/s/ G.J. Kleisterlee

(President, Chairman of the Board of Management)

/s/ P.J. Sivignon

(Chief Financial Officer, Member of the Board of Management)

Forward-looking statements

This document contains certain forward-looking statements with respect to the financial condition, results of operations and business of Philips and certain of the plans and objectives of Philips with respect to these items (including, but not limited to, restructuring cost and cost savings), in particular the outlook paragraph in this report. By their nature, forward-looking statements involve risk and uncertainty because they relate to events and depend on circumstances that will occur in the future. There are a number of factors that could cause actual results and developments to differ materially from those expressed or implied by these forward-looking statements. These factors include, but are not limited to, levels of consumer and business spending in major economies, changes in consumer tastes and preferences, changes in law, the performance of the financial markets, pension costs, the levels of marketing and promotional expenditures by Philips and its competitors, raw materials and employee costs, changes in exchange and interest rates (in particular changes in the euro and the US dollar can materially affect results), changes in tax rates and future business combinations, acquisitions or dispositions and the rate of technological changes, political and military developments in countries where Philips operates, the risk of a downturn in the semiconductor market, Philips ability to secure short-term profitability and invest in long-term growth, and industry consolidation.

Statements regarding market share, including as to Philips' competitive position, contained in this document are based on outside sources such as specialized research institutes, industry and dealer panels in combination with management estimates. Where information is not yet available to Philips, those statements may also be based on estimates and projections prepared by outside sources or management. Rankings are based on sales unless otherwise stated.

Use of non-US GAAP information

In presenting and discussing the Philips Group's financial position, operating results and cash flows, management uses certain non-US GAAP financial measures. These non-US GAAP financial measures should not be viewed in isolation as alternatives to the equivalent US GAAP measure(s) and should be used in conjunction with the most directly comparable US GAAP measure(s). A discussion of the non-US GAAP measures included in this document and a reconciliation of such measures to the most directly comparable US GAAP measure(s) are contained in this document.

Use of fair value measurements

In presenting the Philips Group's financial position, fair values are used for the measurement of various items in accordance with the applicable accounting standards. These fair values are based on market prices, where available, and are obtained from sources that are deemed to be reliable. Users are cautioned that these values are subject to changes over time and are only valid at the balance sheet date. When a readily determinable market value does not exist, fair values are estimated using valuation models. The models that are used are appropriate for their purpose. They require management to make significant assumptions with respect to future developments which are inherently uncertain and may therefore deviate from actual developments. In certain cases, independent valuations are obtained to support management's determination of fair values.

Report on the performance of the Philips Group

financial reporting according to US GAAP unless otherwise stated

restated for the sale of the MDS business

**Philips reports strong second quarter: sales up 10% year-on-year; net income of EUR 301 million
EBIT for the quarter increased to EUR 367 million**

Sales increased strongly in the second quarter to EUR 7,601 million, 10% above Q2 2005. Adjusted for the effects of currency movements and consolidation changes, comparable sales increased by 11%, driven by strong growth in all operating divisions.

EBIT amounted to EUR 367 million, compared to EUR 158 million in the same period of last year. Medical Systems, Lighting and DAP all delivered strong increases in profitability, as did Semiconductors, benefiting from its business renewal program. In difficult market conditions, the EBIT of Consumer Electronics held up. Brand campaign costs were EUR 47 million lower than in Q2 2005 due to an amended seasonal spend pattern.

Financial income and expenses resulted in income of EUR 127 million, compared to an expense of EUR 57 million in Q2 2005. The improvement is due to the recognition of a TSMC cash dividend of EUR 223 million, net of tax. Unconsolidated companies recorded a loss of EUR 105 million, EUR 85 million of which was attributable to LG.Philips LCD, compared to a profit of EUR 822 million in Q2 2005. Last year's figure included a gain of EUR 753 million on the sale of NAVTEQ shares, as well as income of EUR 67 million from TSMC.

Net income of EUR 301 million (EUR 0.26 per share) compared to EUR 983 million (EUR 0.78 per share) in the corresponding period of 2005. Excluding last year's non-taxable gain of EUR 753 million attributable to the sale of shares in NAVTEQ, net income grew over 30% in the quarter.

Cash inflow from operating activities increased to EUR 300 million, compared to EUR 52 million in Q2 2005, due to lower additional working capital requirements. Inventories as a percentage of sales amounted to 12.2%, a decrease of 1.2 percentage points compared to Q2 2005.

Gerard Kleisterlee,

Philips President and CEO:

We had an excellent second quarter to round off a good first half year. Our transformation into a market-driven healthcare, lifestyle and technology company starts to show its merits, with strong profit contributions from Medical Systems, Lighting and DAP. Our CE business model is showing its robustness in difficult conditions for the industry and Semiconductors is delivering the expected benefits of its business renewal program. We continued to expand our presence in the growing healthcare market, announcing our intention to acquire Intermagnetics General Corporation and Avent Holdings, while disposing of more non-core activities during the quarter. Going forward, our increasingly focused business scope will serve as an asset.

Continuing our consistent focus on shareholder value, we are pleased to announce the launch of a further EUR 1.5 billion share repurchase program, to start in the third quarter.

2

Philips Group

Highlights in the quarter

Net income

in millions of euros unless otherwise stated

	Q2 2005	Q2 2006
Sales	6,927	7,601
EBIT	158	367
as a % of sales	2.3	4.8
Financial income and expenses	(57)	127
Income taxes	83	(98)
Results unconsolidated companies	822	(105)
Minority interests	(12)	(19)
Income from continuing operations	994	272
Discontinued operations	(11)	29
Net income	983	301
Per common share basic	0.78	0.26

Net income

Net income amounted to EUR 301 million (EUR 0.26 per share), compared to EUR 983 million (EUR 0.78 per share) in the same period last year. The EUR 209 million increase in EBIT and the recognition of TSMC cash dividends of EUR 223 million only partly offset the EUR 927 million lower results from unconsolidated companies.

Q2 2005 included a EUR 753 million gain on the sale of shares in NAVTEQ and a EUR 109 million gain relating to a final agreement on prior-years tax settlements.

A gain of EUR 29 million was reported under discontinued operations on closure of the MDS transaction.

Sales by sector

in millions of euros unless otherwise stated

	Q2 2005	Q2 2006	% change	
			nominal	comparable
Medical Systems	1,498	1,630	9	9
DAP	461	572	24	13
CE	2,259	2,484	10	17
Lighting	1,116	1,296	16	9
Semiconductors	1,088	1,221	12	12
Other Activities	505	398	(21)	(10)
Philips Group	6,927	7,601	10	11

Sales by sector

Nominal sales for the Group grew by 10% compared to Q2 2005. Adjusted for the 1% downward effect of currency and consolidation changes, comparable growth was 11%. All divisions posted year-on-year growth except Other Activities.

Medical Systems posted 9% year-on-year comparable growth driven by the majority of its businesses. DAP grew in all businesses, reporting 13% year-on-year comparable growth. At CE, growth was driven by strong flat display sales in Connected Displays. At Lighting, comparable growth was evident across the division, notably at Automotive, Special Lighting & UHP and Lighting Electronics. Semiconductors 12% comparable growth was led by Automotive & Identification. Other Activities comparable sales decline was mainly due to Optical Storage.

Sales per region

in millions of euros unless otherwise stated

	Q2 2005	Q2 2006	% change	
			nominal	comparable
Europe/Africa	2,757	3,085	12	16
North America	1,817	1,956	8	7
Latin America	461	552	20	16
Asia Pacific	1,892	2,008	6	6
 Philips Group	 6,927	 7,601	 10	 11

Sales by region

In Europe/Africa, comparable sales increased in all main divisions. In North America, Semiconductors, Lighting and DAP were the main drivers of the growth. Consumer Electronics led the sales increase in Latin America. In Asia Pacific, growth was most marked at Medical Systems, DAP and Lighting.

EBIT	Q2	Q2
in millions of euros unless otherwise stated	2005	2006
Medical Systems	157	199
DAP	44	66
CE	62	45
Lighting	120	158
Semiconductors	27	120
Other Activities	(60)	(57)
Unallocated	(192)	(164)
Philips Group	158	367
as a % of sales	2.3	4.8

Earnings before interest and tax (EBIT)

Earnings before interest and tax were EUR 367 million, compared to EUR 158 million in Q2 2005, the improvement being led by Medical Systems, Lighting and Semiconductors.

Medical Systems EBIT improved thanks to higher sales, particularly in Computed Tomography, Nuclear Medicine and X-ray, coupled with improved operational performance.

At DAP, EBIT improved in all main businesses, driven by sales growth and increased margins.

At CE, the impact of additional price pressure driven by market oversupply in flat displays was largely cushioned by the division's business model, limiting the EBIT decline to EUR 17 million.

At Lighting, EBIT improved by EUR 38 million year-over-year, thanks to Lumileds and increased sales across all other businesses.

Semiconductors earnings improved strongly, on the back of higher sales in all businesses, increased capacity utilization and lower costs as a result of its business renewal program.

Other Activities EBIT was in line with Q2 2005 as improvements in Corporate Investments were offset by lower earnings in Corporate Technologies.

EBIT of Unallocated improved, primarily as a result of a EUR 47 million lower spend on the brand campaign. This reduction was caused by an amended seasonal spend pattern compared to 2005.

Financial income and expenses

in millions of euros	Q2 2005	Q2 2006
Interest expenses (net)	(57)	(67)
Other		194
Total	(57)	127

Financial income and expenses

Other financial income and expenses included a cash dividend from TSMC of EUR 223 million, net of tax, and a fair-value loss of EUR 32 million on the revaluation of the option on the TPV convertible bond, offsetting gains recorded in Q1 2006.

Results unconsolidated companies

in millions of euros	Q2 2005	Q2 2006
TSMC	67	
LG.Philips LCD	10	(85)
NAVTEQ: gain on sale of shares	753	
Others	(8)	(20)
Total	822	(105)

Results relating to unconsolidated companies

Results relating to unconsolidated companies decreased by EUR 927 million compared to Q2 2005, which was positively impacted by the EUR 753 million gain on the sale of shares in NAVTEQ. The remainder of the decrease was attributable to the change in accounting treatment of TSMC (result of EUR 67 million in Q2 2005) and the EUR 95 million lower income from LG.Philips LCD.

Cash balance in millions of euros	Q2 2005	Q2 2006
Beginning balance	3,210	3,389
Net cash from operating activities	52	300
Gross capital expenditures	(219)	(255)
Acquisitions/divestments	920	(183)
Other cash from investing activities	(11)	(80)
Dividend paid	(504)	(523)
Changes in debt/other	(426)	(103)
Cash provided by discontinued operations	(17)	(7)
Ending balance	3,005	2,538

Cash balance

The cash balance decreased by EUR 851 million in Q2 2006, compared to a decrease of EUR 205 million in Q2 2005; the latter included EUR 932 million proceeds from the sale of NAVTEQ shares.

The main cash outflows in the quarter were EUR 523 million for dividend payments, EUR 118 million for share repurchases related to employee stock options and EUR 105 million for the purchase of Witt Biomedical Inc.

Cash flows from operating activities

Cash flows from operating activities

Cash flows from operating activities improved by EUR 248 million compared to Q2 2005, driven by lower additional requirements for working capital.

The improvements in working capital centered on Consumer Electronics (mainly accounts receivable and inventories), DAP and Medical Systems.

Gross capital expenditures

Gross capital expenditures

Gross capital expenditures were EUR 36 million higher than in Q2 2005, in line with expectations. The additional expenditure was evident in most divisions, notably further investments in Lamps and Lumileds within the Lighting division.

Inventories as a % of sales

Inventories

Net inventories as a percentage of MAT sales decreased from 13.4% in Q2 2005 to 12.2%. The reduction was visible in DAP, Semiconductors, Medical Systems and CE, where the business model ensured tight inventory management despite market oversupply of flat displays.

Net debt and group equity

Net debt and group equity

The net debt to group equity ratio remained in line with Q2 2005 but increased relative to Q1 2006 as a result of the cash outflow for acquisitions and dividends.

Group equity increased by EUR 4,302 million compared to Q2 2005, primarily due to the change in accounting treatment of TSMC. In the quarter, group equity decreased by EUR 964 million, mainly as a result of a decline in the value of Philips shareholding in TSMC.

Number of employees (FTEs)

Employment

The number of employees at the end of Q2 2006 was 158,344 compared to 159,709 at the end of Q2 2005. The net decrease compared to Q2 2005 represents the effect of acquisitions, including Lumileds and Lifeline, offset by employee reductions related to the TPV deal as well as the ongoing divestment of businesses within Other Activities. The sequential reduction of 3,154 is mainly due to the divestment of several businesses within Corporate Investments, including MDS.

Medical Systems

Key data

in millions of euros unless otherwise stated

	Q2 2005	Q2 2006
Sales	1,498	1,630

Number of employees (FTEs)	30,965	31,261

Sales

EBIT

Business highlights

Philips announced plans to acquire Intermagnetics General Corporation for approximately EUR 1 billion. The company is a leading manufacturer of superconducting magnets and radio-frequency coils for magnetic resonance imaging systems.

In Singapore, Philips opened a EUR 12 million training facility for healthcare professionals and customers – the first of its kind in the region.

In the US, Philips signed 16 iSite PACS (picture archiving and communication systems) contracts, three of which were with leading healthcare organizations – Philadelphia's Thomas Jefferson University Hospital, Seattle's Group Health Cooperative, and New York's Saint Vincent Catholic Medical Centers, doubling iSite's order intake compared to Q1.

Financial performance

Currency-comparable order intake for equipment grew by 2% compared to Q2 2005. Growth in Magnetic Resonance was partially offset by declines in Nuclear Medicine and Monitoring Systems. Healthcare Informatics grew strongly thanks to orders for iSite PACS.

Comparable sales grew 9% compared to Q2 2005, driven by almost all businesses. Double-digit growth was visible in Computed Tomography, Nuclear Medicine (higher sales in PET/CT) and X-ray (FD systems in CV X-ray). All regions contributed to the 9% growth, especially Asia Pacific (19%).

Witt Biomedical was fully consolidated as of April 2006, posting a loss of EUR 4 million due wholly to EUR 6 million purchase-accounting-related costs.

EBIT margin increased by 1.7% compared to Q2 2005 as a result of structural improvements in operating efficiencies, unusually strong sales in Computed Tomography and a release of provisions of approximately EUR 10 million.

Looking ahead

High-single-digit comparable sales growth is expected in 2006.

Medical Systems expects that EBIT margin in the second half of the year will show an improvement compared to 2005.

For planning purposes, we are assuming that completion of the Intermagnetics acquisition will take place in Q4 2006. Purchase-accounting and one-time acquisition-related charges of approximately EUR 85 million are anticipated on completion.

Consumer Healthcare Solutions

To further develop its activities in the Consumer Health & Wellness space, Philips announced the set-up of a Consumer Healthcare Solutions business to target, through non-retail channels, the growing market for cost-effective monitoring, treatment and care outside the hospital environment. Retail channels will continue to be served by the Health & Wellness business.

Business highlights

Philips announced it will buy Avent Holdings Ltd. a baby and infant feeding products company for GBP 460 million to further build up its health & wellness activities.

Leading lifestyle magazine *Men's Health* named SmartTouch-XL Best New Electric Razor and Bodygroom Best New Body Tool as the first trimmer for below-the-belt shaving.

In France, Philips launched the Wardrobe Care Solution, with a 3-in-1 ironing board, powerful iron, steamer and garment refresher. The product will be rolled out in Europe this fall.

Philips and Sara Lee launched their Senseo® coffee pod system in Shanghai, the first market introduction in China and Asia Pacific.

Financial performance

Sales grew 13% on a comparable basis compared with Q2 2005, with the improvement visible across all businesses. On a regional basis, growth was strong in Central/Eastern Europe, China and Western Europe.

EBIT improved by EUR 22 million compared to Q2 2005; the improvement was visible in all businesses except Health & Wellness, which continued to invest in business development. EBITA improved by EUR 26 million compared to Q2 2005.

In Q2, the new Consumer Healthcare Solutions (CHS) business posted sales of EUR 40 million, the majority of which were attributable to Lifeline Systems. CHS posted a EUR 1 million loss, due to investments in innovation and amortization charges of EUR 6 million.

The increase in net operating capital and employee numbers is attributable to the acquisition of Lifeline in Q1.

Looking ahead

The acquisition of Avent Holdings will be completed in Q3.

Consumer Electronics

Key data

Sales

EBIT

Business highlights

Marking the 10th year since Philips introduced flat TVs, its 2006 Ambilight Full Surround Cineos FlatTV launch demonstrates Philips' ongoing leadership in TV innovation.

Philips acquired Power Sentry – a leading U.S. supplier to the growing and profitable peripherals & accessories market.

The range of Philips amBX – PC peripherals, offering ambient light, sound and sensory effects for unrivalled gaming experiences, was named Editors Choice at the 2006 Electronic Entertainment Expo in Los Angeles.

In Europe, Philips launched its new Skype and Windows Live Messenger – voice-over-internet cordless phones. Philips launched its Personal Media Center, a portable entertainment device with recording and photo capabilities.

Financial performance

Sales of EUR 2,484 million were up 10% on Q2 2005 in nominal terms, and 17% on a comparable basis. Growth was particularly visible in Connected Displays, driven by the accelerated transition from CRT to Flat TV.

Peripherals and Accessories also posted a significant 19% comparable sales increase. Regionally, double-digit growth was evident in Europe and Latin America.

Against the background of oversupply and heavy price pressure in the flat displays market, the division posted EBIT of EUR 45 million, underscoring the effectiveness of its business model.

Net operating capital of EUR 5 million was EUR 227 million lower than Q2 2005 due to tight inventory management and further progress with the division's outsourcing-driven asset reduction program.

Looking ahead

Sales growth is expected to ease in Q3 as the speed of transition to Flat TV decelerates.

Margins are expected to remain under pressure as competitors and retailers clear their pipeline stock.

Lighting

Sales

EBIT

Business highlights

Philips entered the emergency lighting market by acquiring The Bodine Company a U.S.-based lighting manufacturer.

For the 2006 FIFA World Cup™, Philips lit up the German government Reichstag building in Berlin and provided floodlighting at 8 of the 12 stadiums.

Philips and German company Novald set a new lifetime and efficiency record for OLEDs (organic light-emitting diodes), developing a high-brightness white OLED lasting over 20,000 hours and emitting light equal to 1000 candles/m².

At the Light + Building Fair in Frankfurt, Philips continued to shape the market in solid-state lighting, introducing a range of LED-based luminaires for applications ranging from city beautification and road lighting to shop and office lighting.

Marking Queen Elizabeth II's 80th birthday, Philips created a permanent lighting installation for the facade of London's Buckingham Palace, which included energy-efficient, compact LUXEON® LEDs lasting 25 years.

Financial performance

Sales amounted to EUR 1,296 million, representing 9% comparable growth compared to Q2 2005. The Lumileds consolidation boosted nominal sales by a further 7%.

Sales were particularly buoyant in Asia Pacific, with 13% comparable growth.

All businesses grew above the market average, leading to market share gains. Driven by strong UHP growth, Automotive, Special Lighting & UHP posted 15% sales growth. Lumileds' sales were 22% above the already high Q2 2005 level in USD terms, in line with the 25% comparable growth target for the full year.

The division recognized an ongoing amortization charge of EUR 8 million related to the acquisition of Lumileds.

The EBIT increase was driven by Lumileds and the higher level of sales.

Looking ahead

Lumileds is well on track to meet its targets in terms of growth and profitability.

The division will continue to launch innovative products and to focus on emerging markets.

Semiconductors

Key data

in millions of euros unless otherwise stated

Sales

EBIT

Business highlights

The French government selected Philips' contactless SmartMX chips for its new electronic passports, bringing the total share of the world's e-passports won by Philips to 80%.

Philips introduced the world's first single-chip solution to combine immobilization and remote keyless entry functions. The chip is now being used in the new Honda Civic.

Philips, Nokia, RMV and Vodafone started the first commercial application of Near Field Communication for secure payment and ticketing on Hanau, Germany's public transport system.

Haier, one of China's top three handset manufacturers, selected Philips' Ultra Low Cost Reference Phone platform based on the Nexperia cellular system solution 5128 to create a low-cost handset for mass production in China.

Dell selected the Nexperia TV810 semiconductor reference design for its 26-inch digital LCD HD TV. The design offers high picture quality and easy audio/video and PC hook-ups.

Financial performance

Sales increased by 12% on both a nominal and a comparable basis compared to Q2 2005. Automotive & Identification, MMS and Home were the main contributors to the sales increase, while Mobile & Personal reported flat sales. Sequentially, sales increased by 5% in US dollar terms.

At the end of Q2, the book-to-bill ratio was 1.07, compared to 1.12 at the end of Q1. Total order book increased by 5%, mainly in Europe, compared to the end of Q1.

The utilization rate at the end of Q2 improved to 88%, compared to 77% in Q2 2005 and 82% in Q1 2006.

EBIT amounted to EUR 120 million, EUR 93 million above Q2 2005. The improvement was attributable to increased sales and cost effectiveness, the latter underpinned by the business renewal program.

The reduction in net operating capital was driven by ongoing progress of the division's asset-light strategy.

Following the announcement in June of our intention to reduce our ownership share in Semiconductors in the second half of 2006, EUR 10 million of related project costs have been capitalized in Q2. These costs will be expensed upon completion of a transaction.

Looking ahead

Mid-to-high-single-digit sequential sales growth in US dollar terms is expected in Q3 2006.

EBITS

Business highlights

Philips and the Dutch University of Groningen succeeded for the first time in fabricating electronics at the molecular level – a breakthrough published in the magazine *Nature*.

Philips Business Communications – the company's enterprise communications activities – were transferred to the joint venture NEC Philips Unified Solutions in which Philips retains a 40% stake.

In the United States, the Industrial Designers Society of America (IDEA) awarded Philips a gold IDEA award for the CityWing pedestrian LED luminaire.

Financial performance Corporate Technologies

Excluding the divestment of PolyLED and several incidentals in Q2 2005, EBIT of Corporate Technologies declined by EUR 3 million. Higher R&D investments in the Technology Incubators and healthcare research were partly offset by temporarily lower investment at Research and improved performance at Applied Technologies.

Financial performance Corp. Investments/others

Corporate Investments recorded a loss of EUR 5 million, an improvement compared with Q2 2005 as a result of the higher EBIT in a number of its operational businesses.

The Service Units recorded a EUR 8 million gain.

The reduction in net operating capital and number of employees is attributable to the ongoing divestment of non-core business activities.

Looking ahead

Continuing its innovation program focused on future growth, Corporate Technologies will step-up Incubator-related R&D investments in Q3.

Research costs in Q3 are expected to be approximately EUR 10 million higher than in Q2 due to the phasing of certain project expenses.

Corporate Investments will continue to reduce its business portfolio. Several announcements regarding divestments can be expected in the second half of 2006. Divestment-related costs of EUR 10 million are anticipated in Q3.

Due to tariff reductions, the gain related to the Service Units in Q2 will not be repeated in the second half of the year.

Business highlights

As official sponsor of the 2006 FIFA World Cup, Philips provided Ambilight screens viewed by 18.5 million fans in 12 German cities, RFID chips in 3.2 million tickets and HeartStart defibrillators at all sports venues.

In India, Philips was one of five large companies to receive a Sustainability Award from the Confederation of Indian Industry (CII) for a commitment to embedding sustainability policies and procedures in its business processes. The CII represents over 6,100 organizations in India.

Philips showcased its commitment to its brand promise sense and simplicity at a Simplicity Event held in April in New York. The event was attended by 800 key stakeholders, including customers, suppliers, partners, top marketers, product designers, employees and the media.

Philips was official sponsor of TV and audio equipment to the Wimbledon 2006 tennis championships, providing over 1,400 sets as well as the Vidiwall screen at the famed No. 1 Court.

To identify and exploit value-adding supplier opportunities, Philips hosted the 4th Partners for Growth supplier forum in May for its top 30 suppliers. Philips channeled 22% of its 2005 spending through these suppliers, up from 17% in 2004.

Financial performance

Corporate and regional overheads were higher than in Q2 2005 due to implementation costs related to compliance with section 404 of the Sarbanes-Oxley Act and expenses for several seasonal events, including the World Cup.

The investment in the global brand campaign was EUR 47 million lower than in Q2 2005 due to an amended seasonality pattern.

Pension and post-retirement benefit costs were lower than in Q2 2005. Lower pension costs in The Netherlands (abolition of post-retirement benefit plan) were partly offset by increased costs in North and Latin America.

Looking ahead

Global brand campaign spend, although at a similar level to 2005 for the full year, will follow a different seasonal pattern in 2006. About 70% of the annual investment will be spent in Q4.

Corporate and regional overhead costs are expected to return to their normative level in Q3.

Highlights in the 1st six monthsThe 1st six months of 2006

Net income EUR 461 million

Comparable sales up 10%, driven by CE, Semiconductors and DAP

EBIT EUR 702 million

Unconsolidated companies reported a loss of EUR 141 million

Net debt : group equity ratio 9:91

Net income

in millions of euros unless otherwise stated

Discontinued operations	(25)	29
Net income	1,100	461
Per common share basic	0.87	0.39

Management summary

Net income showed a profit of EUR 461 million, compared to EUR 1,100 million in the first six months of 2005; the latter included a EUR 753 million gain on the sale of shares of NAVTEQ.

Sales amounted to EUR 14,975 million, 12% higher than in the same period last year. The upward currency effect was more than offset by deconsolidation changes (mainly TPV and ongoing divestments in Corporate Investments), leading to comparable sales growth of 10% compared to the first half of last year.

Comparable sales grew at all main divisions, with double-digit growth at Consumer Electronics (16%), Semiconductors (13%) and DAP (11%). Medical Systems and Lighting both showed comparable sales growth of 8%. Sales in Corporate Investments declined by 13% as a result of the sale of various businesses (including Philips Business Communications, Anteryon, and Optical Pick-up Unit).

EBIT showed a profit of EUR 702 million, compared to EUR 365 million in the same period last year. EBIT increased in all divisions except Consumer Electronics. EBIT margin rose from 2.7% to 4.7%; the increase was visible in all operating divisions except Consumer Electronics.

Net income of EUR 461 million included a EUR 223 million cash dividend from TSMC. Last year's net income included a EUR 753 million gain on the sale of shares in NAVTEQ and a EUR 109 million gain relating to a final

agreement on prior-years tax settlements.

Other information

Other information

On June 21, Philips announced its intention to reduce its ownership share in the Semiconductors division to a minority stake in the course of the second half of 2006 through an IPO and/or sale of shares to financial investors, while continuing to evaluate industry consolidation opportunities.

Following the recent cancellation of the shares acquired in earlier share repurchase programs, the Company will continue with a next share repurchase program of up to EUR 1.5 billion, to be executed during the coming 18 months. The program will be used exclusively for capital reduction.

16

Outlook

Outlook

The second quarter further confirmed our solid progress in growing sales and increasing profitability. We expect this growth to continue in the second half of the year, although, given the particularly strong second half of 2005, at a slightly slower pace. Overall, we are well on track to meet our medium-term targets.

During the remainder of 2006, we will continue our business portfolio realignment through the expected acquisition of Intermagnetics and the further divestment of a number of non-core business activities. We will continue our value-creating management of capital, focusing our resources on further acquisitions, innovation, the brand, and on returning cash to shareholders.

The intention to reduce our ownership share in the Semiconductors division to a minority stake in 2006 will allow us to take a further step in implementing our strategy to build a more stable, predictable healthcare, lifestyle and technology company with a strong market focus around the brand promise of sense and simplicity .

Philips to acquire Intermagnetics, the world's leading MRI components and accessories manufacturer
Thursday, June 15, 2006

Strategic acquisition to build world leading Magnetic Resonance Imaging (MRI) solutions with extended product portfolio, accelerated time-to-market and increased efficiency

Amsterdam, the Netherlands and Latham, New York Royal Philips Electronics (NYSE:PHG, AEX:PHI) today announced it has signed a definitive agreement with Intermagnetics General Corporation (Intermagnetics) (NASDAQ:IMGC) under which Philips will acquire Intermagnetics for USD 27.50 per share or a total equity value of approximately USD 1.3 billion (EUR 1 billion) to be paid in cash upon completion. The Board of Directors of Intermagnetics has unanimously approved the proposed transaction. Completion of the transaction is subject to regulatory approval, to the terms and conditions of the merger agreement and to the approval of Intermagnetics shareholders.

Intermagnetics develops, manufactures and markets high-field superconducting magnets used in Magnetic Resonance Imaging (MRI) systems and is viewed as the technological innovator in this market. Intermagnetics also provides specialized MRI compatible patient monitoring devices and Radio Frequency (RF) coils that are predominantly supplied to hospitals.

The acquisition of Intermagnetics will strengthen Philips' position in the key market of Magnetic Resonance Imaging. It will allow Philips to significantly rationalize its supply chain, to enhance its competitive position and to participate in the fast growing market for RF coils.

Philips anticipates the transaction to be accretive to its operating margin towards the end of 2007. There will be a one-time charge of approximately EUR 85 million related to in-process R&D expenses, integration of supply chain and various purchase accounting items, taken in the latter half of 2006. For the last four quarters ended February 26, 2006, Intermagnetics' revenues were USD 304 million.

Through this acquisition, we will greatly strengthen the overall performance and innovation capability of our MRI business, said Jouko Karvinen, member of the Philips Board of Management and CEO of Medical Systems. In the short term, we expect to gain equipment market share and to grow the installed base by expanding our product offerings with an accelerated innovation rate and a lower cost supply chain. Intermagnetics' leading positions in the high-growth and high-value markets of RF coils and MRI patient monitoring will enable us to build unique solutions for our customers, he added. In the longer term, we believe that MRI technology will become important in molecular imaging, therefore positioning us well for the future.

Philips also recognizes the benefits offered by the breakthrough technology of SuperPower, Intermagnetics' Energy Technology subsidiary, and will actively consider the most effective way to achieve its potential.

Glenn H. Epstein, Chairman and Chief Executive Officer of Intermagnetics General Corporation said: Our Board of Directors unanimously feels that this is the logical next-stage for Intermagnetics. We will now be better positioned to align our core strengths in the design and manufacture of superconducting magnets, RF coils and MRI compatible patient monitors with Philips' deep expertise in MRI system design and clinical applications. This is truly a unique opportunity where another clear winner is the MRI business in general.

Intermagnetics employs approximately 1150 people. Its headquarters in Latham, New York will become the global headquarters of Philips' enlarged Magnetic Resonance business. Upon completion of the acquisition, Glenn H. Epstein will join Philips to lead the MRI business and the integration process. He will report to Steve Rusckowski, CEO of Philips Medical Imaging Systems.

Magnetic Resonance Imaging is one of the key imaging technologies in radiology departments in hospitals. In 2005, total MRI market was approximately EUR 5 billion, and consisted of MRI systems, services and accessories (such as RF coils). Over the past 10 years, the number of MRI procedures grew on average by 10 percent per year. This has been driven by an increasing number of diagnostic applications. Magnetic resonance imaging is radiation free, and is the preferred technique for high-resolution imaging of the brain, spine, abdomen, breast, prostate, blood vessels, and of all joints in the body.

About Royal Philips Electronics

Royal Philips Electronics of the Netherlands (NYSE: PHG, AEX: PHI) is one of the world's biggest electronics companies and Europe's largest, with sales of EUR 30.4 billion in 2005. With activities in the three interlocking domains of healthcare, lifestyle and technology and 161,500 employees in more than 60 countries, it has market leadership positions in medical diagnostic imaging and patient monitoring, color television sets, electric shavers, lighting and silicon system solutions. News from Philips is located at www.philips.com/newscenter

Intermagnetics General Corporation

Intermagnetics draws on the financial strength, operational excellence and technical leadership in the market of Magnetic Resonance Imaging (MRI), as well as its expanding businesses within Medical Devices that encompass In vivo Diagnostic Imaging (focusing on MRI components & imaging sub-systems) and In vivo Patient Care (focusing on monitoring & other patient care devices). Intermagnetics is also a prominent participant in superconducting applications for Energy Technology. The

company has a 35-year history as a successful developer, manufacturer and marketer of superconducting materials, high-field magnets, medical systems & components and other specialized high-value added devices.

Forward-looking statements

This release may contain certain forward-looking statements with respect to the financial condition, results of operations and business of Philips and certain of the plans and objectives of Philips with respect to these items. By their nature, forward-looking statements involve risk and uncertainty because they relate to events and depend on circumstances that will occur in the future and there are many factors that could cause actual results and developments to differ materially from those expressed or implied by these forward-looking statements.

IMPORTANT ADDITIONAL INFORMATION WILL BE FILED WITH THE SEC

Intermagnetics intends to mail to its stockholders and file with the Securities and Exchange Commission (the SEC) a Proxy Statement in connection with the proposed transaction, and to file other relevant materials with the SEC. The Proxy Statement and other materials filed with the SEC will contain important information about Intermagnetics, Philips, the Merger and related matters. Investors and security holders are urged to read the Proxy Statement carefully when it is available. Investors and security holders will be able to obtain free copies of the Proxy Statement and other documents filed with the SEC by Intermagnetics and Philips through the web site maintained by the SEC at www.sec.gov. In addition, investors and security holders will be able to obtain free copies of the Proxy Statement from Intermagnetics by contacting Investor Relations, Intermagnetics General Corporation, P.O. Box 461, Latham, New York 12110-0461, or by telephoning (518) 782-1122, or on Intermagnetics web site at www.igc.com.

Intermagnetics and its directors and executive officers also may be deemed to be participants in the solicitation of proxies from the stockholders of Intermagnetics in connection with the transaction described herein. Information regarding the special interests of these directors and executive officers in the transaction described herein will be included in the Proxy Statement described above. Additional information regarding these directors and executive officers is also included in Intermagnetics proxy statement for its 2005 Annual Meeting of Stockholders, which was filed with the SEC on or about September 26, 2005. This document is available free of charge at the SEC's web site at www.sec.com and from Intermagnetics by contacting Investor Relations, Intermagnetics General Corporation, P.O. Box 461, Latham, New York 12110-0461, or by telephoning (518) 782-1122, or on Intermagnetics web site at www.igc.com.

Philips aims for minority position in Semiconductors in 2006

Wednesday, June 21, 2006

Preparations for a separate stock exchange listing have started

Amsterdam, the Netherlands Royal Philips Electronics (NYSE:PHG, AEX: PHI) today announced the intention of the company to reduce its ownership share in its Semiconductors division in the course of the second half of 2006 to a minority stake through an IPO of the company and/or sale of shares to financial investors, while continuing to evaluate industry consolidation opportunities.

In December 2005 Philips announced that its Semiconductors division would be legally separated in order to generate value to Philips shareholders and to provide better ability to the division to achieve its business renewal objectives and become a stronger company.

In a letter e-mailed to employees today Philips President and CEO Mr. Gerard Kleisterlee, wrote: In the course of these last few months hundreds of Philips people have been working long hours on issues relating to the disentanglement of Semiconductors, while a small top team has worked on the pursuit of the different strategic alternatives. Both projects are well on track and in the process we have been able to define more clearly the next steps we will make and the outcome that will result in, both for Philips as well as Semiconductors. This has led us to the decision to speed up the transformation of our Semiconductors division into a standalone company that is separate from Philips and will have a majority third parties ownership.

Mr. Kleisterlee further added: The future deconsolidation of Semiconductors is a further step for Philips in moving away from a focus on high volume electronics and implementing a strategy to build a Healthcare, Lifestyle and Technology company with a strong market focus around the brand promise of Sense and Simplicity.

The new semiconductors company will strongly continue its business renewal strategy as well as consider additional measures to strengthen its portfolio in Mobile & Personal, Home, Automotive & Identification and Multi Market Semiconductors. Naming for the company will be announced in due course and preparations for a separate stock exchange listing have started.

Philips will engage in consultation with workers councils about the steps that need to be set in order to complete the disentanglement by the end of the third quarter and create an independent semiconductor company with majority third party shareholding before the end of the year 2006.

This announcement does not constitute an offer to sell, or the solicitation of an offer to buy, any securities

Philips acquires Power Sentry, a leading U.S. electronics peripherals & accessories supplier
Monday, July 03, 2006

Amsterdam, the Netherlands and Madison, Wisconsin Royal Philips Electronics (NYSE:PHG, AEX: PHI) and Fiskars Brands Inc., a global manufacturer of consumer and commercial products, announced today that Philips acquired Power Sentry a division of Fiskars Brands Inc. Based in Plymouth, Minnesota, Power Sentry is the number two player in the North American plug-in power surge protector market with sales in 2005 of approximately USD 50 million. The transaction is completed. No further financial details were disclosed.

In 2005, the global plug-in power surge protector market was valued at approximately USD 640 million, with the United States representing approximately 80% of the global market. It is estimated that over the next five years the global market will grow annually by approximately 9%, with higher growth rates expected in Europe, Asia and Latin America as awareness of the potential benefits of these products spreads.

Accessories and peripherals are some of the fastest growing and higher-margin product categories in consumer electronics today, with retailers increasingly looking to offer these products as part of a complete consumer electronics portfolio to their customers. Power Sentry has a proven track record in growing its position in the North American plug-in power surge protector market, said Rudy Provoost, CEO of Philips Consumer Electronics. This acquisition fits Philips aim to become a top three global player in the audio-visual, PC and mobility accessory market, builds on our earlier acquisition of U.S. accessories supplier Gemini and allows us to leverage Philips global presence to extend Power Sentry s activities beyond its North American base, he added.

We look forward to further growing the business as part of Philips global organization, said Mark Schaffner, president of Power Sentry. And with Philips backing including its industry-leading technologies, distribution network, and global brand we ll be better positioned to step up that growth, he added.

Philips acquires Bodine, a leading player in emergency lighting sector
Friday, July 07, 2006

Acquisition of market leader in North America positions Philips to enter new market segments

Amsterdam, The Netherlands and Collierville, Tennessee Royal Philips Electronics (NYSE:PHG, AEX:PHI) announced today that it acquired The Bodine Company, a leading Collierville, Tennessee-based manufacturer of emergency ballasts with revenues of over \$30 million in 2005. The transaction is completed. No further financial details were disclosed.

This acquisition positions Philips very favourably in the niche emergency ballast market and enables us to broaden our product portfolio and enter strategic new market segments involving building networks, says Brian Dundon, President & CEO of Philips Lighting Electronics North America. Together with Bodine we will pursue new opportunities in emergency lighting and improve the system compatibility of lamp, ballast, and emergency lighting technology.

Through proximity to Philips' high-quality product offering, outstanding operations, extensive global resources and broad technical expertise, we will be able to strengthen and further grow our business, says David Crippen, CEO of Bodine. We look forward to continuing to develop the field of emergency lighting in the areas of automation and control, LED, and electronic HID technology as well as enhancing our overall value proposition within the lighting industry.

Bodine will be fully integrated as a business unit within Philips Lighting, while their commercial activities will continue to be operated under the Bodine structure. Founded in 1962, Bodine is a leading manufacturer of emergency ballasts and specialty lighting solutions and currently employs approximately 200 associates in its Collierville, Tennessee headquarters. The emergency ballast arena offers extensive opportunities for growth and development, particularly as it relates to the market's emerging provision of integrated and controllable emergency lighting solutions for use with building management systems.
