**Comments of Management**

Commenting on the results, Shaikhe Orbach, President and CEO, said, "We are very pleased to report another strong quarter for Silicom – a period during which we achieved 66% growth in revenues, 84% increase in gross profit, 822% increase in operating income and 440% increase in net income as compared year-over-year to the second quarter of 2009."

---

“These satisfying results reflect the IT market’s bottomless need for faster response times and increased bandwidth in an era of cloud computing, virtualization and Internet-based applications, and the industry’s growing awareness of our products and technologies as effective solutions to bottleneck challenges. This reputation, combined with our continued investment in sales, marketing and R&D, is paying off with a steady increase in our sales and profits.”

Mr. Orbach continued, "The positive factors that have been driving our results for the last few quarters make us optimistic regarding our future potential. For our traditional product lines, our growth is being driven in three ways. First, many of our existing customers continue to increase the size of their ongoing orders. Second, some of our larger customers have begun integrating additional Silicom products into their product lines. Third, we continue to add new companies to our customer base, and this expands our platform for ongoing repeat orders. In parallel, we are also seeing the beginning of market traction for our External Bypass Switches, encryption products and Redirector cards, as demonstrated by an increased flow of orders within all of our growth areas.

“As to SETAC, the newest and an exciting part of our strategy, we are increasingly confident regarding the market need as well as our marketing approach. During the quarter, we announced another SETAC win with a very important customer, while also continuing to build out the pipeline of customers who are evaluating and/or considering it for their next generation appliances. The size and depth of this pipeline leads us to believe that the SETAC will succeed in generating significant, growing sales over the long term.”

Mr. Orbach concluded, “Taken as a whole, the results we have achieved so far, the strengthening of the growth factors driving our business and the potential of our new product lines make us feel well-positioned to generate additional growth as we enter the second half of 2010.”
