NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Unaudited

Note 1. Accounting Policies

The interim consolidated financial statements include the accounts of Allegheny Technologies Incorporated and its subsidiaries. Unless the context requires otherwise, Allegheny Technologies, ATI and the Company refer to Allegheny Technologies Incorporated and its subsidiaries.

These unaudited consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and with the instructions for Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and note disclosures required by U.S. generally accepted accounting principles for complete financial statements. In management's opinion, all adjustments (which include only normal recurring adjustments) considered necessary for a fair presentation have been included. These unaudited consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's 2010 Annual Report on Form 10-K. The results of operations for these interim periods are not necessarily indicative of the operating results for any future period. The December 31, 2010 financial information has been derived from the Company's audited financial statements.

New Accounting Pronouncements Adopted

On January 1, 2011, the Company prospectively adopted changes issued by the Financial Accounting Standards Board (FASB) to revenue recognition for multiple-deliverable arrangements. These changes affect the accounting and reporting of revenues related to bundled sales arrangements with customers to provide multiple products and services at different points in time or over different time periods. The adoption of these changes had no impact on the consolidated financial statements.

On January 1, 2011, the Company adopted changes issued by the FASB to disclosure requirements for disaggregated disclosure of fair value measurements using significant unobservable inputs, which are categorized as Level 3 in the fair value hierarchy. These changes had no impact on the September 30, 2011 consolidated financial statements, but will further enhance the fair value disclosures within the December 31, 2011 consolidated financial statements.

Pending Accounting Pronouncements

In June 2011, the FASB issued changes to the presentation of comprehensive income which requires entities to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. Additionally, these changes require an entity to present on the face of the financial statements reclassification adjustments for items that are reclassified from other comprehensive income to net income in the statement(s) where the components of net income and the components of other comprehensive income are presented. The option to present components of other comprehensive income as part of the statement of changes in stockholders' equity, which is the method of presentation used by ATI, will no longer be permitted. Finally, no changes were made to the calculation and presentation of earnings per share. These changes, with retrospective application, become effective for ATI for interim and annual periods in fiscal year 2012, with early adoption allowed. Other than the change in presentation, these changes will not have an impact on the consolidated financial statements.

In September 2011, the FASB issued changes to disclosure requirements for employers who participate in multi-employer pension plans. The new standards require an employer to provide additional quantitative and qualitative disclosures, including disclosure of the significant multiemployer plans in which an employer participates, the level of an employer's participation in the significant multiemployer plans, including the employer's contributions made to the plans and an indication of whether the employer's contributions represent more than 5 percent of the total contributions made to the plan by all contributing employers. Additionally, the financial health of the significant multiemployer plans, including an indication of the funded status, whether funding improvement plans are pending or implemented, and whether the plan has imposed surcharges on the contributions to the plan. Finally, the required disclosures include the nature of the employer commitments to the plan, including when the collective-bargaining agreements that require contributions to the significant plans are set to expire and

Table of Contents

whether those agreements require minimum contributions to be made to the plans. The expanded disclosures will be included in the December 31, 2011 consolidated financial statements.

In September 2011, the FASB issued changes to the testing of goodwill for impairment. The changes are effective for interim and annual periods beginning after December 15, 2011, with early adoption permitted. The changes provide the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not (more than 50%) that the fair value of a reporting unit is less than its carrying amount. If an entity elects to perform a qualitative assessment and determines that an impairment is more likely than not, the entity is then required to perform the existing two-step quantitative impairment test, otherwise no further analysis is required. An entity also may elect not to perform the qualitative assessment and, instead, go directly to the two-step quantitative impairment test.

Note 2. Acquisition of Business

On May 9, 2011, ATI completed the acquisition of Ladish Co., Inc. (Ladish) for \$897.6 million, comprised of the issuance of 7.3 million shares of ATI common stock and payment of \$384 million in cash. ATI Ladish results are included in the High Performance Metals segment from the date of the acquisition. Based in Wisconsin, ATI Ladish engineers, produces and markets high-strength, high technology forged and cast metal components for a wide variety of load-bearing and fatigue-resisting applications in the jet engine, aerospace and industrial markets, for both domestic and international customers. Ladish sales in 2010 were \$403.1 million. Based on the preliminary purchase price allocation, goodwill of \$533.3 million and intangible assets of \$166.0 million were recorded for this transaction. The final allocation of the purchase price is expected to be completed by the end of 2011. Pro forma financial information has not been included because the acquisition did not meet certain significance thresholds.

Note 3. Inventories

Inventories at September 30, 2011 and December 31, 2010 were as follows (in millions):

	September 30, 2011	December 31, 2010
Raw materials and supplies	\$ 231.1	\$ 169.3
Work-in-process	1,181.4	892.8
Finished goods	191.3	126.5
Total inventories at current cost	1,603.8	1,188.6
Less allowances to reduce current cost values to LIFO basis	(159.6)	(163.0)
Progress payments	(9.7)	(1.1)
Total inventories, net	\$ 1,434.5	\$ 1,024.5

Inventories are stated at the lower of cost (last-in, first-out (LIFO), first-in, first-out (FIFO), and average cost methods) or market, less progress payments. Most of the Company's inventory is valued utilizing the LIFO costing methodology. Inventory of the Company's non-U.S. operations is valued using average cost or FIFO methods. The effect of using the LIFO methodology to value inventory, rather than FIFO, decreased cost of sales by \$3.4 million for the first nine months of 2011 compared to an increase of \$40.7 million for the first nine months of 2010.

Table of Contents**Note 4. Property, Plant and Equipment**

Property, plant and equipment at September 30, 2011 and December 31, 2010 was as follows (in millions):

	September 30, 2011	December 31, 2010
Land	\$ 34.1	\$ 25.8
Buildings	719.1	638.2
Equipment and leasehold improvements	3,084.2	2,750.8
	3,837.4	3,414.8

Total property, plant and equipment, net	\$ 2,307.5	\$ 1,989.3

Note 5. Debt

Debt at September 30, 2011 and December 31, 2010 was as follows (in millions):

	September 30, 2011	December 31, 2010
Allegheny Technologies 5.95% Notes due 2021	\$ 500.0	\$
Allegheny Technologies 4.25% Convertible Notes due 2014	402.5	402.5
Allegheny Technologies 9.375% Notes due 2019	350.0	350.0
Allegheny Technologies 8.375% Notes due 2011, net (a)	116.9	117.3
Allegheny Ludlum 6.95% debentures due 2025	150.0	150.0
Ladish Series B 6.14% Notes due 2016 (b)	32.2	
Ladish Series C 6.41% Notes due 2015 (c)	45.1	
Domestic Bank Group \$400 million unsecured credit facility		
Promissory note for J&L asset acquisition		10.2
Foreign credit facilities	25.6	26.3
Industrial revenue bonds, due through 2020, and other	6.0	7.0
Total short-term and long-term debt	1,628.3	1,063.3
Short-term debt and current portion of long-term debt	144.9	141.4
Total long-term debt	\$ 1,483.4	\$ 921.9

(a) Includes fair value adjustments for settled interest rate swap contracts of \$0.2 million at September 30, 2011 and \$0.9 million at December 31, 2010.

(b) Includes fair value adjustments of \$3.6 million at September 30, 2011.

(c) Includes fair value adjustments of \$5.1 million at September 30, 2011.

On January 7, 2011, ATI issued \$500 million of 5.95% Senior Notes due January 15, 2021 (2021 Notes). Interest is payable semi-annually on January 15 and July 15 of each year. The 2021 Notes were issued under ATI's shelf registration statement and are not listed on any national securities exchange. Underwriting fees, discount, and other third-party expenses for the issuance of the 2021 Notes were \$5.0 million and are being amortized to interest expense over the 10-year term of the 2021 Notes. The 2021 Notes are unsecured and unsubordinated obligations of the Company and equally ranked with all of its existing and future senior unsecured debt. The 2021 Notes restrict the Company's ability to create certain liens, to enter into sale leaseback transactions, and to consolidate, merge or transfer all, or substantially all, of its assets. The Company has the option to redeem the 2021 Notes, as a whole or in part, at any time or from time to time, on at least 30 days prior notice to the holders of

Edgar Filing: ALLEGHENY TECHNOLOGIES INC - Form 10-Q

the 2021 Notes at a redemption price specified in the 2021 Notes. On or after October 15, 2020, the Company may redeem the 2021 Notes at its option, at any time in whole or from time to time in part, at a redemption price equal to 100% of the principal amount of the 2021 Notes to be redeemed, plus accrued and unpaid interest. The 2021 Notes are subject to repurchase upon the occurrence of a change in control repurchase event (as defined in the 2021 Notes) at a repurchase price in cash equal to 101% of the aggregate principal amount of the 2021 Notes repurchased, plus any accrued and unpaid interest.

Table of Contents

In conjunction with the Ladish acquisition, the Company assumed the Series B and Series C Notes previously issued by Ladish. The Series B 6.14% Notes are unsecured and have a principal balance of \$28.6 million at September 30, 2011, excluding fair value adjustments. The Series B Notes pay interest semi-annually and mature on May 16, 2016, with the principal amortizing equally in annual payments over the remaining term. The Series C 6.41% Notes are unsecured and have a principal balance of \$40 million at September 30, 2011, excluding fair value adjustments. The Series C Notes pay interest semi-annually and mature on September 2, 2015, with the principal amortizing equally in annual payments over the remaining term. The Series B and Series C Notes contain financial covenants specific to ATI Ladish which (1) limit the incurrence of certain additional debt; (2) require a certain level of consolidated adjusted net worth; (3) require minimum fixed charges coverage ratio; and (4) require a limited amount of funded debt to consolidated cash flow. The covenant on incurrence of additional debt limits funded debt to 60% of total capitalization. ATI Ladish was in compliance with all Series B and Series C covenants at September 30, 2011.

The Company did not borrow funds under its \$400 million senior unsecured domestic credit facility during the first nine months of 2011, although approximately \$7 million has been utilized to support the issuance of letters of credit. The unsecured facility requires the Company to maintain a leverage ratio (consolidated total indebtedness net of cash on hand in excess of \$50 million, divided by consolidated earnings before interest, taxes, depreciation and amortization, and non-cash pension expense) of not greater than 3.25, and maintain an interest coverage ratio (consolidated earnings before interest, taxes, and non-cash pension expense divided by interest expense) of not less than 2.0. For the twelve months ended September 30, 2011, the leverage ratio was 2.05, and the interest coverage ratio was 5.25.

The Company has an additional separate credit facility for the issuance of letters of credit. As of September 30, 2011, \$30 million in letters of credit were outstanding under this facility.

In addition, STAL, the Company's Chinese joint venture company in which ATI has a 60% interest, has a 205 million renminbi (approximately \$32 million at September 30, 2011 exchange rates) revolving credit facility with a group of banks. This credit facility is supported solely by STAL's financial capability without any guarantees from the joint venture partners. As of September 30, 2011, there were no borrowings under this credit facility.

Note 6. Derivative Financial Instruments and Hedging

As part of its risk management strategy, the Company, from time-to-time, utilizes derivative financial instruments to manage its exposure to changes in raw material prices, energy costs, foreign currencies, and interest rates. In accordance with applicable accounting standards, the Company accounts for most of these contracts as hedges. In general, hedge effectiveness is determined by examining the relationship between offsetting changes in fair value or cash flows attributable to the item being hedged, and the financial instrument being used for the hedge. Effectiveness is measured utilizing regression analysis and other techniques to determine whether the change in the fair market value or cash flows of the derivative exceeds the change in fair value or cash flow of the hedged item. Calculated ineffectiveness, if any, is immediately recognized on the statement of income.

The Company sometimes uses futures and swap contracts to manage exposure to changes in prices for forecasted purchases of raw materials, such as nickel and natural gas. Under these contracts, which are generally accounted for as cash flow hedges, the price of the item being hedged is fixed at the time that the contract is entered into and the Company is obligated to make or receive a payment equal to the net change between this fixed price and the market price at the date the contract matures.

The majority of ATI's products are sold utilizing raw material surcharges and index mechanisms. However, as of September 30, 2011, the Company had entered into financial hedging arrangements primarily at the request of its customers, related to firm orders, representing approximately 5% of its annual nickel usage, primarily with settlements in 2011. A minor amount of nickel hedges extend into 2014.

At September 30, 2011, the outstanding financial derivatives used to hedge the Company's exposure to energy cost volatility included natural gas cost hedges for approximately 70% of its annual forecasted domestic requirements through 2011, approximately 50% for 2012, and approximately 10% for 2013, and electricity hedges for Western Pennsylvania operations of approximately 45% of its forecasted on-peak and off-peak requirements for 2011 and approximately 30% for 2012.

While the majority of the Company's direct export sales are transacted in U.S. dollars, foreign currency exchange contracts are used, from time-to-time, to limit transactional exposure to changes in currency exchange

Table of Contents

rates for those transactions denominated in a non-U.S. currency. The Company sometimes purchases foreign currency forward contracts that permit it to sell specified amounts of foreign currencies expected to be received from its export sales for pre-established U.S. dollar amounts at specified dates. The forward contracts are denominated in the same foreign currencies in which export sales are denominated. These contracts are designated as hedges of the variability in cash flows of a portion of the forecasted future export sales transactions which otherwise would expose the Company to foreign currency risk. The Company may also enter into foreign currency forward contracts that are not designated as hedges, which are denominated in the same foreign currency in which export sales are denominated. At September 30, 2011, the outstanding financial derivatives, including both hedges and undesignated derivatives, that are used to manage the Company's exposure to foreign currency, primarily euros, represented approximately 10% of its forecasted total international sales through 2013. In addition, the Company may also designate cash balances held in foreign currencies as hedges of forecasted foreign currency transactions.

The Company may enter into derivative interest rate contracts to maintain a reasonable balance between fixed- and floating-rate debt. There were no unsettled derivative financial instruments related to debt balances for the periods presented, although previously settled contracts remain a component of the recorded value of debt. See Note 5. Debt, for further information.

The fair values of the Company's derivative financial instruments are presented below. All fair values for these derivatives were measured using Level 2 information as defined by the accounting standard hierarchy, which includes quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, and inputs derived principally from or corroborated by observable market data.

(in millions):		September 30, 2011	December 31, 2010
Asset derivatives	Balance sheet location		
Derivatives designated as hedging instruments:			
Foreign exchange contracts	Prepaid expenses and other current assets	\$ 5.0	\$ 10.0

Table of Contents

For derivative financial instruments that are designated as cash flow hedges, the effective portion of the gain or loss on the derivative is reported as a component of other comprehensive income (OCI) and reclassified into earnings in the same period or periods during which the hedged item affects earnings. Gains and losses on the derivative representing either hedge ineffectiveness or hedge components excluded from the assessment of effectiveness are recognized in current period results. The Company did not use fair value or net investment hedges for the periods presented. The effects of derivative instruments in the tables below are presented net of related income taxes.

Activity with regard to derivatives designated as cash flow hedges for the three and nine month periods ended September 30, 2011 and 2010 was as follows (in millions):

Derivatives in Cash Flow Hedging Relationships	0000000		0000000		0000000		0000000	
	Amount of Gain (Loss) Recognized in OCI on Derivatives (Effective Portion) Quarter ended September 30,		Amount of Gain (Loss) Reclassified from Accumulated OCI into Income (Effective Portion) (a) Quarter ended September 30,		Amount of Gain (Loss) Recognized in Income on Derivatives (Ineffective Portion and Amount Excluded from Effectiveness Testing) (b) Quarter ended September 30,			
	2011	2010	2011	2010	2011	2010	2011	2010
Nickel and other raw material contracts	\$ (4.2)	\$ 4.2	\$ (2.5)	\$ 2.5	\$	\$		
Natural gas contracts	(2.6)	(4.2)	(2.7)	(2.4)				
Electricity contracts		(1.3)						
Foreign exchange contracts	11.1	(16.8)	(0.2)	4.2				
Total	\$ 4.3	\$ (18.1)	\$ (5.4)	\$ 4.3	\$	\$		

Derivatives in Cash Flow Hedging Relationships	0000000		0000000		0000000		0000000	
	Amount of Gain (Loss) Recognized in OCI on Derivatives (Effective Portion) Nine Months Ended September 30,		Amount of Gain (Loss) Reclassified from Accumulated OCI into Income (Effective Portion) (a) Nine Months Ended September 30,		Amount of Gain (Loss) Recognized in Income on Derivatives (Ineffective Portion and Amount Excluded from Effectiveness Testing) (b) Nine Months Ended September 30,			
	2011	2010	2011	2010	2011	2010	2011	2010
Nickel and other raw material contracts	\$ (7.2)	\$ 6.2	\$ (0.5)	\$ 9.9	\$	\$		
Natural gas contracts	(4.0)	(11.0)	(8.9)	(7.3)				
Electricity contracts		(1.8)						
Foreign exchange contracts	(2.4)	4.9	(1.3)	10.0				
Total	\$ (13.6)	\$ (1.7)	\$ (10.7)	\$ 12.6	\$	\$		

(a) The gains (losses) reclassified from accumulated OCI into income related to the effective portion of the derivatives are presented in cost of sales.

(b) The gains recognized in income on derivatives related to the ineffective portion and the amount excluded from effectiveness testing are presented in selling and administrative expenses.

Assuming market prices remain constant with those at September 30, 2011, a loss of \$6.5 million is expected to be recognized over the next 12 months.

The disclosures of gains or losses presented above for nickel and other raw material contracts and foreign currency contracts do not take into account the anticipated underlying transactions. Since these derivative contracts represent hedges, the net effect of any gain or loss on results of operations may be fully or partially offset.

Table of Contents

Derivatives that are not designated as hedging instruments were as follows:

<i>In millions</i>	Amount of Gain (Loss) Recognized in Income on Derivatives			
	Three Months Ended September 30, 2011		Nine Months Ended September 30, 2011	
Derivatives Not Designated as Hedging Instruments				
Foreign exchange contracts	\$ 2.2	\$ (2.8)	\$ (1.3)	\$ 1.9

Changes in the fair value of foreign exchange contract derivatives not designated as hedging instruments are recorded in cost of sales.

There are no credit risk-related contingent features in the Company's derivative contracts, and the contracts contained no provisions under which the Company has posted, or would be required to post, collateral. The counterparties to the Company's derivative contracts were substantial and creditworthy commercial banks that are recognized market makers. The Company controls its credit exposure by diversifying across multiple counterparties and by monitoring credit ratings and credit default swap spreads of its counterparties. The Company also enters into master netting agreements with counterparties when possible.

Note 7. Fair Value of Financial Instruments

The estimated fair value of financial instruments at September 30, 2011 was as follows:

<i>(In millions)</i>	Total Carrying Amount	Total Estimated Fair Value	Fair Value Measurements at Reporting Date Using	
			Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)
Cash and cash equivalents	\$ 431.5	\$ 431.5	\$ 431.5	\$
Derivative financial instruments:				
Assets	8.8	8.8		8.8
Liabilities	17.3	17.3		17.3
Debt (a)	1,628.3	1,823.8	1,714.9	108.9

The estimated fair value of financial instruments at December 31, 2010 was as follows:

<i>(In millions)</i>	Total Carrying Amount	Total Estimated Fair Value	Fair Value Measurements at Reporting Date Using	
			Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)
Cash and cash equivalents	\$ 432.3	\$ 432.3	\$ 432.3	\$
Derivative financial instruments:				
Assets	20.1	20.1		20.1
Liabilities	21.9	21.9		21.9
Debt (a)	1,063.3	1,328.4	1,284.9	43.5

- (a) Includes fair value adjustments for settled interest rate swap contracts of \$0.2 million at September 30, 2011, and \$0.9 million at December 31, 2010.

In accordance with accounting standards, fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants at the measurement date. Accounting standards

Table of Contents

established three levels of a fair value hierarchy that prioritizes the inputs used to measure fair value. This hierarchy requires entities to maximize the use of observable inputs and minimize the use of unobservable inputs. The three levels of inputs used to measure fair value are as follows:

Level 1 Quoted prices in active markets for identical assets or liabilities.

Level 2 Observable inputs other than quoted prices included in Level 1, such as quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets and liabilities in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets and liabilities. This includes certain pricing models, discounted cash flow methodologies and similar techniques that use significant unobservable inputs.

The following methods and assumptions were used by the Company in estimating the fair value of its financial instruments:

Cash and cash equivalents: Fair value was determined using Level 1 information.

Derivative financial instruments: Fair values for derivatives were measured using exchange-traded prices for the hedged items. The fair value was determined using Level 2 information, including consideration of counterparty risk and the Company's credit risk.

Short-term and long-term debt: The fair values of the Company's publicly traded debt were based on Level 1 information. The fair values of the other short-term and long-term debt were determined using Level 2 information.

Note 8. Pension Plans and Other Postretirement Benefits

The Company has defined benefit pension plans and defined contribution plans covering substantially all employees. Benefits under the defined benefit pension plans are generally based on years of service and/or final average pay. The Company funds the U.S. pension plans in accordance with the Employee Retirement Income Security Act of 1974, as amended, and the Internal Revenue Code.

The Company also sponsors several postretirement plans covering certain salaried and hourly employees. The plans provide health care and life insurance benefits for eligible retirees. In most plans, Company contributions towards premiums are capped based on the cost as of a certain date, thereby creating a defined contribution. For the non-collectively bargained plans, the Company maintains the right to amend or terminate the plans at its discretion.

For the three month periods ended September 30, 2011 and 2010, the components of pension expense and components of other postretirement benefit expense for the Company's defined benefit plans included the following (in millions):

	Pension Benefits		Other Postretirement Benefits	
	Three Months Ended September 30,		Three Months Ended September 30,	
	2011	2010	2011	2010
Service cost - benefits earned during the year	\$ 7.6	\$ 7.6	\$ 0.9	\$ 0.8
Interest cost on benefits earned in prior years	34.6	32.9	6.9	7.2
Expected return on plan assets	(49.1)	(45.4)	(0.2)	(0.3)
Amortization of prior service cost (credit)	2.8	3.4	(4.6)	(4.5)
Amortization of net actuarial loss	17.8	19.3	2.5	1.5
Total retirement benefit expense	\$ 13.7	\$ 17.8	\$ 5.5	\$ 4.7

For the nine month periods ended September 30, 2011 and 2010, the components of pension expense and components of other postretirement benefit expense for the Company's defined benefit plans included the following (in millions):

Table of Contents

	Pension Benefits		Other Postretirement Benefits	
	Nine Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	2011	2010
Service cost benefits earned during the year	\$ 22.5	\$ 22.7	\$ 2.3	\$ 2.3
Interest cost on benefits earned in prior years	100.4	98.9	20.8	21.6
Expected return on plan assets	(142.9)	(136.2)	(0.8)	(1.0)
Amortization of prior service cost (credit)	8.4	10.1	(13.8)	(13.5)
Amortization of net actuarial loss	53.5	58.0	7.5	4.5
Total retirement benefit expense	\$ 41.9	\$ 53.5	\$ 16.0	\$ 13.9

Note 9. Income Taxes

Third quarter 2011 results included a provision for income taxes of \$31.2 million, or 32.7% of income before tax, compared to \$6.2 million for the comparable 2010 period.

For the first nine months of 2011, the provision for income taxes was \$100.6 million, or 34.7% of income before tax, compared to \$41.8 million, or 40.5% of income before tax, for the first nine months of 2010. The first nine months of 2011 included a discrete tax charge of \$2.7 million primarily related to foreign income taxes. The first nine months 2010 included a non-recurring tax charge of \$5.3 million recognized in the first quarter associated with the impact of the Patient Protection and Affordable Care Act and a \$3.9 million charge recognized in the third quarter related to the Small Business Jobs and Credit Act.

In conjunction with the Ladish acquisition, ATI assumed certain liabilities related to uncertain tax positions previously adopted by Ladish. These assumed liabilities were valued at approximately \$14.9 million, including interest and penalties of \$2.2 million.

Table of Contents**Note 10. Business Segments**

Following is certain financial information with respect to the Company's business segments for the periods indicated (in millions):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	2011	2010
Total sales:				
High Performance Metals	\$ 557.9	\$ 362.3	\$ 1,515.6	\$ 1,035.8
Flat-Rolled Products	697.0	626.3	2,151.8	1,767.6
Engineered Products	139.2	104.9	406.3	300.9
	1,394.1	1,093.5	4,073.7	3,104.3
Intersegment sales:				
High Performance Metals	23.2	17.9	84.3	47.3
Flat-Rolled Products	7.4	7.1	24.3	16.5
Engineered Products	10.9	9.7	33.5	30.3
	41.5	34.7	142.1	94.1
Sales to external customers:				
High Performance Metals	534.7	344.4	1,431.3	988.5
Flat-Rolled Products	689.6	619.2	2,127.5	1,751.1
Engineered Products	128.3	95.2	372.8	270.6
	\$ 1,352.6	\$ 1,058.8	\$ 3,931.6	\$ 3,010.2
Operating profit (loss):				
High Performance Metals	\$ 95.7	\$ 72.0	\$ 274.2	\$ 194.3
Flat-Rolled Products	58.8	(11.8)	195.9	61.7
Engineered Products	7.3	2.8	27.5	12.5
Total operating profit	161.8	63.0	497.6	268.5
Corporate expenses	(20.9)	(13.4)	(72.5)	(40.7)
Interest expense, net	(23.4)	(16.4)	(70.1)	(46.4)
Other expense, net of gains on asset sales	(2.9)	(1.2)	(7.6)	(10.9)
Retirement benefit expense	(19.2)	(22.5)	(57.9)	(67.4)
Income before income taxes	\$ 95.4	\$ 9.5	\$ 289.5	\$ 103.1

The operating results of ATI Ladish are included in the High Performance Metals segment from the May 9, 2011 acquisition date. Assets in the High Performance Metals segment, including goodwill and identifiable intangible assets, increased by approximately \$1.2 billion as a result of the Ladish acquisition.

Retirement benefit expense represents defined benefit plan pension expense, and other postretirement benefit expense for both defined benefit and defined contribution plans. Operating profit with respect to the Company's business segments excludes any retirement benefit expense.

Corporate expenses for the three months ended September 30, 2011 were \$20.9 million compared to \$13.4 million for the three months ended September 30, 2010. The increase in corporate expenses was primarily related to higher incentive compensation expenses associated with long-term performance plans.

Other expense, net of gains on asset sales, primarily includes charges incurred in connection with closed operations and other non-operating income or expense. These items are presented primarily in selling and administrative expenses and in other expense in the statement of operations. These items resulted in net charges of \$2.9 million for the three months ended September 30, 2011 and \$1.2 million for the three

Edgar Filing: ALLEGHENY TECHNOLOGIES INC - Form 10-Q

months ended September 30, 2010. This increase was primarily related to greater environmental and other expenses at closed operations.

Table of Contents**Note 11. Per Share Information**

The following table sets forth the computation of basic and diluted net income per common share

(in millions, except per share amounts):	Three Months Ended		Nine Months Ended	
	September 30, 2011	2010	September 30, 2011	2010
Numerator for basic net income per common share - Net income attributable to ATI	\$ 62.3	\$ 1.0	\$ 182.6	\$ 55.6
Effect of dilutive securities:				
4.25% Convertible Notes due 2014	2.5		7.5	
Numerator for diluted net income per common share - Net income available to ATI after assumed conversions	\$ 64.8	\$ 1.0	\$ 190.1	\$ 55.6
Denominator for basic net income per common share-weighted average shares	105.1	97.5	101.6	97.4
Effect of dilutive securities:				
Share-based compensation	1.7	1.1	1.7	1.3
4.25% Convertible Notes due 2014	9.6		9.6	
Denominator for diluted net income per common share adjusted weighted average shares assuming conversions	116.4	98.6	112.9	98.7
Basic net income attributable to ATI per common share	\$ 0.59	\$ 0.01	\$ 1.80	\$ 0.57
Diluted net income attributable to ATI per common share	\$ 0.56	\$ 0.01	\$ 1.68	\$ 0.56

Common stock that would be issuable upon the assumed conversion of the 2014 Convertible Notes and other option equivalents and contingently issuable shares were excluded from the computation of contingently issuable shares, and therefore, from the denominator for diluted earnings per share, if the effect of inclusion would have been anti-dilutive. Excluded shares for the three and nine month periods ended September 30, 2010 were 9.6 million for both periods.

The Company issued 7.3 million shares of common stock as part of the Ladish acquisition consideration completed on May 9, 2011. Weighted average shares included 7.3 million and 3.9 million shares for the three and nine months ended September 30, 2011, respectively, as a result of the acquisition.

Note 12. Financial Information for Subsidiary and Guarantor Parent

The payment obligations under the \$150 million 6.95% debentures due 2025 issued by Allegheny Ludlum Corporation (the **Subsidiary**) are fully and unconditionally guaranteed by Allegheny Technologies Incorporated (the **Guarantor Parent**). In accordance with positions established by the Securities and Exchange Commission, the following financial information sets forth separately financial information with respect to the Subsidiary, the non-guarantor subsidiaries and the Guarantor Parent. The principal elimination entries eliminate investments in subsidiaries and certain intercompany balances and transactions. Investments in subsidiaries, which are eliminated in consolidation, are included in other assets on the balance sheets.

Allegheny Technologies is the plan sponsor for the U.S. qualified defined benefit pension plan (the **Plan**) which covers certain current and former employees of the Subsidiary and the non-guarantor subsidiaries. As a result, the balance sheets presented for the Subsidiary and the non-guarantor subsidiaries do not include any Plan assets or liabilities, or the related deferred taxes. The Plan assets, liabilities and related deferred taxes and pension income or expense are recognized by the Guarantor Parent. Management and royalty fees charged to the Subsidiary and to the non-guarantor subsidiaries by the Guarantor Parent have been excluded solely for purposes of this presentation.

Cash flows related to intercompany activity between the Guarantor Parent, the Subsidiary, and the non-guarantor subsidiaries are presented as financing activities on the condensed statements of cash flows.

Note 13. Commitments and Contingencies

The Company is subject to various domestic and international environmental laws and regulations that govern the discharge of pollutants and disposal of wastes, and which may require that it investigate and remediate the effects of the release or disposal of materials at sites associated with past and present operations. The Company could incur substantial cleanup costs, fines, and civil or criminal sanctions, third party property damage or personal injury claims as a result of violations or liabilities under these laws or noncompliance with environmental permits required at its facilities. The Company is currently involved in the investigation and remediation of a number of its current and former sites, as well as third party sites.

Environmental liabilities are recorded when the Company's liability is probable and the costs are reasonably estimable. In many cases, however, the Company is not able to determine whether it is liable or, if liability is probable, to reasonably estimate the loss or range of loss. Estimates of

Edgar Filing: ALLEGHENY TECHNOLOGIES INC - Form 10-Q

the Company's liability remain subject to additional uncertainties, including the nature and extent of site contamination, available remediation alternatives, the extent of corrective actions that may be required, and the number, participation, and financial condition of other

Table of Contents

potentially responsible parties (PRPs). The Company expects that it will adjust its accruals to reflect new information as appropriate. Future adjustments could have a material adverse effect on the Company's results of operations in a given period, but the Company cannot reliably predict the amounts of such future adjustments.

Based on currently available information, the Company does not believe that there is a reasonable possibility that a loss exceeding the amount already accrued for any of the sites with which the Company is currently associated (either individually or in the aggregate) will be an amount that would be material to a decision to buy or sell the Company's securities. Future developments, administrative actions or liabilities relating to environmental matters, however, could have a material adverse effect on the Company's financial condition or results of operations.

At September 30, 2011, the Company's reserves for environmental remediation obligations totaled approximately \$15 million, of which \$7 million was included in other current liabilities. The reserve includes estimated probable future costs of \$6 million for federal Superfund and comparable state-managed sites; \$6 million for formerly owned or operated sites for which the Company has remediation or indemnification obligations; \$2 million for owned or controlled sites at which Company operations have been discontinued; and \$1 million for sites utilized by the Company in its ongoing operations. The Company continues to evaluate whether it may be able to recover a portion of past and future costs for environmental liabilities from third parties and to pursue such recoveries where appropriate.

The timing of expenditures depends on a number of factors that vary by site. The Company expects that it will expend present accruals over many years and that remediation of all sites with which it has been identified will be completed within thirty years.

See Note 16. Commitments and Contingencies to the Company's consolidated financial statements in the Company's Annual Report on Form 10-K for its fiscal year ended December 31, 2010 for a discussion of legal proceedings affecting the Company.

A number of other lawsuits, claims and proceedings have been or may be asserted against the Company relating to the conduct of its currently and formerly owned businesses, including those pertaining to product liability, patent infringement, commercial, government contract work, employment, employee benefits, taxes, environmental, health and safety, occupational disease, and stockholder matters. While the outcome of litigation cannot be predicted with certainty, and some of these lawsuits, claims or proceedings may be determined adversely to the Company, management does not believe that the disposition of any such pending matters is likely to have a material adverse effect on the Company's financial condition or liquidity, although the resolution in any reporting period of one or more of these matters could have a material adverse effect on the Company's results of operations for that period.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

Allegheny Technologies is one of the largest and most diversified specialty metals producers in the world. We use innovative technologies to offer global markets a wide range of specialty metals solutions. Our products include titanium and titanium alloys, nickel-based alloys and superalloys, zirconium, hafnium, and niobium, advanced powder alloys, stainless and specialty steel alloys, grain-oriented electrical steel, tungsten-based materials and cutting tools, forgings, castings, and fabrication and machining capabilities. Our specialty metals are produced in a wide range of alloys and product forms and are selected for use in applications that demand metals having exceptional hardness, toughness, strength, resistance to heat, corrosion or abrasion, or a combination of these characteristics. The acquisition of Ladish Co., Inc. (now ATI Ladish) on May 9, 2011 added advanced forgings, titanium investment castings and precision finishing capabilities to ATI's product portfolio. Results for ATI Ladish, which principally serves the aerospace & defense market, are included in the High Performance Metals segment from the acquisition date. ATI is a fully integrated supplier, from raw material (for titanium) and melt (for other specialty alloy systems) through highly engineered finished components.

Sales for the third quarter 2011 increased 28% to \$1.35 billion, compared to the third quarter 2010, primarily as a result of higher shipments for most high-value products, higher raw material surcharges and increases in average base selling prices for many products. Compared to the third quarter 2010, sales increased 55% in the High Performance Metals segment, 11% in the Flat-Rolled Products segment and 35% in the Engineered Products segment. Compared to the second quarter 2011, total sales were flat, as an 8% increase in the High Performance Metals segment offset a 5% decrease in the Flat-Rolled Products segment. For the nine months of 2011, sales were

Table of Contents

\$3.9 billion, 31% higher than the prior year to date period.

Demand from the global aerospace and defense, electrical energy, oil and gas, chemical process industry, and medical markets grew 36% compared to the first nine months of 2010, and accounted for 70% of our sales for the first nine months of 2011. Sales to the aerospace and defense market grew 46% and represented 28% of sales, as the acquisition ATI Ladish augmented organic growth. Sales to the oil and gas/chemical process industry grew 47% and represented 22% of sales. Sales to the electrical energy and medical markets grew 15% and 16%, respectively, for the first nine months of 2011.

Comparative information for our overall revenues (in millions) by market and their respective percentages of total revenues for the three and nine month periods ended September 30, 2011 and 2010 were as follows:

Market	Three Months Ended		Three Months Ended	
	September 30, 2011		September 30, 2010	
Aerospace & Defense	\$ 415.2	31%	\$ 272.0	26%
Oil & Gas/Chemical Process Industry	284.0	21%	207.9	20%

Automotive	\$ 302.6	8%	\$ 239.2	8%
Construction/Mining	241.2	6%	208.2	7%
Food Equipment & Appliances	172.1	4%	202.6	7%
Transportation	161.7	4%	118.7	4%
Electronics/Computers/Communication	120.6	3%	87.6	3%
Machine & Cutting Tools	106.8	3%	73.4	2%
Conversion Services & Other	55.2	2%	43.2	1%
Total	\$ 3,931.6	100%	\$ 3,010.2	100%

For the first nine months of 2011, direct international sales increased \$381.7 million, or 40%, and represented 34% of total sales. Sales of our high-value products (titanium and titanium alloys, nickel-based alloys and specialty alloys, exotic alloys, precision forgings and castings, grain-oriented electrical steel, precision and engineered strip, and tungsten materials) represented 70% of total sales.

Total titanium mill product shipments for the first nine months of 2011, including ATI-produced products for our Uniti titanium joint venture, were 36 million pounds, a 22% increase compared to the same 2010 period.

Table of Contents

Titanium shipments in our High Performance Metals segment benefited from a more value-added product mix to the aerospace and medical markets. Titanium shipments in our Flat-Rolled Products segment, including Uniti joint venture conversion were 15 million pounds year-to-date, 57% higher than the comparable 2010 period, as a result of strong demand from the oil and gas/chemical process industry and electrical energy markets.

Segment operating profit for the third quarter 2011 increased 157% compared to the third quarter 2010, to \$161.8 million, or 12.0% of sales, compared to \$63.0 million, or 6.0% of sales. While operating profit improved in all business segments, results for the third quarter 2011 in the High Performance Metals segment were impacted by \$12.5 million of inventory fair value adjustments from the acquisition of ATI Ladish, and \$6.2 million of idle facility and start-up and qualification costs associated with our titanium sponge operations. The start-up and qualification costs at our Rowley, UT premium-titanium sponge facility were \$3.3 million, a 50% reduction compared to the second quarter of 2011. We continue to make good progress at the Rowley facility as we ramp production. We are well into the standard grade qualification program at the Rowley facility and expect start-up and qualification costs to decline further in the fourth quarter. We remain on track to complete the standard qualification process by the end of the first quarter 2012. Idle facility costs relate mostly to our Albany, OR titanium sponge facility, which is positioned to be back in production when warranted by market conditions. Third quarter 2010 results were impacted by idle facility, start-up and additional equipment maintenance costs of \$27.0 million. In addition, the third quarter 2011 operating profit included a pretax \$12.5 million favorable net LIFO inventory valuation adjustment resulting from raw material changes which benefited the Flat-Rolled Products segment but negatively affected the High Performance Metals and Engineered Products segments. The third quarter 2010 included LIFO inventory valuation reserve charges of \$35.2 million. The third quarter 2011 results included \$28.9 million in gross cost reductions, before the effects of inflation, bringing gross cost reductions for the year to \$87.5 million.

Segment operating profit for the nine months ended September 2011 was \$497.6 million, or 12.7% of sales, and included \$25.7 million of inventory fair value adjustments associated with the Ladish transaction, compared to \$268.5 million, or 8.9% of sales for the nine months ended September 2010. Operating profit for the nine months ended September 2011 improved across all three business segments. For the September 2011 year-to-date period, the net LIFO inventory valuation benefit was \$3.4 million, pretax, compared to a LIFO inventory valuation reserve charge of \$40.7 million for the comparable 2010 period.

Segment operating profit (loss) as a percentage of sales for the three and nine month periods ended September 30, 2011 and 2010 was:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	2011	2010
High Performance Metals	17.9%	20.9%	19.2%	19.7%
Flat-Rolled Products	8.5%	(1.9%)	9.2%	3.5%
Engineered Products	5.7%	2.9%	7.4%	4.6%

Our measure of segment operating profit, which we use to analyze the performance and results of our business segments, excludes income taxes, corporate expenses, net interest income or expense, retirement benefit expense, and other costs net of gains on asset sales. We believe segment operating profit, as defined, provides an appropriate measure of controllable operating results at the business segment level.

Income before tax for the third quarter 2011 was \$95.4 million, or 7.1% of sales, compared to \$9.5 million, or 0.9% of sales for the third quarter 2010. Income before tax for the third quarter 2011 included ATI Ladish acquisition costs of \$12.6 million, primarily related to inventory fair value adjustments. Third quarter 2011 results also included higher interest costs as a result of the January 7, 2011 issuance of \$500 million, 5.95% Notes due 2021, and debt assumed in the ATI Ladish acquisition. 2011 third quarter results benefited from decreased retirement benefit expenses of \$3.3 million primarily due to higher than expected returns on pension plan assets in 2010 and the benefits resulting from our voluntary pension contributions over the past several years. Income before tax for the nine months ended September 2011 was \$289.5 million, or 7.4% of sales, compared to \$103.1 million, or 3.4% of sales for the comparable 2010 period.

Net income attributable to ATI for the third quarter 2011 was \$62.3 million, or \$0.56 per share, compared to \$1.0 million, or \$0.01 per share for the third quarter 2010. Expenses related to the acquisition of ATI Ladish were

Table of Contents

\$8.3 million, net of tax, or \$0.07 per share in the 2011 third quarter, primarily related to inventory fair value adjustments. Third quarter 2010 results included a tax charge of \$0.04 per share. For the nine months ended September 30, 2011, net income attributable to ATI was \$182.6 million, or \$1.68 per share, compared to \$55.6 million, or \$0.56 per share for the first nine months of 2010. Year to date 2011 results included \$26.8 million of expenses and charges due to ATI Ladish acquisition-related expenses of \$21.0 million, accelerated recognition of equity-based compensation expense due to executive retirements, and a discrete tax charge primarily related to foreign taxes. Excluding these acquisition expenses and special charges, net income attributable to ATI for the first nine months 2011 was \$209.4 million, or \$1.92 per share. Results for the first nine months 2010 included non-recurring tax charges of \$9.2 million related to the Patient Protection and Affordable Care Act and the Small Business Jobs and Credit Act. Excluding these tax charges, net income attributable to ATI for the first nine months 2010 was \$64.8 million, or \$0.66 per share.

At September 30, 2011, we had cash on hand of \$431.5 million, an increase of \$63.7 million in the quarter and a decrease of \$0.8 million from year-end 2010. Cash flow provided by operations for the first nine months of 2011 was \$107.5 million. Increased profitability was partially offset by an investment of \$390.3 million in managed working capital to a higher level of business. Net debt to total capitalization was 30.3% and total debt to total capitalization was 37.2% at September 30, 2011. At December 31, 2010, net debt to total capitalization was 23.6% and total debt to total capitalization was 34.3%.

High Performance Metals segment backlog grew to over \$1.4 billion at the end of the third quarter 2011, compared to \$650 million at the end of 2010, reflecting growing global markets and ATI Ladish business, and total ATI backlog was \$2.2 billion, both high by any historical comparison. Demand remains strong from Asian markets, and we expect record sales to Asia in 2011 with year-to-date orders running 70% ahead of the same period in 2010. Much of this demand is from the oil and gas/chemical process industry and electrical energy markets.

Our focus is to continue to deliver quality growth in the future. Over the next three to five years, demand drivers are expected to remain positive in our key global markets of aerospace, oil and gas/chemical process industry, electrical energy, and medical. However, concerns about U.S. and European economies and continued high unemployment levels appear to be negatively impacting short-term consumer and business confidence. This is clearly evident in the more short-cycle GDP-sensitive markets for products like our standard stainless sheet and plate. Demand for our standard stainless products is also negatively impacted by rapidly falling raw material surcharges resulting in customers delaying purchases and managing inventory levels. In addition, these same factors appear to be influencing short-term demand for some of our high-value products from some of our key end markets as many customers are being cautious and keeping inventories lean as we approach year end.

As a result of these conditions, we now expect 2011 revenues of approximately \$5.2 billion and segment operating profit as a percent of revenues in the range of the nine months year-to-date level.

Although caution exists in the short term, the intermediate and long-term secular growth trends in our key global markets remain in place. We expect demand to be strong in 2012 for our titanium-based alloy, nickel-based alloy and superalloy, and specialty alloy mill products and our highly engineered forgings and castings from the aerospace market. Commercial airframe OEMs have record backlogs and have announced unprecedented production rate ramps through 2014. In addition, ATI benefits from the secular shift to new titanium-intensive airframes, new energy efficient engines, and an expanding aftermarket. Strong growth in demand for many of our products is expected to continue in 2012 from the oil and gas/chemical process industry. Global demand is also expected to grow considerably from the electrical energy market driven by increased need for natural gas turbines, nuclear applications, alternative energy applications, and the building and rebuilding of transmission infrastructure. Medical market demand for our titanium, zirconium, specialty, and niobium alloys is expected to continue to grow significantly. In addition, we expect business conditions to improve in 2012 for our standard stainless products as inventory levels appear in line and we expect end-market demand to recover.

Business Segment Results

We operate in three business segments: High Performance Metals, Flat-Rolled Products, and Engineered Products. These segments represented the following percentages of our total revenues and segment operating profit for the first nine months of 2011 and 2010:

Table of Contents

	2011		2010	
	Revenue	Operating Profit	Revenue	Operating Profit
High Performance Metals	36%	55%	33%	72%
Flat-Rolled Products	54%	39%	58%	23%
Engineered Products	10%	6%	9%	5%

High Performance Metals Segment

Third quarter 2011 sales increased 55% to \$534.7 million compared to third quarter 2010. Mill product shipments increased 29% for nickel-based and specialty alloys, and 4% for titanium and titanium alloys primarily due to higher demand from the commercial aerospace market. Exotic alloys shipments decreased 17% primarily due to lower project-based demand in the chemical process industry. The 2011 third quarter benefited from the inclusion of a full quarter of ATI Ladish results. Average mill products selling prices increased 12% for titanium and titanium alloys, and 9% for nickel-based and specialty alloys primarily due to a favorable product mix, higher raw material indices and improving base prices. Average selling prices for exotic alloys increased 22% primarily due to a favorable mix.

Comparative information for our High Performance Metals revenues (in millions) by market and their respective percentages of the segment's overall revenues for the three month periods ended September 30, 2011 and 2010 is as follows:

Market	Three Months Ended September 30, 2011		Three Months Ended September 30, 2010	
Aerospace:				
Jet Engines	\$ 186.1	35%	\$ 97.7	28%
Airframes	80.8	15%	75.7	22%
Government	61.9	12%	29.4	9%
Total Aerospace	\$ 328.8	62%	\$ 202.8	59%
Defense	\$ 26.3	5%	\$ 29.4	8%
Oil & Gas/Chemical Process Industry	35.5	7%	41.7	12%
Electrical Energy	47.3	9%	22.4	7%
Medical	47.0	9%	45.9	13%
Construction/Mining	12.7	2%	0.4	0%
Other	37.1	6%	1.8	1%
Total	\$ 534.7	100%	\$ 344.4	100%

Segment operating profit in the 2011 third quarter increased to \$95.7 million, or 17.9% of sales, compared to 72.0 million, or 20.9% of sales, for the third quarter 2010. Segment operating profit included \$12.5 million of purchase accounting inventory charges, which are not expected to be significant beyond the third quarter 2011. Excluding these charges, segment operating profit was 20.2% of segment sales. The increase in operating profit primarily resulted from higher shipment volumes, improved product pricing, and the benefits of gross cost reductions. Third quarter 2011 operating profit was impacted by \$9.0 million of idle facility, start-up and qualification costs associated with our titanium sponge operations and by costs associated with a temporary production outage at our Sheffield, UK operation. The third quarter 2010 included \$12 million of start-up and idle facility costs associated with our titanium sponge operations and \$7 million related to a two-week shutdown at our zirconium facilities. In addition, third quarter 2011 segment operating profit included a LIFO inventory valuation reserve charge of \$4.2 million, compared to a \$4.9 million LIFO inventory valuation reserve benefit for the third quarter 2010. Results benefited from \$12.7 million in gross cost reductions in the third quarter 2011.

Certain comparative information on the segment's mill products for the three months ended September 30, 2011 and 2010 is provided in the following table. Mill products volume and average price information includes shipments to ATI Ladish for all periods presented.

Table of Contents

	Three Months Ended		% Change
	September 30, 2011	2010	
Mill Products Volume (000 s pounds):			
Titanium	6,773	6,515	4%
Nickel-based and specialty alloys	11,448	8,858	29%
Exotic alloys	976	1,181	(17%)
Mill Products Average Prices (per pound):			
Titanium	\$ 22.13	\$ 19.71	12%
Nickel-based and specialty alloys	\$ 16.40	\$ 15.09	9%
Exotic alloys	\$ 70.77	\$ 58.18	22%

For the nine months ended September 30, 2011, segment sales increased 36% to \$1.43 billion. Mill products shipments increased 5% for titanium and titanium alloys and 34% for nickel-based and specialty alloys primarily due to improved demand from the commercial aerospace market. Shipments of exotic alloys decreased 8% primarily due to the timing of projects for the chemical process industry. Average mill products selling prices increased 13% for titanium and titanium alloys and 12% for nickel-based and specialty alloys primarily due to a favorable product mix, higher raw material indices and improved base selling prices. Average selling prices for exotic alloys increased 11% due to a favorable product mix.

Comparative information for our High Performance Metals revenues (in millions) by market and their respective percentages of the segment's overall revenues for the nine month periods ended September 30, 2011 and 2010 is as follows:

Market	Nine Months Ended		Nine Months Ended	
	September 30, 2011		September 30, 2010	
Aerospace:				
Jet Engines	\$ 486.1	34%	\$ 282.4	29%
Airframes	229.0	16%	217.3	22%
Government	138.1	10%	85.2	8%
Total Aerospace	\$ 853.2	60%	\$ 584.9	59%
Defense	\$ 73.6	5%	\$ 69.6	7%
Oil & Gas/Chemical Process Industry	130.6	9%	106.2	11%
Electrical Energy	122.4	9%	70.4	7%
Medical	140.9	10%	106.3	11%
Construction/Mining	21.8	1%	0.7	0%
Other	88.8	6%	50.4	5%
Total	\$ 1,431.3	100%	\$ 988.5	100%

Segment operating profit for the first nine months of 2011 increased to \$274.2 million, or 19.2% of sales, compared to \$194.3 million, or 19.7% of sales, for the comparable 2010 period. The increase in operating profit primarily resulted from higher shipment volumes, improved product pricing, and the benefits of gross cost reductions. Operating profit for the first nine months of 2011 was adversely affected by approximately \$25.5 million of idle facility and start-up costs associated with our titanium sponge operations and ATI Ladish acquisition related expenses of \$25.7 million. Operating profit for the first nine months of 2011 included a \$12.6 million LIFO inventory valuation reserve charge, compared to \$2.8 million of LIFO inventory valuation reserve benefit in the first nine months of 2010.

Certain comparative information on the segment's mill products for the nine months ended September 30, 2011 and 2010 is provided in the following table. Mill products volume and average price information includes shipments to ATI Ladish for all periods presented.

Table of Contents

	Nine Months Ended September 30,		%
	2011	2010	
Mill Products Volume (000 s pounds):			
Titanium	20,830	19,750	5%
Nickel-based and specialty alloys	36,061	26,819	34%
Exotic alloys	3,046	3,305	(8%)
Mill Products Average Prices (per pound):			
Titanium	\$ 21.49	\$ 19.01	13%
Nickel-based and specialty alloys	\$ 15.63	\$ 13.96	12%
Exotic alloys	\$ 66.06	\$ 59.78	11%

Flat-Rolled Products Segment

Third quarter 2011 sales increased to \$689.6 million, 11.4% higher than the third quarter 2010, primarily due to improved base-selling prices for most high value products. Shipments of high value products increased 8% while shipments of standard stainless products (sheet and plate) decreased 12%. Demand was strong for high-value products from the oil and gas/chemical process industry and aerospace markets and improved from the global automotive market. Third quarter Flat-Rolled Products segment titanium shipments, including Uniti joint venture conversion, were a record 5.3 million pounds, a 39% increase compared to the third quarter 2010. Demand declined for our standard stainless sheet and plate products due to the challenging economic environment impacting more short-term GDP sensitive markets in both the U.S. and Europe. Demand for our standard stainless sheet and plate products was also negatively impacted by rapidly falling raw material surcharges resulting in customers delaying purchases and managing inventory levels. Average transaction prices for all products, which include surcharges, were 15% higher due to increased raw material surcharges for all products and improved base prices for most high value products due to strengthening market conditions.

Comparative information for our Flat-Rolled Products revenues (in millions) by market and their respective percentages of the segment's overall revenues for the three month periods ended September 30, 2011 and 2010 is as follows:

Market	Three Months Ended September 30, 2011		Three Months Ended September 30, 2010	
	\$	%	\$	%
Oil & Gas/Chemical Process Industry	\$ 214.4	31%	\$ 140.9	23%
Electrical Energy	149.7	22%	141.0	23%
Automotive	68.4	10%	77.8	13%
Food Equipment & Appliances	52.3	8%	79.3	13%
Construction/Mining	53.4	8%	64.8	10%
Aerospace & Defense	49.4	7%	32.8	5%
Electronics/Computers/Communication	40.0	6%	29.4	5%
Transportation	31.8	5%	29.6	5%
Medical	15.4	2%	12.0	2%
Other	14.8	1%	11.6	1%
Total	\$ 689.6	100%	\$ 619.2	100%

Segment operating profit for the third quarter 2011 improved to \$58.8 million, or 8.5% of sales, compared to a segment operating loss of \$11.8 million for the third quarter 2010 as a result of the increase in sales and a better matching of raw material costs and surcharges. Third quarter 2011 also included a LIFO inventory valuation reserve benefit of \$24.0 million due primarily to declining nickel prices. The third quarter 2010 included a LIFO inventory valuation reserve charge of \$38.9 million, mainly due to significant increases of nickel prices in the prior year quarter. Segment results for the third quarter 2011 benefited from \$11.5 million in gross cost reductions.

Comparative information on the segment's products for the three months ended September 30, 2011 and 2010 is provided in the following table:

Table of Contents

	Three Months Ended September 30,		%
	2011	2010	
Volume (000 s pounds):			
High value	122,504	113,738	8%
Standard	145,901	166,293	(12)%
Total	268,405	280,031	(4)%
Average prices (per lb.):			
High value	\$ 3.45	\$ 2.98	16%
Standard	\$ 1.78	\$ 1.68	6%
Combined Average	\$ 2.54	\$ 2.21	15%

For the nine months ended September 30, 2011, sales increased to \$2.13 billion, 22% higher than the 2010 period, primarily due to improved base-selling prices for most high value products. Shipments of high-value products increased 11% while shipments of standard stainless products (sheet and plate) decreased 7%. Average transaction prices for all products, which include surcharges, were 21% higher due to increased raw material surcharges and improved base prices for most high value products.

Comparative information for our Flat-Rolled Products revenues (in millions) by market and their respective percentages of the segment's overall revenues for the nine month periods ended September 30, 2011 and 2010 is as follows:

Market	Nine Months Ended September 30, 2011		Nine Months Ended September 30, 2010	
	\$	%	\$	%

Segment operating profit for the nine months ended September 30, 2011 improved to \$195.9 million, or 9.2% of sales, compared to \$61.7 million, or 3.5% of sales, for the 2010 period due primarily to increased high value products shipments and base selling prices, and a better matching of raw material costs and surcharges. Results for the first nine months of 2011 include a \$29.7 million LIFO inventory valuation reserve benefit, compared to a LIFO inventory valuation reserve charge of \$40.5 million in the 2010 period. Results for the nine months ended September 30, 2011 benefited from \$34.7 million of gross cost reductions.

Comparative information on the segment's products for the nine months ended September 30, 2011 and 2010 is provided in the following table:

Engineered Products Segment

Sales for the third quarter of 2011 were \$128.3 million, an increase of 34.8% compared to the same period of 2010. Sales for the nine months ended September 30, 2011 were \$372.8 million, a 37.8% increase compared to the first nine months of 2010. Demand continued to improve from the oil and gas, cutting tools, transportation, construction and mining, aerospace, and electrical energy markets.

Comparative information for our Engineered Products revenues (in millions) by market and their respective percentages of the segment's overall revenues for the three month and nine month periods ended September 30, 2011 and 2010 is as follows:

Market	Three Months Ended September 30, 2011		Three Months Ended September 30, 2010	
	\$	%	\$	%
Oil & Gas/Chemical Process Industry	\$ 34.1	27%	\$ 25.3	27%

Total	\$ 372.8	100%	\$ 270.6	100%

Segment operating profit for the 2011 third quarter was \$7.3 million, compared to \$2.8 million in the third quarter 2010. Results for the 2011 third quarter included a LIFO inventory valuation reserve charge of \$7.3 million

Table of Contents

due to higher tungsten raw material costs, compared to a \$1.2 million LIFO inventory valuation reserve charge for the comparable 2010 period. Results benefited from \$4.7 million in gross cost reductions in the third quarter 2011. Segment operating profit for the nine months ended September 30, 2011 was \$27.5 million, compared to \$12.5 million for the 2010 period. LIFO inventory valuation reserve charges were \$13.7 million and \$3.0 million for the first nine months of 2011 and 2010, respectively.

Corporate Items

Corporate expenses for the third quarter 2011 were \$20.9 million, compared to \$13.4 million in the year-ago period. The increase in corporate expenses was primarily related to Ladish transaction costs and higher incentive compensation expenses associated with long-term performance plans. For the nine months ended September 30, 2011, corporate expenses were \$72.5 million, compared to \$40.7 million for nine months ended September 30, 2010. The increase in corporate expenses for the first nine months of 2011 was primarily related to accelerated recognition of equity-based compensation expense due to executive retirements, higher incentive compensation expenses associated with long-term performance plans, costs related to the acquisition of ATI Ladish, and corporate-funded research and development costs.

Interest expense, net of interest income, in the third quarter 2011 was \$23.4 million, compared to interest expense of \$16.4 million in the third quarter 2010. For the first nine months of 2011, net interest expense was \$70.1 million compared to \$46.4 million for the first nine months of 2010. The increase in interest expense was primarily due to the January 7, 2011 issuance of \$500 million of 5.95% Notes due 2021, and debt assumed in the Ladish acquisition. Interest expense benefited from the capitalization of interest costs on strategic capital projects of \$3.1 million in the 2011 third quarter and by \$2.6 million in the third quarter of 2010. For the nine months ended September 30, 2011 and 2010, capitalized interest reduced interest expense by \$8.5 million and \$10.0 million, respectively.

Other expenses, which include charges incurred in connection with closed operations, and other non-operating income or expense, for the third quarter 2011 was \$2.9 million, compared to \$1.2 million for the third quarter 2010. The increase over the prior year quarter was primarily related to environmental and other costs at closed operations. For the nine months ended September 30, 2011, other expense was \$7.6 million, compared to \$10.9 million for the comparable 2010 period. The decrease was primarily related to lower expenses associated with closed operations and foreign exchange gains. These items are presented primarily in selling and administrative expenses, and in other income (expense) in the statement of operations.

Retirement benefit expense, which includes pension expense and other postretirement expense, decreased to \$19.2 million in the third quarter 2011, compared to \$22.5 million in the third quarter 2010. For the third quarter 2011, retirement benefit expense of \$13.6 million was included in cost of sales and \$5.6 million was included in selling and administrative expenses. For the third quarter 2010, the amount of retirement benefit expense included in cost of sales was \$16.1 million, and the amount included in selling and administrative expenses was \$6.4 million. Retirement benefit expense decreased to \$57.9 million for the nine months ended September 30, 2011, compared to \$67.4 million in the nine months ended September 30, 2010. For the nine months ended September 30, 2011, retirement benefit expense of \$40.8 million was included in cost of sales and \$17.1 million was included in selling and administrative expenses. For the nine months ended September 30, 2010, the amount of retirement benefit expense included in cost of sales was \$48.1 million, and the amount included in selling and administrative expenses was \$19.3 million. The decrease in retirement benefit expense for 2011 was primarily due to higher than expected returns on pension plan assets in 2010 and the benefits resulting from our voluntary pension contributions made over the last several years.

Income Taxes

Third quarter 2011 results included a provision for income taxes of \$31.2 million, or 32.7% of income before tax, compared to an income tax provision of \$6.2 million, or 65.3% of income before tax for the comparable 2010 period. For the first nine months of 2011, the provision for income taxes was \$100.6 million, or 34.7% of income before tax, compared to \$41.8 million, or 40.5% of income before tax for the first nine months of 2010. The first nine months of 2011 included discrete tax charges of \$2.7 million primarily related to foreign taxes. The first nine months of 2010 included non-recurring tax charges of \$9.2 million, \$5.3 million associated with the impact of the Patient Protection and Affordable Care Act, and \$3.9 million related to the Small Business Jobs and Credit Act.

Table of Contents

Financial Condition and Liquidity

We believe that internally generated funds, current cash on hand, and available borrowings under existing credit lines will be adequate to meet foreseeable liquidity needs, including a substantial expansion of our production capabilities over the next few years and scheduled debt maturities. We did not borrow funds under our domestic senior unsecured credit facility during the first nine months of 2011. However, as of September 30, 2011, approximately \$7 million of this facility was utilized to support letters of credit.

If we needed to obtain additional financing using the credit markets, the cost and the terms and conditions of such borrowings may be influenced by our credit rating. Changes in our credit rating do not impact our access to, or the cost of, our existing credit facilities.

We have no off-balance sheet arrangements as defined in Item 303(a)(4) of SEC Regulation S-K.

Cash Flow and Working Capital

For the nine months ended September 30, 2011, cash flow provided in operations for 2011 was \$107.5 million, as improved profitability was offset by an increase of \$390.3 million in managed working capital, due to a significant increase in the level of business activity. Cash used in investing activities was \$515.0 million in the first nine months of 2011, primarily for the purchase of Ladish and for capital expenditures. Cash provided by financing activities was \$406.7 million in the first nine months of 2011. Financing activities for the first nine months of 2011 included \$495 million in net proceeds from the issuance of \$500 million of 5.95% Notes due January 2021, dividend payments of \$55.7 million and \$28.9 million in net debt retirements. At September 30, 2011, cash and cash equivalents on hand totaled \$431.5 million, a decrease of \$0.8 million from year end 2010. As of September 30, 2011, \$133.9 million of cash and cash equivalents were held by our foreign subsidiaries.

As part of managing the liquidity of our business, we focus on controlling managed working capital, which is defined as gross accounts receivable and gross inventories, less accounts payable. In measuring performance in controlling this managed working capital, we exclude the effects of LIFO inventory valuation reserves, excess and obsolete inventory reserves, and reserves for uncollectible accounts receivable which, due to their nature, are managed separately. At September 30, 2011, managed working capital increased to 34.6% of annualized sales, compared to 34.4% of annualized sales at December 31, 2010. During the first nine months of 2011, managed working capital increased by \$560.5 million, to \$1.9 billion. The increase in managed working capital from December 31, 2010 included \$170.2 million acquired from Ladish, and a \$390.3 million increase from the prior year end, comprised of increased accounts receivable of \$140.9 million and increased inventory of \$299.6 million, partially offset by increased accounts payable of \$50.2 million. While accounts receivable balances increased during 2011, days sales outstanding, which measures actual collection timing for accounts receivable, improved by 5% compared to year end 2010. Gross inventory turns, which exclude the effect of LIFO inventory valuation reserves, remained essentially unchanged at September 30, 2011 compared to year end 2010.

Table of Contents

The Components of managed working capital were as follows:

(in millions)	September 30, 2011	December 31, 2010
Accounts receivable	\$ 769.3	\$ 545.4
Inventory	1,434.5	1,024.5
Accounts payable	(491.8)	(394.1)
Subtotal	1,712.0	1,175.8
Allowance for doubtful accounts	6.8	5.6
LIFO reserve	159.6	163.0
Corporate and other	61.8	35.3
Managed working capital	1,940.2	1,379.7
Annualized prior 2 months sales	\$ 5,602.2	\$ 4,007.7
Managed working capital as a % of annualized sales	34.6%	34.4%
Change in managed working capital from December 31, 2010	\$ 560.5	
Managed working capital acquired	(170.2)	
Net change in managed working capital	\$ 390.3	

Capital Expenditures

We have significantly expanded, and continue to expand, our manufacturing capabilities to meet expected intermediate and long-term demand from the aerospace (engine and airframe) and defense, chemical process industry, oil and gas, electrical energy, and medical markets, especially for titanium and titanium-based alloys, nickel-based alloys and superalloys, specialty alloys, and exotic alloys. We expect capital expenditures for 2011 will be between \$275 and \$300 million, of which \$168.8 million was expended in the first nine months of 2011. We expect 2011 depreciation expense to be approximately \$175 million. Our self-funded, on-going strategic capital investments include a new advanced specialty metals hot-rolling and processing facility at our existing Brackenridge, PA site, which recently began foundation construction. The project is estimated to cost approximately \$1.1 billion and to be completed by the end of 2013. Our new advanced hot-rolling and processing facility is designed to be the most powerful mill in the world for production of specialty metals. When completed, we believe that the facility will provide unsurpassed manufacturing capability and versatility in the production of a wide range of flat-rolled specialty metals. We expect improved productivity, lower costs, and higher quality for our diversified product mix of flat-rolled specialty metals, including nickel-based and specialty alloys, titanium and titanium alloys, zirconium alloys, Precision Rolled Strip[®] products, and stainless sheet and coiled plate products. It is designed to roll and process exceptional quality hot bands of up to 78.62 inches, or 2 meters, wide.

Debt

At September 30, 2011, we had \$1,628.3 million in total outstanding debt, compared to \$1,063.3 million at December 31, 2010, an increase of \$565.0 million. The increase in debt was primarily due to the January 2011 issuance of \$500 million of 5.95% Senior Notes due in 2021. The 2021 Notes pay interest semi-annually in arrears at a rate of 5.95% per year and mature on January 15, 2021, unless earlier repurchased. Additionally, we assumed debt in the ATI Ladish acquisition that has a remaining principal balance of approximately \$69 million and recorded fair value of approximately \$77 million. The ATI Ladish debt pays interest semi-annually in arrears at fixed rates of 6.14% and 6.41%, with annual principal payments through May 2016.

In managing our overall capital structure, some of the measures on which we focus are net debt to total capitalization, which is the percentage of our debt, net of cash that may be available to reduce borrowings, to our total invested and borrowed capital, and total debt to total capitalization, which excludes cash balances. Net debt as a percentage of total capitalization was 30.3% at September 30, 2011, compared to 23.6% at December 31, 2010. The net debt to total capitalization was determined as follows:

Table of Contents

(\$ in millions)	September 30, 2011	December 31, 2010
Total debt	\$ 1,628.3	\$ 1,063.3
Less: Cash	(431.5)	(432.3)
Net debt	\$ 1,196.8	\$ 631.0
Net debt	\$ 1,196.8	\$ 631.0
Total ATI stockholders' equity	2,748.7	2,040.8
Net ATI total capital	\$ 3,945.5	\$ 2,671.8
Net debt to ATI total capital	30.3%	23.6%

Total debt to total capitalization increased to 37.2% at September 30, 2011 from 34.3% December 31, 2010.

Total debt to total capitalization was determined as follows:

(\$ in millions)	September 30, 2011	December 31, 2010
Total debt	\$ 1,628.3	\$ 1,063.3
Total ATI stockholders' equity	2,748.7	2,040.8
Total ATI capital	\$ 4,377.0	\$ 3,104.1
Total debt to total ATI capital	37.2%	34.3%

We did not borrow funds under our \$400 million senior unsecured domestic credit facility during the first nine months of 2011, although approximately \$7 million has been utilized to support the issuance of letters of credit. The unsecured facility requires us to maintain a leverage ratio (consolidated total indebtedness net of cash on hand in excess of \$50 million, divided by consolidated earnings before interest, taxes, depreciation and amortization, and non-cash pension expense) of not greater than 3.25, and maintain an interest coverage ratio (consolidated earnings before interest, taxes, and non-cash pension expense divided by interest expense) of not less than 2.0. For the twelve months ended September 30, 2011, our leverage ratio was 2.05 and our interest coverage ratio was 5.25.

We have an additional, separate credit facility for the issuance of letters of credit. As of September 30, 2011, \$31 million in letters of credit was outstanding under this facility.

In addition, STAL, the Company's Chinese joint venture company in which ATI has a 60% interest, has a 205 million renminbi (approximately \$32 million at September 30, 2011 exchange rates) revolving credit facility with a group of banks. This credit facility is supported solely by STAL's financial capability without any guarantees from the joint venture partners. As of September 30, 2011, there were no borrowings under this credit facility.

Retirement Benefits

At December 31, 2010, the measurement date for ERISA funding, our U.S. qualified pension defined benefit pension plan was essentially fully-funded. Based upon current regulations and actuarial studies, we are not required to make a cash contribution for 2011. However, we may elect, depending upon investment performance of the pension plan assets and other factors, to make additional voluntary cash contributions to this plan in the future. Assumed obligations of Ladish include several U.S. qualified defined benefit pension plans, most of which are frozen to new entrants and credited service. The Ladish plans have modest annual funding requirements.

Dividends

A regular quarterly dividend of \$0.18 per share of common stock was paid on September 28, 2011 to stockholders of record at the close of business on September 20, 2011. The payment of dividends and the amount of such dividends depends upon matters deemed relevant by our

Edgar Filing: ALLEGHENY TECHNOLOGIES INC - Form 10-Q

Board of Directors, such as our results of operations, financial condition, cash requirements, future prospects, any limitations imposed by law, credit agreements or senior securities, and other factors deemed relevant and appropriate.

Table of Contents

Labor Matters

On August 8, 2011, we announced that the United Steelworkers (USW)-represented employees at ATI Allegheny Ludlum and ATI's Albany, OR titanium operations ratified four-year agreements covering approximately 3,000 employees. The agreements will expire on June 30, 2015.

Additionally, on September 30, 2011, we announced that union-represented employees at ATI Ladish Forging in Cudahy, WI ratified six-year agreements covering approximately 650 employees. The new agreements will take effect as current agreements expire and extend to 2018 or 2019.

Critical Accounting Policies

Inventory

At September 30, 2011, we had net inventory of \$1,434.5 million. Inventories are stated at the lower of cost (last-in, first-out (LIFO), first-in, first-out (FIFO) and average cost methods) or market, less progress payments. Costs include direct material, direct labor and applicable manufacturing and engineering overhead, and other direct costs. Most of our inventory is valued utilizing the LIFO costing methodology. Inventory of our non-U.S. operations is valued using average cost or FIFO methods. Under the LIFO inventory valuation method, changes in the cost of raw materials and production activities are recognized in cost of sales in the current period even though these material and other costs may have been incurred at significantly different values due to the length of time of our production cycle. The prices for many of the raw materials we use have been extremely volatile during the past four years. Since we value most of our inventory utilizing the LIFO inventory costing methodology, a rise in raw material costs has a negative effect on our operating results, while, conversely, a fall in material costs results in a benefit to operating results. For example, in 2010, the effect of rising raw material costs on our LIFO inventory valuation method resulted in cost of sales which were \$60.2 million higher than would have been recognized had we utilized the FIFO methodology to value our inventory. However, in 2009 and 2008, the effect of falling raw material costs on our LIFO inventory valuation method resulted in cost of sales which were \$102.8 million and \$169.0 million lower than would have been recognized had we utilized the FIFO methodology to value our inventory. In a period of rising prices, cost of sales expense recognized under LIFO is generally higher than the cash costs incurred to acquire the inventory sold. Conversely, in a period of declining raw material prices, cost of sales recognized under LIFO is generally lower than cash costs incurred to acquire the inventory sold.

Since the LIFO inventory valuation methodology is designed for annual determination, interim estimates of the annual LIFO valuation are required. We recognize the effects of the LIFO inventory valuation method on an interim basis by projecting the expected annual LIFO cost and allocating that projection to the interim quarters equally. These projections of annual LIFO inventory valuation reserve changes are updated quarterly and are evaluated based upon material, labor and overhead costs and projections for such costs at the end of the year plus projections regarding year-end inventory levels. Operating results for the nine months ended September 30, 2011 included a LIFO inventory valuation reserve benefit of \$3.4 million primarily as a result of lower nickel prices.

The LIFO inventory valuation methodology is not utilized by many of the companies with which we compete, including foreign competitors. As such, our results of operations may not be comparable to those of our competitors during periods of volatile material costs due, in part, to the differences between the LIFO inventory valuation method and other acceptable inventory valuation methods.

We evaluate product lines on a quarterly basis to identify inventory values that exceed estimated net realizable value. The calculation of a resulting reserve, if any, is recognized as an expense in the period that the need for the reserve is identified. At September 30, 2011, no significant reserves were required. It is our general policy to write-down to scrap value any inventory that is identified as obsolete and any inventory that has aged or has not moved in more than twelve months. In some instances this criterion is up to twenty-four months due to the longer manufacturing and distribution process for such products.

Other Critical Accounting Policies

A summary of other significant accounting policies is discussed in Management's Discussion and Analysis of Financial Condition and Results of Operations and in Note 1 to the consolidated financial statements contained in our Annual Report on Form 10-K for the year ended December 31, 2010.

Table of Contents

The preparation of the financial statements in accordance with U.S. generally accepted accounting principles requires us to make judgments, estimates and assumptions regarding uncertainties that affect the reported amounts of assets and liabilities. Significant areas of uncertainty that require judgments, estimates and assumptions include the accounting for derivatives, retirement plans, income taxes, environmental and other contingencies as well as asset impairment, inventory valuation and collectability of accounts receivable. We use historical and other information that we consider to be relevant to make these judgments and estimates. However, actual results may differ from those estimates and assumptions that are used to prepare our financial statements.

New Accounting Pronouncements Adopted

On January 1, 2011, we prospectively adopted changes issued by the Financial Accounting Standards Board (FASB) to revenue recognition for multiple-deliverable arrangements. These changes affect the accounting and reporting of revenues related to bundled sale arrangements with customers to provide multiple products and services at different points in time or over different time periods. The adoption of these changes had no impact on the consolidated financial statements.

On January 1, 2011, we adopted changes issued by the FASB to disclosure requirements for disaggregated disclosure of fair value measurements using significant unobservable inputs, which are categorized as Level 3 in the fair value hierarchy. These changes had no impact on the September 30, 2011 consolidated financial statement or footnotes, but will further enhance the fair value disclosures within the December 31, 2011 consolidated financial statements.

Forward-Looking and Other Statements

From time to time, we have made and may continue to make forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Certain statements in this report relate to future events and expectations and, as such, constitute forward-looking statements. Forward-looking statements include those containing such words as anticipates, believes, estimates, expects, would, should, will likely result, forecast, outlook, projects, and similar expressions. Forward-looking statements are based on management's current expectations and include known and unknown risks, uncertainties and other factors, many of which we are unable to predict or control, that may cause our actual results, performance or achievements to materially differ from those expressed or implied in the forward-looking statements. Important factors that could cause actual results to differ materially from those in the forward-looking statements include: (a) material adverse changes in economic or industry conditions generally, and global supply and demand conditions and prices for our specialty metals; (b) material adverse changes in the markets we serve, including the aerospace and defense, electrical energy, chemical process industry, oil and gas, medical, automotive, construction and mining, and other markets; (c) our inability to achieve the level of cost savings, productivity improvements, synergies, growth or other benefits anticipated by management from the Ladish acquisition and other strategic investments and the integration of acquired businesses, whether due to significant increases in energy, raw materials or employee benefits costs, the possibility of project cost overruns or unanticipated costs and expenses, or other factors; (d) volatility of prices and availability of supply of the raw materials that are critical to the manufacture of our products; (e) declines in the value of our defined benefit pension plan assets or unfavorable changes in laws or regulations that govern pension plan funding; (f) significant legal proceedings or investigations adverse to us; and (g) other risk factors summarized in our Annual Report on Form 10-K for the year ended December 31, 2010, and in other reports filed with the Securities and Exchange Commission. We assume no duty to update our forward-looking statements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

As part of our risk management strategy, we utilize derivative financial instruments, from time to time, to hedge our exposure to changes in raw material prices, energy prices, foreign currencies, and interest rates. We monitor the third-party financial institutions which are our counterparty to these financial instruments on a daily basis and diversify our transactions among counterparties to minimize exposure to any one of these entities. Fair values for derivatives were measured using exchange-traded prices for the hedged items including consideration of counterparty risk and the Company's credit risk.

Interest Rate Risk. We attempt to maintain a reasonable balance between fixed- and floating-rate debt to keep financing costs as low as possible. At September 30, 2011, we had approximately \$26 million of floating rate debt outstanding with a weighted average interest rate of approximately 1.4%. Since the interest rate on floating rate debt changes with the short-term market rate of interest, we are exposed to the risk that these interest rates may increase, raising our interest expense in situations where the interest rate is not capped. For example, a hypothetical 1%

Table of Contents

increase in the rate of interest on the \$26 million of our outstanding floating rate debt not subjected to a cap would result in increased annual financing costs of approximately \$0.3 million.

Volatility of Energy Prices. Energy resources markets are subject to conditions that create uncertainty in the prices and availability of energy resources. The prices for and availability of electricity, natural gas, oil and other energy resources are subject to volatile market conditions. These market conditions often are affected by political and economic factors beyond our control. Increases in energy costs, or changes in costs relative to energy costs paid by competitors, have and may continue to adversely affect our profitability. To the extent that these uncertainties cause suppliers and customers to be more cost sensitive, increased energy prices may have an adverse effect on our results of operations and financial condition. We use approximately 8 to 10 million MMBtu's of natural gas annually, depending upon business conditions, in the manufacture of our products. These purchases of natural gas expose us to risk of higher gas prices. For example, a hypothetical \$1.00 per MMBtu increase in the price of natural gas would result in increased annual energy costs of approximately \$8 to \$10 million. We use several approaches to minimize any material adverse effect on our financial condition or results of operations from volatile energy prices. These approaches include incorporating an energy surcharge on many of our products and using financial derivatives to reduce exposure to energy price volatility.

At September 30, 2011, the outstanding financial derivatives used to hedge our exposure to energy cost volatility included both natural gas and electricity hedges. For natural gas, approximately 70% of our forecasted domestic requirements are hedged through 2011, approximately 50% of our domestic requirements are hedged for 2012, and about 10% of our domestic requirements are hedged for 2013. The net mark-to-market valuation of these outstanding natural gas hedges at September 30, 2011 was an unrealized pre-tax loss of \$9.3 million, comprised of \$8.3 million in accrued liabilities, and \$1.0 million in other long-term liabilities on the balance sheet. For the three months ended September 30, 2011, the effects of natural gas hedging activity increased cost of sales by \$2.7 million. For electricity usage in our Western Pennsylvania operations, we have hedged approximately 45% of our on-peak and off-peak forecasted requirements for 2011 and approximately 30% for 2012. The net mark-to-market valuation of the electricity hedges was an unrealized pre-tax loss of \$0.8 million, comprised of \$0.1 million included in prepaid expenses and other current assets, \$0.8 million in accrued liabilities, and \$0.1 million in other long-term liabilities on the balance sheet. The effects of the hedging activity will be recognized in income over the designated hedge periods.

Volatility of Raw Material Prices. We use raw materials surcharge and index mechanisms to offset the impact of increased raw material costs; however, competitive factors in the marketplace can limit our ability to institute such mechanisms, and there can be a delay between the increase in the price of raw materials and the realization of the benefit of such mechanisms. For example, in 2010 we used approximately 95 million pounds of nickel; therefore, a hypothetical change of \$1.00 per pound in nickel prices would result in increased costs of approximately \$95 million. In addition, in 2010 we also used approximately 780 million pounds of ferrous scrap in the production of our flat-rolled products and a hypothetical change of \$0.01 per pound would result in increased costs of approximately \$8 million. While we enter into raw materials futures contracts from time-to-time to hedge exposure to price fluctuations, such as for nickel, we cannot be certain that our hedge position adequately reduces exposure. We believe that we have adequate controls to monitor these contracts, but we may not be able to accurately assess exposure to price volatility in the markets for critical raw materials.

The majority of our products are sold utilizing raw material surcharges and index mechanisms. However as of September 30, 2011, we had entered into financial hedging arrangements primarily at the request of our customers related to firm orders for approximately 5% of our total annual nickel requirements, primarily with settlements in 2011 and 2012. A minor amount of nickel hedges extend into 2014. Any gain or loss associated with these hedging arrangements is included in cost of sales. At September 30, 2011, the net mark-to-market valuation of our outstanding raw material hedges was an unrealized pre-tax loss of \$6.2 million, comprised of \$0.1 million included in prepaid expenses and other current assets, \$0.1 million in other long-term assets, and \$6.2 million in accrued liabilities and \$0.2 million in long-term other liabilities on the balance sheet.

Foreign Currency Risk. Foreign currency exchange contracts are used, from time-to-time, to limit transactional exposure to changes in currency exchange rates. We sometimes purchase foreign currency forward contracts that permit us to sell specified amounts of foreign currencies expected to be received from our export sales for pre-established U.S. dollar amounts at specified dates. The forward contracts are denominated in the same foreign currencies in which export sales are denominated. These contracts are designated as hedges of the variability in cash flows of a portion of the forecasted future export sales transactions which otherwise would expose the Company to foreign currency risk. We may also enter into foreign currency forward contracts that are not designated as hedges, which are denominated in the same foreign currency in which export sales are denominated. At September 30,

Table of Contents

2011, the outstanding financial derivatives, including both hedges and undesignated derivatives, that are used to manage our exposure to foreign currency, primarily euros, represented approximately 10% of our forecasted total international sales through 2013. In addition, we may also designate cash balances held in foreign currencies as hedges of forecasted foreign currency transactions. At September 30, 2011, the net mark-to-market valuation of the outstanding foreign currency forward contracts was a net asset of \$5.6 million, of which \$5.0 million is included in prepaid expenses and other current assets, \$1.2 million was included other long-term assets, and \$0.6 million in accrued liabilities on the balance sheet.

Item 4. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

Our Chief Executive Officer and Chief Financial Officer have evaluated the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) or Rule 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of September 30, 2011, and they concluded that these disclosure controls and procedures are effective.

(b) Changes in Internal Controls

On May 9, 2011, we completed our acquisition of Ladish. See Note 2, Acquisition of Business in the notes to the consolidated financial statements in this quarterly report for a discussion of the acquisition, which was not material to ATI's historical results of operations or financial condition. While management does not expect significant changes to our financial reporting processes and related internal controls as a result of the Ladish acquisition, we are currently in the process of evaluating the internal controls and procedures of Ladish, and it will take time for us to fully complete the integration of Ladish's internal controls over financial reporting. Except with respect to our acquisition of Ladish, there was no change in our internal control over financial reporting identified in connection with the evaluation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) or Rule 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of September 30, 2011, conducted by our Chief Executive Officer and Chief Financial Officer, that occurred during the quarter ended September 30, 2011 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

A number of lawsuits, claims and proceedings have been or may be asserted against the Company relating to the conduct of its business, including those pertaining to product liability, patent infringement, commercial, government contract work, employment, employee benefits, taxes, environmental, health and safety, occupational disease, and stockholder matters. Certain of such lawsuits, claims and proceedings are described in our Annual Report on Form 10-K for the year ended December 31, 2010, and addressed in Note 13 to the unaudited interim financial statements included herein. While the outcome of litigation cannot be predicted with certainty, and some of these lawsuits, claims or proceedings may be determined adversely to the Company, management does not believe that the disposition of any such pending matters is likely to have a material adverse effect on the Company's financial condition or liquidity, although the resolution in any reporting period of one or more of these matters could have a material adverse effect on the Company's results of operations for that period.

Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2010, which could materially affect our business, financial condition or future results. The risks described in our Annual Report on Form 10-K are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results.
