**GOODRICH PETROLEUM CORPORATION AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**NOTE 1 Description of Business and Significant Accounting Policies**

The consolidated financial statements of Goodrich Petroleum Corporation ( Goodrich or the Company or we ) included in this Form 10-Q have been prepared, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission ( SEC ) and, accordingly, certain information normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States has been condensed or omitted. The consolidated financial statements reflect all normal recurring adjustments that, in the opinion of management, are necessary for a fair presentation. Significant intercompany balances and transactions have been eliminated in consolidation.

The accompanying consolidated financial statements of the Company should be read in conjunction with the consolidated financial statements and notes included in the Company s Annual Report on Form 10-K for the year ended December 31, 2007. The results of operations for the three ended March 31, 2008, are not necessarily indicative of the results to be expected for the full year.

*Presentation Change* The Consolidated Statements of Operations includes a category of expense titled Production and other taxes which is a change from Production taxes in prior period presentations. The changed category includes ad valorem taxes as well as production taxes for which all comparative periods presented have been adjusted.

*Use of Estimates* Our Management has made a number of estimates and assumptions relating to the reporting of assets, liabilities, revenues and expenses and the disclosure of contingent assets and liabilities to prepare these consolidated financial statements in conformity with accounting principles generally accepted in the United States. Actual results could differ from those estimates.

*Assets Held for Sale* Assets Held for Sale as of March 31, 2008, represent our remaining assets in South Louisiana. These assets include the St. Gabriel, Bayou Bouillon and Plumb Bob fields.

*Income Taxes* We follow the provisions of Statement of Financial Accounting Standards ( SFAS ) No. 109, *Accounting for Income Taxes*, ( SFAS 109 ) as clarified by FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* ( FIN 48 ), which requires income taxes be accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. We have established a valuation allowance against our entire deferred tax asset balance and have not provided for any income taxes in the three months ended March 31, 2008.

*New Accounting Pronouncements*

In September 2006, the Financial Accounting Standards Board ( FASB ) issued SFAS No. 157, *Fair Value Measurements* ( SFAS 157 ), which establishes a single authoritative definition of fair value based upon the assumptions market participants would use when pricing an asset or liability and creates a fair value hierarchy that prioritizes the information used to develop these assumptions. Under the standard, additional disclosures are required, including disclosures of fair value measurements by level within the fair value hierarchy. SFAS 157 is effective for fair value measures already required or permitted by other standards for fiscal years beginning after November 15, 2007 and interim period within those fiscal years. FASB Staff Position ( FSP ) No. 157-2 ( FSP 175-2 ) defers the effective date of SFAS 157 for non-financial assets and liabilities to fiscal years beginning after November 15, 2008. We have prospectively adopted SFAS 157 as of January 1, 2008, and this prospective adoption had an immaterial effect on our financial statements. See Note 9 Fair Value of Financial Assets and Liabilities for additional information regarding the adoption of SFAS 157.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133* ( SFAS 161 ). SFAS 161 amends and expands the disclosure requirements of SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities* ( SFAS No. 133 ), by requiring enhanced disclosures about how and why an entity uses derivative instruments, how derivative instruments and related hedged items are accounted for under SFAS 133 and its related interpretations, and how derivative instruments and related hedged items affect an entity s financial position, financial performance, and cash flows. SFAS 161 requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of and gains and

losses on

7

**Table of Contents****GOODRICH PETROLEUM CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. SFAS 161 will be effective as of January 1, 2009. As SFAS 161 provides only disclosure requirements, the adoption of this standard will not have a material impact on our results of operations, cash flows or financial positions.

We do not believe that any other recently issued, but not yet effective accounting pronouncements, if adopted, would have a material effect on our accompanying financial statements.

**NOTE 2 Share-Based Compensation Plans**

On February 12, 2008, we granted 162,000 options under our 2006 Long-Term Incentive Plan to current employees who were employed by the Company on February 12, 2008. Executive vice presidents and above did not participate in this one time grant. The grant was intended for employee retention purposes. The stock options awarded have a term of seven years vesting over three years in equal increments on February 12, 2011, February 12, 2012 and February 12, 2013.

We apply SFAS No. 123 (revised 2004), *Share-Based Payment* ( SFAS 123R ), which requires us to measure the cost of stock based compensation granted, including stock options and restricted stock, based on the fair market value of the award as of the grant date, net of estimated forfeitures. SFAS 123R supersedes SFAS 123 *Accounting for Stock-Based Compensation* and Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees*.

The following table provides information about stock option activity for the three months ended March 31, 2008:

	Number of Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (Years)
Outstanding at December 31, 2007	949,333	\$ 20.95	
Granted	162,000	21.59	
Exercised	(10,000)	4.96	
Forfeited			
Outstanding at March 31, 2008	1,101,333	\$ 21.19	7.18
Exercisable at March 31, 2008	633,334	\$ 19.56	6.97
Fair value of stock options granted		\$ 10.72	

The estimated fair value of the options granted during the three months ended March 31, 2008 was calculated using a Black Scholes Merton option pricing model ( Black Scholes ). The following schedule reflects the various assumptions included in this model as it relates to the valuation of our options:

	Three Months Ended March 31, 2008
Risk free interest rate	3.52%
Volatility	53.3%
Dividend yield	0%

Expected years until exercise

5

8

**Table of Contents****GOODRICH PETROLEUM CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

During the three months ended, March 31, 2008, we granted 239,003 restricted (phantom) shares under our 2006 Long-Term Incentive Plan to employees as normal annual awards. The following table summarizes information on restricted stock activity for the three months ended March 31, 2008:

	Number of Shares	Weighted Average Grant Date Fair Value Per Share
Unvested at December 31, 2007	108,251	\$ 33.60
Vested	(15,496)	21.91
Granted	239,003	21.72
Forfeited	(1,966)	28.13
 Unvested at March 31, 2008	 329,792	

In the three months ended March 31, 2008, we recorded \$1.3 million in stock compensation expense comprised of \$0.5 million from stock options and \$0.8 million from restricted (phantom) share plans. In the three months ended March 31, 2007, we recorded \$1.4 million in stock compensation expense comprised of \$0.7 million from stock options and \$0.7 million from restricted (phantom) share plans.

**NOTE 3 Asset Retirement Obligations**

The Company follows SFAS No. 143, *Accounting for Asset Retirement Obligations* ( SFAS 143 ) which requires the Company to record the fair value of a liability associated with the retirement obligations of its tangible long-lived assets in the periods in which it is incurred. The Company capitalizes the discounted fair value of the liability when initially incurred. The liability is accreted through accretion expense to its full fair value during the life of the long-lived asset.

The reconciliation of the beginning and ending asset retirement obligation for the period ending March 31, 2008 is as follows (in thousands):

Beginning balance, January 1, 2008	\$ 6,180
Liabilities incurred	372
Accretion expense (reflected in depletion, depreciation and amortization expense)	83
 Ending balance, March 31, 2008	 6,635
Less current portion (including \$0.3 million attributable to Assets Held for Sale)	588
	 \$ 6,047

**NOTE 4 Long-Term Debt**

Long-term debt consisted of the following balances (in thousands):

Edgar Filing: GOODRICH PETROLEUM CORP - Form 10-Q

	March 31, 2008	December 31, 2007
Senior Credit Facility	\$ 34,000	\$ 40,500
Second Lien Term Loan	75,000	
3.25% convertible senior notes due 2026	175,000	175,000
Total long-term debt	\$ 284,000	\$ 215,500

*Senior Credit Facility*

On November 17, 2005, we amended our existing credit agreement and entered into an amended and restated senior credit agreement (as amended, the Senior Credit Facility ) and a term loan that expanded our borrowing capabilities and extended our credit facility for an additional two years. Total lender commitments under the Senior Credit Facility were \$200 million, and the Senior Credit Facility matures on February 25, 2010. Revolving borrowings under the Senior Credit Facility

**Table of Contents**

**GOODRICH PETROLEUM CORPORATION AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

are limited to, and subject to periodic redeterminations of the borrowing base. On January 11, 2008, we entered into the Ninth Amendment to our Senior Credit Facility. The amendment included the reduction in the borrowing base to \$150 million less 30% of the Second Lien Term Loan (discussed below) in excess of \$50 million. At March 31, 2008, we had a borrowing base of \$142.5 million under the Senior Credit Facility and we had \$34.0 million in outstanding revolving borrowings under the Facility. Interest on revolving borrowings under the Senior Credit Facility accrues at a rate calculated, at our option, at the bank base rate plus 0.00% to 0.50%, or LIBOR plus 1.25% to 2.25%, depending on borrowing base utilization.

On May 7, 2008, the bank group established the new borrowing base at \$175 million.

The terms of the Senior Credit Facility, as amended, require us to maintain certain covenants. Capitalized terms used, but not defined, here have the meanings assigned to them in the Senior Credit Facility. As of March 31, 2008, we were in compliance with all of the financial covenants of our Senior Credit Facility. The covenants in effect at March 31, 2008 include:

Current Ratio of 1.0/1.0,

Interest Coverage Ratio of not less than 3.0/1.0 for the trailing four quarters, and

Total Debt of no greater than 3.0 times EBITDAX for the trailing four quarters. (EBITDAX is earnings before interest expense, income tax, DD&A, exploration expense and impairment of oil and gas properties. In calculating EBITDAX for this purpose, earnings includes realized gains (losses) from derivatives but excludes unrealized gains (losses) from derivatives. The 3.25% convertible senior notes are excluded from the calculation of Total Debt for the purpose of computing this ratio.)

*Second Lien Term Loan*

On January 16, 2008, we entered into a new Second Lien Term Loan Agreement which provides for a 3-year, non-revolving loan of \$75.0 million and is due in a single maturity on December 31, 2010. There are no rights to prepay in the first year. Voluntary prepayment rights in the second year are at 101% of par, and thereafter at par. Interest on the term loan borrowing accrues at a rate of LIBOR plus 550 basis points and is payable quarterly in arrears. As of March 31, 2008, we were in compliance with all of the financial covenants of our Second Lien Term Loan. The terms of the Second Lien Term Loan Agreement contain financial covenants which include:

Asset coverage ratio (defined as the present value of proved reserves discounted 10% to total debt, excludes 3.25% convertible senior notes) of not less than 1.5 to 1.0;

Total debt to EBITDAX ratio of not more than 3.0 to 1.0 (total debt to exclude the 3.25% convertible senior notes); and

EBITDAX to interest expense ratio of not less than 3.0 to 1.0.

*Convertible Senior Notes*

In December 2006, we sold \$175 million of 3.25% convertible senior notes due in December 2026. The notes mature on December 1, 2026, unless earlier converted, redeemed or repurchased. The notes are our senior unsecured obligations and rank equally in right of payment to all of our other existing and future indebtedness. The notes accrue interest at a rate of 3.25% annually, and interest will be paid semi-annually on

## Edgar Filing: GOODRICH PETROLEUM CORP - Form 10-Q

June 1 and December 1. Interest payments on the notes began on June 1, 2007.

Before December 1, 2011, the notes are not redeemable. On or after December 11, 2011, we may redeem for cash all or a portion of the notes, and the investors may require us to repurchase the notes on each of December 11, 2011, 2016 and 2021. The notes are convertible into shares of our common stock at a rate equal to the sum of:

- a) 15.1653 shares per \$1,000 principal amount of notes (equal to a base conversion price of approximately \$65.94 per share) plus
- b) an additional amount of shares per \$1,000 of principal amount of notes equal to the incremental share factor (2.6762), multiplied by a fraction, the numerator of which is the applicable stock price less the base conversion price and the denominator of which is the applicable stock price.

**Table of Contents****GOODRICH PETROLEUM CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****NOTE 5 Net Income (Loss) Per Common Share**

Net income (loss) was used as the numerator in computing basic and diluted income (loss) per common share for the three months ended March 31, 2008 and 2007. The following table reconciles the weighted average shares outstanding used for these computations (in thousands):

	<b>For the Three Months Ended March 31,</b>	
	<b>2008</b>	<b>2007</b>
Basic Method	31,705	25,141
Dilutive Stock Options and Restricted Stock		245
<b>Dilutive Method</b>	<b>31,705</b>	<b>25,386</b>

Common shares on assumed conversion of restricted and employee option stock for the three months ended March 31, 2008 in the amount of 105,645 shares were not included in the computation of diluted loss per common share since their inclusion would be anti-dilutive.

**NOTE 6 Income Taxes**

The Company did not record a tax benefit for the quarter ended March 31, 2008 which differs from the amount calculated at the statutory rate of 35% due to the increase in the valuation allowance of \$8.4 million. In determining the carrying value of a deferred tax asset, SFAS 109 provides for the weighing of evidence in estimating whether and how much of a deferred tax asset may be recoverable. As we have incurred net operating losses in 2006 and prior years, relevant accounting guidance suggests that cumulative losses in recent years constitute significant negative evidence, and that future expectations about income are insufficient to overcome a history of such losses. We increased our valuation allowance and reduced our net deferred tax asset to zero during 2007 after considering all available positive and negative evidence related to the realization of our deferred tax asset. If we achieve profitable operations in the future, we may reverse a portion of the valuation allowance in an amount at least sufficient to eliminate any tax provision in that period. The valuation allowance has no impact on our net operating loss ( NOL ) position for tax purposes, and if we generate taxable income in future periods, we will be able to use our NOLs to offset taxes due at that time. The Company will continue to assess the valuation allowance against deferred tax assets considering all available evidence obtained in future reporting periods.

As of March 31, 2008, the Company had no unrealized tax benefits. There were no significant changes to the calculation since year end 2007. The Company does not anticipate that total unrecognized tax benefits will significantly change due to the settlement of audits and the expiration of statute of limitations prior to March 31, 2009.

**NOTE 7 Stockholders Equity***Share Lending Agreement*

In connection with the offering of our 3.25% convertible senior notes we agreed to lend an affiliate of Bear, Stearns & Co. ( BSC ) a total of 3,122,263 shares of our common stock under the Share Lending Agreement. Under this agreement, BSC is entitled to offer and sell such shares and use the sale to facilitate the establishment of a hedge position by investors in the notes. BSC will receive all proceeds from such common stock offerings and lending transactions under this agreement. We will not receive any of the proceeds from these transactions. BSC is obligated to return the shares to us in the event of certain circumstances, including the redemption of our 3.25% convertible senior notes or the conversion of the notes to shares pursuant to the terms of the indenture governing the 3.25% convertible senior notes.

The Share Lending Agreement also requires collateral to be posted by BSC if its credit rating is below either A3 by Moody's Investors Service ( Moody's ) or A- by Standard and Poors ( S&P ). As a result of the long term ratings downgrade of BSC in March 2008, BSC was required to return all or a portion of the borrowed shares or collateralize the return obligation with cash or highly liquid non-cash collateral. On March 20,

## Edgar Filing: GOODRICH PETROLEUM CORP - Form 10-Q

2008, BSC had returned 1,497,963 shares of the 3,122,263 originally borrowed shares and fully collateralized the remaining 1,624,300 borrowed shares with a cash collateral deposit of approximately \$41.3 million. This amount represents the market value of the remaining borrowed shares at March 20, 2008. Under the Share Lending Agreement, BSC is required to maintain collateral value in the amount at least

**Table of Contents**

**GOODRICH PETROLEUM CORPORATION AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

equal to the market value of the outstanding borrowed shares. The market value of the cash collateral deposit at March 31, 2008 was approximately \$47.8 million. The 1,497,963 shares returned to the Company were recorded to Treasury stock and retired in March of 2008.

The 1,624,300 shares of common stock outstanding as of March 31, 2008, under the Share Lending Agreement are required to be returned to the Company in the future. The shares are treated in basic and diluted earnings per share as if they were already returned and retired. The shares of common stock lent under the Share Lending Agreement have no impact on the earnings per share calculation.

*Capped Call Option Transactions*

On December 10, 2007, we closed the public offering of 6,430,750 shares of our common stock at a price of \$23.50 per share. Net proceeds from the offering were approximately \$145.4 million after deducting the underwriters' discount and estimated offering expenses. We used approximately \$123.8 million of the net proceeds to pay off outstanding borrowings under our Senior Credit Facility, and approximately \$21.6 million of the net proceeds to purchase capped call options on shares of our common stock from affiliates of BSC and J.P. Morgan Securities Inc. The capped call option transactions covered, subject to customary anti-dilution adjustments, approximately 5.8 million shares of our common stock, and each of them was divided into a number of tranches with differing expiration dates. One third of the options will expire over each of three separate multi-day settlement periods beginning approximately 18 months, 24 months and 30 months from the closing of the offering, respectively.

The capped call option transactions are expected to result in our receipt, on a net share, cashless basis of a certain number of shares of our common stock if the market value per share of the common stock, as measured under the terms of the capped call option agreements, on the option expiration date for the relevant tranche is greater than the lower call strike price of the capped call option transactions. We refer to the amount by which the market value per share exceeds the lower call strike price as an in-the-money amount for the relevant tranche of the capped call option transaction. The in-the-money amount will never exceed the difference between the upper call strike price and the lower call strike price (i.e., it will be capped). The lower call strike price is \$23.50, which corresponds to the price to the public in the equity offering and the upper call strike price is \$32.90, which corresponds to 140% of the price to the public in the offering. Both lower and upper call strike prices are subject to customary anti-dilution and certain other adjustments. The number of shares of our common stock that we will receive from the option counterparties upon expiration of each tranche of the capped call option transactions will be equal to the in-the-money amount of that tranche divided by the market value per share of the common stock, as measured under the terms of the capped call option agreements, on the option expiration date for that tranche. If the stock price is equal to the upper call strike price of \$32.90 on each of the settlement dates, we will recoup up to 1.6 million shares.

The capped call option agreements were separate transactions entered into by us with the option counterparties and were not part of the terms of the offering of common stock.

The capped call option agreements require an option counterparty to transfer their rights and obligations within 30 days if their credit rating is below either Baa1 by Moody's or BBB+ by S&P. As a result of the downgrade of BSC on March 14, 2008, BSC was obligated to transfer their rights and obligations under the capped call option agreement to a suitable counterparty (one with a credit rating of at least BBB+ by S&P and Baa1 by Moody's) within 30 days. As a result of a ratings upgrade of BSC by S&P on March 24, 2008, the obligation to transfer their rights and obligations to an entity with a higher credit rating was cured.

**GOODRICH PETROLEUM CORPORATION AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**NOTE 8 Derivative Activities**

*Commodity Derivative Activity*

We enter into swap contracts, costless collars and other derivative agreements from time to time to manage the commodity price risk for a portion of our production. Our strategy, which is administered by the Hedging Committee of our Board of Directors, and reviewed periodically by the entire Board of Directors, has been to generally hedge between 30% and 70% of our estimated total production for the period the hedges are in effect. As of March 31, 2008, the commodity derivatives we used were in the form of:

swaps, where we receive a fixed price and pay a floating price, based on NYMEX and field prices,

collars, where we receive the excess, if any, of the floor price over the reference price, based on NYMEX quoted prices, and pay the excess, if any, of the reference price over the ceiling price, and

fixed price physical contracts, whereby we agree in advance with the purchasers of our physical gas volumes as to specific quantities to be delivered and specific prices to be received for gas deliveries at specific transfer points in the future.

We account for our commodity derivative contracts in accordance with SFAS 133. SFAS 133 requires each derivative to be recorded on the balance sheet as an asset or liability at its fair value. Additionally, the statement requires that changes in a derivative's fair value be recognized currently in earnings unless specific hedge accounting criteria are met at the time the derivative contract is executed. The Company has elected not to apply hedge accounting treatment to our swaps and collars and as such all changes in the fair value of these instruments are recognized in earnings. Our fixed price physical contracts qualify for the normal purchase and normal sale exception. Contracts that qualify for this treatment do not require mark-to-market accounting treatment.

**Table of Contents****GOODRICH PETROLEUM CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

As of March 31, 2008, our open forward positions on our outstanding commodity derivative contracts, all of which were with either BNP Paribas, Bank of Montreal or Comerica was as follows:

<b>Fixed Price Physical Contracts</b>	<b>Daily Volume</b>	<b>Total Volume</b>	<b>Average Field Price (1)</b>		
Natural gas (MMBtu)					
2Q 2008	28,500	2,593,500	\$	8.05

3Q 2009	20,000	1,840,000	\$	7.87	
4Q 2009	20,000	1,840,000	\$	7.87	
					<b>Total \$ (24,437,879)</b>

(1) Normal sale at a fixed field delivery point, a comparable NYMEX average price of \$8.28.

(2) The index price is based upon Natural Gas Pipeline of America, Texok zone as published in the Inside FERC. The comparable index price based on NYMEX was approximately \$8.25/Mmbtu.

The fair value of the commodity derivative contracts in place at March 31, 2008 that are marked to market, resulted in a net liability of \$24.4 million. For the three months ended March 31, 2008, we recognized in earnings a \$24.0 million loss from these instruments, which consisted of \$0.3 million in realized gains and \$24.3 million in unrealized losses.

## Edgar Filing: GOODRICH PETROLEUM CORP - Form 10-Q

During the first quarter of 2008 we entered into the following NYMEX priced natural gas derivative contracts:

5,000 Mmbtu/day swap with a price of \$8.69 per Mmbtu for the period April to October 2008,

15,000 Mmbtu/day swap with a price of \$8.81 per Mmbtu for calendar year of 2009,

5,000 Mmbtu/day swap with a price of \$8.90 per Mmbtu for the calendar year of 2009, and

10,000 Mmbtu/day collar per with a floor and ceiling price of \$8.00 and \$9.30 per Mmbtu, respectively, for the calendar year of 2009.

**Table of Contents****GOODRICH PETROLEUM CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

During the first quarter of 2008, we also entered into a physical sales contract for 5,000 Mmbtu/day for the period April to October 2008. The field delivery price of \$8.13 per Mmbtu is comparable to a NYMEX price of approximately \$8.26 per Mmbtu.

*Interest Rate Swaps*

We have several variable-rate debt obligations that expose us to the effects of changes in interest rates. To partially reduce our exposure to interest rate risk, from time to time we enter into interest rate swap agreements. At March 31, 2008, we had the following interest rate swap in place with BNP Paribas:

<b>Effective Date</b>	<b>Maturity Date</b>	<b>Libor Swap Rate</b>	<b>Notional Amount (Millions)</b>	<b>Fair Value (Dollars)</b>
2/27/2007	2/26/2009	4.86%	\$ 40.0	\$ 938,768

For the three months ended March 31, 2008, we recognized a \$0.5 million loss from the interest rate derivative which is not designated as a hedge.

We have entered into interest rate derivative swap agreements subsequent to March 31, 2008, whereby we have contracted an additional notional amount of \$75 million at a fixed rate of 3.191% for the period April 2008 to April 2010. We have not designated this swap as a hedge.

**NOTE 9 Fair Value of Financial Instruments**

We adopted SFAS 157 effective January 1, 2008 for financial assets and liabilities measured on a recurring basis. SFAS 157 applies to all financial assets and financial liabilities that are being measured and reported on a fair value basis. In February 2008, the FASB issued FSP 157-2, which delayed the effective date of SFAS 157 to fiscal years beginning after November 15, 2008 for nonfinancial assets and liabilities. Fair value, as defined in SFAS 157, is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SFAS 157 affects the Company in the fair value measurement of the commodity and interest rate derivative positions which must be classified in one of the following categories:

*Level 1 Inputs*

These inputs come from quoted prices (unadjusted) in active markets for identical assets or liabilities.

*Level 2 Inputs*

These inputs are other than quoted prices that are observable, for an asset or liability. This includes: quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; inputs other than quoted prices that are observable for the asset or liability; and inputs that are derived principally from or corroborated by observable market data by correlation or other means.

*Level 3 Inputs*

These are unobservable inputs for the asset or liability which require the Company's own assumptions.

As required by SFAS 157, financial assets and liabilities are classified based on the lowest level of input that is significant to the fair value measurement. Our assessment of the significance of a particular input to the fair value measurement requires judgment, and may affect the valuation of the fair value of assets and liabilities and their placement within the fair value hierarchy levels.

**Table of Contents****GOODRICH PETROLEUM CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

The following table summarizes the valuation of our financial instruments by SFAS 157 input levels as of March 31, 2008:

Description (Liabilities)	Fair Value Measurement (in thousands)			Total
	Level 1	Level 2	Level 3	
Current liabilities	\$	\$ 15,624	\$	\$ 15,624
Non-current liabilities		9,753		9,753
<b>Total</b>	<b>\$</b>	<b>\$ 25,377</b>	<b>\$</b>	<b>\$ 25,377</b>

**NOTE 10 Discontinued Operations**

On March 20, 2007, the Company closed the sale of substantially all of its oil and gas properties in South Louisiana with the exception of the St. Gabriel, Bayou Bouillon and Plumb Bob fields as discussed under Note 1 Assets Held for Sale. In accordance with SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, the results of operations for the properties that were sold and for the properties that are held for sale have been reflected as discontinued operations. We are actively considering bids and will accept any reasonable offer on the three remaining properties.

The following table summarizes the amounts included in Income from discontinued operations net of tax (in thousands):

	Three Months Ended	
	March 31, 2008	March 31, 2007
Revenues	579	8,603
Expenses	194	4,257
Income from discontinued operations	385	4,346
Income tax expense		(1,521)
Income from discontinued operations, net of tax	\$ 385	\$ 2,825

The following presents the main classes of assets and liabilities associated with long-lived assets classified as held for sale (in thousands):

	As of
	March 31, 2008
Assets held for sale	\$ 312
Accrued abandonment costs	276

**NOTE 11 Acquisitions and Divestitures**

In February 2008, we acquired additional acreage located in the Angelina River trend for \$2.5 million from a private company. We acquired an additional 40% working interest in the James Lime rights in our Bethune area, and an additional 31.25% working interest in the James Lime rights in our Allentown area. After the drilling of the second Allentown well, we will earn an additional 6.25% working interest in the James Lime for a total working interest of 93.75%.

## Edgar Filing: GOODRICH PETROLEUM CORP - Form 10-Q

In March, 2008, we sold seismic data related to the St. Gabriel Field (treated as held for sale at March 31, 2008) for \$0.4 million. We had no basis in the data and consequently the entire proceeds of \$0.4 million was recorded as a gain (See Note 10).

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**NOTE 12 Commitments and Contingencies**

We are party to lawsuits arising in the normal course of business. We intend to defend these actions vigorously and believe, based on currently available information, that adverse results or judgments from such actions, if any, will not be material to our consolidated financial position, results of operations or liquidity. No significant changes to these type lawsuits have occurred since December 31, 2007.

## **Table of Contents**

### **Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations**

#### **Forward-Looking Statements**

Certain statements in this report, including statements of the future plans, objectives, and expected performance of the Company, are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, that are dependent upon certain events, risks and uncertainties that may be outside the Company's control, and which could cause actual results to differ materially from those anticipated. Some of these include, but are not limited to:

planned capital expenditures;

future drilling activity;

our financial condition;

continued availability of debt and equity financing;

business strategy;

the market prices of oil and gas;

economic and competitive conditions;

legislative and regulatory changes; and

financial market conditions.

There are numerous uncertainties inherent in estimating quantities of proved oil and gas reserves and in projecting future rates of production and the timing of development expenditures. The total amount or timing of actual future production may vary significantly from reserve and production estimates. The drilling of exploratory wells can involve significant risks, including those related to timing, success rates and cost overruns. Lease and rig availability, complex geology and other factors can affect these risks. Although from time to time we make use of futures contracts, swaps, costless collars and fixed-price physical contracts to mitigate risk, fluctuations in oil and gas prices or a prolonged continuation of low prices may substantially adversely affect the Company's financial position, results of operations and cash flows.

These factors, as well as additional factors that could affect our operating results and performance are described in our Annual Report on Form 10-K for the year ended December 31, 2007, under the headings Business, Risk Factors and Management's Discussion and Analysis of Financial Condition and Results of Operations. We urge you to carefully consider those factors.

All forward-looking statements attributable to us are qualified in their entirety by this cautionary statement. We undertake no responsibility to update our forward-looking statements.

#### **Overview**

##### *General*

## Edgar Filing: GOODRICH PETROLEUM CORP - Form 10-Q

We are an independent oil and gas company engaged in the exploration, exploitation, development and production of oil and natural gas properties primarily in the Cotton Valley Trend of East Texas and Northwest Louisiana.

Our business strategy is to provide long term growth in net asset value per share through the growth and expansion of our oil and gas reserves and production. We focus on adding reserve value through the development of our relatively low risk development drilling program in the Cotton Valley Trend. The Cotton Valley Trend of East Texas and Northwest Louisiana generally provides multiple pay objectives including: the Cotton Valley, Travis Peak, Hosston, James Lime, Pettit and Haynesville shale formations. We continue to aggressively pursue the acquisition and evaluation of prospective acreage, oil and gas drilling opportunities and potential property acquisitions.

### *Source of Revenues*

We derive our revenues from the sale of oil and natural gas that is produced from our properties. Revenues are a function of both the volume produced and the prevailing market price at the time of sale. Production volumes, while somewhat predictable after wells have begun producing, can be impacted for various reasons. The price of oil and natural gas is a primary factor affecting our revenues. To achieve more predictable cash flows and to reduce our exposure to downward

## **Table of Contents**

price fluctuations, we use derivative instruments to manage future sales prices on a portion of our oil and natural gas production. While the derivative instruments may protect us against downward price fluctuation, the use of certain types of derivative instruments may prevent us from realizing the full benefit of upward price movements.

*First Quarter 2008 financial and operating results include:*

We increased our oil and gas production volumes on continuing operations to approximately 57,866 Mcfe per day, representing an increase of 55% from the first quarter of 2007.

We conducted drilling operations on 38 gross wells in the first quarter of 2008.

We entered into a \$75.0 million Second Lien Term Loan in January 2008.

We reduced our total operating expenses by over \$1.00 per Mcfe from first quarter 2007 to first quarter 2008.

### *Cotton Valley Trend*

Our relatively low risk development drilling program in the Cotton Valley Trend is primarily centered in and around Rusk, Panola, Angelina and Nacogdoches counties, Texas, and DeSoto, Caddo and Bienville parishes, Louisiana. We have steadily increased our acreage position in these areas over the last two years to approximately 187,000 gross acres as of March 31, 2008. Through March 31, 2008, we have participated in the drilling and logging of 300 Cotton Valley Trend wells with a success rate in excess of 99%. We conducted drilling operations on 38 gross wells during the first quarter of 2008. Our net production volumes from our Cotton Valley Trend wells aggregated approximately 57,800 Mcfe per day in the first quarter of 2008, or approximately 55% higher than the Cotton Valley Trend production of the comparable prior year period.

### *Sale of South Louisiana Assets*

On March 20, 2007, we completed the sale of substantially all of our assets in South Louisiana to a private company. The sale resulted in total proceeds of \$72.5 million, net to the Company, after normal closing adjustments. The effective date of the sale was July 1, 2006. The remaining fields treated as held for sale are St. Gabriel, Bayou Bouillon and Plumb Bob.

A more complete overview and discussion of our operations can be found in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations in our Annual Report on Form 10-K for the year ended December 31, 2007.

## **Results of Operations**

Our financial statements include discontinued operations presentation for our assets located in South Louisiana. See Note 9 to our consolidated financial statements.

For the three months ended March 31, 2008, we reported a net loss applicable to common stock of \$25.4 million, or \$0.80 per basic share, on total revenue from continuing operations of \$46.4 million as compared with a net loss applicable to common stock of \$0.5 million, or \$0.02 per basic share, on total revenue from continuing operations of \$23.5 million for the three months ended March 31, 2007. We recorded a \$24.7 million loss on derivatives not designated as hedges in the first quarter of 2008. See our discussion below under the caption Loss on Derivatives Not Designated as Hedges.

**Table of Contents***Oil and Natural Gas Revenues*

Revenues presented in the table and the discussion below represent revenue from sales of our oil and natural gas production volumes for continuing operations.

**Three Months Ended March 31, 2008****Summary Operating Information:**

Continuing Operations	2008	2007	Variance	
	(In thousands, except for price data)			
<b>Revenues:</b>				
Natural gas	\$ 42,460	\$ 21,862	\$ 20,598	94%
Oil and condensate	3,737	1,455	2,282	157%
Natural gas, oil and condensate	46,197	23,317	22,880	98%
Operating revenues	46,353	23,542	22,811	97%
Operating expenses	42,750	30,876	11,874	38%
Operating income (loss)	3,603	(7,334)	10,937	149%
Net income (loss) applicable to common stock	(25,394)	(476)	(24,918)	(5235)%
<b>Net Production:</b>				
Natural gas (MMcf)	5,033	3,195	1,838	58%
Oil and condensate (MBbls)	39	26	13	50%
Total (Mmcfe)	5,266	3,351	1,915	57%
Average daily production	57,866	37,233	20,633	55%
<b>Average realized sales price per unit:</b>				
Natural gas (per Mcf)	\$ 8.44	\$ 6.84	\$ 1.60	23%
Oil and condensate (per Bbl)	96.15	56.68	39.47	70%
Total (per Mcfe)	8.77	6.96	1.81	26%

Revenues from continuing operations increased 98% in the first quarter of 2008 compared to the same period in 2007 due primarily to a substantial increase in Cotton Valley Trend production and higher natural gas prices. Production from continuing operations increased 57% period to period due to a substantial increase in the number of wells producing in the Cotton Valley Trend. The average realized sales price per unit increased 26% over the prior year period.

*Operating Expenses*

The following table presents our comparative per unit produced operating expenses related to continuing operations:

	Three Months Ended March 31,			
	2008	2007	Variance	
<b>Operating Expenses per Mcfe</b>				
Lease operating expenses	\$ 1.35	\$ 1.23	\$ 0.12	10%
Production and other taxes	0.24	0.09	0.15	167%
Transportation	0.36	0.32	0.04	13%
Depreciation, depletion and amortization	4.76	5.28	(0.52)	(10)%
Exploration	0.38	0.69	(0.31)	(45)%
General and administrative	1.03	1.59	(0.56)	(35)%

*Lease Operating.* Lease operating expense ( LOE ) for the first quarter of 2008 increased \$3.0 million on an absolute basis (\$7.1 million compared to \$4.1 million) and ten percent on a per unit basis compared to prior year quarter (\$1.35 per Mcfe compared to \$1.23 per Mcfe). The first quarter of 2008 includes \$1.0 million in workover costs which accounted for \$0.18 of the total LOE per Mcfe rate of \$1.35. In the prior year quarter, workover costs of \$0.1 million accounted for \$0.04 and abandonment costs accounted for \$0.02 of the total LOE per Mcfe rate of \$1.23. Excluding the impact of workover and abandonment costs, the LOE rate was \$1.17 per Mcfe for both periods.

## Edgar Filing: GOODRICH PETROLEUM CORP - Form 10-Q

*Production and Other Taxes.* Production and other taxes of \$1.3 million for the first quarter of 2008 includes production tax of \$0.8 million and ad valorem tax of \$0.4 million. Production taxes during the quarter are net of \$0.9 million of accrued Tight Gas Sands ( TGS ) credits for our wells in the State of Texas, which credits equate to \$0.17 per Mcfe of production. During the comparable period in 2007, production and other taxes of \$0.3 million were net of TGS credits of \$0.8 million, or \$0.24 per Mcfe of production, due largely to a greater number of backlogged TGS credits being approved by the State of Texas during the first quarter of 2007.

**Table of Contents**

These TGS credits allow for reduced, and in many cases the complete elimination of, severance taxes in the State of Texas for qualifying wells for up to ten years of production. We only accrue for such credits once we have been notified of the State's approval, and we anticipate that we will incur a gradually lower production tax rate in the future as we add additional Cotton Valley Trend wells to our production base and as reduced rates are approved.

*Transportation.* Transportation expense was \$1.9 million (\$0.36 per Mcfe) in the first quarter of 2008 compared to \$1.1 million (\$0.32 per Mcfe) in the first quarter of 2007. The increased expense was a function of our higher production volumes and a greater percentage of production coming from fields with higher transportation rates.

*Depreciation, Depletion and Amortization.* Depreciation, depletion and amortization ( DD&A ) expense increased to \$25.1 million in the first quarter of 2008 from \$17.7 million for the same period in 2007, primarily due to higher levels of production partially offset by a lower DD&A rate. The average DD&A rate for the first quarter of 2008 was \$4.76 per Mcfe compared to \$5.28 per Mcfe for the same quarter of 2007.

We calculated first quarter 2008 and 2007 DD&A rates using the December 31, 2007 and December 31, 2006 reserves, respectively. Proved developed reserves increased 25% from 87.9 Bcfe at December 31, 2006 to 109.8 Bcfe at December 31, 2007. The favorable impact of our 2007 Cotton Valley Trend drilling program and positive revisions of previous estimates from December 31, 2006 to December 31, 2007, led to the increase in proved developed reserves.

*Exploration.* Exploration expenses for the first quarter of 2008 decreased to \$2.0 million (\$0.38 per Mcfe) from \$2.3 million (\$0.69 per Mcfe) for the first quarter of 2007, due primarily to a decrease in the amortization of undeveloped leasehold costs, from \$1.8 million in the first quarter of 2007 to \$1.6 million in the first quarter of 2008.

*General and Administrative.* General and administrative ( G&A ) expense decreased 35% on a per unit basis to \$1.03 per Mcfe in the first quarter 2008 compared to \$1.59 per Mcfe in 2007 primarily due to a 57% increase in production volumes in 2008. Costs remained relatively flat at \$5.4 million versus \$5.3 million for the first quarter of 2008 and 2007, respectively. Stock based compensation expense, which is a non-cash item, amounted to \$1.3 million for the first quarter of 2008 versus \$1.4 million for the prior year period.

*Other Income (Expense)*

The following table presents our comparative other income (expense) for the periods presented (in thousands):

	<b>Three Months Ended March 31,</b>	
	<b>2008</b>	<b>2007</b>
<b>Other income (expense):</b>		
Interest expense	(3,783)	(2,624)
Loss on derivatives not designated as hedges	(24,487)	(9,487)
Income tax (expense) benefit		6,743
Average total borrowings	254,060	219,483
Weighted average interest rate	6.0%	4.8%

*Interest Expense.* Interest expense increased to \$3.8 million in the first quarter of 2008 compared to the first quarter of 2007 amount of \$2.6 million as a result of the higher average level of total borrowings in 2008, and an increase in the weighted average interest rate.

*Loss on Derivatives Not Designated as Hedges.* Loss on derivatives not designated as hedges was \$24.5 million in the first quarter of 2008, including a realized gain of \$0.3 million and an unrealized loss of \$24.3 million for the change in fair value of our natural gas commodity contracts. The increases in natural gas prices experienced during the period resulted in an unrealized loss on our commodity contracts. The first quarter of 2008 also includes a realized gain of \$0.1 million and an unrealized loss of \$0.6 million on our interest rate swap. As a comparison, the first quarter of 2007 included an unrealized loss of \$13.2 million for the change in fair value of our commodity contracts and a realized gain of \$3.7 million. The first quarter of 2007 also included a realized gain of \$0.1 million and an unrealized loss of \$0.1 million on our interest rate swap.

**Table of Contents**

*Income taxes.* We increased our valuation allowance and reduced our net deferred tax asset to zero during 2007 after considering all available positive and negative evidence related to the realization of our deferred tax asset. As a result, we did not provide for income taxes on continuing operations in the first quarter of 2008. Income taxes were a benefit of \$6.7 million for the first quarter of 2007 and represented approximately 35% of pre-tax loss from continuing operations.

*Discontinued Operations*

In a sale that closed March 20, 2007, we sold our assets in South Louisiana to a private company. We have presented comparative data for our discontinued operations below (in thousands):

	<b>Three Months Ended March 31,</b>	
	<b>2008</b>	<b>2007</b>
<b>Discontinued Operations</b>		
<b>Net Production:</b>		
Natural gas (MMcf)	7	521
Oil and condensate (MBbls)	2	82
Total (MMcfe)	19	1,013
Average Daily Net Production (Mcfe)	212	11,256
Gain (loss) on disposal, net of tax	\$ 400	\$ 10,913
Income (loss) from discontinued operations, net of tax	385	2,825
Total income (loss), net of tax	\$ 785	\$ 13,738

We realized a gain on disposal, net of tax, of \$10.9 million in the first quarter of 2007. Our remaining South Louisiana assets, the St. Gabriel, Bayou Bouillon and Plumb Bob fields, were considered held for sale at March 31, 2008. In March 2008, we sold seismic related to the St. Gabriel field and recognized a gain on disposal of \$0.4 million.

Income from discontinued operations for the three months ended March 31, 2008 and 2007 related to our South Louisiana assets. The first quarter of 2007 includes income from sold properties through the date of closing March 20, 2007. The first quarter of 2008 includes income from assets held for sale only.

**Liquidity and Capital Resources***Cash Flows*

The following table presents our comparative cash flow summary for the periods reported (in thousands):

	<b>Three Months Ended March 31,</b>		
	<b>2008</b>	<b>2007</b>	<b>Variance</b>
<b>Cash flow statement information:</b>			
<b>Net cash:</b>			
Provided by operating activities	\$ 17,195	\$ 16,909	\$ 286
Provided by (used in) investing activities	(84,761)	12,525	(97,286)
Provided by (used in) financing activities	65,786	(28,046)	93,832
Increase (decrease) in cash and cash equivalents	\$ (1,780)	\$ 1,388	\$ (3,168)

*Operating activities.* Net cash provided by operating activities increased \$0.3 million to \$17.2 million for the first three months of 2008, from \$16.9 million for the comparable 2007 period. Our cash flows before working capital changes were up from \$19.9 million in the first three months of 2007 to \$28.9 million in the first three months of 2008 as a result of increased production volumes from continuing operations and higher natural gas prices. Net cash provided by operating activities in the first quarter of 2008 was reduced by \$12.5 million due to the prepay transaction arranged with a physical gas purchaser prior to year end 2007. The physical volumes associated with this transaction were all delivered in the first quarter of 2008.

## Edgar Filing: GOODRICH PETROLEUM CORP - Form 10-Q

*Investing activities.* Net cash used in investing activities was \$84.8 million for the first three months of 2008 compared to net cash provided by investing activities of \$12.5 million for the first three months of 2007. Much of this change can be traced to the net proceeds of \$74.0 million from the sale of substantially all of our South Louisiana assets in the first quarter of 2007. Total capital expenditures of \$84.7 million for the first three months of 2008 were up 33% compared to the 2007

**Table of Contents**

amount of \$63.5 million. We conducted drilling operations on 38 gross wells, all of which are located in our Cotton Valley Trend, during the first three months of 2008. In comparison, we conducted drilling operations on only 19 gross wells, all located in our Cotton Valley Trend during the first three months of 2007. In 2008, we received proceeds of \$0.4 million from sales of seismic data for our St. Gabriel field. The St. Gabriel field is treated as an Asset Held for Sale at March 31, 2008.

*Financing activities.* Net cash provided by financing activities was \$65.8 million for the three months ended March 31, 2008 versus net cash used in financing activities of \$28.0 million for the same period in 2007. In the first quarter of 2008, we borrowed \$75.0 million on our Second Lien Term Loan and paid down a net of \$6.5 million on our revolving credit facility, resulting in a net borrowing of \$68.5 million in the first quarter of 2008. In the first quarter of 2007, we used proceeds from the sale of properties to pay the full outstanding balance on our existing bank credit facility, which had increased to \$65.0 million by the time we received these proceeds.

In December 2007, our Board of Directors approved a preliminary 2008 capital expenditure budget of approximately \$275 million to fund our development drilling program, lease acquisitions and installation of infrastructure in the Cotton Valley Trend. Through March 31, 2008, we have expended approximately \$85.6 million of our 2008 capital expenditure budget. We expect to finance the remainder of our 2008 capital expenditures through a combination of cash flow from operations and borrowings under our existing bank credit facility (see Senior Credit Facility ).

In the first quarter, we entered into a \$75.0 million Second Lien Term Loan. We intend to use the remaining borrowing base of our Senior Credit Facility, the Second Lien Term Loan and cash flow from operations to fund our ongoing drilling activity. Our existing credit facilities include certain financial covenants with which we were in compliance as of March 31, 2008. When considering the historical success of our capital raising activities and our bank relationships, we do not anticipate a lack of borrowing capacity under our senior credit facility in the foreseeable future due to an inability to meet any such financial covenants nor a reduction in our borrowing base.

*3.25% Convertible Senior Notes*

In December 2006, we sold \$175 million of 3.25% convertible senior notes due in December 2026. The notes mature on December 1, 2026, unless earlier converted, redeemed or repurchased. The notes are our senior unsecured obligations and rank equally in right of payment to all of our other existing and future indebtedness. The notes accrue interest at a rate of 3.25% annually, and interest will be paid semi-annually on June 1 and December 1. Interest payments on the notes began on June 1, 2007.

Before December 1, 2011, the notes are not redeemable. On or after December 11, 2011, we may redeem for cash all or a portion of the notes, and the investors may require us to repurchase the notes on each of December 11, 2011, 2016 and 2021. The notes are convertible into shares of our common stock at a rate equal to the sum of:

- a) 15.1653 shares per \$1,000 principal amount of notes (equal to a base conversion price of approximately \$65.94 per share) plus
- b) an additional amount of shares per \$1,000 of principal amount of notes equal to the incremental share factor (2.6762), multiplied by a fraction, the numerator of which is the applicable stock price less the base conversion price and the denominator of which is the applicable stock price.

*Share Lending Agreement*

In connection with the offering of our 3.25% convertible senior notes we agreed to lend an affiliate of Bear, Stearns & Co. ( BSC ) a total of 3,122,263 shares of our common stock under the Share Lending Agreement. Under this agreement, BSC is entitled to offer and sell such shares and use the sale to facilitate the establishment of a hedge position by investors in the notes. BSC will receive all proceeds from such common stock offerings and lending transactions under this agreement. We will not receive any of the proceeds from these transactions. BSC is obligated to return the shares to us in the event of certain circumstances, including the redemption of our 3.25% convertible senior notes or the conversion of the notes to shares pursuant to the terms of the indenture governing the 3.25% convertible senior notes.

The Share Lending Agreement also requires collateral to be posted by BSC if its credit rating is below either A3 by Moody's Investors Service ( Moody's ) or A- by Standard and Poors ( S&P ). As a result of the long term ratings downgrade of BSC in March 2008, BSC was required to return all or a portion of the borrowed shares or collateralize the return obligation with cash or highly liquid non-cash collateral. On March 20, 2008, BSC had returned 1,497,963 shares of the 3,122,263 originally borrowed shares and fully collateralized the remaining 1,624,300 borrowed shares with a cash

**Table of Contents**

collateral deposit of approximately \$41.3 million. This amount represents the market value of the remaining borrowed shares at March 20, 2008. Under the Share Lending Agreement, BSC is required to maintain collateral value in the amount at least equal to the market value of the outstanding borrowed shares. The market value of the cash collateral deposit at March 31, 2008 was approximately \$47.8 million. The 1,497,963 shares returned to the Company were recorded to Treasury stock and retired in March of 2008.

The 1,624,300 shares of common stock outstanding as of March 31, 2008, under the Share Lending Agreement are required to be returned to the Company in the future. The shares are treated in basic and diluted earnings per share as if they were already returned and retired. The shares of common stock lent under the Share Lending Agreement have no impact on the earnings per share calculation.

*Senior Credit Facility*

On November 17, 2005, we amended our existing credit agreement and entered into an amended and restated senior credit agreement (as amended, the Senior Credit Facility ) and a term loan that expanded our borrowing capabilities and extended our credit facility for an additional two years. Total lender commitments under the Senior Credit Facility were \$200 million, and the Senior Credit Facility matures on February 25, 2010. Revolving borrowings under the Senior Credit Facility are limited to, and subject to periodic redeterminations of the borrowing base. On January 11, 2008, we entered into the Ninth Amendment to our Senior Credit Facility. The amendment included the reduction in the borrowing base to \$150 million less 30% of the Second Lien Term Loan (discussed below) in excess of \$50 million. At March 31, 2008, we had a borrowing base of \$142.5 million under the Senior Credit Facility and we had \$34.0 million in outstanding revolving borrowings under the Facility. Interest on revolving borrowings under the Senior Credit Facility accrues at a rate calculated, at our option, at the bank base rate plus 0.00% to 0.50%, or LIBOR plus 1.25% to 2.25%, depending on borrowing base utilization.

On May 7, 2008, the bank group established the new borrowing base at \$175 million.

The terms of the Senior Credit Facility, as amended, require us to maintain certain covenants. Capitalized terms used, but not defined, here have the meanings assigned to them in the Senior Credit Facility. As of March 31, 2008, we were in compliance with all of the financial covenants of our Senior Credit Facility. The covenants in effect at March 31, 2008 include:

Current Ratio of 1.0/1.0,

Interest Coverage Ratio of not less than 3.0/1.0 for the trailing four quarters, and

Total Debt of no greater than 3.0 times EBITDAX for the trailing four quarters. (EBITDAX is earnings before interest expense, income tax, DD&A, exploration expense and impairment of oil and gas properties. In calculating EBITDAX for this purpose, earnings includes realized gains (losses) from derivatives, but excludes unrealized gains (losses) from derivatives. The 3.25% convertible senior notes are excluded from the calculation of Total Debt for the purpose of computing this ratio.)

*Second Lien Term Loan*

On January 16, 2008, we entered into a new Second Lien Term Loan Agreement which provides for a 3-year, non-revolving loan of \$75.0 million and is due in a single maturity on December 31, 2010. There are no rights to prepay in the first year. Voluntary prepayment rights in the second year are at 101% of par, and thereafter at par. Interest on the term loan borrowing accrues at a rate of LIBOR plus 550 basis points and is payable quarterly in arrears. As of March 31, 2008, we were in compliance with all of the financial covenants of our Second Lien Term Loan. The terms of the Second Lien Term Loan Agreement contain financial covenants which include:

Asset coverage ratio (defined as the present value of proved reserves discounted at 10% to total debt, excludes 3.25% convertible senior notes) of not less than 1.5 to 1.0;

Total debt to EBITDAX ratio of not more than 3.0 to 1.0 (total debt to exclude the 3.25% convertible senior notes); and

EBITDAX to interest expense ratio of not less than 3.0 to 1.0.

---

## **Table of Contents**

### *Capped Call Option Transactions*

On December 10, 2007, we closed the public offering of 6,430,750 shares of our common stock at a price of \$23.50 per share. Net proceeds from the offering were approximately \$145.4 million after deducting the underwriters' discount and estimated offering expenses. We used approximately \$123.8 million of the net proceeds to pay off outstanding borrowings under our Senior Credit Facility, and approximately \$21.6 million of the net proceeds to purchase capped call options on shares of our common stock from affiliates of BSC and J.P. Morgan Securities Inc. The capped call option transactions covered, subject to customary anti-dilution adjustments, approximately 5.8 million shares of our common stock, and each of them was divided into a number of tranches with differing expiration dates. One third of the options will expire over each of three separate multi-day settlement periods beginning approximately 18 months, 24 months and 30 months from the closing of the offering, respectively.

The capped call option transactions are expected to result in our receipt, on a net share, cashless basis of a certain number of shares of our common stock if the market value per share of the common stock, as measured under the terms of the capped call option agreements, on the option expiration date for the relevant tranche is greater than the lower call strike price of the capped call option transactions. We refer to the amount by which the market value per share exceeds the lower call strike price as an in-the-money amount for the relevant tranche of the capped call option transaction. The in-the-money amount will never exceed the difference between the upper call strike price and the lower call strike price (i.e., it will be capped). The lower call strike price is \$23.50, which corresponds to the price to the public in the equity offering and the upper call strike price is \$32.90, which corresponds to 140% of the price to the public in the offering. Both lower and upper call strike prices are subject to customary anti-dilution and certain other adjustments. The number of shares of our common stock that we will receive from the option counterparties upon expiration of each tranche of the capped call option transactions will be equal to the in-the-money amount of that tranche divided by the market value per share of the common stock, as measured under the terms of the capped call option agreements, on the option expiration date for that tranche. If the stock price is equal to the upper call strike price of \$32.90 on each of the settlement dates, we will recoup up to 1.6 million shares.

The capped call option agreements were separate transactions entered into by us with the option counterparties and were not part of the terms of the offering of common stock.

The capped call option agreements require an option counterparty to transfer their rights and obligations within 30 days if their credit rating is below either Baa1 by Moody's or BBB+ by S&P. As a result of the downgrade of BSC on March 14, 2008, BSC was obligated to transfer their rights and obligations under the capped call option agreement to a suitable counterparty (one with a credit rating of at least BBB+ by S&P and Baa1 by Moody's within 30 days. As a result of a ratings upgrade of BSC by S&P on March 24, 2008, the obligation to transfer their rights and obligations to an entity with a higher credit rating was cured.

### **Accounting Pronouncements**

See Note 1 Description of Business and Significant Accounting Policies New Accounting Pronouncements to our consolidated financial statements for a discussion of recently issued pronouncements, including Statement of Financial Accounting Standards No.157, *Fair Value Measurements* which we adopted effective January 1, 2008.

### **Critical Accounting Policies and Estimates**

Our discussion and analysis of our financial condition and results of operations are based on consolidated financial statements which have been prepared in accordance with generally accepted accounting principles in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts or assets, liabilities, revenues and expenses. We believe that certain accounting policies affect our more significant judgments and estimates used in the preparation of our consolidated financial statements. Our Annual Report on Form 10-K for the year ended December 31, 2007, includes a discussion of our critical accounting policies.

**Table of Contents****Item 3 Quantitative and Qualitative Disclosures about Market Risk***Commodity Price Risk*

Despite the measures taken by us to attempt to control price risk, we remain subject to price fluctuations for natural gas and crude oil sold in the spot market. Prices received for natural gas sold on the spot market are volatile due primarily to seasonality of demand and other factors beyond our control. Domestic crude oil and gas prices could have a material adverse effect on our financial position, results of operations and quantities of reserves recoverable on an economic basis.

We enter into futures contracts or other derivative arrangements from time to time to manage the commodity price risk for a portion of our production. Our strategy, which is administered by the Hedging Committee of our Board of Directors, and reviewed periodically by the entire Board of Directors, has been to generally hedge between 30% and 70% of our production. As of March 31, 2008, the commodity contracts we used were in the form of:

swaps, where we receive a fixed price and pay a floating price, based on NYMEX or specific transfer point quoted prices,

collars, where we receive the excess, if any, of the floor price over the reference price, based on NYMEX quoted prices, and pay the excess, if any, of the reference price over the ceiling price, and

fixed price physical contracts which qualify for normal purchase and normal sale treatment, whereby we agree in advance with the purchasers of our physical gas volumes as to specific quantities to be delivered and specific prices to be received for gas deliveries at specific transfer points in the future.

Our commodity contracts fall within our targeted range of 30% to 70% of our estimated net oil and gas production volumes for the applicable periods of 2008. The fair value of the natural gas commodity contracts in place at March 31, 2008, resulted in a net liability of \$24.4 million. Based on oil and gas pricing in effect at March 31, 2008, a hypothetical 10% increase in oil and gas prices would have resulted in a derivative liability of \$39.5 million while a hypothetical 10% decrease in oil and gas prices would have decreased the derivative liability to \$4.0 million. See Note 8 Derivative Activities to our consolidated financial statements for additional information.

*Interest Rate Risk*

We have a variable-rate debt obligation that exposes us to the effects of changes in interest rates. To partially reduce our exposure to interest rate risk, from time to time we enter into interest rate swap agreements. At March 31, 2008, we had the following interest rate swaps in place with BNP:

Effective Date	Maturity Date	Libor Swap Rate	Notional Amount (Millions)	Fair Value (Dollars)
2/27/2007	2/26/2009	4.86%	\$ 40.0	\$ 938,768

Based on interest rates at March 31, 2008, a hypothetical 10% increase or decrease in interest rates would not have a material effect on the liability.

We have entered into interest rate derivative swap agreements subsequent to March 31, 2008, whereby we have contracted an additional notional amount of \$75 million at a fixed rate of 3.191% for the period April 2008 to April 2010. We have not designated this swap as a hedge.

**Item 4 Controls and Procedures***Evaluation of Disclosure Controls and Procedures*

## Edgar Filing: GOODRICH PETROLEUM CORP - Form 10-Q

We have established disclosure controls and procedures designed to ensure that material information required to be disclosed in our reports filed under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified by the Securities and Exchange Commission and that any material information relating to us is recorded, processed, summarized and reported to our management including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosures. In designing and evaluating our disclosure controls and procedures, our management recognizes that controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving desired control objectives. In reaching a reasonable level of assurance, our management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

**Table of Contents**

As required by Rule 13a-15(b) under the Exchange Act, we have evaluated, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, the effectiveness of the design and operation of our disclosure controls and procedures (as defined in rules 13a-15(c) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this report. Our Chief Executive Officer and Chief Financial Officer, based upon their evaluation as of March 31, 2008, the end of the period covered in this report, concluded that our disclosure controls and procedures were effective at the reasonable assurance level.

*Changes in Internal Control over Financial Reporting*

There were no changes in our system of internal control over financial reporting that occurred during our first quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
