CONSOLIDATED WATER CO. LTD.

(Exact name of Registrant as specified in its charter)

CAYMAN ISLANDS

**(State or other jurisdiction of
incorporation or organization)**

98-0619652

(I.R.S. Employer Identification No.)

Regatta Office Park
Windward Three, 4th Floor, West Bay Road
P.O. Box 1114
Grand Cayman, KY1-1102, Cayman Islands N/A
(Address of principal executive offices) (Zip Code)

Registrant's Telephone number, including area code: **(345) 945-4277**

Securities registered pursuant to Section 12(b) of the Act:

Title of each class:	Name of each exchange on which registered:
Common Stock, \$0.60 Par Value	The NASDAQ Stock Market LLC (NASDAQ Global Select Market)

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes ☐ No ☒

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (Sec. 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes ☒ No ☐

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this 10-K or any amendments to this Form 10-K. [Not Applicable]

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definition of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☐ Accelerated filer ☒ Non-accelerated filer ☐ Smaller reporting company ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes ☐ No ☒

The aggregate market value of common stock held by non-affiliates of the registrant, based on the closing sales price for the registrant's common shares, as reported on the NASDAQ Global Select Market on June 30, 2014, was \$168,523,919.

As of March 9, 2015, 14,715,899 shares of the registrant's common shares were outstanding.

DOCUMENTS INCORPORATED BY REFERENCE:

Portions of the registrant's Proxy Statement related to its Annual Shareholders' Meeting will be subsequently filed with the Securities and Exchange Commission as to Part III of this Form 10-K.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, including but not limited to, statements regarding our future revenues, future plans, objectives, expectations and events, assumptions and estimates. Forward-looking statements can be identified by use of the words or phrases “will,” “will likely result,” “are expected to,” “will continue,” “estimate,” “project,” “potential,” “believe,” “anticipate,” “expect,” “intend,” or similar expressions and variations of such words. Statements that are not historical facts are based on our current expectations, beliefs, assumptions, estimates, forecasts and projections for our business and the industry and markets related to our business.

The forward-looking statements contained in this report are not guarantees of future performance and involve certain risks, uncertainties and assumptions which are difficult to predict. Actual outcomes and results may differ materially from what is expressed in such forward-looking statements. Important factors which may affect these actual outcomes and results include, without limitation:

- tourism and weather conditions in the areas we serve;
- the economies of the U.S., the areas, and the governments we serve;
- our relationships with the governments we serve;
- regulatory matters, including resolution of the negotiations for the renewal of our retail license on Grand Cayman;
- our ability to successfully enter new markets, including Mexico and Asia;

and other factors, including those set forth under Part I, Item 1A. “Risk Factors” in this Annual Report.

The forward-looking statements in this Annual Report speak as of its date. We expressly disclaim any obligation or undertaking to update or revise any forward-looking statement contained in this Annual Report to reflect any change in our expectations with regard thereto or any change in events, conditions or circumstances on which any forward-looking statement is based, except as may be required by law.

References herein to “we,” “our,” “ours” and “us” refer to Consolidated Water Co. Ltd. and its subsidiaries.

Note Regarding Currency and Exchange Rates

Unless otherwise indicated, all references to “\$” or “US\$” are to United States dollars.

The exchange rate for conversion of Cayman Island dollars (CI\$) into US\$, as determined by the Cayman Islands Monetary Authority, has been fixed since April 1974 at US\$1.20 per CI\$1.00.

The exchange rate for conversion of Belize dollars (BZE\$) into US\$, as determined by the Central Bank of Belize, has been fixed since 1976 at US \$0.50 per BZE\$1.00.

The exchange rate for conversion of Bahamas dollars (B\$) into US\$, as determined by the Central Bank of The Bahamas, has been fixed since 1973 at US\$1.00 per B\$1.00.

The official currency of the British Virgin Islands is the United States dollar.

Consolidated Water Co. Ltd.’s Netherlands subsidiary conducts business in US\$ and euros, its Indonesian subsidiary conducts business in US\$ dollars and Indonesian rupiahs, and its Mexico subsidiary conducts business in US\$ and Mexican pesos. The exchange rates for conversion of euros, rupiahs and Mexican pesos into US\$ vary based upon market conditions.

PART I

ITEM 1. BUSINESS

Overview

We develop and operate seawater desalination plants (that utilize reverse osmosis technology) and water distribution systems in areas where naturally occurring supplies of potable water are scarce or nonexistent. Through our subsidiaries and affiliates, we provide the following services to our customers in the Cayman Islands, The Bahamas, Belize, the British Virgin Islands and Indonesia:

Retail Water Operations. We produce and supply water to end-users, including residential, commercial and government customers in the Cayman Islands under an exclusive retail license issued by the Cayman Islands government to provide water in two of the three most populated and rapidly developing areas on Grand Cayman Island. We also have a desalination plant in Bali, Indonesia that sells water to resort properties. In 2014, our retail water operations generated approximately 37% of our consolidated revenues, substantially all of which were generated by our Grand Cayman operations.

Bulk Water Operations. We produce and supply water to government-owned distributors in the Cayman Islands, Belize and the Bahamas. In 2014, our bulk water operations generated approximately 60% of our consolidated revenues.

Services Operations. We provide engineering and management services for desalination projects, which include the design and construction of desalination plants and the management and operation of desalination plants owned by other companies. In 2014, our services operations generated approximately 3% of our consolidated revenues. We also own 99.9% of a Mexican company, N.S.C. Agua, S.A. de C.V., (“NSC”) that we formed to develop a project encompassing the construction and operation of a 100 million gallon per day seawater reverse osmosis desalination plant to be located in northern Baja California, Mexico and an accompanying pipeline to deliver water to the Mexican potable water system and the U.S. border. This project is in the development stage and NSC does not presently generate any revenues.

Affiliate Operations. We own 50% of the voting rights and 43.5% of the equity rights of Ocean Conversion (BVI) Ltd. (“OC-BVI”), which produces and supplies bulk water to the British Virgin Islands Water and Sewerage Department.

As of December 31, 2014, the number of plants we, or our affiliates, operate in each country and the production capacities of these plants are as follows:

Location	Plants	Capacity ⁽¹⁾
Cayman Islands	7	9.1
Bahamas	3	15.2
Belize	1	0.6
British Virgin Islands	2	0.8
Bali	1	0.8
Total	14	26.5

(1) In millions of gallons per day.

Strategy

Our strategy is to provide water services in areas where (i) the supply of potable water is scarce and (ii) the production of potable water by reverse osmosis desalination is, or will be, economically viable for customers in those areas. We focus primarily on markets with the following characteristics that make them attractive for our business:

- inadequate sources of potable water.
- favorable regulatory and tax environments.
- a large proportion of tourist properties (which historically have generated higher volume sales than residential properties).
- growing populations and economies.

We believe that our potential market includes any location with a demand for, but a limited supply of, potable water that has access to seawater. The desalination of seawater is the most widely used process for producing potable water in areas with an insufficient natural supply. In addition, in many locations, desalination is the only commercially viable means to expand the existing water supply. We believe that our experience in the development and operation of reverse osmosis desalination plants provides us with the capabilities to successfully expand our operations beyond our existing markets and we expect to do so in the coming years.

Key elements of our strategy include:

Expanding our existing operations in the Cayman Islands, The Bahamas and Belize. We plan to continue to seek new water supply agreements and licenses, renewing our existing supply agreements, and increasing our production levels in our existing markets.

Penetrating new markets. We plan to continue to seek opportunities to profitably expand our operations into new markets that have significant unfulfilled demands for potable water. These markets include the rest of the Caribbean, Mexico, Asia and other areas where we can provide water on a profitable basis and in favorable regulatory environments. We may pursue these opportunities either on our own or through joint ventures and strategic alliances.

Broadening our existing and future operations into complementary services. We consider opportunities to leverage our water-related expertise to enter complementary service industries as viable complements to our existing business and will pursue such opportunities as they arise. We may pursue these opportunities either on our own or through joint ventures, strategic alliances and/or acquisitions.

Our Company

We conduct our operations in the Cayman Islands, The Bahamas, Belize, the British Virgin Islands, Indonesia, and the United States through the following operating subsidiaries and affiliates:

Cayman Water Company Limited (“Cayman Water”). Cayman Water operates under an exclusive retail license granted by the Cayman Islands government to provide water to customers within a prescribed service area on Grand Cayman that includes the Seven Mile Beach and West Bay areas, two of the three most populated areas in the Cayman Islands. The only non-government owned public water utility on Grand Cayman is Cayman Water which owns and operates four desalination plants.

Ocean Conversion (Cayman) Limited (“OC-Cayman”). OC-Cayman provides bulk water under various licenses and agreements to the Water Authority-Cayman, a government-owned utility and regulatory agency, which distributes the water to properties located outside our exclusive retail license service area in Grand Cayman. OC-Cayman operates three desalination plants owned by the Water Authority-Cayman.

Consolidated Water (Bahamas) Limited (“CW-Bahamas”). We own a 90.9% equity interest in CW-Bahamas, which provides bulk water under long-term contracts to the Water and Sewerage Corporation of The Bahamas, a government agency. CW-Bahamas owns and operates our largest desalination plant and two other desalination plants.

Consolidated Water (Belize) Limited (“CW-Belize”). CW-Belize owns and operates one desalination plant and has an exclusive contract to provide bulk water to Belize Water Services Ltd., a water distributor that serves residential, commercial and tourist properties in Ambergris Caye, Belize.

Aquilex, Inc. This subsidiary, a United States company, provides financial, engineering and supply chain management support services to our subsidiaries and affiliates.

Ocean Conversion (BVI) Ltd. (“OC-BVI”). We own 50% of the voting stock of our affiliate, OC-BVI, a British Virgin Islands company, which sells bulk water to the Government of the British Virgin Islands Water and Sewerage Department. We own an overall 43.5% equity interest in OC-BVI's profits and certain profit sharing rights that raise our effective interest in OC-BVI's profits to approximately 45%. OC-BVI also pays our subsidiary DesalCo Limited fees for certain engineering and administrative services. We account for our investment in OC-BVI under the equity method of accounting.

DesalCo Limited (“DesalCo”). A Cayman Islands company, DesalCo provides management, engineering and construction services for desalination projects.

Consolidated Water (Bermuda) Limited (“CW-Bermuda”). In January 2007, our affiliate, Consolidated Water (Bermuda) Limited (“CW-Bermuda”) entered into a design, build, sale and operating agreement with the Government of Bermuda for a desalination plant to be built in two phases at Tynes Bay along the northern coast of Bermuda. Under the agreement, CW-Bermuda constructed and operated the plant from the second quarter of 2009 through the expiration of the agreement on June 30, 2011. We do not expect to receive any future fees or revenues from CW-Bermuda.

Consolidated Water Cooperatief, U.A. (“CW-Cooperatief”) and N.S.C. Agua, S.A. de C.V. (“NSC”).

CW-Cooperatief is a wholly-owned Netherlands subsidiary organized in 2010. CW-Cooperatief owns a 99.9% interest in NSC, a Mexican company. NSC has been formed to pursue a project encompassing the construction, ownership and operation of a 100 million gallon per day seawater reverse osmosis desalination plant to be located in northern Baja California, Mexico and accompanying pipeline to deliver water to the Mexican potable water system and the U.S. border. The project is currently in the development stage and NSC does not generate any operating revenues.

Consolidated Water (Asia) Pte. Limited (“CW-Asia”) and PT Consolidated Water Bali (“CW-Bali”). During 2012 we formed CW-Asia, a 95% owned Singapore company and CW-Bali, an Indonesian company, which is 95% owned by CW-Asia. During 2013, CW-Bali completed construction of a 264,000 gallon per day desalination plant and in 2014 we expanded the capacity of this plant to 790,000 gallons per day. This plant provides water to resort properties in the Nusa Dua area of Bali, Indonesia.

Our Operations

We have three business segments: retail water operations, bulk water operations and services operations. Our retail water operations supply water to end-users, including residential, commercial and government customers. Our bulk water operations supply water to government-owned distributors. Our retail and bulk operations serve customers in the Cayman Islands, The Bahamas, Belize, the British Virgin Islands and Indonesia. Our services operations provide engineering and management services, which include the design and construction of desalination plants and the management and operation of desalination plants.

For fiscal year 2014, our retail water, bulk water and service operations generated approximately 37%, 60% and 3%, respectively, of our consolidated revenues. For information about our business segments and geographical information about our operating revenues and long-lived assets, see Note 16 to our consolidated financial statements at ITEM 8 of this Annual Report.

Retail Water Operations

For fiscal years 2014, 2013 and 2012, our retail water operations accounted for approximately 37%, 36% and 37%, respectively, of our consolidated revenues. This business in the Cayman Islands and Indonesia produces and supplies water to end-users, including residential, commercial and government customers.

We sell water through our retail operations to a variety of residential, commercial and government customers through our wholly-owned subsidiary Cayman Water, which operates under an exclusive license issued to us by the Cayman Islands government under The Water (Production and Supply) Law of 1979. As discussed below, this license was set to expire in July 2010 but has since been extended while negotiations for a new license take place. Pursuant to the license, we have the exclusive right to produce potable water and distribute it by pipeline to our licensed service area which consists of two of the three most populated areas of Grand Cayman Island, the Seven Mile Beach and West Bay areas.

Under our license, we pay a royalty to the government of 7.5% of our gross retail water sales revenues (excluding energy cost adjustments). The selling prices of water sold to our customers are determined by the license and vary depending upon the type and location of the customer and the monthly volume of water purchased. The license provides for an automatic adjustment for inflation or deflation on an annual basis, subject to temporary limited exceptions, and an automatic adjustment for the cost of electricity on a monthly basis. The Water Authority-Cayman ("WAC"), on behalf of the government, reviews and confirms the calculations of the price adjustments for inflation and electricity costs. If we want to adjust our prices for any reason other than inflation or electricity costs, we have to request prior approval of the Cabinet of the Cayman Islands government. Disputes regarding price adjustments would be referred to arbitration.

This license was set to expire on July 10, 2010; however, we and the Cayman Islands government have extended the license several times in order to provide sufficient time to negotiate the terms of a new license agreement. The most recent extension of our license expires June 30, 2015.

In February 2011, the Water (Production and Supply) Law, 2011 and the Water Authority (Amendment) Law, 2011 (the “New Laws”) were published and are now in full force and effect. Under the New Laws, the WAC will issue any new license, and such new license could include a rate of return on invested capital model as discussed in the following paragraph.

We have been advised in correspondence from the Cayman Islands government and the WAC that: (i) the WAC is now the principal negotiator, and not the Cayman Islands government, in these license negotiations, and (ii) the WAC has determined that a rate of return on invested capital model (“RCAM”) for the retail license is in the best interest of the public and the our customers. RCAM is the rate model currently utilized in the electricity transmission and distribution license granted by the Cayman Islands government to the Caribbean Utilities Company, Ltd. We have advised the Cayman Islands government that we disagree with its position on these two matters.

In July 2012, in an effort to resolve several issues relating to our retail license renewal negotiations, we filed an Application for Leave to Apply for Judicial Review (the “Application”) with the Grand Court of the Cayman Islands (the “Court”), stating that: (i) certain provisions of the Water Authority (Amendment) Law, 2011 and the Water (Production and Supply) Law, 2011, appear to be incompatible, (ii) the WAC’s roles as the principal license negotiator, statutory regulator and our competitor put the WAC in a position of hopeless conflict, and (iii) the WAC’s decision to replace the rate structure under our current exclusive license with RCAM was predetermined and unreasonable. In October 2012, we were notified that the Court agreed to consider the issues outlined in the Application.

Throughout the course of the retail license renewal negotiations, we have objected to the use of RCAM on the basis that we believe such a model would not promote the efficient operation of our water utility and could ultimately increase water rates to our customers.

The hearing for this judicial review was held on April 1, 2014. Prior to the commencement of the hearing, the parties agreed that the Court should solely be concerned with the interpretation of the statutory provisions. As part of this agreement, the WAC agreed to consider our submissions on the RCAM model and/or alternative models of pricing. In June 2014, the Court determined that: (i) the renewal of the 1990 License does not require a public bidding process; and (ii) the WAC is the proper entity to negotiate with us for the renewal of the 1990 License.

Our submissions on the RCAM model and/or alternative models of pricing were made to the WAC on June 9, 2014. We received a letter from the WAC dated September 11, 2014 which fully rejected our submissions and stated that the WAC intends to provide us with a draft RCAM license in due course. On November 21, 2014, we wrote to the Minister of Works offering to recommence license negotiations on the basis of the RCAM model subject to certain conditions which are: (i) the Government would undertake to amend the current water legislation to provide for an independent regulator and a fair and balanced regulatory regime more consistent with that provided under the electrical utility regulatory regime, (ii) the Government and we would mutually appoint an independent referee and chairman of the negotiations, (iii) our new license would provide exclusivity for the production and provision of all

pipled water, both potable and non-potable, within our Cayman Islands license area, (iv) the Government would allow us to submit our counter proposal to the WAC's June 2010 RCAM license draft, and (v) the principle of subsidization of residential customer rates by commercial customer rates would continue under a new license. To date, we have not received a response to our letter.

As a result of the Court's ruling and our subsequent offer to recommence negotiations on the basis of the RCAM model, we expect to recommence license negotiations with the Government of the Cayman Islands and WAC in the near future.

See further discussion of this matter at ITEM 1.A. RISK FACTORS and ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

Facilities

Our retail operations in the Cayman Islands produce potable water at four reverse osmosis seawater conversion plants in Grand Cayman located at our Abel Castillo Water Works ("ACWW"), Britannia and West Bay sites. We own the land for our ACWW and West Bay plants and have entered into a lease for the land for our Britannia plant that expires January 1, 2027. The current production capacity of the two plants located at ACWW is 2.2 million gallons of water per day. The production capacity of the Britannia plant is 715,000 gallons of water per day. The production capacity of the West Bay plant is 910,000 gallons of water per day.

Electricity to our plants is supplied by Caribbean Utilities Co. Ltd., a publicly traded utility company. We maintain diesel engine-driven standby generators at all four retail plant sites with sufficient capacity to operate our distribution pumps and other essential equipment during any temporary interruptions in electricity supply. Standby generation capacity is available at our West Bay plant and ACWW plants to operate a portion of the water production capacity as well.

In the event of an emergency, our distribution system is connected to the distribution system of the WAC. In prior years, we have purchased water from the WAC for brief periods of time and have also sold potable water to the WAC from our retail plants.

Our pipeline system on Grand Cayman covers the Seven Mile Beach and West Bay areas and consists of approximately 90 miles of potable water pipeline. We extend our distribution system periodically as demand warrants. We have a main pipe loop covering the Seven Mile Beach and West Bay areas. We place extensions of smaller diameter pipe off our main pipe to service new developments in our service area. This system of building branches from the main pipe keeps construction costs low and allows us to provide service to new areas in a timely manner. Developers are responsible for laying the pipeline within their developments at their own cost, but in accordance with

our specifications. When a development is completed, the developer then transfers operation and maintenance of the pipeline to us.

Customers

We enter into contracts with hotels, condominiums, residential homes and other properties located in our existing licensed area to provide potable water. In the Seven Mile Beach area, our primary customers are the hotels and condominium complexes that serve the tourist industry. In the West Bay area, our primary customers are residential homes.

We bill our customers on a monthly basis based on metered consumption and bills are typically collected within 30 to 35 days after the billing date. Receivables not collected within 45 days subject the customer to disconnection from water service. In 2014, 2013 and 2012, bad debts represented less than 1% of our total annual retail sales. In addition to their past due invoice balance, customers that have had their service disconnected must pay re-connection charges.

Historically, demand on our pipeline distribution has varied throughout the year. Demand depends upon the number of tourists visiting and the amount of rainfall during any particular time of the year. In general, the majority of tourists come from the United States during the winter months.

Developing Retail Operations in Indonesia

During the latter half of 2012, we commenced, through our subsidiary, PT Consolidated Water Bali, the construction of a seawater reverse osmosis (“SWRO”) plant with an initial capacity of 264,000 gallons per day in Nusa Dua, one of the primary tourist areas of Bali, Indonesia. Nusa Dua has a target customer profile consisting of tourist resorts and luxury/vacation residences comparable to our retail service area on Grand Cayman. We believe the water demands of these properties in Nusa Dua already exceed the supply capacity of the local public water utility, will soon exceed other local sources (such as wells), and that other areas of Bali will also eventually experience fresh water shortages. However, as SWRO has not been employed to any meaningful extent in Bali, we concluded that to obtain customers in Bali we must first demonstrate the viability of SWRO as well as our capabilities and expertise. Consequently, we elected to construct this plant before obtaining water supply agreements for its production. During 2014, we expanded the capacity of this plant to 790,000 gallons per day. We believe sufficient demand exists in Nusa Dua to enable us to sell all of the plant’s capacity, although we cannot assure that we will be able to do so. As of December 31, 2014, the capitalized costs for this plant reflected on our consolidated balance sheet were approximately \$3.3 million.

Bulk Water Operations

For fiscal years 2014, 2013 and 2012, our bulk water operations accounted for approximately 60%, 63% and 62%, respectively, of our consolidated revenues and are comprised of businesses in the Cayman Islands, The Bahamas and Belize. These businesses produce potable water from seawater and sell this water to governments and private customers.

Bulk Water Operations in the Cayman Islands

We sell bulk water in the Cayman Islands through our wholly-owned subsidiary OC-Cayman.

Facilities

We sell water to the Water Authority-Cayman (“WAC”) from three reverse osmosis seawater conversion plants in Grand Cayman that are owned by the WAC but designed, built and operated by OC-Cayman: the Red Gate, North Sound and North Side Water Works plants, which have production capacities of approximately 1.3 million, 1.6 million and 2.4 million gallons of water per day, respectively. We also operated and sold water from the Lower Valley plant, which is owned by the WAC and had a production capacity of 1.1 million gallons per day, through the January 2013 expiration date of our operating contract for that plant. The WAC now operates the Lower Valley plant. The plants that we operate for the WAC are located on land owned by the WAC.

Customers

We provide bulk water on a take-or-pay basis to the WAC, a government owned utility and regulatory agency, under various licenses and agreements. The WAC in turn distributes that water to properties in the parts of Grand Cayman that are outside of our retail license area.

The current operating agreement for the Red Gate plant began on July 2, 2010 for a period of seven years.

The current operating agreement for the North Sound plant was extended on April 1, 2007 for a period of seven years. In March 2014, the WAC requested that OC-Cayman continue to operate and maintain the plant for an additional twelve months.

The current operating agreement for the North Side Water Works plant was executed on March 11, 2008 for a period of ten years.

Bulk Water Operations in Belize

In Belize, we sell bulk water through our wholly-owned subsidiary CW-Belize.

Facilities

We own the reverse osmosis seawater conversion plant in Belize and lease the land on which our plant is located from the Belize government at an annual rent of BZE\$1.00. The land lease expires in March 2026. The production capacity of the plant is 600,000 gallons of water per day.

Electricity to our plant is supplied by Belize Electricity Limited. At the plant site, we maintain a diesel engine-driven, standby generator with sufficient capacity to operate our water production equipment during any temporary interruption in the electricity supply.

Customers

We are the exclusive provider of water in Ambergris Caye, Belize to Belize Water Services Ltd. (“BWSL”), a government controlled entity which distributes the water through its own pipeline system to residential, commercial and tourist properties. BWSL distributes our water primarily to residential properties, small hotels, and businesses that serve the tourist market. The base price of water supplied, and adjustments thereto, are determined by the terms of the contract, which provides for annual adjustments based upon the movement in the government price indices specified in the contract, as well as monthly adjustments for changes in the cost of diesel fuel and electricity. Demand is less cyclical than in our other locations due to a higher proportion of residential to tourist demand.

We have an exclusive contract with BWSL to supply a minimum of 2.03 million gallons of water per week or, upon demand, up to 2.94 million gallons per week, on a take-or-pay basis. This contract expires on March 23, 2026. BWSL has the right, with six months advance notice before the expiration date, to renew the contract for a further 25-year period on the same terms and conditions.

Bulk Water Operations in The Bahamas

We sell bulk water in The Bahamas to the Water and Sewerage Corporation of The Bahamas (“WSC”) and to a private resort on Bimini through our majority-owned subsidiary, CW-Bahamas.

Facilities

We currently supply bulk water in The Bahamas from our Windsor, Blue Hills and Bimini plants.

The water supply agreement for our Windsor plant, which has a capacity of 3.1 million gallons per day, expired in July 2013. As discussed hereinafter, (see “*Customers*”) at present CW-Bahamas continues to supply water from the Windsor plant at the request of the government of The Bahamas.

We supply water from the Blue Hills plant, our Company’s largest seawater conversion facility with a capacity of 12.0 million gallons per day under the terms of a water supply agreement with the WSC that expires March 2032.

The Bimini plant has a capacity of 115,000 gallons per day and supplies water to a private resort under a water supply agreement that expires in December 2020.

The high pressure pumps for our Windsor and Blue Hills plants in the Bahamas are diesel engine-driven. Electricity for the remainder of our plant operations is supplied by Bahamas Electricity Corporation. We maintain a standby generator with sufficient capacity to operate essential equipment at our Windsor and Blue Hills plants and are able to produce water with these plants during temporary interruptions in the electricity supply.

Customers

We provide bulk water to the WSC, which distributes the water through its own pipeline system to residential, commercial and tourist properties on the Island of New Providence.

Pursuant to a water supply agreement, we are required to provide the WSC with at least 16.8 million gallons per week of potable water from the Windsor plant, and the WSC had contracted to purchase at least that amount on a take-or-pay basis. This water supply agreement was scheduled to expire when we delivered the total amount of water required under the agreement in July 2013, but has been extended on a month-to-month basis. At the conclusion of the agreement, the WSC has the option to:

- extend the agreement for an additional five years at a rate to be negotiated;
- exercise a right of first refusal to purchase any materials, equipment and facilities that CW-Bahamas intends to remove from the Windsor plant site, and negotiate a purchase price with CW-Bahamas; or
- require CW-Bahamas to remove all materials, equipment and facilities from the site.

At the request of the government of The Bahamas, we continue to operate and maintain the Windsor plant on a month-to-month basis to provide the government of The Bahamas with additional time to decide whether or not it will extend CW-Bahamas' water supply agreement for the Windsor plant on a long term basis.

Under the terms of the water supply agreement for our Blue Hills plant, we are required to deliver and the WSC is required to purchase a minimum of 63.0 million gallons per week. The term of the Blue Hills water supply agreement expires the later of March 2032 or the date we deliver the total amount of water required under the agreement. At the conclusion of the agreement, the WSC has the option to:

- extend the agreement for an additional five years at a rate to be negotiated;
- exercise a right of first refusal to purchase any materials, equipment and facilities that CW-Bahamas intends to remove from the site, and negotiate a purchase price with CW-Bahamas; or

- require CW-Bahamas to remove all materials, equipment and facilities from the site.

Services Operations

For fiscal years 2014, 2013 and 2012, our services operations accounted for approximately 3%, 1% and 1%, respectively, of our consolidated revenues and are comprised of businesses providing services in the Cayman Islands, The Bahamas, the British Virgin Islands and (through June 30, 2011) Bermuda. These businesses provide engineering and management services, including designing and constructing desalination plants, and managing and operating plants owned by affiliated companies.

We provide design, engineering and construction services for desalination projects through DesalCo, which is recognized by suppliers as an original equipment manufacturer of reverse osmosis seawater desalination plants for our Company. DesalCo also provides management services to our affiliates.

Our engineering department also conducts research and development. We frequently test new components and technology offered by suppliers in our business and, at times, we collaborate with suppliers in the development of their products.

Aquilex, Inc., our wholly-owned U.S. subsidiary located in Coral Springs, Florida, provides financial, engineering and supply chain support services to our operating segments.

Affiliate Operations

Our affiliate, OC-BVI, sells water to the Government of the British Virgin Islands Water and Sewerage Department (“BVIW&S”). We own 50% of the voting shares of OC-BVI and have an overall 43.5% equity interest in the profits of OC-BVI. We also own separate profit sharing rights in OC-BVI that raise our effective interest in OC-BVI’s profits from 43.5% to approximately 45%. Sage Water Holdings (BVI) Limited (“Sage”) owns the remaining 50% of the voting shares of OC-BVI and the remaining 55% interest in its profits. Under the Articles of Association of OC-BVI, we have the right to appoint three of the six directors of OC-BVI. Sage is entitled to appoint the remaining three directors. In the event of a tied vote of the directors, the President of the Caribbean Water and Wastewater Association, a regional trade association comprised primarily of government representatives, is entitled to appoint a junior director to cast a deciding vote.

We provide certain engineering and administrative services to OC-BVI for a monthly fee and a bonus arrangement which provides for payment of 4.0% of the net operating income of OC-BVI.

We account for our interests in OC-BVI using the equity method of accounting.

Customers

OC-BVI sells bulk water to BVIW&S, which distributes the water through its own pipeline system to residential, commercial and tourist properties on the islands of Tortola and Jost Van Dyke in the British Virgin Islands. OC-BVI provides operating, engineering and procurement services for the Baughers Bay plant under a short-term agreement with Sage.

Facilities

OC-BVI owns and operates a 720,000 gallons per day plant at Bar Bay, Tortola, that supplies water to the BVI government under a contract dated March 4, 2010 that has a term of seven years with a seven-year renewal option exercisable by the BVI government. OC-BVI purchases electrical power to operate this plant from BVI Electric Co. and operate diesel engine driven emergency power generators when BVI Electric Co. is unable to provide power to the plant.

OC-BVI's plant on the island of Jost Van Dyke has a capacity of 60,000 gallons per day. This plant operates under a 10-year contract with the BVI government that expired July 8, 2013. Pursuant to the contract, OC-BVI is operating the plant on a year-to-year basis until the BVI government informs OC-BVI of its intention to extend the existing, or enter into a new agreement. We purchase electrical power to operate this plant from BVI Electric Co.

Reverse Osmosis Technology

The conversion of seawater to potable water is called desalination. The two primary forms of desalination are distillation and reverse osmosis. Both methods are used throughout the world and technologies are improving to lower the costs of production. Reverse osmosis is a fluid separation process in which the saline water (i.e. seawater) is pressurized and the fresh water is separated from the saline water by passing through a semi-permeable membrane which rejects the salts. The saline water is first passed through a pretreatment system, which generally consists of fine filtration and treatment chemicals, if required. Pre-treatment removes suspended solids and organics which could cause fouling of the membrane surface. Next, a high-pressure pump pressurizes the saline water thus enabling approximately 40% conversion of the saline water to fresh water as it passes through the membrane, while more than 99% of the dissolved salts are rejected and remain in the now concentrated saline water. This concentrate is discharged without passing through the membrane; however, the remaining hydraulic energy in the concentrate is transferred to the initial saline feed water with an energy recovery device thus reducing the total energy requirement

for the reverse osmosis system. The final step is post-treatment, which consists of stabilizing the produced fresh water (thereby removing undesirable dissolved gases), adjusting the pH and providing chlorination to prepare it for distribution.

We use reverse osmosis technology to convert seawater to potable water at all of the plants we construct and operate. We believe that this technology is the most effective and efficient conversion process for our market. However, we are always seeking ways to maximize efficiencies in our current processes and investigating new, more efficient processes to convert seawater to potable water. The equipment at our plants is among the most energy efficient available and we monitor and maintain the equipment in an efficient manner. As a result of our decades of experience in seawater desalination, we believe that we have the expertise and “know how” in the development and operation of desalination plants and similar facilities that is easily transferable to locations outside of our current operating areas.

Raw Materials and Sources of Supply

All materials, parts and supplies essential to our business operations are obtained from multiple sources and we use the latest industry technology. We do not manufacture any parts or components for equipment essential to our business. Our access to seawater for processing into potable water is granted through our licenses and contracts with governments of the various jurisdictions in which we have our operations.

Seasonal Variations in Our Business

Our operations are affected by the levels of tourism and are subject to seasonal variations in our service areas. Demand for our water in the Cayman Islands, Belize, and the Bahamas is affected by variations in the level of tourism and local weather, primarily rainfall. Tourism in our service areas is affected by the economies of the tourists’ home countries, primarily the United States and Europe, terrorist activity and perceived threats thereof, and increased costs of fuel and airfares. We normally sell more water during the first and second quarters, when the number of tourists is greater and local rainfall is less, than in the third and fourth quarters.

Government Regulations, Custom Duties and Taxes

Our operations and activities are subject to the governmental regulations and taxes of the countries in which we operate. The following summary of regulatory developments and legislation does not purport to describe all present and proposed regulation and legislation that may affect our businesses. Legislative or regulatory requirements currently applicable to our businesses may change in the future. Any such changes could impose new obligations on us that may adversely affect our businesses and operating results.

The Cayman Islands

The Cayman Islands are a British Overseas Territory and have had a stable political climate since 1670, when the Treaty of Madrid ceded the Cayman Islands to England. The Queen of England appoints the Governor of the Cayman Islands to make laws with the advice and consent of the legislative assembly. The legislative assembly consists of 18 elected members and two members appointed by the Governor from the Civil Service. The Cabinet is responsible for day-to-day government operations. The Cabinet consists of seven ministers who are chosen by the Premier from its 18 popularly elected members, and the two Civil Service members. The elected members choose from among themselves a leader, who is designated the Premier, and is in effect the leader of the elected government. The Governor has reserved powers and the United Kingdom retains full control over foreign affairs and defense. The Cayman Islands are a common law jurisdiction and have adopted a legal system similar to that of the United Kingdom.

The Cayman Islands have no taxes on profits, income, distributions, capital gains or appreciation. We have exemptions from, or receive concessionaire rates of customs duties on capital expenditures for plant and major consumable spare parts and supplies imported into the Cayman Islands as follows:

We do not pay import duty or taxes on reverse osmosis membranes, electric pumps and motors, and chemicals, but we do pay duty at the rate of 10% of the cost, including insurance and transportation to the Cayman Islands, of other plant and associated materials and equipment to manufacture or supply water in the Seven Mile Beach or West Bay areas. We have been advised by the Government of the Cayman Islands that we will not receive any duty concessions in our new retail water license; and

- OC-Cayman pays full customs duties in respect of all plants that it operates for the Water Authority-Cayman.

The Bahamas

The Commonwealth of The Bahamas is an independent nation and a constitutional parliamentary democracy with the Queen of England as the constitutional head of state. The basis of the Bahamian law and legal system is the English common law tradition with a Supreme Court, Court of Appeals, and a Magistrates court.

Under the current laws of the Commonwealth of The Bahamas, no income, corporation, capital gains or other taxes are payable by us. We are required to pay an annual business license fee (the calculation of which is based on our preceding year's financial statements) which to date has not been material to the results of our Bahamas operations.

Belize

Belize achieved full independence from the United Kingdom in 1981. Today, Belize is a constitutional monarchy with the adoption of a constitution in 1981. Based on the British model with three independent branches, the Queen of England is the constitutional head of state, represented by a Governor General. A Prime Minister and cabinet make up the executive branch, while a 31 member elected House of Representatives and a 13 member appointed Senate form a bicameral legislature. The cabinet consists of a prime minister, other ministers and ministers of state who are appointed by the Governor-General on the advice of the Prime Minister, who has the support of the majority party in the House of Representatives. Belize is an English common law jurisdiction with a Supreme Court, Court of Appeals and local Magistrate Courts.

The Government of Belize has exempted CW-Belize from certain customs duties and all revenue replacement duties until April 18, 2026, and had exempted CW-Belize from company taxes until January 28, 2006. Belize levies a gross receipts tax on corporations at a rate varying between 0.75% and 25%, depending on the type of business, and a corporate income tax at a rate of 25% of chargeable income. Gross receipts tax payable amounts are credited towards corporate income tax. The Government of Belize also implemented certain environmental taxes and a general sales tax effective July 1, 2006 and increased certain business and personal taxes and created new taxes effective March 1, 2005. Belize levies import duty on most imported items at rates varying between 0% and 45%, with most items attracting a rate of 20%. Under the terms of our water supply agreement with BWSL we are reimbursed by BWSL for all taxes and customs duties that we are required to pay and we record this reimbursement as an offset to our tax expense.

The British Virgin Islands

The British Virgin Islands (the “BVI”) is a British Overseas Territory, with the Queen as the Head of State and Her Majesty’s representative, the Governor, responsible for external affairs, defense and internal security, the Civil Service and administration of the courts. Since 1967, the BVI has held responsibility for its own internal affairs.

The BVI Constitution provides for the people of the BVI to be represented by a ministerial system of government, led by an elected Premier, a Cabinet of Ministers and the House of Assembly. The House of Assembly consists of 13 elected representatives, the Attorney General, and the Speaker.

The judicial system, based on English law, is under the direction of the Eastern Caribbean Supreme Court, which includes the High Court of Justice and the Court of Appeal. The ultimate appellate court is the Privy Council in London.

Bali, Indonesia

Bali is an Indonesian island with a population of over four million located between Java to the west and Lombok to the east. Bali is one of the world's premier island tourist destinations, home to numerous four and five star resorts. Bali is renowned for its highly developed arts, beautiful surroundings (both mountain and coastal areas), diverse tourist attractions, excellent international and local restaurants, and the friendliness of the local people. Under the current laws of Bali, Indonesia, we are subject to corporate income taxes.

Market and Service Area

Although we currently operate in the Cayman Islands, Belize, the British Virgin Islands, The Commonwealth of The Bahamas, and Indonesia, we believe that our potential market consists of any location where a need exists for potable water and with access to seawater or brackish water. The desalination of seawater, either through distillation or reverse osmosis, is the most widely used process for producing potable water in areas with an insufficient natural supply. We believe our experience in the development and operation of reverse osmosis desalination plants provides us with a significant opportunity to successfully expand our operations beyond the markets in which we currently operate.

Cayman Islands. The Cayman Islands government, through the Water Authority-Cayman, supplies water to parts of Grand Cayman, which are not within our licensed area, as well as to Cayman Brac. We operate all but one of the reverse osmosis desalination plants owned by the Water Authority-Cayman on Grand Cayman and supply water under licenses and supply agreements held by OC-Cayman with the Water Authority-Cayman.

According to the most recent information published by the Economics and Statistics Office of the Cayman Islands Government, the population of the Cayman Islands was estimated in December 2013 to be approximately 55,691. According to the figures published by the Department of Tourism Statistics Information Center, during the year ended December 31, 2014, tourist air arrivals increased by 10.8% and tourist cruise ship arrivals increased by 16.9% compared to 2013.

Total visitors for the year increased from 1.7 million in 2013 to 2.0 million in 2014. We believe that our water sales in the Cayman Islands are more positively impacted by stay-over tourists that arrive by air than by those arriving by cruise ship, since cruise ship tourists generally only visit the island for one day or less and do not remain on the island overnight.

The Bahamas. On South Bimini Island in The Bahamas, we supply water to a private developer and do not have competitors. GE Water operates a seawater desalination plant on North Bimini Island and other small family islands. We competed with companies such as GE Water, Veolia, IDE, OHL Inima and Biwater for the contract with the Bahamian government to build and operate a seawater desalination plant at Blue Hills, New Providence, Bahamas. We expect to compete with these companies and others for future water supply contracts in The Bahamas.

Belize. Our current operations in Belize are located on Ambergris Caye, which consists of residential, commercial and tourist properties in the town of San Pedro. This town is located on the southern end of Ambergris Caye, one of many islands located east of the Belize mainland and off the southeastern tip of the Yucatan Peninsula. Ambergris Caye is approximately 25 miles long and, according to the Central Statistical Office “Belize: 2010 National Census Overview”, has a population of about 11,510 residents. We provide bulk potable water to BWSL, which distributes this water to this market. BWSL currently has no other source of potable water on Ambergris Caye. Our contract with BWSL makes us their exclusive producer of desalinated water on Ambergris Caye through 2026.

A 185 mile long barrier reef, which is the largest barrier reef in the Western Hemisphere, is situated just offshore of Ambergris Caye. This natural attraction is a choice destination for scuba divers and tourists. According to information published by the Belize Trade and Investment Development Service, tourism is Belize’s second largest source of foreign income, next to agriculture.

British Virgin Islands. The British Virgin Islands are a British Overseas Territory and are situated east of Puerto Rico. They consist of 16 inhabited and more than 20 uninhabited islands, of which Tortola is the largest and most populated island. The British Virgin Islands serve as a hub for many large yacht-chartering businesses.

Competition

Cayman Islands. Pursuant to our license granted by the Cayman Islands government, we have the exclusive right to provide potable, piped water within our licensed service area on Grand Cayman. At the present time, we are the only non-government-owned public water utility on Grand Cayman. The Cayman Islands government, through the Water Authority-Cayman, supplies water to parts of Grand Cayman located outside of our licensed service area. Although we have no competition within our exclusive retail license service area for potable water, our ability to expand our service area is at the discretion of the Cayman Island government. Private residences and commercial multi-unit dwellings up to four units may install water making equipment for their own use. Water plants on premises within our license area and serving only their premises in existence prior to 1991 can be maintained but not replaced or expanded. We are aware of only one such plant currently in operation. The Cayman Islands government, through the Water Authority-Cayman, supplies water to parts of Grand Cayman outside of our licensed service area. We have competed with such companies as GE Water, Veolia, and IDE for bulk water supply contracts with the Water Authority-Cayman.

The Bahamas. On South Bimini Island in The Bahamas, we supply water to a private developer and do not have competitors. GE Water operates a seawater desalination plant on North Bimini Island and other small islands. We competed with companies such as GE Water, Veolia, IDE, OHL Inima and Biwater for the contract with the Bahamian government to build and operate a seawater desalination plant at Blue Hills, New Providence, Bahamas. We expect to compete with these companies and others for future water supply contracts in The Bahamas.

Belize. On Ambergris Caye in Belize, our water supply contract with Belize Water Services Limited is exclusive, and Belize Water Services Limited cannot seek contracts with other water suppliers, or produce water itself, to meet their future needs in San Pedro, Ambergris Caye, Belize.

British Virgin Islands. In the British Virgin Islands, GE Water operates seawater desalination plants in West End and Sea Cows Bay, Tortola, and on Virgin Gorda and generally bids against OC-BVI for projects. In 2010, Biwater PLC negotiated a 16 year contract on a sole sourced basis, pursuant to which it has constructed and is operating a 2.75 million gallon per day desalination plant in Tortola for the British Virgin Islands government.

Bali, Indonesia. In Bali, we compete against local water treatment equipment suppliers who provide services to individual resort properties.

To implement our growth strategy outside our existing operating areas, we will have to compete with some of the same companies we competed with for the Blue Hills project in Nassau, Bahamas such as GE Water, Veolia, IDE Technologies, GS Inima, and Biwater as well as other smaller companies. Some of these companies currently operate in areas in which we would like to expand our operations and already maintain worldwide operations having greater financial, managerial and other resources than our company. We believe that our low overhead costs, knowledge of local markets and conditions and our efficient manner of operating desalinated water production and distribution equipment provide us with the capabilities to effectively compete for new projects in the Caribbean basin and other select markets.

Environmental and Health Regulatory Matters

Cayman Islands. With respect to our Cayman Islands operations, we operate our water plants in accordance with guidelines of the Cayman Islands Department of Environmental Health. We are licensed by the Water Authority-Cayman to discharge concentrated seawater, which is a byproduct of our desalination process, into deep disposal wells.

Our Cayman Islands license requires that our potable water quality meet the World Health Organization's Guidelines for Drinking Water Quality and contain less than 200 mg/l of total dissolved solids.

The Bahamas, Belize, and British Virgin Islands. With respect to our Bahamas and Belize operations and OC-BVI's British Virgin Islands operations, we and OC-BVI are required by our water supply contracts to take all reasonable measures to prevent pollution of the environment. We are licensed by the Belize and Bahamian governments to discharge concentrated seawater, which is a by-product of our desalination process, into deep disposal wells. OC-BVI is licensed by the British Virgin Islands government to discharge concentrated seawater into the sea. At several of our locations hydrogen sulfide gas is present in the seawater and we operate our plants in a manner so as to minimize the emission of airborne gas into the environment.

We are not aware of any existing or pending environmental legislation which may affect our operations. To date, we have not received any complaints from any regulatory authorities.

Employees

As of March 9, 2015, we employed a total of 119 persons, 67 in the Cayman Islands, 18 in The Bahamas, 22 in the United States, seven in Belize and five in Asia. We also managed the eight employees of OC-BVI in the British Virgin Islands. We have 10 management employees and 33 administrative and clerical employees. The remaining employees are engaged in engineering, purchasing, plant maintenance and operations, pipe laying and repair, leak detection, new customer connections, meter reading and laboratory analysis of water quality. None of our employees is a party to a collective bargaining agreement. We consider our relationships with our employees to be good.

Available Information

Our website address is <http://www.cwco.com>. Information contained on our website is not incorporated by reference into this Annual Report, and you should not consider information contained on our website as part of this Annual Report.

We have adopted a written code of conduct and ethics that applies to all of our employees and directors, including, but not limited to, our principal executive officer, principal financial officer, and principal accounting officer or controller, or persons performing similar functions. The Code of Conduct and Ethics, the charters of the Audit Committee, Compensation Committee, Nominations and Corporate Governance Committee and the Consolidated Water Co. Ltd. Corporate Governance Guidelines of our Board of Directors, are available at the Investors portion of our website.

You may access, free of charge, our annual reports on Form 10-K, quarterly reports on Form 10-Q, and current reports on Form 8-K, plus amendments to such reports as filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, on our website and on the website of the Securities and Exchange Commission (the “SEC”) as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC. In addition, paper copies of these documents may be obtained free of charge by writing us at the following address: Consolidated Water Co. Ltd., Regatta Office Park, Windward Three, 4th Floor, West Bay Road, P.O. Box 1114, Grand Cayman, KY1-1102, Cayman Islands, Attention: Investor Relations; or by calling us at (345) 945-4277.

ITEM 1A. RISK FACTORS

Investing in our common shares involves risks. Prior to making a decision about investing in our common shares, you should consider carefully the factors discussed below and the information contained in this Annual Report. Each of these risks, as well as other risks and uncertainties not presently known to us or that we currently deem immaterial, could adversely affect our business, results of operations, cash flows and financial condition, and cause the value of our common shares to decline, which may result in the loss of part or all of your investment.

Our exclusive license to provide water to retail customers in the Cayman Islands may not be renewed in the future.

In the Cayman Islands, we provide water to retail customers under a license issued to us in July 1990 by the Cayman Islands government that grants us the exclusive right to provide water to retail customers within our licensed service area. Our service area is comprised of an area on Grand Cayman that includes the Seven Mile Beach and West Bay areas, two of the three most populated areas in the Cayman Islands. For the year ended December 31, 2014, we generated approximately 36% of our consolidated revenues and 53% of our consolidated gross profits from the retail water operations conducted pursuant to our exclusive license. If we are not in default of any of its terms, the license provides us with the right of first refusal to renew the license on terms that are no less favorable than those that the government offers to any third party.

This license was set to expire on July 10, 2010; however, we and the Cayman Islands government have extended the license several times in order to provide sufficient time to negotiate the terms of a new license agreement. The most recent extension of our license expires June 30, 2015.

In February 2011, the Water (Production and Supply) Law, 2011 and the Water Authority (Amendment) Law, 2011 (the “New Laws”) were published and are now in full force and effect. Under the New Laws, the Water Authority-Cayman (“WAC”) will issue any new license, and such new license could include a rate of return on invested capital model, as discussed in the following paragraph.

We have been advised in correspondence from the Cayman Islands government and the WAC that: (i) the WAC is now the principal negotiator, and not the Cayman Islands government, in these license negotiations, and (ii) the WAC has determined that a rate of return on invested capital model (“RCAM”) for the retail license is in the best interest of the public and our customers. RCAM is the rate model currently utilized in the electricity transmission and distribution license granted by the Cayman Islands government to the Caribbean Utilities Company, Ltd. We have advised the Cayman Islands government that we do not agree with its position on these two matters.

In July 2012, in an effort to resolve several issues relating to our retail license renewal negotiations, we filed an Application for Leave to Apply for Judicial Review (the "Application") with the Grand Court of the Cayman Islands (the "Court"), stating that: (i) certain provisions of the Water Authority Law, 2011 and the Water (Production and Supply) Law, 2011, appear to be incompatible, (ii) the WAC's roles as the principal license negotiator, statutory regulator and our competitor put the WAC in a position of hopeless conflict, and (iii) the WAC's decision to replace the rate structure under our current exclusive license with RCAM was predetermined and unreasonable. In October 2012, we were notified that the Court agreed to consider the issues outlined in the Application.

Throughout the course of the retail license renewal negotiations, we have objected to the use of RCAM on the basis that we believe such a model would not promote the efficient operation of our water utility and could ultimately increase water rates to our customers.

The hearing for this judicial review was held on April 1, 2014. Prior to the commencement of the hearing, the parties agreed that the Court should solely be concerned with the interpretation of the statutory provisions. As part of this agreement, the WAC agreed to consider our submissions on the RCAM model and/or alternative models of pricing. In June 2014, the Court determined that: (i) the renewal of the 1990 License does not require a public bidding process; and (ii) the WAC is the proper entity to negotiate with us for the renewal of the 1990 License.

Our submissions on the RCAM model and/or alternative models of pricing were made to the WAC on June 9, 2014. We received a letter from the WAC dated September 11, 2014 which fully rejected our submissions and stated that the WAC intend to provide us with a draft RCAM license in due course. On November 21, 2014, we wrote to the Minister of Works offering to recommence license negotiations on the basis of the RCAM model subject to certain conditions which are: (i) the Government would undertake to amend the current water legislation to provide for an independent regulator and a fair and balanced regulatory regime more consistent with that provided under the electrical utility regulatory regime, (ii) the Government and we would mutually appoint an independent referee and chairman of the negotiations, (iii) our new license would provide exclusivity for the production and provision of all piped water, both potable and non-potable, within our Cayman Islands license area, (iv) the Government would allow us to submit our counter proposal to the WAC's June 2010 RCAM license draft, and (v) the principle of subsidization of residential customer rates by commercial customer rates would continue under a new license. To date, we have not received a response to our letter.

As a result of the Court's ruling and our subsequent offer to recommence negotiations on the basis of the RCAM model, we expect to recommence license negotiations with the Government of the Cayman Islands and WAC in the near future.

If we do not ultimately enter into a new license agreement and no other party is awarded a license, we expect to be permitted to continue to supply water to our service area.

The Cayman Islands government could offer a third party a license to service some or all of our present service area. In such event, we may assume the license offered to the third party by exercising our right of first refusal. However, the terms of any new license agreement may not be as favorable to us as the terms under which we are presently operating and could materially reduce the operating income and cash flows that we have historically generated from our retail license and could require us to record an impairment loss to reduce the \$3,499,037 carrying value of our goodwill. Such impairment loss could be material to our consolidated results of operations.

We rely on fixed-term water supply agreements with our bulk customers in the Cayman Islands, Belize and The Bahamas, which may not be renewed or may be renewed on terms less favorable to us.

All of our bulk water supply agreements are for fixed terms ranging originally from seven to 23 years and with a range of less than one to 18 years remaining. Upon expiration, these agreements may not be renewed or may be renewed on terms less favorable to us. In addition, certain of these agreements for plants not owned by us provide for our customers to take over the operations of the plant upon expiration of the contract term. If this occurs, we may no longer generate income from such plants. In instances where we own the plant that produces the water under an agreement that is not renewed or renewed with lower production quantities, we may not be able to find a new customer for the plant's excess production capacity. If our fixed-term agreements are not renewed or are renewed on terms less favorable to us, our results of operations, cash flows and financial condition could be adversely affected.

The water supply agreement with the Water and Sewerage Corporation of The Bahamas ("WSC") for our Windsor plant was scheduled to expire with the delivery of the total amount of water required under the agreement in July 2013, but has since been extended on a month-to-month basis. At the request of the government of The Bahamas, we continue to maintain and operate the Windsor plant to provide the government of The Bahamas with additional time to decide whether or not to enter into a long term water supply agreement with us for the Windsor plant. We generated \$6.2 million in revenues from this plant during the year ended December 31, 2014.

We have spent approximately \$35.2 million to fund the development costs for a possible project in Mexico and expect to expend significant additional funds in 2015 and 2016 to continue to pursue this project. However, we may not be successful in completing this project.

We own (through our wholly-owned Netherlands subsidiary, Consolidated Water Cooperatief, U.A.) a 99.9% interest in N.S.C. Agua, S.A. de C.V. ("NSC"), a development stage Mexico company formed to pursue a project encompassing the construction, operation and minority ownership of a 100 million gallon per day seawater reverse osmosis desalination plant to be located in northern Baja California, Mexico and an accompanying pipeline to deliver water to the Mexican potable water system and the U.S. border. NSC has conducted an equipment piloting plant and water data collection program at the proposed feed water source and is presently seeking contracts with customers in Mexico and the U.S. for the sale of desalinated water from the project. NSC will be required to accomplish various additional steps before it can commence construction of the plant and pipeline including, but not limited to, obtaining approvals and permits from various governmental agencies in Mexico, securing contracts with its proposed customers to sell water in sufficient quantities and at prices that make the project financially viable, and obtaining equity and debt financing for the project. NSC's potential customers will also be required to obtain various governmental permits and approvals in order to purchase water from NSC. As of December 31, 2014, we have spent approximately \$35.2 million on this project.

In August 2014, the State of Baja California enacted new legislation to regulate Public-Private Association projects, which involve the type of long-term contract between a public sector authority and a private party. NSC is required to obtain to complete its desalination plant and pipeline project. Under this new legislation, NSC may submit an unsolicited proposal for its project to Comisión Estatal de Servicios Públicos de Tijuana (“CESPT”) or to such other entity that Baja California’s government designates as competent for this purpose (the “Contracting Authority”). If the Contracting Authority deems the project feasible and the Public-Private Association Projects State Committee grants its authorization, the Contracting Authority is required to conduct a public tender process for the project. We presently cannot determine if the Contracting Authority will deem our project feasible or, if a public tender process is commenced, when such process will be completed or whether NSC will be awarded the project.

Despite the expenditures we have made and the activities we have completed to date, we may ultimately be unsuccessful in our efforts to complete this project.

We expect the fair value of our investment in OC-BVI to decrease as its sole water supply contract matures. If this decrease in fair value occurs, we will be required to record impairment losses in future periods to reduce the carrying value of our investment in OC-BVI to its decreased fair value.

We account for our investment in OC-BVI under the equity method of accounting for investments in common stock. This method requires recognition of a loss on an equity investment that is other than temporary, and indicates that a current fair value of an equity investment that is less than its carrying amount may indicate a loss in the value of the investment.

As a quoted market price for OC-BVI’s stock is not available, to test for possible impairment of our investment in OC-BVI, we estimate its fair value through the use of the discounted cash flow method, which relies upon projections of OC-BVI’s operating results, working capital and capital expenditures. The use of this method requires us to estimate OC-BVI’s cash flows from (i) its water supply agreement with the BVI government for its Bar Bay plant (the “Bar Bay agreement”); and (ii) the pending amount awarded by the Eastern Caribbean Court of Appeals for the value of the Baughers Bay plant previously transferred by OC-BVI to the BVI government (see further discussion of the Baughers Bay litigation at Item 8. - Notes to the Consolidated Financial Statements – Note 8).

We estimate the cash flows OC-BVI will receive from its Bar Bay agreement by (i) identifying various possible future scenarios for this agreement, which include the cancellation of the agreement after its initial seven-year term, and the exercise by the BVI government of the seven-year extension in the agreement; (ii) estimating the cash flows associated with each possible scenario; and (iii) assigning a probability to each scenario. We similarly estimate the cash flows OC-BVI will receive from the BVI government for the amount due under the ruling by the Eastern Caribbean Court of Appeals for the value of the Baughers Bay plant at the date it was transferred to the BVI government by assigning probabilities to different valuation scenarios. The resulting probability-weighted sum represents the expected cash flows, and our best estimate of future cash flows, to be derived by OC-BVI from its Bar Bay agreement and the pending court award.

The identification of the possible scenarios for the Bar Bay plant agreement and the Baughers Bay plant valuation, the projections of cash flows for each scenario, and the assignment of relative probabilities to each scenario all represent significant estimates made by us. While we use our best judgment in identifying these possible scenarios, estimating the expected cash flows for these scenarios and assigning relative probabilities to each scenario, these estimates are by their nature highly subjective and are also subject to material change by our management over time based upon new information or changes in circumstances.

During the fourth quarter of 2014, after reassessing and revising our probability-weighted estimates of OC-BVI's future cash flows and our resulting estimate of the fair value of our investment in OC-BVI, we determined that the carrying value of our investment in OC-BVI exceeded its fair value and recorded an impairment loss on this investment of \$860,000. The resulting \$5.2 million carrying value of our investment in OC-BVI as of December 31, 2014 assumes that the BVI government will honor its obligations under the Bar Bay agreement and also assumes (on a probability-weighted basis) that the (i) BVI government will exercise its option to extend the Bar Bay agreement for seven years beyond its initial term, which expires February 2017, and (ii) OC-BVI will receive the pending amount (as estimated by us) awarded by the Eastern Caribbean Court of Appeals for the value of the Baughers Bay plant previously transferred by OC-BVI to the BVI government.

The remaining \$5.2 million carrying value of our investment in OC-BVI as of December 31, 2014 exceeds our underlying equity in OC-BVI's net assets by approximately \$2.0 million. We account for this excess as goodwill. The BVI government is OC-BVI's sole customer and substantially all of OC-BVI's revenues are generated from its Bar Bay plant. As the Bar Bay agreement matures to its February 2017 expiration date and OC-BVI receives (or is determined by the court to not be entitled to receive) the pending court award amount assumed due for the value of the Baughers Bay plant, OC-BVI's expected future cash flows, and therefore its fair value computed under the discounted cash flow method, will decrease. Unless OC-BVI obtains an expansion or other modification of its Bar Bay agreement that results in a significant increase in the estimated future cash flows from its Bar Bay plant, we will be required to record impairment losses in 2015 and 2016 to reduce the carrying value of our investment in OC-BVI to its then current fair value. These impairment losses will, in the aggregate, at least equal the underlying \$2.0 million in goodwill reflected in the carrying value of our investment in OC-BVI. The losses we record for our investment in OC-BVI in the future will exceed this \$2.0 million if OC-BVI ultimately ceases operations at its Bar Bay plant, as OC-BVI will be required to record an impairment loss to reduce the carrying value of its Bar Bay plant to its then estimated fair value. OC-BVI's aggregate carrying value of the assets that comprise its Bar Bay plant was approximately \$5.1 million as of December 31, 2014. Future impairment losses for our investment in OC-BVI and our equity in any future operating

losses incurred by OC-BVI could have a material adverse effect on our consolidated results of operations.

We have constructed a desalination plant in Bali, Indonesia prior to obtaining water supply agreements for its production. If we are ultimately unable to generate sufficient revenues from this plant we will be required to record an impairment loss against its carrying value.

Through our subsidiary, PT Consolidated Water Bali, we have constructed a seawater reverse osmosis (“SWRO”) plant in Nusa Dua, one of the primary tourist areas of Bali, Indonesia. Nusa Dua has a target customer profile consisting of tourist resorts and vacation/luxury residences comparable to our retail service area on Grand Cayman. We believe the water demands of these properties in Nusa Dua will soon exceed the water supplies that can be provided to the area by the local public water utility, and that other areas of Bali will also eventually experience fresh water shortages. However, as SWRO has not been employed to any meaningful extent in Bali, we concluded that to obtain customers in Bali we must first demonstrate the viability of SWRO as well as our capabilities and expertise. Consequently, we elected to construct this plant before obtaining water supply agreements for its production. As of December 31, 2014, the capitalized costs for this plant reflected on our consolidated balance sheet were approximately \$3.3 million. If we are ultimately unable to generate sufficient revenues from this plant we will be required to record an impairment loss against its carrying value. Such impairment loss could have a material adverse impact on our results of operations.

We do not have voting control over our affiliate, OC-BVI. Should our interests and the interests of OC-BVI’s other voting shareholder diverge, the operations of OC-BVI could be adversely affected which could decrease the value of our investment in OC-BVI.

We own 43.5% of the equity and 50% of the voting shares of OC-BVI. We and Sage, which owns the remaining 50% of the voting shares, are each entitled to appoint three of the six directors of OC-BVI. If a tie vote of the directors occurs on any matter, the president of the Caribbean Water and Wastewater Association, a regional trade association comprised primarily of government representatives, is entitled to appoint a temporary director to cast the deciding vote. As a result, although we provide operating management and engineering services to OC-BVI, we share the overall management of OC-BVI with Sage and do not fully control its operations. A divergence of our interests and the interests of Sage could adversely affect the operations of OC-BVI and in turn decrease the value of our investment in OC-BVI, in which case we could be required to record an impairment charge to reduce the carrying value of our investment in OC-BVI. Such an impairment charge would reduce our earnings and could have a significant adverse impact on our result of operations and financial condition.

The profitability of our plants is dependent upon our ability to accurately estimate the costs of their construction and operation.

The cost estimates we prepare in connection with the construction and operation of our plants are subject to inherent uncertainties. Additionally, the terms of our supply contracts may require us to guarantee the price of water on a per unit basis, subject to certain annual inflation and monthly energy cost adjustments, and to assume the risk that the costs associated with producing this water may be greater than anticipated. Because we base our contracted price of water in part on our estimation of future construction and operating costs, the profitability of our plants is dependent on our ability to estimate these costs accurately. The cost of materials and services and the cost of the delivery of such services may increase significantly after we submit our bid for a plant, which could cause the gross profit and net return on investment for a plant to be less than we anticipated when the bid was made. The profit margins we initially expect to generate from a plant could be further reduced if future operating costs for that plant exceed our estimates of such costs. These future operating costs could be affected by a variety of factors, including lower than anticipated production efficiencies and hydrological conditions at the plant site that differ materially from those we believe would exist at the time we submitted our bid. Any construction and operating costs for our plants that significantly exceed our initial estimates could adversely affect our results of operations, financial condition and cash flows.

A significant portion of our consolidated revenues are derived from two customers. A loss of, or a less favorable relationship with, either of these customers could adversely affect us.

Our top two bulk water customers, the Water Authority-Cayman and the Water and Sewerage Corporation of The Bahamas, accounted for approximately 15% and 40%, respectively, of our consolidated revenues for the year ended December 31, 2014. If either of these customers terminate or decide not to renew their contracts with us, or renew such contracts on terms that are less favorable to us, or become unable for financial or other reasons to comply with the terms of our contracts with them, our results of operations, cash flows and financial condition could be adversely affected.

Possible future regulatory oversight and control could adversely impact our Belize operations.

By Statutory Instrument No. 81 of 2009, the Minister of Public Utilities of the government of Belize published an order, the Public Utility Provider Class Declaration Order, 2009 (the "Order"), which as of May 1, 2009 designated CW-Belize as a public utility provider under the laws of Belize. With this designation, the Public Utilities Commission of Belize (the "PUC") has the authority to set the rates charged by CW-Belize and to otherwise regulate its activities. On November 1, 2010, CW-Belize received a formal complaint from the PUC alleging that CW-Belize was operating without a license under the terms of the Water Industry Act. CW-Belize applied for this license in December 2010. On July 29, 2011, the PUC issued the San Pedro Public Water Supply Quality and Security Complaint Order (the "Second Order") which among other things requires that (i) CW-Belize and its customer jointly make a submission to the responsible Minister requesting that the area surrounding CW-Belize's seawater abstraction wells be designated

a forest reserve or national park and be designated a Controlled Area under section 58 of the Water Industry Act, (ii) CW-Belize submit an operations manual for CW-Belize's desalination plant to the PUC for approval, (iii) CW-Belize and its customer modify the water supply agreement between the parties to (a) include new water quality parameters included in the Order and (b) cap the current exclusive water supply arrangement in the agreement at a maximum of 450,000 gallons per day, (iv) CW-Belize keep a minimum number of replacement seawater RO membranes in stock at all times and (v) CW-Belize take possession of and reimburse the PUC for certain equipment which the PUC purchased from a third-party in late 2010. CW-Belize has applied for declaratory judgment and has been granted a temporary injunction to stay the enforcement of the Second Order by the PUC until such time as the matter could be heard by the Belize courts. The initial hearing on this matter was conducted on October 30 and 31, 2012 with an additional hearing on November 29, 2012. The ruling on this case is pending. An unfavorable ruling on the Order or the Second Order could have an adverse impact on our results of operations, cash flows or financial condition.

Our operations are affected by tourism and are subject to seasonal fluctuations which could affect the demand for our water.

Our operations are affected by the levels of tourism and are subject to seasonal variations in our service areas. Demand for our water in the Cayman Islands, Belize, Bimini and The Bahamas is affected by variations in the level of tourism and local weather, primarily rainfall. Tourism in our service areas is affected by the economies of the tourists' home countries, primarily the United States and Europe, terrorist activity and perceived threats thereof, and increased costs of fuel and airfares. We normally sell more water during the first and second quarters, when the number of tourists is greater and local rainfall is less, than in the third and fourth quarters. A downturn in tourism or greater than expected rainfall in the locations we serve could adversely affect our revenues, cash flows and results of operations.

We may have difficulty accomplishing our growth strategy within and outside of our current operating areas.

Our expansion both within our current operating areas and into new areas involves significant risks, including, but not limited to, the following:

- regulatory risks, including government relations difficulties, local regulations, currency controls and fluctuations in currency exchange rates;
 - receiving and maintaining necessary permits, licenses and approvals;
- political instability, reliance on local economies, environmental problems, shortages of materials, immigration restrictions and limited skilled labor;
- risks related to development of new operations, including inaccurate assessment of the demand for water, engineering difficulties and inability to begin operations as scheduled; and
- risks relating to greater competition in these new territories, including the ability of our competitors to gain or retain market share by reducing prices.

Even if we successfully expand our operations, we may have difficulty managing our growth. We cannot assure you that any new operations within or outside of our current operating areas will attain or maintain profitability or that the results from these new operations will not adversely impact our results of operations, cash flows and financial condition.

Production shortfalls under any of our bulk supply contracts could result in penalties or cancellation of the contract.

Our bulk water supply contracts require us to deliver specified minimum volumes of water. Membrane fouling or other technical problems could occur at any of our plants, and if we are unable to meet the production minimums due to such operating issues, we could be in technical default of the supply contract and subject to various adverse consequences, including financial penalties or cancellation of the contract.

Our operations could be harmed by hurricanes or tropical storms.

A hurricane or tropical storm could cause major damage to our equipment and properties and the properties of our customers, including the large tourist properties in our areas of operation. For example, in September 2004 Hurricane Ivan caused significant damage to our plants and our customers' properties, which adversely affected our revenues. Any future damage could cause us to lose use of our equipment and properties and incur additional repair costs. Damage to our customers' properties and the adverse impact on tourism could result in a decrease in water demand. A

hurricane or tropical storm could also disrupt the delivery of equipment and supplies, including electricity, necessary to our operations. These and other possible effects of hurricanes or tropical storms could have an adverse impact on our results of operations, cash flows and financial condition.

Contamination of our processed water may cause disruption in our services and adversely affect our revenues.

Our processed water may become contaminated by natural occurrences and by inadvertent or intentional human interference, including acts of terrorism. In the event that a portion of our processed water is contaminated, we may have to interrupt the supply of water until we are able to install treatment equipment or substitute the flow of water from an uncontaminated water production source. In addition, we may incur significant costs in order to treat a contaminated source of plant feed water through expansion of our current treatment facilities, or development of new treatment methods. An inability by us to substitute processed water from an uncontaminated water source or to adequately treat the contaminated plant feed water in a cost-effective manner may have an adverse effect on our results of operations, cash flows and financial condition.

Potential government decisions, actions and regulations could negatively affect our operations.

We are subject to the local regulations of the Cayman Islands, Belize, the British Virgin Islands, and The Bahamas, all of which are subject to change. Any government that regulates our operations may issue legislation or adopt new regulations, including but not limited to:

- - restricting foreign ownership (by us);
 - providing for the expropriation of our assets by the government;
- providing for nationalization of public utilities by the government;
 - providing for different water quality standards;
- unilaterally changing or renegotiating our licenses and agreements;
 - restricting the transfer of U.S. currency; or
- causing currency exchange fluctuations/devaluations or making changes in tax laws.

As new laws and regulations are issued, we may be required to modify our operations and business strategy, which we may be unable to do in a cost-effective manner. Failure by us to comply with applicable regulations could result in the loss of our licenses or authorizations to operate, the assessment of penalties or fines, or otherwise may have a material adverse effect on our results of operations.

The rates we charge our retail customers in the Cayman Islands are subject to regulation. If we are unable to obtain government approval of our requests for rate increases, or if approved rate increases are untimely or inadequate to cover our projected expenses, our results of operations may be adversely affected.

Under our exclusive retail license in the Cayman Islands, with the exception of annual inflation-related and monthly energy-related adjustments, we cannot increase the base rates we charge our retail customers without prior approval from the Cayman Islands government. However, the expenses we incur in supplying water under this license may increase due to circumstances that were unforeseen at the time we entered into the license. We may incur additional costs in attempting to obtain government approval of any rate increase, which may be granted on a delayed basis, if at all. Failure to obtain timely and adequate rate increases could have an adverse effect on our results of operations, cash flows and financial condition.

We rely on the efforts of key employees. Our failure to retain these employees could adversely affect our results of operations.

Our success depends upon the abilities of our executive officers. In particular, the loss of the services of Frederick W. McTaggart, our President and Chief Executive Officer, could be detrimental to our operations and our continued success. Mr. McTaggart has an employment agreement expiring on December 31, 2017. Each year, the term of this agreement may be extended for an additional year. However, we cannot guarantee that Mr. McTaggart will continue to work for us during the term of his agreement or will enter into any extensions thereof.

We are exposed to credit risk through our relationships with several customers.

We are subject to credit risk posed by possible defaults in payment by our bulk water customers in the Cayman Islands, Belize, the British Virgin Islands and The Bahamas and by possible defaults in payment by the Water Authority-Cayman on their loans payable to us. Adverse economic conditions affecting, or financial difficulties of, those parties could impair their ability to pay us or cause them to delay payment. We depend on these parties to pay us on a timely basis. Our outstanding accounts receivable are not covered by collateral or credit insurance. Any delay or default in payment could adversely affect our results of operations, cash flows, and financial condition.

We are exposed to the risk of variations in currency exchange rates.

Although we report our results in United States dollars, the majority of our revenues are earned in other currencies. Although many of these currencies have been fixed to the United States dollar for more than 20 years, other currencies (e.g. the Mexico peso, Indonesian rupiah and the euro) are not. We do not employ hedging strategies against the foreign currency exchange rate risk associated with conducting business in foreign currencies while reporting in United States dollars. If any of the fixed exchange rates becomes a floating exchange rate, or the other currencies in which we conduct business depreciate significantly against the United State dollar, our results of operations, cash flows and financial condition could be adversely affected.

We may enter new markets in the future in which we do not have a contractual commitment for our products or existing customers.

Our strategy contemplates potential entry into new markets (such as Mexico, Indonesia and other countries) where we believe a demand for potable water exists beyond the current supply of potable water in those markets. We may incur significant business development expenses in the pursuit of new markets prior to obtaining a contract for services in these markets, and such expenses could have an adverse impact on our results of operations and cash flows. We may decide to enter such markets by building new reverse osmosis desalination plants before we have obtained a contract for the sale of water produced by the new plant or before we have established a customer base for the water produced by the new plant. If after completing such plant we are unable to obtain a contract or sufficient number of customers for the plant, we may be unable to recover the cost of our investment in the plant, which could have a material adverse effect on our results of operations, cash flows and financial condition.

We may not pay dividends in the future. If dividends are paid, they may be in lesser amounts than past dividends.

Our shareholders may receive dividends out of legally available funds if, and when, they are declared by our Board of Directors. We have paid dividends in the past, but may cease to do so at any time. We may incur increased operating or development expenses or capital requirements or additional indebtedness in the future that may restrict our ability to declare and pay dividends. We may also be restricted from paying dividends in the future due to restrictions imposed by applicable corporate laws, our results of operations, cash flows and financial condition, covenants contained in our financing agreements, and other factors considered by our Board of Directors. We may not continue to pay dividends in the future or, if dividends are paid, they may not be in amounts similar to past dividends.

Service of process and enforcement of legal proceedings commenced against us in the United States may be difficult to obtain.

We are incorporated under the laws of the Cayman Islands and most of our assets are located outside of the United States. In addition, 10 of our 16 directors and executive officers reside outside the United States. As a result, it may be difficult for investors to affect service of process within the United States upon us and such other persons, or to enforce judgments obtained against such persons in United States courts, and bring any action, including actions predicated upon the civil liability provisions of the United States securities laws. In addition, it may be difficult for investors to enforce, in original actions brought in courts or jurisdictions located outside of the United States, rights predicated upon the United States securities laws.

Based on the advice of our Cayman Islands legal counsel, we believe there is no reciprocal statutory enforcement of foreign judgments between the United States and the Cayman Islands, and that foreign judgments originating from the United States are not directly enforceable in the Cayman Islands. A prevailing party in a United States proceeding against us or our officers or directors would have to initiate a new proceeding in the Cayman Islands using the United States judgment as evidence of the party's claim. A prevailing party could rely on the summary judgment procedures available in the Cayman Islands, subject to available defenses in the Cayman Islands courts, including, but not limited to, the lack of competent jurisdiction in the United States courts, lack of due service of process in the United States proceeding and the possibility that enforcement or recognition of the United States judgment would be contrary to the public policy of the Cayman Islands.

Depending on the nature of damages awarded, civil liabilities under the Securities Act of 1933, as amended (or the Securities Act), or the Securities Exchange Act of 1934, as amended (or the Exchange Act), for original actions instituted outside the Cayman Islands may or may not be enforceable. For example, a United States judgment awarding remedies unobtainable in any legal action in the courts of the Cayman Islands, such as treble damages, would likely not be enforceable under any circumstances.

The relatively low trading volume of our stock may adversely impact your sales of our shares.

During the year ended December 31, 2014, the average daily trading volume of our common shares was approximately 118,000 shares, a much lower trading volume than that of many other companies listed on the NASDAQ Global Select Market. A public trading market having the desired characteristics of depth, liquidity and orderliness depends on the presence in the market of willing buyers and sellers of our common shares at any given time. This presence in turn depends on the individual decisions of investors and general economic and market conditions over which we have no control. As a consequence of the limited volume of trading in our common shares, an investor in our stock may have difficulty selling a large number of our common shares in the manner, or at the price, that might be attainable if our common shares were more actively traded.

We are subject to anti-takeover measures that may discourage, delay or prevent a change of control of our Company.

Classified Board of Directors. We have a classified Board of Directors that consists of three groups. Only one group of directors is elected each year. Our classified Board may increase the length of time necessary for an acquirer to change the composition of a majority of directors in order to gain control of our Board.

Option Deed. We are party to an Option Deed that is intended to improve the bargaining position of our Board of Directors in the event of an unsolicited offer to acquire our outstanding stock. Under the terms of the Option Deed, a stock purchase right is attached to each of our current or future outstanding common shares and redeemable preferred shares issued prior to the time the purchase rights become exercisable, are redeemed or expire. The purchase rights will become exercisable only if an individual or group has acquired, or obtained the right to acquire, or announced a tender or exchange offer that if consummated would result in such individual or group acquiring, beneficial ownership of 20% or more of our outstanding common shares. Upon the occurrence of a triggering event, the rights will entitle every holder of our shares, other than the acquirer, to purchase our shares or shares of our successor on terms that would likely be economically dilutive to the acquirer. Under certain circumstances, instead of common shares, our Board of Directors may issue cash or debt securities. Our Board of Directors, however, has the power to amend the Option Deed so that it does not apply to a particular acquisition proposal or to redeem the rights for a nominal value before they become exercisable. These features will likely encourage an acquirer to negotiate with our Board of Directors before commencing a tender offer or to condition a tender offer on our Board of Directors taking action to prevent the purchase rights from becoming exercisable. In March 2007, our Board extended the expiration date of the Option Deed through July 2017.

As a result of these anti-takeover measures, we could deter efforts to make changes to, or exercise control over, current management. In addition, our shareholders may not have an opportunity to sell their common shares to a potential acquirer at the acquirer's offering price, which is typically at a premium to market price.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Cayman Island Properties

Abel Castillo Water Works

Our wholly owned subsidiary, Cayman Water, owns and operates our Abel Castillo Water Works (“ACWW”) site, which encompasses 12,812 square feet of buildings (containing two reverse osmosis water treatment plants), a high service distribution pump house, warehouse space and three 1.0 million gallon potable water storage tanks. The site is located on 3.2 acres, including 485 feet of waterfront. The current water production capacity of this site is 2.2 million gallons per day by two separate water plants with rated production capacities of 1.2 million and 1.0 million gallons per day, respectively.

We own an approximately one acre property adjacent to our ACWW plant which we purchased in 2007 to provide space for future additional water production and storage facilities.

West Bay Plant

We own, operate and maintain our West Bay plant in Grand Cayman, which is located on 6.1 acres in West Bay. The plant began operating in 1995, was expanded over the years, and now has a production capacity of 910,000 gallons per day. On this site we have a 2,600 square foot building which houses our water production facilities, a 2,400 square foot building which houses the potable water distribution pumps, a water quality testing laboratory, and office space and water storage capacity consisting of three 1.0 million gallon potable water tanks.

Britannia Plant

We own the Britannia seawater desalination plant in Grand Cayman, which consists of a seawater reverse osmosis production plant with a capacity of 715,000 gallons of water per day, an 840,000 gallon potable water storage tank, potable water high service pumps, and various ancillary equipment to support the operation. We have entered into a lease of the 0.73 acre site and steel frame building which houses the plant for a term that ends in 2027 at an annual rent of \$1.00.

Distribution System

We own our Seven Mile Beach and West Bay potable water distribution systems in Grand Cayman. The combined systems consist of potable water pipes, valves, curb stops, meter boxes, and water meters.

Corporate Office

We occupy approximately 5,500 square feet of office space at the Regatta Office Park, West Bay Road, Grand Cayman, Cayman Islands under a lease that expires April 30, 2019.

Red Gate Plant

Under the terms of the water production and supply license that expires in July 2017 between OC-Cayman and the government of the Cayman Islands, OC-Cayman is allowed to use the property and the plant for the Red Gate plant to produce approximately 1.3 million gallons of desalinated water per day for sale to the Water Authority-Cayman.

North Sound Plant

Construction of this plant was completed in November 2002. OC-Cayman provided the plant and equipment to the Water Authority-Cayman (“WAC”) under a seven-year vendor-financed sale and operating agreement. OC-Cayman operates the electrically powered plant and supplies approximately 1.6 million gallons of desalinated water per day to the WAC. OC-Cayman leases the property on which the plant is located from the WAC for a minimal annual rent, for the duration of the sale and operating agreement. The sale and operating agreement and property lease expires April 1, 2015. Responsibility for operation of the plant passes to the WAC upon expiration of the sale and operating agreement.

North Side Water Works Plant

OC-Cayman operates this electrically powered plant, which can supply up to approximately 2.4 million gallons of desalinated water per day under a vendor-financed sale and operating agreement with the WAC. OC-Cayman leases the property on which the plant is located from the WAC for a minimal annual rent for the duration of the sale and operating agreement. Responsibility for operation of the plant passes to the Water Authority-Cayman upon expiration of the sale and operating agreement in June 2019.

Bahamas Properties

Bimini plant

We own the water production facility in South Bimini. The facility consists of a 250,000 gallon bolted steel potable water tank and two 40 foot long standard shipping containers which contain a seawater reverse osmosis production plant with a rated capacity of 115,000 gallons per day, a high service pump skid and an office. The facility is located on a parcel of land owned by South Bimini International Ltd., and we are allowed, under the terms of our agreement, to utilize the land for the term of the agreement without charge.

Windsor plant

We own the Windsor water production facility, located in Nassau, New Providence, with a production capacity of 3.1 million gallons per day. The plant is powered by a combination of diesel engine-driven high-pressure pumps, and electrical power purchased from the Bahamas Electricity Corporation to power all other loads in the plant. The plant is contained within a 13,000 sq. ft. concrete and steel building that also contains a warehouse, workshop and offices. It is located on land owned by the Water and Sewerage Corporation of The Bahamas and our 15-year water sales agreement gives us a license to use the land throughout the term of that agreement. This water supply agreement was scheduled to expire in July 2013 when we delivered the total amount of water required under the agreement, but has since been extended on a month-to-month basis.

At the conclusion of the agreement, the WSC has the option to (i) extend the agreement for an additional five years at a rate to be negotiated; (ii) exercise a right of first refusal to purchase any materials, equipment and facilities that CW-Bahamas intends to remove from the site at a purchase price to be negotiated; or (iii) require CW-Bahamas to remove all materials, equipment and facilities from the site. At the request of the government of The Bahamas, we continue to maintain and operate the Windsor plant to provide the government of The Bahamas with additional time to decide whether or not it will extend CW-Bahamas' water supply agreement for the Windsor plant on a long term basis.

Blue Hills plant

In July 2006, we substantially completed construction of a second water production facility in Nassau, New Providence: the Blue Hills plant. With a production capacity of 7.2 million gallons per day this plant is the largest desalination plant we have built or operated to date. The plant is powered by a combination of diesel engine-driven high-pressure pumps, and electrical power purchased from the Bahamas Electricity Corporation to power all other loads in the plant. The plant is contained within a 16,000 sq. ft. concrete and steel building that also contains a warehouse, workshop and offices. It is located on land owned by the Water and Sewerage Corporation of The Bahamas and our 20-year water sales agreement gives us a license to use the land throughout the term of that agreement.

The Blue Hills plant water supply agreement was amended in January 2011 and extended through 2032. Pursuant to this amendment, we increased the production capacity of the Blue Hills plant to 12.0 million gallons per day. The plant expansion was substantially completed in March of 2012 and is powered by a combination of diesel engine-driven high-pressure pumps, and electrical power purchased from the Bahamas Electricity Corporation to power all other loads in the plant. The plant is contained in a 10,640 sq. ft. steel building which is also located on land owned by the WSC.

Belize Properties

We own our San Pedro water production facility in Ambergris Caye, Belize. The plant consists of a one story concrete block building, which contains a seawater reverse osmosis water production plant with a production capacity of 600,000 gallons per day and a 1.0 million gallon potable water storage tank. We lease the land on which our plant is located from the Government of Belize at an annual rent of BZE\$1.00. This lease expires in April 2026.

Indonesia Property

We own a water production facility located in the Nusa Dua region of Bali, Indonesia consisting of a plant with a production capacity of 790,000 gallons per day and a 528,000 gallon potable water storage tank. The land on which this plant and storage tank is located is leased through September 8, 2032.

U.S. Properties

Our Aquilex office consists of 6,500 square feet located in Coral Springs, Florida that has been leased through May 2016. Our U.S. warehouse consists of 4,100 square feet located in Sunrise, Florida that has been leased through October 2015.

Mexico Properties

NSC owns 20.1 hectares of land on which its proposed plant would be constructed in Rosarito Beach, Baja California, Mexico.

NSC has entered into a 20-year lease, effective November 2012, with the Comisión Federal de Electricidad for approximately 5,000 square meters of land on which it plans to construct the water intake and discharge works for the plant. The amounts due on this lease are payable in Mexican pesos at an amount that is currently equivalent to approximately \$20,000 per month. This lease is cancellable should NSC ultimately not proceed with the project.

ITEM 3. LEGAL PROCEEDINGS

CW-Belize

By Statutory Instrument No. 81 of 2009, the Minister of Public Utilities of the government of Belize published an order, the Public Utility Provider Class Declaration Order, 2009 (the “Order”), which as of May 1, 2009 designated CW-Belize as a public utility provider under the laws of Belize. With this designation, the Public Utilities Commission of Belize (the “PUC”) has the authority to set the rates charged by CW-Belize and to otherwise regulate its activities. On November 1, 2010, CW-Belize received a formal complaint from the PUC alleging that CW-Belize was operating without a license under the terms of the Water Industry Act. CW-Belize applied for this license in December 2010. On July 29, 2011, the PUC issued the San Pedro Public Water Supply Quality and Security Complaint Order (the “Second Order”) which among other things requires that (i) CW-Belize and its customer jointly make a submission to the responsible Minister requesting that the area surrounding CW-Belize’s seawater abstraction wells be designated a forest reserve or national park and be designated a Controlled Area under section 58 of the Water Industry Act, (ii) CW-Belize submit an operations manual for CW-Belize’s desalination plant to the PUC for approval, (iii) CW-Belize and its customer modify the water supply agreement between the parties to (a) include new water quality parameters included in the Order and (b) cap the current exclusive water supply arrangement in the agreement at a maximum of 450,000 gallons per day, (iv) CW-Belize keep a minimum number of replacement seawater RO membranes in stock at all times and (v) CW-Belize take possession of and reimburse the PUC for certain equipment which the PUC purchased from a third-party in late 2010. CW-Belize has applied for declaratory judgment and has been granted a temporary injunction to stay the enforcement of the Second Order by the PUC until such time as the matter could be heard by the Belize courts. The initial hearing on this matter was conducted on October 30 and 31, 2012 with an additional hearing on November 29, 2012. The ruling on this case is pending. We are presently unable to determine what impact the Order and the Second Order will have on our results of operations, financial position or cash flows.

N.S.C. Agua, S.A. de C.V.

The Mexico tax authority, the Servicio de Administracion Tributaria (“SAT”), has assessed NSC 3,184,745 Mexican pesos for taxes relating to payments to foreign vendors on which the SAT contends should have been subject to income tax withholdings during the 2011 tax year of N.S.C. Agua, S.A. de C.V., (“NSC”). The SAT has also assessed NSC 1,639,001 Mexican pesos in penalties and 913,711 Mexican pesos in surcharges on these payments bringing the total assessment to 5,737,457 Mexican pesos. Such assessment is equivalent to approximately \$390,000 as of December 31, 2014 based upon the exchange rate between the US\$ and the Mexican peso as of that date.

NSC has retained the assistance of Mexican tax advisers in this matter and believes the assumptions and related work performed by the SAT do not support their tax assessment. As a result, NSC has elected to contest this assessment in Mexico federal tax court. NSC was required to provide an irrevocable letter of credit in the amount of 6,712,634 Mexican pesos as collateral in connection with this tax case. The letter of credit amount includes 975,177 Mexican pesos in additional charges calculated by the SAT to adjust the value of the original assessment to its potential future

value at the time when the matter is settled by the tax court.

In November 2014, NSC obtained a favorable judgment by the court. Based on this outcome, SAT filed an appeal shortly thereafter to contest the judgment.

The restricted cash balance of \$456,083 included in the accompanying consolidated December 31, 2014 balance sheet represents cash on deposit with a bank to secure payment of the irrevocable letter of credit.

We are presently unable to determine what amount, if any, of this assessment NSC will ultimately be required to pay by the Mexico federal tax court. Consequently, no provision for this potential liability has been made in our financial statements. Furthermore, if the Mexico federal tax court upholds the assessment made by the SAT for NSC's 2011 tax year, the SAT may seek to levy an assessment on payments of a similar nature made by NSC during tax years subsequent to 2011.

ITEM 4. MINE SAFETY DISCLOSURE

Not applicable.

PART II

ITEM MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS 5. AND ISSUER PURCHASES OF EQUITY SECURITIES

Market Information

Our Class A common stock is listed on the NASDAQ Global Select Market and trades under the symbol "CWCO." Listed below, for each quarter of the last two fiscal years, are the high and low closing prices for our Class A common stock on the NASDAQ Global Select Market.

	High	Low
First Quarter 2014	\$ 14.47	\$ 11.28
Second Quarter 2014	13.02	10.05
Third Quarter 2014	12.81	10.23
Fourth Quarter 2014	12.76	9.33
First Quarter 2013	\$9.90	\$7.67
Second Quarter 2013	11.43	9.05
Third Quarter 2013	14.97	11.10
Fourth Quarter 2013	16.83	10.98

No trading market exists for our redeemable preferred shares, which are only issued to, or purchased by, long-term employees of our company and must be held by these employees for a period of four years before they vest.

On December 18, 2014, we issued 5,992 shares of common stock to our directors under the Non-Executive Directors' Share Plan in consideration for their service on our Board of Directors and the committees thereof. See "ITEM 11. EXECUTIVE COMPENSATION."

We are a party to an Option Deed dated August 6, 1997, and amended on August 8, 2005, September 27, 2005 and May 30, 2007 (as amended, the "Option Deed"), designed to deter coercive takeover tactics. Pursuant to the Option Deed, we granted to the holders of our common shares and redeemable preferred shares options (the "Options") to purchase one one-hundredth of a share of our Class 'B' common shares at an exercise price of \$100.00 per one one-hundredth of a Class 'B' common share, subject to adjustment. The Options are attached to and trade with our common shares and redeemable preferred shares, and no separate certificates representing the Options have been distributed. The Options will separate from our common shares and redeemable preferred shares, and certificates

representing the Options will be issued, upon the earlier of the date (such date, the “Distribution Date”) that is (i) ten business days following a public announcement that a person or group of affiliated or associated persons (an “Acquiring Person”) has acquired, or obtained the right to acquire, beneficial ownership of 20% or more of our outstanding common shares, or (ii) ten business days following the commencement of a tender offer or exchange offer that would result in a person or group becoming an Acquiring Person.

The Options are not exercisable until the Distribution Date and will expire at the close of business on July 31, 2017, unless that date is extended or the Options are earlier redeemed by us. Additionally, following the Distribution Date, all Options that are, or in certain circumstances were, beneficially owned by any Acquiring Person will be null and void.

For a period of ten business days following the date that any person, alone or jointly with its affiliates and associates, becomes an Acquiring Person, we will have the right to redeem the Options at a price of C\$0.01 per Option. If the Options are not redeemed, then following such ten business day period each holder of an Option will have the right to receive on exercise, in lieu of one one-hundredth of a Class 'B' common share, common shares (or, in certain circumstances, cash, property or other securities) having a value equal to two times the exercise price of the Option. For example, at an exercise price of \$100.00 per Option, each Option not owned by an Acquiring Person (or by certain related parties) following any person, alone or jointly with its affiliates and associates, becoming an Acquiring Person would entitle its holder to purchase \$200.00 worth of common shares for \$100.00. Assuming that the common shares had a per share value of \$20.00 at such time, the holder of each valid Option would be entitled to purchase 10 common shares for \$100.00.

Any of the provisions of the Option Deed may be amended by our Board of Directors prior to the Distribution Date. After the Distribution Date, the provisions of the Option Deed may be amended by the Board of Directors in order to cure any ambiguity, to make changes which do not adversely affect the interests of holders of Options (excluding the interests of any Acquiring Person), or to shorten or lengthen any time period under the Option Deed.

Currently 2,023,850 Bahamian Depository Receipts (“BDRs”) that constitute ownership of 404,770 shares of our common stock are listed and traded on the Bahamian International Stock Exchange. Our common shares that underlie these BDRs are held in a custodial account in The Bahamas. The BDRs are entitled to dividend payments, if and when declared on our common shares, in proportion to their relative value to our common shares.

Holders

On March 9, 2015, we had 798 holders of record of our common stock.

Dividends

Our Board of Directors declares and approves any and all dividends.

We have paid dividends to owners of our common shares and redeemable preferred shares since we began declaring dividends in 1985. However, the payment of any future cash dividends will depend upon our earnings, financial condition, cash flows, capital requirements and other factors our Board of Directors deems relevant in determining the amount and timing of such dividends.

Listed below, for each quarter of the last two fiscal years, is the amount of dividends declared on our issued and outstanding shares of common shares and redeemable preferred shares.

	2014	2013
First Quarter	\$0.075	\$0.075
Second Quarter	0.075	0.075
Third Quarter	0.075	0.075
Fourth Quarter	0.075	0.075

Exchange Controls and Other Limitations Affecting Security Holders

Our Company is not subject to any governmental laws, decrees or regulations in the Cayman Islands which restrict the export or import of capital, or that affect the remittance of dividends, interest or other payments to non-resident holders of our securities. The Cayman Islands does not impose any limitations on the right of non-resident owners to hold or vote our common stock. There are no exchange control restrictions in the Cayman Islands.

Taxation

The Cayman Islands presently impose no taxes on profit, income, distribution, capital gains, or appreciations of our Company and no taxes are currently imposed in the Cayman Islands on profit, income, capital gains, or appreciations of the holders of our securities or in the nature of estate duty, inheritance, or capital transfer tax. The United States and the Cayman Islands do not have an income tax treaty.

The information required by Item 201(d) of Regulation S-K is provided under ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS of this Annual Report.

ITEM 6. SELECTED FINANCIAL DATA

The table below contains selected financial data, derived from our audited consolidated financial statements for each of the years in the five-year period ended December 31, 2014. Our consolidated financial statements are prepared in accordance with the accounting principles generally accepted in the United States of America (“US-GAAP”). As a result, all financial information presented herein has been prepared in accordance with US-GAAP. This selected financial data should be read in conjunction with “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and with our consolidated financial statements and related notes thereto contained elsewhere in this Annual Report.

	Year Ended December 31,				
	2014	2013	2012	2011	2010
Statement of Income Data:					
Revenue	\$65,559,078	\$63,822,131	\$65,450,702	\$55,154,492	\$50,708,554
Net Income	6,265,358	8,594,519	9,315,514	6,113,218	6,292,025
Balance Sheet Data:					
Total Assets	160,459,831	165,364,854	150,449,086	160,859,431	152,201,566
Long Term Debt Obligations (including current portion)	-	15,255,167	6,852,660	24,383,794	18,306,785
Demand loan payable	9,000,000	-	-	-	-
Redeemable Preferred Stock	22,104	22,445	18,159	13,456	10,070
Non-controlling interests	2,933,496	2,599,258	1,927,214	1,556,529	1,600,167
Dividends Declared Per Share	\$0.30	\$0.30	\$0.30	\$0.30	\$0.30
Basic Earnings Per Share	\$0.43	\$0.59	\$0.64	\$0.42	\$0.43
Weighted Average Number of Shares	14,697,896	14,633,884	14,578,518	14,560,259	14,547,065
Diluted Earnings Per Share	\$0.42	\$0.58	\$0.64	\$0.42	\$0.43
Weighted Average Number of Shares	14,764,323	14,703,880	14,606,148	14,596,013	14,597,894

ITEM 7. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**Overview**

Our objective is to provide water services in areas where the supply of potable water is scarce and where the use of reverse osmosis technology to produce potable water is economically feasible.

We intend to increase revenues by developing new business opportunities both within our current service areas and in new markets. We expect to maintain operating efficiencies by continuing to properly execute our water production,

energy recovery, equipment maintenance and water loss mitigation programs. We believe that many water scarce countries in the Caribbean basin and other select markets present opportunities for our business model.

Our operations and activities, and those of our affiliate OC-BVI, are presently conducted at 14 plants in five countries: the Cayman Islands, The Bahamas, Belize, the British Virgin Islands and Indonesia. The following table sets forth the comparative combined production capacity of our retail, bulk and affiliate operations as of December 31 of each year.

Comparative Operations

2014			2013		
Location	Plants	Capacity ⁽¹⁾	Location	Plants	Capacity ⁽¹⁾
Cayman Islands	7	9.1	Cayman Islands	7	9.1
Bahamas	3	15.2	Bahamas	3	15.2
Belize	1	0.6	Belize	1	0.6
British Virgin Islands	2	0.8	British Virgin Islands	2	0.8
Bali, Indonesia	1	0.8	Bali, Indonesia	1	0.3
	14	26.5		14	26.0

(1)

In millions of gallons per day.

Cayman Islands

We have been operating our business on Grand Cayman since 1973 and have been using reverse osmosis technology to convert seawater to potable water since 1989. The Cayman Islands have a limited natural supply of fresh water. We currently have an exclusive license from the Cayman Islands government to process potable water from seawater and then sell and distribute that water by pipeline to the Seven Mile Beach and West Bay areas of Grand Cayman. Our operations consist of seven reverse osmosis seawater conversion plants which provide water to approximately 5,300 retail residential and commercial customers within a government licensed area and bulk water sales to the Water Authority-Cayman (“WAC”). Our pipeline system in the Cayman Islands covers the Seven Mile Beach and West Bay areas of Grand Cayman and consists of approximately 90 miles of potable water pipe.

Our exclusive license from the Cayman Islands government was set to expire on July 30, 2010, however we and the Cayman Islands government have extended the license several times in order to provide sufficient time to negotiate the terms of a new license. The most recent extension of our license expires June 30, 2015. In 2011, the Cayman Islands government enacted new water regulation laws pursuant to which the WAC will issue any new retail license. We have been informed during our retail license negotiations that the Cayman Islands government seeks to restructure the terms of our license to employ a rate of return on invested capital model, the implementation of which could significantly reduce the operating income and cash flows we have historically generated from our retail license. See further discussion of this matter at ITEM 1A. RISK FACTORS and ITEM 7. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - Material Commitments, Expenditures and Contingencies – *Renewal of Retail License*.

The Bahamas

CW-Bahamas produces potable water from three reverse osmosis seawater conversion plants. Two of these plants, the Windsor plant and the Blue Hills plant, are located in Nassau, New Providence and have a total installed capacity of 15.1 million gallons per day. CW-Bahamas supplies water from these plants on a take-or-pay basis to the Water and Sewerage Corporation of The Bahamas (“WSC”) under long-term build, own and operate supply agreements. During 2014, we supplied approximately 3.8 billion gallons (2013: 4.6 billion gallons) of water to the WSC from these plants. The Windsor water supply agreement expired in July 2013, however we continue to supply water from this plant while the Bahamas government determines whether or not to enter into a new supply contract with us. CW-Bahamas’ third plant is located in Bimini, has a capacity of 115,000 gallons per day, and provides potable water to the Bimini Sands Resort and to the Bimini Beach Hotel. We have also sold water intermittently to the WSC from our Bimini plant when their regular supply was unavailable.

From time to time, CW-Bahamas has experienced delays in collecting its accounts receivable. During 2014, the government of the Bahamas made significant incremental payments and as a result, CW-Bahamas’ accounts receivable from the WSC was reduced to approximately \$7.0 million as of December 31, 2014. Representatives of the Bahamas

government have informed us that previous delays in paying our accounts receivables do not reflect any type of dispute with us with respect to the amounts owed, and that the amounts will ultimately be paid in full. To date, we have not been required to provide an allowance for any delinquent CW-Bahamas accounts receivable as such amounts were eventually paid in full. We believe that the accounts receivable from the WSC are fully collectible and therefore have not provided any allowance for possible non-payment of these receivables as of December 31, 2014.

Belize

CW-Belize was acquired on July 21, 2000, and consists of one reverse osmosis seawater conversion plant on Ambergris Caye, Belize, capable of producing 600,000 gallons per day. We sell water to one customer, Belize Water Services Limited, which then distributes the water through its own distribution system to residential, commercial and tourist properties on Ambergris Caye.

In 2009, the Minister of Public Utilities of the government of Belize published a declaratory order designating CW-Belize as a public utility provider. With this order the Public Utilities Commission of Belize (“PUC”) has the authority to regulate CW-Belize’s activities. In 2011, the PUC issued a second order that requires CW-Belize to take various actions mandated by the PUC that would be significant to its operations. Hearings on this matter have been conducted in a Belize court and the ruling on the matter is pending. See further discussion of this matter at ITEM 1A. RISK FACTORS.

Critical Accounting Estimates

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Our actual results could differ significantly from such estimates and assumptions.

Certain of our accounting estimates or assumptions constitute “critical accounting estimates” for us because:

- the nature of these estimates or assumptions is material due to the levels of subjectivity and judgment necessary to account for highly uncertain matters or the susceptibility of such matters to change; and

- the impact of the estimates and assumptions on financial condition and results of operations is material.

Our critical accounting estimates relate to the valuation of our (i) equity investment in our affiliate, OC-BVI; and (ii) goodwill and intangible assets.

Valuation of Investment in OC-BVI. We account for our investment in OC-BVI under the equity method of accounting for investments in common stock. This method requires recognition of a loss on an equity investment that is other than temporary, and indicates that a current fair value of an equity investment that is less than its carrying amount may indicate a loss in the value of the investment. We evaluate the possible impairment of our investment in OC-BVI as part of our reporting process for the fourth quarter of each fiscal year.

As a quoted market price for OC-BVI's stock is not available, to test for possible impairment of our investment in OC-BVI, we estimate its fair value through the use of the discounted cash flow method, which relies upon projections of OC-BVI's operating results, working capital and capital expenditures. The use of this method requires us to estimate OC-BVI's cash flows from (i) its water supply agreement with the BVI government for its Bar Bay plant (the "Bar Bay agreement"); and (ii) the pending amount awarded by the Eastern Caribbean Court of Appeals for the value of the Baughers Bay plant previously transferred by OC-BVI to the BVI government (see further discussion of the Baughers Bay litigation at Item 8. - Notes to the Consolidated Financial Statements – Note 8).

We estimate the cash flows OC-BVI will receive from its Bar Bay agreement by (i) identifying various possible future scenarios for this agreement, which include the cancellation of the agreement after its initial seven-year term, and the exercise by the BVI government of the seven-year extension in the agreement; (ii) estimating the cash flows associated with each possible scenario; and (iii) assigning a probability to each scenario. We similarly estimate the cash flows OC-BVI will receive from the BVI government for the amount due under the ruling by the Eastern Caribbean Court of Appeals for the value of the Baughers Bay plant at the date it was transferred to the BVI government by assigning probabilities to different valuation scenarios. The resulting probability-weighted sum represents the expected cash flows, and our best estimate of future cash flows, to be derived by OC-BVI from its Bar Bay agreement and the pending court award.

The identification of the possible scenarios for the Bar Bay plant agreement and the Baughers Bay plant valuation, the projections of cash flows for each scenario, and the assignment of relative probabilities to each scenario all represent significant estimates made by us. While we use our best judgment in identifying these possible scenarios, estimating the expected cash flows for these scenarios and assigning relative probabilities to each scenario, these estimates are by their nature highly subjective and are also subject to material change by our management over time based upon new information or changes in circumstances.

During the fourth quarter of 2014, after reassessing and revising our probability-weighted estimates of OC-BVI's future cash flows and our resulting estimate of the fair value of our investment in OC-BVI, we determined that the carrying value of our investment in OC-BVI exceeded its fair value and recorded an impairment loss on this investment of \$860,000. The resulting \$5.2 million carrying value of our investment in OC-BVI as of December 31, 2014 assumes that the BVI government will honor its obligations under the Bar Bay agreement and also assumes (on a probability-weighted basis) that (i) the BVI government will exercise its option to extend the Bar Bay agreement for seven years beyond its initial term, which expires in February 2017 and (ii) OC-BVI will receive the pending amount (based upon our estimate) awarded by the Eastern Caribbean Court of Appeals for the value of the Baughers Bay plant previously transferred by OC-BVI to the BVI government.

The \$5.2 million carrying value of our investment in OC-BVI as of December 31, 2014 exceeds our underlying equity in OC-BVI's net assets by approximately \$2.0 million. We account for this excess as goodwill. The BVI government is OC-BVI's sole customer and substantially all of OC-BVI's revenues are generated from its Bar Bay plant. As the Bar Bay agreement matures to its February 2017 expiration date and OC-BVI receives (or is determined by the court to not be entitled to receive) the pending court award amount assumed due for the value of the Baughers Bay plant, OC-BVI's expected future cash flows, and therefore its fair value computed under the discounted cash flow method, will decrease. Unless OC-BVI obtains an expansion or other modification of its Bar Bay agreement that results in a significant increase in the estimated future cash flows from its Bar Bay plant, we will be required to record impairment losses in 2015 and 2016 to reduce the carrying value of our investment in OC-BVI to its then current fair value. These impairment losses will, in the aggregate, at least equal the underlying \$2.0 million in goodwill reflected in the carrying value of our investment in OC-BVI. The losses we record for our investment in OC-BVI in the future will exceed this \$2.0 million if OC-BVI ultimately ceases operations at its Bar Bay plant, as OC-BVI will be required to record an impairment loss to reduce the carrying value of its Bar Bay plant to its then estimated fair value. OC-BVI's aggregate carrying value of the assets that comprise its Bar Bay plant was approximately \$5.1 million as of December 31, 2014. Future impairment losses for our investment in OC-BVI and our equity in any future operating losses incurred by OC-BVI could have a material adverse impact on our consolidated results of operations.

Goodwill and intangible assets. Goodwill represents the excess cost over the fair value of the assets of an acquired business. Goodwill and intangible assets acquired in a business combination accounted for as a purchase and determined to have an indefinite useful life are not amortized, but are tested for impairment at least annually. Intangible assets with estimable useful lives are amortized over their respective estimated useful lives to their estimated residual values and reviewed periodically for impairment. We evaluate the possible impairment of goodwill annually as part of our reporting process for the fourth quarter of each fiscal year. Management identifies our reporting units and determines the carrying value of each reporting unit by assigning the assets and liabilities, including the existing goodwill and intangible assets, to those reporting units. We determine the fair value of each reporting unit and compare the fair value to the carrying amount of the reporting unit. To the extent the carrying amount of the reporting unit exceeds the fair value of the reporting unit, we are required to perform the second step of the impairment test, as this is an indication that the reporting unit goodwill may be impaired. In this step, we compare the implied fair value of the reporting unit goodwill with the carrying amount of the reporting unit goodwill. The implied fair value of goodwill is determined by allocating the fair value of the reporting unit to all the assets (recognized and unrecognized) and liabilities of the reporting unit in a manner similar to a purchase price allocation. The residual fair value after this allocation is the implied fair value of the reporting unit goodwill. If the implied fair value is less than its carrying amount, the impairment loss is recorded.

For each of the years in the three-year period ended December 31, 2014, we estimated the fair value of our reporting units by applying the discounted cash flow method, the subject company stock price method, the guideline public company method, the mergers and acquisitions method and, on an exception basis and where necessary and appropriate, the net asset value method.

The discounted cash flow method relied upon seven-year discrete projections of operating results, working capital and capital expenditures, along with a terminal value subsequent to the discrete period. These seven-year projections were based upon historical and anticipated future results, general economic and market conditions, and considered the impact of planned business and operational strategies. The discount rates for the calculations represented the estimated cost of capital for market participants at the time of each analysis. In preparing these seven-year projections for our retail unit we (i) identified possible outcomes of our on-going negotiations with the Cayman Islands government for the renewal of our retail license; (ii) estimated the cash flows associated with each possible outcome; and (iii) assigned a probability to each outcome and associated estimated cash flows. The weighted average estimated cash flows were then summed to determine the overall fair value of the retail unit under this method. The possible outcomes used for the discounted cash flow method for the retail unit included the implementation of a rate of return on invested capital model, the methodology proposed by Cayman Islands government representatives for the new retail license.

We also estimated the fair value of each of our reporting units for each of the years in the three-year period ended December 31, 2014 through reference to the quoted market prices for our Company and guideline companies and the market multiples implied by guideline merger and acquisition transactions. For the year ended December 31, 2012 we also relied upon net asset values to estimate the fair value of our services unit.

We weighted the fair values estimated for each of our reporting units under each method and summed such weighted fair values to estimate the overall fair value for each reporting unit. We changed the relative weightings for 2013 from those used for 2012 to increase the weightings applied to those methods that resulted in more conservative estimates of fair value. The respective weightings we applied to each method for the year ended December 31, 2014 were consistent with those used for the year ended December 31, 2013 and are as follows:

Method	2014		2013	
	Retail	Bulk	Retail	Bulk
Discounted cash flow	50 %	50 %	50 %	50 %
Subject company stock price	30 %	30 %	30 %	30 %
Guideline public company	10 %	10 %	10 %	10 %
Mergers and acquisitions	10 %	10 %	10 %	10 %
	100 %	100 %	100 %	100 %

The fair values we estimated for our retail and bulk units exceeded their carrying amounts by 39% and 6%, respectively, for the year ended December 31, 2012. The fair value we estimated for our services unit for the year ended December 31, 2012 was 10% less than its carrying amount. As a result of this estimate and our subsequent step 2 analysis of the implied fair value of the goodwill recorded for our services unit, we recorded an impairment charge for the services unit goodwill of \$88,717 for the year ended December 31, 2012. The fair values we estimated for our retail and bulk units exceeded their carrying amounts by 47% and 23%, respectively, for the year ended December 31, 2013. The fair values we estimated for our retail and bulk units exceeded their carrying amounts by 36% and 29%, respectively, for the year ended December 31, 2014.

We also performed an analysis reconciling the conclusions of value for our reporting units to our market capitalization at October 1, 2014. This reconciliation resulted in an implied control premium for our Company of 1%.

Quarterly Results of Operations

The following table presents unaudited quarterly results of operations for the eight quarters ended December 31, 2014. We believe that all adjustments, consisting only of normal recurring adjustments, necessary to present fairly such quarterly information have been included in the amounts reported below.

	Year Ended December 31, 2014			
	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
Total revenues	\$16,348,610	\$16,931,832	\$17,021,056	\$15,257,580
Gross profit	5,970,425	6,370,046	5,700,315	5,074,712
Net income attributable to Consolidated Water Co. Ltd. stockholders	654,909	2,759,693	1,882,692	968,064
Diluted earnings per share	0.04	0.19	0.13	0.07

	Year Ended December 31, 2013			
	First Quarter	Second Quarter	Third Quarter	Fourth Quarter

Results of Operations

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our audited consolidated financial statements and accompanying notes included under Part II, ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA, of this Annual Report.

Year Ended December 31, 2014 Compared to Year Ended December 31, 2013

Consolidated Results

Net income attributable to Consolidated Water Co. Ltd. common stockholders for 2014 was \$6,265,358 (\$0.42 per share on a fully-diluted basis), as compared to \$8,594,519 (\$0.58 per share on a fully-diluted basis) for 2013.

Total revenues for 2014 increased to \$65,559,078 from \$63,822,131 in 2013 due to increases in revenues for our services and retail segments. Gross profit for 2014 was \$23,115,498 or 35% of total revenues, as compared to \$23,505,879 or 37% of total revenues, for 2013. Gross profit for the bulk and service segments decreased from 2013 to 2014 while gross profit for the retail segment increased in 2014 from 2013. For further discussion of revenues and gross profit for 2014, see the “Results by Segment” analysis that follows.

General and administrative (“G&A”) expenses on a consolidated basis were \$16,654,439 and \$15,844,303 for 2014 and 2013, respectively. The increase of approximately 5% in consolidated G&A expenses in 2014 resulted from increases in (i) the project development expenses incurred by NSC, our Mexico subsidiary, of approximately \$544,000; and (ii) professional fees of approximately \$378,000 reflecting consulting and legal fees incurred for the judicial review conducted in conjunction with our retail license negotiations. These increases were partially offset by decreases in (i) non-Mexico related business development costs of approximately \$108,000; and (ii) research and development costs of approximately \$91,000.

Interest income increased to \$1,440,631 for 2014 from \$826,570 in 2013 due to interest on past due accounts receivables from the WSC.

We recognized earnings and profit sharing on our investment in OC-BVI for 2014 and 2013 of \$414,755 and \$1,337,352, respectively. Our earnings from OC-BVI decreased from 2014 to 2013 due to the receipt by OC-BVI during 2013 of approximately \$2 million for the remaining unpaid balance awarded in the Baughers Bay litigation. See further discussion of OC-BVI and the Baughers Bay litigation at Note 8 of our Consolidated Financial Statements at Item 8 of this Annual Report.

Results by Segment

Retail Segment:

The retail segment contributed \$910,938 and \$1,182,525 to our income from operations for 2014 and 2013, respectively.

Revenues generated by our retail water operations were \$24,104,932 and \$23,018,498 for 2014 and 2013, respectively. The additional retail revenues we generated in 2014 are attributable to an increase in the gallons of water sold of 3% from 2013 to 2014 for our Cayman Water retail operations and an increase of approximately \$328,000 in revenues generated by CW- Bali.

Retail segment gross profit was \$12,094,669 (50% of retail revenues) and \$11,995,402 (52% of retail revenues) for 2014 and 2013, respectively. The decline in gross profit as a percentage of revenues from 2013 to 2014 is due to higher plant and pipeline maintenance costs for our Cayman operations and a negative gross profit for our Bali operations.

Consistent with prior periods, we record all non-direct G&A expenses in our retail segment and do not allocate any of these non-direct costs to our other two business segments. Retail G&A expenses for 2014 and 2013 were \$11,183,731 and \$10,812,877, respectively. G&A expenses increased from 2013 to 2014 principally as a result of increases of approximately (i) \$378,000 in professional fees reflecting consulting and legal fees incurred for the judicial review conducted in conjunction with our retail license negotiations; (ii) \$88,000 for computer system updates; and (iii) \$80,000 in employee costs due to base salary increases. These increases were partially offset by decreases in (i) non-Mexico related business development costs of approximately \$108,000; (ii) research and development costs of approximately \$91,000.

CW-Bali owns and operates a seawater reverse osmosis plant with a productive capacity of approximately 790,000 gallons per day located in Nusa Dua, one of the primary tourist areas of Bali, Indonesia. We built this plant based upon our belief that future water shortages in this area of Bali will eventually enable us to sell all of this plant's production. We utilized approximately 18.8% of this plant's capacity during the year ended December 31, 2014, selling to customers on a month-to-month basis. As of December 31, 2014, capitalized costs for this plant reflected on our consolidated balance sheet were approximately \$3.3 million. The revenues we generated from this plant amounted to approximately \$472,000 and \$144,000 for the years ended December 31, 2014 and 2013, respectively. CW-Bali's operating losses were approximately (\$458,000) and (\$438,000) for the years ended December 31, 2014 and 2013, respectively.

Bulk Segment:

The bulk segment contributed \$9,742,455 and \$10,103,455 to our income from operations for 2014 and 2013, respectively.

Bulk segment revenues were \$39,201,011 and \$39,960,220 for 2014 and 2013, respectively. The decrease in bulk revenues of approximately \$759,000 from 2013 to 2014 is attributable to our Bahamas operations, which generated approximately \$2.5 million less in revenues in 2014 than in 2013. The 2014 revenue decrease for our Bahamas operations resulted from a decrease in the volume of water sold (primarily from our Blue Hills plant) to the Water and Sewerage Corporation of the Bahamas ("WSC"). In 2013, the WSC purchased water volumes from our Blue Hills plant that were significantly higher than the minimum amounts they were required to purchase under the water supply agreement for this plant. However, as a result of water conservation and loss mitigation efforts it has conducted since that time, the WSC has significantly reduced the amount of water lost by its distribution system and consequently decreased the volume of water purchased from our Blue Hills plant in 2014 (although the WSC continued to purchase

more in 2014 than the contract minimum amount). The decrease in the revenues from our Bahamas operations was partially mitigated by a \$1.7 million increase in revenues from our Cayman bulk operations that resulted from a 23% increase in the gallons of water sold. Such incremental sales volumes were due to the temporary closing (for refurbishment) of the one plant owned by the Water Authority-Cayman that we no longer operate.

Gross profit for our bulk segment was \$11,347,954 and \$11,747,324 for 2014 and 2013, respectively. Gross profit as a percentage of bulk revenues was approximately 29% for both 2014 and 2013. The gross profit dollars and gross profit as a percentage of revenues from 2013 to 2014 remained fairly consistent as greater gross profit for our Cayman bulk operations in 2014 mitigated the lower gross profit for our Bahamas bulk operations.

Bulk segment G&A expenses remained consistent at \$1,605,499 and \$1,643,869 for 2014 and 2013, respectively.

Services Segment:

The services segment incurred losses from operations of (\$4,192,334) and (\$3,624,404) for 2014 and 2013, respectively. We anticipate that the services segment will continue to incur losses from operations while we continue to fund the project development activities of NSC and/or until such time as we obtain significant new management services or plant construction contracts.

Services segment revenues were \$2,253,135 and \$843,413 for 2014 and 2013, respectively. Services revenues increased from 2013 to 2014 primarily due to construction revenues generated from our contracts with the Water Authority-Cayman to refurbish their Lower Valley plant and build a plant on Cayman Brac.

Gross profit for our services segment was (\$327,125) and (\$236,847) for 2014 and 2013, respectively. The lower gross profit for 2014 reflects a decline in sales of consumables stock to OC-BVI and other outside parties.

G&A expenses for the services segment were \$3,865,209 and \$3,387,557 for 2014 and 2013, respectively. The increase in G&A expenses for 2014 as compared to 2013 reflects an increase of approximately \$544,000 in the project development activities of NSC attributable to a \$1.0 million payment on an option agreement to purchase the shares in NSC held by one of its shareholders and a \$350,000 payment made to reimburse a construction contractor for pilot testing and water monitoring activities conducted by the contractor on behalf of NSC. Such reimbursement was required due to NSC's decision not to extend a memorandum of understanding with this contractor. See further discussion of these two payments at Note 9 of the Notes to Consolidated Financial Statements included at Item 8 of this Annual Report.

Year Ended December 31, 2013 Compared to Year Ended December 31, 2012

Consolidated Results

Net income attributable to Consolidated Water Co. Ltd. common stockholders for 2013 was \$8,594,519 (\$0.58 per share on a fully-diluted basis), as compared to \$9,315,514 (\$0.64 per share on a fully-diluted basis) for 2012.

Total revenues for 2013 declined to \$63,822,131 from \$65,450,702 in 2012 due to decreases in revenues for our retail and bulk segments. Gross profit for 2013 was \$23,505,879 or 37% of total revenues, as compared to \$21,992,442 or 34% of total revenues, for 2012. Gross profit for the bulk segment improved in 2013 from 2012 while gross profit for the retail and services segments declined in 2013 from 2012. For further discussion of revenues and gross profit for 2013, see the “Results by Segment” analysis that follows.

General and administrative (“G&A”) expenses on a consolidated basis were \$15,844,303 and \$14,542,817 for 2013 and 2012, respectively. The increase of approximately 9% in consolidated G&A expenses in 2013 resulted from increases in (i) the project development expenses incurred by NSC, our Mexico subsidiary, of approximately \$1.5 million; (ii) employee expenses of approximately \$206,000 attributable to base salary increases; (iii) director’s fees and expenses of approximately \$218,000; and (iv) fees and licenses of approximately \$146,000. These increases were offset by decreases in (i) non-Mexico related business development costs of approximately \$584,000; (ii) research and development costs of approximately \$186,000; (iii) professional fees of approximately \$178,000 and (iv) depreciation expense of approximately \$131,000.

Interest income decreased to \$826,570 for 2013 from \$835,941 in 2012 as a result of the declining principal balance on our loans receivable.

Interest expense decreased to \$484,057 for 2013 from \$876,971 for 2012 as a result of the repayment on March 31, 2012 of the remaining \$8.5 million balance of CW-Bahamas’ Series A bonds payable and the declining principal balances on our remaining bonds payable.

We recognized earnings and profit sharing on our investment in OC-BVI for 2013 and 2012 of \$1,337,352 and \$2,464,773, respectively. Our earnings from OC-BVI decreased from 2013 to 2012 due to the receipt by OC-BVI during 2012, of approximately \$4.7 million of the amount awarded in the Baughers Bay litigation, as compared to the receipt of only the remaining unpaid balance of this award of \$2 million in 2013. See further discussion of OC-BVI and the Baughers Bay litigation at Note 8 of our Consolidated Financial Statements at Item 8 of this Annual Report.

Results by Segment

Retail Segment:

The retail segment contributed \$1,182,155 and \$1,370,112 to our income from operations for 2013 and 2012, respectively.

Revenues generated by our retail water operations were \$23,018,498 and \$24,222,895 for 2013 and 2012, respectively. The gallons of water sold by our retail segment decreased by almost 8% from 2012 to 2013. While we are not certain of the cause of the decrease in the volume of gallons sold by our retail segment in 2013, we believe this decrease, which continues a decline that began in 2011, could reflect the adoption of water conservation measures by some of our larger customers. The impact of the decrease in the volume of water sold in 2013 on retail revenues was exacerbated by the annual first quarter adjustment to our base rates, which was an decrease of approximately 0.22% in 2013 as a result of movements in the consumer price indices used to determine such rate adjustments.

Retail segment gross profit was \$11,995,402 (52% of retail revenues) and \$12,674,640 (52% of retail revenues) for 2013 and 2012, respectively.

Consistent with prior periods, we record all non-direct G&A expenses in our retail business segment and do not allocate any of these non-direct costs to our other two business segments. Retail G&A expenses for 2013 and 2012 were \$10,812,877 and \$11,304,528, respectively. G&A expenses decreased from 2012 to 2013 principally as a result of decreases in (i) non-Mexico related business development costs of approximately \$584,000; (ii) professional fees of approximately \$154,000 and (iii) depreciation expense of approximately \$125,000. These decreases were offset by an increase in (i) employee expenses of approximately \$220,000 attributable to base salary increases; and (ii) directors' fees and expenses of approximately \$164,000.

During the latter half of 2012, we commenced, through our subsidiary, PT Consolidated Water Bali, the construction of a seawater reverse osmosis (“SWRO”) plant in Nusa Dua, one of the primary tourist areas of Bali, Indonesia. Nusa Dua has a target customer profile consisting of tourist resorts and vacation/luxury residences comparable to our retail service area on Grand Cayman. We believe the water demands of these properties in Nusa Dua will soon exceed the water supplies that can be provided to the area by the local public water utility, and that other areas of Bali will also eventually experience fresh water shortages. However, as SWRO has not been employed to any meaningful extent in Bali, we concluded that to obtain customers in Bali we must first demonstrate the viability of SWRO as well as our capabilities and expertise. Consequently, we elected to construct this plant before obtaining water supply agreements for its production. We believe sufficient demand exists in Nusa Dua to enable us to sell all of the plant’s capacity, although we cannot assure that we will be able to do so. As of December 31, 2013, the capitalized costs for this plant reflected on our consolidated balance sheet were approximately \$3.1 million, and the remaining capital investment for this plant, to expand its existing capacity from 264,000 gallons per day to 790,000 gallons per day, will be approximately \$1.3 million. We generated approximately \$144,000 of revenues from this plant for the year ended December 31, 2013.

Bulk Segment:

The bulk segment contributed \$10,103,455 and \$7,261,041 to our income from operations for 2013 and 2012, respectively.

Bulk segment revenues were \$39,960,220 and \$40,758,182 for 2013 and 2012, respectively. The decrease in bulk revenues of approximately \$798,000 from 2012 to 2013 resulted from the January 2013 expiration of our operating agreement with the Water Authority-Cayman for their Lower Valley plant on Grand Cayman Island. We generated approximately \$2.1 million in revenues and approximately \$213,000 gross profit from the operation of the Lower Valley plant during the year ended December 31, 2012. This decrease was partially offset by increased sales from the other plants we operate for the Water Authority-Cayman. The total gallons of water sold by our bulk segment decreased in 2013 by 2% from 2012.

Gross profit for our bulk segment was \$11,747,324 and \$9,078,295 for 2013 and 2012, respectively. Gross profit as a percentage of bulk revenues was approximately 29% and 22% for 2013 and 2012, respectively. The improvement in gross profit from 2012 to 2013 reflects a reduction of approximately \$2.2 million in depreciation expense, as certain assets we continue to use reached the end of their depreciable lives during the fourth quarter of 2012 and early 2013.

Bulk segment G&A expenses were \$1,643,869 and \$1,384,527 for 2013 and 2012, respectively. The increase in these expenses from 2012 to 2013 reflects an increase of approximately \$113,000 in fees and licenses arising primarily from higher revenues for CW-Bahamas, and approximately \$54,000 in additional directors’ fees.

Services Segment:

The services segment incurred losses from operations of (\$3,624,404) and (\$1,702,972) for 2013 and 2012, respectively. We anticipate that the services segment will continue to incur losses from operations while we continue to fund the project development activities of NSC and/or until such time as we obtain significant new management services or plant construction contracts. As a result of the decline in profitability of our services segment and its current economic prospects, our 2012 goodwill impairment testing resulted in an impairment charge to write-off all of our services segment's goodwill of \$88,717.

Services segment revenues were \$843,413 and \$469,625 for 2013 and 2012, respectively. Services revenues increased from 2012 to 2013 primarily due to an increase in revenues earned under our management services agreement with OC-BVI.

Gross profit for our services segment was (\$236,847) and \$239,507 for 2013 and 2012, respectively. The lower gross profit for 2013 reflects \$307,000 in incremental employee costs primarily due to the transfer of four engineering employees from our retail segment to our services segment, and a \$173,000 increase in engineering related consulting expenses.

G&A expenses for the services segment were \$3,387,557 and \$1,853,762 for 2013 and 2012, respectively. The increase in G&A expenses is attributable to an increase in the expenses related to the project development activities of NSC of approximately \$1.5 million.

FINANCIAL CONDITION

The significant changes in the consolidated balance sheet as of December 31, 2014 as compared to December 31, 2013 result from the reduction in the accounts receivable for our Bahamas operations and the purchase of land by our Mexico subsidiary, NSC.

During May 2014, June 2014 and September 2014, the WSC made significant incremental payments to reduce the past due amounts it owed to CW-Bahamas. As a result, CW-Bahamas' accounts receivable decreased by approximately \$6.9 million from December 31, 2013 to December 31, 2014. A portion of these funds were invested in the \$5.0 million certificate of deposit reflected on our December 31, 2014 consolidated balance sheet.

During May 2014, we paid \$17.4 million to complete the land purchases for NSC's development project in Mexico, in the process satisfying the \$10,050,000 land purchase obligation reported on our December 31, 2013 consolidated

balance sheet. To fund this payment, we liquidated our marketable securities, which had a balance of approximately \$8.6 million as of December 31, 2013, and obtained a \$10 million demand loan.

LIQUIDITY AND CAPITAL RESOURCES

Our projected liquidity requirements for 2015 include capital expenditures for our existing operations of approximately \$5.1 million, approximately \$2.1 million for debt service on our demand loan payable and approximately \$2.1 million for NSC's project development activities. Our liquidity requirements for 2015 may also include quarterly dividends, if such dividends are declared by our Board. Our dividend payments amounted to approximately \$4.6 million for the year ended December 31, 2014.

During May 2014, we obtained new financing (the proceeds from which were used to fund NSC's land purchases in May 2014) in the form of a \$10.0 million demand loan payable. Assuming the loan is not called by the lender, payments on this loan are due quarterly under a five year amortization schedule with the remaining principal balance due after two years. This loan bears interest at LIBOR plus 1.5%. The outstanding balance on this demand loan payable was \$9.0 million as of December 31, 2014.

As of December 31, 2014, we had cash and cash equivalents of approximately \$35.7 million and working capital of approximately \$43.3 million. We are not presently aware of anything that would lead us to believe that we will not have sufficient liquidity to meet our needs for 2015 and thereafter.

Material Commitments, Expenditures and Contingencies

Retail License

We sell water through our retail operations under a license issued in July 1990 by the Cayman Islands government that grants Cayman Water the exclusive right to provide potable water to customers within its licensed service area. As discussed below, this license was set to expire in July 2010 but has since been extended while negotiations for a new license take place. Pursuant to the license, we have the exclusive right to produce potable water and distribute it by pipeline to our licensed service area which consists of two of the three most populated areas of Grand Cayman, the Seven Mile Beach and West Bay areas. For the years ended December 31, 2014, 2013 and 2012 we generated approximately 36%, 36% and 37%, respectively, of our consolidated revenues and 53%, 52% and 58%, respectively, of our consolidated gross profits from the retail water operations conducted pursuant to our exclusive license. If we are not in default of any of its terms, this license provides us with the right of first refusal to renew the license on terms that are no less favorable than those that the government offers to any third party.

Under our license, we pay a royalty to the government of 7.5% of our gross retail water sales revenues (excluding energy cost adjustments). The selling prices of water sold to our customers are determined by the license and vary depending upon the type and location of the customer and the monthly volume of water purchased. The license provides for an automatic adjustment for inflation or deflation on an annual basis, subject to temporary limited exceptions, and an automatic adjustment for the cost of electricity on a monthly basis. The Water Authority-Cayman (“WAC”), on behalf of the government, reviews and confirms the calculations of the price adjustments for inflation and electricity costs. If we want to adjust our prices for any reason other than inflation or electricity costs, we have to request prior approval of the Cabinet of the Cayman Islands government. Disputes regarding price adjustments would be referred to arbitration.

The license was scheduled to expire in July 2010 but has been extended several times by the Cayman Islands government in order to provide the parties with additional time to negotiate the terms of a new license agreement. The most recent extension of the license expires on June 30, 2015.

In February 2011, the Water (Production and Supply) Law, 2011 and the Water Authority (Amendment) Law, 2011 (the “New Laws”) were published and are now in full force and effect. Under the New Laws, the WAC will issue any new license, and such new license could include a rate of return on invested capital model, as discussed in the following paragraph.

We have been advised in correspondence from the Cayman Islands government and the WAC that: (i) the WAC is now the principal negotiator, and not the Cayman Islands government, in these license negotiations, and (ii) the WAC has determined that a rate of return on invested capital model (“RCAM”) for the retail license is in the best interest of the public and our customers. RCAM is the rate model currently utilized in the electricity transmission and distribution license granted by the Cayman Islands government to the Caribbean Utilities Company, Ltd. We have advised the Cayman Islands government that we disagree with its position on these two issues.

In July 2012, in an effort to resolve several issues relating to our retail license renewal negotiations, we filed an Application for Leave to Apply for Judicial Review (the “Application”) with the Grand Court of the Cayman Islands (the “Court”), seeking declarations that: (i) certain provisions of the Water Authority (Amendment) Law, 2011 and the Water (Production and Supply) Law, 2011, appear to be incompatible and a determination as to how those provisions should be interpreted, (ii) the WAC’s roles as the principal license negotiator, statutory regulator and our competitor put the WAC in a position of hopeless conflict, and (iii) the WAC’s decision to replace the rate structure under our current exclusive license with RCAM was predetermined and unreasonable. In October 2012, we were notified that the Court agreed to consider the issues raised in the Application.

Throughout the course of the license renewal negotiations, we have objected to the use of RCAM on the basis that we believe such a model would not promote the efficient operation of our water utility and could ultimately increase water rates to our customers.

The hearing for this judicial review was held on April 1, 2014. Prior to the commencement of the hearing, the parties agreed that the Court should solely be concerned with the interpretation of the statutory provisions. As part of this agreement, the WAC agreed to consider our submissions on the RCAM model and/or alternative models of pricing. In June 2014, the Court determined that: (i) the renewal of the 1990 License does not require a public bidding process; and (ii) the WAC is the proper entity to negotiate with us for the renewal of the 1990 License.

Our submissions on the RCAM model and/or alternative models of pricing were made to the WAC on June 9, 2014. We received a letter from the WAC dated September 11, 2014 which fully rejected our submissions and stated that the WAC intend to provide us with a draft RCAM license in due course. On November 21, 2014, we wrote to the Minister of Works offering to recommence license negotiations on the basis of the RCAM model subject to certain conditions which are: (i) the Government would undertake to amend the current water legislation to provide for an independent regulator and a fair and balanced regulatory regime more consistent with that provided under the electrical utility regulatory regime, (ii) the Government and we would mutually appoint an independent referee and chairman of the negotiations, (iii) our new license would provide exclusivity for the production and provision of all piped water, both potable and non-potable, within our Cayman Islands license area, (iv) the Government would allow us to submit our counter proposal to the WAC's June 2010 RCAM license draft, and (v) the principle of subsidization of residential customer rates by commercial customer rates would continue under a new license. To date, we have not received a response to our letter.

As a result of the Court's ruling and our subsequent offer to recommence negotiations on the basis of the RCAM model, we expect to recommence license negotiations with the Government of the Cayman Islands and WAC in the near future.

If we do not ultimately enter into a new license agreement and no other party is awarded a license, we expect to be permitted to continue to supply water to our service area.

It is possible that the Cayman Islands government could offer a third party a license to service some or all of our present service area. In such event, we may assume the license offered to the third party by exercising our right of first refusal. However, the terms of any new license agreement may not be as favorable to us as the terms under which we are presently operating and could materially reduce the operating income and cash flows we have historically generated from our retail license and could require us to record an impairment charge to reduce the \$3,499,037 carrying value of our goodwill. Such impairment charge could have a material adverse impact on our results of operations.

We are presently unable to determine what impact the resolution of this matter will have on our cash flows, financial condition or results of operations.

N.S.C. Agua, S.A. de C.V.

In May 2010, we acquired, through our wholly-owned Netherlands subsidiary, Consolidated Water Cooperatief, U.A., ("CW-Cooperatief") a 50% interest in N.S.C. Agua, S.A. de C.V. ("NSC"), a development stage Mexican company. We have since purchased, through the conversion of a loan we made to NSC, sufficient shares to raise our ownership

interest in NSC to 99.9%. NSC was formed to pursue a project encompassing the construction, operation and minority ownership of a 100 million gallon per day seawater reverse osmosis desalination plant to be located in northern Baja California, Mexico and an accompanying pipeline to deliver water to the Mexican potable water infrastructure and the U.S. border (the “Project”). We believe the Project can be successful due to what we believe is a growing need for a new potable water supply for the areas of northern Baja California, Mexico and Southern California, U.S.

NSC has engaged engineering groups with extensive regional and/or technical experience to prepare preliminary designs and cost estimates for the desalination plant and the proposed pipeline and prepare the environmental impact studies for local, state and federal regulatory agencies. NSC is presently seeking contracts with proposed customers in Mexico and the U.S. for the sale of the desalinated water from the Project. NSC will be required to accomplish various additional steps before it can commence construction of the plant and pipeline including, but not limited to, obtaining approvals and permits from various governmental agencies in Mexico, securing contracts with its proposed customers to sell water in sufficient quantities and at prices that make the project financially viable, and obtaining equity and debt financing for the Project. NSC’s potential customers will also be required to obtain various governmental permits and approvals in order to purchase water from NSC.

In February 2012, we paid \$300,000 to enter into an agreement (the “Option Agreement”) that provided us with an option, exercisable through February 7, 2014, to purchase the shares of one of the other shareholders of NSC, along with an immediate power of attorney to vote those shares, for \$1.0 million. Such shares constituted 25% of the ownership of NSC as of February 2012. In May 2013, NSC repaid a \$5.7 million loan payable to CW-Cooperatief by issuing additional shares of its stock. As a result of this share issuance to CW-Cooperatief, we acquired 99.9% of the ownership of NSC. The Option Agreement contained an anti-dilution provision that required us to issue new shares in NSC of an amount sufficient to maintain the other shareholder’s 25% ownership interest in NSC if (i) any new shares of NSC were issued subsequent to the execution of the Option Agreement and (ii) we did not exercise our share purchase option by February 7, 2014. We exercised our option and paid the \$1.0 million to purchase the Option Agreement shares in February 2014.

NSC entered into a purchase contract for 8.1 hectares of land on which the proposed plant would be constructed and in 2012 obtained an extension of this purchase contract through May 15, 2014 in exchange for prepayments of (i) \$500,000 paid at signing of the extension and (ii) a further \$500,000 paid in May 2013. NSC paid \$7.4 million in May 2014 to complete this land purchase. In 2013, NSC purchased an additional 12 hectares of land for the project for \$12 million, of which \$2 million was paid. NSC paid the remaining \$10 million balance for this land purchase on May 15, 2014.

In 2012 and 2013, NSC conducted an equipment piloting plant and water data collection program at the proposed feed water source for the Project under a Memorandum of Understanding (the “EPC MOU”) with a global engineering, procurement and construction contractor for large seawater desalination plants. Under the EPC MOU, the contractor installed and operated an equipment piloting plant and collected water quality data from the proposed feed water source site in Rosarito Beach, Baja California, Mexico. The EPC MOU required that NSC negotiate exclusively with the contractor for the construction of the 100 million gallon per day seawater reverse osmosis desalination plant, and further required payment by NSC to the contractor of up to \$500,000 as compensation for the operation and maintenance of the equipment piloting plant should NSC not award the engineering, procurement and construction contract for the Project to the contractor. This first phase of the pilot plant testing program was completed in October

2013. NSC decided not to extend the EPC MOU beyond its February 2014 expiration date and NSC paid the contractor \$350,000 during the three months ended March 31, 2014 as compensation for the operation and maintenance of the pilot plant.

NSC is currently conducting additional source water sampling protocols to comply with regulatory requirements in the U.S. and Mexico, and is also coordinating with regulators to assess the need, if any, for further process and equipment piloting.

In November 2012, NSC signed a letter of intent with Otay Water District in Southern California to deliver no less than 20 million and up to 40 million gallons of water per day from the plant to the Otay Water District at the border between Mexico and the U.S. On November 25, 2013 Otay Water District submitted an application to the Department of State of the United States of America for a Presidential Permit authorizing the construction, connection, operation and importation of desalinated seawater at the international boundary between the United States and Mexico in San Diego County, California. We understand that this application is currently being reviewed by the relevant authorities.

NSC entered into a 20-year lease, effective November 2012, with the Comisión Federal de Electricidad for approximately 5,000 square meters of land on which it plans to construct the water intake and discharge works for the plant. The amounts due on this lease are payable in Mexican pesos at an amount that is currently equivalent to approximately \$20,000 per month. This lease is cancellable should NSC ultimately not proceed with the Project.

In August 2014, the State of Baja California enacted new legislation to regulate Public-Private Association projects which involve the type of long-term contract between a public sector authority and a private party NSC is required to obtain to complete the Project. Pursuant to this new legislation, on January 4, 2015, NSC submitted an expression of interest for its project to the Secretary of Infrastructure and Urban Development of the State of Baja California (“SIDUE”). On January 23, 2015 SIDUE accepted NSC’s expression of interest and requested that we submit a detailed proposal for the project that complies with requirements of the new legislation. The new legislation requires that such proposal is further evaluated by SIDUE and submitted to the Public-Private Association Projects State Committee (the “APP Committee”) for review and authorization. If the APP Committee grants its authorization, the State of Baja California is required to conduct a public tender for the Project. We presently cannot determine if the APP Committee will grant its authorization or, if a public tender process is commenced, when such process will be completed or whether NSC will be awarded the Project.

We have acknowledged since its inception that, due to the amount of capital the Project requires, we will ultimately need an equity partner or partners to complete the Project. During the fourth quarter of 2014, we concluded that our chances of successfully obtaining a contract with Comisión Estatal de Servicios Públicos de Tijuana (“CESPT”) under the new Public-Private Association legislation would be greatly enhanced through the addition of an equity partner for NSC with substantial financial resources and a history of successful capital project investments in Mexico. In February 2015, NSC entered into a Letter of Intent (“LOI”) with such a potential partner. The terms of this LOI will be binding if and only if NSC and its new partner are ultimately awarded the Project by early February 2016. Pursuant to the LOI, (i) NSC has agreed to sell the land and other Project assets to a new company (“Newco”) that will build and own the Project; (ii) NSC’s potential new partner will provide the majority of the equity for the Project and thereby will own the majority interest in Newco; (iii) NSC will maintain a minority ownership position in Newco; and (iv) Newco will enter into a long term management and technical services contract with NSC for the Project.

On February 20, 2015, NSC received notification from the regulatory authorities in Mexico that its federal environmental impact assessment and mitigation plan for the Project's proposed desalination plant was approved.

Included in our consolidated results of operations are general and administrative expenses from NSC, consisting of organizational, legal, accounting, engineering, consulting and other costs relating to NSC's project development activities. Such expenses amounted to approximately \$3.7 million, \$3.2 million, and \$1.7 million for the years ended December 31, 2014, 2013 and 2012, respectively. The assets and liabilities of NSC included in the consolidated balance sheets amounted to approximately \$22.0 million and \$214,000, respectively, as of December 31, 2014 and approximately \$13.7 million and \$10.3 million, respectively, as of December 31, 2013.

We expect to incur project development costs on behalf of NSC in 2015 to submit the detailed proposal to CESPT and (if such proposal is successful) to complete the site piloting plant activities, secure feed water and power supplies, complete the engineering and feasibility studies, negotiate customer contracts, secure the required rights-of-way and regulatory permits and arrange the Project financing. We presently expect these costs to total approximately \$2.1 million in 2015.

Despite the expenditures made and the activities completed to date, we may ultimately be unsuccessful in our efforts to complete the Project.

The Mexico tax authority, the Servicio de Administracion Tributaria ("SAT"), has assessed NSC 3,184,745 Mexican pesos for taxes relating to payments to foreign vendors on which the SAT contends should have been subject to income tax withholdings during NSC's 2011 tax year. The SAT has also assessed NSC 1,639,001 Mexican pesos in penalties and 913,711 Mexican pesos in surcharges on these payments bringing the total assessment to 5,737,457 Mexican pesos. Such assessment is equivalent to approximately \$390,000 as of December 31, 2014 based upon the exchange rate between the US\$ and the Mexican peso as of that date.

NSC has retained the assistance of Mexican tax advisers in this matter and believes the assumptions and related work performed by the SAT do not support their tax assessment. As a result, NSC has elected to contest this assessment in Mexico federal tax court. NSC was required to provide an irrevocable letter of credit in the amount of 6,712,634 Mexican pesos as collateral in connection with this tax case. The letter of credit amount includes 975,177 Mexican pesos in additional charges calculated by the SAT to adjust the value of the original assessment to its potential future value at the time when the matter is settled by the tax court.

In November 2014, NSC obtained a favorable judgment by the court. Based on this outcome, SAT filed an appeal shortly thereafter to contest the judgment.

The restricted cash balance of \$456,083 included in the accompanying consolidated December 31, 2014 balance sheet represents cash on deposit with a bank to secure payment of the irrevocable letter of credit.

We are presently unable to determine what amount, if any, of this assessment NSC will ultimately be required to pay by the Mexico federal tax court. Consequently, no provision for this potential liability has been made in our financial statements. Furthermore, if the Mexico federal tax court upholds the assessment made by the SAT for NSC's 2011 tax year, the SAT may seek to levy an assessment on payments of a similar nature made by NSC during tax years subsequent to 2011.

CW-Belize

By Statutory Instrument No. 81 of 2009, the Minister of Public Utilities of the government of Belize published an order, the Public Utility Provider Class Declaration Order, 2009 (the "Order"), which as of May 1, 2009 designated CW-Belize as a public utility provider under the laws of Belize. With this designation, the Public Utilities Commission of Belize (the "PUC") has the authority to set the rates charged by CW-Belize and to otherwise regulate its activities. On November 1, 2010, CW-Belize received a formal complaint from the PUC alleging that CW-Belize was operating without a license under the terms of the Water Industry Act. CW-Belize applied for this license in December 2010. On July 29, 2011, the PUC issued the San Pedro Public Water Supply Quality and Security Complaint Order (the "Second Order") which among other things requires that (i) CW-Belize and its customer jointly make a submission to the responsible Minister requesting that the area surrounding CW-Belize's seawater abstraction wells be designated a forest reserve or national park and be designated a Controlled Area under section 58 of the Water Industry Act, (ii) CW-Belize submit an operations manual for CW-Belize's desalination plant to the PUC for approval, (iii) CW-Belize and its customer modify the water supply agreement between the parties to (a) include new water quality parameters included in the Order and (b) cap the current exclusive water supply arrangement in the agreement at a maximum of 450,000 gallons per day, (iv) CW-Belize keep a minimum number of replacement seawater RO membranes in stock at all times and (v) CW-Belize take possession of and reimburse the PUC for certain equipment which the PUC purchased from a third-party in late 2010. CW-Belize has applied for declaratory judgment and has been granted a temporary injunction to stay the enforcement of the Second Order by the PUC until such time as the matter could be heard by the Belize courts. The initial hearing on this matter was conducted on October 30 and 31, 2012 with an additional hearing on November 29, 2012. The ruling on this case is pending. We are presently unable to determine what impact the Order and the Second Order will have on our results of operations, financial position or cash flows.

Transfers of U.S. dollars from CW-Belize to our other subsidiaries require authorization in advance from the Central Bank of Belize.

Material Expenditures and Commitments

The following table summarizes our contractual obligations as of December 31, 2014:

	Total	2015	2016-2018	2019-2021	2022 and Thereafter
Demand loan payable ⁽¹⁾	\$9,196,227	\$2,144,282	\$7,051,945	\$ -	\$ -
Employment agreements	3,099,351	1,805,433	1,293,918	-	-
Operating leases	5,432,097	728,452	1,570,923	753,478	2,379,244
Purchase obligations	1,397,286	1,218,946	178,340	-	-
Security deposits	224,827	-	50,000	124,827	50,000
Total	\$19,349,788	\$5,897,113	\$10,145,126	\$ 878,305	\$2,429,244

(1) Includes interest costs to be incurred.

CW-Bahamas Liquidity

Transfers of U.S. dollars from CW-Bahamas to our other subsidiaries require authorization in advance from the Central Bank of The Bahamas.

CW-Bahamas Performance Guarantees

Our contract to supply water to the WSC from our Blue Hills plant requires us to guarantee delivery of a minimum quantity of water per week. If we do not meet this minimum, we are required to pay the WSC for the difference between the minimum and actual gallons delivered at a per gallon rate equal to the price per gallon that WSC is currently paying us under the contract. The Blue Hills contract expires in 2032 and requires us to deliver 63.0 million gallons of water each week.

Dividends

- On January 31, 2014, we paid a dividend of \$0.075 to shareholders of record on January 1, 2014.
 - On April 30, 2014, we paid a dividend of \$0.075 to shareholders of record on April 1, 2014.
 - On July 31, 2014, we paid a dividend of \$0.075 to shareholders of record on July 1, 2014.
 - On October 31, 2014, we paid a dividend of \$0.075 to shareholders of record on October 1, 2014.
 - On January 31, 2015, we paid a dividend of \$0.075 to shareholders of record on January 1, 2015.
- On February 10, 2015, our Board declared a dividend of \$0.075 payable on April 30, 2015 to shareholders of record on April 1, 2015.

We have paid dividends to owners of our common shares and redeemable preferred shares since we began declaring dividends in 1985. Our payment of any future cash dividends will depend upon our earnings, financial condition, cash flows, capital requirements and other factors our Board deems relevant in determining the amount and timing of such dividends.

Dividend Reinvestment and Common Stock Purchase Plan.

This program is available to our shareholders, who may reinvest all or a portion of their common cash dividends into shares of common stock at prevailing market prices and may also invest optional cash payments to purchase additional shares at prevailing market prices as part of this program.

Impact of Inflation

Under the terms of our Cayman Islands license and our water sales agreements in The Bahamas, Belize and the British Virgin Islands, our water rates are automatically adjusted for inflation on an annual basis, subject to temporary exceptions. We, therefore, believe that the impact of inflation on our gross profit, measured in consistent dollars, will not be material. However, significant increases in items such as fuel and energy costs could create additional credit risks for us, as our customers' ability to pay our invoices could be adversely affected by such increases.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

Credit Risk

We are not exposed to significant credit risk on retail customer accounts in the Cayman Islands as our policy is to cease supply of water to customers whose accounts are more than 45 days overdue. Our primary exposure to credit risk is from accounts receivable arising from bulk water sales to the governments of Belize, The Bahamas, the British Virgin Islands, and the Cayman Islands.

As of December 31, 2014, we had approximately \$7.3 million in loans receivable due from the Water Authority-Cayman. These loans were current as to scheduled principal and interest payments as of December 31, 2014.

Interest Rate Risk

We are not exposed to significant interest rate risk as the balance of our demand loan payable is not material to our operations or financial condition.

Foreign Exchange Risk

All of the currencies in our operating areas other than the Mexican peso, Indonesian rupiah (“IDR”) and the euro have been fixed to the dollar for over 30 years and we do not employ a hedging strategy against exchange rate risk associated with our reporting in dollars. If any of these fixed exchange rates becomes a floating exchange rate or if any of the foreign currencies in which we conduct business depreciate significantly against the dollar, our results of operations and financial condition could be adversely affected.

As a result of our foreign operations, we have revenues and expenses, and assets and liabilities that are denominated in foreign currencies that are subject to variable foreign exchange rates. A 10% hypothetical adverse change in foreign exchange rates applied consistently to our financial instruments subject to foreign exchange risk would result in an increase or decrease in our consolidated net income of approximately \$262,000 as of December 31, 2014. A 10% hypothetical adverse change in foreign exchange rates applied variably to our financial instruments subject to foreign exchange risk would result in an increase or decrease in our consolidated net income of approximately \$367,000 as of December 31, 2014.

Although operations generally are conducted in the relevant local currency, we also are subject to foreign exchange transaction exposure when our subsidiaries transact business in a currency other than their own functional currency.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Stockholders

Consolidated Water Co. Ltd.

We have audited the accompanying consolidated balance sheets of Consolidated Water Co. Ltd. as of December 31, 2014 and 2013, and the related consolidated statements of income, comprehensive income (loss), stockholders' equity and cash flows for each of the years in the three-year period ended December 31, 2014. We also have audited Consolidated Water Co. Ltd.'s internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control—Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Consolidated Water Co. Ltd.'s management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on these consolidated financial statements and an opinion on the Company's internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the consolidated financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Consolidated Water Co. Ltd. as of December 31, 2014 and 2013, and the consolidated results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2014 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, Consolidated Water Co. Ltd. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control—Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

CONSOLIDATED WATER CO. LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Principal activity

Consolidated Water Co. Ltd., and its subsidiaries (collectively, the “Company”) use reverse osmosis technology to produce potable water from seawater. The Company processes and supplies water to its customers in the Cayman Islands, Belize, The Bahamas, the British Virgin Islands and Indonesia. The Company sells water to a variety of customers, including public utilities, commercial and tourist properties, residential properties and government facilities. The base price of water supplied by the Company, and adjustments thereto, are determined by the terms of a license and supply contracts, which provide for adjustments based upon the movement in the government price indices specified in the licenses and contracts, as well as monthly adjustments for changes in the cost of energy. The Company also provides engineering and design services for water plant construction, and manages and operates water plants owned by others.

2. Accounting policies

Basis of preparation: The consolidated financial statements presented are prepared in accordance with the accounting principles generally accepted in the United States of America.

Use of estimates: The preparation of consolidated financial statements in conformity with the accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Significant items subject to estimates and assumptions include the carrying value of property, plant and equipment, intangible assets, goodwill and the fair value of the Company’s investment in affiliate. Actual results could differ significantly from such estimates.

Basis of consolidation: The accompanying consolidated financial statements include the accounts of the Company’s (i) wholly-owned subsidiaries, Aquilex, Inc., Cayman Water Company Limited (“Cayman Water”), Consolidated Water (Belize) Limited (“CW-Belize”), Ocean Conversion (Cayman) Limited (“OC-Cayman”), DesalCo Limited (“DesalCo”), Consolidated Water Cooperatief, U.A. (“CW-Cooperatief”); (ii) majority-owned subsidiaries Consolidated Water (Bahamas) Ltd. (“CW-Bahamas”), Consolidated Water (Asia) Pte. Limited, PT Consolidated Water Bali (“CW-Bali”) and

N.S.C. Agua, S.A. de C.V. (“NSC”). The Company’s investment in its affiliate, Ocean Conversion (BVI) Ltd. (“OC-BVI”), is accounted for using the equity method of accounting. All significant intercompany balances and transactions have been eliminated in consolidation.

Foreign currency: The Company’s reporting currency is the United States dollar (“US\$”). The functional currency of the Company and its foreign operating subsidiaries (other than its majority-owned subsidiary, NSC) is the currency for each respective country. The functional currency for NSC is the US\$. The exchange rates between the Cayman Islands dollar, the Belize dollar, the Bahamian dollar are fixed to the US\$. CW-Cooperatief conducts business in US\$ and euros, CW-Bali conducts business in US\$ and Indonesian rupiahs, and NSC conducts business in US\$ and Mexican pesos. The exchange rates for conversion of euros, rupiahs and Mexican pesos into US\$ vary based upon market conditions. Net foreign currency gains (losses) arising from transactions conducted in foreign currencies were (\$111,409), (\$197,396) and \$68,355 for the years ended December 31, 2014, 2013 and 2012, respectively, and are included in other income (expense), net in the consolidated statements of income.

Comprehensive income: Comprehensive income (loss) is defined as the change in equity during a period from transactions and other events from non-owner sources. Comprehensive income (loss) is the total of net income and other comprehensive income (loss) which, for the Company, is comprised entirely of foreign currency translation adjustments related to CW-Bali.

Cash and cash equivalents: Cash and cash equivalents consist of demand deposits at banks and highly liquid deposits at banks with an original maturity of three months or less.

As of December 31, 2014, the Company had deposits in U.S. banks in excess of federally insured limits of approximately \$527,000. As of December 31, 2014, the Company held cash in foreign bank accounts of approximately \$36.3 million.

Marketable securities: Marketable securities consist primarily of marketable debt obligations with maturities of less than one year, are accounted for as trading securities, and stated at fair value. Any unrealized gains and losses on these securities are recognized in the consolidated statement of income.

Accounts receivable and allowance for doubtful accounts: Accounts receivable are recorded at invoiced amounts based on meter readings or minimum take-or-pay amounts per contractual agreements. The allowance for doubtful accounts is the Company's best estimate of the amount of probable credit losses in the Company's existing accounts receivable balance. The Company determines the allowance for doubtful accounts based on historical write-off experience and monthly review of delinquent accounts. Past due balances are reviewed individually for collectability and disconnection. Account balances are charged off against the allowance for doubtful accounts after all means of collection have been exhausted and the potential for recovery is considered by management to be remote.

Inventory: Inventory primarily includes consumables stock and spare parts stock that are valued at the lower of cost or net realizable value with cost determined on the first-in, first-out basis. Inventory also includes potable water held in the Company's reservoirs. The carrying amount of the water inventory is the lower of the average cost of producing water during the year or its net realizable value.

Loans receivable: Loans receivable relate to notes receivable from customers arising from the construction and sale of water desalination plants. The allowance for loan losses, if any, is the Company's best estimate of the amount of probable credit losses in the Company's existing loans and is determined on an individual loan basis.

Property, plant and equipment: Property, plant and equipment is stated at cost less accumulated depreciation. Depreciation is calculated using a straight line method with an allowance for estimated residual values. Rates are determined based on the estimated useful lives of the assets as follows:

Buildings	5 to 40 years
Plant and equipment	4 to 40 years
Distribution system	3 to 40 years
Office furniture, fixtures and equipment	3 to 10 years
Vehicles	3 to 10 years
Leasehold improvements	Shorter of 5 years or lease term
Lab equipment	5 to 10 years

Additions to property, plant and equipment are comprised of the cost of the contracted services, direct labor and materials. Assets under construction are recorded as additions to property, plant and equipment upon completion of the projects. Depreciation commences in the month the asset is placed in service.

Long-lived assets: Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets might not be recoverable. Conditions that would necessitate an impairment assessment include a significant decline in the observable market value of an asset, a significant change in the extent or manner in which an asset is used, or a significant adverse change that would indicate that the carrying

amount of an asset or group of assets is not recoverable. For long-lived assets to be held and used, the Company recognizes an impairment loss only if its carrying amount is not recoverable through its undiscounted cash flows and measures the impairment loss based on the difference between the carrying amount and fair value.

During 2012, the Company determined, after assessing the economic prospects for one of CW-Bahamas' reverse osmosis desalination plants, that the carrying value of this plant's assets were likely not recoverable from its undiscounted future cash flows. Accordingly, the Company recorded an impairment loss of \$432,727 for the year ended December 31, 2012 to reduce the carrying value of this plant to its estimated fair value.

Construction in progress: Interest costs directly attributable to the acquisition and construction of qualifying assets, which are assets that necessarily take a substantial period of time to be ready for their intended use, are added to the cost of those assets until such time as the assets are substantially ready for use. No interest was capitalized during the years ended December 31, 2014, 2013 or 2012.

Goodwill and intangible assets: Goodwill represents the excess cost over the fair value of the assets of an acquired business. Goodwill and intangible assets acquired in a business combination accounted for as a purchase and determined to have an indefinite useful life are not amortized, but are tested for impairment at least annually. Intangible assets with estimable useful lives are amortized over their respective estimated useful lives to their estimated residual values and reviewed periodically for impairment. The Company evaluates the possible impairment of goodwill annually as part of its reporting process for the fourth quarter of each fiscal year. Management identifies the Company's reporting units and determines the carrying value of each reporting unit by assigning the assets and liabilities, including the existing goodwill and intangible assets, to those reporting units. The Company determines the fair value of each reporting unit and compares the fair value to the carrying amount of the reporting unit. To the extent the carrying amount of the reporting unit exceeds the fair value of the reporting unit, the Company is required to perform the second step of the impairment test, as this is an indication that the reporting unit goodwill may be impaired. In this step, the Company compares the implied fair value of the reporting unit goodwill with the carrying amount of the reporting unit goodwill. The implied fair value of goodwill is determined by allocating the fair value of the reporting unit to all the assets (recognized and unrecognized) and liabilities of the reporting unit in a manner similar to a purchase price allocation. The residual fair value after this allocation is the implied fair value of the reporting unit goodwill. If the implied fair value is less than its carrying amount, the impairment loss is recorded.

For each of the years in the three-year period ended December 31, 2014 the Company estimated the fair value of its reporting units by applying the discounted cash flow method, the subject company stock price method, the guideline public company method, the mergers and acquisitions method and, on an exception basis and where necessary and appropriate, the net asset value method.

The discounted cash flow method relied upon seven-year discrete projections of operating results, working capital and capital expenditures, along with a terminal value subsequent to the discrete period. These seven-year projections were based upon historical and anticipated future results, general economic and market conditions, and considered the impact of planned business and operational strategies. The discount rates for the calculations represented the estimated cost of capital for market participants at the time of each analysis. In preparing these seven-year projections for its retail unit the Company (i) identified possible outcomes of its on-going negotiations with the Cayman Islands government for the renewal of its retail license; (ii) estimated the cash flows associated with each possible outcome; and (iii) assigned a probability to each outcome and associated estimated cash flows. The weighted average estimated cash flows were then summed to determine the overall fair value of the retail unit under this method. The possible outcomes used for the discounted cash flow method for the retail unit included the implementation of a rate of return on invested capital model, the methodology proposed by Cayman Islands government representatives for the new retail license.

The Company also estimated the fair value of each of its reporting units for each of the years in the three-year period ended December 31, 2014 through reference to the quoted market prices for the Company and guideline companies and the market multiples implied by guideline merger and acquisition transactions. For the year ended December 31, 2012, the Company also relied upon net asset values to estimate the fair value of its services unit.

The Company weighted the fair values estimated for each of its reporting units under each method and summed such weighted fair values to estimate the overall fair value for each reporting unit. The Company changed the relative weightings for 2013 from those used for 2012 to increase the weightings applied to those methods that resulted in more conservative estimates of fair value. The respective weightings the Company applied to each method for the year ended December 31, 2014 were consistent with those used for the year ended December 31, 2013 and are as follows:

Method	2014		2013	
	Retail	Bulk	Retail	Bulk
Discounted cash flow	50 %	50 %	50 %	50 %
Subject company stock price	30 %	30 %	30 %	30 %
Guideline public company	10 %	10 %	10 %	10 %
Mergers and acquisitions	10 %	10 %	10 %	10 %
	100 %	100 %	100 %	100 %

The fair values the Company estimated for its retail and bulk units exceeded their carrying amounts by 39% and 6%, respectively, for the year ended December 31, 2012. The fair value the Company estimated for its services unit for the year ended December 31, 2012 was 10% less than its carrying amount. As a result of this estimate and the Company's subsequent step 2 analysis of the implied fair value of the goodwill recorded for its services unit, the Company recorded an impairment charge for the services unit goodwill of \$88,717 for the year ended December 31, 2012. The fair values the Company estimated for its retail and bulk units exceeded their carrying amounts by 47% and 23%, respectively, for the year ended December 31, 2013, and by 36% and 29%, respectively, for the year ended December 31, 2014.

The Company also performed an analysis reconciling the conclusions of value for its reporting units to its market capitalization as of October 1, 2014. This reconciliation resulted in an implied control premium for the Company of 1%.

Investments: Investments where the Company does not exercise significant influence over the operating and financial policies of the investee and holds less than 20% of the voting stock are recorded at cost. The Company uses the equity method of accounting for investments in common stock where the Company holds 20% to 50% of the voting stock of the investee and has significant influence over its operating and financial policies but does not meet the criteria for consolidation. The Company recognizes impairment losses on declines in the fair value of the stock of investees that are other than temporary.

Other assets: Under the terms of CW-Bahamas' contract with the Water and Sewerage Corporation of The Bahamas to supply water from its Blue Hills desalination plant, CW-Bahamas was required to reduce the amount of water lost by the public water distribution system on New Providence Island, The Bahamas, over a one year period by 438 million gallons. CW-Bahamas met the requirements of this non-revenue water ("NRW") component of the agreement during 2007. The Company was solely responsible for the engineering, labor and materials costs incurred to effect the reduction in lost water, which were capitalized and are being amortized on a straight-line basis over the remaining life of the original Blue Hills contract. Such costs are included in other assets and aggregated approximately \$3.5 million as of December 31, 2014 and 2013. Accumulated amortization for these NRW costs was approximately \$1.5 million and \$1.3 million as of December 31, 2014 and 2013, respectively.

Other liabilities: Other liabilities consist of security deposits and advances in aid of construction. Security deposits are received from large customers as security for trade receivables. Advances in aid of construction are recognized as a liability when advances are received from condominium developers in the licensed area to help defray the capital expenditure costs of the Company. These advances do not represent loans to the Company and are interest free. However, the Company allows a discount of ten percent on future supplies of water to these developments until the aggregate discounts allowed are equivalent to advances received. Discounts are charged against advances received.

Income taxes: The Company accounts for the income taxes arising from the operations of its United States subsidiary, Aquilex, Inc., under the asset and liability method. Deferred tax assets and liabilities, if any, are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. A valuation allowance is provided to the extent any deferred tax asset may not be realized.

CW-Belize is liable for business and corporate income taxes. Under the terms of its water supply agreement with Belize Water Services Ltd. ("BWSL"), its sole customer, CW-Belize is reimbursed by BWSL for all taxes that it is required to pay and records this reimbursement as an offset to its tax expense.

Other than Bali, Indonesia, the Company is not presently subject to income taxes in the other countries in which it operates.

Plant construction revenue and cost of plant construction revenue: The Company recognizes revenue and related costs as work progresses on fixed price contracts for the construction of desalination plants to be sold to third parties using the percentage-of-completion method, which relies on contract revenue and estimates of total expected costs. The Company follows this method since it can make reasonably dependable estimates of the revenue and costs applicable to various stages of a contract. Under the percentage-of-completion method, the Company records revenue and recognizes profit or loss as work on the contract progresses. The Company estimates total project costs and profit to be earned on each long term, fixed price contract prior to commencement of work on the contract and updates these estimates as work on the contract progresses. The cumulative amount of revenue recorded on a contract at a specified point in time is that percentage of total estimated revenue that incurred costs to date comprises of estimated total contract costs. If, as work progresses, the actual contract costs exceed estimates, the profit recognized on revenue from that contract decreases. The Company recognizes the full amount of any estimated loss on a contract at the time the estimates indicate such a loss. Any costs and estimated earnings in excess of billings are classified as current assets. Billings in excess of costs and estimated earnings on uncompleted contracts, if any, are classified as current liabilities.

The Company assumes the risk that the costs associated with constructing the plant may be greater than it anticipated in preparing its bid. However, the terms of each of the sales contracts with its customers require the Company to guarantee the sales price for the plant at the bid amount. Because the Company bases its contracted sales price in part on its estimation of future construction costs, the profitability of its plant sales is dependent on its ability to estimate these costs accurately. The cost estimates the Company prepares in connection with the construction of plants to be sold to third parties are subject to inherent uncertainties. The cost of materials and construction may increase significantly after the Company submits its bid for a plant due to factors beyond the Company's control, which could cause the profit margin for a plant to be less than the Company anticipated when the bid was made. The profit margin the Company initially expects to generate from a plant sale could be further affected by other factors, such as hydro-geologic conditions at the plant site that differ materially from those the Company believes exists, and therefore

relies upon, in preparing its bid.

Revenue from water sales: The Company recognizes revenues from water sales at the time water is supplied to the customer's facility or storage tank. The amount of water supplied is determined based upon water meter readings performed at the end of each month. Under the terms of both its license agreement with the government of the Cayman Islands and its bulk water supply contracts, the Company is entitled to charge its customers the greater of a minimum monthly charge or the price for water supplied during the month.

Comparative amounts: Certain amounts presented in the financial statements previously issued for 2013 and 2012 have been reclassified to conform to the current year's presentation.

3. Cash and cash equivalents

Cash and cash equivalents are not restricted by the terms of the Company's bank accounts as to withdrawal or use. As of December 31, 2014 and 2013, the equivalent United States dollars are denominated in the following currencies:

	December 31,	
	2014	2013
Bank accounts:		
United States dollar	\$7,809,107	\$10,484,207
Cayman Islands dollar	4,274,025	5,275,615
Bahamian dollar	6,822,761	3,090,021
Belize dollar	3,658,705	3,055,990
Bermudian dollar	5,507	6,759
Mexican Peso	53,203	11,227

Transfers from the Company's Bahamas and Belize bank accounts to Company bank accounts in other countries require the approval of the Central Bank of the Bahamas and Belize, respectively.

4. Accounts receivable

	December 31	
	2014	2013
Trade accounts receivable	\$ 10,722,177	\$ 18,666,283
Receivable – construction project	415,305	-
Receivable from affiliate	49,154	53,867
Other accounts receivable	780,446	362,453
	11,967,082	19,082,603
Allowance for doubtful accounts	(193,338)	(223,043)
	\$ 11,773,744	\$ 18,859,560

The activity for the allowance for doubtful accounts consisted of:

	December 31	
	2014	2013
Opening allowance for doubtful accounts	\$ 223,043	\$ 223,043
Provision for doubtful accounts	-	32,933
Accounts written off during the year	(29,705)	(32,933)
Ending allowance for doubtful accounts	\$ 193,338	\$ 223,043

Significant concentrations of credit risk are disclosed in Note 20.

5. Inventory

	December 31,	
	2014	2013
Water stock	\$38,353	\$28,222
Consumables stock	204,180	224,584
Spare parts stock	5,736,826	5,334,418
Total inventory	5,979,359	5,587,224
Less current portion	1,738,382	1,383,135

Inventory (non-current) \$4,240,977 \$4,204,089

6. Loans receivable

	December 31,	
	2014	2013
All loans receivable are due from the Water Authority-Cayman and consisted of:		
Two loans originally aggregating \$10,996,290, bearing interest at 6.5% per annum, receivable in aggregate monthly installments of \$124,827 to May 2019, and secured by the machinery and equipment of the North Side Water Works plant.	\$5,831,504	\$6,912,337
Two loans originally aggregating \$1,738,000, bearing interest at 5% per annum, receivable in aggregate monthly installments of \$24,565 to March 2014, and secured by the machinery and equipment of the North Sound plant.	-	73,084
Two loans originally aggregating \$3,671,039, bearing interest at 6.5% per annum, receivable in aggregate monthly installments of \$54,513 to June 2017, and secured by the machinery and equipment of the Red Gate plant.	1,505,673	2,042,858
Total loans receivable	7,337,177	9,028,279
Less current portion	1,726,310	1,691,102
Loans receivable, excluding current portion	\$5,610,867	\$7,337,177

7. Property, plant and equipment and construction in progress

	December 31,	
	2014	2013
Land	\$3,223,361	\$3,223,361
Buildings	18,462,770	18,422,087
Plant and equipment	61,679,293	60,552,890
Distribution system	31,481,048	30,719,858
Office furniture, fixtures and equipment	3,159,699	3,010,080
Vehicles	1,273,803	1,251,653
Leasehold improvements	260,519	235,930
Lab equipment	28,743	28,942
	119,569,236	117,444,801
Less accumulated depreciation	63,172,248	58,841,915
Property, plant and equipment, net	\$56,396,988	\$58,602,886
Construction in progress	\$1,900,016	\$1,450,417

As of December 31, 2014, the Company had outstanding capital commitments of \$199,528. The Company maintains insurance for loss or damage to all fixed assets that it deems susceptible to loss. The Company does not insure its underground distribution system as the Company considers the possibility of material loss or damage to this system to be remote. During the years ended December 31, 2014 and 2013, \$2,693,622 and \$4,924,980, respectively, of construction in progress was placed in service. Depreciation expense was \$5,355,771, \$5,113,589, and \$7,381,759 for the years ended December 31, 2014, 2013 and 2012, respectively.

8. Investment in OC-BVI

The Company owns 50% of the outstanding voting common shares and a 43.5% equity interest in the profits of Ocean Conversion (BVI) Ltd. (“OC-BVI”). The Company also owns certain profit sharing rights in OC-BVI that raise its effective interest in the profits of OC-BVI to approximately 45%. Pursuant to a management services agreement, OC-BVI pays the Company monthly fees for certain engineering and administrative services. OC-BVI’s sole customer is the Ministry of Communications and Works of the Government of the British Virgin Islands (the “Ministry”) to which it sells bulk water.

The Company’s equity investment in OC-BVI amounted to \$5,208,603 and \$6,623,448 as of December 31, 2014 and 2013, respectively.

Until 2009, substantially all of the water sold by OC-BVI to the Ministry was supplied by one desalination plant with a capacity of 1.7 million gallons per day located at Baughers Bay, Tortola (the “Baughers Bay plant”). As discussed later in this Note (see “*Baughers Bay litigation*”), the BVI government assumed the operating responsibilities for the Baughers Bay plant in March 2010. During 2007, OC-BVI completed the construction of a desalination plant with a capacity of 720,000 gallons per day located at Bar Bay, Tortola (the “Bar Bay plant”). OC-BVI began selling water to the Ministry from this plant in January 2009 and on March 4, 2010, OC-BVI and the BVI government executed a seven-year contract for the Bar Bay plant (the “Bar Bay agreement”). Under the terms of the Bar Bay agreement, OC-BVI delivers up to 600,000 gallons of water per day to the BVI government from the Bar Bay plant. The Bar Bay agreement includes a seven-year extension option exercisable by the BVI government and required OC-BVI to complete a storage reservoir on a BVI government site by no later than March 4, 2011. OC-BVI has not commenced construction of this storage reservoir due to the BVI government’s failure to pay (i) the full amount of invoices for the water provided by the Bar Bay plant on a timely basis; and (ii) the full amount ordered pursuant to a court ruling relating to the Baughers Bay litigation (see discussion that follows).

Summarized financial information for OC-BVI is as follows:

	December 31,	
	2014	2013
Current assets	\$2,547,542	\$3,391,411
Non-current assets	5,297,904	5,954,304
Total assets	\$7,845,446	\$9,345,715

	December 31,	
	2014	2013
Current liabilities	\$427,269	\$717,887
Non-current liabilities	1,393,200	1,688,850
Total liabilities	\$1,820,469	\$2,406,737

	Year Ended December 31,		
	2014	2013	2012
Revenues	\$4,679,829	\$4,711,091	\$4,371,520
Gross profit	\$1,846,822	\$1,824,271	\$1,545,568
Income from operations	\$906,750	\$866,528	\$496,755
Other income (expense), net ⁽¹⁾	\$(188,751)	\$1,411,932	\$4,410,425
Net income attributable to controlling interests	\$696,954	\$2,250,667	\$4,873,236

(1) Other income (expense), net, includes \$2.0 million and \$4.7 million for the years ended December 31, 2013 and 2012, respectively, in award amounts received under the Court ruling for the Baughers Bay litigation.

The Company recognized \$303,380, \$979,716 and \$2,121,319 in earnings from its equity investment in OC-BVI for the years ended December 31, 2014, 2013 and 2012, respectively. The Company recognized \$111,375, \$357,636 and \$343,454 in profit sharing income from its profit sharing agreement with OC-BVI for the years ended December 31, 2014, 2013 and 2012, respectively.

For the years ended December 31, 2014, 2013, and 2012, the Company recognized \$747,340, \$784,626, and \$469,625, respectively, in revenues from sales of consumable stock and its management services agreement with OC-BVI, which is included in services revenues in the accompanying consolidated statement of income. The Company's remaining unamortized balance recorded for this management services agreement, which is reflected as an intangible asset on the consolidated balance sheet, was approximately \$196,000 and \$285,000 as of December 31, 2014 and 2013, respectively (see Note 10).

Baughers Bay litigation:

Under the terms of a water supply agreement dated May 1990 (the “1990 Agreement”) between OC-BVI and the Government of the British Islands (the “BVI Government”), upon the expiration of its initial seven-year term in May 1999, the 1990 Agreement would automatically be extended for another seven-year term unless the BVI government provided notice, at least eight months prior to such expiration, of its decision to purchase the plant from OC-BVI at the agreed upon amount under the 1990 Agreement of approximately \$1.42 million. In correspondence between the parties from late 1998 through early 2000, the BVI government indicated that it intended to purchase the plant but would be amenable to negotiating a new water supply agreement, and that it considered the 1990 Agreement to be in force on a monthly basis until negotiations between the BVI government and OC-BVI were concluded. Occasional discussions were held between the parties since 2000 without resolution of the matter. OC-BVI continued to supply water from the plant and expended approximately \$4.7 million between 1995 and 2003 to significantly expand the production capacity of the plant beyond that contemplated in the 1990 Agreement.

In 2006, the BVI government took the position that the seven-year extension of the 1990 Agreement had been completed and that it was entitled to ownership of the Baughers Bay plant. In response, OC-BVI disputed the BVI government’s contention that the original terms of the 1990 Agreement remained in effect.

During 2007, the BVI government significantly reduced the amount and frequency of its payments for the water being supplied by OC-BVI and filed a lawsuit with the Eastern Caribbean Supreme Court (the “Court”) seeking ownership of the Baughers Bay plant. OC-BVI counterclaimed to the Court that it was entitled to continued possession and operation of the Baughers Bay plant until the BVI government paid OC-BVI approximately \$4.7 million, which OC-BVI believed represented the value of the Baughers Bay plant at its expanded production capacity. OC-BVI subsequently filed claims with the Court seeking payment for water sold and delivered to the BVI government through May 31, 2009 at the contract prices in effect before the BVI government asserted its purported right of ownership of the plant.

The Court ruled on this litigation in 2009, determining that (1) the BVI government was entitled to immediate ownership and possession of the Baughers Bay plant and dismissed OC-BVI’s claim for compensation of approximately \$4.7 million for the expenditures made to expand the production capacity of the plant; (2) OC-BVI was entitled to full payment of water invoices issued up to December 20, 2007, which had been calculated under the terms of the original 1990 Agreement; and (3) OC-BVI was entitled to the amount of \$10.4 million for water produced by OC-BVI from the Baughers Bay plant subsequent to December 20, 2007. The BVI government made a payment of \$2.0 million to OC-BVI under the Court order during the fourth quarter of 2009, a second payment of \$2.0 million under the Court order during 2010 and a third payment under the Court order of \$1.0 million in 2011.

OC-BVI filed an appeal with the Eastern Caribbean Court of Appeals (the “Appellate Court”) in October 2009 asking the Appellate Court to review the September 17, 2009 ruling by the Court as it related to OC-BVI’s claim for compensation for expenditures made to expand the production capacity of the Baughers Bay plant. In October 2009, the BVI government also filed an appeal with the Appellate Court requesting the Appellate Court to reduce the \$10.4 million awarded by the Court to OC-BVI for water supplied subsequent to December 20, 2007 to an amount equal to the cost of producing such water.

In March 2010, OC-BVI vacated the Baughers Bay plant and the BVI government assumed direct responsibility for the plant’s operations.

In June 2012, the Appellate Court issued the final ruling with respect to the Baughers Bay litigation. This ruling dismissed the BVI government’s appeal against the previous judgment of the Court awarding \$10.4 million for the water supplied, and also awarded OC-BVI compensation for improvements made to the plant in the amount equal to the difference between (i) the value of the Baughers Bay plant at the date OC-BVI transferred possession of the plant to the BVI government and (ii) \$1.42 million (the purchase price for the Baughers Bay plant under the 1990 Agreement). OC-BVI was also awarded all of its court costs at the trial level and two-thirds of such costs incurred on appeal. Prior to the final ruling, the BVI government had paid only \$5.0 of the original \$10.4 million, and the remaining \$5.4 million amount due had increased to approximately \$6.7 million by the fourth quarter of 2012 due to the court costs awarded by the Appellate Court and the accrued interest due on the aggregate unpaid balance. The BVI government paid OC-BVI \$4.7 million of this amount during the fourth quarter of 2012 and the remaining \$2.0 million in January 2013. These amounts paid by the BVI government were recognized in OC-BVI’s earnings in the periods in which they were received. To date, OC-BVI and the BVI government have not reached an agreement on the

value of the plant at the date it was transferred to the BVI government. However, during the first quarter of 2015, OC-BVI and the BVI government appointed a mutually approved appraiser to complete a valuation of the Baughers Bay plant in accordance with the Appellate Court ruling.

Valuation of Investment in OC-BVI:

The Company accounts for its investment in OC-BVI under the equity method of accounting for investments in common stock. This method requires recognition of a loss on an equity investment that is other than temporary, and indicates that a current fair value of an equity investment that is less than its carrying amount may indicate a loss in the value of the investment. The Company evaluates the possible impairment of its investment in OC-BVI as part of its reporting process for the fourth quarter of each fiscal year.

As a quoted market price for OC-BVI's stock is not available, to test for possible impairment of its investment in OC-BVI, the Company estimates its fair value through the use of the discounted cash flow method, which relies upon projections of OC-BVI's operating results, working capital and capital expenditures. The use of this method requires the Company to estimate OC-BVI's cash flows from (i) the Bar Bay agreement and (ii) the pending amount awarded by the Appellate Court for the value of the Baughers Bay plant previously transferred by OC-BVI to the BVI government.

The Company estimates the cash flows OC-BVI will receive from its Bar Bay agreement by (i) identifying various possible future scenarios for this agreement, which include the cancellation of the agreement after its initial seven-year term, and the exercise by the BVI government of the seven-year extension in the agreement; (ii) estimating the cash flows associated with each possible scenario; and (iii) assigning a probability to each scenario. The Company similarly estimates the cash flows OC-BVI will receive from the BVI government for the amount due under the ruling by the Appellate Court for the value of the Baughers Bay plant at the date it was transferred to the BVI government by assigning probabilities to different valuation scenarios. The resulting probability-weighted sum represents the expected cash flows, and the Company's best estimate of future cash flows, to be derived by OC-BVI from its Bar Bay agreement and the pending Appellate Court award.

The identification of the possible scenarios for the Bar Bay plant agreement and the Baughers Bay plant valuation, the projections of cash flows for each scenario, and the assignment of relative probabilities to each scenario all represent significant estimates made by the Company. While the Company uses its best judgment in identifying these possible scenarios, estimating the expected cash flows for these scenarios and assigning relative probabilities to each scenario, these estimates are by their nature highly subjective and are also subject to material change by the Company's management over time based upon new information or changes in circumstances.

During the fourth quarter of 2014, after reassessing and revising its probability-weighted estimates of OC-BVI's future cash flows and its resulting estimate of the fair value of its investment in OC-BVI, the Company determined that the carrying value of its investment in OC-BVI exceeded its fair value and recorded an impairment loss on this investment of \$860,000. The resulting \$5.2 million carrying value of the Company's investment in OC-BVI as of December 31, 2014 assumes that the BVI government will honor its obligations under the Bar Bay agreement and also assumes (on a probability-weighted basis) that (i) the BVI government will exercise its option to extend the Bar Bay agreement for seven years beyond its initial term, which expires February 2017, and (ii) OC-BVI will receive the pending amount (as estimated by the Company) awarded by the Eastern Caribbean Court of Appeals for the value of the Baughers Bay plant previously transferred by OC-BVI to the BVI government.

The \$5.2 million carrying value of the Company's investment in OC-BVI as of December 31, 2014 exceeds the Company's underlying equity in OC-BVI's net assets by approximately \$2.0 million. The Company accounts for this excess as goodwill. The BVI government is OC-BVI's sole customer and substantially all of OC-BVI's revenues are generated from its Bar Bay plant. As the Bar Bay agreement matures to its February 2017 expiration date, and OC-BVI receives (or is determined by the court to not be entitled to receive) the pending court award amount assumed due for the value of the Baughers Bay plant, OC-BVI's expected future cash flows, and therefore its fair value computed under the discounted cash flow method, will decrease. Unless OC-BVI obtains an expansion or other modification of its Bar Bay agreement that results in a significant increase in the estimated future cash flows from its Bar Bay plant, the Company will be required to record impairment losses in 2015 and 2016 to reduce the carrying value of its investment in OC-BVI to its then current fair value. These impairment losses will, in the aggregate, at least equal the underlying \$2.0 million in goodwill reflected in the carrying value of the Company's investment in OC-BVI. The losses the Company records for its investment in OC-BVI in the future will exceed this \$2.0 million if OC-BVI ultimately ceases operations at its Bar Bay plant, as OC-BVI will be required to record an impairment loss to reduce the carrying value of its Bar Bay plant to its then estimated fair value. OC-BVI's aggregate carrying value of the assets that comprise its Bar Bay plant was approximately \$5.1 million as of December 31, 2014. Future impairment losses for the Company's investment in OC-BVI and the Company's equity in any future operating losses incurred by OC-BVI could have a material adverse impact on the Company's consolidated results of operations.

9. N.S.C. Agua, S.A. de C.V.

In May 2010, the Company acquired, through its wholly-owned Netherlands subsidiary, Consolidated Water Cooperatief, U.A., ("CW-Cooperatief") a 50% interest in N.S.C. Agua, S.A. de C.V. ("NSC"), a development stage Mexican company. The Company has since purchased, through the conversion of a loan it made to NSC, sufficient shares to raise its ownership interest in NSC to 99.9%. NSC was formed to pursue a project encompassing the construction, operation and minority ownership of a 100 million gallon per day seawater reverse osmosis desalination plant to be located in northern Baja California, Mexico and an accompanying pipeline to deliver water to the Mexican potable water infrastructure and the U.S. border (the "Project"). The Company believes the Project can be successful due to what it believes is a growing need for a new potable water supply for the areas of northern Baja California, Mexico and Southern California, U.S.

NSC has engaged engineering groups with extensive regional and/or technical experience to prepare preliminary designs and cost estimates for the desalination plant and the proposed pipeline and prepare the environmental impact studies for local, state and federal regulatory agencies. NSC is presently seeking contracts with proposed customers in Mexico and the U.S. for the sale of the desalinated water from the Project. NSC will be required to accomplish various additional steps before it can commence construction of the plant and pipeline including, but not limited to, obtaining approvals and permits from various governmental agencies in Mexico, securing contracts with its proposed customers to sell water in sufficient quantities and at prices that make the Project financially viable, and obtaining equity and debt financing for the Project. NSC's potential customers will also be required to obtain various governmental permits and approvals in order to purchase water from NSC.

In February 2012, the Company paid \$300,000 to enter into an agreement (the "Option Agreement") that provided it with an option, exercisable through February 7, 2014, to purchase the shares of one of the other shareholders of NSC, along with an immediate power of attorney to vote those shares, for \$1.0 million. Such shares constituted 25% of the ownership of NSC as of February 2012. In May 2013, NSC repaid a \$5.7 million loan payable to CW-Cooperatief by issuing additional shares of its stock. As a result of this share issuance to CW-Cooperatief, the Company acquired 99.9% of the ownership of NSC. The Option Agreement contained an anti-dilution provision that required the Company to issue new shares in NSC of an amount sufficient to maintain the other shareholder's 25% ownership interest in NSC if (i) any new shares of NSC were issued subsequent to the execution of the Option Agreement and (ii) the Company did not exercise its share purchase option by February 7, 2014. The Company exercised its option and paid the \$1.0 million to purchase the Option Agreement shares in February 2014.

NSC entered into a purchase contract for 8.1 hectares of land on which the proposed plant would be constructed and in 2012 obtained an extension of this purchase contract through May 15, 2014 in exchange for prepayments of (i) \$500,000 paid at signing of the extension and (ii) a further \$500,000 paid in May 2013. NSC paid \$7.4 million in May 2014 to complete this land purchase. In 2013, NSC purchased an additional 12 hectares of land for the project for \$12 million, of which \$2 million was paid. NSC paid the remaining \$10 million balance for this land purchase on May 15, 2014.

In 2012 and 2013, NSC conducted an equipment piloting plant and water data collection program at the proposed feed water source for the Project under a Memorandum of Understanding (the "EPC MOU") with a global engineering, procurement and construction contractor for large seawater desalination plants. Under the EPC MOU, the contractor installed and operated an equipment piloting plant and collected water quality data from the proposed feed water source site in Rosarito Beach, Baja California, Mexico. The EPC MOU required that NSC negotiate exclusively with the contractor for the construction of the 100 million gallon per day seawater reverse osmosis desalination plant, and further required payment by NSC to the contractor of up to \$500,000 as compensation for the operation and maintenance of the equipment piloting plant should NSC not award the engineering, procurement and construction contract for the Project to the contractor. This first phase of the pilot plant testing program was completed in October 2013. NSC decided not to extend the EPC MOU beyond its February 2014 expiration date and NSC paid the contractor \$350,000 during the three months ended March 31, 2014 as compensation for the operation and maintenance of the pilot plant.

NSC is currently conducting additional source water sampling protocols to comply with regulatory requirements in the U.S. and Mexico, and is also coordinating with regulators to assess the need, if any, for further process and equipment piloting.

In November 2012, NSC signed a letter of intent with Otay Water District in Southern California to deliver no less than 20 million and up to 40 million gallons of water per day from the plant to the Otay Water District at the border between Mexico and the U.S. On November 25, 2013 Otay Water District submitted an application to the Department of State of the United States of America for a Presidential Permit authorizing the construction, connection, operation and importation of desalinated seawater at the international boundary between the United States and Mexico in San Diego County, California. The Company understands that this application is currently being reviewed by the relevant authorities.

NSC has entered into a 20-year lease, effective November 2012, with the Comisión Federal de Electricidad for approximately 5,000 square meters of land on which it plans to construct the water intake and discharge works for the plant. The amounts due on this lease are payable in Mexican pesos at an amount that is currently equivalent to approximately \$20,000 per month. This lease is cancellable should NSC ultimately not proceed with the Project.

In August 2014, the State of Baja California enacted new legislation to regulate Public-Private Association projects which involve the type of long-term contract between a public sector authority and a private party NSC is required to obtain to complete the Project. Pursuant to this new legislation, on January 4, 2015, NSC submitted an expression of interest for its project to the Secretary of Infrastructure and Urban Development of the State of Baja California (“SIDUE”). On January 23, 2015 SIDUE accepted NSC’s expression of interest and requested that NSC submit a detailed proposal for the Project that complies with requirements of the new legislation. The new legislation requires that such proposal is further evaluated by SIDUE and submitted to the Public-Private Association Projects State Committee (the “APP Committee”) for review and authorization. If the APP Committee grants its authorization, the State of Baja California is required to conduct a public tender for the Project. The Company presently cannot determine if the APP Committee will grant its authorization or, if a public tender process is commenced, when such process will be completed or whether NSC will be awarded the Project.

The Company has acknowledged since its inception that, due to the amount of capital the Project requires, NSC will ultimately need an equity partner or partners to complete the Project. During the fourth quarter of 2014, the Company concluded that its chances of successfully obtaining a contract with Comisión Estatal de Servicios Públicos de Tijuana (“CESPT”) under the new Public-Private Association legislation would be greatly enhanced through the addition of an equity partner for NSC with substantial financial resources and a history of successful capital project investments in Mexico. In February 2015, NSC entered into a Letter of Intent (LOI) with such a potential partner. The terms of this LOI will be binding if and only if NSC and its new partner are ultimately awarded the Project by early February 2016. Pursuant to the LOI, (i) NSC has agreed to sell the land and other Project assets to a new company (“Newco”) that will build and own the Project; (ii) NSC’s potential new partner will provide the majority of the equity for the Project and thereby will own the majority interest in Newco; (iii) NSC will maintain a minority ownership position in Newco; and (iv) Newco will enter into a long term management and technical services contract with NSC for the Project.

On February 20, 2015, NSC received notification from the regulatory authorities in Mexico that its federal environmental impact assessment and mitigation plan for the Project's proposed desalination plant was approved.

Included in the Company's consolidated results of operations are general and administrative expenses from NSC, consisting of organizational, legal, accounting, engineering, consulting and other costs relating to NSC's project development activities. Such expenses amounted to approximately \$3.7 million, \$3.2 million, and \$1.7 million for the years ended December 31, 2014, 2013 and 2012, respectively. The assets and liabilities of NSC included in the Company's consolidated balance sheets amounted to approximately \$22.0 million and \$214,000, respectively, as of December 31, 2014 and approximately \$13.7 million and \$10.3 million, respectively, as of December 31, 2013.

The Company expects to incur additional project development costs on behalf of NSC in 2015 to submit the detailed proposal to CESPT and (if such proposal is successful) to complete the site piloting plant activities, secure feed water and power supplies, complete the engineering and feasibility studies, negotiate customer contracts, obtain the required rights-of-way and regulatory permits and arrange the Project financing.

Despite the expenditures made and the activities the completed to date, the Company may ultimately be unsuccessful in its efforts to complete the Project.

The Mexico tax authority, the Servicio de Administracion Tributaria ("SAT"), has assessed NSC 3,184,745 Mexican pesos for taxes relating to payments to foreign vendors on which the SAT contends should have been subject to income tax withholdings during NSC's 2011 tax year. The SAT has also assessed NSC 1,639,001 Mexican pesos in penalties and 913,711 Mexican pesos in surcharges on these payments bringing the total assessment to 5,737,457 Mexican pesos. Such assessment is equivalent to approximately \$390,000 as of December 31, 2014 based upon the exchange rate between the US\$ and the Mexican peso as of that date.

NSC has retained the assistance of Mexican tax advisers in this matter and believes the assumptions and related work performed by the SAT do not support their tax assessment. As a result, NSC has elected to contest this assessment in Mexico federal tax court. NSC was required to provide an irrevocable letter of credit in the amount of 6,712,634 Mexican pesos as collateral in connection with this tax case. The letter of credit amount includes 975,177 Mexican pesos in additional charges calculated by the SAT to adjust the value of the original assessment to its potential future value at the time when the matter is settled by the tax court.

In November 2014, NSC obtained a favorable judgment by the court. Based on this outcome, SAT filed an appeal shortly thereafter to contest the judgment.

The restricted cash balance of \$456,083 included in the accompanying consolidated December 31, 2014 balance sheet represents cash on deposit with a bank to secure payment of the irrevocable letter of credit.

The Company is presently unable to determine what amount, if any, of this assessment NSC will ultimately be required to pay by the Mexico federal tax court. Consequently, no provision for this potential liability has been made in the accompanying financial statements. Furthermore, if the Mexico federal tax court upholds the assessment made by the SAT for NSC's 2011 tax year, the SAT may seek to levy an assessment on payments of a similar nature made by NSC during tax years subsequent to 2011.

10. Intangible assets

In 2003, as part of the acquisition of a group of companies, the Company acquired 100% of the outstanding voting common shares of DesalCo, which had an agreement to provide management and engineering services to OC-BVI. The Company attributed \$856,356 of the purchase price of the acquisition to the value of this management services agreement, which has no expiration term. Initially the Company determined that this intangible asset had an indefinite life and therefore it was not amortized. However in 2010, as a result of the loss by OC-BVI of its Baughers Bay contract (see Note 8), the Company began amortizing this asset over the life of OC-BVI's remaining seven year water supply contract for its Bar Bay plant.

The carrying amount of the Belize Water Production and Supply Agreement is being amortized over the 23-year term of the agreement which expires in March 2026.

In February 2012, the Company paid \$300,000 to enter into an agreement (the “Option agreement”) that provided it with an option, exercisable through February 7, 2014, to purchase the shares of one of the other shareholders of NSC, along with an immediate power of attorney to vote those shares, for \$1.0 million. This \$300,000 payment was capitalized and amortized over the option period.

	December 31,	
	2014	2013
Cost		
Intangible asset management service agreement	\$856,356	\$856,356
Belize water production and supply agreement	1,522,419	1,522,419
Option agreement	300,000	300,000
	2,678,775	2,678,775
Accumulated amortization		
Intangible asset management service agreement	(660,800)	(570,904)
Belize water production and supply agreement	(790,075)	(723,883)
Option agreement	(300,000)	(287,500)
	(1,750,875)	(1,582,287)
Intangible assets, net	\$927,900	\$1,096,488

Amortization for each of the next five years and thereafter is expected to be as follows:

2015	156,089
2016	156,089
2017	81,955
2018	66,192
2019	66,192
Thereafter	401,383
	\$927,900

11. Dividends

Interim dividends declared on Class A common stock and redeemable preferred stock for each quarter of the respective years ended December 31 were as follows:

	2014	2013	2012
First Quarter	\$0.075	\$0.075	\$0.075
Second Quarter	0.075	0.075	0.075
Third Quarter	0.075	0.075	0.075
Fourth Quarter	0.075	0.075	0.075

12. Long term debt

Long term debt consists of the following:

	December 31,	
	2014	2013
Fixed rate bonds bearing interest at a rate of 5.95%; maturing on August 4, 2016; repayable in quarterly installments of \$526,010; secured through an inter-creditor agreement with the Republic Bank & Trust by substantially all of the Company's assets. Redeemable in full at any time after August 4, 2009 at a premium of 1.5% of the outstanding principal and accrued interest on the bonds on the date of redemption.	\$-	\$5,301,328
Demand loan payable with an original balance of \$10.0 million, payable in quarterly installments of \$500,000 with the remaining principal balance due on May 14, 2016 if not called by the lender; bearing interest at LIBOR plus 1.5%.	9,000,000	-
Total debt	9,000,000	5,301,328
Less discount	-	96,161
Less current portion	9,000,000	5,205,167
Long term debt, excluding current portion	\$-	\$-

The Company prepaid the remaining outstanding balance on its 5.95% fixed rate bonds on February 17, 2014.

Substantially all of the Company assets owned by its Cayman Island subsidiaries are pledged as collateral for the \$10.0 million demand note payable.

13. Share capital and additional paid-in capital

Shares of redeemable preferred stock ("preferred shares") are issued under the Company's Employee Share Incentive Plan (see Note 18) and carry the same voting and dividend rights as shares of common stock ("common shares"). Preferred shares vest over four years and convert to common stock on a share for share basis on the fourth anniversary of each grant date. Preferred shares are only redeemable with the Company's agreement. Upon liquidation, preferred shares rank in preference to the common shares to the extent of the par value of the preferred shares and any related additional paid in capital.

The Company is a party to an Option Deed dated August 6, 1997, and amended on August 8, 2005, September 27, 2005 and May 30, 2007 (as amended, the "Option Deed"), designed to deter coercive takeover tactics. Pursuant to the

Option Deed, the Company granted to the holders of its common shares and redeemable preferred shares options (the "Options") to purchase one one-hundredth of a share of Class 'B' common shares of the Company at an exercise price of \$100.00 per one one-hundredth of a Class 'B' common share, subject to adjustment. The Options are attached to and trade with the Company's common shares and redeemable preferred shares, and no separate certificates representing the Options have been distributed. The Options will separate from the Company's common shares and redeemable preferred shares, and certificates representing the Options will be issued, upon the earlier of the date (such date, the "Distribution Date") that is (i) ten business days following a public announcement that a person or group of affiliated or associated persons (an "Acquiring Person") has acquired, or obtained the right to acquire, beneficial ownership of 20% or more of the Company's outstanding common shares, or (ii) ten business days following the commencement of a tender offer or exchange offer that would result in a person or group becoming an Acquiring Person.

The Options are not exercisable until the Distribution Date and will expire at the close of business on July 31, 2017, unless that date is extended or the Options are earlier redeemed by us. Additionally, following the Distribution Date, all Options that are, or in certain circumstances were, beneficially owned by any Acquiring Person will be null and void.

For a period of ten business days following the date that any person, alone or jointly with its affiliates and associates, becomes an Acquiring Person, the Company will have the right to redeem the Options at a price of C\$0.01 per Option. If the Options are not redeemed, then following such ten business day period each holder of an Option will have the right to receive on exercise, in lieu of one one-hundredth of a Class 'B' common share, common shares of the Company (or, in certain circumstances, cash, property or other securities) having a value equal to two times the exercise price of the Option. For example, at an exercise price of \$100.00 per Option, each Option not owned by an Acquiring Person (or by certain related parties) following any person, alone or jointly with its affiliates and associates, becoming an Acquiring Person would entitle its holder to purchase \$200.00 worth of the Company's common shares for \$100.00. Assuming that the common shares had a per share value of \$20.00 at such time, the holder of each valid Option would be entitled to purchase 10 common shares for \$100.00.

Any of the provisions of the Option Deed may be amended by the Company's Board of Directors prior to the Distribution Date. After the Distribution Date, the provisions of the Option Deed may be amended by the Board of Directors in order to cure any ambiguity, to make changes which do not adversely affect the interests of holders of Options (excluding the interests of any Acquiring Person), or to shorten or lengthen any time period under the Option Deed.

14. Cost of revenues and general and administrative expenses

	Year Ended December 31,		
	2014	2013	2012
Cost of revenues consist of:			
Electricity	\$14,631,638	\$13,634,617	\$14,473,583
Depreciation	5,077,293	4,822,967	6,959,912
Fuel oil	8,726,195	10,106,409	10,078,724
Employee costs	4,630,609	4,422,093	4,423,899
Cost of plant sales	1,470,045	-	-
Maintenance	3,131,947	2,332,893	2,849,453
Retail license royalties	1,405,067	1,357,988	1,451,672
Insurance	1,397,799	1,499,201	1,625,733
Other	1,972,987	2,140,084	1,595,284
	\$42,443,580	\$40,316,252	\$43,458,260
General and administrative expenses consist of:			
Employee costs	\$6,314,908	\$6,218,948	\$5,751,142
Insurance	923,089	969,370	968,662

Directors' fees and expenses	686,228	752,044	533,715
Depreciation	278,478	290,622	421,851
NSC project expenses	3,702,332	3,158,309	1,656,831
Other	3,324,477	3,449,515	4,026,956
	\$16,654,439	\$15,844,303	\$14,542,817

15. Earnings per share

Earnings per share ("EPS") are computed on a basic and diluted basis. Basic EPS is computed by dividing net income (less preferred stock dividends) available to common stockholders by the weighted average number of common shares outstanding during the period. The computation of diluted EPS assumes the issuance of common shares for all potential common shares outstanding during the reporting period and, if dilutive, the effect of stock options as computed under the treasury stock method.

The following summarizes information related to the computation of basic and diluted EPS for the respective years ended December 31:

Year Ended December 31,

Edgar Filing: CONSOLIDATED WATER CO LTD - Form 10-K

	2014	2013	2012
Net income attributable to Consolidated Water Co. Ltd. common stockholders	\$6,265,358	\$8,594,519	\$9,315,514
Less: preferred stock dividends	(11,485)	(11,222)	(9,080)
Net income available to common shares in the determination of basic earnings per common share	\$6,253,873	\$8,583,297	\$9,306,434
Weighted average number of common shares in the determination of basic earnings per common share attributable to Consolidated Water Co. Ltd. common stockholders	14,697,896	14,633,884	14,578,518
Plus:			
Weighted average number of preferred shares outstanding during the period	37,924	34,827	27,057
Potential dilutive effect of unexercised options	28,503	35,169	573
Weighted average number of shares used for determining diluted earnings per common share attributable to Consolidated Water Co. Ltd. common stockholders	14,764,323	14,703,880	14,606,148

16. Segment information

The Company has three reportable segments: retail, bulk and services. The retail segment primarily operates the water utility for the Seven Mile Beach and West Bay areas of Grand Cayman Island pursuant to an exclusive license granted by the Cayman Islands government. The bulk segment supplies potable water to government utilities in Grand Cayman, The Bahamas and Belize under long-term contracts. The services segment designs, constructs and sells desalination plants to third parties and provides desalination plant management and operating services to affiliated companies. Consistent with prior periods, the Company records all non-direct general and administrative expenses in its retail business segment and does not allocate any of these non-direct costs to its other two business segments.

The accounting policies of the segments are consistent with those described in Note 2. The Company evaluates each segment's performance based upon its income from operations. All intercompany transactions are eliminated for segment presentation purposes.

The Company's segments are strategic business units that are managed separately because, while all segments derive their revenues from desalination-related activities, each segment sells different products and/or services, serves customers with distinctly different needs and generates different gross profit margins.

	Year Ended December 31, 2014			
	Retail	Bulk	Services	Total
Revenues	\$24,104,932	\$39,201,011	\$2,253,135	\$65,559,078

	\$56,396,988	\$58,602,886

17. Commitments and contingencies

Commitments

As of December 31, 2014, the Company held operating leases for land, office space, warehouse space, and equipment. In addition to minimum lease payments, certain leases provide for payment of real estate taxes, insurance, common area maintenance, and certain other expenses. Lease terms may include escalating rent provisions and rent incentives. Minimum lease payments and rent incentives are expensed using a straight line method over the non-cancellable lease term, which expire at various dates through the year 2032.

The short-term and long-term components of deferred rent assets are included within prepaid expenses and other current assets, and other assets, respectively, in the consolidated balance sheets.

Future minimum lease payments under these non-cancellable operating leases as of December 31, 2014 are as follows:

2015	\$728,452
2016	554,055
2017	512,094
2018	504,774
2019	314,233
Thereafter	2,818,489
	\$5,432,097

Total rental expense for the years ended December 31, 2014, 2013 and 2012 was \$812,658, \$822,159 and \$559,811, respectively, and is included within general and administrative expenses in the consolidated statements of income.

The Company has entered into employment agreements with certain executives, which expire through December 31, 2017 and provide for, among other things, base annual salaries in an aggregate amount of approximately \$3.1 million, performance bonuses and various employee benefits.

The Company has purchase obligations totaling approximately \$1.4 million through December 31, 2017.

Retail License

The Company sells water through its retail operations under a license issued in July 1990 by the Cayman Islands government that grants Cayman Water the exclusive right to provide potable water to customers within its licensed service area. As discussed below, this license was set to expire in July 2010 but has since been extended while negotiations for a new license take place. Pursuant to the license, Cayman Water has the exclusive right to produce potable water and distribute it by pipeline to its licensed service area which consists of two of the three most populated areas of Grand Cayman, the Seven Mile Beach and West Bay areas. For the years ended December 31, 2014, 2013 and 2012 the Company generated approximately 36%, 36% and 37%, respectively, of its consolidated revenues and 53%, 52% and 58%, respectively, of its consolidated gross profits from the retail water operations conducted pursuant to Cayman Water's exclusive license. If Cayman Water is not in default of any of its terms, this license provides Cayman Water with the right of first refusal to renew the license on terms that are no less favorable than those that the government offers to any third party.

Under the license, Cayman Water pays a royalty to the government of 7.5% of its gross retail water sales revenues (excluding energy adjustments). The selling prices of water sold to customers are determined by the license and vary depending upon the type and location of the customer and the monthly volume of water purchased. The license provides for an automatic adjustment for inflation or deflation on an annual basis, subject to temporary limited exceptions, and an automatic adjustment for the cost of electricity on a monthly basis. The Water Authority-Cayman ("WAC"), on behalf of the government, reviews and confirms the calculations of the price adjustments for inflation and electricity costs. If Cayman Water wants to adjust its prices for any reason other than inflation or electricity costs, it must request prior approval of the Cabinet of the Cayman Islands government. Disputes regarding price adjustments are referred to arbitration.

The license was scheduled to expire in July 2010 but has been extended several times by the Cayman Islands government in order to provide the parties with additional time to negotiate the terms of a new license agreement. The most recent extension of the license expires on June 30, 2015.

In February 2011, the Water (Production and Supply) Law, 2011 and the Water Authority (Amendment) Law, 2011 (the "New Laws") were published and are now in full force and effect. Under the New Laws, the WAC will issue any new license, and such new license could include a rate of return on invested capital model, as discussed in the following paragraph.

The Company has been advised in correspondence from the Cayman Islands government and the WAC that: (i) the WAC is now the principal negotiator, and not the Cayman Islands government, in these license negotiations, and (ii) the WAC has determined that a rate of return on invested capital model ("RCAM") for the retail license is in the best interest of the public and Cayman Water's customers. RCAM is the rate model currently utilized in the electricity transmission and distribution license granted by the Cayman Islands government to the Caribbean Utilities Company, Ltd. The Company has advised the Cayman Islands government that we disagree with its position on these two issues.

In July 2012, in an effort to resolve several issues relating to its retail license renewal negotiations, the Company filed an Application for Leave to Apply for Judicial Review (the “Application”) with the Grand Court of the Cayman Islands (the “Court”), seeking declarations that: (i) certain provisions of the Water Authority (Amendment) Law, 2011 and the Water (Production and Supply) Law, 2011, appear to be incompatible and a determination as to how those provisions should be interpreted, (ii) the WAC’s roles as the principal license negotiator, statutory regulator and the Company’s competitor put the WAC in a position of hopeless conflict, and (iii) the WAC’s decision to replace the rate structure under the Company’s current exclusive license with RCAM was predetermined and unreasonable. In October 2012 the Company was notified that the Court agreed to consider the issues raised in the Application.

Throughout the course of the license renewal negotiations, the Company has objected to the use of RCAM on the basis that it believes such a model would not promote the efficient operation of its water utility and could ultimately increase water rates to Cayman Water’s customers.

The hearing for this judicial review was held on April 1, 2014. Prior to the commencement of the hearing, the parties agreed that the Court should solely be concerned with the interpretation of the statutory provisions. As part of this agreement, the WAC agreed to consider our submissions on the RCAM model and/or alternative models of pricing. In June 2014, the Court determined that: (i) the renewal of the 1990 License does not require a public bidding process; and (ii) the WAC is the proper entity to negotiate with the Company for the renewal of the 1990 License.

The Company’s submissions on the RCAM model and/or alternative models of pricing were made to the WAC on June 9, 2014. The Company received a letter from the WAC dated September 11, 2014 which fully rejected the Company’s submissions and stated that they intend to provide the Company with a draft RCAM license in due course. On November 21, 2014, the Company wrote to the Minister of Works offering to recommence license negotiations on the basis of the RCAM model subject to certain conditions which are; (i) the Government would undertake to amend the current water legislation to provide for an independent regulator and a fair and balanced regulatory regime more consistent with that provided under the electrical utility regulatory regime, (ii) the Government and the Company would mutually appoint an independent referee and chairman of the negotiations, (iii) the Company’s new license would provide exclusivity for the production and provision of all piped water, both potable and non-potable, within its Cayman Islands license area, (iv) the Government would allow the Company to submit its counter proposal to the WAC’s June 2010 RCAM license draft, and (v) the principle of subsidization of residential customer rates by commercial customer rates would continue under a new license. To date, the Company has not received a response to its letter.

As a result of the Court’s ruling and the Company’s subsequent offer to recommence negotiations on the basis of the RCAM model, the Company expects to recommence license negotiations with the Government of the Cayman Islands and WAC in the near future.

If the Company does not ultimately enter into a new license agreement and no other party is awarded a license, the Company expects Cayman Water to be permitted to continue to supply water to its service area.

It is possible that the Cayman Islands government could offer a third party a license to service some or all of Cayman Water's present service area. In such event, Cayman Water may assume the license offered to the third party by exercising its right of first refusal. However, the terms of any new license agreement may not be as favorable to the Company as the terms under which Cayman Water is presently operating and could materially reduce the operating income and cash flows the Company has historically generated from its retail license and could require the Company to record an impairment charge to reduce the \$3,499,037 carrying value of its goodwill. Such impairment charge could have a material adverse impact on the Company's results of operations.

The Company is presently unable to determine what impact the resolution of this matter will have on its cash flows, financial condition or results of operations.

Other Contingencies

As part of the acquisition of the Company's interests in OC-Cayman, with the approval of Scotiabank (Cayman Islands) Ltd., the Company has guaranteed the performance of OC-Cayman to the Cayman Islands government, pursuant to the water supply contract with the Water Authority-Cayman dated April 25, 1994, as amended.

CW-Bahamas' contract to supply water to the WSC from its Blue Hills plant requires CW-Bahamas to guarantee delivery of a minimum quantity of water per week. If CW-Bahamas does not meet this minimum, it will be required to pay the WSC for the difference between the minimum and actual gallons delivered at a per gallon rate equal to the price per gallon that WSC is currently paying under the contract. The Blue Hills contract expires in 2032 and requires CW-Bahamas to deliver 63.0 million gallons of water each week.

By Statutory Instrument No. 81 of 2009, the Minister of Public Utilities of the government of Belize published an order, the Public Utility Provider Class Declaration Order, 2009 (the "Order"), which as of May 1, 2009 designated CW-Belize as a public utility provider under the laws of Belize. With this designation, the Public Utilities Commission of Belize (the "PUC") has the authority to set the rates charged by CW-Belize and to otherwise regulate its activities. On November 1, 2010, CW-Belize received a formal complaint from the PUC alleging that CW-Belize was operating without a license under the terms of the Water Industry Act. CW-Belize applied for this license in December 2010. On July 29, 2011, the PUC issued the San Pedro Public Water Supply Quality and Security Complaint Order (the "Second Order") which among other things requires that (i) CW-Belize and its customer jointly make a submission to the responsible Minister requesting that the area surrounding CW-Belize's seawater abstraction wells be designated a forest reserve or national park and be designated a Controlled Area under section 58 of the Water Industry Act, (ii) CW-Belize submit an operations manual for CW-Belize's desalination plant to the PUC for approval, (iii) CW-Belize and its customer modify the water supply agreement between the parties to (a) include new water quality parameters included in the Order and (b) cap the current exclusive water supply arrangement in the agreement at a maximum of

450,000 gallons per day, (iv) CW-Belize keep a minimum number of replacement seawater RO membranes in stock at all times and (v) CW-Belize take possession of and reimburse the PUC for certain equipment which the PUC purchased from a third-party in late 2010. CW-Belize has applied for declaratory judgment and has been granted a temporary injunction to stay the enforcement of the Second Order by the PUC until such time as the matter could be heard by the Belize courts. The initial hearing on this matter was conducted on October 30 and 31, 2012 with an additional hearing on November 29, 2012. The ruling on this case is pending. The Company is presently unable to determine what impact the Order and the Second Order will have on its results of operations, financial position or cash flows.

18. Stock-Based Compensation

The Company has the following stock compensation plans that form part of its employees' remuneration:

Employee Share Incentive Plan (Preferred Shares)

The Company awards shares of its preferred stock for \$nil consideration under its Employee Share Incentive Plan to eligible employees, other than Directors and Officers, after four consecutive years of employment. If these employees remain with the Company for an additional four consecutive years, they can convert these preferred shares into shares of common stock on a one for one basis. In addition, at the time the preferred shares are granted, the employees receive options to purchase an equal number of shares of preferred stock at the average trading price of the Company's common stock for the first seven days of the October immediately preceding the date of the preferred stock grant. If these options are exercised, the shares of preferred stock obtained may also be converted to shares of common stock if the employee remains with the Company for an additional four consecutive years. Each employee's option to purchase shares of preferred stock must be exercised within 30 days of the grant date, which is the 90th day after the date of the independent registered public accountants firm's audit opinion on the Company's consolidated financial statements. Shares of preferred stock not subsequently converted to shares of common stock are redeemable only at the discretion of the Company. Shares of preferred stock granted under this plan during the years ended December 31, 2014, 2013 and 2012, totaled 5,957, 10,180 and 10,033, respectively, and an equal number of preferred stock options were granted in each of these years.

Employee Share Option Plan (Common Stock Options)

The Company has an employee stock option plan for certain long-serving employees of the Company. Under the plan, these employees are granted in each calendar year, as long as the employee is a participant in the Employee Share Incentive Plan, options to purchase common shares. The price at which the option may be exercised will be the closing market price on the grant date, which is the 40th day after the date of the Company's Annual Shareholder Meeting. The number of options each employee is granted is equal to five times the sum of (i) the number of preferred shares which that employee receives for \$nil consideration and (ii) the number of preferred share options which that employee exercises in that given year. Options may be exercised during the period commencing on the fourth anniversary of the grant date and ending on the thirtieth day after the fourth anniversary of the grant date. Options granted under this plan during the years ended December 31, 2014, 2013, and 2012, totaled 2,990, 6,600 and 5,780, respectively.

2008 Equity Incentive Plan

On May 14, 2008, the Company's stockholders approved the 2008 Equity Incentive Plan (the "2008 Plan") and reserved 1,500,000 shares of the Company's Class A common shares for issuance under this plan. All Directors, executives and key employees of the Company or its affiliates are eligible for participation in the 2008 Plan which provides for the issuance of options, restricted stock and stock equivalents at the discretion of the Board. No options were granted under the plan in 2012, 2013 or 2014.

The Company measures and recognizes compensation expense at fair value for all share-based payments, including stock options. Stock-based compensation for the Employee Share Incentive Plan, Employee Share Option Plan and the 2008 Equity Incentive Plan totaled \$116,574, \$246,473 and \$371,038 for the years ended December 31, 2014, 2013 and 2012, respectively, and is included in general and administrative expenses in the consolidated statements of income.

Non-Executive Directors' Share Plan

This stock grant plan provides part of Directors' remuneration. Under this plan, non-Executive Directors receive a combination of cash and common stock for their participation in Board meetings. The number of shares of common stock granted is calculated based upon the market price of the Company's common stock on October 1 of the year preceding the grant. Common stock granted under this plan during the years ended December 31, 2014, 2013 and 2012 totaled 5,992, 13,980 and 10,886 shares, respectively. The Company recognized stock-based compensation for these share grants of \$85,880, \$135,503 and \$82,649 for the years ended December 31, 2014, 2013 and 2012, respectively.

The fair value of each option award is estimated on the date of grant using a Black-Scholes option-pricing model that uses the assumptions noted in the table below. Expected volatilities are based on historical volatilities of the Company's common stock. The Company uses historical data to estimate option exercise and post-vesting termination behavior. The expected term of options granted is based on historical data and represents the period of time that options granted are expected to be outstanding. The Company uses historical data to estimate stock option exercises and forfeitures within its valuation model. The risk-free interest rate for the expected term of the option is based on the U.S. Treasury yield curve in effect at the time of the grant.

The significant weighted average assumptions for the years ended December 31, 2014, 2013 and 2012 were as follows:

	2014	2013	2012
Risk free interest rate	0.48 %	0.47 %	0.26 %
Expected option life (years)	1.4	1.7	1.5
Expected volatility	48.06 %	27.87 %	43.43 %

Expected dividend yield 2.71 % 2.71 % 3.78 %

A summary of the Company's stock option activity for the year ended December 31, 2014 is as follows:

	Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (Years)	Aggregate Intrinsic Value (1)
Outstanding at beginning of period	224,344	\$ 12.82		
Granted	8,947	11.14		
Exercised	(6,705)	7.90		
Forfeited/expired	(39,954)	25.59		
Outstanding as of December 31, 2014	186,632	\$ 10.18	1.18 years	\$ 99,570
Exercisable as of December 31, 2014	165,822	\$ 10.20	1.09 years	\$ 79,337

The intrinsic value of a stock option represents the amount by which the fair value of the underlying stock, (1) measured by reference to the closing price of the common shares of \$10.68 on the Nasdaq Global Select Market on December 31, 2014, exceeds the exercise price of the option.

As of December 31, 2014, 20,810 non-vested options and 165,822 vested options were outstanding, with weighted average exercise prices of \$10.05 and \$10.20, respectively, and average remaining contractual lives of 1.94 years and 1.09 years, respectively. The total remaining unrecognized compensation costs related to unvested stock-based arrangements were \$31,209 as of December 31, 2014 and are expected to be recognized over a weighted average period of 1.94 years.

As of December 31, 2014, unrecognized compensation costs relating to redeemable preferred stock outstanding were \$123,555, and are expected to be recognized over a weighted average period of 1.12 years.

The following table summarizes the weighted average fair value of options at the date of grant and the intrinsic value of options exercised during the years ended December 31, 2014, 2013 and 2012:

	2014	2013	2012
Options granted with an exercise price below market price on the date of grant:			
Employees — preferred stock	\$-	\$4.65	\$1.28
Overall weighted average	\$-	\$4.65	\$1.28

Options granted with an exercise price at market price on the date of grant:

Management employees	\$-	\$-	\$-
Employees — common stock	\$3.11	\$3.18	\$3.28
Overall weighted average	\$3.11	\$3.18	\$3.28

Options granted with an exercise price above market price on the date of grant:

Management employees	\$-	\$-	\$-
Employees — preferred stock	\$0.59	\$-	\$-
Overall weighted average	\$0.59	\$-	\$-

Total intrinsic value of options exercised	\$17,162	\$190,212	\$1,799
--	----------	-----------	---------

19. Pension benefits

Staff pension plans are offered to all employees in the Cayman Islands and the Bahamas. The plans are administered by third party pension plan providers and are defined contribution plans whereby the Company matches the contribution of the first 5% of each participating employee's salary up to \$72,000 for the Cayman Islands. There is no salary limit for the Bahamas. The total amount recognized as an expense under the plan during the years ended December 31, 2014, 2013 and 2012 was \$199,233, \$198,329 and \$166,060, respectively.

20. Financial instruments

Credit risk:

The Company is not exposed to significant credit risk on its retail customer accounts as its policy is to cease supply of water to customers' accounts that are more than 45 days overdue. The Company's exposure to credit risk is concentrated on receivables from its Bulk water customers. The Company considers these receivables fully collectible and therefore has not recorded an allowance for these receivables.

Interest rate risk:

The Company is not subject to significant interest-rate risk arising from fluctuations in interest rates as the balance of the Company's demand loan payable at December 31, 2014 is not significant to its financial condition or results of operations.

Foreign exchange risk:

All relevant foreign currencies other than the Mexican peso, Indonesian rupiah and the euro have been fixed to the dollar for over 30 years and the Company does not employ a hedging strategy against exchange rate risk associated with the reporting in dollars. If any of these fixed exchange rates becomes a floating exchange rate or if any of the foreign currencies in which the Company conducts business depreciate significantly against the dollar, the Company's consolidated results of operations could be adversely affected.

Fair values:

As of December 31, 2014 and 2013, the carrying amounts of cash and cash equivalents, accounts receivable, accounts payable and other current liabilities, dividends payable and the land purchase obligation approximate their fair values due to the short term maturities of these instruments. Management considers that the carrying amounts for loans receivable and long term debt as of December 31, 2014 and 2013 approximate their fair value.

Under US GAAP, fair value is defined as the exit price, or the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants as of the measurement date. The US GAAP guidance also establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are inputs market participants would use in valuing the asset or liability and are developed based on market data obtained from sources independent of the Company. Unobservable inputs are inputs that reflect the Company's assumptions about the factors market participants would use in valuing the asset or liability. The guidance establishes three levels of inputs that may be used to measure fair value:

Level 1 — Quoted prices in active markets for identical assets or liabilities.

Level 2 — Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 — Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurements. The Company reviews its fair value hierarchy classifications on a quarterly basis. Changes in the observability of valuation inputs may result in a reclassification of levels for certain securities within the fair value hierarchy.

The following table presents the Company's fair value hierarchy for assets and liabilities measured at fair value as of December 31, 2014 and 2013:

	December 31, 2014			
	Level 1	Level 2	Level 3	Total
Assets:				
Recurring				
Restricted cash	\$456,083	\$-	\$-	\$456,083
Certificate of deposit	-	5,000,000	-	5,000,000
Total recurring	\$456,083	\$5,000,000	\$-	\$5,456,083
Nonrecurring				
Investment in OC-BVI	\$-	\$-	\$5,208,603	\$5,208,603

	December 31, 2013			
	Level 1	Level 2	Level 3	Total
Assets:				
Recurring				
Marketable securities	\$8,587,475	\$ -	\$-	\$8,587,475
Nonrecurring				
Investment in OC-BVI	\$-	\$ -	\$6,623,448	\$6,623,448

A reconciliation of the beginning and ending balances for Level 3 investments for the year ended December 31, 2014:

Balance as of December 31, 2013	\$6,623,448
Profit sharing and equity from earnings of OC-BVI	414,755
Distributions received from OC-BVI	(969,600)
Impairment of investment in OC-BVI (See Note 8)	(860,000)
Balance as of December 31, 2014	\$5,208,603

21. Supplemental disclosure of cash flow information

	Year Ended December 31,		
	2014	2013	2012
Interest paid in cash	\$196,768	\$380,014	\$670,042
Non-cash transactions:			
Transfers from inventory to property plant and equipment, net and construction in progress	\$168,622	\$181,875	\$508,107
Transfers from construction in progress to property, plant and equipment, net	\$2,693,622	\$4,924,980	\$278,214
Transfer from construction in progress to costs and estimated earnings in excess of billings	\$1,090,489	\$-	\$-
Issuance of 18,294, 25,111 and 21,686, respectively, shares of common stock for services rendered	\$263,098	\$217,826	\$175,313
Issuance of 5,957, 10,180 and 10,033, respectively, shares of redeemable preferred stock for services rendered	\$65,289	\$110,249	\$77,856
Conversion (on a one-to-one basis) of 4,756, 4,720 and 2,629, respectively, shares of redeemable preferred stock to common stock	\$2,854	\$2,832	\$1,577
Dividends declared but not paid	\$1,106,456	\$1,104,271	\$1,096,746
Obligation incurred for investment in land	\$-	\$10,050,000	\$-

22. Impact of recent accounting standards pronouncements

Adoption of New Accounting Standards:

In March 2013, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2013-05, *Foreign Currency Matters (Topic 830: Parent’s Accounting for the Cumulative Translation Adjustment upon Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or of an Investment in a Foreign Entity)*. This ASU offers guidance on a parent’s accounting for the cumulative translation adjustment upon derecognition of a subsidiary or group of assets within a foreign entity. This new guidance requires that the parent release any related cumulative translation adjustment into net income only if the sale or transfer results in the complete or substantially complete liquidation of the foreign entity in which the subsidiary or group of assets had resided. The amendment is effective for annual and interim reporting periods beginning after December 15, 2013. The adoption of ASU 2013-05 did not have an impact on the Company’s consolidated financial statements.

Effect of Newly Issued But Not Yet Effective Accounting Standards:

In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers*. ASU 2014-09 requires revenue recognition to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. ASU 2014-09 prescribes a five step framework in accounting for revenues from contracts within its scope, including (a) identification of the contract, (b) identification of the performance obligations under the contract, (c) determination of the transaction price, (d) allocation of the transaction price to the identified performance obligations and (e) recognition of revenues as the identified performance obligations are satisfied. ASU 2014-09 also prescribes additional disclosures and financial statement presentations. This amendment is effective for public entities in annual reporting periods beginning after December 15, 2016. Early application is not permitted. ASU 2014-09 may be adopted retrospectively or under a modified retrospective method where the cumulative effect is recognized at the date of initial application. The Company is currently evaluating the effect the adoption of this standard will have on the Company's consolidated financial statements.

In February 2015, the FASB issued ASU 2015-02, *Consolidation (Topic 810) - Amendments to the Consolidation Analysis*. The amendments in this update require management to reevaluate whether certain legal entities should be consolidated. Specifically, the amendments (1) modify the evaluation of whether limited partnerships and similar legal entities are variable interest entities ("VIEs") or voting interest entities, (2) eliminate the presumption that a general partner should consolidate a limited partnership, (3) affect the consolidation analysis of reporting entities that are involved with VIEs, particularly those that have fee arrangements and related party relationships, and (4) provide a scope exception from consolidation guidance for reporting entities with interests in legal entities that are required to comply with or operate in accordance with requirements that are similar to those in Rule 2a-7 of the Investment Company Act of 1940 for registered money market funds. The amendments in this update are effective for public business entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. Early adoption is permitted. The Company is currently evaluating the effect the adoption of this amendment will have on the Company's consolidated financial statements.

23. Subsequent events

The Company evaluated subsequent events through the time of the filing of its Annual Report on Form 10-K. Other than as disclosed in these consolidated financial statements, the Company is not aware of any significant events that occurred subsequent to the balance sheet date but prior to the filing of this report that would have a material impact on its consolidated financial statements.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors

Ocean Conversion (BVI) Ltd.

We have audited the accompanying consolidated balance sheets of Ocean Conversion (BVI) Ltd. and its subsidiary (the "Company") as of December 31, 2014 and 2013, and the related consolidated statements of operations, stockholders' equity and cash flows for each of the years in the three-year period ended December 31, 2014. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall consolidated financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Ocean Conversion (BVI) Ltd. and subsidiary as of December 31, 2014 and 2013, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2014, in conformity with accounting principles generally accepted in the United States of America.

Cash and cash equivalents at the end of the period	\$848,960	\$456,927	\$1,009,942

The accompanying notes are an integral part of these consolidated financial statements.

OCEAN CONVERSION (BVI) LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Principal activity

Ocean Conversion (BVI) Ltd. (“OC-BVI”) was incorporated in the British Virgin Islands under the Companies Act, Cap 285, on May 14, 1990 and is engaged in the production and sale of potable water to the Government of the British Virgin Islands (the “BVI government”). OC-BVI has an agreement with the BVI government, its sole customer, to produce and supply a guaranteed quantity and quality of potable water. This agreement provides for specific penalties should OC-BVI not be able to provide the guaranteed quantity of water.

JVD Ocean Desalination Ltd. (“JVD”), a majority owned subsidiary of OC-BVI, was incorporated on January 2, 2003 and began producing potable water on the island of Jost Van Dyke for the BVI government in July 2003 under a 10-year contract with the BVI government that expired July 8, 2013. Pursuant to the contract, OC-BVI is operating the plant on a year-to-year basis until the BVI government informs OC-BVI of its intention to extend the existing, or enter into a new agreement.

OC-BVI supplies water to the BVI government under a seven-year contract executed in March 2010 for OC-BVI’s plant located at Bar Bay, Tortola (the “Bar Bay Agreement”). Under the terms of the Bar Bay Agreement, OC-BVI delivers up to 600,000 gallons of water per day to the BVI government from the Bar Bay plant and the BVI government is obligated to pay for this water at a specified price as adjusted by a monthly energy factor. The Bar Bay Agreement includes a seven-year extension option exercisable by the BVI government. Substantially all of OC-BVI’s revenues and cash flows are derived from the Bar Bay plant. If OC-BVI ceases supplying water to the BVI government from the Bar Bay plant after the February 2017 expiration date of the initial seven year term of the Bar Bay Agreement, OC-BVI will be required to record an impairment loss on its long-lived Bar Bay plant assets to reduce the carrying value of these assets to their then fair value. This impairment loss would have an adverse impact on OC-BVI’s consolidated financial condition and consolidated statements of operations. The accompanying consolidated financial statements do not include any adjustments for the possible outcome of this contingency.

2. Accounting policies

Basis of preparation: The consolidated financial statements presented are prepared in accordance with the accounting principles generally accepted in the United States of America.

Basis of consolidation: The consolidated financial statements include the financial statements of OC-BVI and its majority owned subsidiary, JVD (collectively, the “Company”). All significant intercompany balances and transactions have been eliminated.

Use of estimates: The preparation of the consolidated financial statements in conformity with the accounting principles generally accepted in the United States of America requires management of the Company to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Significant items subject to estimates and assumptions include the carrying value of property, plant and equipment and inventory. Actual results could differ from those estimates.

Cash and cash equivalents: Cash and cash equivalents are comprised of demand deposits at banks and highly liquid deposits at banks with an original maturity of three months or less. Cash and cash equivalents are not restricted as to withdrawal or use.

Accounts receivable: Accounts receivable are recorded at the invoiced amounts based on meter readings.

Interest income: The Company earns interest income on accounts receivable based on the overdue invoices from its customer.

Inventory: Inventory primarily includes replacement spares and parts that are valued at the lower of cost or net realizable value, with cost determined on the first-in, first-out basis.

Impairment of long-lived assets: Assets such as property, plant and equipment, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to estimated undiscounted future cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated future cash flows, an impairment charge is recognized by the amount by which the carrying amount exceeds the fair value of the asset.

Property, plant and equipment: Property, plant and equipment is stated at cost less accumulated depreciation. Depreciation is calculated using a straight line method with an allowance for estimated residual values. Rates are determined based on the estimated useful lives of the assets as follows:

Plant and equipment	4 to 14 years
Office furniture, fixtures and equipment	3 to 10 years
Vehicles	3 to 10 years
Lab equipment	5 to 10 years

Additions to property, plant and equipment consist of the cost of the contracted services, direct labor and materials. Assets under construction are recorded as additions to property, plant and equipment upon completion of the projects. Depreciation commences in the month of addition.

Revenue from water sales: OC-BVI recognizes revenues from Bar Bay plant water sales at the time water is supplied to the BVI government's distribution system. The amount of water supplied is determined based upon water meter readings performed at the end of each month. Under the terms of its bulk water supply contracts, OC-BVI is entitled to charge its customers the greater of a minimum monthly charge or the price for water supplied during the month.

3. Litigation with the BVI government

Under the terms of a water supply agreement dated May 1990 (the "1990 Agreement") between OC-BVI and the Government of the British Islands (the "BVI Government"), upon the expiration of its initial seven-year term in May 1999, the 1990 Agreement would automatically be extended for another seven-year term unless the BVI government provided notice, at least eight months prior to such expiration, of its decision to purchase the plant from OC-BVI at the agreed upon amount under the 1990 Agreement of approximately \$1.42 million. In correspondence between the parties from late 1998 through early 2000, the BVI government indicated that it intended to purchase the plant but would be amenable to negotiating a new water supply agreement, and that it considered the 1990 Agreement to be in force on a monthly basis until negotiations between the BVI government and OC-BVI were concluded. Occasional discussions were held between the parties since 2000 without resolution of the matter. OC-BVI continued to supply water from the plant and expended approximately \$4.7 million between 1995 and 2003 to significantly expand the production capacity of the plant beyond that contemplated in the 1990 Agreement.

In 2006, the BVI government took the position that the seven-year extension of the 1990 Agreement had been completed and that it was entitled to ownership of the Baughers Bay plant. In response, OC-BVI disputed the BVI government's contention that the original terms of the 1990 Agreement remained in effect.

During 2007, the BVI government significantly reduced the amount and frequency of its payments for the water being supplied by OC-BVI and filed a lawsuit with the Eastern Caribbean Supreme Court (the “Court”) seeking ownership of the Baughers Bay plant. OC-BVI counterclaimed to the Court that it was entitled to continued possession and operation of the Baughers Bay plant until the BVI government paid OC-BVI approximately \$4.7 million, which OC-BVI believed represented the value of the Baughers Bay plant at its expanded production capacity. OC-BVI subsequently filed claims with the Court seeking payment for water sold and delivered to the BVI government through May 31, 2009 at the contract prices in effect before the BVI government asserted its purported right of ownership of the plant.

The Court ruled on this litigation in 2009, determining that (1) the BVI government was entitled to immediate ownership and possession of the Baughers Bay plant and dismissed OC-BVI’s claim for compensation of approximately \$4.7 million for the expenditures made to expand the production capacity of the plant; (2) OC-BVI was entitled to full payment of water invoices issued up to December 20, 2007, which had been calculated under the terms of the original 1990 Agreement; and (3) OC-BVI was entitled to the amount of \$10.4 million for water produced by OC-BVI from the Baughers Bay plant subsequent to December 20, 2007. The BVI government made a payment of \$2.0 million to OC-BVI under the Court order during the fourth quarter of 2009, a second payment of \$2.0 million under the Court order during 2010 and a third payment under the Court order of \$1.0 million in 2011.

OC-BVI filed an appeal with the Eastern Caribbean Court of Appeals (the “Appellate Court”) in October 2009 asking the Appellate Court to review the September 17, 2009 ruling by the Court as it related to OC-BVI’s claim for compensation for expenditures made to expand the production capacity of the Baughers Bay plant. In October 2009, the BVI government also filed an appeal with the Appellate Court requesting the Appellate Court to reduce the \$10.4 million awarded by the Court to OC-BVI for water supplied subsequent to December 20, 2007 to an amount equal to the cost of producing such water.

In March 2010, OC-BVI vacated the Baughers Bay plant and the BVI government assumed direct responsibility for the plant’s operations.

In June 2012, the Appellate Court issued the final ruling with respect to the Baughers Bay litigation. This ruling dismissed the BVI government's appeal against the previous judgment of the Court awarding \$10.4 million for the water supplied, and also awarded OC-BVI compensation for improvements made to the plant in the amount equal to the difference between (i) the value of the Baughers Bay plant at the date OC-BVI transferred possession of the plant to the BVI government and (ii) \$1.42 million (the purchase price for the Baughers Bay plant under the 1990 Agreement). OC-BVI was also awarded all of its court costs at the trial level and two-thirds of such costs incurred on appeal. Prior to the final ruling, the BVI government had paid only \$5.0 of the original \$10.4 million, and the remaining \$5.4 million amount due had increased to approximately \$6.7 million by the fourth quarter of 2012 due to the court costs awarded by the Appellate Court and the accrued interest due on the aggregate unpaid balance. The BVI government paid OC-BVI \$4.7 million of this amount during the fourth quarter of 2012 and the remaining \$2.0 million in January 2013. These amounts paid by the BVI government were recognized in OC-BVI's results of operations as other income in the periods in which they were received. To date, OC-BVI and the BVI government have not reached an agreement on the value of the plant at the date it was transferred to the BVI government. However, during the first quarter of 2015, OC-BVI and the BVI government appointed a mutually approved appraiser to complete a valuation of the Baughers Bay plant in accordance with the Appellate Court ruling.

4. Inventory

Inventory consists of:

	December 31,	
	2014	2013
Consumables stock	\$20,667	\$23,466
Spare parts inventory	330,095	258,286
Total inventory	350,762	281,752
Less current portion	108,171	65,391
Inventory (non-current)	\$242,591	\$216,361

5. Property, plant and equipment

Property, plant and equipment consist of:

	December 31,	
	2014	2013
Buildings	\$3,599,824	\$3,599,824
Plant and equipment	5,691,243	5,712,027
Office furniture, fixtures and equipment	44,203	36,789

Vehicles	78,428	45,928
Tools & test equipment	9,622	9,622
	9,423,320	9,404,190
Accumulated depreciation	(4,888,233)	(4,159,664)
Property, plant and equipment, net	\$4,535,087	\$5,244,526

Depreciation expense was \$753,759, \$790,785 and \$789,706 for the years ended December 31, 2014, 2013 and 2012, respectively.

During 2007, OC-BVI completed, for a total cost of approximately \$8 million, the construction of a desalination plant with a capacity of 720,000 gallons per day located at Bar Bay, Tortola (the “Bar Bay plant”). OC-BVI began selling water to the Ministry from this plant in January 2009 and on March 4, 2010, OC-BVI and the BVI government executed a definitive seven-year contract for the Bar Bay plant (the “Bar Bay Agreement”). Under the terms of the Bar Bay Agreement, OC-BVI delivers up to 600,000 gallons of water per day to the BVI government from the Bar Bay plant and the BVI government is obligated to pay for this water at a specified price as adjusted by a monthly energy factor. The Bar Bay Agreement includes a seven-year extension option exercisable by the BVI government and required OC-BVI to complete a storage reservoir on a BVI government site by no later than March 4, 2011. OC-BVI has not commenced construction of this storage reservoir due to the BVI government’s failure to pay the invoices for the water provided by the Bar Bay plant on a timely basis.

6. Commitments

During 2005, OC-BVI entered into a 25- year lease agreement with Bar Bay Estate Holdings Limited (“Bar Bay Holdings”), a private company incorporated in the Territory of the British Virgin Islands, pursuant to which OC-BVI agreed to lease from Bar Bay Holdings approximately 50,000 square feet of land on Tortola, British Virgin Islands on which a seawater desalination plant and wells was constructed. Under the terms of the lease agreement, a lease premium payment of \$750,000 was made on June 10, 2005, annual lease and easement payments of \$17,662 are due annually and royalty payments of 2.87% of annual sales, as defined in the lease agreement, are payable quarterly. Sage Water Holdings (BVI) Limited currently owns 100% of the non-voting stock, 50% of the voting common stock and 50% of the profit sharing rights of OC-BVI. A Director of Sage Water Holdings is also a Director of OC-BVI and holds 50% of the outstanding shares of Bar Bay Holdings.

OC-BVI entered into an agreement that grants an easement over a parcel of land used to access certain Bar Bay plant. Under the terms of the agreement, an initial premium payment of \$70,000 was made and fees of \$6,000 are due annually through September 2019.

Future minimum lease payments under non-cancelable operating leases as of December 31, 2014 are as follows:

2015	\$23,662
2016	23,662
2017	23,662
2018	23,662
2019	21,662
Thereafter	183,971
	\$300,281

Total rental expense amounted to \$76,262, \$76,262 and \$76,262 for the years ended December 31, 2014, 2013 and 2012, respectively.

7. Expenses

	Year Ended December 31,		
	2014	2013	2012
Cost of water sales consist of the following:			
Fuel oil	\$89,672	\$55,024	\$42,747
Electricity	1,114,780	1,173,659	1,161,957
Maintenance	90,025	109,782	180,960
Depreciation	751,705	789,342	787,897
Employee costs	395,648	385,943	229,910
Insurance	74,086	72,974	73,210
Other	317,092	300,095	349,271
	\$2,833,007	\$2,886,820	\$2,825,952

General and administrative expenses consist of the following:

Management fees	\$628,643	\$627,725	\$626,153
Directors fees and expenses	71,390	78,735	158,242
Professional fees	25,626	18,900	112,221
Employee costs	65,213	65,301	65,482
Depreciation	2,054	1,442	1,809
Other	147,145	165,640	84,906
	\$940,072	\$957,743	\$1,048,813

8. Related party transactions

Pursuant to an amended and restated Management Services Agreement between DesalCo Limited (a wholly-owned subsidiary of CWCO) and the Company, DesalCo Limited provides the Company with management, administration, finance, operations, maintenance, engineering and purchasing services, and is entitled to be reimbursed for all reasonable expenses incurred on behalf of the Company. The Company incurred fees of \$513,048, \$510,998, and \$468,620 related to this management services agreement for the years ended December 31, 2014, 2013 and 2012, respectively. The Company had accounts payable of \$49,031 and \$49,147 due to DesalCo Limited as of December 31, 2014 and December 31, 2013, respectively, for fees and expenses paid by DesalCo Limited on behalf of the Company.

Pursuant to a Management Services Memorandum effective January 1, 2004 between the Class B Directors who at any point in time represent Sage Water Holdings (BVI) Limited, and the Company, the Class B directors provide the Company with delegated operational matters, general management of local business matters, donation, sponsorship and public relations activities, and are entitled to an annual fixed fee of \$60,000, adjusted annually for inflation, and a profit sharing bonus equal to 2% of the Company's income before depreciation, interest (income and expense), and

other expenses not directly related to the operation of the Company. The Company incurred fees of \$115,595, \$116,727, and \$157,533 related to this management services memorandum for the years ended December 31, 2014, 2013 and 2012, respectively. The Company had accounts payable of \$6,244 and \$5,719 due to Sage Water Holdings (BVI) Ltd. as of December 31, 2014 and December 31, 2013, respectively.

Pursuant to a Services Agreement effective November 30, 2012 between the Company and Sage Utilities Holdings (BVI) Limited ('SUHL'), which is related to Sage Water Holdings (BVI) Ltd. through common ownership, the Company provides SUHL with operations, maintenance, engineering, and purchasing services, and is entitled to a monthly fixed fee of \$39,325 for the first two months of the Services Agreement, thereafter reduced to \$35,325 per month. The Company recorded revenue of \$447,965, \$476,060, and \$39,325 related to this services agreement for the years ended December 31, 2014, 2013, and 2012, respectively.

9. Profit sharing obligation

	December 31,	
	2014	2013
Opening balance	\$1,688,850	\$1,743,077
Additions	222,750	715,273
Distributions paid and accrued	(518,400)	(769,500)
Ending balance	\$1,393,200	\$1,688,850

In 1993, the Company and its existing shareholders at that time, entered into two Share Repurchase and Profit Sharing Agreements (the “Agreements”) to repurchase 225,000 shares each from those shareholders (the “Parties”), whose shares were issued in exchange for guarantees of the Company’s long term debt. The Agreements were subsequently approved by special resolution at an Extraordinary Meeting of all the Company’s shareholders.

Under the terms of the Agreements, the Company, in exchange for the above-mentioned shares, granted the Parties, profit sharing rights in the Company’s profits for as long as the Company remains in business as a going concern. The Agreement states that where the Company has profits available for the payment of dividends and pays a dividend from there, a distribution shall be made to each of the Parties equal to 202,500 times the dividend per share received by the remaining shareholders and paid concurrently with such dividend. The factor of 202,500 shall be subject to amendment by the same proportion and at the same time as changes take place or adjustments are made in respect of the remaining shareholders.

The current shareholders and an affiliate of a current shareholder have acquired these profit sharing rights. The Company has recorded an obligation as of December 31, 2014 for the maximum profit shares payable to the Parties if all retained earnings were to be distributed as dividends and profit shares.

10. Taxation

Under the terms of the water sale agreements with the Government, the Company is exempt from all non-employee taxation in the British Virgin Islands.

11. Pension plan

Effective December 1, 2003, the Company established the MWM Global Retirement Plan (the “Plan”). The Plan is a defined contribution plan whereby the Company contributes 5% of each participating employee’s salary to the Plan. The total amount recognized as an expense under the plan was \$11,319, \$11,051 and \$11,225 for the years ended December 31, 2014, 2013 and 2012, respectively.

12. Financial instruments

Credit risk:

Financial assets that potentially subject the Company to concentrations of credit risk consist principally of cash and cash equivalents, accounts receivable and intercompany loans receivable. The Company’s cash is placed with high credit quality financial institutions. The accounts receivable are due from the Company’s sole customer, the BVI government. As a result, the Company is subject to credit risk to the extent of any non-performance by the BVI government.

Interest rate risk:

The Company has no long-term debt as of December 31, 2014.

Fair values:

As of December 31, 2014 and 2013, the carrying amounts of cash and cash equivalents, accounts receivable, prepaid expenses and other assets, accounts payable and accrued liabilities approximate fair values due to the short term maturities of these assets and liabilities.

13. Subsequent events

The Company has evaluated subsequent events for potential recording or disclosure in these consolidated financial statements through the date the financial statements were issued.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

None.

ITEM 9A. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Disclosure controls and procedures are the Company's controls and other procedures that are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934, as amended (the "Exchange Act") is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports that we file under the Exchange Act is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure. Our management recognizes that any controls and procedures, no matter how well designed and operated, can only provide reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the possible controls and procedures.

Our management has evaluated, with the participation of our principal executive officer and principal financial officer, the effectiveness of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this report. Based upon that evaluation, our management, including our principal executive officer and principal financial officer, has concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective at the reasonable assurance level.

Internal Control Over Financial Reporting

(a) Management's Annual Report on Internal Control Over Financial Reporting

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Company management is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is a process designed by, or under the supervision of, our principal executive officer and principal financial officer and effected by the Company's Board of Directors, management and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles in the United States of America and includes those policies and procedures that:

- pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles in the United States of America, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risks that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2014. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control-Integrated Framework (2013)*.

Based on our assessment, management has concluded that, as of December 31, 2014, the Company's internal control over financial reporting was effective at the reasonable assurance level.

The Company's independent registered public accounting firm, Marcum LLP, has issued a report on the effectiveness of the Company's internal control over financial reporting. Their report appears in ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA.

(b) Attestation Report of the Independent Registered Public Accounting Firm

See ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA.

(c) Changes in Internal Control Over Financial Reporting

There were no changes in the Company's internal control over financial reporting identified in connection with the evaluation of such internal control that occurred during the Company's last fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Information required by this item with respect to our directors and the nomination process is contained in the proxy statement for our 2015 Annual Meeting of Shareholders to be filed with the SEC (the "Proxy Statement") under the heading "Proposal 1 - Election of Group III Directors" and is incorporated by reference in this Annual Report.

Information required by this item with respect to our executive officers is set forth in the Proxy Statement under the heading "Executive Officers."

Information required by this item with respect to our audit committee and our audit committee financial expert is contained in the Proxy Statement under the heading “Proposal 1 – Election of Group III Directors – Committees of the Board of Directors – Audit Committee” and is incorporated by reference in this Annual Report.

Information required by this item with respect to compliance with Section 16(a) of the Exchange Act is contained in the Proxy Statement under the heading “Additional Information Regarding Executive Compensation - Section 16(a) Beneficial Ownership Reporting Compliance” and is incorporated by reference in this Annual Report.

The Board of Directors has adopted a Code of Business Conduct and Ethics (the “Code”) that applies to all of the Company’s directors, officers (including the principal executive officer, principal financial officer and principal accounting officer) and employees. Information related to the Code is contained in the Proxy Statement under the heading “Proposal 1 – Election of Group III Directors – Governance of the Company” and is incorporated by reference in this Annual Report.

We intend to disclose future amendments to certain provisions of the Code, or waivers of such provisions granted to executive officers and directors, on our website within four business days following the date of such amendment or waiver.

ITEM 11. EXECUTIVE COMPENSATION
