NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

September 30, 2007

1. BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements of Zions Bancorporation (the Parent) and its majority-owned subsidiaries (collectively the Company, we, our, us) have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Certain prior period amounts have been reclassified to conform to the current period presentation.

Operating results for the three- and nine-month periods ended September 30, 2007 are not necessarily indicative of the results that may be expected in future periods. The balance sheet at December 31, 2006 is from the audited financial statements at that date, but does not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. For further information, refer to the consolidated financial statements and footnotes thereto included in Zions Bancorporation's Annual Report on Form 10-K for the year ended December 31, 2006.

The Company provides a full range of banking and related services through banking subsidiaries in ten Western and Southwestern states as follows: Zions First National Bank (Zions Bank), in Utah and Idaho; California Bank & Trust (CB&T); Amegy Corporation (Amegy) and its subsidiary, Amegy Bank, in Texas; National Bank of Arizona (NBA), in Arizona and California; Nevada State Bank (NSB); Vectra Bank Colorado (Vectra), in Colorado and New Mexico; The Commerce Bank of Washington (TCBW); and The Commerce Bank of Oregon (TCBO).

2. CERTAIN RECENT ACCOUNTING PRONOUNCEMENTS

In February 2007, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities, including an amendment of FASB Statement No. 115*. SFAS 159 permits entities to choose to measure many financial instruments and certain other items at fair value at specified election dates. The fair value option may be applied instrument by instrument with certain exceptions and is applied generally on an irrevocable basis to the particular instrument. SFAS 159 is effective for financial statements issued for fiscal years beginning after November 15, 2007. The Company will adopt SFAS 159 effective January 1, 2008. Management is currently evaluating the impact this Statement may have on the Company's financial statements.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements*. SFAS 157 provides enhanced guidance for using fair value to measure assets and liabilities and expands disclosures about fair value measurements. The Statement impacts other accounting pronouncements that require or permit fair value measurements; however, it does not expand the use of fair value measurements in any new circumstances. SFAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. The Company will adopt SFAS 157 effective January 1, 2008. Management is currently evaluating the impact this Statement may have on the Company's financial statements.

Table of Contents

ZIONS BANCORPORATION AND SUBSIDIARIES

Additional accounting pronouncements recently adopted are discussed where applicable in the Notes to Consolidated Financial Statements.

3. ACQUISITIONS AND DIVESTITURES

Effective September 6, 2007, Amegy completed its acquisition for cash of Intercontinental Bank Shares Corporation (Intercon), including three branches located in San Antonio, Texas. Approximately \$8.3 million in goodwill, \$58 million in loans, and \$105 million in deposits, including \$98 million in core deposits, were added to the Company's balance sheet.

On January 17, 2007, we completed the acquisition of The Stockmen's Bancorp, Inc. (Stockmen's), headquartered in Kingman, Arizona. As of the date of acquisition, Stockmen's had approximately \$1.2 billion of total assets, \$1.1 billion of total deposits, and a total of 43 branches—32 in Arizona and 11 in central California. Consideration of approximately \$206.1 million consisted of 2.6 million shares of the Company's common stock plus a small amount of cash paid for fractional shares. Stockmen's parent company merged into the Parent and Stockmen's banking subsidiary merged into NBA. As of September 30, 2007, the acquisition had resulted in approximately \$115.1 million of goodwill, which is subject to adjustment as the purchase price allocation is finalized during the year following the acquisition. In June 2007, NBA entered into an agreement to sell the 11 California branches. The sale closed effective November 2, 2007 and included approximately \$168 million of loans and \$190 million of deposits.

In January 2007, Zions Bank sold the Grant Hatch insurance agency and certain other insurance assets. For the nine months ended September 30, 2007, the net pretax gain recognized in other noninterest income was approximately \$2.9 million.

4. LONG-TERM DEBT

On June 6, 2007, the Company redeemed the entire \$19.7 million net par amount of the 11.75% trust preferred securities and recognized a gain of approximately \$1.6 million. During the nine months ended September 30, 2007, the Company redeemed other trust preferred securities totaling \$15.3 million. All redemptions were made under provisions of the respective borrowing agreements.

On August 22, 2007, the Parent established a \$135 million line of credit with Amegy Bank. On August 30, 2007, the Parent renewed its line of credit with CB&T, increasing the amount from \$40 million to \$53 million. Interest on both lines is at a variable rate based on specified indices. No amounts were outstanding at September 30, 2007.

5. INCOME TAXES

Effective January 1, 2007, the Company adopted FASB Interpretation No. 48 (FIN 48), *Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109*. FIN 48 prescribes a more-likely-than-not threshold for the financial statement recognition of uncertain tax positions.

We have a liability for unrecognized tax benefits relating to uncertain tax positions primarily for various state tax contingencies in several jurisdictions. As a result of adopting FIN 48, we reduced this liability by approximately \$10.4 million at January 1, 2007 and recognized a cumulative effect adjustment as an increase to retained earnings. Our total gross unrecognized tax benefits subsequent to this adjustment were approximately \$46.3 million at January 1, 2007. Of this amount, approximately \$25.9 million (net of the federal

Table of Contents

ZIONS BANCORPORATION AND SUBSIDIARIES

benefit on state issues) relates to unrecognized tax benefits that, if recognized, would affect the effective tax rate. Gross unrecognized tax benefits that may decrease during the 12 months subsequent to September 30, 2007 could range up to approximately \$22.6 million as a result of the resolution of various state tax positions.

Interest and penalties related to unrecognized tax benefits are included in income taxes in the statement of income and amounted to approximately \$1.7 million on a gross basis for the nine months ended September 30, 2007. Gross accrued interest and penalties were approximately \$8.3 million at January 1, 2007 and \$10.0 million at September 30, 2007.

The Company and its subsidiaries file income tax returns in U.S. federal and various state jurisdictions. The Company is no longer subject to income tax examinations for years prior to 2004 for federal returns, and generally prior to 2000 for state returns.

During the first quarter of 2007, the Company surrendered certain bank-owned life insurance contracts and incurred taxes and penalties of approximately \$2.9 million, which were included in income taxes in the statement of income.

Net unrealized gains, net of reclassification to operations of \$(27,568) and income tax expense of \$3,278		6,663		6,663
Other comprehensive income (loss)	(12,912)	6,663		(6,249)
Balance, September 30, 2006	\$ (23,684)	\$ (43,601)	\$ (22,007)	\$ (89,292)

On October 22, 2007, the Company announced it had received notification from the Securities and Exchange Commission (SEC) that its patent-pending Employee Stock Option Appreciation Rights Securities (ESOARS) was sufficiently designed as a market-based method for valuing employee stock options under SFAS No. 123R, *Share-Based Payment*. The SEC staff did not object to the Company's view that the market-clearing price of ESOARS in the Company's auction conducted May 4-7, 2007 was a reasonable estimate of the fair value of the underlying employee stock options.

The Company used the results of that auction to value its employee stock options issued on May 4, 2007. The value established was \$12.06 per option, which the Company estimated was approximately 14% below its Black-Scholes model valuation on that date. For the second and third quarters of 2007, the Company used the option value to compute stock option expense included in salaries and employee benefits in the statement of income and recorded the related estimated future settlement obligation of ESOARS as a liability in the balance sheet.

Edgar Filing: ZIONS BANCORPORATION /UT/ - Form 10-Q

Net shares of common stock issued for the exercise of stock options during the nine months ended September 30, 2007 and 2006 were 1,368,982 and 1,402,523, respectively.

ZIONS BANCORPORATION AND SUBSIDIARIES

7. GUARANTEES

The following are guarantees issued by the Company (*in thousands*):

	September 30, 2007	December 31, 2006
Standby letters of credit:		
Financial	\$ 1,093,698	\$ 1,157,205
Performance	337,700	330,056
	\$ 1,431,398	\$ 1,487,261

The Company's Annual Report on Form 10-K for the year ended December 31, 2006 contains further information on these letters of credit including their terms and collateral requirements. At September 30, 2007, the carrying value recorded by the Company as a liability for these guarantees was \$5.7 million.

As of September 30, 2007, the Parent has guaranteed approximately \$300.0 million of debt issued by affiliated trusts issuing trust preferred securities.

Zions Bank provides a liquidity facility (Liquidity Facility) for a fee to Lockhart Funding, LLC (Lockhart), a qualifying special-purpose entity (QSPE) securities conduit. Lockhart purchases floating rate U.S. Government and AAA-rated securities with funds from the issuance of commercial paper. Zions Bank also provides interest rate hedging support and administrative and investment advisory services for a fee. Pursuant to the Liquidity Facility contract, Zions Bank is required to purchase securities from Lockhart to provide funds for Lockhart to repay maturing commercial paper upon Lockhart's inability to access the commercial paper market, or upon a commercial paper market disruption as specified in governing documents for Lockhart. Pursuant to the governing documents, including the liquidity agreement, if any security in Lockhart is downgraded below AA-, Zions Bank must either 1) place its letter of credit on the security, 2) obtain credit enhancement from a third party, or 3) purchase the security from Lockhart at book value. Zions Bank may incur losses in the event it is required to purchase securities from Lockhart because it would record any repurchased securities at fair value, which may be below the book value that would be paid to Lockhart.

The commitment of Zions Bank to Lockhart under the Liquidity Facility is the lesser of \$6.12 billion or the book value of Lockhart's securities portfolio, which was \$3.3 billion at September 30, 2007 and \$3.1 billion at October 31, 2007. No amounts were outstanding under this Liquidity Facility at September 30, 2007. Lockhart is limited in size by program agreements, agreements with rating agencies and by the size of the Liquidity Facility.

The book value of Lockhart's securities portfolio approximated fair value at September 30, 2007 with the exception of \$136.5 million of certain structured asset-backed collateralized debt obligations (ABS CDOs) (also known as diversified structured finance CDOs) which have some exposure to subprime and home equity mortgage securitizations. Approximately 24% (\$33.2 million) of the collateral backing the \$136.5 million of ABS CDOs is subprime mortgage securitizations and 14% (\$19.6 million) is home equity credit line securitizations. Approximately \$131.3 million of these ABS CDOs are rated by Moody's as Aaa and \$5.2 million are rated Aa1. These ABS CDOs were purchased from 2001 through 2004. At September 30, 2007, net unrealized losses on these securities were \$11.4 million.

During the third quarter of 2007, the Company purchased asset-backed commercial paper from Lockhart to provide liquidity to Lockhart during the recent disruptions in the credit markets. The amount of commercial paper included in money market investments

Table of Contents

ZIONS BANCORPORATION AND SUBSIDIARIES

on the Company's average balance sheet for the third quarter was approximately \$232 million; the maximum amount outstanding was \$909 million. The amount of the purchased commercial paper outstanding at September 30, 2007 was approximately \$500 million. Since September 30, 2007 and through November 6, 2007, this amount has been as low as \$118.5 million on October 30, 2007 and as high as \$832.8 million on November 6, 2007.

8. RETIREMENT PLANS

The following discloses the net periodic benefit cost (credit) and its components for the Company's pension and postretirement plans (*in thousands*):

	Pension benefits		Supplemental retirement benefits		Postretirement benefits		Pension benefits		Supplemental retirement benefits		Postretirement benefits	
	Three Months Ended September 30,		Three Months Ended September 30,		Three Months Ended September 30,		Nine Months Ended September 30,		Nine Months Ended September 30,		Nine Months Ended September 30,	
	2007	2006	2007	2006	2007	2006	2007	2006	2007	2006	2007	2006
Service cost (credit)	\$ 93	\$ 168	\$	\$	\$ 27	\$ (33)	\$ 337	\$ 426	\$	\$	\$ 79	\$ 32
Interest cost (credit)	2,081	2,900	211	180	79	(105)	6,323	7,200	565	539	238	66
Expected return on plan assets	(2,822)	(3,447)					(8,621)	(8,627)				
Amortization of prior service cost			54	31					117	94		
Amortization of transition liability			7	4					15	12		
Amortization of net actuarial (gain) loss	264	672	72	(3)	(67)	108	775	1,655	66	(8)	(201)	(26)
Net periodic benefit cost (credit)	\$ (384)	\$ 293	\$ 344	\$ 212	\$ 39	\$ (30)	\$ (1,186)	\$ 654	\$ 763	\$ 637	\$ 116	\$ 72

As disclosed in the Company's Annual Report on Form 10-K for the year ended December 31, 2006, the Company's contributions for individual benefit payments in the postretirement benefit plan were frozen in 2000 and participation and benefit accruals for the pension plan were frozen effective January 1, 2003.

9. OPERATING SEGMENT INFORMATION

We manage our operations and prepare management reports and other information with a primary focus on geographical area. As of September 30, 2007, we operate eight community/regional banks in distinct geographical areas. Performance assessment and resource allocation are based upon this geographical structure. Zions Bank operates 114 branches in Utah, 24 in Idaho, and one foreign branch in the Grand Cayman Islands. CB&T operates 91 branches in California. Amegy operates 87 branches in Texas and one foreign branch in the Grand Cayman Islands. NBA operates 76 branches in Arizona and 11 in California; however, the California branches of NBA were sold effective November 2, 2007 as discussed in Note 3. NSB operates 74 branches in Nevada. Vectra operates 40 branches in Colorado and one branch in New Mexico. TCBW operates one branch in the state of Washington. TCBO operates one branch in Oregon. The operating segment identified as "Other" includes the Parent, certain nonbank financial service and financial technology subsidiaries, other smaller nonbank operating units, TCBO, and eliminations of transactions between segments.

The accounting policies of the individual operating segments are the same as those of the Company. Transactions between operating segments are primarily conducted at fair value, resulting in profits that are eliminated for reporting consolidated results of operations. Operating segments pay for centrally provided services based upon estimated or actual usage of those services.

FORWARD-LOOKING INFORMATION

Statements in Management's Discussion and Analysis that are based on other than historical data are forward-looking, within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements provide current expectations or forecasts of future events and include, among others:

statements with respect to the beliefs, plans, objectives, goals, guidelines, expectations, anticipations, and future financial condition, results of operations and performance of Zions Bancorporation and its subsidiaries (collectively the Company);

statements preceded by, followed by or that include the words may, could, should, would, believe, anticipate, estimate, expect, plan, projects, or similar expressions.

These forward-looking statements are not guarantees of future performance, nor should they be relied upon as representing management's views as of any subsequent date. Forward-looking statements involve significant risks and uncertainties and actual results may differ materially from those presented, either expressed or implied, in the Management's Discussion and Analysis. Factors that might cause such differences include, but are not limited to:

the Company's ability to successfully execute its business plans, manage its risks, and achieve its objectives;

changes in political and economic conditions, including the economic effects of terrorist attacks against the United States and related events;

changes in financial market conditions, either nationally or locally in areas in which the Company conducts its operations, including without limitation, reduced rates of business formation and growth, commercial and residential real estate development and real estate prices;

fluctuations in the equity and fixed-income markets, including availability and pricing of funding;

changes in interest rates, the quality and composition of the loan and securities portfolios, demand for loan products, deposit flows and competition;

acquisitions and integration of acquired businesses;

increases in the levels of losses, customer bankruptcies, claims and assessments;

changes in fiscal, monetary, regulatory, trade and tax policies and laws, including policies of the U.S. Treasury and the Federal Reserve Board;

continuing consolidation in the financial services industry;

new litigation or changes in existing litigation;

success in gaining regulatory approvals, when required;

changes in consumer spending and savings habits;

increased competitive challenges and expanding product and pricing pressures among financial institutions;

demand for financial services in the Company's market areas;

inflation and deflation;

technological changes and the Company's implementation of new technologies;

the Company's ability to develop and maintain secure and reliable information technology systems;

legislation or regulatory changes which adversely affect the Company's operations or business;

the Company's ability to comply with applicable laws and regulations; and

changes in accounting policies or procedures as may be required by the Financial Accounting Standards Board or regulatory agencies. Additional factors that could cause actual results to differ materially from those expressed in the forward-looking statements are discussed in the 2006 Annual Report on Form 10-K of Zions Bancorporation filed with the Securities and Exchange Commission (SEC) and available at the SEC's Internet site (<http://www.sec.gov>).

Table of Contents

ZIONS BANCORPORATION AND SUBSIDIARIES

The Company specifically disclaims any obligation to update any factors or to publicly announce the result of revisions to any of the forward-looking statements included herein to reflect future events or developments.

CRITICAL ACCOUNTING POLICIES AND SIGNIFICANT ESTIMATES

The Company has made no significant changes in its critical accounting policies and significant estimates from those disclosed in its Annual Report on Form 10-K for the year ended December 31, 2006, except as noted below.

Securitization Transactions

During the third quarter of 2007, the Company updated certain valuation assumptions for retained beneficial interests under the rules contained in Emerging Issues Task Force Issue No. 99-20, *Recognition of Interest Income and Impairment on Purchased and Retained Beneficial Interests in Securitized Financial Assets*, (EITF 99-20). These rules require the Company to periodically update its assumptions used to compute estimated cash flows for its retained beneficial interests and to compare the net present value of these cash flows to the carrying value. The Company complies with EITF 99-20 by evaluating and updating its default assumption as compared to the historical credit losses and the credit loss expectation of the portfolio and its prepayment speed assumption as compared to the historical prepayment speeds and prepayment rate expectation.

The Company currently has seven small business securitizations and the retained beneficial interests for these securitizations did not require impairment charges at September 30, 2007 following the application of EITF 99-20. For the nine months ended September 30, 2007, the Company incurred impairment charges of \$9.3 million before income taxes resulting in a \$5.7 million reduction of net income or \$(0.05) per diluted share.

Employee Stock Option Expense

From May 4 7, 2007, the Company successfully conducted an auction of its Employee Stock Option Appreciation Rights Securities (ESOARS). As allowed by Statement of Financial Accounting Standards (SFAS) No. 123R, *Share-Based Payment*, the Company used the results of that auction to value its employee stock options issued on May 4. The value established was \$12.06 per option, which the Company estimates is approximately 14% below its Black-Scholes model valuation on that date. The Company recorded the related estimated future settlement obligation of ESOARS as a liability in the balance sheet.

On October 22, 2007, the Company announced it had received notification from the SEC that its ESOARS are sufficiently designed as a market-based method for valuing employee stock options under SFAS 123R. The SEC staff did not object to the Company's view that the market-clearing price of ESOARS in the Company's auction was a reasonable estimate of the fair value of the underlying employee stock options.

Valuation of Collateralized Debt Obligations Available-for-Sale Securities

During the third quarter of 2007, the Company enhanced its methodology to value certain collateralized debt obligations (CDOs), which are included in available-for-sale investment securities on the balance sheet. The enhancement to the methodology was due to changing from a restricted single dealer price quote method to a whole market price quote method. The whole market price quote method for CDOs incorporates matrix pricing, which uses the prices of similarly rated and type of securities to value comparable securities held by the Company and includes the aforementioned restricted single dealer quotes. The enhancement was made due to dealers' reluctance to provide unrestricted price quotes and to provide a more representative view of comparable instruments. The prior and current pricing methodologies are consistent with the Level 2 input pricing under the fair value measurement framework

Table of Contents

ZIONS BANCORPORATION AND SUBSIDIARIES

of SFAS No. 157, *Fair Value Measurements*. The Company will adopt SFAS 157 effective January 1, 2008. See Note 2 in the Notes to Consolidated Financial Statements for further discussion. Also see Investment Securities Portfolio for further information.

RESULTS OF OPERATIONS

Zions Bancorporation (the Parent) and subsidiaries (collectively Zions, the Company, we, our) reported net earnings applicable to common shareholders of \$132.0 million or \$1.22 per diluted share for the third quarter of 2007 compared with \$153.7 million or \$1.42 per diluted share for the third quarter of 2006. The annualized return on average assets was 1.10% for the third quarter of 2007 and 1.36% for the third quarter of 2006. For the same comparative periods, the annualized return on average common equity was 10.50% compared to 13.41%. The efficiency ratio for the third quarter of 2007 was 56.0% compared to 56.3% for the second quarter of 2007 and 55.2% for the third quarter of 2006. However the efficiency ratios for the third quarters of 2007 and 2006 were favorably impacted by the inclusion in revenue of the full amount of venture capital gains discussed under Noninterest Income. When adjusted to exclude from revenue the minority interest related to these venture capital gains, the efficiency ratio would be 56.6% and 56.1% in the third quarters of 2007 and 2006, respectively.

Net income declined during the third quarter of 2007 compared to the third quarter of 2006 mainly due to a \$41.0 million increase in the provision for loan losses, a 14 basis point decrease in the net interest margin, and an \$8.9 million decrease in trading and nonhedge derivative income. See further discussion following.

Net earnings applicable to common shareholders for the first nine months of 2007 was \$437.2 million or \$4.01 per diluted share, compared to \$436.6 million or \$4.04 per diluted share for the first nine months of 2006. For the first nine months of 2007, the annualized return on average assets was 1.24% compared to 1.34% for the same period of 2006. For the same comparative periods, the annualized return on average common equity was 11.74% compared to 13.18%. The efficiency ratio for the first nine months of 2007 was 56.7% compared to 56.9% for 2006.

The Company completed its acquisition of The Stockmen s Bancorp, Inc. effective January 17, 2007. Comparisons to 2006 include the impact of this acquisition.

Net Interest Income, Margin and Interest Rate Spreads

Taxable-equivalent net interest income for the third quarter of 2007 increased 6.7% to \$483.1 million compared with \$452.6 million for the comparable period of 2006. The increase reflects the significant increase in earning assets driven by strong loan growth over much of the last year. The incremental tax rate used for calculating all taxable-equivalent adjustments is 35% for all periods presented.

The Company s net interest margin was 4.44% for the third quarter of 2007 compared to 4.53% for the second quarter of 2007 and 4.58% for the third quarter of 2006. The margin decrease in the third quarter of 2007 compared to the second quarter of 2007 primarily resulted from the decline in average noninterest-bearing deposit balances and from the strong loan growth being funded mainly by increased nondeposit borrowings. The margin compression for the third quarter of 2007 compared to the third quarter of 2006 resulted from competitive pricing pressures, a continued shift in the interest-bearing deposit mix to more expensive products, a decline in noninterest-bearing demand deposits, and greater reliance on nondeposit borrowings.

We have experienced fairly steady pricing pressure on deposits over the past several quarters due to a variety of factors, including returns on alternative investment and savings opportunities. As a result of this pricing pressure and the change in our funding mix toward higher rate deposits and other funding sources, the average rate paid this quarter on interest-bearing funds increased 25 basis points from the third quarter of 2006. The yield on average earning assets increased 10 basis points for the third quarter of 2007 compared to the same period in 2006. The Company also continues to experience strong competition in loan pricing.

Table of Contents

ZIONS BANCORPORATION AND SUBSIDIARIES

As a result of these funding and loan pricing pressures, the spread on average interest-bearing funds for the third quarter of 2007 was 3.55%, which declined from 3.62% for the second quarter of 2007 and 3.70% for the third quarter of 2006. We expect that the net interest spread may continue to be under pressure in the next few quarters due to the persistence of these factors.

The Company expects to continue its efforts to maintain a slightly asset-sensitive position with regard to interest rate risk. However, our estimates of the Company's actual position are highly dependent upon changes in both short-term and long-term interest rates, modeling assumptions, and the actions of competitors and customers in response to those changes.

During the third quarter of 2007, the Federal Reserve lowered the federal funds rate by 50 basis points. The rate change, which came at the end of the quarter, did not have a measurable impact on the net interest margin during the third quarter of 2007. The 50 basis point decrease in the federal funds rate had an immediate impact on loans tied to the prime rate since the prime rate was lowered by 50 basis points the same day. Due to the intense competition for bank deposits, the rates paid to consumers for their deposits have been lowered less than 50 basis points. On October 31, 2007, the Federal Reserve lowered the federal funds rate by an additional 25 basis points. These competitive pressures on deposit rates may impede our ability to reprice deposits, which would have a negative impact on the net interest margin during the fourth quarter of 2007. See [Interest Rate Risk](#) for further information.

Table of Contents

ZIONS BANCORPORATION AND SUBSIDIARIES

Provisions for Credit Losses

The provision for loan losses is the amount of expense that, based on our judgment, is required to maintain the allowance for loan losses at an adequate level based upon the inherent risks in the portfolio. The provision for unfunded lending commitments is used to maintain the reserve for unfunded lending commitments at an adequate level. See [Credit Risk Management](#) for more information on how we determine the appropriate level for the allowance for loan and lease losses and the reserve for unfunded lending commitments.

The provision for loan losses for the third quarter of 2007 was \$55.4 million compared to \$17.8 million for the second quarter of 2007 and \$14.4 million for the third quarter of 2006. On an annualized basis, the provision was 0.60% of average loans for the third quarter of 2007 compared to 0.20% for the second quarter of 2007 and 0.17% for the third quarter of 2006. The provision for unfunded lending commitments was \$0.2 million for the third quarter of 2007 compared to \$1.2 million for the second quarter of 2007 and \$1.0 million for the third quarter of 2006. From period to period, the amounts of unfunded lending commitments may be subject to sizeable fluctuation due to changes in the timing and volume of loan originations and fundings. The related provision will generally reflect these fluctuations. When combined, the provisions for credit losses for the third quarter of 2007 were \$55.5 million compared to \$19.0 million for the second quarter of 2007 and \$15.4 million for the third quarter of 2006. The increased provision reflects significant softening in our credit quality outlook, particularly in relation to residential land development and construction activity in the Southwest, with our Arizona business being most severely impacted.

The provision for loan losses for the first nine months of 2007 was \$82.2 million, 79.2% higher than the \$45.9 million provision for the first nine months of 2006. The increased provision for loan losses for the first nine months of 2007 compared to 2006 is primarily impacted by weaker asset quality indicators. See further details at [Nonperforming Assets](#) and at [Allowance and Reserve for Credit Losses](#). The provision for unfunded lending commitments was \$1.7 million for the first nine months of 2007 compared to \$0.5 million for the first nine months of 2006.

Noninterest Income

For the third quarter of 2007, noninterest income increased 0.3% to \$145.8 million compared to \$145.3 million for the third quarter of 2006.

Service charges and fees on deposit accounts increased \$6.4 million or 15.9% for the third quarter of 2007 compared to the third quarter of 2006. The increase was mainly due to the impact of fee increases and the acquisition of Stockmen's.

Loan sales and servicing income for the third quarter of 2007 increased \$0.6 million or 5.8% compared to the third quarter of 2006. However, the 2006 amount included a \$4.1 million impairment charge on retained interests from certain previous loan securitizations. Exclusive of this impairment charge, loan sales and servicing income decreased \$3.5 million mainly due to a decline in loans sold being serviced during the third quarter of 2007 compared to the third quarter of 2006.

Other service charges, commissions and fees for the third quarter of 2007 increased \$6.6 million or 14.7% compared to the third quarter of 2006. The increase was primarily driven by higher public finance fees, loan fees, debit card fees, and cash management fees offset by decreased insurance income of \$1.1 million resulting from the previously announced sale of the Company's Grant Hatch insurance agency and certain other insurance assets completed during the first quarter of 2007.

Trust and wealth management income for the third quarter increased \$1.9 million or 26.5% compared to the third quarter of 2006. The increase was primarily driven by higher fee income from our wealth management and trust businesses.

Income from securities conduit decreased \$4.5 million or 58.4% for the third quarter of 2007 compared to the third quarter of 2006. This servicing income represents fees we receive from Lockhart Funding, LLC (Lockhart), a qualifying special-purpose entity

Table of Contents**ZIONS BANCORPORATION AND SUBSIDIARIES**

(QSPE) securities conduit, in return for liquidity management, an interest rate agreement, and administrative services that Zions Bank provides to Lockhart in accordance with a servicing agreement. The decrease in income is due to the higher cost of asset-backed commercial paper resulting from the recent disruptions in the credit markets and a decrease in Lockhart's securities portfolio. The book value of Lockhart's securities portfolio declined to \$3.3 billion at September 30, 2007 and \$3.1 billion at October 31, 2007 from \$4.7 billion at September 30, 2006 due to repayments of principal. We expect that the book value of the Lockhart portfolio will decrease over time unless new securities are purchased to replace the maturing securities. Income from securities conduit will depend both on the amount of securities held in the portfolio and on the cost of the commercial paper used to fund those securities.

Dividends and other investment income increased \$4.3 million or 41.5% for the third quarter of 2007 compared to the same period in 2006. The increased income is primarily from investments accounted for on the equity method of \$5.0 million.

Trading and nonhedge derivative income (loss) for the third quarter of 2007 was \$(5.2) million compared to \$3.6 million for the third quarter of 2006. The decline is primarily due to decreases in the fair value of nonhedge derivatives resulting from decreasing spreads during the third quarter between LIBOR and prime rates.

Net equity securities gains were \$11.1 million for the third quarter of 2007 compared to \$13.2 million for the third quarter of 2006. The third quarters of 2007 and 2006 included net gains on venture capital investments of \$11.1 million and \$12.9 million, respectively. Net of related minority interest of \$7.5 million and \$9.5 million, income taxes and other expenses, the gains from consolidated venture capital investments increased net income for the respective third quarters by \$1.9 million and \$1.7 million.

Noninterest income for the first nine months of 2007 of \$432.6 million increased 5.2% from \$411.3 million for the first nine months of 2006. Explanations previously provided for the quarterly changes also apply to the year-to-date changes. Additional explanations of variances follow.

Loan sales and servicing income decreased \$12.0 million for the first nine months of 2007 compared to the first nine months of 2006. The decline results primarily from increased pretax impairment charges of \$9.3 million for the first nine months of 2007 compared to \$4.1 million for the first nine months of 2006 on retained interests from certain previous small business loan securitizations due mainly to accelerated prepayment speeds, and lower amounts of servicing fees based on lower balances of serviced loans. It is possible that additional impairment charges may be incurred if actual prepayment speeds exceed current estimates. Factors influencing the prepayment speed include the prepayment penalties, which decrease over time and the shape of the yield curve at the time the prepayment penalties are eliminated. As of September 30, 2007, the Company had \$54.2 million of retained interests in small business securitizations recorded on the balance sheet that are exposed to additional future impairments due to the above mentioned factors.

Net equity securities gains were \$16.4 million for the first nine months of 2007 compared with net gains of \$12.0 million for the same period in 2006. Net gains for the first nine months of 2007 included a \$2.5 million gain on the sale of an investment in a community bank and net gains on venture capital equity investments of \$13.9 million. Net of related minority interest of \$6.8 million, income taxes and other expenses, the gains from consolidated venture capital investments increased net income for the first nine months of 2007 by approximately \$3.3 million. Net gains for the first nine months of 2006 included a \$3.4 million loss on the sale of a mortgage mutual fund investment, a \$2.0 million gain from the sale of other equity securities, and \$13.4 million in gains on venture capital equity investments. Net of related minority interest of \$8.6 million, income taxes and other expenses, venture capital investments contributed \$1.6 million to net income for the first nine months of 2006.

Table of Contents

ZIONS BANCORPORATION AND SUBSIDIARIES

Noninterest Expense

Noninterest expense for the third quarter of 2007 was \$352.0 million, an increase of 6.7% over the \$330.0 million for the third quarter of 2006. The Company's efficiency ratio for the third quarter of 2007 was 56.0% compared to 55.2% for the third quarter of 2006. As previously discussed, the efficiency ratios for the third quarters of 2007 and 2006 were favorably impacted by the inclusion in consolidated noninterest income of the minority interest in equity securities gains related to venture capital investments.

Salaries and employee benefits increased \$13.9 million or 7.3% compared to the third quarter of 2006. The increase from the prior year was due to salary increases, increased staffing levels in selected areas, and the impact of the Stockmen's acquisition.

Noninterest expense for the first nine months of 2007 of \$1,051.6 million increased 6.5% from \$987.5 million for the first nine months of 2006. The Company's efficiency ratio for the first nine months of 2007 was 56.7% compared to 56.9% for 2006.

Salaries and employee benefits for the first nine months of 2007 increased \$46.7 million or 8.3% compared to the same period in 2006. The increase is due to salary increases, increased staffing levels in selected areas, and the impact of the Stockmen's acquisition.

Merger related expense decreased \$13.7 million or 74.9% compared to the first nine months of 2006. The decrease is mainly due to the completion of the Amegy system conversion during the third quarter of 2006.

Other noninterest expense for the first nine months of 2007 increased \$11.2 million or 7.0% compared to the first nine months of 2006. The only significant increase is a \$4.0 million write-down on repossessed equipment, which was collateral for an equipment lease on which we recorded a loan loss related to an alleged accounting fraud at a water bottling company during the fourth quarter of 2006.

At September 30, 2007, the Company had 11,007 full-time equivalent employees, 520 domestic branches, and 628 ATMs, compared to 10,255 full-time equivalent employees, 470 domestic branches, and 575 ATMs at September 30, 2006.

Income Taxes

The Company's income tax expense decreased to \$71.9 million for the third quarter of 2007 compared to \$83.8 million for the same period in 2006. The Company's effective income tax rates, including the effects of minority interest, were 34.6% and 35.3% for the third quarters of 2007 and 2006, respectively. The lower third quarter tax rate for 2007 compared to 2006 is due primarily to an increased proportion of nontaxable income to income before income taxes. The effective income tax rates for the first nine months of 2007 and 2006, including the effects of minority interest, were 35.5% and 35.3%, respectively. The higher year-to-date tax rate is primarily due to taxes incurred in the first quarter of 2007 for the one-time redemption of bank-owned life insurance policies. As discussed in previous filings, the Company has received federal income tax credits under the Community Development Financial Institutions Fund set up by the U.S. Government that are recognized over a seven-year period from the year of investment. The effect of these tax credits was to reduce income tax expense by \$4.2 million and \$3.2 million for the first nine months of 2007 and 2006, respectively.

Effective January 1, 2007, the Company adopted FASB Interpretation No. 48 (FIN 48), *Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109, Accounting for Income Taxes*. As a result of adopting this new accounting guidance, the Company reduced its existing liability for unrecognized tax benefits by approximately \$10.4 million at January 1, 2007 and recognized a cumulative effect adjustment as an increase to retained earnings.

ZIONS BANCORPORATION AND SUBSIDIARIES

BALANCE SHEET ANALYSIS

As previously disclosed, the Company completed its acquisition of The Stockmen's Bancorp, Inc. effective January 17, 2007. Certain comparisons to 2006 include the impact of this acquisition.

Interest-Earning Assets

Interest-earning assets are those assets that have interest rates or yields associated with them and consist of money market investments, securities and loans.

Average interest-earning assets increased 11.0% to \$42.4 billion for the nine months ended September 30, 2007 compared to \$38.2 billion for the same period in 2006. Interest-earning assets comprised 88.0% of total average assets for the first nine months of 2007, compared with 87.3% for the comparable period of 2006. Average interest-earning assets as a percentage of total average assets for the third quarter of 2007 was 88.3% compared to 88.0% for the second quarter of 2007 and 87.8% for the first quarter of 2007.

Average money market investments, consisting of interest-bearing deposits, federal funds sold and security resell agreements, increased 28.5% to \$620.4 million for the first nine months of 2007 compared to \$482.6 million for the first nine months of 2006. The increase in average money market investments is due in part to the asset-backed commercial paper that the affiliate banks purchased from Lockhart during the third quarter of 2007. See discussion at Liquidity Risk Management for further details. Average securities decreased 6.3% for the first nine months of 2007 compared to the same period in 2006. Average net loans and leases for the first nine months of 2007 increased 13.9% compared to the same period in 2006.

Investment Securities Portfolio

Table of Contents

ZIONS BANCORPORATION AND SUBSIDIARIES

The amortized cost of investment securities at September 30, 2007 decreased 6.4% from the balance at December 31, 2006 and 6.8% from the balance at September 30, 2006. As discussed further in Risk Elements: Market Risk Fixed Income, changes in fair value on available-for-sale securities have been reflected in shareholders' equity through other comprehensive income.

Included in asset-backed securities at September 30, 2007 are CDOs collateralized by trust preferred securities issued by banks, insurance companies, or real estate investment trusts (REITs) that may have some exposure to the subprime market. We do not have any CDOs collateralized directly by subprime related mortgage assets. See further discussion of certain CDOs held by Lockhart in Liquidity Risk Management.

At September 30, 2007, the Company valued certain CDO securities using a matrix pricing methodology. Prior to the third quarter of 2007, the Company valued its CDOs from single dealer price quotes. See further discussion of the enhancement in Critical Accounting Policies and Significant Estimates.

We review investment securities on an ongoing basis for other than temporary impairment taking into consideration current market conditions, fair value in relationship to cost, issuer rating trends and volatility of earnings, current analysts' evaluations, our ability and intent to hold investments until a recovery of fair value, which may be maturity, and other factors. Our review did not result in an adjustment for other than temporary impairment during the quarter ended September 30, 2007. Future reviews for other than temporary impairment will consider the particular facts and circumstances during the reporting period in review.

The investment securities portfolio includes \$873 million of nonrated fixed income securities compared to \$881 million at December 31, 2006 and \$875 million at September 30, 2006. These securities include \$668 million of nonrated municipal securities underwritten and structured by Zions Bank in accordance with its established municipal credit standards, \$184 million of securitized small business loan trust securities from Zions' securitizations, and \$20 million of individual and pooled trust preferred bank and insurance securities.

Table of Contents

ZIONS BANCORPORATION AND SUBSIDIARIES

Loan Portfolio

Net loans and leases at September 30, 2007 were \$37.8 billion, an annualized increase of 12.1% from December 31, 2006 and an increase of 12.2% over the balance at September 30, 2006.

The following table sets forth the loan portfolio by type of loan:

(In millions)	September 30, 2007	December 31, 2006	September 30, 2006
Loans held for sale	\$ 201	\$ 253	\$ 268
Commercial lending:			
Commercial and industrial	9,260	8,422	7,846
Leasing	474	443	420
Owner occupied	7,347	6,260	5,855
Total commercial lending	17,081	15,125	14,121
Commercial real estate:			
Construction and land development	8,396	7,483	7,362
Term	5,054	4,952	4,960
Total commercial real estate	13,450	12,435	12,322
Consumer:			
Home equity credit line and other consumer real estate	2,033	1,850	1,944
1-4 family residential	4,178	4,192	4,255
Bankcard and other revolving plans	299	295	281
Other	467	457	458
Total consumer	6,977	6,794	6,938
Foreign loans	27	3	3
Other receivables	243	209	200
Total loans	\$ 37,979	\$ 34,819	\$ 33,852

The loan growth noted above for commercial and commercial real estate lending principally resulted from organic loan growth at Zions Bank, Amegy Bank, Vectra Bank Colorado and from the impact of the loans acquired from the Stockmen's acquisition.

Loan growth for the third quarter of 2007 was approximately \$1.0 billion or 11.2% annualized and was concentrated primarily in commercial lending which increased \$586 million and commercial real estate which increased \$329 million. Third quarter organic loan growth increased over the first and second quarters 2007 loan growth; however, year to date loan growth has slowed compared to growth experienced during 2006 due particularly to a continued reduction in the rate of residential housing construction and development lending in California, Arizona and Nevada.

Sold Loans Being Serviced

Zions performs loan servicing both on loans that it holds in its portfolios and also on loans that are owned by third party investor-owned trusts. The Company has used asset securitizations to sell loans and in many instances provides the servicing on these loans as a condition of the sale.

Table of Contents

ZIONS BANCORPORATION AND SUBSIDIARIES

(In millions)	Residual interests				
	Sold loans being serviced Sales for nine months ended September 30, 2007	Outstanding balance at September 30, 2007	on balance sheet at September 30, 2007		
			Subordinated retained interests	Capitalized residual cash flows	Total
Home equity credit lines	\$	\$ 110	\$ 7	\$ 2	\$ 9
Small business loans		1,429	206	59	265
SBA 7(a) loans		101		2	2
Farmer Mac	38	382		4	4
Total	\$ 38	\$ 2,022	\$ 213	\$ 67	\$ 280

Securitized loans being serviced for others totaled \$2.0 billion at September 30, 2007, \$2.6 billion at December 31, 2006, and \$2.8 billion at September 30, 2006. The Company did not complete a small business loans securitization during 2006 or the first nine months of 2007 and also discontinued selling new home equity credit line originations during the fourth quarter of 2006.

As of September 30, 2007, the Company had recorded assets, comprised of subordinated retained interests and capitalized residual cash flows, in the amount of \$280 million in connection with the \$2.0 billion of sold loans being serviced. As is a common practice with securitized transactions, the Company had retained subordinated interests in the securitized assets that totaled \$213 million at September 30, 2007, which represented junior positions to the other investors in the trust securities. The capitalized residual cash flows, which are sometimes referred to as excess servicing, of \$67 million primarily represent the present value of the excess cash flows that have been projected over the lives of the sold loans.

As of September 30, 2007, conforming long-term first mortgage real estate loans being serviced for others were \$1,230 million, compared with \$1,251 million at December 31, 2006 and \$1,238 million at September 30, 2006.

Other Noninterest-Bearing Investments

The following table sets forth the Company's other noninterest-bearing investments:

(In millions)	September 30, 2007	December 31, 2006	September 30, 2006
Bank-owned life insurance	\$ 595	\$ 627	\$ 620
Federal Home Loan Bank and Federal Reserve stock	232	189	187
SBIC investments (1)	93	104	96
Non-SBIC investment funds	55	37	33
Other public companies	38	37	36
Other nonpublic companies	16	14	14
Trust preferred securities	14	14	20
	\$ 1,043	\$ 1,022	\$ 1,006

(1) Amounts include minority investors' interests in Zions' managed SBIC investments of approximately \$35 million, \$41 million and \$40 million as of the respective dates.

Edgar Filing: ZIONS BANCORPORATION /UT/ - Form 10-Q

Bank-owned life insurance investments declined \$32 million during the first nine months of 2007 mainly due to the Company surrendering three bank-owned life insurance contracts during the first quarter. The increase in cash surrender value of the remaining policies is not taxable since it is anticipated that the bank-owned life insurance will be held until the eventual death of the insured employees.

Table of Contents

ZIONS BANCORPORATION AND SUBSIDIARIES

Federal Home Loan Bank and Federal Reserve stock investments increased \$43 million from December 31, 2006 primarily during the third quarter of 2007. The increase is mainly due to increased investments the Company made at the Federal Home Loan Banks to increase the Company's borrowing capacity.

Deposits

Average total deposits for the first nine months of 2007 increased 10.0% compared to the same period in 2006, with interest-bearing deposits increasing 14.5% and noninterest-bearing deposits decreasing 0.8%.

Total deposits at the end of the third quarter of 2007 increased to \$35.8 billion, an annualized increase of 3.0% from the balances reported at December 31, 2006, and increased 6.3% over the September 30, 2006 amounts. Core deposits at September 30, 2007 increased 2.4% annualized compared to the December 31, 2006 balance and 4.0% compared to the balance at September 30, 2006.

The mix of deposits reflects the decline in demand deposits during the first nine months of 2007 as demand, savings and money market deposits comprised 72.2% of total deposits at the end of the third quarter, compared with 74.0% and 76.0% as of December 31, 2006 and September 30, 2006, respectively.

Management expects that deposit growth may continue to lag behind loan growth, and that a portion of future loan growth may be funded from alternative higher cost funding sources.

RISK ELEMENTS

Since risk is inherent in substantially all of the Company's operations, management of risk is an integral part of its operations and is also a key determinant of its overall performance. We apply various strategies to reduce the risks to which the Company's operations are exposed, including credit, interest rate and market, liquidity and operational risks.

Credit Risk Management

Credit risk is managed centrally through a uniform credit policy, credit administration, and credit exam functions at the parent. Effective management of credit risk is essential in maintaining a safe, sound and profitable financial institution. We have structured the organization to separate the lending function from the credit administration function, which has added strength to the control over and the independent evaluation of credit activities. Formal loan policies and procedures provide the Company with a framework for consistent underwriting and a basis for sound credit decisions. In addition, the Company has a well-defined set of standards for evaluating its loan portfolio, and management utilizes a comprehensive loan grading system to determine the risk potential in the portfolio. Further, an independent, internal credit examination department periodically conducts examinations of the Company's lending departments. These examinations are designed to review credit quality, adequacy of documentation, appropriate loan grading administration and compliance with lending policies, and reports thereon are submitted to management and to the Credit Review Committee of the Board of Directors.

Both the credit policy and the credit examination functions are managed centrally. Each affiliate bank is permitted to modify corporate credit policy to be more conservative; however, corporate approval must be obtained if a bank wishes to create a more liberal policy. Historically, only a limited number of such modifications have been approved. This entire process has been designed to place an emphasis on strong underwriting standards and early detection of potential problem credits so that action plans can be developed and implemented on a timely basis to mitigate any potential losses.

Table of Contents

ZIONS BANCORPORATION AND SUBSIDIARIES

Another aspect of the Company's credit risk management strategy is to pursue the diversification of the loan portfolio. The Company maintains a diversified loan portfolio with some emphasis in real estate. As set forth in the following table, at September 30, 2007 no single loan category exceeded 24.4% of the Company's total loan portfolio.

(In millions)	September 30, 2007		December 31, 2006		September 30, 2006	
	Amount	% of total loans	Amount	% of total loans	Amount	% of total loans
Commercial lending:						
Commercial and industrial	\$ 9,260	24.4%	\$ 8,422	24.2%	\$ 7,846	23.2%
Leasing	474	1.3%	443	1.3%	420	1.2%
Owner occupied	7,347	19.3%	6,260	18.0%	5,855	17.3%
Commercial real estate:						
Construction and land development	8,396	22.1%	7,483	21.5%	7,362	21.7%
Term	5,054	13.3%	4,952	14.2%	4,960	14.7%
Consumer:						
Home equity credit line and other consumer real estate	2,033	5.4%	1,850	5.3%	1,944	5.7%
1-4 family residential	4,178	11.0%	4,192	12.1%	4,255	12.6%
Bankcard and other revolving plans	299	0.8%	295	0.8%	281	0.8%
Other	467	1.2%	457	1.3%	458	1.4%
Other	471	1.2%	465	1.3%	471	1.4%
Total loans	\$ 37,979	100.0%	\$ 34,819	100.0%	\$ 33,852	100.0%

We believe the Company's potential risk from concentration in owner occupied commercial loans is reduced by the emphasis we place on lending programs sponsored by the Small Business Administration (SBA). The Company attempts to avoid the risk of an undue concentration of credits in a particular industry, trade group, property type, or with an individual customer or counterparty. The majority of the Company's business activity is with customers located within the geographical footprint of its banking subsidiaries.

The Company does not pursue subprime or alternative (Alt-A) residential mortgage lending and has little or no direct exposure to that market. However, lending to finance residential land acquisition, development and construction is a core business for the Company. In some geographic markets, significant declines in the availability of subprime residential first mortgages to buyers of newly constructed homes is having an adverse impact on the operations of some of the Company's developer and builder customers.

As discussed in the following sections, the Company's level of credit quality weakened during the third quarter of 2007 although it remained relatively strong compared to historical company and industry standards. The deterioration in credit quality was mainly related to the continuing weakness in residential development and construction activity in the Southwest.

A more comprehensive discussion of our credit risk management is contained in Zions' Annual Report on Form 10-K for the year ended December 31, 2006.

Nonperforming Assets

Nonperforming assets include nonaccrual loans, restructured loans, other real estate owned, and other nonperforming assets. Loans are generally placed on nonaccrual status when the loan is 90 days or more past due as to principal or interest, unless the loan is both well secured and in the process of collection. Consumer loans are not normally placed on nonaccrual status, inasmuch as they

Table of Contents

ZIONS BANCORPORATION AND SUBSIDIARIES

are generally charged off when they become 120 days past due. Loans occasionally may be restructured to provide a reduction or deferral of interest or principal payments. This generally occurs when the financial condition of a borrower deteriorates to the point that the borrower needs to be given temporary or permanent relief from the original contractual terms of the loan. Other real estate owned is acquired primarily through or in lieu of foreclosure on loans secured by real estate.

The following table sets forth the Company's nonperforming assets:

(Amounts in millions)	September 30, 2007	December 31, 2006	September 30, 2006
Nonaccrual loans	\$ 175	\$ 67	\$ 65
Restructured loans	10		
Other real estate owned	12	9	10
Other assets		6	
Total	\$ 197	\$ 82	\$ 75
% of net loans and leases* and other real estate owned	0.52%	0.24%	0.22%
Accruing loans past due 90 days or more	\$ 65	\$ 44	\$ 20
% of net loans and leases*	0.17%	0.13%	0.06%

* Includes loans held for sale.

Total nonperforming assets increased \$115 million or 140% as of September 30, 2007 compared with the balance at December 31, 2006 and increased \$102 million or 106% from the \$95 million balance at June 30, 2007. The increase in nonperforming assets consisted primarily of residential construction and development loans in Arizona, California, and Nevada. Total nonaccrual loans at September 30, 2007 increased \$108 million from the balances at December 31, 2006, which included increases of \$91 million for nonaccrual construction and land development loans and \$14 million for commercial and industrial loans.

Included in nonaccrual loans are loans that we have determined to be impaired. Loans, other than those included in large groups of smaller-balance homogeneous loans, are considered impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due in accordance with the contractual terms of the loan agreement, including scheduled interest payments. The amount of the impairment is measured based on either the present value of expected cash flows, the observable fair value of the loan, or the fair value of the collateral securing the loan.

The Company's total recorded investment in impaired loans was \$188 million at September 30, 2007, compared with \$47 million at December 31, 2006 and \$43 million at September 30, 2006. Estimated losses on impaired loans are included in the allowance for loan losses. At September 30, 2007, the allowance for loan losses included \$9 million for impaired loans with a recorded investment of \$70 million. At December 31, 2006, the allowance included \$6 million for impaired loans with an \$18 million recorded investment, and at September 30, 2006 the allowance included \$6 million for impaired loans with a \$23 million recorded investment.

The amount of accruing loans past due 90 days or more increased to \$65 million at September 30, 2007 up from \$48 million at June 30, 2007 and \$20 million at September 30, 2006.

ZIONS BANCORPORATION AND SUBSIDIARIES

Allowance and Reserve for Credit Losses

Allowance for Loan Losses The allowance for loan losses is established for estimated losses in the loan portfolio outstanding at the balance sheet date. In analyzing the adequacy of the allowance for loan losses, we utilize a comprehensive loan grading system to determine the risk potential in the portfolio and also consider the results of independent internal credit reviews. To determine the adequacy of the allowance, the Company's loan and lease portfolio is broken into segments based on loan type.

For commercial loans, we use historical loss experience factors by loan segment, adjusted for changes in trends and conditions, to help determine an indicated allowance for each portfolio segment. These factors are evaluated and updated using migration analysis techniques and other considerations based on the makeup of the specific segment. These other considerations include:

volumes and trends of delinquencies;

levels of nonaccruals, repossessions and bankruptcies;

trends in criticized and classified loans;

expected losses on real estate secured loans;

new credit products and policies;

economic conditions;

concentrations of credit risk; and

experience and abilities of the Company's lending personnel.

The allowance for consumer loans is determined using historically developed loss experience rates at which loans migrate from one delinquency level to the next higher level. Using average roll rates for the most recent twelve-month period and comparing projected losses to actual loss experience, the model estimates expected losses in dollars for the forecasted period. By refreshing the model with updated data, it is able to project losses for a new twelve-month period each month, segmenting the portfolio into nine product groupings with similar risk profiles. This methodology is an accepted industry practice, and the Company believes it has a sufficient volume of information to produce reliable projections.

The methodology used by Amegy to estimate its allowance for loan losses has not yet been conformed to the process used by the other affiliate banks. However, the process used by Amegy is not significantly different than the process used by our other affiliate banks.

The Company has initiated a comprehensive review of its allowance for loan losses methodology with a view toward updating and conforming this methodology across all of its banking subsidiaries.

Table of Contents

ZIONS BANCORPORATION AND SUBSIDIARIES

The following table shows the changes in the allowance for loan losses and a summary of loan loss experience:

(Amounts in millions)	Nine Months Ended September 30, 2007	Twelve Months Ended December 31, 2006	Nine Months Ended September 30, 2006
Loans* and leases outstanding (net of unearned income) at end of period	\$ 37,822	\$ 34,668	\$ 33,706
Average loans* and leases outstanding (net of unearned income)	\$ 36,255	\$ 32,395	\$ 31,835
Allowance for loan losses:			
Balance at beginning of period	\$ 365	\$ 338	\$ 338
Allowance of companies acquired	8		
Provision charged against earnings	82	73	46
Loans and leases charged-off:			
Commercial lending	(25)	(46)	(30)
Commercial real estate	(11)	(5)	(2)
Consumer	(11)	(14)	(10)
Other receivables	(2)	(1)	(1)
Total	(49)	(66)	(43)
Recoveries:			
Commercial lending	7	11	8
Commercial real estate	1	2	2
Consumer	4	7	5
Total	12	20	15
Net loan and lease charge-offs	(37)	(46)	(28)
Balance at end of period	\$ 418	\$ 365	\$ 356
Ratio of annualized net charge-offs to average loans and leases	0.14%	0.14%	0.12%
Ratio of allowance for loan losses to net loans and leases at end of period	1.11%	1.05%	1.06%
Ratio of allowance for loan losses to nonperforming loans	226.52%	548.53%	549.66%
Ratio of allowance for loan losses to nonaccrual loans and accruing loans past due 90 days or more	175.09%	331.56%	418.94%

* Includes loans held for sale.

Edgar Filing: ZIONS BANCORPORATION /UT/ - Form 10-Q

Net loan and lease charge-offs, along with their annualized ratios to average loans and leases, are shown in the preceding table for the periods presented. The same respective amounts for the third quarter of 2007 were \$18.1 million and 0.19%.

The total allowance for loan losses at September 30, 2007 increased \$53.0 million from the level at year-end 2006. The amount of the allowance included for criticized and classified commercial and commercial real estate loans increased \$45.5 million. Of this increase, \$22.7 million was for construction and land development loans reflecting the weaker credit conditions in the Southwestern residential real estate markets as previously discussed, \$17.3 million was for commercial lending, and \$5.5 million was for other commercial real estate loans. The level of the allowance for noncriticized and nonclassified commercial and commercial real estate loans increased \$5.5 million, mainly the result of \$3.0 billion of new loan growth. The allowance for consumer loans increased \$2.0 million compared to December 31, 2006.

Table of Contents

ZIONS BANCORPORATION AND SUBSIDIARIES

Reserve for Unfunded Lending Commitments The Company also estimates a reserve for potential losses associated with off-balance sheet commitments and standby letters of credit. We determine the reserve for unfunded lending commitments using a process that is similar to the one we use for commercial loans. Based on historical experience, we have developed experience-based loss factors that we apply to the Company's unfunded lending commitments to estimate the potential for loss in that portfolio. These factors are generated from tracking commitments that become funded and develop into problem loans.

The following table sets forth the reserve for unfunded lending commitments:

(In millions)	Nine Months Ended September 30, 2007	Twelve Months Ended December 31, 2006	Nine Months Ended September 30, 2006
Balance at beginning of period	\$ 19.4	\$ 18.1	\$ 18.1
Reserve of company acquired	0.3		
Provision charged against earnings	1.7	1.3	0.5
Balance at end of period	\$ 21.4	\$ 19.4	\$ 18.6

The following table sets forth the total allowance and reserve for credit losses:

(In millions)	September 30, 2007	December 31, 2006	September 30, 2006
Allowance for loan losses	\$ 418	\$ 365	\$ 356
Reserve for unfunded lending commitments	21	19	19
Total allowance and reserve for credit losses	\$ 439	\$ 384	\$ 375

Interest Rate and Market Risk Management

Interest rate and market risk are managed centrally. Interest rate risk is the potential for loss resulting from adverse changes in the level of interest rates on the Company's net interest income. Market risk is the potential for loss arising from adverse changes in the fair value of fixed income securities, equity securities, other earning assets and derivative financial instruments as a result of changes in interest rates or other factors. As a financial institution that engages in transactions involving an array of financial products, the Company is exposed to both interest rate risk and market risk.

Interest Rate Risk Interest rate risk is one of the most significant risks to which the Company is regularly exposed. In general, our goal in managing interest rate risk is to have the net interest margin increase slightly in a rising interest rate environment. We refer to this goal as being slightly asset-sensitive. This approach is based on our belief that in a rising interest rate environment, the market cost of equity, or implied rate at which future earnings are discounted, would also tend to rise.

We attempt to minimize the impact of changing interest rates on net interest income primarily through the use of interest rate swaps, and by avoiding large exposures to fixed rate interest-earning assets that have significant negative convexity. The prime lending rate and the London Interbank Offer Rate (LIBOR) curves are the primary indices used for pricing the Company's loans. The interest rates paid on deposit accounts are set by individual banks so as to be competitive in each local market.

Table of Contents

ZIONS BANCORPORATION AND SUBSIDIARIES

We monitor interest rate risk through the use of two complementary measurement methods: duration of equity and income simulation. In the duration of equity method, we measure the expected changes in the fair values of equity in response to changes in interest rates. In the income simulation method, we analyze the expected changes in income in response to changes in interest rates. For income simulation, Company policy requires that interest sensitive income from a static balance sheet is expected to decline by no more than 10% during one year if rates were to immediately rise or fall in parallel by 200 basis points.

As of the dates indicated, the following table shows the Company's estimated range of duration of equity and percentage change in interest sensitive income, based on a static balance sheet, in the first year after the rate change if interest rates were to sustain an immediate parallel change of 200 basis points; the low and high results differ based on the assumed speed of repricing of administered-rate deposits (money market, interest-on-checking, and savings):

	September 30, 2007		December 31, 2006	
	Low	High	Low	High
Duration of equity:				
Range (in years)				
Base case	1.1	2.5		1.6
Increase interest rates by 200 bp	2.2	3.7	0.8	2.4
Income simulation change in interest sensitive income:				
Increase interest rates by 200 bp	-2.6%	-0.2%	-0.9%	1.5%
Decrease interest rates by 200 bp	-1.3%	1.1%	-3.6%	-1.3%

As discussed previously under the section, Net Interest Income, Margin and Interest Rate Spreads, the Company believes that in recent quarters, the dynamic balance sheet changes with regard to changes in the mix of deposits and other funding sources have tended to have a somewhat larger effect on the net interest spread and net interest margin than has the Company's interest rate risk position. However as also discussed in that section, competitive pressures on deposit rates may impede our ability to reprice deposits, which would have a negative impact on the net interest margin during the fourth quarter of 2007.

Market Risk Fixed Income The Company engages in the trading of municipal and corporate securities. This trading exposes the Company to a risk of loss arising from adverse changes in the prices of these fixed income securities held by the Company.

At September 30, 2007, the Company had \$15.5 million of trading account assets and \$21.0 million of securities sold, not yet purchased compared with \$63.4 million and \$92.6 million of trading assets and \$176.0 million and \$53.8 million of securities sold, not yet purchased at December 31, 2006 and September 30, 2006, respectively. The higher securities sold, not yet purchased balance as of December 31, 2006 is related to an Amegy Bank sweep product.

The Company also is exposed to market risk through changes in fair value of available-for-sale securities and interest rate swaps used to hedge interest rate risk. Changes in fair value in both of these categories are included in accumulated other comprehensive income (loss) (OCI) each quarter. During the third quarter of 2007, the change in OCI attributable to available-for-sale securities was \$(33.7) million and the change attributable to interest rate swaps was \$59.6 million, for a net increase in shareholders' equity of \$25.9 million. If any of the available-for-sale securities becomes other than temporarily impaired, the loss in OCI is reversed and the impairment is charged to operations.

Table of Contents

ZIONS BANCORPORATION AND SUBSIDIARIES

Market Risk – Equity Investments Through its equity investment activities, the Company owns equity securities that are publicly traded and subject to fluctuations in their market prices or values. In addition, the Company owns equity securities in companies that are not publicly traded and that are accounted for under cost, fair value, equity, or full consolidation methods of accounting, depending upon the Company's ownership position and degree of involvement in influencing the investees' affairs. In either case, the value of the Company's investment is subject to fluctuation. Since the fair value associated with these securities may fall below the Company's investment costs, the Company is exposed to the possibility of loss. These equity investments are approved, monitored and evaluated by the Company's Equity Investment Committee.

The Company generally conducts minority investing in prepublic venture capital companies in which it does not have strategic involvement, through four funds collectively referred to as Wasatch Venture Funds ("Wasatch"). Wasatch screens investment opportunities and makes investment decisions based on its assessment of business prospects and potential returns. After an investment is made, Wasatch actively monitors the performance of each company in which it has invested, and often has representation on the board of directors of the company.

In addition to the program described above, Amegy has in place an alternative investments program. These investments are primarily directed towards equity buyout and mezzanine funds with a key strategy of deriving ancillary commercial banking business from the portfolio companies. Early stage venture capital funds are not part of the strategy since the underlying companies are typically not credit worthy.

The Company also, from time to time, either starts and funds businesses or makes significant investments in companies of strategic interest. These investments may result in either minority or majority ownership positions, and usually give board representation to Zions or its subsidiaries. These strategic investments generally are in companies that are financial services or financial technologies providers.

A more comprehensive discussion of the Company's interest rate and market risk management is contained in Zions' Annual Report on Form 10-K for the year ended December 31, 2006.

Liquidity Risk Management

Liquidity is managed centrally for both the Parent and the bank subsidiaries. The Parent's cash requirements consist primarily of debt service, investment in and advances to subsidiaries, operating expenses, income taxes, dividends to shareholders and share repurchases. The Parent's cash needs are routinely met through dividends from its subsidiaries, investment income, and subsidiaries' proportionate share of current income taxes, management and other fees, bank lines, equity contributed through the exercise of stock options, commercial paper, and long-term debt and equity issuances.

Operational cash flows, while constituting a funding source for the Company, are not large enough to provide funding in the amounts that fulfill the needs of the Parent and the bank subsidiaries. For the first nine months of 2007, operations contributed \$512 million toward these needs. As a result, the Company utilizes other sources at its disposal to manage its liquidity needs.

During the first nine months of 2007, the Parent received \$379 million in dividends from its subsidiaries. At September 30, 2007, \$419 million of dividend capacity was available for the subsidiaries to pay to the Parent under regulatory guidelines.

The Parent also has a program to issue short-term commercial paper. At September 30, 2007, outstanding commercial paper was \$411 million. In addition, at September 30, 2007, the Parent had secured revolving credit facilities with subsidiary banks totaling \$188 million. No amounts were outstanding on these facilities at September 30, 2007.

Table of Contents

ZIONS BANCORPORATION AND SUBSIDIARIES

On June 6, 2007, under provisions of the borrowing agreements, the Company redeemed the entire \$19.7 million net par amount of the 11.75% trust preferred securities. During the nine months ended September 30, 2007, the Company redeemed other trust preferred securities totaling \$15.3 million.

The subsidiaries' primary source of funding is their core deposits, consisting of demand, savings and money market deposits, time deposits under \$100,000 and foreign deposits. At September 30, 2007, these core deposits, in aggregate, constituted 87.3% of consolidated deposits, compared with 87.7% of consolidated deposits at December 31, 2006. For the first nine months of 2007, decreases in deposits resulted in net cash outflows of \$407 million.

The Federal Home Loan Bank (FHLB) system is also a significant source of liquidity for each of the Company's subsidiary banks. Zions Bank and TCBW are members of the FHLB of Seattle. CB&T, NSB, and NBA are members of the FHLB of San Francisco. Vectra is a member of the FHLB of Topeka and Amegy Bank is a member of the FHLB of Dallas. The FHLB allows member banks to borrow against their eligible loans to satisfy liquidity requirements. For the first nine months of 2007, the activity in short-term FHLB borrowings resulted in a net cash inflow of approximately \$1,520 million.

At September 30, 2007, the Company managed approximately \$2.0 billion of securitized assets that were originated or purchased by its subsidiary banks. Of these, approximately \$1.2 billion were credit-enhanced by a third party insurance provider and held in Lockhart, which is a QSPE securities conduit and has been an important source of funding for the Company's loans. Zions Bank provides a Liquidity Facility for a fee to Lockhart, which purchases floating-rate U.S. Government and AAA-rated securities with funds from the issuance of commercial paper. Zions Bank also provides interest rate hedging support and administrative and investment advisory services for a fee. Pursuant to the Liquidity Facility, Zions Bank is required to purchase securities from Lockhart to provide funds for it to repay maturing commercial paper upon Lockhart's inability to access the commercial paper market, or upon a commercial paper market disruption, as specified in the governing documents of Lockhart. In addition, pursuant to the governing documents, including the Liquidity Facility, if any security in Lockhart is downgraded below AA-, Zions Bank must either 1) place its letter of credit on the security, 2) obtain a credit enhancement on the security from a third party, or 3) purchase the security from Lockhart at book value. Zions Bank may incur losses in the event it is required to purchase securities from Lockhart because it would record any repurchased securities at fair value, which may be below the book value that would be paid to Lockhart.

The commitment of Zions Bank to Lockhart under the Liquidity Facility is the lesser of \$6.12 billion or the book value of Lockhart's securities portfolio, which was \$3.3 billion at September 30, 2007 and \$3.1 billion at October 31, 2007. No amounts were outstanding under this Liquidity Facility at September 30, 2007. Lockhart is limited in size by program agreements, agreements with rating agencies and by the size of the Liquidity Facility.

The book value of Lockhart's securities portfolio approximated fair value at September 30, 2007 with the exception of \$136.5 million of certain structured asset-backed collateralized debt obligations (ABS CDOs) (also known as diversified structured finance CDOs) which have some exposure to subprime and home equity mortgage securitizations. Approximately 24% (\$33.2 million) of the collateral backing the \$136.5 million of ABS CDOs is subprime mortgage securitizations and 14% (\$19.6 million) is home equity credit line securitizations. Approximately \$131.3 million of these ABS CDOs are rated by Moody's as Aaa and \$5.2 million are rated Aa1. These ABS CDOs were purchased from 2001 through 2004. At September 30, 2007, net unrealized losses on these securities were \$11.4 million.

Table of Contents

ZIONS BANCORPORATION AND SUBSIDIARIES

During the third quarter of 2007, the Company purchased asset-backed commercial paper from Lockhart to provide liquidity to Lockhart during the recent disruptions in the credit markets. The amount of commercial paper included in money market investments on the Company's average balance sheet for the third quarter was approximately \$232 million; the maximum amount outstanding was \$909 million. The amount of the purchased commercial paper outstanding at September 30, 2007 was approximately \$500 million. Since September 30, 2007 and through November 6, 2007, this amount has been as low as \$118.5 million on October 30, 2007 and as high as \$832.8 million on November 6, 2007.

The Company's investment activities can also provide or use cash. For the first nine months of 2007, investment securities activities resulted in a decrease in investment securities holdings and a net increase of cash in the amount of \$397 million.

Maturing balances in the various loan portfolios also provide additional flexibility in managing cash flows. In most cases, however, loan growth has resulted in net cash outflows from a funding standpoint. For the first nine months of 2007, loan growth resulted in a net cash outflow of \$2,430 million.

A more comprehensive discussion of our liquidity management is contained in Zions' Annual Report on Form 10-K for the year ended December 31, 2006.

Operational Risk Management

Operational risk is the potential for unexpected losses attributable to human error, systems failures, fraud, or inadequate internal controls and procedures. In its ongoing efforts to identify and manage operational risk, the Company has created an Operating Risk Management Group, whose responsibility is to help Company management identify and monitor the key internal controls and processes that the Company has in place to mitigate operational risk. We have documented controls and the Control Self Assessment related to financial reporting under Section 404 of the Sarbanes-Oxley Act of 2002 and the Federal Deposit Insurance Corporation Improvement Act of 1991.

To manage and minimize its operating risk, the Company has in place transactional documentation requirements, systems and procedures to monitor transactions and positions, regulatory compliance reviews, and periodic reviews by the Company's internal audit and credit examination departments. In addition, reconciliation procedures have been established to ensure that data processing systems consistently and accurately capture critical data. Further, we maintain contingency plans and systems for operations support in the event of natural or other disasters. Efforts are underway to improve the Company's oversight of operational risk, including enhancement of risk-control self assessments and of antifraud measures.

CAPITAL MANAGEMENT

The Company has a fundamental financial objective to consistently produce superior risk-adjusted returns on its shareholders' capital. We believe that a strong capital position is vital to continued profitability and to promoting depositor and investor confidence.

Total shareholders' equity on September 30, 2007 was \$5.3 billion, up 5.4% from \$5.0 billion at December 31, 2006 and 13.2% from \$4.6 billion at September 30, 2006. The Company's capital ratios were as follows as of the dates indicated:

Table of Contents

ZIONS BANCORPORATION AND SUBSIDIARIES

	September 30, 2007	December 31, 2006	September 30, 2006	Percentage required to be well capitalized
Tangible equity ratio	6.40%	6.51%	5.92%	na
Average equity to average assets (three months ended)	10.69%	10.37%	10.17%	na
Risk-based capital ratios:				
Tier 1 leverage	7.67%	7.86%	7.69%	5.00%
Tier 1 risk-based capital	7.66%	7.98%	7.87%	6.00%
Total risk-based capital	11.74%	12.29%	12.53%	10.00%

It is our belief that capital not considered necessary to support current and anticipated business should be returned to the Company's shareholders through dividends and repurchases of its shares. The Company has stated that its target range for the tangible equity ratio is 6.25% to 6.50%; the actual ratio at September 30, 2007 was 6.40% compared to 6.52% at June 30, 2007 and 5.92% at September 30, 2006. The decrease from the previous quarter is primarily due to loan growth, share repurchases, and reduced earnings partially offset by reductions in accumulated other comprehensive loss.

In December 2006, the Company resumed its stock repurchase plan, which had been suspended since July 2005 because of the Amegy acquisition. On December 11, 2006, the Board authorized a \$400 million repurchase program. The Company repurchased and retired 3,933,128 shares of its common stock in the first nine months of 2007 at a total cost of \$318.8 million and an average per share price of \$81.04 under this share repurchase authorization. During the third quarter, the Company repurchased and retired 1,194,296 shares of its common stock at a total cost of \$90.0 million and an average per share price of \$75.37. The remaining authorized amount for share repurchase as of September 30, 2007 was \$56.3 million. The Company has not repurchased any shares since August 16, 2007.

The Parent and its subsidiary banks are required to maintain adequate levels of capital as measured by several regulatory capital ratios. As of September 30, 2007, the Company and each of its banking subsidiaries met the well capitalized guidelines under regulatory standards.

Dividends per common share of \$0.43 and \$0.36 were paid in the third quarter of 2007 and 2006, respectively. For the three months ended September 30, 2007, the Company paid \$46.1 million in common stock dividends compared to \$38.4 million in the same period of 2006.

In December 2006, the Company issued \$240 million of preferred stock. During the three- and nine-month periods ended September 30, 2007, the Company declared and set aside funds of \$3.8 million and \$11.0 million, respectively, for preferred dividends.

At its October 2007 meeting, the Company's Board of Directors declared a dividend in the amount of \$0.43 per share of common stock. The dividend is payable November 21, 2007 to shareholders of record as of the close of business on November 7, 2007.

ITEM 3. **QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

Interest rate and market risks are among the most significant risks regularly undertaken by the Company, and they are closely monitored as previously discussed. A discussion regarding the Company's management of interest rate and market risk is included in the section entitled "Interest Rate and Market Risk Management" in this Form 10-Q.

ITEM 4. **CONTROLS AND PROCEDURES**

An evaluation was carried out by the Company's management, with the participation of the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934). Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this report, these disclosure controls and procedures were effective. There have been no changes in the Company's internal control over financial reporting during the period covered by this report that have materially affected or are reasonably likely to materially affect the Company's internal control over financial reporting.

PART II. **OTHER INFORMATION**

ITEM 1. **LEGAL PROCEEDINGS**

The Company is a defendant in various legal proceedings arising in the normal course of business. The Company does not believe that the outcome of any such proceedings will have a material effect on its consolidated financial position, operations, or liquidity.

ITEM 1A. **RISK FACTORS**

The Company believes there have been no significant changes in risk factors compared to the factors identified in Zions Bancorporation's Annual Report on Form 10-K for the year ended December 31, 2006; however, this filing contains enhanced disclosures related to the risk factors discussed under "Credit Risk Management," "Market Risk - Fixed Income," and "Liquidity Risk Management."

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS**Share Repurchases**

The following table summarizes the Company's share repurchases for the third quarter of 2007:

Period	Total number of shares repurchased (1)	Average price paid per share	Total number of shares purchased as part of publicly announced plans or programs	Approximate dollar value of shares that may yet be purchased under the plan (2)
July	481,382	\$ 76.93	481,030	\$ 109,254,679
August	715,176	74.31	713,266	56,250,315
September	164	70.21		56,250,315
Quarter	1,196,722	75.36	1,194,296	

- (1) Includes 706 shares tendered for exercise of stock options and 1,720 shares to cover payroll taxes on the vesting of restricted stock.
(2) In December 2006, the Company resumed the repurchase of its common stock following a \$400 million repurchase authorization approved by the Board of Directors on December 11, 2006. Prior to December 2006, the Company had suspended the repurchase of its common stock since July 2005 because of the Amegy acquisition.
