(Registrant's Telephone Number, Including Area Code)

None

(Former Name or Former Address, if Changed Since Last Report)

ITEM 5. OTHER EVENTS AND REGULATION FD DISCLOSURE.

In January 2004, we began to implement an organizational change that resulted in a change in our segment reporting from five market facing business units (Electric, Natural Gas, Water & Public Power, International and End User Solutions) to two operating groups (Hardware Solutions and Software Solutions).

Management has three primary measures for each of the operating groups: revenue, gross margin and operating income. Revenues for each operating group are according to product lines. There are no inter-operating group revenues. Within each operating group, costs of sales are based on standard costs, which include materials, direct labor and an overhead allocation based on projected production for the year. Variances from standard cost are also included in each operating group. Service related costs of sales are based on actual time and materials

Edgar Filing: ITRON INC /WA/ - Form 8-K

incurred, warranty expense and an allocation of miscellaneous service related costs. Operating expenses directly associated with each operating group may include sales, marketing, product development or administrative expenses.

Corporate operating expenses, interest revenue, interest expense, equity in the income of investees accounted for under the equity method, amortization expense and income tax expense are not allocated to the operating groups, nor included in segment profit or loss for management purposes. Assets and liabilities are not allocated to the operating groups. Approximately 50% of depreciation expense is allocated to the operating groups.

OPERATING SEGMENT PRODUCTS AND SERVICES

OPERATING SEGMENT -----	MAJOR PRODUCTS AND SERVICES -----
Hardware Solutions:	Residential and commercial automatic meter reading (AMR) meter modules, mobile and network AMR reading technologies, SmartSynch meter systems, handheld computers for meter data collection or mobile workforce applications, residential meter data collection software, mobile workforce solutions software and installation and implementation services for AMR, handheld meter data collection and mobile workforce systems.
Software Solutions:	Commercial and industrial meter data collection software, transmission and distribution systems design and optimization software, energy management and asset optimization software, and related implementation and consulting services.
