## 4Q12

## 1. BALANCE SHEET

## 1.1. Assets

As of December 31, 2012, Bancolombia's assets totaled COP 97,916 billion, which represents an increase of 5.1% compared to 3Q12 and an increase of 14.6% compared to 4Q11.

The increase in assets presented for the quarter is mainly explained by the 8.2% increase in net loans and financial leases, which represented 68% of total assets at the end of 4Q12. On the other hand, investments decreased 6.3% during the quarter.

It is highlighted the growth of operating leases, which increased 9.2% during the quarter and 58.8% compared to 4Q11.

The most relevant aspects regarding the evolution of the loan portfolio during 4Q12 were:

- The growth of consumer and commercial loans in Colombia during 4Q12 indicates a greater credit demand than the one presented during the first half of 2012.

Net loans in USD correspond to loans originated in Colombia (USD 5,119 million, 57%), El Salvador (USD 2,544 million, 28%) and other countries (USD 1,357 million, 15%). USD denominated loans represented 76% of total loans as of 4Q12.

- COP appreciated 1.8% versus USD during 4Q12 and appreciated 9.0% for the last 12 months.

- Mortgage loans denominated in COP presented a dynamic performance. The dynamism of mortgage lending in Colombia is explained by the optimism regarding the economy, lower long-term interest rates, as well as by the Colombian government's interest rate subsidy programs. On the other hand, the outstanding mortgage balance denominated in USD from our operation in El Salvador grew 1.8% during the quarter, and 2.3% in the past 12 months.

Financial leases, 90% of which are denominated in COP, increased 9.2% during the quarter and 20.6% as compared to 4Q11. Operating leases, net of depreciation, also increased and present a fast growth during the quarter and during the year. These two products are mainly used by enterprises in order to finance equipment, commercial real estate and commercial vehicles.

## 4Q12

When analyzing the loan portfolio according to the customer categories established by Bancolombia in order to manage its commercial strategy, it becomes clear that corporate loans were key drivers of the growth during 4Q12, as they increased 9.7% with respect to 3Q12. This increase is explained by higher demand for working capital and investments by the corporate. Consumer and SMEs loans increased 5% compared to 3Q12, which indicates a sustained credit demand that Bancolombia has capitalized under strict credit origination criteria..

Total reserves (allowances in balance sheet) for loan losses increased 3.1% during 4Q12 and totaled COP 3,250 billion, or 4.6% of total loans at the end of the quarter. For further explanation regarding coverage of the loan portfolio and credit quality trends, see section “2.4. Asset Quality, Provision Charges and Balance Sheet Strength”.

1.3.

Investment Portfolio

As of December 31, 2012, Bancolombia's net investment portfolio totaled COP 12,554 billion, decreasing 6.3% compared to 3Q12 and increasing 26.1% compared to 4Q11. The investment portfolio is mainly composed of debt investment securities, which represented 91% of Bancolombia's total investments and 12% of assets at the end of 4Q12. Investments denominated in USD totaled USD 1,381 million and represented 19% of the investment portfolio.

Additionally, the Bank has COP 1,427 billion in net mortgage backed securities, which represents 11% of the investment portfolio. At the end of 4Q12, the duration of the debt securities portfolio was 20.7 months and a yield to maturity of 4.2%.

**4Q12**

## 1.4. Goodwill

As of 4Q12, Bancolombia's goodwill totaled COP 571 billion, decreasing 3.6% compared to the amount reported in 3Q12 and 16% compared to 4Q11. This variation is explained by the amortization of goodwill reported during the past year (under COL GAAP, goodwill is amortized within a maximum period of 20 years), by the elimination of the goodwill related to Asesuisa (which was sold in September 2012) and by the appreciation of the Colombian peso versus the dollar. As of December 31, 2012, Bancolombia's goodwill included USD 321 million related mostly to the acquisition of Banagrícola in 2007.

## 1.5. Funding

As of December 31, 2012, Bancolombia's liabilities totaled COP 86.309 billion, increasing 5.2% compared to 3Q12 and 12.9% compared to 4Q11. The ratio of net loans to deposits (including borrowings from domestic development banks) was 99% at the end of 4Q12, decreasing compared to the 104% reported in 3Q12, and the 105% in 4Q11.

Deposits totaled COP 64,159 billion (or 74% of liabilities) at the end of 4Q12, increasing 14.3% during the quarter and 22.4% over the last 12 months. CDs represented 38.6% of deposits in 4Q12. Bancolombia's funding strategy has meant to improve the liquidity position and to encourage savings accounts and term deposits while keeping costs at a reasonable level. This strategy permitted to reduce slightly the cost on deposits of the bank during the quarter. The ultimate goal is to defend the net interest margin.

At the end of 4Q12, Bancolombia had outstanding bonds for USD 3,740 million in international markets and for COP 5,446 billion in local markets. The maturities of these bonds range from 2 to 10 years.

1.6. Shareholders' Equity and Regulatory Capital

Shareholders' equity at the end of 4Q12 was COP 11,607 billion, increasing 29% or COP 2,613 billion, with respect to the COP 8,993 billion reported at the end of 4Q11.

Bancolombia's capital adequacy ratio was 15.77%, 84 basis points below the 16.61% for 3Q12 and 331 bps above the 12.46% at the end of 4Q11. This annual increase in the capital adequacy ratio is explained by the COP 1,680 billion stock issuance in February 2012 and by the USD 1,200 million subordinated bonds issuance in September 2012.

Bancolombia's capital adequacy ratio was 677 basis points above the minimum level required by Colombia's regulator, while the basic capital ratio (Tier 1) to risk weighted assets was 10.4% and the tangible capital ratio, defined as shareholders' equity minus goodwill and intangible assets divided by tangible assets, was 10.6% at the end of 4Q12.

2. **INCOME STATEMENT**

Net income totaled COP 468 billion in 4Q12, or COP 549 per share - USD 1.24 per ADR, which represents an increase of 7.7% compared to 3Q12 and a decrease of 7.2% compared to 4Q11. Bancolombia's annualized ROE was 16.5% for 4Q12, higher than the annualized ROE of 15.9% reported for 3Q12 and lower than the 23.1% of 4Q11.

2.1. **Net Interest Income**

Net interest income totaled COP 1,240 billion in 4Q12, 0.9% higher than that reported in 3Q12, and 21.5% higher than the figure for 4Q11. The increase of net interest income is explained by growth of the loan portfolio in the previous quarters and by better margins in 2012 compared to 2011.

During 4Q12, the income generated by the investment portfolio totaled COP 202 billion, a figure 3.7% lower than the COP 210 billion reported in 3Q12 and 67.9% higher than the COP 120 billion for 4Q11.

**Net Interest Margin**

In 4Q12, Bancolombia changed the method for calculating the Net Interest Margin and excluded from that calculation, the operating leases and net income attributable to those leases. The reason for changing the method was that the magnitude of those operating leases (2.24 of assets as of 4Q12) and the treatment of depreciation was causing a growing distortion in the margins of the financial intermediation or credit.

Under the old methodology, the net interest margin presented the trend indicated in the next table:

Annualized Interest Margin	1Q11	2Q11	3Q11	4Q11	1Q12	2Q12	3Q12	4Q12
Loans' Interest margin	6.4 %	6.3 %	6.3 %	6.3 %	6.4 %	6.5 %	6.6 %	6.4 %

Debt investments' margin	3.0 %	5.1 %	4.3 %	1.4 %	4.3 %	4.3 %	4.2 %	3.1 %
Net interest margin	5.9 %	6.2 %	6.0 %	5.6 %	6.2 %	6.2 %	6.3 %	5.9 %

Under the new methodology, the net interest margin presents the trend indicated in the next table:

Annualized Interest Margin									
	1Q11	2Q11	3Q11	4Q11	1Q12	2Q12	3Q12	4Q12	
Loans' Interest margin	6.7 %	6.7 %	6.6 %	6.7 %	6.8 %	7.0 %	7.1 %	6.9 %	
Debt investments' margin	2.9 %	5.0 %	4.2 %	1.2 %	4.1 %	4.1 %	4.0 %	2.9 %	
Net interest margin	6.1 %	6.4 %	6.3 %	5.9 %	6.5 %	6.6 %	6.6 %	6.3 %	

Annualized net interest margin ended 4Q12 at 6.3%. Annualized net interest margin for investments decreased to 2.9%, and annualized net interest margin for loans, financial leases and overnight funds was 6.9%. The rate cuts in the Colombian Central Bank rate at the end of the year put pressure on margins and caused them to decline.

The funding cost decreased during 4Q12 due to a change in the composition of deposits. Savings and checking accounts increased their share and time deposits decreased it. The cost of deposits started to reflect the cuts in rates of the Colombian Central Bank. The annualized weighted average cost of deposits was 3.3% in 4Q12, decreasing compared to the 3.4% for 3Q12 and increasing compared to the 2.8% for 4Q11.

## 2.2.

## Fees and Income from Services

During 4Q12, net fees and income from services totaled COP 494 billion, increasing 10% compared to those reported in 3Q12 and 5.9% higher than those reported in 3Q12. Fees from credit and debit cards decreased 2.9% with respect to 4Q11 due to a lower transactional volume. Fees from banking services increased 6% compared to 3Q12 and 20.7% with respect to 4Q11; this line includes fees from insurance distribution throughout the distribution networks in Colombia and in El Salvador. Fees from brokerage services increased 40.4% in 4Q12, however, decreased 46.8% as compared to those in 4Q11, when big transactions occurred in that period.

The following table summarizes Bancolombia's participation in the credit card business in Colombia:

2.3.

Other Operating Income

Total other operating income was COP 196 billion in 4Q12, 21% lower than those in 3Q12, and 42.5% lower than in 4Q11. Income from foreign exchange gains and derivatives denominated in foreign currencies decreased 4.8% in the quarter, due to the net effect of the active and passive positions the bank had in foreign currency.

Revenues aggregated in the communication, rent and others totaled COP 113 billion in 4Q12, which is 28.5% higher as compared to 3Q12 and 70.4% higher as compared to those in 4Q11. This line includes revenues from commercial discounts and operating leases payments, which have grown as the value of assets rented under operating leasing contracts have increased.

## 4Q12

## 2.4. Asset Quality, Provision Charges and Balance Sheet Strength

The deterioration of the loan portfolio (new past due loans including charge-offs) was COP 144 billion in 4Q12, decreasing with respect to the COP 237 billion in 3Q12. The vintages of consumer loans originated in 2011 were the leading contributors to this deterioration. However, this situation does not represent a threat to the balance sheet's strength, since the provisions performed in 2010 and 2011 cover the potential loan portfolio deterioration. The largest part of the loan portfolio deterioration in 4Q12 occurred in the consumer loans and SMEs loans segments. This deterioration had been previously calculated and is the result of the growth strategy implemented by the bank since beginnings of 2010.

Past due loans (those that are overdue for more than 30 days) totaled COP 1,833 billion at the end of 4Q12, which represents 2.6 of total gross loans. The PDL ratio decreased from the 2.9% in 3Q12 and increased with respect to the 2.2% reported in 4Q11. Loan charge-offs totaled COP 209 billion in 4Q12.

Provision charges (net of recoveries) totaled COP 335 billion in 4Q12. The higher provision charges for the quarter are explained by the loan growth, which implies making counter cyclical provision when new loans are originated, in addition to provisions associated to loans that deteriorate during the quarter.

Bancolombia maintains a strong balance sheet supported on an adequate level of loan loss reserves. Allowances for loan losses totaled COP 3,250 billion, or 4.6% of total loans at the end of 4Q12. This proportion declined with respect to the one presented at the end of 3Q12, and remained stable with respect to the 4.6% for 4Q11. The coverage measured by the ratio of allowances for loans losses (principal) to PDLs (overdue 30 days), was 177% at the end of 4Q12. Likewise, the coverage measured by the ratio of allowances for loans losses to loans classified as C, D and E, was 117% at the end of 4Q12, decreasing with respect to the 123% in 3Q12 and to the 120% in 4Q11.

The following tables present key metrics related to asset quality:

(1) "Performing" past due loans are loans upon which Bancolombia continues to recognize income although interest in respect of such loans has not been received. Mortgage loans cease to accumulate interest on the statement of operations when they are more than 60 days past due. For all other loans and financial leasing operations of any type, interest is no longer accumulated after they are more than 30 days past due.

(2) Under Colombian Bank regulations, a loan is past due when it is at least 31 days past the actual due date.

**2.5.****Operating Expenses**

During 4Q12, operating expenses totaled COP 1,055 billion, increasing 1.8% with respect to 3Q12 and also increasing 16.7% compared to 4Q11.

Personnel expenses (salaries, bonus plan payments and compensation) totaled COP 405 billion in 4Q12, decreasing 1.8% as compared to 3Q12 and increasing 4.1% as compared to 4Q11. The increase of salaries in the last 12 months is explained by the bank's higher number of employees and the 2012 wage increases.

During 4Q12, administrative expenses totaled COP 528 billion, decreasing 2.9% as compared to 3Q12 and increased 25.5% as compared to 4Q11. This variation during the quarter is mainly explained by higher rent expenses, higher taxes (other than income tax) and higher expenses for maintenance of fixed assets.

Depreciation expenses totaled COP 90 billion in 4Q12, increasing 9.3% as compared to 3Q12 and 37.9% as compared to 4Q11. The increase in this type of expense is explained by the increase of operating leases from Leasing Bancolombia.

At the end of 4Q12, Bancolombia had 24,820 employees, 992 branches and 3,827 ATMs.
