PROSPECTUS SUMMARY

This summary highlights certain information contained elsewhere in this prospectus. Because it is a summary, it may not contain all of the information that is important to you. Before investing in our common stock, you should read this entire prospectus carefully, especially the sections entitled Risk Factors” beginning on page 9 and Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on page 36, as well our financial statements and related notes included elsewhere in this prospectus. In this prospectus, the terms MusclePharm,” Company,” we,” us” and our” refer to MusclePharm Corporation.

Overview

MusclePharm Corporation was initially incorporated in the State of Nevada on August 4, 2006, under the name Tone in Twenty, for the purpose of engaging in the business of providing personal fitness training using isometric techniques (Tone in Twenty”). Tone in Twenty was never able to raise the level of funding necessary to commence operations. On February 18, 2010, the Company acquired all of the issued and outstanding equity and voting interests of Muscle Pharm, LLC, a Colorado limited liability company, in exchange for 26,000,000 shares of the Company’s common stock. The shares were issued pursuant to that certain Securities Exchange Agreement, dated February 1, 2010 (the Securities Exchange Agreement”). As a result of this transaction, Muscle Pharm, LLC became a wholly owned subsidiary of the Company. The 26,000,000 shares represented approximately 99.7% of the common stock outstanding following the closing of this transaction. As part of this transaction, the Company’s former President sold his 366,662 shares to Muscle Pharm, LLC for \$25,000 and these shares were then cancelled.

As part of the Securities Exchange Agreement, the Company agreed to seek shareholder approval of an amendment to the Company’s Articles of Incorporation changing the name of the Company to MusclePharm Corporation.” This amendment was approved by a majority of the Company’s shareholders and the name change became effective on March 1, 2010.

MusclePharm currently manufactures and markets wide-ranging variety of high-quality sports nutrition products, including: Assault™, Battle Fuel™, Bullet Proof™, Combat™, SHRED Matrix®, and Re-con®. However, we will receive proceeds from sale of our common stock to the Southridge under the Equity Purchase Agreement. OTCBB Symbol MSLP

This number assumes the full sale of the 10,000,000 Put Shares we are registering hereunder that are issuable to (1) Southridge pursuant to the Equity Purchase Agreement but does not include the 32,400,000 Warrant Shares. The 42,000,000 Purchase Shares being registered hereunder have already been issued.

Equity Purchase Agreement

This offering relates to the resale of up to 10,000,000 Put Shares that we will put to Southridge pursuant to the Equity Purchase Agreement. Assuming the resale of all of the shares being offered in this prospectus, such shares would

constitute approximately 0.6% of the Company's outstanding common stock.

On November 4, 2011, the Company and Southridge entered into the Equity Credit Agreement pursuant to which, we have the opportunity, for a two-year period, commencing on the date on which the SEC first declares effective this registration statement (the "Commitment Period"), of which this prospectus forms a part, registering the resale of our common shares by Southridge, to resell shares of our common stock purchased by Southridge under the Equity Credit Agreement.

In order to sell shares to Southridge under the Equity Credit Agreement, during the Commitment Period, the Company must deliver to Southridge a written put notice on any trading day (the "Put Date"), setting forth the dollar amount to be invested by Southridge (the "Put Notice"). For each share of our common stock purchased under the Equity Credit Agreement, Southridge will pay ninety-four percent (94%) of the average of the lowest two closing bid prices on any two applicable trading days, consecutive or inconsecutive, during the five trading days immediately following the date on which the Company has deposited an estimated amount of put shares to Southridge's brokerage account in the manner provided by the Equity Credit Agreement (the "Valuation Period"). The Company may, at its sole discretion, issue a Put Notice to Southridge and Southridge will then be irrevocably bound to acquire such shares.

If, during any Valuation Period, the Company (i) subdivides or combines the common stock; (ii) pays a dividend in shares of common stock or makes any other distribution of shares of common stock; (iii) issues any options or other rights to subscribe for or purchase shares of common stock and the price per share is less than closing price in effect immediately prior to such issuance; (iv) issues any securities convertible into shares of common stock and the consideration per share for which shares of common stock may at any time thereafter be issuable pursuant to the terms of such convertible securities shall be less than the closing price in effect immediately prior to such issuance; (v) issue shares of common stock otherwise than as provided in the foregoing subsections (i) through (iv) at a price per share less than the closing price in effect immediately prior to such issuance, or without consideration; or (vi) makes a distribution of its assets or evidences of its indebtedness to the holders of common stock as a dividend in liquidation or by way of return of capital or other than as a dividend payable out of earnings or surplus legally available for dividends under applicable law (collectively, a “Valuation Event”), then a new Valuation Period shall begin on the trading day immediately after the occurrence of such Valuation Event and end on the fifth trading day thereafter.

We are relying on an exemption from the registration requirements of the Securities Act and/or Rule 506 of Regulation D promulgated thereunder. The transaction does involve a private offering, Southridge is an “accredited investor” and/or qualified institutional buyer and Southridge has access to information about us and its investment.

At the assumed offering price of \$0.01 per share, we will be able to receive up to \$112,800 in gross proceeds, assuming the sale of the entire 10,000,000 Put Shares being registered hereunder pursuant to the Equity Purchase Agreement. We would be required to register 1,049,829,788 additional shares to obtain the balance of \$10,000,000 under the Equity Purchase Agreement at the assumed offering price of \$0.01. Neither the Equity Purchase Agreement nor any rights or obligations of the parties under the Equity Purchase Agreement may be assigned by either party to any other person.

There are substantial risks to investors as a result of the issuance of shares of our common stock under the Equity Purchase Agreement. These risks include dilution of stockholders, significant decline in our stock price and our inability to draw sufficient funds when needed.

Southridge will periodically purchase our common stock under the Equity Purchase Agreement and will, in turn, sell such shares to investors in the market at the market price. This may cause our stock price to decline, which will require us to issue increasing numbers of common shares to Southridge to raise the same amount of funds, as our stock price declines.

RISK FACTORS

The following discussion and analysis should be read in conjunction with the other financial information and consolidated financial statements and related notes appearing in this prospectus. This discussion contains forward-looking statements that involve risks and uncertainties. Our actual results will depend upon a number of factors beyond our control and could differ materially from those anticipated in the forward-looking statements. Some of these factors are discussed below and elsewhere in this prospectus.

Risks Related to Our Business and Industry

OUR INDEPENDENT AUDITORS HAVE EXPRESSED SUBSTANTIAL DOUBT ABOUT OUR ABILITY TO CONTINUE AS A GOING CONCERN, WHICH MAY HINDER OUR ABILITY TO OBTAIN FUTURE FINANCING.

As reflected in the accompanying financial statements, the Company had a net loss of \$23,280,950 and net cash used in operations of \$5,801,761 for the year ended December 31, 2011, and a working capital deficit and stockholders' deficit of \$13,693,267 and \$12,971,212, respectively, at December 31, 2011. These factors raise substantial doubt about the Company's ability to continue as a going concern.

The ability of the Company to continue its operations is dependent on management's plans, which include the raising of capital through debt and/or equity markets with some additional funding from other traditional financing sources, including term notes, until such time that funds provided by operations are sufficient to fund working capital requirements. The Company may need to incur liabilities with certain related parties to sustain the Company's existence.

The Company will require additional funding to finance the growth of its current and expected future operations as well as to achieve its strategic objectives. The Company believes its current available cash along with anticipated revenues may be insufficient to meet its cash needs for the near future. There can be no assurance that financing will be available in amounts or terms acceptable to the Company, if at all.

In response to these problems, management has taken the following actions:

- seeking additional third party debt and/or equity financing;
- execute a plan to recapitalize the company;
- continue with the implementation of the business plan;
- generate new sales from international customers; and
- allocate sufficient resources to continue with advertising and marketing efforts.

In their report dated April 13, 2012, our independent auditors stated that our financial statements for the period ended December 31, 2011, were prepared assuming that we would continue as a going concern, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. These financial statements do not include any adjustments relating to the recovery of the recorded assets or the classification of the liabilities that might be necessary should the Company be unable to continue as a going concern.

WE WILL NEED TO RAISE ADDITIONAL CAPITAL TO CARRY OUT OUR BUSINESS PLAN.

We will need to raise additional capital to fund the growth of our business. There is no guarantee that we will be able to access additional capital at rates and on terms which are attractive to us, if at all. Without the additional funding needed to fund our growth we may not be able to grow as planned.

OUR FAILURE TO APPROPRIATELY RESPOND TO COMPETITIVE CHALLENGES, CHANGING CONSUMER PREFERENCES AND DEMAND FOR NEW PRODUCTS COULD SIGNIFICANTLY HARM OUR CUSTOMER RELATIONSHIPS AND PRODUCT SALES.

The nutritional sports supplement industry is characterized by intense competition for product offerings and rapid and frequent changes in consumer demand. Our failure to accurately predict product trends could negatively impact our products and inventory levels and cause our revenues to decline.

Our success with any particular product offering (whether new or existing) depends upon a number of factors, including our ability to:

- deliver products in a timely manner in sufficient volumes;
- accurately anticipate customer needs and forecast accurately to the manufacturer in a rapidly expanding business;
- differentiate our product offerings from those of our competitors;
- competitively price our products; and
- develop and/or acquire new products.

Products often have to be promoted heavily in stores or in the media to obtain visibility and consumer acceptance. Acquiring distribution for products is difficult and often expensive due to slotting and other promotional charges mandated by retailers. Products can take substantial periods of time to develop consumer awareness, consumer acceptance and sales volume. Accordingly, some products fail to gain or maintain sufficient sales volume and as a result have to be discontinued. In a highly competitive marketplace it may be difficult to have retailers open stock-keeping units (sku's) for new products.

OUR INDUSTRY IS HIGHLY COMPETITIVE, AND OUR FAILURE TO COMPETE EFFECTIVELY COULD ADVERSELY AFFECT OUR MARKET SHARE, FINANCIAL CONDITION AND FUTURE GROWTH.

The sports supplement industry is highly competitive with respect to:

- price;
- shelf space and store placement;
- brand and product recognition;
- new product introductions; and
- raw materials.

Several of our competitors are larger, more established and possess greater financial, personnel, distribution and other resources. We face competition in the health food channel from a limited number of large nationally known manufacturers, private label brands and many smaller manufacturers of dietary supplements.

WE RELY ON A LIMITED NUMBER OF CUSTOMERS FOR A SUBSTANTIAL PORTION OF OUR SALES, AND THE LOSS OF OR MATERIAL REDUCTION IN PURCHASE VOLUME BY ANY OF THESE CUSTOMERS WOULD ADVERSELY AFFECT OUR SALES AND OPERATING RESULTS.

In 2011, two customers accounted for approximately 55% of net sales. Our largest customer in 2011 represented 41% of our sales. In 2010, three customers accounted for approximately 67% of our sales. The largest customer in 2010 accounted for 45% of our sales. The loss of any of our major customers, a significant reduction in purchases by any major customer, or, any serious financial difficulty of a major customer, could have a material adverse effect on our sales and results of operations.

Customer	2011	2010
A	41 %	45 %
B	14 %	7 %
C	- %	15 %

ADVERSE PUBLICITY OR CONSUMER PERCEPTION OF OUR PRODUCTS AND ANY SIMILAR PRODUCTS DISTRIBUTED BY OTHERS COULD HARM OUR REPUTATION AND ADVERSELY AFFECT OUR SALES AND REVENUES.

We are highly dependent upon positive consumer perceptions of the safety and quality of our products as well as similar products distributed by other sports nutrition supplement companies. Consumer perception of sports nutrition supplements and our products in particular can be substantially influenced by scientific research or findings, national media attention and other publicity about product use. Adverse publicity from such sources regarding the safety, quality or efficacy of dietary supplements and our products could harm our reputation and results of operations. The mere publication of reports asserting that such products may be harmful or questioning their efficacy could have a material adverse effect on our business, financial condition and results of operations, regardless of whether such reports are scientifically supported or whether the claimed harmful effects would be present at the dosages recommended for such products.

IF WE ARE UNABLE TO RETAIN KEY PERSONNEL, OUR ABILITY TO MANAGE OUR BUSINESS EFFECTIVELY AND CONTINUE OUR GROWTH COULD BE NEGATIVELY IMPACTED.

Key management employees include Brad J. Pyatt, Cory Gregory, Jeremy DeLuca, Lewis Gary Davis, Larry Meer, John H. Bluhner, and certain other individuals. These key management employees are primarily responsible for our day-to-day operations, and we believe our success depends in large part on our ability to retain them and to continue to attract additional qualified individuals to our management team. Currently, we have executed employment agreements with our key management employees. We anticipate having all key executives under new performance based contracts by the end of the third quarter of 2012. The loss or limitation of the services of any of our key management employees or the inability to attract additional qualified personnel could have a material adverse effect on our business and results of operations. We may obtain key man insurance on one or more key executives.

OUR OPERATING RESULTS MAY FLUCTUATE, WHICH MAKES OUR RESULTS DIFFICULT TO PREDICT AND COULD CAUSE OUR RESULTS TO FALL SHORT OF EXPECTATIONS.

Our operating results may fluctuate as a result of a number of factors, many outside of our control. As a result, comparing our operating results on a period-to-period basis may not be meaningful, and you should not rely on our past results as an indication of our future performance. Our quarterly, year-to-date, and annual expenses as a

percentage of our revenues may differ significantly from our historical or projected rates. Our operating results in future quarters may fall below expectations. Each of the following factors may affect our operating results:

- our ability to deliver products in a timely manner in sufficient volumes;
- our ability to recognize product trends;
- our loss of one or more significant customers;
- the introduction of successful new products by our competitors; and
- adverse media reports on the use or efficacy of sports nutrition supplements.

Because our business is changing and evolving, our historical operating results may not be useful to you in predicting our future operating results.

THE EFFECTS OF THE RECENT GLOBAL ECONOMIC CRISIS MAY IMPACT OUR BUSINESS, OPERATING RESULTS, OR FINANCIAL CONDITION.

The recent global economic crisis has caused disruptions and extreme volatility in global financial markets and increased rates of default and bankruptcy, and has impacted levels of consumer spending. These macroeconomic developments could negatively affect our business, operating results, or financial condition. For example, if consumer spending continues to decrease, this may result in lower sales.

OUR BUSINESS AND OPERATIONS ARE EXPERIENCING RAPID GROWTH. IF WE FAIL TO EFFECTIVELY MANAGE OUR GROWTH, OUR BUSINESS AND OPERATING RESULTS COULD BE HARMED.

We have experienced and expect to continue to experience rapid growth in our operations, which has placed, and will continue to place, significant demands on our management, operational and financial infrastructure. If we do not effectively manage our growth, we may fail to timely deliver products to our customers in sufficient volume or the quality of our products could suffer, which could negatively affect our operating results. To effectively manage this growth, we will need to hire additional persons, particularly in sales and marketing, and we will need to continue to improve our operational, financial and management controls and our reporting systems and procedures. These additional employees, systems enhancements and improvements will require significant capital expenditures and management resources. Failure to implement these improvements could hurt our ability to manage our growth and our financial position.

WE MAY BE EXPOSED TO MATERIAL PRODUCT LIABILITY CLAIMS, WHICH COULD INCREASE OUR COSTS AND ADVERSELY AFFECT OUR REPUTATION AND BUSINESS.

As a marketer and distributor of products designed for human consumption, we are subject to product liability claims if the use of our products is alleged to have resulted in injury. Our products consist of vitamins, minerals, herbs and other ingredients that are classified as dietary supplements and in most cases are not subject to pre-market regulatory approval in the United States or internationally. Previously unknown adverse reactions resulting from human consumption of these ingredients could occur.

We have not had any product liability claims filed against us, but in the future we may be, subject to various product liability claims, including among others that our products had inadequate instructions for use, or inadequate warnings concerning possible side effects and interactions with other substances. The cost of defense can be substantially higher than the cost of settlement even when claims are without merit. The high cost to defend or settle product liability claims could have a material adverse effect on our business and operating results.

OUR INSURANCE COVERAGE OR THIRD PARTY INDEMNIFICATION RIGHTS MAY NOT BE SUFFICIENT TO COVER OUR LEGAL CLAIMS OR OTHER LOSSES THAT WE MAY INCUR IN THE FUTURE.

We maintain insurance, including property, general and product liability, and workers' compensation to protect ourselves against potential loss exposures. In the future, insurance coverage may not be available at adequate levels or on adequate terms to cover potential losses, including on terms that meet our customer's requirements. If insurance coverage is inadequate or unavailable, we may face claims that exceed coverage limits or that are not covered, which could increase our costs and adversely affect our operating results.

OUR INTELLECTUAL PROPERTY RIGHTS ARE VALUABLE, AND ANY INABILITY TO PROTECT THEM COULD REDUCE THE VALUE OF OUR PRODUCTS AND BRAND.

We have invested significant resources to protect our brands and intellectual property rights. However, we may be unable or unwilling to strictly enforce our intellectual property rights, including our trademarks, from infringement. Our failure to enforce our intellectual property rights could diminish the value of our brands and product offerings and harm our business and future growth prospects.

WE MAY BE SUBJECT TO INTELLECTUAL PROPERTY RIGHTS CLAIMS, WHICH ARE COSTLY TO DEFEND, COULD REQUIRE US TO PAY DAMAGES AND COULD LIMIT OUR ABILITY TO SELL SOME OF OUR PRODUCTS.

As a marketer and distributor of products designed for human consumption, we are subject to product liability claims if the use of our products is alleged to have resulted in injury. Our products consist of vitamins, minerals, herbs and other ingredients that are classified as dietary supplements and in most cases are not subject to pre-market regulatory approval in the United States or internationally. Previously unknown adverse reactions resulting from human consumption of these ingredients could occur.

WE RELY ON HIGHLY SKILLED PERSONNEL AND, IF WE ARE UNABLE TO RETAIN OR MOTIVATE KEY PERSONNEL, HIRE QUALIFIED PERSONNEL, WE MAY NOT BE ABLE TO GROW EFFECTIVELY.

Our performance largely depends on the talents and efforts of highly skilled individuals. Our future success depends on our continuing ability to identify, hire, develop, motivate and retain highly skilled personnel for all areas of our organization, particularly sales and marketing. Competition in our industry for qualified employees is intense. In addition, our compensation arrangements, such as our equity award programs, may not always be successful in attracting new employees and retaining and motivating our existing employees. Our continued ability to compete effectively depends on our ability to attract new employees and to retain and motivate our existing employees.

An increase in product returns could negatively impact the Company's operating results and profitability.

The Company permits the return of damaged or defective products and accepts limited amounts of product returns in certain instances. While such returns have historically been nominal and within management's expectations and the provisions established, future return rates may differ from those experienced in the past. Any significant increase in damaged or defective products or expected returns could have a material adverse effect on the Company's operating results for the period or periods in which such returns materialize.

We have no manufacturing capacity and anticipate continued reliance on third-party manufacturers for the development and commercialization of our products.

We do not currently operate manufacturing facilities for production of our products. We lack the resources and the capabilities to manufacture our current offered products on a commercial scale. We do not intend to develop facilities for the manufacture of products for clinical trials or commercial purposes in the foreseeable future. We rely on

third-party manufacturers to produce bulk products required to meet our sales needs. We plan to continue to rely upon contract manufacturers and, potentially, collaboration partners to manufacture commercial quantities of our products if and when approved for marketing by the applicable regulatory authorities.

Our contract manufacturers' failure to achieve and maintain high manufacturing standards, in accordance with applicable regulatory requirements, or the incidence of manufacturing errors, could result in patient injury or death, product shortages, product recalls or withdrawals, delays or failures in product testing or delivery, cost overruns or other problems that could seriously harm our business. Contract manufacturers often encounter difficulties involving production yields, quality control and quality assurance, as well as shortages of qualified personnel. Our existing manufacturers and any future contract manufacturers may not perform as agreed or may not remain in the contract manufacturing business. In the event of a natural disaster, business failure, strike or other difficulty, we may be unable to replace a third-party manufacturer in a timely manner and the production of our products would be interrupted, resulting in delays and additional costs.

A SHORTAGE IN THE SUPPLY OF KEY RAW MATERIALS COULD INCREASE OUR COSTS OR ADVERSELY AFFECT OUR SALES AND REVENUES.

We obtain all of our raw materials from third-party suppliers with whom we do not have significant long-term supply contracts. Since all of the ingredients in our products are commonly used, we have not experienced any shortages or delays in obtaining raw materials. If things changed, shortages could result in materially higher raw material prices or adversely affect our ability to manufacture a product. Price increases from a supplier would directly affect our profitability if we are not able to pass price increases on to customers. Our inability to obtain adequate supplies of raw materials in a timely manner or a material increase in the price of our raw materials could have a material adverse effect on our business, financial condition and results of operations.

BECAUSE WE ARE SUBJECT TO NUMEROUS LAWS AND REGULATIONS, AND WE MAY BECOME INVOLVED IN LITIGATION FROM TIME TO TIME, WE COULD INCUR SUBSTANTIAL JUDGMENTS, FINES, LEGAL FEES AND OTHER COSTS.

Our industry is highly regulated. The manufacture, labeling and advertising for our products are regulated by various federal, state and local agencies as well as those of each foreign country to which we distribute. These governmental authorities may commence regulatory or legal proceedings, which could restrict the permissible scope of our product claims or the ability to manufacture and sell our products in the future. The FDA regulates our products to ensure that the products are not adulterated or misbranded. Failure to comply with FDA requirements may result in, among other things, injunctions, product withdrawals, recalls, product seizures, fines and criminal prosecutions. Our advertising is subject to regulation by the FTC under the FTCA. In recent years the FTC has initiated numerous investigations of dietary supplement and weight loss products and companies. Additionally, some states also permit advertising and labeling laws to be enforced by private attorney generals, who may seek relief for consumers, seek class action certifications, seek class wide damages and product recalls of products sold by us. Any of these types of adverse actions against us by governmental authorities or private litigants could have a material adverse effect on our business, financial condition and results of operations.

Other Risks Factors

WE MAY, IN THE FUTURE, ISSUE ADDITIONAL COMMON SHARES, WHICH WOULD REDUCE INVESTORS' PERCENT OF OWNERSHIP AND MAY DILUTE OUR SHARE VALUE.

Our Articles of Incorporation authorize the issuance of 2,500,000,000 shares of common stock, 5,000,000 shares of Series A Convertible Preferred Stock, 51 shares of Series B Preferred Stock, 500 shares of Series C Convertible Preferred Stock. The Company currently has 9,999,449 shares of blank-check preferred stock authorized but undesignated. The future issuance of common stock may result in substantial dilution in the percentage of our common stock held by our then existing shareholders. We may value any common stock issued in the future on an arbitrary basis. The issuance of common stock for future services or acquisitions or other corporate actions may have the effect of diluting the value of the shares held by our investors, and might have an adverse effect on any trading market for our common stock.

OUR COMMON STOCK IS QUOTED ON THE OTCBB, WHICH MAY HAVE AN UNFAVORABLE IMPACT ON OUR STOCK PRICE AND LIQUIDITY.

Our common stock is quoted on the OTCBB. The OTCBB is a significantly more limited market than the New York Stock Exchange or NASDAQ system. The quotation of our shares on the OTCBB may result in a less liquid market available for existing and potential stockholders to trade shares of our common stock, could depress the trading price of our common stock and could have a long-term adverse impact on our ability to raise capital in the future.

OUR COMMON SHARES ARE SUBJECT TO THE "PENNY STOCK" RULES OF THE SEC AND THE TRADING MARKET IN OUR SECURITIES IS LIMITED, WHICH MAKES TRANSACTIONS IN OUR STOCK CUMBERSOME AND MAY REDUCE THE VALUE OF AN INVESTMENT IN OUR STOCK.

The Securities and Exchange Commission has adopted Rule 15c-9 which establishes the definition of a "penny stock," for the purposes relevant to us, as any equity security that has a market price of less than \$5.00 per share or with an exercise price of less than \$5.00 per share, subject to certain exceptions.

For any transaction involving a penny stock, unless exempt, the rules require:

- (a) that a broker or dealer approve a person's account for transactions in penny stocks; and
- (b) the broker or dealer receive from the investor a written agreement to the transaction, setting forth the identity and quantity of the penny stock to be purchased.

In order to approve a person's account for transactions in penny stocks, the broker or dealer must: (a) obtain financial information and investment experience objectives of the person; and (b) make a reasonable determination that the transactions in penny stocks are suitable for that person and the person has sufficient knowledge and experience in financial matters to be capable of evaluating the risks of transactions in penny stocks.

The broker or dealer must also deliver, prior to any transaction in a penny stock, a disclosure schedule prescribed by the Commission relating to the penny stock market, which, in highlight form: (a) sets forth the basis on which the broker or dealer made the suitability determination, and (b) that the broker or dealer received a signed, written agreement from the investor prior to the transaction. Generally, brokers may be less willing to execute transactions in securities subject to the "penny stock" rules. This may make it more difficult for investors to dispose of our Common shares and cause a decline in the market value of our stock.

Disclosure also has to be made about the risks of investing in penny stocks in both public offerings and in secondary trading and about the commissions payable to both the broker-dealer and the registered representative, current quotations for the securities and the rights and remedies available to an investor in cases of fraud in penny stock transactions. Finally, monthly statements have to be sent disclosing recent price information for the penny stock held in the account and information on the limited market in penny stocks.

LIABILITY OF DIRECTORS FOR BREACH OF DUTY OF CARE IS LIMITED.

According to Nevada law (NRS 78.138(7)), all Nevada corporations limit the liability of directors and officers, including acts not in good faith. Our stockholders' ability to recover damages for fiduciary breaches may be reduced by this statute. In addition, we are obligated to indemnify our directors and officers regarding stockholder suits which they successfully defend (NRS 78.7502).

BECAUSE WE DO NOT INTEND TO PAY ANY CASH DIVIDENDS ON OUR COMMON STOCK, OUR STOCKHOLDERS WILL NOT BE ABLE TO RECEIVE A RETURN ON THEIR SHARES UNLESS THEY SELL THEM.

We intend to retain any future earnings to finance the development and expansion of our business. We do not anticipate paying any cash dividends on our common stock in the foreseeable future. Unless we pay dividends, our stockholders will not be able to receive a return on their shares unless they sell them. There is no assurance that stockholders will be able to sell shares when desired.

WE WILL INCUR ONGOING COSTS AND EXPENSES FOR SEC REPORTING AND COMPLIANCE, AND WITHOUT REVENUE WE MAY NOT BE ABLE TO REMAIN IN COMPLIANCE WITH THE SEC, MAKING IT DIFFICULT FOR INVESTORS TO SELL THEIR SHARES, IF AT ALL.

To remain eligible for quotation on the OTCBB, issuers must remain current in their filings with the SEC. Market Makers are not permitted to begin quotation of a security whose issuer does not meet this filing requirement. Securities already quoted on the OTCBB that become delinquent in their required filings will be removed following a 30 or 60 day grace period if they do not make their required filing during that time. In order for us to remain in compliance we will require future revenues to cover the cost of these filings, which could comprise a substantial portion of our available cash resources. If we are unable to generate sufficient revenues to remain in compliance it may be difficult for you to resell any shares you may purchase, if at all.

WE MAY ISSUE ADDITIONAL SHARES OF PREFERRED STOCK IN THE FUTURE THAT MAY ADVERSELY IMPACT YOUR RIGHTS AS HOLDERS OF OUR COMMON STOCK.

Our articles of incorporation authorize us to issue up to issue up to 15,000,000 shares of preferred stock in various classes. Currently, the Company has 51 shares of Series B preferred stock outstanding and 190 shares of Series C preferred stock outstanding. The Series C preferred stock is convertible into shares of the Company's common stock.

Our board of directors will have the authority to fix and determine the relative rights and preferences of preferred shares, as well as the authority to issue additional shares, without further stockholder approval. As a result, our board of directors could authorize the issuance of a series of preferred stock that would grant to holders preferred rights to our assets upon liquidation, the right to receive dividends before dividends are declared to holders of our common stock, and the right to the redemption of such preferred shares, together with a premium, prior to the redemption of the common stock. To the extent that we do issue such additional shares of preferred stock, your rights as holders of common stock could be impaired thereby, including, without limitation, dilution of your ownership interests in us. In addition, shares of preferred stock could be issued with terms calculated to delay or prevent a change in control or make removal of management more difficult, which may not be in your interest as a holder of common stock.

WE ARE REGISTERING AN AGGREGATE OF 10,000,000 SHARES OF COMMON STOCK TO BE ISSUED UNDER THE EQUITY PURCHASE AGREEMENT. THE SALE OF SUCH SHARES COULD DEPRESS THE MARKET PRICE OF OUR COMMON STOCK.

We are registering an aggregate of 10,000,000 shares of common stock under the registration statement of which this prospectus forms a part for issuance pursuant to the Equity Purchase Agreement. The 10,000,000 shares of our common stock will represent approximately 0.6% of our shares outstanding immediately after our exercise of the put right. The sale of these shares into the public market by Southridge could depress the market price of our common stock.

THE COMPANY MAY NOT HAVE ACCESS TO THE FULL AMOUNT AVAILABLE UNDER THE EQUITY PURCHASE AGREEMENT.

We have not drawn down funds and have not issued shares of our common stock under the Equity Purchase Agreement with Southridge. Our ability to draw down funds and sell shares under the Equity Purchase Agreement requires that the registration statement, of which this prospectus is a part, be declared effective by the SEC, and that this registration statement continue to be effective. In addition, the registration statement of which this prospectus is a part registers 10,000,000 total shares of our common stock issuable under the Equity Purchase Agreement, and our ability to access the Equity Purchase Agreement to sell any remaining shares issuable under the Equity Purchase Agreement is subject to our ability to prepare and file one or more additional registration statements registering the resale of these shares. These subsequent registration statements may be subject to review and comment by the staff of the SEC, and will require the consent of our independent registered public accounting firm. Therefore, the timing of effectiveness of these subsequent registration statements cannot be assured. The effectiveness of these subsequent registration statements is a condition precedent to our ability to sell the shares of common stock subject to these subsequent registration statements to Southridge under the Equity Purchase Agreement. Even if we are successful in causing one or more registration statements registering the resale of some or all of the shares issuable under the Equity Purchase Agreement to be declared effective by the SEC in a timely manner, we will not be able to sell shares under the Equity Purchase Agreement unless certain other conditions are met. Accordingly, because our ability to draw down amounts under the Equity Purchase Agreement is subject to a number of conditions, there is no guarantee that we will be able to draw down any portion or all of the \$10 million available to us under the Equity Purchase Agreement.

CERTAIN RESTRICTIONS ON THE EXTENT OF PUTS MAY HAVE LITTLE, IF ANY, EFFECT ON THE ADVERSE IMPACT OF OUR ISSUANCE OF SHARES IN CONNECTION WITH THE EQUITY PURCHASE AGREEMENT, AND AS SUCH, SOUTHRIDGE MAY SELL A LARGE NUMBER OF SHARES, RESULTING IN SUBSTANTIAL DILUTION TO THE VALUE OF SHARES HELD BY EXISTING SHAREHOLDERS.

Southridge has agreed, subject to certain exceptions listed in the Equity Purchase Agreement, to refrain from holding an amount of shares which would result in Southridge owning more than 9.99% of the then-outstanding shares of the Company's common stock at any one time. These restrictions, however, do not prevent Southridge from selling shares of common stock received in connection with a put, and then receiving additional shares of common stock in connection with a subsequent put. In this way, Southridge could sell more than 9.99% of the outstanding common stock in a relatively short time frame while never holding more than 9.99% at one time.

SOUTHRIDGE WILL PAY LESS THAN THE THEN-PREVAILING MARKET PRICE FOR OUR COMMON STOCK.

The common stock to be issued to Southridge pursuant to the Equity Purchase Agreement will be purchased at a 6% discount to the average of the lowest closing price of the common stock of any two trading days, consecutive or inconsecutive, during the five consecutive trading days immediately following the date of our notice to Southridge of our election to put shares pursuant to the Equity Purchase Agreement. Southridge has a financial incentive to sell our common stock immediately upon receiving the shares to realize the profit equal to the difference between the discounted price and the market price. If Southridge sells the shares, the price of our common stock could decrease. If our stock price decreases, Southridge may have a further incentive to sell the shares of our common stock that it holds. These sales may have a further impact on our stock price.

YOUR OWNERSHIP INTEREST MAY BE DILUTED AND THE VALUE OF OUR COMMON STOCK MAY DECLINE BY EXERCISING THE PUT RIGHT PURSUANT TO OUR EQUITY PURCHASE AGREEMENT.

Effective November 4, 2011, we entered into a \$10,000,000 Equity Purchase Agreement with Southridge. Pursuant to the Equity Purchase Agreement, when we deem it necessary, we may raise capital through the private sale of our common stock to Southridge at a price equal to 94% of the average of the lowest closing bid price of our common stock of any two trading days, consecutive or inconsecutive, during the five (5) trading day period immediately following the date our put notice is delivered and estimated put shares have been delivered and cleared through Southridge's brokerage account. Because the put price is lower than the prevailing market price of our common stock, to the extent that the put right is exercised, your ownership interest may be diluted.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

The information contained in this registration statement, including in the documents incorporated by reference into this registration statement, includes some statements that are not purely historical and that are “forward-looking statements.” Such forward-looking statements include, but are not limited to, statements regarding our and our management’s expectations, hopes, beliefs, intentions or strategies regarding the future, including our financial condition and results of operations. In addition, any statements that refer to projections, forecasts or other characterizations of future events or circumstances, including any underlying assumptions, are forward-looking statements. The words “anticipates,” “believes,” “continue,” “could,” “estimates,” “expects,” “intends,” “may,” “might,” “plans,” “potential,” “predicts,” “projects,” “seeks,” “should,” “will,” “would” and similar expressions, or the negatives of such terms, may identify forward-looking statements, but the absence of these words does not mean that a statement is not forward-looking.

The forward-looking statements contained in this registration statement are based on current expectations and beliefs concerning future developments and the potential effects on the parties and the transaction. There can be no assurance that future developments actually affecting us will be those anticipated. Those that may cause actual results or performance to be materially different from those expressed or implied by these forward-looking statements, including the following forward-looking statements, involve a number of risks, uncertainties (some of which are beyond the Company’s control) or other assumptions.

USE OF PROCEEDS

We will not receive any proceeds from the sale of the common stock offered through this prospectus by the Selling Security Holders. However, we will receive proceeds (i) from any sale of the common stock under the Equity Purchase Agreement to Southridge or (ii) in the event that some or all of the warrants held by a Selling Security Holder are exercised for cash. There can be no assurance that any of the Selling Security Holders will exercise their warrants or that we will receive any proceeds therefrom. We intend to use the net proceeds received for working capital or general corporate needs.

DETERMINATION OF OFFERING PRICE

Our common stock currently trades on the OTCBB under the symbol “MSLP.OB”. The proposed offering price of the Put Shares and the Purchased Shares is \$0.01 and has been estimated solely for the purpose of computing the amount of the registration fee in accordance with Rule 457(c) of the Securities Act of 1933, on the basis of the closing bid price of common stock of the Company as reported on the OTCBB on August 3, 2012. The offering price of the Warrant Shares is \$0.015, which is equal to the exercise price of the warrants. The Selling Security Holders may sell

shares in any manner at the current market price.

SELLING SECURITY HOLDERS

The Put Shares

We agreed to register for resale 10,000,000 shares of our common stock by Southridge. On November 4, 2011, the Company and Southridge entered into the Equity Credit Agreement pursuant to which, we have the opportunity, for a two-year period, commencing on the date on which the SEC first declares effective this registration statement (the “Commitment Period”), to which this prospectus is made a part registering the resale of our common shares by Southridge, to resell shares of our common stock purchased under the Equity Credit Agreement.

In order to sell shares to Southridge under the Equity Credit Agreement, during the Commitment Period, the Company must deliver to Southridge a written put notice on any trading day (the “Put Date”), setting forth the dollar amount to be invested by Southridge (the “Put Notice”). For each share of our common stock purchased under the Equity Credit Agreement, Southridge will pay ninety-four percent (94%) of the average of the lowest two closing bid prices on any two applicable trading days, consecutive or inconsecutive, during the five trading days immediately following the date on which the Company has deposited an estimated amount of put shares to Southridge’s brokerage account in the manner provided by the Equity Credit Agreement (the “Valuation Period”). The Company may, at its sole discretion, issue a Put Notice to Southridge and Southridge will then be irrevocably bound to acquire such shares.

If, during any Valuation Period, the Company (i) subdivides or combines the common stock; (ii) pays a dividend in shares of common stock or makes any other distribution of shares of common stock; (iii) issues any options or other rights to subscribe for or purchase shares of common stock and the price per share is less than closing price in effect immediately prior to such issuance; (iv) issues any securities convertible into shares of common stock and the consideration per share for which shares of common stock may at any time thereafter be issuable pursuant to the terms of such convertible securities shall be less than the closing price in effect immediately prior to such issuance; (v) issue shares of common stock otherwise than as provided in the foregoing subsections (i) through (iv) at a price per share less than the closing price in effect immediately prior to such issuance, or without consideration; or (vi) makes a distribution of its assets or evidences of its indebtedness to the holders of common stock as a dividend in liquidation or by way of return of capital or other than as a dividend payable out of earnings or surplus legally available for dividends under applicable law (collectively, a “Valuation Event”), then a new Valuation Period shall begin on the trading day immediately after the occurrence of such Valuation Event and end on the fifth trading day thereafter.

We are relying on an exemption from the registration requirements of the Act for the private placement of our securities under the Equity Purchase Agreement pursuant to Section 4(2) of the Securities Act and/or Rule 506 of Regulation D promulgated thereunder. The transaction does not involve a public offering, Southridge is an “accredited investor” and/or qualified institutional buyer and the Investor has access to information about us and its investment.

There are substantial risks to investors as a result of the issuance of shares of our common stock under the Equity Purchase Agreement. These risks include dilution of stockholders, significant decline in our stock price and our ability to draw sufficient funds under the Equity Purchase Agreement when needed.

Southridge will periodically purchase shares of our common stock under the Equity Purchase Agreement and will in turn, sell such shares to investors in the market at the prevailing market price. This may cause our stock price to decline, which will require us to issue increasing numbers of shares to Southridge to raise the same amount of funds, as our stock price declines.

Southridge and any participating broker-dealers are “underwriters” within the meaning of the Securities Act. All expenses incurred with respect to the registration of the common stock will be borne by us, but we will not be obligated to pay any underwriting fees, discounts, commission or other expenses incurred by the Selling Security Holder in connection with the sale of such shares.

The Purchased Shares

The 42,000,000 Purchased Shares being offered for resale in this registration statement are held by certain shareholders who purchased shares of our common stock in private transactions.

The Warrant Shares

The 32,400,000 Warrant Shares being offered for resale in this registration statement are held by certain shareholders who purchased common stock purchase warrants in private transactions.

All expenses incurred with respect to the registration of the common stock will be borne by us, but we will not be obligated to pay any underwriting fees, discounts, commission or other expenses incurred by the Selling Security Holders in connection with the sale of such shares.

Except as indicated below, neither the Selling Security Holders nor any of their associates or affiliates has held any position, office, or other material relationship with us in the past three years.

PLAN OF DISTRIBUTION

This prospectus relates to the resale of 84,400,000 Shares of our common stock, par value \$0.001 per share, by the selling security holders (the “Selling Security Holders”), including (i) 10,000,000 Put Shares that we will put to Southridge pursuant to the Equity Purchase Agreement, (ii) 42,000,000 Purchase Shares, and (iii) 32,400,000 Warrant Shares.

The Selling Security Holders and any of its respective pledges, donees, assignees and other successors-in-interest may, from time to time, sell any or all of their shares of our common stock on any stock exchange, market or trading facility on which the shares are traded or in private transactions. The Selling Security Holders may use any one or more of the following methods when selling shares:

- ordinary brokerage transactions and transactions in which the broker-dealer solicits purchasers;

· block trades in which the broker-dealer will attempt to sell the shares as agent, but may position and resell a portion of the block as principal to facilitate the transaction;

· purchases by a broker-dealer as principal and resale by the broker-dealer for its account;

· an exchange distribution in accordance with the rules of the applicable exchange;

· privately negotiated transactions;

· broker-dealers may agree with the Selling Security Holders to sell a specified number of such shares at a stipulated price per share;

· through the writing of options on the shares;

· a combination of any such methods of sale; and

· any other method permitted pursuant to applicable law.

According to the terms of the Equity Purchase Agreement, neither Southridge nor any affiliate of Southridge acting on its behalf or pursuant to any understanding with it will execute any short sales during the term of this offering or any subsequent extension thereof pursuant to a renewal of the Equity Purchase Agreement.

The Selling Security Holders or their respective pledgees, donees, transferees or other successors in interest, may also sell the shares directly to market makers acting as principals and/or broker-dealers acting as agents for themselves or their customers. Such broker-dealers may receive compensation in the form of discounts, concessions or commissions from the Selling Security Holders and/or the purchasers of shares for whom such broker-dealers may act as agents or to whom they sell as principal or both, which compensation as to a particular broker-dealer might be in excess of customary commissions. Market makers and block purchasers purchasing the shares will do so for their own account and at their own risk. It is possible that a Selling Security Holder will attempt to sell shares of Common Stock in block transactions to market makers or other purchasers at a price per share which may be below the then market price. The Selling Security Holders cannot assure that all or any of the shares offered in this prospectus will be issued to, or sold by, the Selling Security Holders. In addition, the Selling Security Holders and any brokers, dealers or agents, upon effecting the sale of any of the shares offered in this prospectus are “underwriters” as that term is defined under the Securities Act or the Exchange Act, or the rules and regulations under such acts. In such event, any commissions received by such broker-dealers or agents and any profit on the resale of the shares purchased by them may be deemed to be underwriting commissions or discounts under the Securities Act.

Discounts, concessions, commissions and similar selling expenses, if any, attributable to the sale of shares will be borne by a Selling Security Holder. The Selling Security Holders may agree to indemnify any agent, dealer or broker-dealer that participates in transactions involving sales of the shares if liabilities are imposed on that person under the Securities Act.

The Selling Security Holders may from time to time pledge or grant a security interest in some or all of the shares of common stock owned by them and, if they default in the performance of their secured obligations, the pledgees or secured parties may offer and sell the shares of common stock from time to time under this prospectus after we have filed an amendment to this prospectus under Rule 424(b)(3) or any other applicable provision of the Securities Act amending the list of Selling Security Holders to include the pledgee, transferee or other successors in interest as a Selling Security Holder under this prospectus.

- Build lean muscle mass.

Perform Elite™ helps: fight fatigue, boost performance, build muscle, amp up intensity, hydrate muscles and feed muscle cells the nutrients they need. People need a pre-workout supplement because it prepares them to stay focused, energetic and fully-powered from start to finish. In Perform Elite™, ingredients like creatine and beta alanine feed muscle cells the nutrients they need to grow bigger and stronger. Without a pre-workout like Perform Elite™, muscles don't have the building blocks they need to gain size and strength.

RECOVER Elite™ (540g)

Post-Workout Recharger

- Optimize athletes' "muscle building";
- Promote post workout growth & repair;
- Replenish vital nutrients; and
- Speed recovery time.

Recover Elite™ helps athletes recover quicker and more effectively, repair muscle cells, maintain nutrient levels and grow bigger and stronger. When people work out, their muscle cells break down. In that post-workout period, it is important to feed these cells a supply of the right nutrients like the ones in Recover Elite™, so they can rebuild properly. When this is done correctly, muscles become both stronger and larger. If you don't use a post-workout supplement, these cells don't have the building blocks they need to recover and you won't increase size or strength.

Future Products

We have trademarked and registered an energy product for active lifestyles and competitive athletes, under the name Energel®. This product will be distributed primarily via internet sales, convenience stores, cycling shops, ski shops, and fitness and runner shoes retail sales stores by the end of the second quarter of 2012.

Sales & Distribution

We sell our products both domestically and internationally. With respect to domestic sales, we have three traditional distribution systems:

- 1) Approximately 41% of sales in 2011 were through a domestic Internet site named Bodybuilding.com (“Body Building”), which is the largest online retailer of sports nutrition products in the United States. Body Building awarded MusclePharm the title of the “Breakout Brand,” “Best Packaging” and “Best New Product for Assault” in 2011 and MusclePharm is now the number two best-selling brand on BB.com, and has two products in their top ten best sellers, and eight products in the top fifty selling products out of over 14,000 sku’s. In addition to Body Building.com, we also sell domestically through several distributors and over 100 Internet sites;
- 2) We sell through traditional brick and mortar stores, and are carried in approximately 450 The Vitamin Shoppes outlets and we sell our products into over 5000 GNC stores, and we are in 400 Vitamin World retail stores;

- 3) We have regional salesmen that support wholesale distributors like Europa, selling in up to 15,000 smaller retail or regional stores. We also work with other large distributors who have begun to place the Company’s product in small retail stores and gyms across the United States. Internationally, we are expanding rapidly into Central America, Mexico, Brazil, the Middle East, Europe, Russia, and the UK, and have Sportika Export as our international distributor that services over 120 countries.

In addition, we just recently launched a partnership with Eurpac to distribute our line of products to U.S. military bases and stores all over the world.

Marketing Strategy

Our core marketing strategy is to brand MusclePharm as the “must have” nutritional supplement line for high performance athletes. We want to be known as the athlete’s company, run by athletes who create their products for other athletes both professional and otherwise. We have endorsements from over 50 UFC fighters, well-known NFL players, as well as top X-Game and fitness athletes. Athletes are considered role models and many people strive to emulate their fitness and well-being regimen. Athlete sponsorships are the most logical tactic for our business. The objective of these athletic endorsements is to build both consumer awareness and confidence and to drive consumer demand for our products.

Edgar Filing: MusclePharm Corp - Form POS AM

MusclePharm in 2011 became the Official Supplement Provider and Sponsor of the Ultimate Fighting Championship (“UFC”). Our agreement includes prominent logo placement on the mat, and our branding can be seen on Fox and pay-per-view worldwide.

The fighters we sponsor feature our brand on their uniforms and we also extensively advertise at the Ultimate Fighting Championship events. In 2011, we launched a state-of-the-art website that will tap into the social networking world, further expanding our brand and consumer awareness.

The Company is also currently engaged in various in-store promotions, including point-of-purchase stands, aisle displays in our retail outlets, as well as sample demonstrations and athlete appearances in Wal-Mart, GNC, Vitamin World and Vitamin Shoppe locations.

Research and Development

Each and every product sold by MusclePharm is the end result of a long development process involving leading nutrition scientists, doctors, and top professional athletes.

Manufacturing and Product Quality

We are committed to producing and selling highly efficacious products that are trusted for their quality and safety. To date, our products have been outsourced to a third party manufacturer where the products are manufactured in full compliance with the Good Manufacturing Practice standards set by the Food & Drug Administration.

Trademarks and Patents

We regard our trademarks and other proprietary rights as valuable assets and believe that protecting our key trademarks is crucial to our business strategy of building strong brand name recognition. These trademarks are crucial elements of our business, and have significant value in the marketing of our products.

Our policy is to pursue registrations for all of the trademarks associated with our products. Federally registered trademarks have a perpetual life, provided that they are maintained and renewed on a timely basis and used correctly as trademarks, subject to the rights of third parties to attempt to cancel a trademark if priority is claimed or there is confusion of usage. We rely on common law trademark rights to protect our unregistered trademarks. Common law trademark rights generally are limited to the geographic area in which the trademark is actually used, while a United States federal registration of a trademark enables the registrant to stop the unauthorized use of the trademark by any third party anywhere in the United States. Furthermore, the protection available, if any, in foreign jurisdictions may not be as extensive as the protection available to us in the United States.

Although we seek to ensure that we do not infringe on the intellectual property rights of others, there can be no assurance that third parties will not assert intellectual property infringement claims against us.

Competition

The sports nutrition business is highly competitive. Competition is based primarily on quality and assortment of products, marketing support, and availability of new products. Currently, our main competitors are three private companies: Optimum Nutrition, Inc. (“Optimum”), Iovate Health Sciences, Inc. (“IHS”), and Bio-Engineered Supplements and Nutrition, Inc. (“BSN”). Optimum is a wholly owned subsidiary of Glanbia Nutritionals, Inc., an international nutritional ingredients group. Optimum owns and operates two brands of nutritional supplements (Optimum Nutrition and American Body Building), providing a line of products across multiple categories. IHS is a nutritional supplement company that delivers a range of products to the nutritional marketplace. Headquartered in Oakville, Ontario, Canada,

IHS's line of products can be found in major retail stores and include such brands as Hydroxy-Cut™, Cell-Tech™, Six Star Nutrition™. BSN is also a sports nutrition leader whose top products include No-Explode™ and Syntha Six Protein™.

MusclePharm intends to compete by aggressively marketing our brand, emphasizing our relationships with professional athletes, and maximizing our relationships with those athletes, retail outlets and industry publications that align with our vision. We also tout the strength of the science behind MusclePharm products, as this is a key point of difference.

Regulatory Matters

The manufacture, packaging, labeling, advertising, promotion, distribution and sale of our products are subject to regulation by numerous governmental agencies. Our products are subject to regulation by, among other regulatory entities, the Consumer Product Safety Commission (CPSC), the U.S. Department of Agriculture (USDA), the Environmental Protection Agency (EPA) and the U.S. Food and Drug Administration (FDA). Advertising and other forms of promotion and methods of marketing are subject to regulation primarily by the U.S. Federal Trade Commission (FTC), which regulates these activities under the Federal Trade Commission Act (FTCA). The manufacture, labeling and advertising of our products are also regulated by various state and local agencies as well as those of each foreign country to which we distribute our products.

The Dietary Supplement Health and Education Act of 1994 (DSHEA) revised the provisions of the Federal Food, Drug, and Cosmetic Act (FFDC Act) concerning the regulation of dietary supplements. All of the products we market are regulated as dietary supplements under the FFDC Act.

Under the current provisions of the FFDC Act, there are four categories of claims that pertain to the regulation of dietary supplements. Health claims are claims that describe the relationship between a nutrient or dietary ingredient and a disease or health related condition and can be made on the labeling of dietary supplements if supported by significant scientific agreement and authorized by the FDA in advance via notice and comment rulemaking. Nutrient content claims describe the nutritional value of the product and may be made if defined by the FDA through notice and comment rulemaking and if one serving of the product meets the definition. Statements of nutritional support or product performance, which are permitted on labeling of dietary supplements without FDA pre-approval, are defined to include statements that: (i) claim a benefit related to a classical nutrient deficiency disease and disclose the prevalence of such disease in the United States; (ii) describe the role of a nutrient or dietary ingredient intended to affect the structure or function in humans; (iii) characterize the documented mechanism by which a dietary ingredient acts to maintain such structure or function; or (iv) describe general well-being from consumption of a nutrient or dietary ingredient. In order to make a nutritional support claim, the marketer must possess adequate substantiation to demonstrate that the claim is not false or misleading and if the claim is for a dietary ingredient that does not provide traditional nutritional value, prominent disclosure of the lack of FDA review of the relevant statement and notification to the FDA of the claim is required. Drug claims are representations that a product is intended to diagnose, mitigate, treat, cure or prevent a disease. Drug claims are prohibited from use in the labeling of dietary supplements.

Claims made for our dietary supplement products may include statements of nutritional support and health and nutrient content claims when authorized by the FDA or otherwise allowed by law. The FDA's interpretation of what constitutes an acceptable statement of nutritional support may change in the future, thereby requiring that we revise our labeling. In addition, a dietary supplement that contains a new dietary ingredient (i.e., one not on the market before October 15, 1994) must have a history of use or other evidence of safety establishing that it is reasonably expected to be safe. The manufacturer must notify the FDA at least 75 days before marketing products containing new dietary ingredients and provide the FDA the information upon which the manufacturer based its conclusion that the product has a reasonable expectation of safety. There is no assurance that the FDA will accept the evidence of safety for any new dietary ingredients that we may wish to market, and the FDA's refusal to accept that evidence could prevent the marketing of the new dietary ingredients and dietary supplements containing a new dietary ingredient.

Our dietary supplements must comply with the Dietary Supplement and Nonprescription Drug Consumer Protection Act, which became effective on December 22, 2007. This Act amends the FFDC Act to mandate the reporting of serious adverse events received by us to the FDA.

The FDA has also announced its intention to promulgate new GMPs specific to dietary supplements, to fully enforce DSHEA and monitor compliance with the Bioterrorism Act of 2002.

Our failure to comply with applicable FDA regulatory requirements could result in, among other things, injunctions, product withdrawals, recalls, product seizures, fines and criminal prosecutions. We intend to comply with the new GMPs once they are adopted. The new GMPs, predicted to be finalized shortly, would be more detailed and stringent than the GMPs that currently apply to dietary supplements and may, among other things, require dietary supplements

to be prepared, packaged, produced and held in compliance with regulations similar to the GMP regulations for drugs. There can be no assurance that, if the FDA adopts GMP regulations for dietary supplements, we will be able to comply with the new regulations without incurring a substantial expense.

As a result of our efforts to comply with applicable statutes and regulations in the United States and elsewhere, we have from time to time reformulated, eliminated or relabeled certain of our products and revised certain advertising claims. We cannot predict the nature of any future laws, regulations, interpretations or applications, nor can we determine what effect additional governmental regulations or administrative orders, when and if promulgated, would have on our business in the future. They could, however, require the reformulation of certain products to meet new standards, the recall or discontinuance of certain products not capable of reformulation, additional record keeping, expanded documentation of the properties of certain products, expanded or different labeling, and/or scientific substantiation. Any or all of such requirements could have a material adverse effect on our business, financial condition and results of operations.

Our advertising of dietary supplement products is subject to regulation by the FTC under the FTCA. Section 5 of the FTCA prohibits unfair methods of competition and unfair or deceptive acts or practices in or affecting commerce. Section 12 of the FTCA provides that the dissemination or the causing to be disseminated of any false advertisement pertaining to drugs or foods, which would include dietary supplements, is an unfair or deceptive act or practice. Under the FTC's Substantiation Doctrine, an advertiser is required to have a "reasonable basis" for all objective product claims before the claims are made. Failure to adequately substantiate claims may be considered either deceptive or unfair practices. Pursuant to this FTC requirement, we are required to have adequate substantiation for all material advertising claims made for our products.

On November 18, 1998, the FTC issued "Dietary Supplements: An Advertising Guide for Industry." This guide provides marketers of dietary supplements with guidelines on applying FTC law to dietary supplement advertising. It includes examples of the principles that should be used when interpreting and substantiating dietary supplement advertising. Although the guide provides additional explanation, it does not substantively change the FTC's existing policy that all supplement marketers have an obligation to ensure that claims are presented truthfully and to verify the adequacy of the support behind such claims. Our outside counsel reviews our advertising claims for compliance with FTC requirements.

The FTC has a variety of processes and remedies available to it for enforcement, both administratively and judicially, including compulsory process, cease and desist orders and injunctions. FTC enforcement can result in orders requiring, among other things, limits on advertising, corrective advertising, consumer redress, divestiture of assets, rescission of contracts and such other relief as may be deemed necessary. A violation of such orders could have a material adverse effect on our business, financial condition and results of operations.

Advertising and labeling for dietary supplements and conventional foods are also regulated by state, county and other local governmental authorities. Some states also permit these laws to be enforced by private attorney generals. These private attorney generals may seek relief for consumers, seek class action certifications, seek class-wide damages, seek class-wide refunds and product recalls of products sold by us. There can be no assurance that state and local authorities will not commence regulatory action, which could restrict the permissible scope of our product advertising claims, or products that can be sold in the future.

Governmental regulations in foreign countries where we plan to or expand sales may prevent or delay entry into the market or prevent or delay the introduction, or require the reformulation, of certain of our products. Compliance with such foreign governmental regulations is generally the responsibility of our distributors for those countries. These distributors are independent contractors over whom we have limited control.

PENNY STOCK RULES

The U.S. Securities and Exchange Commission has also adopted rules that regulate broker-dealer practices in connection with transactions in penny stocks. Penny stocks are generally equity securities with a price of less than \$5.00 (other than securities registered on certain national securities exchanges or quoted on the Nasdaq system, provided that current price and volume information with respect to transactions in such securities is provided by the exchange or system).

A purchaser is purchasing penny stock, which limits the ability to sell the stock. The shares offered by this prospectus constitute penny stock under the Exchange Act. The shares will remain penny stocks for the foreseeable future. The classification of penny stock makes it more difficult for a broker-dealer to sell the stock into a secondary market, which makes it more difficult for a purchaser to liquidate his/her investment. Any broker-dealer engaged by the purchaser for the purpose of selling his or her shares in us will be subject to Rules 15g-1 through 15g-10 of the Exchange Act. Rather than creating a need to comply with those rules, some broker-dealers will refuse to attempt to sell penny stock.

The penny stock rules require a broker-dealer, prior to a transaction in a penny stock not otherwise exempt from those rules, to deliver a standardized risk disclosure document, which:

- Contains a description of the nature and level of risk in the market for penny stock in both public offerings and secondary trading;
- Contains a description of the broker's or dealer's duties to the customer and of the rights and remedies available to the customer with respect to a violation of such duties or other requirements of the Securities Act;
- Contains a brief, clear, narrative description of a dealer market, including bid" and ask" price for the penny stock and the significance of the spread between the bid and ask price;
- Contains a toll-free number for inquiries on disciplinary actions;
- - Defines significant terms in the disclosure document or in the conduct of trading penny stocks;
 - and
- Contains such other information and is in such form (including language, type, size and format) as the Securities and Exchange Commission shall require by rule or regulation.

The broker-dealer also must provide, prior to effecting any transaction in a penny stock, to the customer:

- The bid and offer quotations for the penny stock;
- The compensation of the broker-dealer and its salesperson in the transaction;

The number of shares to which such bid and ask prices apply, or other comparable information relating to the depth and liquidity of the market for such stock; and

· Monthly account statements showing the market value of each penny stock held in the customer's account.

In addition, the penny stock rules require that prior to a transaction in a penny stock not otherwise exempt from those rules; the broker-dealer must make a special written determination that the penny stock is a suitable investment for the purchaser and receive the purchaser's written acknowledgement of the receipt of a risk disclosure statement, a written agreement to transactions involving penny stocks, and a signed and dated copy of a written suitability statement. These disclosure requirements will have the effect of reducing the trading activity in the secondary market for our stock because it will be subject to these penny stock rules. Therefore, stockholders may have difficulty selling their securities.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Special Note Regarding Forward-Looking Statements

This registration statement and other reports filed by our Company from time to time with the U.S. Securities and Exchange Commission (collectively the Filings") contain or may contain forward-looking statements and information that are based upon beliefs of, and information currently available to, our management as well as estimates and assumptions made by our management. Readers are cautioned not to place undue reliance on these forward-looking statements, which are only predictions and speak only as of the date hereof. When used in the filings, the words anticipate," believe," estimate," expect," future," intend," plan," or the negative of these terms and similar expressions as they relate to us or our management identify forward-looking statements. Such statements reflect our current view with respect to future events and are subject to risks, uncertainties, assumptions, and other factors, including those set forth in the Risk Factors on page 9. Should one or more of these risks or uncertainties materialize, or should the underlying assumptions prove incorrect, actual results may differ significantly from those anticipated, believed, estimated, expected, intended, or planned.

Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance, or achievements. Except as required by applicable law, including the securities laws of the United States, we do not intend to update any of the forward-looking statements to conform these statements to actual results.

Our financial statements are prepared in accordance with accounting principles generally accepted in the United States (GAAP[®]). These accounting principles require us to make certain estimates, judgments and assumptions. We believe that the estimates, judgments and assumptions upon which we rely are reasonable based upon information available to us at the time that these estimates, judgments and assumptions are made. These estimates, judgments and assumptions can affect the reported amounts of assets and liabilities as of the date of the financial statements as well as the reported amounts of revenues and expenses during the periods presented. Our financial statements would be affected to the extent there are material differences between these estimates and actual results. In many cases, the accounting treatment of a particular transaction is specifically dictated by GAAP and does not require management's judgment in its application. There are also areas in which management's judgment in selecting any available alternative would not produce a materially different result. The following discussion should be read in conjunction with our consolidated financial statements and notes thereto appearing elsewhere in this report.

Results of Operations

For the Year Ended December 31, 2011 (As Restated) Compared to the Year Ended December 31, 2010 (As Restated)

Revenues

Net revenues from the sale of products were approximately \$17 million for the year ended December 31, 2011, as compared to revenue from the sale of products of approximately \$3.2 million for the year ended December 31, 2010. Sales activities during the year ended December 31, 2011, increased due to the increase in advertising and promotion efforts, as well as the change in the Company's manufacturers, which provided more consistent shipments to customers. The increase is also related to the significant capital spent on marketing with distributors and marketing and brand recognition with endorsements and sponsorships.

Cost of Sales

Cost of sales for the year ended December 31, 2011, were approximately \$14.8 million or 86% of revenue, as compared to approximately \$2.8 million or 88% of revenue for the year ended December 31, 2010. The cost of sales as a percentage of revenues were not consistent from December 31, 2010 to December 31, 2011. The cost of sales as a percentage of revenues increased due primarily to a reclassification of advertising expense to cost of sales in the amount of \$374,455 during 2011 due to our restatement. There were no such reclassifications in 2010.

Operating Expenses

Operating expenses for the year ended December 31, 2011, were approximately \$18.6 million, as compared to approximately \$18.7 million for the year ended December 31, 2010.

The approximate \$.1 million decrease is primarily due to an increase in stock based compensation – of approximately \$3.7 million, an increase in depreciation expense of approximately \$0.2 million and an increase in travel, meetings and entertainment of approximately \$0.3 million, offset by a decrease in investment advisory services of approximately \$2.4 million, a decrease in research and development costs of approximately \$1.2 million and the decrease of advertising expense of \$0.9 million.

Operating Loss

Operating loss for the year ended December 31, 2011 was approximately \$16.2 million, as compared to approximately \$18.3 million for the year ended December 31, 2010.

Interest Expense

Interest expense for the year ended December 31, 2011, was approximately \$3.7 million, as compared to approximately \$0.5 million for the year ended December 31, 2010. The increase in interest expense primarily relates to amortization of the debt discounts and debt issue costs of \$3.5 million and interest charges incurred on our debt instruments of approximately \$0.2 million.

Other Expenses

Other expenses for the year ended December 31, 2011, were approximately \$7 million, as compared to approximately \$1.3 million for the year ended December 31, 2010. The \$5.7 million increase in other expenses is primarily due to an increase in derivative expense of approximately \$4.7 million, an increase in interest expense of approximately \$3.2 million and increases in the losses on settlement of accounts payable of approximately \$3.4 million, offset by changes in the fair value of derivative liabilities of approximately \$5.3 million and licensing income of approximately \$0.2 million.

Net Loss

Net loss for the year ended December 31, 2011, was approximately \$23.3 million, or loss per share of \$0.08, as compared to the net loss of approximately \$19.6 million or loss per share of \$0.48 for the year ended December 31, 2010.

Inflation did not have a material impact on the Company's operations for the period. Other than the foregoing, management knows of no trends, demands, or uncertainties that are reasonably likely to have a material impact on the Company's results of operations.

For the Three Months Ended March 31, 2012 Compared to the Three Months Ended March 31, 2011:

Sales

Sales increased approximately \$13.5 million or 446% to \$16,560,680 for the three months ended March 31, 2012, as compared to \$3,033,936 for the three months ended March 31, 2011. The increase in sales was primarily attributable to increased brand awareness. Since inception, the Company has focused on an aggressive marketing plan to penetrate the market. As such, new promotional efforts have been made to increase sales by adding new customers and expanding our product line. The inclusion of new Gel squeeze tubes in various flavors has increased sales and seems to be reaching new customer demands. Another area of the increase is due to the growth in the international markets. Overall as a direct result of the aggressive marketing plan, our products are currently being offered in more retail stores, both domestic and international, and our products are receiving better shelf placement.

Gross Profit

Gross profit increased approximately \$3.0 million or 480% for the three months ended March 31, 2012 compared to the same three months ended March 31, 2011. Meanwhile the gross profit percentage increased slightly to approximately 22% during the three months ended March 31, 2012 from 21% for the same period ending March 31, 2011.

General and Administrative Expenses

General and administrative expenses for the three months ended March 31, 2012 increased approximately \$2.7 million over the same three months ended March 31, 2011. The increases seen in sales had corresponding increases in the general and administrative expenses bringing the total to \$4,392,811 for the quarter ending March 31, 2012, as compared to \$1,719,627 for the comparable three months ended March 31, 2011.

The major increase was the result of \$856,000 in athlete endorsements, \$1,084,000 in increases for salaries and benefits, \$159,000 in stock based compensation, \$146,000 through increased advertising and promotions, and other increases in general administrative expenses of \$340,000. The total increase was offset by decreases in professional fees of approximately \$182,000, and decrease in store support of \$250,000.

Loss from Operations

The loss from operations for the three months ended March 31, 2012, was \$727,293 as compared to a loss of \$1,087,225 for the comparable three months ended March 31, 2011. The improved operating performance for the period is primarily attributable to an aggressive marketing plan and the Company's ability to gain brand recognition resulting in increased sales during the three months ended March 31, 2012, as compared to the three months ended March 31, 2011.

Other Expenses

Other net expenses for the three months ended March 31, 2012, were \$15,308,000, as compared to \$3,924,697 for the comparable three months ended March 31, 2011. The increase in other expenses of \$11,383,303 is primarily attributed to items shown in the table below:

	Three Months Ended	
	March 31, 2012	March 31, 2011
Derivative expense	\$(1,456,910)	\$ (1,359,369)
Change in fair value of derivative liabilities	\$(8,357,171)	\$ (131,717)
Loss on settlement of accounts payable and debt	\$(2,941,826)	\$ (1,914,689)
Interest expense	\$(2,570,516)	\$ (518,922)
Other income (expense)	\$18,422	\$ -
	\$(15,308,000)	\$ (3,924,697)

The increase in this expense category was mainly attributed to fair value changes in derivative contracts and the increase in interest expense.

Net Loss

Net loss for the three months ended March 31, 2012, was \$16,035,293 or \$(0.01) loss per share as compared to \$5,011,922 or loss per share of \$(0.03) compared to the three months ended March 31, 2011.

Inflation did not have a material impact on the Company's operations for the period. Other than the foregoing, management knows of no trends, demands, or uncertainties that are reasonably likely to have a material impact on the Company's results of operations.

Liquidity and Capital Resources

The following table summarizes total current assets, liabilities and working capital at March 31, 2012, compared to December 31, 2011.

	March 31, 2012	December 31, 2011	Increase/Decrease
Current Assets	\$ 6,373,160	\$ 4,016,833	\$ 2,356,327
Current Liabilities	\$ 24,513,501	\$ 17,710,100	\$ 6,803,401
Working Capital (Deficit)	\$ (18,140,341)	\$ (13,693,267)	\$ (4,447,074)

Our primary source of operating cash has been through the sale of equity and through the issuance of convertible secured promissory notes and other short-term debt as discussed below.

At March 31, 2012, the Company had cash of \$1,299,235 and working capital deficit of approximately \$17.8 million, compared to cash of \$659,764 and a working capital deficit of approximately \$13.7 million at December 31, 2011. The working capital deficit increase of approximately \$4.1 million is primarily due to an increase in derivative liabilities of approximately \$8 million, and an decrease in other assets of \$0.3 million offset by an increase in accounts receivable of \$2 million and a decrease in accounts payable and accrued liabilities of approximately \$1.6 million, and \$0.6 million in cash.

Cash provided by operating activities was approximately \$1.4 million for the three months ended March 31, 2012, as compared to cash used in operating activities of approximately \$0.8 million for the three months ended March 31, 2011. The increase in cash provided by operating activities of approximately \$2.2 million for the three months ended March 31, 2012, compared to the three months ended March 31, 2011, was primarily due to an increased payables and deferred revenue of approximately \$2.6 million, an increase in derivative liabilities of \$8.2 million, a net increase in expenses related to the repayment and conversion of debt of \$1 million, and a increase in depreciation and amortization \$1.7 million, offset by an increase net loss of \$11 million, and an increase in accounts receivable and prepaids of \$0.3 million.

Cash used in investing activities increased to \$0.3 million from \$0.2 million for the three months ended March 31, 2012 and 2011 due to slightly higher spending on fixed assets. Future investments in property and equipment, as well as further development of our Internet presence will largely depend on available capital resources.

Cash flows used in financing activities were approximately \$.5 million for the three months ended March 31, 2012, as compared to cash flows provided by financing activities of approximately \$1.4 million for three months ended March 31, 2011. The approximately \$1.9 million decrease is due to the \$3.3 million increase in repayments of debt and \$0.2 million purchase of treasury stock offset by an increase proceeds from issuance of debt of \$1.4 million and proceeds from warrant exercises of approximately \$0.3 million.

Cash Flows From Financing Activities: For the Three Months Ended	March 31 2012	March 31 2011
Proceeds from issuance of debt	2,842,950	1,482,000
Repayment of debt	(3,346,433)	-
Debt issuance costs	(30,000)	(69,700)
Repurchase of common stock	(230,400)	-
Proceeds from issuance of common stock and warrants	285,760	-
Net Cash (Used In) Provided By Financing Activities	(478,123)	1,412,300

Going Concern

As reflected in the accompanying unaudited interim consolidated financial statements, the Company had a net loss of \$16,035,293 and net cash provided by operations of \$1,423,375 for the three months ended March 31, 2012 and a working capital deficit and stockholders' deficit of \$18,140,341 and \$17,209,090 respectively, at March 31, 2012. These factors raise substantial doubt about the Company's ability to continue as a going concern.

The ability of the Company to continue its operations is dependent on management's plans, which include the raising of capital through debt and/or equity markets with some additional funding from other traditional financing sources, including term notes, sale of aged debt to third parties in exchange for free trading stock, until such time that funds provided by operations are sufficient to fund working capital requirements. The Company may need to incur liabilities with certain related parties to sustain the Company's existence.

The Company will require additional funding to finance the growth of its current and expected future operations as well as to achieve its strategic objectives. The Company believes its current available cash along with anticipated revenues may be insufficient to meet its cash needs for the near future. There can be no assurance that financing will

be available in amounts or terms acceptable to the Company, if at all.

In response to these problems, management has taken the following actions:

- seeking additional third party debt and/or equity financing;
- continue with the implementation of the business plan;
- allocate sufficient resources to continue with advertising and marketing efforts.

Financings

Our primary source of operating cash has been through the sale of equity and through the issuance of convertible secured promissory notes.

The Company continues to explore potential expansion opportunities in the industry in order to boost sales, while leveraging distribution systems to consolidate lower costs. The Company needs to continue to raise money in order execute the business plan.

Off-Balance Sheet Arrangements

Other than the operating leases, as of March 31, 2012, the Company did not have any off-balance sheet arrangements. We are obligated under an operating lease for the rental of office space. Future minimum rental commitments with a remaining term in excess of one year as of March 31, 2012 are as follows:

Years Ended December 31,

2012	\$64,771
2013	92,421
2014	98,481
2015	104,542
Total minimum lease payments	\$360,215

Critical Accounting Policies

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period.

Making estimates requires management to exercise significant judgment. It is at least reasonably possible that the estimate of the effect of a condition, situation or set of circumstances that existed at the date of the financial statements, which management considered in formulating its estimate could change in the near term due to one or more future non-conforming events. Accordingly, the actual results could differ significantly from estimates.

Risks and Uncertainties

The Company operates in an industry that is subject to rapid change and intense competition. The Company's operations will be subject to significant risk and uncertainties including financial, operational, technological, regulatory and other risks, including the potential risk of business failure.

Principles of Consolidation

All significant intercompany accounts and transactions have been eliminated in consolidation.

Use of Estimates

The preparation of financial statements in conformity with United States of America generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period.

Making estimates requires management to exercise significant judgment. It is at least reasonably possible that the estimate of the effect of a condition, situation or set of circumstances that existed at the date of the financial statements, which management considered in formulating its estimate could change in the near term due to one or more future non-conforming events. Accordingly, the actual results could differ significantly from estimates.

Accounts Receivable and Allowance for Doubtful Accounts

Accounts receivable represents trade obligations from customers that are subject to normal trade collection terms. The Company periodically evaluates the collectability of its accounts receivable and considers the need to establish an allowance for doubtful accounts based upon historical collection experience and specific customer information. Accordingly, the actual amounts could vary from the recorded allowances.

The Company does not charge interest on past due receivables. Receivables are determined to be past due based on the payment terms of the original invoices.

Fair Value of Financial Instruments

The Company measures assets and liabilities at fair value based on an expected exit price as defined by the authoritative guidance on fair value measurements, which represents the amount that would be received on the sale of an asset or paid to transfer a liability, as the case may be, in an orderly transaction between market participants. As such, fair value may be based on assumptions that market participants would use in pricing an asset or liability. The authoritative guidance on fair value measurements establishes a consistent framework for measuring fair value on either a recurring or nonrecurring basis whereby inputs, used in valuation techniques, are assigned a hierarchical level.

The following are the hierarchical levels of inputs to measure fair value:

- Level 1: Observable inputs that reflect quoted prices (unadjusted) for identical assets or liabilities in active markets.

- Level 2: Inputs reflect quoted prices for identical assets or liabilities in markets that are not active; quoted prices for similar assets or liabilities in active markets; inputs other than quoted prices that are observable for the assets or liabilities; or inputs that are derived principally from or corroborated by observable market data by correlation or other means.

- Level 3: Unobservable inputs reflecting the Company's assumptions incorporated in valuation techniques used to determine fair value. These assumptions are required to be consistent with market participant assumptions that are reasonably available.

Revenue Recognition

The Company records revenue when all of the following have occurred: (1) persuasive evidence of an arrangement exists, (2) product has been shipped or delivered, (3) the sales price to the customer is fixed or determinable, and (4) collectability is reasonably assured.

Depending on individual customer agreements, sales are recognized either upon shipment of products to customers or upon delivery. The Company records sales allowances and discounts as a direct reduction of sales.

The Company has determined that advertising related credits that were granted to customers fell within the guidance of ASC No. 605-50-55 (“*Revenue Recognition*” – *Customer Payments and Incentives – Implementation Guidance and Illustrations*). The guidance indicates that, absent evidence of benefit to the vendor, appropriate treatment requires netting these types of payments against revenues and not expensing as advertising expense.

The Company has an informal 7-day right of return for products. There were nominal returns at the quarter ended March 31, 2012 and March 31, 2011.

Accounts Receivable

MusclePharm performs ongoing evaluations of its customer’s financial condition and generally does not require collateral. Management reviews accounts receivable periodically and reduces the carrying amount by a valuation allowance that reflects management’s best estimate of amounts that may not be collectible. Allowances, if any, for uncollectible accounts receivable are determined based upon information available and historical experience.

Beneficial Conversion Feature

For conventional convertible debt where the rate of conversion is below market value, the Company records a “beneficial conversion feature” (“BCF”) and related debt discount.

When the Company records a BCF, the relative fair value of the BCF would be recorded as a debt discount against the face amount of the respective debt instrument. The discount would be amortized to interest expense over the life of the debt.

Derivative Liabilities

Fair value accounting requires bifurcation of embedded derivative instruments such as conversion features in convertible debt or equity instruments, and measurement of their fair value for accounting purposes. In determining the appropriate fair value, the Company uses the Black-Scholes option-pricing model. In assessing the convertible debt instruments, management determines if the convertible debt host instrument is conventional convertible debt and further if there is a beneficial conversion feature requiring measurement. If the instrument is not considered conventional convertible debt, the Company will continue its evaluation process of these instruments as derivative financial instruments.

Once determined, derivative liabilities are adjusted to reflect fair value at each reporting period end, with any increase or decrease in the fair value being recorded in results of operations as an adjustment to fair value of derivatives. In addition, the fair value of freestanding derivative instruments such as warrants, are also valued using the Black-Scholes option-pricing model.

Debt Issue Costs and Debt Discount

The Company may pay debt issue costs, and record debt discounts in connection with raising funds through the issuance of convertible debt. These costs are amortized over the life of the debt to interest expense. If a conversion of the underlying debt occurs, a proportionate share of the unamortized amounts is immediately expensed.

Original Issue Discount

For certain convertible debt issued, the Company provides the debt holder with an original issue discount. The original issue discount is recorded to debt discount and additional paid in capital at an amount not to exceed gross proceeds raised, reducing the face amount of the note and is amortized to interest expense over the life of the debt.

Share-Based Payments

Generally, all forms of share-based payments, including stock option grants, warrants, restricted stock grants and stock appreciation rights are measured at their fair value on the awards' grant date, based on estimated number of awards that are ultimately expected to vest. Share-based compensation awards issued to non-employees for services rendered are recorded at either the fair value of the services rendered or the fair value of the share-based payment, whichever is more readily determinable.

Restatement

On May 14, 2012, the Company determined that a material misstatement exists in the Company's 2011 quarterly and 2011 and 2010 annual financial statements. The Company concluded that the following financial statements contained material misstatements: (i) the Company's audited financial statements for the year ended December 31, 2011, filed in an annual report on Form 10-K with the U.S. Securities and Exchange Commission (the "SEC") on April 16, 2012; (ii) the Company's audited financial statements for the year ended December 31, 2010, filed in an annual report on Form 10-K with the U.S. Securities and Exchange Commission (the "SEC") on April 1, 2011; (iii) the Company's unaudited financial statements for the period ended September 30, 2011, filed in a quarterly report on Form 10-Q with the SEC on November 14, 2011; (iv) the Company's unaudited financial statements for the period ended June 30, 2011, filed in a quarterly report on Form 10-Q with the SEC on August 16, 2011; and (v) the Company's unaudited financial statements for the period ended March 31, 2011, filed in a quarterly report on Form 10-Q with the SEC on May 23, 2011.

The foregoing financial statements contained material misstatements pertaining to the Company's calculation of net sales and presentation of general and administrative expenses and cost of sales. The Company has determined that advertising related credits that were granted to customers fell within the guidance of ASC No. 605-50-55 ("*Revenue Recognition*" – *Customer Payments and Incentives – Implementation Guidance and Illustrations*). The guidance indicates that, absent evidence of benefit to the vendor, appropriate treatment requires netting these types of payments against revenues and not expensing as advertising expense. The Company also noted other credits and discounts that, upon further review, had been previously classified as advertising expense as a component of general and administrative expense that require a reallocation of presentation as amounts to be netted against revenues. Additionally, for the year ended December 31, 2011, the Company reclassified certain advertising expenses relating to sample items to cost of sales. There were no such reclassifications for 2010. The Company's net loss and loss per share will not be affected by this reallocation in the statement of operations.

Promotions, credits and non-specific advertising with its customers have been reclassified from general and administrative expenses to revenues.

Samples shipped to customers not clearly identifiable were reclassified from general and administrative expense to cost of sales.

Accounts Receivable

MusclePharm performs ongoing evaluations of its customer's financial condition and generally does not require collateral. Management reviews accounts receivable periodically and reduces the carrying amount by a valuation allowance that reflects management's best estimate of amounts that may not be collectible. Allowances, if any, for uncollectible accounts receivable are determined based upon information available and historical experience.

Property and Equipment

Property and equipment are stated at cost less accumulated depreciation. Included in property and equipment are website development costs which represent capitalized costs of design, configuration, coding, installation, and testing of the Company's website. Depreciation is computed on the straight-line method over the asset's useful lives which range from three to five years. Maintenance and repairs are charged to expense as incurred; improvements and betterments are capitalized.

Long-Lived Assets

MusclePharm's primary long-lived assets are property and equipment. The Company assesses the recoverability of its long-lived assets whenever events and circumstances indicate the carrying value of an asset or asset group may not be recoverable from estimated future cash flows expected to result from its use and eventual disposition.

Fair Value Measurements

The Company follows guidance for fair value measurements which defines fair value, establishes a framework for using fair value to measure financial assets and liabilities on a recurring basis, and expands disclosures about fair value measurements. The Company also applies the guidance to non-financial assets and liabilities measured at fair value on a non-recurring basis, which includes goodwill and intangible assets. The guidance establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are inputs that market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the Company. Unobservable inputs are inputs that reflect the Company's assumptions of what market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The hierarchy is broken down into three levels based on the reliability of the inputs as follows:

Level 1 – Valuation is based upon unadjusted quoted market prices for identical assets or liabilities in active markets that the Company has the ability to access.

Level 2 – Valuation is based upon quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; or valuations based on models where the significant inputs are observable in the market.

Level 3 – Valuation is based on models where significant inputs are not observable. The unobservable inputs reflect the Company's own assumptions about the inputs that market participants would use.

Financial instruments consist of cash, accounts receivable, prepaid expenses, accounts payable and accrued expenses. The carrying amount of these financial instruments approximates fair value due to their short-term nature or the current rates at which the Company could borrow funds with similar remaining maturities. Unless otherwise noted, it is management's opinion that the Company is not exposed to significant interest, currency or credit risks arising from these financial statements.

Derivative Financial Instruments

Fair value accounting requires bifurcation of embedded derivative instruments such as conversion features in convertible debt or equity instruments, and measurement of their fair value for accounting purposes. In determining the appropriate fair value, the Company uses the Black-Scholes option-pricing model. In assessing the convertible debt instruments, management determines if the convertible debt host instrument is conventional convertible debt and further if there is a beneficial conversion feature requiring measurement. If the instrument is not considered conventional convertible debt, the Company will continue its evaluation process of these instruments as derivative financial instruments.

Revenue Recognition (As Restated)

The Company records revenue when all of the following have occurred: (1) persuasive evidence of an arrangement exists, (2) product has been shipped or delivered by the third party manufacturer, (3) the sales price to the customer is fixed or determinable, and (4) collectability is reasonably assured.

Depending on individual customer agreements, sales are recognized either upon shipment of products to customers or upon delivery. For one of our largest customers, which represent 14% of total revenue in 2011, revenue is recognized upon delivery.

The Company has determined that advertising related credits that were granted to customers fell within the guidance of ASC No. 605-50-55 (“*Revenue Recognition*” – *Customer Payments and Incentives – Implementation Guidance and Illustrations*). The guidance indicates that, absent evidence of benefit to the vendor, appropriate treatment requires netting these types of payments against revenues and not expensing as advertising expense.

The Company records store support, give aways, sales allowances and discounts as a direct reduction of sales. The Company recorded reductions to gross revenues totaling approximately \$4,000,000 and \$1,000,000 for the years ended December 31, 2011 and 2010, respectively.

The Company grants volume incentive rebates to certain customers based on contractually agreed percentages ranging from 2.5% - 5.5% as a percentage of sales once a certain threshold has been met. The credits are recorded as a direct reduction to sales. Included in the reductions to revenues above are volume incentive rebates. Total volume incentive rebates granted for the years ended December 31, 2011 and 2010 were approximately \$500,000 and \$0, respectively.

The Company has an informal 7-day right of return for products. There were nominal returns in 2011 and 2010.

During the years ended December 31, 2011 and 2010, the Company had the following concentrations of revenues with customers:

Customer	2011 (As Restated)		2010 As Restated)	
A	41	%	45	%
B	14	%	7	%
C	-	%	15	%

The Company does not manufacture or physically hold any inventory. Inventory is held and distributed by the Company's third party manufacturer.

Sponsorship and Endorsement Agreements

As a component of its marketing strategy, the Company enters into sponsorship and endorsement agreements with prominent athletes, trainers, and other high profile individuals that provide the Company ongoing sources of exposure to its products. The agreements sometimes specify certain contingencies that must be met to receive payments; others may require regular or periodic payments with no specified service or events that trigger payments under an agreement, or a combination of both. Agreements that are contingent upon the successful completion of an event prior to payment are considered unearned until the completion of the triggering event, and as such, no expense or liability is recorded until the successful completion of the triggering event. Where agreements are based on time and not on specific triggering events, the services are considered to be earned ratably over the period of the agreement, and as such expenses and liabilities are recorded ratably over the term of the agreement.

On September 1, 2011, the Company signed a sponsorship agreement with Zuffa Marketing, LLC, the owner of Ultimate Fighting Championship™ (“UFC™”). The Company is one of five primary sponsors with Dodge Trucks, Harley-Davidson, Bud Light and Tapout. The Company is the “Official Supplement Company of the UFC.” The Company receives brand placement at UFC™ events. Our agreement includes prominent logo placement on the mat, and our branding can be seen on Fox and pay-per-view worldwide.

Stock-Based Compensation

MusclePharm measures and recognizes compensation expense for all share-based awards made to employees and directors, including stock options and stock purchase warrants, based on estimated fair values. The Company must estimate the fair value of share-based awards on the grant date using an option pricing model. MusclePharm values share-based awards using the Black-Scholes option pricing model. The Black-Scholes model is highly complex and dependent on key estimates by management.

Recent Accounting Pronouncements

In May 2011, the FASB issued ASU No. 2011-04, which amended ASC Topic 820 to achieve common fair value measurements and disclosure requirements in U.S. GAAP and International Financial Reporting Standards (“IFRS”). The amendments in ASU No. 2011-05 result in common fair value measurement and disclosure requirements in U.S. GAAP and IFRSs. Consequently, the amendments change the wording used to describe many of the requirements in U.S. GAAP for measuring fair value and for disclosing information about fair value measurements. This amendment is effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. The Company does not anticipate this amendment will have a material impact on its financial statements.

Except as indicated by footnote, and subject to the community property laws where applicable, the persons or entities named in the tables have sole voting and dispositive power with respect to all shares shown as beneficially owned by them.

Insofar as indemnification for liabilities arising under the Securities Act may be permitted to our directors, officers and controlling persons pursuant to the provisions described above, or otherwise, we have been

advised that in the opinion of the SEC such indemnification is against public policy as expressed in the Securities Act and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than our payment of expenses incurred or paid by our director, officer or controlling person in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, we will, unless in the opinion of our counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Securities Act and will be governed by the final adjudication of such issue.

Notes to Consolidated Financial Statements

(March 31, 2012)

(Unaudited)

Note 1 Nature of Operations and Basis of Presentation

Nature of Operations

MusclePharm Corporation (the “Company”, “We”, “Our” or “MP”), was organized as a limited liability company in the State of Colorado on April 22, 2008. On February 18, 2010, the Company executed a reverse recapitalization with Tone in Twenty, Inc. and changed its name to MP.

During the second quarter of 2012, the Company opened operations in Canada under the subsidiary name MusclePharm Canada, Inc. The business will have distribution and sales activity on site in its warehouse in Hamilton, Ontario. The business currently employs five people.

The Company markets branded sports nutrition products.

Basis of Presentation

The accompanying unaudited interim consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America and the rules and regulations of the United States Securities and Exchange Act of 1934, as amended for interim financial information.

The financial information as of December 31, 2011 is derived from the audited financial statements presented in the Company’s Annual Report on Form 10-K for the years ended December 31, 2011 and 2010. The unaudited interim consolidated financial statements should be read in conjunction with the Company’s Annual Report on Form 10-K, which contains the audited financial statements and notes thereto, together with the Management’s Discussion and

Analysis, for the years ended December 31, 2011 and 2010.

Certain information or footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been or omitted, pursuant to the rules and regulations of the Securities and Exchange Commission for interim financial reporting. Accordingly, they do not include all the information and footnotes necessary for a comprehensive presentation of financial position, results of operations, or cash flows. It is management's opinion, however, that all material adjustments (consisting of normal recurring adjustments) have been made which are necessary for a fair financial statement presentation. The interim results for the three months ended March 31, 2012 are not necessarily indicative of results for the full fiscal year.

Restatement

On May 14, 2012, the Company determined that a material misstatement exists in the Company's 2011 quarterly and annual financial statements. The Company concluded that the following financial statements contained material misstatements: (i) the Company's audited financial statements for the year ended December 31, 2011, filed in an annual report on Form 10-K with the U.S. Securities and Exchange Commission (the "SEC") on April 16, 2012; (ii) the Company's unaudited financial statements for the period ended September 30, 2011, filed in a quarterly report on Form 10-Q with the SEC on November 14, 2011; (iii) the Company's unaudited financial statements for the period ended June 30, 2011, filed in a quarterly report on Form 10-Q with the SEC on August 16, 2011; and (iv) the Company's unaudited financial statements for the period ended March 31, 2011, filed in a quarterly report on Form 10-Q with the SEC on May 23, 2011.

The foregoing financial statements contained material misstatements pertaining to the Company's calculation of net sales and presentation of general and administrative expenses and cost of sales. The Company has determined that advertising related credits that were granted to customers fell within the guidance of ASC No. 605-50-55 ("*Revenue Recognition*" – *Customer Payments and Incentives – Implementation Guidance and Illustrations*). The guidance indicates that, absent evidence of benefit to the vendor, appropriate treatment requires netting these types of payments against revenues and not expensing as advertising expense. The Company also noted other credits and discounts that, upon further review, had been previously classified as advertising expense as a component of general and administrative expense that require a reallocation of presentation as amounts to be netted against revenues. The Company's net loss will not be affected by this reallocation in the statement of operations.

Promotions, credits and non-specific advertising with its customers have been reclassified from general and administrative expenses to revenues.

Samples shipped to customers not clearly identifiable were reclassified from general and administrative expense to cost of sales.

Note 2 Summary of Significant Accounting Policies

Principles of Consolidation

All significant intercompany accounts and transactions have been eliminated in consolidation.

Use of Estimates

The preparation of financial statements in conformity with United States of America generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period.

Making estimates requires management to exercise significant judgment. It is at least reasonably possible that the estimate of the effect of a condition, situation or set of circumstances that existed at the date of the financial statements, which management considered in formulating its estimate could change in the near term due to one or more future non-conforming events. Accordingly, the actual results could differ significantly from estimates.

Risks and Uncertainties

The Company operates in an industry that is subject to rapid change and intense competition. The Company's operations will be subject to significant risk and uncertainties including financial, operational, technological,

regulatory and other risks, including the potential risk of business failure.

Cash and Cash Equivalents

The Company considers all highly liquid instruments purchased with an original maturity of three months or less and money market accounts to be cash equivalents. At March 31, 2012 and December 31, 2011, the Company had no cash equivalents.

Accounts Receivable and Allowance for Doubtful Accounts

Accounts receivable represents trade obligations from customers that are subject to normal trade collection terms. The Company periodically evaluates the collectability of its accounts receivable and considers the need to establish an allowance for doubtful accounts based upon historical collection experience and specific customer information. Accordingly, the actual amounts could vary from the recorded allowances.

The Company does not charge interest on past due receivables. Receivables are determined to be past due based on the payment terms of the original invoices. Accounts receivable at March 31, 2012 and December 31, 2011:

Accounts receivable	\$4,721,674	\$2,766,776
Less: allowance for doubtful accounts	(179,809)	(197,684)
Accounts receivable – net	\$4,541,865	\$2,569,092

Prepaid Sponsorship Fees

Prepaid sponsorship fees represents fees paid in connection with future advertising to be received.

MusclePharm Corporation and Subsidiaries

Notes to Consolidated Financial Statements

March 31, 2012

(Unaudited)

At March 31, 2012 and December 31, 2011, the Company had the following concentrations of accounts receivable with customers:

Customer	2012		2011	
A	36	%	7	%
B	12	%	3	%
C	3	%	12	%
D	3	%	10	%
E	9	%	3	%
F	4	%	36	%

Property and Equipment

Property and equipment are stated at cost and depreciated to their estimated residual value over their estimated useful lives. When assets are retired or otherwise disposed of, the assets and related accumulated depreciation are relieved from the accounts and the resulting gains or losses are included in operating income in the statements of operations. Repairs and maintenance costs are expensed as incurred. Depreciation is provided using the straight-line method for all property and equipment.

Long-Lived Assets

The Company reviews long-lived assets for impairment whenever events or changes in circumstances, such as service discontinuance or technological obsolescence, indicate that the carrying amount of the long-lived asset may not be recoverable. When such events occur, the Company compares the carrying amount of the asset to the undiscounted expected future cash flows related to the asset. If the comparison indicates that impairment is present, the amount of the impairment is calculated as the difference between the excess of the carrying amount over the fair value of the asset. If a readily determinable market price does not exist, fair value is estimated using discounted expected cash flows attributable to the asset. During the three months ended March 31, 2012 and 2011, the Company recorded no impairment expense.

Website Development Costs

Costs incurred in the planning stage of a website are expensed, while costs incurred in the development stage are capitalized and amortized over the estimated useful life of the asset.

Fair Value of Financial Instruments

The Company measures assets and liabilities at fair value based on an expected exit price as defined by the authoritative guidance on fair value measurements, which represents the amount that would be received on the sale of an asset or paid to transfer a liability, as the case may be, in an orderly transaction between market participants. As such, fair value may be based on assumptions that market participants would use in pricing an asset or liability. The authoritative guidance on fair value measurements establishes a consistent framework for measuring fair value on either a recurring or nonrecurring basis whereby inputs, used in valuation techniques, are assigned a hierarchical level.

The following are the hierarchical levels of inputs to measure fair value:

·Level 1: Observable inputs that reflect quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2: Inputs reflect quoted prices for identical assets or liabilities in markets that are not active; quoted prices for similar assets or liabilities in active markets; inputs other than quoted prices that are observable for the assets or liabilities; or inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3: Unobservable inputs reflecting the Company's assumptions incorporated in valuation techniques used to determine fair value. These assumptions are required to be consistent with market participant assumptions that are reasonably available.

The following are the major categories of liabilities measured at fair value on a recurring basis as of March 31, 2012 and December 31, 2011, using quoted prices in active markets for identical liabilities (Level 1); significant other observable inputs (Level 2); and significant unobservable inputs (Level 3):

March 31,	December 31,
2012	2011

Derivative liabilities (Level 2) \$15,098,603 \$7,061,238

The Company's financial instruments consisted primarily of accounts receivable, prepaids, accounts payable and accrued liabilities, derivative liabilities and debt. The carrying amounts of the Company's financial instruments generally approximated their fair values as of March 31, 2012 and December 31, 2011, respectively, due to the short-term nature of these instruments.

Revenue Recognition

The Company records revenue when all of the following have occurred: (1) persuasive evidence of an arrangement exists, (2) product has been shipped or delivered, (3) the sales price to the customer is fixed or determinable, and (4) collectability is reasonably assured.

MusclePharm Corporation and Subsidiaries**Notes to Consolidated Financial Statements****March 31, 2012****(Unaudited)**

Depending on individual customer agreements, sales are recognized either upon shipment of products to customers or upon delivery. The Company records sales allowances and discounts as a direct reduction of sales. The Company has determined that advertising related credits that were granted to customers fell within the guidance of ASC No. 605-50-55 ("*Revenue Recognition*" – *Customer Payments and Incentives – Implementation Guidance and Illustrations*). The guidance indicates that, absent evidence of benefit to the vendor, appropriate treatment requires netting these types of payments against revenues and not expensing as advertising expense. Sales for the three months ended March 31, 2012 and 2011 are as follows:

	Three Months Ended March 31, 2012	2011 Restated	Adjustments	March 31, 2011 As Issued
Sales	\$ 19,302,769	\$ 3,671,215	\$ -	\$3,671,215
Discounts	2,742,089	637,279	483,838	153,441
Sales - Net	\$ 16,560,680	\$ 3,033,936	\$ 483,838	\$3,517,774

The Company has an informal 7-day right of return for products. There were nominal returns for the three months ended March 31, 2012 and 2011.

For the three months ended March 31, 2012 and 2011, the Company had the following concentrations of revenues with customers:

Customer	2012	2011
A	38 %	39 %
B	18 %	9 %
C	11 %	3 %

The Company does not manufacture or physically hold any inventory. Inventory is held and distributed by the Company's third party manufacturer.

Licensing Income and Royalty Revenue

On May 5, 2011, the Company granted an exclusive indefinite term license to a third party for \$250,000. The licensee may market, manufacture, design and sell the Company's existing apparel line. The licensee will pay the Company a 10% net royalty based on its net income at the end of each fiscal year. To date, no royalty revenue has been earned.

Cost of Sales

(Unaudited)

Beneficial Conversion Feature

For conventional convertible debt where the rate of conversion is below market value, the Company records a "beneficial conversion feature" ("BCF") and related debt discount.

When the Company records a BCF, the relative fair value of the BCF would be recorded as a debt discount against the face amount of the respective debt instrument. The discount would be amortized to interest expense over the life of the debt.

Derivative Liabilities

Fair value accounting requires bifurcation of embedded derivative instruments such as conversion features in convertible debt or equity instruments, and measurement of their fair value. In determining the appropriate fair value, the Company uses the Black-Scholes option-pricing model. In assessing the convertible debt instruments, management determines if the convertible debt host instrument is conventional convertible debt and further if there is a beneficial conversion feature requiring measurement. If the instrument is not considered conventional convertible debt, the Company will continue its evaluation process of these instruments as derivative financial instruments.

Once derivative liabilities are determined, they are adjusted to reflect fair value at the end of each reporting period. Any increase or decrease in the fair value is recorded in results of operations as an adjustment to fair value of derivatives. In addition, the fair value of freestanding derivative instruments such as warrants, are also valued using the Black-Scholes option-pricing model. Once a derivative liability ceases to exist any remaining fair value will be reclassified to additional paid in capital.

Debt Issue Costs and Debt Discount

The Company may pay debt issue costs, and record debt discounts in connection with raising funds through the issuance of convertible debt. These costs are amortized over the life of the debt to interest expense. If a conversion of the underlying debt occurs, a proportionate share of the unamortized amounts is immediately expensed.

Original Issue Discount

For certain convertible debt issued, the Company provides the debt holder with an original issue discount. The original issue discount is recorded to debt discount, reducing the face amount of the note and is amortized to interest expense over the life of the debt.

Share-Based Payments

The Company has incentive plans that reward employees with stock options, warrants, restricted stock and stock appreciation rights. The amount of compensation cost for these share-based awards is measured based on the fair value of the awards, as of the date that the share-based awards are issued and adjusted to the estimated number of awards that are expected to vest.

Fair value of stock options, warrants, and stock appreciation rights, is generally determined using a Black-Scholes option pricing model, which incorporates assumptions about expected volatility, risk free rate, dividend yield, and expected life. Compensation cost for share-based awards is recognized on a straight-line basis over the vesting period.

Earnings (loss) Per Share

Net earnings (loss) per share is computed by dividing net income (loss) less preferred dividends for the period by weighted average number of shares of common stock outstanding during each period. Diluted earnings (loss) per share is computed by dividing net income (loss) less preferred dividends by the weighted average number of shares of common stock, common stock equivalents and potentially dilutive securities outstanding during the period.

Since the Company reflected a net loss for the three months ended March 31, 2012 and 2011, respectively, the effect of considering any common stock equivalents, if exercisable, would have been anti-dilutive. A separate computation of diluted earnings (loss) per share is not presented.

The Company has the following common stock equivalents at March 31, 2012 and 2011 respectively:

	2012	2011
Stock options (exercise price - \$0.50/share)	1,617,500	2,767,500
Warrants (exercise price \$0.002- \$1.50/share)	72,096,327	16,310,000
Convertible debt (exercise price \$0.002- \$0.02/share)	2,100,000	46,504,410
Total common stock equivalents	75,813,827	65,581,910

In the above table, some of the outstanding instruments from 2012 and 2011 contains ratchet provisions that would cause variability in the exercise price at the balance sheet date. As a result, common stock equivalents could change at each reporting period.

Reclassification

The Company has reclassified certain prior period amounts to conform to the current period presentation including the restatement previously mentioned. These reclassifications had no effect on the financial position, results of operations or cash flows for the periods presented.

Recent Accounting Pronouncements

In May 2011 the Financial Accounting Standards Board issued Accounting Standards Update (“ASU”) No. 2011-04 “Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. Generally Accepted Accounting Principles (“GAAP”) and International Financial Reporting Standards (“IFRS”). ASU 2011-04 includes common requirements for measurement of and disclosure about fair value between U.S. GAAP and IFRS. ASU 2011-04 requires reporting entities to disclose additional information for fair value measurements categorized within Level 3 of the fair value hierarchy. In addition, ASU 2011-04 requires reporting entities to make disclosures about amounts and reasons for all transfers in and out of Level 1 and Level 2 fair value measurements. The new and revised disclosures are effective for interim and annual reporting periods beginning after December 15, 2011.

Note 3 Going Concern

As reflected in the accompanying unaudited interim consolidated financial statements, the Company had a net loss of \$16,035,293 and net cash provided by operations of \$1,423,375 for the three months ended March 31, 2012 and a working capital deficit and stockholders' deficit of \$18,140,341 and \$17,209,090 respectively, at March 31, 2012. These factors raise substantial doubt about the Company's ability to continue as a going concern.

The ability of the Company to continue its operations is dependent on Management's plans, which include the raising of capital through debt and/or equity markets with some additional funding from other traditional financing sources, including term notes, until such time that funds provided by operations are sufficient to fund working capital requirements. The Company may need to incur liabilities with certain related parties to sustain the Company's existence.

The Company will require additional funding to finance the growth of its current and expected future operations as well as to achieve its strategic objectives. The Company believes its current available cash along with anticipated revenues may be insufficient to meet its cash needs for the near future. There can be no assurance that financing will be available in amounts or terms acceptable to the Company, if at all.

In response to these problems, management has taken the following actions:

- seeking additional third party debt and/or equity financing,
- continue with the implementation of the business plan,
- allocate sufficient resources to continue with advertising and marketing efforts

The accompanying financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. These financial statements do not include any adjustments relating to the recovery of the recorded assets or the classification of the liabilities that might be necessary should the Company be unable to continue as a going concern.

The debt holders are entitled, at their option, to convert all or part of the principal and accrued interest into shares of the Company's common stock at conversion prices and terms discussed above. The Company classifies embedded conversion features in these notes as a derivative liability due to management's assessment that the Company may not have sufficient authorized number of shares of common stock required to net-share settle or due to the existence of a ratchet due to an anti-dilution provision. See Note 6 regarding accounting for derivative liabilities.

Note 6 Derivative Liabilities

The Company identified conversion features embedded within convertible debt, warrants and series A, preferred stock issued in 2011 and 2010 (see Notes 5 and 9). The Company has determined that the features associated with the embedded conversion option should be accounted for at fair value as a derivative liability as the Company could not determine if a sufficient number of shares would be available to settle all transactions.

MusclePharm Corporation and Subsidiaries**Notes to Consolidated Financial Statements****March 31, 2012****(Unaudited)**

As a result of the application of ASC No. 815, the fair value of the conversion feature is summarized as follow:

Derivative liability - December 31, 2011	\$7,061,238
Fair value at the commitment date for debt instruments	1,096,808
Fair value at the commitment date for warrants issued	2,707,774
Fair value mark to market adjustment for debt instruments	(1,517,609)
Fair value mark to market adjustment for warrants	9,874,838
Fair value mark to market adjustment for Series A, Preferred Stock issued	(59)

Derivative liability - March 31, 2012	\$15,098,603

The Company recorded the debt discount to the extent of the gross proceeds raised, and expensed immediately the remaining value of the derivative as it exceeded the gross proceeds of the note. The Company recorded a derivative expense of \$1,456,910 and \$1,359,369 for the three months ended March 31, 2012 and 2011, respectively.

The fair value at the commitment and re-measurement dates for the Company's derivative liabilities were based upon the following management assumptions as of March 31, 2012:

	Commitment Date	Re-measurement Date
Expected dividends	0 %	0 %
Expected volatility	228% -249 %	226% -249 %
Expected term:	6 months – 2.5 years	6 months – 2.5 years
Risk free interest rate	0.12% - 0.69 %	0.2% - 0.33 %

Note 7 Stockholders' Deficit

The Company has three separate series of authorized preferred stock:

(A) Series A, Convertible Preferred Stock

This class of stock has the following provisions:

Non-voting,
No rights to dividends,
No liquidation value,
Convertible into 200 shares of common stock

(B) Series B, Preferred Stock (Related Parties)

In August 2011, the Company issued an aggregate 51 shares of Series B, preferred stock to 2 of its officers and directors. The Company accounted for the share issuance at par value since there was no future economic value that could be associated with the issuance.

This class of stock has the following provisions:

- Voting rights entitling the holders to an aggregate 51% voting control,
Initially no rights to dividends,
Stated value of \$0.001 per share,
- Liquidation rights entitle the receipt of net assets on a pro-rata basis; and
Non-convertible

(C) Series C, Convertible Preferred Stock

In October 2011, the Company issued 190 shares of Series C, preferred stock, having a fair value of \$190,000. Of the total shares issued, 100 shares were issued for \$100,000 (\$1,000 /share). The remaining 90 shares were issued for services rendered having a fair value of \$90,000 (\$1,000 /share), based upon the stated value per share. In March 2012, all 190 shares were converted into 19,000,000 common shares at a conversion price of \$0.00001 per share.

This class of stock has the following provisions:

Stated Value - \$1,000 per share,

Non-voting,

Liquidation rights entitle an amount equal to the stated value, plus any accrued and unpaid dividends. As long as any Series C, convertible preferred stock is outstanding, the Company is prohibited from executing various corporate actions with the majority consent of the Series C, convertible preferred stockholders authorization; and

Convertible at the higher of (a) \$0.01 or (b) such price that is a 50% discount to market using the average of the low 2 closing bid prices, 5 days preceding conversion

Due to the existence of an option to convert at a variable amount, the Company has applied ASC No. 815, and treated this series of preferred stock as a derivative liability due to the potential for settlement in a variable quantity of shares. Additionally, the Company computed the fair value of the derivative liability at the commitment date and remeasurement date, which was \$293 and \$175, respectively, using the black-scholes assumptions below. This transaction is analogous to a dividend with a direct charge to retained earnings.

MusclePharm Corporation and Subsidiaries**Notes to Consolidated Financial Statements****March 31, 2012****(Unaudited)****(D) Common Stock**

Total	797,857,154	\$7,903,431	\$ 966,005	\$ 0.0038–.0324

The fair value of all stock issuances above is based upon the quoted closing trading price on the date of issuance, except for stock and warrants issued for cash, which is based on the cash received.

(1) Represents stock issued for prior year 2011 accrued compensation.

The forbearance of agreement terms valuation of \$914,500 is reduced by \$135,000 accrual, for items expensed in the year ended December 31, 2011, but are treated in the current period as a non-cash settlement, which nets to \$779,500 as shown in the statement of cash flows as loss on debt.

(E) Stock Options

Edgar Filing: MusclePharm Corp - Form POS AM

The Company applied fair value accounting for all shares based payments awards. The fair value of each option granted is estimated on the date of grant using the Black-Scholes option-pricing model. The Black-Scholes assumptions used in the year ended December 31, 2010 is as follows:

(B) Legal Matters

From time to time, the Company may become involved in various lawsuits and legal proceedings, which arise in the ordinary course of business. Litigation is subject to inherent uncertainties as to outcomes. Although there can be no assurances, based on information currently available, management believes that it is probable that the ultimate outcome of matters that are pending or threatened will not have a material effect on the company's consolidated financial condition.

Other legal matters to which the Company is party do exist. At this time the outcome of these matters is not probable nor reasonably estimable. The Company intends to defend these matters vigorously. The company is party to the following legal matters as of March 31, 2012:

Plaintiff alleges the Company's use of the tagline "Train like an unchained beast" infringes on their mark "Beast" for dietary supplements. Plaintiff's primary goal is not damages, but rather that the Company cease using the tagline. The Company believes the case is without merit.

Plaintiff has filed notices of intent to commence litigation on over 200 sports nutrition and dietary supplement companies in the US and Canada, including the Company. Plaintiff alleges violations of California's Proposition 65. The Company considers this case without merit and merely an attempt by a commercial plaintiff to pressure settlements.

On April 20, 2012, Musclepharm received notice of a pending lawsuit in U.S. Federal District Court in Utah alleging misvaluation of stock used to settle a debt obligation. The Company believes the Plaintiffs case is without merit.

(C) Payroll Taxes

As of March 31, 2012 accounts payable and accrued expenses included approximately \$163,000 pertaining to accrued payroll taxes. The taxes represent employee withholdings that have yet to be remitted to the taxing agencies.

Included in the \$163,000 is an amount due prior to the Company becoming a publicly traded company in February 2010, when the Company existed as an LLC, which at that time had accrued payroll taxes/penalties and interest of approximately \$53,000.

All warrants contain anti-dilution rights and are treated as derivative liabilities.

During the 2nd quarter there have been principal and interest payments related to the unsecured notes of approximately \$558,000.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of:

MusclePharm Corporation

We have audited the accompanying consolidated balance sheets of MusclePharm Corporation and Subsidiary as of December 31, 2011 and 2010, and the related consolidated statements of operations, stockholders' deficit and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of MusclePharm Corporation and Subsidiary as of December 31, 2011 and 2010, and the results of its operations and its cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 2 to the financial statements, the Company has a net loss of \$23,280,950 and net cash used in operations of \$5,801,761 for the year ended December 31, 2011; and has a working capital deficit of \$13,693,267, and a stockholders' deficit of \$12,971,212 at December 31, 2011. These factors raise substantial doubt about the Company's ability to continue as a going concern. Management's plan in regards to these matters is also described in Note 2.

Consolidated Notes to Financial Statements

December 31, 2011(Restated) and 2010 (Restated)

Note 1 Nature of Operations and Summary of Significant Accounting Policies (Restated)

Nature of Operations

MusclePharm Corporation (the “Company”, “We”, “Our” or “MP”), was organized as a limited liability company in the State of Colorado on April 22, 2008. On February 18, 2010, the Company executed a reverse recapitalization with Tone in Twenty, Inc. and changed its name to MP (See Note 3).

The Company markets branded sports nutrition products.

Restatement

On May 14, 2012, the Company determined that a material misstatement exists in the Company’s 2011 quarterly and 2011 and 2010 annual financial statements. The Company concluded that the following financial statements contained material misstatements: (i) the Company’s audited financial statements for the year ended December 31, 2011, filed in an annual report on Form 10-K with the U.S. Securities and Exchange Commission (the “SEC”) on April 16, 2012; (ii) the Company’s audited financial statements for the year ended December 31, 2010, filed in an annual report on Form 10-K with the SEC on April 1, 2011; (iii) the Company’s unaudited financial statements for the period ended September 30, 2011, filed in a quarterly report on Form 10-Q with the SEC on November 14, 2011; (iv) the Company’s unaudited financial statements for the period ended June 30, 2011, filed in a quarterly report on Form 10-Q with the SEC on August 16, 2011; and (v) the Company’s unaudited financial statements for the period ended March 31, 2011, filed in a quarterly report on Form 10-Q with the SEC on May 23, 2011.

The foregoing financial statements contained material misstatements pertaining to the Company’s calculation of net sales and presentation of general and administrative expenses and cost of sales. The Company has determined that advertising related credits that were granted to customers fell within the guidance of ASC No. 605-50-55 (“*Revenue Recognition*” – *Customer Payments and Incentives – Implementation Guidance and Illustrations*). The guidance indicates that, absent evidence of benefit to the vendor, appropriate treatment requires netting these types of payments

against revenues and not expensing as advertising expense. The Company also noted other credits and discounts that, upon further review, had been previously classified as advertising expense as a component of general and administrative expense that require a reallocation of presentation as amounts to be netted against revenues. The Company's net loss and loss per share will not be affected by this reallocation in the statement of operations.

Promotions, credits and non-specific advertising with its customers have been reclassified from general and administrative expenses to revenues.

Samples shipped to customers not clearly identifiable were reclassified from general and administrative expense to cost of sales.

Risks and Uncertainties

The Company operates in an industry that is subject to rapid change and intense competition. The Company's operations will be subject to significant risk and uncertainties including financial, operational, technological, regulatory and other risks, including the potential risk of business failure.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period.

Making estimates requires management to exercise significant judgment. It is at least reasonably possible that the estimate of the effect of a condition, situation or set of circumstances that existed at the date of the financial statements, which management considered in formulating its estimate could change in the near term due to one or more future non-conforming events. Accordingly, the actual results could differ significantly from estimates.

Principles of Consolidation

All inter-company accounts and transactions have been eliminated in consolidation.

Cash and Cash Equivalents

The Company considers all highly liquid instruments purchased with an original maturity of three months or less and money market accounts to be cash equivalents. At December 31, 2011 and 2010, the Company had no cash equivalents.

The Company minimizes its credit risk associated with cash by periodically evaluating the credit quality of its primary financial institution. The balance at times may exceed federally insured limits. At December 31, 2011 there was one account that had a balance that exceeded the federally insured limit by approximately \$378,000. In 2010, there were no balances that exceeded the federally insured limit.

Accounts Receivable and Allowance for Doubtful Accounts

Accounts receivable represent trade obligations from customers that are subject to normal trade collection terms. The Company periodically evaluates the collectability of its accounts receivable and considers the need to establish an allowance for doubtful accounts based upon historical collection experience and specific customer information. Accordingly, the actual amounts could vary from the recorded allowances.

The Company does not charge interest on past due receivables. Receivables are determined to be past due based on the payment terms of the original invoices.

Consolidated Notes to Financial Statements

December 31, 2011(Restated) and 2010 (Restated)

Accounts receivable at December 31, 2011 and 2010 were as follows:

Accounts receivable	\$2,766,776	\$542,863
Less: allowance for doubtful accounts	(197,684)	(116,102)
Accounts receivable – net	\$2,569,092	\$426,761

As of December 31, 2011 and 2010, the Company had the following concentrations of accounts receivable with customers:

Customer	2011	2010
A	36 %	24 %
B	12 %	2 %
C	10 %	- %
D	7 %	40 %
E	5 %	11 %

Property and Equipment

Property and equipment are stated at cost and depreciated to their estimated residual value over their estimated useful lives. When assets are retired or otherwise disposed of, the assets and related accumulated depreciation are relieved from the accounts and the resulting gains or losses are included in operating income in the statements of operations. Repairs and maintenance costs are expensed as incurred. Depreciation is provided using the straight-line method for all property and equipment.

Website Development Costs

Costs incurred in the planning stage of a website are expensed, while costs incurred in the development stage are capitalized and amortized over the estimated useful life of the asset.

Long-Lived Assets

The Company reviews long-lived assets for impairment whenever events or changes in circumstances, such as service discontinuance or technological obsolescence, indicate that the carrying amount of the long-lived asset may not be recoverable. When such events occur, the Company compares the carrying amount of the asset to the undiscounted expected future cash flows related to the asset. If the comparison indicates that impairment is present, the amount of impairment is calculated as the difference between the excess of the carrying amount over the fair value of the asset. If a readily determinable market price does not exist, fair value is estimated using discounted expected cash flows attributable to the asset.

Fair Value of Financial Instruments

The Company measures assets and liabilities at fair value based on an expected exit price as defined by the authoritative guidance on fair value measurements, which represents the amount that would be received on the sale of an asset or paid to transfer a liability, as the case may be, in an orderly transaction between market participants. As such, fair value may be based on assumptions that market participants would use in pricing an asset or liability. The authoritative guidance on fair value measurements establishes a consistent framework for measuring fair value on either a recurring or nonrecurring basis whereby inputs, used in valuation techniques, are assigned a hierarchical level.

The following are the hierarchical levels of inputs to measure fair value:

·Level 1: Observable inputs that reflect quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2: Inputs reflect quoted prices for identical assets or liabilities in markets that are not active; quoted prices for similar assets or liabilities in active markets; inputs other than quoted prices that are observable for the assets or liabilities; or inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3: Unobservable inputs reflecting the Company's assumptions incorporated in valuation techniques used to determine fair value. These assumptions are required to be consistent with market participant assumptions that are reasonably available.

MusclePharm Corporation and Subsidiary

Consolidated Notes to Financial Statements

December 31, 2011(Restated) and 2010 (Restated)

The following are the major categories of liabilities measured at fair value on a recurring basis as of December 31, 2011 and 2010, using quoted prices in active markets for identical liabilities (Level 1); significant other observable inputs (Level 2); and significant unobservable inputs (Level 3):

		2011	2010
Derivative liabilities	Level 2	\$7,061,238	\$622,944

The Company's financial instruments consisted primarily of accounts receivable, prepaids, accounts payable and accrued liabilities, derivative liabilities and debt. The carrying amounts of the Company's financial instruments generally approximated their fair values as of December 31, 2011 and 2010, respectively, due to the short-term nature of these instruments.

Revenue Recognition (Restated)

The Company records revenue when all of the following have occurred: (1) persuasive evidence of an arrangement exists, (2) product has been shipped or delivered by the third party manufacturer, (3) the sales price to the customer is fixed or determinable, and (4) collectability is reasonably assured.

Depending on individual customer agreements, sales are recognized either upon shipment of products to customers or upon delivery. For one of our largest customers, which represent 14% of total revenue in 2011, revenue is recognized upon delivery.

The Company has determined that advertising related credits that were granted to customers fell within the guidance of ASC No. 605-50-55 (“*Revenue Recognition*” – *Customer Payments and Incentives – Implementation Guidance and Illustrations*). The guidance indicates that, absent evidence of benefit to the vendor, appropriate treatment requires netting these types of payments against revenues and not expensing as advertising expense.

Edgar Filing: MusclePharm Corp - Form POS AM

The Company records store support, give aways, sales allowances and discounts as a direct reduction of sales. The Company recorded reductions to gross revenues totaling approximately \$4,000,000 and \$1,000,000 for the years ended December 31, 2011 and 2010, respectively.

The Company grants volume incentive rebates to certain customers based on contractually agreed percentages ranging from 2.5% - 5.5% as a percentage of sales once a certain threshold has been met. The credits are recorded as a direct reduction to sales. Included in the reductions to revenues above are volume incentive rebates. Total volume incentive rebates granted for the years ended December 31, 2011 and 2010 were approximately \$500,000 and \$0, respectively.

The Company has an informal 7-day right of return for products. There were nominal returns in 2011 and 2010.

During the years ended December 31, 2011 and 2010, the Company had the following concentrations of revenues with customers:

Customer	2011	2010
A	41 %	45 %
B	14 %	7 %
C	- %	15 %

The Company does not manufacture or physically hold any inventory. Inventory is held and distributed by the Company's third party manufacturer.

Licensing Income and Royalty Revenue

On May 5, 2011, the Company granted an exclusive indefinite term license to a third party for \$250,000. The licensee may market, manufacture, design and sell the Company's existing apparel line. The licensee will pay the Company a 10% net royalty based on its net income at the end of each fiscal year. To date, no royalty revenue has been earned.

Cost of Sales (Restated)

Cost of sales represents costs directly related to the production and third party manufacturing of the Company's products.

In 2011, cost of sales increased due to a reclassification from advertising expense in the amount of \$374,454.

Shipping and Handling

Product sold is typically shipped directly to the customer from the manufacturer. Any freight billed to customers is offset against shipping costs and included in cost of sales.

Freight billed to customers for the years ended December 31, 2011 and 2010 was \$309,690 and \$71,983, respectively.

Advertising (Restated)

The Company expenses advertising costs when incurred.

Advertising for the years ended December 31, 2011 and 2010 are as follows:

	2011 As Issued	Adjustments	2011 Restated	2010 As Issued	Adjustments	2010 Restated
Advertising	\$ 9,241,741	\$ (4,000,156)	\$ 5,241,585	\$ 7,084,955	\$ (844,608)	\$ 6,240,347

Income Taxes

Through February 18, 2010, the Company was taxed as a pass-through entity (LLC) under the Internal Revenue Code and was not subject to federal and state income taxes; accordingly, no provision was made. The financial statements reflect the LLC's transactions without adjustment, if any, required for income tax purposes for the period ended February 18, 2010. In computing the expected tax benefit, the Company reflected a net loss of \$23,280,950 in the year ended December 31, 2011 and \$19,169,454 for the period from February 18, 2010 to December 31, 2010.

In 2011, and the period from February 18, 2010 through December 31, 2010, income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases, operating loss and tax credit carry-forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. Beginning with the adoption of FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*, (included in FASB ASC Subtopic 740-10, *Income Taxes — Overall*), the Company recognizes the effect of income tax positions only if those positions are more likely than not to be sustained. Recognized income tax positions are measured at the largest amount that is greater than 50% likely to be realized. Changes in recognition or measurement are reflected in the period in which the change in judgment occurs.

The Company records interest and penalties related to unrecognized tax benefits in income tax expense. There were none for the years ended December 31, 2011 and 2010.

Beneficial Conversion Feature

For conventional convertible debt where the rate of conversion is below market value, the Company records a "beneficial conversion feature" ("BCF") and related debt discount.

When the Company records a BCF, the relative fair value of the BCF is recorded as a debt discount against the face amount of the respective debt instrument. The discount is amortized to interest expense over the life of the debt.

Derivative Liabilities

Fair value accounting requires bifurcation of embedded derivative instruments, such as ratchet provisions or conversion features in convertible debt or equity instruments, and measurement of their fair value. In determining the appropriate fair value, the Company uses the Black-Scholes option-pricing model. In assessing the convertible debt

instruments, management determines if the convertible debt host instrument is conventional convertible debt and further if there is a beneficial conversion feature requiring measurement. If the instrument is not considered conventional convertible debt, the Company will continue its evaluation process of these instruments as derivative financial instruments.

Once derivative liabilities are determined, they are adjusted to reflect fair value at the end of each reporting period. Any increase or decrease in the fair value is recorded in results of operations as an adjustment to fair value of derivatives. In addition, the fair value of freestanding derivative instruments such as warrants, are also valued using the Black-Scholes option-pricing model.

Debt Issue Costs and Debt Discount

The Company may pay debt issue costs, and record debt discounts in connection with raising funds through the issuance of convertible debt. These costs are amortized to interest expense over the life of the debt. If a conversion of the underlying debt occurs, a proportionate share of the unamortized amounts is immediately expensed.

Original Issue Discount

For certain convertible debt issued, the Company provides the debt holder with an original issue discount. The original issue discount is recorded to debt discount, reducing the face amount of the note and is amortized to interest expense over the life of the debt.

Share-based payments

The Company has incentive plans that reward employees with stock options, warrants, restricted stock and stock appreciation rights. The amount of compensation cost for these share-based awards is measured based on the fair value of the awards, as of the date that the share-based awards are issued and adjusted to the estimated number of awards that are expected to vest.

Fair value of stock options, warrants, and stock appreciation rights, is generally determined using a Black-Scholes option pricing model, which incorporates assumptions about expected volatility, risk free rate, dividend yield, and expected life. Compensation cost for share-based awards is recognized on a straight-line basis over the vesting period.

Net Earnings (Loss) per Share

Edgar Filing: MusclePharm Corp - Form POS AM

Net earnings (loss) per share is computed by dividing net income (loss) less preferred dividends for the period by weighted average number of shares of common stock outstanding during each period. Diluted earnings (loss) per share is computed by dividing net income (loss) less preferred dividends by the weighted average number of shares of common stock, common stock equivalents and potentially dilutive securities outstanding during the period.

Since the Company reflected a net loss in 2011 and 2010, respectively, the effect of considering any common stock equivalents, if exercisable, would have been anti-dilutive. A separate computation of diluted earnings (loss) per share is not presented.

The Company has the following common stock equivalents at December 31, 2011 and 2010:

	2011	2010
Stock options (exercise price - \$0.50/share)	1,617,500	2,767,500
Warrants (exercise price \$0.015- \$1.50/share)	61,696,327	750,000
Convertible preferred series C shares (exercise price \$0.01/share)	19,000	-
Convertible debt (exercise price \$0.002- \$0.02/share)	448,592,711	11,197,139
Total common stock equivalents	511,925,538	14,714,639

In the above table, some of the outstanding convertible debt from 2011 and 2010 contains ratchet provisions that would cause variability in the exercise price at the balance sheet date. As a result, common stock equivalents could change at each reporting period.

Reclassification

The Company has reclassified certain prior period amounts to conform to the current period presentation. These reclassifications had no effect on the financial position, results of operations or cash flows for the periods presented.

Recent Accounting Pronouncements

In May 2011, the FASB issued ASU No. 2011-04, which amended ASC Topic 820 to achieve common fair value measurements and disclosure requirements in U.S. GAAP and International Financial Reporting Standards ("IFRS"). The amendments in ASU No. 2011-05 result in common fair value measurement and disclosure requirements in U.S. GAAP and IFRSs. Consequently, the amendments change the wording used to describe many of the requirements in U.S. GAAP for measuring fair value and for disclosing information about fair value measurements. This amendment is effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. The Company does not anticipate this amendment will have a material impact on its financial statements.

Note 2 Going Concern

As reflected in the accompanying financial statements, the Company had a net loss of \$23,280,950 and net cash used in operations of \$5,801,761 for the year ended December 31, 2011; and a working capital deficit and stockholders' deficit of \$13,693,267 and \$12,971,212, respectively, at December 31, 2011. These factors raise substantial doubt about the Company's ability to continue as a going concern.

The ability of the Company to continue its operations is dependent on Management's plans, which include the raising of capital through debt and/or equity markets with some additional funding from other traditional financing sources, including term notes, until such time that funds provided by operations are sufficient to fund working capital requirements. The Company may need to incur liabilities with certain related parties to sustain the Company's existence.

The Company will require additional funding to finance the growth of its current and expected future operations as well as to achieve its strategic objectives. The Company believes its current available cash along with anticipated revenues may be insufficient to meet its cash needs for the near future. There can be no assurance that financing will be available in amounts or terms acceptable to the Company, if at all.

In response to these problems, management has taken the following actions:

- seeking additional third party debt and/or equity financing,
- continue with the implementation of the business plan,
- generate new sales from international customers; and
- allocate sufficient resources to continue with advertising and marketing efforts

The accompanying financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. These financial statements do not include any adjustments relating to the recovery of the recorded assets or the classification of the liabilities that might be necessary should the Company be unable to continue as a going concern.

Note 3 Reverse Recapitalization

On February 18, 2010, the Company merged with Tone in Twenty, Inc. ("TIT"), a then public shell corporation, and MP became the surviving corporation, in a transaction treated as a reverse recapitalization. TIT did not have any operations and majority-voting control was transferred to MP.

In the recapitalization, MP acquired 26,000,000 shares of common stock from TIT in exchange for all member units in MP. Prior to the transaction, the Company paid approximately \$25,000 to a former executive of TIT to acquire 366,662 of the 437,500 shares issued and outstanding, these shares were then immediately cancelled and retired. The remaining 70,838 shares were held by the selling stockholders as a deemed issuance in the recapitalization. After the transaction, there were 26,070,838 shares issued and outstanding. The transaction resulted in MP acquiring 99.7% control.

The transaction also requires a recapitalization of MP. Since MP acquired a controlling voting interest, it was deemed the accounting acquirer, while TIT was deemed the legal acquirer. The historical financial statements of the Company are those of MP and of the consolidated entities from the date of recapitalization and subsequent.

Since the transaction is considered a reverse recapitalization, the presentation of pro-forma financial information was not required.

The debt holders are entitled, at their option, to convert all or part of the principal and accrued interest into shares of the Company's common stock at conversion prices and terms discussed above. The Company classifies embedded conversion features in these notes as a derivative liability due to management's assessment that the Company may not have sufficient authorized number of shares of common stock required to net-share settle or due to the existence of a ratchet due to an anti-dilution provision. See Note 6 regarding accounting for derivative liabilities.

During the year ended December 31, 2011, the Company converted debt and accrued interest, totaling \$5,126,809 into 294,339,121 shares of common stock resulting in a loss on conversion of \$1,739,329.

MusclePharm Corporation and Subsidiary**Consolidated Notes to Financial Statements****December 31, 2011(Restated) and 2010 (Restated)****Note 6 Derivative Liabilities**

The Company identified conversion features embedded within convertible debt, warrants and series A, preferred stock issued in 2011 and 2010 (see Notes 5 and 9). The Company has determined that the features associated with the embedded conversion option should be accounted for at fair value as a derivative liability as the Company could not determine if a sufficient number of shares would be available to settle all transactions. Additionally, at one point during 2011, the Company had received conversion notices from investors for which sufficient authorized shares were not available.

As a result of the application of ASC No. 815, the fair value of the conversion feature is summarized as follow:

Derivative liability - December 31, 2009	\$-
Fair value at the commitment date for convertible instruments	473,638
Fair value mark to market adjustment	149,306
Derivative liability - December 31, 2010	622,944

Reclassification to additional paid in capital for financial instruments that ceased to be a derivative liability	(640,826)
Derivative liability - December 31, 2011	\$7,061,238

The Company recorded the debt discount to the extent of the gross proceeds raised, and expensed immediately the remaining value of the derivative as it exceeded the gross proceeds of the note. The Company recorded a derivative expense of \$4,777,654 and \$93,638 for 2011 and 2010 respectively.

The fair value at the commitment and re-measurement dates for the Company's derivative liabilities were based upon the following management assumptions as of December 31, 2011:

	Commitment Date		Re-measurement Date	
Expected dividends	0	%	0	%

Note 7 Income Taxes

Income taxes are provided for the tax effects of transactions reported in the financial statements and consist of taxes currently due. Deferred taxes relate to differences between the basis of assets and liabilities for financial and income tax reporting which will be either taxable or deductible when the assets or liabilities are recovered or settled.

At December 31, 2011, the Company has a net operating loss carry-forward of approximately \$16,355,000 available to offset future taxable income expiring through 2031. Utilization of future net operating losses may be limited due to potential ownership changes under Section 382 of the Internal Revenue Code.

The valuation allowance at December 31, 2010 was \$ 2,495,000. The net change in valuation allowance during the year ended December 31, 2011 was an increase of approximately \$6,075,000. In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred income tax assets will not be realized. The ultimate realization of deferred income tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred income tax liabilities, projected future taxable income, and tax planning strategies in making this assessment. Based on consideration of these items, management has determined that enough uncertainty exists relative to the realization of the deferred income tax asset balances to warrant the application of a full valuation allowance as of December 31, 2011.

The effects of temporary differences that gave rise to significant portions of deferred tax assets at December 31, 2011 and 2010 are approximately as follows:

	December 31, 2011	December 31, 2010
Net operating loss carry forward	\$ 6,061,000	\$ 1,986,000
Amortization of debt discount and debt issue costs	1,465,000	465,000

At December 31, 2010, the Company no longer factored its accounts receivable.

(C) Legal Matters

From time to time, the Company may become involved in various lawsuits and legal proceedings, which arise in the ordinary course of business. However, litigation is subject to inherent uncertainties, and an adverse result in these or other matters may arise that may harm its business. The Company is party to the following legal matters as of December 31, 2011:

Plaintiff alleges the Company use of Creatine Nitrate in product infringed on a patent held by the Plaintiff. The Company believes the Plaintiffs case is without merit.

Plaintiff alleges the Company's use of the tagline "Train like an unchained beast" infringes on their mark "Beast" for dietary supplements. Plaintiff's primary goal is not damages, but rather that the Company cease using the tagline. Settlement discussions are ongoing in this case and the Company intends to defend its position.

Plaintiff has filed notices of intent to commence litigation on over 200 sports nutrition and dietary supplement companies in the US and Canada, including the Company. Plaintiff alleges violations of California's Proposition 65. The Company considers this case without merit and merely an attempt by a commercial plaintiff to pressure settlements. Plaintiff conveyed a settlement offer in the amount of \$121,500 to which the Company has not yet responded. The Company has recorded an accrual in the amount of \$121,500 as of December 31, 2011.

Beginning in October 2009, the Company engaged in various business dealings regarding the manufacturing, sale and distribution of products with Fit Foods Manufacturing, Ltd. and Fit Foods Distribution, Inc. Jointly, "Fit Foods"). MusclePharm and Fit Foods subsequently became involved in a business dispute regarding their respective obligations and filed claims against each other in District Court. The Parties settled their dispute on December 22, 2010. The Company issued 13,987,393 shares of common stock having a fair value of \$676,980 (\$0.048/share), based upon the quoted closing trading price which settled outstanding accounts payable of \$333,666, resulting in a loss on settlement of \$343,314 All settlement payments have been made and the case was dismissed on July 1, 2011.

(D) Payroll Taxes

As of December 31, 2011 and 2010, accounts payable and accrued expenses included approximately \$168,000 and \$367,860, respectively, pertaining to accrued payroll taxes. The taxes represent employee withholdings that have yet to be remitted to the taxing agencies.

Note 9 Stockholders' Deficit

The Company has three separate series of authorized preferred stock:

(A) Series A, Convertible Preferred Stock

During 2010, the Company issued 16,666,600 shares of common stock in connection with the conversion of 83,333 shares of Series A, convertible preferred stock. There was no gain or loss on conversion as the transaction was accounted for at par value in connection with the reverse recapitalization in 2010. (See Note 3)

This class of stock has the following provisions:

- Non-voting,
- No rights to dividends,
- No liquidation value,
- Convertible into 200 shares of common stock

(B) Series B, Preferred Stock (Related Parties)

In August 2011, the Company issued an aggregate 51 shares of Series B, preferred stock to 2 of its officers and directors. The Company accounted for the share issuance at par value since there was no future economic value that could be associated with the issuance.

This class of stock has the following provisions:

- Voting rights entitling the holders to an aggregate 51% voting control,
- Initially no rights to dividends,
- Stated value of \$0.001 per share,
- Liquidation rights entitle the receipt of net assets on a pro-rata basis; and
- Non-convertible

(C) Series C, Convertible Preferred Stock

In October 2011, the Company issued 190 shares of Series C, preferred stock, having a fair value of \$190,000. Of the total shares issued, 100 shares were issued for \$100,000 (\$1,000 /share). The remaining 90 shares were issued for services rendered having a fair value of \$90,000 (\$1,000 /share), based upon the stated value per share.

This class of stock has the following provisions:

- Stated Value - \$1,000 per share,
 - Non-voting,
 - Liquidation rights entitle an amount equal to the stated value, plus any accrued and unpaid dividends
- As long as any Series C, convertible preferred stock is outstanding, the Company is prohibited from executing various corporate actions with the majority consent of the Series C, convertible preferred stockholders authorization; and
- Convertible at the higher of (a) \$0.01 or (b) such price that is a 50% discount to market using the average of the low 2 closing bid prices, 5 days preceding conversion

Due to the existence of an option to convert at a variable amount, the Company has applied ASC No. 815, and treated this series of preferred stock as a derivative liability due to the potential for settlement in a variable quantity of shares. Additionally, the Company computed the fair value of the derivative liability at the commitment date and remeasurement date, which was \$293 and \$175, respectively, using the black-scholes assumptions below. This transaction is analogous to a dividend with a direct charge to retained earnings.

INDEMNIFICATION OF DIRECTORS AND OFFICERS

Nevada Law

Section 78.7502 of the Nevada General Corporation Law contains provisions authorizing indemnification by the Company of directors, officers, employees or agents against certain liabilities and expenses that they may incur as directors, officers, employees or agents of the Company or of certain other entities. Section 78.7502(3) provides for mandatory indemnification, including attorney's fees, if the director, officer, employee or agent has been successful on the merits or otherwise in defense of any action, suit or proceeding or in defense of any claim, issue or matter therein.

Section 78.751 provides that such indemnification may include payment by the Company of expenses incurred in defending a civil or criminal action or proceeding in advance of the final disposition of such action or proceeding upon receipt of an undertaking by the person indemnified to repay such payment if he shall be ultimately found not to be entitled to indemnification under the Section. Indemnification may be provided even though the person to be indemnified is no longer a director, officer, employee or agent of the Company or such other entities.

Section 78.752 authorizes the Company to obtain insurance on behalf of any such director, officer employee or agent against liabilities, whether or not the Company would have the power to indemnify such person against such liabilities under the provisions of the Section 78.7502. The indemnification and advancement of expenses provided pursuant to Sections 78.7502 and 78.751 are not exclusive, and subject to certain conditions, the Company may make other or further indemnification or advancement of expenses of any of its directors, officers, employees or agents. Because neither the Articles of Incorporation, as amended, or By-laws of the Company otherwise provide, notwithstanding the failure of the Company to provide indemnification and despite a contrary determination by the board of directors or its shareholders in a specific case, a director, officer, employee or agent of the Company who is or was a party to a proceeding may apply to a court of competent jurisdiction for indemnification or advancement of expenses or both, and the court may order indemnification and advancement of expenses, including expenses incurred in seeking court-ordered indemnification or advancement of expenses if it determines that the petitioner is entitled to mandatory indemnification pursuant to Section 78.7502(3) because he has been successful on the merits, or because the Company has the power to indemnify on a discretionary basis pursuant to Section 78.7502 or because the court determines that the petitioner is fairly and reasonably entitled to indemnification or advancement of expenses or both in view of all the relevant circumstances.

Articles of Incorporation and Bylaws

Our Articles of Incorporation and By-laws, as amended, empower us to indemnify our current or former directors, officers, employees or agents or persons serving by our request in such capacities in any other enterprise or persons who have served by our request in such capacities in any other enterprise to the full extent permitted by the laws of the State of Nevada. Pursuant to Nevada law and our Articles of Incorporation and By-laws, our officers and directors (and former officers and directors) are entitled to indemnification from us to the full extent permitted by law. Our Articles of Incorporation and By-laws generally provide for such indemnification for claims arising out of the acts or omissions of our officers and directors in their capacity as such, undertaken in good faith and in a manner reasonably believed to be in, or not opposed to, our best interests and, with respect to any criminal action or proceeding, had no reasonable cause to believe that his conduct was unlawful. The conditions and extent of indemnification are set forth in the Articles of Incorporation and By-laws. Insofar as indemnification for liabilities arising under the Securities Act may be permitted to officers, directors or persons controlling us pursuant to the foregoing provisions, we have been informed that in the opinion of the SEC, such indemnification is against public policy as expressed in the Securities Act and is therefore unenforceable.

UNDERTAKINGS

(A) The undersigned Registrant hereby undertakes:

(1) To file, during any period in which offers or sales are being made, a post-effective amendment to this registration statement to:

(i) To include any prospectus required by Section 10(a)(3) of the Securities Act;

Reflect in the prospectus any facts or events which, individually or together, represent a fundamental change in the information set forth in the registration statement. Notwithstanding the foregoing, any increase or decrease in volume of securities offered (if the total dollar value of securities offered would not exceed that which was (ii) registered) any deviation from the low or high end of the estimated maximum offering range may be reflected in the form of prospectus filed with the Commission pursuant to Rule 424(b) if, in the aggregate, the changes in volume and price represent no more than a 20% change in the maximum aggregate offering price set forth in the "Calculation of Registration Fee" table in the effective registration statement; and

(iii) Include any material information with respect to the plan of distribution not previously disclosed in the registration statement or any material change to such information in the registration statement.

That, for the purpose of determining any liability under the Securities Act, each such post-effective amendment (2) shall be deemed to be a new registration statement relating to the securities offered therein, and the offering therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

(3) To remove from registration by means of a post-effective amendment any of the securities being registered which remain unsold at the termination of the offering.

Insofar as indemnification for liabilities arising under the Securities Act of 1933 may be permitted to directors, officers and controlling persons of the registrant pursuant to the foregoing provisions, or otherwise, the registrant has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Act and is, therefore, unenforceable. In the event that a claim for indemnification (4) against such liabilities (other than the payment by the registrant of expenses incurred or paid by a director, officer or controlling person of the registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Act and will be governed by the final adjudication of such issue.

(B) The issuer is subject to Rule 430C (ss. 230. 430C of this chapter): Each prospectus filed pursuant to Rule 424(b)(ss. 230. 424(b) of this chapter) as part of a registration statement relating to an offering, other than registration statements relying on Rule 430B or other than prospectuses filed in reliance on Rule 430A (ss. 230. 430A of this chapter), shall be deemed to be part of and included in the registration statement as of the date it is first used after effectiveness. Provided, however, that no statement made in a registration statement or prospectus that is part of the registration statement or made in a document incorporated or deemed incorporated by reference into the registration statement or prospectus that is part of the registration statement will, as to a purchaser with a time of contract of sale prior to such first use, supersede or modify any statement that was made in the registration statement or prospectus that was part of the registration statement or made in any such document immediately prior to such date of first use.
