excess of net long-term capital losses, if any, to our stockholders to maintain our qualification as a RIC. As a result, these earnings are not available to fund new investments. An inability to access the capital markets successfully could limit our ability to grow our business and execute our business strategy fully and could decrease our earnings, if any, which may have an adverse effect on the value of our securities.

We may have difficulty paying our required distributions if we recognize income before, or without, receiving cash representing such income.

For U.S. federal income tax purposes, we include in income certain amounts that we have not yet received in cash, such as the accretion of original issue discount. This may arise if we receive warrants in connection with the making of a loan and in other circumstances, or through contracted PIK interest, which represents contractual interest added to the loan balance and due at the end of the loan term. Such original issue discount, which could be significant relative to our overall investment activities, or increases in loan balances as a result of contracted PIK arrangements, is included in income before we receive any corresponding cash payments. We also may be required to include in

income certain other amounts that we do not receive in cash.

That part of the incentive fee payable by us that relates to our net investment income is computed and paid on income that may include interest that has been accrued but not yet received in cash, such as market discount, debt instruments with PIK interest, preferred stock with PIK dividends and zero coupon securities. If a portfolio company defaults on a loan that is structured to provide accrued interest, it is possible that accrued interest previously used in the calculation of the incentive fee will become uncollectible.

Since in certain cases we may recognize income before or without receiving cash representing such income, we may have difficulty meeting the requirement to distribute at least 90% of our net ordinary income

TABLE OF CONTENTS

and net short-term capital gains in excess of net long-term capital losses, if any, to our stockholders to maintain our qualification as a RIC. In such a case, we may have to sell some of our investments at times we would not consider advantageous, raise additional debt or equity capital or reduce new investment originations to meet these distribution requirements. If we are not able to obtain such cash from other sources, we may fail to qualify as a RIC and thus be subject to corporate-level income tax. See Material U.S. Federal Income Tax Considerations Taxation as a RIC.

Regulations governing our operation as a business development company affect our ability to, and the way in which we, raise additional capital. As a business development company, the necessity of raising additional capital exposes us to risks, including the typical risks associated with leverage.

We may issue debt securities or preferred stock and/or borrow money from banks or other financial institutions, which we refer to collectively as senior securities, up to the maximum amount permitted by the 1940 Act. Under the provisions of the 1940 Act, we are permitted as a business development company to issue senior securities in amounts such that our asset coverage ratio, as defined in the 1940 Act, equals at least 200% of gross assets (other than the SBA debentures of GC SBIC IV, L.P.) less all liabilities and indebtedness not represented by senior securities (other than the SBA debentures of GC SBIC IV, L.P.), after each issuance of senior securities. If the value of our assets declines, we may be unable to satisfy this ratio. If that happens, we may be required to sell a portion of our investments and, depending on the nature of our leverage, repay a portion of our indebtedness at a time when such sales may be disadvantageous. Also, any amounts that we use to service our indebtedness would not be available for distributions to our common stockholders. If we issue senior securities, we will be exposed to typical risks associated with leverage, including an increased risk of loss. As of September 30, 2011, we had \$237.7 million of outstanding borrowings, including \$174.0 million outstanding under the Debt Securitization, \$61.3 million of SBA debentures and \$2.4 million under the Credit Facility.

In the absence of an event of default, no person or entity from which we borrow money will have a veto right or voting power over our ability to set policy, make investment decisions or adopt investment strategies. If we issue preferred stock, which is another form of leverage, the preferred stock would rank senior to common stock in our capital structure, preferred stockholders would have separate voting rights on certain matters and might have other rights, preferences or privileges more favorable than those of our common stockholders, and the issuance of preferred stock could have the effect of delaying, deferring or preventing a transaction or a change of control that might involve a premium price for holders of our common stock or otherwise be in your best interest. Holders of our common stock will directly or indirectly bear all of the costs associated with offering and servicing any preferred stock that we issue.

In addition, any interests of preferred stockholders may not necessarily align with the interests of holders of our common stock and the rights of holders of shares of preferred stock to receive dividends would be senior to those of holders of shares of our common stock. We do not, however, anticipate issuing preferred stock in the next 12 months.

We are not generally able to issue and sell our common stock at a price below net asset value per share. We may, however, sell our common stock, or warrants, options or rights to acquire our common stock, at a price below the then-current net asset value per share of our common stock if our board of directors determines that such sale is in the best interests of us and our stockholders, and if our stockholders approve such sale. In any such case, the price at which our securities are to be issued and sold may not be less than a price that, in the determination of our board of directors, closely approximates the market value of such securities (less any distributing commission or discount). If we raise additional funds by issuing common stock or senior securities convertible into, or exchangeable for, our common stock, then the percentage ownership of our stockholders at that time will decrease, and you might experience dilution.

We are subject to risks associated with the Debt Securitization.

As a result of the Debt Securitization, we are subject to a variety of risks, including those set forth below.

21

TABLE OF CONTENTS

We are subject to certain risks as a result of our indirect interests in the junior notes and membership interests of the Securitization Issuer.

Under the terms of the master loan sale agreement governing the Debt Securitization, (1) we sold and/or contributed to Holdings all of our ownership interest in our portfolio loans and participations for the purchase price and other consideration set forth in the master loan sale agreement and (2) Holdings, in turn, sold and/or contributed to the Securitization Issuer all of its ownership interest in such portfolio loans and participations for the purchase price and other consideration set forth in the master loan sale agreement. Following these transfers, the Securitization Issuer, and not Holdings or us, held all of the ownership interest in such portfolio loans and participations. As a result of the Debt Securitization, we hold indirectly through Holdings a combination of junior notes comprised of Class B Notes and Subordinated Notes as well as membership interests, which comprise 100% of the equity interests, in the Securitization Issuer. As a result, we consolidate the financial statements of Holdings and the Securitization Issuer, as well as our other subsidiaries, in our consolidated financial statements. Because each of Holdings and the Securitization Issuer is disregarded as an entity separate from its owner for U.S. federal income tax purposes, the sale or contribution by us to Holdings, and by Holdings to the Securitization Issuer, did not constitute a taxable event for U.S. federal income tax purposes. If the U.S. Internal Revenue Service were to take a contrary position, there could be a material adverse effect on our business, financial condition, results of operations or cash flows. The securities issued by the Securitization Issuer, or by any securitization vehicle we sponsor in the future, could be acquired by another business development company or securitization vehicle subject to the satisfaction of certain conditions. We may also, from time to time, hold asset-backed securities, or the economic equivalent thereof, issued by a securitization vehicle sponsored by another business development company to the extent permitted under the 1940 Act.

The Subordinated Notes and membership interests in the Securitization Issuer are subordinated obligations of the Securitization Issuer.

The Subordinated Notes are the most junior class of notes issued by the Securitization Issuer, are subordinated in priority of payment to every other class of notes issued by the Securitization Issuer and are subject to certain payment restrictions set forth in the indenture governing the notes. Therefore, Holdings only receives cash distributions on the Subordinated Notes if the Securitization Issuer has made all cash interest payments to all other notes it has issued, and we only receive cash distributions in respect of our indirect ownership of the Securitization Issuer to the extent that Holdings receives any cash distributions in respect of its direct ownership of the Securitization Issuer. The Subordinated Notes are also unsecured and rank behind all of the secured creditors, known or unknown, of the Securitization Issuer, including the holders of the senior notes it has issued. Consequently, to the extent that the value of the Securitization Issuer's portfolio of loan investments has been reduced as a result of conditions in the credit markets, or as a result of defaulted loans or individual fund assets, the value of the Subordinated Notes at their redemption could be reduced.

The membership interests in the Securitization Issuer represent all of the equity interest in the Securitization Issuer. As such, the holder of the membership interests is the residual claimant on distributions, if any, made by the Securitization Issuer after holders of all classes of notes issued by the Securitization Issuer have been paid in full on each payment date or upon maturity of such notes under the Debt Securitization documents. Such payments may be made by the Securitization Issuer only to the extent permitted under the Debt Securitization documents on any payment date or upon payment in full of the notes issued by the Securitization Issuer.

The interests of holders of the senior classes of securities issued by the Securitization Issuer may not be aligned with our interests.

The Class A Notes are the debt obligations ranking senior in right of payment to other securities issued by the Securitization Issuer in the Debt Securitization. As such, there are circumstances in which the interests of holders of the Class A Notes may not be aligned with the interests of holders of the other classes of notes issued by, and membership interests of, the Securitization Issuer. For example, under the terms of the Class A Notes, holders of the Class A Notes have the right to receive payments of principal and interest prior to holders of the Class B Notes, the Subordinated Notes and the membership interests.

TABLE OF CONTENTS

For as long as the Class A Notes remain outstanding, holders of the Class A Notes comprise the Controlling Class under the Debt Securitization and, as such, they have the right to act in certain circumstances with respect to the portfolio loans in ways that may benefit their interests but not the interests of holders of more junior classes of notes and membership interests, including by exercising remedies under the indenture in the Debt Securitization.

If an event of default has occurred and acceleration occurs in accordance with the terms of the indenture, the most senior class of notes then outstanding will be paid in full before any further payment or distribution on the more junior classes of notes and membership interests. In addition, if an event of default occurs, holders of a majority of the Controlling Class will be entitled to determine the remedies to be exercised under the indenture, subject to the terms of the indenture. For example, upon the occurrence of an event of default with respect to the notes issued by the Securitization Issuer, the trustee or holders of a majority of the Controlling Class may declare the principal, together with any accrued interest, of all the notes of such class and any junior classes to be immediately due and payable. This would have the effect of accelerating the principal on such notes, triggering a repayment obligation on the part of the Securitization Issuer. If at such time the portfolio loans were not performing well, the Securitization Issuer may not have sufficient proceeds available to enable the trustee under the indenture to repay the obligations of holders of the Class B Notes or the Subordinated Notes, or to pay a dividend to holders of the membership interests.

Remedies pursued by the Controlling Class could be adverse to the interests of the holders of the notes that are subordinated to the Controlling Class (which would include the Class B Notes and Subordinated Notes to the extent the Class A Notes constitute the Controlling Class), and the Controlling Class will have no obligation to consider any possible adverse effect on such other interests. Thus, we cannot assure you that any remedies pursued by the Controlling Class will be in the best interests of Holdings or that Holdings will receive any payments or distributions upon an acceleration of the notes. Any failure of the Securitization Issuer to make distributions on the notes we indirectly hold, whether as a result of an event of default or otherwise, could have a material adverse effect on our business, financial condition, results of operations and cash flows and may result in an inability of us to make distributions sufficient to maintain our status as a RIC.

The Securitization Issuer may fail to meet certain asset coverage tests.

Under the documents governing the Debt Securitization, there are two asset coverage tests applicable to the Class A Notes and Class B Notes. The first such test compares the amount of interest received on the portfolio loans held by the Securitization Issuer to the amount of interest payable in respect of the Class A Notes and Class B Notes. To meet this first test, interest received on the portfolio loans must equal at least 115% of the interest payable in respect of the Class A Notes and Class B Notes. The second such test compares the principal amount of the portfolio loans to the aggregate outstanding principal amount of the Class A Notes and Class B Notes. To meet this second test at any time, the aggregate principal amount of the portfolio loans must equal at least 158% of the outstanding principal amount of the Class A Notes and the Class B Notes, taken together. If either coverage test is not satisfied, interest and principal received by the Securitization Issuer are diverted on the following payment date to pay the Class A Notes in full and then the Class B Notes in full (in order of seniority) to the extent necessary to cause all coverage tests to be satisfied on a pro forma basis after giving effect to all payments made in respect of the notes, which we refer to as a mandatory redemption. If any asset coverage test with respect to the Class A Notes or Class B Notes is not met, proceeds from the portfolio of loan investments that otherwise would have been distributed to the Securitization Issuer and the holders of the Subordinated Notes will instead be used to redeem first the Class A Notes and then the Class B Notes, to the extent necessary to satisfy the applicable asset coverage tests or to obtain the necessary ratings confirmation.

The value of the Class B Notes could be adversely affected by a mandatory redemption because such redemption could result in the Class B Notes being redeemed at par at a time when they are trading in the secondary market at a

premium to their stated principal amount and when other investments bearing the same rate of interest may be difficult or expensive to acquire. A mandatory redemption could also result in a shorter investment duration than a holder of Class B Notes may have wanted or anticipated, which could, in turn, result in such a holder incurring breakage costs on related hedging transactions. In addition, the reinvestment period under the Debt Securitization may extend through as late as July 20, 2015, which could affect the value of the collateral securing the Class B Notes and the Subordinated Notes.

23

TABLE OF CONTENTS

We may not receive cash from the Securitization Issuer.

We receive cash from the Securitization Issuer only to the extent that Holdings receives payments on the Class B Notes, Subordinated Notes or membership interests. The Securitization Issuer may only make payments on such securities to the extent permitted by the payment priority provisions of the indenture governing the notes, which generally provides that principal payments on the Class B Notes and the Subordinated Notes may not be made on any payment date unless all amounts owing under the Class A Notes are paid in full. In addition, if the Securitization Issuer does not meet the asset coverage tests or the interest coverage test set forth in the documents governing the Debt Securitization, cash would be diverted from the Class B Notes and the Subordinated Notes to first pay the Class A Notes in amounts sufficient to cause such tests to be satisfied. In the event that we fail to indirectly receive cash from the Securitization Issuer, we could be unable to make such distributions in amounts sufficient to maintain our status as a RIC, or at all.

We may be required to assume liabilities of the Securitization Issuer.

As part of the Debt Securitization, we entered into a master loan sale agreement under which we would be required to repurchase any loan (or participation interest therein) which was sold to the Securitization Issuer in breach of any representation or warranty made by us with respect to such loan on the date such loan was sold. To the extent we fail to satisfy any such repurchase obligation, the trustee may, on behalf of the Securitization Issuer, bring an action against us to enforce these repurchase obligations.

The structure of the Debt Securitization is intended to prevent, in the event of our bankruptcy or the bankruptcy of Holdings, the consolidation of the Securitization Issuer with our operations or those of Holdings. If the true sale of these assets were not respected in the event of our insolvency, a trustee or debtor-in-possession might reclaim the assets of the Securitization Issuer for our estate. However, in doing so, we would become directly liable for all of the indebtedness then outstanding under the Debt Securitization, which would equal the full amount of debt of the Securitization Issuer reflected on our consolidated balance sheet. In addition, we cannot assure that the recovery in the event we were consolidated with the Securitization Issuer for purposes of any bankruptcy proceeding would exceed the amount to which we would otherwise be entitled as an indirect holder of the Class B Notes and the Subordinated Notes had we not been consolidated with the Securitization Issuer.

In addition, in connection with the Debt Securitization, we indirectly gave the lenders certain customary representations with respect to the legal structure of the Securitization Issuer and the quality of the assets transferred to it. We remain indirectly liable for any incorrect statements or omissions for a period of at least one year, and potentially for the life of the Debt Securitization.

The Securitization Issuer may issue additional Subordinated Notes.

Under the terms of the Debt Securitization documents, the Securitization Issuer could issue additional Subordinated Notes and use the net proceeds of such issuance to purchase additional portfolio loans. Any such additional issuance, however, would require the consent of the collateral manager and the approval of a majority of the Subordinated Notes. Among the other conditions that must be satisfied in connection with an additional issuance of Subordinated Notes, the aggregate principal amount of all additional issuances of Subordinated Notes may not exceed \$116 million; the Securitization Issuer must notify each rating agency of such issuance prior to the issuance date; and the terms of the Subordinated Notes to be issued must be identical to the terms of previously issued Subordinated Notes (except that all monies due on such additional Subordinated Notes will accrue from the issue date of such notes and that the prices of such Subordinated Notes do not have to be identical to those of the initial Subordinated Notes). We do not

expect to cause the Securitization Issuer to issue any additional Subordinated Notes at this time, and the terms of the Debt Securitization documents do not provide for additional issuances of Class A Notes or Class B Notes.

We are subject to risks associated with the Credit Facility.

On July 21, 2011, Funding, our wholly owned subsidiary, entered into the Credit Facility. As a result of the Credit Facility, we are subject to a variety of risks, including those set forth below.

TABLE OF CONTENTS

Our interests in Funding are subordinated.

We own 100% of the equity interests in Funding. We consolidate the financial statements of Funding in our consolidated financial statements and treat the indebtedness of Funding as our leverage. Our interests in Funding are subordinated in priority of payment to every other obligation of Funding and are subject to certain payment restrictions set forth in the Credit Facility. We receive cash distributions on our equity interests in Funding only if Funding has made all required cash interest payments to the lenders. We cannot assure you that distributions on the assets held by Funding will be sufficient to make any distributions to us or that such distributions will meet our expectations.

Our equity interests in Funding rank behind all of the secured and unsecured creditors, known or unknown, of Funding, including the lenders. Consequently, to the extent that the value of Funding's portfolio of loan investments has been reduced as a result of conditions in the credit markets, defaulted loans, capital gains and losses on the underlying assets, prepayment or changes in interest rates, the return on our investment in Funding could be reduced. Accordingly, our investment in Funding may be subject to up to 100% loss.

We may not receive cash on our equity interests from Funding.

We receive cash from Funding only to the extent that we receive distributions on our equity interests in Funding. Funding may make payments on such interests only to the extent permitted by the payment priority provisions of the Credit Facility. The Credit Facility generally provides that payments on such interests may not be made on any payment date unless all amounts owing to the lenders and other secured parties are paid in full. In addition, if Funding does not meet the asset coverage tests or the interest coverage test set forth in the Credit Facility documents, cash would be diverted from us to first pay the Lender in amounts sufficient to cause such tests to be satisfied. In the event that we fail to receive cash from Funding, we could be unable to make distributions to our stockholders in amounts sufficient to maintain our status as a RIC, or at all. We also could be forced to sell investments in portfolio companies at less than their fair value in order to continue making such distributions.

The ability to sell investments held by Funding is limited.

The Credit Facility places significant restrictions on the servicer's ability to sell investments. As a result, there may be times or circumstances during which the servicer is unable to sell investments or take other actions that might be in our best interests.

Our ability to invest in public companies may be limited in certain circumstances.

To maintain our status as a business development company, we are not permitted to acquire any assets other than qualifying assets specified in the 1940 Act unless, at the time the acquisition is made, at least 70% of our total assets are qualifying assets (with certain limited exceptions). Subject to certain exceptions for follow-on investments and investments in distressed companies, an investment in an issuer that has outstanding securities listed on a national securities exchange may be treated as qualifying assets only if such issuer has a common equity market capitalization that is less than \$250 million at the time of such investment.

We intend to finance our investments with borrowed money, which will magnify the potential for gain or loss on amounts invested and may increase the risk of investing in us.

The use of leverage magnifies the potential for gain or loss on amounts invested. The use of leverage is generally considered a speculative investment technique and increases the risks associated with investing in our securities. We may issue senior debt securities to banks, insurance companies and other lenders. Lenders of these senior securities will have fixed dollar claims on our assets that are superior to the claims of our common stockholders, and we would expect such lenders to seek recovery against our assets in the event of a default. We may pledge up to 100% of our assets and may grant a security interest in all of our assets under the terms of any debt instruments we may enter into with lenders. In addition, under the terms of any credit facility or other debt instrument we enter into, we are likely to be required by its terms to use the net proceeds of any investments that we sell to repay a portion of the amount borrowed under such facility or instrument before applying such net proceeds to any other uses. If the value of our assets decreases,

TABLE OF CONTENTS

leveraging would cause our net asset value to decline more sharply than it otherwise would have had we not leveraged, thereby magnifying losses or eliminating our equity stake in a leveraged investment. Similarly, any decrease in our revenue or income will cause our net income to decline more sharply than it would have had we not borrowed. Such a decline would also negatively affect our ability to make distributions on our common stock or any outstanding preferred stock. Our ability to service our debt will depend largely on our financial performance and will be subject to prevailing economic conditions and competitive pressures. Moreover, as the base management fee payable to GC Advisors is payable based on our average adjusted gross assets, including those assets acquired through the use of leverage, GC Advisors has a financial incentive to incur leverage which may not be consistent with our stockholders' interests. In addition, our common stockholders will bear the burden of any increase in our expenses as a result of our use of leverage, including interest expenses and any increase in the base management fee payable to GC Advisors.

As a business development company, we generally are required to meet a coverage ratio of total assets to total borrowings and other senior securities, which include the Class A Notes issued by the Securitization Issuer, our other borrowings (other than the SBA debentures of GC SBIC IV, L.P.) and any preferred stock that we may issue in the future, of at least 200%. If this ratio declines below 200%, we cannot incur additional debt and could be required to sell a portion of our investments to repay some debt when it is disadvantageous to do so. This could have a material adverse effect on our operations, and we may not be able to make distributions. The amount of leverage that we employ will depend on GC Advisors' and our board of directors' assessment of market and other factors at the time of any proposed borrowing. We cannot assure you that we will be able to obtain credit at all or on terms acceptable to us.

On September 13, 2011, we received exemptive relief from the SEC allowing us to modify the asset coverage requirement to exclude the SBA debentures from this calculation. As such, our ratio of total consolidated assets to outstanding indebtedness may be less than 200%. This provides us with increased investment flexibility but also increases our risks related to leverage.

The following table illustrates the effect of leverage on returns from an investment in our common stock assuming various annual returns, net of expenses. The calculations in the table below are hypothetical and actual returns may be higher or lower than those appearing in the table below.

	Assumed Return on Our Portfolio (Net of Expenses)				
	-10%	-5%	0%	5%	10%
Corresponding return to common stockholder ⁽¹⁾	-20 %	-11 %	-2 %	6 %	15 %

(1) Assumes \$559.6 million in total assets, \$237.7 million in debt outstanding and \$316.5 million in net assets as of September 30, 2011 and an effective annual interest rate of 3.3%.

Based on our outstanding indebtedness of \$237.7 million as of September 30, 2011 and the effective annual interest rate of 3.3% as of that date, our investment portfolio would have been required to experience an annual return of at least 1.4% to cover annual interest payments on the outstanding debt.

To the extent we use debt to finance our investments, changes in interest rates will affect our cost of capital and net investment income.

To the extent we borrow money to make investments, our net investment income will depend, in part, upon the difference between the rate at which we borrow funds and the rate at which we invest those funds. As a result, we can

To the extent we use debt to finance our investments, changes in interest rates will affect our cost of capital and net

offer no assurance that a significant change in market interest rates will not have a material adverse effect on our net investment income in the event we continue to use debt to finance our investments. In periods of rising interest rates, our cost of funds will increase because the interest rates on the Class A Notes and Class B Notes issued under the Debt Securitization are floating, which could reduce our net investment income to the extent any debt investments have fixed interest rates. We expect that our long-term fixed-rate investments will be financed primarily with issuances of equity and long-term debt securities. We may use interest rate risk management techniques in an effort to limit our exposure to interest rate fluctuations. Such techniques may include various interest rate hedging activities to the extent permitted by the 1940 Act.

TABLE OF CONTENTS

You should also be aware that a rise in the general level of interest rates typically leads to higher interest rates applicable to our debt investments. Accordingly, an increase in interest rates may result in an increase of the amount of incentive fees payable to GC Advisors.

We have entered into a total return swap and may enter into other derivative transactions which expose us to certain risks, including risks similar to those associated with the use of leverage.

GCMF has entered into the TRS with Citibank. A total return swap is a contract in which one party agrees to make periodic payments to another party based on the change in the market value of the assets referenced by the total return swap, which may include a specified security, basket of securities or securities indices during the specified period, in return for periodic payments based on a fixed or variable interest rate. A total return swap typically is used to obtain exposure to a security or market without owning or taking physical custody of such security or investing directly in such market. A total return swap may effectively add leverage to a company's portfolio because, in addition to total net assets, the company is subject to investment exposure on the amount of securities subject to the total return swap.

A total return swap is also subject to the risk that a counterparty will default on its payment obligations under the arrangements or that one party will not be able to meet its obligations to the other. In the case of the TRS, we are required to post cash collateral amounts to secure our obligations to Citibank under the TRS. Citibank, however, is not required to collateralize any of its obligations to us under the TRS.

In the event that Citibank chooses to exercise its termination rights under the TRS, it is possible that we will owe more to Citibank or, alternatively, will be entitled to receive less from Citibank than it would have if we controlled the timing of such termination due to the existence of adverse market conditions at the time of such termination.

In addition, because a total return swap is a form of synthetic leverage, such arrangements are subject to risks similar to those associated with the use of leverage.

For purposes of determining our compliance with the asset coverage ratio test applicable to us as a business development company, we have agreed with the Staff of the SEC to treat the outstanding notional amount of the TRS, less the initial amount of any cash collateral required to be posted by us under the TRS, as a senior security for the life of that instrument. Further, for purposes of determining our compliance with the 70% qualifying assets requirement of the 1940 Act, we have agreed to treat the TRS, as a whole, as a non-qualifying asset. We may, however, accord different treatment to the TRS in the future in accordance with any applicable new rules or interpretations adopted by the Staff of the SEC.

We may enter into reverse repurchase agreements, which are another form of leverage.

We may enter into reverse repurchase agreements as part of our management of our temporary investment portfolio. Under a reverse repurchase agreement, we will effectively pledge our assets as collateral to secure a short-term loan. Generally, the other party to the agreement makes the loan in an amount equal to a percentage of the fair value of the pledged collateral. At the maturity of the reverse repurchase agreement, we will be required to repay the loan and correspondingly receive back our collateral. While used as collateral, the assets continue to pay principal and interest which are for the benefit of us.

We have entered into a total return swap and may enter into other derivative transactions which expose us to certain

Our use of reverse repurchase agreements, if any, involves many of the same risks involved in our use of leverage, as the proceeds from reverse repurchase agreements generally will be invested in additional securities. There is a risk that the market value of the securities acquired in the reverse repurchase agreement may decline below the price of the securities that we have sold but remain obligated to purchase. In addition, there is a risk that the market value of the securities retained by us may decline. If a buyer of securities under a reverse repurchase agreement were to file for bankruptcy or experience insolvency, we may be adversely affected. Also, in entering into reverse repurchase agreements, we would bear the risk of loss to the extent that the proceeds of such agreements at settlement are less than the fair value of the underlying securities being pledged. In addition, due to the interest costs associated with reverse repurchase agreements, our net asset value would decline, and, in some cases, we may be worse off than if we had not used such agreements.

TABLE OF CONTENTS

We are currently operating in a period of capital markets disruption and economic downturn.

The U.S. capital markets have experienced extreme volatility and disruption during the economic downturn that began in mid-2007, and the U.S. economy was in a recession for several consecutive calendar quarters during the same period. Disruptions in the capital markets have increased the spread between the yields realized on risk-free and higher risk securities, resulting in illiquidity in parts of the capital markets. A prolonged period of market illiquidity may have an adverse effect on our business, financial condition, results of operations and cash flows. Unfavorable economic conditions also could increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. These events could limit our investment originations, limit our ability to grow and negatively impact our operating results.

Adverse developments in the credit markets may impair our ability to enter into new debt financing arrangements.

During the economic downturn in the United States that began in mid-2007, many commercial banks and other financial institutions stopped lending or significantly curtailed their lending activity. In addition, in an effort to stem losses and reduce their exposure to segments of the economy deemed to be high risk, some financial institutions limited routine refinancing and loan modification transactions and even reviewed the terms of existing facilities to identify bases for accelerating the maturity of existing lending facilities. As a result, it may be difficult for us to finance the growth of our investments on acceptable economic terms, or at all.

If we do not invest a sufficient portion of our assets in qualifying assets, we could fail to qualify as a business development company or be precluded from investing according to our current business strategy.

As a business development company, we may not acquire any assets other than qualifying assets unless, at the time of and after giving effect to such acquisition, at least 70% of our total assets are qualifying assets. See Regulation Qualifying Assets.

In the future, we believe that most of our investments will constitute qualifying assets. However, we may be precluded from investing in what we believe are attractive investments if such investments are not qualifying assets for purposes of the 1940 Act. If we do not invest a sufficient portion of our assets in qualifying assets, we could violate the 1940 Act provisions applicable to business development companies. As a result of such violation, specific rules under the 1940 Act could prevent us, for example, from making follow-on investments in existing portfolio companies (which could result in the dilution of our position) or could require us to dispose of investments at inappropriate times in order to come into compliance with the 1940 Act. If we need to dispose of such investments quickly, it could be difficult to dispose of such investments on favorable terms. We may not be able to find a buyer for such investments and, even if we do find a buyer, we may have to sell the investments at a substantial loss. Any such outcomes would have a material adverse effect on our business, financial condition, results of operations and cash flows.

If we do not maintain our status as a business development company, we would be subject to regulation as a registered closed-end investment company under the 1940 Act. As a registered closed-end investment company, we would be subject to substantially more regulatory restrictions under the 1940 Act which would significantly decrease our operating flexibility.

Many of our portfolio investments are recorded at fair value as determined in good faith by our board of directors and, as a result, there may be uncertainty as to the value of our portfolio investments.

The majority of our portfolio investments take the form of securities that are not publicly traded. The fair value of securities and other investments that are not publicly traded may not be readily determinable, and we value these securities at fair value as determined in good faith by our board of directors, including to reflect significant events affecting the value of our securities. As discussed in more detail under Management's Discussion and Analysis of Financial Condition, Results of Operations and Cash Flows Critical Accounting Policies, most, if not all, of our investments (other than cash and cash equivalents) are classified as Level 3 under Accounting Standards Codification, or ASC, Topic 820, *Fair Value Measurement*. This means that our portfolio valuations are based on unobservable inputs and our own assumptions about how market participants would price the asset or liability in question. Inputs into the determination of fair value of our portfolio

TABLE OF CONTENTS

investments require significant management judgment or estimation. Even if observable market data are available, such information may be the result of consensus pricing information or broker quotes, which may include a disclaimer that the broker would not be held to such a price in an actual transaction. The non-binding nature of consensus pricing and/or quotes accompanied by disclaimers materially reduces the reliability of such information. We have retained the services of one or more independent service providers to review the valuation of these securities. The types of factors that the board of directors may take into account in determining the fair value of our investments generally include, as appropriate, comparison to publicly traded securities including such factors as yield, maturity and measures of credit quality, the enterprise value of a portfolio company, the nature and realizable value of any collateral, the portfolio company's ability to make payments and its earnings and discounted cash flow, the markets in which the portfolio company does business and other relevant factors. Because such valuations, and particularly valuations of private securities and private companies, are inherently uncertain, may fluctuate over short periods of time and may be based on estimates, our determinations of fair value may differ materially from the values that would have been used if a ready market for these securities existed. Our net asset value could be adversely affected if our determinations regarding the fair value of our investments were materially higher than the values that we ultimately realize upon the disposal of such securities.

We adjust quarterly the valuation of our portfolio to reflect our board of directors' determination of the fair value of each investment in our portfolio. Any changes in fair value are recorded in our consolidated statement of operations as net change in unrealized appreciation or depreciation.

We may experience fluctuations in our quarterly operating results.

We could experience fluctuations in our quarterly operating results due to a number of factors, including the interest rate payable on the debt securities we acquire, the default rate on such securities, the level of our expenses, variations in and the timing of the recognition of realized and unrealized gains or losses, the degree to which we encounter competition in our markets and general economic conditions. In light of these factors, results for any period should not be relied upon as being indicative of our performance in future periods.

New or modified laws or regulations governing our operations may adversely affect our business.

We and our portfolio companies are subject to regulation by laws at the U.S. federal, state and local levels. These laws and regulations, as well as their interpretation, may change from time to time, and new laws, regulations and interpretations may also come into effect. Any such new or changed laws or regulations could have a material adverse effect on our business. In particular, on July 21, 2010, the Dodd-Frank Wall Street Reform and Consumer Protection Act, or Dodd-Frank, became law. The scope of Dodd-Frank impacts many aspects of the financial services industry, and it requires the development and adoption of many implementing regulations over the next several months and years. The effects of Dodd-Frank on the financial services industry will depend, in large part, upon the extent to which regulators exercise the authority granted to them and the approaches taken in implementing regulations. We have begun to assess the potential impact of Dodd-Frank on our business and operations, but the likely impact cannot be ascertained with any degree of certainty.

Additionally, changes to the laws and regulations governing our operations, including those associated with RICs, may cause us to alter our investment strategy in order to avail ourselves of new or different opportunities or result in the imposition of corporate-level taxes on us. Such changes could result in material differences to our strategies and plans set forth in this prospectus and may shift our investment focus from the areas of expertise of GC Advisors to other types of investments in which GC Advisors may have little or no expertise or experience. Any such changes, if

they occur, could have a material adverse effect on our results of operations and the value of your investment.

Our board of directors may change our investment objective, operating policies and strategies without prior notice or stockholder approval.

Our board of directors has the authority, except as otherwise provided in the 1940 Act, to modify or waive our investment objective and certain of our operating policies and strategies without prior notice and without stockholder approval. However, absent stockholder approval, we may not change the nature of our

TABLE OF CONTENTS

business so as to cease to be, or withdraw our election as, a business development company. Under Delaware law, we also cannot be dissolved without prior stockholder approval. We cannot predict the effect any changes to our current investment objective, operating policies and strategies would have on our business, operating results and the price value of our common stock. Nevertheless, any such changes could adversely affect our business and impair our ability to make distributions.

Provisions of the General Corporation Law of the State of Delaware and our certificate of incorporation and bylaws could deter takeover attempts and have an adverse effect on the price of our securities.

The General Corporation Law of the State of Delaware, or the DGCL, contains provisions that may discourage, delay or make more difficult a change in control of us or the removal of our directors. Our certificate of incorporation and bylaws contain provisions that limit liability and provide for indemnification of our directors and officers. These provisions and others also may have the effect of deterring hostile takeovers or delaying changes in control or management. We are subject to Section 203 of the DGCL, the application of which is subject to any applicable requirements of the 1940 Act. This section generally prohibits us from engaging in mergers and other business combinations with stockholders that beneficially own 15% or more of our voting stock, or with their affiliates, unless our directors or stockholders approve the business combination in the prescribed manner. If our board of directors does not approve a business combination, Section 203 of the DGCL may discourage third parties from trying to acquire control of us and increase the difficulty of consummating such an offer.

We have also adopted measures that may make it difficult for a third party to obtain control of us, including provisions of our certificate of incorporation classifying our board of directors in three classes serving staggered three-year terms, and provisions of our certificate of incorporation authorizing our board of directors to classify or reclassify shares of our preferred stock in one or more classes or series, to cause the issuance of additional shares of our stock, and to amend our certificate of incorporation, without stockholder approval, to increase or decrease the number of shares of stock that we have authority to issue. These provisions, as well as other provisions of our certificate of incorporation and bylaws, may delay, defer or prevent a transaction or a change in control that might otherwise be in the best interests of our securityholders.

GC Advisors can resign on 60 days notice, and we may not be able to find a suitable replacement within that time, resulting in a disruption in our operations that could adversely affect our financial condition, business and results of operations.

GC Advisors has the right, under the Investment Advisory Agreement, to resign at any time upon not less than 60 days written notice, whether we have found a replacement or not. If GC Advisors resigns, we may not be able to find a new investment adviser or hire internal management with similar expertise and ability to provide the same or equivalent services on acceptable terms within 60 days, or at all. If we are unable to do so quickly, our operations are likely to experience a disruption, our financial condition, business and results of operations as well as our ability to pay distributions are likely to be adversely affected and the market price of our shares may decline. In addition, the coordination of our internal management and investment activities is likely to suffer if we are unable to identify and reach an agreement with a single institution or group of executives having the expertise possessed by GC Advisors and its affiliates. Even if we are able to retain comparable management, whether internal or external, the integration of such management and their lack of familiarity with our investment objective may result in additional costs and time delays that may adversely affect our business, financial condition, results of operations and cash flows.

Our board of directors may change our investment objective, operating policies and strategies without prior notice or

GC Service can resign on 60 days notice, and we may not be able to find a suitable replacement, resulting in a disruption in our operations that could adversely affect our financial condition, business and results of operations.

GC Service has the right to resign under the Administration Agreement at any time upon not less than 60 days written notice, whether we have found a replacement or not. If GC Service resigns, we may not be able to find a new administrator or hire internal management with similar expertise and ability to provide the same or equivalent services on acceptable terms, or at all. If we are unable to do so quickly, our operations are likely to experience a disruption, our financial condition, business and results of operations as well as our

TABLE OF CONTENTS

ability to pay distributions are likely to be adversely affected and the market price of our shares may decline. In addition, the coordination of our internal management and administrative activities is likely to suffer if we are unable to identify and reach an agreement with a service provider or individuals with the expertise possessed by GC Service. Even if we are able to retain a comparable service provider or individuals to perform such services, whether internal or external, their integration into our business and lack of familiarity with our investment objective may result in additional costs and time delays that may adversely affect our business, financial condition, results of operations and cash flows.

We incur significant costs as a result of being a publicly traded company.

As a publicly traded company, we incur legal, accounting and other expenses, including costs associated with the periodic reporting requirements applicable to a company whose securities are registered under the Exchange Act, as well as additional corporate governance requirements, including requirements under the Sarbanes-Oxley Act of 2002, or the Sarbanes-Oxley Act, and other rules implemented by the SEC.

Efforts to comply with Section 404 of the Sarbanes-Oxley Act will involve significant expenditures, and non-compliance with Section 404 of the Sarbanes-Oxley Act may adversely affect us and the market price of our common stock.

Under current SEC rules, we are required to report on our internal control over financial reporting pursuant to Section 404 of the Sarbanes-Oxley Act and related rules and regulations of the SEC. As a result, we incur additional expenses that may negatively impact our financial performance and our ability to make distributions. This process also results in a diversion of management's time and attention. We cannot be certain as to the timing of completion of our evaluation, testing and remediation actions or the impact of the same on our operations, and we may not be able to ensure that the process is effective or that our internal control over financial reporting is or will be effective in a timely manner. In the event that we are unable to maintain or achieve compliance with Section 404 of the Sarbanes-Oxley Act and related rules, we and the market price of our securities may be adversely affected.

We are highly dependent on information systems and systems failures could significantly disrupt our business, which may, in turn, negatively affect the market price of our common stock and our ability to pay dividends and other distributions.

Our business depends on the communications and information systems of GC Advisors and its affiliates. Any failure or interruption of such systems could cause delays or other problems in our activities. This, in turn, could have a material adverse effect on our operating results and negatively affect the market price of our securities and our ability to pay dividends and other distributions to our securityholders.

Lawrence E. Golub and David B. Golub have substantial control over us.

As of September 30, 2011, Lawrence E. Golub and David B. Golub beneficially owned, in the aggregate, approximately 42.8% and 42.5%, respectively, of our outstanding common stock, primarily as a result of their ownership interests in and control of Golub Capital Management LLC, the investment adviser to Golub Capital Company IV, LLC, Golub Capital Company V LLC, Golub Capital Company VI LLC (collectively, the Capital

Companies) and GEMS Fund L.P., a limited partnership affiliated with GC Advisors. As a result, these individuals, acting together, may have the ability to control the outcome of matters submitted to our stockholders for approval, including the election of directors and any merger, consolidation or sale of all or substantially all of our assets, and may cause actions to be taken that you may not agree with or that are not in your interests or those of other securityholders.

This concentration of beneficial ownership also might harm the market price of our securities by:

delaying, deferring or preventing a change in corporate control;
impeding a merger, consolidation, takeover or other business combination involving us; or
discouraging a potential acquirer from making a tender offer or otherwise attempting to obtain control of us.

31

TABLE OF CONTENTS

Risks Related to Our Investments

Economic recessions or downturns could impair our portfolio companies and harm our operating results.

Many of our portfolio companies are susceptible to economic slowdowns or recessions and may be unable to repay our loans during these periods. Therefore, our non-performing assets are likely to increase and the value of our portfolio is likely to decrease during these periods. Adverse economic conditions may decrease the value of collateral securing some of our loans and the value of our equity investments. Economic slowdowns or recessions could lead to financial losses in our portfolio and a decrease in revenues, net income and assets. Unfavorable economic conditions also could increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. These events could prevent us from increasing our investments and harm our operating results.

A portfolio company's failure to satisfy financial or operating covenants imposed by us or other lenders could lead to defaults and, potentially, termination of its loans and foreclosure on its assets, which could trigger cross-defaults under other agreements and jeopardize our portfolio company's ability to meet its obligations under the debt securities that we hold. We may incur expenses to the extent necessary to seek recovery upon default or to negotiate new terms with a defaulting portfolio company. In addition, lenders in certain cases can be subject to lender liability claims for actions taken by them when they become too involved in the borrower's business or exercise control over a borrower. It is possible that we could become subject to a lender's liability claim, including as a result of actions taken if we render significant managerial assistance to the borrower. Furthermore, if one of our portfolio companies were to file for bankruptcy protection, even though we may have structured our investment as senior secured debt, depending on the facts and circumstances, including the extent to which we provided managerial assistance to that portfolio company, a bankruptcy court might re-characterize our debt holding and subordinate all or a portion of our claim to claims of other creditors.

Current market conditions have materially and adversely affected debt and equity capital markets in the United States and around the world.

From mid-2007 through 2011, the global capital markets experienced a period of disruption resulting in a lack of liquidity in parts of the debt capital markets, significant write-offs in the financial services sector relating to subprime mortgages and the re-pricing of credit risk in the broadly syndicated market. These events, along with the deterioration of the housing market, illiquid market conditions, declining business and consumer confidence and the failure of major financial institutions in the United States, led to a general decline of economic conditions. This economic decline materially and adversely affected the broader financial and credit markets and has reduced the availability of debt and equity capital for the market as a whole and to financial firms, in particular. To the extent that we wish to use debt to fund our investments, the debt capital available to us, if any, may be at a higher cost and on terms and conditions that may be less favorable than what we expect, which could negatively affect our financial performance and results. A prolonged period of market illiquidity may cause us to reduce the volume of loans we originate and/or fund and adversely affect the value of our portfolio investments, which could have a material and adverse effect on our business, financial condition, results of operations and cash flows. Any deterioration of current market conditions could materially and adversely affect our business.

Our investments in leveraged portfolio companies may be risky, and you could lose all or part of your investment.

Investment in leveraged companies involves a number of significant risks. Leveraged companies in which we invest may have limited financial resources and may be unable to meet their obligations under their debt securities that we hold. Such developments may be accompanied by a deterioration in the value of any collateral and a reduction in the likelihood of our realizing any guarantees that we may have obtained in connection with our investment. Smaller leveraged companies also may have less predictable operating results and may require substantial additional capital to support their operations, finance their expansion or maintain their competitive position.

TABLE OF CONTENTS

Our investments in private and middle-market portfolio companies are risky, and you could lose all or part of your investment.

Investment in private and middle-market companies involves a number of significant risks. Generally, little public information exists about these companies, and we expect to rely on the ability of GC Advisors' investment professionals to obtain adequate information to evaluate the potential returns from investing in these companies. If we are unable to uncover all material information about these companies, we may not make a fully informed investment decision, and we may lose money on our investments. Middle-market companies may have limited financial resources and may be unable to meet their obligations under their debt securities that we hold, which may be accompanied by a deterioration in the value of any collateral and a reduction in the likelihood of our realizing any guarantees we may have obtained in connection with our investment. In addition, such companies typically have shorter operating histories, narrower product lines and smaller market shares than larger businesses, which tend to render them more vulnerable to competitors' actions and market conditions, as well as general economic downturns. Additionally, middle-market companies are more likely to depend on the management talents and efforts of a small group of persons. Therefore, the death, disability, resignation or termination of one or more of these persons could have a material adverse impact on our portfolio company and, in turn, on us. Middle-market companies also may be parties to litigation and may be engaged in rapidly changing businesses with products subject to a substantial risk of obsolescence. In addition, our executive officers, directors and GC Advisors may, in the ordinary course of business, be named as defendants in litigation arising from our investments in the portfolio companies.

The lack of liquidity in our investments may adversely affect our business.

We may invest all of our assets in illiquid securities, and a substantial portion of our investments in leveraged companies are and will be subject to legal and other restrictions on resale or will otherwise be less liquid than more broadly traded public securities. The illiquidity of these investments may make it difficult for us to sell such investments if the need arises. In addition, if we are required to liquidate all or a portion of our portfolio quickly, we may realize significantly less than the value at which we have previously recorded our investments. We may also face other restrictions on our ability to liquidate an investment in a portfolio company to the extent that we, GC Advisors, Golub Capital or any of its affiliates have material nonpublic information regarding such portfolio company.

Price declines and illiquidity in the corporate debt markets may adversely affect the fair value of our portfolio investments, reducing our net asset value through increased net unrealized depreciation.

As a business development company, we are required to carry our investments at market value or, if no market value is ascertainable, at fair value as determined in good faith by our board of directors. As part of the valuation process, we may take into account the following types of factors, if relevant, in determining the fair value of our investments:

- a comparison of the portfolio company's securities to publicly traded securities;
- the enterprise value of a portfolio company;
- the nature and realizable value of any collateral;
- the portfolio company's ability to make payments and its earnings and discounted cash flow;
- the markets in which the portfolio company does business; and

changes in the interest rate environment and the credit markets generally that may affect the price at which similar investments may be made in the future and other relevant factors.

When an external event such as a purchase transaction, public offering or subsequent equity sale occurs, we use the pricing indicated by the external event to corroborate our valuation. We record decreases in the market values or fair values of our investments as unrealized depreciation. Declines in prices and liquidity in the corporate debt markets may result in significant net unrealized depreciation in our portfolio. The effect of all of these factors on our portfolio may reduce our net asset value by increasing net unrealized depreciation in our portfolio. Depending on market conditions, we could incur substantial realized losses and may suffer

TABLE OF CONTENTS

additional unrealized losses in future periods, which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

We have not yet identified the portfolio company investments we will acquire.

While we currently hold a portfolio of investments, we have not yet identified additional potential investments for our portfolio that we will acquire with the proceeds of any offering of securities pursuant to this prospectus. Privately negotiated investments in illiquid securities or private middle-market companies require substantial due diligence and structuring, and we cannot assure you that we will achieve our anticipated investment pace. As a result, you will be unable to evaluate any future portfolio company investments prior to purchasing our shares of common stock. Additionally, GC Advisors selects all of our investments, and our stockholders will have no input with respect to such investment decisions. These factors increase the uncertainty, and thus the risk, of investing in our securities.

We anticipate that we will use substantially all of the net proceeds of any offering of our securities within approximately six months following the completion of any offering of our securities, depending on the availability of appropriate investment opportunities consistent with our investment objectives and market conditions. Until such appropriate investment opportunities can be found, we will invest the net proceeds primarily in cash, cash equivalents, U.S. government securities and high-quality debt investments that mature in one year or less from the date of investment. We expect these temporary investments to earn yields substantially lower than the income that we expect to receive in respect of investments in senior secured, unitranche, mezzanine and second lien loans and equity securities. As a result, any distributions we make during this period may be substantially smaller than the distributions that we expect to pay when our portfolio is fully invested.

We are a non-diversified investment company within the meaning of the 1940 Act, and therefore we are not limited with respect to the proportion of our assets that may be invested in securities of a single issuer.

We are classified as a non-diversified investment company within the meaning of the 1940 Act, which means that we are not limited by the 1940 Act with respect to the proportion of our assets that we may invest in securities of a single issuer. To the extent that we assume large positions in the securities of a small number of issuers, our net asset value may fluctuate to a greater extent than that of a diversified investment company as a result of changes in the financial condition or the market's assessment of the issuer. We may also be more susceptible to any single economic or regulatory occurrence than a diversified investment company. Beyond our asset diversification requirements as a RIC under the Code, we do not have fixed guidelines for diversification, and our investments could be concentrated in relatively few portfolio companies.

Our portfolio may be concentrated in a limited number of portfolio companies and industries, which will subject us to a risk of significant loss if any of these companies defaults on its obligations under any of its debt instruments or if there is a downturn in a particular industry.

Our portfolio may be concentrated in a limited number of portfolio companies and industries. As a result, the aggregate returns we realize may be significantly and adversely affected if a small number of investments perform poorly or if we need to write down the value of any one investment. Additionally, while we are not targeting any specific industries, our investments may be concentrated in relatively few industries. As a result, a downturn in any particular industry in which we are invested could also significantly impact the aggregate returns we realize.

We may hold the debt securities of leveraged companies that may, due to the significant volatility of such companies, enter into bankruptcy proceedings.

Leveraged companies may experience bankruptcy or similar financial distress. The bankruptcy process has a number of significant inherent risks. Many events in a bankruptcy proceeding are the product of contested matters and adversary proceedings and are beyond the control of the creditors. A bankruptcy filing by an issuer may adversely and permanently affect the issuer. If the proceeding is converted to a liquidation, the value of the issuer may not equal the liquidation value that was believed to exist at the time of the investment. The duration of a bankruptcy proceeding is also difficult to predict, and a creditor's return on

TABLE OF CONTENTS

investment can be adversely affected by delays until the plan of reorganization or liquidation ultimately becomes effective. The administrative costs of a bankruptcy proceeding are frequently high and would be paid out of the debtor's estate prior to any return to creditors. Because the standards for classification of claims under bankruptcy law are vague, our influence with respect to the class of securities or other obligations we own may be lost by increases in the number and amount of claims in the same class or by different classification and treatment. In the early stages of the bankruptcy process, it is often difficult to estimate the extent of, or even to identify, any contingent claims that might be made. In addition, certain claims that have priority by law (for example, claims for taxes) may be substantial.

Our failure to make follow-on investments in our portfolio companies could impair the value of our portfolio.

Following an initial investment in a portfolio company, we may make additional investments in that portfolio company as follow-on investments, in seeking to:

increase or maintain in whole or in part our position as a creditor or equity ownership percentage in a portfolio company;

exercise warrants, options or convertible securities that were acquired in the original or subsequent financing; or
preserve or enhance the value of our investment.

We have discretion to make follow-on investments, subject to the availability of capital resources. Failure on our part to make follow-on investments may, in some circumstances, jeopardize the continued viability of a portfolio company and our initial investment, or may result in a missed opportunity for us to increase our participation in a successful portfolio company. Even if we have sufficient capital to make a desired follow-on investment, we may elect not to make a follow-on investment because we may not want to increase our level of risk, because we prefer other opportunities or because of regulatory or other considerations. Our ability to make follow-on investments may also be limited by GC Advisors' allocation policy.

Because we generally do not hold controlling equity interests in our portfolio companies, we may not be able to exercise control over our portfolio companies or to prevent decisions by management of our portfolio companies that could decrease the value of our investments.

Although we may do so in the future, we do not currently hold controlling equity positions in our portfolio companies. As a result, we are subject to the risk that a portfolio company may make business decisions with which we disagree, and that the management and/or stockholders of a portfolio company may take risks or otherwise act in ways that are adverse to our interests. Due to the lack of liquidity of the debt and equity investments that we typically hold in our portfolio companies, we may not be able to dispose of our investments in the event we disagree with the actions of a portfolio company and may therefore suffer a decrease in the value of our investments.

Defaults by our portfolio companies will harm our operating results.

A portfolio company's failure to satisfy financial or operating covenants imposed by us or other lenders could lead to defaults and, potentially, termination of its loans and foreclosure on its assets. This could trigger cross-defaults under other agreements and jeopardize such portfolio company's ability to meet its obligations under the debt or equity securities that we hold. We may incur expenses to the extent necessary to seek recovery upon default or to negotiate new terms, which may include the waiver of certain financial covenants, with a defaulting portfolio company.

Our failure to make follow-on investments in our portfolio companies could impair the value of our portfolio 72

Our portfolio companies may incur debt that ranks equally with, or senior to, our investments in such companies.
