**SILICOM EXTENDS INTO ADDITIONAL MARKETS:
ACHIEVES DESIGN WINS WITH TELECOM,
STORAGE AND ACCELERATION APPLIANCE
MANUFACTURERS**

3 New Design Wins Together With about \$400K in Initial Orders

KFAR SAVA, Israel June 9, 2005 Silicom Ltd. (Nasdaq: SILCF) today announced that it has achieved three new design wins, and received initial orders totaling about \$400,000, for its Multiport Gigabit Ethernet Adapter products from manufacturers in three additional market segments, demonstrating the excellent match of its flexible products with a wide range of connectivity needs:

A leading VAS (Value-Added Services) solution provider will use Silicom's Quad-Port Gigabit Ethernet Adapters to increase the throughput and connectivity of its server-based SMS solutions.

A manufacturer of advanced storage solutions will use Silicom's Quad-Port Gigabit Ethernet Adapters to maximize inter-server throughput.

A manufacturer of data acceleration appliances will use Silicom's Bypass Gigabit Ethernet Adapter to guarantee data availability in times of appliance failure, to enhance traffic throughput and to provide multiport connectivity.

We are excited by the continuously growing momentum of our multi-port Gigabit Ethernet server adapter business, said Mr. Shaikha Orbach, President and CEO of Silicom. The strategic importance of our success in the high-growth Security Appliance sector, one of our first target markets, is illustrated by last month's Design Win with a Tier 1 security industry player, which has already resulted in \$660,000 of orders, most of which has already been delivered. Now, as demonstrated by these three new Design Wins, we are expanding our horizons to additional market segments which also need our high performance connectivity solutions. We believe that all these markets and more represent significant long-term potential that we are only beginning to address.

Edgar Filing: SILICOM LTD - Form 6-K

Silicom Ltd. is an industry-leading provider of high-performance network connectivity solutions. The Company's flagship products include a variety of multi-port Gigabit Ethernet server adapters and innovative BYPASS adapters designed to increase throughput and availability of security appliances and other mission-critical gateway applications. Silicom also offers a broad range of customizable PC Cards, PCI cards and USB products. For more information, please visit: www.silicom.co.il.
