Notes to Unaudited Condensed Consolidated Financial Statements

Note 1 - Basis of Presentation

The accompanying condensed (a) consolidated balance sheet as of December 31, 2015, which has been derived from audited consolidated financial statements, and (b) the unaudited interim condensed consolidated financial statements have been prepared and, in the opinion of management, contain all the adjustments (consisting of those of a normal recurring nature) considered necessary to present fairly the consolidated financial position and the consolidated statements of comprehensive income and consolidated cash flows for the periods presented in conformity with generally accepted accounting principles for interim consolidated financial information and the instructions to Form 10-Q and Article 8 of Regulation S-X. Accordingly, they do not include all the information and footnotes required by accounting principles generally accepted in the United States of America. Operating results for the three and six months ended June 30, 2016 are not necessarily indicative of the results that may be expected for the fiscal year ending December 31, 2016. It is suggested that these condensed consolidated financial statements be read in conjunction with the consolidated financial statements and notes thereto included in the Company's annual report on Form 10-K for the fiscal year ended December 31, 2015.

Principles of consolidation and nature of operations:

The condensed consolidated financial statements include the accounts of CTI Industries Corporation and its wholly-owned subsidiaries, CTI Balloons Limited and CTI Supply, Inc., its majority-owned subsidiaries, Flexo Universal, S. de R.L. de C.V. and CTI Europe gmbH, as well as the accounts of Venture Leasing S. A. de R. L., Venture Leasing L.L.C and Clever Container Company, L.L.C. (the "Company"). The last three entities have been consolidated as variable interest entities. All significant intercompany transactions and accounts have been eliminated in consolidation. The Company (i) designs, manufactures and distributes balloon products throughout the world and (ii) operates systems for the production, lamination, coating and printing of films used for food packaging and other commercial uses and for conversion of films to flexible packaging containers and other products.

Variable Interest Entities ("VIE's"):

The determination of whether or not to consolidate a variable interest entity under U.S. GAAP requires a significant amount of judgment concerning the degree of control over an entity by its holders of variable interest. To make these judgments, management has conducted an analysis of the relationship of the holders of variable interest to each other,

the design of the entity, the expected operations of the entity, which holder of variable interests is most “closely associated” to the entity and which holder of variable interests is the primary beneficiary required to consolidate the entity. Upon the occurrence of certain events, management reviews and reconsiders its previous conclusion regarding the status of an entity as a variable interest entity. There are three entities that have been consolidated as variable interest entities.

Use of estimates:

In preparing condensed consolidated financial statements in conformity with accounting principles generally accepted in the United States of America, management makes estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the condensed consolidated financial statements and the reported amount of revenue and expenses during the reporting period in the condensed consolidated financial statements and accompanying notes. Actual results may differ from those estimates. The Company's significant estimates include reserves for doubtful accounts, reserves for the lower of cost or market of inventory, reserves for deferred tax assets and recovery value of goodwill.

Earnings per share:

Basic earnings per share is computed by dividing net income by the weighted average number of shares of common stock outstanding during each period.

Diluted earnings per share is computed by dividing the net income by the weighted average number of shares of common stock and equivalents (stock options and warrants), unless anti-dilutive, during each period.

As of June 30, 2016 and 2015, shares to be issued upon the exercise of options and warrants aggregated 288,048 and 344,048, respectively. The number of anti-dilutive shares (not included in the determination of earnings on a diluted basis) for the three and six months ended June 30, 2016 and 2015 were 0 and 174,500, respectively, all of which were represented by options.

Significant Accounting Policies:

The Company's significant accounting policies are summarized in Note 2 of the Company's consolidated financial statements for the year ended December 31, 2015. There were no significant changes to these accounting policies during the three and six months ended June 30, 2016.

Reclassification:

Certain 2015 amounts have been reclassified to conform to the 2016 presentation.

Recent Accounting Pronouncements:

In 2014, the FASB issued guidance on revenue recognition, which provides for a single five-step model to be applied to all revenue contracts with customers. The guidance also requires additional financial statement disclosures that will enable users to understand the nature, amount, timing and uncertainty of revenue and cash flows relating to customer contracts. The guidance provides an option to use either a retrospective approach or a cumulative effect adjustment approach to implement the guidance. In 2015, the FASB issued a deferral of the effective date of the guidance to 2018, with early adoption permitted in 2017. In 2016, the FASB issued final amendments clarifying the implementation guidance for principal versus agent considerations, identifying performance obligations and the accounting of intellectual property licenses. In addition, the FASB introduced practical expedients related to disclosures of remaining performance obligations, as well as other amendments to guidance on collectibility, non-cash consideration and the presentation of sales and other similar taxes. We are currently evaluating the impact of this guidance on our financial statements and the timing of adoption, and have not yet selected a transition approach.

In April 2015, the FASB issued ASU No. 2015-03, *Simplifying the Presentation of Debt Issuance Cost*. The ASU requires debt issuance costs associated with a recognized debt liability to be presented on the balance sheet as a direct deduction from the carrying amount of the corresponding debt liability. This new guidance is effective for interim and annual reporting periods beginning after December 15, 2015, with early adoption permitted. An entity should apply the new guidance on a retrospective basis. We adopted this ASU effective with the first quarter of fiscal year 2016. The adoption of this accounting standard update did not have a material impact to our consolidated financial statements.

In July 2015, the FASB issued ASU 2015-11, *Simplifying the Measurement of Inventory*. Under this ASU, inventory will be measured at the “lower of cost and net realizable value” and options that currently exist for “market value” will be eliminated. The ASU defines net realizable value as the “estimated selling prices in the ordinary course of business, less reasonably predictable costs of completion, disposal, and transportation.” No other changes were made to the current guidance on inventory measurement. ASU 2015-11 is effective for interim and annual periods beginning after December 15, 2016. Early application is permitted and should be applied prospectively. We do not expect the adoption of this accounting standard update to have a material impact on our consolidated financial statements.

In November 2015, the FASB issued ASU 2015-17, *Balance Sheet Classification of Deferred Taxes*, to eliminate the current requirements to classify deferred income tax assets and liabilities between current and noncurrent. To simplify the presentation of deferred income taxes, the amendments in this update require that deferred tax liabilities and assets be classified as noncurrent in a classified statement of financial position. For public business entities, the amendments in this update are effective for financial statements issued for annual periods beginning after December 15, 2016, and interim periods within those annual periods. Earlier application is permitted for all entities as of the beginning of an interim or annual reporting period. We are continuing to evaluate the impact of ASU 2015-17 on our consolidated financial statement.

In February 2016, the FASB issued ASU 2016-02, *Leases* (Topic 842), aimed at making leasing activities more transparent and comparable. The new standard requires substantially all leases be recognized by lessees on their balance sheet as a right-of-use asset and corresponding lease liability, including today’s operating leases. For public business entities, the standard is effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years, although early adoption is allowed. For all other entities, the standard is effective for fiscal years beginning after December 15, 2019, and interim periods within fiscal years beginning after December 15, 2020. Early application is permitted for all entities. We are continuing to evaluate the impact of ASU 2016-02 on our consolidated financial statements and related disclosures.

Note 2 - Stock-Based Compensation; Changes in Equity

The Company has adopted Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 718 which requires all share-based payments to employees, including grants of employee stock options, to be recognized in the condensed consolidated financial statements based on their grant-date fair values.

The Company has applied the Black-Scholes model to value stock-based awards and issued warrants related to notes payable. That model incorporates various assumptions in the valuation of stock-based awards relating to the risk-free rate of interest to be applied, the estimated dividend yield and expected volatility of our common stock. The risk-free rate of interest is the related U.S. Treasury yield curve for periods within the expected term of the option at the time of grant. The dividend yield on our common stock is estimated to be 0%, as the Company did not issue dividends during

2016 and 2015. The expected volatility is based on historical volatility of the Company's common stock.

The Company's net loss for the three months ended June 30, 2016 and net income in 2015 includes approximately \$11,000 and \$9,000, respectively, of compensation costs related to share based payments. The Company's net loss for the six months ended June 30, 2016 and net income in 2015 includes approximately \$23,000 and \$19,000, respectively, of compensation costs related to share based payments. As of June 30, 2016 there is \$37,000 of unrecognized compensation expense related to non-vested stock option grants and stock grants. Foil Balloons. During the three months ended June 30, 2016, revenues from the sale of foil balloons increased by 1.4% compared to the prior year period from \$6,262,000 to \$6,350,000. During the six months ended June 30, 2016, revenues from the sale of foil balloons increased by 7.5% compared to the prior year period from \$13,356,000 to \$14,362,000. During the first half of 2016, foil balloon sales to our largest customer increased to \$8,287,000 from \$8,150,000 in the first half of 2015. Sales of foil balloons to other customers increased to \$6,075,000 from \$5,206,000 for the same period last year. These sales to other customers include sales in the United States, Mexico, the United Kingdom and Europe.

Latex Balloons. During the three months ended June 30, 2016, revenues from the sale of latex balloons decreased by 1.1% compared to the prior year period from \$2,288,000 to \$2,263,000. During the six months ended June 30, 2016, revenues from the sale of latex balloons decreased by 6.5% compared to the prior year period from \$4,608,000 to \$4,308,000. The decline in sales is attributable to (i) the reduced Dollar value of sales denominated in the Mexican Peso during those periods due to the decline of the Peso in relation to the Dollar and (ii) a reduction in sales to customers in Central and South America.

Vacuum Sealing Products. During the three months ended June 30, 2016, revenues from the sale of pouches and vacuum sealing machines decreased by 7.9% compared to the prior year from \$2,654,000 to \$2,444,000. During the six months ended June 30, 2016, revenues from the sale of pouches and vacuum sealing machines decreased by 12.7% compared to the prior year from \$5,464,000 to \$4,768,000. The decline in revenues for the six month period is attributable to the decline in sales of zippered pouches from \$535,000 in the first quarter of 2015 to \$9,000 in the first quarter of 2016. Most of the sales of zippered pouches were to a principal customer. Sales to that customer declined in the first quarter of this year and the customer has advised us that they will not be purchasing the product on an ongoing basis. However, we are introducing a new line of zippered pouch products under the brand Clever Fresh™ to be sold through Clever Container from which we anticipate new revenues of zippered pouch product. With respect to our branded vacuum sealing systems, sales for the quarter increased to \$2,435,000 from \$2,119,000 for the same period last year and sales for the six months ended June 30, 2016 increased to \$4,646,000 from \$4,249,000 in the same period last year. We are anticipating a significant increase in sales of this product line during the course of 2016.

Films. During the three months ended June 30, 2016, revenues from the sale of laminated film products increased by 23.0% compared to the prior year period from \$1,097,000 to \$1,350,000. During the six months ended June 30, 2016, revenues from the sale of laminated film products increased by 26.1% compared to the prior year period from \$1,880,000 to \$2,370,000. Virtually all of the sales of this product line were to a single long-term customer.

Home Organizing Products. During the three months ended June 30, 2016, revenues from the sale of home organizing products increased by 76.0% compared to the prior year period from \$850,000 to \$1,496,000. During the six months ended June 30, 2016, revenues from the sale of home organizing products increased by 88.4% compared to the prior year period from \$1,568,000 to \$2,954,000. Over the past several years, we have initiated direct sales of home organizing products through Clever Container Company, LLC. We now have a 28.5% direct ownership interest in Clever Container and the results of its operations are consolidated with those of the Company as a variable interest entity. Clever Container engages in the direct sales of home organizing products and containers (including certain products produced by the Company) through a network of independent consultants throughout the United States.

Other Revenues. During the three months ended June 30, 2016, revenues from the sale of various other products decreased by 47.3% to \$248,000 compared to revenues from other products in the same period in 2015 of \$470,000. During the six months ended June 30, 2016, revenues from the sale of various other products decreased by 65.5% to \$593,000 compared to revenues from other products in the same period in 2015 of \$1,720,000. The revenues from the sale of other products during 2016 include (i) sales of a line of “Candy Blossoms” and “Candy Loons” consisting of candy and small inflated balloons sold in small containers, and (ii) the sale of accessories and supply items related to balloon products.

On October 13, 2015, the Company entered into Amendment No. 6 to the Credit Agreement among the Company and BMO Harris. Pursuant to the terms of the Amendment, the company will be able to obtain advances under the revolving line of credit with BMO Harris in the amount provided for in the borrowing base formula plus an overadvance amount of up to \$1 million, up to a total maximum amount under the revolving line of credit of \$12 million. The Company has been advised of a substantial order for vacuum sealing systems for delivery in November 2016 which requires a significant investment by the Company in vacuum sealing machines and rolls of film in the period of June through October. Management has undertaken financing activities to meet that financial requirement.

On July 29, 2016, the Company and certain accredited investors entered into a Securities Purchase Agreement in which the investors purchased 152,850 shares of common stock at the price of \$6.00 per share. As additional consideration for the purchase of shares in the Company, each investor received one-half of a warrant, with one warrant entitling the investor to purchase one share of common stock at the price of \$7.00 per share. The warrants are exercisable between six months and three years from the investment date. In addition to the Purchase Agreement, the Company and the investors entered into a Registration Rights Agreement under which the Company agreed to file a Registration Statement with the SEC on or before August 29, 2016 to register the common stock purchased by the investors.

The issuance of shares in this placement resulted in gross proceeds to the Company of \$917,000, and after commissions and fees, net proceeds to the Company of approximately \$836,394. The Company expects to use these proceeds for general working capital purposes.

On August 5, 2016, the Company entered into Amendment No. 8 to the Credit Agreement among the Company and BMO Harris and Amendment No. 3 to the Note and Warrant Purchase Agreement among the Company and BMO Equity. Management believes that, with the foregoing financing funds available under the Credit Agreement, as amended, as well as internally generated funds will be sufficient for the Company to meet its working capital needs for at least the next 12 months.

As of June 30, 2016, the Company was in compliance with all of the financial covenants under the Credit Agreement and the Note and Warrant Purchase Agreement, except that the Company did not meet two of the financial covenants in the Credit Agreement with the Bank – the ratio of EBITDA to Senior Debt and the ratio of EBITDA to Total Debt. Please see pages 25-28 of our Annual Report on Form 10-K for the year ended December 31, 2015 for a description of policies that are critical to our business operations and the understanding of our results of operations. Item 3. Quantitative and Qualitative Disclosures Regarding Market Risk

Not applicable.

Item 4. Controls and Procedures

In the course of review of our preliminary financial statements for this period, our audit firm identified a transaction involving the sale and leaseback of certain equipment by our Mexico subsidiary, Flexo Universal, which was not properly recorded under U.S. GAAP. This error was identified and corrected prior to completion of the financial statements. Upon review by management and our Audit Committee, it was determined that information respecting the transaction, and the accounting for it, was not provided to management on a timely basis to enable proper review of the transaction prior to its being recorded.

Accordingly, our management under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, reviewed and evaluated the effectiveness of the design and operation of our disclosure controls and procedures and determined that there was a material weakness such controls and procedures with respect to this matter. Based upon such review and evaluation, our Chief Executive Officer, Chief Financial Officer, and our Audit Committee, have concluded that the disclosure controls and procedures were not effective as of June 30, 2016 to ensure that the information required to be disclosed by the Company in the reports that we file or submit under the Exchange Act is (a) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and (b) accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow for timely decisions regarding required disclosure.

Management, working with our Audit Committee, intends to effect changes to our system of internal controls to remediate the material weakness identified, in particular to design and implement a system for effective timely communication to, and review by, the Chief Financial Officer and other U.S. accounting personnel of accounting for complex, non-routine transactions as necessary to provide reasonable assurance that the Company's financial statements and related disclosures will be prepared in accordance with U.S. GAAP.

There have been no material changes in our internal control over financial reporting during the three months ended June 30, 2016 that have materially affected or are likely to materially affect our internal controls over financial reporting.
