(1) MARKETABLE SECURITIES

Upon adoption of FASB No. 115, management has determined that the company's portfolio is best characterized as "Available-For-Sale". A corresponding increase in shareholders' equity has been effectuated. In accordance with the provisions of FASB No. 115, the adjustment in shareholders' equity to reflect the company's unrealized gains has been made net of the tax effect had these gains been realized.

The following tables summarize the company's investments as of:

As at June 30, 2003 and December 31, 2002, the Company had loans outstanding aggregating $900,000 and $700,000 borrowed on a short term basis from a bank, which are secured by certain marketable securities of the Company. The loans bear interest at approximately 4%.

MANAGEMENT'S DISCUSSION AND ANALYSIS
RESULTS OF OPERATIONS AND FINANCIAL CONDITION

ITEM 2.

RESULTS OF OPERATIONS

Three months ended June 30, 2003 as compared with three months ended June 30, 2002.

For the three months ended June 30, 2003 total revenues were $771,667, up from $753,088 in 2002. Operating revenues were $290,411 in 2003 up from $196,441 in 2002. Dividend income was $430,752 with a net interest expense of $19,075 in 2003, as compared to dividend income of $452,557 with a net interest expense of $7,221 in 2002. In 2003, the Company had a net loss before income taxes of $(247,559) versus a net income before income taxes of $77,258 in 2002. Total cost and Expenses in 2003 increased to $1,019,226 vs. $675,830 in 2002. This was related to increased marketing efforts and research and development expenses. Operating revenues increased by 48% from the comparable quarter in 2002. The Company's new sales team began marketing in the fourth quarter of 2002. The increase in operating revenues can be attributable to these sales efforts. The Company anticipates that it's sales of BVA-100 Blood Volume Analyzers and kits will become the major source of income for the Company. The Company is currently in the process of expanding its sales and marketing force.

Six months ended June 30, 2003 as compared with six months ended June 30, 2002.

For the six months ended June 30,2003, total revenues were $1,509,284 up from $1,414,926 in 2002. Operating revenues were $509,094 up from $389,504 in 2002. Selling and administrative expenses were $1,295,354 in 2003, vs. $867,771 in 2002. The increased expenses were related to the employment of additional sales and marketing personnel. In 2003, Dividend income was $910,641 with a net interest expense of $33,582 as compared to the dividend income of $908,543 with a net interest expense of $18,793 in 2002. In 2003, the Company had $81,263 in capital gains vs. $95,064 in 2002. In 2003, the Company had a net loss of $(500,594) before income taxes versus $125,578 before income taxes in 2002. The Company has adopted a policy that encourages leasing or renting of BVA-100 equipment to enable hospitals to obtain the equipment. This results in sales of kits but a slower recognition of operating income from BVA sales.

LIQUIDITY AND CAPITAL RESOURCES

At June 30, 2003 the Company had total assets of $45,557,552 with shareholders' equity of $35,065,290. The Company has a net pre-taxed unrealized gain of $22,065,923 and $14,563,509 of net after tax unrealized capital gains on available-for-sale securities in its portfolio. This amount is included in the calculation of Total Shareholders' Equity. The Company's stock portfolio had a market value of $44,546,379 with short-term loans of $ 2,633,309 with 4,646,226 shares outstanding. The Company has the current liabilities of $10,492,262. Included in these liabilities are deferred taxes of $7,502,414. These deferred taxes would occur if the Company chose to sell its entire portfolio. Current liabilities minus these deferred taxes equals $2,989,848.

The Company has adequate resources for the current marketing level of its Blood Volume Analyzer as well as capital to sustain its localized semen and blood banking services. The Company anticipates hiring additional regional managers to the existing sales/marketing team. It is the goal of the marketing team to develop an individual sales team for each regional manager. The Company is also expanding its support services personnel. The decision to develop the marketing team was partially based on the anticipation of new publications in peer reviewed medical journals by current users of the Blood Volume Analyzer.

The Company's goal is to establish blood volume measurement as a standard of care in multiple areas of medicine and surgery. It is hoped that the publication of research studies from leading medical facilities will result in an increase in sales in both the Blood Volume Analyzer and its associated kits.

F-6

The Company has an instrument loaner reagent plan which requires use of the Company's reserves. The equipment loaner reagent plan permits a user to make a minimal initial capital commitment. This results in a slower return on capital expenditure for the Company. The Company has established a private label leasing program called Daxor Capital through De Lage Landen. With this arrangement Daxor receives the net present value of the lease upon the signed completion of the installation of the equipment.

The Company is evaluating blood volume instrumentation management programs for hospitals. Under such a plan, the Company would provide equipment and personnel on a sub-contract basis. The Company will use its current financial reserves primarily for developing and marketing the Blood Volume Analyzer. The Company is evaluating various options to expand blood banking services in conjunction with the use of the Blood Volume Analyzer.
