LETTER TO SHAREHOLDERS

DEAR SHAREHOLDERS,

We are pleased to announce that SMIC recorded historical highs in both revenue and net profit attributable to owners of the Company for the first half of this year. The Company recorded total revenue of approximately US\$1.32 billion for the first half of this year, representing an increase of 25.4% YOY. We target that the growth rate of our revenues this year will reach over 25%, substantially higher than the forecast industry average single-digit 2016 annual growth rate. As of the end of the second quarter of this year, we achieved our sixth quarter of consecutive revenue growth and expect that our revenues will continue to grow by 8–11% for the third quarter of the year. We recorded net profit attributable to owners of the Company of over US\$159 million for the first half of this year, representing an increase of approximately 20.3% as compared to the corresponding period of last year. Revenue from PRC-based customers continued to experience significant growth for the first half of this year, achieving an increase of 26.9% as compared to the corresponding period last year and representing 49.7% of total revenue. Revenue from our Eurasia region also experienced phenomenal growth of 93.5% and its contribution to total revenue increased from 14.5% for the first half of last year to 22.4%. We maintained significant growth in our revenue from 40/45nm process during the first half of the year, recording a growth of 72.3% as compared to the corresponding period last year. As we have sustained full utilizations, we plan to expand the capacity of our two 12-inch fabs in Beijing, the 12-inch fab in Shanghai and our 8-inch fab in Shenzhen to meet the strong demand from our customers. With the expansion of our capacity and continuous innovation, we are confident that we are able to further increase our market share, enhance our position in the industry and benefit from continuous increase in our economies of scale.

With regard to advanced process technology, SMIC announced in February this year that a 28nm high-k/metal gate (HKMG) product had been successfully taped out, verified, and was ready for mass production. The 28nm SoC chips designed by Leadcore Technology were manufactured based on our platform and have been successfully used in smartphones. We shall also continue to develop and improve the 28nm technology platform so as to provide customers with more selections of enhanced manufacturing processes.

With the evolution of technology, customers are insisting on a one-stop service for manufacturing and packaging. Therefore, the cooperation between manufacturing and packaging is becoming increasingly important. Siltech Shanghai has announced its intention to acquire JCET's new shares for approximately US\$400 million, along with the previous ownership of Changjiang Xinke (which acquired STATS ChipPAC Limited), purchased for US\$100 million and converted to JCET's shares. Upon relevant government's approval, we (through Siltech Shanghai) will own 14.26% shares of JCET, becoming their largest shareholder. SMIC and JCET's further cooperation is expected to complement each other's strengths and create a more comprehensive industry ecosystem. Together, we can shorten time-to-market for customers' products. This joint effort holds significance to the many PRC domestic fabless companies and overseas customers who target China as their prime market.

We made a great stride forward in globalizing our operation through the Company's June announcement of our proposed acquisition of 70% equity interest in LFoundry, an Italian speciality IC foundry, for a consideration of EUR49 million. This transaction closed in July. This also represented the first time a PRC IC foundry has successfully acquired a production base outside China. As LFoundry is a leading foundry for auto CMOS image sensors globally, SMIC expects to, by virtue of this acquisition, successfully gain a foothold in the global automotive electronics market and occupy certain market shares. The acquisition is expected to improve the Company's 8-inch fab capacity and expand the overall technology portfolio, and may also achieve synergies in terms of technology, products, talents and market penetration.

4 SMIC 2016 INTERIM REPORT

The Company is also actively diversifying its financing channels this year. In June, SMIC successfully completed the issuance of its first tranche of Panda Bonds in the PRC domestic interbank market and raised proceeds of RMB2.1 billion, making SMIC the first non-financial institution to complete the issuance of short-term commercial paper and medium-term notes of Panda Bonds in the inter-bank market concurrently. SMIC also completed the issuance of zero coupon and zero yield six-year convertible bonds at a 34% premium conversion price (including the right to redemption by the issuer in the fourth year), which successfully raised proceeds of US\$450 million.

It is the third year in which we have sponsored the “SMIC Liver Transplant Program for Children”. The Company announced in May that it had donated RMB2.55 million to China Soong Ching Ling Foundation for the project. Up to this date, the Company has donated over RMB10 million to this program and 137 afflicted children have successfully received treatment and are able to enjoy their new lives.

In the future, SMIC will continue to focus on enhancing its competitive strength and expanding its corporate scale in order to further enhance the Company’s position in the global semiconductor industry chain. We are excited and encouraged by the results that SMIC has achieved for the first half of 2016 and continue to target high growth rate going forward. We continue to be committed to diligently and carefully execute our business plan for the best interests of our shareholders. We would like to again express our sincere gratitude to all of our shareholders, customers, suppliers, and employees for their continued care and support of SMIC’s development.

SMIC 2016 INTERIM REPORT 5

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The Board of Directors (the "Board") of Semiconductor Manufacturing International Corporation (the "Company" or "SMIC") would like to announce the unaudited interim results of operations of the Company and its subsidiaries (hereinafter collectively referred to as the "Group") for the six months ended June 30, 2016, and would like to express its gratitude to the shareholders and its staff for their support for the Group.

SALES

Sales increased by 25.4% from US\$1,056.4 million for the six months ended June 30, 2015 to US\$1,324.5 million for the six months ended June 30, 2016, primarily due to an increase in wafer shipments during this period. The number of wafer shipments increased by 26.6% from 1,423,861 8-inch wafer equivalents for the six months ended June 30, 2015 to 1,803,170 8-inch wafer equivalents for the six months ended June 30, 2016.

COST OF SALES AND GROSS PROFIT

Cost of sales increased by 30.5% from US\$730.1 million for the six months ended June 30, 2015 to US\$953.0 million for the six months ended June 30, 2016, primarily due to an increase in wafer shipment during this period and increased manufacturing costs as the majority-owned fab in Beijing entered into mass production in December 2015.

The Group had a gross profit of US\$371.6 million for the six months ended June 30, 2016 compared to a gross profit of US\$326.3 million for the six months ended June 30, 2015, representing an increase of 13.9%. Gross margin decreased to 28.1% for the six months ended June 30, 2016 from 30.9% for the six months ended June 30, 2015. The decrease in gross margin was primarily due to increased manufacturing costs from the majority-owned fab in Beijing which entered into mass production in December 2015.

PROFIT FOR THE PERIOD FROM OPERATIONS

Profit from operations increased from US\$106.2 million for the six months ended June 30, 2015 to US\$181.6 million for the six months ended June 30, 2016 primarily due to the combined effect of 1) an increase in wafer shipment, 2) a

decrease in accrued employee bonus and 3) higher gain realized from the partial disposal of the living quarters in Beijing in the first half of 2016 partially offset by an increase in R&D activities.

Research and development expenses increased by 8.6% from US\$108.7 million for the six months ended June 30, 2015 to US\$118.0 million for the six months ended June 30, 2016. The increase was mainly due to an increase in R&D activities.

General and administrative expenses decreased by 35.5% from US\$94.5 million for the six months ended June 30, 2015 to US\$61.0 million for the six months ended June 30, 2016. The decrease was primarily due to 1) a decrease in accrued employee bonus and 2) a decrease in the pre-operating related expenses in the first half of 2016, as compared to the first half of 2015, after the majority-owned fab in Beijing entered into mass production in December 2015.

Sales and marketing expenses decreased by 2.3% from US\$18.4 million for the six months ended June 30, 2015 to US\$17.9 million for the six months ended June 30, 2016.

Other operating income were US\$1.4 million and US\$6.9 million for the six months ended June 30, 2015 and 2016, respectively, and the increase was due to the gains arising from the partial disposal of the Group's living quarters recorded in the first half of 2016.

As a result, the Group's profit from operations increased to US\$181.6 million for the six months ended June 30, 2016 from US\$106.2 million for the six months ended June 30, 2015.

PROFIT FOR THE PERIOD

Due to the factors described above, the Group had a profit of US\$146.3 million for the six months ended June 30, 2016 compared to US\$123.3 million for the six months ended June 30, 2015.

FUNDING SOURCES FOR MATERIAL CAPITAL EXPENDITURE IN THE COMING YEAR

In 2016, the Group plans to spend approximately US\$2.5 billion in capital expenditures for foundry operations, which are subject to adjustment based on market conditions. The capital expenditures are mainly for 1) the expansion of capacity in our majority-owned 12-inch fab in Beijing, 12-inch fab in Shanghai, 8-inch fab in Shenzhen and a new majority-owned 12-inch joint venture fab for bumping services in Jiangyin, 2) a new majority-owned joint venture company, which will focus on research and development on 14nm logic technology, and 3) research and development equipment, mask shops and intellectual property acquisition.

In addition, the Group budgeted approximately US\$50 million in 2016 as capital expenditures for non-foundry operations. This is mainly for the construction of living quarters for employees as part of the Group's employee retention program.

The Group's actual expenditures may differ from its planned expenditures for a variety of reasons, including changes in its business plan, process technology, market conditions, equipment prices, and customer requirements. The Group will monitor the global economy, the semiconductor industry, the demands of its customers, and its cash flow from operations and will adjust its capital expenditures plans as necessary.

The primary sources of capital resources and liquidity include cash generated from operations, bank borrowings and debt or equity issuances and other forms of financing. Future acquisitions, mergers, strategic investments, or other developments also may require additional financing. The amount of capital required to meet the Group's growth and development targets is difficult to predict in the highly cyclical and rapidly changing semiconductor industry.

LIQUIDITY AND CAPITAL RESOURCES

For the six months ended June 30, 2016, the Group incurred capital expenditures of US\$1,543.2 million compared to US\$513.0 million for the six months ended June 30, 2015. The Group financed its capital expenditures primarily from cash flows generated from operating and financing activities.

The Group had US\$1,586.7 million in cash and cash equivalents as of June 30, 2016. These cash and cash equivalents are held in the form of United States Dollars, Japanese Yen, Euro, and Chinese Renminbi. The net cash from operating activities increased by 28.8% from US\$288.9 million for the six months ended June 30, 2015 to US\$372.2 million for the six months ended June 30, 2016.

Net cash used in investing activities was US\$1,627.3 million for the six months ended June 30, 2016, primarily attributable to 1) purchases of plant and equipment for the fabs in Shanghai, Beijing, Shenzhen and Jiangyin, 2) the net result of proceeds from selling and payments for acquiring financial assets and 3) payments for acquiring long-term investments. Net cash used in investing activities was US\$319.3 million for the six months ended June 30, 2015, primarily attributable to 1) purchases of plant and equipment for the fabs in Shanghai and Beijing, 2) the net result of proceeds from selling and payments for acquiring financial assets and 3) payments for acquiring long-term investment.

Net cash generated from financing activities was US\$1,844.6 million for the six months ended June 30, 2016, which was primarily 1) the net result of proceeds from new financing and repayments of bank borrowings, 2) net proceeds from the issuance of medium-term and short-term notes and 3) capital contribution from China Integrated Circuit Industry Investment Fund Co., Ltd. (“China IC Fund”) into the registered capital of Semiconductor Manufacturing North China (Beijing) Corporation (“SMNC”) in the first half of 2016. Net cash generated from financing activities was US\$193.6 million for the six months ended June 30, 2015, which was primarily 1) the net result of proceeds from new bank borrowings and repayments of bank borrowings and

2) net proceeds from the issuance of new Ordinary Shares in the first half of 2015.

As of June 30, 2016, the Group’s outstanding long-term liabilities primarily consisted of US\$558.6 million in secured bank loans, US\$765.2 million in unsecured bank loans, US\$399.4 million in convertible bonds, US\$494.0 million in USD bond, US\$224.0 million in medium-term notes and US\$90.5 million in short-term notes. Of which, US\$61.3 million was classified as the current portion of long-term loans.

PROSPECTS AND FUTURE PLANS

In the first half of 2016, the Group achieved its historical high revenue of US\$1.32 billion, an increase of 25.4% compared to the first half of 2015. With high utilizations in Q1 and Q2 of 99% and 98%, the Group targets high utilizations in the second half given their current demand situation. The Group expects third quarter revenue to increase by 8% to 11% quarter over quarter and targets to grow mid to high 20's percent annually in 2016 compared to 2015, which includes the growth from acquiring LFoundry Europe. SMIC's EBITDA margin* was around 35% in 2015; the Group targets EBITDA margin to increase for the full year of 2016 compared to 2015.

With regard to SMIC's future plans for capacity, the Group continues to expand its 8-inch and 12-inch capacities to address the great demand. The Group's planned consolidated capital expenditures are around US\$2.5 billion for 2016. Shanghai 12-inch fab has already reached its target 20,000 12-inch wafers per month. The Beijing JV fab hit 15,000 12-inch wafers per month at the end of the first half of 2016 and is targeted to reach 18,000 by year-end. The Group's fully-owned Beijing 12-inch fab is targeted to grow to 45,000 12-inch wafers per month capacity by year-end from the reported 37,000 at the end of the first half of 2016. Meanwhile, Shenzhen had reached 26,000 8-inch wafers per month capacity in the first half of 2016 and is targeted to be 31,000 by year-end. SMIC completed the acquisition of majority ownership of LFoundry Europe in Q3 of 2016; subsequently, the Group will consolidate LFoundry's 40,000 8-inch wafers per month capacity.

The Group targets to grow at a 20% compound annual growth rate over the next 3–4 years and continues to focus on delivering sustainable profitable growth and building value for all stakeholders.

*EBITDA margin is defined as profit for the period excluding the impact of the finance cost, depreciation and amortization, and income tax expense divided by revenue. SMIC uses EBITDA margin as a measure of operating performance; for planning purposes, including the preparation of the Group's annual operating budget; to allocate resources to enhance the financial performance of the Group's business; to evaluate the effectiveness of the Group's business strategies; and in communications with SMIC's board of directors concerning the Group's financial performance. Although EBITDA is widely used by investors to measure a company's operating performance without regard to items, such as net finance cost, income tax benefit and expense and depreciation and amortization that can vary substantially from company to company depending upon their respective financing structures and accounting policies, the book values of their assets, their capital structures and the methods by which their assets were acquired, EBITDA has limitations as an analytical tool, and you should not consider it in isolation or as a substitute for analysis of the Group's results of operations as reported under IFRS. Some of these limitations are: it does not reflect the Group's capital expenditures or future requirements for capital expenditures or other contractual commitments; it

does not reflect changes in, or cash requirements for, the Group's working capital needs; it does not reflect finance cost; it does not reflect cash requirements for income taxes; that, although depreciation and amortization are non-cash charges, the assets being depreciated or amortized will often have to be replaced in the future, and these measures do not reflect any cash requirements for these replacements; and that other companies in SMIC's industry may calculate these measures differently than SMIC does, limiting their usefulness as comparative measures.

The following table sets forth the reconciliation of EBITDA and EBITDA margin to their most directly comparable financial measures presented in accordance with IFRS, for the periods indicated.

SMIC 2016 INTERIM REPORT 23

CODE OF BUSINESS CONDUCT AND ETHICS

The Board has adopted a code of business conduct and ethics (the “Code of Conduct”) which provides guidance about doing business with integrity and professionalism. The Code of Conduct addresses issues including among others, fraud, conflicts of interest, corporate opportunities, protection of intellectual property, transactions in the Company’s securities, use of the Company’s assets, and relationships with customers and third parties. Any violation of the Code of Conduct is reported to the Company’s Compliance Office, which will subsequently report such violation to the Audit Committee.

U.S. Corporate Governance Practices

Companies listed on the New York Stock Exchange, or the NYSE, must comply with certain corporate governance standards under Section 303A of the New York Stock Exchange Listed Company Manual. Because the Company’s American Depositary Shares are registered with the SEC and are listed on the New York Stock Exchange, the Company is also subject to certain U.S. corporate governance requirements, including many of the provisions of the Sarbanes-Oxley Act of 2002. However, because the Company is a “foreign private issuer”, many of the corporate governance rules in the NYSE Listed Company Manual, or the NYSE Standards, do not apply to the Company. The Company is permitted to follow corporate governance practices in accordance with Cayman Islands law and the Hong Kong Stock Exchange Listing Rules in lieu of most of the corporate governance standards contained in the NYSE Standards.

Set forth below is a brief summary of the significant differences between the Company’s corporate governance practices and the corporate governance standards applicable to U.S. domestic companies listed on the NYSE, or U.S. domestic issuers:

The NYSE Standards require U.S. domestic issuers to have a nominating/corporate governance committee composed entirely of independent directors. We are not subject to this requirement, and we have not established a nominating/corporate governance committee. Instead, our Board has established the Nomination Committee to review the structure, size and composition (including the skills, knowledge and experience as well as diversity of perspectives of the Board) at least annually, monitor the implementation of Board Diversity Policy, make recommendations on any proposed changes to the Board to complement the Company’s corporate strategy, identify individuals suitably qualified to become Board members consistent with criteria approved by the Board, assess the independence of independent non- executive Directors, make recommendations to the Board on the selection of individuals nominated for directorships, and make recommendations to the Board on the appointment or reappointment of Directors and succession planning for Directors, in particular the Chairman of the Board and the Chief Executive Officer. However, such nomination committee is not responsible for developing and recommending to the Board a set of corporate governance guidelines applicable to the Company and overseeing the evaluation of the Board and management.

The NYSE Standards provide detailed tests that U.S. domestic issuers must use for determining independence of directors. While we may not specifically apply the NYSE tests, our Board assesses independence in accordance with Hong Kong Stock Exchange Listing Rules, and in the case of Audit Committee members in accordance with Rule 10A-3 under the U.S. Securities Exchange Act of 1934, as amended, and considers whether there are any relationships or circumstances which are likely to affect such director's independence from management.

24 **SMIC 2016** INTERIM REPORT

We believe that the composition of our Board and its committees and their respective duties and responsibilities are otherwise generally responsive to the relevant NYSE Standards applicable to U.S. domestic issuers. However, the charters for our Audit Committee and Compensation Committee may not address all aspects of the NYSE Standards. For example, NYSE Standards require compensation committees of U.S. domestic issuers to produce a compensation committee report annually and include such report in their annual proxy statements or annual reports on Form 10-K. We are not subject to this requirement, and we have not addressed this in our Compensation Committee charter. We disclose the amounts of compensation of our Directors on a named basis and the five highest individuals on an aggregate basis in our 2014 annual report in accordance with the requirements of the Hong Kong Stock Exchange Listing Rules.

The NYSE Standards require that shareholders must be given the opportunity to vote on all equity compensation plans and material revisions to those plans. We comply with the requirements of Cayman Islands law and the Hong Kong Stock Exchange Listing Rules in determining whether shareholder approval is required, and we do not take into consideration the NYSE's detailed definition of what are considered "material revisions".
