Forward-Looking Information

Certain of the discussions and information included in this report may constitute “forward-looking statements” within the meaning of the federal securities laws. Forward-looking statements are statements that are not historical in nature and may include statements relating to our goals, plans and projections regarding industry and general economic trends, our expected financial position, results of operations or market position and our business strategy. Such statements can generally be identified by words such as “may,” “target,” “could,” “would,” “will,” “should,” “believe,” “expect,” “anticipate,” “plan,” “intend,” “foresee” and other similar words or phrases. Forward-looking statements may also relate to our expectations and assumptions with respect to, among other things:

- our ability to execute our business strategy;
- our ability to further improve our operating cash flows, and the availability of capital and liquidity;
- our estimated future capital expenditures;
- the duration of the economic recovery process and its impact on our revenues and expenses;
- our parts and service revenue due to, among other things, improvements in manufacturing quality, manufacturer recalls, the recently lower than historical U.S. SAAR and any changes in business strategy and government regulations;
- the variable nature of significant components of our cost structure;
- our ability to decrease our exposure to regional economic downturns due to our geographic diversity and brand mix;
- manufacturers’ willingness to continue to use incentive programs to drive demand for their product offerings;
- our ability to fully leverage our dealer management system in a cost-efficient manner;
- our acquisition and divestiture strategies;
- the continued availability of financing, including floor plan financing for inventory;
- the ability of consumers to secure vehicle financing;
- the growth of mid-line import and luxury brands over the long-term;
- our ability to mitigate any future negative trends in new vehicle sales; and
- our ability to increase our net income as a result of the foregoing and other factors.

Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause our actual future results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such factors include, but are not limited to:

- our ability to execute our balanced automotive retailing and service business strategy;
- changes in the mix, and total number, of vehicles we are able to sell;

• changes in general economic and business conditions, including changes in consumer confidence levels, interest rates, consumer credit availability and employment levels;

• changes in laws and regulations governing the operation of automobile franchises, including trade restrictions, consumer protections, accounting standards, taxation requirements and environmental laws;

• changes in the price of oil and gasoline;

• our ability to generate sufficient cash flows, maintain our liquidity and obtain additional funds for working capital, capital expenditures, acquisitions, debt maturities and other corporate purposes, if necessary;

• our continued ability to comply with applicable covenants in various of our financing and lease agreements, or to obtain waivers of these covenants as necessary;

• our relationships with, and the reputation and financial health and viability of, the vehicle manufacturers whose brands we sell, and their ability to design, manufacture, deliver and market their vehicles successfully;

Table of Contents

• significant disruptions in the production and delivery of vehicles and parts for any reason, including natural disasters, product recalls, work stoppages or other occurrences that are outside of our control;

• adverse results from litigation or other similar proceedings involving us;

• our relationship with, and the financial stability of, our lenders and lessors;

• our ability to execute our initiatives and other strategies;

• high levels of competition in our industry, which may create pricing and margin pressures on our products and services;

• our ability to renew, and enter into new, framework and dealer agreements with vehicle manufacturers whose brands we sell, on terms acceptable to us;

• our ability to attract and to retain key personnel;

• our ability to leverage gains from our dealership portfolio; and

• significant disruptions in the financial markets, which may impact our ability to access capital.

Many of these factors are beyond our control or difficult to predict, and their ultimate impact could be material.

Moreover, the factors set forth under “Item 1A. Risk Factors” and “Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations” below and other cautionary statements made in this report should be read and considered as forward-looking statements subject to such uncertainties. We urge you to carefully consider those factors.

Forward-looking statements speak only as of the date of this report. We expressly disclaim any obligation to update any forward-looking statement contained herein.

Additional Information

Our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and any amendments to such reports filed pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, are made available free of charge on our web site at <http://www.asburyauto.com> as soon as practical after such reports are filed with the Securities and Exchange Commission (the “Commission”). In addition, the proxy statement that will be delivered to our stockholders in connection with our 2012 Annual Meeting of Stockholders, when filed, will also be available on our web site, and at the URL stated in such proxy statement. We also make available on our web site copies of our charter, bylaws and other materials that outline our corporate governance policies and practices, including:

• the respective charters of our audit committee, governance and nominating committee, compensation and human resources committee and risk management committee;

• our criteria for independence of the members of our board of directors, audit committee, and compensation committee;

• our Corporate Governance Guidelines; and

• our Code of Business Conduct and Ethics for Directors, Officers and Employees.

We intend to provide any information required by Item 5.05 of Form 8-K (relating to amendments or waivers of our Code of Business Conduct and Ethics for Directors, Officers and Employees) by disclosure on our web site.

You may also obtain a printed copy of the foregoing materials by sending a written request to: Investor Relations Department, Asbury Automotive Group, Inc., 2905 Premiere Parkway, NW, Suite 300, Duluth, Georgia 30097. In addition, the Commission makes available on its web site, free of charge, reports, proxy and information statements and other information regarding issuers, such as us, that file electronically with the Commission. The Commission's web site is <http://www.sec.gov>. Unless otherwise specified, information contained on our web site, available by hyperlink from our web site or on the Commission's web site, is not incorporated into this report or other documents we file with, or furnish to, the Commission.

Except as the context otherwise requires, "we," "our," "us," "Asbury" and "the Company" refer to Asbury Automotive Group, Inc. and its subsidiaries.

Item 1. Business

We are one of the largest automotive retailers in the United States, operating 99 franchises (79 dealership locations) as of December 31, 2011. We offer an extensive range of automotive products and services, including:

new and used vehicles;

2

Table of Contents

• vehicle maintenance;

• replacement parts and collision repair services;

• new and used vehicle financing; and

• aftermarket products such as insurance, warranty and service contracts.

Asbury Automotive Group, Inc. was incorporated in the State of Delaware on February 15, 2002, and our stock is listed on the New York Stock Exchange under the ticker symbol “ABG.”

General Description of Our Operations

As of December 31, 2011, we operated dealerships in 18 metropolitan markets throughout the United States. We have developed our dealership portfolio through the acquisition of large, locally-branded dealership groups operating throughout the United States. We have complemented these large dealership group acquisitions with the purchase of numerous single point dealerships and smaller dealership groups in and surrounding our then-existing market areas. Our retail network is made of up dealerships operating primarily under eight locally-branded dealership groups. The following chart gives a detailed breakdown of our markets, brand names and franchises as of December 31, 2011:

Brand Names	Date of Initial Acquisition	Markets	Franchises
Nalley Automotive Group	September 1996	Atlanta, GA	Acura, Audi, BMW, Honda, Infiniti(a), Jaguar, Lexus(a), Nissan, Toyota, Volvo
Courtesy Autogroup	September 1998	Tampa, FL	Chrysler, Dodge, Honda, Hyundai, Infiniti, Jeep, Kia, Mercedes-Benz, Nissan, Toyota, smart, Sprinter
Coggin Automotive Group	October 1998	Jacksonville, FL Orlando, FL Fort Pierce, FL	Honda(a), Nissan(a), Toyota, Chevrolet, Buick, GMC Ford, Honda(a), Lincoln Acura, BMW, Honda, Mercedes-Benz
Crown Automotive Company	December 1998	Princeton, NJ Greensboro, NC Durham, NC Fayetteville, NC Richmond, VA Charlottesville, VA Greenville, SC	BMW, MINI Acura, BMW, Chrysler, Dodge, Honda, Jeep, Nissan, Volvo Honda Dodge, Ford Acura, BMW(a), MINI BMW Jaguar, Lexus, Nissan, Porsche, Toyota, Volvo
David McDavid Auto Group	April 1998	Dallas/Fort Worth, TX Houston, TX Austin, TX	Acura, Honda(a), Lincoln Honda, Nissan Acura
North Point Auto Group	February 1999	Little Rock, AR	BMW, Ford, Lincoln, Mazda, Nissan(a), Toyota, Volkswagen, Volvo

Edgar Filing: ASBURY AUTOMOTIVE GROUP INC - Form 10-K

Gray-Daniels Auto Family	April 2000	Jackson, MS	Chevrolet, Ford, Lincoln, Nissan(a), Toyota
Plaza Motor Company	December 1997	St. Louis, MO	Audi, BMW, Cadillac, Fisker, Infiniti, Land Rover, Lexus, Mercedes-Benz(a), Porsche, smart, Sprinter(a)

(a) This market has two of these franchises.

Our operations provide a diverse revenue base that we believe mitigates the impact of fluctuating new vehicle sales volumes and our broad geographic footprint, as well as diversification among manufacturers, decrease our exposure to regional economic downturns and manufacturer-specific risks such as warranty issues or production disruption. While new vehicle sales generate the majority of our revenue, used vehicle retail sales, parts and service and finance and insurance provide significantly

3

Table of Contents

higher profit margins, and therefore account for the majority of our profitability and have been historically more stable throughout economic cycles.

New Vehicle Sales

As of December 31, 2011, our dealerships represented a diverse portfolio of 30 American, European and Asian brands. Our new vehicle sales consist of the sale of new vehicles to individual retail customers (“new vehicle retail”) and the sale of new vehicles to commercial customers (“fleet”) (the terms “new vehicle retail” and “fleet” being together referred to as “new”). New vehicle revenue and new vehicle gross profit consist of revenue and gross profit from new vehicle retail and fleet sales. In 2011, we sold 71,449 new vehicles through our dealerships. We evaluate the results of our new vehicle sales based on unit volumes and gross profit per vehicle sold. Our new vehicle business represented 54% of our total revenues and 22% of our total gross profit for the year ended December 31, 2011.

Our new vehicle revenues include new vehicle sale and lease transactions arranged by our dealerships with third parties. We believe leases provide a number of benefits. As a result of fixed-period lease terms, customers who lease new vehicles have historically returned to our dealerships more frequently than customers who purchase new vehicles. In addition, because third-party lessors frequently give the leasing dealerships the first option to purchase vehicles returned by their customers at lease-end, leases typically provide us with an additional source of late-model vehicles for our used vehicle inventory. Generally, leased vehicles remain under manufacturer warranty for the term of the lease, which results in additional parts and services revenue, as authorized dealerships are typically relied upon to provide warranty repair service to the lessee throughout the lease term.

Used Vehicle Sales

We sell used vehicles at all of our dealership locations. Used vehicle sales include the sale of used vehicles to individual retail customers (“used retail”) and the sale of used vehicles to other dealers at auction (“wholesale”) (the terms “used retail” and “wholesale” being together referred to as “used”). In 2011, we sold 55,805 used retail vehicles through our dealerships. We evaluate the results of our used vehicle sales based on unit volumes and gross profit per vehicle sold. Our used retail vehicle business, which generally has higher gross margins than our new vehicle business, accounted for approximately 25% of our total revenues and 14% of our total gross profit for the year ended December 31, 2011. Wholesale sales represented 4% of our total revenues, but did not have a material impact on our total gross profit for the year ended December 31, 2011.

Gross profit from the sale of used vehicles depends primarily on the ability of our dealerships to obtain a high quality supply of used vehicles and the use of advanced technology to manage our inventory. Our new vehicle operations typically provide our used vehicle operations with a large supply of high quality trade-ins and off-lease vehicles, which we believe are good sources of attractive used vehicle inventory. We also purchase a significant portion of our used vehicle inventory at auctions restricted to new vehicle dealers (offering off-lease, rental and fleet vehicles) and “open” auctions that offer vehicles sold by other dealers and repossessed vehicles. Our used vehicle inventory is typically sold as wholesale if a vehicle is not sold at retail within 60 days, except for used vehicles that do not fit within our inventory mix, which are typically sold as wholesale almost immediately. The reconditioning of used vehicles also generates revenue for our parts and service departments.

Parts and Service

We sell replacement parts and provide vehicle maintenance and collision repair service at all of our franchised dealerships, primarily for the vehicle brands sold at those dealerships. In addition, as of December 31, 2011, we maintained 25 free-standing collision repair centers either on the premises of, or in close proximity to, our dealerships. Our parts and service business accounted for approximately 14% of our total revenues and 45% of our total gross profit for the year ended December 31, 2011. Historically, parts and service revenues have been more stable than those from vehicle sales. Industry-wide, parts and service revenues have consistently increased over time primarily due to the increased cost of maintaining vehicles, the added technical complexity of vehicles and the increasing number of vehicles on the road, although the significant declines in new vehicle sales in 2008 and 2009 could lead to a decline in parts and service revenues in the near term.

The automotive parts and service industry tends to be highly fragmented, with franchised dealerships and independent repair shops competing for this business. We believe, however, that the increased use of advanced technology in vehicles is making it difficult for independent repair shops to compete effectively for our parts and service business.

These independent repair shops may not be able to invest in the equipment and training necessary to perform major or technical repairs, especially as such repairs relate to luxury and mid-line imports, which comprise a significant majority of our new vehicle retail sales. We believe our parts and service business is also well-positioned to benefit from the service work potentially generated through the sale of extended service contracts to customers who purchase new and used vehicles from us, as historically these customers have tended to have their vehicles serviced at the location where they purchase extended service contracts. Additionally, vehicle manufacturers generally require manufacturer warranty work to be performed only at franchised dealerships. As a result, unlike

Table of Contents

independent service stations or independent and superstore used car dealerships with service operations, our franchised dealerships are authorized to perform work covered by manufacturer warranties on increasingly technologically complex vehicles.

Finance and Insurance

We refer to the finance and insurance portion of our business as "F&I." Through our F&I business, we arrange, and receive commissions for, third-party financing of the sale or lease of new and used vehicles to customers, as well as offer a number of aftermarket products, as described below. We also generate F&I revenues from the receipt of certain marketing fees paid to us under agreements with preferred lenders. Our F&I business generated approximately 3% of our total revenues and 19% of our total gross profit for the year ended December 31, 2011.

The following is a brief description of our significant F&I product offerings:

- Extended service contracts – covers certain repair work after the expiration of the manufacturer warranty;
- Guaranteed asset protection ("GAP") debt cancellation – covers the customer after a total loss for the difference between the value of the vehicle and the outstanding loan or lease obligation after insurance proceeds;
- Prepaid maintenance – covers certain routine maintenance work, such as (i) oil changes, (ii) cleaning and adjusting of brakes, (iii) multi-point vehicle inspections and (iv) tire rotations; and
- Credit life and disability – covers the remaining amounts due on an auto loan or a lease in the event of death or disability.

We earn sales-based commissions from third-party lenders, including manufacturer captive finance subsidiaries, on substantially all of the financing that we arrange on behalf of our customers. We may be charged back ("chargebacks") for these commissions in the event a finance contract is canceled or repaid, typically within the first 90 days of such contract. We arranged customer financing on approximately 70% of the vehicles we sold during the year ended December 31, 2011. We do not retain any material liability for the credit risk associated with these purchase and lease transactions after the completion of the transactions.

Similarly, we may be required to refund a portion of our profit relating to the sale of service contracts, maintenance and insurance and other products in the event of early cancellation. We do not, however, bear any risk related to insurance payments, which are borne by third parties. We receive discounted pricing compared to smaller competitors in our local markets on many of the service contracts, maintenance and insurance products that we provide as a result of our size and sales volume. Historically, chargebacks on finance and service contracts, maintenance and insurance products have totaled between 10% and 14% of total F&I revenue.

We are party to a number of "preferred lender agreements." Under the terms of these preferred lender agreements, each lender has agreed to provide a marketing fee to us above the standard commission rate for each loan that our dealerships places with that lender. Furthermore, many of the service contracts and insurance products we sell result in underwriting profits and investment income for us based on portfolio performance. The underwriting profits and investment income, if any, represent the amount of funds available to pay future claims in excess of what is actually used to pay claims on the related policies. These payments are determined by the lenders based upon an agreed-upon earnings schedule.

Recent Developments

In February 2012, our Board of Directors elected to terminate the Asbury Wealth Accumulation Plan (the "Deferred Compensation Plan"). Please refer to Note 22 ("Share-Based Compensation and Employee Benefit Plans") for a detailed description of the Deferred Compensation Plan. As a result of this decision, we reclassified \$10.7 million of assets and \$7.7 million of liabilities associated with the Deferred Compensation Plan from Other Long-Term Assets and Other Long-Term Liabilities, respectively, to Other Current Assets and Accounts Payable and Other Current Liabilities, respectively, on our Consolidated Balance Sheet as of December 31, 2011.

Business Strategy

Focus on Premier Brand Mix, Strategic Markets and Diversification

We classify our new vehicle retail sales into the following categories: luxury, mid-line import, and mid-line domestic. Luxury and mid-line imports together accounted for approximately 84% of our new vehicle sales for the

year ended December 31, 2011. Despite a recent modest increase in sales of mid-line domestic vehicles, we continue to believe that, over the long-term, luxury and mid-line import manufacturers are well positioned to continue the market share gains they have achieved in the United States over the past few decades based on the expectation of continued broadening of their product

5

Table of Contents

offerings and the delivery of high quality products and services to their customers.

Our physical locations encompassed 18 different metropolitan markets at 79 locations in the following 10 states as of December 31, 2011: Arkansas, Florida, Georgia, Mississippi, Missouri, New Jersey, North Carolina, South Carolina, Texas and Virginia. We believe that our broad geographic coverage, as well as diversification among manufacturers, decreases our exposure to regional economic downturns and manufacturer-specific risks such as warranty issues or production disruption.

The following table reflects (i) the number of franchises and (ii) the percent of new vehicle revenues represented by each class of franchise as of December 31, 2011:

Class/Franchise	Number of Franchises as of December 31, 2011	% of New Vehicle Revenues for the Year Ended December 31, 2011

* Franchise accounted for less than 1% of new vehicle revenues for the year ended December 31, 2011

Maintain Disciplined Cost Structure and Emphasize Expense Control

We continually focus on expense control at our dealerships. We are constantly evaluating our cost structure, and believe we are well positioned to manage our costs in the future by:

- centralizing our financial and information processing systems;
- deploying information technology and best practices across our dealership network;
- capitalizing on our scale through negotiating contracts with certain of our vendors on a national basis; and
- maintaining a performance-based compensation structure.

For example, in order to reduce our expenses, in 2009 we completed a corporate and regional restructuring, which included the relocation of our corporate offices and the reorganization of our retail network, and also included the elimination of our regional management structure. These restructuring and reorganization activities allowed us to continue realizing cost savings through 2010 and 2011.

In order to mitigate the impact of significant fluctuations in vehicle sales, we tie management and employee compensation at various operational levels to performance through incentive-based pay systems based on various metrics. For example, a portion of management's stock-based compensation is based on overall performance criteria relative to our peer group, including, profitability growth, productivity improvement and return on invested capital measures. We also compensate our general managers, department managers and sales and other dealership personnel with incentive pay, based on metrics such as dealership profitability, departmental profitability and individual performance, as appropriate.

Flexible and Prudent Capital Allocation

Our capital allocation decisions are primarily based on our desire to maintain sufficient liquidity and a prudent capital structure. We continuously evaluate our liquidity and capital resources based upon (i) our cash and cash equivalents on hand, (ii) the funds that we expect to generate through future operations, (iii) current and expected borrowing availability under our credit facilities and mortgage financings, (iv) amounts in our new vehicle floor plan notes payable offset accounts and (v) the potential impact of any contemplated or pending future transactions, including, but not limited to, financings, acquisitions, dispositions or other capital expenditures. As part of our balanced approach, we continuously evaluate capital deployment opportunities that we believe will maximize the value of our Company, including:

- investing in our business and technology;
- acquiring dealerships that meet our internal return threshold;
- repurchasing shares of our common stock in the open market; and
- reducing our leverage through the repurchase of our outstanding indebtedness and purchasing properties currently under lease.

We may at some time in the future return some portion of capital to our shareholders through the payment of dividends.

Focus on Higher Margin Products and Services

While new vehicle sales are critical to drawing customers to our dealerships, parts and service, used vehicle retail sales, and F&I generally provide significantly higher profit margins and account for the majority of our profitability. In order to maximize the growth of these higher margin businesses, we have discipline-specific executives at both the corporate and dealership levels who focus on increasing the penetration of current services and expanding the breadth of our offerings to customers.

Local Management of Dealership Operations

We believe that local management of dealership operations enables our retail network to provide market-specific responses to sales, customer service and inventory requirements. The general manager of each of our dealerships is responsible for the operations, personnel and financial performance of that dealership as well as other day-to-day operations. We believe our

7

Table of Contents

general managers' familiarity with their respective markets enables them to effectively run day-to-day operations, market to customers and recruit new employees. The general manager of each dealership is supported, in most cases, by a new vehicle sales manager, a used vehicle sales manager, an F&I manager, and a parts and service manager. Our dealership management teams typically have many years of experience in the automotive retail industry. This management structure is complemented by support from the corporate office through centralized technology and financial oversight.

Centralized Administrative and Strategic Functions

Our corporate management is responsible for our capital structure and operating strategy while the implementation of our operating strategy rests with each dealership management team based on the policies and procedures established by corporate management. Corporate management continuously evaluates the financial and operating results of our dealerships, as well as each dealership's geographical location, and from time to time, makes decisions to acquire or dispose of dealerships to refine our dealership portfolio.

As part of our investment in our IT systems, in June 2010, we undertook the deployment of a common dealer management system (DMS) with the Dealer Services Group of Automatic Data Processing, Inc. as our provider. The implementation of this system was substantially complete by the end of 2011. We believe a single DMS will provide the foundation for future efficiencies and create a more efficient retail operation that will result in a better experience for our customers.

We consolidate financial, accounting and operational data received from our dealerships through customized financial products. Our IT approach enables us to integrate and aggregate information from our dealerships. Through the combination of a common DMS and our corporate financial products, management has access to the financial, accounting and operational data at various levels of the organization. In addition, we have centralized our information technology, payroll and benefits administration from which we expect continued cost synergies.

Commitment to Customer Service

We are focused on providing a high level of customer service and have designed our dealerships' services to meet the needs of an increasingly sophisticated and demanding automotive consumer. We endeavor to establish relationships that we believe will result in both repeat business and additional business through customer referrals. Furthermore, we provide our dealership managers with appropriate incentives to employ efficient selling approaches, engage in extensive follow-up to develop long-term relationships with customers and extensively train our sales staff to meet customer needs.

We continually evaluate opportunities, and implement appropriate new technologies, to improve the buying experience for our customers, and believe that our ability to share best practices across our multi-jurisdictional platform gives us an advantage over independent dealerships. For example, we recently implemented a common customer relations management tool in all of our dealerships to facilitate communications with customers before, during and after the sale. We continue to invest in technologies designed to improve our sales process and employee productivity, all with the goal of improving the customer experience.

In addition, our higher margin parts and service operations are an integral part of our overall approach to customer service, providing an opportunity to foster ongoing relationships and improve customer loyalty. We continue to train our technicians and service advisors to ensure that our customers continue to receive excellent service.

Marketing

Consistent with our local management strategy, our advertising and marketing efforts are generally focused at the local market level, with the aim of building our business with a broad base of repeat, referral and new customers. Traditionally, we have spent the majority of our advertising dollars on television advertising. However, we are experiencing a continued shift toward Internet-based advertising, including lead generation. Recognizing the fact that customers are increasing their use of interactive tools to make buying decisions, we continue to invest in the development of our e-commerce strategy by:

focusing on online brand development;

performing research to better understand the online consumer and their decision to visit one site versus another; and

increasing marketing spend on online marketing.

In addition, radio, print, direct mail and the yellow pages make up a significant portion of our remaining advertising spend. We also use electronic mail and social media channels to assist our marketing efforts and to stay in contact with our customers.

We use common marketing materials for our brand names using professional advertising agencies. Our total advertising

8

Table of Contents

expense from continuing operations was \$26.6 million for the year ended December 31, 2011, which equaled an average of \$209 per retail vehicle sold. In addition, manufacturers' direct advertising spending in support of their brands has historically been a significant component of the total amount spent on new car advertising in the United States.

Competition

The automotive retail and service industry is highly competitive with respect to price, service, location and selection. Our competition includes:

franchised automotive dealerships in our markets that sell the same or similar new and used vehicles;

privately negotiated sales of used vehicles;

other used vehicle retailers, including regional and national vehicle rental companies;

Internet-based used vehicle brokers that sell used vehicles to consumers;

service center and parts supply chain stores; and

independent service and repair shops.

For new vehicle sales, our dealerships compete with other franchised dealerships, primarily in their regions. We do not have any cost advantage in purchasing new vehicles from manufacturers. Instead, we rely on our advertising and merchandising, sales expertise, service reputation, strong local branding and location of our dealerships to assist in the sale of new vehicles. Our used vehicle operations compete with other franchised dealers, large used car retail consolidators, regional and national vehicle rental companies, independent used car dealers, Internet-based vehicle brokers and private parties for supply and resale of used vehicles.

We compete with other franchised dealers to perform warranty repairs and with other automobile dealers and franchised and independent service centers for non-warranty repair and routine maintenance business. We compete with other automobile dealers, service stores and auto parts retailers in our parts operations. We believe that the principal competitive factors in parts and service sales are our ability to use factory-approved replacement parts, our competitive prices, our familiarity with a manufacturer's brands and models, and the quality of our customer service. In arranging financing for our customers' vehicle purchases, we compete with a broad range of financial institutions. In addition, many financial institutions are now offering F&I products through the Internet, which may increase competition and reduce our profits on certain of these items. We believe that the principal competitive factors in providing financing are convenience, interest rates and flexibility in contract length.

In addition, given our desire to hire experienced, talented and successful individuals, the market for qualified employees in the industry and in the regions in which we operate, particularly for general managers and sales and service personnel, is highly competitive. As a result, we also compete with franchised dealers and other large automotive retailers for talented personnel.

Seasonality

The automobile industry is subject to seasonal variations in revenues. Demand for vehicles is generally lower during the first and fourth quarters of each year and, accordingly, we expect our revenues and operating results generally to be lower in the first and fourth quarters than in the second and third quarters of any year. If conditions occur during the second or third quarters that weaken automotive sales, such as severe weather in the geographic areas in which our dealerships operate, war, high fuel costs, depressed economic conditions or similar adverse conditions, our revenues for the year may be disproportionately adversely affected.

Dealer and Framework Agreements

Each of our dealerships operates pursuant to a dealer agreement between the dealership and the manufacturer (or in some cases the distributor) of each brand of new vehicles sold and/or serviced at the dealership. A typical dealer agreement specifies the locations at which the dealer has the right and obligation to sell the manufacturer's vehicles and related parts and products and/or to perform certain approved services. Each dealer agreement also governs the use of the manufacturer's trademarks and service marks.

Table of Contents

The allocation of new vehicles among dealerships is subject to a published formula which is derived at the discretion of the manufacturer, and generally does not guarantee the dealership exclusivity within a given territory or otherwise. Most dealer agreements impose requirements on substantially all aspects of the dealer's operations. For example, most of our dealer agreements contain provisions and standards related to, among other things, the following:

- inventories of new vehicles and manufacturer replacement parts;
- maintenance of minimum net working capital requirements, and in some cases, minimum net worth requirements;
- achievement of certain sales and customer satisfaction targets;
- advertising and marketing practices;
- facilities and signs;
- products offered to customers;
- dealership management;
- personnel training;
- information systems;

geographic market, including but not limited to requirements to meet sales and service targets within an assigned market area, geographic limitations on where the dealership may locate or advertise, and restrictions on the export of vehicles; and

• dealership monthly and annual financial reporting.

In addition to requirements under dealer agreements, we are subject to additional provisions contained in supplemental agreements, framework agreements, dealer addenda and manufacturers' policies, collectively referred to as "framework agreements." Framework agreements impose requirements on us in addition to those described above. Such agreements also define other standards and limitations, including:

- company-wide performance criteria;
- capitalization requirements;
- limitations on changes in our ownership or management;
- limitations on the number of a particular manufacturer's franchises owned by us;
- restrictions or prohibitions on our ability to pledge the stock of certain of our subsidiaries; and

conditions for consent to proposed acquisitions, including sales and customer satisfaction criteria, as well as limitations on the total local, regional and national market share percentage that would be represented by a particular manufacturer's franchises owned by us after giving effect to a proposed acquisition.

Some dealer agreements and framework agreements grant the manufacturer the right to purchase its dealerships from us under certain circumstances, including upon the occurrence of an extraordinary corporate transaction without the manufacturer's prior consent or a material breach of the framework agreement. Some of our dealer agreements and

framework agreements also give the manufacturer a right of first refusal if we propose to sell any dealership representing the manufacturer's brands to a third party. These agreements may also attempt to limit the protections available under applicable state laws and require us to resolve disputes through binding arbitration.

Certain of our dealer agreements expire after a specified period of time, ranging from one year to eight years, while other of our agreements have a perpetual term. We expect that we will be able to renew expiring agreements in the ordinary course of business. However, typical dealer agreements give the manufacturer the right to terminate or the option of non-renewal of the dealer agreement under certain circumstances, including:

- insolvency or bankruptcy of the dealership;

- failure to adequately operate the dealership or to maintain required capitalization levels;

- impairment of the reputation or financial condition of the dealership;

- change of control of the dealership without manufacturer approval (including certain material changes in the composition of our Board of Directors during a specified time period, the acquisition of 20% or more of our voting stock by another vehicle manufacturer or distributor, or the acquisition of 50% or more of our voting stock by a person, entity or group not affiliated with the vehicle manufacturer or distributor);

Table of Contents

- certain extraordinary corporate transactions such as a merger or sale of all or substantially all of our assets;

failure to complete facility upgrades required by the manufacturer or agreed to by the dealer; or

material breach of other provisions of a dealer agreement.

While one or more of our dealer agreements may be terminated or not renewed due to a number of circumstances, it may be possible to negotiate a waiver of termination or non-renewal with the manufacturer. Notwithstanding that, however, no assurances can be provided that upon the termination or attempted termination, or nonrenewal of any agreement, we will be able to enter into new agreements, or waivers to any agreement, on acceptable terms, in a timely manner, or at all. Our loss of any one or more of our dealer agreements, whether as a result of termination, expiration or otherwise, could have a material adverse effect on our revenues and results of operations.

Applicable state laws generally provide that an automobile manufacturer may not terminate or refuse to renew a dealer agreement unless it has first provided the dealer with written notice setting forth "good cause" and stating the grounds for termination or non-renewal. Some state laws allow dealers to file protests or petitions or allow them to attempt to comply with the manufacturer's criteria within a notice period to avoid the termination or non-renewal. Our framework agreements with certain manufacturers contain provisions that, among other things, attempt to limit the protections available to dealers under these laws and, though unsuccessful to date, manufacturers' ongoing lobbying efforts may lead to the repeal or revision of these laws. If these laws are repealed in the states in which we operate, manufacturers may be able to terminate our franchises without providing advance notice, an opportunity to cure or a showing of good cause. Without the protection of these laws, it may also be more difficult for us to renew our dealer agreements upon expiration. Changes in laws that provide manufacturers the ability to terminate our dealer agreements could materially adversely affect our business, financial condition and results of operations. Furthermore, if a manufacturer seeks protection from creditors in bankruptcy, courts have held that the federal bankruptcy laws may supersede these laws, resulting in either the termination, non-renewal or rejection of franchises by such manufacturers, which, in turn, could materially adversely affect our business, financial condition and results of operations.

Regulations

We operate in a highly regulated industry. Under various state laws each of our dealerships must obtain one or more licenses in order to establish, operate or relocate a dealership or operate an automotive repair service in such state. In addition, we are subject to numerous complex federal, state and local laws regulating the conduct of our business, including with respect to:

advertising;

motor vehicle and retail installment sales practices;

leasing;

sales of finance, insurance and vehicle protection products;

consumer credit;

unfair and deceptive trade practices;

consumer protection;

consumer privacy;

• money laundering;

• environmental matters;

• land use and zoning;

- health and safety;
and

• employment practices.

We actively make efforts to assure we are in compliance with the laws and related regulations that affect our business.

Environmental Matters

11

Table of Contents

We are subject to a wide range of environmental laws and regulations, including those governing discharges into the air and water, the storage of petroleum substances and chemicals, the handling and disposal of wastes and the remediation of contamination. As with automobile dealerships generally, and service and parts and collision repair center operations in particular, our business involves the generation, use, handling and disposal of hazardous or toxic substances and wastes. Operations involving the management of wastes are subject to requirements of the Federal Resource Conservation and Recovery Act and comparable state statutes. Pursuant to these laws, federal and state environmental agencies have established approved methods for handling, storing, treating, transporting and disposing of regulated substances and wastes with which we must comply.

Our business also involves the use of above ground and underground storage tanks. Under applicable laws and regulations, we are responsible for the proper use, maintenance and abandonment of our regulated storage tanks and for remediation of subsurface soils and groundwater impacted by releases from existing or abandoned storage tanks. In addition to these regulated tanks, we own, operate, or have otherwise closed in place other underground and above ground devices or containers (such as automotive lifts and service pits) that may not be classified as regulated tanks, but which could or may have released stored materials into the environment, thereby potentially obligating us to clean up any soils or groundwater resulting from such releases.

We are also subject to laws and regulations governing remediation of contamination at or from our facilities or at facilities where we send hazardous or toxic substances or wastes for treatment, recycling or disposal. The Comprehensive Environmental Response, Compensation and Liability Act, or CERCLA, also known as the "Superfund" law, and similar state statutes, impose liability for the entire cost of a cleanup, without regard to fault or the legality of the original conduct, on those that are considered to have contributed to the release of a "hazardous substance."

Responsible parties include the owner or operator of the site or sites where the release occurred and companies that disposed or arranged for the disposal of the hazardous substances released at such sites. These responsible parties also may be liable for damages to natural resources. It is not uncommon for neighboring landowners and other third parties to file claims for personal injury and property damage allegedly caused by the release of hazardous substances. Currently, we are not aware of any material "Superfund" or other remedial liabilities to which we are subject. Further, the Federal Clean Water Act and comparable state statutes prohibit discharges of pollutants into regulated waters without the necessary permits, require containment of potential discharges of oil or hazardous substances and require preparation of spill contingency plans. We are not aware of any non-compliance with the wastewater discharge requirements, requirements for the containment of potential discharges and spill contingency planning or other environmental laws applicable to our operations.

Environmental laws and regulations are very complex and it has become difficult for businesses that routinely handle hazardous and non-hazardous wastes to achieve and maintain full compliance with all applicable environmental laws. From time to time we may experience incidents and encounter conditions that are not in compliance with environmental laws and regulations. However, none of our dealerships has been subject to any material environmental liabilities in the past, nor do we know of any fact or condition that would result in any material environmental liabilities being incurred in the future. Nevertheless, environmental laws and regulations and their interpretation and enforcement change frequently and we believe that the trend of more expansive and stricter environmental legislation and regulations is likely to continue. As a result, there can be no assurance that compliance with environmental laws or regulations or the future discovery of unknown environmental conditions will not require additional expenditures by us, or that such expenditures would not be material. Our operations are subject to substantial changes in laws and regulations and related claims and proceedings, any of which could adversely affect our business, financial condition and results of operations.

Employees

As of December 31, 2011, we employed approximately 6,800 people. We believe our relationship with our employees is favorable. We do not have employees that are represented by a labor union; however, certain of our facilities are located in areas of high union concentration, and such facilities are susceptible to union-organizing activity. Although we have not experienced any strikes or walkouts at our operations, because of our dependence on vehicle manufacturers, we may be affected adversely by labor strikes, work slowdowns and walkouts at vehicle manufacturers' production facilities and transportation modes that are outside of our control.

Insurance

Because of the vehicle inventory and the nature of the automotive retail business, automobile retail dealerships generally require significant levels of insurance covering a broad variety of risks. Our insurance program includes multiple umbrella policies with a total per occurrence and aggregate limit of \$102.0 million. We are self insured for certain employee medical claims and maintain stop loss insurance for individual claims. We have large deductible insurance programs in place for

12

Table of Contents

workers compensation, property and general liability claims.

13

Table of Contents

Item 1A. Risk Factors

In addition to the other information contained and referred to in this report, you should consider carefully the following factors when evaluating our business. Any of these risks, or the occurrence of any of the events described in these risk factors, could cause our actual future results, performance or achievements to be materially different from or could materially adversely affect our business, financial condition or results of operations. In addition, other risks or uncertainties not presently known to us or that we currently do not deem material could arise, any of which could also materially adversely affect us.

If the automotive retail environment continues to be challenging and our dealerships are unable to generate sufficient cash, our liquidity may be materially adversely affected.

For the last four years, the automotive retail industry has experienced an unprecedented challenging environment. The seasonally adjusted annual rate (“SAAR”) of new vehicle sales in the U.S., which was over 16.0 million from 1999 to 2007, decreased to approximately 13.2 million in 2008 and 10.4 million in 2009. Although the automotive retail industry has begun to experience a modest recovery with the new-vehicle SAAR reaching 11.6 million in 2010 and 12.8 million in 2011, we believe that improvement in the industry will continue to be slow, with the new vehicle SAAR expected to improve only modestly in 2012, as the long-term prospects for, and the timing of, a full recovery continue to be difficult to predict. During the initial downturn in the automotive retailing industry, our results of operations were adversely affected, and could again be adversely affected by the continuance of uncertain economic conditions, including any increased difficulty for consumers in securing vehicle financing as unemployment remains higher than recent historical averages. If consumer financing becomes more difficult to obtain, the new vehicle SAAR could be negatively impacted, which in turn could further adversely impact our results of operations, our cash flows and ultimately our liquidity.

If we are unable to generate sufficient operating cash flows, we may need to enter into certain extraordinary transactions in order to generate additional cash, which may include, but not be limited to, selling certain of our dealerships or other assets or increasing borrowings under our existing, or any future, credit facilities. There can be no assurance that, if necessary, we will be able to enter into any such transactions in a timely manner or on reasonable terms, if at all. Furthermore, in the event we were required to sell dealership assets, the sale of any material portion of such assets could have an adverse effect on our revenue and profitability.

Our dealerships’ profitability depends in large part upon customer demand for the particular vehicle lines they carry, and the availability to us of such popular vehicles.

The profitability of our dealerships depends in large part on customer demand for the vehicle lines they carry. Historically, we have generated most of our revenue through new vehicle sales. New vehicle sales also tend to lead to sales of higher-margin products and services such as finance and insurance products and parts and services.

We depend on our ability to obtain a desirable mix of popular new vehicles from manufacturers. Typically, popular vehicles produce the highest profit margins but are the most difficult to obtain from manufacturers. Manufacturers generally allocate their vehicles among their franchised dealerships based on the sales history of each dealership, and in some instances on the level of capital expenditures associated with such dealerships. If our dealerships experience prolonged periods of sales declines, those manufacturers may cut back their allotments of popular vehicles to our dealerships and, as a result, our new vehicle sales and profits may decline.

If our brand mix is significantly concentrated in any one vehicle brand, and the manufacturer of such brand experiences any disruptions in its operations, develops a poor reputation or there is a decrease in customer demand for vehicles produced by such manufacturer, there could be material adverse effects on our revenues, operational results and profitability.

Although we have sought to limit our dependence on any one vehicle brand, we have focused and continue to focus our new vehicle sales operations primarily on mid-line import and luxury brands, and there can be no assurance that our brand mix is appropriate or sufficiently diverse to protect from a significant decline in the desirability of vehicles

manufactured by a particular manufacturer. Our current brand mix is weighted 84% towards luxury and mid-line import brands, with the remaining 16% consisting of domestic brands. For the year ended December 31, 2011, brands representing 5% or more of our revenues from new vehicle sales were as follows:

Table of Contents

Brand	% of Total New Vehicle Revenues	
Honda	20	%
Nissan	13	%
Toyota	10	%
BMW	10	%
Ford	9	%
Mercedes-Benz	7	%
Lexus	5	%
Acura	5	%

If a manufacturer fails to produce desirable vehicles or develops a reputation for producing undesirable vehicles, and we own dealerships that sell that manufacturer's vehicles, our revenues at those dealerships could be adversely affected as consumers shift their vehicle purchases toward more desirable brands, makes and models. Likewise, if the manufacturer experiences any disruption in its ability to produce vehicles, thus limiting the supply of vehicles to our dealerships, it could have a material adverse affect on our revenues, results of operations and profitability. If the profitability at certain of our dealerships is adversely affected, there could be a significant reduction of our cash flows, which in turn could result in impairments of such dealership's properties and/or intangible assets. Changes or declines in consumer demand, or delays in nonessential services, due to general economic conditions, changes in preferences, or otherwise, could adversely affect our revenues and results of operations.

Our business is heavily dependent on consumer demand and preferences, and our key partners' respective abilities to adapt to changes in consumer demand and preferences. Further, retail vehicle sales are cyclical and historically have experienced periodic downturns characterized by oversupply and weak demand. These cycles are often dependent on general economic conditions and consumer confidence, as well as levels of discretionary personal income, credit availability and interest rates. In addition, in recent periods fuel prices have been unstable and have reached and remain near historically high levels. If gasoline prices remain near historical highs, or materially increase, this could cause a further reduction in automobile purchases and a further shift in buying patterns from less fuel-efficient luxury or SUV models (which typically provide higher profit margins to automotive retailers) to smaller, more fuel-efficient and economical vehicles (which typically have lower profit margins). A shift in preferences by consumers to smaller, more economic vehicles due to pricing, fuel costs or otherwise may have an adverse effect on our revenues and results of operations.

While a decline in vehicle purchases in some instances creates additional demand for parts and services due to the aging of and increased wear and tear on existing vehicles, in difficult economic conditions, people often delay nonessential service and repairs on their vehicles. Continued delays on the service and repairs of vehicles due to a continual decline in economic conditions or otherwise could have a further adverse effect on the revenues and results of operations of our parts and service business, which has traditionally produced higher profit margins for our business relative to vehicle sales. Conversely, in the recent past, we have seen the prices of used vehicles generally increase, creating an increased demand for new vehicles. A relative increase in new vehicle sales versus used vehicle sales could have an adverse effect on our results of operations as used vehicle sales have traditionally produced relatively higher profit margins for our business.

We have significant debt, and the ability to incur additional debt may limit our flexibility to manage our business. Furthermore, if we are unable to generate sufficient cash, our ability to service our debt may be materially adversely affected.

We have substantial debt service obligations. As of December 31, 2011, we had total debt of \$459.0 million, excluding floor plan notes payable and the \$0.4 million unamortized discount on our convertible notes on our Consolidated Balance Sheets. In addition, we and our subsidiaries have the ability to incur additional debt from time

to time to finance, among other things, acquisitions, working capital and capital expenditures, and new and used vehicle inventory, as well as to refinance new and used vehicle inventory, subject in each case to the restrictions contained in the agreement governing our senior secured credit facilities, the indentures governing our senior subordinated notes, and our mortgage agreements and related mortgage guarantees, as well as certain other agreements. We will continue to have substantial debt service obligations, consisting of required cash payments of principal and interest, for the foreseeable future.

Table of Contents

Our significant indebtedness could have important consequences to us, including the following:

our ability to obtain additional financing for acquisitions, capital expenditures, working capital or other general corporate purposes may be impaired;

a substantial portion of our current cash flow from operating activities must be dedicated to the payment of principal and interest on our debt, thereby reducing the funds available to us for our operations and other corporate purposes;

some of our borrowings are and will continue to be at variable rates of interest, which exposes us to certain risks of interest rate increases; and

we may be substantially more leveraged than some of our competitors, which may place us at a relative competitive disadvantage and make us more vulnerable to changes in market conditions and governmental regulations.

As a result of the foregoing and other potential limitations, our indebtedness obligations may limit our ability to take strategic actions that would otherwise enable us to manage our business, in a manner in which we otherwise would, absent such limitations, which could materially adversely affect our business, financial condition and results of operations.

We are a holding company and as a result are dependent on our subsidiaries to generate sufficient cash and distribute cash to us to service our indebtedness.

Our ability to make payments on our indebtedness, fund our ongoing operations and invest in capital expenditures and any acquisitions will depend on our subsidiaries' ability to generate cash in the future and distribute that cash to us. It is possible that our subsidiaries may not generate cash from operations in an amount sufficient to enable us to service our indebtedness. Many of our subsidiaries are subject to restrictions on payments to us and our affiliates under their franchise agreements, dealer agreements, other agreements with manufacturers, mortgages, and credit facilities. For example, most of the agreements contain minimum working capital or net worth requirements, and some manufacturers' dealer agreements specifically prohibit a distribution to us if the distribution would cause the dealership to fail to meet such manufacturer's capitalization guidelines, including net working capital. These restrictions limit our ability to utilize profits generated from one subsidiary at other subsidiaries or, in some cases, at the parent company. These factors could also render our subsidiary guarantors financially or contractually unable to make payments under their guarantees of our senior subordinated notes.

Under several of our debt, mortgage, lease and framework agreements, we are required to maintain compliance with certain financial and other covenants. Our failure to comply with certain covenants in these agreements could adversely affect our ability to access our borrowing capacity, subject us to acceleration of our outstanding debt or result in a cross default on other indebtedness, and adversely affect our ability to conduct our business.

There are operating and financial restrictions and covenants in certain of our debt and mortgage agreements, including the agreement governing our senior secured credit facilities, the indentures governing our senior subordinated notes and our mortgage agreements and related mortgage guarantees, as well as certain other agreements to which we are a party. These limit, among other things, our ability to incur certain additional debt, create certain liens or other encumbrances, and make certain payments (including dividends and repurchases of our common stock and for investments). Certain of these agreements also require us to maintain compliance with certain financial ratios.

If we are unable to comply with any applicable financial or other covenants, we may be required to seek waivers of or modifications to our covenants from our creditors, or we may need to undertake a transaction designed to generate proceeds sufficient to repay our debt. Obtaining such waivers or modifications often requires the payment to creditors of significant fees and requires significant time and attention of management. In light of continued uncertain

conditions in the automotive industry and the conditions in the credit markets generally, we cannot give any assurance that we would be able to successfully take any necessary actions at times, or on terms acceptable to us.

Our failure to comply with any of these covenants in the future could constitute a default under the relevant agreement, which would, depending on the relevant agreement, (i) entitle the creditors under such agreement to terminate our ability to borrow under the relevant agreement and accelerate our obligations to repay outstanding borrowings; (ii) require us to apply our available cash to repay these borrowings; (iii) entitle the creditors under such agreement to foreclose on the property securing the relevant indebtedness; and/or (iv) prevent us from making debt service payments on certain of our other indebtedness, any of which would have a material adverse effect on our business, financial condition or results of operations. In many cases, a default under one of our debt or mortgage, agreements could trigger cross default provisions in one or more of our other debt or mortgages.

Table of Contents

In addition to the financial and other covenants contained in our various debt or mortgage agreements, a number of our dealerships are located on properties that we lease. Certain of the leases governing such properties have certain covenants with which we must comply. If we fail to comply with the covenants under our leases, the respective landlords could, among other remedies, terminate the leases and seek damages that could equal the amount by which the accelerated rents under the applicable leases for the remainder of the lease terms exceed the fair market rent over the same period, or evict us from the applicable properties.

Similarly, our failure to comply with any financial or other covenants in any of our framework agreements would give the relevant manufacturer certain rights, including the right to reject proposed acquisitions, and may give it the right to repurchase its franchises from us. Events that give rise to such rights, and our inability to acquire additional dealerships or the requirement that we sell one or more of our dealerships at any time, could inhibit the growth of our business, and could have a material adverse effect on our business, financial condition and results of operations.

Manufacturers may have the right to restrict our ability to provide guaranties of our operating companies, pledges of the capital stock of our subsidiaries and liens on our assets, which could adversely impact our ability to obtain financing for our business and operations on favorable terms or at desired levels, if at all. A decline in our credit rating or a general disruption in the credit markets could negatively impact liquidity and ability to conduct our operations.

Access to funding allows us to take strategic actions for the benefit of our business. A deterioration of our credit rating, or a general disruption in the credit markets, could limit our ability to obtain credit on favorable terms, which could in turn materially adversely affect our liquidity and ability to conduct our operations.

In the recent past, global financial markets and economic conditions have been disruptive and volatile, and continue to be uncertain. These issues, along with significant write-offs in the financial services sector, the re-pricing of certain credit risks and weak economic conditions in certain industries and sectors have made it more difficult to obtain funding than in the past.

We currently maintain senior secured credit facilities with Bank of America, N.A. and a syndicate of other banks and we have hedge transactions in place with Wells Fargo Bank, N.A., Wachovia Financial Services, Inc., Goldman Sachs & Co. and Deutsche Bank AG, London Branch. If any of the financial institutions that have extended credit commitments to us or have entered into hedge or similar transactions with us are further adversely affected by the current uncertain conditions in the U.S. and international capital markets, they may become unable or unwilling to fund borrowings under their credit commitments to us or otherwise fulfill their obligations under the relevant agreements with us, which could have a material adverse effect on our liquidity and ability to conduct our operations.

Furthermore, the cost of credit generally has increased coincident with the uncertain financial markets, as many lenders and institutional investors have enacted more stringent lending standards, refused to refinance existing debt and and, in some cases, increased interest rates or reduced or even ceased to provide funding to borrowers. Our inability to access necessary or desirable funding, or to enter into certain related transactions, at times and at costs deemed appropriate by us, could have a negative impact on our liquidity and ability to conduct our operations. Our capital costs and our results of operations may be materially and adversely affected by changes in interest rates. We generally finance our purchases of new vehicle inventory, have the ability to finance the purchases of used vehicle inventory and have the availability to borrow funds for working capital using senior secured credit facilities under which we are charged interest at variable rates. Therefore, our interest expense from variable rate debt will rise with increases in interest rates. In addition, a significant rise in interest rates may also have the effect of depressing demand in the interest rate sensitive aspects of our business, particularly new and used vehicle sales, because most of our customers finance their vehicle purchases. As a result, rising interest rates may have the effect of simultaneously

increasing our capital costs and reducing our revenues. Given our debt composition as of December 31, 2011, each one percent increase in market interest rates would increase our total annual interest expense, including floor plan interest, by as much as \$5.1 million. When considered in connection with reduced expected sales as and if interest rates increase, any such increase could materially adversely affect our business, financial condition and results of operations.

Adverse conditions affecting the manufacturers of the vehicles that we sell may negatively impact our revenues and profitability.

Our ability to successfully market vehicles to the public depends to a great extent on aspects of manufacturers' operations.

Table of Contents

Vehicle manufacturers have been, and continue to be, adversely affected by the recent U.S. and international economic climate. In addition to challenges created by economic conditions, we remain vulnerable to other matters impacting the manufacturers. For example, the earthquake and related events that occurred in Japan in March 2011 negatively impacted certain manufacturers' ability to provide vehicles and related parts which, in turn, negatively impacted our operations. Other factors that could negatively impact include:

• financial condition;

• marketing efforts;

• reputation for quality;

• manufacturer and other product defects, including recalls;

• management;

• disruptions in the production and delivery of vehicles and parts due to natural disasters or other reasons that are outside of our control; and

• labor relations.

Adverse conditions that materially affect a vehicle manufacturer and impact its ability to profitably design, market, produce or distribute new vehicles could in turn materially adversely affect our ability to (i) sell vehicles produced by that manufacturer, (ii) obtain or finance our desired new vehicle inventories, (iii) access or benefit from manufacturer financial assistance programs, (iv) collect in full or on a timely basis any amounts due therefrom, and/or (v) obtain other goods and services provided by the impacted manufacturer. Our business, results of operations, financial condition, cash flows, and prospects could be materially adversely affected as a result of any event that has an adverse effect on any vehicle manufacturers or distributors.

In addition, if a vehicle manufacturer seeks protection from creditors in bankruptcy, among other things, (i) the manufacturer could seek to terminate or reject all or certain of our franchises, (ii) if the manufacturer is successful in terminating all or certain of our franchises, we may not receive adequate compensation for those franchises, (iii) our cost to obtain financing for our new vehicle inventory may increase or no longer be available from such manufacturer's captive finance subsidiary, (iv) consumer demand for such manufacturer's products could be materially adversely affected, especially if costs related to improving such manufacturer's poor financial condition are imputed to the price of its products, (v) there may be a significant disruption in the availability of consumer credit to purchase or lease vehicles or negative changes in the terms of such financing, which may negatively impact our sales, or (vi) there may be a reduction in the value of receivables and inventory associated with that manufacturer. The occurrence of any one or more of these events could have a material adverse effect on our business and results of operations.

If vehicle manufacturers reduce or discontinue sales incentive, warranty or other promotional programs, our results of operations, cash flows and financial condition may be adversely affected.

Our dealerships benefit from certain sales incentive, warranty and other promotional programs of vehicle manufacturers that are intended to promote and support their respective new vehicle sales. Key incentive programs include:

• customer rebates on new vehicles;

• dealer incentives on new vehicles;

• special financing or leasing terms;

warranties on new and used vehicles; and

• sponsorship of used vehicle sales by authorized new vehicle dealers.

Manufacturers often make many changes to their incentive programs during each year. Any reduction or discontinuation of key manufacturers' incentive programs may reduce our sales volume which, in turn, could have a material adverse effect on our results of operations, cash flows and financial condition.

Our vehicle sales, results of operations and financial condition have been and may continue to be adversely affected by depressed levels of available consumer financing.

The majority of vehicle purchases are financed. During and as a result of the recent global economic downturn, consumers experienced a decline in the availability of credit. In addition, manufacturers decreased the availability of leases or, in some instances, terminated leasing programs altogether. The reduced availability of credit to consumers contributed to the recent

Table of Contents

decline in our vehicle sales. Continued reductions or increased costs of credit could result in a further decline in our vehicle sales, which could have a material adverse effect on our results of operations and financial condition.

Sub-prime lenders have historically provided financing to those buyers who, for various reasons, do not have access to traditional financing, including those buyers who have a poor credit history or lack the down payment necessary to purchase a vehicle. With the downturn of the economy, sub-prime lenders have become more stringent with their credit standards, which has made it more difficult for consumers needing sub-prime financing to obtain credit. If this trend continues, the ability of these consumers to purchase vehicles could remain limited, resulting in a decline in our vehicle sales, which, in turn, could have a material adverse effect on results of operations and financial condition. Our business may be adversely affected by unfavorable conditions in one or more of our local markets, even if those conditions are not prominent nationally.

Our overall corporate results are also subject to local economic, competitive and other conditions prevailing in the various geographic markets in which we operate. Our dealerships currently are located in the Atlanta, Austin, Charlottesville, Dallas-Fort Worth, Durham, Fayetteville, Fort Pierce, Greensboro, Greenville, Houston, Jackson, Jacksonville, Little Rock, Orlando, Princeton, Richmond, St. Louis and Tampa markets. If economic conditions remain uncertain, we experience a decline in value of our local brands for any reason, consumer spending remains low or competition for services offered by automotive retailers remains significant in any of these markets, or any of these factors becomes exacerbated, our business could be adversely affected.

If we fail to obtain renewals of one or more of our dealer agreements on acceptable terms, if certain of our franchises are terminated, if certain manufacturers' rights under their agreements with us are triggered, or if the geographic areas of any of our franchises are altered, our business, financial condition and results of operations may be adversely affected.

Each of our dealerships operates under the terms of a dealer agreement with the manufacturer (or manufacturer-authorized distributor) of each new vehicle brand it carries and/or is authorized to service, and we operate under additional framework agreements with some vehicle manufacturers, which contain additional requirements that govern the particular vehicle manufacturer's franchises. Our dealerships may obtain new vehicles from manufacturers, service vehicles, sell new vehicles and display vehicle manufacturers' trademarks only to the extent permitted under these agreements. As a result of the terms of our dealer, framework and related agreements and our dependence on the rights granted by the manufacturers, the manufacturers have the right to exercise a great deal of control over our day-to-day operations, and the terms of these agreements govern key aspects of our operations, acquisition strategy and capital spending.

Our dealer agreements may be terminated or not renewed by manufacturers for a number of reasons, and many of the manufacturers have the right to direct us to divest our dealerships if there is a default under the franchise agreement, an unapproved change of control (including certain material changes in the composition of our Board of Directors during a specified time period, the acquisition of 20% or more of our voting stock by another vehicle manufacturer or distributor, or the acquisition of 50% or more of our voting stock by a person, entity or group not affiliated with the vehicle manufacturer or distributor), or certain other unapproved events (including certain extraordinary corporate transactions such as a merger or sale of all or substantially all of our assets).

Our dealer agreements are scheduled to expire at various times. Although we expect that these agreements will be renewed in the ordinary course of business, there can be no assurances that we will be able to renew these agreements on a timely basis or on acceptable terms or at all. Most of our dealer agreements also provide the manufacturer with a right of first refusal to purchase any of the manufacturer's franchises we seek to sell. Our business, financial condition and results of operations may be materially and adversely affected to the extent that our rights become compromised or our operations are restricted due to the terms of our dealer or framework agreements or if we lose franchises representing a significant percentage of our revenues.

Our dealer agreements do not give us the exclusive right to a given geographic area. Manufacturers can establish new franchises or relocate existing franchises, subject to applicable state franchise laws. The establishment or relocation of franchises in our markets could have a material adverse effect on the business, financial condition and results of operations of our dealerships in the market in which the franchise action is taken.

Our failure to meet consumer satisfaction, financial or sales performance or facilities requirements specified by manufacturers may adversely affect our ability to acquire new dealerships and our profitability. Many manufacturers attempt to measure customers' satisfaction with their experience in our sales and service departments through rating systems that are generally known in the automotive retailing industry as consumer satisfaction indices ("CSI").

Table of Contents

The use of CSI ratings by manufacturers is in addition to their contractual rights to monitor the financial and sales performance of our dealerships. At the time we acquire a dealership or enter into a new dealer or framework agreement, manufacturers will often establish sales or performance criteria for that dealership. In accordance with the terms of these agreements, these criteria have been modified by various manufacturers in the past, and we cannot assure you that they will not be further modified or replaced by different criteria in the future. Some of our dealerships have had difficulty meeting these criteria in the past. We cannot assure you that any of our dealerships will be able to comply with these criteria in the future.

Also, manufacturers often impose facilities requirements on our dealerships. Among other things, manufacturers may require us to move or renovate our dealerships to meet certain image standards. Image standards have been modified by manufacturers in the past, and we cannot assure you that the standards will not be further modified or replaced by different criteria in the future. These commitments could require significant capital expenditures, which could have an adverse affect on our profitability.

In accordance with the terms of an applicable framework agreement, a manufacturer may use these criteria as factors in evaluating any application we may make for acquisitions of additional dealerships. A manufacturer may refuse to consent to our acquisition of one of its franchises if it determines our dealerships do not comply with its performance criteria. This would impede our ability to execute acquisitions and limit our ability to grow. In addition, we receive payments and incentives from certain manufacturers based, in part, on our CSI ratings, and future payments may be materially reduced or eliminated if our CSI ratings do not meet stated criteria.

Manufacturers' actions in connection with any proposed acquisitions or divestitures may limit our future growth and impact our business, financial condition or results of operations.

We are generally required to obtain manufacturer consent before we can acquire dealerships selling a manufacturer's automobiles. In addition, many of our dealer and framework agreements require that we meet certain CSI rating and sales performance criteria as a condition to additional dealership acquisitions. We cannot assure you that we will be able to meet these performance criteria at any applicable time or that manufacturers will consent to future acquisitions, which may prevent us from being able to take advantage of strategic opportunities, and may limit our ability to expand our business. The process of applying for and obtaining a manufacturer's consents can take a significant amount of time. Delays in consummating acquisitions caused by this process may negatively affect our ability to acquire dealerships that we believe will produce acquisition synergies and integrate well into our overall strategy. In addition, manufacturers typically establish minimum capital requirements for each of their dealerships on a case-by-case basis. As a condition to granting consent to a proposed acquisition, a manufacturer may require us to remodel or upgrade our facilities and capitalize the subject dealership at levels we would not otherwise choose to fund, causing us to divert our financial resources away from uses that management believes may be of higher long-term value to us.

Furthermore, the exercise by a manufacturers of its right of first refusal to acquire a dealership may prevent us from acquiring dealerships that we otherwise would acquire which could have an adverse effect on our ability to grow through acquisitions, and therefore adversely impact our business, financial condition and results of operations.

Likewise, from time to time, we may determine that it is in our best interest to divest one or more of our dealerships. Parties that are interested in acquiring any dealership may also be required to obtain the consent of the manufacturer. The refusal by the manufacturer to approve a potential buyer may delay the sale of that dealership, and would require us to find another potential buyer or wait until the buyer is able to meet the requirements of the manufacturer. A delay in the sale of a dealership could have a negative impact on our business, financial condition or results of operations. Additionally, many vehicle manufacturers place limits on the total number of franchises that any group of affiliated dealerships may own. Certain manufacturers place limits on the number of franchises or share of total brand vehicle sales that may be maintained by an affiliated dealership group on a national, regional or local basis, as well as limits on store ownership in contiguous markets. If we reach any of these limits, we may be prevented from making further acquisitions, which could adversely affect our future growth.

If state laws that protect automotive retailers are repealed, weakened or superseded by our framework agreements with manufacturers, our dealerships will be more susceptible to termination, non-renewal or renegotiation of their dealer agreements.

Applicable state laws generally provide that an automobile manufacturer may not terminate or refuse to renew a dealer agreement unless it has first provided the dealer with written notice setting forth “good cause” and stating the grounds for termination or non-renewal. Some state laws allow dealers to file protests or petitions or allow them to attempt to comply with the manufacturer’s criteria within a notice period to avoid the termination or non-renewal. Our framework agreements with certain manufacturers contain provisions that, among other things, attempt to limit the protections available to dealers under

Table of Contents

these laws, and, though unsuccessful to date, manufacturers' ongoing lobbying efforts may lead to the repeal or revision of these laws. If these laws are repealed in the states in which we operate, manufacturers may be able to terminate our franchises without providing advance notice, an opportunity to cure or a showing of good cause. Without the protection of these state laws, it may also be more difficult for us to renew our dealer agreements upon expiration. Changes in laws that provide manufacturers the ability to terminate our dealer agreements could materially adversely affect our business, financial condition and results of operations. Furthermore, if a manufacturer seeks protection from creditors in bankruptcy, courts have held that the federal bankruptcy laws may supersede the state laws that protect automotive retailers resulting in either the termination, non-renewal or rejection of franchises by such manufacturers, which, in turn, could materially adversely affect our business, financial condition and results of operations.

Manufacturers' restrictions regarding a change in our stock ownership may result in the termination or forced sale of our franchises, which may have a number of impacts on us, including adversely impacting our business, financial condition and results of operations, or even deterring an acquisition of us.

Some of our dealer agreements and framework agreements with manufacturers prohibit transfers of any ownership interests of a dealership or, in some cases, its parent, without the applicable manufacturer's consent. Our agreements with some manufacturers provide that, under certain circumstances, the manufacturer would have the right to terminate our agreement or force a sale of our franchise if a person or entity acquires an ownership interest in us above a specified level or if a person or entity acquires the right to vote a specified percentage of our common stock without the approval of the applicable manufacturer. Triggers of these clauses are often based upon actions by our stockholders and are generally outside of our control, and may result in the termination or non-renewal of our dealer and framework agreements or forced sale of one or more franchises, which may have a material adverse effect on us. These restrictions may also prevent or deter prospective acquirers from acquiring control of us and, therefore, may adversely impact the value of our common stock.

Our business is seasonal, and events occurring during seasons in which revenues are typically higher may disproportionately affect our results of operations and financial condition.

The automobile industry is subject to seasonal variations in revenues. Demand for vehicles is generally lower during the first and fourth quarters of each year. Accordingly, we expect our revenues and operating results generally to be lower in the first and fourth quarters than in the second and third quarters of any year. If conditions occur during the second or third quarters that weaken automotive sales, such as severe weather in the geographic areas in which our dealerships operate, war, high fuel costs, depressed economic conditions or similar adverse conditions, our revenues for the year may be disproportionately adversely affected.

Our business may be adversely affected by import product restrictions, foreign trade risks and currency valuations that may impair our ability to sell foreign vehicles or parts profitably.

A portion of our business involves the sale of vehicles, parts or vehicles composed of parts that are manufactured outside the United States. As a result, our operations are subject to customary risks of importing merchandise, including import duties, exchange rates, trade restrictions, work stoppages, natural or manmade disasters, and general political and socio-economic conditions in other countries. The United States or the countries from which our products are imported may, from time to time, impose new quotas, duties, tariffs or other restrictions, or adjust presently prevailing quotas, duties or tariffs, which may affect our operations and our ability to purchase imported vehicles and/or parts at reasonable prices. Relative weakness of the U.S. dollar against foreign currencies in the future may result in an increase in costs to us and in the retail price of such vehicles or parts, which could discourage consumers from purchasing such vehicles and adversely impact our profitability.

If we are unable to acquire and successfully integrate additional dealerships, we may be unable to realize desired results and be required to divert resources from comparatively more profitable operations.

We believe that the automotive retailing industry is a mature industry whose sales are significantly impacted by the prevailing economic climate, both nationally and in local markets. Accordingly, we believe that our future growth depends in part on our ability to manage expansion, control costs in our operations and acquire and effectively and efficiently integrate acquired dealerships into our organization. When seeking to acquire and acquiring other dealerships, we face risks commonly encountered with growth through acquisitions. These risks include, but are not

limited to:

• failing to obtain manufacturers' consents to acquisitions of additional franchises;

• incurring significant transaction related costs for both completed and failed acquisitions;

• incurring significantly higher capital expenditures and operating expenses;

• failing to integrate the operations and personnel of the acquired dealerships and impairing relationships with employees;

21

Table of Contents

• incorrectly valuing entities to be acquired or incurring undisclosed liabilities at acquired dealerships;

• disrupting our ongoing business and diverting our management resources to newly acquired dealerships;

• failing to achieve predicted performance levels; and

• impairing relationships with manufacturers and customers as a result of changes in management.

We may not adequately anticipate all the demands that our growth will impose on our personnel, procedures and structures, including our financial and reporting control systems, data processing systems and management structure. Moreover, our failure to retain qualified management personnel at any acquired dealership may increase the risks associated with integrating the acquired dealership. If we cannot adequately anticipate and respond to these demands, we may fail to realize acquisition synergies and our resources will be focused on incorporating new operations into our structure rather than on areas that may be more profitable.

There is competition to acquire automotive dealerships, and we may not be able to grow our business through acquisitions if attractive targets are not available or if market values result in prices at levels that we do not believe offer an acceptable rate of return.

We believe that the U.S. automotive retailing market is fragmented and offers many potential acquisition candidates. However, we often compete with several other national, regional and local dealership groups, and other strategic and financial buyers, some of which may have greater financial resources, in evaluating potential acquisition candidates. Competition for attractive acquisition targets may result in fewer acquisition opportunities for us, and increased acquisition costs. We may have to forego acquisition opportunities to the extent that we cannot negotiate such acquisitions on acceptable terms.

Substantial competition in automobile sales and services may adversely affect our profitability.

The automotive retail and service industry is highly competitive with respect to price, service, location and selection. Our competition includes:

• franchised automobile dealerships in our markets that sell the same or similar new and used vehicles;

• privately negotiated sales of used vehicles;

• other used vehicle retailers, including regional and national vehicle rental companies;

• Internet-based used vehicle brokers that sell used vehicles to consumers;

• service center and parts supply chain stores; and

• independent service and repair shops.

We do not have any cost advantage over other retailers in purchasing new vehicles from manufacturers. We typically rely on our advertising, merchandising, sales expertise, service reputation, strong local branding and dealership location to sell new and used vehicles. Further, our dealer agreements do not grant us the exclusive right to sell a manufacturer's product within a given geographic area. Our revenues and profitability may be materially and adversely affected if competing dealerships expand their market share or additional franchises are awarded in our markets. Property loss or other uninsured liabilities at some of our dealerships could impact our financial condition and results of operations.

The automotive retail business is subject to substantial risk of property loss due to the significant concentration of property at dealership locations, including vehicles and parts. We have historically experienced business interruptions from time to time at several of our dealerships due to adverse weather conditions or other extraordinary events, such as hurricanes in Florida and tornadoes and hail storms in Texas and Mississippi. Concentration of property at

dealership locations also makes the automotive retail business particularly vulnerable to theft, fraud and misappropriation of assets. Illegal or unethical conduct by employees, customers, vendors and unaffiliated third parties can result in loss of assets, disrupt operations, impact brand reputation, jeopardize manufacturer and other relationships, result in the imposition of fines or penalties, and subject us to governmental investigations or lawsuits. Other potential liabilities arising out of our operations may involve claims by employees, customers or third parties for personal injury or property damage and potential fines and penalties in connection with alleged violations of regulatory requirements. To the extent we experience future events such as these, or others, our financial condition and results of operations may be materially adversely impacted.

Table of Contents

While we maintain insurance to protect against a number of losses, this insurance coverage often contains significant deductibles which we must pay prior to obtaining insurance coverage. In addition, we choose to “self-insure” for a portion of our potential liabilities, meaning we do not carry insurance from a third party for such liabilities, and are wholly responsible for any related losses. Furthermore, the laws of some states prohibit insurance against certain types of liabilities, and so we self-insure for those liabilities as well.

In certain instances, our insurance may not fully cover a loss depending on the applicable deductible or the magnitude and nature of the claim. Additionally, changes in the cost or availability of insurance in the future could substantially increase our costs to maintain our current level of coverage or could cause us to reduce our insurance coverage and increase our self-insured risks. To the extent we incur significant additional costs for insurance, suffer losses that are not covered by in-force insurance or suffer losses for which we are self-insured, our financial condition and results of operations could be materially adversely impacted.

Business interruptions at any of our dealerships due to a failure of any of our management information systems, could have a material adverse effect on our business, results of operations, financial condition and cash flow.

We rely on management information systems at our dealerships which are licensed from third parties and are used in all aspects of our sales and service efforts, as well as in the preparation of our consolidated financial and operating data. In 2010, we began the conversion of our dealer management systems to a common dealer management system (“DMS”) provided by ADP. As of December 31, 2011, approximately 93% of our dealerships had been successfully converted to the ADP DMS, and we completed the remaining conversions of our dealerships in January 2012. Our business could be significantly disrupted if (i) the ADP DMS fails to integrate with other third party management information systems, customer relations management tools or other software, or to the extent any of these systems become unavailable to us for an extended period of time for any reason, or (ii) if our relationship deteriorates with ADP or any of our other third-party providers. Any such significant disruption in our business could materially adversely affect our business, results of operations, financial condition and cash flow.

Government regulations and environmental regulation compliance costs may adversely affect our business.

We are, and expect to continue to be, subject to a wide range of federal, state and local laws and regulations, including local licensing requirements. These laws regulate the conduct of our business, including:

• motor vehicle and retail installment sales practices;

• leasing;

• sales of finance, insurance and vehicle protection products;

• consumer credit;

• deceptive trade practices;

• consumer protection;

• consumer privacy;

• money laundering;

• advertising;

• land use and zoning;

• health and safety;
and

•employment practices.

Environmental laws and regulations govern, among other things, discharges into the air and water, storage of petroleum substances and chemicals, the handling and disposal of wastes and remediation of contamination arising from spills and releases. In addition, we may also have liability in connection with materials that were sent to third-party recycling, treatment and/or disposal facilities under federal and state statutes. These federal and state statutes impose liability for investigation and remediation of contamination without regard to fault or the legality of the conduct that contributed to the contamination. Similar to many of our competitors, we have incurred and expect to continue to incur capital and operating expenditures and other costs in complying with such federal and state statutes. In addition, we may be subject to broad liabilities arising out of contamination at our currently and formerly owned or operated facilities, at locations to which hazardous substances were transported from such facilities, and at such locations related to entities formerly affiliated with us. Although for some such potential liabilities we believe we are entitled to indemnification from other entities, we cannot assure you that such entities

23

Table of Contents

will view their obligations as we do or will be able or willing to satisfy them. Failure to comply with applicable laws and regulations, or significant additional expenditures required to maintain compliance therewith, may have a material adverse effect on our business, results of operations, financial condition, cash flows, and prospects.

If we or our employees at the individual dealerships violate or are alleged to violate laws and regulations applicable to them or protecting consumers generally, we could be subject to individual claims or consumer class actions, administrative, civil or criminal actions investigations or actions and adverse publicity. Such actions could expose us to substantial monetary damages and legal defense costs, injunctive relief and criminal and civil fines and penalties, including suspension or revocation of our licenses and franchises to conduct dealership operations. Some jurisdictions regulate finance fees and administrative or document fees that may be charged in connection with vehicle sales, which could restrict our ability to generate revenue from these activities.

Furthermore, the enactment of new laws and regulations that materially impair or restrict our sales, finance and insurance, or other operations could have a material adverse effect on our business, results of operations, financial condition, cash flows, and prospects. For example, in recent years, private plaintiffs and state attorneys general in the United States have increased their scrutiny of advertising, sales, and finance and insurance activities in the sale and leasing of motor vehicles. These activities have led many lenders to limit the amounts that may be charged to customers as fee income for these activities. If these or similar activities were to significantly restrict our ability to generate revenue from arranging financing for our customers, we could be adversely affected. In addition, the Dodd-Frank Wall Street Reform and Consumer Protection Act, which was signed into law on July 21, 2010, established the Consumer Financial Protection Bureau, which has broad regulatory powers. Although automotive dealers are generally excluded from coverage within this agency, the Dodd-Frank Act and future regulatory actions by this bureau could lead to additional, indirect regulation of automotive dealers through its regulation of automotive finance companies and other financial institutions.

Likewise, employees and former employees are protected by a variety of employment laws and regulations. Allegations of a violation could subject us to individual claims or consumer class actions, administrative investigations or adverse publicity. Such actions could expose us to substantial monetary damages and legal defense costs, injunctive relief and civil fines and penalties.

We are involved in various legal proceedings in the ordinary course of our business, including litigation with employees and with customers regarding our products and services, and expect to continue to be subject to claims related to our existing business and any new business. A significant judgment against us, the loss of a significant license or permit or the imposition of a significant fine could have a material adverse effect on our business, financial condition and future prospects. We further expect that, from time to time, new laws and regulations, particularly in the labor, employment, environmental and consumer protection areas will be enacted, and compliance with such laws, or penalties for failure to comply, could significantly increase our costs.

Healthcare reform legislation could adversely affect our future profitability and financial condition.

Rising healthcare costs and interest in universal healthcare coverage in the United States have resulted in government and private sector initiatives proposing significant healthcare reforms. The Patient Protection and Affordable Care Act, signed into law on March 23, 2010, is expected to increase our annual employee health care costs, with the most significant increases commencing in 2014. We cannot predict the extent of the effect of this statute, or any future state or federal healthcare legislation or regulation, will have on us. However, an expansion in government's role in the U.S. healthcare industry could result in significant long-term costs to us, which could in turn adversely affect our future profitability and financial condition.

A data security breach with regard to personally identifiable information about our customers or employees could negatively affect operations and result in high costs.

In the ordinary course of business, we and our partners receive personally identifiable information ("PII") about our customers in order to complete the sale or service of a vehicle and related products. We also receive PII from our employees. Numerous state and federal regulations, as well as payment card industry and other vendor standards, govern the collection and maintenance of PII from consumers and other individuals. Although many companies across

many industries are affected by malicious efforts to obtain access to PII, news reports suggest that the automotive dealership industry is a particular target of identity thieves. Moreover, there are numerous opportunities for a data security breach, including cyber-security breaches, burglary, lost or misplaced data, scams, or misappropriation of data by employees, vendors or unaffiliated third parties. Despite the security measures we have in place and any additional measures we may implement or adopt in the future, our facilities and systems, and those of our third-party service providers, could be vulnerable to security breaches, computer viruses, lost or misplaced data, programming errors, scams, burglary, human errors, acts of vandalism, or other events. Alleged or actual data security breaches can increase costs of doing business, negatively affect customer satisfaction and loyalty, expose us to

Table of Contents

negative publicity, individual claims or consumer class actions, administrative, civil or criminal investigations or actions, and infringe on proprietary information.

Governmental regulation pertaining to fuel economy (CAFE) standards may affect a manufacturer's ability to produce cost effective vehicles, which would impact our sales.

The Energy Policy Conservation Act, enacted into law by Congress in 1975, added Title V, "Improving Automotive Efficiency," to the Motor Vehicle Information and Cost Savings Act and established Corporate Average Fuel Economy ("CAFE") standards for passenger cars and light trucks. CAFE is the sales weighted average fuel economy, expressed in miles per gallon (mpg) of a manufacturer's fleet of passenger cars or light trucks with a gross vehicle weight rating of 8,500 pounds or less, manufactured for sale in the U.S., for any given model year.

The primary goal of CAFE was to substantially increase passenger car fuel efficiency. Congress has continuously increased the standards since 1974 and, since mid-year 1990, the passenger car standard was increased to 27.5 miles per gallon, a level at which it has remained through 2009. Passenger car fuel economy is now required to rise to an industry average of 39 miles per gallon by 2016. Likewise, significant changes to light truck CAFE standards have been established over the years. The standard is expected to be increased to about 30 miles per gallon by 2016.

The penalty for a manufacturer's failure to meet the CAFE standards is currently \$5.50 per tenth of a mile per gallon for each tenth under the target volume times the total volume of those vehicles manufactured for a given model year. Failure of a manufacturer to develop passenger vehicles and light trucks that meet CAFE standards could subject the manufacturer to substantial penalties, increase the cost of vehicles sold to us, and adversely affect our ability to market and sell vehicles to meet consumer needs and desires. Furthermore, Congress may continue to increase CAFE standards in the future and such additional legislation may have a further adverse impact on vehicle manufacturers and our business.

Climate change legislation or regulations restricting emission of "greenhouse gases" could result in increased operating costs and reduced demand for the vehicles we sell.

On December 15, 2009, the U.S. Environmental Protection Agency ("EPA") published its findings that emissions of carbon dioxide, methane and other "greenhouse gases" present an endangerment to public health and the environment because emissions of such gases are, according to the EPA, contributing to warming of the earth's atmosphere and other climatic changes. These findings allow the EPA to adopt and implement regulations that would restrict emissions of greenhouse gases under existing provisions of the federal Clean Air Act. Accordingly, the EPA has proposed regulations that would require a reduction in emissions of greenhouse gases from motor vehicles and could trigger permit review for greenhouse gas emissions from certain stationary sources. In addition, on October 30, 2009, the EPA published a final rule requiring the reporting of greenhouse gas emissions from specified large greenhouse gas emission sources in the United States, including facilities that emit more than 25,000 tons of greenhouse gases on an annual basis, beginning in 2011 for emissions occurring in 2010. At the state level, more than one-third of the states, either individually or through multi-state regional initiatives, already have begun implementing legal measures to reduce emissions of greenhouse gases. The adoption and implementation of any regulations imposing reporting obligations on, or limiting emissions of greenhouse gases from, our facilities, equipment and operations could require us to incur costs to reduce emissions of greenhouse gases associated with our operations. In addition, similar regulations imposed on the owners of the vehicles that we sell could adversely affect demand for certain vehicles. The loss of key personnel may adversely affect our business.

Our success depends, to a significant degree, upon the continued contributions of our management team.

Manufacturer dealer or framework agreements may require the prior approval of the applicable manufacturer before any change is made in dealership general managers or other management positions. The loss of the services of one or more of these key employees may materially impair the profitability of our operations, or may result in a violation of an applicable dealer or framework agreement.

In addition, we may need to hire additional managers or other key personnel from time to time. In some instances, potential acquisitions are more viable to us if we are able to retain experienced managers or obtain replacement managers should the owner or manager of an acquired dealership not continue to manage the business. The market for

qualified employees in the industry and in the regions in which we operate, particularly for general managers and sales and service personnel, is highly competitive and may subject us to increased labor costs during periods of low unemployment. The loss of the services of key employees or the inability to attract additional qualified managers may adversely affect the ability of our dealerships to conduct their operations in accordance with the standards set by us or the manufacturers.

We depend on our executive officers as well as other key personnel. Although our CEO and COO have entered into

25

Table of Contents

agreements relating to their employment with us, most of our key personnel are not bound by employment agreements, and those with employment agreements are bound only for a limited period of time. Further, we do not maintain “key man” life insurance policies on any of our executive officers or key personnel. If we are unable to retain our key personnel, we may be unable to successfully develop and implement our business plans, which may have an adverse effect on our business.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

We lease our corporate headquarters, which are located at 2905 Premiere Parkway, NW, Suite 300, Duluth, Georgia. In addition, as of December 31, 2011, our operations encompassed 79 dealership locations throughout 10 states. As of December 31, 2011, we leased 35 of these locations and owned the remaining locations. We have one location in Mississippi and one location in Missouri where we lease the underlying land but own the building facilities on that land. These locations are included in the leased column of the table below. In addition, we operate 25 collision repair centers. We lease 13 of these collision repair centers and own the remaining repair center locations.

Dealership Group	Dealerships			Collision Repair Centers	
	Owned	Leased		Owned	Leased
Coggin Automotive Group	10	4	(a)	5	2
Courtesy Autogroup	4	5		—	2
Crown Automotive Company	12	7		2	1
David McDavid Auto Group	5	2		2	3
Gray-Daniels Auto Family	1	5		—	1
Nalley Automotive Group	4	8		2	2
Northpoint Auto Group	4	2		1	1
Plaza Motor Company	4	2		—	1
Total	44	35		12	13

(a) Includes one dealership that leases a new vehicle facility and operates a separate used vehicle facility that is owned.

Item 3. Legal Proceedings

From time to time, we and our dealerships may become involved in various claims relating to, and arising out of our business and our operations. These claims may involve, but are not limited to, financial and other audits by vehicle manufacturers, lenders and certain federal, state and local government authorities, which relate primarily to (a) incentive and warranty payments received from vehicle manufacturers, or allegations of violations of manufacturer agreements or policies, (b) compliance with lender rules and covenants and (c) payments made to government authorities relating to federal, state and local taxes, as well as compliance with other government regulations. Claims may also arise through litigation, government proceedings and other dispute resolution processes. Such claims, including class actions, can relate to, but are not limited to, the practice of charging administrative fees, employment-related matters, truth-in-lending practices, contractual disputes, actions brought by governmental authorities and other matters. We evaluate pending and threatened claims and establish loss contingency reserves based upon outcomes we currently believe to be probable and reasonably estimable.

As previously disclosed, the Company and certain of its subsidiaries were named as defendants in a class action lawsuit filed in December 2002 in the Pulaski County Circuit Court in Arkansas. The complaint related to our Arkansas dealerships' charging certain document preparation fees and receiving certain interest rate participation

amounts from lenders related to customer arranged financing from November 2000 through November 2006. On November 7, 2011, the circuit court approved a class action settlement previously agreed to by the parties. In connection therewith, the Company made a payment of approximately \$5.4 million in the fourth quarter of 2011.

Item 4. Mine Safety Disclosures

Not applicable.

26

Table of Contents

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Our common stock is traded on the New York Stock Exchange (the "NYSE") under the symbol "ABG". Quarterly information concerning our high and low closing sales price per share of our common stock as reported by the NYSE is as follows:

	High	Low
Fiscal Year Ended December 31, 2010		
First Quarter	\$ 14.24	\$ 10.91
Second Quarter	16.79	10.54
Third Quarter	14.42	9.82
Fourth Quarter	18.80	13.73
Fiscal Year Ended December 31, 2011		
First Quarter	\$ 19.98	\$ 17.04
Second Quarter	18.96	15.04
Third Quarter	21.66	16.18
Fourth Quarter	21.56	15.52

We did not pay any dividends during any of these periods. On February 21, 2012, the last reported sale price of our common stock on the NYSE was \$25.12 per share, and there were approximately 82 record holders of our common stock.

In December 2010, our board of directors authorized the repurchase of up to \$25.0 million of our common stock. In July 2011, our board of directors increased the authorization to repurchase common stock, resulting in \$45.0 million of remaining repurchase capacity. During the year ended December 31, 2011, we repurchased 2.6 million shares of our common stock for \$44.8 million.

Pursuant to the indentures governing our senior subordinated notes, and the agreements governing our senior secured credit facilities, our ability to repurchase shares of our common stock and pay cash dividends is limited. In accordance with such calculations, our ability to repurchase shares of our common stock and pay cash dividends was limited to \$45.6 million under these agreements as of December 31, 2011, with an additional \$10.0 million available to repurchase common stock only.

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1)	Approximate Dollar Value of Shares that May Yet be Purchased Under the Plans or Program (in millions)
10/01/2011 - 10/31/2011	180,400	\$ 16.85	180,400	\$ 27.8
11/01/2011 - 11/30/2011	490,100	\$ 18.47	490,100	\$ 18.7
12/01/2011 - 12/31/2011	186,096	\$ 19.60	186,096	\$ 15.1

(1) Represents shares of our common stock repurchased pursuant to a 10b5-1 trading plan, which expired on December 31, 2011.

PERFORMANCE GRAPH

The following graph furnished by the Company shows the value as of December 31, 2011, of a \$100 investment in the Company's common stock made on December 31, 2006 (with dividends reinvested), as compared with similar investments based on (i) the value of the S & P 500 Index (with dividends reinvested) and (ii) the value of a market-weighted Peer Group Index composed of the common stock of AutoNation, Inc., Sonic Automotive, Inc., Group 1 Automotive, Inc., Penske Automotive Group, Inc. and Lithia Motors, Inc., in each case on a "total return" basis assuming reinvestment of dividends. The market-weighted Peer Group Index values were calculated from the beginning of the performance period. The historical stock performance shown below is not necessarily indicative of future expected performance.

The forgoing graph is not, and shall not be deemed to be, filed as part of the Company's annual report on Form 10-K. Such graph is not, and will not be deemed, filed or incorporated by reference into any filing of the Company under the Securities Act of 1933 or the Securities Exchange Act of 1934, except to the extent specifically incorporated by reference therein by the Company.

Item 6. Selected Financial Data

The following table sets forth selected consolidated financial data for the five years ended December 31, 2011. The accompanying income (loss) statement data for the years ended December 31, 2010, 2009, 2008, and 2007 have been reclassified to reflect the status of our discontinued operations as of December 31, 2011. The following information should be read in conjunction with "Management's Discussion and Analysis of Financial Condition and Results of Operations" and the Company's consolidated financial statements and the notes thereto, included elsewhere in this annual report on Form 10-K.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation

OVERVIEW

We are one of the largest automotive retailers in the United States, operating 99 franchises (79 dealership locations) in 18 metropolitan markets within 10 states as of December 31, 2011. We offer an extensive range of automotive products and services, including new and used vehicles; vehicle maintenance, replacement parts and collision repair services; and financing, insurance and service contracts. As of December 31, 2011, we offered 30 domestic and foreign brands of new vehicles. Our current brand mix is weighted 84% towards luxury and mid-line import brands, with the remaining 16% consisting of domestic brands. We also operate 25 collision repair centers that serve customers in our local markets.

Our retail network is made up of dealerships operating primarily under the following locally-branded dealership groups:

• Coggin dealerships, operating primarily in Jacksonville, Fort Pierce and Orlando, Florida;

• Courtesy dealerships operating in Tampa, Florida;

• Crown dealerships operating in New Jersey, North Carolina, South Carolina and Virginia;

• Nalley dealerships operating in Atlanta, Georgia;

• McDavid dealerships operating primarily in Dallas and Houston, Texas;

• North Point dealerships operating in Little Rock, Arkansas;

• Plaza dealerships operating in St. Louis, Missouri; and

• Gray-Daniels dealerships operating in Jackson, Mississippi.

Our revenues are derived primarily from: (i) the sale of new vehicles to individual retail customers ("new vehicle retail") and commercial customers ("fleet") (the terms "new vehicle retail," and "fleet" being together referred to as "new"); (ii) the sale of used vehicles to individual retail customers ("used retail") and to other dealers at auction ("wholesale") (the terms "used retail" and "wholesale" being together referred to as "used"); (iii) maintenance and collision repair services and the sale of automotive parts (together referred to as "parts and service"); and (iv) the arrangement of vehicle financing and the sale of a number of aftermarket products, such as insurance and service contracts (collectively referred to as "F&I"). We evaluate the results of our new and used vehicle sales based on unit volumes and gross profit per vehicle sold, our parts and service operations based on aggregate gross profit, and F&I based on dealership generated F&I gross profit per vehicle sold. We assess the organic growth of our revenue and gross profit by comparing the year-to-year results of stores that we have operated for at least twelve full months ("same store").

Our organic growth is dependent upon the execution of our balanced automotive retailing and service business strategy, the continued strength of our brand mix and the production of desirable vehicles by automobile manufacturers whose brands we sell. Our vehicle sales have historically fluctuated with product availability as well as local and national economic conditions, including consumer confidence, availability of consumer credit, fuel prices and employment levels. We believe that the impact on our business of any future negative trends in new vehicle sales would be partially mitigated by (i) the expected relative stability of our parts and service operations over the long-term, (ii) the variable nature of significant components of our cost structure and (iii) our brand mix. Historically, our brand mix has been less affected by market volatility than the U.S. automobile industry as a whole. We believe that our new vehicle revenue brand mix, which included approximately 47% revenue from mid-line import brands and 37% revenue from luxury brands for 2011, is well positioned for growth over the long term.

Our operating results are generally subject to changes in the economic environment as well as seasonal variations. We tend to generate more revenue and operating income in the second and third quarters than in the first and fourth quarters of the calendar year. Generally, the seasonal variations in our operations are caused by factors related to weather conditions, changes in manufacturer incentive programs, model changeovers and consumer buying patterns, among other things.

Our gross profit margin varies with our revenue mix. The sale of new vehicles generally results in lower gross profit margin than used vehicle sales and sales of parts and service. As a result, when used vehicle and parts and service revenue increase as a percentage of total revenue, we expect our overall gross profit margin to increase.

Selling, general and administrative (“SG&A”) expenses consist primarily of fixed and incentive-based compensation, advertising, rent, insurance, utilities and other customary operating expenses. A significant portion of our cost structure is variable (such as sales commissions), or controllable (such as advertising), generally allowing us to adapt to changes in the retail environment over the long-term. We evaluate commissions paid to salespeople as a percentage of retail vehicle gross

Table of Contents

profit and all other SG&A expenses in the aggregate as a percentage of total gross profit, with the exception of advertising expense, which we evaluate on a per vehicle retailed ("PVR") basis.

The United States automotive retail market has shown continued improvement in 2011, with new vehicle SAAR increasing to 12.8 million as compared to 11.6 million in 2010. We believe that improvement in the industry will continue to be slow, with the new vehicle SAAR expected to improve only modestly in 2012, as the long-term prospects for, and the timing of, a full recovery continue to be difficult to predict.

We continue to evaluate potential consequences resulting from the natural disasters and related events in Japan on our operating results. Disruption in new vehicle inventories from certain Japanese manufacturers began during the second quarter of 2011 and continued into the fourth quarter of 2011. We currently expect that the resulting inventory supply shortages will subside by the first quarter of 2012, although we can provide no assurance of this. In addition, we do not expect that the disruption in the supply of inventory from our Japanese manufacturing partners will have a material adverse effect on our earnings, results of operations or our business during 2012, although we can provide no assurance of this.

We had total available liquidity of \$231.0 million as of December 31, 2011, which included cash and cash equivalents of \$11.4 million, borrowing availability of \$204.1 million under our various credit facilities and \$15.5 million of availability under our new vehicle floor plan offset account. For further discussion of our floor plan offset account, please refer to "Liquidity and Capital Resources" below. We have no material long-term debt maturities until September 2012, at which time our 3% Senior Subordinated Convertible Notes due 2012 (the "3% Convertible Notes") will mature. As of December 31, 2011, we had \$15.1 million in aggregate principal amount of our 3% Convertible Notes outstanding.

SG&A EXPENSES AS A PERCENTAGE OF GROSS PROFIT	76.3	% 77.3	%

Net income and income from continuing operations increased by \$29.8 million and \$10.6 million, respectively, during 2011 as compared to 2010, primarily a result of a \$70.4 million (11%) increase in gross profit, partially offset by (i) a \$47.3 million (9%) increase in SG&A expenses, (ii) a \$14.3 million increase in other operating expense and (iii) a \$3.3 million (9%) increase in other interest expense. The increase in net income was primarily the result of the sale of our heavy truck business, two additional franchises (two dealership locations) and one ancillary business in 2011, which resulted in \$22.3 million in net-of-tax gains, which are included in discontinued operations, net. Net income and income from continuing operations for 2011 were reduced by (i) \$5.5 million, net of tax, due to legal claims related to operations from 2000 to 2006, (ii) \$4.2 million, net of tax, due to expenses related to executive separation benefits and (iii) \$1.1 million, net of tax, due to real estate related charges. Net income and income from continuing operations for 2010 were reduced by \$8.3 million, net of tax, from losses on the extinguishment of long-term debt. Gross profit increased across all four of our business lines and was driven by a \$26.2 million (23%) increase in F&I gross profit and a \$20.3 million (7%) increase in parts and service gross profit. Our total gross profit margin increased 20 basis points to 16.9%, primarily as a result of a mix shift to our higher margin parts and service and F&I businesses.

The \$379.5 million (10%) increase in total revenue was primarily a result of a \$160.0 million (7%) increase in new vehicle revenue and a \$171.9 million (16%) increase in used vehicle revenue. The increase in new vehicle revenue includes a \$96.3 million (4%) increase in same store new vehicle revenue and \$63.7 million in new vehicle revenue from acquired dealerships. The increase in used vehicle revenue includes (i) a \$147.3 million (17%) increase in same store used vehicle retail revenue and (ii) \$35.8 million of used vehicle retail revenue derived from acquired dealerships.

Table of Contents

New Vehicle Metrics—

	For the Year Ended December			%	%
	31, 2011	2010	Increase		
Revenue per new vehicle sold—same store(1)	\$32,265	\$31,371	\$894	3	%
Gross profit per new vehicle sold—same store(1)	\$2,177	\$2,075	\$102	5	%
New vehicle gross margin—same store(1)	6.7	% 6.6	% 0.1	% 2	%

(1) Same store amounts consist of information from dealerships for the identical months of each period presented in the comparison, commencing with the first full month in which the dealership was owned by us.

The \$160.0 million (7%) increase in new vehicle revenue was primarily a result of a \$96.3 million (4%) increase in same store new vehicle revenue due to a 2% increase in same store new vehicle unit sales and a 3% increase in revenue per new vehicle sold. Our total new vehicle revenue also benefited from \$63.7 million of revenue derived from acquisitions. Same store unit volumes for our mid-line import brands decreased 2%, while unit volumes from our domestic brands increased 8% on a same store basis, reflecting (i) reduced availability of new vehicle inventory from certain Japanese brands due to the natural disasters and related events in Japan and (ii) increased consumer demand for domestic vehicles. New vehicle SAAR increased to 12.8 million for 2011 as compared to 11.6 million for 2010.

Total new vehicle gross profit increased by \$13.4 million (9%), which included \$4.0 million of gross profit derived from acquisitions. Our same store gross profit per new vehicle sold increased by \$102, driven by a decrease in supply of higher-volume, lower-margin vehicles due to the natural disaster and related events in Japan, which drove a 50 basis point increase in our new vehicle gross margins from our mid-line import brands when compared to 2010. Our margins in the near future are expected to be primarily dependent upon market-based forces of supply and demand as we expect U.S. based inventory levels from our Japanese manufacturing partners to begin to normalize by the first quarter of 2012. As discussed above, these events favorably impacted our new vehicle gross profit margins during 2011 and these margins may not be sustainable as vehicle production and availability increase and inventory levels normalize.

From time to time, we participate in certain manufacturer incentive programs that include performance criteria. In the fourth quarter of 2010, we recognized approximately \$2.5 million of manufacturer incentives (\$2.1 million of which related to the period of January 2008 through September 2010) related to (i) the purchase and sale of vehicles during the period from January 2008 through December 2010 and (ii) our satisfaction of certain manufacturer facility image standards in the fourth quarter of 2010. The \$2.5 million of manufacturer incentives is included as a reduction of new vehicle cost of sales and, as a result, increased our luxury new vehicle gross profit for 2010. We do not expect this level of manufacturer incentives in the future.

Used vehicle retail units—same store(1)	54,030	46,093	7,937	17	%
Used vehicle retail units—acquisitions	1,775	—			
Used vehicle retail units—actual	55,805	46,093	9,712	21	%

Used Vehicle Metrics—

	For the Year Ended December 31,		Decrease	%	
	2011	2010		Change	
Revenue per used vehicle retailed—same store(1)	\$18,904	\$18,964	\$(60)	—)%
Gross profit per used vehicle retailed—same store(1)	\$1,853	\$2,015	\$(162)	(8))%
Used vehicle retail gross margin—same store(1)	9.8	% 10.6	% (0.8)	(8))%

(1) Same store amounts consist of information from dealerships for the identical months of each period presented in the comparison, commencing with the first full month in which the dealership was owned by us.

The \$171.9 million (16%) increase in used vehicle revenue includes (i) a \$147.3 million (17%) increase in same store used vehicle retail revenue and (ii) \$40.5 million of used vehicle revenue derived from acquired dealerships, partially offset by a \$15.9 million (8%) decrease in same store used vehicle wholesale revenue. The \$10.5 million (11%) increase in used vehicle gross profit was primarily a result of a \$7.2 million (8%) increase in same store used vehicle retail gross profit. The increase in used vehicle retail revenue and gross profit was driven primarily by increased unit sales volumes, partially offset by a lower gross profit margin of 9.8%, down 80 basis points from the prior year. These results reflect the continued benefits of several store-level programs, including volume-driven initiatives such as our "Asbury 1-2-1" program, a goal of retailing one used vehicle for every new vehicle retailed. This initiative is designed to drive not only used retail volume, but to increase revenues from associated parts and

service reconditioning and F&I as well.

We believe our used vehicle inventory is well-aligned with current consumer demand, with approximately 31 days of supply in our inventory as of December 31, 2011, as compared to approximately 35 days of supply as of December 31, 2010.

(1) Same store amounts consist of information from dealerships for the identical months of each period presented in the comparison, commencing with the first full month in which the dealership was owned by us.

The \$21.4 million (4%) increase in parts and service revenue was primarily due to \$19.5 million of parts and service revenue derived from acquired dealerships. The \$20.3 million (7%) increase in parts and service gross profit was primarily due to a 150 basis point increase in our same store parts and service gross margin primarily as a result of increased gross profit from reconditioning and preparation of vehicles. The \$11.8 million increase in reconditioning gross profit was primarily a result of the 21% increase in our used vehicle retail unit sales.

We continue to focus on increasing our parts and service revenue, and specifically our customer pay business, over the long-term by (i) continuing to invest in additional service capacity, where appropriate, (ii) upgrading equipment, (iii) focusing on improving customer retention and customer satisfaction and (iv) capitalizing on our dealer training programs.

(1) Same store amounts consist of information from dealerships for the identical months of each period presented in the comparison, commencing with the first full month in which the dealership was owned by us.

F&I increased \$26.2 million (23%) during 2011 as compared to 2010, due to (i) an 8% increase in same store retail unit sales and (ii) an 11% increase in same store F&I per vehicle sold. The increase in F&I per vehicle sold was primarily attributable to (i) the improving availability of consumer credit, which allowed more of our customers to take advantage of a broader array of F&I products, (ii) the addition of key personnel to our F&I management team and (iii) our continued focus on improving the F&I results at our lower-performing stores by increasing the training of our F&I personnel, including implementing a certification process and certain best practices initiatives.

Gross profit—same store(1)	\$699.0		\$650.6					
Gross profit—actual	\$721.0		\$650.6					

(1) Same store amounts consist of information from dealerships for the identical months of each period presented in the comparison, commencing with the first full month in which the dealership was owned by us.

Same store SG&A expense as a percentage of gross profit was 76.5% for 2011 as compared to 77.3% for 2010. The 80 basis point decrease was primarily a result of (i) a 110 basis point decrease in rent expense as a result of (a) our purchase of certain previously leased real estate during 2011 and (b) a \$0.9 million lease termination charge in the 2010 period associated with our former corporate headquarters in New York, NY, and (ii) a 100 basis point decrease in personnel costs as a result of leveraging our fixed expenses, partially offset by a 50 basis point increase in outside services expense, primarily due to increased investment in our information technology infrastructure.

We continue to be engaged in numerous store-level productivity initiatives designed to improve our profitability, including the consolidation of certain dealership accounting functions. In 2011, we substantially completed the process of converting all of our dealerships to the ADP Dealer Management System, which had been implemented at approximately 93% of our dealerships as of December 31, 2011, and was implemented at our remaining dealerships in January 2012. Upon completion of our dealership ADP conversions, we expect to focus on fully leveraging the ADP Dealer Management System with our other technology platforms.

Depreciation and Amortization —

The \$1.8 million (9%) increase in depreciation and amortization expense was primarily the result of increased capital expenditures in 2011 and 2010 as compared to 2009, as well our decision to purchase certain previously leased real estate during 2011.

Other Operating Expense, net —

Other operating expense, net includes gains and losses from the sale of property and equipment, income derived from lease arrangements and other non-core operating items. During the year ended December 31, 2011, we recognized (i) approximately \$9.0 million of expense due to legal claims related to operations from 2000 to 2006 and (ii) approximately \$6.6 million of executive separation costs, which were partially offset by income related to proceeds received from the elimination of one of our franchises.

Table of Contents

Other Interest Expense —

The \$3.3 million (9%) increase in other interest expense was attributable to (i) a refinancing of our long-term debt in the fourth quarter of 2010, which included the issuance of \$200.0 million of our 8.375% Senior Subordinated Notes Due 2020 (the "8.375% Notes"), the proceeds of which were primarily used to repurchase all \$179.4 million aggregate principal amount of our outstanding 8% Senior Subordinated Notes Due 2014 (the "8% Notes") and (ii) our entrance into a mortgage for the purchase of land and building associated with an acquisition in the fourth quarter of 2010.

Swap Interest Expense —

We have entered into various derivative financial instruments, including fair value and cash flow interest rate swaps, which have been designed to provide hedges against changes in fair value of certain debt obligations and variable rate cash flows. Our earnings have been impacted by these interest rate swaps in the form of (i) amounts reclassified from AOCI to earnings for active swaps, (ii) amortization of amounts reclassified from AOCI to earnings for terminated cash flow swaps and (iii) amortization of terminated fair value swaps. The pre-tax impact on earnings related to our various derivative financial instruments for 2011 and 2010 was \$5.5 million and \$6.6 million, respectively.

Income Tax Expense—

The \$6.4 million (28%) increase in income tax expense was primarily a result of the \$17.0 million (28%) increase in income before income taxes in 2011 as compared to 2010. Our effective tax rate decreased from 38.3% for 2010 to 38.1% for 2011. Our effective tax rate is highly dependent on our level of income before income taxes and permanent differences between book and tax income. As a result, it is difficult to project our overall effective tax rate for any given period. Based upon our current expectation of 2012 income before income taxes, we expect our effective income tax rate will be between 38% and 40% in 2012.

Discontinued Operations—

During 2011, we sold (i) our heavy truck business in Atlanta, Georgia, which consisted of ten franchises (three dealership locations) and one collision repair center, (ii) two franchises (two dealership locations) and (iii) one additional ancillary business. The \$19.9 million, net of tax, net income from discontinued operations for 2011 consists of a \$22.3 million, net of tax, gain on the sale of the businesses discussed above, partially offset by \$2.4 million, net of tax, of net operating losses of franchises and ancillary businesses sold prior to December 31, 2011, including rent and other expenses of idle facilities.

During 2010, we sold one franchise (one dealership location). The \$0.7 million, net of tax, net income from discontinued operations during 2010 consists of \$2.5 million, net of tax, of income from insurance proceeds related to tornado damage to the unused real estate of one of our former dealership locations in Yazoo City, Mississippi, offset by (i) \$1.3 million, net of tax, of impairment expenses related to certain property not used in our operations, (ii) \$0.2 million, net of tax, of net operating losses of franchises sold prior to December 31, 2011, including primarily rent and other expenses of idle facilities, (iii) \$0.2 million, net of tax, of rent acceleration on certain real estate not used in our operations and (iv) a \$0.1 million, net of tax, loss on the sale of one franchise (one dealership location).

We continuously evaluate the financial and operating results of our dealerships, as well as each dealership's geographical location, and may continue to refine our dealership portfolio through strategic acquisitions or divestitures from time to time.

Net income and income from continuing operations increased by \$24.7 million and \$11.7 million, respectively, during 2010 as compared to 2009, primarily as a result of (i) a \$66.1 million (11%) increase in gross profit and (ii) a 270 basis point decrease in SG&A expenses as a percentage of gross profit. Net income and income from continuing operations for 2010 were reduced by \$8.3 million, net of tax, from losses on the extinguishment of long-term debt. The \$11.7 million increase in income from continuing operations was primarily a result of a \$66.1 million (11%) increase in total gross profit. Gross profit increased across all four of our business lines and was driven by a \$25.6 million (29%) increase in F&I gross profit and a \$15.6 million (5%) increase in parts and service gross profit. These increases in gross profit were partially offset by (i) a \$35.0 million (7%) increase in SG&A expenses and (ii) \$12.6 million in losses from the extinguishment of long-term debt during 2010. Our total gross profit margin decreased 60 basis points to 16.7%, principally as a result of a mix shift to our lower margin new vehicle and used vehicle businesses.

The \$525.4 million (16%) increase in total revenue was primarily a result of a \$317.1 million (17%) increase in new vehicle revenue and a \$183.4 million (20%) increase in used vehicle revenue. The increase in new vehicle revenue includes a \$309.1 million (17%) increase in same store new vehicle revenue and \$8.0 million in new vehicle revenue from acquired dealerships. The increase in used vehicle revenue includes (i) a \$159.6 million (22%) increase in same store used vehicle retail revenue, (ii) a \$20.5 million (11%) increase in same store used vehicle wholesale revenue and (iii) \$3.3 million of used vehicle revenue derived from acquired dealerships.

New Vehicle Metrics—

	For the Year Ended		Increase	%	
	December 31, 2010	2009		Change	
Revenue per new vehicle sold—same store(1)	\$31,368	\$29,896	\$1,472	5	%
Gross profit per new vehicle sold—same store(1)	\$2,078	\$2,124	\$(46)	(2))%
New vehicle gross margin—same store(1)	6.6	% 7.1	% (0.5))% (7)%

(1) Same store amounts consist of information from dealerships for the identical months of each period presented in the comparison, commencing with the first full month in which the dealership was owned by us.

The \$317.1 million (17%)increase in new vehicle revenue was primarily a result of a \$309.1 million (17%) increase in same store new vehicle revenue due to an 11% increase in same store vehicle retail units sales and an 11% increase in same store fleet unit sales. Our total new vehicle revenue also benefited from \$8.0 million of revenue derived from acquisitions. We believe that the increase in new vehicle retail unit sales was primarily driven by a favorable comparison with an overall weak economic environment during 2009, as well as increased consumer confidence and less stringent consumer lending standards. Unit volumes increased across each of our brand segments, consistent with overall U.S. vehicle sales. New vehicle SAAR increased to 11.6 million for 2010 as compared to 10.4 million for 2009.

Total new vehicle gross profit increased by \$12.0 million (9%), which included \$0.3 million of gross profit derived from acquisitions. Gross profit from our luxury and mid-line domestic brands increased \$11.4 million (23%) and \$5.4 million (32%), respectively, but was offset by a \$5.1 million (8)% decrease in gross profit from our mid-line import brands. Gross profit per new vehicle sold decreased \$46, driven primarily by the decrease in mid-line import gross profit, due to higher incentives in the 2009 period, including manufacturer incentives and the impact of the federal government's Car Allowance Rebate System Program, otherwise known as "Cash for Clunkers"; however, this decrease was more than offset by a \$111 increase in F&I per vehicle sold, reflecting an improvement in total gross profit per vehicle sold during 2010.

From time to time we participate in certain manufacturer incentive programs that include performance criteria. In the fourth quarter of 2010, we recognized approximately \$2.5 million of manufacturer incentives (\$2.1 million of which related to the period of January 2008 through September 2010) related to (i) the purchase and sale of vehicles during the period from January 2008 through December 2010 and (ii) our satisfaction of certain manufacturer facility image standards in the fourth quarter of 2010. The \$2.5 million of manufacturer incentives is included as a reduction of new vehicle cost of sales and, as a result, increased our luxury new vehicle gross profit for 2010.

Used Vehicle Metrics—

	For the Year Ended December 31,		Increase	%	
	2010	2009	(Decrease)	Change	
Revenue per used vehicle retailed—same store(1)	\$18,960	\$18,267	\$693	4	%
Gross profit per used vehicle retailed—same store(1)	\$2,015	\$2,033	\$(18)	(1))%
Used vehicle retail gross margin—same store(1)	10.6	% 11.1	% (0.5)%	(5))%

(1) Same store amounts consist of information from dealerships for the identical months of each period presented in the comparison, commencing with the first full month in which the dealership was owned by us.

The \$183.4 million (20%) increase in used vehicle revenue consists of (i) a \$159.6 million (22%) increase in same store used vehicle retail revenue, (ii) a \$20.5 million (11%) increase in same store wholesale revenue and (iii) \$3.3 million of used vehicle revenue derived from acquired dealerships. The \$12.9 million (16%) increase in used vehicle gross profit was primarily a result of a \$13.3 million (17%) increase in same store used vehicle retail gross profit, partially offset by a \$0.8 million increase in same store used vehicle wholesale losses. The increase in used vehicle retail revenue and gross profit was driven primarily by increased unit volume sales, partially offset by a lower gross profit margin of 10.6%, down 50 basis points from the prior year. These results reflect a favorable comparison to an overall weak economic environment in 2009, as well as the benefits of several store-level programs initiated in 2009, including volume-driven initiatives such as our "Asbury 1-2-1" program, a goal of retailing one used vehicle for every new vehicle retailed. This initiative is designed to drive not only used retail volume, but to increase revenues from

associated parts and service reconditioning and F&I as well. The 4% increase in revenue per used vehicle retailed from 2009 to 2010 was primarily driven by (i) a mix shift towards our higher-priced used vehicles, including Certified Pre-Owned, or "CPO" vehicles, as well as our full-size used trucks and SUVs and (ii) an increase in associated parts and service reconditioning, as reconditioning work generally increases the price of the related used vehicles.

Table of Contents

We believe this was reflective of an overall trend in 2010, with many customers preferring to purchase a higher-priced used vehicle rather than a comparably priced new vehicle.

Parts and Service—

	For the Year Ended December 31, 2010		2009		Increase (Decrease)	% Change
	(Dollars in millions)					
Revenue:						
Parts and service revenue—same store(1)	\$554.6	\$557.2	\$(2.6)	—	%
Parts and service revenues—acquisitions	1.9	—				
Parts and service revenue, as reported	\$556.5	\$557.2	\$(0.7)	—	%
Gross profit:						
Parts and service gross profit—same store(1):						
Customer pay	\$187.9	\$183.5	\$4.4		2	%
Warranty	47.5	45.7	1.8		4	%
Reconditioning and preparation	45.1	35.4	9.7		27	%
Wholesale parts	20.2	21.6	(1.4)	(6)%
Total parts and service gross profit—same store(1)	300.7	286.2	14.5		5	%
Parts and service gross profit—acquisitions	1.1	—				
Parts and service gross profit, as reported	\$301.8	\$286.2	\$15.6		5	%
Parts and service gross margin—same store(1)	54.2	% 51.4	% 2.8		% 5	%

(1) Same store amounts consist of information from dealerships for the identical months of each period presented in the comparison, commencing with the first full month in which the dealership was owned by us.

The \$0.7 million decrease in parts and service revenue was due to a \$2.6 million decrease in same store revenue, partially offset by \$1.9 million of parts and service revenue derived from acquired dealerships. The \$15.6 million (5%) increase in parts and service gross profit was primarily due to a 280 basis point increase in our same store parts and service gross margin primarily as a result of increased gross profit from reconditioning and preparation of vehicles. The \$9.7 million increase in reconditioning gross profit was primarily a result of the increase in our new and used vehicle unit sales, which provided more reconditioning and preparation work.

(1) Same store amounts consist of information from dealerships for the identical months of each period presented in the comparison, commencing with the first full month in which the dealership was owned by us.

F&I increased \$25.6 million (29%) during 2010 as compared to the same period in 2009, primarily due to a (i) a 14% increase in same store retail unit sales and (ii) a 12% increase in same store F&I per vehicle sold. The increase in F&I per vehicle sold was primarily attributable to (a) more favorable lending standards and other market factors in 2010, which allowed more of our customers to take advantage of a broader array of F&I products and (b) our continued focus on improving the F&I results at our lower-performing stores by increasing the training of our F&I personnel and implementing certain best practices initiatives, including a certification process for our F&I personnel.

Gross profit—same store(1)	\$648.6		\$584.5			
Gross profit—actual	\$650.6		\$584.5			

(1) Same store amounts consist of information from dealerships for the identical months of each period presented in the comparison, commencing with the first full month in which the dealership was owned by us.

Same store SG&A expense as a percentage of gross profit was 77.3% for 2010, as compared to 80.0% for 2009. The 270 basis point decrease was primarily a result of (i) a 120 basis point decrease in personnel costs as a result of leveraging our fixed expenses, and lower fixed compensation expense resulting from the elimination of our regional management structure and staffing reductions and (ii) a 60 basis point decrease in insurance costs associated with our large deductible insurance programs for workers compensation, property and general liability claims.

During 2010, we recognized \$0.9 million of incremental rent expense as a result of reaching an agreement with the lessor of our former New York headquarters office space for a cash settlement in exchange for a termination of our remaining lease obligation, which totaled approximately \$5.9 million prior to termination.

Depreciation and Amortization—

The \$1.0 million 5% decrease in depreciation and amortization expense was primarily the result of a significant reduction in capital expenditures in 2010 and 2009 as compared to our historical levels.

Table of Contents

Floor Plan Interest Expense—

The \$1.4 million (13%) decrease in floor plan interest expense was primarily attributable to the lower short-term interest rate environment. Additionally, during 2010, we used excess cash to reduce floor plan notes payable using floor plan offset accounts with certain of our floor plan lenders, effectively lowering our average floor plan notes payable balance during 2010 when compared to the prior year period. We had approximately \$48.7 million in these floor plan offset accounts, on a daily weighted average basis, during 2010. We did not have any amounts in floor plan offset accounts during 2009.

Swap Interest Expense —

We have entered into various derivative financial instruments, including fair value and cash flow interest rate swaps, which have been designed to provide hedges against changes in fair value of certain debt obligations and variable rate cash flows. Our earnings have been impacted by these interest rate swaps in the form of (i) amounts reclassified from Accumulated Other Comprehensive Income ("AOCI") to earnings for active swaps, (ii) amortization of amounts reclassified from AOCI to earnings for terminated cash flow swaps and (iii) amortization of terminated fair value swaps. The pre-tax impact on earnings related to our various derivative financial instruments for 2010 and 2009 was \$6.6 million.

Convertible Debt Discount Amortization —

During 2010 and 2009, we recognized \$1.4 million and \$1.8 million of convertible debt amortization associated with our 3% Convertible Notes. Since a portion of our 3% Convertible Notes will be settled in cash upon conversion, we separately account for the liability and equity components in a manner that reflects our nonconvertible debt borrowing rate when interest cost is recognized in subsequent periods. The excess of the principal amount of the liability component over its initial fair value is amortized to interest cost using the effective interest method.

(Loss) Gain on Extinguishment of Long-Term Debt—

During 2010, we recognized a \$12.6 million net loss on the extinguishment of long-term debt, consisting of (i) an \$11.3 million loss on the extinguishment of our remaining outstanding \$179.4 million of 8% Notes and (ii) a \$1.3 million net loss on the repurchase of \$25.2 million of our 3% Convertible Notes for \$24.4 million. Included in the \$11.3 million loss on the extinguishment of our remaining 8% Notes was (i) \$5.2 million of premiums paid in connection with the repurchase of the 8% Notes pursuant to a tender offer, (ii) a \$3.6 million write-off of unamortized hedging activity associated with a terminated fair value swap and (iii) a \$2.5 million write-off of the remaining unamortized debt issuance costs associated with the 8% Notes. Included in the \$1.3 million net loss on the repurchase of our 3% Convertible Notes was (a) a \$1.8 million pro-rata write-off of the unamortized discount associated with the repurchased 3% Convertible Notes and (b) a \$0.3 million pro-rata write-off of unamortized debt issuance costs, partially offset by a \$0.8 million gain on the repurchase of the 3% Convertible Notes.

Income Tax Expense—

The \$7.9 million (52%) increase in income tax expense was primarily a result of the \$19.6 million (48%) increase in income before income taxes in 2010 as compared to 2009. Our effective tax rate increased from 37.3% for the 2009 period to 38.3% for the 2010 period. The 100 basis point increase is primarily a result of the reversal of certain tax reserves in 2009, partially offset by 2010 tax exempt income and 2009 tax exempt losses from corporate owned life insurance policies.

Discontinued Operations—

During 2010, we sold one franchise (one dealership location). The \$0.7 million, net of tax, net income from discontinued operations during 2010 consists of \$2.5 million, net of tax, of income from insurance proceeds related to tornado damage to the unused real estate of one of our former dealership locations in Yazoo City, Mississippi, partially offset by (i) \$1.3 million, net of tax, of impairment expenses related to certain property not used in our operations, (ii) \$0.2 million, net of tax, of rent acceleration on certain real estate not used in our operations, (iii) \$0.1 million, net of tax, of net operating losses of franchises sold prior to December 31, 2011, including primarily rent and other expenses of idle facilities and (iv) a \$0.1 million, net of tax, loss on the sale of one franchise (one dealership location).

During 2009, we sold four franchises (three dealership locations) and closed six franchises (three dealership locations). The \$12.3 million, net of tax, net loss from discontinued operations for 2009 is a result of (i) \$9.2 million,

net of tax, of net operating losses of franchises sold prior to December 31, 2011, including rent expense of idle facilities and legal expenses for franchises sold prior to December 31, 2011, (ii) \$3.0 million, net of tax, of impairment expenses related to abandoned real estate from discontinued operations and (iii) \$2.5 million, net of tax, of rent accelerations on abandoned properties, partially offset by a \$2.4 million, net of tax, net gain on the sale of dealerships.

Table of Contents

LIQUIDITY AND CAPITAL RESOURCES

As of December 31, 2011, we had total available liquidity of \$231.0 million, which consisted of cash and cash equivalents of \$11.4 million, borrowing availability of \$204.1 million under our revolving credit facilities and \$15.5 million of availability under our new vehicle floor plan offset account, which is generally accessible within one to two days. The total borrowing capacity under our revolving credit facilities is limited by borrowing base calculations and, from time to time, may be further limited by our required compliance with certain financial covenants. These financial covenants do not currently further limit our availability under our credit facilities. For a detailed discussion of our financial covenants, see "Covenants" below.

We continually evaluate our liquidity and capital resources based upon (i) our cash and cash equivalents on hand, (ii) the funds that we expect to generate through future operations, (iii) current and expected borrowing availability under our revolving credit facilities, our floor plan facilities and our mortgage financing, (iv) amounts in our new vehicle floor plan notes payable offset account and (v) the potential impact of any contemplated or pending future transactions, including, but not limited to, financings, acquisitions, dispositions or other capital expenditures. We believe we will have sufficient liquidity to meet our debt service and working capital requirements; commitments and contingencies; debt repayment, maturity and repurchase obligations; acquisitions; capital expenditures; and any operating requirements for at least the next twelve months.

We currently have the following material credit facilities, floor plan facilities, mortgage notes, and senior subordinated notes. For a more detailed description of the material terms of our senior secured credit facilities, see "Credit Agreement" below. For a more detailed description of the material terms of our mortgage notes and senior subordinated notes, refer to the "Floor Plan Notes Payable" and "Long-Term Debt" footnote in the accompanying consolidated financial statements.

Revolving credit facility - a \$175.0 million senior secured revolving credit facility for, among other things, acquisitions, working capital and capital expenditures, including a \$50.0 million sublimit for letters of credit. Our borrowing capacity under the revolving credit facility is limited by a borrowing base calculation and any outstanding letters of credit, which totaled \$15.7 million as of December 31, 2011.

New inventory floor plan facilities - \$625.0 million senior secured new vehicle revolving floor plan facility. In conjunction with the new vehicle floor plan facility, we established an account with Bank of America that allows us to transfer cash to an account as an offset to floor plan notes payable (a "floor plan offset account"). These transfers reduce the amount of outstanding new vehicle floor plan notes payable that would otherwise accrue interest, while retaining the ability to transfer amounts from the offset account into our operating cash accounts within one to two days. As a result of the use of our floor plan offset account, we experience a reduction in Floor plan interest expense on our Consolidated Statements of Income. As of December 31, 2011, we had \$15.5 million in this floor plan offset account. We also have a floor plan facility with Ford to purchase new Ford and Lincoln vehicle inventory and well as facilities with certain other manufacturers for loaner vehicles.

Used vehicle floor plan facility - a \$100.0 million senior secured used vehicle revolving floor plan facility to finance the acquisition of used vehicle inventory and for, among other things, other working capital and capital expenditures, as well as to refinance used vehicles.

Mortgage notes - as of December 31, 2011, we had \$96.8 million of mortgage note obligations. These mortgage notes payable are secured by the related underlying property.

3% Senior Subordinated Convertible Notes due 2012 ("3% Convertible Notes") - as of December 31, 2011, we had \$15.1 million in aggregate principal amount of our 3% Convertible Notes outstanding, offset by \$0.4 million of unamortized discount. We are required to pay interest on the 3% Convertible Notes on March 15 and September 15 of each year until their maturity on September 15, 2012.

7.625% Senior Subordinated Notes due 2017 (“7.625% Notes”) - as of December 31, 2011, we had \$143.2 million in aggregate principal amount of our 7.625% Notes outstanding. We are required to pay interest on the 7.625% Notes on March 15 and September 15 of each year until their maturity on March 15, 2017.

8.375% Senior Subordinated Notes due 2020 (“8.375% Notes”) - as of December 31, 2011, we had \$200.0 million in aggregate principal amount of our 8.375% Notes outstanding. We are required to pay interest on the 8.375% Notes on May 15 and November 15 of each year until their maturity on November 15, 2020.

Table of Contents

Under the terms of the senior secured credit facilities and certain mortgage notes payable, our ability to incur new indebtedness is currently limited to (i) permitted floor plan indebtedness, (ii) real estate loans in an aggregate amount not to exceed \$29.0 million, (iii) certain refinancings, refunds, renewals or extensions of existing indebtedness, and (iv) other customary permitted indebtedness.

Credit Agreement

On October 14, 2011, we and certain of our subsidiaries entered into a credit agreement with Bank of America, N.A. (“Bank of America”), as administrative agent, and the lenders party thereto (the “Credit Agreement”). The Credit Agreement provides for our senior secured credit facilities, consisting of (i) a \$175.0 million revolving credit facility with a \$50.0 million sublimit for letters of credit, (ii) a \$625.0 million new vehicle revolving floor plan facility, and (iii) a \$100.0 million used vehicle revolving floor plan facility, in each case subject to limitations on borrowing availability as set out in the Credit Agreement. Subject to the compliance with certain conditions, the Credit Agreement provides that we and our dealership subsidiaries that are borrowers under the senior secured credit facilities (collectively, the “Borrowers”) have the ability, at their option and subject to the receipt of additional commitments from existing or new lenders, to increase the size of the revolving credit facility by up to \$50.0 million without lender consent. The Credit Agreement also provides that the Borrowers have the ability, at their option and subject to the receipt of additional commitments from existing or new lenders, to increase the size of the new vehicle floor plan facility or the used vehicle floor plan facility by up to \$225.0 million in the aggregate without lender consent and also subject to the compliance with certain conditions. The senior secured credit facilities mature, and all amounts outstanding thereunder will be due and payable, on October 14, 2016.

In connection with our entry into the Credit Agreement, we terminated our prior \$150.0 million revolving credit facility and our prior \$50.0 million used vehicle floor plan facility, neither of which had any material amounts outstanding as of the termination thereof. We used borrowings under our new vehicle floor plan facility to repay amounts outstanding under, and terminate, substantially all of our prior floor plan facilities, other than the facilities with Ford relating to the financing of new Ford and Lincoln vehicles and with certain other manufacturers for loaner vehicles, which remain in place.

Borrowings under the revolving credit facility bear interest, at our option, based on LIBOR plus 1.75% to 2.75% or the Base Rate plus 0.75% to 1.75%, in each case based on our total lease adjusted leverage ratio. The Base Rate is the highest of the (i) Bank of America prime rate, (ii) Federal Funds rate plus 0.50%, and (iii) one month LIBOR plus 1.0%.

Borrowings under the new vehicle revolving floor plan facility bear interest, at our option, based on LIBOR plus 1.5% or the Base Rate plus 0.50%. Borrowings under the used vehicle revolving floor plan facility bear interest, at our option, based on LIBOR plus 1.75% or the Base Rate plus 0.75%.

Covenants

We are subject to a number of covenants in our various debt and lease agreements, including those described below. We were in compliance with all of our covenants as of December 31, 2011. Failure to comply with any of our debt covenants would constitute a default under the relevant debt agreements, which would entitle the lenders under such agreements to terminate our ability to borrow under the relevant agreements and accelerate our obligations to repay outstanding borrowings, if any, unless compliance with the covenants is waived. In many cases, defaults under one of our agreements could trigger cross default provisions in our other agreements. If we are unable to remain in compliance with our financial or other covenants, we would be required to seek waivers or modifications of our covenants from our lenders, or we would need to raise debt and/or equity financing or sell assets to generate proceeds sufficient to repay such debt. We cannot give any assurance that we would be able to successfully take any of these actions on terms, or at times, that may be necessary or desirable.

The Credit Agreement contains certain representations and covenants that we must comply with. The representations and covenants contained in the Credit Agreement are customary for financing transactions of this nature including, among others, a requirement to comply with a minimum consolidated current ratio and consolidated fixed charge

coverage ratio (each as defined in the Credit Agreement) and a maximum consolidated total lease adjusted leverage ratio, in each case as set out in the Credit Agreement. In addition, certain other covenants could restrict our ability to incur additional debt, pay dividends or acquire or dispose of assets.

The Credit Agreement also provides for events of default that are customary for financing transactions of this nature, including cross-defaults to other material indebtedness. In certain instances, an event of default under either the revolving credit facility or the used vehicle floor plan facility could be, or result in, an event of default under the new vehicle floor plan facility, and vice versa. Upon the occurrence of an event of default, we could be required to immediately repay all amounts outstanding under the applicable facility.

Table of Contents

Our guarantees under our master loan agreement with Wachovia Bank, National Association and Wachovia Financial Services, Inc. also require compliance with certain financial covenants, including a consolidated current ratio, consolidated fixed charge coverage ratio and an adjusted net worth calculation. The Wachovia master loan agreement currently restricts our ability to incur new indebtedness from real estate loans to an aggregate of \$29.0 million. At our option and with 30 days' written notice, the indebtedness limitation may be removed in conjunction with the reinstatement of our compliance with a total leverage ratio.

Certain of our lease agreements also require compliance with various financial covenants and incorporate by reference the financial covenants set forth in the Credit Agreement. A breach of any of these covenants could immediately give rise to certain landlord remedies under our various lease agreements, the most severe of which include the following: (a) termination of the applicable lease and/or other leases with the same or an affiliated landlord under a cross-default provision, (b) eviction from the premises; and (c) the landlord would have a claim for any or all of the following: (i) damages suffered by landlord by reason of the default, equal to rent and other amounts payable by tenant under the lease prior to the default plus other fees and costs incurred by landlord; and (ii) additional damages, either payable monthly in an amount equal to the rent due under the lease less the amount of rent, if any, received by the landlord from a substitute tenant, or payable in a lump sum equal to the present value of the sum of the amount by which all remaining sums due under the lease exceeds the fair market rental value of the premises for the same period, plus landlord's expense and value of all vacancy periods projected by landlord to be incurred in connection with reletting the premises.

Subordinated Note Repurchases

Our board of directors has authorized us, from time to time, to repurchase various of our senior subordinated notes in open market purchases or privately negotiated transactions. The decision to repurchase our senior subordinated notes is dependent upon prevailing market conditions, our liquidity position, applicable limitations in any agreements to which we are a party, and other factors. Currently, the Credit Agreement allows us to purchase at least \$25.0 million of our debt securities per calendar year, subject to increase based on availability under senior secured credit facilities. In February 2011, in accordance with the terms of our prior credit agreement, our board of directors authorized us to use up to \$30.0 million of cash to repurchase outstanding 3% Convertible Notes, 7.625% Notes or 8.375% Notes, which authorization expires February 28, 2012. This authority supersedes and replaces the previous authorization under which we had repurchased \$25.2 million of 3% Convertible Notes. During 2011, we repurchased \$14.4 million of 3% Convertible Notes in private transactions, which reduced our authorization to repurchase our senior subordinated notes to \$15.6 million as of December 31, 2011.

Stock Repurchases

In December 2010, our board of directors authorized the repurchase of up to \$25.0 million of our common stock. In July

2011, our board of directors increased the authorization to repurchase common stock, resulting in \$45.0 million of remaining

repurchase capacity. During 2011, we repurchased 2,566,096 million shares for a total of \$44.8 million.

During 2011, we also repurchased 226,214 shares of our common stock for \$4.3 million from employees in connection with a net share settlement feature of employee equity-based awards.

Contractual Obligations

As of December 31, 2011, we had the following contractual obligations (in millions):

	Payments due by period						Total
	2012	2013	2014	2015	2016	Thereafter	
Floor plan notes payable	\$434.0	\$—	\$—	\$—	\$—	\$—	\$434.0
Operating leases	39.5	36.6	34.1	32.0	31.7	135.4	309.3
Long-term debt (a)	19.5	41.4	2.1	18.0	0.9	377.1	459.0
Interest on long-term debt (b)	32.3	31.5	30.8	30.4	30.1	76.2	231.3
	7.7	—	—	—	—	—	7.7

Deferred compensation obligations (c)							
Employee compensation obligations	0.5	—	—	—	—	—	0.5
Total	\$533.5	\$109.5	\$67.0	\$80.4	\$62.7	\$588.7	\$1,441.8

(a) Does not include \$0.4 million unamortized discount that reduces the book value of our 3% Convertible Notes.

Table of Contents

(b) Includes variable interest calculated using an estimated LIBOR rate of 0.30%.

In February 2012, our Board of Directors elected to terminate the Asbury Wealth Accumulation Plan (the "Deferred Compensation Plan"). As a result of this decision, we reclassified \$7.7 million of liabilities associated with the Deferred Compensation Plan from Other Long-Term Liabilities to Other Current Assets and Accounts Payable on our Consolidated Balance Sheet as of December 31, 2011.

Cash Flows

Classification of Cash Flows Associated with Floor Plan Notes Payable

Borrowings and repayments of floor plan notes payable to a lender unaffiliated with the manufacturer from which we purchase a particular new vehicle ("Non-Trade"), and all floor plan notes payable relating to pre-owned vehicles (together referred to as "Floor Plan Notes Payable - Non-Trade"), are classified as financing activities on the accompanying Consolidated Statements of Cash Flows, with borrowings reflected separately from repayments. The net change in floor plan notes payable to a lender affiliated with the manufacturer from which we purchase a particular new vehicle (collectively referred to as "Floor Plan Notes Payable - Trade") is classified as an operating activity on the accompanying Consolidated Statements of Cash Flows. Borrowings of floor plan notes payable associated with inventory acquired in connection with all acquisitions are classified as a financing activity in the accompanying Consolidated Statement of Cash Flows. Cash flows related to floor plan notes payable included in operating activities differ from cash flows related to floor plan notes payable included in financing activities only to the extent that the former are payable to a lender affiliated with the manufacturer from which we purchased the related inventory, while the latter are payable to a lender not affiliated with the manufacturer from which we purchased the related inventory. Repayments of Floor Plan Notes Payable - Trade associated with divestitures are classified as an operating activity. Repayments of Floor Plan Notes Payable - Non-Trade associated with divestitures are classified as a financing activity.

Floor plan borrowings are required by all vehicle manufacturers for the purchase of new vehicles, and all floor plan lenders require amounts borrowed for the purchase of a vehicle to be repaid within a short time period after the related vehicle is sold. As a result, we believe that it is important to understand the relationship between the cash flows of all of our floor plan notes payable and new vehicle inventory in order to understand our working capital and operating cash flow and to be able to compare our operating cash flow to that of our competitors (i.e., if our competitors have a different mix of trade and non-trade floor plan financing as compared to us). In addition, we include all floor plan borrowings and repayments in our internal operating cash flow forecasts. As a result, we use the non-GAAP measure "cash provided by operating activities, as adjusted" (defined below) to compare our results to forecasts. We believe that splitting the cash flows of floor plan notes payable between operating activities and financing activities, while all new vehicle inventory activity is included in operating activities, results in significantly different operating cash flow than if all the cash flows of floor plan notes payable were classified together in operating activities.

Cash provided by operating activities, as adjusted, includes borrowings and repayments of floor plan notes payable to lenders not affiliated with the manufacturer from which we purchase the related vehicle. Cash provided by operating activities, as adjusted, has material limitations, therefore, may not be comparable to similarly titled measures of other companies and should not be considered in isolation, or as a substitute for analysis of our operating results in accordance with GAAP. In order to compensate for these potential limitations we also review the related GAAP measures.

We have provided below a reconciliation of cash flow from operating activities, as if all changes in floor plan notes payable, except for (i) borrowings associated with acquisitions and repayments associated with divestitures and (ii) borrowings and repayments associated with the purchase of used vehicle inventory, were classified as an operating activity.

For the Year Ended December 31,

Table of Contents

Operating Activities—

Net cash used in operating activities totaled \$181.1 million for the year ended December 31, 2011. Net cash provided by operating activities totaled \$9.9 million and \$110.9 million for the years ended December 31, 2010 and 2009, respectively. Net cash provided by operating activities, as adjusted, totaled \$135.1 million, \$23.1 million and \$65.3 million for the years ended December 31, 2011, 2010 and 2009, respectively. Cash provided by operating activities, as adjusted, includes net income, adjustments to reconcile net income to net cash used in operating activities and changes in working capital, including changes in floor plan notes payable and inventory.

The \$112.0 million increase in our cash provided by operating activities, as adjusted, for the year ended December 31, 2011 compared to the year ended December 31, 2010 was primarily the result of the following:

- \$100.9 million related to a decrease in inventory, net of floor plan notes payable, primarily as a result of limited availability of new inventory as a result of the natural disasters and related events in Japan in early 2011;

- \$39.0 million related to the timing of collection of accounts receivable and contracts-in-transit during 2011 as compared to 2010, primarily related to the collection of accounts receivable from our heavy truck business, which was sold in the first quarter of 2011; and

- \$13.5 million related to a net decrease in other current assets primarily related to a decrease in our prepaid taxes and loaner inventory.

The increase in our cash provided by operating activities, as adjusted, was partially offset by:

- \$16.0 million related to the decrease in accounts payable and accrued expenses as a result of (i) increased business activities during 2011 as compared to 2010 and (ii) our decision to terminate an interest rate swap in 2011; and

- a \$25.4 million decrease in net income adjusted for non-cash items.

Investing Activities—

Net cash provided by investing activities totaled \$34.3 million and \$16.1 million for the years ended December 31, 2011 and 2009, respectively. Net cash used in investing activities totaled \$68.9 million for the year ended December 31, 2010. Cash flows from investing activities relate primarily to capital expenditures, acquisition and divestiture activity and sales of property and equipment.

Capital expenditures, excluding the purchase of real estate and lease buyouts, were \$22.4 million, \$22.7 million and \$7.2 million for the years ended December 31, 2011, 2010 and 2009, respectively. Real estate related capital expenditures totaled \$18.0 million, \$7.4 million and \$1.1 million for the years ended December 31, 2011, 2010 and 2009, respectively. In addition, we purchased previously leased property for \$30.3 million during 2011. Our capital investments currently consist primarily of real estate purchases, upgrades to our existing facilities and equipment purchases. We expect that capital expenditures during 2012 will total approximately \$50.0 million, excluding the purchase of real estate. As part of our capital allocation strategy, we continuously evaluate opportunities to purchase properties currently under lease. No assurances can be provided that we will have or be able to access capital at times or on terms in amounts deemed necessary to execute this strategy.

Proceeds from the sale of assets totaled \$104.4 million, \$17.7 million and \$25.1 million for the years ended December 31, 2011, 2010 and 2009, respectively. Included in the proceeds from the sale of assets for the years ended December 31, 2011, 2010 and 2009, were \$39.6 million, \$7.0 million and \$14.9 million, respectively, associated with the sale of inventory in connection with the sale of twelve franchises (five dealership locations), one franchise (one dealership location), and four franchises (three dealership locations), respectively. We continuously monitor the profitability and market value of our dealerships and may, under certain conditions, strategically divest certain

dealerships.

Financing Activities—

Net cash provided by financing activities totaled \$136.9 million for the year ended December 31, 2011. Net cash used in financing activities totaled \$4.4 million and \$133.9 million for the years ended December 31, 2010 and 2009, respectively.

During 2011, non-trade floor plan borrowings, net of repayments totaled \$291.4 million as a result of our entrance into the Credit Agreement, under which the majority of our floor plan notes are payable to parties unaffiliated with the entities from which we purchase our new vehicle inventory, with the exception of floor plan notes payable relating to the financing of new Ford and Lincoln vehicles. In connection with our entrance into the Credit Agreement, we also paid \$4.3 million in debt

Table of Contents

issuance costs.

During 2011, we also made non-trade floor plan repayments of \$14.8 million related to the divestiture of our heavy trucks business.

The proceeds from borrowings during 2010 were primarily the result of the issuance of \$200.0 million of the 8.375% Notes.

Repayments of borrowings totaled \$96.7 million, \$240.1 million and \$76.3 million for the years ended December 31, 2011, 2010 and 2009, respectively. During the year ended December 31, 2011, we repaid \$74.6 million of mortgage notes payable prior to their associated maturity, including \$5.1 million associated with sale of our heavy trucks business, and repurchased \$14.4 million of 3% Convertible Notes in a private transaction. The repayments during 2010 were primarily related to the repurchase of \$179.4 million of our 8% Notes and \$25.2 million of our 3% Convertible Notes.

During 2011, we repurchased a total of 2,566,096 shares of our common stock under our authorized repurchase program for \$44.8 million. In 2011, we also repurchased 226,214 shares of our common stock for \$4.3 million from employees in connection with a net share settlement feature of employee share-based awards.

Stock Repurchase and Dividend Restrictions

Pursuant to the indentures governing our 8.375% Notes and our 7.625% Notes, and the agreements governing our senior secured credit facilities, our ability to repurchase shares of our common stock and pay cash dividends is limited. In accordance with such calculations, our ability to repurchase shares of our common stock and pay cash dividends was limited to \$45.6 million under these agreements as of December 31, 2011, with an additional \$10.0 million available to repurchase common stock only.

Off Balance Sheet Arrangements

We had no off balance sheet arrangements during any of the periods presented other than those disclosed in Note 19 and 20 of our accompanying consolidated financial statements.

APPLICATION OF CRITICAL ACCOUNTING ESTIMATES

Preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect amounts of assets and liabilities and disclosures of contingent assets and liabilities as of the date of the financial statements and reported amounts of revenues and expenses during the periods presented. Actual amounts could differ from those estimates. On an ongoing basis, management evaluates its estimates and assumptions and the effects of any such revisions are reflected in the financial statements in the period in which they are determined to be necessary. The accounting estimates described below are those that require management judgments, and therefore are critical to understanding our results of operations. Senior management has discussed the development and selection of these accounting estimates and the related disclosures with the audit committee of our board of directors.

Deferred Income Taxes—

Estimates and judgments are used in the calculation of certain tax liabilities and in the determination of the recoverability of certain deferred tax assets. In assessing the realizability of deferred tax assets, we consider whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. We regularly evaluate the recoverability of our deferred tax assets and, if necessary, provide valuation allowances to offset portions of deferred tax assets due to uncertainty surrounding the future realization of such deferred tax assets. Valuation allowances are based on historical taxable income, projected future taxable income, the expected timing of the reversals of existing temporary differences, and the implementation of tax-planning strategies. We would establish a valuation allowance in the period we determine it is more likely than not that deferred tax assets will or will not be realized. If a change in circumstances results in a change in our ability to realize our deferred tax assets, our tax provision would be adjusted in the period when the change in circumstances occurs.

F&I Chargeback Reserve—

We receive commissions from the sale of vehicle service contracts, credit life insurance and disability insurance to customers. In addition, we receive commissions from financing institutions for arranging customer financing. We may be charged back (“chargebacks”) for finance, insurance or vehicle service contract commissions in the event a customer

prepays or defaults on a retail sales contract or cancels an insurance or warranty contract. The revenues from financing fees and commissions are recorded at the time the vehicles are sold and a reserve for future chargebacks is established based on

55

Table of Contents

historical operating results and the termination provisions of the applicable contracts. This data is evaluated on a product-by-product basis. Our loss histories vary depending on the product but generally total between 10% and 14% of F&I revenues. Our F&I chargebacks from continuing operations for the years ended December 31, 2011, 2010 and 2009 were \$16.8 million, \$13.7 million, and \$11.9 million, respectively. Our chargeback reserves were \$14.5 million and \$12.5 million as of December 31, 2011 and December 31, 2010, respectively. Total chargebacks as a percentage of F&I revenue for the years ended December 31, 2011 and 2010, were 12%, respectively. A 1% change in our estimate for all our products would have changed finance and insurance, net on our accompanying Consolidated Statement of Income for the year ended December 31, 2011 by approximately \$1.6 million.

Used Vehicle Inventory Lower of Cost or Market Reserves—

Our used vehicle inventory is stated at the lower of cost or market. We use the specific identification method to value our vehicle inventories. We maintain a reserve for specific inventory units where cost basis exceeds fair value. In assessing lower of cost or market for used vehicles, we consider (i) the aging of used vehicles, (ii) loss histories of used vehicles and (iii) current market conditions.

Our used vehicle loss histories have indicated that our losses range between 3% and 6% of our used vehicle inventory. Our used vehicle losses for the years ended December 31, 2011, 2010 and 2009 were \$9.6 million, \$10.4 million and \$9.7 million, respectively. As of December 31, 2011, our used vehicle loss reserve was \$3.1 million, or 3.7% of used vehicle inventory. As of December 31, 2010, our used vehicle loss reserve was \$2.9 million, or 3.7% of used vehicle inventory. As of December 31, 2011, each 1% change in our estimate would change our used vehicle reserve approximately \$0.9 million.

Insurance Reserves—

We are self insured for certain employee medical claims and maintain stop loss insurance for individual claims. We have large deductible insurance programs in place for workers compensation, property and general liability claims. We maintain and review at least monthly our claim and loss history to assist in assessing our future liability for these claims. We also use professional service providers, such as account administrators and actuaries, to help us accumulate and assess this information. As of December 31, 2011 and December 31, 2010, we had \$14.8 million and \$13.8 million, respectively, of insurance reserves for both known and unknown employee medical, workers compensation, property and general liability claims. Expenses associated with employee medical, workers compensation, property and general liability claims from continuing operations, including premiums for insurance coverage, for the years ended December 31, 2011, 2010 and 2009, totaled \$22.0 million, \$20.8 million and \$23.5 million, respectively.

Manufacturer Franchise Rights—

Our only significant identifiable intangible assets, other than goodwill, are rights under franchise agreements with manufacturers, which are recorded at an individual dealership level. The fair market value of our manufacturer franchise rights is determined at the acquisition date through discounting the projected cash flows specific to each franchise. We have determined that manufacturer franchise rights have an indefinite life as there are no legal, contractual, economic or other factors that limit their useful lives and they are expected to generate cash flows indefinitely due to the historically long lives of the manufacturers' brand names. Due to the fact that manufacturer franchise rights are specific to the location in which we acquire a dealership, we have determined that the dealership is the reporting unit for purposes of testing franchise rights for impairment. We do not amortize manufacturer franchise rights.

We review indefinite lived manufacturer franchise rights for impairment annually on October 1st of each year, or more often if events or circumstances indicate that impairment may have occurred. We are subject to financial statement risk to the extent that manufacturer franchise rights become impaired due to decreases in fair market value of our individual franchises.

The significant estimates and assumptions used by management in assessing the recoverability of manufacturer franchise rights are estimated future cash flows, present value discount rate, and other factors. Any changes in these estimates or assumptions could result in an impairment charge. The estimates of future cash flows, based on reasonable and supportable assumptions and projections, require management's subjective judgment. Depending on the assumptions and estimates used, the estimated future cash flows projected in the evaluations of manufacturer franchise

rights can vary within a range of outcomes.

Table of Contents

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Interest Rate Risk

We are exposed to market risk from changes in interest rates on a significant portion of our outstanding indebtedness. Based on \$509.8 million of total variable interest rate debt (including floor plan notes payable) outstanding as of December 31, 2011, a 1% change in interest rates could result in a change of as much as \$5.1 million to our annual other interest expense.

We received \$18.9 million of interest credit assistance from certain automobile manufacturers during the year ended December 31, 2011. Interest credit assistance reduced cost of sales (including amounts classified as discontinued operations) for the year ended December 31, 2011 by \$18.9 million and reduced new vehicle inventory by \$4.1 million and \$4.1 million as of December 31, 2011 and December 31, 2010, respectively. Although we can provide no assurance as to the amount of future floor plan interest credit assistance, it is our expectation, based on historical data that an increase in prevailing interest rates would result in increased interest credit assistance from certain automobile manufacturers.

Hedging Risk—

We have an interest rate swap agreement which had a notional principal amount of \$21.0 million as of December 31, 2011. This swap was designed to provide a hedge against changes in variable interest rate cash flows through maturity in October 2015. The notional value of this swap was reduced through July 2011, when the notional principal amount increased to \$21.5 million, and then began to reduce over the remaining term to \$16.1 million at maturity. This interest rate swap qualifies for cash flow hedge accounting treatment and does not, and will not, contain any ineffectiveness.

In November 2011, we chose to terminate an interest rate swap, which resulted in a cash payment of \$7.2 million, which equaled the fair market value of the swap agreement at the point of termination. Included in Accumulated Other Comprehensive Loss on our Consolidated Balance Sheet as of December 31, 2011, was \$6.5 million (\$4.0 million, net of tax) of unrecognized amortization related to our terminated cash flow swap, which is being amortized through May 2013 as a component of Swap Interest Expense on the accompanying Consolidated Statements of Income. The terminated swap liability is being amortized as a result of the probability of the original hedged item (interest payments) continuing to occur. Amortization of this terminated cash flow swap totaled \$0.6 million for the year ended December 31, 2011. Amortization of this terminated cash flow swap will total approximately \$4.6 million for the year ended December 31, 2012.

In June 2011, one of our interest rate swap agreements matured. This swap had been designed to provide a hedge against changes in variable rate cash flows, and had qualified for cash flow hedge accounting treatment. The maturity of this swap did not have a material impact our Consolidated Financial Statements.

For additional information about the effect of our derivative instruments on the accompanying consolidated financial statements, see Note 14 “Financial Instruments and Fair Value” of the notes thereto.

In connection with the sale of our 3% Convertible Notes, we entered into convertible note hedge transactions with respect to our common stock with Goldman, Sachs & Co. and Deutsche Bank AG, London Branch (collectively, the “Counterparties”). The convertible note hedge transactions require the Counterparties to deliver to us, subject to customary anti-dilution adjustments, all shares issuable upon conversion of the 3% Convertible Notes. The effect of the convertible note hedge transactions is to unwind the conversion feature of the 3% Convertible Notes. Under the terms of the convertible note hedge transactions we will receive shares from the Counterparties in the event of a conversion of our 3% Convertible Notes. In connection with the repurchase of 3% Convertible Notes, a portion of the convertible note hedges was terminated.

We also entered into separate warrant transactions whereby we sold to the Counterparties warrants to acquire, subject to customary anti-dilution adjustments, shares of our common stock at an initial strike price of \$45.09 per share, which was a 62.50% premium over the market price of our common stock at the time of pricing. As of December 31, 2011, the strike price was \$44.74 as a result of certain dividend payments. Under the terms of the warrant transactions we are required to issue shares of our common stock to the Counterparties in the event of a conversion of our 3% Convertible Notes at a strike price above \$33.73.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM
ON THE CONSOLIDATED FINANCIAL STATEMENTS

The Board of Directors and Shareholders of
Asbury Automotive Group, Inc.

We have audited the accompanying consolidated balance sheets of Asbury Automotive Group, Inc. as of December 31, 2011 and 2010, and the related consolidated statements of income, shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2011. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Asbury Automotive Group, Inc. at December 31, 2011 and 2010, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2011, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Asbury Automotive Group, Inc.'s internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 22, 2012 expressed an unqualified opinion thereon.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM
ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The Board of Directors and Shareholders of
Asbury Automotive Group, Inc.

We have audited Asbury Automotive Group, Inc.'s internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Asbury Automotive Group, Inc.'s (the "Company") management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Asbury Automotive Group, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Asbury Automotive Group, Inc. as of December 31, 2011 and 2010, and the related consolidated statements of income, shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2011 of Asbury Automotive Group, Inc. and our report dated February 22, 2012 expressed an unqualified opinion thereon.

ASBURY AUTOMOTIVE GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(December 31, 2011, 2010 and 2009)

1. DESCRIPTION OF BUSINESS

We are one of the largest automotive retailers in the United States, operating 99 franchises (79 dealership locations) in 18 metropolitan markets within 10 states as of December 31, 2011. We offer an extensive range of automotive products and services, including new and used vehicles; vehicle maintenance, replacement parts and collision repair services; and financing, insurance and service contracts. As of December 31, 2011, we offered 30 domestic and foreign brands of new vehicles. Our current brand mix is weighted 84% towards luxury and mid-line import brands, with the remaining 16% consisting of domestic brands. We also operate 25 collision repair centers that serve customers in our local markets.

Our retail network is made up of dealerships operating primarily under the following locally-branded dealership groups:

• Coggin dealerships, operating primarily in Jacksonville, Fort Pierce and Orlando, Florida;

• Courtesy dealerships operating in Tampa, Florida;

• Crown dealerships operating in New Jersey, North Carolina, South Carolina and Virginia;

• Nalley dealerships operating in Atlanta, Georgia;

• McDavid dealerships operating primarily in Dallas and Houston, Texas;

• North Point dealerships operating in Little Rock, Arkansas;

• Plaza dealerships operating in St. Louis, Missouri; and

• Gray-Daniels dealerships operating in Jackson, Mississippi.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accompanying consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP"), and reflect the consolidated accounts of Asbury Automotive Group, Inc. and our wholly owned subsidiaries. All intercompany transactions have been eliminated in consolidation.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the periods presented. Actual results could differ materially from these estimates. Estimates and assumptions are reviewed quarterly and the effects of any revisions are reflected in the consolidated financial statements in the period they are determined to be necessary. Significant estimates made in the accompanying consolidated financial statements include, but are not limited to, those relating to inventory valuation reserves, reserves for chargebacks against revenue recognized from the sale of finance and insurance ("F&I") products, certain assumptions related to intangible and long-lived assets, reserves for insurance programs, reserves for certain legal or similar proceedings relating to our business operations, realization of deferred tax assets and reserves for estimated tax liabilities.

Cash and Cash Equivalents

Cash and cash equivalents include investments in money market accounts and short-term certificates of deposit which have maturity dates of less than 90 days when purchased.

Contracts-In-Transit

Contracts-in-transit represent receivables from third-party finance companies for the portion of new and used vehicle purchase price financed by customers through sources arranged by us. Amounts due from contracts-in-transit are generally collected within two weeks following the date of sale of the related vehicle.

Inventories

Inventories are stated at the lower of cost or market. We use the specific identification method to value vehicle inventories and the “first-in, first-out” method (“FIFO”) to account for our parts inventories. We maintain a reserve for specific vehicles

Table of Contents

where cost basis exceeds market value. In assessing the lower of cost or market for new and used vehicles, we consider (i) the aging of new and used vehicles, (ii) loss histories of new and used vehicles, (iii) the timing of annual and model changeovers of new vehicles and (iv) then-current market conditions. Our new vehicle loss histories have indicated that our losses range between 1% and 3% of our new vehicle inventory greater than 300 days old. Our used vehicle loss histories have indicated that our losses range between 3% and 6% of our total used vehicle inventory.

We receive assistance from certain automobile manufacturers in the form of advertising and interest credits. Manufacturer advertising credits that are reimbursements of costs associated with specific advertising programs are recognized as a reduction of advertising expense in the period they are earned. All other manufacturer advertising and interest credits are accounted for as purchase discounts and are recorded as a reduction of inventory and recognized as a reduction to New Vehicle Cost of Sales in the accompanying Consolidated Statements of Income in the period the related vehicle is sold.

Property and Equipment

Property and equipment are recorded at cost and depreciated using the straight-line method over their estimated useful lives. Depreciation is included in Depreciation and Amortization and Discontinued Operations, net of tax, on the accompanying Consolidated Statements of Income. Leasehold improvements are capitalized and amortized over the lesser of the life of the lease or the useful life of the related asset. The ranges of estimated useful lives are as follows (in years):

Buildings and improvements	10-40
Machinery and equipment	5-10
Furniture and fixtures	3-10
Company vehicles	3-5

Expenditures for major additions or improvements, which extend the useful lives of assets, are capitalized. Minor replacements, maintenance and repairs, which do not improve or extend the lives of such assets, are expensed as incurred.

We review property and equipment for impairment whenever events or changes in circumstances indicate the carrying value may not be recoverable. When we test our long-lived assets for impairment, we first compare the carrying amount of the underlying assets to their net recoverable value by reviewing the undiscounted cash flows expected to result from the use and eventual disposition of the underlying assets. If the carrying amount of the underlying assets is less than their net recoverable value, then we calculate an impairment equal to the excess of the carrying amount over the fair market value, and the impairment loss would be charged to operations in the period identified. As a result of impairment tests conducted in 2011, 2010 and 2009, we recorded only immaterial impairments of certain of our property and equipment in those periods.

We capitalize interest on borrowings during the active construction period of capital projects. Capitalized interest is added to the cost of the assets and is depreciated over the estimated useful lives of the assets.

Acquisitions

Acquisitions are accounted for under the purchase method of accounting and the assets acquired and liabilities assumed are recorded at their fair value as of the acquisition dates. The operations of the acquired dealerships are included in the accompanying Consolidated Statements of Income commencing on the date of acquisition.

Goodwill and Other Intangible Assets

Goodwill represents the excess cost of the businesses acquired over the fair market value of the identifiable net assets. We have determined that, based on how we integrate acquisitions into our business, how the components of our business share resources and interact with one another, and the fact that all components are economically similar, we qualify as a single reporting unit for purposes of testing goodwill for impairment.

Our only significant identifiable intangible assets, other than goodwill, are rights under franchise agreements with manufacturers, which are recorded at an individual dealership level. The fair market value of our manufacturer franchise rights, which are included in Other Long Term Assets on the accompanying Consolidated Balance Sheets, is determined at the acquisition date through discounting the projected cash flows specific to each franchise. We have

determined that manufacturer franchise rights have an indefinite life as there are no economic or other factors that limit their useful lives and they are expected to generate cash flows indefinitely due to the historically long lives of the manufacturers' brand names. Furthermore, to the extent that any agreements evidencing our manufacturer franchise rights would expire, we expect that we would be able to renew those agreements in the ordinary course of business. Due to the fact that manufacturer franchise rights are specific to

Table of Contents

each dealership, we have determined that the dealership is the reporting unit for purposes of testing franchise rights for impairment.

We do not amortize goodwill and other intangible assets that are deemed to have indefinite lives. We review goodwill and manufacturer franchise rights for impairment annually as of October 1st of each year, or more often if events or circumstances indicate that impairment may have occurred. We are subject to financial statement risk to the extent that manufacturer franchise rights become impaired due to decreases in fair market value of our individual franchises or to the extent that goodwill becomes impaired due to decreases in the fair market value of our automotive retail business.

We completed our annual intangible impairment tests as of October 1, 2011, and no impairment of goodwill or other intangible assets was recognized as a result of such tests.

Debt Issuance Costs

Debt issuance costs are capitalized and included in Other Long-Term Assets in the accompanying Consolidated Balance Sheets. Debt issuance costs are amortized to Other Interest Expense, net and Floor Plan Interest Expense in the accompanying Consolidated Statements of Income through maturity using either the effective interest method or straight line method.

Derivative Instruments and Hedging Activities

We utilize derivative financial instruments to manage our capital structure and interest rate risk. The types of risks hedged are those relating to the variability of cash flows and changes in the fair value of our financial instruments caused by movements in interest rates. We document our risk management strategy and assess hedge effectiveness at the inception and during the term of each hedge. Derivatives are reported at fair value on the accompanying Consolidated Balance Sheets.

The effective portion of the gain or loss on our cash flow hedges is reported as a component of Accumulated Other Comprehensive Loss on the accompanying Consolidated Balance Sheets and reclassified to Swap Interest Expense in the accompanying Consolidated Statements of Income in the same period during which the hedged transaction affects earnings.

Measurements of hedge effectiveness are based on comparisons between the gains or losses of the actual interest rate swaps and the gains or losses of hypothetical interest rate swaps, which have the same critical terms of the defined hedged items. Ineffective portions of these interest rate swaps are reported as a component of interest expense in the accompanying Consolidated Statements of Income.

Insurance

We are self insured for employee medical claims and maintain stop loss insurance for individual claims. We have large deductible insurance programs for workers compensation, property and general liability claims. We maintain and review our claim and loss history to assist in assessing our expected future liability for these claims. We also use professional service providers, such as account administrators and actuaries, to help us accumulate and assess this information.

Revenue Recognition

Revenue from the sale of new and used vehicles (which excludes sales tax) is recognized upon the latest of delivery, passage of title, signing of the sales contract or approval of financing. Revenue from the sale of parts, service and collision repair work (which excludes sales tax) is recognized upon delivery of parts to the customer or at the time vehicle service or repair work is completed, as applicable. Manufacturer incentives and rebates, including manufacturer holdbacks, floor plan interest assistance and certain advertising assistance, are recognized as a reduction of new vehicle cost of sales at the time the related vehicles are sold.

We receive commissions from third-party lending and insurance institutions for arranging customer financing and from the sale of vehicle service contracts, credit life insurance and disability insurance, and other insurance, to customers (collectively "F&I"). We may be charged back ("chargebacks") for F&I commissions in the event a contract is prepaid, defaulted upon or terminated. F&I commissions are recorded at the time a vehicle is sold and a reserve for

future chargebacks is established based on historical chargeback experience and the termination provisions of the applicable contract. F&I commissions, net of estimated chargebacks, are included in Finance and Insurance, net in the accompanying Consolidated Statements of Income.

Internal Profit

Revenues and expenses associated with the internal work performed by our parts and service departments on new and used vehicle inventory are eliminated in consolidation. The gross profit earned by our parts and service departments for internal

Table of Contents

work performed is included as a reduction of Parts and Service Cost of Sales on the accompanying Consolidated Statements of Income. The costs incurred by our new and used departments for work performed by our parts and service departments is included in either New Vehicle Cost of Sales or Used Vehicle Cost of Sales on the accompanying Consolidated Statements of Income, depending on the classification of the vehicle serviced. We maintain an internal profit reserve for internal profit on vehicles that have not been sold.

Share-Based Compensation

We record share-based compensation expense under the fair value method on a straight-line basis over the vesting period, unless the awards are subject to performance conditions, in which case we recognize the expense over the requisite service period of each separate vesting tranche.

Earnings per Common Share

Basic earnings per common share is computed by dividing net income by the weighted-average common shares outstanding during the period. Diluted earnings per common share is computed by dividing net income by the weighted-average common shares and common share equivalents outstanding during the period. For all periods presented, there were no adjustments to the numerator necessary to compute diluted earnings per share. We have issued warrants that, upon exercise, may result in the issuance of between 2.4 million and 4.9 million shares of our common stock at an exercise price of \$44.74 per share. Since the warrants are required to be settled in shares of common stock, the premium received for selling the warrants was recorded as an increase to additional paid-in capital, together with any cash that would be received upon exercise. In addition, our 3% Senior Subordinated Convertible Notes due 2012 (the "3% Convertible Notes") are convertible into shares of our common stock at a current conversion price of \$33.73 per share. The shares issuable upon exercise of these warrants and conversion of our 3% Convertible Notes could potentially dilute basic earnings per share in the future; however, these shares were not included in the computation of diluted earnings per share in any period presented because their inclusion would be anti-dilutive. The maximum number of shares of common stock issuable upon conversion of our 3% Convertible Notes as of December 31, 2011 was 2.2 million shares.

Advertising

We expense costs of advertising as incurred and production costs when the advertising initially takes place, net of certain advertising credits and other discounts. Advertising expense from continuing operations totaled \$26.6 million, \$25.6 million and \$26.3 million for the years ended December 31, 2011, 2010 and 2009, net of earned advertising credits and volume discounts of \$9.6 million, \$10.3million and \$3.3 million, respectively, and is included in Selling, General and Administrative expense in the accompanying Consolidated Statements of Income.

Income Taxes

We use the liability method to account for income taxes. Under this method, deferred tax assets and liabilities are recognized for the expected future tax consequences of differences between the carrying amounts of assets and liabilities and their respective tax basis using currently enacted tax rates. The effect on deferred assets and liabilities of a change in tax rates is recognized in income in the period when the change is enacted. Deferred tax assets are reduced by a valuation allowance when it is more likely than not that some portion or all the deferred tax assets will not be realized.

Discontinued Operations

Certain amounts reflected in the accompanying Consolidated Balance Sheets have been classified as Assets Held for Sale or Liabilities Associated with Assets Held for Sale, with such classification beginning on the date that the assets and associated liabilities were first considered held for sale. When such assets and associated liabilities are subsequently removed from Assets Held for Sale and Liabilities Associated with Assets Held for Sale, we reclassify our prior period balance sheets to reflect the current operating status of such assets and associated liabilities.

We report franchises and ancillary businesses as discontinued operations when it is evident that the operations and cash flows of a franchise or ancillary business being actively marketed for sale will be eliminated from our on-going operations and that we will not have any significant continuing involvement in its operations. We do not classify franchises as discontinued operations if we believe that the cash flows generated by the franchise will be replaced by expanded operations of our remaining franchises within the respective local market area.

Amounts in the accompanying Consolidated Statements of Income for the years ended December 31, 2010 and December 31, 2009 have been reclassified to reflect the results of franchises sold during 2011 as if we had classified those franchises as discontinued operations for all years presented.

Table of Contents

Statements of Cash Flows

Borrowings and repayments of floor plan notes payable to a lender unaffiliated with the manufacturer from which we purchase a particular new vehicle ("Non-Trade"), and all floor plan notes payable relating to pre-owned vehicles (collectively

referred to as "Floor Plan Notes Payable - Non-Trade"), are classified as financing activities on the accompanying Consolidated Statements of Cash Flows, with borrowings reflected separately from repayments. The net change in floor plan notes payable to a lender affiliated with the manufacturer from which we purchase a particular new vehicle (collectively referred to as "Floor Plan Notes Payable - Trade") is classified as an operating activity on the accompanying Consolidated Statements of Cash Flows. Borrowings of floor plan notes payable associated with inventory acquired in connection with all acquisitions are classified as a financing activity. Cash flows related to floor plan notes payable included in operating activities differ from cash flows related to floor plan notes payable included in financing activities only to the extent that the former are payable to a lender affiliated with the manufacturer from which we purchased the related inventory, while the latter are payable to a lender not affiliated with the manufacturer from which we purchased the related inventory. Repayments of Floor Plan Notes Payable - Trade associated with divestitures are classified as an operating activity. Repayments of Floor Plan Notes Payable - Non-Trade associated with divestitures are classified as a financing activity.

Loaner vehicles account for a significant portion of Other Current Assets in the accompanying Consolidated Statements of Cash Flows. We acquire loaner vehicles either with available cash or through borrowings from manufacturer affiliated lenders. Loaner vehicles are initially used by our service department for only a short period of time (typically six to twelve months) before we seek to sell them. Therefore we classify the acquisition of loaner vehicles and the related borrowings and repayments as operating activities in the accompanying Consolidated Statements of Cash Flows. The cash outflow to acquire loaner vehicles is presented in Other Current Assets in the accompanying Consolidated Statements of Cash Flows. Borrowings and repayments of loaner vehicle notes payable are presented in Accounts Payable and Accrued Liabilities in the accompanying Consolidated Statements of Cash Flows. When loaner vehicles are taken out of loaner status they are transferred to used vehicle inventory, which is reflected as a non-cash transfer in the accompanying Consolidated Statements of Cash Flows. The cash inflow from the sale of loaner vehicles is reflected in Inventories on the accompanying Consolidated Statements of Cash Flows.

Business and Credit Concentration Risk

Financial instruments, which potentially subject us to concentration of credit risk, consist principally of cash deposits. We maintain cash balances at financial institutions with strong credit ratings. Generally, amounts invested with financial institutions are in excess of FDIC insurance limits.

We have substantial debt service obligations. As of December 31, 2011, we had total debt of \$459.0 million, excluding floor plan notes payable and the unamortized discount on our 3% Convertible Notes on our accompanying Consolidated Balance Sheet. In addition, we and our subsidiaries have the ability to obtain additional debt from time to time to finance acquisitions, real property purchases, capital expenditures or for other purposes, which borrowings are subject to the restrictions contained in the credit agreement governing our senior secured credit facilities and the indentures governing our 8.375% Senior Subordinated Notes due 2020 (the "8.375% Notes") and our 7.625% Senior Subordinated Notes due 2017 (the "7.625% Notes"). We will have substantial debt service obligations, consisting of required cash payments of principal and interest, for the foreseeable future.

We are subject to operating and financial restrictions and covenants in certain of our leases and in our debt instruments, including the credit agreement governing our senior secured credit facilities, the indentures under our 8.375% Notes and our 7.625% Notes, and the mortgage agreements and related mortgage guarantees held with Wachovia Bank, National Association and Wachovia Financial Services, Inc. and certain of our other mortgage obligations. These agreements contain restrictions on, among other things, our ability to incur additional indebtedness, to create liens or other encumbrances, and to make certain payments (including dividends and repurchases of our shares and investments). These agreements may also require us to maintain compliance with certain financial and other ratios. Our failure to comply with any of these covenants in the future would constitute a default under the relevant agreement, which would, depending on the relevant agreement, (i) entitle the creditors under such agreement

to terminate our ability to borrow under the relevant agreement and accelerate our obligations to repay outstanding borrowings; (ii) require us to apply our available cash to repay these borrowings; (iii) entitle the creditors under such agreement to foreclose on the property securing the relevant indebtedness; and/or (iv) prevent us from making debt service payments on certain of our other indebtedness, any of which would have a material adverse effect on our business, financial condition or results of operations. In many cases, a default under one of our debt or mortgage, agreements could trigger cross default provisions in one or more of our other debt or mortgages. A number of our dealerships are located on properties that we lease. Each of the leases governing such properties has

Table of Contents

certain covenants with which we must comply. If we fail to comply with the covenants under our leases, the respective landlords could terminate the leases and seek damages from us.

Concentrations of credit risk with respect to contracts-in-transit and accounts receivable are limited primarily to automotive manufacturers and financial institutions. Credit risk arising from receivables from commercial customers is minimal due to the large number of customers comprising our customer base.

A significant portion of our new vehicle sales are derived from a limited number of automotive manufacturers. For the year ended December 31, 2011, brands representing 5% or more of our revenues from new vehicle sales were as follows:

Brand	% of Total New Vehicle Revenues	
Honda	20	%
Nissan	13	%
Toyota	10	%
BMW	10	%
Mercedes-Benz	7	%
Ford	9	%
Lexus	5	%
Acura	5	%

No other brand accounted for more than 5% of our total new vehicle revenue for the year ended December 31, 2011.

Segment Reporting

We have determined that as a result of how we internally view our business, regularly review our financial data and operating metrics and allocate resources that we operate in one segment, automotive retail. Our Chief Operating Decision Maker is our Chief Executive Officer who manages the business, regularly reviews financial information and allocates resources on a consolidated basis. Our dealerships are components of our automotive retail segment and, therefore, are not segments themselves.

3. ACQUISITIONS

Results of acquired dealerships are included in our accompanying Consolidated Statements of Income commencing on the date of acquisition.

We did not acquire any dealerships during the year ended December 31, 2011. In the fourth quarter of 2010, we acquired nine franchises (four dealership locations) for an aggregate purchase price of \$77.5 million. We financed these acquisitions with (i) \$46.6 million of cash, (ii) \$13.9 million of floor plan borrowings for the purchase of the related new vehicle inventory and (iii) \$17.0 million of a seller financed mortgage note payable for the purchase of land and buildings associated with five of those franchises (three dealership locations).

Two of the franchises acquired thereafter became part of our heavy truck business. In December 2010, we entered into a contract to sell our heavy truck business. As a result the assets and liabilities associated with these franchises were classified as Assets Held for Sale and Liabilities Associated with Assets Held for Sale as of December 31, 2010.

Below is the allocation of purchase price for acquisitions completed during 2010. The \$39.0 million of goodwill and manufacturer franchise rights will be deductible for federal and state income taxes ratably over a fifteen year period.

	December 31, 2010 (In millions)
Inventory	\$17.4
Property and equipment	21.1
Goodwill	20.5
Manufacturer Franchise rights	18.5

Total purchase price

\$77.5

70

Table of Contents

During the year ended December 31, 2011, we were awarded one Fisker franchise, which was added to our Plaza dealership locations in St. Louis, Missouri. We did not pay any amounts in connection with being awarded this franchise.

During the year ended December 31, 2010, we were awarded two Sprinter franchises, which were added to our Mercedes-Benz locations in St. Louis, Missouri and Tampa, Florida. We did not pay any amounts in connection with being awarded these two franchises.

The pro forma consolidated statements of operations as if the results of these acquisitions had been included in our consolidated results for the entire year ended December 31, 2010 would not have been materially different from our reported consolidated statements of operations for these periods.

4. ACCOUNTS RECEIVABLE

We have agreements to sell certain of our trade receivables, without recourse as to credit risk, in an amount not to exceed \$25.0 million annually. The receivables are sold at a discount, which is included in Selling, General and Administrative expense in the accompanying Consolidated Statements of Income. The discounts totaled \$0.6 million for the years ended December 31, 2011, 2010 and 2009, respectively. During the years ended December 31, 2011, 2010 and 2009, \$22.6 million, \$23.4 million and \$22.5 million of receivables, respectively, were sold under these agreements and were reflected as reductions of trade accounts receivable.

5. INVENTORIES

Inventories consist of the following:

	As of December 31,	
	2011	2010
	(In millions)	
New vehicles	\$400.0	\$436.1
Used vehicles	82.0	74.8
Parts and accessories	37.5	36.5
Total inventories	\$519.5	\$547.4

The lower of cost or market reserves reduced total inventory cost by \$5.2 million and \$4.6 million as of December 31, 2011 and December 31, 2010, respectively. In addition to the inventories shown above, we had \$31.3 million of inventory as of December 31, 2010, classified as Assets Held for Sale on the accompanying Consolidated Balance Sheets as they are associated with franchises held for sale. As of December 31, 2011 and December 31, 2010, certain automobile manufacturer incentives reduced new vehicle inventory cost by \$4.9 million and \$5.1 million, respectively, and reduced new vehicle cost of sales from continuing operations for the years ended December 31, 2011, 2010 and 2009 by \$20.7 million, \$19.1 million and \$20.1 million, respectively.

6. ASSETS AND LIABILITIES HELD FOR SALE

Assets and liabilities classified as held for sale include (i) assets and liabilities associated with discontinued operations held for sale at each balance sheet date and (ii) real estate not currently used in our operations that we are actively marketing to sell and the related mortgage notes payable, if applicable.

During the year ended December 31, 2011, we sold (i) our heavy truck business in Atlanta, Georgia (as discussed further below), (ii) two franchises (two dealership locations) and (iii) one additional ancillary business. There were no assets and liabilities associated with pending dispositions as of December 31, 2011. Assets and liabilities associated with pending dispositions as of December 31, 2010 totaled \$48.0 million and \$32.2 million, respectively.

Real estate not currently used in our operations that we are actively marketing to sell totaled \$2.8 million and \$12.7 million as of December 31, 2011 and December 31, 2010, respectively. During the year ended December 31, 2011, we sold \$8.8 million of real estate that was not currently used in our operations and recognized impairments in value

totaling \$1.1 million on the remaining real estate not currently used in our operations. There were no liabilities associated with our real estate assets held for sale as of December 31, 2011 or December 31, 2010.

During the year ended December 31, 2011, we sold our heavy truck business in Atlanta, Georgia, which consisted of ten

71

Table of Contents

franchises (three dealership locations) and one collision repair center, for a total net pre-tax gain of approximately \$25.7 million, which is included in Discontinued Operations, net on our Consolidated Statement of Income. The assets associated with this divestiture consisted of (in millions):

Inventories	\$30.7
Property and equipment, net	12.7
Goodwill	1.6
Total assets	\$45.0

Proceeds from the sale of these assets were used, in part, to repay \$33.7 million of floor plan notes payable associated with new vehicle inventory and \$5.1 million of mortgage notes payable associated with certain property and equipment included in the sale.

In addition, during the first quarter of 2011, we removed certain assets held for sale and liabilities associated with assets held for sale related to one franchise (one dealership location) as a result of our decision to operate this store instead of market it for sale. As a result, we reclassified the assets and liabilities associated with this franchise from Assets Held for Sale and Liabilities Associated with Assets Held for Sale to (i) Inventory, (ii) Property and Equipment, net and (iii) Floor Plan Notes Payable - Non-Trade on the Consolidated Balance Sheet as of December 31, 2010.

A summary of assets held for sale and liabilities associated with assets held for sale is as follows:

	As of December 31,	
	2011	2010
	(In millions)	
Assets:		
Inventories	\$—	\$31.3
Property and equipment, net	2.8	25.6
Goodwill	—	1.6
Other	—	2.2
Total assets	2.8	60.7
Liabilities:		
Floor plan notes payable	—	27.0
Mortgage notes payable	—	5.2
Total liabilities	—	32.2
Net assets held for sale	\$2.8	\$28.5

7. OTHER CURRENT ASSETS

Other current assets consist of the following:

	As of December 31,	
	2011	2010
	(In millions)	
Service loaner vehicles	\$43.6	\$41.2
Cash surrender value of corporate-owned life insurance policies	10.7	—
Prepaid taxes	3.4	9.4
Prepaid rent	0.5	0.7
Other	5.1	5.3
Other current assets	\$63.3	\$56.6

Table of Contents

8. PROPERTY AND EQUIPMENT, NET

Property and equipment, net consist of the following:

	As of December 31,	
	2011	2010
	(In millions)	
Land	\$208.0	\$171.9
Buildings and leasehold improvements	343.4	316.3
Machinery and equipment	65.8	66.1
Furniture and fixtures	29.1	28.9
Company vehicles	7.8	7.0
Total	654.1	590.2
Less—Accumulated depreciation	(143.3)	(131.3)
Property and equipment, net	\$510.8	\$458.9

During the years ended December 31, 2011, 2010 and 2009, we capitalized \$0.4 million, \$0.5 million and \$0.4 million, respectively, of interest in connection with various capital projects to upgrade or remodel our facilities. Depreciation and capital lease amortization expense from continuing operations was \$22.7 million, \$20.9 million and \$21.9 million for the years ended December 31, 2011, 2010 and 2009, respectively.

We have multiple mortgage agreements with various lenders. For a detailed description of our mortgage agreements, refer to our “Long-Term Debt” footnote below. As of December 31, 2011 and 2010, we had total mortgage notes payable outstanding of \$96.8 million and \$178.0 million, respectively, of which \$5.2 million was classified as Liabilities Held for Sale on the accompanying Consolidated Balance Sheet as of December 31, 2010. These obligations were collateralized by the related real estate with a carrying value of \$150.9 million and \$276.4 million as of December 31, 2011 and 2010, respectively.

Due to events and circumstances specific to each reporting period, we performed certain interim period impairment tests during 2011, 2010 and 2009. We compared the carrying value of our assets held for sale to estimates of fair values determined with the assistance of third-party desktop appraisals and real estate brokers. The impairment tests indicated an impairment of certain of our property and equipment. As a result, we recognized impairment expenses of \$1.1 million, \$5.1 million and \$5.5 million during 2011, 2010 and 2009, respectively. Impairment expenses for 2010 and 2009 included \$2.1 million and \$4.8 million, respectively, included in Discontinued Operations, net on our Consolidated Statements of Income.

9. GOODWILL

Our acquisitions have resulted in the recording of goodwill, which is an asset representing operational synergies and future economic benefits arising from other assets acquired in a business combination that are not individually identified and separately recognized. The changes in the carrying amount of goodwill for the years ended December 31, 2011 and 2010 are as follows:

	Gross	Less:	
	Carrying	Accumulated	Net
	Amount	Impairment	
	(In millions)		
Balance as of December 31, 2009	\$537.7	\$(537.7)	\$—
Acquisitions	20.5	—	20.5
Reclassified to assets held for sale	(1.6)	—	(1.6)
Balance as of December 31, 2010	556.6	(537.7)	18.9
Divestitures	(0.2)	—	(0.2)
Balance as of December 31, 2011	\$556.4	\$(537.7)	\$18.7

Table of Contents

10. OTHER LONG-TERM ASSETS

Other Long-Term Assets consist of the following:

	As of December 31,	
	2011	2010
	(In millions)	
Manufacturer franchise rights	\$33.4	\$36.3
Deferred financing costs	15.1	12.9
Cash surrender value of corporate-owned life insurance policies	2.3	13.6
Construction period rent	2.8	3.4
Other	2.4	4.0
Total other long-term assets	\$56.0	\$70.2

11. FLOOR PLAN NOTES PAYABLE

On October 14, 2011, we and certain of our subsidiaries entered into a credit agreement with Bank of America, N.A. ("Bank of America"), as administrative agent, and the lenders party thereto (the "Credit Agreement"). The Credit Agreement provides for our senior secured credit facilities, consisting of (i) a \$175.0 million revolving credit facility with a \$50.0 million sublimit for letters of credit (discussed further below under our "Long Term Debt" footnote), (ii) a \$625.0 million new vehicle floor plan facility, and (iii) a \$100.0 million used vehicle revolving floor plan facility, in each case subject to limitations on borrowing availability as set out in the Credit Agreement. Subject to the compliance with certain conditions, the Credit Agreement provides that we and our dealership subsidiaries that are borrowers under the senior secured credit facilities (collectively, the "Borrowers") have the ability, at their option and subject to the receipt of additional commitments from existing or new lenders, to increase the size of the new vehicle floor plan facility or the used vehicle floor plan facility by up to \$225.0 million in the aggregate without lender consent and also subject to the compliance with certain conditions. The senior secured credit facilities mature, and all amounts outstanding thereunder will be due and payable, on October 14, 2016.

In connection with our entry into the Credit Agreement, we terminated our prior \$50.0 million used vehicle floor plan facility, which did not have any material amounts outstanding as of the termination thereof. We used borrowings under our new vehicle floor plan facility to repay amounts outstanding under, and terminate, substantially all of our prior floor plan facilities, other than the facilities with Ford relating to the financing of new Ford and Lincoln vehicles and with certain other manufacturers for loaner vehicles, which remain in place.

Borrowings under the new vehicle floor plan facility bear interest, at our option, based on LIBOR plus 1.5% or the Base Rate plus 0.50%. Borrowings under the used vehicle revolving floor plan facility bear interest, at our option, based on LIBOR plus 1.75% or the Base Rate plus 0.75%.

In addition to the payment of interest on borrowings outstanding under the senior secured credit facilities, the Borrowers are required to pay a commitment fee on the total commitments under the senior secured credit facilities. The fees for commitments under the new vehicle revolving floor plan facility and the used vehicle revolving floor plan facility are 0.20% per annum and 0.25% per annum, respectively. The fees are payable quarterly, and began on December 5, 2011.

We consider floor plan notes payable to a party that is affiliated with the entity from which we purchase our new vehicle inventory "Floor plan notes payable—trade" and all other floor plan notes payable "Floor plan notes payable—non-trade." Upon our entrance into the Credit Agreement, the majority of our floor plan notes are payable to parties unaffiliated with the entities from which we purchase our new vehicle inventory, with the exception of floor plan notes payable relating to the financing of new Ford and Lincoln vehicles, and certain loaner vehicles. As of December 31, 2011, we had \$65.5 million of floor plan notes payable—trade and \$368.5 million of floor plan notes payable—non-trade outstanding.

As of December 31, 2011 and 2010, we had a total of \$434.0 million and \$451.6 million of floor plan notes payable outstanding, respectively, including \$27.0 million classified as Liabilities Associated with Assets Held for Sale as of December 31, 2010.

In conjunction with our entrance into the new vehicle floor plan facility described above, we have established an account with Bank of America that allows us to transfer cash to an account as an offset to floor plan notes payable (a “floor plan offset account”). These transfers reduce the amount of outstanding new vehicle floor plan notes payable that would otherwise accrue interest, while retaining the ability to transfer amounts from the floor plan offset account into our operating cash accounts

Table of Contents

within one to two days. As of December 31, 2011, we had \$15.5 million in this floor plan offset account.

The representations and covenants contained in the Credit Agreement are customary for financing transactions of this nature including, among others, a requirement to comply with a minimum consolidated current ratio and consolidated fixed charge coverage ratio (each as defined in the Credit Agreement) and a maximum consolidated total lease adjusted leverage ratio, in each case as set out in the Credit Agreement. In addition, certain other covenants could restrict the Company's ability to incur additional debt, pay dividends or acquire or dispose of assets. See the "Covenants" section below under our "Long Term Debt" footnote.

The Credit Agreement also provides for events of default that are customary for financing transactions of this nature, including cross-defaults to other material indebtedness. In certain instances, an event of default under either the revolving credit facility or the used vehicle revolving floor plan facility could be, or result in, an event of default under the new vehicle revolving floor plan facility, and vice versa. Upon the occurrence of an event of default, the Company could be required to immediately repay all amounts outstanding under the applicable facility.

The senior secured credit facilities are guaranteed by each existing, and will be guaranteed by each future, direct and indirect domestic subsidiary of the Company, other than, at our option, any immaterial subsidiary. The new vehicle revolving floor plan facility and the used vehicle revolving floor plan facility are each also guaranteed by the Company. The obligations under each of the revolving credit facility and the used vehicle revolving floor plan facility are collateralized by liens on substantially all of the present and future assets, other than real property, of the Company and the guarantors. The obligations under the new vehicle revolving floor plan facility are collateralized by liens on substantially all of the present and future assets, other than real property, of the borrowers under the new vehicle revolving floor plan facility.

12. ACCOUNTS PAYABLE AND ACCRUED LIABILITIES

Accounts payable and accrued liabilities consist of the following:

	As of December 31,	
	2011	2010
	(In millions)	
Accounts payable	\$45.6	\$43.9
Loaner vehicle notes payable	39.6	37.6
Accrued compensation	18.5	20.8
Taxes payable (non-income tax)	15.8	13.8
Accrued insurance	14.8	13.8
Accrued finance and insurance chargebacks	8.7	7.6
Deferred compensation liability	7.7	—
Accrued interest	6.9	7.4
Other	25.2	25.2
Accounts payable and accrued liabilities	\$182.8	\$170.1

Table of Contents

13. LONG-TERM DEBT

Long-term debt consists of the following:

	As of December 31,	
	2011	2010
	(In millions)	
8.375% Senior Subordinated Notes due 2020	\$200.0	\$200.0
7.625% Senior Subordinated Notes due 2017	143.2	143.2
3% Senior Subordinated Convertible Notes due 2012 (\$15.1 million and \$29.5 million face value, respectively, net of discounts of \$0.4 million and \$1.7 million, respectively)	14.7	27.8
Mortgage notes payable bearing interest at fixed and variable rates (the weighted average interest rates were 4.6% and 3.6% for the years ended December 31, 2011 and 2010, respectively)	96.8	172.8
Capital lease obligations	3.9	—
	458.6	543.8
Less: current portion	(19.5) (8.9
Long-term debt	\$439.1	\$534.9

The aggregate maturities of long-term debt as of December 31, 2011, are as follows (in millions) (a):

2012	\$19.5
2013	41.4
2014	2.1
2015	18.0
2016	0.9
Thereafter	377.1
	\$459.0

(a) Maturities do not include the \$0.4 million discount which reduces the book value of our 3% Convertible Notes.

Revolving Credit Facility

As discussed above under our "Floor Plan Notes Payable" footnote, the Credit Agreement includes a \$175.0 million revolving credit facility with a \$50.0 million sublimit for letters of credit. Under the revolving credit facility, subject to a borrowing base, we may (i) borrow up to \$175.0 million, which amount may be expanded to up to \$225.0 million in total credit availability upon satisfaction of certain conditions and (ii) request Bank of America to issue letters of credit on our behalf up to \$50.0 million. Availability under the revolving credit facility is, in part, a function of our borrowing base. Availability is reduced on a dollar-for-dollar basis by the aggregate face amount of any outstanding letters of credit. Based on the borrowing base calculation and the \$15.7 million of outstanding letters of credit as of December 31, 2011, our available borrowings were limited to \$150.2 million as of December 31, 2011. As of December 31, 2011, we did not have any borrowings outstanding under the revolving credit facility. Proceeds from borrowings from time to time under the revolving credit facility may be used for, among other things, acquisitions, working capital and capital expenditures.

In connection with our entry into the Credit Agreement, we terminated our prior \$150.0 million revolving credit facility, which did not have any material amounts outstanding as of the termination thereof.

Borrowings under the revolving credit facility bear interest, at our option, based on LIBOR plus 1.75% to 2.75% or the Base Rate plus 0.75% to 1.75%, in each case based on our total lease adjusted leverage ratio. The Base Rate is the highest of the (i) Bank of America, N.A. prime rate, (ii) Federal Funds rate plus 0.50%, and (iii) one month LIBOR plus 1.0%.

In addition to the payment of interest on borrowings outstanding under the senior secured credit facilities, the Borrowers are required to pay a commitment fee on the total commitments under the senior secured credit facilities. The fee for commitments under the revolving credit facility ranges from 0.30% to 0.50% per annum, based on the

Company's total lease adjusted leverage ratio. The fees are payable quarterly, and began on December 5, 2011.

76

Table of Contents

The representations and covenants contained in the Credit Agreement are customary for financing transactions of this nature including, among others, a requirement to comply with a minimum consolidated current ratio and consolidated fixed charge coverage ratio (each as defined in the Credit Agreement) and a maximum consolidated total lease adjusted leverage ratio, in each case as set out in the Credit Agreement. In addition, certain other covenants could restrict the Company's ability to incur additional debt, pay dividends or acquire or dispose of assets. See "Covenants" below.

8.375% Senior Subordinated Notes due 2020

We had \$200.0 million in aggregate principal amount of our 8.375% Notes outstanding as of December 31, 2011. Our 8.375% Notes are fully and unconditionally guaranteed, on a joint-and-several basis, by all of our current wholly-owned subsidiaries and will be so guaranteed by all of our future domestic subsidiaries that have outstanding, incur or guarantee any other indebtedness. The terms of our 8.375% Notes, in certain circumstances, restrict our ability to, among other things, incur additional indebtedness, pay dividends, repurchase our common stock and merge or sell all or substantially all our assets.

7.625% Senior Subordinated Notes due 2017

We had \$143.2 million in aggregate principal amount of our 7.625% Notes outstanding as of December 31, 2011. Our 7.625% Notes are fully and unconditionally guaranteed, on a joint-and-several basis, by all of our current wholly-owned subsidiaries and will be so guaranteed by all of our future domestic subsidiaries that have outstanding, incur or guarantee any other indebtedness. The terms of our 7.625% Notes, in certain circumstances, restrict our ability to, among other things, incur additional indebtedness, pay dividends, repurchase our common stock and merge or sell all or substantially all our assets.

3% Senior Subordinated Convertible Notes due 2012

We had \$15.1 million in aggregate principal amount of our 3% Convertible Notes outstanding as of December 31, 2011. If the 3% Convertible Notes are converted, we will pay cash for the principal amount of each Note and, if applicable, shares of our common stock. As of December 31, 2011, the conversion rate of our 3% Convertible Notes was equivalent to a per share stock price of \$33.73. The conversion rate is subject to adjustment in some events, but is not adjusted for accrued interest. In addition to the 3% coupon interest expense that we recognize on any outstanding 3% Convertible Notes, we also recognize non-cash interest expense relative to the amortization of the discount associated with our 3% Convertible Notes through Convertible Debt Discount Amortization on our Consolidated Statements of Income. Including the impact of both the coupon interest rate and the non-cash amortization of the associated discount, our effective interest rate on our 3% Convertible Notes was approximately 6% for the years ended December 31, 2011, 2010 and 2009.

Our 3% Convertible Notes are fully and unconditionally guaranteed, on a joint-and-several basis, by all of our current wholly-owned subsidiaries. We are a holding company that has no material independent assets or operations. Any subsidiary other than the subsidiary guarantors are immaterial.

In connection with the sale of our 3% Convertible Notes in March 2007, we entered into convertible note hedge and warrant transactions. The convertible note hedge and warrant transactions are separate contracts and are not part of the terms of the 3% Convertible Notes and, as such, they do not affect the holders' rights under the 3% Convertible Notes. The convertible hedge and warrant transactions have the effect of increasing the conversion price of the 3% Convertible Notes to \$44.74 per share. The convertible note hedge and warrant transactions are expected to offset the potential dilution upon conversion of the 3% Convertible Notes in the event that the market value per share of our common stock at the time of conversion is between \$33.73 and \$44.74.

Mortgage Notes Payable

We have a master loan agreement with Wells Fargo Bank, National Association, successor by merger to Wachovia Bank, National Association, a national banking association, and Wachovia Financial Services, Inc., a North Carolina corporation (together referred to as "Wachovia", and the master loan agreement being referred to as the "Wachovia Master Loan Agreement"). Pursuant to the terms of the Wachovia Master Loan Agreement, Wachovia has extended credit to certain of our subsidiaries guaranteed by us through a series of related but separate loans (collectively, the "Wachovia Mortgages") for certain properties located in Florida, North Carolina, Virginia, Georgia, Arkansas and Texas. Each of the Wachovia Mortgages is secured by the related underlying property and bears interest at 1-month

LIBOR plus 2.95%. We are required to make monthly principal payments based on a straight-line twenty year amortization schedule, with balloon repayment of all outstanding principal amounts due in June 2013.

The Wachovia Master Loan Agreement also contains customary representations and warranties and the guarantees under such agreements contain negative covenants, including, among other things, covenants not to, with permitted exceptions, (i) incur any additional debt; (ii) create any additional liens on the Property (as defined in the Wachovia Master Loan Agreement); and (iii) enter into any sale-leaseback transactions in connection with the underlying properties.

Below is a summary of our outstanding mortgage notes payable, the carrying values of the related collateralized real estate, and years of maturity as of December 31, 2011 and 2010:

Table of Contents

Mortgage Agreement	As of December 31, 2011			As of December 31, 2010		
	Aggregate Principal Outstanding	Carrying Value of Collateralized Related Real Estate	Maturity Dates	Aggregate Principal Outstanding	Carrying Value of Collateralized Related Real Estate	Maturity Dates
Wachovia Master Loan Agreement (a)	\$41.8	\$75.3	2013	\$122.2	\$197.5	2013
Wells Fargo Mortgage(s)	21.0	32.7	2015	22.3	34.9	2011
Other mortgage debt	34.0	42.9	2018-2020	33.5	44.0	2018-2020
Total	\$96.8	\$150.9		\$178.0	\$276.4	

Aggregate principal outstanding and carrying value of collateralized real estate includes \$5.2 million and \$7.8 (a) million, respectively, classified as Liabilities Associated with Assets Held for Sale and Assets Held for Sale, respectively, as of December 31, 2010.

Subordinated Note Repurchases

As of December 31, 2011, we had \$358.3 million in aggregate principal amount of various series of our subordinated notes outstanding, including \$200.0 million of 8.375% Notes, \$143.2 million of 7.625% Notes and \$15.1 million of 3% Convertible Notes. During 2011, we paid \$14.3 million to repurchase \$14.4 million of our 3% Convertible Notes. Our board of directors has authorized us, from time to time, to repurchase various of our senior subordinated notes in open market purchases or privately negotiated transactions. The decision to repurchase our senior subordinated notes is dependent upon prevailing market conditions, our liquidity position, applicable limitations in any agreements to which we are a party, and other factors. Currently, the Credit Agreement allows us to purchase at least \$25.0 million of our debt securities per calendar year, subject to increase based on availability under senior secured credit facilities. In February 2011, in accordance with the terms of our prior credit agreement, our board of directors authorized us to use up to \$30.0 million of cash to repurchase outstanding 3% Convertible Notes, 7.625% Notes or 8.375% Notes, which authorization expires February 28, 2012. This authority supersedes and replaces the previous authorization under which we had repurchased \$25.2 million of 3% Convertible Notes. During 2011, we repurchased \$14.4 million of 3% Convertible Notes in private transactions, which reduced our authorization to repurchase our senior subordinated notes to \$15.6 million as of December 31, 2011.

Stock Repurchase and Dividend Restrictions

Pursuant to the indentures governing our 8.375% Notes and our 7.625% Notes, and the agreements governing our senior secured credit facilities, our ability to repurchase shares of our common stock and pay cash dividends is limited. In accordance with such calculations, our ability to repurchase shares of our common stock and pay cash dividends was limited to \$45.6 million under these agreements as of December 31, 2011, with an additional \$10.0 million available to repurchase common stock only.

Covenants

We are subject to a number of covenants in our various debt and lease agreements, including those described below. We were in compliance with all of our covenants throughout 2011. Failure to comply with any of our debt covenants would constitute a default under the relevant debt agreements, which would entitle the lenders under such agreements to terminate our ability to borrow under the relevant agreements and accelerate our obligations to repay outstanding borrowings, if any, unless compliance with the covenants is waived. In many cases, defaults under one of our agreements could trigger cross default provisions in our other agreements. If we are unable to remain in compliance with our financial or other covenants, we would be required to seek waivers or modifications of our covenants from our lenders, or we would need to raise debt and/or equity financing or sell assets to generate proceeds sufficient to repay such debt. We cannot give any assurance that we would be able to successfully take any of these actions on terms, or at times, that may be necessary or desirable.

The Credit Agreement contains certain representations and covenants that we must comply with. The representations and covenants contained in the Credit Agreement are customary for financing transactions of this nature including, among others, a requirement to comply with a minimum consolidated current ratio and consolidated fixed charge coverage ratio (each as defined in the Credit Agreement) and a maximum consolidated total lease adjusted leverage ratio, in each case as set out in the Credit Agreement. In addition, certain other covenants could restrict our ability to incur additional debt, pay dividends or

78

Table of Contents

acquire or dispose of assets.

The Credit Agreement also provides for events of default that are customary for financing transactions of this nature, including cross-defaults to other material indebtedness. In certain instances, an event of default under either the revolving credit facility or the used vehicle revolving floor plan facility could be, or result in, an event of default under the new vehicle floor plan facility, and vice versa. Upon the occurrence of an event of default, we could be required to immediately repay all amounts outstanding under the applicable facility.

Our guarantees under the Wachovia Master Loan Agreement also require compliance with certain financial covenants, including a consolidated current ratio, consolidated fixed charge coverage ratio and an adjusted net worth calculation. The Wachovia Master Loan Agreement currently restricts our ability to incur new indebtedness from real estate loans to an aggregate of \$29.0 million. At our option and with 30 days' written notice, the indebtedness limitation may be removed in conjunction with the reinstatement of our compliance with a total leverage ratio.

Certain of our lease agreements also require compliance with various financial covenants and incorporate by reference the

financial covenants set forth in the Credit Agreement. A breach of any of these covenants could immediately give rise to certain landlord remedies under our various lease agreements, the most severe of which include the following: (a) termination of the applicable lease and/or other leases with the same or an affiliated landlord under a cross-default provision, (b) eviction from the premises; and (c) the landlord would have a claim for any or all of the following: (i) damages suffered by landlord by reason of the default, equal to rent and other amounts payable by tenant under the lease prior to the default plus other fees and costs incurred by landlord; and (ii) additional damages, either payable monthly in an amount equal to the rent due under the lease less the amount of rent, if any, received by the landlord from a substitute tenant, or payable in a lump sum equal to the present value of the sum of the amount by which all remaining sums due under the lease exceeds the fair market rental value of the premises for the same period, plus landlord's expense and value of all vacancy periods projected by landlord to be incurred in connection with reletting the premises.

14. FINANCIAL INSTRUMENTS AND FAIR VALUE

Financial instruments consist primarily of cash, contracts-in-transit, accounts receivable, notes receivable, cash surrender value of corporate-owned life insurance policies, accounts payable, floor plan notes payable, long-term debt and interest rate swap agreements. The carrying values of our financial instruments, with the exception of long-term debt, approximate fair value due either to their short-term nature or existence of variable interest rates, which approximate market rates. The fair market value of our long-term debt is based on reported market prices. A summary of the carrying values and fair values of our 8.375% Notes, our 7.625% Notes and 3% Convertible Notes is as follows:

	As of December 31,	
	2011	2010
	(In millions)	
Carrying Value:		
8.375% Senior Subordinated Notes due 2020	\$200.0	\$200.0
7.625% Senior Subordinated Notes due 2017	143.2	143.2
3% Senior Subordinated Convertible Notes due 2012 (\$15.1 million and \$29.5 million face value, respectively, net of discounts of \$0.4 million and \$1.7 million, respectively)	14.7	27.8
Total carrying value	\$357.9	\$371.0
Fair Value:		
8.375% Senior Subordinated Notes due 2020	\$205.0	\$205.8
7.625% Senior Subordinated Notes due 2017	141.8	144.1
3% Senior Subordinated Convertible Notes due 2012	14.6	29.0
Total fair value	\$361.4	\$378.9

We have an interest rate swap agreement which had a notional principal amount of \$21.0 million as of December 31, 2011. This swap is designed to provide a hedge against changes in variable interest rate cash flows through maturity in October 2015. The notional value of this swap was reduced through July 2011, when the notional principal amount increased to \$21.5 million, and then began reducing over the remaining term to \$16.1 million at maturity. This interest rate swap qualifies for cash flow hedge accounting treatment and does not, and will not, contain any ineffectiveness. In November 2011, we chose to terminate an interest rate swap, which resulted in a cash payment of \$7.2 million, which equaled the fair market value of the swap agreement at the point of termination. Included in Accumulated Other

Table of Contents

Comprehensive Loss on our Consolidated Balance Sheet as of December 31, 2011, was \$6.5 million (\$4.0 million, net of tax) of unrecognized amortization related to our terminated cash flow swap, which is being amortized through May 2013 as a component of Swap Interest Expense on the accompanying Consolidated Statements of Income. The terminated swap liability is being amortized as a result of the probability of the original hedged item (interest payments) continuing to occur. Amortization of this terminated cash flow swap totaled \$0.6 million for the year ended December 31, 2011. Amortization of this terminated cash flow swap will total approximately \$4.6 million for the year ended December 31, 2012.

In June 2011, one of our interest rate swap agreements matured. This swap had been designed to provide a hedge against changes in variable rate cash flows, and had qualified for cash flow hedge accounting treatment. The maturity of this swap did not have a material impact on our Consolidated Financial Statements.

Information about the effect of derivative instruments on the accompanying Consolidated Statements of Income (in millions):

For the Year Ended December 31,	Derivative in Cash Flow Hedging Relationships	Results Recognized in AOCI (Effective Portion)	Location of Results Reclassified from AOCI to Earnings	Amount Reclassified out of AOCI to Earnings—Active Swaps	Amount Reclassified from AOCI to Earnings—Terminated Swaps	Ineffective Results Recognized in Earnings	Location of Ineffective Results
2011	Interest rate swaps	\$(3.1)	Swap interest expense	\$ (4.1)	\$ (0.3)	\$—	N/A
2010	Interest rate swaps	\$(5.9)	Swap interest expense	\$ (5.3)	\$ (0.3)	\$—	N/A
2009	Interest rate swaps	\$(5.6)	Swap interest expense	\$ (5.1)	\$ (0.4)	\$—	N/A

On the basis of yield curve conditions as of December 31, 2011, we anticipate that the amount expected to be reclassified out of AOCI into earnings in the next 12 calendar months will be a loss of \$5.0 million.

Fair value estimates reflect a credit adjustment to the discount rate applied to all expected cash flows under the swaps.

Other than that assumption, all other inputs reflect level 2 inputs.

Market Risk Disclosures as of December 31, 2011:

Instruments entered into for trading purposes—None

Instruments entered into for hedging purposes (in millions)—

Type of Derivative	Notional Size	Underlying Rate	Expiration	Fair Value
Interest Rate Swap*	\$21.0	1 month LIBOR	2013 - 2015	\$(0.5)

* The total fair value of all swaps is a \$0.5 million net liability, of which \$0.2 million is included in Accounts Payable and Accrued Liabilities and \$0.3 million is included in Other Long-Term Liabilities, respectively, on the accompanying Consolidated Balance Sheet.

Market Risk Disclosures as of December 31, 2010:

Instruments entered into for trading purposes—None

Instruments entered into for hedging purposes (in millions)—

Type of Derivative	Notional Size	Expiration	Fair Value
Interest Rate Swap*	\$147.3	2011 - 2015	\$(9.2)

Table of Contents

* The total fair value of all swaps is a \$9.2 million net liability, of which \$5.0 million is included in Accounts Payable and Accrued Liabilities, \$4.7 million is included in Other Long-Term Liabilities and \$0.5 million is included in Other Long-Term Assets, respectively, on the accompanying Consolidated Balance Sheet.

In determining fair value, we use various valuation approaches, including market, income and/or cost approaches. Accounting standards establish a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are inputs that market participants would use in pricing the asset or liability developed based on market data obtained from independent sources. Unobservable inputs are inputs that reflect our assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The hierarchy is broken down into three levels based on the reliability of inputs as follows:

Level 1—Valuations based on quoted prices in active markets for identical assets or liabilities that we have the ability to access. Assets utilizing Level 1 inputs include exchange-traded equity securities that are actively traded.

Level 2—Valuations based on quoted prices in markets that are not active or for which all significant inputs are observable, either directly or indirectly. Assets and liabilities utilizing Level 2 inputs include fair value and cash flow swap instruments.

Level 3—Valuations based on inputs that are unobservable and significant to the overall fair value measurement. Asset and liability measurements utilizing Level 3 inputs include those used in estimating fair value of non-financial assets and non-financial liabilities in purchase acquisitions and those used in assessing impairment of manufacturer franchise rights.

The availability of observable inputs can vary and is affected by a wide variety of factors. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment required to determine fair value is greatest for instruments categorized in Level 3. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement is disclosed is determined based on the lowest level input that is significant to the fair value measurement.

Fair value is a market-based measure considered from the perspective of a market participant who holds the asset or owes the liability rather than an entity-specific measure. Therefore, even when market assumptions are not readily available, our assumptions are set to reflect those that market participants would use in pricing the asset or liability at the measurement date. We use inputs that are current as of the measurement date, including during periods when the market may be abnormally high or abnormally low.

Valuation Techniques

The fair value of cash flow swaps is calculated as the present value of expected future cash flows, determined on the basis of forward interest rates and present value factors. As such, the carrying amounts for these swaps are designated to be Level 2 fair values and totaled \$0.5 million and \$9.2 million as of December 31, 2011 and 2010, respectively.

The carrying value of these swaps is included in Other Long-Term Liabilities and Other Current Liabilities on the accompanying Consolidated Balance Sheet as of December 31, 2011.

The fair value of assets held for sale used to determine the immaterial impairment expense we incurred in 2011, 2010 and 2009 were determined with the assistance of third-party desktop appraisals and real estate brokers and are designated to be Level 3 fair values.

Other Financial Instruments

In connection with the sale of our 3% Convertible Notes in March 2007, we entered into convertible note hedge and warrant transactions. The convertible note hedge and warrant transactions are separate contracts and are not part of the terms of the 3% Convertible Notes and, as such, they do not affect the holders' rights under the 3% Convertible Notes. The convertible hedge and warrant transactions have the effect of increasing the conversion price of the 3% Convertible Notes to \$44.74 per share. The convertible note hedge and warrant transactions are expected to offset the

potential dilution upon conversion of the 3% Convertible Notes in the event that the market value per share of our common stock at the time of conversion is between \$33.73 and \$44.74.

The convertible note hedge transactions represent purchase options of our common stock. At the issuance, there were 3.4 million shares of our common stock underlying the convertible note hedge transactions, with 4.1 million shares representing the

81

Table of Contents

maximum number of shares that we could receive thereunder. The initial exercise price of the convertible note hedge contracts was \$33.99. The exercise price is subject to certain adjustments which mirror the adjustments to the conversion price of the 3% Convertible Notes (including for subsequent changes in our dividend). A portion of the options will be exercised upon the conversion of our 3% Convertible Notes and each such exercise will be settled in shares of our common stock. The convertible note hedge transactions will expire on the earlier of (i) the last day on which any convertible notes remain outstanding and (ii) the third scheduled trading day immediately preceding September 15, 2012. In connection with the repurchase of 3% Convertible Notes a portion of the convertible note hedges was terminated. As of December 31, 2011, there were 2.2 million shares representing the maximum number of shares that we could receive under the convertible note hedge transactions.

The warrant transactions represent net call options. On exercise of the warrants, we are obligated to deliver a number of shares of our common stock in an amount based on the excess of the market value per share of our common stock over the strike price of the warrants. At issuance, there were 3.4 million shares of our common stock underlying the warrant transactions, with 6.8 million shares representing the maximum number of shares of our common stock required to be issued. The warrant transactions expire at various dates from December 14, 2012 through April 11, 2013. As of December 31, 2011, there were 4.9 million shares representing the maximum number of shares that we could receive under the warrant transactions.

15. INCOME TAXES

The components of income tax expense from continuing operations are as follows:

	For the Year Ended December 31,		
	2011	2010	2009
	(In millions)		
Current:			
Federal	\$16.0	\$6.0	\$1.6
State	(0.1) 1.9	(1.2
Subtotal	15.9	7.9	0.4
Deferred:			
Federal	9.9	14.1	12.2
State	3.8	1.2	2.7
Subtotal	13.7	15.3	14.9
Total	\$29.6	\$23.2	\$15.3

A reconciliation of the statutory federal rate to the effective tax rate from continuing operations is as follows:

	For the Year Ended December 31,		
	2011	2010	2009
	(In millions)		
Provision at the statutory rate	\$27.2	\$21.2	\$14.3
Increase (decrease) resulting from:			
State income tax expense, net	2.4	2.0	1.3
Loss (gain) on corporate owned life insurance policies	0.1	(0.2) (0.4
Tax credits received	(0.5) (0.1) (0.1
Other	0.4	0.3	0.2
Provision for income taxes	\$29.6	\$23.2	\$15.3

The tax effects of temporary differences representing deferred tax assets (liabilities) result principally from the following:

Table of Contents

	December 31,	
	2011	2010
	(In millions)	
Reserves and accruals	\$23.7	\$20.5
Net operating loss (“NOL”) carryforwards	3.0	4.5
Goodwill amortization	36.7	51.4
Depreciation	(16.2) (12.1
Interest rate swaps	2.9	3.8
Other	0.9	1.0
Net deferred tax asset	\$51.0	\$69.1

	December 31,	
	2011	2010
	(In millions)	
Balance sheet classification:		
Deferred tax assets:		
Current	\$10.5	\$8.6
Long-term	76.2	87.7
Deferred tax liabilities:		
Current	(0.9) (1.0
Long-term	(34.8) (26.2
Net deferred tax asset	\$51.0	\$69.1

As of December 31, 2011, our state operating losses of \$4.5 million, before federal benefit, are set to expire between 2012 and 2031.

As of December 31, 2011, the net amount of our unrecognized tax benefits was \$0.8 million, all of which, if recognized, would affect our effective tax rate. A reconciliation of the beginning and ending amount of gross unrecognized tax benefits is as follows:

	Gross Liability for Unrecognized Tax Benefits In Millions	
Balance at January 1, 2009	\$ 4.6	
Additions for Tax Positions of Current Year	0.3	
Additions for Tax Positions of Prior Year	0.1	
Reduction for Tax Positions of Prior Years	(0.4)
Reduction for Lapse of Statute of Limitations	(1.2)
Effective Settlements	(1.9)
Balance at December 31, 2009	\$ 1.5	
Reduction for Lapse of Statute of Limitations	(0.3)
Balance at December 31, 2010	1.2	
Additions for Tax Positions of Prior Year	0.3	
Reduction for Lapse of Statute of Limitations	(0.5)
Balance at December 31, 2011	\$ 1.0	

We recognize interest and penalties related to unrecognized tax benefits in income tax expense. Included in the liability for unrecognized tax benefits was accrued interest of \$0.2 million and no amount for penalties, as of December 31, 2011.

The statute of limitations related to the consolidated Federal income tax return is closed for all tax years up to and including 2007. The IRS is currently conducting a Joint Committee Review for the Consolidated Federal Tax Return

for the 2009 loss that was carried back to 2006.

83

Table of Contents

The expiration of the statute of limitations related to the various state income tax returns that we and our subsidiaries file varies by state. The 2008 through 2010 tax years generally remain subject to examination by most state tax authorities. We do not anticipate any material changes related to unrecognized tax benefits, individually or in the aggregate, to occur within the next twelve months.

16. OTHER LONG-TERM LIABILITIES

Other long-term liabilities consist of the following:

	As of December 31,	
	2011	2010
	(In millions)	
Deferred compensation liability	\$—	\$8.2
Deferred rent	7.0	7.7
Accrued finance and insurance chargebacks	5.8	4.9
Interest rate swap liabilities	0.3	4.7
Other	4.3	3.0
Other long-term liabilities	\$17.4	\$28.5

17. DISCONTINUED OPERATIONS AND DIVESTITURES

During the year ended December 31, 2011, we sold (i) our heavy truck business in Atlanta, Georgia, which consisted of ten franchises (three dealership locations) and one collision repair center, (ii) two franchises (two dealership locations) and (iii) one additional ancillary business. As of December 31, 2011, there were no franchises pending disposition. The accompanying Consolidated Statements of Income for the years ended December 31, 2010 and 2009 have been reclassified to reflect the status of our discontinued operations as of December 31, 2011.

The following table provides further information regarding our discontinued operations as of December 31, 2011, and includes the results of businesses sold prior to December 31, 2011:

	For the Year Ended December 31,		
	2011	2010	2009
		(a)	(b)
	(Dollars in millions)		
Franchises:			
Mid-line domestic	—	—	7
Mid-line import	1	2	3
Heavy Trucks	10	10	10
Luxury	1	1	3
Total	12	13	23
Revenues	\$94.5	\$323.6	\$426.0

(a) Franchises were sold between January 1, 2010 and December 31, 2011

(b) Franchises were sold between January 1, 2009 and December 31, 2011

Table of Contents**18. SUPPLEMENTAL CASH FLOW INFORMATION**

During the years ended December 31, 2011, 2010 and 2009, we made interest payments, including amounts capitalized, totaling \$52.3 million, \$52.1 million and \$55.2 million, respectively. Included in these interest payments are \$11.0 million, \$10.9 million and \$11.7 million of floor plan interest payments for the years ended December 31, 2011, 2010 and 2009, respectively.

During the year ended December 31, 2011, we made income tax payments, net of refunds received, totaling \$15.4 million. During the years ended December 31, 2010 and 2009, we received income tax refunds, net of payments made, of \$1.7 million and \$3.9 million, respectively.

During the years ended December 31, 2011, 2010 and 2009, we sold \$22.6 million, \$23.4 million and \$22.4, respectively, of trade receivables, each at a total discount of \$0.6 million.

During the years ended December 31, 2011, 2010 and 2009, we transferred \$36.4 million, \$35.6 million and \$38.0 million, respectively, of loaner vehicles from Other Current Assets to Inventory on our Consolidated Balance Sheets.

During the year ended December 31, 2011, we entered into two transactions in which we purchased various previously leased real estate, for a total purchase price of \$30.3 million. One of the transactions included a termination of a lease obligation for property not currently used in our operations, resulting in a loss of \$1.0 million, which is included in Selling, General and Administrative Expense on our Consolidated Statements of Income for year ended December 31, 2011.

The following items are included in Other Adjustments to reconcile net income to cash flow from operating activities:

	For the Years Ended December 31,		
	2011	2010	2009
Accelerated rent expense associated with abandoned rental properties	\$0.2	\$0.4	\$4.0
Amortization of deferred financing fees	2.7	2.5	2.8
Convertible debt discount amortization	0.8	1.4	1.8
Depreciation and amortization from discontinued operations	0.2	1.4	2.8
Deferred compensation expense	—	0.9	1.4
Gain on insurance proceeds	—	(4.3) —
Unrealized loss (gain) on deferred compensation investments	0.2	(0.5) (1.1
Other individually immaterial items	0.6	2.5	1.9
Other adjustments, net	\$4.7	\$4.3	\$13.6

19. LEASE OBLIGATIONS

We lease various facilities, real estate and equipment primarily under operating lease agreements, most of which have remaining terms from one to twenty years. Certain of our leases contain renewal options and rent escalation clauses.

We record rent expense on a straight-line basis over the life of the lease for lease agreements where the rent escalates at fixed rates over time. Rent expense from continuing operations totaled \$37.3 million, \$41.4 million and \$38.2 million for the years ended December 31, 2011, 2010 and 2009, respectively. As of December 31, 2011, we had one significant capital lease obligation totaling approximately \$3.9 million. This lease was entered into in 2011, and is being amortized over 20 years.

Future minimum payments under long-term, non-cancelable operating leases as of December 31, 2011, are as follows:

Table of Contents

	Total (In millions)
2012	\$39.5
2013	36.6
2014	34.1
2015	32.0
2016	31.7
Thereafter	135.4
Total minimum lease payments	\$309.3

Certain of our lease agreements include financial covenants and incorporate by reference the financial covenants set forth in the Credit Agreement. A breach of any of these covenants could immediately give rise to certain landlord remedies under our various lease agreements, the most severe of which include the following: (a) termination of the applicable lease and/or other leases with the same or an affiliated landlord under a cross-default provision, (b) eviction from the premises; and (c) the landlord would have a claim for any or all of the following: (i) damages suffered by landlord by reason of the default, equal to rent and other amounts payable by tenant under the lease prior to the default plus other fees and costs incurred by landlord; and (ii) additional damages, either payable monthly in an amount equal to the rent due under the lease less the amount of rent, if any, received by landlord from a substitute tenant, or payable in a lump sum equal to the present value of the sum of the amount by which all remaining sums due under the lease exceeds the fair market rental value of the premises for the same period, plus landlord's expense and value of all vacancy periods projected by landlord to be incurred in connection with reletting the premises.

20. COMMITMENTS AND CONTINGENCIES

Our dealerships are party to dealer and framework agreements with applicable vehicle manufacturers. In accordance with these agreements, each dealership has certain rights and is subject to restrictions typical of the industry. The ability of these manufacturers to influence the operations of the dealerships or the loss of any of these agreements could have a negative impact on our operating results.

In some instances, manufacturers may have the right, and may direct us, to implement costly capital improvements to dealerships as a condition to entering into, renewing or extending franchise agreements with them. Manufacturers also typically require that their franchises meet specific standards of appearance. These factors, either alone or in combination, could cause us to use our financial resources on capital projects that we might not have planned for or otherwise determined to undertake.

From time to time, we and our dealerships are or may become involved in various claims relating to, and arising out of, our business and our operations. These claims may involve, but not be limited to, financial and other audits by vehicle manufacturers, lenders and certain federal, state and local government authorities, which have historically related primarily to (a) incentive and warranty payments received from vehicle manufacturers, or allegations of violations of manufacturer agreements or policies, (b) compliance with lender rules and covenants and (c) payments made to government authorities relating to federal, state and local taxes, as well as compliance with other government regulations. Claims may also arise through litigation, government proceedings and other dispute resolution processes. Such claims, including class actions, could relate to, but may not be limited to, claims related to the practice of charging administrative fees and other fees and commissions, employment-related matters, truth-in-lending and other dealer assisted financing obligations, contractual disputes, actions brought by governmental authorities and other matters. We evaluate pending and threatened claims and establish loss contingency reserves based upon outcomes we currently believe to be probable and reasonably estimable.

The Company and certain of its subsidiaries were named defendants in a class action lawsuit filed in December 2002 in the Pulaski County circuit court in Arkansas. The lawsuit related to our Arkansas dealerships' charging certain document preparation fees and receiving certain interest rate participation amounts from lenders related to customer

arranged financing from November 2000 through November 2006. After various motions and judgments, in October 2008, the circuit court ruled in favor of the Company and its subsidiaries on all class action claims and found the Company and its subsidiaries had no liability. On March 11, 2010, the plaintiff appealed the circuit court's decisions.

On April 14, 2011, the Supreme Court of Arkansas ruled that the class may proceed with claims with respect to certain document preparation fees collected by the Company's subsidiaries from November 2000 to November 2006, and also reversed the circuit court's decision not to certify a subclass relating to the dealerships' interest rate participation. The Supreme Court remanded the case to the Pulaski County circuit court for further proceedings. On August 23, 2011, the circuit court granted

Table of Contents

preliminary approval to a proposed Class Action Settlement (the "settlement") agreed to by the parties. The Company had previously accrued its best estimate of probable and reasonably estimable losses of \$9.0 million in connection with this matter.

On November 7, 2011, the circuit court approved a class action settlement previously agreed to by the parties. In connection therewith, the Company made a payment of approximately \$5.4 million in the fourth quarter of 2011.

Additionally, the Company is currently engaged in discussions with an affiliate of a vehicle manufacturer whose brands we sell relating to the alleged receipt by the Company of certain overpayments from vehicle service work. The Company has accrued its best estimate of the probable and reasonably estimable exposure in connection with this matter.

It is reasonably possible that losses in excess of the amounts accrued for the various types of claims known to us could be up to approximately \$1.1 million in the aggregate. We currently do not anticipate that any known claim will materially adversely affect our financial condition, liquidity, results of operations or financial statement disclosures. However, the outcome of any matter cannot be predicted with certainty, and an unfavorable resolution of one or more matters presently known or arising in the future could have a material adverse effect on our financial condition, liquidity, results of operations or financial statement disclosure.

A significant portion of our business involves the sale of vehicles, parts or vehicles composed of parts that are manufactured outside the United States of America. As a result, our operations are subject to customary risks of importing merchandise, including fluctuations in the relative values of currencies, import duties, exchange controls, trade restrictions, work stoppages and general political and socio-economic conditions in foreign countries. The United States of America or the countries from which our products are imported may, from time to time, impose new quotas, duties, tariffs or other restrictions, or adjust presently prevailing quotas, duties or tariffs, which may affect our operations and our ability to purchase imported vehicles and/or parts at reasonable prices.

We continue to evaluate potential consequences resulting from the natural disasters and related events in Japan on our operating results. Disruption in new vehicle inventories from certain Japanese manufacturers began during the second quarter of 2011 and continued into the fourth quarter of 2011. We currently expect that the resulting inventory supply shortages will subside by the first quarter of 2012, although we can provide no assurance of this. In addition, we do not expect that the disruption in the supply of inventory from our Japanese manufacturing partners will have a material adverse effect on our earnings, results of operations or our business during 2012, although we can provide no assurance of this.

Substantially all of our facilities are subject to federal, state and local provisions regarding the discharge of materials into the environment. Compliance with these provisions has not had, nor do we expect such compliance to have, any material effect upon our capital expenditures, net earnings, financial condition, liquidity or competitive position. We believe that our current practices and procedures for the control and disposition of such materials comply with applicable federal, state and local requirements. No assurances can be provided, however, that future laws or regulations, or changes in existing laws or regulations, would not require us to expend significant resources in order to comply therewith.

We had \$15.7 million of letters of credit outstanding as of December 31, 2011, which are required by certain of our insurance providers. In addition, as of December 31, 2011, we maintained a \$7.5 million surety bond line in the ordinary course of our business.

Our other material commitments include (i) floor plan notes payable, (ii) operating leases, (iii) long-term debt and (iv) interest on long-term debt, as described elsewhere herein.

21. RELATED PARTY TRANSACTIONS

During the years ended December 31, 2011, 2010 and 2009, we were party to certain agreements with a member of our board of directors and a current member of our management team. These agreements primarily involved long-term operating leases of dealership facilities. We believe that the rental transactions related to these agreements were on terms comparable to those that could be obtained from unaffiliated third parties. For the years ended December 31, 2011, 2010 and 2009, we made rental payments totaling \$2.3 million, \$3.7 million and \$3.3 million, respectively, to these individuals or entities controlled by these individuals.

During the year ended December 31, 2011, we concurrently entered into two transactions with a member of our board of directors, which were (i) the purchase of dealership real estate previously leased by us for approximately \$16.9 million and (ii) a new lease agreement for a separate parcel of dealership real estate. The new lease agreement is being accounted for as a capital lease and, as a result, we recorded approximately \$4.0 million in Property and Equipment, net and Long-Term Debt on

Table of Contents

our Consolidated Balance Sheet in 2011. We believe that these transactions were on terms comparable to those that could be obtained from unaffiliated third parties.

22. SHARE-BASED COMPENSATION AND EMPLOYEE BENEFIT PLANS

We have established two share-based compensation plans (the "Plans") under which we have granted non-qualified stock options, performance share units, restricted share units and shares of restricted stock to our directors, officers and employees at fair market value on the date of the grant. Stock options generally vest ratably over three years from the date of grant and expire ten years from the date of grant. Performance share units vest after three years or ratably over three years from the date of grant. The actual number of shares earned by a holder of performance share units may range from 0% to 150% of the target number of shares to be granted to the holder, depending on the achievement of certain performance criteria over a defined period of time. Restricted stock, with the exception of restricted stock granted to member of our board of directors, vests ratably over three years from the date of grant and provides the holder voting and dividend rights prior to vesting. Restricted stock grants to members of our board of directors generally vests immediately upon the date of grant. Restricted share units vest ratably over three years from the date of grant. We have granted a total of 5.8 million non-qualified stock options, 1.2 million performance share units, 0.9 million shares of restricted stock and 0.1 million of restricted share units. In addition, there were approximately 2.7 million share-based awards available for grant under our share-based compensation plans as of December 31, 2011. We issue new shares of our common stock upon the exercise of stock options or vesting of performance share units, restricted stock or restricted share units. In addition, in connection with the vesting of performance share units, restricted stock or restricted share units, we expect to repurchase a portion of the shares issued equal to the amount of employee income tax withholding.

The fair value of each option award was estimated on the date of grant using the Black Scholes option valuation model. The fair value of each performance share unit and restricted stock was calculated using the closing market price of our common stock on the date of grant. Expected volatilities are based on the historical volatility of our common stock. We use historical data to estimate the rate of option exercises and employee turnover within the valuation model. The expected term of options granted represents the period of time that the related options are expected to be outstanding. The risk-free rate for periods within the contractual life of the option is based on the U.S. Treasury yield curve in effect at the time of grant.

We have recognized \$8.8 million (\$3.4 million tax benefit), \$5.1 million (\$2.0 million tax benefit) and \$2.8 million (\$1.1 million tax benefit) in stock-based compensation expense for the years ended December 31, 2011, 2010 and 2009, respectively. As of December 31, 2011, there was \$4.7 million of total unrecognized share-based compensation expense related to non-vested share-based awards granted under the Plans, and we expect to recognize \$2.9 million of this expense in 2012, \$1.5 million in 2013 and \$0.3 million in 2014.

The table below summarizes the assumptions used relating to the valuation of our stock options during 2009. We did not grant any stock options during 2011 or 2010.

	2009
Risk-free interest rate	1.61%-2.35%
Expected term	4-6 years
Expected volatility	64% - 75%
Expected dividends	-

A summary of options outstanding and exercisable under the Plans as of December 31, 2011, changes during the year then ended and changes during the years ended December 31, 2010 and 2009 is presented below:

Table of Contents

	Stock Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value* (in millions)
Options outstanding—December 31, 2008	1,494,300	\$ 11.39

Employee Retirement Plan

We sponsor the Asbury Automotive Retirement Savings Plan (the “Plan”), a 401(k) plan, for eligible employees except for the employees of one of our dealership groups, which maintains a separate retirement plan. Employees are eligible to participate in the Plan on or after ninety days of service to the Company. Employees electing to participate in the Plan may contribute up to 75% of their annual eligible compensation. IRS rules limited total participant contributions during 2011 to \$16,500 or \$22,000 if age 50 or more; however, we limit participant contributions for employees considered Highly Compensated Employees with an annual salary or base salary equal to or greater than \$110,000 to \$10,000 per year or \$15,500 if age 50 or more. After one year of employment, we match 25% of employees' contributions up to 4% of their eligible compensation, with a maximum match of \$2,450 per participant. Beginning on January 1, 2009, we suspended our matching contributions for Highly Compensated Employees with an annual salary equal to or greater than \$110,000. Employer contributions vest by graded schedule over four years after the date of hire. Expenses from continuing operations related to employer matching contributions totaled \$1.0 million, \$0.9 million and \$1.0 million for the years ended December 31, 2011, 2010 and 2009, respectively.

Deferred Compensation Plan

We sponsor the Asbury Automotive Wealth Accumulation Plan (the “Deferred Compensation Plan”) wherein eligible employees, generally those at senior levels, may elect to defer a portion of their annual compensation. We have

established a rabbi trust to provide security for our funding obligations under the Deferred Compensation Plan with corporate-owned variable life insurance contracts. Participants are 100% vested in their respective deferrals and the earnings thereon.

90

Table of Contents

Historically, we elected to match a portion of certain eligible employee's contributions. Beginning January 1, 2009, we suspended our matching contributions for all employees in the Deferred Compensation Plan. Each annual employer match vests in full three years from the date the employee deferral match is funded. The total deferred compensation liability was \$7.7 million and \$8.2 million as of December 31, 2011 and 2010, respectively. The related cash surrender value and face value of the 60 life insurance contracts totaled \$10.7 million and \$66.9 million as of December 31, 2011, respectively. The related cash surrender value and face value of the 60 life insurance contracts totaled \$11.5 million and \$66.8 million as of December 31, 2010, respectively.

23. CONDENSED QUARTERLY REVENUES AND EARNINGS (UNAUDITED):

	For the Three Months Ended			
	March 31,	June 30,	September 30,	December 31,
	(In millions, except per share data)			
2010				
Revenues (1)	\$879.0	\$986.9	\$1,019.7	\$1,011.6
Gross profit (1)	\$153.2	\$164.6	\$166.8	\$166.0
Net income (1) (3)	\$7.4	\$12.8	\$12.5	\$5.4
Net income per common share:				
Basic (2) (3)	\$0.23	\$0.40	\$0.39	\$0.17
Diluted (2) (3)	\$0.22	\$0.39	\$0.38	\$0.16
2011				
Revenues (1)	\$1,039.3	\$1,074.6	\$1,072.4	\$1,090.4
Gross profit (1)	\$171.2	\$187.0	\$183.0	\$179.8
Net income (1) (4)	\$19.9	\$14.2	\$12.3	\$21.5
Net income per common share:				
Basic (2) (4)	\$0.61	\$0.44	\$0.39	\$0.69
Diluted (2) (4)	\$0.59	\$0.43	\$0.38	\$0.68

(1) Quarterly revenues, gross profit and net income may not agree to previously reported amounts on Form 10-Q as a result of subsequent discontinued operations.

(2) The sum of income per common share for the four quarters does not equal total income per common share due to changes in the average number of shares outstanding during the respective periods.

(3) Results for the three months ended December 31, 2010 were reduced by \$7.6 million, net of tax, or \$0.23 per common share, as a result of expenses associated with the repurchase of our 8% Notes and amendments to our 7.625% Notes and credit facilities and mortgage notes payable.

(4) Results for the three months ended March 31, 2011 were (i) increased by \$15.8 million, net of tax, or \$0.49 per common share, as a result of a gain on the sale of our heavy truck business and (ii) reduced by \$5.5 million, net of tax, or \$0.17 per common share, due to legal claims related to operations from 2000 to 2006.

24. SUBSEQUENT EVENTS

In February 2012, our Board of Directors elected to terminate the Asbury Wealth Accumulation Plan (the "Deferred Compensation Plan"). Please refer to Note 22 ("Share-Based Compensation and Employee Benefit Plans") for a detailed description of the Deferred Compensation Plan. As a result of this decision, we reclassified \$10.7 million of assets and \$7.7 million of liabilities associated with the Deferred Compensation Plan from Other Long-Term Assets and Other Long-Term Liabilities, respectively, to Other Current Assets and Accounts Payable and Other Current Liabilities, respectively, on our Consolidated Balance Sheet as of December 31, 2011.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Disclosure Controls and Procedures

As of the end of the period covered by this report, the Company conducted an evaluation, under the supervision and with the participation of the Company's principal executive officer and principal financial officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures as defined in Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act"). Based on this evaluation, the Company's principal executive officer and principal financial officer concluded that as of the end of such period such disclosure controls and procedures were effective to ensure that information required to be disclosed by the Company in reports it files or submits under the Exchange Act is (i) recorded, processed, summarized and reported within the time period specified in the rules and forms of the U.S. Securities and Exchange Commission and (ii) accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding disclosure. Management necessarily applies its judgment in assessing the costs and benefits of such controls and procedures, which, by their nature, can provide only reasonable assurance regarding management's control objectives. The Company's management, including the principal executive officer and the principal financial officer, does not expect that our disclosure controls and procedures can prevent all possible errors or fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that objectives of the control system are met. There are inherent limitations in all control systems, including the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple errors or mistakes. Additionally, controls can be circumvented by the intentional acts of one or more persons. The design of any system of controls is based in part upon certain assumptions about the likelihood of future events, and while our disclosure controls and procedures are designed to be effective under circumstances where they should reasonably be expected to operate effectively, there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Because of the inherent limitations in any control system, misstatements due to possible errors or fraud may occur and not be detected.

Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over our company's financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). Our internal control system was designed to provide reasonable assurance to our management and our board of directors regarding the preparation and fair presentation of published financial statements. Our internal control over financial reporting also includes those policies and procedures that:

• Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets;

• Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors; and

• Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisitions, use or disposition of our assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree or compliance with the policies or procedures may deteriorate.

Our management assessed the effectiveness of our internal control over financial reporting as of December 31, 2011. In making this assessment, we used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control—Integrated Framework. Our assessment included a review of the documentation of controls, evaluation of the design effectiveness of controls and testing of the effectiveness of controls. Based on our assessment under the framework in Internal Control—Integrated Framework issued by COSO, our management concluded that our internal control over financial reporting was effective as of December 31, 2011. Our auditors, Ernst & Young LLP, an independent registered public accounting firm, has audited and reported on our consolidated financial statements and on the effectiveness of our internal controls over financial reporting. Their reports are contained herein.

Table of Contents

Changes in Internal Control Over Financial Reporting

During the quarter ended December 31, 2011, the Company continued its implementation of the ADP Dealer Management System, which, as of the date of this report, has been implemented at all of our dealerships. As appropriate, the Company is modifying the documentation of its internal control processes and procedures relating to this change in dealer management systems to supplement and complement existing internal controls over financial reporting. Other than the above, there was no change in the Company's internal control over financial reporting during the quarter ended December 31, 2011 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 9B. Other Information.

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance.

Reference is made to the information to be set forth in the "Proposal No. 1 Election of Directors," "Governance of the Company," "2011 Director Compensation Table," "Section 16(a) Beneficial Ownership Reporting Compliance," "Code of Business Conduct and Ethics," and "Executive Officers" sections of our Proxy Statement to be filed within 120 days after the end of our fiscal year, which information is incorporated herein by reference.

Item 11. Executive Compensation.

Reference is made to the information to be set forth in the "Governance of the Company," "Compensation Disclosure and Analysis," "Executive Compensation," "Compensation and Human Resources Committee Report," and "Compensation Committee Interlocks and Inside Participation" sections of our Proxy Statement to be filed within 120 days after the end of our fiscal year, which information is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

Reference is made to the information to be set forth in the "Securities Owned by Management and Certain Beneficial Owners" and "Securities Authorized for Issuance under Equity Compensation Plans" sections of our Proxy Statement to be filed within 120 days after the end of our fiscal year, which information is incorporated herein by reference.

Item 13. Certain Relationships and Related Transactions, and Director Independence.

Reference is made to the information to be set forth in the "Related Persons Transactions" and "Governance of the Company" sections of our Proxy Statement to be filed within 120 days after the end of our fiscal year, which information is incorporated herein by reference.

Item 14. Principal Accountant Fees and Services.

Reference is made to the information to be set forth in the "Independent Auditors' Fees" section of our Proxy Statement to be filed within 120 days after the end of our fiscal year, which information is incorporated herein by reference.

PART IV

Item 15. Exhibits and Financial Statement Schedules.

(a) The following documents are filed as a part of this report on Form 10-K:

- (1) Financial Statements: See index to Consolidated Financial Statements.
- (2) Financial Statement Schedules: Not applicable.
- (3) Exhibits required to be filed by Item 601 of Regulation S-K:

The Exhibits listed below are identified by numbers corresponding to the Exhibit Table of Item 601 of Regulation S-K.
