Form 10-Q
May 17, 2010

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

Form 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2010

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 1-13776

GreenMan Technologies, Inc.
(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

71-0724248
(I.R.S. Employer Identification No.)

205 South Garfield, Carlisle, Iowa
(Address of principal executive offices)

50047
(Zip Code)

(781) 224-2411
(Registrant's telephone number, including area code)

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10-Q

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer

Accelerated Filer

Non-accelerated Filer

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes No

As of May 14, 2010, there were 33,113,310 shares of the registrant's Common Stock outstanding.

GreenMan Technologies, Inc.

GreenMan Technologies, Inc.
Notes to Condensed Interim Consolidated Financial Statements
Quarter Ended March 31, 2010 and 2009
(Unaudited)

1. Nature of Operations, Risks, and Uncertainties

GreenMan Technologies, Inc. (together with its subsidiaries “we”, “us” or “our”) was originally founded in 1992 and has operated as a Delaware corporation since 1995. Today, we are comprised of two business segments, our dual fuel conversion operations (American Power Group) and our molded recycled rubber products operations (Green Tech Products). Prior to November 17, 2008, we also had tire recycling operations. As described below, our business changed substantially in November 2008, when we sold substantially all of the assets of our tire recycling operations. The tire recycling operations were located in Savage, Minnesota and Des Moines, Iowa and collected, processed and marketed scrap tires in whole, shredded or granular form.

On June 17, 2009, we signed an exclusive license agreement with American Power Group, Inc., an Iowa corporation, under which we acquired the exclusive worldwide right to commercialize American Power Group’s patented dual fuel alternative energy technology. American Power Group’s unique external fuel delivery enhancement system converts existing diesel engines into more efficient and environmentally friendly engines that have the flexibility to run on: (1) diesel fuel and compressed natural gas; (2) diesel fuel and bio-methane; or (3) 100% on diesel fuel depending on the circumstances. On July 27, 2009, we entered into an agreement with American Power Group to purchase substantially all of their operating assets, including their name (excluding its dual fuel patent). (See Note 5.)

As of March 31, 2010, we had \$2,942,500 in cash, cash equivalents, certificates of deposit, marketable investments and net working capital of \$2,302,561, primarily due to the sale of our tire recycling business. Our tire recycling business has historically been the source of substantially all of our revenue and cash flow.

During the past two fiscal years, Green Tech Products has incurred operating losses of approximately \$800,000 per year and had negative cash flow from operations. During the six months ended March 31, 2010, Green Tech Products lost approximately \$552,000. We are currently evaluating several new types of products and marketing agreements outside the playground and parks markets that would use Green Tech Product’s patented cold-cure process and exclusive school board contract network.

Since the July 2009 acquisition of American Power Group’s dual fuel conversion operations, we have also made a significant investment in sales and marketing initiatives intended to promote American Power Group’s dual fuel conversion technology and establish broader market presence. Since the date of acquisition to the end of fiscal 2009, American Power Group incurred an operating loss of approximately \$480,000. American Power Group had an operating loss of approximately \$1,680,000 during the six months ended March 31, 2010.

In November 2008, our credit facility with Laurus Master Fund, Ltd. was terminated and we have not yet established a new corporate-wide credit facility. We understand that achieving positive cash flow from operations as well as sustained profitability will be key components necessary to re-establish a new credit facility. Based on our March 31, 2010 results and traditional credit facility advance rates of 75% of eligible accounts receivable and 50% of eligible inventory, we believe we could have an additional \$832,000 of available liquidity through a traditional credit facility. Management is currently evaluating several financing alternatives that would enhance our financial position and provide growth capital to supplement our existing working capital position. No assurances can be given that any such financing will be concluded in the near future, on terms favorable to us, or at all.

We understand that our continued existence is dependent on our ability to generate positive operating cash flow, achieve profitability on a sustained basis for all operations and improved performance during the warmer second half of the fiscal year which is when a majority of playground and athletic surfaces are typically installed. Based on our fiscal 2010 budget and existing cash and marketable investments, we believe we will be able to satisfy our cash requirements through the end of fiscal 2010. If Green Tech Products and American Power Group are unable to achieve sustained profitability and we are unable to obtain additional financing to supplement our cash position, our ability to maintain our current level of operations could be materially and adversely affected. There is no guarantee we will be able to achieve profitability of either business.

-7-

GreenMan Technologies, Inc.
Notes to Condensed Interim Consolidated Financial Statements
Quarter Ended March 31, 2010 and 2009
(Unaudited)

2. Basis of Presentation

The consolidated financial statements include the accounts of GreenMan Technologies, Inc. and our wholly-owned subsidiaries Green Tech Products, Inc. and American Power Group, Inc. All significant intercompany accounts and transactions have been eliminated in consolidation. All tire recycling assets, liabilities and results of operations have been classified as discontinued operations for all periods presented in the accompanying consolidated financial statements.

The accompanying interim financial statements are unaudited and should be read in conjunction with the financial statements and notes thereto for the year ended September 30, 2009 included in our Annual Report on Form 10-K. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to the Securities and Exchange Commission rules and regulations, although we believe the disclosures which have been made herein are adequate to ensure that the information presented is not misleading. The results of operations for the interim periods reported are not necessarily indicative of those that may be reported for a full year. In our opinion, all adjustments which are necessary for a fair statement of our financial position as of March 31, 2010 and the operating results for the interim periods ended March 31, 2010 and 2009 have been included.

3. Investments

Certificates of Deposit

We invest excess cash in certificates of deposit issued by various banks. All certificate of deposit investments have an original maturity of more than three months but less than three years and are stated at original purchase price which approximates fair value. As of March 31, 2010, we have pledged \$1,050,000 of our certificates of deposit as collateral for two loans currently outstanding.

Marketable Investments

We also invest excess cash in marketable investments, including highly-liquid debt securities of the United States Government and its agencies and high-quality corporate debt securities. All highly-liquid investments with an original maturity of more than three months at original purchase price are considered investments available for sale.

We evaluate marketable investments periodically for possible other-than-temporary impairment and review factors such as length of time to maturity, the extent to which fair value has been below cost basis and our intent and ability to hold the marketable investments for a period of time which may be sufficient for anticipated recovery in market value. We recorded impairment charges equal to the amount that the carrying value of the available-for-sale investments exceeds the estimated fair market value of the investments as of the evaluation date, if appropriate. The fair value for all investments is determined based on quoted market prices as of the valuation date as available. Effective January 1, 2008, we adopted ASC 820, Fair Value Measurements and Disclosures which defines fair value, establishes a framework for measuring fair value under generally accepted accounting principals and enhances disclosures about fair value measurements. Fair value is defined under ASC 820 as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Valuation techniques used to measure

fair value under ASC 820 must maximize the use of observable inputs and minimize the use of unobservable inputs. The standard describes a fair value hierarchy based on three levels of inputs, of which the first two are considered observable and the last unobservable, that may be used to measure fair value which are the following:

- Level 1 – Quoted prices in active markets for identical assets or liabilities.
- Level 2 – Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.
- Level 3 – Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

GreenMan Technologies, Inc.
Notes to Condensed Interim Consolidated Financial Statements
Quarter Ended March 31, 2010 and 2009
(Unaudited)

3. Investments – (Continued)

The adoption of this standard with respect to our financial assets and liabilities, did not impact our consolidated results of operations and financial condition, but required additional disclosure for assets and liabilities measured at fair value.

In accordance with ASC 820, the following table represents the fair value hierarchy for our financial assets (investments) measured at fair value on a recurring basis as of March 31, 2010:

Description:	March 31, 2010	September 30, 2009
Marketable	\$	
investments – Level 1	1,489,322	\$ 2,846,256

As of March 31, 2010 and September 30, 2009, we recorded a cumulative unrealized loss of \$715 and \$19,849, respectively, which is shown as a reduction to stockholders' equity until such time as we sell the underlying investments or determine the unrealized loss to be an other-than-temporary loss at which time we will record the loss in our statement of operations.

The following is a summary of maturities of carrying values of all marketable investments at March 31, 2010:

Twelve Months Ending March 31,	
2011	\$ --
2012	756,357
2013	732,965
2014	--
2015	--
	\$ 1,489,322

4. Net Income Per Share

Basic earnings per share represents income available to common stockholders divided by the weighted average number of common shares outstanding during the period. Diluted earnings per share reflects additional common shares that would have been outstanding if potentially dilutive common shares had been issued, as well as any adjustment to income that would result from the assumed conversion. Potential common shares that may be issued by us relate to outstanding stock options and warrants (determined using the treasury stock method). We incurred losses from continuing operations for the three and six months ending March 31, 2010 and 2009. Potential common shares included in a diluted earnings per share computation would result in an anti-dilutive per-share amount and therefore, no diluted earnings share is presented.

5. Acquisition of Subsidiary

Dual Fuel Technology License Agreement

On June 17, 2009, we signed an exclusive license agreement with American Power Group, Inc., an Iowa corporation, under which we acquired the exclusive worldwide right to commercialize American Power Group's patented dual fuel alternative energy technology. American Power Group's unique external fuel delivery enhancement system converts existing diesel engines into more efficient and environmentally friendly engines that have the flexibility to run on: (1) diesel fuel and compressed natural gas; (2) diesel fuel and bio-methane; or (3) 100% on diesel fuel depending on the circumstances. The proprietary technology seamlessly displaces up to 60% of the normal diesel fuel consumption with compressed natural gas or bio-methane and the energized fuel balance between the two fuels is maintained with a patented control system ensuring the engines operate to Original Equipment Manufacturers' ("OEM") specified temperatures and pressures with no loss of horsepower. Installation requires no engine modification unlike the more expensive high-pressure alternative fuel systems in the market.

In conjunction with executing the license agreement, we issued American Power Group two million shares of our common stock, valued at \$500,000 (based on the value of our stock on the date of the license) and subject to a one-year lock-up and certain escrow provisions. The value assigned to this long-term contract is being amortized on a straight line basis over an estimated useful life 120 months. In addition, we will be required to pay royalties to American Power Group upon the sales of dual fuel products and services.

GreenMan Technologies, Inc.
Notes to Condensed Interim Consolidated Financial Statements
Quarter Ended March 31, 2010 and 2009
(Unaudited)

5. Acquisition of Subsidiary – (Continued)

On May 14, 2009, we loaned American Power Group \$250,000 under a 24-month secured promissory note bearing interest at 5% with interest only due for the first six months with the balance (including interest) amortized in monthly payments of principal and interest over an eighteen month period commencing in November 2009.

American Power Group, Inc.

On July 27, 2009, our wholly owned subsidiary GreenMan Alternative Energy, Inc. entered into an agreement with American Power Group for the purchase of substantially all of their operating assets, including the name American Power Group (excluding its dual fuel patent) which we believe will enhance our ability to utilize the technology license agreement described earlier. The consideration for the acquisition consisted of (i) approximately \$850,000 in cash (financed by a local bank through short term debt), which was used by American Power Group to retire indebtedness to a bank, (ii) loans of approximately \$611,000 from GreenMan to American Power Group (including the \$250,000 loan described above and an additional loan of \$361,000 made on the closing date), which loans were also assumed by GreenMan Alternative Energy and have been eliminated as intercompany loans in consolidation subsequent to the acquisition, and (iii) the assumption by GreenMan Alternative Energy of approximately \$555,000 of American Power Group's accounts payable and other liabilities to third parties.

The acquisition was accounted for as a purchase and accordingly the results of American Power Group's operations since the date of acquisition are included in our consolidated financial statements.

Working capital acquired, net of cash and debt	\$ 164,817
Property acquired	107,185
Seller's note receivable	800,000
Dual fuel conversion technology acquired	500,000

Long term debt	(772,002)
Cash acquired upon purchase of business	\$--

The total consideration paid exceeded the fair value of the net assets acquired by \$500,000 resulting in the recognition of \$500,000 of intangibles which have been allocated to the patented dual fuel conversion technology acquired. This allocation was based on our estimated cost to reproduce the technology acquired as described in the dual fuel technology license agreement. The value assigned to the purchased technology is being amortized on a straight line basis over an estimated useful life of 120 months. The assets acquired include a promissory note from the previous owners of American Power Group of \$800,000 to GreenMan and bearing interest at the rate of 5.5% per annum and was based on the difference between the assets acquired and the consideration given. The note is due in a single, lump sum payment on July 27, 2013; provided, however, that 25% of any royalties due from time to time to American Power Group under the technology license agreement will be applied against outstanding interest and principal due under the terms of the note rather than to American Power Group. We consider this a related party note as one of the owners is now an employee of ours. In August 2009, we changed GreenMan Alternative Energy's name to American Power Group.

Research and Development Costs

Research and development expense is primarily the direct result of our spending related to our continued commitment of introducing new dual fuel technology as well as enhancing our current dual fuel products.

Amortization expense associated with acquisition related intangibles during the next five years is anticipated to be:

Twelve months ending	Contracts	Patents	Technology	Total
March 31:				
2010	\$ 229,250	\$ 21,667	\$ 50,000	\$ 300,917
2011	148,620	21,667	50,000	220,287
2012	57,500	21,666	50,000	129,166
2013	50,000	10,833	50,000	110,833

6. Discontinued Operations

Georgia Operations

Due to the magnitude of the continuing operating losses incurred by our GreenMan Technologies of Georgia, Inc. subsidiary our Board of Directors determined it to be in the best interest of our company to discontinue all Georgia operations and completed the divestiture of its operating assets during fiscal 2006. Accordingly, we have classified all its results of operations as discontinued operations.

During the three and six months ended March 31, 2009, we recognized an expense of \$100,000 associated with an April 2009 settlement agreement with a former Georgia vendor (See Note 10).

Tire Recycling Operations

On September 12, 2008 we executed an Asset Purchase Agreement with Liberty Tire Services of Ohio, LLC, a wholly-owned subsidiary of Liberty Tire Services, LLC, the largest tire recycling company in the United States, for sale of our tire recycling business, subject to shareholder approval. On November 13, 2008 our shareholders approved the sale and on November 17, 2008 we completed the divestiture of substantially all of the assets of our GreenMan Technologies of Minnesota, Inc. and GreenMan Technologies of Iowa, Inc. subsidiaries, which had operated our tire recycling business, for approximately \$27.7 million (\$27.9 million upon final reconciliation in June 2009) in cash. We recognized an initial gain on sale of approximately \$14.35 million, net of estimated taxes of approximately \$5.5 million which is included in gain on sale of discontinued operation during the three months ended December 31, 2008. We completed the final purchase accounting reconciliation during the three months ended September 30, 2009 and recorded an additional \$620,000 of income tax expense associated with this divestiture.

We used approximately \$16.5 million of the proceeds of this sale to retire certain transaction related obligations and other debt including approximately \$12.8 million due to our former primary secured lender, Laurus Master Fund, Ltd., and approximately \$645,000 of related party debt (including approximately \$111,000 of accrued interest). In addition, \$750,000 of the proceeds were placed in an escrow account for twelve months to cover possible indemnification claims by the purchaser as well as the pending finalization of several other post-closing reconciliations. All escrowed funds have been released from escrow and returned to us.

In March 2004, our Minnesota subsidiary leased back their property from a company co-owned by a former employee under a twelve-year lease requiring an annual rental of \$195,000, increasing to \$227,460 over the term of the lease. The building lease was classified as a capital lease with a value of \$1,036,000 and the portion allocated to the land had been treated as an operating lease. In conjunction with the sale of our Minnesota tire recycling operations, we terminated this long term land and building lease agreement and realized a gain on termination of the lease of \$124,627 which is included in income from discontinued operations for the three months ended December 31, 2008. In addition, included in income from discontinued operations for the three months ended December 31, 2008 is the remaining unamortized gain of \$265,570 associated with a 2004 sale lease back transaction associated with this property. Previously, we had been amortizing a gain of \$437,337 as income ratably over the lease term.

Net sales and income from discontinued tire recycling operations were as follows:

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10-Q

(Unaudited)

7. Inventory

Raw material inventory primarily consists of dual fuel conversion components and crumb rubber used in production of molded rubber products by our molded recycled rubber products operation. Work in progress includes materials, labor and direct overhead associated with incomplete dual fuel conversion projects. Finished goods primarily consist of molded products and playground equipment. All inventory is valued at the lower of cost or market on the first-in first-out (FIFO) method. Inventory consists of the following:

	March 31, 2010	September 30, 2009	
Raw materials	\$ 159,023	\$ 86,132	
Work in progress	24,342	448,023	
Finished goods	1,003,594	784,994	
Total inventory	\$ 1,186,959	\$ 1,319,149	

8. Property, Plant and Equipment

Property, plant and equipment consists of the following:

	March 31, 2010	September 30, 2009	Estimated Useful Lives
Land	\$ 175,000	\$ 175,000	--
Buildings and improvements	285,000	285,000	10 - 20 years
Machinery and equipment	1,942,618	1,746,559	5 - 10 years
Furniture and fixtures	73,363	59,954	3 - 5 years
	2,475,981	2,266,513	
Less accumulated depreciation	(1,469,666)	(1,394,155)	
Property, plant and equipment, net	\$ 1,006,315	\$ 872,358	

9. Notes Payable/Credit Facilities

June 2006 Laurus Credit Facility

In June 2006, we entered into a \$16 million amended and restated credit facility with Laurus Master Fund, Ltd. The credit facility consisted of a \$5 million non-convertible secured revolving note and an \$11 million secured

non-convertible term note. All amounts due to Laurus under the revolving note (\$3.4 million) and term note (\$9.4 million plus accrued interest of \$35,511) were paid off on November 17, 2008 in conjunction with the sale of our tire recycling business, and this credit facility has been terminated.

10. Litigation

As previously disclosed, substantially all of GreenMan Technologies of Georgia, Inc.'s assets were sold as of March 1, 2006. Several vendors of this subsidiary commenced legal action, primarily in the state courts of Georgia, in attempts to collect past due amounts, plus accruing interest, attorneys' fees, and costs, all relating to various services rendered to these subsidiaries. Although GreenMan Technologies, Inc. itself was not a party to any of these vendor relationships, two of the plaintiffs, representing approximately \$900,000 of these claims named GreenMan Technologies, Inc. as a defendant along with GreenMan Technologies of Georgia, Inc.

On June 27, 2008, GreenMan Technologies of Georgia, Inc. filed for liquidation under Chapter 7 of the federal bankruptcy laws in the Bankruptcy Court of the Middle District of Georgia and a trustee was appointed. As a result of the bankruptcy proceedings all pending litigation was stayed and GreenMan Technologies of Georgia, Inc. was de-consolidated from our financial statements as of June 30, 2008.

GreenMan Technologies, Inc.
Notes to Condensed Interim Consolidated Financial Statements
Quarter Ended March 31, 2010 and 2009
(Unaudited)

10. Litigation – (Continued)

During fiscal 2008, one vendor secured a summary judgment for approximately \$890,000 against GreenMan Technologies, Inc. While GreenMan Technologies, Inc. believed it had valid defenses to these claims, as well as against any similar or related claims that may be made against us in the future, we did not receive proper notice of the summary judgment against us and therefore were unable to timely appeal the judgment. Management therefore determined it to be in the best interests of GreenMan Technologies, Inc. to reach settlement on this judgment rather than to attempt to appeal the judgment for lack of proper notice. On March 28, 2008, GreenMan Technologies, Inc. agreed to a cash settlement of \$450,000 with \$100,000 paid upon signing the settlement agreement and nine additional monthly payments of \$38,889 commencing on April 30, 2008 and ending on December 31, 2008. In January, 2009, after receipt of the final payment, the plaintiff marked the judgment satisfied with the appropriate courts, at which time we recorded a gain on settlement of approximately \$161,000 relating to amounts accrued for but forgiven per the agreement and which are included in income from discontinued operations. On April 15, 2009, we settled the only remaining Georgia legal action involving GreenMan, executing a settlement and general release agreement with the plaintiff in return for a payment of \$100,000, which is included in the loss from discontinued operations for the fiscal year ended September 30, 2009.

In April 2009, Jacquelyn M. Cyronis filed a complaint in the United States District Court for the Middle District of Georgia against MART Management, Inc., GreenMan and Tires Into Recycled Energy & Supplies, Inc. (“TIRES”), following a death of an individual employed by TIRES resulting from a fire at a tire recycling facility in Georgia in 2007. MART Management, Inc. was the owner of the premises at the time of the incident and leased the property to us. We in turn, had subleased the property to TIRES. Pursuant to the terms of the March 2001 lease agreement, we have agreed to indemnify MART against such claims. We believe that we have substantial defenses against the plaintiff’s claims and are contesting the matter vigorously through our insurance company.

11. Stockholders’ Equity

Common Stock

In March 2010, a director exercised options to purchase 36,000 shares of common stock at prices ranging from \$.33 to \$.40 per share.

Stock Options

Effective October 1, 2006, we adopted the provisions of ASC 718 “Stock Compensation” for our share-based compensation plans. We adopted ASC 718 using the modified prospective transition method. Under this transition method, compensation cost recognized includes (a) the compensation cost for all share-based awards granted prior to the effective date of ASC 718, but not yet vested, as of October 1, 2006, based on the grant-date fair value estimated and (b) the compensation cost for all share-based awards granted subsequent to September 30, 2006, based on the grant-date fair value estimated in accordance with the provisions of ASC 718. In addition, we have used the vesting term for determining expected terms on stock options for calculating expense as our stock option exercise experience does not provide a reasonable basis for an estimated expected option term. Amortization of stock compensation expense for the three and six months ended March 31, 2010 was \$39,387 and \$75,528, respectively, and \$32,565 and \$61,731 for the three and six months ended March 31, 2009, respectively. The unamortized compensation expense at

March 31, 2010 was \$477,892 and will be amortized over a weighted average remaining amortizable life of approximately 4 years.

During the six months ended March 31, 2009, we granted options to our directors and management to purchase an aggregate of 600,000 shares of our common stock at an exercise price of \$.33 per share (the closing price of our stock on the date of grant). The options were granted under our 2005 Stock Option Plan, have a ten-year term and vest equally over a five-year period from date of grant. The fair value of the options at the date of grant in aggregate was \$136,000, which was determined on the date of grant using the Black-Scholes option-pricing model with the following weighted average assumptions: dividend yield of 0%; risk-free interest rates of approximately 2.3%; expected volatility based on historical trading information of 87% and expected term of 5 years.

On March 24, 2009, we purchased and retired warrants to purchase 4,811,905 shares of common stock with an exercise price of \$.01 per share held by our former secured lender, Laurus Master Fund, Ltd. for \$700,000 in cash, or approximately \$0.145 per share.

During the three months ended March 31, 2010, we granted options to management to purchase an aggregate of 300,000 shares of our common stock at an exercise price of \$.36 per share (the closing price of our stock on the date of grant). The options were granted under the 2005 Stock Option Plan, have a ten-year term and vest equally over a five-year period from date of grant. The fair value of the options at the date of grant in aggregate was \$74,300 which was determined on the date of grant using the Black-Scholes option-pricing model with the following weighted average assumptions; dividend yield of 0%; risk-free interest rates of approximately 2.3%; expected volatility based on historical trading information of 87% and expected term of 5 years.

GreenMan Technologies, Inc.
Notes to Condensed Interim Consolidated Financial Statements
Quarter Ended March 31, 2010 and 2009
(Unaudited)

12. Income Taxes

As a result of the gain to be realized in fiscal 2009 from the sale of the tire recycling operations and anticipated overall results for fiscal 2009, we have recorded a provision for state and federal income of \$5.5 million during the six months ended March 31, 2009 using an effective overall tax rate of 30% (which takes into account certain state net operating loss limitations). This amount is included in the gain on disposal of discontinued operations during the six months ended March 31, 2009. We completed the final purchase accounting reconciliation during the three months ended September 30, 2009 and recorded an additional \$620,000 of income tax expense associated with this divestiture.

Historically we have provided a valuation reserve equal to 100% of our potential deferred tax benefit due to the uncertainty of our ability to realize the anticipated benefit given our historical losses. As a result of the estimated gain to be realized in fiscal 2009 from the sale of the tire recycling operations and anticipated overall results for fiscal 2009, we expect to be able to realize the benefit of a portion of our federal net operating loss carry-forwards. Using an effective overall tax rate of 30% (which takes into account certain state net operating loss limitations) we have recognized a change in the valuation allowance of \$5.3 million during the fiscal year ended September 30, 2008 based on the estimated gain associated with the November 2008 sale of our tire recycling operations. This deferred asset was utilized during the six months ended March 31, 2009.

13. Related Party Transactions

On November 18, 2008 we entered into a four-month (extended in March 2009 on a month-to-month basis) consulting agreement at a rate of \$7,500 per month with a company owned by one of our directors who also serves as the Chairman of our Compensation committee. The consulting firm is currently providing assistance in the areas of due diligence support, "green" market opportunity identification and evaluation, Board of Director candidate identification and evaluation and other services as our Board may determine.

14. Segment Information

Today, we have two reportable operating segments: (1) molded recycled rubber products and (2) dual fuel conversion operations (See Note 2). Each operating segment has its respective management team. Prior to November 17, 2008, we also had tire recycling operations. Our business changed substantially in November 2008, when we sold substantially all of the assets of our tire recycling operations. The tire recycling operations were located in Savage, Minnesota and Des Moines, Iowa and collected, processed and marketed scrap tires in whole, shredded or granular form.

The molded recycled rubber products operation specializes in designing, developing, and manufacturing of environmentally responsible products using recycled materials, primarily recycled rubber and providing innovative playground design, equipment and services that provide schools and other political subdivisions viable solutions for safety, compliance, and accessibility.

Our dual fuel conversion operations provide a unique external fuel delivery enhancement system which converts existing diesel engines into more efficient and environmentally friendly engines that have the flexibility to run on: (1) diesel fuel and compressed natural gas; (2) diesel fuel and bio-methane; or (3) 100% on diesel fuel depending on the

circumstances.

Our Chief Executive Officer has been identified as the chief operating decision maker (CODM) as he assesses the performance of the segments and decides how to allocate resources to the segments. Income (loss) from operations is the measure of profit and loss that our CODM uses to assess performance and make decisions. Assets are not a measure used to assess the performance of the company by the CODM; therefore we will report assets by segment in our disclosures. Income (loss) from operations represents the net sales less the cost of sales and direct

GreenMan Technologies, Inc.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This Quarterly Report on Form 10-Q contains certain statements that are "forward-looking" within the meaning of the Private Securities Litigation Reform Act of 1995 (the "Litigation Reform Act"). These forward looking statements and other information are based on our beliefs as well as assumptions made by us using information currently available.

The words "anticipate," "believe," "estimate," "expect," "intend," "will," "should" and similar expressions, as they relate to intended to identify forward-looking statements. Such statements reflect our current views with respect to future events, are subject to certain risks, uncertainties and assumptions, and are not guaranties of future performance. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein as anticipated, believed, estimated, expected, intended or using other similar expressions.

In accordance with the provisions of the Litigation Reform Act, we are making investors aware that such forward-looking statements, because they relate to future events, are by their very nature subject to many important factors that could cause actual results to differ materially from those contemplated by the forward-looking statements contained in this Quarterly Report on Form 10-Q. Important factors that could cause actual results to differ from our predictions include those discussed under "Risk Factors" and this "Management's Discussion and Analysis". Although we have sought to identify the most significant risks to our business, we cannot predict whether, or to what extent, any of such risks may be realized, nor can there be any assurance that we have identified all possible issues which we might face. In addition, assumptions relating to budgeting, marketing, product development and other management decisions are subjective in many respects and thus susceptible to interpretations and periodic revisions based on actual experience and business developments, the impact of which may cause us to alter our marketing, capital expenditure or other budgets, which may in turn affect our financial position and results of operations. For all of these reasons, the reader is cautioned not to place undue reliance on forward-looking statements contained herein, which speak only as of the date hereof. We assume no responsibility to update any forward-looking statements as a result of new information, future events, or otherwise except as required by law.

The following information should be read in conjunction with the unaudited consolidated financial statements and the notes thereto included in Item 1 of this Quarterly Report, and the audited consolidated financial statements and notes thereto and Management's Discussion and Analysis of Financial Condition and Results of Operations contained in our Annual Report on Form 10-K, as amended filed for the fiscal year ended September 30, 2009.

Introduction

As described in Item 1, above, our business changed substantially in November 2008, when we sold substantially all of the assets of our tire recycling operations. Because we operated our tire recycling assets during only a portion of the fiscal year covered by this Quarterly Report on Form 10-Q we have included in this report relevant information on this business segment but have classified its assets, liabilities and results of operations as discontinued operations for all periods presented in the accompanying consolidated financial statements. On July 27, 2009 we purchased substantially all the dual fuel conversion operating assets of American Power Group (excluding its dual fuel patent). The results described below include the operations of American Power Group since July 27, 2009.

Results of Operations

Three Months ended March 31, 2010 Compared to the Three Months ended March 31, 2009

Net sales from continuing operations for the three months ended March 31, 2010 increased \$150,494 or 154% to \$248,004 as compared to net sales of \$97,510 for the three months ended March 31, 2009. The increase is primarily

attributable to higher playground tile and equipment sales in the Midwestern region of the United States. A majority of our revenue is derived from specific one-time installations with minimal follow-on revenue from the installed project, thus making quarterly revenue comparison particularly difficult. We anticipate increased revenue during our seasonally stronger second half of the fiscal year due to warmer weather conditions and school vacation closures, which allow for easier installation conditions. In addition, our new American Power Group dual fuel subsidiary recorded revenue of \$96,266 with during the three months ended March 31, 2010.

During the three months ended March 31, 2010 we incurred a negative gross profit of \$83,385, primarily due to the inclusion of \$123,212 of unabsorbed costs in excess of revenues associated with our dual fuel subsidiary. Due to higher product revenue and increased production during the quarter, our recycled rubber products operation had a gross profit of \$39,827 or 26% of net sales. During the three months ended March 31, 2009, we incurred a negative gross profit of \$111,445, primarily due to management's decision to produce a minimal amount of playground tiles due to anticipated seasonally slower tile sales and adequate existing product inventory levels. As a result, we were unable to fully absorb all manufacturing overhead costs which contributed to the negative gross profit during the quarter.

Selling, general and administrative expenses for the three months ended March 31, 2010 increased \$611,803 to \$1,336,319 as compared to \$724,516 for the three months ended March 31, 2009. The increase was primarily attributable to the inclusion of \$548,710 in costs associated with increased sales and marketing initiatives for our American Power Group subsidiary as well as increased professional expenses relating to business development initiatives which offset decreased performance based incentives.

Expenses for internal research and development projects relating to the introduction of new dual fuel products, enhancements made to the current family of dual fuel products, and research and development overhead was \$213,154 for the three months ended March 31, 2010.

As a result of the foregoing, our loss from continuing operations after income taxes increased \$904,189 to \$1,720,774 for the three months ended March 31, 2010 as compared to \$816,585 for the three months ended March 31, 2009.

During the quarter ended March 31, 2009, we recognized a loss from Georgia discontinued operations of \$100,000 associated with settlement agreement with a former Georgia vendor.

Our net loss for the three months ended March 31, 2010 was \$1,720,774 or \$.05 per basic share as compared to a net loss of \$916,585 or \$.03 per basic share for the three months ended March 31, 2009.

Six Months ended March 31, 2010 Compared to the Six Months ended March 31, 2009

Net sales from continuing operations for the six months ended March 31, 2010 decreased \$71,655 or 9% to \$687,860 as compared to net sales of \$759,515 for the six months ended March 31, 2009. The decrease is attributable to lower playground tile and equipment sales in the Midwestern region of the United States. A majority of our revenue is derived from specific one-time installations with minimal follow on revenue from the installed project, thus making quarterly revenue comparison particularly difficult. We anticipate increased revenue during our seasonally stronger second half of the fiscal year due to warmer weather conditions and school vacation closures which allow for easier installation conditions. In addition, our new American Power Group dual fuel subsidiary recorded \$161,378 of revenue during the six months ended March 31, 2010.

During the six months ended March 31, 2010 we incurred a negative gross profit of \$337,705 primarily due to the inclusion of \$446,499 of unabsorbed costs in excess of revenues associated with our dual fuel subsidiary. Due to higher product revenue and increased production during the quarter, our recycled rubber products operation had a gross profit of \$108,794 or 21% of net sales. During the six months ended March 31, 2009, we had a gross profit of \$57,400 or 8% of net revenue. The gross profit was low due to management's decision to produce a minimal amount of playground tiles during the first half of fiscal 2009 based on seasonally slower tile sales and adequate existing product inventory levels. As a result, we unable to fully absorb all manufacturing overhead costs which contributed to the lower gross profit during the quarter.

Selling, general and administrative expenses for the six months ended March 31, 2010 increased \$625,773 to \$2,527,891 as compared to \$1,902,118 for the six months ended March 31, 2009. The increase was primarily

attributable to the inclusion of \$909,444 in costs associated with increased sales and marketing initiatives for our American Power Group subsidiary as well as increased professional expenses relating to business development initiatives, which offset decreased performance based incentives.

Expenses for internal research and development projects relating to the introduction of new dual fuel products, enhancements made to the current family of dual fuel products, and research and development overhead were \$291,513 for the six months ended March 31, 2010.

As a result of the foregoing, our loss from continuing operations after income taxes increased \$1,420,610 to \$3,314,724 for the six months ended March 31, 2010 as compared to \$1,894,114 for the six months ended March 31, 2009.

During the six months ended March 31, 2009 we recognized a gain on sale of discontinued operations net of income taxes (\$5.5 million), of \$14,347,445 associated with the sale of our tire recycling business in November 2008. The income from discontinued operations for the six months ended March 31, 2009 relates primarily to the net results of our tire recycling operations including approximately \$391,000 of one-time gains associated with the termination of a long-term land and building lease agreement in Minnesota. In addition, during the six months ended March 31, 2009, we recognized income from Georgia discontinued operations of approximately \$44,000 relating to the net effects of two settlement agreements with two former Georgia vendors.

Our net loss for the six months ended March 31, 2010 was \$3,314,724 or \$.10 per basic share as compared to net income of \$12,771,036 or \$.41 per basic share for the six months ended March 31, 2009.

Liquidity and Capital Resources

As of March 31, 2010, we had \$2,942,500 in cash, cash equivalents, certificates of deposit, marketable investments and net working capital of \$2,302,561, primarily due to the sale of our tire recycling business. Our tire recycling business has historically been the source of substantially all of our revenue and cash flow.

During the past two fiscal years, Green Tech Products has incurred operating losses of approximately \$800,000 per year and had negative cash flow from operations. During the six months ended March 31, 2010, Green Tech Products lost approximately \$552,000. We are currently evaluating several new types of products and marketing agreements outside the playground and parks markets that would use Green Tech Product's patented cold-cure process and exclusive school board contract network.

Since the July 2009 acquisition of American Power Group's dual fuel conversion operations, we have also made a significant investment in sales and marketing initiatives intended to promote American Power Group's dual fuel conversion technology and establish broader market presence. Since the date of acquisition to the end of the fiscal 2009, American Power Group incurred an operating loss of approximately \$480,000. American Power Group had an operating loss of approximately \$1,680,000 during the six months ended March 31, 2010.

In November 2008, our credit facility with Laurus Master Fund, Ltd. was terminated and we have not yet established any new corporate-wide credit facility. We understand that achieving positive cash flow from operations as well as sustained profitability will be key components necessary to re-establish a new credit facility. Based on our March 31, 2010 results and traditional credit facility advance rates of 75% of eligible accounts receivable and 50% of eligible inventory, we believe we could have an additional \$832,000 of available liquidity through a traditional credit facility. Management is currently evaluating several financing alternatives that would enhance our financial position and provide growth capital to supplement our existing working capital position. No assurances can be given that any such financing will be concluded in the near future, on terms favorable to us, or at all.

We understand our continued existence is dependent on our ability to generate positive operating cash flow, achieve profitability on a sustained basis for all operations and we anticipate improved performance during the warmer second half of the fiscal year which is when a majority of playground and athletic surfaces are typically installed. Based on our fiscal 2010 budget and existing cash and marketable investments, we believe we will be able to satisfy our cash requirements through the end of fiscal 2010. If Green Tech Products and American Power Group are unable to achieve sustained profitability and we are unable to obtain additional financing to supplement our cash position, our ability to maintain our current level of operations could be materially and adversely affected. There is no guarantee we will be able to achieve profitability of either business.

The Consolidated Statements of Cash Flows reflect events for the six months ended March 31, 2010 and 2009 as they affect our liquidity. During the six months ended March 31, 2010, net cash used in operating activities was

\$3,331,846. Our net loss for the six months ended March 31, 2010 was \$3,314,724, with our cash flow being positively impacted by the following non-cash expenses and changes to our working capital: \$302,271 of depreciation and net amortization and a decrease of \$995,352 in accounts receivable, inventory and other current assets. This was offset by a decrease of \$1,288,561 in accounts payable and accrued expenses. During the six months ended March 31, 2009, net cash used by operating activities was \$2,340,915. Our net income for the six months ended March 31, 2009 was \$12,771,036, reflecting a \$19,847,445 gain on sale of our tire recycling operations and the application of \$5.3 million of non-cash income taxes. Our cash flow was positively impacted by the following non-cash expenses and changes to our working capital: \$690,744 of depreciation and amortization which was offset by an \$811,606 increase in other current assets and a decrease of \$934,655 in accounts payable and accrued expenses.

Net cash provided by investing activities was \$1,915,132 for the six months ended March 31, 2010, reflecting the maturing of a certificate of deposit as well as the sale of marketable investments which offset the purchase of machinery and equipment. Net cash provided by investing activities was \$23,873,994 for the six months ended March 31, 2009, reflecting net proceeds from the sale of our scrap tire processing operations of approximately \$27.5 million. During the six months ended March 31, 2009, we purchased \$3 million of marketable investments and used \$700,000 to purchase from our former secured lender, warrants to purchase approximately 4.8 million shares of our common stock.

Net cash used in financing activities was \$58,204 during the six months ended March 31, 2010, reflecting the normal debt payments and the proceeds from new notes payable. Net cash used by financing activities was \$16,791,267 during the six months ended March 31, 2009, reflecting the payoff of approximately \$12.85 million associated with our Laurus credit facility and approximately \$3.4 million of other debt and capital lease obligations associated with our discontinued scrap tire operations and \$534,320 of related party debt.

Effects of Inflation and Changing Prices

Generally, we are exposed to the effects of inflation and changing prices. Given that our dual fuel conversion technology replaces a certain percentage of diesel fuel with natural gas, we would be impacted by any material change in the net fuel savings between the two fuels (for example, if diesel fuel prices decrease and natural gas prices increase). We have generally been unaffected by interest rate changes in fiscal 2009 and 2010, because we no longer maintain any floating-rate debt.

Environmental Liability

There are no known material environmental violations or assessments.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Not required pursuant to Item 305(e) of Regulation S-K.

Item 4. Controls and Procedures

Our management, with the participation of our chief executive officer and chief financial officer, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) as of March 31, 2010. In designing and evaluating our disclosure controls and procedures, we recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applied its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on this evaluation, our chief executive officer and chief financial officer concluded that as of March 31, 2010, our disclosure controls and procedures were (1) designed to ensure that material information relating to the company, including our consolidated subsidiaries, is made known to our chief executive officer and chief financial officer by others within those entities, particularly during the period in which this report was being prepared and (2) effective at the reasonable assurance level.

No change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) occurred during the fiscal quarter ended March 31, 2010 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

We are subject to routine claims from time to time in the ordinary course of our business. We do not believe that the resolution of any of the claims that are currently known to us will have a material adverse effect on our company or on our financial statements

Item 1A. Risk Factors

There have not been any material changes from the risk factors previously disclosed under Item 6 of our Annual Report on Form 10-K, as amended for the fiscal year ended September 30, 2009.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

On March 2, 2010, we issued 36,000 shares of our unregistered common stock valued at \$12,300 to a director upon exercise of stock options. The issuance of these shares is exempt from registration under the Securities Act of 1933 pursuant to Section 4(2) of the Securities Act.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Submission of Matters to a Vote of Security Holders

We conducted our Annual Meeting of Stockholders on March 31, 2010. The matters considered at the meeting and the results for each vote were as follows:

	For	Against	Abstain
Vote 1 – Election of the Board of Directors			
Maurice E. Needham	25,882,029	404,456	N/A
Lew Boyd	25,876,629	409,856	N/A
Dr. Allen Kahn	26,043,129	243,356	N/A
Lyle Jensen	26,623,941	237,456	N/A
Kevin Tierney, Sr.	25,882,529	403,956	N/A
Vote 2 – To consider and act upon a proposal to amend the 2005 Stock Option Plan to increase the authorized shares to be issued from 3.5 million to 6 million			
	24,444,299	1,822,991	19,195
Vote 3 – To Ratify the selection of Schechter, Dokken, Kanter, Andrews & Selcer, Ltd. as our independent auditors for the fiscal year ended September 30, 2010			
	26,081,959	101,634	102,992

Item 5. Other Information

None.

Item 6. Exhibits

The following exhibits are filed with this document:

Exhibit No.	Description
10.1 (1)	-- 2005 Stock Option Plan, as amended
31.1 (1)	-- Certification of Chief Executive Officer pursuant to Rule 13a-14(a) or Rule 15d-14(a)
31.2 (1)	-- Certification of Chief Financial Officer pursuant to Rule 13a-14(a) or Rule 15d-14(a)
32.1 (1)	-- Certification of Chief Executive Officer under 18 U.S.C. Section 1350
32.2 (1)	-- Certification of Chief Financial Officer under 18 U.S.C. Section 1350
