press release

**November 16, 2009**

**APPRAISAL WELL CONFIRMS WESTERN EXTENSION OF  
THE  
KASKIDA FIELD IN THE  
GULF OF MEXICO**

BP  
today  
confirmed that an appraisal well to test a western extension of the Kaskida field has confirmed oil  
in Lower Tertiary reservoirs five  
miles to the west of the  
Kaskida  
discovery well. The well, drilled to a total depth of 32,500 feet, is located in  
Keathley Canyon block 291  
in 5,675 feet of water and  
250 miles southwest of  
New Orleans

Appraisal activities will continue with a WATS  
(wide azimuth towed streamer)  
seismic acquisition survey in early 2010 and a well test in 2011.

"  
This well builds on the success of our recent Tiber discovery to further strengthen BP's leading position in the  
emerging Lower Tertiary play in the US Gulf of Mexico  
,  
" said Andy Inglis, chief executive, Exploration and Production, "and  
supports the continuing growth of our deepwater Gulf of Mexico business into the second half of the next decade."

Kaskida is operated by BP, with a 70 per cent working interest  
,  
with co-owner Devon  
(30 per cent)  
.
