## TOWER SEMICONDUCTOR ANNOUNCES SALE OF ALL OF ITS SHARES IN SAIFUN SEMICONDUCTOR

TOWER TO SELL SAIFUN SHARES FOR \$39 MILLION

TOWER TO RECORD A \$32 MILLION CAPITAL GAIN

MIGDAL HAEMEK - ISRAEL - DECEMBER 8, 2004 - Tower Semiconductor Ltd. (Nasdaq: TSEM; TASE: TSEM), today announced that it has agreed to sell all of its holdings in Saifun Semiconductor to a U.S. based private equity investor for approximately \$39 million in cash. As agreed, Tower may receive additional payments through August 2005 subject to certain future events.

Following the transaction, Tower will record a \$32 million capital gain in the fourth quarter. The 1997 Non Volatile Memory (NVM) technology agreement between Tower and Saifun remains unchanged.

"This transaction and its timing is an important step in our Fab 2 financing plan and, together with the recently announced cost reduction measures, would enable us to focus on growing our businesses," said Carmel Vernia, chairman and chief executive officer of Tower. "We purchased our position in Saifun for \$6 million and it has been an excellent performer for us over the years."

The closing of the transaction is expected within the next few weeks. The transaction is subject to the rights of first refusals held by Saifun's other shareholders and receipt of regulatory approvals.

### ABOUT TOWER SEMICONDUCTOR LTD.

Tower Semiconductor LTD. is a pure-play independent wafer foundry established in 1993. The company manufactures integrated circuits with geometries ranging from 1.0 to 0.13 micron; it also provides complementary technical services and design support. In addition to digital CMOS process technology, Tower offers advanced non-volatile memory solutions, mixed-signal and CMOS image-sensor technologies. To provide world-class customer service, the company maintains two manufacturing facilities: Fab 1 has process technologies from 1.0 to 0.35 micron and can produce up to 16,000 150mm wafers per month. Fab 2 features 0.18-micron and below process technologies, including foundry-standard technology. When fully equipped, Fab 2 is expected to offer full production capacity of 33,000 200mm wafers per month. The Tower Web site is located at [www.towersemi.com](http://www.towersemi.com).
