**CHENIERE ENERGY, INC. AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

(unaudited)

**NOTE 1 Basis of Presentation**

The accompanying unaudited consolidated financial statements of Cheniere Energy, Inc. have been prepared in accordance with generally accepted accounting principles in the United States ( GAAP ) for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In our opinion, all adjustments, consisting only of normal recurring adjustments necessary for a fair presentation, have been included. As used herein, the terms Cheniere, the Company, we, our and us refer to Cheniere Energy, Inc. and its wholly-owned or controlled subsidiaries, unless otherwise stated or indicated by context.

For further information, refer to the consolidated financial statements and footnotes included in our annual report on Form 10-K for the year ended December 31, 2007.

**NOTE 2 Recent Business Developments**

In February 2008, we announced that we were exploring strategic options for the Company. Further to this strategic option review process, in April we announced our decision to take steps to reduce costs and capital requirements and increase our available cash and cash equivalents. Since that time, those actions have included:

In May 2008, we entered into a \$95.0 million 18-month bridge loan with Credit Suisse and received approximately \$82.3 million of net proceeds (the Bridge Loan ). The purpose of the Bridge Loan was to provide incremental funding and liquidity until we entered into a strategic transaction, obtained sufficient revenues from a significant number of imported liquefied natural gas ( LNG ) cargos or consummated an alternative financing transaction. The Bridge Loan was repaid in the third quarter of 2008 using proceeds from a \$250.0 million senior secured convertible term loan agreement that closed in August 2008 (see Note 12 Long-Term Debt and Credit Facility ).

As a result of the downsizing of our natural gas marketing business activities and the nearing completion of significant construction activities for both the Sabine Pass LNG receiving terminal and Creole Trail Pipeline, we have reduced our personnel Company-wide by approximately 43% (see Note 3 Restructuring Charges ).

We terminated both of our LNG vessel time charter interests and forfeited cash collateral that had been classified as non-current restricted cash and cash equivalents on our Consolidated Balance Sheet (see Note 3 Restructuring Charges ).

In June 2008, we announced that we had entered into a domestic marketing agreement for the sale of LNG with J.P. Morgan Ventures Energy Corporation ( JPMorgan Ventures ), a wholly-owned subsidiary of J.P. Morgan Chase & Co. ( JPMorgan ). The agreement provides a framework under which Cheniere Marketing, LLC ( Cheniere Marketing ), formerly Cheniere Marketing, Inc., may offer to sell to JPMorgan Ventures all or a portion of the LNG from each cargo it acquires on delivery to the Sabine Pass LNG receiving terminal, and under which JPMorgan Ventures will utilize a portion of Cheniere Marketing 's terminal use agreement ( TUA ) capacity for storage and regasification services related to the portion of the LNG cargo that JPMorgan Ventures purchases. JPMorgan Ventures has also acquired a first look right through March 31, 2009 under which JPMorgan Ventures will have the preemptive right to acquire LNG on the same pricing terms that Cheniere Marketing offers to its other customers. JPMorgan will guarantee all of J.P. Morgan Ventures ' obligations under this agreement, including any LNG purchases executed under this agreement.

## Edgar Filing: CHENIERE ENERGY INC - Form 10-Q

In August 2008, Cheniere Common Units Holding, LLC, our subsidiary, closed a \$250.0 million senior secured convertible term loan agreement ( 2008 Convertible Loans ). Proceeds were used to repay the

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(unaudited)

Bridge Loan obtained in May 2008, fund a reserve account for payments under Cheniere Marketing's TUA with Sabine Pass LNG, L.P. (Sabine Pass LNG), and for general corporate purposes (see Note 12 Long-Term Debt and Credit Facility).

In September 2008, we completed a \$183.5 million, before discount, additional issuance of Sabine Pass LNG's 7 1/2% Senior Secured Notes due 2016 pursuant to the existing indenture, dated as of November 9, 2006, under which it previously issued \$1,482.0 million in aggregate principal amount of 7 1/2% Senior Secured Notes due 2016. The additional issuance and the outstanding 2016 Notes are treated as a single series of notes under the indenture.

**NOTE 3 Restructuring Charges**

In the second quarter of 2008, we announced a cost savings program in connection with the downsizing of our natural gas marketing business activities, the nearing completion of significant construction activities for both the Sabine Pass LNG receiving terminal and Creole Trail Pipeline and the seeking of alternative arrangements for our time charter interest in two LNG vessels (see Note 2 Recent Business Developments). In connection with this program, we recognized \$78.9 million in restructuring charges for the nine months ended September 30, 2008, in accordance with Statement of Financial Accounting Standard (SFAS) No. 146, *Accounting for Costs Associated with Exit or Disposal Activities*, and have presented the financial impact as Restructuring Charges on the Consolidated Statements of Operations.

Below is a reconciliation of the total restructuring charges expected to be recognized and charged to expense over the restructuring period to the amount of expected restructuring charges at September 30, 2008 (in thousands):

	Severance Costs	Facility Costs	Marketing Costs	Total
Estimated restructuring charges (at inception of program)	\$ 12,400	\$	\$ 69,400	\$ 81,800
Adjustment to estimated restructuring charges as of September 30, 2008	(5,314)	2,594	1,292	(1,428)
Total estimated restructuring charges at September 30, 2008	7,086	2,594	70,692	80,372
Restructuring charges recognized as of September 30, 2008	(5,565)	(2,594)	(70,692)	(78,851)
Estimated restructuring charges to be recognized in the future	\$ 1,521	\$	\$	\$ 1,521

**NOTE 4 LNG Held for Commissioning**

In connection with the construction of the Sabine Pass LNG receiving terminal, we require LNG to perform certain commissioning activities, as follows:

**Cool down** A minimum amount of LNG will be used to cool down the LNG receiving terminal. Cool down represents the amount of LNG required to cool the LNG receiving terminal to its normal operating temperature.

**LNG heel** A certain amount of LNG will be used to establish a level of LNG inventory in each LNG storage tank and in the LNG receiving terminal piping in order for the LNG receiving terminal to function properly.

## Edgar Filing: CHENIERE ENERGY INC - Form 10-Q

Equipment commissioning The remaining amount of the LNG will be used to commission the equipment in the LNG receiving terminal to ensure that it performs at designed specifications. Equipment commissioning will result in natural gas being sold.

Index to Financial Statements

## CHENIERE ENERGY, INC. AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(unaudited)

LNG purchased for commissioning activities is recorded at cost and classified as a non-current asset on our consolidated balance sheet as LNG held for commissioning. As the LNG held for commissioning is used to cool down the LNG receiving terminal and establish LNG heel in the LNG receiving terminal, we capitalize the portion used. The LNG used in the commissioning process is capitalized net of amounts received from the sale of natural gas.

As of September 30, 2008, we had acquired a total of three LNG commissioning cargoes for the Sabine Pass LNG receiving terminal and have successfully unloaded the LNG into the Sabine Pass LNG receiving terminal.

**NOTE 5 Minority Interest**

We have consolidated certain joint ventures and partnerships because we have a controlling interest in these ventures. Therefore, the entities financial statements are consolidated in our consolidated financial statements and the ownership interests of others in these entities equity is recorded as minority interest. The following table sets forth the components of our minority interest balance attributable to third-party investors interest (in thousands):

Net proceeds from Cheniere Partners issuance of common units (1)	\$ 98,442
Net proceeds from sale of Cheniere Partners common units (2)	203,946
Distributions to Cheniere Partners minority interest	(33,426)
Minority interest share of loss of Cheniere Partners	(8,119)
Minority interest in Frontera (3)	343
Minority interest at September 30, 2008	\$ 261,186

- (1) Through the public offering of Cheniere Energy Partners, L.P. ( Cheniere Partners ), Cheniere Partners received \$98.4 million in net proceeds from the issuance of its common units to the public in March 2007 ( Cheniere Partners Offering ). Securities and Exchange Commission ( SEC ) Staff Accounting Bulletin ( SAB ) No. 51, *Accounting for Sales of Stock by a Subsidiary*, provides guidance on accounting by the parent for issuances of a subsidiary s common equity to unaffiliated parties.
- (2) In conjunction with the Cheniere Partners Offering, we sold a portion of our Cheniere Partners common units to the public, realizing net proceeds of \$203.9 million. Due to the subordinated distribution rights on our subordinated units, we have recorded those proceeds as a minority interest. Upon the conversion of all of our subordinated units in Cheniere Partners to common units, we will evaluate whether to recognize a gain through earnings at that time.
- (3) In September 2007, we acquired an 80% interest in Frontera Pipeline, LLC ( Frontera ) from Tidelands Oil and Gas Corporation ( Tidelands ) for \$1.0 million, providing us with an 80% ownership stake in the Burgos Hub Project. This project involves the development and construction of an integrated pipeline project traversing the United States and Mexico border and the construction of a related subterranean storage facility in Mexico. As of September 30, 2008, Tidelands proportionate interest in the net assets of Frontera was \$0.3 million. In October 2008, we acquired the remaining 20% interest in Frontera from Tidelands for \$250,000.

Index to Financial Statements

**CHENIERE ENERGY, INC. AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

(unaudited)

**NOTE 6 Restricted Cash, Cash Equivalents and U.S. Treasury Securities**

Restricted cash and cash equivalents and U.S. treasury securities are composed of cash that has been contractually restricted as to usage or withdrawal, as follows:

*Sabine Pass LNG Receiving Terminal Construction Reserve*

In November 2006, Sabine Pass LNG, our majority-owned subsidiary, consummated a private offering of an aggregate principal amount of \$2,032.0 million of Senior Secured Notes consisting of \$550.0 million of 7<sup>1</sup>/<sub>4</sub>% Senior Secured Notes due 2013 (the 2013 Notes ) and \$1,482.0 million of 7<sup>1</sup>/<sub>2</sub>% Senior Secured Notes due 2016 (the 2016 Notes and collectively with the 2013 Notes, the Senior Notes ) (see Note 12 Long-Term Debt and Credit Facility ). In September 2008, we issued an additional \$183.5 million, before discount, of the 2016 Notes whose terms were identical to the outstanding 2016 Notes. The additional issuance and the previously outstanding 2016 Notes are treated as a single series of notes under the indenture. Under the terms and conditions of the Senior Notes, we were required to fund a cash reserve account with approximately \$987 million to pay the costs to construct the Sabine Pass LNG receiving terminal. The cash accounts are controlled by a collateral trustee, and therefore, are shown as restricted cash and cash equivalents on our Consolidated Balance Sheets. As of September 30, 2008 and December 31, 2007, \$48.2 million and \$40.2 million related to accrued construction costs were classified as part of current restricted cash and cash equivalents, and \$57.4 million and \$380.2 million related to remaining construction costs were classified as a non-current asset on our Consolidated Balance Sheets, respectively.

*Senior Notes Debt Service Reserve*

As described above, Sabine Pass LNG consummated a private offering of an aggregate principal amount of \$2,215.5 million of Senior Notes, before discount (see Note 12 Long-Term Debt and Credit Facility ). Under the terms and conditions of the Senior Notes, Sabine Pass LNG was required to fund a cash reserve account for \$335.0 million related to future interest payments on the Senior Notes. Beginning in July 2008, the indenture governing the Senior Notes requires that one semi-annual interest payment be maintained in a reserve account. As of September 30, 2008 and December 31, 2007, \$82.4 million and \$61.8 million, respectively, had been classified as part of non-current restricted cash and cash equivalents related to the semi-annual interest payment maintained in this reserve account. In addition, on a monthly basis, one-sixth of the semi-annual interest payment must be deposited into another reserve account. As of September 30, 2008 and December 31, 2007, \$54.9 million and \$151.0 million, respectively, related to the payment of interest due within twelve months was maintained in this separate reserve account and had been classified as part of current restricted cash and cash equivalents. These cash accounts are controlled by a collateral trustee, and therefore, are shown as restricted cash and cash equivalents on our Consolidated Balance Sheets.

*Cheniere Partners Distribution Reserve*

At the closing of the Cheniere Partners Offering, Cheniere Partners funded a distribution reserve of \$98.4 million, which was invested in U.S. treasury securities. The distribution reserve, including interest earned thereon, will be used to pay quarterly distributions of \$0.425 per common unit for all common units, as well as related distributions to the general partner of Cheniere Partners, through the distribution made in respect of the quarter ending June 30, 2009. The U.S. treasury securities were acquired at a discount from their maturity values equal to an average of approximately 4.87% per year. As of September 30, 2008 and December 31, 2007, we classified the \$31.5 million and \$63.9 million balance of U.S. treasury securities as Non-Current Restricted U.S. Treasury Securities on our Consolidated Balance Sheets, respectively, as these securities had original maturities

**Index to Financial Statements****CHENIERE ENERGY, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(unaudited)**

greater than three months. In addition, we classified \$11.9 million of the distribution reserve as non-current restricted cash and cash equivalents as of September 30, 2008.

*TUA Reserve*

Under the terms and conditions of the 2008 Convertible Loans described below in Note 12, we were required to fund a reserve account with \$135.0 million to pay Cheniere Marketing's TUA obligations to Sabine Pass LNG and as additional collateral for the 2008 Convertible Loans. The cash account is controlled by a collateral trustee, and therefore, is shown as restricted cash and cash equivalents on our Consolidated Balance Sheets. In September 2008, Cheniere Marketing utilized \$15.0 million of this TUA reserve to pay its fourth quarter 2008 TUA obligation to Sabine Pass LNG. As of September 30, 2008, we classified the remaining \$120.1 million related to Cheniere Marketing's TUA obligations payable within the next twelve months as part of current restricted cash on our Consolidated Balance Sheet.

*Other Restricted Cash and Cash Equivalents*

As of September 30, 2008 and December 31, 2007, \$171.2 million and \$36.9 million had been classified as part of current restricted cash and cash equivalents, and \$0.4 million and \$36.2 million had been classified as non-current restricted cash and cash equivalents on our Consolidated Balance Sheets, respectively. As of September 30, 2008, \$164.4 million of the current restricted cash and cash equivalents related to cash and cash equivalents controlled by Sabine Pass LNG. The remaining current and non-current restricted cash and cash equivalents related to various other contractual restrictions.

**NOTE 7 Property, Plant and Equipment**

Property, plant and equipment consists of LNG terminal construction-in-process expenditures, LNG site and related costs, investments in oil and gas properties, and fixed assets, as follows (in thousands):

	<b>September 30, 2008</b>	<b>December 31, 2007</b>

*LNG Terminal Costs*

Costs associated with the construction of the Sabine Pass LNG receiving terminal have been capitalized as construction-in-process since the date the project satisfied our criteria for capitalization. For the nine months ended September 30, 2008 and 2007, we capitalized \$69.4 million and \$46.1 million of interest expense related to the construction of the Sabine Pass LNG receiving terminal, respectively.

We began depreciating equipment and facilities associated with the initial 2.6 Bcf/d of sendout capacity and 10.1 Bcf of storage capacity of the Sabine Pass LNG receiving terminal when they were ready for use in the third quarter of 2008. The Sabine Pass LNG receiving terminal is depreciated using the straight-line depreciation method applied to groups of LNG receiving terminal assets with varying useful lives. The identifiable components of the Sabine Pass LNG receiving terminal with similar estimated useful lives have a depreciable range between 10 and 50 years.

*Natural Gas Pipeline Costs*

Our natural gas pipeline business is subject to the jurisdiction of the Federal Energy Regulatory Commission (FERC) in accordance with the Natural Gas Act of 1938 and the Natural Gas Policy Act of 1978, and we have determined that our pipelines have met the criteria set forth in SFAS No. 71, *Accounting for the Effects of Certain Types of Regulation*. For the nine months ended September 30, 2008 and 2007, we capitalized \$17.0 million and \$8.4 million, respectively, of AFUDC to our natural gas pipeline projects.

*Fixed Assets*

Our fixed assets are recorded at cost and are depreciated on a straight-line method based on estimated lives of the individual assets or groups of assets. Depreciation expense related to our property, plant and equipment totaled \$12.8 million and \$4.0 million for the nine months ended September 30, 2008 and 2007, respectively.

*Asset Retirement Costs*

Our asset retirement obligations relate primarily to the retirement of certain LNG receiving terminal and natural gas pipeline assets and obligations related to right-of-way agreements. In accordance with SFAS No. 143, *Accounting for Asset Retirement Obligations*, we determined that due to an indeterminate life of such assets, the fair value of the retirement obligation is not reasonably estimable. A liability for such asset retirement obligation will be recorded when a fair value is determinable.

**Index to Financial Statements****CHENIERE ENERGY, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(unaudited)****NOTE 8 Advances Under Long-Term Contracts**

We have entered into certain engineering, procurement and construction ( EPC ) contracts and purchase agreements related to the construction of the Sabine Pass LNG receiving terminal that require us to make payments to fund costs that will be incurred or equipment that will be received in the future. Advances made under long-term contracts on purchase commitments are carried at face value and transferred to property, plant and equipment as the costs are incurred or equipment is received. As of September 30, 2008 and December 31, 2007, our Advances Under Long-Term Contracts were \$12.8 million and \$28.5 million, respectively.

**NOTE 9 Intangible Assets**

The fair values, estimated useful lives, amortization and net book values and of our intangible assets as of September 30, 2008 and December 31, 2007 are presented in the following tables (in thousands).

	Fair Value	As of September 30, 2008		Net book value
		Amortization Period	Accumulated Amortization	
Intangible assets not subject to amortization	\$ 6,182		\$	\$ 6,182

  

	Fair Value	As of December 31, 2007		Net book value
		Amortization Period	Accumulated Amortization	
Amortizable intangible assets	\$ 14,228	5 years	\$	\$ 14,228
Intangible assets not subject to amortization	6,174			6,174
	\$ 20,402		\$	\$ 20,402

**Amortizable Intangible Assets**

At December 31, 2007, we assigned \$14.2 million to intangible assets acquired either individually or with a group of assets that are subject to amortization as of December 31, 2007. The weighted average amortization period for these assets is 5 years. For the year ended December 31, 2007, we had not recognized amortization expense.

In the second quarter of 2008, we impaired these amortizable intangible assets in connection with the downsizing of our natural gas marketing business. This impairment was recorded in Restructuring Charges on the Consolidated Statement of Operations for the nine months ended September 30, 2008 (see Note 3 Restructuring Charges ).

**Intangible Assets Not Subject to Amortization**

We assigned \$6.2 million to intangible assets acquired either individually or with a group of assets that are not subject to amortization as of both September 30, 2008 and December 31, 2007.

**NOTE 10 Investment in Limited Partnership**

## Edgar Filing: CHENIERE ENERGY INC - Form 10-Q

We account for our 30% limited partnership investment in Freeport LNG Development, L.P. ( Freeport LNG ) using the equity method of accounting. As of September 30, 2008 and December 31, 2007, we had

Index to Financial Statements

## CHENIERE ENERGY, INC. AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(unaudited)

unrecorded cumulative suspended losses of \$23.7 million and \$19.8 million, respectively, related to our investment in Freeport LNG as our basis in this investment had been reduced to zero.

In March 2008 and May 2008, we received cash call notices from Freeport LNG requesting that we provide further financial support due to higher than expected commissioning and performance testing costs. During the nine months ended September 30, 2008, we funded the cash calls and recorded \$4.8 million of additional losses in Freeport LNG. We have not recorded the unrecorded cumulative suspended losses referred to above as we have not guaranteed any obligations and are not committed to provide any further financial support. The \$4.8 million in cash calls were returned by Freeport LNG in October 2008.

The financial position of Freeport LNG at September 30, 2008 and December 31, 2007 and the results of Freeport LNG's operations for the three and nine months ended September 30, 2008 and 2007 are summarized as follows (in thousands):

	September 30, 2008	December 31, 2007
Current assets	\$ 87,264	\$ 120,580
Property, plant and equipment, net	912,559	1,590
Construction-in-process	56,118	863,977
Other assets	45,906	46,316
<b>Total assets</b>	<b>\$ 1,101,847</b>	<b>\$ 1,032,463</b>
Current liabilities	24,939	34,477
Notes payable	1,150,893	1,063,984
Deferred revenue and other deferred credits	10,635	5,478
Partners' capital	(84,620)	(71,476)
<b>Total liabilities and partners' capital</b>	<b>\$ 1,101,847</b>	<b>\$ 1,032,463</b>

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
Income (loss) from continuing operations	\$ 16,622	\$ (4,622)	\$ (16,535)	\$ (15,823)
Net income (loss)	4,541	(4,622)	(29,143)	(15,823)
Cheniere's 30% equity in net income (loss) from limited partnership (1)	1,362	(1,387)	(8,743)	(4,747)

- (1) During the three months ended September 30, 2008 and 2007, we did not record our share of Freeport LNG's \$1.4 million net income or \$1.4 million net losses for such periods, and during the nine months ended September 30, 2008 and 2007, we did not record \$8.7 million and \$4.7 million of the net losses for such periods, respectively, as the basis in this investment had been reduced to zero and because we have not guaranteed any obligations and have not been committed to provide any further financial support since December 2005.

<b>Accrued liabilities</b>	<b>\$ 109,172</b>	<b>\$ 164,917</b>

**NOTE 12 Long-Term Debt and Credit Facility**

As of September 30, 2008 and December 31, 2007, our long-term debt consisted of the following (in thousands):

	September 30, 2008	December 31, 2007
Senior Notes, net of discount	\$ 2,177,161	\$ 2,032,000
Convertible Senior Unsecured Notes	325,000	325,000
2007 Term Loan	400,000	400,000
2008 Convertible Loans	250,000	
<b>Total Long-Term Debt</b>	<b>\$ 3,152,161</b>	<b>\$ 2,757,000</b>

*Sabine Pass LNG Senior Notes*

In November 2006, Sabine Pass LNG issued an aggregate principal amount of \$2,032.0 million of Senior Notes, consisting of \$550.0 million of the 2013 Notes and \$1,482.0 million of the 2016 Notes. In September 2008, Sabine Pass LNG issued an additional \$183.5 million, before discount, of 2016 Senior Notes whose terms were identical to the previously outstanding 2016 Senior Notes. The net proceeds from the additional issuance of the 2016 Notes were \$145.0 million. The additional issuance and the previously outstanding 2016 Senior Notes are treated as a single series of notes under the indenture. We placed \$100.0 million of the \$145.0 million of net proceeds from the additional issuance of the 2016 Senior Notes into a construction account to pay construction expenses of cost overruns related to the construction, cool down, commissioning and completion of the Sabine Pass LNG receiving terminal. In addition, we placed \$40.8 million of the remaining net proceeds into an account in accordance with the cash waterfall requirements of the security deposit agreement, which are used by Sabine Pass LNG for working capital and other general business purposes.

Interest on the Senior Notes is payable semi-annually in arrears on May 30 and November 30 of each year. The Senior Notes are secured on a first-priority basis by a security interest in all of Sabine Pass LNG's equity interests and substantially all of its operating assets.

## Edgar Filing: CHENIERE ENERGY INC - Form 10-Q

Under the indenture governing the Senior Notes, except for permitted tax distributions, Sabine Pass LNG may not make distributions until certain conditions are satisfied. The indenture requires that Sabine Pass LNG

**Index to Financial Statements**

**CHENIERE ENERGY, INC. AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

**(unaudited)**

apply its net operating cash flow (i) first, to fund with monthly deposits its next semiannual payment of approximately \$82.4 million of interest on the Senior Notes, and (ii) second, to fund a one-time, permanent debt service reserve fund equal to one semiannual interest payment of approximately \$82.4 million on the Senior Notes. Distributions from Sabine Pass LNG will be permitted only after satisfaction of the foregoing funding requirements, after satisfying a fixed charge coverage ratio test of 2:1 and after satisfying other conditions specified in the indenture.

*Convertible Senior Unsecured Notes*

In July 2005, we consummated a private offering of \$325.0 million aggregate principal amount of Convertible Senior Unsecured Notes due 2012 to qualified institutional buyers pursuant to Rule 144A under the Securities Act of 1933, as amended ( *Securities Act* ). The notes bear interest at a rate of 2.25% per year. The notes are convertible at any time into our common stock under certain circumstances at an initial conversion rate of 28.2326 shares per \$1,000 principal amount of the notes, which is equal to a conversion price of approximately \$35.42 per share. As of September 30, 2008, no holders had elected to convert their notes.

We may redeem some or all of the notes on or before August 1, 2012, for cash equal to 100% of the principal plus any accrued and unpaid interest if in the previous 10 trading days the volume-weighted average price of our common stock exceeds \$53.13, subject to adjustment, for at least five consecutive trading days. In the event of such a redemption, we will make an additional payment equal to the present value of all remaining scheduled interest payments through August 1, 2012, discounted at the U.S. Treasury rate plus 50 basis points. The indenture governing the notes contains customary reporting requirements.

*2007 Term Loan*

In May 2007, Cheniere Subsidiary Holdings, LLC ( *Cheniere Subsidiary* ), a wholly-owned subsidiary of Cheniere, entered into a \$400.0 million credit agreement ( *2007 Term Loan* ). Borrowings under the 2007 Term Loan generally bear interest at a fixed rate of 9.75% per annum. Interest is calculated on the unpaid principal amount of the 2007 Term Loan outstanding and is payable quarterly in arrears on March 31, June 30, September 30 and December 31 of each year. The 2007 Term Loan will mature on May 31, 2012. The net proceeds of \$391.7 million from the 2007 Term Loan are being used for general corporate purposes, including our repurchase, completed during the year ended December 31, 2007, of approximately 9.2 million shares of our outstanding common stock pursuant to the exercise of the call options acquired in the issuer call spread purchased by us in connection with the issuance of the Convertible Senior Unsecured Notes. The 2007 Term Loan is secured by a pledge of our 135,383,831 subordinated units in Cheniere Partners and our equity interests in the entities that own our 30% interest in Freeport LNG.

*2008 Convertible Loans*

In August 2008, we entered into a credit agreement pursuant to which we obtained \$250.0 million in convertible term loans ( *2008 Convertible Loans* ). The 2008 Convertible Loans will mature in 2018, but the lenders can require prepayment of the loan on August 15, 2011, 2013 and 2015, and upon a change of control. The 2008 Convertible Loans bear interest at a fixed rate of 12% per annum, except during the occurrence of an event of default during which time the rate of interest will be 14% per annum. The 2008 Convertible Loans are secured by Cheniere's rights and fees payable under management services agreements with Sabine Pass LNG and Cheniere Partners, by Cheniere's common units in Cheniere Partners, by the equity and non-real property assets of Cheniere's pipeline entities, by the equity of various other subsidiaries and certain other assets and subsidiary guarantees. The principal amount of \$250.0 million may be exchanged for newly-created Series B Preferred

**Index to Financial Statements**

**CHENIERE ENERGY, INC. AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

**(unaudited)**

Stock with voting rights limited to the equivalent of 10,125,000 shares of common stock. The exchange ratio is one share of Series B Preferred Stock for each \$5,000 of outstanding borrowings. The aggregate preferred stock is exchangeable into 50 million shares of common stock at a conversion price of \$5.00 per share pursuant to a broadly syndicated offering. We placed \$135 million of the borrowings under the 2008 Convertible Loans into a TUA reserve account to pay the reservation fee and operating fee as defined under Cheniere Marketing's TUA. We utilized \$95.0 million of the borrowings under the 2008 Convertible Loans to repay the Bridge Loan. The remaining borrowings were utilized to pay for interest on the Bridge Loan and expenses incurred in connection with the issuance of the 2008 Convertible Loans and consideration of other strategic alternatives.

One of the lenders is Scorpion Capital Partners LP ( Scorpion ), an affiliate of one of the Company's directors. Scorpion's portion of the 2008 Convertible Loans was \$8.5 million and Scorpion did not receive any fees in connection with making the 2008 Convertible Loans.

As long as the 2008 Convertible Loans are exchangeable for shares of Series B Preferred Stock or shares of Series B Preferred Stock remain outstanding, the holders of a majority of the 2008 Convertible Loans and Series B Preferred Stock, acting together, shall have the right to nominate two individuals to the Company's Board, and together with the Board, a third nominee, who shall be an independent director.

*Bridge Loan*

In May 2008, Cheniere Common Units Holding, LLC ( Cheniere Common Units Holding ), a newly formed wholly-owned subsidiary of Cheniere, entered into the Bridge Loan pursuant to which the lenders agreed to make a term loan of \$95.0 million to Cheniere Common Units Holding. We received approximately \$82.3 million of net proceeds. This loan was repaid in the third quarter of 2008 using a portion of the proceeds from the 2008 Convertible Loans.

**NOTE 13 Financial Instruments**

We entered into financial derivatives to hedge the exposure to variability in expected future cash flows attributable to the future sale of natural gas from our LNG commissioning cargoes ( LNG commissioning cargo derivatives ). The net cost (LNG commissioning cargo purchase price less natural gas sales proceeds) of our LNG commissioning cargoes is capitalized on our Consolidated Balance Sheets as it is directly related to the LNG receiving terminal construction and is incurred to place the LNG receiving terminal in usable condition. However, changes in the fair value of our LNG commissioning cargo derivatives are reported in earnings because they are not able to be designated as a qualifying hedge in accordance with FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*.

Effective January 1, 2008, we adopted SFAS No. 157, *Fair Value Measurements*, and SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities Including an amendment of FASB Statement No. 115*. As a result of the adoption, we elected not to measure any additional financial assets or liabilities at fair value, other than those which were recorded at fair value prior to adoption.

Index to Financial Statements

## CHENIERE ENERGY, INC. AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(unaudited)

The estimated fair value of financial instruments is the amount at which the instrument could be exchanged currently between willing parties. The financial assets and liabilities at September 30, 2008, measured at fair value on a recurring basis, are summarized below (in thousands):

	Quoted Prices in Active Markets for Identical Instruments (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total Carrying Value at September 30, 2008
Trading derivative assets payables	\$	\$	\$	\$
Other derivatives assets	3,750			3,750
Total assets at fair value	\$ 3,750	\$	\$	\$ 3,750
Trading derivative payables	\$	\$ 4	\$	\$ 4
Other derivatives payables				
Total liabilities at fair value	\$	\$ 4	\$	\$ 4

Trading derivatives reflect positions held by Cheniere Marketing and include exchange-traded derivative contracts and over-the-counter derivative contracts. Other derivatives reflect positions held by Cheniere Marketing on behalf of Sabine Pass LNG related to natural gas swaps entered into to hedge the cash flows from the sale of excess LNG purchased for commissioning.

SFAS No. 107, *Disclosures about Fair Value of Financial Instruments*, requires the disclosure of the estimated fair value of financial instruments including those financial instruments for which the SFAS No. 159 fair value option was not elected. The carrying amounts reported on the Consolidated Balance Sheets for cash and cash equivalents, restricted cash and cash equivalents, accounts receivable and accounts payable approximate fair value due to their short-term nature. The carrying amounts of the fair values of financial instruments for which SFAS No. 159 was not elected are as follows:

Financial Instruments (in thousands):

	September 30, 2008		December 31, 2007	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
2013 Notes (1)	\$ 550,000	\$ 448,250	\$ 550,000	\$ 525,250
2016 Notes, net of discount (1)	1,627,161	1,293,593	1,482,000	1,404,195
2.25% Convertible Senior Unsecured Notes (2)	325,000	80,639	325,000	338,611
2007 Term Loan (3)	400,000	400,000	400,000	400,000
2008 Convertible Loans (4)	250,000	250,000		
Restricted U.S. treasury securities (5)	31,456	34,107	63,923	66,984

(1) The fair value of the Senior Notes, net of discount, is based on quotations obtained from broker-dealers who made markets in these and similar instruments as of September 30, 2008 and December 31, 2007, as applicable.

## Edgar Filing: CHENIERE ENERGY INC - Form 10-Q

- (2) The fair value of our Convertible Senior Unsecured Notes is based on the closing trading prices on September 30, 2008 and December 31, 2007, as applicable.
- (3) The 2007 Term Loan bears interest at a fixed rate; therefore, the estimated fair value is expected to vary with changes in market interest rates. At September 30, 2008 and December 31, 2007, the fair value of the debt instrument was stated at its carrying amount due to it being a non-trading instrument with no liquid market.
- (4) The 2008 Convertible Loans bear interest at a fixed rate; therefore, the estimated fair value is expected to vary with changes in market interest rates. At September 30, 2008, the fair value of the debt instrument was stated at its carrying amount due to it being a non-trading instrument with no liquid market.

**NOTE 14 Income Taxes**

From our inception, we have reported a net operating loss ( NOL ) for both financial reporting purposes and for international, federal and state income tax reporting purposes. Accordingly, we are not presently a taxpayer and have not recorded a net liability for international, federal or state income taxes in any of the periods included in the accompanying financial statements. Our Consolidated Statements of Operations for the three and nine months ended September 30, 2008 and 2007 included no income tax benefits.

In July 2006, the Financial Accounting Standards Board ( FASB ) issued FASB Interpretation ( FIN ) No. 48, *Accounting for Uncertainty in Income Taxes - An Interpretation of FASB Statement No. 109*. FIN No. 48 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with SFAS No. 109, *Accounting for Income Taxes*. It prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This standard also provides guidance on de-recognition, classification, interest and penalties, accounting in interim periods, disclosure and transition rules.

We adopted the provisions of FIN No. 48 on January 1, 2007. We have determined that all of the material tax positions taken in our income tax returns and the positions we expect to take in our future income tax filings meet the more likely-than-not recognition threshold prescribed by FIN No. 48. We have approximately \$19.3 million of deferred federal income tax benefits for tax positions related to the accelerated recovery of certain capital costs for which the ultimate deductibility is highly certain, but for which there is some uncertainty corresponding to the timing of the related prior, current and future year tax deductions. Under SFAS No. 109, the disallowance of an accelerated recovery period would not affect our annual reported effective income tax rate in any of the prior, current or future financial reporting periods, but could create a federal alternative minimum tax liability in a prior reporting period. Adjustments that would increase our federal taxable income in our prior reporting periods would largely be offset by our available NOL carryovers, and therefore, the potential underpayment of tax, interest and penalties have not been accrued with respect to this liability.

The amount of our unrecognized tax benefits associated with uncertain tax positions decreased significantly in the first quarter of 2008 based on discussions with the relevant taxing authorities on the timing of the deductions related to a significant portion of our capital costs. The remaining \$19.3 million of unrecognized tax benefits pertain to tax positions taken in prior years for which there is still some uncertainty as to the timing of the corresponding tax deductions. To date, the adoption of FIN No. 48 has had no impact on our financial position, results of operations or cash flows. A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows (in thousands):

Balance at January 1, 2008	\$ 70,530
Additions based on tax positions related to current year	
Additions for tax positions of prior years	3,401
Reductions for tax positions of prior years	(54,592)
Settlements	
Balance at September 30, 2008	\$ 19,339

Index to Financial Statements

**CHENIERE ENERGY, INC. AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

**(unaudited)**

SFAS No. 109, *Accounting for Income Taxes*, establishes specific procedures to (a) measure deferred tax liabilities and assets using a specified tax rate convention, and (b) assess whether a valuation allowance should be established for an enterprise's deferred tax assets. As provided for in SFAS No. 109, we have established a tax valuation allowance for the tax benefits related to all of our international, federal and state NOL carryovers and all of our other deferred tax assets due to the uncertainty of our ability to realize the related future tax benefits. Once a valuation allowance has been established, SFAS No. 109 requires that all available evidence, both positive and negative, must be considered to determine when, based on the weight of that evidence, it is appropriate to release all or any portion of the valuation allowance. Judgment must be used in considering the relative impact of both positive and negative evidence; the weight given to such evidence must be commensurate with the extent to which such evidence can be objectively verified. Based on the criteria provided in SFAS No. 109, we have determined that all of our deferred tax assets should have a full valuation allowance for financial reporting purposes as of September 30, 2008.

Our federal consolidated income tax returns have not been audited by the Internal Revenue Service; we have not been notified of any pending federal, state or international income tax audits; and we are not aware of any additional income tax controversies that are likely to occur with any taxing authority. We have not entered into any agreements with any taxing authorities to extend the period of time in which they may assert or assess additional income tax, penalties or interest. However, since we are presently in an NOL carryover position and have been since our inception, under the applicable Internal Revenue Service guidelines, in the event of an audit, our available federal NOL carryover amount is subject to adjustment until the normal three year federal statute of limitations closes for the year in which the NOL is fully utilized. In 2007, the Texas Comptroller's office completed an audit of Cheniere's Texas franchise tax returns for the three-year period ended December 31, 2004; the Louisiana Department of Revenue completed an income and franchise audit of Cheniere and one of our wholly-owned affiliates for the two-year period ended December 31, 2003. We expect that all of our significant operating affiliates will be audited by the States of Texas and Louisiana for annual tax reporting periods ended on and after December 31, 2004. To date, all of the state-level income tax audits have been settled favorably and without changes. None of our foreign affiliates have been audited by any foreign taxing authorities and none have been notified of any pending income tax audits.

As discussed above, we have not previously recorded a liability for international, federal or state income taxes and therefore we have not been subject to any penalties or interest expense related to any income tax liabilities. In future reporting periods, if any interest or penalties are imposed in connection with an income tax liability, we expect to include both of these items in the our income tax provision.

**NOTE 15 Net Loss Per Share**

Basic net loss per share is computed by dividing the net loss by the weighted average number of shares of common stock outstanding for the period. The computation of diluted net loss per share reflects the potential dilution that could occur if securities or other contracts to issue common stock that are dilutive to net income were exercised or converted into common stock or resulted in the issuance of common stock that would then share in our earnings.

**NOTE 18 Business Segment Information**

## Edgar Filing: CHENIERE ENERGY INC - Form 10-Q

We have four business segments: LNG receiving terminal business, natural gas pipeline business, LNG and natural gas marketing business and oil and gas exploration and development business. These segments reflect lines of business for which separate financial information is produced internally and are subject to evaluation by our chief operating decision makers in deciding how to allocate resources.

Our LNG receiving terminal business segment is in various stages of developing, constructing and operating up to three LNG receiving terminal projects along the U.S. Gulf Coast at the following locations: Sabine Pass

(unaudited)

LNG, approximately 90.6% owned, in western Cameron Parish, Louisiana on the Sabine Pass Channel; Corpus Christi LNG, 100% owned, near Corpus Christi, Texas; and Creole Trail LNG, 100% owned, at the mouth of the Calcasieu Channel in central Cameron Parish, Louisiana. In addition, we own a 30% limited partner interest in a fourth project, Freeport LNG, located on Quintana Island near Freeport, Texas.

Our natural gas pipeline business segment is in various stages of developing, constructing and operating natural gas pipelines to provide access to North American natural gas markets.

Our LNG and natural gas marketing business segment is developing a portfolio of long-term, short-term, and spot LNG purchase agreements, and will focus on entering into business relationships such as the one entered into with JPMorgan for the domestic marketing of natural gas that is imported by Cheniere Marketing as LNG to the Sabine Pass LNG receiving terminal.

Our oil and gas exploration and development business segment conducts and participates in exploration, development and production activities in the shallow waters of the Gulf of Mexico.

The following table summarizes revenues, net income (loss) from operations and total assets for each of our operating segments (in thousands):

**NOTE 19 Share-Based Compensation**

We have granted options to purchase common stock to employees, consultants and outside directors under the Cheniere Energy, Inc. Amended and Restated 1997 Stock Option Plan ( 1997 Plan ) and the Cheniere Energy, Inc. Amended and Restated 2003 Stock Incentive Plan ( 2003 Plan ). Effective January 1, 2006, we adopted SFAS No. 123R (revised 2004), *Share-Based Payment*, which revised SFAS No. 123 and superseded Accounting Principles Bulletin ( APB ) No. 25. No adjustments to prior periods were made as a result of adopting SFAS No. 123R. SFAS No. 123R requires that all share-based payments to employees be recognized in the financial statements based on their fair values at the date of grant. The calculated fair value is recognized as expense (net of any capitalization) over the requisite service period, net of estimated forfeitures, using the straight-line method under SFAS No. 123R. We consider many factors when estimating expected forfeitures, including types of awards, employee class and historical experience.

For the three and nine months ended September 30, 2008, the total share-based compensation expense (net of amount capitalized) recognized in our net loss was \$10.3 million and \$26.2 million, respectively. For the three and nine months ended September 30, 2007, the total share-based compensation cost capitalized as part of the cost of capital assets was \$0.5 million and \$1.3 million, respectively.

For the three and nine months ended September 30, 2007, the total share-based compensation expense (net of amounts capitalized) recognized in our net loss was \$22.7 million and \$42.0 million, respectively. For the three and nine months ended September 30, 2007, the total share-based compensation cost capitalized as part of the cost of capital assets was \$0.6 million and \$1.3 million, respectively.

The total unrecognized compensation cost at September 30, 2008 relating to non-vested share-based compensation arrangements granted under the 1997 Plan and 2003 Plan, before any capitalization, was \$51.3 million. That cost is expected to be recognized over 3.75 years, with a weighted average period of 1.09 years.

We received total proceeds from the exercise of stock options of \$0.5 million and \$2.5 million in the nine months ended September 30, 2008 and 2007, respectively.

*Phantom Stock*

In May 2007, the Company established the 2007 Incentive Compensation Plan ( 2007 Plan ) and the 2008-2010 Incentive Compensation Plan ( 2008-2010 Plan ) covering executive officers and other key employees for the performance periods of 2007, 2008, 2009 and 2010. During 2007,

Edgar Filing: CHENIERE ENERGY INC - Form 10-Q

a total of 537,000 and 1,647,000 shares of phantom stock were granted under the 2007 Plan and 2008-2010 Plans, respectively, which will be payable in

Index to Financial Statements

## CHENIERE ENERGY, INC. AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(unaudited)

shares of our common stock if stock price hurdles established by the plans are achieved. At its sole discretion, the Compensation Committee of our Board of Directors may elect to settle all or part of the phantom stock in cash. Using a Monte Carlo simulation, fair values (net of forfeitures) of \$13.7 million, \$11.1 million and \$8.3 million were calculated for the performance periods 2008, 2009 and 2010, respectively. A projected earnings date was also forecasted on which the stock price hurdle will be achieved for the award related to each performance period. The fair value of the award for each performance period will be amortized as compensation expense ratably from the date of plan approval to the date it is expected to be earned. In January 2008, 537,000 shares of our common stock were issued as the stock price hurdle for the 2007 Plan was achieved. In addition, during the nine months ended September 30, 2008, additional grants of 147,000 shares of phantom stock were made under the 2008-2010 Plan. Using the Monte Carlo simulation, fair values (net of forfeitures) of \$0.5 million, \$0.3 million, and \$0.2 million were calculated for the additional shares for the performance periods 2008, 2009 and 2010, respectively. For the nine months ended September 30, 2008, a total of \$10.5 million was recognized as compensation expense relating to all phantom stock awards.

*Stock Options*

We estimate the fair value of stock options under SFAS No. 123R at the date of grant using a Black-Scholes valuation model, which is consistent with the valuation technique we previously utilized to value stock options for the footnote disclosures required under SFAS No. 123. The risk-free rate is based on the U.S. Treasury yield curve in effect at the time of grant. The expected term (estimated period of time outstanding) of stock options granted is based on the simplified method of estimating the expected term for plain vanilla stock options allowed by SAB No. 107, *Valuation of Share-based Payment Agreements for Public Companies*, and varies based on the vesting period and contractual term of the stock option. Expected volatility for stock options granted is based on an equally weighted average of the implied volatility of exchange traded stock options on our common stock expiring more than one year from the measurement date, and historical volatility of our common stock for a period equal to the stock option's expected life. We have not declared dividends on our common stock. We did not issue any options to purchase shares of our common stock during the nine months ended September 30, 2008.

The table below provides a summary of option activity under the combined plans as of September 30, 2008, and changes during the nine months then ended:

	Option (in thousands)	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value (in thousands)
Outstanding at January 1, 2008	4,442	\$ 38.84		
Granted				
Exercised	(155)	4.29		
Forfeited or Expired	(791)	31.74		
Outstanding at September 30, 2008	3,496	41.97	4.9	
Exercisable at September 30, 2008	1,342	\$ 27.94	\$ 2.1	\$

*Stock and Non-Vested Stock*

We have granted stock and non-vested (restricted) stock to employees, executive officers, outside directors and consultants under the 2003 Plan. Under SFAS No. 123R, grants of non-vested stock are accounted for on an

Index to Financial Statements

## CHENIERE ENERGY, INC. AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(unaudited)

intrinsic value basis. No recognition of deferred compensation is made in stockholders' equity. Instead, the amortization of the calculated value of non-vested stock grants is accounted for as a charge to compensation and an increase in additional paid-in-capital over the requisite service period.

In January 2008, 479,802 shares having three-year graded vesting were issued to our employees in the form of non-vested stock awards and 537,000 shares were issued to our executive officers in the form of vested stock awards related to our performance in 2007. In May 2008 and June 2008, as a part of the short-term and long-term retention plans approved by the Compensation Committee, 373,656 shares vesting on December 1, 2008 and 1,525,038 shares having a three-year graded vesting beginning December 31, 2008 were issued to our employees and a consultant in the form of non-vested stock awards. In May 2008 and September 2008, 228,714 shares having a one-year graded vesting were issued to our directors. In the nine months ended September 30, 2008, an additional 23,443 shares of non-vested stock having three- or four-year graded vestings were issued to employees.

The table below provides a summary of the status of our non-vested shares under the 2003 Plan as of September 30, 2008, and changes during the nine months then ended (in thousands except for per share information):

	Non-Vested Shares	Weighted Average Grant Date Fair Value Per Share
Non-vested at January 1, 2008	1,355	\$ 32.74
Granted	3,168	12.76
Vested	(1,445)	15.69
Forfeited	(170)	19.54
Non-vested at September 30, 2008	2,908	\$ 5.69

*Share-based Plan Descriptions and Information*

Our 1997 Plan provided for the issuance of stock options to purchase up to 5.0 million shares of our common stock, all of which have been granted. Non-qualified stock options were granted to employees, contract service providers and outside directors. Option terms for the remaining unexercised options are five years with vesting that generally occurs on a graded basis over three years.

Awards providing for the issuance of up to an aggregate of 11.0 million shares of our common stock may be made under our 2003 Plan. These awards may be in the form of non-qualified stock options, incentive stock options, purchased stock, restricted (non-vested) stock, bonus (unrestricted) stock, stock appreciation rights, phantom stock and other share-based performance awards deemed by the Compensation Committee to be consistent with the purposes of the 2003 Plan. To date, the only awards made by the Compensation Committee have been in the form of non-qualified stock options, restricted stock, bonus stock and phantom shares. Beginning in 2005, stock options granted to employees as hiring incentives have been granted at the money with 10-year terms and graded vesting over four years. Prior to that time, stock options granted as hiring incentives were granted at the money with five-year terms and graded vesting over three years. Retention grants made to employees provide for exercise prices at or in excess of the stock price on the grant date, 10-year terms and graded vesting over three years, which commence on the fourth anniversary of the grant date. Restricted stock that has been granted as a hiring incentive vests over three or four years on a graded basis, while restricted stock granted from a bonus pool vests over three years. Shares issued under the 2003 Plan are generally newly issued shares.

**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS  
INFORMATION REGARDING FORWARD-LOOKING STATEMENTS**

This quarterly report contains certain statements that are, or may be deemed to be, forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the Securities Act), and Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act). All statements, other than statements of historical fact, included herein or incorporated herein by reference are forward-looking statements. Included among forward-looking statements are, among other things:

statements relating to the construction and operation of each of our proposed liquefied natural gas (LNG) receiving terminals or our proposed natural gas pipelines, or expansions or extensions thereof, including statements concerning the completion or expansion thereof by certain dates or at all, the costs related thereto and certain characteristics, including amounts of regasification and storage capacity, the number of storage tanks and docks, pipeline deliverability and the number of pipeline interconnections, if any;

statements regarding future levels of domestic natural gas production, supply or consumption; future levels of LNG imports into North America; sales of natural gas in North America; and the transportation, other infrastructure or prices related to natural gas, LNG or other energy sources or hydrocarbon products;

statements regarding any financing transactions or arrangements, or ability to enter into such transactions or arrangements, whether on the part of Cheniere or at the project level;

statements regarding any terminal use agreement (TUA) or other commercial arrangements presently contracted, optioned or marketed or potential arrangements to be performed substantially in the future, including any cash distributions and revenues anticipated to be received and the anticipated timing thereof, and statements regarding the amounts of total LNG regasification capacity that are, or may become subject to, TUAs or other contracts;

statements regarding counterparties to our TUAs, construction contracts and other contracts;

statements regarding any business strategies, any business plans or any other plans, forecasts, projections or objectives, including potential revenues and capital expenditures, any or all of which are subject to change;

statements regarding legislative, governmental, regulatory, administrative or other public body actions, requirements, permits, investigations, proceedings or decisions;

statements regarding our anticipated LNG and natural gas marketing activities; and

any other statements that relate to non-historical or future information.

These forward-looking statements are often identified by the use of terms and phrases such as achieve, anticipate, believe, estimate, expect, forecast, plan, potential, project, propose, strategy and similar terms and phrases. Although we believe that the expectations reflected in the forward-looking statements are reasonable, they do involve assumptions, risks and uncertainties, and these expectations may prove to be incorrect. You should not place undue reliance on these forward-looking statements, which speak only as of the date of this quarterly report.

As used herein, the terms Cheniere, the Company, we, our and us refer to Cheniere Energy, Inc. and its wholly-owned or controlled subsidiaries.

## Edgar Filing: CHENIERE ENERGY INC - Form 10-Q

Our actual results could differ materially from those anticipated in these forward-looking statements as a result of a variety of factors, including those discussed under **Risk Factors** in our annual report on Form 10-K

---

**Index to Financial Statements**

for the year ended December 31, 2007. All forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by these risk factors. These forward-looking statements are made as of the date of this quarterly report.

The following discussion and analysis presents management's view of our business, financial condition and overall performance and should be read in conjunction with our consolidated financial statements and the accompanying notes in Item 1. Consolidated Financial Statements. This information is intended to provide investors with an understanding of our past performance, current financial condition and outlook for the future.

**OVERVIEW**

We are engaged primarily in the business of developing and constructing, and then owning and operating, a network of up to three onshore LNG receiving terminals and related natural gas pipelines. In addition, we are engaged to a limited extent in LNG and natural gas marketing activities, and also in oil and natural gas exploration and development activities in the Gulf of Mexico.

In February 2008, we announced that we were exploring strategic options for the Company to enhance stockholder value, including options to optimize the value of the Sabine Pass LNG receiving terminal and the regasification capacity at the facility held under a long-term TUA by our wholly-owned subsidiary, Cheniere Marketing, LLC (Cheniere Marketing), formerly Cheniere Marketing, Inc.

In April 2008, we commenced a cost savings program in connection with the downsizing of our natural gas marketing business activities as well as nearing completion of significant construction activities for both the Sabine Pass LNG receiving terminal and Creole Trail Pipeline. The cost savings program involved reducing our personnel Company-wide by approximately 43%. We anticipate recognizing losses of approximately \$80.4 million from this cost savings program, including the impact of cancelling our LNG vessel charter agreements, with substantially all of these losses not affecting our working capital. As of September 30, 2008, we had recognized approximately \$78.9 million of such losses.

In May 2008, we entered into a \$95.0 million 18-month bridge loan with Credit Suisse (the Bridge Loan) and received approximately \$82.3 million of net proceeds to be held as unrestricted cash and cash equivalents and to be used for general corporate purposes and pipeline capital expenditures. The purpose of the Bridge Loan was to provide incremental funding and liquidity until we entered into a strategic transaction, obtained sufficient revenues from a significant number of imported LNG cargos or consummated an alternative financing transaction.

In August 2008, Cheniere Common Units Holding, LLC, our subsidiary, closed a \$250.0 million senior secured convertible term loan agreement (2008 Convertible Loans). Proceeds were used to repay the Bridge Loan obtained in May 2008, to fund a reserve account for payments under Cheniere Marketing's TUA with Sabine Pass LNG, L.P. (Sabine Pass LNG), and to pay expenses incurred in connection with the 2008 Convertible Loans and consideration of other strategic alternatives.

In September 2008, we received \$145.0 million, net of discount, from the additional issuance of \$183.5 million of Sabine Pass LNG's 7 1/2% Senior Secured Notes due 2016 (Senior Notes) pursuant to the existing indenture, dated as of November 9, 2006, under which we had previously issued \$1,482.0 million in aggregate principal amount of 7 1/2% Senior Secured Notes due 2016.

As of September 30, 2008, we had unrestricted cash and cash equivalents of \$128.3 million. In addition, we had restricted cash and cash equivalents and U.S. treasury securities of \$578.0 million, which were designated for the following purposes: \$105.6 million for construction costs of the Sabine Pass LNG receiving terminal; \$164.4 million for Sabine Pass LNG's working capital; \$137.3 million for interest payments related to the Senior Notes

---

**Index to Financial Statements**

described below; \$120.1 million for Cheniere Marketing TUA payments; \$43.4 million for cash distributions by Cheniere Energy Partners, L.P. ( Cheniere Partners ) through the distribution made in respect of the quarter ending June 2009; and \$7.2 million in other restricted cash and cash equivalents.

**LIQUIDITY, CAPITAL RESOURCES AND OPERATIONS**

**LNG Receiving Terminal Business**

*Sabine Pass LNG*

We have completed physical construction of the initial 2.6 Bcf/d of sendout capacity and 10.1 Bcf of storage capacity at the Sabine Pass LNG receiving terminal and are now able to accept commercial cargoes. In order to complete commissioning and testing of this initial phase of the facility, our primary construction contractor, Bechtel Corporation, or Bechtel, will need to complete specified outstanding work items and we may need to obtain and process additional LNG. Construction of the remaining 1.4 Bcf/d of sendout capacity and 6.7 Bcf of storage capacity was approximately 84% complete as of September 30, 2008, and we anticipate achieving full operability, with total sendout capacity of approximately 4.0 Bcf/d and storage capacity of approximately 16.8 Bcf, during the third quarter of 2009.

Our estimated aggregate construction, commissioning and operating cost budget through the achievement of full operability of the Sabine Pass LNG receiving terminal, with approximately 4.0 Bcf/d of total sendout capacity and five LNG storage tanks with approximately 16.8 Bcf of aggregate storage capacity, is approximately \$1,559 million, excluding financing costs. Of this amount, \$1,385.1 million of construction and commissioning costs had been incurred as of September 30, 2008. Our remaining construction, commissioning and operating costs are anticipated to be funded from restricted cash and cash equivalents designated for construction and from working capital.

The entire 4.0 Bcf/d of regasification capacity that will be available at the Sabine Pass LNG receiving terminal upon completion of construction has been fully reserved under three long-term TUAs, under which Sabine Pass LNG's customers are required to pay fixed monthly fees, whether or not they use the terminal. We have achieved commercial operations so that capacity reservation fee TUA payments will begin to be made by our third-party customers as follows:

Total LNG USA, Inc. ( Total ) has reserved approximately 1.0 Bcf/d of regasification capacity and has agreed to make monthly capacity payments to Sabine Pass aggregating approximately \$125 million per year for 20 years commencing April 1, 2009. Total, S.A. has guaranteed Total's obligations under its TUA up to \$2.5 billion, subject to certain exceptions; and

Chevron U.S.A., Inc. ( Chevron ) has reserved approximately 1.0 Bcf/d of regasification capacity and has agreed to make monthly capacity payments to Sabine Pass LNG aggregating approximately \$125 million per year for 20 years commencing not later than July 1, 2009. Chevron Corporation has guaranteed Chevron's obligations under its TUA up to 80% of the fees payable by Chevron. In addition, Cheniere Marketing has reserved the remaining 2.0 Bcf/d of regasification capacity, and is entitled to use any capacity not utilized by Total and Chevron. Cheniere Marketing has agreed to make monthly capacity payments aggregating approximately \$250 million per year through at least the third quarter of 2028, plus capacity payments of \$5 million per month for the three months beginning October 2008 when the Sabine Pass LNG receiving terminal achieved commercial operations. Cheniere Energy has guaranteed Cheniere Marketing's obligations under its TUA.

In September 2008, Hurricane Ike and related storm activity, such as windstorms, storm surges, and floods struck the Texas and Louisiana coast. We experienced minor damage at the Sabine Pass LNG receiving terminal with most of the damage impacting equipment and facilities associated with the 1.4 Bcf/d of sendout capacity

---

**Index to Financial Statements**

and 6.7 Bcf of storage capacity still under construction. Impact to operations and the equipment and facilities associated with the initial 2.6 Bcf/d of sendout capacity and 10.1 Bcf of storage capacity was minimal. We continue to expect to complete construction of the remaining 1.4 Bcf/d of sendout capacity and 6.7 Bcf of storage capacity in the third quarter of 2009. Estimated costs to repair damage caused by Hurricane Ike are approximately \$38 million, of which we believe approximately \$28 million will be recoverable from insurance proceeds and other reimbursements.

*Other LNG Receiving Terminals*

We have a 30% limited partner interest in Freeport LNG Development, L.P. ( Freeport LNG ). Under the limited partnership agreement of Freeport LNG, development expenses of the Freeport LNG receiving terminal project and other Freeport LNG cash needs generally are to be funded out of Freeport LNG's own cash flows, borrowings or other sources, and with capital contributions by the limited partners. In March 2008 and May 2008, we received cash call notices from Freeport LNG requesting that we provide further financial support due to higher than expected commissioning and performance testing costs. As of September 30, 2008, we had funded the cash calls and have recorded \$4.8 million of additional losses in Freeport LNG. We do not anticipate any additional cash calls in the foreseeable future. The \$4.8 million in cash calls were returned by Freeport LNG in October 2008.

We will contemplate making final investment decisions to complete construction of our Corpus Christi LNG receiving terminal project and to commence construction of our Creole Trail LNG receiving terminal project upon, among other things, entering into acceptable commercial arrangements and entering into acceptable financing arrangements for the applicable project.

**Natural Gas Pipeline Business**

As of September 30, 2008, Phase 1 of the Creole Trail Pipeline, consisting of 94 miles of pipeline, had been placed into commercial operations. Creole Trail Pipeline expenditures incurred through September 30, 2008 were \$553 million, including accrued liabilities. Total costs, excluding financing costs, are expected to be approximately \$557 million to construct the Creole Trail Pipeline.

We will contemplate making a final investment decision to construct Phase 2 of the Creole Trail Pipeline, the Corpus Christi Pipeline, the Cheniere Southern Trail Pipeline and the Burgos Hub project upon, among other things, receiving all required authorizations to construct and operate the applicable pipeline (and storage facility in the case of Burgos Hub), to the extent not already obtained, and entering into acceptable commercial arrangements, including acceptable financing arrangements for the applicable project.

**LNG and Natural Gas Marketing Business**

Our LNG and natural gas marketing business segment is seeking to develop a portfolio of long-term, short-term, and spot LNG purchase agreements, and will focus on entering into business relationships such as the one entered into with JPMorgan for the domestic marketing of natural gas that is imported by Cheniere Marketing as LNG to the Sabine Pass LNG receiving terminal. See Note 2 of the Notes to Consolidated Financial Statements.

We have unwound, terminated or assigned our commitments under our domestic natural gas agreements on terms we believe to be acceptable and have cancelled both of our LNG vessel charters.

We cancelled a credit facility that Cheniere Marketing had in place and, as a result of the release of cash collateral for that facility, increased our unrestricted cash balance by \$44.5 million as of September 30, 2008.

**Index to Financial Statements**

**Oil and Gas Exploration and Development Business**

Although our focus is primarily on the development of LNG-related businesses, we have continued to be involved to a limited extent in oil and gas exploration, development and production activities in the shallow waters of the Gulf of Mexico. This business has historically required, and will continue to require, an insignificant amount of cash to fund its operations.

**Cheniere Partners**

For each calendar quarter through June 30, 2009, Cheniere Partners is expected to make quarterly cash distributions of \$0.425 per unit on all outstanding common units, as well as related distributions to its general partner, from restricted cash and cash equivalents held in a distribution reserve established in connection with Cheniere Partners' initial public offering. We anticipate receiving \$4.8 million per quarter out of the total \$11.4 million of quarterly common unit distributions. Beginning with the distribution in respect of the quarter ending September 30, 2009, the distribution reserve is expected to have been depleted, and Cheniere Partners will rely on the receipt of operating revenues from Sabine Pass LNG's TUAs to fund future quarterly cash distributions to us and other unitholders. Sabine Pass LNG is not permitted under the Senior Notes indenture to make cash distributions to Cheniere Partners if it does not satisfy a fixed charge coverage ratio test of 2:1, calculated as required in the indenture. When Cheniere Marketing makes its capacity reservation fee payments under its TUA of approximately \$250 million per year in addition to the aggregate TUA payments of approximately \$250 million by Total and Chevron, we anticipate that the fixed charge coverage ratio test will be met and we expect to receive, subject to declaration by Cheniere Partners' board of directors, approximately \$254 million per year from Cheniere Partners in distributions on our common, subordinated and general partner units, as well as an additional approximately \$18 million of management and service fees. Until such time, we may not receive distributions equal to the amount of our TUA payments.

**Index to Financial Statements****Sources and Uses of Cash**

The following table summarizes the sources and uses of our cash and cash equivalents for the nine months ended September 30, 2008 and 2007. The table presents capital expenditures on a cash basis; therefore, these amounts differ from the amounts of capital expenditures, including accruals that are referred to elsewhere in this document. Additional discussion of these items follows the table (in thousands).

	Nine Months Ended September 30,	
	2008	2007
<b>Sources of cash and cash equivalents:</b>

*Use of restricted cash and cash equivalents*

Under the indenture governing the Senior Notes, a portion of the proceeds from the original issuance of the Senior Notes is required to be used for scheduled interest payments through May 2009 and to fund the cost to complete construction of the Sabine Pass LNG receiving terminal. Due to these restrictions imposed by the indenture, the proceeds are not presented as cash and cash equivalents, and therefore, when proceeds from the Senior Notes are used they are presented as a source of cash and cash equivalents. For the nine months ended September 30, 2008 and 2007, the \$391.4 million and \$399.4 million, respectively, of restricted cash and cash equivalents were used primarily to pay for construction activities at the Sabine Pass LNG receiving terminal.

*Use of restricted treasury securities*

## Edgar Filing: CHENIERE ENERGY INC - Form 10-Q

At the closing of the Cheniere Partners offering, we funded a distribution reserve, which was invested in U.S. treasury securities. The distribution reserve, including interest earned thereon, will be used to pay quarterly

---

**Index to Financial Statements**

distributions of \$0.425 per common unit for all common units, as well as related distributions to Cheniere Partners general partner, through the distribution made in respect of the quarter ending June 30, 2009.

*Proceeds from debt and proceeds from related party debt*

Our proceeds from debt were \$490.0 million and \$400.0 million for the nine months ended September 30, 2008 and 2007, respectively. During the nine months ended 2008, we received \$95.0 million from borrowings under a Bridge Loan, \$250.0 million from borrowings under the 2008 Convertible Loans described below, and \$145.0 million, net of discount, from borrowings under the additional issuance of the Senior Notes due 2016. We repaid the Bridge Loan in full using a portion of the borrowings under the 2008 Convertible Loans. During the nine months ended September 30, 2007, we received \$400.0 million from borrowings under the 2007 Term Loan described below, used primarily to repurchase shares of our common stock under the call option acquired in the issuer call spread purchased by us in connection with the issuance of the Convertible Senior Unsecured Notes.

*Proceeds from sale of common units in partnership*

In conjunction with the Cheniere Partners offering in the first quarter of 2007, we sold to the public a portion of the Cheniere Partners common units held by us, realizing net proceeds of \$203.9 million. These net proceeds are being used for corporate and general purposes.

*Proceeds from issuance of common units in partnership*

Through the Cheniere Partners offering in the first quarter of 2007, Cheniere Partners received \$98.4 million in net proceeds for the issuance of common units to the public. Cheniere Partners used all of the net proceeds to purchase U.S. treasury securities to fund a distribution reserve for payment of initial quarterly distributions on common units and related general partner units through the quarter ending June 30, 2009.

*Operating cash flow*

Net cash used in operations was \$101.4 million and \$51.9 million in the nine months ended September 30, 2008 and 2007, respectively. The \$49.5 million increase in the net cash used in operations in the nine months ended September 30, 2008 resulted primarily from restructuring charges recognized in the second and third quarters of 2008.

*Purchases of LNG for commissioning, net of amounts transferred to LNG terminal construction-in-process*

As of September 30, 2008, we had acquired a total of three LNG commissioning cargoes for the Sabine Pass LNG receiving terminal and have successfully unloaded the LNG into the Sabine Pass LNG receiving terminal.

*Distributions to minority interest*

During the nine months ended September 30, 2008 and 2007, we distributed \$19.8 million and \$7.0 million, respectively, to non-affiliated common unitholders of Cheniere Partners.

*Debt issuance costs*

Our debt issuance costs were \$28.1 million and \$9.7 million in the nine months ended September 30, 2008 and 2007, respectively. The debt issuance costs in 2008 related to the additional issuance of Senior Notes due 2016, the 2008 Convertible Loans and the Bridge Loan. Debt issuance costs in 2007 related primarily to the 2007 Term Loan.

*Advances under long-term contracts*

We have entered into certain contracts and purchase agreements related to the construction of the Sabine Pass LNG receiving terminal that require us to make payments to fund costs that will be incurred or equipment

---

## **Index to Financial Statements**

that will be received in the future. Advances made under long-term contracts on purchase commitments are carried at face value and transferred to property, plant and equipment as the costs are incurred or equipment is received.

### *Investment in restricted cash and cash equivalents*

In the nine months ended September 30, 2008, we invested \$140.8 million of the \$145.0 million, net of discount, additional issuance of the Senior Notes due 2016, and \$135.0 million of the 2008 Convertible Loans in restricted cash and cash equivalents, which was partially offset by quarterly distributions made from restricted cash.

### *Investment in U.S. treasury securities*

Through the Cheniere Partners offering in the first quarter of 2007, Cheniere Partners received \$98.4 million in net proceeds for the issuance of common units to the public. Cheniere Partners used all of the net proceeds to purchase U.S. treasury securities to fund a distribution reserve for payment of initial quarterly distributions through the quarter ending June 30, 2009.

## ***Debt Agreements***

### *Convertible Senior Unsecured Notes*

In July 2005, we consummated a private offering of \$325.0 million aggregate principal amount of Convertible Senior Unsecured Notes due 2012 to qualified institutional buyers pursuant to Rule 144A under the Securities Act. The notes bear interest at a rate of 2.25% per year. Interest on the Convertible Senior Unsecured Notes is payable semi-annually in arrears February 1 and August 1 of each year. The notes are convertible at any time into our common stock under certain circumstances at an initial conversion rate of 28.2326 per \$1,000 principal amount of the notes, which is equal to a conversion price of approximately \$35.42 per share. As of September 30, 2008, no holders had elected to convert their notes. We may redeem some or all of the notes on or before August 1, 2012, for cash equal to 100% of the principal plus any accrued and unpaid interest if in the previous 10 trading days the volume-weighted average price of our common stock exceeds \$53.13, subject to adjustment, for at least five consecutive trading days. In the event of such redemption, we will make an additional payment equal to the present value of all remaining scheduled interest payments through August 1, 2012, discounted at the U.S. Treasury rate plus 50 basis points. The indenture governing the notes contains customary reporting requirements.

### *Sabine Pass LNG Senior Secured Notes*

Sabine Pass LNG has issued an aggregate principal amount of \$2,215.5 million of Senior Notes consisting of \$550.0 million of 7 1/4% Senior Secured Notes due 2013 and \$1,665.5 million of 7 1/2 % Senior Secured Notes due 2016. Interest on the Senior Notes is payable semi-annually in arrears on May 30 and November 30 of each year. The Senior Notes are secured on a first-priority basis by a security interest in all of Sabine Pass LNG's equity interests and substantially all of its operating assets. Under the indenture governing the Senior Notes, except for permitted tax distributions, Sabine Pass LNG may not make distributions until certain conditions are satisfied. The indenture requires that Sabine Pass LNG apply its net operating cash flow (i) first, to fund with monthly deposits its next semiannual payment of approximately \$82.4 million of interest on the Senior Notes, and (ii) second, to fund a one-time, permanent debt service reserve fund equal to one semiannual interest payment of approximately \$82.4 million on the Senior Notes. Distributions will be permitted only after satisfaction of the foregoing funding requirements, after satisfying a fixed charge coverage ratio test of 2:1 and after satisfying other conditions specified in the indenture.

### *2007 Term Loan*

In May 2007, Cheniere Subsidiary Holdings, LLC ( Cheniere Subsidiary ), a wholly-owned subsidiary of Cheniere, entered into a \$400.0 million credit agreement ( 2007 Term Loan ). Borrowings under the 2007 Term

---

**Index to Financial Statements**

Loan generally bear interest at a fixed rate of 9.75% per annum. Interest is calculated on the unpaid principal amount of the 2007 Term Loan outstanding and is payable quarterly in arrears on March 31, September 30, September 30 and December 31 of each year. The 2007 Term Loan will mature on May 31, 2012. The net proceeds from the 2007 Term Loan were \$391.7 million and are being used for general corporate purposes, including the repurchase, completed in July 2007, of approximately 9.2 million shares of our outstanding common stock pursuant to the exercise of the call options acquired in the issuer call spread purchased by us in connection with the issuance of the Convertible Senior Unsecured Notes. The 2007 Term Loan is secured by a pledge of our 135,383,831 subordinated units in Cheniere Partners and our equity interests in the entities that own our 30% interest in Freeport LNG.

*2008 Convertible Loans*

In August 2008, we entered into a credit agreement pursuant to which we obtained \$250.0 million in convertible term loans. The 2008 Convertible Loans will mature in 2018, but the lenders can require prepayment of the loan on August 15, 2011, 2013 and 2015, and upon a change of control. The 2008 Convertible Loans bear interest at a fixed rate of 12% per annum, except during the occurrence of an event of default during which time the rate of interest will be 14% per annum. The 2008 Convertible Loans are secured by Cheniere's rights and fees payable under management services agreements with Sabine Pass LNG and Cheniere Partners, by Cheniere's common units in Cheniere Partners, by the equity and non-real property assets of Cheniere's pipeline entities, by the equity of various other subsidiaries and certain other assets and subsidiary guarantees. The principal amount of \$250.0 million may be exchanged for newly-created Series B Preferred Stock with voting rights limited to the equivalent of 10,125,000 shares of common stock. The exchange ratio is one share of Series B Preferred Stock for each \$5,000 of outstanding borrowings. The aggregate preferred stock is exchangeable into 50 million shares of common stock at a conversion price of \$5.00 per share pursuant to a broadly syndicated offering. We placed \$135 million of the borrowings under the 2008 Convertible Loans into a TUA reserve account to pay the reservation fee and operating fee as defined under Cheniere Marketing's TUA. We utilized \$95.0 million of the borrowings under the 2008 Convertible Loans to repay the Bridge Loan. The remaining borrowings were utilized to pay for interest on the Bridge Loan and expenses incurred in connection with the issuance of the 2008 Convertible Loans and consideration of other strategic alternatives.

One of the lenders is Scorpion Capital Partners LP (Scorpion), an affiliate of one of the Company's directors. Scorpion's portion of the 2008 Convertible Loans was \$8.5 million and Scorpion did not receive any fees in connection with making the 2008 Convertible Loans.

As long as the 2008 Convertible Loans are exchangeable for shares of Series B Preferred Stock or shares of Series B Preferred Stock remain outstanding, the holders of a majority of the 2008 Convertible Loans and Series B Preferred Stock, acting together, shall have the right to nominate two individuals to the Company's Board, and together with the Board, a third nominee, who shall be an independent director.

*Issuances of Common Stock*

During the first nine months of 2008, a total of 145,403 shares of our common stock were issued pursuant to the exercise of stock options, resulting in net cash proceeds of \$0.5 million. In addition, in January 2008, 479,802 shares having three-year graded vesting were issued to our employees in the form of non-vested stock awards and 537,000 were issued to our executive officers in the form of vested stock awards related to our performance in 2007. In May 2008 and June 2008, as a part of the short-term and long-term retention plans approved by the Compensation Committee, 373,656 shares vesting on December 1, 2008 and 1,525,038 shares having a three-year graded vesting beginning December 31, 2008 were issued to our employees and a consultant in the form of non-vested stock awards. In May 2008 and September 2008, 228,714 shares having a one-year graded vesting

---

**Index to Financial Statements**

were issued to our directors. In the nine months ended September 30, 2008, an additional 23,443 shares of non-vested stock having three- or four-year graded vestings were issued to employees.

During the first nine months of 2007, a total of 308,125 shares of our common stock were issued pursuant to the exercise of stock options, resulting in net cash proceeds of \$2.5 million. In addition, 215,759 shares of common stock were issued in satisfaction of cashless exercises of options to purchase 241,275 shares of common stock.

In January 2007, 628,396 shares of our common stock were issued to our employees and executive officers in the form of non-vested (restricted) stock awards related to our performance in 2006. During the first nine months of 2007, we issued an additional 242,755 shares of non-vested restricted stock to new and existing employees.

In May 2007, 30,574 shares of our common stock were issued to our outside directors in the form of non-vested restricted stock awards.

As of July 26, 2007, we had purchased approximately 9.2 million shares of our common stock for a cash price of \$35.42 per share under the call options acquired by us concurrently with the issuance of the Convertible Senior Unsecured Notes.

**RESULTS OF OPERATIONS**

***Three Months Ended September 30, 2008 vs. Three Months Ended September 30, 2007***

*Overall Operations*

Our consolidated net loss for the third quarter of 2008 was \$67.4 million, or \$1.42 per share (basic and diluted), compared to a net loss of \$53.5 million, or \$1.14 per share (basic and diluted), for the third quarter of 2007. The increase in consolidated net loss was primarily due to decreased interest income, increased loss on early extinguishment of debt, increased interest expense and increased depreciation expense, which were partially offset by a derivative gain and decreased general and administrative expenses.

*Interest Income*

Interest income decreased \$17.5 million in the third quarter of 2008 compared to the third quarter of 2007 because of the lower average invested cash balances resulting from the use of cash to pay construction costs and make interest payments and lower interest rates.

*Loss on Early Extinguishment of Debt*

Loss on early extinguishment of debt increased \$10.7 million in the third quarter of 2008 compared to the third quarter of 2007. The increase was a result of recognizing all unamortized debt issuance costs associated with the \$95 million Bridge Loan that was repaid in full using a portion of the borrowings under the 2008 Convertible Loans during the third quarter of 2008.

*Interest Expense, net*

Interest expense, net of amounts capitalized, increased \$8.8 million in the third quarter of 2008 compared to the third quarter of 2007. The increase was caused by the additional borrowing under the 2008 Convertible Loans and the issuance of \$183.5 million of additional Senior Notes due 2016 during the third quarter of 2008.

*Depreciation Expense*

Depreciation expense increased \$5.3 million in the third quarter of 2008 compared to the third quarter of 2007. This increase resulted from our having begun depreciating the Sabine Pass LNG receiving terminal's initial

---

**Index to Financial Statements**

2.6 Bcf/d of regassification capacity and 10.1 Bcf of storage capacity in the third quarter of 2008 when it was ready for use and placed in service, and of our having begun depreciating the Creole Trail Pipeline in the second quarter of 2008 when it was ready for use and placed in service.

*Derivative Gain*

During the three months ended September 30, 2008, we recognized a \$14.7 million derivative gain as a result of entering into several natural gas swaps to hedge the exposure to variability in expected future cash flows related to the commissioning and cool down cargos purchased.

*General and Administrative Expenses*

General and administrative ( G&A ) expenses decreased \$5.0 million in the third quarter of 2008 compared to the third quarter of 2007. The decrease in G&A primarily resulted from a decrease in non-cash compensation of \$10.0 million that was partially offset by increased legal and professional fees incurred related to the 2008 Convertible Loans and other proposed strategic alternatives. The decrease in non-cash compensation resulted from our cost savings program in connection with the downsizing of our natural gas marketing business activities and nearing completion of significant construction activities for both the Sabine Pass LNG receiving terminal and Creole Trail Pipeline.

*Nine Months Ended September 30, 2008 vs. Nine Months Ended September 30, 2007*

*Overall Operations*

Our consolidated net loss for the first nine months of 2008 was \$249.7 million, or \$5.29 per share (basic and diluted), compared to a net loss of \$129.1 million, or \$2.48 per share (basic and diluted), for the first nine months of 2007. The increase in the loss was primarily due to restructuring charges, decreased interest income, increased loss on early extinguishment of debt, increased depreciation expense and increased loss from equity method investments, which were partially offset by decreased LNG receiving terminal and pipeline development expenses, decreased general and administrative expenses and a derivative gain. In addition, a significant portion of our loss was attributable to the recognition of non-cash, share-based payments accounted for under SFAS No. 123R, *Share-Based Payments*, which requires all non-cash, share-based compensation be recognized in the financial statements based on fair value at the date of grant. As a result of our issuance of non-cash, share-based payments to employees, we recorded \$26.6 million of non-cash compensation expense in the first nine months ended September 30, 2008 compared to \$40.8 million of non-cash compensation expense in the first nine months ended September 30, 2007. Not including the impact of the restructuring charges and this non-cash expense in the nine months ended September 30, 2008, our net loss would have been \$144.2 million, or \$3.05 net loss per common share (basic and diluted).

*Restructuring Charges*

During the nine months ended September 30, 2008, we incurred \$78.9 million of restructuring charges resulting from our cost savings program in connection with the downsizing of our natural gas marketing business activities, nearing completion of significant construction activities for both the Sabine Pass LNG receiving terminal and Creole Trail Pipeline and seeking alternative arrangements for our time charter interests in two LNG vessels (see Note 3 Restructuring Charges of our Notes to Consolidated Financial Statements).

*Interest Income*

Interest income decreased \$48.8 million in the nine months ended September 30, 2008 compared to the nine months ended September 30, 2007, because of the lower average invested cash balances resulting from the use of cash to pay construction costs and interest payments and lower interest rates.

---

**Index to Financial Statements**

*Loss on Early Extinguishment of Debt*

Loss on early extinguishment of debt increased \$10.7 million in the nine months ended September 30, 2008 compared to the nine months ended September 30, 2007. The increase was a result of recognizing all unamortized debt issuance costs associated with the \$95 million Bridge Loan that was paid in full using a portion of the borrowings under the 2008 Convertible Loans during the third quarter of 2008.

*Depreciation Expense*

Depreciation expense increased \$8.3 million in the nine months ended September 30, 2008 compared to the nine months ended September 30, 2007. This increase resulted from our having begun depreciating the Sabine Pass LNG receiving terminal's initial 2.6 Bcf/d of regassification capacity and 10.1 Bcf of storage capacity in the third quarter of 2008 when it was ready for use and placed in service, and our having begun depreciating the Creole Trail Pipeline in the second quarter of 2008 when it was ready for use and placed in service.

*Loss from Equity Method Investments*

During the first nine months ended September 30, 2008, we recognized \$4.8 million of suspended losses from our equity method investment in Freeport LNG. In the first nine months of 2008, we received and paid cash call notices of \$4.8 million from Freeport LNG requesting that we provide further financial support due to higher than expected commissioning and performance testing costs. The \$4.8 million in cash calls were returned by Freeport LNG in October 2008.

*LNG Receiving Terminal and Pipeline Development Expenses*

Our LNG receiving terminal and pipeline development expenses include primarily professional costs associated with front-end engineering and design work, obtaining orders from the FERC authorizing construction of our facilities and other required permitting for our LNG receiving terminals and natural gas pipelines.

LNG receiving terminal and pipeline development expenses decreased \$15.6 million in the first nine months of 2008 compared to the first nine months of 2007. The primary cause of the decrease was a \$9.4 million decrease in salaries and a \$6.2 million decrease in investor relations and other business development expenditures that were not incurred in the nine months ended September 30, 2008 compared to the nine months ended September 30, 2007.

*General and Administrative Expenses*

General and administrative ( G&A ) expenses decreased \$5.1 million in the nine months ended September 30, 2008, compared to the nine months ended September 30, 2007. The decrease in G&A primarily resulted from a decrease in non-cash compensation that was partially offset by increased legal and professional fees incurred related to the 2008 Convertible Loans and other proposed strategic alternatives. The decrease in non-cash compensation resulted from our cost savings program in connection with the downsizing of our natural gas marketing business activities and nearing completion of significant construction activities for both the Sabine Pass LNG receiving terminal and Creole Trail Pipeline.

*Derivative Gain*

During the nine months ended September 30, 2008, we recognized a \$2.3 million derivative gain primarily as a result of entering into several natural gas swaps to hedge the exposure to variability in expected future cash flows related to the commissioning and cool down cargos purchased.

**Off-Balance Sheet Arrangements**

As of September 30, 2008, we had no off-balance sheet debt or other such unrecorded obligations, and we have not guaranteed the debt of any other party.

---

**Index to Financial Statements**

**OTHER MATTERS**

**Critical Accounting Estimates and Policies**

The selection and application of accounting policies is an important process that has developed as our business activities have evolved and as the accounting rules have developed. Accounting rules generally do not involve a selection among alternatives but involve an implementation and interpretation of existing rules, and the use of judgment, to the specific set of circumstances existing in our business. We make every effort to comply properly with all applicable rules on or before their adoption, and we believe that the proper implementation and consistent application of the accounting rules are critical. However, not all situations are specifically addressed in the accounting literature. In these cases, we must use our best judgment to adopt a policy for accounting for these situations. We accomplish this by analogizing to similar situations and the accounting guidance governing them.

***Accounting for LNG Activities***

Generally, we begin capitalizing the costs of our LNG receiving terminals and related pipelines once the individual project meets the following criteria: (i) regulatory approval has been received, (ii) financing for the project is available and (iii) management has committed to commence construction. Prior to meeting these criteria, most of the costs associated with a project are expensed as incurred. These costs primarily include professional fees associated with front-end engineering and design work, costs of securing necessary regulatory approvals, and other preliminary investigation and development activities related to our LNG receiving terminals and related pipelines.

Generally, costs that are capitalized prior to a project meeting the criteria otherwise necessary for capitalization include: land costs, costs of lease options and the costs of certain permits, which are capitalized as intangible LNG assets. The costs of lease options are amortized over the life of the lease once it is obtained. If no lease is obtained, the costs are expensed. Site rental costs and related amortization of capitalized options have been capitalized during the construction period through the end of 2005. Beginning in 2006, such costs have been expensed as required by the FASB Staff Position No. 13-1.

During the construction periods of our LNG receiving terminals, we capitalize interest and other related debt costs in accordance with Statement of Financial Accounting Standards ( SFAS ) No. 34, *Capitalization of Interest Cost*, as amended by SFAS No. 58, *Capitalization of Interest Cost in Financial Statements That Include Investments Accounted for by the Equity Method (an Amendment of FASB Statement No. 34)*. Upon commencement of operations, capitalized interest, as a component of the total cost, will be amortized over the estimated useful life of the asset.

In connection with the construction of the Sabine Pass LNG receiving terminal, we require LNG to perform certain commissioning activities, as follows:

**Cool down** A minimum amount of LNG will be used to cool down the LNG receiving terminal. Cool down represents the amount of LNG required to cool the LNG receiving terminal to its normal operating temperature.

**LNG heel** A certain amount of LNG will be used to establish a level of LNG inventory in each LNG storage tank and in the LNG receiving terminals piping in order for the LNG receiving terminal to function properly.

**Equipment commissioning** The remaining amount of the LNG will be used to commission the equipment in the LNG receiving terminal to ensure that it performs at designed specifications. Equipment commissioning will result in natural gas being sold. LNG purchased for commissioning activities is recorded at cost and classified as a non-current asset on our Consolidated Balance Sheets as LNG held for commissioning. As the LNG held for commissioning is used to

---

## **Index to Financial Statements**

cool down the LNG receiving terminal and establish LNG heel in the LNG receiving terminal, we capitalize the portion used. The LNG used in the commissioning process is capitalized net of amounts received from the sale of natural gas.

### ***Regulated Operations***

Our natural gas pipeline business is subject to the jurisdiction of the Federal Energy Regulatory Commission ( FERC ) in accordance with the Natural Gas Act of 1938 and the Natural Gas Policy Act of 1978, and we have determined that certain of our pipeline systems to be constructed have met the criteria set forth in SFAS No. 71. Accordingly, we have applied the provisions of SFAS No. 71 to the affected pipeline subsidiaries beginning in the second quarter of 2006.

Our application of SFAS No. 71 is based on the current regulatory environment, our current projected tariff rates, and our ability to collect those rates. Future regulatory developments and rate cases could impact this accounting. Although discounting of our maximum tariff rates may occur, we believe that the standards required by SFAS No. 71 for its application are met and the use of regulatory accounting under SFAS No. 71 best reflects the results of future operations in the economic environment in which we will operate. Regulatory accounting requires us to record assets and liabilities that result from the rate-making process that would not be recorded under GAAP for non-regulated entities. We will continue to evaluate the application of regulatory accounting principles based on on-going changes in the regulatory and economic environment. Items that may influence our assessment are:

inability to recover cost increases due to rate caps and rate case moratoriums;

inability to recover capitalized costs, including an adequate return on those costs through the rate-making process and the FERC proceedings;

excess capacity;

increased competition and discounting in the markets we serve; and

impacts of ongoing regulatory initiatives in the natural gas industry.

Natural gas pipeline costs include amounts capitalized as an Allowance for Funds Used During Construction ( AFUDC ). The rates used in the calculation of AFUDC are determined in accordance with guidelines established by the FERC. AFUDC represents the cost of debt and equity funds used to finance our natural gas pipeline additions during construction. AFUDC is capitalized as a part of the cost of our natural gas pipelines. Under regulatory rate practices, we generally are permitted to recover AFUDC, and a fair return thereon, through our rate base after our natural gas pipelines are placed in service.

### ***Revenue Recognition***

LNG receiving terminal capacity reservation fees are recognized as revenue over the term of the respective TUAs. Advance capacity reservation fees are deferred initially.

### ***Cash Flow Hedges***

As defined in SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, cash flow hedge transactions hedge the exposure to variability in expected future cash flows (i.e., in our case, the variability of floating interest rate exposure). In the case of cash flow hedges, the hedged item (the underlying risk) is generally unrecognized (i.e., not recorded on the balance sheet prior to settlement), and any changes in the fair value, therefore, will not be recorded within earnings. Conceptually, if a cash flow hedge is effective, this means that a variable, such as a movement in interest rates, has been effectively fixed so that any fluctuations will have no net result on either cash flows or earnings. Therefore, if the changes in fair value of the hedged item are not recorded in earnings, then the changes in fair value of the hedging instrument (the derivative) must also be

---

## **Index to Financial Statements**

excluded from the income statement or else a one-sided net impact on earnings will be reported, despite the fact that the establishment of the effective hedge results in no net economic impact. To prevent such a scenario from occurring, SFAS No. 133 requires that the fair value of a derivative instrument designated as a cash flow hedge be recorded as an asset or liability on the balance sheet, but with the offset reported as part of other comprehensive income, to the extent that the hedge is effective. We assess, both at the inception of each hedge and on an on-going basis, whether derivatives that are used in our hedging transactions are highly effective in offsetting changes in cash flows of the hedged items. On an on-going basis, we monitor the actual dollar offset of the hedges' market values compared to hypothetical cash flow hedges. Any ineffective portion will be reflected in earnings. Ineffectiveness is the amount of gains or losses from derivative instruments that are not offset by corresponding and opposite gains or losses on the expected future transaction.

### ***Goodwill and Other Intangible Assets***

Goodwill and other intangible assets are accounted for in accordance with SFAS No. 142, *Goodwill and Other Intangible Assets*. We perform an annual impairment review in the fourth quarter of each year, although we may perform an impairment review more frequently whenever events or circumstances indicate that the carrying value may not be recoverable.

### ***Share-Based Compensation Expense***

Effective January 1, 2006, we adopted the fair value recognition provisions of SFAS No. 123R using the modified prospective transition method. Under this method, we recognize compensation expense for all share-based payments granted after January 1, 2006 and prior to, but not yet vested as of, January 1, 2006, in accordance with SFAS No. 123R using the Black-Scholes option valuation model. Under the fair value recognition provisions of SFAS No. 123R, we recognize stock-based compensation net of an estimated forfeiture rate and only recognize compensation cost for those shares expected to vest on a straight-line basis over the requisite service period of the award.

Determining the appropriate fair value model and calculating the fair value of share-based payment awards require the input of highly subjective assumptions, including the expected life of the share-based payment awards and stock price volatility. We believe that implied volatility, calculated based on traded options of our common stock, combined with historical volatility is an appropriate indicator of expected volatility and future stock price trends. Therefore, expected volatility for the quarter ended September 30, 2008 was based on a combination of implied and historical volatilities. The assumptions used in calculating the fair value of share-based payment awards represent our best estimates, but these estimates involve inherent uncertainties and the application of management judgment. As a result, if factors change and we use different assumptions, our stock-based compensation expense could be materially different in the future. In addition, we are required to estimate the expected forfeiture rate and only recognize expense for those shares expected to vest. If our actual forfeiture rate is materially different from our estimate, the stock-based compensation expense could be significantly different from what we have recorded in the current period. See Note 19 *Share-Based Compensation* of our Notes to Consolidated Financial Statements for a further discussion on share-based compensation.

### ***New Accounting Pronouncements***

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements - an amendment of ARB No. 51*, which establishes accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. It clarifies that a noncontrolling interest in a subsidiary is an ownership interest in the consolidated entity that should be reported as equity in the consolidated financial statements. SFAS No. 160 is effective for fiscal years beginning October 1, 2009. We are currently evaluating the impact SFAS No. 160 will have on our financial position, results of operations and cash flows.

On January 1, 2008, we adopted SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities - including an amendment of FASB Statement No. 115* ( SFAS No. 159 ). SFAS No. 159 permits

---

**Index to Financial Statements**

entities to choose to measure many financial instruments and certain other assets and liabilities at fair value on an instrument-by-instrument basis (the fair value option) with changes in fair value reported in earnings. Cheniere already records derivative contracts at fair value in accordance with SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities, as amended* ( SFAS No. 133 ). The adoption of SFAS No. 159 had no impact on our Consolidated Financial Statements as management did not elect the fair value option for any financial instruments or other assets and liabilities.

On January 1, 2008, we adopted SFAS No. 157, *Fair Value Measurements* ( SFAS No. 157 ) as it relates to financial assets and financial liabilities. In February 2008, the FASB issued FSP No. FAS 157-2, *Effective Date of FASB Statement No. 157*, which delayed the effective date of SFAS No. 157 for all nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value in the financial statements on at least an annual basis, until January 1, 2009 for calendar year-end entities. The adoption of SFAS No. 157 did not have a material impact on our Consolidated Financial Statements.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities – an amendment of FASB Statement No. 133* ( SFAS No. 161 ). SFAS No. 161 requires enhanced disclosures about an entity's derivative and hedging activities, including (i) how and why an entity uses derivative instruments, (ii) how derivative instruments and related hedged items are accounted for under SFAS No. 133, and (iii) how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. This standard becomes effective for us on January 1, 2009. Earlier adoption of SFAS No. 161 and, separately, comparative disclosures for earlier periods at initial adoption are encouraged. As SFAS No. 161 only requires enhanced disclosures, this standard will have no impact on our Consolidated Financial Statements.

In April 2008, the FASB issued FASB Staff Position ( FSP ) SFAS No. 142-3, *Determination of the Useful Life of Intangible Assets*. This FSP amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset under FASB Statement No. 142, *Goodwill and Other Intangible Assets*. The intent of this FSP is to improve the consistency between the useful life of a recognized intangible asset under SFAS No. 142 and the period of expected cash flows used to measure the fair value of the asset under SFAS No. 141R, and other GAAP. This FSP is effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim periods within those fiscal years. Early adoption is prohibited. We are currently evaluating the impact of SFAS FSP No. 142-3 but do not expect the adoption of this pronouncement will have a material impact on our Consolidated Financial Statements.

In May 2008, the FASB issued SFAS No. 162, *The Hierarchy of Generally Accepted Accounting Principles*. SFAS No. 162 identifies the sources of accounting principles and the framework for selecting principles to be used in the preparation of financial statements of nongovernmental entities that are presented in conformity with GAAP in the United States. This statement will be effective 60 days following the SEC's approval of the Public Company Accounting Oversight Board's amendments to AU section 411, *The Meaning of Present Fairly in Conformity with Generally Accepted Accounting Principles*. We are currently evaluating the impact of SFAS No. 162 but do not expect the adoption of this pronouncement will have a material impact on our Consolidated Financial Statements.

In May 2008, the FASB issued FSP APB 14-1, *Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement)*. This FSP clarifies that convertible debt instruments that may be settled in cash upon conversion (including partial cash settlement) are not addressed by paragraph 12 of APB Opinion No. 14, *Accounting for Convertible Debt and Debt issued with Stock Purchase Warrants*. Additionally, this FSP specifies that issuers of such instruments should separately account for the liability and equity components in a manner that will reflect the entity's nonconvertible debt borrowing rate when interest cost is recognized in subsequent periods. This FSP is effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim periods within those fiscal years. We do not anticipate that this new FSP will have any material impact upon our financial condition or results of operations.

**Index to Financial Statements**

**Item 3. Quantitative and Qualitative Disclosures About Market Risk  
Commodity Prices**

We produce and sell natural gas, crude oil and condensate. As a result, our financial results can be affected as these commodity prices fluctuate widely in response to changing market forces. We have not entered into any derivative transactions related to our oil and gas producing activities.

**Cash Investments**

We have cash investments that we manage based on internal investment guidelines that emphasize liquidity and preservation of capital. Such cash investments are stated at historical cost, which approximates fair market value on our Consolidated Balance Sheets.

**Cheniere Marketing and Sabine Pass LNG Derivative Commodity Price Risk**

Our derivative positions as of September 30, 2008 primarily consist of NYMEX natural gas swaps entered into to hedge the exposure to variability in expected future cash flows related to commissioning and cool down cargoes purchased in the second quarter of 2008 that are being sold as part of the testing phase of the commissioning process. As of September 30, 2008, we entered into a total of 1,292,500 MMBtu of NYMEX swaps through February 2009 with one counterparty for which we will receive fixed prices of \$8.44 to \$12.59 per MMBtu. At September 30, 2008, the value of the derivatives was an asset of \$3.8 million.

**Item 4. Disclosure Controls and Procedures**

We maintain a set of disclosure controls and procedures that are designed to ensure that information required to be disclosed by us in the reports filed by us under the Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. As of the end of the period covered by this report, we evaluated, under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer, the effectiveness of our disclosure controls and procedures pursuant to Rule 13a-15 of the Exchange Act. Based on that evaluation, our Chief Executive Officer and our Chief Financial Officer concluded that our disclosure controls and procedures are effective.

During the most recent fiscal quarter, there have been no changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

**Index to Financial Statements****PART II. OTHER INFORMATION****Item 1. Legal Proceedings**

We may in the future be involved as a party to various legal proceedings which are incidental to the ordinary course of business. We regularly analyze current information and, as necessary, provide accruals for probable liabilities on the eventual disposition of these matters. In the opinion of management and legal counsel, as of September 30, 2008, there were no known threatened or pending legal matters that could reasonably be expected to have a material adverse impact on our consolidated results of operations, financial position or cash flows.

**Item 6. Exhibits**

(a) Each of the following exhibits is filed herewith:

- 10.1 Assignment, Assumption, Consent and Release Agreement of Management Services Agreement, dated August 15, 2008, between Sabine Pass LNG-GP, Inc. and Cheniere LNG Terminals, Inc.
- 10.2 CQP GP Consent and Agreement (Operation and Maintenance Agreement), dated August 15, 2008, among Cheniere LNG O&M Services, LLC, Cheniere Energy Partners GP, LLC and Bank of New York Mellon.
- 10.3 CQP Consent and Agreement (Management and Administrative Services Letter Agreement) among Cheniere LNG Terminals, Inc., Cheniere Energy Partners, L.P. and Bank of New York Mellon.
- 10.4 Sabine Consent and Agreement (Operation and Maintenance Agreement), dated August 15, 2008, among Cheniere Energy Partners GP, LLC, Sabine Pass LNG, L.P. and Bank of New York Mellon.
- 10.5 Sabine Consent and Agreement (Management Services Agreement), dated August 15, 2008, among Cheniere LNG Terminals, Inc., Sabine Pass LNG, L.P. and Bank of New York Mellon.
- 10.6 Form of Amendment to Nonqualified Stock Option Agreement under the Cheniere Energy, Inc. Amended and Restated 1997 Stock Option Plan pursuant to the Nonqualified Stock Option Agreement.
- 10.7 Form of Amendment to Non-Qualified Stock Option Grant under the Cheniere Energy, Inc. Amended and Restated 2003 Stock Incentive Plan, as amended, pursuant to the Nonqualified Stock Option Agreement.
- 10.8 Change Order 10 to Agreement for Engineering, Procurement, Construction and Management of Construction Services for the Sabine Phase 2 Receiving, Storage and Regasification Terminal Expansion, dated July 21, 2006, between Sabine Pass LNG, L.P. and Bechtel Corporation.
- 10.9 Amendment to Agreement, dated September 3, 2008, for modification for transfer of risk of loss and modification of certain other obligations between Owner and Contractor under the Lump Sum Turnkey Agreement for Engineering, Procurement and Construction of the Sabine Pass LNG Receiving, Storage and Regasification Terminal by and between Sabine Pass LNG, L.P. and Bechtel Corporation, dated December 18, 2004.
- 31.1 Certification by Chief Executive Officer required by Rule 13a-14(a) and 15d-14(a) under the Exchange Act
- 31.2 Certification by Chief Financial Officer required by Rule 13a-14(a) and 15d-14(a) under the Exchange Act
- 32.1 Certification by Chief Executive Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002
- 32.2 Certification of Chief Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002
