## **Nova Sees Best Stand-Alone Quarter of All Times**

### *Multiple Stand-alone metrology orders received from several customers*

**REHOVOT, Israel, June 22, 2009** - Nova Measuring Instruments Ltd. (NASDAQ: NVMI) provider of leading edge stand-alone metrology and the market leader of integrated metrology solutions to the semiconductor process control market, today announced that orders for its stand-alone metrology during the second quarter set an all time record. The orders originated from three different customers. The tools are to be utilized for Optical CD and thin film measurements in CMP, front end of line and back end of line etch as well as deposition at advanced technology nodes, down to 45nm.

This is clearly a significant milestone for the Company said Gabi Seligsohn, President and CEO of Nova. We set out to prove that we have a valuable technology for semiconductor manufacturers and our penetration efforts are bearing fruit. The stand-alone market represents a meaningful growth engine for Nova, especially in light of the average selling prices which are significantly higher than in the integrated metrology segment. The diversity of customers as well as the deployment at different process steps both in production and in R&D, demonstrate that we are well positioned to grow our stand-alone market share as the industry continues to recover from the current downturn. I appreciate the fact that this achievement is also due to the confidence of our customers in Nova and I look forward to continue providing them with innovative technologies and dedicated support .

The Company also reported that it expects to deliver and install the ordered tools within the second and third quarters of 2009 fiscal year.

Nova's Optical CD solutions deploy normal incidence Scatterometry technology to measure fine profile details of the semiconductor structure with high accuracy and repeatability. Nova's systems feature industry leading throughput, accuracy and fleet (tool-to-tool) matching making them the best cost effective Optical CD solution for advanced technology nodes down to 22nm. For technology nodes of 32nm and above the NovaScan stand-alone platform offers industry leading throughput and full compatibility with Nova's Integrated Metrology. The Modular Metrology Nova T500 offers the ability to combine metrology units to a throughput of 250WPH. Improved metrology, easy and cost effective extendibility make the Nova T500 an excellent Optical CD metrology tool for technology nodes of 22nm and beyond.

---

## Edgar Filing: NOVA MEASURING INSTRUMENTS LTD - Form 6-K

**About Nova:** Nova Measuring Instruments Ltd. develops, produces and markets advanced integrated and stand alone metrology solutions for the semiconductor manufacturing industry. Nova is traded on the NASDAQ & TASE under the symbol NVMI. The Company's website is [www.nova.co.il](http://www.nova.co.il).

*This press release contains forward-looking statements within the meaning of safe harbor provisions of the Private Securities Litigation Reform Act of 1995 relating to future events or our future performance, such as statements regarding trends, demand for our products, expected deliveries, transaction, expected revenues, operating results, earnings and profitability. Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied in those forward looking statements. These risks and other factors include but are not limited to: unanticipated consequences of the global economic crisis, our dependency on a single integrated process control product line; the highly cyclical nature of the markets we target; our inability to reduce spending during a slowdown in the semiconductor industry; our ability to respond effectively on a timely basis to rapid technological changes; risks associated with our dependence on a single manufacturing facility; our ability to expand our manufacturing capacity or marketing efforts to support our future growth; our dependency on a small number of large customers and small number of suppliers; risks related to our intellectual property; changes in customer demands for our products; new product offerings from our competitors; changes in or an inability to execute our business strategy; unanticipated manufacturing or supply problems; changes in tax requirements; changes in customer demand for our products; risks related to currency fluctuations; and risks related to our operations in Israel. We cannot guarantee future results, levels of activity, performance or achievements. The matters discussed in this press release also involve risks and uncertainties summarized under the heading "Risk Factors" in Nova's Annual Report on Form 20-F for the year ended December 31, 2008 filed with the Securities and Exchange Commission on March 30, 2009. These factors are updated from time to time through the filing of reports and registration statements with the Securities and Exchange Commission. Nova Measuring Instruments Ltd. does not assume any obligation to update the forward-looking information contained in this press release.*
