(Name, telephone, e-mail and/or facsimile

number and address of company contact person)

Securities registered or to be registered pursuant to Section 12(b) of the Act.

Title of Each Class	Name of each exchange on which registered
Common shares, \$0.01 par value per share Securities registered pursuant to Section 12(g) of the Act.	New York Stock Exchange

None.

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act.

None.

As of December 31, 2011 there were 44,803,735 common shares of the registrant outstanding.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934. Yes No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP International Financial Reporting Standards as issued by the International Accounting Standards Board Other

If Other has been checked, indicate by check mark which financial statement item the registrant has elected to follow: Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

NOTE REGARDING USE OF FORWARD LOOKING STATEMENTS

This Annual Report on Form 20-F (this Report) contains forward-looking statements. The words believe, may, will, aim, estimate, contain, anticipate, intend, expect, forecast and similar words are intended to identify forward-looking statements. Forward-looking statements include information concerning our possible or assumed future results of operations, business strategies, financing plans, competitive position, industry environment, potential growth opportunities, the effects of future regulation and the effects of competition. We have based these forward-looking statements largely on our current beliefs, expectations and projections about future events and financial trends affecting our business. These statements are subject to many important factors, certain risks and uncertainties that could cause actual results to differ materially from those anticipated in the forward-looking statements. Factors that might cause such a difference include, but are not limited to those discussed in the section entitled Risk Factors under ITEM 3. Key Information.

Readers should not place undue reliance on forward-looking statements, which reflect management's view only as of the date of this Report. The Company undertakes no duty to update any forward-looking statement to conform the statement to actual results or changes in management's expectations. Readers should also carefully review the risk factors described in other documents the Company files from time to time with the U.S. Securities and Exchange Commission, which we refer to in this Report as the SEC.

FINANCIAL STATEMENTS AND CURRENCY PRESENTATION

The Company prepares its consolidated financial statements in accordance with accounting principles generally accepted in the United States of America and publishes its financial statements in United States dollars.

INTRODUCTION

Except where the context otherwise requires and for purposes of this Report only:

we, us, our company, our, the Company and Nam Tai refer to Nam Tai Electronics, Inc. and, in the context of describing our operations, also include our PRC operating companies;

shares refer to our common shares, \$0.01 par value;

China or PRC refers to the People's Republic of China, excluding Taiwan, Hong Kong and Macao;

Taiwan refers to the Taiwan province of the People's Republic of China;

Hong Kong refers to the Hong Kong Special Administrative Region of the People's Republic of China and HK\$ refers to the legal currency of Hong Kong;

Macao refers to the Macao Special Administrative Region of the People's Republic of China; and

all references to Renminbi, RMB or yuan are to the legal currency of China; all references to U.S. dollars, dollars, \$ or US\$ are to the legal currency of the United States.

Note with respect to our use of Bluetooth: The Bluetooth® word mark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by Nam Tai is under license. Other trademarks and trade names used in this Report, if any, are those of their respective owners.

Table of Contents

PART I

ITEM 1. IDENTITY OF DIRECTORS, SENIOR MANAGEMENT AND ADVISORS

Not applicable to Nam Tai.

ITEM 2. OFFER STATISTICS AND EXPECTED TIMETABLE

Not applicable to Nam Tai.

ITEM 3. KEY INFORMATION

Our historical consolidated financial statements are prepared in accordance with generally accepted accounting principles in the United States, or U.S. GAAP, and are presented in U.S. dollars. The following selected consolidated statements of income data for each of the three years in the period ended December 31, 2011 and the consolidated balance sheets data as of December 31, 2010 and 2011 are derived from our consolidated financial statements and notes thereto included in this Report. The selected consolidated statements of income data for each of the two-year periods ended December 31, 2007 and 2008 and the consolidated balance sheets data as of December 31, 2007, 2008 and 2009 were derived from our audited financial statements, which are not included in this Report. The following data should be read in conjunction with the Section of the Report entitled ITEM 5. Operating and Financial Review and Prospects and our consolidated financial statements including the related footnotes which are included in the F pages of this Report immediately following page 78.

Table of Contents**Selected Financial Information**

Consolidated statements of income data:	Year ended December 31,				
	2007	2008	2009	2010	2011
	(in thousands, except per share data)				
Net sales	\$ 780,822	\$ 622,852	\$ 408,137	\$ 534,420	\$ 602,317
Cost of sales	(693,804)	(552,174)	(367,817)	(483,126)	(574,228)
Gross profit	87,018	70,678	40,320	51,294	28,089
Operating expenses:					
General and administrative expenses ⁽¹⁾⁽²⁾	(29,986)	(29,112)	(28,393)	(25,232)	(27,325)
Selling expenses ⁽¹⁾	(6,564)	(6,945)	(5,266)	(5,504)	(5,902)
Research and development expenses	(9,798)	(10,890)	(6,273)	(5,757)	(3,362)
Impairment loss on goodwill		(17,345)			(2,951)
Total operating expenses	(46,348)	(64,292)	(39,932)	(36,493)	(39,540)
Income (loss) from operations	40,670	6,386	388	14,801	(11,451)
Other income (expenses) net	2,219	6,428	(256)	3,972	9,760

- (1) The Company's consolidated statements of income for years prior to 2009, as originally published, combined general and administrative expenses and selling expenses as a single line items labeled "Selling, general and administrative expenses". In the above presentation of Selected Financial Data and in the Company's consolidated financial statements included in this Report, such expenses have been presented separately to conform to the 2009, 2010 and 2011 presentation.
- (2) General and administrative expenses for the years ended December 31, 2009, 2010 and 2011 included employee severance benefits of \$5.1 million, \$0.7 million and \$3.0 million, respectively. General and administrative expenses for the years ended December 31, 2009 and 2010 also included accruals of \$0.8 million and \$0.8 million, respectively, for a compensation obligation payable to the Company's CFO at the end of three years of continuous service. In October 2010, the Company's compensation obligation payable at the end of three years to its CFO was terminated. In accordance with Staff Accounting Bulletin (SAB) Topics 1B.1 and 5T, Financial Accounting Standard Board (FASB) Accounting Standards Codification (ASC) 718-10-15-4, the aggregate of approximately \$1.6 million previously accrued on this

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

obligation during the periods from March 1, 2009 through December 31, 2009 and from January 1, 2010 to September 30, 2010 was reclassified and added to additional paid-in capital on the Company's Balance Sheet as at December 31, 2010.

Table of Contents

- (3) Working Capital represents the excess of current assets over current liabilities.
- (4) In November 2009, Nam Tai successfully completed the privatization of Nam Tai Electronic & Electrical Products Limited, or NTEEP, by tendering for and acquiring the 25.12% of NTEEP that it did not previously own. This acquisition resulted in NTEEP becoming the Company's wholly-owned subsidiary. Beginning with its consolidated financial statements for the year ended December 31, 2009, Nam Tai reclassified non-controlling interests for years prior to 2009 as equity in accordance with FASB ASC 810-10-45-16 Consolidated-Overall-Other Presentation Matter Non-controlling Interest in a Subsidiary. The presentation in the table above includes such reclassification for 2007 and 2008. Total Nam Tai shareholders' equity at December 31, 2010 also included approximately \$1.6 million previously accrued on a compensation obligation payable to the Company's CFO, which was terminated in October 2010. See footnote (2) above.
- (5) For 2010 and 2011, the Company declared a dividend payable quarterly in 2011 and 2012, respectively. See the table entitled Dividends declared for 2012 in ITEM 8. Financial Information Dividends on page 62 of this Report for the schedule of dividend payments for 2012.

Risk Factors

We may from time to time make written or oral forward-looking statements. Written forward-looking statements may appear in this document and other documents filed with the SEC, in press releases, in reports to shareholders, on our website, and other documents. The Private Securities Reform Act of 1995 contains a safe harbor for forward-looking statements on which the Company relies in making such disclosures. In connection with this safe harbor, we are hereby identifying important factors that could cause actual results to differ materially from those contained in any forward-looking statements made by us or on our behalf. Any such statements are qualified by reference to the following cautionary statements.

We are dependent on a few large customers, the loss of any of which could substantially harm our business and operating results.

Historically, a substantial percentage of our sales have been made to a small number of customers. During the years ended December 31, 2009, 2010 and 2011, sales to customers who account for 10% or more of our net sales totaled approximately 63.3%, 71.0% and 84.0% of our net sales, respectively. During these same years, sales to our largest 10 customers accounted for 86.2%, 88.4% and 93.0% of our net sales, respectively. We currently depend, and expect to continue to depend, on a relatively small number of customers for a significant percentage of our net revenue. If our customers, particularly our major customers, experience a decline in the demand for their products as a result of the prevailing economic environment or other factors, the electronic manufacturing services, or EMS, that we provide to these customers could be curtailed or possibly even terminated. The loss of any one of our major customers or a substantial reduction in orders from any of them could adversely impact our sales and decrease our net income or cause us to incur losses unless and until we were able to replace the customer or order with one or more of comparable size.

In addition, we generate significant account receivables in connection with the EMS that we provide to our customers. If one or more of our customers became insolvent or otherwise were unable to pay for these services on a timely basis, or at all, our operating results and financial position could be adversely affected. Such adverse effects could include any one or more of the following: a further decline in revenue or net income, a charge for bad debts, a charge for inventory write-offs, a decrease in inventory turns, an increase in days in inventory and an increase in days in accounts receivable.

Consolidation in industries that utilize or manufacture electronics components may adversely affect our business.

Consolidation in industries that utilize electronic components may continue to increase as companies combine to achieve further economies of scale and other synergies. Further consolidation could result in an increase in excess manufacturing capacity as companies seek to divest manufacturing operations or eliminate duplicative product lines. Excess manufacturing capacity may decrease pricing and increase competitive pressures for our industry as a whole and for us in particular. Consolidation could also result in an increasing number of very large companies offering products in multiple industries. If one of our customers is acquired by another company that does not rely on us to provide services and has its own production facilities or relies on another provider of similar services, we may lose that customer's business. Such consolidation among our customers may further reduce the number of customers that generate a significant percentage of our net revenue and exposes us to increased risks relating to our reliance on a small number of customers. Any of the foregoing results of industry consolidation could adversely affect our business.

In addition, consolidation in our industry would result in larger and more geographically diverse competitors that have significantly larger combined resources, which may allow them to devote significantly greater resources to the expansion of the EMS that they offer and the marketing of their existing services to their larger installed customer bases or to new customers attracted to a larger global manufacturing organization.

Table of Contents

Continuing economic uncertainty may adversely affect our earnings, liquidity and financial position.

The business environment in the electronics industry depends significantly on worldwide economic conditions. In particular, there has been an erosion of global consumer confidence from concerns over declining asset values, price instability, geopolitical issues, the availability and cost of credit, rising unemployment, and the stability and solvency of financial institutions, financial markets, businesses, and sovereign nations. These concerns slowed global economic growth and resulted in recessions in many countries, including in the U.S., Europe and certain countries in Asia. The global economic downturn negatively impacted our operating results beginning in the second half of 2008 through the first quarter ended March 31, 2010.

Even though there were signs that an overall economic recovery was beginning in the second quarter of 2010 and throughout 2011, such recovery continues to be uncertain. Recessionary conditions may return. If any of these potential negative economic conditions occur, a number of negative effects on our business could result and adversely affect:

the demand for our customers' products;

the amount, timing and stability of their orders;

the financial strength of our customers and suppliers;

our customers' and suppliers' ability or willingness to do business with us;

our willingness to do business with our current customers and suppliers;

our suppliers' and customers' ability to fulfill their obligations to us;

our customers', our suppliers' or our ability to obtain credit, secure funds or raise capital; and

the prices at which we can sell our products and services.

Any of these effects could impact our ability to effectively manage inventory levels and collect receivables, increase our need for cash, or decrease our net revenue and profitability. As a result, continuing economic uncertainty may adversely affect our earnings, liquidity and financial position and no assurance can be given that we will not be impacted by changes in the economic environment or perceived changes in the economic environment.

Our quarterly and annual operating results are subject to significant fluctuations as a result of a wide variety of factors.

Substantially all of our sales are made on purchase order bases, and we are not always able to predict with certainty the timing or magnitude of these orders, especially during the current global economic downturn. We cannot guarantee that we will continue to receive orders from any of our customers. Our net sales will be harmed if we are unable to obtain a sufficient number of orders from, perform a sufficient number of EMS for, or ship a sufficient number of products to our customers in each quarter. In addition, our customers may cancel, change or delay product purchase orders with little or no advance notice to us. Also, we believe customers may be increasing the number of vendors upon which they rely for manufacturing. Our quarterly and annual operating results are affected by a wide variety of factors that could materially and adversely affect our business and operating results during any period. This could result from any one or a combination of factors, such as:

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

the timing, cancellation or deferral of orders;

adverse changes in global economic conditions, particularly those affecting the electronics industry;

the level of capacity utilization of our manufacturing facilities and associated fixed costs;

the composition of the costs of revenue between materials, labor and manufacturing overhead;

changes in demand for our products or services;

changes in demand in our customers' end markets, which affect the type of product and related margins;

our customers' announcement and introduction of new products or new generations of products;

the efficiencies we achieve in managing inventories and fixed assets;

the degree to which we are able to utilize our available manufacturing capacity;

long national seasonal breaks in the PRC, such as the Chinese New Year holidays in our first quarter and the National Day Golden week in our fourth quarter, during which our ability to manufacture products, obtain components and materials from suppliers and receive and process orders from customers are adversely affected;

fluctuations in the cost of materials and the availability of materials;

the life cycles of our customers' products;

Table of Contents

variability in our manufacturing yields;

long lead times and advance financial commitments for our factories, equipment expenditures and components required to complete anticipated customer orders;

our effectiveness in managing our manufacturing processes, including, interruptions or slowdowns in production and changes in cost and availability of components;

changes in the specific products or quantities our customers order;

extended payment terms demanded by our major customers which, for competitive reasons, we choose to accommodate and result in longer periods for us to receive payment and increase our accounts receivable;

customer insolvencies resulting in bad debt or inventory exposures that are in excess of our reserves;

charges to our operating results because of impairments to the values of long-lived assets or goodwill carried on our balance sheet; and

price reductions caused by competitive pressure.

The volume and timing of orders received during a quarter have been, even in normal economic climates, difficult to forecast and fluctuate as a consequence of variation in demand for our customers' products; our customers' attempts to manage their inventory; electronic design changes; changes in our customers' manufacturing strategies; and acquisitions of or consolidations among our customers. Customers generally order based on their forecasts. Further, we do not typically operate with any significant backlog in orders, and this makes it difficult for us to forecast our revenues, plan our production and allocate resources for future periods (including for our capital expenditures). If demand falls below such forecasts or if customers do not control inventories effectively, they may reduce, cancel or postpone shipments of orders.

Because of any of the above factors, our operating results in any period should not be considered indicative of results to be expected in any future period, and fluctuations in operating results may also result in fluctuations in the market price of our common shares. Our operating results in future periods may fall below the expectations of public market analysts and investors. This failure to meet expectations could cause the trading price of our common shares to decline.

We face increasing competition, which has had and may continue to have, an adverse effect on our gross margins.

Certain barriers to entry exist in the EMS industry such as technical expertise, substantial capital requirements, and establishing and maintaining valuable customer relationships and a large and loyal customer base. However, these barriers to entry are relatively low. We are aware that manufacturers in Hong Kong and China may be developing or have developed the required technical capability and customer base to compete with our existing business.

Competition in the EMS industry is intense, characterized by price erosion, rapid technological change and competition from major international companies. This intense competition has resulted in pricing pressures and a lower gross margin percentage in certain years. Our gross margin percentages during the years ended December 31, 2007, 2008, 2009, 2010 and 2011 are shown in the chart below.

Table of Contents

During 2011, our gross profit margin dropped from 9.6% to 4.7% as compared with 2010. In 2011, we were still burdened with launch costs for new projects in our facility in Wuxi which reduced our overall gross profit margin by 2.0%. Additional launch costs for new projects could impact our overall gross profit margin in the future. Wages and allowance increased by 48%, which reduced our overall gross profit margin by 1.6%. Additionally, in the future, we may not be able to improve on, or even maintain, our gross margin percentage at the 2011 level. If, as a result of competitive forces, we are compelled to lower our unit prices and are unable to otherwise offset the recent trend of decreases in our gross margin percentage, our financial position may be harmed and our stock price may fall.

We may not be able to compete successfully with our competitors, many of which have substantially greater resources than we do. We will face intense competition when we begin large-scale production of flexible printed circuit, or FPC, boards and FPC subassemblies.

The EMS we provide are available from many independent sources as well as from our current and potential customers with in-house manufacturing capabilities. The following table identifies those companies, which we believe are our principal competitors (listed alphabetically) by category of products or services we provide:

	Product/Service	Competitor
EMS		Celestica, Inc. Flextronics International Ltd. Hon Hai Precision Industry Co., Ltd. Jabil Circuit, Inc. Sanmina-SCI Corporation
Image capturing devices and their modules		Altus Technology Inc. (controlled by Foxconn) Lite-on Technology Corporation Logitech International S.A. The Primax Group
Mobile phone accessories		Balda-Thong Fook Solutions Sdn., Bhd. Celestica, Inc. Elcoteq Network Corporation Flextronics International Ltd. Foster Corporation Foxlink Group Merry Electronics Co., Ltd. WKK International (Holdings) Ltd.
Liquid crystal display, or LCD panels		Tianma Microelectronics Co., Ltd. Truly International Holdings Ltd. Varitronix International Ltd. Yeebo (International) Holdings Ltd.
Telecommunication subassemblies and components		Flextronics International Ltd. LG. Philips LCD Co., Ltd. Samsung Electronics Varitronix International Ltd.
Consumer electronic products (calculators, personal organizers and linguistic products)		Computime Limited Inventec Co., Ltd. Kinpo Electronics, Inc. VTech Holdings Limited
FPC boards/FPC subassemblies		Ichia Technologies Inc. Nitto Denko (HK) Ltd. NOK Corporation Sumitomo Chemical Co., Ltd. Fujikura Ltd.

Table of Contents

Many of our competitors have greater financial, technical, marketing, manufacturing, regional shipping capabilities, logistics support and personnel resources than we do. Consolidation among our competitors could result in even larger competitors emerging. As a result, we may be unable to compete successfully with these organizations in the future.

In addition to intense competition from large FPC board manufacturers located in Taiwan, China, Korea, Singapore, North America, Japan and Europe, we also face such competition from large, established EMS providers that have acquired or, like we have, developed their own FPC manufacturing capabilities, and have extensive experience in electronics assembly. Furthermore, many companies in our target customer base are moving the design and manufacturing of their products to original engineering manufacturers, or OEMs, in Asia. OEMs could create pressure on us to provide discounts or lower prices to gain or maintain market share, which could adversely affect our margins and the profitability of our FPC business and our operating results as a whole. In addition, if we are unable to capture significant original design manufacturers (ODMs) as customers, we may be unable to sustain or grow our FPC business.

Cancellations or delays in orders could materially and adversely affect our gross margins and operating results.

Our sales to OEMs are primarily based on purchase orders that we receive from time to time rather than firm, long-term purchase commitments. Although it is our general practice to purchase raw materials only upon receiving a purchase order, for certain customers we will occasionally purchase raw materials based on such customers' rolling forecasts. Further, during times of potential component shortages, we have purchased, and may continue to purchase, raw materials and component parts expecting that we will receive purchase orders for products that use these components. In the event actual purchase orders are delayed, are not received or are cancelled and we declined any other potential orders that may arise, we would experience increased inventory levels or possible write-offs of obsolete inventory, write-downs of raw materials inventory or the underutilization of our manufacturing capacity.

Our customers face numerous competitive challenges, such as rapid technological changes and short life cycles for their products, which may materially adversely affect both their business and ours.

Factors affecting the industries that utilize electronic components, and our customers specifically, could seriously harm our customers and, as a result, us. These factors include:

The inability of our customers to adapt to rapidly changing technology and evolving industry standards, which may result in short product life cycles;

The inability of our customers to develop and market their products, some of which are new and untested;

The potential that our customers' products may become obsolete or the failure of our customers' products to gain widespread commercial acceptance;

Recessionary periods in our customers' markets;

Increased competition among our customers and their respective competitors which may result in a loss of business, or a reduction in pricing power, for our customers; and

New product offerings by our customers' competitors may prove to be more successful than our customers' product offerings. If our customers are unsuccessful in addressing these competitive challenges, or any others that they may face, then their business may be materially adversely affected, and as a result, the demand for our services could decline.

Our business has been characterized by a rapidly changing mix of products and customers.

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

Since 2007, we have targeted markets that we believe offer significant growth opportunities and for which OEMs sell complex products that are subject to rapid technological change. We believe that markets involving complex, rapidly changing products offer us opportunities to produce products with higher margins because these products require higher value-added manufacturing services and may also include advanced components. We expect that our current mix of customers and products will continue to change rapidly, and we believe this to be relatively common in the EMS industry. If the products we manufacture for our customers become obsolete or less profitable and we are not able to diversify our product offerings or expand customer base in a timely manner, our business could be materially and adversely affected.

Table of Contents

There may not be a sufficient market for new products that our customers or we develop.

Our customers may not develop new products in a timely and cost-effective manner, or the market for products they choose to develop may not grow or continue in line with their expectations. This would reduce the overall businesses they outsource, which would seriously affect our business and operating results. Even if we develop capabilities to manufacture new products, there can be no guarantee that a market exists or will develop for such products or that such products will adequately respond to market trends. If we invest resources to develop capabilities to manufacture or expand capabilities for existing and new products, like our investments in our new factory in Wuxi, China and in the land in Guangming Hi-Tech Industrial Park in Shenzhen, China for which sales do not develop, our business and operating results could be seriously harmed. Even if the market for our services grows, it may not grow at an adequate pace.

We must spend substantial amounts to maintain and develop advanced manufacturing processes and engage additional engineering personnel in order to attract new customers and business.

We operate in a rapidly changing industry. Technological advances and the introduction of new products and new manufacturing and design techniques could materially and adversely affect our business unless we are able to adapt to those changing conditions. As a result, we are continually required to commit substantial funds for, and significant resources to, engaging additional engineering and other technical personnel and to purchase advanced design, production and test equipment. Our future operating results will depend to a significant extent on our ability to continue to provide new manufacturing solutions which, based on time to introduction, cost and performance with the manufacturing capabilities of OEMs and competitive third-party suppliers compare favorably to those offered by our competitors. Our success in attracting new customers and developing new business depends on various factors, including:

the utilization of advances in technology;

the development of new or improved manufacturing processes for our customers' products;

the delivery of efficient and cost-effective services; and

the timely completion of manufacturing of new products.

Our business is capital intensive and the failure to generate sufficient cash could require that we curtail capital expenditures.

To remain competitive, we must continue to make investments in capital equipment, facilities and technological improvements. We plan to finance our expansion with capital we generate from operations. If we are unable to generate sufficient funds to conduct existing operations and fund our expansion, we may have to curtail our capital expenditures. Any curtailment of our capital expenditures could result in a reduction in net sales, the reduction or elimination of dividends to shareholders, the reduced quality of our products, increased manufacturing costs for our products, harm to our reputation and reduced manufacturing efficiencies.

Our inability to obtain local government approvals to release or obtain lands needed for our planned expansion projects could limit our future manufacturing capacity and adversely impact our growth and potentially our financial results when our existing capacity is reached.

Currently, we have two separate projects planned for expansion, including:

the development of raw land in the Guangming Hi-Tech Industrial Park in Shenzhen, China that we acquired in 2007 into new manufacturing and support facilities to supplement our current manufacturing capabilities at our principal manufacturing facilities in Shenzhen, China; and

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

the acquisition and development of raw land adjacent to our recently operational manufacturing facility in Wuxi, China in order to construct buildings to support our operations in Wuxi, such as: dormitories, a canteen, a labor activity center, a research laboratory and testing and training centers.

All capital construction and expansion projects in China require a number of government approvals, which are subject to a variety of regulatory, economic and policy factors that are beyond our control. For example, although we fully paid the local government for the land use rights at our Guangming property in 2007, the government has delayed the release of this land to us and we have not been able to commence development of the property. In the case of our planned expansion in Wuxi, while the local Wuxi government has indicated to us that it strongly supports our expansion and development, it has been slow in providing the approvals and documentation necessary for us to consummate the acquisition of the land use rights and begin development.

We believe that the immediate expansion of our manufacturing facilities in Shenzhen is needed. We expect that our production capacity will be fully utilized by the end of 2012 at our principal manufacturing facilities in Shenzhen. Similarly, we expect that our existing Wuxi facilities will reach full capacity by 2013. In order to increase capacity and house additional workers at our Wuxi facilities, we believe we need to complete construction of the planned adjunct facilities by 2013.

Table of Contents

When we receive government approval, construction at Guangming and Wuxi could be further delayed by construction delays, equipment delays or shortages, labor shortages or disputes or other unexpected events. If we reach our manufacturing capacity before we are able to complete development of our planned expansion projects we may not be able to accept new customers or serve our existing customers adequately and could potentially lose them, either of which could harm our growth, profitability and financial results.

We generally do not have written agreements with suppliers to obtain components and our margins and operating results could suffer from price increases of components.

For certain customers, we are responsible for purchasing components used in manufacturing their products. We do not have written agreements with some of our suppliers of components and, in many cases, we bear the risk of cost increases. We may be unable to procure the required materials at a price level necessary to generate anticipated margins from the orders of our customers. Accordingly, increases in component prices could materially and adversely affect our gross margins and operating results.

Our business and operating results would be materially and adversely affected if our component suppliers fail to meet our needs.

At various times, we have experienced and expect to continue to experience, shortages of some of the electronic components that we use. Some of our component suppliers lack sufficient capacity to meet the demand for these components. In some cases, supply shortages and delays in deliveries of particular components have resulted in curtailed production, or delays in production, of assemblies using that component, which contributed to an increase in our inventory levels and reduction in our gross margins. We expect that shortages and delays in deliveries of some components will continue. If we are unable to obtain sufficient components on a timely basis, we may experience manufacturing delays, which could harm our relationships with current or prospective customers and reduce our sales. We also depend on a small number of suppliers for certain components that we use in our business. If we were unable to continue to purchase components from this group, our business and operating results could be materially and adversely affected.

We may be required to write down our long-lived assets and a significant impairment charge would adversely affect our operating results.

At December 31, 2011, we had \$161.3 million in long-lived assets on our balance sheet. The valuation of our long-lived assets requires us to make assumptions about future sales prices and sales volumes for our products. Our assumptions are used to forecast future undiscounted cash flows. Given the current economic environment, uncertainties regarding the duration and severity of these conditions, forecasting future business is difficult and subject to modification. If actual market conditions differ or our forecasts change, we may be required to reassess long-lived assets and we may have to record an impairment charge. Any impairment charge relating to long-lived assets would have the effect of decreasing our earnings or increasing our losses in such period. If we are required to take a substantial impairment charge, our operating results could be materially adversely affected in the periods and year in which the charge is incurred.

The PRC's labor law could penalize Nam Tai if it needs to make additional workforce reductions.

In June 2007, the National People's Congress of the PRC enacted new labor law legislation called the Labor Contract Law, which became effective on January 1, 2008. It formalizes workers' rights concerning overtime hours, pensions, layoffs, employment contracts and the role of trade unions. Considered one of the strictest labor laws in the world, among other things, this new law provides for an open-ended employment contract for any employee who either has worked for the employer for 10 years or more or has had two consecutive fixed-term contracts. An open-ended employment contract is a lifetime, permanent contract, which is terminable by the Company only in specific circumstances, such as a material breach by the employee of the employer's rules and regulations or for a serious dereliction of an employee's duty. Under the new law, a reduction in the workforce of 20% or more may occur only under specific circumstances, such as a restructuring undertaken pursuant to China's Enterprise Bankruptcy Law or where a company suffers serious difficulties in production and/or business operations. In addition, the new law requires that companies communicate with the labor union of the Company and the District Labor Bureau if the Company terminates the employment of 20 or more people at one time. We can expect to incur much higher costs under China's labor laws if we are forced in the future to downsize our workforce materially and such costs could have a material adverse effect on our financial results and financial condition.

Table of Contents

The economy of China has been experiencing significant growth, leading to inflation and increased labor costs. Any material increases in the labor costs for workers in the PRC may have a material and adverse effect on our financial operating results and profitability.

We generate all revenues from sales of products that we manufacture at our facilities in the PRC. The economy in China has grown significantly over the past 20 years, which has resulted in inflation and an increase in the average cost of labor, especially in the coastal cities. China's consumer price index, the broadest measure of inflation, rose 4.5% in January 2012 from the level in January 2011. The wages we pay our employees also increased substantially in 2011. At December 31, 2011, the average wage level of our direct labour workforce was approximately 27% higher than that at December 31, 2010. China's overall economy and the average wage in the PRC are expected to continue to grow.

Continuing inflation and material increases in the cost of labor in China could diminish our competitive advantage. Unless we are able pass on these increased labor costs to our customers by increasing prices for our products and services, our profitability and results of operations could be materially and adversely affected.

We are exposed to global business trends in the mobile phone industry, which could result in even lower gross margins on mobile phone components and subassemblies we manufacture.

During the year ended December 31, 2011, approximately 88% of our sales were derived from subassemblies and components for mobile phones. Accordingly, any fluctuations in the size of the mobile phone market, market trends, increased competition or pricing pressure in the mobile phone industry may affect our business and operating results. For example, the mobile phone industry has been experiencing rapid growth, particularly from emerging economies such as India and China. The growth in these markets, however, does not necessarily translate into increased margins or growing profits as mobile phones sold in developing countries are typically stripped down to basic features and sold for low prices. Competition in the emerging markets is fierce, even more intense than in developed markets. Accordingly, we expect that our margins and profitability from the components and assemblies we manufacture for use in mobile phones for emerging economies will continue to undergo severe pricing pressures, resulting in lower margins than we have experienced historically.

Our customers are dependent on shipping companies for the delivery of our products. Interruptions to shipping could materially and adversely affect our business and operating results.

Our customers rely on a variety of carriers for product transportation through various international ports. A work stoppage, strike or shutdown of one or more major ports or airports could result in shipping delays that could materially and adversely affect our customers, our business and our operating results. Similarly, an increase in freight surcharges from rising fuel costs or general price increases could materially and adversely affect our business and operating results.

The political, economic and legal uncertainties involved with operating an international organization could significantly harm us.

As of December 31, 2011, approximately 97.2% of the net book value of our total property, plant and equipment was located in China. We sell our products to customers in Hong Kong, North America, Europe, Japan, China and Southeast Asia. Our international operations are subject to significant political and economic risks and legal uncertainties, including:

changes in economic and political conditions and in governmental policies;

changes in international and domestic customs regulations;

wars, civil unrest, acts of terrorism and other conflicts;

changes in tariffs, trade restrictions, trade agreements and taxation;

limitations on the repatriation of funds because of foreign exchange controls;

exposure to political and financial instability;

currency exchange fluctuations, collection difficulties or other country-specific losses;

exposure to fluctuations in the value of local currencies;

changes in value-added tax reimbursement;

imposition of currency exchange controls; and

delays from customs brokers or government agencies.

Any of these risks could significantly harm our business, financial condition and operating results.

Table of Contents

Our operating results could be negatively impacted by seasonality.

Historically, our sales and operating results have been affected by seasonality. Sales of products and components related to mobile phones have generally been lower in the first quarter after peaking in the fourth quarter. Sales of educational products and home entertainment devices are often higher during the second and third quarters in anticipation of the start of the school year and the holiday season. Similarly, orders for consumer electronics products have historically been lower in the first quarter due to the closing of our factories in China for the Lunar New Year holidays and the general reduction in sales following the holiday season. These sales patterns may not be indicative of our future sales performance. For example, in 2009 as a result of the prevailing economic turmoil, many of our customers either postponed or cancelled orders that had been scheduled to be delivered for the holidays, which based on our historical seasonal patterns was unusual.

The long, national seasonal breaks in the PRC, such as the Chinese Lunar New Year holidays during the first quarter, and the National Day Golden week during the fourth quarter, typically adversely affect our ability to manufacture products, obtain components and materials from suppliers and receive and process orders from customers. Accordingly our results of operations during these periods can be expected to suffer.

Our results could be adversely affected with intensifying environmental regulations.

Our operations create environmentally sensitive waste. Our manufacturing process involves the use and disposal of chemicals, solid and hazardous waste and other toxic and hazardous materials. The disposal of hazardous waste has received increasing attention from Chinese national and local governments and foreign governments and agencies and is subject to increasing regulation. Currently, Chinese environmental protection laws and regulations impose fines on the discharge of waste materials and empower certain environmental authorities to close any facility that causes serious environmental problems. The costs of remedying violations or resolving enforcement actions that might be initiated by governmental authorities could be substantial. Any remediation of environmental contamination would involve substantial expense that could harm our operating results. In addition, we cannot predict the nature, scope or effect of future regulatory requirements to which our operations may be subject or the manner in which existing or future laws will be administered or interpreted. Future regulations may be applied to materials, products or activities that have not yet been subject to regulation. The costs of complying with new or more stringent regulations could be significant.

Global environmental legislation continues to emerge. These laws place increased responsibility and requirements on the producers of electronic equipment and, in turn, their EMS providers and suppliers. On July 1, 2006, the European Union's Restriction of Hazardous Substances (RoHS) came into effect. As a result, the use of lead and certain other specific substances in electronic products is restricted in the European Union. Where appropriate, we have transitioned our manufacturing processes and interfaced with suppliers and customers to review and secure RoHS compliance. In the event we are not in compliance with the RoHS requirements, we could incur substantial costs, including fines and penalties, as well as liability to our customers. In addition, our customers who were deemed exempt for certain substances, or beyond the scope of the legislation, are beginning to be impacted by the changing supply chain. In this respect, we may incur costs related to the portion of our inventory that contains these restricted substances. There are also European Union requirements with respect to the collection, recycling and management of electronic product and component waste. Under the European Union's Waste Electrical and Electronic Equipment (WEEE) directive, responsibility rests primarily with OEMs rather than with EMS companies. However, OEMs may turn to EMS companies such as Nam Tai for assistance in meeting their WEEE obligations. Failure by our customers to meet the RoHS or WEEE requirements or obligations could have a negative impact on their businesses and revenues which would adversely impact our financial results. Similar restrictions are being proposed or enacted in other jurisdictions, including China. We cannot currently assess the impact of these legislations on our operations.

Power shortages in China could affect our business.

We consume substantial amounts of electricity in our manufacturing processes at our production facilities in China. Certain parts of China, including areas where our manufacturing facilities are located, have been subject to power shortages in recent years. We have experienced a number of power shortages at our production facilities in China to date. Sometimes we are given advance notice of power shortages and, in response to the occurrence of power shortages we currently have a backup power system. However, there can be no assurance that in the future our backup power system will be completely effective in the event of a power shortage, particularly if that power shortage is over a sustained period of time and/or we are not given advance notice of it. Any power shortage, brownout or blackout for a significant period of time may disrupt our manufacturing, and as a result, may have an adverse impact on our business.

Table of Contents

Our insurance coverage may not be sufficient to cover the risks to our manufacturing facilities or related to our operations.

We have not experienced any major accidents in the course of our operations, which have caused significant property damage or personal injuries. However, there is no assurance that major accidents will not occur in the future. Although we have insurance against various risks, including a business interruption or losses or damages to our buildings, machinery, equipment and inventories, the occurrence of certain incidents such as major earthquakes, hurricanes, tsunamis, war, acts of terrorism, pandemics and flood, and their consequences, we may not be covered adequately, or at all, by our insurance. In the event of a major earthquake or other disaster affecting our manufacturing facilities, our operations and management information systems, which control our worldwide procurement, inventory management and shipping and billing activities, could be significantly disrupted. Such events could also delay or prevent product manufacturing and shipment for the time required to transfer production or repair, rebuild or replace the affected manufacturing facilities. This time frame could be lengthy and result in significant expenses for repair and related costs. Any extended inability to continue our operations at affected facilities following such an event would reduce our revenue and potentially damage our reputation as a reliable supplier.

We also face exposure to product liability claims in the event that any of our products are alleged to have resulted in property damage, bodily injury or other adverse effects. We have limited product liability insurance covering only some of our products. Losses incurred or payments we may be required to make in excess of applicable insurance coverage or for uninsured events or any material claim for which insurance coverage is denied, limited or is not available could have a material adverse effect on our business, operating results or financial condition.

We could become involved in intellectual property disputes.

We do not have any patents, licenses, or trademarks material to our business. Instead, we rely on trade secrets, industry expertise and our customers sharing their intellectual property with us. However, there can be no assurance that the intellectual property of our customers is their intellectual property. We may be notified that we are infringing patents, copyrights or other intellectual property rights owned by other parties. In the event of an infringement claim, we may be required to spend a significant amount of money to develop a non-infringing alternative or to obtain licenses. We may not be successful in developing such an alternative or obtaining a license on reasonable terms, if at all. Any litigation, even without merit, could result in substantial costs and the diversion of resources and could materially and adversely affect our business and operating results.

We depend on our executive officers and skilled personnel and, if we are unable to attract or retain personnel necessary to operate our business, our ability to perform our services and manufacture and market our products successfully could be harmed.

Our success depends largely upon the continued services of our executive officers as well as upon our ability to attract and retain qualified technical, manufacturing and marketing personnel. Generally, we have entered into employment agreements or non-competition agreements with our executive officers. However, we cannot assure you that we will be able retain our executive officers and we could be seriously harmed by the loss of any of our executive officers. The loss of service of any of these officers or key management personnel could have a material adverse effect on our business growth and operating results. Although we maintain key person life insurance for our executive officers, such coverage may not be adequate to protect us in the event of loss of such personnel. As our operations grow, we also need to recruit and retain additional skilled management personnel and if we are not able to do so, our business and our ability to grow could be harmed.

We have experienced high management and employee turnover at our manufacturing facilities in China, and are experiencing increased difficulty in recruiting employees for these facilities. In addition, we are noting the early signs of wage inflation, labor unrest and increased unionization in China and expect these to be ongoing trends for the foreseeable future, which could cause employee issues, including work stoppages, excessive wage increases and the formation of more active labor unions, at our China facilities. Virtually all of our employees work at our facilities in China, and the costs associated with hiring and retaining these employees has increased over the past several years and particularly during the last two years. The high turnover rate, our difficulty in recruiting and retaining qualified employees and the labor trends in China have resulted in an increase in our employee expenses. A continuation of any of these trends could result in even higher costs and production disruptions or delays, which may result in order cancellations and the imposition of customer penalties. If we were unable to perform manufacturing services and deliver our products on time, it could have a negative impact on our net sales and profitability.

Table of Contents

The PRC legal system has inherent uncertainties that could materially and adversely impact our ability to enforce the agreements governing our factories and to do business.

We occupy our manufacturing facilities under China land use agreements with agencies of the PRC government and we occupy other facilities under lease agreements with the relevant landlord. Our operations depend on our relationship with the local governments in the regions which our facilities are located and our landlords. Our operations and prospects could be materially and adversely affected by the failure of the local government to honor these agreements or an adverse change in the law governing them. In the event of a dispute, enforcement of these agreements could be difficult in China. Unlike the United States, China has a civil law system based on written statutes in which judicial decisions have limited precedential value. The government of China has enacted laws and regulations dealing with economic matters such as corporate organization and governance, foreign investment, commerce, taxation and trade. However, its experience in implementing, interpreting and enforcing these laws and regulations is limited, and our ability to enforce commercial claims or to resolve commercial disputes in China is unpredictable. These matters may be subject to the exercise of considerable discretion by agencies of the PRC government, and forces and factors unrelated to the legal merits of a particular matter or dispute may influence their determination.

Political or trade controversies between China and the United States could harm our operating results or depress our stock price.

The United States and PRC governments continue to disagree on some political issues. These occasional controversies could materially and adversely affect our business and operations. Political or trade friction between the two countries could also materially and adversely affect the market price of our shares, whether or not they adversely affect our business.

Changes to PRC tax laws and heightened efforts by the China's tax authorities to increase revenues have subjected us to greater taxes.

Under PRC law before 2008, we were afforded a number of tax concessions by, and tax refunds from, China's tax authorities on a substantial portion of our operations in China by reinvesting all or part of the profits attributable to our PRC manufacturing operations. However, on March 16, 2007, the Chinese government enacted a unified enterprise income tax law or EIT, which became effective on January 1, 2008. Prior to the EIT, as a foreign invested enterprise, or FIE, located in Shenzhen, China, our PRC subsidiaries enjoyed a national income tax rate of 15% and were exempted from the 3% local income tax. The preferential tax treatment given to our subsidiaries in the PRC as a result of reinvesting their profits earned in previous years in the PRC also expired on January 1, 2008. Under the EIT, most domestic enterprises and FIEs will be subject to a single PRC enterprise income tax rate of 25% in 2012 and afterward. For information on the EIT rates as announced by the PRC's State Council for the transition period until year 2012, please see the table in ITEM 5. Operating and Financial Review and Prospects on page 37 of this Report. We base our tax position upon the anticipated nature and conduct of our business and upon our understanding of the tax laws of the various administrative regions and countries in which we have assets or conduct activities. However, our tax position is subject to review and possible challenge by taxing authorities and to possible changes in law, which may have retroactive effect. We cannot determine in advance the extent to which some jurisdictions may require us to pay taxes or make payments in lieu of taxes.

We appear to have been a passive foreign investment company for 2011 and we may also be a passive foreign investment company for 2012, which could result in adverse U.S. federal income tax consequences for U.S. investors.

The determination of whether we are a passive foreign investment company, or PFIC, in any taxable year is made on an annual basis after the close of that year and depends on the composition of our income and the nature and value of our assets, including goodwill. Specifically, we will be classified as a PFIC if, after applying relevant look-through rules with respect to the income and assets of subsidiaries, either (i) 75% or more of our gross income for such taxable year is passive income, or (ii) 50% or more of the value of our assets (based on an average of the quarterly values of the assets during such year) is attributable to assets that either produce passive income or are held for the production of passive income (the PFIC asset test).

Based upon the nature and book value of our assets and the total market value, or market capitalization, of our shares (which reflects goodwill) at the end of each quarter during 2011, we appear to have been a PFIC for U.S. federal income tax purposes for 2011. We have not conducted an appraisal of the actual fair market value of our assets for 2011 or currently in 2012, and we cannot anticipate the market capitalization of our shares for 2012. Accordingly, we may be treated as a PFIC for 2012. Our characterization as a PFIC during any year could result in adverse U.S. federal income tax consequences for U.S. investors. For example, if we were a PFIC in 2011, in 2012 or in any other taxable year, U.S. investors who owned our common shares generally would be subject to increased U.S. tax liabilities and reporting requirements.

Table of Contents

Given the complexity of the issues regarding our classification as a PFIC, U.S. investors are urged to consult their own tax advisors for guidance as to our PFIC status. For further discussion of the adverse U.S. federal income tax consequences of from the classification as a PFIC see "Taxation - United States Federal Income Tax Consequences" beginning on page 67 of this Report.

Changes in foreign exchange regulations of China could adversely affect our operating results.

Some of our earnings are denominated in yuan, the base unit of the RMB. The People's Bank of China and the State Administration of Foreign Exchange (SAFE) regulate the conversion of RMB into foreign currencies. Under the current unified floating exchange rate system, the People's Bank of China publishes a daily exchange rate for RMB based on the previous day's dealings in the inter-bank foreign exchange market. Financial institutions may enter into foreign exchange transactions at exchange rates within an authorized range above or below the exchange rate published by the People's Bank of China according to the market conditions. Since 1996, the PRC government has issued a number of rules, regulations and notices regarding foreign exchange control designed to provide for greater convertibility of RMB. Under such regulations, any FIE must establish a current account and a capital account with a bank authorized to deal in foreign exchange. Currently, FIEs are able to exchange RMB into foreign exchange currencies at designated foreign exchange banks for settlement of current account transactions, which include payment of dividends based on the board resolutions authorizing the distribution of profits or dividends of the company concerned, without the approval of SAFE. Conversion of RMB into foreign currencies for capital account transactions, which include the receipt and payment of foreign currencies for loans and capital contributions, continues to be subject to limitations and requires the approval of SAFE. There can be no assurance that we will be able to obtain sufficient foreign currencies to make relevant payments or satisfy other foreign currency requirements in the future.

Changes in currency exchange rates involving the Japanese yen or RMB have and could continue to significantly affect our financial results.

Our financial results have been affected by currency fluctuations, resulting in total foreign exchange gains or losses during each of our three fiscal years ended December 31 as indicated in the following chart:

Our operating costs and financial results have been adversely affected by the appreciation of the RMB to the U.S. dollar because operating costs, which include labor costs, are denominated in RMB. Future appreciation of the Japanese yen against the U.S. dollar would increase our costs and could adversely affect our margins and financial results unless we made sufficient sales in Japanese yen to offset the costs and expenses, including material purchases, we incur in Japanese yen.

We sell most of our products in U.S. dollars and pay our expenses in U.S. dollars, Japanese yen, Hong Kong dollars and RMB. While we face a variety of risks associated with changes among the relative value of these currencies, we believe the most significant exchange risk presently results from the costs and expenses we pay in RMB and Japanese yen, and material purchases we make, in Japanese yen.

Table of Contents

The appreciation and depreciation of the RMB compared to the U.S. dollar increases and decreases our costs and expenses to the extent paid in RMB, respectively. Approximately 18%, 17% and 19% of our total costs and expenses and 9%, 7% and 9% of our material costs were in RMB during the years ended December 31, 2009, 2010 and 2011, respectively.

Similarly, the appreciation and depreciation of the Japanese yen as compared to the U.S. dollar increases and decreases our costs and expenses to the extent paid in yen, respectively. Approximately 18%, 24% and 5% of our total costs and expenses and 14%, 29% and 6% of our material costs were in Japanese yen during the years ended December 31, 2009, 2010 and 2011, respectively. However, we make substantial sales denominated in Japanese yen, which mitigates the effects of fluctuations in the yen-U.S. dollar exchange ratio on our financial results. Approximately 12%, 23% and 5% respectively, of our total net sales were made in Japanese yen during the years ended December 31, 2009, 2010 and 2011, respectively.

A future material appreciation of the Japanese yen against the U.S. dollar would increase our costs when translated into U.S. dollars and could adversely affect our margins and financial results unless we made sufficient sales in Japanese yen to offset against material purchases and other costs we paid in Japanese yen.

If we pass the effect of increases in the RMB and/or Japanese yen relative to the U.S. dollars to our customers through price increases it would make our products more expensive. This could result in the loss of customers, who may seek, and be able to obtain, products and services comparable to those we offer in lower-cost regions of the world. If we did not increase our prices to pass on the effect of increases in the RMB or Japanese yen relative to the U.S. dollars, our margins and profitability could suffer.

Nam Tai's declaration and payment of dividends is not assured. We declared no dividends for 2009 and 2010. Although our Board has resumed dividends for 2011 and 2012, we may not declare or pay dividends thereafter.

Before 2009, we had a long history of paying dividend. In February 2009, our board of directors decided not to declare a dividend. In February 2010, our board of directors also decided not to declare a dividend. The board of directors decided not to declare a dividend in 2009 and 2010 in order to maintain our cash reserves during a period of global economic turmoil. The Company resumed the payment of quarterly dividends of \$0.05 and \$0.07 per share for 2011 and 2012 respectively. The payment of dividends in 2011 and 2012 does not necessarily mean that dividend payments will continue thereafter. Whether future dividends will be declared will depend on our future growth and earnings and our cash flow needs for future expansion. Our growth, earning or cash flow needs may be adversely affected by one or more of the factors discussed in this section of our Report or by other factors. There can be no assurance that cash dividends on the Company's shares will be declared for years after 2012, what the amounts of such dividends will be or whether such dividends, once declared for a specific period, will continue for any future period, or at all. For additional information on the dividends we have declared for 2012 and historically, please see ITEM 8. Dividends on page 62 of this Report.

Payment of dividends by our subsidiaries in the PRC to our subsidiaries outside of the PRC and to us, as the ultimate parent, is subject to restrictions under PRC law. If we determine to continue our payment of dividends to our shareholders, the PRC tax law could force us to reduce the amount of dividends we have historically paid to our shareholders or possibly eliminate our ability to pay any dividends at all.

Under PRC law, dividends may only be paid out of distributable profits. Distributable profits with respect to our subsidiaries in the PRC refers to after-tax profits as determined in accordance with accounting principles and financial regulations applicable to PRC enterprises (China GAAP) less any recovery of accumulated losses and allocations to statutory funds that we are required to make. Any distributable profits that are not distributed in a given year are retained and available for distribution in subsequent years. The calculation of distributable profits under China GAAP differs in many respects from the calculation under U.S. GAAP. As a result, our subsidiaries in PRC may not be able to pay a dividend in a given year as determined under U.S. GAAP. China's tax authorities may also change the determination of income which would limit our PRC subsidiaries' ability to pay dividends and make other distributions.

Table of Contents

Prior to the EIT law, which became effective on January 1, 2008, PRC-organized companies were exempt from withholding taxes with respect to earnings distributions, or dividends, paid to shareholders of PRC companies outside the PRC. However, under the new EIT Law, dividends payable to foreign investors which are derived from sources within the PRC will be subject to income tax at the rate of 5% to 15% by way of withholding unless the foreign investors are companies incorporated in countries which have tax treaty agreements with the PRC and then the rate agreed by both parties will be applied. For example, under the terms of the tax treaty between Hong Kong and the PRC, which became effective in December 2006, distributions from our PRC subsidiaries to our Hong Kong subsidiary, will be subject to a withholding tax at a rate ranging from 5% to 10%, depending on the extent of ownership of equity interests held by our Hong Kong subsidiary in our PRC enterprises. As a result of this new PRC withholding tax, amounts available to us in earnings distributions from our PRC enterprises will be reduced. Since we derive most of our profits from our subsidiaries in PRC, the reduction in amounts available for distribution from our PRC enterprises could, depending on the income generated by our PRC subsidiaries, force us to reduce, or possibly eliminate, the dividends we have paid to our shareholders historically. For this reason, or other factors, we may decide not to declare dividends in the future. If we do pay dividends, we will determine the amounts when they are declared and even if we do declare dividends in the future, we may not continue them in any future period.

The market price of our shares will likely be subject to substantial price and volume fluctuations.

The markets for equity securities have been volatile and the price of our common shares has been and could continue to be subject to wide fluctuations in response to variations in our operating results, news announcements, trading volume, sales of common shares by our officers, directors and our principal shareholders, customers, suppliers or other publicly traded companies, general market trends both domestically and internationally, currency movements and interest rate fluctuations. Other events, such as the issuance of common shares upon the exercise of our outstanding stock options could also materially and adversely affect the prevailing market price of our common shares.

Further, the stock markets have often experienced extreme price and volume fluctuations that have affected the market prices of the equity securities of many companies and that have been unrelated or disproportionate to the operating performance of such companies. These fluctuations may materially and adversely affect the market price of our common shares.

Our senior management owns a large portion of our common stock allowing them to control or substantially influence the outcome of matters requiring shareholder approval.

On February 28, 2012, members of our senior management and board of directors as a group beneficially owned approximately 25.0% of our common shares. As a result, acting together, they may be able to control and substantially influence the outcome of all matters requiring approval by our shareholders, including the election of directors and approval of significant corporate transactions. This ability may have the effect of delaying or preventing a change in control of Nam Tai, or causing a change in control of Nam Tai that may not be favored by our other shareholders.

Regulatory initiatives in the United States, such as the Dodd-Frank Act and the Sarbanes-Oxley Act have increased, and may continue to increase the time and costs of being a U.S. public company and any further changes would likely continue to increase our costs.

In the United States, changes in corporate governance practices due to the Dodd-Frank Act and the Sarbanes-Oxley Act, changes in the continued listing rules of the New York Stock Exchange, new accounting pronouncements and new regulatory legislation, rules or accounting changes have increased the cost of being a U.S. public company and may have an adverse impact on our future financial position and operating results. These regulatory changes and other legislative initiatives have made some activities more time-consuming and have increased financial compliance and administrative costs for public companies, including foreign private issuers like Nam Tai. In addition, any future changes in regulatory legislation, rules or accounting may cause our legal and accounting costs to further increase. In addition, these new rules and regulations require increasing time commitments and resource commitments from our company, including from senior management. This increased cost could negatively impact our earnings and have a material adverse effect on our financial position results of operations.

Table of Contents

Due to inherent limitations, there can be no assurance that our system of disclosure and internal controls and procedures will be successful in preventing all errors or fraud, or in informing management of all material information in a timely manner.

Our management, including the Acting Chief Executive Officer and the Chief Financial Officer, does not expect that our disclosure controls and internal controls and procedures will prevent all errors and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system reflects that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been or will be detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur simply because of error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control.

The design of any system of controls is also based in part upon certain assumptions about the likelihood of future events. There can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, a control may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur or may not be detected.

There are inherent uncertainties involved in estimates, judgments and assumptions used in the preparation of financial statements in accordance with U.S. GAAP. Any changes in estimates, judgments and assumptions could have a material adverse effect on our business, financial position and results of operations.

The consolidated financial statements included in the periodic reports we file with the SEC are prepared in accordance with U.S. GAAP. The preparation of financial statements in accordance with U.S. GAAP involves making estimates, judgments and assumptions that affect reported amounts of assets (including intangible assets), liabilities and related reserves, revenues, expenses and income. Estimates, judgments and assumptions are inherently subject to changes in the future, and any such changes could result in corresponding changes to the amounts of assets, liabilities, revenues, expenses and income. Any such changes could have a material adverse effect on our financial position and results of operation.

It may be difficult to serve us with legal process or enforce judgments against our management or us.

We are a British Virgin Islands holding corporation with subsidiaries in Hong Kong and China. Substantially, all of our assets are located in the PRC. In addition, most of our directors and executive officers reside within the PRC or Hong Kong, and substantially all of the assets of these persons are located within the PRC or Hong Kong. It may not be possible to effect service of process within the United States or elsewhere outside the PRC or Hong Kong upon our directors, or executive officers, including effecting service of process with respect to matters arising under United States federal securities laws or applicable state securities laws. The PRC does not have treaties providing for the reciprocal recognition and enforcement of judgments of courts with the United States and many other countries. As a result, recognition and enforcement in the PRC of judgments of a court in the United States or many other jurisdictions in relation to any matter, including securities laws, may be difficult or impossible. An original action may be brought against our assets and our subsidiaries, our directors and executive officers in the PRC only if the actions are not required to be arbitrated by PRC law and only if the facts alleged in the complaint give rise to a cause of action under PRC law. In connection with any such original action, a PRC court may award civil liability, including monetary damages.

No treaty exists between Hong Kong or the British Virgin Islands and the United States providing for the reciprocal enforcement of foreign judgments. However, the courts of Hong Kong and the British Virgin Islands are generally prepared to accept a foreign judgment as evidence of a debt due. An action may then be commenced in Hong Kong or the British Virgin Islands for recovery of this debt. A Hong Kong or British Virgin Islands court will only accept a foreign judgment as evidence of a debt due if:

the judgment is for a liquidated amount in a civil matter;

the judgment is final and conclusive;

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

the judgment is not, directly or indirectly, for the payment of foreign taxes, penalties, fines or charges of a like nature (in this regard, a Hong Kong court is unlikely to accept a judgment for an amount obtained by doubling, trebling or otherwise multiplying a sum assessed as compensation for the loss or damage sustained by the person in whose favor the judgment was given);

the judgment was not obtained by actual or constructive fraud or duress;

the foreign court has taken jurisdiction on grounds that are recognized by the common law rules as to conflict of laws in Hong Kong or the British Virgin Islands;

Table of Contents

the proceedings in which the judgment was obtained were not contrary to natural justice (i.e. the concept of fair adjudication);

the proceedings in which the judgment was obtained, the judgment itself and the enforcement of the judgment are not contrary to the public policy of Hong Kong or the British Virgin Islands;

the person against whom the judgment is given is subject to the jurisdiction of a foreign court; and

the judgment is not on a claim for contribution in respect of damages awarded by a judgment, which fall under Section 7 of the Protection of Trading Interests Ordinance, Chapter 7 of the Laws of Hong Kong.

Enforcement of a foreign judgment in Hong Kong or the British Virgin Islands may also be limited or affected by applicable bankruptcy, insolvency, liquidation, arrangement and moratorium, or similar laws relating to or affecting creditors' rights generally, and will be subject to a statutory limitation of time within which proceedings may be brought.

Future issuances of preference shares could materially and adversely affect the holders of our common shares or delay or prevent a change of control.

Our Board of Directors may amend our Memorandum and Articles of Association without shareholder approval to create from time to time, and issue, one or more classes of preference shares (which are analogous to preferred stock of corporations organized in the United States). While we have never issued any preference shares and we have none outstanding, we could issue preference shares in the future. Future issuance of preference shares could materially and adversely affect the rights of the holders of our common shares, or delay or prevent a change of control.

We incurred substantial expenses and costs in privatizing Nam Tai Electronic & Electrical Products Limited. It may require a number of years to realize the benefits from owning 100% of NTEEP.

In November 2009, we successfully completed the privatization of Nam Tai Electronic & Electrical Products Limited, or NTEEP, by tendering for and acquiring the 25.12% of NTEEP that we did not previously own. As a result of the acquisition, NTEEP became our wholly owned subsidiary. During the year ended December 31, 2009, we expended approximately \$44.3 million to acquire NTEEP's noncontrolling shares, including approximately \$0.9 million in professional fees and related expenses. We financed these expenditures with internally generated funds.

Although our acquisition of NTEEP has resulted in cost savings and the elimination of profit sharing with NTEEP's noncontrolling shareholders, which improved our financial results during the years ended December 31, 2010 and 2011, we will only benefit from this acquisition to the extent NTEEP's operations remain profitable. Even if NTEEP's future operating results remain profitable, it may take a number of years before NTEEP's net income that was attributable to the noncontrolling interests and the overhead costs saved from NTEEP's privatization equal the costs and expenses of acquiring that interest.

Our status as a foreign private issuer in the United States exempts us from certain of the reporting requirements under the Securities Exchange Act of 1934 and corporate governance standards of the New York Stock Exchange, or NYSE limiting the protections and information afforded to investors.

We are a foreign private issuer within the meaning of the rules promulgated under the Securities Exchange Act of 1934, as amended (the Exchange Act). As such, we are exempt from certain provisions applicable to public companies in the United States, including:

the rules under the Exchange Act requiring the filing with the SEC of quarterly reports on Form 10-Q, current reports on Form 8-K or annual reports on Form 10-K;

the sections of the Exchange Act regulating the solicitation of proxies, consents or authorizations in respect of a security registered under the Exchange Act or disclosures required in a proxy statement in accordance with rules therefor promulgated under the Exchange Act;

the provisions of Regulation FD aimed at preventing issuers from making selective disclosures of material information; and

the sections of the Exchange Act requiring insiders to file public reports of their stock ownership and trading activities and establishing insider liability for profits realized from any short-swing trading transaction (i.e. a purchase and sale, or sale and purchase, of the issuer's equity securities within less than six months).

Table of Contents

In addition, because the Company is a foreign private issuer, certain corporate governance standards of the NYSE that are applied to domestic companies listed on that exchange may not be applicable to us. For information regarding whether our corporate governance standards differ from those applied to US domestic issuers, see the discussion under "NYSE listed Company Manual Disclosure" in ITEM 6. Directors and Senior Management of this Report.

Because of these exemptions, investors are not afforded the same protections or information generally available to investors holding shares in public companies organized in the United States or traded on the NYSE. See footnote * on page 52 of this Report under the heading

"Compensation on an Individual Basis" for information and risks associated with disclosures we have made in this Report or may make in our proxy statements regarding compensation we have paid to our directors and senior managers on an individual basis.

Product quality issues could adversely affect our reputation and could impact our operating results.

The market for our products is characterized by rapidly changing technology and evolving industry standards. To remain competitive, we must continually introduce new manufacturing solutions. The products that we sell could contain defects in design or manufacture. Defects could also occur in the products or components that are supplied to us. There can be no assurance we will be able to detect and remedy all defects in the products we sell. Failure to do so could result in product recalls, product redesign efforts, lost revenue, loss of reputation, and significant warranty and other expenses to remedy.

ITEM 4. INFORMATION ON THE COMPANY

Corporate Information

Nam Tai Electronics, Inc. was founded in 1975 and moved its manufacturing facilities to China in 1980 to take advantage of lower overhead costs, lower material costs and competitive labor rates available. We relocated to Shenzhen, China in order to capitalize on the significant opportunities offered in southern China. We were reincorporated as a limited liability International Business Company under the laws of the British Virgin Islands in August 1987 (which was amended in 2004 as The British Virgin Islands Business Companies Act, 2004). Our PRC headquarters and our principal manufacturing and design operations are currently based in Shenzhen, China, approximately 30 miles from Hong Kong. Certain of our subsidiaries' offices are located in Hong Kong, which provide us access to Hong Kong's infrastructure of communication and banking facilities. Our corporate administrative matters are conducted in the British Virgin Islands through our registered agent, McNamara Corporate Services Limited, McNamara Chambers, P.O. Box 3342, Road Town, Tortola, British Virgin Islands. In 1978, Mr. Koo, the founder of the Company, began recruiting operating executives from the Japanese electronics industry. These executives brought years of experience in Japanese manufacturing methods, which emphasize quality, precision, and efficiency in manufacturing. A large portion of our senior and middle management currently includes Japanese professionals who provide technical expertise and work closely with both our Japanese component suppliers and customers.

Table of Contents

Major Events during 2011 to Date

During 2011, to simplify our corporate structure, we have taken the following actions:

Changing the name of Namtai Electronic (Shenzhen) Co., Ltd to Namtai Investment (Shenzhen) Co., Ltd (NTISZ) and transforming it into an investment holding company in the PRC in April 2011;

Changing the shareholder of NTISZ from Nam Tai Electronic & Electrical Products Limited to Nam Tai Electronics, Inc. in April 2011;

Changing the shareholder of Wuxi Zastron Precision-Flex Co., Ltd. (Wuxi Zastron-Flex) from Nam Tai Investment Limited to NTISZ in July 2011;

Changing Zastron Electronic (Shenzhen) Co., Ltd from a domestic enterprise to a wholly owned foreign enterprise in August 2011; and

Based on a strategic development agreement, Wuxi Zastron-Flex was recapitalized with an injection of \$32.3 million by NTISZ in August, October and November 2011.

Organizational Structure

The chart as below and on the next page shows our organizational structure of our principal subsidiaries at December 31, 2011.

Table of Contents

Table of Contents

Capital Expenditures

The following chart illustrates the amounts of our principal capital expenditures and divestitures (in thousands of dollars) during each of the past three years ended December 31:

Expenditures on property, plant and equipment

The following are capital expenditures we currently have planned for 2012:

\$43.4 million for a TFT LCD module assembly line;

\$7.7 million for setting up equipment and machinery for flex rigid boards manufacturing; and

\$5.0 million for land and building construction.

Our major capital expenditures in 2011 included:

\$64.9 million for machinery and lease hold improvements for a LCD module assembly;

\$7.0 million for machinery used for FPC boards and assemblies; and

\$4.6 million for commercial property in Hong Kong.

Our major capital expenditures in 2010 included:

\$3.2 million for machinery used mainly for the production of LCD and FPC Modules;

\$0.9 million for leasehold improvements as a result of two of our subsidiaries merging; and

\$0.5 million for other capital equipment.

Our major capital expenditures in 2009 included:

\$23.7 million for new factory construction in Wuxi;

\$0.5 million for machinery mainly used for the production of LCD modules; and

\$0.8 million for other capital equipment.

Our plans for capital expenditures are subject to change from time to time and could result from, among other things, our consummation of any significant acquisition or strategic investment opportunities, which we regularly explore, and prevailing economic conditions.

Business Overview

We are an electronics manufacturing and design services provider to a select group of the world's leading telecommunications and consumer electronic products OEMs. Through our EMS operations, we manufacture electronic components and subassemblies, including FPC boards, FPC board subassemblies, LCD panels, LCD modules, TFT display modules, RF modules, DAB modules, internet radio subassemblies, CMOS imaging sensor modules and PCB subassemblies. The components, modules and subassemblies are used in numerous electronic products, including mobile phones, IP phones, notebook computers, digital cameras, electronic toys, handheld video game devices and learning devices. We also manufacture finished products, including mobile phone accessories, home entertainment products and educational products. We assist our OEM customers in the design and development of their products and furnish full turnkey manufacturing services that utilize advanced manufacturing processes and production technologies.

Table of Contents

Our services include software, firmware, and hardware development, mechanical design, parts and components source and purchasing, product industrialization, and assembly into finished products or electronic subassemblies with full quality testing and assurance. These services are value-added and assist us in obtaining new business but do not represent a material component of our revenues. We also provide early supplier involvement in design service to develop proprietary products that are sold by our OEM customers using their brand name.

Our Customers

Historically, we have had substantial recurring sales from our existing customers. Approximately 99.2% of our 2011 net sales came from customers we provided services to in 2010. While we seek to diversify our customer base, a small number of customers currently generate a significant portion of our sales. Sales to our 10 largest customers accounted for 86.2%, 88.4% and 93.0% of our net sales during the years ended December 31, 2009, 2010 and 2011, respectively. Sales to customers accounting for 10% or more of our net sales in the years ended December 31, 2009, 2010 or 2011 (listed in order of our net sales during 2011) were as follows:

	Year ended December 31,		
	2009	2010	2011
Toshiba Mobile Display ⁽¹⁾	12.2%	24.7%	32.3%
Sony Mobile Display Corporation	*	16.7%	30.7%
Sharp Corporation	17.9%	11.9%	10.5%
Sony Computer Entertainment Europe Ltd.	10.2%	17.7%	10.4%
Epson Imaging Devices Corporation	23.0%	*	*

* Less than 10% of our total net sales during the year indicated.

(1) For the years ended December 31, 2009, 2010 and 2011, sales to Toshiba Mobile Display through an agent, Hikari Alphax Co., Ltd, represented 12.2%, 24.1% and 6.9% of net sales, respectively.

Our 10 largest OEM customers based on net sales during 2011 were the following (listed alphabetically):

Customer	Products
Anoto AB	Digital Pen
Flextronics (Nan Jing) Technology Co., Ltd.	LCD modules
Ryoyo Electro Hong Kong Limited	LCD modules
Sharp Corporation	LCD modules, FPC subassemblies and PCB modules
Siemens Enterprise Communications	LCD modules
Sony Computer Entertainment Europe Ltd.	Home entertainment products
Sony Mobile Display Corporation	LCD modules
Stanley Electric (Asia Pacific) Ltd.	LCD Panels for Automotive
Toshiba Mobile Display	LCD modules
Vtech Communications Ltd.	LCD modules

At any given time, different customers account for a significant portion of our business. Percentages of net sales to customers vary from quarter to quarter and from year to year and fluctuate depending on the timing of production cycles for particular products.

Sales to our OEM customers are based primarily on purchase orders we receive from time to time rather than fixed, long-term purchase commitments from our customers. Although it is our general practice to purchase raw materials only upon receiving a purchase order, for certain customers we will occasionally purchase raw materials based on such customers' rolling forecasts. Uncertain economic conditions and our general lack of long-term purchase commitments with our customers make it difficult for us to predict revenue accurately long term. Even in those cases where customers are contractually obligated to purchase products from us or repurchase unused inventory from us, we may elect not to enforce our contractual rights immediately because of the long-term relationships and for other business reasons. Instead we may negotiate accommodations with customers regarding particular situations.

Our Products

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

In 2008 and 2009, we managed our business using three reportable segments: telecommunication components assembly (TCA), consumer electronics and communication products (CECP) and LCD products (LCDP). In 2010, we reclassified the TCA and LCDP segments into the TCA segment to accurately reflect the nature and management of our operations. Currently, the Company operates and presents two business segments: TCA and CECP. The segment information in 2008 and 2009 has been restated in order to conform to the change in segment reporting in accordance with FASB ASC 280-10-50-34. The results of the former LCDP segment were included in the TCA segment in 2008 and 2009.

The TCA segment is focused on subassemblies of components such as LCD modules, radio frequency modules, digital audio broadcast modules, FPC subassemblies, FPC boards, and front light panels and back light panels for handheld video game devices. In addition, we manufacture LCD panels and LCD modules for various electronic appliances. The CECP segment is focused on the manufacturing of box-built products such as mobile phone accessories, entertainment devices, educational products and optical devices.

Table of Contents

Our net sales by reportable segments were as follows (\$ in thousands):

	Year ended December 31,					
	2009		2010		2011	
	Dollars	Percent	Dollars	Percent	Dollars	Percent
TCA	292,074	72%	401,259	75%	527,894	88%
CECP	116,063	28%	133,161	25%	74,423	12%
Total	408,137	100%	534,420	100%	602,317	100%

Please refer to Note 15 Segment Information of our consolidated financial statements and ITEM 8. Financial Information Export Sales which sets forth the information of net sales to customers by geographical area.

Consumer Electronic and Communication Products

The consumer electronic and communication products we manufacture are focused on high growth and mass volume product segments of the consumer electronics and communications sectors, and include:

Mobile phone accessories such as headsets containing Bluetooth wireless technology, snap-on portable music speakers, phone cradles, snap-on FM radio adaptors, and snap-on GPS adaptors;

Entertainment devices such as USB webcams for interactive games, USB microphone and converter boxes for Karaoke, and a buzzer device for quiz games, both in wire and wireless designs with an infrared solution;

Educational products such as digital pens, calculators and electronic dictionaries; and

Optical devices such as CMOS imaging sensor modules for notebook computers, portable media players and recording cameras for the automotive industry.

Telecommunication Component Assembly

We manufacture the following subassemblies and components:

Color and monochrome LCD modules to display information as part of telecommunication products such as PDA phones, smart phones and traditional mobile phones and telephone systems. These modules are also used in most other hand-held consumer electronic devices, such as electronic games, MP3 players, Automotive products and digital cameras;

RF modules for integration into mobile phones. RF modules are partially finished circuits that can be incorporated into larger products or components. Each module includes receivers, transmitters, and transceivers, and can be manufactured for use in hand-held consumer electronic products, such as PDAs, laptop computers and other products with wireless connectivity;

DAB modules are digital audio broadcasting components that are used in digital radio products such as home tuners, kitchen radios, in-car receivers, CD players, clock radios, boom boxes, midi-systems and handheld portable devices;

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

FPC subassemblies for integration into various LCD modules and electronic devices;

FPC board manufacturing for vertical integration to the FPC subassembly business, which are used for mobile phones, PDAs, office automation, laptop computers and other products that require a portable product design;

Front light panels for handheld video game devices;

Back light panels for handheld video game devices;

1.9 high-frequency cordless telephones and home feature phones;

Super high contrast monochrome vertical aligned Twisted Nematic LCD for applications in automotive parts and major appliances;
and

Wide temperature monochrome Super-Twisted Nematic (STN) LCD for application in major appliances.

Table of Contents

Our Manufacturing and Assembly Capabilities

We utilize the following production techniques:

Chip on Glass, or COG	a process that connects integrated circuits directly to LCD panels without the need for wire bonding. We apply this technology to produce advanced LCD modules for high-end electronic products, such as cellular phones and PDAs. These machines provide an LCD with a length of up to 200 millimeters by a width of up to 200 millimeters by a height of up to 2.2 millimeters, a process time of five seconds per chip, a pin pitch fine to 38 micrometers. During 2005, our subsidiary, Jetup also started manufacturing COG LCD modules. During 2010, Jetup was merged into Zastron Shenzhen. During the third quarter of 2011, Wuxi Zastron-Flex also expanded LCD module assembly and set up state of the art COG machines. As of December 31, 2011, Zastron Shenzhen and Wuxi Zastron-Flex had a total of 22 sets of COG machines. and is capable of bonding 10 million units of COG LCD modules a month with an accuracy of five microns tolerance, in a cycle time of 12-15 seconds per piece.
Chip on Board, or COB	a technology that utilizes wire bonding to connect large-scale integrated circuits directly to printed circuit boards. As of December 31, 2011, we had 11 COB aluminum bonding machines which provide a high speed chip bonding time of 0.25 second per 2 millimeters wire, a bond pad fine to 75 micrometers and a total production capacity of up to 3,829,000 (150 wires/board) per month. We use COB aluminum bonding in the assembly of consumer products such as digital pens, calculators, electronic dictionaries and audio products. We also had three COB gold ball bonding machines, which provide a high speed chip bonding time of 0.072 second per 2 millimeters wire, a bond pad fine to 50 micrometers and a total production capacity of up to 500,000 (150 wires/board) per month. We use COB gold ball bonding in CMOS camera modules, which are incorporated into USB cameras, notebook computers, mobile phones and digital pens.
Tape Automated Bonding With Anisotropic Conductive Film, or TAB With ACF	an advanced heat sealing technology that connects a liquid crystal display component with an integrated circuit in very small LCD modules, such as those used in cellular phones and pagers. As of December 31, 2011, Zastron Shenzhen had 33 systems of TAB with ACF machines. The machines provide a process time of 10 to 25 seconds per component, a pin pitch fine up to 150 micrometers and a total production capacity of up to 5,876,000 components per month. Zastron Shenzhen is able to bond LCD panels with a length of up to 120 millimeters by a width of up to 120 millimeters and a height of up to 2.2 millimeters, with an accuracy of 10 microns tolerance in a cycle time of 20-25 seconds per piece.
Fine Pitch Heat Seal Technology, or FPHS Technology	allows us to connect LCD displays to PCBs produced by COB and outer lead bonding that enables very thin connections. This method is highly specialized and is used in the production of finished products such as PDAs. As of December 31, 2011, we had eight machines utilizing FPHS technology. The machines provide a pin pitch fine to 260 micrometers and a total production capacity of up to 268,000 units per month.

Table of Contents

Surface Mount Technology, or SMT	a process by which electronic components are mounted directly on both sides of a printed circuit board, increasing board capacity, facilitating product miniaturization and enabling advanced automation of production. We use SMT for products such as mobile display modules and electronic linguistic devices. As of December 31, 2011, we had 30 SMT production lines. The production time per chip ranges from 0.055 second per chip to 0.8 second per chip and high precision ranging from +/-0.05 millimeter to +/-0.1 millimeter. The components size ranges from 0.4 millimeter long by 0.2 millimeter wide to 55 millimeters long by 55 millimeters wide. Ball grid array, or BGA, ball pitch is 0.4 millimeter and ball diameter is 0.2 millimeter. Flip Chip, our smallest lead/bump pitch, is 250/240UM and our smallest components spacing is 0.15 micrometers. The total production capacity is over 1 billion resistor capacitor chips per month.
Super-Twisted Nematic, or STN, Displays	a type of monochrome passive matrix LCD capable of providing higher information content to display systems. STN Displays are typically found in applications such as cordless phones, mobile phones, MP3 players, pocket games and PDAs. Our subsidiary, Zastron Shenzhen, through its predecessor, Jetup, began producing STN LCDs in 2002. Since 2005, our two existing twisted nematic, or TN type, LCD lines have been upgraded to STN LCD lines. TN displays rotate the director of the liquid crystal by 90 degrees, but STN LCD displays employ up to a 270 degree rotation. This extra rotation gives the crystal a much steeper voltage-brightness response curve and also widens the angle at which the display can be viewed before losing much contrast. As of December 31, 2011, Zastron Shenzhen was using two automated STN lines capable of producing both TN and STN type LCDs with capacity of 100,000 pairs of glass (each sheet of glass of 360 millimeters by 400 millimeters in size) panels per month.
LCD Back-End	a main manufacturing process for LCD panels, and is regarded as part of the process for its finished product LCD modules. It includes the precise pure water cleaning process, scribing of LCD glass, liquid crystal insertion, sealing process and breaking process, then turns the LCD mother glass into LCD panels. Our machines can cope with 0.2 millimeters + 0.2 millimeters LCD mother glass up to dimension of 550 millimeters by 670 millimeters, with cutting tolerance +/-0.1 millimeters.
As of December 31, 2011, we had 18 clean rooms (total area size of 214,438 square feet) at our principal manufacturing facilities, which housed COB, COF, COG and Chip Scale Package capabilities for CMOS sensor modules, electronic calculators, digital camera accessories, LCD panels and modules manufacturing, and FPC manufacturing.	

A clean room is an environment, typically used in manufacturing or scientific research, which has a low level of environmental pollutants such as dust, airborne microbes, aerosol particles and chemical vapors. In other words, a clean room has a controlled level of contamination that is specified by the number of particles per cubic meter at a specified particle size. Of our 18 clean rooms at December 31, 2011, 2 were class one hundred thousand, 7 were class ten thousand, 8 were class thousand and 1 was class one hundred with one of them used for cleaning attire provided for use in the clean rooms.

FPC boards and FPC Subassemblies

Flexible Printed Circuit Subassemblies. We began manufacturing FPC subassemblies in March 2003 for integration into various LCD modules. FPC subassemblies are FPC boards enhanced by attaching electronic components, such as connectors, switches, resistors, capacitors, light emitting devices, integrated circuits, cameras and optical sensors, to the circuit. The reliability of FPC component assemblies is dependent upon proper assembly design and the use of appropriate fixtures to protect the flex-to-connector interface. Connector selection is also important in determining the signal integrity of the overall assembly and is very important to devices that rely upon high system speed to function properly.

Flexible Printed Circuits. Flexible printed circuits, which consist of copper conductive patterns that have been etched or printed while affixed to flexible substrate materials such as polyimide or polyester, are used to provide connections between electronic components and as a substrate to support these electronic devices. The circuits are manufactured by subjecting the base materials to multiple processes, such as drilling, screening, photo imaging, etching, plating and finishing. Single-sided flexible printed circuits, which have an etched conductive pattern on one side of the substrate, are normally less costly and more flexible than double-sided flexible printed circuits because their construction consists of a single patterned conductor layer. Double-sided flexible printed circuits, which have conductive patterns or materials on both sides of the substrate that are interconnected by a drilled or copper-plated hole, can provide either more functionality than a single-sided flexible printed circuit by containing conductive patterns on both sides, or greater shielding of components against electromagnetic interference than a single-sided flexible printed circuit by covering one side of the circuit with a shielding material rather than a circuit pattern.

Table of Contents

FPC Boards. Flexible printed circuit boards or FPC Boards are applied to various electronic devices because of their mechanical characteristics and are indispensable to electronic devices requiring system miniaturization, weight reduction and multi-functionality. FPCs are employed in a wide variety of applications due to the nature of their characteristics. Examples of applications for FPCs include cell-phone liquid crystal display enclosures, hinge parts, keypads, battery enclosures and interface components. FPCs fall into three broad categories: single-sided flexible printed wiring boards, double-sided flexible printed wiring boards and multilayer flexible printed boards. Single sided and double sided FPCs are widely employed for personal computers, hard disk drives and cell phones.

We buy a portion of the FPC boards that we use in the manufacturing of our products from suppliers and attach electronic components to the purchased FPC boards in accordance with our customer's specifications and produce FPC subassemblies. Since 2007, we also began manufacturing these devices at our existing facility in Shenzhen to vertically integrate this process by producing FPC boards internally. Our Wuxi factory began manufacturing pilot runs of FPC boards and is moving to large scale manufacturing in 2010.

Quality Control

We maintain strict quality control programs for our products, including the use of total quality management systems and advanced testing and calibration equipment. Our quality control personnel test the quality of incoming raw materials and components. During the production stage, our quality control personnel also test the quality of our work-in-progress at several points in the production process. Finally, after the assembly stage, we conduct testing of finished products. In addition, we provide office space at our principal manufacturing facilities for representatives of our major customers to permit them to monitor production of their products and we provide them with direct access to our manufacturing personnel.

All of our existing manufacturing facilities are certified under ISO 9001 quality standards, the International Organization for Standardization, or ISO's, highest standards. The ISO is a Geneva-based organization dedicated to the development of worldwide standards for quality management guidelines and quality assurance. Our certifications under an ISO 9001 quality standard demonstrate that our manufacturing operations meet the most demanding ISO standards. All of our manufacturing facilities are also certified under an ISO 14001 environmental management standard, which was published in 2004 to provide a structured basis for environmental management control.

After the consolidation of our Shenzhen operations under Zastron Shenzhen in 2010, our quality assurance personnel embarked to integrate all management systems in Shenzhen into that single company. At the end of February 2012, Zastron Shenzhen has passed the following certifications:

ISO 9001:2008	Basic Quality Management System
ISO 14001:2004	Environmental Management System
QC080000:2005	Hazardous Substance Process Management System
OHASA18001:2007	Occupational Health & Safety Management System
TS16949:2009	Quality Management System specific for Automotive Products
ISO13485:2003	Quality Management System specific for Medical Products

In December 2009, our new factory in Wuxi was audited for compliance of ISO 9001 and TS16949. We received both certifications in March 2010. During 2010, we applied for other certifications for this plant, including QC08000 and ISO 14001, which we received in April and May 2010, respectively.

We employ the Six Sigma approach in various projects that we run each year. In 2004, our principal manufacturing facilities in Shenzhen were recognized by the Chinese Government as a National Advanced Enterprise for the Promotion of Six Sigma. Six Sigma is an internationally recognized approach that uses facts and data to develop better solutions, thereby reducing defects and production times, and improving customer satisfaction. This approach allows the Company to lower its costs by minimizing manufacturing defects. Our use of Six Sigma has resulted in improved profit margins and higher competitiveness.

Our Suppliers

We purchase thousands of different component parts from numerous suppliers, which we have approved based on their quality, cost and services. For some components, we have chosen, for strategic reasons, to rely on a single supplier. We purchase components from suppliers located in Japan, China and other countries. Our general practice is to purchase components upon receipt of purchase orders from customers and pursuant to the customer's authorization in order to minimize our inventory risk. However, we may occasionally purchase raw materials or request suppliers to maintain buffer stock of certain supplies for particular customers based on such customer's rolling forecasts in order to

shorten the lead-time for key materials.

Table of Contents

The major component parts we purchase include the following:

Integrated circuits or chips, most of which we purchase presently from Cambridge Silicon Radio Plc Ltd., Qualcomm CDMA Technologies Asia Pacific Pte. Ltd., Toshiba Electronics (Asia) Ltd., Ricoh Co., Ltd., ATI Technologies Ltd., Rohm Electronics (HK) Co., Ltd., Samsung Electronics., Ltd., Sharp Electronics (M) SDN.BHD and certain of their affiliates;

LCD panels, which are available from many manufacturers. Since 2007, we have purchased LCD panels from Suzhou Epson Co., Ltd., Safaring Technology Co., Ltd., Toshiba Matsushita Display Co., Ltd., Shantou Goworld Display (Plant II) Co., Ltd., and VBest Electronics Ltd.;

FPC boards, which consist of copper conductive patterns that have been etched or printed while affixed to flexible substrate materials such as polyimide or polyester, are mainly used to provide connections for electronic components and as a substrate to support these electronic devices. Since 2007, we have purchased FPC boards mainly from Sony Chemical Co., Ltd., Nitto Denko (HK) Co., Ltd. and NOK Mektec Corp. Ltd.;

Light-emitting diodes, or LEDs, are semiconductor devices that emit incoherent narrow-spectrum light when electrically biased in the forward direction. This effect is a form of electroluminescence. LEDs are small extended sources with extra optics added to the chip, which emit a complex intensity spatial distribution. We purchase LEDs primarily from Nichia Corporation and Everlight Electronics Co., Ltd.; and

CMOS imaging sensors, which we purchase mainly from Omnivision Technologies Inc., Micron Technology Inc. and MagnaChip Semiconductor Ltd. Solar cells and batteries, which are standard off-the-shelf items that we generally purchase in Hong Kong from agents of Japanese manufacturers or directly from companies in China; various mechanical components such as plastic parts, cables, rubber keypads, PCBs, indium tin oxide, or ITO, glass used in the production of LCD panels, and packaging materials from various local suppliers in China; and various acoustic components, which we mainly sourced from Wanstonic Electronics Ltd, Yinpin Electronics (SZ) Co., Ltd., Goertek Technology Co., Ltd., Shandong Gettop Acoustic Co., Ltd. and Vansonic Enterprise Co., Ltd.

Whenever practical, we will consider using domestic Chinese suppliers who are often able to provide their products at lower cost than overseas suppliers and with shorter lead times.

From time to time, there may be certain components subjected to limited allocation by certain of our suppliers due to industry-wide shortage as a result of fast growing global demand.

In some cases, supply shortages and delays in deliveries of particular components could result in curtailed production, or delays in production. These supply shortages have contributed to an increase in our inventory levels and reductions in our margins. We expect that occasional component shortages and delays in deliveries of some components will continue to occur. If we are unable to procure sufficient quantity components in a timely fashion, we may experience production delays, which could harm our relationships with current or prospective customers and reduce our sales.

The principal raw materials used by the Company are large scale integrated, or LSI, circuits, digital signal processors, or DSP, LCD driver IC semiconductors, FPC boards, LCD panels, TFT panels and batteries. At times, the pricing and availability of these raw materials can be volatile, attributable to numerous factors beyond the Company's control, including general economic conditions, currency exchange rates, industry cycles, production levels or a supplier's tight supply. In the past, we have asked our customers to share the increased costs of raw materials where such increased costs would adversely affect the Company's business, results of operations and financial condition. Our customers have generally agreed when so requested in the past. We cannot provide assurances, however, that our customers will agree to share costs in the future and that our business, results of operations and financial condition would not be adversely affected by increased volatility in the price or availability of raw materials.

Production Scheduling

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

The typical cycle for a product to be designed, manufactured and sold to an OEM customer is one to two years, which includes the production period, the development period and the period for market research and data collection (which is undertaken primarily by our OEM customers). Initially, an OEM customer gathers data from its sales personnel on products for which there is market interest, including features and unit costs. The OEM customer then contacts us, and possibly other prospective manufacturers, with forecasted total production quantities and design specifications or renderings. From that information, we in turn contact our suppliers and determine estimated component and material costs. We later advise our OEM customer of the development costs, charges (including molds, tooling and software design, if applicable) and unit cost based on the forecasted production quantities desired during the expected production cycle.

Table of Contents

Once we have agreed with the OEM customer on the quotation for the development costs and the unit cost, we begin the product development if we are engaged to do so. This development period typically lasts less than six months, but may be longer if software design is included. During this time, we complete all molds, tooling and software required to manufacture the product with the development costs generally borne by our customer. Upon completion of the molds, tooling and software, we produce samples of the product for the customer's quality testing, and, once approved, commence mass production of the product. We recover the development costs in relation to molds, tooling and software from our customers.

The production period usually lasts approximately six to twelve months. In some cases, our OEM customer handles all product design and development and engages us only at the point of initial production. Typically, more advanced products have shorter production runs. If total production quantities change, the OEM customer often provides only limited notice before discontinuing orders for a product. At any point in time we may be in different stages of the development and production periods for the various models under development or in production for our OEM customers.

Generally, our production is based on purchase orders received from OEM customers. Purchase orders are often supported by letters of credit or written confirmation from the OEM customer and generally may not be cancelled once confirmed without the mutual consent of the parties. Even in those cases where customers are contractually obligated to purchase products from us or repurchase unused inventory from us, we may elect not to enforce our contractual rights immediately because of the long-term nature of our customer relationships and for other business reasons, and instead may negotiate accommodations with customers regarding particular situations.

In general, we plan for and purchase the materials and components that we will need to manufacture customers' products when we receive the purchase order and specifications from the customer. We are assisted in this process by our ERP software system which several of our manufacturing subsidiaries began installing during 2008 and 2009. Installation of our subsidiaries' ERP software system was completed in the first half of 2009. The ERP software system includes related integrated applications for managing worldwide procurement and logistics business processes, customer relationships, product life-cycle and supplier relationships and helps us and our customers assure that the materials and components needed to manufacture our customers' products arrive at our manufacturing facilities on time to meet production and product delivery schedules. Since our customers are involved in the procurement and delivery of the materials and components we use to manufacture their products, our customers assume the risk of delays or failures of delivery of such materials and components.

We did not suffer a material loss resulting from the cancellation of OEM customer orders for the years ended December 31, 2009, 2010 or 2011.

Sales and Marketing

We focus on developing close relationships with our customers at the development and design phases and throughout all stages of production. We identify, develop and market new products and technologies that benefit our customers and position us as a strong EMS provider with the ability to design and develop products.

Sales and marketing operations are integrated processes involving direct salespersons, project managers and senior executives. We direct our sales resources and activities at several management and staff levels within our customers and prospective customers. We receive unsolicited inquiries resulting from word of mouth, from public relations activities, and through referrals from current customers. We evaluate these opportunities against our customer selection criteria and evaluation procedure. Upon approval, we assign a salesperson to the customer.

Seasonality

Historically, our sales and operating results have often been affected by seasonality. Sales of products and components related to mobile phones have generally been lower in the first quarter after peaking in the fourth quarter. Sales of educational products and home entertainment devices are often higher during the second and third quarters in anticipation of the start of the school year and the holiday season. Similarly, consumer electronics products have historically been lower in the first quarter resulting from both the closing of our factories in China for the Lunar New Year holidays and the general reduction in sales following the holiday season.

The long, national seasonal breaks in the PRC, such as the Chinese Lunar New Year holidays occurring in the first quarter and the National Day Golden week occurring in the fourth quarter, typically adversely affects our ability to manufacture products, obtain components and materials from suppliers and receive and process orders from customers and accordingly our results of operations during these period can be expected to suffer.

Transportation

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

Transportation of components and finished products to and from Shenzhen is by truck. Component parts purchased from Japan, Korea, Singapore and elsewhere of the world are generally shipped by air and delivered to our designated forwarders' warehouse located in Hong Kong. To date, we have not been materially impacted by any transportation problems. However, transportation difficulties affecting air cargo or shipping, such as an extended closure of ports that materially disrupt the flow of our customers' products into the United States, could significantly and adversely influence our sales and margins if, as a result, our customers delay or cancel orders or seek concessions to offset expediting charges they incur pending resolution of the problems causing the port closures.

Table of Contents**Competition**

The electronic manufacturing services we provide are available from many independent sources as well as from our current and potential customers with internal manufacturing capabilities. The following table identifies those companies who we believe are our principal competitors (listed alphabetically) by category of products or services we provide.

Product/Service	Competitor
EMS	Celestica, Inc. Flextronics International Ltd. Hon Hai Precision Industry Co., Ltd. Jabil Circuit, Inc. Sanmina-SCI Corporation
Image capturing devices and their modules	Altus Technology Inc. (controlled by Foxconn) Lite-on Technology Corporation Logitech International S.A. The Primax Group
Mobile phone accessories	Balda-Thong Fook Solutions Sdn., Bhd. Celestica, Inc. Elcoteq Network Corporation Flextronics International Ltd. Foster Corporation Foxlink Group Merry Electronics Co., Ltd. WKK International (Holdings) Ltd.
Liquid crystal display, or LCD panels	Tianma Microelectronics Co., Ltd. Truly International Holdings Ltd. Varitronix International Ltd. Yeebo (International) Holdings Ltd.
Telecommunication subassemblies and components	Flextronics International Ltd. LG. Philips LCD Co., Ltd. Samsung Electronics Varitronix International Ltd.
Consumer electronic products (calculators, personal organizers and linguistic products)	Computime Limited Inventec Co., Ltd. Kinpo Electronics, Inc. VTech Holdings Limited
FPC boards/FPC Subassemblies	Ichia Technologies Inc. Nitto Denko (HK) Ltd. NOK Corporation Sumitomo Chemical Co., Ltd. Fujikura Ltd.

Many of our competitors have greater financial, technical, marketing, manufacturing, regional shipping capabilities and international logistics support and personnel resources than we do. As a result, Nam Tai positions itself as a competitive-priced EMS with niches in key product and technology categories focusing on advanced manufacturing technique and processes as well as design and development capabilities in these niche areas to compete successfully against with these organizations.

In addition to intense competition from large FPC board manufacturers located in Taiwan, China, Korea, Singapore, North America, Japan and Europe, such as those listed in the above table opposite FPC boards/FPC subassemblies, we also face such competition from large, established EMS providers that have acquired or, like we have, developed their own FPC manufacturing capabilities, and have extensive experience in electronics assembly. Furthermore, many companies in our target customer base are moving the design and manufacturing of their products to original engineering manufacturers, or OEMs, in Asia. These changes could create pressure on us to provide discounts or lower prices to gain or

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

maintain market share, which could adversely affect our margins and the profitability of our FPC business and our operating results as a whole. In addition, if we are unable to capture significant original design manufactures (ODMs) as customers, we may be unable to sustain or grow our FPC business.

Table of Contents

Research and Development

We invest in research and development for developing products, manufacturing and assembly technology that provide us with the potential to offer better and more technologically advanced services to our OEM customers or assist us in working with our OEM customers and in the design and development of future products. We plan to continue acquiring advanced design equipment and to enhance our technological expertise through continued training of our engineers and further hiring of qualified system engineers. These investments are intended to improve the speed, efficiency, costs and quality of our assembly processes.

Additionally, we are responsible for the design and development of new products specified by our customers. We sell these products to OEM customers to be marketed to end users under the customers' brand names. To date, we have successfully developed LCD modules, CMOS sensor camera modules, mobile phone accessories and game peripherals for our customers.

Patents, Licenses and Trademarks

We do not have any patents, licenses or trademarks on which our business is substantially dependent. Instead, we rely on our industry expertise, knowledge of niche products and technology and strong long-term relationships with our customers and suppliers.

Property, Plant and Equipment

Our registered office in the British Virgin Islands is located at McNamara Chambers, P.O. Box 3342, Road Town, Tortola. Corporate administrative matters in the British Virgin Islands are conducted at this office through our registered agent, McNamara Corporate Services Limited.

The table below lists the locations, square footage, principal use and the expiration dates of leases or land use rights on the facilities used in our principal operations as of December 31, 2011:

Location	Approximate Square Footage	Principal or Presently Contemplated Use	Owned ⁽¹⁾ or lease expiration date
<i>Principal Facilities</i>			
Hong Kong	2,200	Administration	Owned
Shenzhen, China	557,835	Principal manufacturing facilities	2043/2049 ⁽²⁾
	87,460	Administration	2043/2049 ⁽²⁾
	350,585	Dormitories	2043/2049 ⁽²⁾
	41,530	Cafeteria	2043
	33,825	Recreational	2049
<i>Other existing facilities</i>			
Shenzhen, China	134,549	Manufacturing LCD panels and modules	2014 ⁽³⁾
Wuxi, Jiangsu Province, China	470,360	FPC boards and FPC subassemblies, LCD modules and other products	2056 ⁽⁴⁾
<i>Other property</i>			
Guangming, Shenzhen, China	1,270,160	LCD modules and other products	2057 ⁽⁵⁾

- (1) Only the PRC government and peasant collectives may own land in China. Our principal manufacturing facilities are located on land in which we have entered into a land lease agreement with the PRC government that gives us the right to use the land for 50 years. Similarly, the lands which we have acquired in Wuxi and Guangming Shenzhen will be by 50-year land leases. Our understanding of the practice as it exists today; at the expiration of the land lease, we may be given the right to renew the lease. For our other facilities, we have entered into factory building lease agreements with peasant collectives or other companies for 10 years or less.
- (2) Our principal manufacturing facilities occupy two parcels of land with 50-year land leases that we acquired in 1993 and 1999, respectively.
- (3) Cancelable upon three months notice.
- (4) Construction was completed in 2009 and mass production at this factory began in 2010.
- (5) Raw land.

Table of Contents

Hong Kong

In October 2005, Nam Tai restructured its subsidiaries to focus its operations in China. We now only maintain a minimal workforce in Hong Kong.

In February 2011, the Company purchased a commercial property having approximately 2,200 square feet at Unit 1201, 12th Floor, Tower 1, Lippo Centre, 89 Queensway, Admiralty, Hong Kong. These premises are located at the Eastern extension of the Hong Kong's Central Business District. The purchase price for the property was approximately \$4.6 million, which the Company paid in cash. The Company relocated its Hong Kong office to this location at the end of March 2011.

Shenzhen, China

Principal Manufacturing Facilities

Our principal manufacturing facilities are located in Baoan County, Shenzhen, China. In December 1993, we acquired a 50-year lease for the land on which these facilities are located and initially built a manufacturing facility consisting of approximately 160,000 square feet of manufacturing space, 39,000 square feet of office space, 212,000 square feet of dormitories and 26,000 square feet of full service cafeteria, recreation facilities and a swimming pool. Over the years beginning in November 2000, we have made several additions to these facilities, including:

a five-story factory with approximately 138,000 square feet of production facilities, including one floor for assembling, one floor of office space, one floor for warehouse use and two floors of class thousand clean room facilities, totaling approximately 626,000 square feet of manufacturing space, when construction was completed in October 2002;

an additional factory, consisting of approximately 265,000 square feet of space, completing construction in December 2004 on vacant land of approximately 280,000 square feet (approximately 6.5 acres) bordering on our existing facilities that we purchased in July 1999; and

two additional blocks of dormitories, which we completed during 2005.

With these additions, our principal manufacturing facilities in Shenzhen total approximately 557,835 square feet of manufacturing space, 87,460 square feet of offices, 350,585 square feet of dormitories and 41,530 square feet of cafeteria space, and include a full services recreational building of 33,825 square feet.

LCD Factory

Our LCD manufacturing facility is located in Guanlan, Shenzhen, China and consists of 134,549 square feet of manufacturing space. Our subsidiary, Zastron Shenzhen leases this facility from a third party to manufacture LCDs and LCD Modules. Rent for this facility is approximately \$0.02 million a month.

Wuxi, China

We began construction of our new Wuxi manufacturing facility in January 2008 on approximately 470,000 square feet of land we acquired in December 2006. We completed construction in 2009 and by the end of 2009 we had installed machinery and equipment to manufacture FPC boards and FPC subassemblies, providing approximately 150,700 square feet of space to manufacture FPC Boards and FPC subassemblies. The Wuxi factory is first earmarked to manufacture FPC boards, followed by FPC subassemblies and then other electronic products assemblies such as LCD modules. We began manufacturing operations at this factory in 2010.

When we acquired the land use rights in Wuxi, we also acquired similar rights to a second parcel of approximately 515,000 square feet of raw land situated approximately three miles from the first parcel we used for our manufacturing facility. In September 2010, we sold the second Wuxi parcel back to the Wuxi local government for approximately \$1.6 million, realizing a gain of approximately \$0.8 million on the second parcel.

Planned and Future Expansion

Currently, we have two separate projects planned for expansion, both of which are dependent upon the prompt action and cooperation of local PRC governments.

Table of Contents

The first project is the development of the Company's raw land in Guangming Hi-Tech Industrial Park, Shenzhen, PRC, approximately 30 minutes from its existing facilities in Gushu, Shenzhen and approximately one hour driving distance from Hong Kong. We acquired the land use rights to approximately 1.3 million square feet of land in 2005. We plan to develop this land into new manufacturing and support facilities to supplement our manufacturing capabilities in Shenzhen. We believe that immediate expansion of our manufacturing facilities in Shenzhen is needed because we expect that the production capacity at our principal manufacturing facility in Shenzhen to be fully utilized by the end of 2012.

Although we fully paid for the land use rights to our Guangming property in 2007, the local government has delayed the release of this land to us and, to date, we have been unable to commence development of the property. The local government has indicated that the delivery of this land would be further delayed to allow more time to resolve the dispute with the local farmers who originally owned the land.

Our second Wuxi phase II expansion project involves our acquisition of the land use rights to approximately 500,000 square feet of raw land adjacent to our manufacturing facility in Wuxi. On the land adjacent to our facility in Wuxi, we plan to construct buildings that will support our operations such as a manufacturing plant, a canteen, a labor activity center, a research laboratory and testing and training centers. The land was split into 2 portions for acquisition as required by the Government. On February 22, 2012, Wuxi Zastron-Flex entered into a Contract of Land Use Right Acquisition with the Government for the first portion of the land of approximately 159,890 square feet for consideration of approximately \$1.6 million (RMB 10.0 million). The second portion of the land is expected to be acquired in the second quarter of 2012.

We currently expect to fund our planned and future expansion by using cash on hand and the excess cash generated from operations after reserving funds to maintain and replace machinery and equipment used at our existing facilities and for working capital. For information regarding our capital expenditures planned for 2012, please see ITEM 4. Information on the Company's Capital Expenditures on page 25 of this Report.

Table of Contents

ITEM 4A. UNRESOLVED STAFF COMMENTS

We do not have any unresolved Staff comments.

ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS

Except for statements of historical facts, this section contains forward-looking statements involving risks and uncertainties particularly statements found under the heading entitled "Trend Information". You can identify these forward-looking statements by words such as "expect", "anticipate", "believe", "plans", "seek", "estimate", "intends", "should", or "may". Forward-looking statements are not guarantees of our future performance and our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including those discussed in "Regarding Use of Forward Looking Statements" under the section of this Report entitled "ITEM 3. Key Information Risk Factors". This section should be read in conjunction with our consolidated financial statements included as "ITEM 18. Financial Statements" in this Report.

Operating Results

Overview

We are an electronics manufacturing and design services provider to a select group of the world's leading telecommunications and consumer electronic products OEMs. Through our EMS operations, we manufacture electronic components and subassemblies, including FPC boards, FPC board subassemblies, LCD panels, LCD modules, TFT display modules, RF modules, DAB modules, internet radio subassemblies, CMOS imaging sensor modules and PCB subassemblies. These components, modules and subassemblies are used in numerous electronic products, including mobile phones, IP phones, notebook computers, digital cameras, electronic toys and handheld video game and learning devices. We also manufacture finished products, including entertainment devices, mobile phone accessories and educational products.

We assist our OEM customers in the design and development of their products and furnish full turnkey manufacturing services that utilize advanced manufacturing processes and production technologies. Our services include software development services, firmware, and mechanical design, parts and components source and purchasing, product industrialization, and assembly into finished products, or electronic subassemblies with full quality testing and assurance. These services are value-added and assist us in obtaining new business but do not represent a material component of our revenue. We also provide early supplier involvement in design services to develop proprietary products specified by our OEM customers using their brand name.

Net Sales and Cost of Sales

We derive our net sales principally from manufacturing services that we provide to OEMs of telecommunications and consumer electronic products. The market for the products we manufacture is generally characterized by declining unit prices and short product life cycles. Sales to our OEM customers are primarily based on purchase orders we receive from time to time rather than firm, long-term purchase commitments from our customers. We recognize sales, net of product returns and warranty costs, typically at the time of product shipment or, in some cases, as services are rendered.

Our production is typically based on purchase orders received from OEM customers. However, for certain customers, we will occasionally purchase raw materials based on such customers' rolling forecasts. Purchase orders are often supported by letters of credit or written confirmation from our OEM customers. We generally do not obtain firm, long-term commitments from our customers. Uncertain economic conditions and our general lack of long-term purchase commitments with our customers make it difficult for us to predict our revenues accurately over the longer term. Even in those cases where customers are contractually obligated to purchase products from us or to repurchase unused inventory from us, we may elect not to immediately enforce our contractual rights because of the long-term nature of our customer relationships and for other business reasons, and instead may negotiate accommodations with customers regarding particular situations.

Gross Margins

It has been the Company's strategy to focus on our key components subassembly business. These complex products generally have relatively high material costs and higher fixed overhead costs as a percentage of total unit costs. Due to our shift in focus in 2011 to the components subassembly business and the higher material and overhead costs of these products our gross margins were adversely affected during 2011. Additionally, our newly operational FPC manufacturing and assembly facility in Wuxi is still operating at a loss, which also adversely affects our gross margin in 2011.

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

During the three years ended December 31, 2011, we streamlined our product mix and decreased the production of box-built products with higher gross margins, such as Bluetooth headsets and calculators. Consistent with our long-term business strategy, the Company is narrowing its focus to higher-growth, lower-margin business opportunities, such as key component assembly for telecommunication products such as LCD modules and FPC, which leverage the Company's core strengths.

Table of Contents

Gross margins were decreased due to the salaries of our employees increasing substantially in 2011. At December 31, 2011, the average wage level of our direct labor workforce was approximately 27% higher than that at December 31, 2010.

Impact of Foreign Currency Fluctuations

We sell most of our products in U.S. dollars and pay our expenses in U.S. dollars, Japanese yen, Hong Kong dollars and RMB. Between 1994 and July 2005, the market and official RMB rates were unified and the value of the RMB was essentially pegged to the U.S. dollar and was relatively stable. On July 21, 2005, the People's Bank of China adjusted the exchange rate of the RMB to the U.S. dollar by linking the RMB to a basket of currencies and simultaneously setting the exchange rate of RMB to U.S. dollars, at 1:8.11, resulting in an approximate 1.9% appreciation in the value of the RMB against the U.S. dollars from July 2005 to the end of 2005. The following chart illustrates the fluctuations since the July 31, 2005 adjustment of the RMB to the U.S. dollar by showing the exchange ratio at the end of each year from December 31, 2005 to December 31, 2011.

(1) RMB to U.S. dollar data presented in this chart were derived from the historical currency converter available at <http://forex-history.net>.

(2) If the end of a year fell on a Saturday or Sunday, exchange rate information is provided as of the previous Friday.

The appreciation and depreciation of the RMB compared to the U.S. dollar increases and decreases our costs and expenses to the extent paid in RMB, respectively. Approximately 18%, 17% and 19% of our total costs and expenses and 9%, 7% and 9% of our material costs were in RMB during the years ended December 31, 2009, 2010 and 2011, respectively.

The following table shows the percentage fluctuation in the exchange rate of the RMB to the U.S. dollar during each of the past three years ending December 31:

RMB Exchange Rate to US\$1.00 at December 31 ⁽¹⁾						
2009		2010		2011		
Exchange Rate	Percent	Exchange Rate	Percent	Exchange Rate	Percent	
to US\$1.00	change ⁽²⁾	to US\$1.00	change ⁽²⁾	to US\$1.00	change ⁽²⁾	
6.827	-0.06%	6.602	3.30%	6.306	4.48%	

(1) RMB to U.S. dollar data presented in this table were derived from the historical currency converter available at <http://forex-history.net>.

(2) From exchange rate at preceding December 31.

In mid-2008, the Chinese government halted the appreciation of the RMB against the U.S. dollar as it did prior to July 21, 2005 because of concerns that a stronger RMB made Chinese exports less competitive during a global recession.

Table of Contents

Accordingly, as shown in the above table, there was virtually no change in the exchange ratio of the RMB to the U.S. dollar during 2009. However, on June 19, 2010 China's central bank announced that it planned to introduce more flexibility in the management of its currency and since then the RMB has again begun to appreciate against the U.S. dollar, increasing approximately 3.30% and 4.48% during 2010 and 2011, respectively.

Similarly, the appreciation and depreciation of the Japanese yen as compared to the U.S. dollar increases and decreases our costs and expenses to the extent paid in yen, respectively. Approximately 18%, 24% and 5% of our total costs and expenses and 14%, 29% and 6% of our material costs were in Japanese yen during the years ended December 31, 2009, 2010 and 2011, respectively. However, we make substantial sales denominated in Japanese yen, which mitigates the effects of fluctuations in the yen-U.S. dollar exchange ratio on our financial results. Approximately 12%, 23% and 5% respectively, of our total net sales were made in Japanese yen during the years ended December 31, 2009, 2010 and 2011, respectively.

The following table shows the percentage fluctuation in the exchange rate of the Japanese yen to the U.S. dollar during each of the past three years ended December 31:

2009		Yen Exchange Rate to US\$1.00 at December 31 ⁽¹⁾		2011	
Exchange Rate to US\$1.00	Percent change ⁽²⁾	Exchange Rate to US\$1.00	Percent change ⁽²⁾	Exchange Rate to US\$1.00	Percent change ⁽²⁾
92.434	-1.98%	81.313	12.03%	77.440	4.76%

1) Yen to U.S. dollar data presented in this table were derived from the historical currency converter available at <http://forex-history.net>.

2) From exchange rate at preceding December 31.

Fluctuations in the exchange rate of the Japanese yen to the U.S. dollar affect our gross margins and financial results, but the effect is mitigated by our yen denominated sales. For example, at December 31, 2010, the yen to U.S. dollar exchange rate appreciated by 12.03% compared to the rate at December 31, 2009. At December 31, 2011, the yen to U.S. dollar exchange rate appreciated by 4.76% compared to the rate at December 31, 2010. These fluctuations resulted in an increase in our material costs and other costs and expenses paid in yen during 2010 and 2011. However, the fluctuations did not have a material net impact on our financial results for either 2010 or 2011, because the material appreciation in the exchange rate was effectively nullified by our yen denominated sales, which nearly matched our costs and expenses paid in yen.

Income Taxes

Under current BVI law, our income is not subject to taxation. Subsidiaries operating in Hong Kong and China are subject to income taxes as described below.

Under current Cayman Islands law, NTEEP is not subject to any profit tax in the Cayman Islands because it has no business operations in the Cayman Islands. However, it may be subject to Hong Kong income taxes as described below since it is registered in Hong Kong.

Our subsidiaries operating in Hong Kong are subject to an income tax rate of 16.5% for the years ended 2009, 2010 and 2011. We calculate income tax provision by applying the income tax rate to our estimated taxable income earned in or derived from Hong Kong during the applicable period.

Efforts by the Chinese government to increase tax revenues could result in decisions or interpretations of the tax laws by the China's tax authorities that are unfavorable to us and which increase our future tax liabilities, or deny us expected refunds. Changes in PRC tax laws or their interpretation or application may subject us to additional PRC taxation in the future. For example, following the implementation of the EIT Law effective January 1, 2008, the State Council announced the transition rules for preferential tax policies (Guofa [2007] No.39) of January 2, 2008, for eligible enterprises previously subject to a 15% tax rate or 24% tax rate. During the transitional period, the new enterprise income tax rates were/are:

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

Tax Year	Rate under EIT for enterprises previously subject to 15% tax rate	Rate under EIT for enterprises previously subject to 24% tax rate
2008	18%	25%
2009	20%	25%
2010	22%	25%
2011	24%	25%
2012	25%	25%

Table of Contents

Our effective tax rates were 172%, 26% and 51% for each of the three years ended December 31, 2009, 2010 and 2011 respectively. The significant factors that caused our effective tax rates to differ from the applicable statutory rates were as follows:

	\$000,000	\$000,000	\$000,000
	Year Ended December 31,		
	2009	2010	2011
Applicable statutory tax rates	20%	22%	24%
Effect of difference between Hong Kong and PRC tax rates applied to Hong Kong income	65	1	21
Effect of change in tax law	(49)	(1)	(15)
Effect of tax exemption			147
Change in valuation allowance	(37)	(4)	41
Deferred tax liability on withholding tax on undistributed profits of PRC subsidiaries	49	2	
Effect of loss/income for which no income tax benefit/expense is receivable/payable	102	4	(99)
Under (over) provision of income tax expense in prior years	6		(132)
Other items	16	2	64
Effective tax rates	172%	26%	51%

Critical Accounting Policies and Estimates

The preparation of our consolidated financial statements and related disclosures in conformity with accounting principles generally accepted in the United States requires management to make estimates and judgments that affect our reported amounts of assets and liabilities, revenues and expenses, and related disclosures of contingent assets and liabilities. On an on-going basis, we evaluate our estimates and assumptions based upon historical experience and various other factors and circumstances. Management believes that our estimates and assumptions are reasonable under the circumstances; however, actual results may vary from these estimates and assumptions under different future circumstances. We have identified the following critical accounting policies that affect the more significant judgments and estimates used in the preparation of our consolidated financial statements.

For more information on our significant accounting policies, refer to Note 2 Summary of Significant Accounting Policies of our consolidated financial statements.

Allowance for Doubtful Accounts

Our accounts and notes receivable balance is recorded net of allowances for amounts not expected to be collected from customers. Because the Company's accounts and notes receivable are typically unsecured, the Company periodically evaluates the collectability of accounts based on a combination of factors, including a particular customer's ability to pay as well as the age of the receivables. To evaluate a specific customer's ability to pay, the Company analyzes financial statements, payment history, third-party credit analysis reports and various information or disclosures by the customer or other publicly available information. In cases where the evidence suggests a customer may not be able to satisfy its obligation to the Company, we create a specific allowance that is determined to be appropriate for the perceived risk. If the financial condition of a customer deteriorates, resulting in an impairment of their ability to make payments, additional allowances may be required.

There have been no significant changes in our collection rates for our accounts and notes receivable at December 31, 2011 as compared to December 31, 2010.

Impairment of Long-lived Assets and Goodwill

Long-lived assets. The Company reviews the carrying value of its long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying value may not be recoverable.

The Company assesses the recoverability of the carrying value of long-lived assets by first grouping its long-lived assets with other assets and liabilities at the lowest level for which identifiable cash flows are largely independent of the cash flows of other assets and liabilities (the asset

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

group). Next, the Company estimates the undiscounted future cash flows that are directly associated with and expected to arise from the use of and eventual disposition of such asset group. The Company estimates the undiscounted cash flows over the remaining useful life of the primary asset within the asset group. If the carrying value of the asset group exceeds the estimated undiscounted cash flows, the Company records an impairment charge to the extent the carrying value of the long-lived asset exceeds its fair value. The Company determines fair value through quoted market prices in active markets or, if quotations of market prices are unavailable, through the performance of internal analysis using a discounted cash flow methodology or obtains external appraisals from independent valuation firms. The undiscounted and discounted cash flow analyses all based on a number of estimates and assumptions, including the expected period over which the asset will be utilized, projected future operating results of the asset group, discount rate and long-term growth rate.

In light of the sustained level of the Company's stock price during 2009 and our resulting market capitalization throughout 2009 at a level below our recorded book value at December 31, 2009, the Company conducted a review of Nam Tai's long-lived assets for potential impairment.

Table of Contents

In 2010, although the Company's stock price remained below the aggregate book value of its assets, the continuous improvement of the Company's results closed the gap on the difference. Management assessed and determined that there were no events or changes in circumstances to indicate that the carrying amounts of long-lived assets in Nam Tai's Shenzhen facilities were not recoverable and there were no impairment tests conducted with respect to those assets. In view of the continuous operating losses and negative cash flows in Nam Tai's Wuxi facilities, the Company assessed the impairment of its long-lived assets used in the Wuxi facilities, by comparing the undiscounted cash flows with the carrying amounts of the assets. The results indicated that the carrying amounts of the Company's long-lived assets at December 31, 2010 were less than the undiscounted cash flows.

In 2011, although the Company's stock price remained below the aggregate book value of its assets, the continuous improvement of the Company's results closed the gap on the difference. Management assessed and determined that there were no events or changes in circumstances to indicate that the carrying amounts of long-lived assets in Nam Tai's Shenzhen facilities were not recoverable and there were no impairment tests conducted with respect to those assets. In view of the continuous operating losses and negative cash flows in Nam Tai's Wuxi facilities, the Company assessed the impairment of its long-lived assets used in the Wuxi facilities, by comparing the undiscounted cash flows with the carrying amounts of the assets. The results indicated that the carrying amounts of the Company's long-lived assets at December 31, 2010 were less than the undiscounted cash flows.

From the forgoing, the Company concluded that the carrying amounts of Nam Tai's long-lived assets were not impaired at December 31, 2009, 2010 and 2011.

Goodwill. To assess goodwill for impairment, the Company performs an assessment of the carrying value of its reporting units at least on an annual basis or when events and changes in circumstances occur that would more likely than not reduce the fair value of the Company's reporting units below their carrying value. If the carrying value of a reporting unit exceeds its fair value, the Company would perform the second step in its assessment process and would recognize an impairment loss to earnings to the extent the carrying amount of the reporting unit's goodwill exceeds its implied fair value. The Company estimates the fair value of its reporting units using a discounted cash flow methodology. This valuation technique is based on a number of estimates and assumptions, including the projected future operating results of the reporting unit, discount rate, long-term growth rate and appropriate market comparables.

In performing the annual assessment of goodwill for impairment for the years ended December 31, 2009, 2010 and 2011, the Company determined that there was no impairment loss on goodwill 2009 and 2010. We recognized an impairment loss of \$3.0 million in 2011, primarily as result of the onset of and impact from future cessation of business of the CECP segment.

The Company's assessments of impairment of long-lived assets, and its periodic review of the remaining useful lives of its long-lived assets are an integral part of the Company's ongoing strategic review of its business and operations. Therefore, future changes in the Company's strategy and other changes (including the discount rate and expected long-term growth rate) in the operations of the Company could impact the projected future operating results that are inherent in the Company's estimates of fair value, resulting in impairments in the future.

Accruals and Provisions for Loss Contingencies

The Company makes provisions for all loss contingencies when information available prior to the issuance of the consolidated financial statements indicates that it is probable that an asset has been impaired or a liability has been incurred at the date of the consolidated financial statements and the amount of loss can be reasonably estimated.

For provisions or accruals related to litigation, the Company makes provisions based on information from legal counsel and management's best estimation. The Company assesses the potential liability for the significant legal proceedings in accordance with FASB ASC 450 *Contingencies*. FASB ASC 450 requires a liability to be recorded if the contingency loss is probable and the amount of loss can be reasonably estimated. The actual resolution of the contingency may differ from the Company's estimates. If the contingency was settled for an amount greater than the estimate, a future charge to income would result. Likewise, if the contingency was settled for an amount that is less than our estimate, a future credit to income would result.

Workforce Reduction

As a result of the global economic crisis, we suffered serious difficulties in production and business operations during 2009 and reduced the net headcount in our operating subsidiaries by approximately 1,900 from 7,104 at December 31, 2008 to 5,203 at December 31, 2009. The amount of employee severance benefits in 2009 was \$5.1 million, of which we paid out \$4.1 million, recording these amounts under general and administrative expenses, and accrued \$1.0 million for future payments, in our balance sheet at December 31, 2009. In 2010 and 2011, we have incurred employee severance payment of approximately \$0.7 million and \$3.0 million, respectively. For example, in early December 2011, we

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

experienced a labor strike of approximately 1,200 employees due to dissatisfaction with the 23% increase in the wage package for 2012. Accordingly, the Company paid out \$2.7 million in lay-off costs for employee severance benefits. For a breakdown of these severance expenses by operating segment, For more information, see Note 16 of Notes to our Consolidated Financial Statements.

Table of Contents**Summary of Results**

The Company sustained a year-over-year revenue growth of 12.7% for 2011 when compared with 2010. The Company has identified significant revenue growth opportunities assembling telecommunication product LCD modules for Japanese multinational corporations (MNCs) that supply global customers. The Company is well-positioned to benefit from this expected trend in 2011.

The following table sets forth key operating results (in thousands, except per share data) for the years ended December 31, 2009, 2010 and 2011:

	Year Ended December 31,			% increase/(decrease)	
	2009	2010	2011	2010 vs 2009	2011 vs 2010
Net sales	\$ 408,137	\$ 534,420	\$ 602,317	30.9%	12.7%
Gross profit	40,320	51,294	28,089	27.2	(45.2)
Income (loss) from operations	388	14,801	(11,451)	3,714.7	(177.4)
Consolidated net (loss) income	(535)	15,006	505	(2,904.9)	(96.6)
Basic earnings per share	\$ 0.04	\$ 0.33	\$ 0.01	725.0	(97.0)
Diluted earnings per share	\$ 0.04	\$ 0.33	\$ 0.01	725.0	(97.0)

Key Performance Indicators

The following tables set forth, for each of the quarters in the two years period ended December 31, 2011, certain of management's key financial performance indicators that management utilizes to assess the Company's operating results. The first table presents the results sequentially by quarter and the second table presents the results in quarterly comparisons by year.

Days in:	\$000	\$000	\$000	\$000	\$000	\$000	\$000	\$000	\$000
	2010				2011				
	Mar. 31	Jun. 30	Sept. 30	Dec. 31	Mar. 31	Jun. 30	Sept. 30	Dec. 31	
Sales cycle ⁽¹⁾	15	11	9	9	13	12	9	12	
Inventory turnover ⁽²⁾	18	24	24	22	17	22	18	20	
Accounts receivable ⁽³⁾	58	73	67	51	49	44	41	45	
Accounts payable ⁽⁴⁾	61	86	82	64	53	54	50	53	

Days in:	Mar. 31	Mar. 31	Mar. 31	Mar. 31	Mar. 31	Mar. 31	Mar. 31	Mar. 31	Mar. 31
	March 31		June 30		September 30		December 31		
	2010	2011	2010	2011	2010	2011	2010	2011	
Sales cycle ⁽¹⁾	15	13	11	12	9	9	9	12	
Inventory turnover ⁽²⁾	18	17	24	22	24	18	22	20	
Accounts receivable ⁽³⁾	58	49	73	44	67	41	51	45	
Accounts payable ⁽⁴⁾	61	53	86	54	82	50	64	53	

(1) Sales cycle is calculated as the sum of days in accounts receivable and days in inventory, less the days in accounts payable.

(2) Inventory turnover is calculated as the ratio of inventory, net, at period end divided by cumulative year to date average daily net cost of sales and multiplied by the cumulative number of days.

(3) Days in accounts receivable is calculated as the ratio of accounts receivable, net, at period end divided by cumulative year to date average daily net sales and multiplied by the cumulative number of days.

(4) Days in accounts payable is calculated as the ratio of accounts payable, net, at period end divided by cumulative year to date average daily net cost of sales and multiplied by the cumulative number of days.

Table of Contents

Results of Operations

The following table presents selected consolidated financial information stated as a percentage of net sales for the years ended December 31, 2009, 2010 and 2011.

	\$000,000	\$000,000	\$000,000
	Year Ended December 31,		
	2009	2010	2011
Net sales	100.0%	100.0%	100.0%
Cost of sales	(90.1)	(90.4)	(95.3)
Gross profit	9.9	9.6	4.7
General and administrative expenses ⁽¹⁾	(6.9)	(4.7)	(4.5)
Selling expenses	(1.3)	(1.0)	(1.0)
Research and development expenses	(1.6)	(1.1)	(0.6)
Impairment loss on goodwill			(0.5)
Income (loss) from operations	0.1	2.8	(1.9)
Other (expense) income, net	(0.1)	0.7	1.6
Interest income	0.2	0.3	0.5
Income before income taxes	0.2	3.8	0.2
Income taxes	(0.3)	(1.0)	(0.1)
Consolidated net (loss) income	(0.1)	2.8	0.1
Net loss attributable to non-controlling interests	0.5		
Net income attributable to Nam Tai ⁽²⁾ shareholders	0.4%	2.8%	0.1%

(1) General and administrative expenses include employee severance benefits of \$5.1 million, \$0.7 million and \$3.0 million for the years ended December 31, 2009, 2010 and 2011, respectively.

(2) Nam Tai refers to Nam Tai Electronics, Inc.

Year Ended December 31, 2011 Compared to Year Ended December 31, 2010

Net Sales. Our net sales increased by 12.7% to \$602.3 million for 2011, up from \$534.4 million in 2010. Sales of the TCA segment increased by 31.6%, while sales of the CECP segment decreased by 44.1%, due to our decision to exit the business of the CECP segment.

The distribution of revenues across our reportable segments has fluctuated, and we expect it to continue to fluctuate, as a result of numerous factors, including but not limited to, increased business from new and existing customers, fluctuations in customer demand resulting from the economic recovery or otherwise and seasonality. The following table sets forth, our net sales during for the years ended December 31, 2010 and 2011 by reportable segment expressed as a dollar amount and as percentage of total net sales and shows the percentage difference in net sales by segment and in total between 2010 and 2011.

	\$000,000	\$000,000	\$000,000	\$000,000	\$000,000
	Year ended December 31,				
	2010		2011		2011 vs. 2010
	Dollars	Percent	Dollars	Percent	Percent
	(in		(in		

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

	thousands)		thousands)		
TCA	\$ 401,259	75%	\$ 527,894	88%	31.6%
CECP	133,161	25	74,423	12	(44.1)
Total net sales	\$ 534,420	100%	\$ 602,317	100%	12.7%

In the TCA segment, overall sales increased by 31.6%. This was driven primarily by the increase of 47.2% or \$127.4 million in sales of LCD modules and the increase of 6.6%, or \$4.3 million in sales of FPC sub-assemblies. However, the increase was partially offset by the decrease of 10.2% or \$6.4 million in the sales of COG products.

Table of Contents

In the CECP segment, net sales decreased by 44.1%, mainly because sales of home entertainment products decreased by 33.6% or \$31.9 million, sales of mobile phone accessories decreased by 72.6% or \$10.3 million, and sales of educational products decreased by 72.0% or \$14.7 million, as compared to 2010.

Gross Profit. In terms of dollar value, gross profit for 2011 decreased by \$23.2 million as compared to 2010. Gross margin decreased to 4.7% of net sales in 2011 from 9.6% of net sales in 2010 mainly due to three factors. Gross margin decreased because we changed our product mix. We discontinued production of box-built products with higher gross margins, such as Bluetooth headsets and calculators. Consistent with our long-term business strategy, the Company is narrowing its focus to higher-growth, lower-margin business opportunities, such as key component assembly for telecommunication products. Second, our labor costs continue to increase due to year on year wage inflation in China. Third, launch costs for new projects and operating losses at the Company's facility in Wuxi continued to accrue although our Wuxi facility was completed in 2009 and began manufacturing pilot runs of FPC boards and moving to large scale manufacturing in 2010.

General and Administrative Expenses. General and administrative expenses increased to \$27.3 million, but decreased to 4.5% of net sales, in 2011, from \$25.2 million or 4.7% of net sales in 2010. The \$2.1 million increase was mainly attributable to increases of \$2.4 million of employee severance benefits.

Selling Expenses. Selling expenses in 2011 increased slightly to \$5.9 million from \$5.5 million in 2010 accounting for 1.0% and 1.0% of net sales for 2011 and 2010, respectively.

Research and Development Expenses. Research and development expenses in 2011 decreased to \$3.4 million from \$5.8 million in 2010 accounting for 0.6% and 1.1% of net sales for 2011 and 2010 respectively due to CECP business decline.

Other Income, Net. During 2011, other income of \$9.8 million, comprised primarily of a \$8.2 million foreign currency exchange gain, as compared to \$4.0 million in 2010.

Interest Income. Interest income was \$2.7 million, which increased by \$1.2 million from \$1.5 million in 2010. The increase was primarily the result of greater RMB cash balances that were deposited in banks with higher interest rates than were available in 2010.

Income Taxes. The Company had an effective tax rate of about 51% on income before income taxes in 2011. The amount represented income tax provision of \$3.0 million, partially offset by a deferred tax asset of \$2.5 million recognized during the year, which mainly arose from tax losses from the Company's operation in Wuxi. However, the actual utilization of this deferred tax asset depends on future profit streams of our businesses. The Company had an effective tax rate of about 26% on income before income taxes in 2010.

Net Income. Net income decreased to \$0.5 million in 2011 from \$15.0 million in 2010 as result of the foregoing.

The following table sets forth, for the years indicated, net income (loss) by reportable segment expressed as a dollar amount and as a percentage of total net income.

	\$000,000		\$000,000		\$000,000		\$000,000		\$000,000	
	Year ended December 31,									
	2010			2011			2011 vs. 2010			
	Dollars (in thousands)		Percent	Dollars (in thousands)		Percent	Percent			
TCA	\$ 6,617	44.1%	\$ 377	74.7%	(94.3)%					
CECP	13,969	93.1	3,985	789.1	(71.5)					
Corporate	(5,580)	(37.2)	(3,857)	(763.8)	n/a					
Net income	\$ 15,006	100.0%	\$ 505	100.0%	(96.6)%					

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

Note: Percentage change is presented as n/a if either of the two periods contains a loss.

In the TCA segment, net income was \$0.4 million in 2011 as compared to net income of \$6.6 million in 2010. Such decrease mainly resulted from inclusion of the \$14.1 million net loss from the Wuxi operations for 2011.

Net income in the CECP segment decreased to \$4.0 million from \$14.0 million mainly because of a decline in customer orders resulting in the decrease in sales.

Net income in the corporate segment is mainly represented by corporate expenses which were not allocated to segments.

Table of Contents

Year Ended December 31, 2010 Compared to Year Ended December 31, 2009

Net Sales. Our net sales increased by 30.9% to \$534.4 million for 2010, up from \$408.1 million in 2009. Sales of the TCA segment and the CECP segment increased by 37.4% and 14.7%, respectively. The increased sales levels were due to the recovery in the global economic conditions after the 2008 crisis.

The distribution of revenues across our reportable segments has fluctuated, and we expect it to continue to fluctuate, as a result of numerous factors, including but not limited to, increased business from new and existing customers, fluctuations in customer demand resulting from the economic recovery or otherwise and seasonality. The following table sets forth, our net sales during for the years ended December 31, 2009 and 2010 by reportable segment expressed as a dollar amount and as percentage of total net sales and shows the percentage difference in net sales by segment and in total between 2009 and 2010.

	\$000,000		\$000,000		\$000,000	
	Year ended December 31,					
	2009		2010			2010 vs. 2009
	Dollars (in thousands)	Percent	Dollars (in thousands)	Percent	Percent	
TCA	\$ 292,074	72%	\$ 401,259	75%	37.4%	
CECP	116,063	28	133,161	25	14.7	
Total net sales	\$ 408,137	100%	\$ 534,420	100%	30.9%	

In the TCA segment, overall sales increased by 37.4%. This was driven primarily by the increase in sales of LCD modules of 71.1% or \$102.6 million, and the increase of 25.1% or \$12.7 million, in sales of COG products. However, the increase was partially offset by the decrease in sales of FPC sub-assemblies of 17.0% or \$12.8 million.

In the CECP segment, net sales increased by 14.7%, mainly because sales of home entertainment products increased by 183.2% or \$61.3 million. However, the increase was partially offset by the decrease in sales of mobile phone accessories of 69.5% or \$32.5 million, and the decrease in sales of optical products of 68.6% or \$7.9 million, as compared with 2009.

Gross Profit. In terms of dollar value, gross profit for 2010 increased by \$11.0 million from 2009 mainly because of an increase in sales. Gross margin decreased to 9.6% of net sales in 2010 from 9.9% in 2009 mainly as a result of start-up expenses at our newly operational manufacturing and assembly facility in Wuxi, which reduced our overall gross profit margin in 2010 by 2.1%, and an increase in our material costs. Cost reduction and control measures initiated in the first quarter of 2009, including the combination of work centers and the reduction in amount of floor space used in manufacturing helped to compensate for the increase in material costs and contributed to Nam Tai's improved gross margin at the beginning of the second quarter of 2010.

General and Administrative Expenses. General and administrative expenses decreased to \$25.2 million or 4.7% of net sales in 2010, from \$28.4 million or 6.9% of net sales in 2009. The \$3.2 million decrease was mainly attributable to decreases of \$4.4 million of employee severance benefits, \$1.2 million of loss on disposal of machinery, \$0.9 million of privatization expenses, \$0.8 million pre-operating expenses for our Wuxi operations and \$0.4 million of salaries and benefits. However, the decrease was partially offset by increases of \$4.2 million of incentive bonuses and \$0.5 million of depreciation.

Selling Expenses. Selling expenses in 2010 increased slightly to \$5.5 million from \$5.3 million in 2009 accounting for 1.0% and 1.3% of net sales for 2010 and 2009, respectively.

Research and Development Expenses. Research and development expenses in 2010 decreased to \$5.8 million from \$6.3 million in 2009 accounting for 1.1% and 1.6% of net sales for 2010 and 2009, respectively.

Other Income, Net. During 2010, other income of \$4.0 million, comprised primarily of a \$2.4 million foreign currency exchange gain (due to the RMB has again begun to appreciate against the U.S. dollar, increasing approximately 3.3% during 2010), as compared to a \$0.3 million foreign currency exchange loss in 2009, and a gain of \$0.8 million resulting from the sale to the Wuxi local government of a parcel of raw land that we

acquired in 2006.

Interest Income. Interest income was \$1.5 million, which increased by \$0.7 million from \$0.8 million in 2009. The increase was primarily the result of greater RMB cash balances that were deposited in banks with interest rates higher than they were in 2009.

Interest Expense. Interest expense was nil in 2010 as compared to \$0.2 million in 2009. There was no interest expense in 2010 because we did not draw on our credit facilities, whereas interest expense in 2009 was incurred on an entrusted loan receivable prior to paying it off in 2009.

Income Taxes. The Company had an effective tax rate of about 26% on income before income taxes in 2010. The amount represented income tax provision of \$7.8 million, partially offset by a deferred tax asset of \$2.6 million recognized during the year, which mainly arose from tax losses from the Company's operation in Wuxi. However, the actual utilization of this deferred tax asset depends on future profit streams of our businesses. The Company had an effective tax rate of about 172% on income before income taxes in 2009.

Table of Contents*Net Income attributable to Nam Tai shareholders*

In November 2009, Nam Tai successfully completed the privatization of Nam Tai Electronic & Electrical Products Limited, or NTEEP, by tendering for and acquiring the 25.12% of NTEEP that it did not previously own, i.e., NTEEP's noncontrolling shares, resulting in NTEEP becoming the Company's wholly-owned subsidiary. Accordingly, the Company had no net income or loss attributable to noncontrolling interests in 2010. Net loss attributable to noncontrolling interests in 2009 was \$2.2 million.

Net income attributable to Nam Tai shareholders increased to \$15.0 million in 2010 from \$1.7 million in 2009.

The following table sets forth, for the years indicated, net income (loss) by reportable segment expressed as a dollar amount and as a percentage of total net income.

	\$000,000		\$000,000		\$000,000	
			Year ended December 31,		2010 vs.	
	2009		2010		2009	
	Dollars (in thousands)	Percent	Dollars (in thousands)	Percent	Percent	
TCA	\$ (573)	(34.7)%	\$ 6,617	44.1%	n/a %	
CECP	6,710	406.2	13,969	93.1	108.2	
Corporate	(4,485)	(271.5)	(5,580)	(37.2)	n/a	
Net income attributable to Nam Tai shareholders	\$ 1,652	100.0%	\$ 15,006	100.0%	808.4%	

Note: Percentage change is presented as n/a if either of the two periods contains a loss.

In the TCA segment, net income was \$6.6 million in 2010 as compared to net loss of \$0.6 million in 2009. The improvement was mainly due to the increase in sales in LCD modules and COG products. Such increase was partially offset by the inclusion of the \$11.6 million net loss from the Wuxi operations for 2010.

Net income in the CECP segment increased to \$14.0 million in 2010 from \$6.7 million in 2009 mainly because of the increase in sales in the home entertainment products. Such increase in sales was partially offset by the drop in sales from losing two customers in 2010.

Net income in the corporate segment is mainly represented by corporate expenses which were not allocated to segments.

Liquidity and Capital Resources*Liquidity*

We have financed our operations and met our cash flow obligations primarily from internally generated funds, the proceeds from the sale of land we owned in Hong Kong and PRC, and by selling our common stock.

We do not have other off-balance sheet financing arrangements, such as securitized receivables or access to assets through special purpose entities, which could act as sources of liquidity. Our primary uses of cash during the past three years have been to fund expansions of and upgrades to our manufacturing facilities, to acquire the noncontrolling interests in NTEEP from its publicly traded minority shareholders and to fund increases in inventory and accounts receivable in years when our sales, inventories or accounts receivables have increased.

We had net working capital of \$148.6 million at December 31, 2011 compared to net working capital of \$222.2 million at December 31, 2010. The principal components of our working capital at December 31, 2011 and December 31, 2010 consisted of cash and cash equivalents, accounts and notes receivables, and inventories. The decreases in these components at December 31, 2011 from levels at December 31, 2010, resulted

from the purchase of property, plant and equipment in 2011 and a \$9.0 million dividend payment in 2011.

We expect our working capital requirements and capital expenditures to increase when we begin expanding our operations through the construction of new factories and machinery purchases. Future liquidity needs will also depend on fluctuations in levels of inventory and shipments, changes in customer order volumes and timing of expenditures for new equipment.

We currently believe that during 2012, our capital expenditures will be approximately \$56.1 million. For additional information concerning our planned capital expenditures during 2012, please see ITEM 4. Information on the Company Capital Expenditures on page 25 of this Report. We believe that our level of internal resources, which include cash and cash equivalents, fixed deposits maturing over three months, accounts and notes receivable, and available borrowings under our credit facilities, will be adequate to fund these capital expenditures and our working capital requirements for at least the next twelve months. Should we desire to pursue acquisition opportunities or undertake additional significant expansion activities, our capital needs would increase and could possibly result in our need to increase available borrowings under our revolving credit facilities or access public or private debt and equity markets. There can be no assurance, however, that we would be successful in raising additional debt or equity on terms that we would consider acceptable or at all.

Table of Contents

The following table sets forth, for the years ended December 31, 2009, 2010 and 2011, selected consolidated cash flow information (\$ in thousands):

	\$000,000	\$000,000	\$000,000
	Year Ended December 31,		
	2009	2010	2011
Net cash provided by (used in) operating activities	\$ 38,503	\$ 34,893	\$ (5,320)
Net cash (used in) provided by investing activities	(74,781)	8,217	(99,410)
Net cash used in financing activities	(18,056)		(8,961)
Net (decrease) increase in cash and cash equivalents	\$ (54,334)	\$ 43,110	\$ (113,691)

Net cash used in operating activities for 2011 was \$5.3 million. This consisted primarily of an increase in prepaid expenses and other receivables of \$14.2 million, an increase in deferred tax asset of \$2.5 million and a decrease in income tax payable of \$4.2 million. Net cash used in operating activities was partially offset by a \$0.5 million positive consolidated net income and \$16.1 million of non-cash depreciation and amortization.

Net cash used in investing activities was \$99.4 million for 2011 consisting primarily \$59.9 million in capital expenditures, which were used mainly to expand our manufacturing capacity and purchase equipment for our new manufacturing site in Wuxi, a fixed deposit of \$34.8 million maturing over three months and deposits paid for property, plant and equipment of \$4.1 million.

Net cash used in financing activities was \$9.0 million for 2011 representing a dividend payment to shareholders of the Company.

Net cash provided by operating activities for 2010 was \$34.9 million. This consisted primarily of a \$15.0 million positive consolidated net income, and \$24.5 million of non-cash item depreciation and amortization, an increase in accounts payable of \$25.9 million and an increase in accrued expenses and other payables of \$4.4 million. Net cash provided by operating activities in 2010 was partially offset by an increase in accounts and notes receivable of \$16.3 million, an increase in inventories of \$13.0 million, an increase in prepaid expenses and other receivables of \$2.4 million and increase in net deferred tax asset of \$2.6 million.

Net cash provided by investing activities was \$8.2 million for 2010 consisting primarily of a fixed deposit of \$12.9 million maturing over three months which matured in 2010 and \$2.0 million in proceeds from the disposal of property, plant and equipment and land use rights, offset by capital expenditures of \$6.3 million, which were used mainly to expand our manufacturing capacity and purchase equipment for our new manufacturing site in Wuxi, and deposits paid for property, plant and equipment of \$0.4 million.

There is no net cash used in or provided by financing activities during 2010.

Net cash provided by operating activities for 2009 was \$38.5 million. This consisted primarily of a \$0.5 million consolidated net loss, adjusted for \$23.1 million of depreciation and amortization, a decrease in accounts receivable of \$46.2 million, a decrease in inventories of \$11.2 million and a decrease in prepaid expenses and other receivables of \$1.1 million. Nevertheless, net cash provided by operating activities was partially offset by a decrease in accounts payable of \$39.5 million and a decrease in accrued expenses and other payables of \$4.1 million, mainly because sales in 2009 decreased by 34.5% as compared to 2008.

Net cash used in investing activities was \$74.8 million for 2009 consisting primarily of capital expenditures of \$30.4 million, which were used mainly to expand our manufacturing capacity and purchase equipment for our new manufacturing site in Wuxi, an increase of \$12.9 million in fixed deposits maturing over three months, offset by a decrease in entrusted loan receivables of \$8.2 million and deposits for purchase of property, plant and equipment of \$2.9 million. In addition, the Company utilized \$43.4 million to acquire additional ordinary shares of NTEEP in 2009.

Net cash used in financing activities was \$18.1 million for 2009 resulting primarily from dividend payments of \$9.9 million paid to the shareholders of the Company and noncontrolling shareholders of NTEEP, and the repayment of an entrusted loan of \$8.2 million.

For the years ended December 31, 2010 and 2011, the Company had no guaranteed loans.

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

We had no material transactions, arrangements or relationships with unconsolidated affiliated entities that are reasonably likely to affect our liquidity.

Table of Contents*Capital Resources*

As of December 31, 2011, we had \$118.5 million in cash and cash equivalents, consisting of cash and short-term deposits and \$34.8 million of fixed deposits maturing over three months, compared with \$228.1 million as of December 31, 2010. The Company had short-term notes payable of \$0.3 million, while we have no long-term bank loans as of December 31, 2011.

As of December 31, 2011, we had in place \$8.16 million of general banking facilities with financial institutions. The maturity of these facilities is generally up to 90 days. These banking facilities (which are not considered guaranteed loans) are guaranteed by NTISZ and there is an undertaking not to pledge any assets to any other banks without the prior consent of our bankers. However, these covenants do not have any impact on our ability to undertake additional debt or equity financing. Interest rates are generally based on the banks' reference lending rates. Our facilities permit us to obtain letters of credit, import facilities, treasury products, trust receipt financing. No significant commitment fees are required to be paid for the banking facilities. These facilities are subject to annual review and approval. As of December 31, 2011, we had available unused credit facilities of \$6.01 million.

As of December 31 2011, the Company had no term loans.

Our contractual obligations, including capital expenditure, purchase obligations and future minimum lease payments under non-cancelable operating lease arrangements as of December 31, 2011 are summarized below. We do not participate in, or secure financing for, any unconsolidated limited purpose entities. Non-cancelable purchase commitments do not typically extend beyond the normal lead-time of several weeks at most. Purchase orders beyond this time frame are typically cancelable.

Contractual Obligations	Total	Payments (in thousands) due by period			
		2012	2013 to 2014	2015 to 2016	After 2016
Long-term debt obligations	\$	\$	\$	\$	\$
Capital (finance) lease obligations					
Operating lease obligations	517	392	125		
Purchase obligations:					
Capital commitments	27,871	27,871			
Other purchase obligations	46,525	46,525			
Other long-term liabilities reflected on the Company's balance sheet under US GAAP					
Total	\$ 74,913	\$ 74,788	\$ 125	\$	\$

With the exception of a requirement for PRC subsidiaries that about 11% of profits after tax be reserved for future developments and staff welfare, there are no restrictions on the payment of dividends from China once all taxes are paid and assessed and losses, if any, from previous years have been made good.

Impact of Inflation

Historically, inflation in China, where virtually all of our assets and employees are located, has had little impact on the Company's business because we have been able to increase the price of our services and products to keep pace with inflation. However, in addition to the appreciation of the renminbi to the U.S. dollar, inflation in China has recently affected the Company significantly. China's consumer price index, the broadest measure of inflation, rose 4.5% in January 2012 from the level in January 2011. The wages we pay our employees also increased substantially in 2011. At December 31, 2011, the average wage level of our direct labour workforce was approximately 27% higher than that at December 31, 2010. China's overall economy and the average wage in the PRC are expected to continue to grow.

Continuing inflation and material increases in the cost of labor could diminish our competitive advantage. Unless we are able to pass on these increased labor costs to our customers by increasing prices for our products and services, our profitability and results of operations could be materially and adversely affected.

Recent Changes in Accounting Standards

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

In May 2011, the FASB issued ASU No. 2011-04, *Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS*, which provides common requirements for measuring fair value and disclosing information about fair value measurements in accordance with U.S. GAAP and IFRS. This ASU is effective for fiscal years, and interim periods within those years, beginning on or after December 15, 2011. The adoption of ASU No. 2011-04 is not expected to have a material impact on the Company's financial position, results of operations or cash flows.

In June 2011, the FASB issued ASU No. 2011-05, *Comprehensive Income (Topic 220): Presentation of Comprehensive Income*, which improves the comparability, consistency and transparency of financial reporting and increases the prominence of items reported in other comprehensive income. This ASU is effective for fiscal years, and interim periods within those years, beginning on or after December 15, 2011, although early adoption is permitted. In December 2011, the FASB issued ASU 2011-12 *Comprehensive Income (Topic 220): Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05*, which indefinitely defers certain aspects of ASU No. 2011-05 related to the presentation of reclassification adjustments. The adoption of ASU No. 2011-05 and ASU No. 2011-12 are not expected to have a material impact on the financial position, results of operations or cash flows.

Table of Contents

In September 2011, the FASB issued ASU No. 2011-08, *Intangibles Goodwill and Other (Topic 350), Testing Goodwill for Impairment*, which permits a company to first assess qualitative factors to determine whether it is more likely than not that the fair value is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step process for goodwill impairment testing previously required under Topic 350. ASU No. 2011-08 is effective for the Company for the annual and interim goodwill tests performed for years beginning after December 15, 2011, with early adoption permitted. The adoption of ASU No. 2011-08 is not expected to have a material impact on the financial position, results of operations or cash flows.

Research and Development

Our research and development expenditures were mainly comprised of salaries and benefits paid to our research and development personnel and primarily for the development of advanced manufacturing techniques to produce complex products on a mass scale and at a low cost. We expense our research and development costs as incurred. For the years ended December 31, 2009, 2010 and 2011 we incurred research and development expenses of approximately \$6.3 million, \$5.8 million and \$3.4 million, respectively.

Trend Information

In 2012, the Company plans to continue to focus its business on manufacturing higher volume LCD modules geared toward applications in market segments that management perceives to be strong, such as telecommunications and automotive. In order to meet the demand from customers, the Company will consider significant expansion of production capacity for LCD modules and assemblies for smart phones and tablet applications in upcoming years. For the FPC business, management believes that, through its incorporation of state-of-the-art technology and equipment for the production of FPC boards that are used in many diverse electronic products and components, management's and the marketing department's experience in FPC board production and sales, operations from Nam Tai's FPC board facilities in Wuxi, our FPC business will show momentum in 2012 and eventually become one of the Company's key growth drivers.

Off-balance Sheet Arrangements

For 2011, we did not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

ITEM 6. DIRECTORS AND SENIOR MANAGEMENT

Directors and Senior Managers

Our current directors and senior management, and their ages as of March 1, 2012, are as follows:

Name	Age	Position with Nam Tai or its Subsidiaries
M. K. Koo	67	Nam Tai's Executive Chairman, Chief Financial Officer and Acting Chief Executive Officer; NTEEP's President and director
Tohru Odashima	61	Senior President of Wuxi Manufacturing
Wang Lu Ping	56	Senior Operations President of Wuxi Manufacturing
Wang Shi Ping	58	Senior Operations President of Shenzhen Manufacturing
Peter R. Kellogg	69	Member of the Board of Directors
Dr. Wing Yan (William) Lo	51	Member of the Board of Directors
Charles Chu	55	Member of the Board of Directors
Mark Waslen	51	Member of the Board of Directors

M. K. Koo. Mr. Koo, a founder of the Nam Tai Group, serves as Executive Chairman, Chief Financial Officer and Acting Chief Executive Officer of Nam Tai. Effective October 1, 2010, Mr. Koo was appointed President and director of NTEEP. Mr. Koo has served Nam Tai in various senior executive and management positions since our inception, including responsibilities for corporate strategy, finance and administration. He is also Chairman of the Board of Directors of NTEEP and Chairman & Legal Representative of Nam Tai's PRC subsidiaries. Mr. Koo received his Bachelor of Laws degree from National Taiwan University in 1970.

Table of Contents

Tohru Odashima. Mr. Odashima, the Senior President of Wuxi Manufacturing, joined Nam Tai as President of its manufacturing plant in Wuxi in September 2010. Before joining Nam Tai, Mr. Odashima was employed by Sony Chemical Corporation and its related companies since 1968. During his over 40 years with Sony, he served Sony in areas of research and development, manufacturing technology, factory operations management and business development of FPC products. His most recent position with Sony, in which he served for approximately 10 years, was as Director/President of Sony Chemicals (Suzhou) Co., Ltd., located in Suzhou, PRC, which is the city to the immediate Northwest from our facilities in Wuxi. During his tenure with Sony, Mr. Odashima gained substantial experience and developed expertise in the development, manufacturing and marketing of FPC products and in the management of PRC factories dedicated to their production.

Wang Lu Ping. Mr. Wang, the Senior Operations President of Wuxi Manufacturing, has rejoined Nam Tai as Operations President of its manufacturing plant in Wuxi since September 2011. From 1997 to 2004, Mr. Wang was employed by Nam Tai in various capacities, including Engineering Manager, Assistant General Manager and Managing Director. From 2006 to 2009, Mr. Wang was re-employed as Chief Operating Officer and Chief Executive Officer of Zastron Electronic (Shenzhen) Co., Ltd. Before joining Nam Tai in 1997, Mr. Wang held several management positions in various companies in Taiwan and Malaysia. Mr. Wang graduated from Chinese Military Academy in Taiwan. He has over 28 years of managing experience in the field of electronics industry.

Wang Shi Ping. Mr. Wang is the Senior Operations President of Shenzhen Manufacturing. He joined Nam Tai as an engineer in the Engineering Department on June 10, 1991. During his 21 years service to Nam Tai, he sequentially served as the Manager of the Engineering Department, the Assistant Manager of the Production Department, the Vice General Manager of the General Management (GM) Office, the Directing Vice General Manager of the GM Office, the Operations Director of the GM Office, the Vice Operations President of the GM Office, and the Operations President of the Operations Department.

Peter R. Kellogg. Mr. Kellogg has served on our Board of Directors since June 2000. Mr. Kellogg was a Senior Managing Director of Spear, Leeds & Kellogg, a registered broker-dealer in the United States and a specialist firm on the NYSE until the firm merged with Goldman Sachs in 2000. Mr. Kellogg serves on our Compensation Committee and Nominating/Corporate Governance Committee. Mr. Kellogg is also a member of the Board of the Ziegler Companies and the U.S. Ski Team.

Dr. Wing Yan (William) Lo. Dr. Lo has served on our Board of Directors since July 8, 2003. From 1998 to 1999, Dr. Lo served as the Chief Executive Officer of Citibank's Global Consumer Banking business for Hong Kong. Prior to joining Citibank, Dr. Lo was the founding Managing Director of Hongkong Telecom IMS Ltd. From 2002 to 2006, Dr. Lo served as Executive Director and Vice President of China Unicom Ltd., a telecommunications operator in China that is listed on both the Hong Kong and New York Stock Exchanges. Until mid-2009, Dr. Lo served as Vice Chairman and Managing Director of I.T. Limited, a Hong Kong retailer in the fashion apparel market with stores in the PRC, Taiwan, Macao, Thailand and the Middle East, listed on the Hong Kong Stock Exchange. Dr. Lo holds an M. Phil. and Ph.D. degrees from Cambridge University, England. He also serves as an Adjunct Professor of The School of Business of Hong Kong Baptist University as well as on the Faculty of Business of Hong Kong Polytechnic University. In 1998, Dr. Lo was appointed as a Hong Kong Justice of the Peace. In 2003, he was appointed as a Committee Member of Shantou People's Political Consultative Conference. Dr. Lo currently serves on the Nominating/Corporate Governance Committee acting as the Chairman and also serves on our Audit Committee and Compensation Committee.

Charles Chu. Mr. Chu originally served as a Director of Nam Tai from November 1987 to September 1989. He was reappointed in November 1992 and has since served on our Board of Directors. Since July 1988, Mr. Chu has been engaged in the private practice of law in Hong Kong. Mr. Chu serves as Chairman of our Compensation Committee and on our Audit Committee and Nominating/Corporate Governance Committee. Mr. Chu received his Bachelor's of Laws degree and Post-Graduate Certificate of Law from the University of Hong Kong in 1980 and 1981, respectively.

Mark Waslen. Mr. Waslen has served on our Board of Directors since July 2003 and serves as Chairman of our Audit Committee and on our Compensation Committee and Nominating/Corporate Governance Committee. From 1990 to 1995 and from June 1998 to October 1999, Mr. Waslen was employed by Nam Tai in various capacities, including Financial Controller, Secretary and Treasurer. Since June 1, 2010, Mr. Waslen is employed as a Partner with MNP, a Canadian Chartered Accountant and business advisory firm. From 2001 to 2010, Mr. Waslen was employed by Berris Mangan Chartered Accountants, an accounting firm located in Vancouver, BC. Prior to joining Berris Mangan, Mr. Waslen has been employed by various other accounting firms, including Peat Marwick Thorne and Deloitte & Touche. Mr. Waslen is a CFA, CA and a CPA and received a Bachelor's of Commerce (Accounting Major) from University of Saskatchewan in 1982.

No family relationship exists among any of our directors or members of our senior management and no arrangement or understanding exists between any of our major shareholders, customers, suppliers or others, pursuant to which any person referred to above was selected as a director or member of senior management. Directors are elected each year at our annual meeting of shareholders or serve until their respective successors take office or until their death, resignation or removal. Members of senior management serve at the pleasure of the Board of Directors.

Table of Contents

Compensation of Directors and Senior Management

Compensation on an Aggregate Basis

The aggregate compensation, including benefits in kind granted, during the year ended December 31, 2011 that we or any of our subsidiaries paid to all directors and senior management as a group for their services in all capacities to the Company or any subsidiary was approximately \$3.1 million. That total includes an aggregate of \$0.1 million in stock compensation expense for options granted to the Company's non-employee directors.

During the year ended December 31, 2011, we granted to our directors, under our stock option plan, options to purchase an aggregate of 60,000 of our common shares at an exercise price of \$5.92 per share. The exercise price of the shares covered by the options granted during 2011 was equal to the fair market value of our shares on the date of grant. The closing price of our common stock on the date of grant, June 10, 2011, was \$5.92, as reported on the NYSE. The options granted during 2011 expire on the third anniversary of their grant date in 2014.

We pay our directors \$4,000 per month for their services as directors, and \$1,000 per meeting attended in person and \$700 per meeting attended by telephone. In addition, we reimburse our directors for all reasonable expenses incurred in connection with their services as a director and member of a board committee.

Members of our senior management were eligible for annual cash bonuses based on their performance and that of the subsidiaries in which they are assigned for the relevant period. Senior management is entitled to share up to 15% of the operating income, after tax, from the subsidiary in which they are employed for the year. During 2011, senior management was entitled to 5%. Our senior management recommends who among the participating staff members should receive a bonus and the amount, if any, to be allocated from such subsidiary's profit pool to the eligible employee. In addition to cash incentives, members of our senior management are eligible to receive stock options from our Stock Option Plans. For 2011, the former Chief Executive Officer and Chief Financial Officer were each entitled to 20% of the incentive pools and the balance is to be shared by other operational senior management of the Company per above.

According to the local laws and regulations of Shenzhen, China, prior to July 2006, we were required to contribute 8% to 9% of the stipulated salaries of our staff that worked in Shenzhen to retirement benefit schemes to fund retirement benefits for our employees. After July 2006, the applicable percentages were adjusted to 10% to 11%. In Wuxi, we are required to contribute 20% of our staff's salaries to help fund retirement benefits for our employees. Our principal obligation with respect to these retirement benefit schemes is to make the required contributions under the scheme. No forfeited contributions may be used by us to reduce the existing level of contributions.

Since December 2000, we have enrolled all of our eligible employees located in Hong Kong into the Mandatory Provident Fund, or MPF, scheme, a formal system of retirement protection that is mandated by the government of Hong Kong and provides the framework for the establishment of a system of privately managed, employment-related MPF schemes to accrue financial benefits for members of the Hong Kong workforce when they retire. Since first establishing a subsidiary in Macao in 2003, we have enrolled all of our eligible employees in Macao into Macao's retirement benefit scheme, or RBS. Both the MPF and RBS are available to all employees aged 18 to 64 and with at least 60 days of service at Nam Tai in Hong Kong or Macao. We contribute 5% of the employee's income. The maximum income for contribution purposes per employee is \$3,000 per month. Staff members are entitled to 100% of the Company's contributions, together with accrued returns, irrespective of their length of service with us, but the benefits are required by law to be preserved until the retirement age of 65 for employees in Hong Kong while the benefit can be withdrawn by the employees in Macao at the end of employment contracts.

The cost of our contributions to the staff retirement plans in Hong Kong, Macao and China amounted to approximately \$1.5 million, \$1.7 million and \$2.3 million for the years ended December 31, 2009, 2010 and 2011, respectively.

Table of Contents**Compensation on an Individual Basis****Directors Compensation*

The following table presents the total compensation paid to each of our non-management directors during 2011:

Name	Fees Earned or Paid in Cash (\$) ⁽¹⁾	Option Awards (\$) ⁽²⁾	All Other Compensation (\$)	Total (\$)
Peter R. Kellogg	52,200	28,050		80,250
Charles Chu	58,000	28,050		86,050
Dr. Wing Yan (William) Lo	55,700	28,050		83,750
Mark Waslen	55,700	28,050		83,750

- (1) Consists of the aggregate dollar amount of all fees earned or paid in cash for services as a director, including annual retainer fees and meeting fees.
- (2) Consists of the US\$ amount of option grants that Nam Tai recognized for financial statement reporting purposes in accordance with FASB ASC 718.

* Under the rules of the SEC, foreign private issuers like us are not required to disclose compensation paid to our directors or senior managers on an individual basis unless individual disclosure is required in the foreign private issuer's home country and is not otherwise publicly disclosed by the company. Although we are not required by our home country (the British Virgin Islands, the jurisdiction in which we are organized), we are voluntarily providing disclosure of compensation we paid to our directors and senior managers on an individual basis in this Report and plan to do so in our proxy statement for our 2011 Annual Meeting of Shareholders (even though we are not subject to the sections of the Securities Exchange Act of 1934 regulating the solicitation of proxies, consents or authorizations in respect of a security registered under the Securities Exchange Act of 1934 or disclosures required in a proxy statement in accordance with rules therefore promulgated under the Securities Exchange Act of 1934). See ITEM 3. Key Information of this Report under the heading Risk Factors. Our status as a foreign private issuer in the United States exempts us from certain of the reporting requirements under the Securities Exchange Act of 1934 and corporate governance standards of the New York Stock Exchange, or NYSE, limiting the protections and information afforded to investors. By providing disclosures of compensation we pay to our directors and senior managers on an individual basis in this Report or in our proxy statement, we are not undertaking any duty, and investors and others reviewing this Report should not expect, that we will continue to make such disclosures in any future Reports or in our proxy statements as long as we are exempt from doing so under the Securities Exchange Act of 1934. *We reserve the right to discontinue doing so at any time without prior notice.* Further, although the disclosures of compensation we paid to our directors and senior managers on an individual basis that we have provided in this Report may, in certain respects, appear comparable to similar disclosures made by companies organized in the U.S. that are required to file Annual Reports on Form 10-K or proxy statements under Regulation 14A under the Securities Exchange Act of 1934, such disclosures that we have made in this Report do not necessarily comply with the applicable requirements therefore under Form 10-K or Regulation 14A and this Report does not contain all disclosures required by ITEM 11 of Form 10-K or ITEM 8 of Schedule 14A of Regulation 14A.

Options Granted During the Year and Held by Directors, at December 31, 2011

Our policy is to grant to non-employee directors on an annual basis, upon their election to the Board of Director at the annual shareholders meeting, options to purchase 15,000 shares at an exercise price equal to 100% of the fair market value of the common shares on the date of grant. Accordingly, in June 2011, each of our non-employee directors was granted options to purchase 15,000 shares (a total of 60,000 shares for all of our non-employee directors) at an exercise price of \$5.92 and they are exercisable immediately. These options lapse three years from the date of grant.

Compensation on an Individual Basis - Executive Officers

The following table sets forth a summary of the compensation which we (including our subsidiaries) paid during 2011 to Mr. Koo and our four other highest paid executive officers during 2011 who were serving at December 31, 2011.

Table of Contents**Summary Compensation Table**

Name and Principal Position	Year	Salary (\$) ⁽¹⁾	Other	Total (\$)
			comp. and benefits (\$) ⁽²⁾	
Koo Ming Kown <i>Nam Tai's Executive Chairman, Chief Financial Officer and Acting</i>	2011	851,625 ⁽³⁾	318,287 ⁽⁴⁾	1,169,912
<i>Chief Executive Officer; NTEEP's President and director</i>	2010	212,915 ⁽³⁾	236,079 ⁽⁴⁾	448,994
	2009	10 ⁽³⁾	199,720 ⁽⁴⁾	199,730
Colin Yeoh⁽⁵⁾ <i>Former Chief Executive Officer of Nam Tai and a director of NTEEP</i>	2011	340,645	7,536	348,181
	2010	213,523	829,411	1,042,934
	2009	171,304	4,191	175,495
Ivan Chui⁽⁶⁾ <i>Former Chief Marketing Officer of Nam Tai</i>	2011	278,710	415	279,125
	2010	219,691	551,757	771,448
	2009		129,032	129,032
Tohru Odashima <i>Senior President of Wuxi Manufacturing</i>	2011	378,837	240,462	619,299
	2010	109,198	38,653	147,851
	2009			
Wang Shi Ping <i>Senior Operations President of Shenzhen Manufacturing</i>	2011	170,460	41,187	211,647
	2010	147,120	188,607	335,727
	2009	120,220	3,294	123,514

- (1) Consists of the basic salary earned by the named executive officers during the year indicated. Cash compensation included in the table was paid to Nam Tai's senior executives in HK\$, RMB and Japanese yen (JPY), respectively and for purposes of the presentation in the above table have been converted into US\$ at a conversion rate \$1.00:HK\$7.75, \$1.00:RMB6.43 and \$1.00:JPY79.39 for 2011, \$1.00:HK\$7.75, \$1.00:RMB6.77 and \$1.00:JPY89.08 for 2010 and \$1.00:HK\$7.75, \$1.00:RMB6.83 for 2009, respectively.
- (2) To the extent applicable to the named individual, consists of amounts paid for housing, golf club membership fees, mandatory provident fund, life, medical, travel, social security, unemployment compensation, welfare and accident insurance premiums, bonus and fees for annual physical examination. The value of stock options is not included.
- (3) Mr. Koo was appointed as Nam Tai's Chief Financial Officer effective March 1, 2009. Prior to March 1, 2009, Mr. Koo served on Nam Tai's Board of Directors as Non-executive Chairman of the Board and since March 1, 2009 has served as Executive Chairman of the Board. Mr. Koo's salary for serving as Nam Tai's Chief Financial Officer during 2009, 2010 and 2011 was \$1.00 per month. Effective October 1, 2010, in addition to his duties as Nam Tai's Chief Financial Officer, Mr. Koo was appointed as President of NTEEP, his salary for serving as Nam Tai's Chief Financial Officer was confirmed at \$1.00 per month and his salary for serving as President of NTEEP at approximately \$0.9 million annually. See ITEM 7. Major Shareholders and Related Party Transactions - Certain Relationships and Related Party Transactions.
- (4) All other compensation and benefits for 2011 includes insurance premiums and fees for annual physical examination, \$0.2 million in rental charges paid for housing provided for Mr. Koo and \$0.1 million which Nam Tai has accrued as a bonus to Mr. Koo for services in 2011, but is payable to Mr. Koo in February 2012. All other compensation and benefits for 2010 includes insurance premiums and golf membership expenses, \$0.1 million in rental charges paid for housing provided for Mr. Koo and \$0.03 million which Nam Tai has accrued as a bonus to Mr. Koo for services in 2010, but which is payable to Mr. Koo in March 2011. All other compensation and benefits for 2009 includes insurance premiums and golf membership expenses, \$0.1 million in rental charges paid for housing provided for Mr. Koo. Amounts of \$0.8 million and \$0.8 million previously accrued by the Company during 2009 and 2010, respectively, for payment to Mr. Koo if he remained as Nam Tai's CFO from March 1, 2009 through and after February 29, 2012 have not been included in the table since the Company's obligation therefore was terminated in October 2010 and Mr. Koo has never received payment of those amounts during 2009 or 2010. See ITEM 7. Major Shareholders and Related Party Transactions - Certain Relationships and Related Party Transactions for a discussion of the compensation payable and previously payable to Mr. Koo as Nam Tai's CFO. All other compensation and benefits in 2011, 2010 and 2009 also includes directors fees of nil, \$0.04 million and \$0.04 million, respectively. Because options to purchase 15,000 shares granted in 2009 to Mr. Koo were surrendered and cancelled within a few months thereafter, in order to avoid the appearance that Mr. Koo received duplicate compensation in this transition from being an independent director to a management director, all other compensation and benefits in 2009 do not include \$0.01 million, which were the dollar amounts for the options granted to Mr. Koo in 2009 that Nam Tai recognized for financial statement reporting purposes in accordance with FASB ASC 718.

- (5) Resigned on February 28, 2012.
- (6) Resigned on November 17, 2011.

Table of Contents

Retirement Benefits

Since December 2000, we have enrolled all of our eligible employees located in Hong Kong into the Mandatory Provident Fund. The following table provides amount of contributions that the Company has made for the Mandatory Provident Retirement Funds to the individuals named in the Summary Compensation Table above in accordance with Hong Kong law.

Name	Number of years of credited Service	Value at December 31, 2011 of Accumulated Benefits (\$)	Company Payments During 2011 (\$)
Koo Ming Kown	37.0 ⁽¹⁾	N/A	N/A
Colin Yeoh ⁽²⁾	8.3	3,865	N/A
Ivan Chui ⁽³⁾	11.1	12,308	N/A
Tohru Odashima	1.3	N/A	N/A
Wang Shi Ping	20.6	N/A	N/A

(1) Prior to October 2010, Mr. Koo's services as our employee were for Nam Tai Electronics, Inc., the ultimate parent, and as such he is not eligible under Hong Kong's Mandatory Provident Retirement Fund or Macao's retirement benefit scheme. Accordingly, no contributions have been made for Mr. Koo. Although he was appointed President of our subsidiary, NTEEP, effective October 1, 2010, contributions are not required for Mr. Koo under Hong Kong's Mandatory Provident Retirement Fund because he is over 65 years old.

(2) Resigned on February 28, 2012.

(3) Resigned on November 17, 2011.

Options Held by Executive Officers at December 31, 2011

None of our executive officers named in the Summary Compensation Table above held any option to purchase shares of the Company as of December 31, 2011.

Board Practices

All directors hold office until our next annual meeting of shareholders, which generally is in the summer of each calendar year, or until their respective successors are duly elected and qualified or their positions are earlier vacated by resignation or otherwise. The full board committee appoints members and the chairman of the board committees, who serve at the pleasure of the Board. Nam Tai does not have any director service contracts providing for benefits upon termination of service as a director or employee (if employed). We previously had a contract with Mr. Koo related to his board service. For more information relating to the loss of office agreement with Mr. Koo and its termination, see ITEM 7. Major Shareholders and Related Party Transactions – Certain Relationships and Related Party Transactions on page 59 of this Report.

Corporate Governance Guidelines

We have adopted a set of corporate governance guidelines which are available on our website at <http://www.namtai.com/corpgov/corpgov.htm>. The contents of this website address, other than the corporate governance guidelines, the code of ethics and committee charters, are not a part of this Form 20-F. Stockholders also may request a free copy of our corporate governance guidelines in print form by making a request to:

Paul Lau, Corporate Secretary

Facsimile: (852) 2263 1001

e-mail: shareholder@namtai.com

NYSE Listed Company Manual Disclosure

As a foreign private issuer with shares listed on the NYSE, the Company is required by Section 303A.11 of the Listed Company Manual of the NYSE to disclose any significant ways in which its corporate governance practices differ from those followed by U.S. domestic companies under NYSE listing standards. Management believes that there are no significant ways in which Nam Tai's corporate governance standards differ from those followed by U.S. domestic companies under NYSE listing standards.

Table of Contents

Committee Charters and Independence

The charters for our Audit Committee, Compensation Committee and Nominating/Corporate Governance Committee are available on our website at <http://www.namtai.com/corpgov/corpgov.htm>. The contents of this website address, other than the corporate governance guidelines, the code of ethics and committee charters, are not a part of this Report. Stockholders may request a copy of each of these charters from the address and phone number set forth above under Corporate Governance Guideline .

Each of the members of our Board of Directors serving on our Audit Committee, Compensation Committee and Nominating/Corporate Governance Committee are independent as that term is defined in Corporate Governance Rules of the NYSE.

Nam Tai has adopted the directors independence criteria as established by NYSE Corporate Governance Rules Section 303A.02.

An independent Non-Executive Director (INED) is an individual:

who has no material relationship with the Company as affirmatively determined by the Board;

who is not nor has been within the last three years immediately prior to the date of his appointment as an INED an employee of the Company, provided, however, employment as an interim Chairman of the Board or Chief Executive Officer or other executive officer of the Company shall not disqualify a director from being considered independent following that employment;

whose immediate family members⁽¹⁾ are not, nor have been within the last three years immediately prior to the date of his appointment as an INED, an executive officer of the Company;

who, or whose immediate family member⁽¹⁾, have not received greater than US\$0.1 million in direct compensation from the Company, other than directors and committees fees and pension or other forms of deferred compensation for prior service (provided such compensation is not contingent in any way on continuous service), during any twelve-month period within the last three years immediately prior to the date of his appointment as an INED;

who is neither a partner nor an employee of the internal or external audit firm of the Company and within the last three years immediately prior to the date of his appointment as an INED was neither a partner nor an employee of such firm and personally worked on the Company s audit during that time;

none of whose immediate family members⁽¹⁾ is (a) a current partner of the internal or external audit firm of the Company or (b) a current employee of the internal or external audit firm of the Company and personally works on the Company s audit;

none of whose immediate family members⁽¹⁾ have been, within the last three years immediately prior to the date of his appointment as an INED, partners or employees of the internal or external audit firm and personally worked on the Company s audit during that time; and

who, or whose immediate family members⁽¹⁾, are not, nor within the last three years immediately prior to the date of his appointment as an INED, employed as an executive officer of another company in which any of the Company s present executives at the same time serves or served on that company s compensation committee; and

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

who is not an employee of, or whose immediate family members⁽¹⁾ are not executive officers of, a company that has made payments to, or received payments from, the Company for property or services in an amount which in any of the 3 fiscal years prior to his appointment as an INED, exceeds the greater of \$1 million or 2% of such other company's consolidated gross revenues.

- (1) An immediate family member includes a person's spouse, parents, children, siblings, mothers- and father-in-law, sons-and daughters-in-law, brothers and sisters-in-law, and anyone (other than domestic employees) who shares such person's home.

Audit Committee

The primary duties of Nam Tai's Audit Committee are reviewing, acting on and reporting to the Board of Directors with respect to various auditing and accounting matters, including the selection of independent registered public accounting firm, the scope of annual audits, the fees to be paid to the independent registered public accounting firm and the performance of the independent registered public accounting firm and accounting practices.

Our Audit Committee consists of three independent non-executive directors, Messrs. Waslen and Chu and Dr. Lo. Mr. Waslen serves as the Chairman of the Audit Committee as a financial expert.

Table of Contents

Compensation Committee

The primary duties of Nam Tai's Compensation Committee are to recommend (1) the compensation of the Company's Board of Directors; (2) compensation of any directors who are executives of the Company and the chief executive officer with reference to achievement of corporate goals and objectives established in the previous year; (3) compensation of other senior management if required by the Board; and (4) equity-based and incentive compensation programs of the Company.

Our Compensation Committee consisted of four independent non-executive directors in 2011: Messrs. Chu, Waslen, Kellogg and Dr. Lo. Mr. Chu serves as the Chairman of the Compensation Committee.

Nominating/Corporate Governance Committee

The primary duties of Nam Tai's Nominating/Corporate Governance Committee consist of (1) assisting the Board by actively identifying individuals qualified to become Board members consistent with criteria approved by the Board; (2) recommending to the Board the director nominees for election at the next annual meeting of stockholders, the member nominees for the Audit Committee, Compensation Committee and the Nominating/Corporate Governance Committee on an annual basis; (3) reviewing and

recommending to the Board whether it is appropriate for such director to continue to be a member of the Board in the event that there is a significant change in the circumstance of any director that would be considered detrimental to the Company's business or his/her ability to serve as a director or his/her independence; (4) reviewing the composition of the Board on an annual basis; (5) recommending to the Board a succession plan for the chief executive officer and directors, if necessary; (6) monitoring significant developments in the law and practice of corporate governance and of the duties and responsibilities of directors of public companies; (7) establishing criteria to be used in connection with the annual self-evaluation of the Nominating/Corporate Governance Committee; and (8) developing and recommending to the Board and administering the corporate governance guidelines of the Company.

Our Nominating/Corporate Governance Committee consists of four independent non-executive directors: Messrs. Chu, Waslen and Kellogg and Dr. Lo. Dr. Lo serves as the Chairman of the Nominating/Corporate Governance Committee.

Stock Options of Directors and Senior Management

During 2011, our non-employee directors were each granted options to purchase 15,000 shares of the Company. These options (a total of 60,000 options) and an aggregate of 120,000 options granted to our directors in 2009 and 2010 (a total of 180,000) were outstanding and held by our directors as of February 28, 2012. The options granted in 2009 are exercisable at \$4.41 per share and will lapse on June 4, 2012, the options granted in 2010 are exercisable at \$ 4.45 per share, and will lapse on June 2, 2013, and the options granted in 2011 are exercisable at \$5.92 per share and will lapse on June 9, 2014.

Share Ownership of Directors and Senior Management

For information regarding the numbers and percentage ownership of our shares, see ITEM 7. Major Shareholders and Related Party Transactions Shares and Options Ownership of Directors, Senior Management and Principal Shareholders.

Employee Stock Option Plans

Nam Tai has two stock option plans, its amended 2001 stock option plan and its 2006 stock option plan. The 2006 stock option plan was approved by the Board on February 10, 2006 and approved by shareholders at our 2006 Annual Meeting of Shareholders.

Under either the amended 2001 stock option plan or the 2006 stock option plan, the terms and conditions of individual grants may vary subject to the following: (1) the exercise price of incentive stock options may not normally be less than market value on the date of grant; (2) the term of incentive stock options may not exceed ten years from the date of grant; (3) the exercise price of an option cannot be altered once granted unless such action is approved by shareholders in a general meeting or results from adjustments to the Company's share capital and necessary to preserve the intrinsic value of the granted options; and (4) every non-employee director automatically receives on an annual basis upon their election to the Board of Director at the annual shareholders' meeting, options to purchase 15,000 common shares at an exercise price equal to 100% of the fair market value of the common shares on the date of grant.

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

At February 28, 2012, we had options outstanding to purchase 180,000 shares, held by non-employee directors. Under our existing stock option plans, options to purchase 2,664,869 shares were available for future grant.

The full text of our amended 2001 stock option plan, amended on July 30, 2004, was filed with the SEC as Exhibit 4.18 to our Annual Report on Form 20-F for the year ended December 31, 2004. The full text of our 2006 stock option plan was included as Exhibit 99.1 to our Form 6-K furnished to the SEC on June 12, 2006. Amendments to our stock options were included with our form 6-K furnished to the SEC on November 13, 2006.

Table of Contents**Employees**

The following table provides information concerning the number of Nam Tai's employees, their geographic location and their main category of activity during the years ended December 31, 2009, 2010 and 2011.

Geographic Location	Main Activity	At December 31,		
		2009	2010	2011
Shenzhen, PRC				
	Manufacturing	3,734	4,153	2,910

(1) Employees categorized in "support" include personnel engaged in procurement, customs, shipping and warehouse services. Our subsidiaries in Shenzhen, China have entered into collective agreements with their respective trade unions. The collective agreements usually set out the minimum standard for wages, working hours and other benefits. The current collective agreement between our subsidiaries and its trade union was renewed on January 1, 2012 and we expect that it will be renewed on an annual basis thereafter.

Table of Contents**ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS**
Shares and Options Ownership of Directors, Senior Management and Principal Shareholders

The following table sets forth certain information known to us regarding the beneficial ownership of our common shares as of February 28, 2012, by each person (or group within the meaning of Section 13(d)(3) of the Exchange Act) known by us to own beneficially 5% or more of our common shares; and each of our current directors and senior management.

Name	Shares beneficially owned ⁽¹⁾	
	Number	Percent
Peter R. Kellogg	5,951,180 ⁽²⁾	13.3%
M. K. Koo	5,242,786 ⁽³⁾	11.7%
I.A.T. Reinsurance Syndicate Ltd.	5,224,800 ⁽²⁾	11.7%
Charles Chu	47,500 ⁽⁴⁾	*
Wing Yan (William) Lo	45,000 ⁽⁴⁾	*
Mark Waslen	55,000 ⁽⁴⁾	*
Wang Lu Ping	2,416 ⁽⁵⁾	*
Wang Shi Ping		
Tohru Odashima		

* Less than 1%.

- (1) Percentage of ownership is based on 44,803,735 common shares outstanding as of February 28, 2012. In accordance with Rule 13d-3(d)(1) under the Exchange Act, options which are exercisable within 60 days of February 28, 2012 have been considered outstanding for the purpose of computing the percentage of Nam Tai's outstanding shares owned by the listed person holding such options, but are not considered outstanding for the purpose of computing the percentage of shares owned by any of the other listed persons.
- (2) Mr. Kellogg directly holds 681,380 common shares and indirectly, through I.A.T. Reinsurance Syndicate Ltd., holds 5,224,800 common shares. I.A.T. Reinsurance Syndicate Ltd. is a Bermuda corporation of which Mr. Kellogg is the sole holder of its voting stock. Mr. Kellogg disclaims beneficial ownership of the shares held by I.A.T. Reinsurance Syndicate Ltd. Mr. Kellogg also holds options to purchase 45,000 shares, which he received in 2009, 2010 and 2011 as a director of Nam Tai.
- (3) Mr. Koo beneficially owned 5,242,786 common shares jointly with Ms. Cho Sui Sin, Mr. Koo's wife.
- (4) Includes options to purchase 45,000 shares.
- (5) Includes 2,416 common shares held by Ms. Jean S. Tsai, Mr. Wang's wife.

To our knowledge, the Company is not directly or indirectly owned or controlled by another corporation or corporations, by any foreign government or by any other natural or legal person severally or jointly through February 28, 2012.

All of the holders of our common shares have equal voting rights with respect to the number of common shares held. As of February 28, 2012, there were approximately 604 holders of record of our common shares. According to information provided to us by our transfer agent, 587 holders of record with addresses in the United States held 39,203,252 of our common shares at February 28, 2012.

The following table reflects the percentage ownership of our common shares during the last three years ended February 28, 2012 by shareholders who beneficially owned 5% or more of our common shares during that period:

	Percentage Ownership ⁽¹⁾		
	2010	2011	2012
Peter R. Kellogg ⁽²⁾	13.0%	13.0%	13.3%
M. K. Koo	11.7%	11.7%	11.7%
I.A.T. Reinsurance Syndicate Ltd.	11.7%	11.7%	11.7%
Kahn Brothers LLC		5.5% ⁽³⁾⁽⁴⁾	
Royce & Associates, LLC	5.2% ⁽⁵⁾	4.6% ⁽⁶⁾⁽⁷⁾	

(1)

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

Based on 44,803,735 common shares outstanding on February 28, 2012. In accordance with Rule 13d-3(d)(1) under the Exchange Act, options which are exercisable within 60 days of February 28, 2012 have been considered outstanding for the purpose of computing the percentage of Nam Tai's outstanding shares owned by the listed person holding such options, but are not considered outstanding for the purpose of computing the percentage of shares owned by any of the other listed persons.

- (2) Includes shares registered in the name of I.A.T. Reinsurance Syndicate Ltd., of which Mr. Kellogg disclaims beneficial ownership. Mr. Kellogg also holds options to purchase 45,000 shares, which he received in 2009, 2010 and 2011 as a director of Nam Tai.
- (3) Based on a Schedule 13G filed with the SEC by the beneficial holder on February 7, 2011.

Table of Contents

- (4) The holder did not make a filing with the SEC under Rule 13d-1 or 13d-2 of the Exchange Act for its holdings in 2010 or 2012 and Nam Tai has no information regarding the holder's beneficial ownership of its shares for 2012.
- (5) Based on Amendment No. 1 to Schedule 13G filed with the SEC by the beneficial holder on January 26, 2010.
- (6) Based on Amendment No. 2 to Schedule 13G filed with the SEC by the beneficial holder on February 4, 2011.
- (7) The holder did not make a filing with the SEC under Rule 13d-1 or 13d-2 of the Exchange Act for its holdings in 2012 and Nam Tai has no information regarding the holder's beneficial ownership of its shares for 2012.

The Company is not aware of any arrangements that may, at a subsequent date, result in a change of control of the Company.

Certain Relationships and Related Party Transactions

In connection with the appointment of Mr. Koo as Nam Tai's Chief Financial Officer in March 2009, Nam Tai and Mr. Koo agreed to the following compensation arrangements: (1) a salary of \$1.00 per month; (2) employment benefits comparable to those provided to other members of senior management, including insurance coverage, annual physical examination, golf club membership fees, and rent payment for his apartment in Hong Kong of up to \$0.02 million per month, plus all miscellaneous fees; and (3) compensation in the amount of \$3.0 million after completion of three years' service with Nam Tai as Chief Financial Officer.

The compensation payable to Mr. Koo for his three-year term of service was not payable if Nam Tai replaced Mr. Koo with a suitable candidate within the three-year period ending February 28, 2011. In October 2010, Nam Tai appointed Joseph Li as Chief Financial Officer. In November 2010, as a consequence of his wife's health, Mr. Li resigned as Nam Tai's Chief Financial Officer and Mr. Koo again resumed in that position. However, despite his short tenure, Mr. Li's appointment as Nam Tai's Chief Financial Officer within the three-year period terminated the Company's obligation to pay Mr. Koo at the end of the three years. Accordingly, the approximately \$1.6 million we accrued since March 2009 for the potential payment to Mr. Koo at the end of his three years of service as the Chief Financial Officer was added to the Company's additional paid-in capital on Nam Tai's balance sheet at December 31, 2010 in accordance with the guidance under SAB Topics 1B.1 and 5T, and FASB ASC 718-10-15-4.

In view of Mr. Li's resignation, Mr. Koo resumed as Nam Tai's Chief Financial Officer and he and Nam Tai entered in an employment agreement effective October 1, 2010 regarding Mr. Koo's service as Nam Tai's CFO. Under this employment agreement, Mr. Koo's salary remains at \$1.00 per month, Mr. Koo is also entitled to receive perquisites consisting of (a) the same benefits as other members of the senior management enjoy, (b) reimbursement for any reasonable miscellaneous expenses including entertainment expenses and (c) reimbursement for the actual amount that Mr. Koo pays for the rental charges of his residential apartment in the amount of approximately \$0.02 million monthly, and all monthly utilities charges, such as for water, electricity telephone etc. Under the employment agreement, in the event that (1) Nam Tai terminates Mr. Koo for any reason other than for his commission of a criminal act, Nam Tai has agreed to pay Mr. Koo an amount which is equal to 36 months of his basic monthly salary, all bonuses and allowances and so on that he is entitled to at the time of his termination and (2) Mr. Koo wishes to terminate his employment with Nam Tai, except in the case of illness or other health conditions that prevent him from working, he must provide Nam Tai with one year's prior written notice.

Effective at the same time as his above-described employment agreement with Nam Tai, Mr. Koo and Nam Tai's subsidiary, NTEEP, entered into an employment agreement for Mr. Koo's services as NTEEP's President (which are in addition to his duties as Nam Tai's Chief Financial Officer). Under his employment agreement with NTEEP, Mr. Koo is to receive (a) an annual salary of approximately \$0.9 million, (b) subject to the final decision of NTEEP, an annual bonus of approximately \$0.1 million, provided that Mr. Koo is an employee of the Company in February of the following financial year, (c) perquisites consisting of (1) the same benefits as other members of the senior management of NTEEP enjoy and (2) reimbursement for any reasonable miscellaneous expenses including entertainment expenses. Under his employment agreement with NTEEP, the provisions in the event of termination of employment with NTEEP are identical to the provisions described above in the event of termination of employment with Nam Tai.

During 2009, Mr. Koo was granted options to purchase 15,000 shares of the Company and, in 2010, Mr. Koo's options granted in 2009 were abandoned and lapsed. As of December 31, 2011, Mr. Koo had no options.

Tax Dispute with Hong Kong Inland Revenue Department

Since the fourth quarter of 2007, several of our inactive subsidiaries have been involved in tax disputes relating to tax years 1996 and later years with the Inland Revenue Department of Hong Kong, or HKIRD, the income tax authority of the Hong Kong Government. These disputes are discussed sequentially below.

(1) NTTC

(a) In October 2007, the HKIRD issued an assessment Determination against Nam Tai Trading Company Limited (NTTC), a limited liability company incorporated in Hong Kong and an indirect wholly-owned subsidiary of the Company. This assessment relates to four tax years from 1996/1997 to 1999/2000. The taxes assessed in this proceeding amount to approximately \$2.9 million.

After consulting Hong Kong tax experts, Nam Tai believed that the position of the HKIRD for the years in question was incorrect as a matter of law and accordingly NTTC objected to the HKIRD's assessment and appealed it to the Hong Kong Board of Review, an independent body established under Hong Kong Inland Revenue Ordinance to hear appeals of HKIRD assessments. In December 2008, the Board of Review dismissed NTTC's appeal. According to advice from Senior Counsel in Hong Kong, the Court of Appeal in Hong Kong was unlikely to disturb the findings of the Board of Review. Therefore, NTTC decided not to pursue an appeal.

(b) In addition to the assessment Determination of October 2007, in May 2008, the HKIRD issued a writ against NTTC claiming taxes in the amount of approximately \$3 million for the taxable years from 1997/1998 to 2000/2001, partially overlapping the taxes against NTTC assessed by HKIRD in its assessment Determination of October 2007. Nam Tai's defense was struck out by the District Court in Hong Kong. According to advice from Senior Counsel in Hong Kong, the Court of Appeal was unlikely to disturb the findings of the District Court. Therefore, NTTC decided not to pursue an appeal against the decision of the District Court.

(c) Furthermore, from May to November 2010, the HKIRD issued three separate writs against NTTC claiming taxes and interests on unpaid taxes, in the amount of approximately \$0.9 million, \$1.1 million and \$0.1 million for the taxable years from 1996/1997 to 2003/2004, from 1996/1997, 1998/1999 and 1999/2000, and from 1996/1997 to 1999/2000, respectively. NTTC did not contest these proceedings, judgments were thus entered against NTTC.

(d) As a result of the proceedings stated in paragraphs (b) - (c) above, the HKIRD petitioned to the High Court of Hong Kong for a winding-up order against NTTC for the overdue judgment sums on June 10, 2011. The petition is fixed to be heard in the High Court of Hong Kong on March 13, 2012. NTTC shall ask for an adjournment of the hearing of the petition pending the determination of the HKIRD on whether to assess additional tax against the former directors of NTTC (see paragraph 5 herein below for details) since such determination is related to the arguments raised in the winding-up proceedings.

(2) NTGM

(a) The HKIRD has also made estimated assessments against Nam Tai Group Management Limited (NTGM), another wholly-owned subsidiary of Nam Tai, which has been inactive since 2005. This assessment, which relates to the tax years of 2001 and 2002, is in the amount of approximately \$0.2 million including interest allegedly due thereon. On December 17, 2008, the Hong Kong tax authorities issued a Writ of Summons through the District Court in Hong Kong claiming against NTGM the amount of \$0.2 million as taxes allegedly due and payable, together with interest, to the Hong Kong tax authorities for the fiscal years 2001 to 2002. NTGM filed its defense on January 29, 2009, but on February 17, 2009, HKIRD filed papers seeking to strike out NTGM's defense. As NTGM's defense was similar to the defense of NTTC and Senior Counsel had advised that NTTC's defense was not arguable before the Court, NTGM accordingly agreed with HKIRD to allow Judgment to be entered against NTGM by consent.

(b) On February 8, 2011, HKIRD issued a writ against NTGM claiming taxes in the amount of approximately \$0.9 million for the taxable years 2001/2002 to 2003/2004. NTGM filed a Defense to this action. The hearing of the action took place on September 6, 2011. The judgment was handed down on September 29, 2011 with the Defense being struck out and judgment was thus entered against NTGM.

(c) The HKIRD has commenced taxation by filing and serving its bill of costs together with a Notice of Commencement of Taxation both dated December 23, 2011. NTGM did not file any list of objections since it has no funds at hand. The taxing master of the District Court in Hong Kong has directed that the bill of costs filed by the HKIRD be set down for provisional taxation by a Chief Judicial Clerk on March 22, 2012.

(3) NTI

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

(a) On September 14, 2009, the HKIRD issued a writ against Nam Tai Telecom (Hong Kong) Company Limited (NTT), a dormant company of the Company, claiming taxes in the amount of approximately \$0.3 million for the taxable year 2002/2003. Judgment has been entered against NTT.

Table of Contents

(b) On February 17, 2011, HKIRD issued a writ against NTT claiming taxes in the amount of approximately \$0.03 million for the taxable year 2002/2003. NTT filed a Defense to this action. The hearing of this action was heard together with the case of NTGM as discussed in paragraph (2)(b) above on September 6, 2011. Similarly, the judgment was handed down on September 29, 2011 with the Defense being struck out and judgment was thus entered against NTT.

(c) The HKIRD has commenced taxation by filing and serving its bill of costs together with a Notice of Commencement of Taxation both dated December 23, 2011. NTT did not file any list of objections since it has no funds at hand. The taxing master of the District Court in Hong Kong has directed that the bill of costs filed by the HKIRD be set down for provisional taxation by a Chief Judicial Clerk on March 12, 2012.

(4) Expected Dispositions of Tax Disputes with Inactive or Dormant Subsidiaries

HKIRD has not accepted the explanations that it was necessary for these subsidiaries to perform their individual functions for the whole Nam Tai group and therefore the management fees paid by the Company by contract to support and finance all the necessary overhead expenses of these subsidiaries (not located in Hong Kong) to contribute to the businesses representing the administration and finance departmental functions from Vancouver, Canada for the whole group under the corporate structure at that time were not regarded as necessary expenses by HKIRD.

Since it is believed that it will be difficult for these subsidiaries to continue cooperating with HKIRD in the future, if the Company discontinues financing these subsidiaries, they will be forced to liquidate in due course. As these subsidiaries do not conduct any business and have been inactive or dormant for some time, and have either assets of limited book-value or no assets, Nam Tai believes that there should be no material impact from these proceeding on the Company's financial condition, liquidity or results of operations. Accordingly, no provision has been made regarding these assessments in Nam Tai's consolidated financial statements.

(5) Notices of Alleged Personal Liability for Additional Taxes Against Former Directors and Officers for Signing NTTC's Tax Returns

In addition to the legal cases against the inactive or dormant subsidiaries of the Company discussed above, in January 2011, the HKIRD issued two Notices of intention to assess additional taxes separately and personally against two former directors and officers of NTTC in the amounts of approximately \$1.5 million for the taxable years 1996/1997 and 1999/2000 and \$0.7 million for the taxable year 1997/1998. The taxable years involved in the controversy date from 13 to 15 years ago and initial advice received from the Company's tax advisor is that it is very rare for tax authorities to seek to attach personal liability on directors in this situation.

The former directors and officers to whom the Notices have been directed signed the tax returns for and on behalf of NTTC and the HKIRD has by its Notices sought to hold them personally liable for additional taxes purportedly on the basis that the relevant tax returns of NTTC were incorrect and contained omissions and understatements in violation of the Inland Revenue Ordinance, the governing tax law of Hong Kong.

The Company denies that any of NTTC's tax return filings were incorrect or contained omissions and understatements in violation of the Inland Revenue Ordinance and believes that no incorrect tax return was ever filed. The Company maintains that all of the expenses in disputes were normal and reasonable expenses incurred by the Director/Officer under the relevant management service contracts.

The two former directors submitted written representations in opposition to the issuance of the Notices, through their tax advisors, to the HKIRD on February 16, 2011, February 25, 2011, May 13, 2011 and June 30, 2011 respectively. The matter is pending the HKIRD's further reply. One of these former directors has commenced an action in the High Court of Hong Kong in November 2011 to seek an order from the Court that, *inter alia*, the Notice be withdrawn by the HKIRD.

At this time, Nam Tai is unable to assess the potential impact of these proceedings on the Company. However, the Company may be required to indemnify and defend this matter for the former directors and officers. If forced to defend, the Company plans to do so vigorously.

Nam Tai maintains directors' and officers' liability insurance against certain claims or liabilities that may arise by reason of the status or service of its directors and officers as such. We have informed Nam Tai's directors' and officers' liability insurance carrier of the HKIRD's Notices of assessment against NTTC's former directors and they have confirmed that the HKIRD's Notices constitute a claim under the coverage of the directors' and officers' liability insurance policy. Details of the reimbursement of the relevant costs are still in the process of being sorted out.

Table of Contents**Export Sales**

The following table reflects the approximate percentages of our net sales to customers by geographic area, based upon product delivery location, for the years ended December 31, 2009, 2010 and 2011:

Geographic Areas	Year Ended December 31,		
	2009	2010	2011
Japan	35%	55%	69%
Hong Kong	28	19	17
Europe	12	12	7
United States	10	10	5
China (excluding Hong Kong)	11	3	1
Others	4	1	1
	100%	100%	100%

Dividends

Under our dividend policy, our Board of Directors determines and declares the amount of Nam Tai's dividend payable based on our operating income, current and estimated future cash, cash flow and capital expenditure requirements at the time of the yearly declaration and such other factors as Nam Tai's Board believes reasonable and appropriate to consider in the determination and plans to announce the declared amount of that dividend.

Before 2009, we had a long history of paying dividends. In 2009 and 2010 our board of directors decided not to declare dividends. The decision not to declare dividends in 2009 and 2010 was made in order to maintain our cash reserves during the global economic downturn.

As announced on November 1, 2010, the Company set payment of quarterly dividends for 2011 of \$0.05 per quarter. All quarterly dividends scheduled for payment in 2011 were paid as scheduled.

On October 31, 2011, following its review of our financial results for the first nine months of 2011, the board of directors assessed our continuing improvement, the prevailing global economic conditions and the prospects of recovery, our operating income, current and estimated future cash, cash flow and capital expenditure requirements, and decided to pay quarterly dividends in 2012 according to the Schedule set forth below.

Dividends declared for 2012			
Quarterly Payment	Record Date	Period Scheduled	Dividend per share
Q1 2012	December 31, 2011	January 20 -31, 2012	\$ 0.07
Q2 2012	March 31, 2012	April 20 - 30, 2012	0.07
Q3 2012	June 30, 2012	July 20 - 31, 2012	0.07
Q4 2012	September 30, 2012	October 20 -31, 2012	0.07
		Total for full year 2012	\$ 0.28

Although the Company has resumed paying dividends, it does not necessarily mean that dividend payments will continue thereafter. Whether future dividends will be declared will depend upon Nam Tai's future growth and earnings, of which there can be no assurance, and the Company's cash flow needs for future expansion, which growth, earning or cash flow needs may be adversely affected by one or more of the factors discussed in ITEM 3. Key Information – Risk Factors in this Report. There can be no assurance that future cash dividends will be declared, what the amounts of such dividends will be or whether such dividends, once declared for a specific period, will continue for any future period, or at all.

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

The following table sets forth the total cash dividends and dividends per share we have declared during each of the five years ended December 31:

	Year ended December 31,				
	2007	2008	2009	2010	2011
Total dividends declared (in thousands)	\$ 37,635	\$ 39,427	\$	\$ 8,961	\$ 12,545
Regular dividends per share	\$ 0.84	\$ 0.88	\$	\$ 0.20	\$ 0.28
Total dividends per share	\$ 0.84	\$ 0.88	\$	\$ 0.20	\$ 0.28

Table of Contents**ITEM 9. THE LISTING**

Our shares are traded in the United States and have been listed on the New York Stock Exchange since January 2003 under the symbol NTE .

The following table sets forth the highest and lowest closing sales prices for our shares for each of the quarters in the three-year period ended December 31, 2011:

	2009			2010			2011		
	High	Low	Average Daily Trading Volume ⁽¹⁾	High	Low	Average Daily Trading Volume ⁽¹⁾	High	Low	Average Daily Trading Volume ⁽¹⁾
1 st Quarter	\$ 6.16	\$ 2.83	271,989	\$ 5.30	\$ 4.33	131,361	\$ 8.08	\$ 6.21	112,281
2 nd Quarter	4.71	3.80	189,192	5.04	4.12	81,622	6.55	5.21	91,990

October 31, 2011	5.01	4.50	92,500
September 30, 2011	5.18	4.75	63,138

(1) Determined by dividing the sum of the reported daily volume for the month by the number of trading days in the month.

ITEM 10. ADDITIONAL INFORMATION

Share Capital

Our authorized capital consists of 200,000,000 common shares, \$0.01 par value per share. As of February 28, 2012, we had 44,803,735 common shares outstanding.

Memorandum and Articles of Association

On December 5, 2007, we filed with the Registrar of Corporate Affairs of the British Virgin Islands, our jurisdiction of organization, an amended Memorandum and Articles of Associations (collectively our Charter), the instruments governing a company organized under the law of the British Virgin Islands, which are comparable in purpose and effect to certificates or articles of incorporation and bylaws of corporations organized in a state of the United States. Our Charter, which became effective on December 5, 2007, amended and restated our Memorandum and Articles of Association. The purpose of amending our Charter was to:

Table of Contents

1. Make our shares eligible for a direct registration system operated by a securities depository in accordance with Section 501.00 (B) of the rules of the New York Stock Exchange that became effective on January 1, 2008 as to companies, like us, having equity securities listed on the New York Stock Exchange prior to January 1, 2007;
2. Make various consequential amendments to our Memorandum and Articles of Association so as to make them consistent with the BVI Business Company's Act, 2004, as amended (the Act), which we became subject to on January 1, 2007;
3. Eliminate our authority to issue bearer shares that would otherwise be permitted under BVI law, which our directors believed to be inappropriate for a company with shares publicly traded in the United States;
4. Authorize our Chief Executive Officer, Chief Financial Officer and our other officers designated by the Chairman of the Board of Directors (or the directors in the absence of designation by the Chairman of the Board of Directors), to serve as the Chairman of all meetings of shareholders in the absence of the Chairman of the Board of Directors; and
5. Make certain other changes as are indicated Memorandum and Articles of Association.

Under our Charter, holders of our shares:

are entitled to one vote for each whole share a holder owns on all matters to be voted upon by shareholders, including the election of directors;

do not have cumulative voting rights in the election of directors;

are entitled to receive dividends if and when declared by our board of directors out of funds legally available under British Virgin Islands law; and

do not have preemptive rights to purchase any additional, unissued common shares.

Under our Charter or applicable BVI law:

all of common shares are equal to each other with respect to voting and dividend rights; and

in the event of our liquidation, all assets available for distribution to the holders of our common shares are distributable among them according to their respective holdings.

Pursuant to our Charter and pursuant to the laws of the British Virgin Islands, our Board of Directors without shareholder approval, may amend our Memorandum and Articles of Association except:

to restrict the rights or powers of our shareholders to amend the Memorandum or the Articles;

to change the percentage of shareholders required to pass a resolution of shareholders to amend our Charter;

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

in circumstances where our Charter cannot be amended by the Shareholders;

to authorize the Company to issue, or authorize the issuance of, bearer shares of capital stock; or

The power of our Board of Directors to amend our Memorandum and Articles of Association continues to include amendments to increase or reduce our authorized capital stock. Our ability to amend our Memorandum and Articles of Association without shareholder approval in this fashion could have the effect of delaying, deterring or preventing our change in control, including one involving a tender offer to purchase our common shares or to engage in a business combination at a premium over the then current market price of our shares.

We have never had any class of stock outstanding other than our common shares nor have we ever changed the voting rights with respect to our common shares.

Our registered office is at P.O. Box 3342, Road Town, Tortola, British Virgin Islands and we have been assigned company number 3805.

As set forth in Clause 4 of our Memorandum of Association included in our Charter, our object or purpose is to engage in any act or activity that is not prohibited under British Virgin Islands law.

The following summarizes certain of the Regulations from our Articles of Association, included in our Charter:

Regulation 53 provides that a director may be counted as part of the quorum with respect to any contract or arrangement in which the director is materially interested or makes with the Company.

Regulation 46 allows the directors to vote on their compensation for their service as directors.

Table of Contents

Regulation 62 provides that the directors may by resolution exercise all of the Company's powers to borrow money and to mortgage or charge our undertakings and property or any part thereof, to issue debentures, debenture stock and other securities whenever we borrow money or as security for any of our debts, liabilities or obligations or those of any third party. These borrowing powers can be altered by an amendment to the Articles.

Regulation 78 allows us to deduct from any shareholder's dividends amounts owed to us by that shareholder.

Regulation 8(b) provides that we can redeem shares at fair market value from any shareholder against whom we have a judgment debt.

Regulation 5(a) provides that the Company's registered shares may be certificated or uncertificated and shall be entered in the register of members of the Company and registered as they are issued.

Regulation 7 provides that without prejudice to any special rights previously conferred on the holders of any existing shares, any of our shares may be issued with such preferred, deferred or other special rights or such restrictions, with respect to dividends, voting, return of capital or otherwise as the directors may from time to time determine.

Regulation 9 provides that if at any time our capital stock is divided into different classes or series of shares, the rights attached to any class or series may be varied with the consent in writing of the holders of not less than three-fourths of the issued shares of any other class or series of shares which may be affected by such variation.

Regulations 22 through 26 and under applicable BVI law provide that directors may convene meetings of our shareholders at such times and in such manner and places as the directors consider necessary or desirable, and they shall convene such a meeting upon the written request of shareholders holding more than 30% of the votes of our outstanding voting shares. Other than providing, if requested, reasonable proof of a holder's status as a holder of our shares as of the applicable record date, there is no condition to the admission of a shareholder or his or her proxy holder to our meetings of shareholders.

There is no provision in our Charter for the mandatory retirement of directors. Directors are not required to own our shares in order to serve as directors.

British Virgin Islands law and our Charter impose no limitations on the right of nonresident or foreign owners to hold or vote our securities.

There are no provisions in our Charter governing the ownership threshold above which shareholder ownership must be disclosed.

We filed our Charter with the SEC as Exhibit 1.1 to Amendment No. 1 to Form 8-A on December 13, 2007 and the provisions of our Charter may be reviewed by examining that filing.

Transfer Agent

Registrar and Transfer Agent Company, 10 Commerce Drive, Cranford, New Jersey 07016, U.S.A., serves as transfer agent and registrar for our shares in the United States.

Material Contracts

The following summarizes each material contract, other than contracts entered into in the ordinary course of business, to which Nam Tai or any subsidiary of Nam Tai is a party, for the two years immediately preceding the filing of this report:

On July 10, 2009, Nam Tai's subsidiary, Wuxi Zastron Precision-Flex Co., Ltd. and Yixing Building Engineering & Installation Co., Ltd entered into a Supplemental Plant Construction Contractor's Agreement, whereby Wuxi Zastron Precision-Flex Co., Ltd. agreed to pay RMB201 million (approximately \$29.4 million at the date of the agreement) for electrical engineering services to be provided Yixing Building Engineering &

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

Installation Co., Ltd. in connection with the new Wuxi Factory.

On June 29, 2010, Nam Tai's subsidiary, Namtai Electronic (Shenzhen) Co., Ltd. entered into a Banking Facilities Letter with China Construction Bank Corporation, Shenzhen Branch for Namtai Electronic (Shenzhen) Co., Ltd. to receive import facilities of up to \$6 million.

On October 28, 2010, Nam Tai's subsidiary, Zastron Electronic (Shenzhen) Co., Ltd. entered into a Banking Facilities Letter with HSBC Bank (China) Company Limited, Shenzhen Branch for Zastron Electronic (Shenzhen) Co., Ltd. to receive banking facilities of up to \$5 million.

Table of Contents

On November 15, 2010, Nam Tai's subsidiary, Namtai Electronic (Shenzhen) Co., Ltd. signed a guaranty in favor of HSBC Bank (China) Company Limited with maximum liability of RMB40 million (approximately \$6 million on November 15, 2010) for the banking facilities granted to Zastron Electronic (Shenzhen) Co., Ltd..

On November 25, 2010, Nam Tai and M. K. Koo entered into an employment agreement, effective on October 1, 2010, for Mr. Koo's services as Nam Tai's Chief Financial Officer.

On November 25, 2010, Nam Tai's subsidiary, Nam Tai Electronic & Electrical Products Limited, or NTEEP, and M. K. Koo entered into an employment agreement, effective on October 1, 2010, for Mr. Koo's services as NTEEP's President.

On July 21, 2011, Nam Tai's subsidiary, Zastron Electronic (Shenzhen) Co., Ltd. entered into a Banking Facilities Letter with HSBC Bank (China) Company Limited, Shenzhen Branch for Zastron Electronic (Shenzhen) Co., Ltd. to receive import facilities of up to \$5 million.

On July 21, 2011, Nam Tai's subsidiary, Namtai Investment (Shenzhen) Co., Ltd. signed a guaranty in favor of HSBC Bank (China) Company Limited, Shenzhen Branch with maximum liability of RMB40 million for the banking facilities granted to Zastron Electronic (Shenzhen) Co., Ltd..

On July 21, 2011, Nam Tai's subsidiary, Wuxi Zastron Precision-Flex Co., Ltd. entered into a Banking Facilities Letter with HSBC Bank (China) Company Limited, Suzhou Branch for Wuxi Zastron Precision-Flex Co., Ltd. to receive import facilities of up to \$3 million.

On July 21, 2011, Nam Tai's subsidiary, Namtai Investment (Shenzhen) Co., Ltd. signed a guaranty in favor of HSBC Bank (China) Company Limited, Suzhou Branch with maximum liability of RMB24 million for the banking facilities granted to Wuxi Zastron Precision-Flex Co., Ltd..

On November 16, 2011, Nam Tai's subsidiary, Wuxi Zastron Precision-Flex Co., Ltd. entered into a Banking Facilities Letter with HSBC Bank (China) Company Limited, Suzhou Branch for Wuxi Zastron Precision-Flex Co., Ltd. to receive a line for treasury products of up to \$2.5 million.

On November 16, 2011, Nam Tai's subsidiary, Zastron Electronic (Shenzhen) Co., Ltd. entered into a Banking Facilities Letter with HSBC Bank (China) Company Limited, Shenzhen Branch for Zastron Electronic (Shenzhen) Co., Ltd. to receive a line for treasury products of up to \$2.5 million.

On December 8, 2011, Nam Tai's subsidiary, Wuxi Zastron Precision-Flex Co., Ltd. entered into an amendment to its July 21, 2011 banking facility extending the term of such facility for 270 days.

The following summarizes each material contract, other than contracts entered into in the ordinary course of business, to which Nam Tai or any subsidiary of Nam Tai is a party since the end of the period covered by this report:

On January 13, 2012, Nam Tai's subsidiary, Zastron Electronic (Shenzhen) Co., Ltd. entered into a Banking Facilities Letter with HSBC Bank (China) Company Limited, Shenzhen Branch for Zastron Electronic (Shenzhen) Co., Ltd. to receive banking facilities of up to \$50 million. (replacing the Bank Facilities Letters entered into between Zastron Electronic (Shenzhen) Co., Ltd. and HSBC Bank (China) Company Limited, Shenzhen Branch on July 21, 2011 and November 16, 2011).

On January 16, 2012, Nam Tai's subsidiaries, Namtai Investment (Shenzhen) Co., Ltd. and Wuxi Zastron Precision-Flex Co., Ltd. signed a guaranty in favor of HSBC Bank (China) Company Limited, Shenzhen Branch with maximum liability of RMB370 million for the banking facilities granted to Zastron Electronic (Shenzhen) Co., Ltd..

On January 13, 2012, Nam Tai's subsidiary, Wuxi Zastron Precision-Flex Co., Ltd. entered into a Banking Facilities Letter with HSBC Bank (China) Company Limited, Suzhou Branch for Wuxi Zastron Precision-Flex Co., Ltd. to receive banking facilities of up to \$50 million. (replacing the Bank Facilities Letters entered into between Wuxi Zastron Precision-Flex Co., Ltd. and HSBC Bank (China) Company Limited, Suzhou Branch on July 21, 2011, November 16, 2011 and December 8, 2011).

On January 16, 2012, Nam Tai's subsidiaries, Namtai Investment (Shenzhen) Co., Ltd. and Zastron Electronic (Shenzhen) Co., Ltd. signed a guaranty in favor of HSBC Bank (China) Company Limited, Suzhou Branch with maximum liability of RMB370 million for the banking facilities granted to Wuxi Zastron Precision-Flex Co., Ltd..

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

On January 12, 2012, Nam Tai's subsidiary, Wuxi Zastron Precision-Flex Co., Ltd. entered into a Banking Facilities Letter with China Merchants Bank Co., Ltd., Shenzhen Jinzhonghuan Sub-branch, for Wuxi Zastron Precision-Flex Co., Ltd. to receive banking facilities of up to RMB50 million.

On January 13, 2012, Nam Tai's subsidiary, Zastron Electronic (Shenzhen) Co., Ltd. entered into a Banking Facilities Letter with China Merchants Bank Co., Ltd., Shenzhen Jinzhonghuan Sub-branch, for Zastron Electronic (Shenzhen) Co., Ltd. to receive banking facilities of up to RMB300 million.

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

On January 13, 2012, Nam Tai's subsidiary, Zastron Electronic (Shenzhen) Co., Ltd. signed a guaranty in favor of China Merchants Bank Co., Ltd., Shenzhen Jinzhonghuan Sub-branch, in relation to the RMB50 million banking facilities granted to Wuxi Zastron Precision-Flex Co., Ltd.

On January 13, 2012, Nam Tai's subsidiary, Namtai Investment (Shenzhen) Co., Ltd. signed a guaranty in favor of China Merchants Bank Co., Ltd., Shenzhen Jinzhonghuan Sub-branch, in relation to the RMB50 million banking facilities granted to Wuxi Zastron Precision-Flex Co., Ltd.

On January 13, 2012, Nam Tai's subsidiary, Namtai Investment (Shenzhen) Co., Ltd. signed a guaranty in favor of China Merchants Bank Co., Ltd., Shenzhen Jinzhonghuan Sub-branch in relation to the RMB300 million banking facilities granted to Zastron Electronic (Shenzhen) Co., Ltd.

Exchange Controls

There are no exchange control restrictions on payments of dividends, interest, or other payments to nonresident holders of Nam Tai's securities or on the conduct of our operations in Hong Kong, Cayman Islands or the British Virgin Islands, where Nam Tai is incorporated. Other jurisdictions in which we conduct operations may have various exchange controls. With respect to our subsidiaries in China, with the exception of a requirement that 11% of profits be reserved for future developments and staff welfare, there are no restrictions on the payment of dividends and the removal of dividends from China once all taxes are paid and assessed and losses, if any, from previous years have been made good. We believe such restrictions will not have a material effect on our liquidity or cash flows.

Table of Contents

Taxation

United States Federal Income Tax Consequences

The discussion below is for general information only and is not, and should not be interpreted to be, tax advice to any holder of our common shares. Each holder or a prospective holder of our common shares is urged to consult his, her or its own tax advisor.

General

This section is a general summary of the material United States federal income tax consequences to U.S. Holders, as defined below, of the ownership and disposition of our common shares as of the date of this report. This summary is based on the provisions of the Internal Revenue Code of 1986, as amended, or the Code, the applicable Treasury regulations promulgated and proposed thereunder, judicial decisions and current administrative rulings and practice, all of which are subject to change, possibly on a retroactive basis. The summary applies to you only if you hold our common shares as a capital asset within the meaning of Section 1221 of the Code. In addition, this summary generally addresses certain U.S. federal income tax consequences to U.S. Holders if we were to be classified as a PFIC. The United States Internal Revenue Service, or the IRS, may challenge the tax consequences described below, and we have not requested, nor will we request, a ruling from the IRS or an opinion of counsel with respect to the United States federal income tax consequences of acquiring, holding or disposing of our common shares. This summary does not purport to be a comprehensive description of all the tax considerations that may be relevant to the ownership of our common shares. In particular, the discussion below does not cover tax consequences that depend upon your particular tax circumstances nor does it cover any state, local or foreign law, or the possible application of the United States federal estate or gift tax. You are urged to consult your own tax advisors regarding the application of the United States federal income tax laws to your particular situation as well as any state, local, foreign and United States federal estate and gift tax consequences of the ownership and disposition of the common shares. In addition, this summary does not take into account any special United States federal income tax rules that apply to a particular U.S. or Non-U.S. holder of our common shares, including, without limitation, the following:

a dealer in securities or currencies;

a trader in securities that elects to use a market-to-market method of accounting for its securities holdings;

a financial institution or a bank;

an insurance company;

a tax-exempt organization;

a person that holds our common shares in a hedging transaction or as part of a straddle or a conversion transaction;

a person whose functional currency for United States federal income tax purposes is not the U.S. dollar;

a person liable for alternative minimum tax;

a person that owns, or is treated as owning, 10% or more, by voting power or value, of our common shares;

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

certain former U.S. citizens and residents who have expatriated;

persons holding shares through partnerships or other tax transparent entities; or

a person who receives our shares pursuant to the exercise of employee stock options or otherwise as compensation.

Investors should consult their tax advisors regarding the application of the U.S. federal tax rules to their particular circumstances as well as the state, local, non-U.S. and other tax consequences to them of the purchase, ownership and disposition of the shares.

Table of Contents

U.S. Holders

For purposes of the discussion below, you are a U.S. Holder if you are a beneficial owner of our common shares who or which is:

an individual United States citizen or resident alien of the United States (as specifically defined for United States federal income tax purposes);

a corporation, or other entity treated as a corporation for United States federal income tax purposes, created or organized in or under the laws of the United States, any State or the District of Columbia;

an estate whose income is subject to United States federal income tax regardless of its source; or

a trust (x) if a United States court can exercise primary supervision over the trust's administration and one or more United States persons are authorized to control all substantial decisions of the trust or (y) if it was in existence on August 20, 1996, was treated as a United States person prior to that date and has a valid election in effect under applicable Treasury regulations to be treated as a United States person.

The U.S. federal income tax treatment of a partner in a partnership (or other entity treated as a partnership for U.S. federal income tax purposes) that holds shares will generally depend on the status of the partner and the activities of the partnership. Partners in a partnership investing in shares should consult their tax advisors regarding the specific U.S. federal income tax consequences to them to the acquisition, ownership and disposition of the shares.

Distributions on Our Common Shares

If you are a U.S. Holder of common shares in a taxable year in which we are a PFIC (and any subsequent taxable years), then this section generally may not apply to you instead, see PFIC Considerations below. Otherwise, generally, the gross amount of any cash distribution or the fair market value of any property distributed that you receive with respect to our common shares will be subject to tax as ordinary income to the extent such distribution does not exceed our current or accumulated earnings and profits, or E&P, as calculated for United States federal income tax purposes. Such income will be included in your gross income on the date of receipt. Subject to certain limitations, dividends paid to non-corporate U.S. Holders, including individuals, may be eligible for a reduced rate of taxation if we are a qualified foreign corporation for U.S. federal income tax purposes. A qualified foreign corporation includes (i) a foreign corporation that is eligible for the benefits of a comprehensive income tax treaty with the United States that includes an exchange of information program, and (ii) a foreign corporation if its stock with respect to which a dividend is paid is readily tradable on an established securities market within the United States. We anticipate that each of requirements (i) and (ii) will be met here. A qualified foreign corporation for purposes of the reduced rate does not, however, include a PFIC, which we anticipate that we may be, as discussed below. Thus, U.S. Holders should consult their tax advisors regarding the availability of the reduced rate of taxation applicable to any dividends the Company pays with respect to the shares. To the extent any distribution exceeds our E&P, such distribution will first be treated as a tax-free return of capital to the extent of your adjusted tax basis in our common shares and will be applied against and reduce such basis on a dollar-for-dollar basis (thereby increasing the amount of gain and decreasing the amount of loss recognized on a subsequent disposition of such shares). To the extent that such distribution exceeds your adjusted tax basis in our common shares, the distribution will be treated as capital gain. Because we are not a United States corporation, a dividends-received deduction generally will not be allowed to corporations with respect to dividends paid by us.

We appear to have been a PFIC for 2011 and, based on our current operations, assets and market conditions for our shares, which we cannot anticipate, we may be a PFIC for 2012 see PFIC Considerations below and the discussion of certain PFIC issues in Risk Factors above. Therefore, the reduced rate of taxation available to U.S. Holders of a qualified foreign corporation may not be available for 2011.

For United States foreign tax credit limitation purposes, dividends received on our common shares will be treated as foreign source income and will generally be passive category income, or in the case of certain holders, general category income. You may be eligible, subject to a number of complex limitations, to claim a foreign tax credit in respect of foreign withholding taxes, if any, imposed on dividends paid on our common shares. The rules governing United States foreign tax credits are complex, and we recommend that you consult your tax advisor regarding the applicability of such rules to you.

Sale, Exchange or Other Disposition of Our Common Shares

If you are a U.S. Holder of common shares in a taxable year in which we are a PFIC (and any subsequent taxable years), then this section will not apply to you instead, see PFIC Considerations below. Otherwise, generally, in connection with the sale, exchange or other taxable disposition of our common shares:

you will recognize capital gain or loss equal to the difference (if any) between:

the amount realized on such sale, exchange or other taxable disposition and your adjusted tax basis in such common shares (your adjusted tax basis in the shares you hold generally will equal your U.S. dollar cost of such shares);

Table of Contents

such gain or loss will be long-term capital gain or loss if your holding period for our common shares is more than one year at the time of such sale or other disposition;

such gain or loss will generally be treated as United States source for United States foreign tax credit purposes; and

your ability to deduct capital losses is subject to limitations.

Newly enacted legislation requires certain U.S. Holders that are individuals, estates or trusts to pay an additional 3.8% tax on, among other things, dividends on and capital gains from the sale or other disposition of stock for taxable years beginning after December 31, 2012. U.S. Holders that are individuals, estates or trusts should consult their tax advisors regarding the effect, if any, of this legislation on their ownership and disposition of the Company's shares.

PFIC Considerations

The determination of whether a corporation is a PFIC in any taxable year is made on an annual basis after the close of that year and depends on the composition of its income and the nature and value of its assets including goodwill. Specifically, a corporation will be classified as a PFIC if, after applying relevant look-through rules with respect to the income and assets of subsidiaries, either (i) 75% or more of gross income for such taxable year is passive income, or (ii) 50% or more of the value of assets (based on an average of the quarterly values of the assets during such year) is attributable to assets that either produce passive income or are held for the production of passive income (the PFIC asset test). For this purpose, passive income generally includes dividends, interest, royalties, rents (other than rents and royalties derived in the active conduct of a trade or business), annuities and gains from assets that produce passive income.

Based upon the nature and book value of our assets and the total market value, or market capitalization, of our shares (which reflects goodwill) at the end of each quarter during 2011, we appear to have been a PFIC for U.S. federal income tax purposes for 2011. We have not conducted an appraisal of the actual fair market value of our assets for 2011 or currently in 2012, and we cannot anticipate the market capitalization of our shares for 2012. Accordingly, we may be treated as a PFIC for 2012.

As a result of the classification as a PFIC, a special tax regime would apply to both (a) any excess distribution by us (generally, the U.S. Holder's ratable share of distributions in any year that are greater than 125% of the average annual distributions received by such U.S. Holder in the three preceding years or its holding period, if shorter) and (b) any gain recognized on the sale or other disposition of your ordinary shares. Under the PFIC regime, any excess distribution and recognized gain would be treated as ordinary income. The U.S. federal income tax on such ordinary income is determined under the following steps: (i) the amount of the excess distribution or gain is allocated ratably over the U.S. Holder's holding period for our ordinary shares; (ii) tax is determined for amounts allocated to the first year in the holding period in which we were classified as a PFIC and all subsequent years (except the year in which the excess distribution was received or the sale occurred) by applying the highest applicable tax rate in effect in the year to which the income was allocated; (iii) an interest charge is added to this tax calculated by applying the underpayment interest rate to the tax for each year determined under the preceding sentence from the due date of the income tax return for such year to the due date of the return for the year in which the excess distribution or sale occurs; and (iv) amounts allocated to a year prior to the first year in the U.S. Holder's holding period in which we were classified as a PFIC or to the year in which the excess distribution or the disposition occurred are taxed as ordinary income and no interest charge applies.

If we were treated as a PFIC, a U.S. Holder of our shares would generally be subject to the PFIC rules described above with respect to distributions by us, and dispositions by us of the stock of, any direct or indirect subsidiaries of ours that are classified as PFICs under either the asset test or the income test, as if such holder received directly its pro-rata share of either the distribution or proceeds from such disposition.

A U.S. Holder may generally avoid the PFIC regime by making a qualified electing fund election which generally provides that, in lieu of the foregoing treatment, our earnings, on a pro rata basis, would be currently included in their gross income. However, we may be unable or unwilling to provide information to our U.S. Holders that would enable them to make a qualified electing fund election; thus, such election may not be available with respect to our shares.

In addition, U.S. Holders may generally avoid the PFIC regime by making the mark-to-market election with respect to our common shares. Although a U.S. Holder may be eligible to make a mark-to-market election with respect to our shares, no such election may be made with respect to the stock of any of our subsidiaries that a U.S. Holder is treated as owning, if such stock is not marketable. Hence, the mark-to-market election generally would not be effective to eliminate the interest charge described above with respect to deemed dispositions of a subsidiary PFIC stock or distributions from a subsidiary PFIC. Marking-to-market, in this context, means including in ordinary income each taxable year the excess, if any, of the fair market value of our common shares over your tax adjusted basis in such common shares as of the end of each year.

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

This mark-to-market election generally enables a U.S. Holder to avoid the deferred interest charge that would otherwise be imposed on them if we were to be classified as a PFIC.

An actual determination of PFIC status is factual in nature. Given the complexity of the issues regarding our classification as a PFIC, U.S. Holders are urged to consult their own tax advisors for guidance as to our PFIC status.

Table of Contents

Non-U.S. Holders

If you are not a U.S. Holder, you are a Non-U.S. Holder .

Distributions on Our Common Shares

You generally will not be subject to U.S. federal income tax, including withholding tax, on distributions made on our common shares unless:

you conduct a trade or business in the United States and the distributions are effectively connected with the conduct of that trade or business (and, if an applicable income tax treaty so requires as a condition for you to be subject to U.S. federal income tax on a net income basis in respect of income from our common shares, such distributions are attributable to a permanent establishment that you maintain in the United States).

If you meet the two tests above, you generally will be subject to tax in respect of such dividends in the same manner as a U.S. Holder, as described above. In addition, any effectively connected dividends received by a non-U.S. corporation may also, under certain circumstances, be subject to an additional branch profits tax at a 30 % rate or such lower rate as may be specified by an applicable income tax treaty.

Sale, Exchange or Other Disposition of Our Common Shares

Generally, you will not be subject to U.S. federal income tax, including withholding tax, in respect of gain recognized on a sale or other taxable disposition of our common shares unless:

your gain is effectively connected with a trade or business that you conduct in the United States (and, if an applicable income tax treaty so requires as a condition for you to be subject to U.S. federal income tax on a net income basis in respect of gain from the sale or other disposition of our common shares, such gain is attributable to a permanent establishment maintained by you in the United States); or

you are an individual Non-U.S. Holder and are present in the United States for at least 183 days in the taxable year of the sale or other disposition, and certain other conditions exist.

You will be subject to tax in respect of any gain effectively connected with your conduct of a trade or business in the United States generally in the same manner as a U.S. Holder, as described above. Effectively connected gains realized by a non-U.S. corporation may also, under certain circumstances, be subject to an additional branch profits tax at a rate of 30% or such lower rate as may be specified by an applicable income tax treaty.

Backup Withholding and Information Reporting

Payments, including dividends and proceeds of sales, in respect of our common shares that are made in the United States or by a United States related financial intermediary will be subject to United States information reporting rules. In addition, such payments may be subject to United States federal backup withholding tax. You will not be subject to backup withholding provided that:

you are a corporation or other exempt recipient; or

you provide your correct United States federal taxpayer identification number and certify, under penalties of perjury, that you are not subject to backup withholding.

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

Amounts withheld under the backup withholding rules may be credited against your United States federal income tax, and you may obtain a refund of any excess amounts withheld under the backup withholding rules by filing the appropriate claim for refund with the IRS in a timely manner.

Generally, a U.S. shareholder in a PFIC must file IRS Form 8621 for each tax year in which that shareholder: (1) recognizes gain on a direct or indirect disposition of a PFIC stock; (2) receives certain distributions from a PFIC; or (3) makes reportable elections with regard to the PFIC. In addition, under the recently enacted legislation, shareholders of a PFIC may be required to file information with the IRS with regard to their ownership of shares in the PFIC even in the absence of any of the above described gains, distributions or elections.

A shareholder that owns 10% or more (taking certain attribution rules into account) of the shares of a non-U.S. corporation may be required to file an information return, Form 5471, containing certain disclosure with regard to itself, other shareholders and the corporation.

In addition, certain U.S. Holders who are individuals that hold certain foreign financial assets as defined in the Code (which may include shares) are required to report information relating to such assets, subject to certain exceptions. U.S. Holders are urged to consult their tax advisors regarding these and any other reporting requirements that may apply with respect to their shares.

Table of Contents

The discussion above is a general summary. It does not cover all tax matters that may be important to you. Investors should consult their tax advisors regarding the application of the U.S. federal tax rules to their particular circumstances as well as the state, local, non-U.S. and other tax consequences to them of the purchase, ownership and disposition of the shares.

Documents on Display

Nam Tai is subject to the information requirements of the Exchange Act, and, in accordance with the Exchange Act, Nam Tai files annual reports on Form 20-F within four months of its fiscal year end, and submits other reports and information under cover of Form 6-K with the SEC. You may read and copy this information at the SEC's public reference room at 450 Fifth Street, N.W., Washington, D.C. 20549. Recent filings and reports are also available free of charge through the EDGAR electronic filing system at www.sec.gov. You can also request copies of the documents, upon payment of a duplicating fee, by writing to the public reference section of the SEC. Please call the SEC at 1-800-SEC-0330 for further information on the operation of the public reference room or accessing documents through EDGAR. As a foreign private issuer, Nam Tai is exempt from the rules under the Exchange Act prescribing the furnishing and content of proxy statements to shareholders.

ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Currency Fluctuations and Foreign Exchange Risk

Beginning on December 1, 1996, the RMB became fully convertible under the current accounts. There are no restrictions on trade-related foreign exchange receipts and disbursements in China. However, capital account foreign exchange receipts and disbursements are subject to control, and organizations in China are required to use designated banks for foreign currency transactions.

We sell a majority of our products in U.S. dollars and pay for our material components in Japanese yen, U.S. dollars, Hong Kong dollars, and RMB. We pay labor costs and overhead expenses in RMB, the currency of China (the basic unit of which is the yuan), Hong Kong dollars and Japanese yen.

Hong Kong Dollar

The exchange rate of Hong Kong dollars to U.S. dollars has been fixed by the Hong Kong government since 1983 at approximately HK\$7.80 to US\$1.00, through the currency-issuing banks in Hong Kong and, accordingly, has not in the past presented a currency exchange risk. This could change in the future.

Table of Contents

Japanese Yen

We face the potential of a material foreign exchange risk resulting from our costs and expenses we pay in Japanese yen. The following chart shows the percentage of our total costs paid in yen and our total sales made in yen during the years ended December 31, 2009, 2010 and 2011.

Our business and operating results could be materially and adversely affected in the event of a severe increase in the value of the Japanese yen to the U.S. dollar at a time when our sales made in Japanese yen are insufficient to cover our material purchases in Japanese yen. For further information regarding the historical effects on our financial results of fluctuations in the exchange rate of the yen to the U.S. dollar, please see discussion regarding the yen to U.S. dollar exchange rate in ITEM 5. Operating and Financial Review and Prospects Impact of Foreign Currency Fluctuations under the heading: Impact of Foreign Currency Fluctuations, beginning on page 38 of this Report. The appreciation of Japanese yen has shown signs of slowing down since the beginning of 2011, and we expect that the Japanese yen will continue to appreciate against the U.S. Dollar in 2012.

Chinese Renminbi

Approximately 19% of our total costs and expenses and 9% of our material costs in 2011 were in RMB. The appreciation of the RMB against U.S. dollars in 2011 has increased our costs when translated into U.S. dollars and could adversely affect our margin.

In 2009, the exchange rate of the RMB to U.S. dollars was relatively stable. At the end of 2010, the RMB had appreciated by 3.3% as compared to the year end of 2009. At the end of 2011, the RMB had further appreciated by 4.5% as compared to the year end of 2010.

If the RMB had been 1% and 5% less valuable against the U.S. dollar than the actual rate as of December 31, 2011, which was used in preparing our audited consolidated financial statements as of and for the year ended December 31, 2011, our net asset value, as presented in U.S. dollars, would have been reduced by \$0.5 million and \$2.7 million, respectively. Conversely, if the RMB had been 1% and 5% more valuable against the U.S. dollars as of that date, then our net asset value would have increased by \$0.5 million and \$2.7 million, respectively. Had rates of the RMB been 10% higher relative to the U.S. dollar during 2011, our operating expenses would have increased \$5.5 million as a result of net assets denominated in RMB as of December 31, 2011. For additional information regarding the fluctuation of the exchange rate of the RMB to the U.S. dollar, please see the discussion regarding the RMB to U.S. dollar exchange rate in ITEM 5. Operating and Financial Review and Prospects Impact of Foreign Currency Fluctuations.

Our results of operations may be negatively impacted by fluctuations in the exchange rate between the U.S. dollars and the RMB. If the RMB continues to appreciate against the U.S. dollars, our operating expenses will increase and, consequently, our operating margins and net income will likely decline if we do not manufacture products that allow for greater margins than those we have experienced historically.

Table of Contents*Currency Hedging*

We may elect to hedge our currency exchange risk when we judge that such action is required. In an attempt to lower the costs of expenditures in foreign currencies, we may enter into forward contracts or option contracts to buy or sell foreign currency(ies) against the U.S. dollar through one of our banks. As a result, we may suffer losses resulting from the fluctuation between the buy forward exchange rate and the sell forward exchange rate, or from the price of the option premium.

As of December 31, 2011, we held forward contracts but no option or future contracts and during the year we did not purchase or sell any commodity or currency options. No exchange gain/loss on forward contracts was recorded during the year. We are continuing to review our hedging strategy and there can be no assurance that we will not suffer losses in the future as a result of hedging activities. See also ITEM 11. Quantitative and Qualitative Disclosures About Market Risk – Currency Fluctuations and Foreign Exchange Risks.

Currencies included in Cash and Cash Equivalents and Fixed Deposits Maturing Over Three Months

The following table provides the U.S. dollar equivalent of amounts of currencies included in cash and cash equivalents and fixed deposits maturing over three months on our balance sheets at December 31, 2010 and 2011:

Currencies included in cash and cash equivalents and fixed deposits maturing over three months	As of December 31	
	2010	2011
	(In thousands)	
United States dollars	\$ 74,392	\$ 74,712
Chinese renminbi	92,731	67,802
Japanese yen	1,695	1,484
Hong Kong dollars	59,249	9,337
Total US\$ equivalent	\$ 228,067	\$ 153,335

Interest Rate Risk

Our interest expenses and income are sensitive to changes in interest rates. All of our cash reserves and short-term borrowings are subject to interest rate changes. Cash on hand of \$137.9 million as of December 31, 2011 was invested in term deposits. As such, interest income will fluctuate with changes in interest rates. During 2011, we had \$2.7 million in interest income and no interest expense.

As of December 31, 2010 and 2011, we had utilized approximately nil and \$2.1 million of our credit facilities, including nil and \$2.1 million in short term notes payable, but no short-term bank loans, respectively, resulting in minimal interest rate risk.

As of December 31, 2010 and 2011, we had no long-term bank loans.

ITEM 15. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

As of the end of the period covered by this report, the Company's management, with the participation of its Acting Chief Executive Officer and Chief Financial Officer, conducted an evaluation pursuant to Rule 13a-15 promulgated under the Exchange Act, of the effectiveness of the design and operation of Nam Tai's disclosure controls and procedures. Based on this evaluation, the Company's Acting Chief Executive Officer and Chief Financial Officer concluded that as of the end of the period covered by this report such disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed by the Company in reports it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC, and included controls and procedures designed to ensure that information required to be disclosed by the Company in such reports is accumulated and communicated to the Company's management, including the Company's Acting Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Report of Management on Internal Control Over Financial Reporting

Nam Tai's management is responsible for establishing and maintaining adequate internal control over financial reporting. Our management, including our Acting Chief Executive Officer and Chief Financial Officer, does not expect that our internal controls will prevent all errors and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, a control may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Nam Tai's management, including its Acting Chief Executive Officer and Chief Financial Officer, assessed the effectiveness of our internal control over financial reporting as of December 31, 2011. In making this assessment, our management used the criteria set forth in the Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on the assessment, Nam Tai's management, including its Acting Chief Executive Officer and Chief Financial Officer, concluded that, as of December 31, 2011, the Company's internal control over financial reporting was effective based on these criteria.

Attestation Report of Independent Registered Public Accounting Firm

The effectiveness of Nam Tai's internal control over financial reporting as of December 31, 2011 has been audited by Moore Stephens, an independent registered public accounting firm. The related report to the shareholders and the Board of Directors of Nam Tai appears on the next page of this Report.

Table of Contents

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and the Shareholders of Nam Tai Electronics, Inc.:

We have audited the internal control over financial reporting of Nam Tai Electronics, Inc. and its subsidiaries (the Company) as of December 31, 2011, based on criteria established in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Report of Management on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on the criteria established in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's consolidated balance sheet as of December 31, 2011 and the related consolidated statements of income, changes in equity and comprehensive income, and cash flows for the year then ended, and the financial statement schedules listed in Schedule 1, and our report dated March 16, 2012 expressed an unqualified opinion thereon.

Changes in Internal Control Over Financial Reporting

There were no changes in the Company's internal controls over financial reporting during the year ended December 31, 2011, the period covered by this Report on Form 20-F, that have materially affected, or are reasonably likely to materially affect, the Company's internal controls over financial reporting.

ITEM 16. [RESERVED]

ITEM 16 A. AUDIT COMMITTEE FINANCIAL EXPERT

The Company's Board of Directors has determined that one member of the Audit Committee, Mark Waslen, qualifies as an audit committee financial expert as defined by Item 407(d)(5)(ii) of Regulation S-K, adopted pursuant to the Exchange Act. For information concerning Mr. Waslen's education and experience by which he acquired the attributes qualifying him as an audit committee financial expert, please see the description of Mr. Waslen's background in ITEM 6. Directors and Senior Management Directors and Senior Managers of this Report.

Mr. Waslen is independent as that term is defined in the Listed Company Manual of the NYSE.

ITEM 16 B. CODE OF ETHICS

The Company has adopted a Code of Ethics for the Chief Executive Officer and Chief Financial Officer, which also applies to the Company's principal executive officers and to its principal financial and accounting officers. The Code of Ethics has been revised to apply to all employees as well. A copy of the revised Code of Ethics is attached as Exhibit 11.1 to this Report on Form 20-F. This code has been posted on our website, which is located at <http://www.namtai.com/corpgov/corpgov.htm>. The contents of this website address, other than the corporate governance guidelines, the code of ethics and committee charters, are not a part of this Form 20-F. ITEM 16 C. PRINCIPAL ACCOUNTANT FEES AND SERVICES

Moore Stephens has served as our independent registered public accounting firm for the years ended December 31, 2010 and 2011, for which audited consolidated financial statements appeared in this Report on Form 20-F. Each year our Audit Committee of the Board of Directors selects our independent registered public accounting firm and our Board of Directors annually directs us to submit the selection of our independent registered public accounting firm for ratification by shareholders at our annual meeting of shareholders. It is currently expected that the Audit Committee will select Moore Stephens as our independent registered public accounting firm for 2012 and that our Board of Directors will propose at the Annual Meeting of Shareholders to be held in 2012 that Moore Stephens be ratified as our independent registered public accounting firm for 2012.

The following table presents the aggregate fees for professional services and other services rendered by Moore Stephens to us in 2010 and 2011, respectively (dollars in thousands).

	Year ended December 31	
	2010	2011
Audit Fees ⁽¹⁾	\$ 371	\$ 396
Audit-related Fees ⁽²⁾		
Tax Fees ⁽³⁾	3	5
All other fees ⁽⁴⁾		
Total	\$ 374	\$ 401

- (1) Audit Fees consist of fees billed for the annual audit of our consolidated financial statements and the statutory financial statements of our subsidiaries. They also include fees billed for other audit services, which are those services that only the independent registered public accounting firm reasonably can provide, and include the provision of attestation services relating to the review of documents filed with the SEC.

Table of Contents

- (2) Audit-related Fees consist of fees billed for assurance and related services that are reasonably related to the performance of the audit or review of our consolidated financial statements.
- (3) Tax Fees include fees billed for tax compliance services, including the preparation of original and amended tax returns.
- (4) Includes all other products and services the independent public accounting firm provided to the Company.

Audit Committee Pre-approval Policies and Procedures

The Audit Committee of our Board of Directors is responsible, among other matters, for the oversight of the independent registered public accounting firm subject to the relevant regulations of the SEC and NYSE. The Audit Committee has adopted a policy, or the Policy, regarding pre-approval of audit and permissible non-audit services provided by our independent registered public accounting firm.

Under the Policy, the Chairman of the Audit Committee is delegated with the authority to grant pre-approvals in respect of all auditing services including non-audit service, but excluding those services stipulated in Section 201 Service Outside the Scope of Practice of Auditors . Moreover, if the Audit Committee approves an audit service within the scope of the engagement of the audit service, such audit service shall be deemed to have been pre-approved. The decisions of the Chairman of the Audit Committee made under delegated authority to pre-approve an activity shall be presented to the Audit Committee at each of its scheduled meetings.

Requests or applications to provide services that require specific approval by the Audit Committee are submitted to the Audit Committee by both the independent registered public accounting firm and the Chief Financial Officer.

During 2010 and 2011, 100% and 100%, respectively, of the total audit fees, audit-related fees, tax fees and all other fees were approved by the Audit Committee pursuant to the pre-approval requirement provided by paragraph (c)(7)(i)(C) of Rule 2-01 of Regulation S-X.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and the Shareholders of Nam Tai Electronics, Inc.:

We have audited the accompanying consolidated balance sheets of Nam Tai Electronics, Inc. and subsidiaries (the Company) as of December 31, 2010 and 2011, and the related consolidated statements of income, changes in equity and comprehensive income, and cash flows for each of the three years in the period ended December 31, 2011. Our audit also included the financial statement schedules listed in Schedule 1. These consolidated financial statements and financial statement schedules are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedules based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatements. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2010 and 2011, and the results of its operations and its cash flows for each of three years in the period ended December 31, 2011, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, the financial statement schedules listed in Schedule 1, when considered in relation to the basic financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2011, based on the criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 16, 2012 expressed an unqualified opinion thereon.

NAM TAI ELECTRONICS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(In thousands of U.S. dollars, except share and per share data)

1. Company Information

Nam Tai Electronics, Inc. and subsidiaries (the Company or Nam Tai) is an electronics manufacturing and design services provider to a selected group of the world's leading original equipment manufacturers, or OEMs, of telecommunication and consumer electronic products. Through its electronics manufacturing services operations, the Company manufactures electronic components and sub-assemblies, including flexible printed circuit board (FPCB), FPCB subassemblies, liquid crystal display (LCD) modules, LCD panels, thin film transistor display modules, radio frequency modules, digital audio broadcast modules, internet radio subassemblies, image sensors modules and printed circuit board assemblies. These components, modules and subassemblies are used in numerous electronic products including mobile phones, Internet Protocol phones, notebook computers, digital cameras, electronic toys, handheld video game devices and learning devices. The Company also manufactures finished products, including mobile phone accessories, home entertainment products and educational products.

The Company was founded in 1975 and moved its manufacturing facilities to the People's Republic of China (the PRC) in 1980 to take advantage of lower overhead costs, lower material costs and competitive labor rates available and subsequently relocated to Shenzhen, PRC in order to capitalize on opportunities offered in Southern PRC. The Company was reincorporated as a limited liability International Business Company under the laws of the British Virgin Islands (BVI) in August 1987 (which was amended in 2004 as The British Virgin Islands Business Companies Act, 2004). The Company's principal manufacturing and design operations are based in Shenzhen, approximately 30 miles from the Hong Kong Special Administrative Region (Hong Kong). Its PRC headquarters are located in Shenzhen. Some of the subsidiaries' offices are located in Hong Kong, which provide them access to Hong Kong's infrastructure of communication and banking facilities. The Company's principal manufacturing operations are conducted in the PRC. The PRC resumed sovereignty over Hong Kong effective July 1, 1997, and, politically, Hong Kong is an integral part of the PRC. However, for simplicity and as a matter of definition only, our references to PRC in these consolidated financial statements mean the PRC and all of its territories excluding Hong Kong.

Prior to fiscal year 2010, the Company operated in three reportable segments - telecommunication components assembly (TCA), consumer electronics and communication products (CECP), and LCD products (LCDP). In 2010, the Company's business was consolidated into two segments, TCA and CECP, following the merger of the Company's two PRC subsidiaries. The Chief Operating Decision Maker reviews the segment results by two segments, TCA and CECP, when allocating resources and assessing performance. The change in segment reporting was due to the following:

Most of the LCDP business has been LCD module assembly for telecommunication products since 2010, which is similar to the business operated by TCA; and

Since the merger, the combined segments can now be run by a single management team.

In view of the similarity of the products, the Company has merged the LCDP segment into the TCA segment. The results of the former LCDP segment were included in the TCA segment since 2010. In addition, the Company's FPCB business was too small to be designated as a separate business segment in 2011.

Management continue to evaluate their segmentation on an ongoing basis. In reviewing their segmentation, they note that the Company discontinued CECP production for Bluetooth headsets and calculators with two major box-built customers in the fourth quarter of 2010. If the CECP segment falls below the threshold prescribed under Financial Accounting Standard Board (FASB) Accounting Standards Codification (ASC) 280-10-50-12, they will combine this segment with the TCA segment and will not disclose separate CECP segment information starting in the first quarter of 2012.

2. Summary of Significant Accounting Policies

(a) Principles of consolidation

The consolidated financial statements include the financial statements of the Company and all of its subsidiaries. The Company consolidates companies in which it has controlling interest of over 50%. All significant intercompany accounts, transactions and cash flows have been eliminated on consolidation.

(b) Cash and cash equivalents

Cash and cash equivalents include all cash balances and certificates of deposit having a maturity date of three months or less upon acquisition.

F-7

Table of Contents**2. Summary of Significant Accounting Policies continued****(c) Allowance for doubtful accounts**

Accounts and notes receivable balance is recorded net of allowances for amounts not expected to be collected from customers. Because the accounts and notes receivable are typically unsecured, the Company periodically evaluates the collectability of accounts based on a combination of factors, including a particular customer's ability to pay as well as the age of the receivables. To evaluate a specific customer's ability to pay, the Company analyzes financial statements, payment history, third-party credit analysis reports and various information or disclosures by the customer or other publicly available information. In cases where the evidence suggests a customer may not be able to satisfy its obligation to the Company, a specific allowance would be set up for the perceived risk. If the financial condition of customers deteriorates, resulting in an impairment of their ability to make payments, additional allowances may be required.

(d) Inventories

Inventories are stated at the lower of cost or market value. Cost is determined on the first-in, first-out basis. The standard cost of work-in-progress and finished goods comprises direct materials, labor and manufacturing overheads. Write downs of potentially obsolete or slow-moving inventory are recorded based on management's analysis of inventory levels.

For the Company's CECP and TCA (excluding LCDP production) reporting units, the Company orders inventory from its suppliers based on firm customer orders for products that are unique to each customer. The inventory is utilized in production as soon as all the necessary components are received. The only reason that inventory would not be utilized within six months is if a specific customer deferred or canceled an order. As the inventory is typically unique to each customer's products, it is unusual for the Company to be able to utilize the inventory for other customers' products. Therefore, the Company's policy is to negotiate with the customer for the disposal of such inventory that remains unused for six months. The Company does not generally write down its inventories as usually, the customers are held to their purchase commitments. However, there are cases where customers are contractually obligated to purchase the unused inventory from the Company, but the Company may elect not to immediately enforce such contractual right for business reasons. In this connection, the Company will consider writing down these inventory items which remained unused for over six months at the Company's own cost. Prior to writing down, management would determine if the inventory can be utilized in other products.

For the Company's LCDP production, due to the nature of the business, the customers do not always place orders enough in advance to enable the Company to order inventory from suppliers based on firm customer orders. Nonetheless, management reviews its inventory balance on a regular basis and writes down all inventory over six months old if it is determined that the relevant inventory cannot be utilized in the foreseeable future.

(e) Property, plant and equipment and land use rights

Property, plant and equipment and land use rights are recorded at cost and include interest on funds borrowed to finance construction, if applicable. No interest was capitalized for the years ended December 31, 2009, 2010. An interest of \$13 was capitalized in 2011. The cost of major improvements and betterments is capitalized whereas the cost of maintenance and repairs is expensed in the year incurred. Assets under construction are not depreciated until construction is completed and the assets are ready for their intended use. Gains and losses for the disposal of property, plant and equipment and land use rights are included in the consolidated statement of income.

The majority of the land in Hong Kong is owned by the government of Hong Kong which leases the land at public auction to non-governmental entities. All of the Company's leasehold land in Hong Kong have leases of not more than 50 years from the respective balance sheet dates. The cost of such leasehold land is amortized on a straight-line basis over the respective terms of the leases.

All land in other regions of the PRC is owned by the PRC government. The government in the PRC, according to PRC law, may sell the right to use the land for a specified period of time. Thus, all of the Company's land purchases in the PRC are considered to be leasehold land and classified as land use rights in the consolidated balance sheet. They are amortized on a straight-line basis over the respective term of the right to use the land.

Table of Contents**2. Summary of Significant Accounting Policies - continued****(e) Property, plant and equipment and land use rights - continued**

Since August 1, 2009, in order to reflect a more reasonable estimation on the useful lives of the property, plant and equipment, the Company computed depreciation expenses using the straight-line method at the following depreciation rates:

Classification	Prior to August 1, 2009	After August 1, 2009
Land use rights	50 years	50 years
Buildings	20 to 50 years	20 years
Machinery and equipment	4 to 12 years	4 years
Leasehold improvements	shorter of lease term or 7 years	shorter of lease term or 4 years
Furniture and fixtures	4 to 8 years	4 years
Automobiles	4 to 6 years	4 years
Tools and molds	4 to 6 years	2 years

The above change in depreciation rates decreased operating income, net income, basic and diluted earnings per share in 2009 by \$2,308, \$1,643, \$0.04 and \$0.04, respectively.

(f) Goodwill

The excess of the purchase price over the fair value of net assets acquired is recorded on the consolidated balance sheet as goodwill.

Goodwill is not amortized, but is tested for impairment at the reporting unit level at least on an annual basis at the balance sheet date or more frequently if certain indicators arise. For the year 2009, the Company operated in three reporting units, which are its reportable segments of CECP, TCA and LCDP. For the years 2010 and 2011, the Company operated in two reporting units, which are its reportable segments of TCA and CECP. If business conditions or other factors cause the profitability and cash flows to decline, the Company may be required to record impairment charges for goodwill at that time. The goodwill impairment review is a two-step process in accordance with the FASB ASC 350-20

Goodwill. First step consists of a comparison of the fair value of a reporting unit with its carrying value. An impairment loss may be recognized if the review indicates that the carrying value of a reporting unit exceeds its fair value. Estimates of fair value are primarily determined by using discounted cash flows method. If the carrying amount of a reporting unit exceeds its fair value, second step requires the fair value of the reporting unit to be allocated to all of the assets and liabilities (including any unrecognized intangible assets) of that reporting unit, resulting in an implied fair value of goodwill. If the carrying amount of the goodwill of the reporting unit exceeds the implied fair value, an impairment loss is recognized which is equal to the excess of the carrying amount over the fair value.

The impairment review is highly judgmental and involves the use of significant estimates and assumptions. These estimates and assumptions have a significant impact on the amount of any impairment loss recognized. Discounted cash flow methodology is based on a number of estimates and assumptions, including the projected future operating results of the reporting unit, discount rate, long-term growth rate and appropriate market comparables.

Impairment loss on goodwill of the CECP reporting unit of \$2,951, as fully described in note 5 was identified and recognized in 2011. No impairment loss on goodwill was recognized in 2009 and 2010.

(g) Impairment or disposal of long-lived assets

Long-lived assets are included in impairment evaluations when events and circumstances exist that indicate the carrying value of these assets may not be recoverable. In accordance with FASB ASC 360 *Property, Plant and Equipment* the Company assesses the recoverability of the carrying value of long-lived assets by first grouping its long-lived assets with other assets and liabilities at the lowest level for which identifiable cash flows are largely independent of the cash flows of other assets and liabilities (the asset group) and, secondly, estimating the undiscounted future cash flows that are directly associated with and expected to arise from the use of and eventual disposition of such asset group. The

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

Company estimates the undiscounted cash flows over the remaining useful life of the primary asset within the asset group. If the carrying value of the asset group exceeds the estimated undiscounted cash flows, the Company recognizes an impairment loss to the extent the carrying value of the long-lived asset exceeds its fair value. The Company determines fair value through quoted market prices in active markets or, if quotations of market prices are unavailable, through the performance of internal analysis using a discounted cash flow methodology or obtains external appraisals from independent valuation firms. The undiscounted and discounted cash flow analyses based on a number of estimates and assumptions, including the expected period over which the asset will be utilized, projected future operating results of the asset group, discount rate and long-term growth rate.

F-9

Table of Contents**2. Summary of Significant Accounting Policies continued****(g) Impairment or disposal of long-lived assets continued**

Long-lived assets to be disposed of are stated at the lower of fair value or carrying value. Expected future operating losses from discontinued operations are recorded in the periods in which the losses are incurred. In view of the sustained level of the Company's stock price during 2009 and our resulting market capitalization throughout 2009 at a level below our recorded book value at December 31, 2009, in accordance with FASB ASC 360 *Property, Plant and Equipment*, the Company conducted a review of Nam Tai's long-lived assets for potential impairment.

In view of the sustained level of the Company's stock price during 2010 and our resulting market capitalization throughout 2010 at a level below our recorded book value at December 31, 2010, the Company conducted a similar review of Nam Tai's long-lived assets for potential impairment.

In 2011, although the Company's stock price remained below the aggregate book value of its assets, management assessed and determined that there were no events or changes in circumstances to indicate that the carrying amounts of long-lived assets in Nam Tai's Shenzhen facilities were not recoverable and there were impairment tests conducted with respect to those assets, and in view of the continuous operating losses and negative cash flows in Nam Tai's Wuxi facilities, the Company assessed the impairment of its long-lived assets used in the Wuxi facilities, by comparing the undiscounted cash flows with the carrying amounts of the assets. The results indicated that the carrying amounts of the Company's long-lived assets at December 31, 2011 were less than the undiscounted cash flows.

No impairment was recognized in respect of the Company's long-lived assets for the years ended December 31, 2009, 2010 and 2011.

(h) Accruals and provisions for loss contingencies

The Company makes provisions for all loss contingencies when information available prior to the issuance of the consolidated financial statements indicates that it is probable that an asset has been impaired or a liability has been incurred at the date of the consolidated financial statements and the amount of loss can be reasonably estimated.

For provisions or accruals related to litigation, the Company makes provisions based on information from legal counsels and the best estimation of management. The Company assesses the potential liability for the significant legal proceedings in accordance with FASB ASC 450

Contingencies. FASB ASC 450 requires a liability to be recorded if the contingency loss is probable and the amount of loss can be reasonably estimated. The actual resolution of the contingency may differ from the Company's estimates. If the contingency was settled for an amount greater than the estimate, a future charge to income would result. Likewise, if the contingency was settled for an amount that is less than our estimate, a future credit to income would result.

(i) Revenue recognition

The Company recognizes revenue when all of the following conditions are met:

Persuasive evidence of an arrangement exists;

Delivery has occurred or services have been rendered;

Price to the customer is fixed or determinable; and

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

Collectability is reasonably assured.

Revenue from sales of products is recognized when the title is passed to customers upon shipment and when collectability is reasonably assured. The Company does not provide its customers with the right of return (except for quality), price protection, rebates or discounts. There are no customer acceptance provisions associated with the Company's products, except for quality. All sales are based on firm customer orders with fixed terms and conditions, which generally cannot be modified.

Certain of the Company's subsidiaries are subject to value-added tax of 17% on the revenue earned for goods and services sold in the PRC. The Company presents revenue net of such value-added tax which amounted to \$369, \$73 and \$378 for the years ended December 31, 2009, 2010 and 2011, respectively.

F-10

Table of Contents

2. Summary of Significant Accounting Policies continued

(j) Shipping and handling costs

Shipping and handling costs are classified as cost of sales for materials purchased and selling expenses for those costs incurred in the delivery of finished products. During the years ended December 31, 2009, 2010 and 2011, shipping and handling costs classified as costs of sales were \$363, \$323 and \$588, respectively. During the years ended December 31, 2009, 2010 and 2011, shipping and handling costs classified as selling expenses were \$669, \$940 and \$1,203, respectively.

(k) Research and development costs

Research and development costs are incurred in the development of new products and processes, including significant improvements and refinements to existing products and are expensed as incurred.

(l) Advertising expenses

The Company expenses advertising costs as incurred. Advertising expenses was \$36 for the year ended December 31, 2009. No advertising expenses were recognized for the years ended December 31, 2010 and 2011, respectively.

(m) Staff retirement plan costs

The Company's costs related to the staff retirement plans (see Note 11) are charged to the consolidated statement of income as incurred.

(n) Income taxes

Deferred income taxes are provided using the asset and liability method in accordance with FASB ASC 740 *Income taxes*. Under this method, deferred income taxes are recognized for all significant temporary differences at enacted rates and classified as current or non-current based upon the classification of the related asset or liability in the consolidated financial statements. A valuation allowance is provided to reduce the amount of deferred tax assets if it is considered more likely than not that some portion of, or all, the deferred tax asset will not be realized.

FASB ASC 740 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements, and prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. It also provides accounting guidance on de-recognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. Interest and penalties from tax assessments, if any, are included in income taxes in the consolidated statement of income.

(o) Foreign currency transactions and translations

All transactions in currencies other than functional currencies during the year are translated at the exchange rates prevailing on the respective transaction dates. Monetary assets and liabilities existing at the balance sheet date denominated in currencies other than functional currencies are remeasured at the exchange rates existing on that date. Exchange differences are recorded in the consolidated statement of income.

The functional currency of the Company and its subsidiaries include the U.S. dollar or the Hong Kong dollar. The financial statements of all subsidiaries are translated in accordance with FASB ASC 830 *Foreign Currency Matters*. All assets and liabilities are translated at the rates of exchange ruling at the balance sheet date and all income and expense items are translated at the average rates of exchange over the year. All exchange differences arising from the translation of subsidiaries' financial statements are recorded as a component of comprehensive income.

(p) Earnings per share

Basic earnings per share is computed by dividing net income attributable to common shareholders by the weighted average number of common shares outstanding during the year.

Diluted earnings per share gives effect to all dilutive potential common shares outstanding during the year. The weighted average number of common shares outstanding is adjusted to include the number of additional common shares that would have been outstanding if the dilutive potential common shares had been issued.

F-11

Table of Contents**2. Summary of Significant Accounting Policies continued****(q) Stock options**

The Company has a stock-based employee compensation plan, as more fully described in Note 9(b). The Company measures the cost of employee services received in exchange for an award of equity instruments based on the grant-date fair value of the award. That cost is recognized over the period during which an employee is required to provide service, the requisite service period (usually the vesting period), in exchange for the award. The grant-date fair value of employee share options and similar instruments are estimated using option-pricing models. If the award is modified after the grant date, incremental compensation cost is recognized in an amount equal to the excess of the fair value of the modified award over the fair value of the original award immediately before the modification.

(r) Use of estimates

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

(s) Comprehensive loss

Accumulated other comprehensive loss represents principally foreign currency translation adjustments and is included in the consolidated statement of changes in equity.

(t) Fair value of financial instruments

The Company adopted FASB ASC 820 *Fair Value Measurements and Disclosures* to measure its assets and liabilities. The carrying amounts of cash and cash equivalents, fixed deposits maturing over three months, accounts and notes receivable, other receivables, notes payable, accrued expenses and accounts payable, other payables, and dividend payable approximate their fair values due to the short term nature of these instruments.

As of December 31, 2010 and 2011, the Company did not have any nonfinancial assets and liabilities that are recognized or disclosed at fair value in the financial statements, at least annually, on a recurring basis.

(u) Concentration of other risk

The market for our products is characterized by rapidly changing technology and evolving industry standards. The Company's results of operations are affected by a wide variety of factors, including general economic conditions; manufacturing capacity; the ability to manufacture efficiently; demand for the company's products; competition and intellectual property in a rapidly evolving market. As a result, the Company may experience substantial period-to-period fluctuations in future operating results due to the factors mentioned above.

(v) Recent changes in accounting standards

In May 2011, the FASB issued ASU No. 2011-04, *Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS*, which provides common requirements for measuring fair value and disclosing information about fair value measurements in accordance with U.S. GAAP and IFRS. This ASU is effective for fiscal years, and interim periods within those years, beginning on or after December 15, 2011. The adoption of ASU No. 2011-04 is not expected to have a material impact on the Company's financial position, results of operations and cash flows.

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

In June 2011, the FASB issued ASU No. 2011-05, *Comprehensive Income (Topic 220): Presentation of Comprehensive Income*, which improves the comparability, consistency and transparency of financial reporting and increases the prominence of items reported in other comprehensive income. This ASU is effective for fiscal years, and interim periods within those years, beginning on or after December 15, 2011, although early adoption is permitted. In December 2011, the FASB issued ASU 2011-12 *Comprehensive Income (Topic 220): Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05*, which indefinitely defers certain aspects of ASU No. 2011-05 related to the presentation of reclassification adjustments. The adoption of ASU No. 2011-05 and ASU No. 2011-12 are not expected to have a material impact on the Company's financial position, results of operations and cash flows.

F-12

Table of Contents**2. Summary of Significant Accounting Policies continued****(v) Recent change in accounting standards continued**

In September 2011, the FASB issued ASU No. 2011-08, *Intangibles Goodwill and Other (Topic 350), Testing Goodwill for Impairment*, which permits a company to first assess qualitative factors to determine whether it is more likely than not that the fair value is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step process for goodwill impairment testing previously required under Topic 350. ASU No. 2011-08 is effective for the Company for the annual and interim goodwill tests performed for years beginning after December 15, 2011, with early adoption permitted. The adoption of ASU No. 2011-08 is not expected to have a material impact on the company's financial position, results of operations and cash flows.

3. Inventories

Inventories consist of the following:

At December 31,	2010	2011
Raw materials	\$ 19,372	\$ 21,483
Work-in-progress	4,022	5,194
Finished goods	5,664	5,179
	\$ 29,058	\$ 31,856

4. Property, Plant and Equipment, net

Property, plant and equipment, net consist of the following:

At December 31,	2010	2011
At cost:		
Buildings	\$ 89,361	\$ 93,913
Machinery and equipment	128,647	120,402
Leasehold improvements	30,586	26,907
Furniture and fixtures	4,469	5,058
Automobiles	1,397	1,151
Tools and molds	283	337
Total	254,743	247,768
Less: accumulated depreciation	(166,642)	(159,313)
	88,101	88,455
Construction in progress	794	60,859
Net book value	\$ 88,895	\$ 149,314

Depreciation expenses were \$22,819, \$23,734 and \$15,785 for the years ended December 31, 2009, 2010 and 2011, respectively.

5. Goodwill

A summary of the changes in the carrying value of goodwill, by reporting unit, is as follows:

	CECP reporting unit
At December 31, 2010	\$ 2,951
Impairment loss recognized during the year	(2,951)
At December 31, 2011	

In 2009, the fair value of the CECP reporting unit was determined using a discounted cash flow methodology, based on a discount rate of 9.8% and expected future cash flows. The expected future cash flows were based on a five-year plan (after taking into account of the impact of the current financial crisis) provided by management and with a reasonable growth rate covering the five-year period as well as the period beyond. The Company completed its annual impairment analysis for 2009 and concluded that the fair value of the CECP reporting unit exceeded its carrying value as of December 31, 2009. Therefore, no impairment loss was recognized in 2009.

Table of Contents**5. Goodwill Continued**

In 2010, the fair value of the CECP reporting unit was determined using a discounted cash flow methodology, based on a discount rate of 8.6% and expected future cash flows. The expected future cash flows were based on a five-year plan provided by management and with a reasonable growth rate covering the five-year period as well as the period beyond. The Company completed its annual impairment analysis for 2010 and concluded that the fair value of the CECP reporting unit exceeded its carrying value as of December 31, 2010. Therefore, no impairment loss was recognized in 2010.

In 2011, the Company performed impairment test for goodwill by comparing the fair value of the CECP reporting unit with its carrying amount, including goodwill. The fair value of the CECP reporting unit was determined using a discounted cash flow methodology, based on a discount rate of 8.17% and expected future cash flows provided by management. As there were only two customers left in the CECP segment, the future cash flows were significantly reduced, therefore, the fair value of the CECP reporting unit is less than its carrying value (including goodwill) as of December 31, 2011. The Company further performed step 2 of the impairment test and allocated the fair value of the CECP reporting unit to all assets and liabilities, and to any unrecognized intangibles, as if the CECP reporting unit had been acquired at December 31, 2011. As the implied fair value of goodwill is zero, an impairment loss of \$2,951 was recognized in 2011.

6. Investments in Subsidiaries

Subsidiaries	Place of Incorporation	Principal activity	Percentage of Ownership as at December 31,	
			2010	2011
Consolidated principal subsidiaries:				
Nam Tai Electronic & Electrical Products Limited (NTEEP)	Cayman Islands	Investment holding	100%	100%
Nam Tai Holdings Limited	BVI	Investment holding	100%	100%
Nam Tai Investment Limited	Hong Kong	Investment holding	100%	100%
Nam Tai Group Management Limited (NTGM)	Hong Kong	Inactive	100%	100%
Nam Tai Telecom (Hong Kong) Company Limited (NTT)	Hong Kong	Inactive	100%	100%
Nam Tai Trading Company Limited (NTTC)	Hong Kong	Inactive	100%	100%
Namtai Investment (Shenzhen) Co., Ltd. (NTISZ) (previously known as Namtai Electronic (Shenzhen) Co., Ltd.)	PRC	Investment holding	100%	100%
Zastron Electronic (Shenzhen) Co., Ltd. (Zastron Shenzhen)	PRC	Manufacturing and trading	100%	100%
Wuxi Zastron Precision-Flex Co., Ltd. (Wuxi Zastron-Flex)	PRC	Manufacturing and trading	100%	100%
Retained Earnings and Reserves				

The Company's retained earnings are not restricted as to the payment of dividends except to the extent dictated by prudent business practices. The Company believes that there are no material restrictions, including foreign exchange controls, on the ability of its non-PRC subsidiaries to transfer surplus funds to the Company in the form of cash dividends, loans, advances or purchases. With respect to the Company's PRC subsidiaries, there are restrictions on the payment of dividends and the distribution of dividends from the PRC. On March 16, 2007, the PRC promulgated the Law of the PRC on Enterprise Income Tax (the New Law) by Order No. 63 of the President of the PRC. Please refer to Note 12 for further details of the New Law. The New Law became effective from January 1, 2008. Prior to the enactment of the New Law, when dividends are paid by the Company's PRC subsidiaries, such dividends would reduce the amount of reinvested profits and accordingly, the refund of taxes paid might be reduced to the extent of tax applicable to profits not reinvested. Subsequent to the enactment of the New Law, due to the removal of tax benefit related to reinvestment of capital in PRC subsidiaries, the Company may not reinvest the profits made by the PRC subsidiaries. Payment of dividends by PRC subsidiaries to foreign investors on profits earned subsequent to January 1, 2008 will also be subject to withholding tax under the New Law. In addition, pursuant to the relevant PRC regulations, a certain portion of the profits made by these subsidiaries must be set aside for future capital investment and are not distributable, and the registered capital of the Company's PRC subsidiaries are also restricted. These reserves and registered capital of the PRC subsidiaries amounted to \$294,691 and \$327,697 as of December 31, 2010 and 2011, respectively. However, the Company believes that such restrictions will not have a material effect on the Company's liquidity or cash flows.

Table of Contents**7. Accrued Expenses and Other Payables**

Accrued expenses and other payables consisted of the following:

At December 31,	2010	2011
Accrued salaries	\$ 4,744	\$ 3,003
Accrued bonus	4,561	2,070
Accrued tooling and equipment charges	553	3,485
Accrued professional fees	1,709	1,616
Construction payable	1,102	17,731
Others	4,815	10,381
	\$ 17,484	\$ 38,286

8. Bank Loans and Banking Facilities

The subsidiaries of the Company have credit facilities with various banks representing notes payable, trade acceptances, import facilities, revolving loans and overdrafts. At December 31, 2010 and 2011, these facilities totaled \$14,130 and \$8,159, of which \$14,130 and \$6,012 were unused at December 31, 2010 and 2011, respectively. The maturity of these facilities is generally up to 90 days. Interest rates are generally based on the banks' usual lending rates in Hong Kong or the PRC and the credit lines are normally subject to annual review. The banking facilities are secured by guarantee given by NTISZ.

Total banking facilities utilized which are usance bills pending maturity may not agree to notes payable due to bank having not yet received the bills of goods from vendors as of the balance sheet date.

At December 31,	2010	2011
Usance bills pending maturity	\$	\$ 2,147
Total banking facilities utilized		2,147
Less: Outstanding letters of credit		(1,879)
Notes payable	\$	\$ 268

The weighted average interest rate was 7.34% per annum.

9. Equity

(a) The Company has only one class of common shares authorized, issued and outstanding.

(b) Stock Options

In May 2001 (and amended in July 2004 and in November 2006), the Board of Directors approved a stock option plan which would grant 15,000 options to each non-employee director of the Company elected at each annual general meeting of shareholders, and might grant options to key employees, consultants or advisors of the Company or any of its subsidiaries to subscribe for its shares in accordance with the terms of this stock option plan based on past performance and/or expected contributions to the Company. The maximum number of shares to be issued pursuant to the exercise of options granted was 3,300,000 shares. The options granted under this plan generally have a term of two to three years, subject to the discretion of the Board of Directors, but cannot exceed ten years.

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

In February 2006, the Board of Directors approved another stock option plan, which was subsequently approved by the shareholders at the 2006 annual general meeting of shareholders, with the same terms and conditions. However, the maximum number of shares to be issued pursuant to exercise of options granted was 2,000,000 shares.

F-15

Table of Contents**9. Equity continued****(b) Stock Options continued**

A summary of stock option activity during the three years ended December 31, 2011 is as follows:

	Number of options	Weighted average exercise price	Weighted average fair value per option
Outstanding and exercisable at January 1, 2009	15,000	\$ 22.25	\$ 6.64
Granted	75,000	\$ 4.41	\$ 0.89
Expired	(15,000)	\$ 22.25	\$ 6.64
Outstanding and exercisable at December 31, 2009	75,000	\$ 4.41	\$ 0.89
Granted	60,000	\$ 4.45	\$ 1.58
Surrendered	(15,000)	\$ 4.41	\$ 0.89
Outstanding and exercisable at December 31, 2010	120,000	\$ 4.43	\$ 1.24
Granted	60,000	\$ 5.92	\$ 1.87
Outstanding and exercisable at December 31, 2011	180,000	\$ 4.93	\$ 1.45

Details of the options granted by the Company in 2009, 2010 and 2011 are as follows:

Number of options granted	Vesting period	Exercise price	Exercisable period
In 2009			
75,000	100% vested at date of grant	\$4.41	June 5, 2009 to June 4, 2012 (note 1)
In 2010			
60,000	100% vested at date of grant	\$4.45	June 3, 2010 to June 2, 2013
In 2011			
60,000	100% vested at date of grant	\$5.92	June 10, 2011 to June 9, 2014

Note:

- 15,000 of these stock options were surrendered during 2010.

Table of Contents**9. Equity continued****(b) Stock Options continued**

As of December 31, 2011, there were no non-vested stock options. The total amount of recognized compensation expense in 2009, 2010 and 2011 was \$67, \$95 and \$112, respectively.

The following summarizes information about stock options outstanding at December 31, 2011. 180,000 stock options are exercisable as of December 31, 2011.

	Number of options	Weighted average remaining contractual life in months
Weighted average exercise price	180,000	17.2
\$4.93		

The weighted average remaining contractual life of the stock options outstanding at December 31, 2009, 2010 and 2011 was approximately 29, 23 and 17 months, respectively. The weighted average fair value of options granted during 2009, 2010 and 2011 was \$0.89, \$1.58 and \$1.87, respectively, using the Black-Scholes option-pricing model based on the following assumptions:

Year ended December 31,	2009	2010	2011
Risk-free interest rate	1.50%	1.25%	0.75%
Expected life	3 years	3 years	3 years
Expected volatility	52.34%	51.23%	50.99%
Expected dividend yield	9.98%		1.69%

(c) Share Buy-back

No shares were repurchased during the years ended December 31, 2009, 2010 and 2011.

(d) Share Redemptions and Reinstatement of Redeemed Shares

On January 22, 1999, pursuant to its Articles of Association, the Company redeemed and canceled 415,500 shares of the Company registered in the name of Tele-Art Inc. (Tele-Art) at a price of \$3.73 per share for \$1,549.

On August 12, 2002, pursuant to its Articles of Association, the Company redeemed and canceled an additional 509,181 shares of the Company beneficially owned by Tele-Art at a price of \$6.14 per share for \$3,125.

No shares have been redeemed since August 12, 2002.

On November 20, 2006, judgment was rendered by the Lords of the Judicial Committee of the Privy Council of the United Kingdom (the Privy Council), declaring that the redemptions by the Company of its common shares beneficially owned by Tele-Art on January 22, 1999 and August 12, 2002 were nullities and that the register of members of the Company (i.e. the Company's shareholders' register) should be rectified to reinstate the redeemed shares together with any other shares which have since accrued by way of exchange or dividend.

Following the November 20, 2006 judgment, the Company received the order from the Privy Council on January 9, 2007 to rectify the share register of Nam Tai by registering such 1,017,149 (after adjustment of the 1 for 10 stock dividend on November 7, 2003) shares (the Redeemed

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

Shares) in the name of Bank of China (Hong Kong) Limited (Bank of China). In March 2007, the Company issued the 1,017,149 common shares. However, as the court judgment was determined in 2006, the Company accounted for the obligation to reinstate the Redeemed Shares at their fair value (i.e. market closing price) on November 20, 2006, the date of the judgment.

F-17

Table of Contents**10. Earnings Per Share**

The calculations of basic earnings per share and diluted earnings per share are computed as follows:

	Income	Weighted average number of shares	Per share amount
Year ended December 31, 2009			
Basic earnings per share	\$ 1,652	44,803,735	\$ 0.04
Effect of dilutive securities - Stock options		6,063	
Diluted earnings per share	\$ 1,652	44,809,798	\$ 0.04

	Income	Weighted average number of shares	Per share amount
Year ended December 31, 2010			
Basic earnings per share	\$ 15,006	44,803,735	\$ 0.33
Effect of dilutive securities - Stock options		18,025	
Diluted earnings per share	\$ 15,006	44,821,760	\$ 0.33

	Income	Weighted average number of shares	Per share amount
Year ended December 31, 2011			
Basic earnings per share	\$ 505	44,803,735	\$ 0.01
Effect of dilutive securities - Stock options		37,467	
Diluted earnings per share	\$ 505	44,841,202	\$ 0.01

11. Staff Retirement Plans

The Company operates a retirement benefit scheme (RBS) for all qualifying employees in Macao (terminated in March 2009) and a Mandatory Provident Fund (MPF) scheme for all qualifying employees in Hong Kong. The RBS and MPF are defined contribution schemes and the assets of the schemes are managed by trustees independent to the Company.

Both the RBS and MPF are available to all employees aged 18 to 64 and with at least 60 days of service under the employment of the Company in Macao and Hong Kong. Contributions are made by the Company at 5% based on the staff's relevant income. The maximum relevant income for contribution purpose per employee is \$3 per month. Staff members are entitled to 100% of the Company's contributions together with accrued returns irrespective of their length of service with the Company, but the benefit can be withdrawn by the employees in Macao at the end of employment contracts while the benefits are required by law to be preserved until the retirement age of 65 for employees in Hong Kong.

According to the applicable laws and regulations in the PRC, the Company is required to contribute 10% to 11% and 20% of the stipulated salary set by the local government of Shenzhen and Wuxi, respectively. The principal obligation of the Company with respect to these retirement benefit schemes is to make the required contributions under the scheme. No forfeited contributions may be used by the employer to reduce the existing level of contributions.

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

The cost of the Company's contribution to the staff retirement plans in Macao, Hong Kong and the PRC amounted to \$1,480, \$1,715 and \$2,317 for the years ended December 31, 2009, 2010 and 2011, respectively.

F-18

Table of Contents**12. Income Taxes**

The components of income before income taxes are as follows:

Year ended December 31,	2009	2010	2011
PRC, excluding Hong Kong and Macao	\$ 4,629	\$ 25,405	\$ 7,402
Hong Kong, Macao and other jurisdictions	(3,881)	(5,148)	(6,365)
	\$ 748	\$ 20,257	\$ 1,037

The Company's income is not subject to taxation in BVI under the current BVI law. Subsidiaries operating in Hong Kong and the PRC are subject to income taxes as described below, and the subsidiaries operating in Macao are exempted from income taxes. Under the current Cayman Islands law, NTEEP is not subject to profit tax in the Cayman Islands as it has no business operations in the Cayman Islands. However, it may be subject to Hong Kong income taxes as described below if they have income earned in or derived from Hong Kong, if applicable.

The provision for current income taxes of the subsidiaries operating in Hong Kong has been calculated by applying the rate of taxation of 16.5% for the years ended December 31, 2009, 2010 and 2011 to the estimated income earned in or derived from Hong Kong during the respective years, if applicable.

On March 16, 2007, the PRC promulgated the New PRC Tax Law. Under the New Law which became effective from January 1, 2008, inter alia, the tax refund to a foreign Investment Enterprises (FIEs) whose foreign investor directly reinvests by way of capital injection its share of profits obtained from that FIE or another FIE owned by the same foreign investor in establishing or expanding an export-oriented or technologically advanced enterprise in the PRC for a minimum period of five years under the capital reinvestment scheme is removed. In addition, under the New Law, all enterprises (both domestic enterprises and FIEs) will have one uniform tax rate of 25%. On December 6, 2007, the State Council of the PRC issued Implementation Regulations of the New Law. The New Law and Implementation Regulations have changed the tax rate from 15% to 18%, 20%, 22%, 24% and 25% for years ended December 31, 2008, 2009, 2010, 2011 and 2012, respectively, for Shenzhen PRC subsidiaries. Moreover, under the New Law, there is no reduction in the tax rate for FIEs such as Namtai Shenzhen, which export 70% or more of the production value of their products with effect from January 1, 2008. As such, the Shenzhen PRC subsidiaries do not have any further benefit since the implementation of the New Law in 2008.

For our subsidiary in Wuxi, China, it is granted a 5-year tax benefit. According to the PRC tax regulation, Guo Shui Fa (2007) No. 39 issued in 2007, Wuxi Zastron-Flex is entitled to full exemption for the first two years starting 2008 and 50% exemption for the following three years accordingly.

The Company, which has subsidiaries that are tax resident in the PRC, will be subject to the PRC dividend withholding tax of 5% when and if undistributed earnings are declared to be paid as dividends commencing on January 1, 2008 to the extent those dividends are paid out of profits that arose on or after January 1, 2008.

The limitation of the Company's obligation for the 5% dividend withholding tax to only those dividends paid out of earnings that arose on or after January 1, 2008 is due to guidance issued by the PRC government in February 2008. As such, the Company's tax provision includes \$363, \$276 and nil of income tax expense for the 5% dividend withholding tax on the balance of distributable earnings that arose on or after January 1, 2008 within its PRC subsidiaries as of December 31, 2009, 2010 and 2011, respectively.

Uncertainties exist with respect to how the PRC's current income tax law applies to the Company's overall operations, and more specifically, with regard to tax residency status. The New Law includes a provision specifying that legal entities organized outside of the PRC will be considered residents for PRC income tax purposes if their place of effective management or control is within PRC. The Implementation Rules to the New Law provide that non-resident legal entities will be considered PRC residents if substantial and overall management and control over the manufacturing and business operations, personnel, accounting, properties, etc. occurs within the PRC. Additional guidance is expected to be released by the PRC government in the near future that may clarify how to apply this standard to taxpayers. Despite the present uncertainties resulting from the limited PRC tax guidance on the issue, the Company does not believe that its legal entities organized outside of the PRC should be treated as residents for the New Law's purposes. If one or more of the Company's legal entities organized outside of the PRC were characterized as PRC tax residents, the impact would adversely affect the Company's results of operation.

Table of Contents**12. Income Taxes continued**

The Company has made its assessment of each tax position (including the potential application of interest and penalties) based on the technical merits, and has measured the unrecognized tax benefits associated with the tax positions. Based on the evaluation by the Company, it is concluded that there are no significant uncertain tax positions requiring recognition in the consolidated financial statements. The Company classifies interest and/or penalties related to unrecognized tax benefits as a component of income tax provisions; however, during the years ended December 31, 2009, 2010 and 2011, there were no interest and penalties related to uncertain tax positions, and the Company had no material unrecognized tax benefit which would favorably affect the effective income tax rate in future periods. The Company does not anticipate any significant increases or decreases to its liability for unrecognized tax benefit within the next twelve months. Other than the audit by the Hong Kong tax authorities as described below, the tax positions for the years 2009 to 2011 may be subject to examination by the PRC and Hong Kong tax authorities.

Tax Dispute with Hong Kong Inland Revenue Department

Since the fourth quarter of 2007, several of our inactive subsidiaries have been involved in tax disputes relating to tax years 1996 and later years with the Inland Revenue Department of Hong Kong, or HKIRD, the income tax authority of the Hong Kong Government. These disputes are discussed sequentially below.

(1) NTTC

(a) In October 2007, the HKIRD issued an assessment Determination against Nam Tai Trading Company Limited (NTTC), a limited liability company incorporated in Hong Kong and an indirect wholly-owned subsidiary of the Company. This assessment relates to four tax years from 1996/1997 to 1999/2000. The taxes assessed in this proceeding amount to approximately \$2,900.

After consulting Hong Kong tax experts, Nam Tai believed that the position of the HKIRD for the years in question was incorrect as a matter of law and accordingly NTTC objected to the HKIRD's assessment and appealed it to the Hong Kong Board of Review, an independent body established under Hong Kong Inland Revenue Ordinance to hear appeals of HKIRD assessments. In December 2008, the Board of Review dismissed NTTC's appeal. According to advice from Senior Counsel in Hong Kong, the Court of Appeal in Hong Kong was unlikely to disturb the findings of the Board of Review. Therefore, NTTC decided not to pursue an appeal.

(b) In addition to the assessment Determination of October 2007, in May 2008, the HKIRD issued a writ against NTTC claiming taxes in the amount of approximately \$3,000 for the taxable years from 1997/1998 to 2000/2001, partially overlapping the taxes against NTTC assessed by HKIRD in its assessment Determination of October 2007. Nam Tai's defense was struck out by the District Court in Hong Kong. According to advice from Senior Counsel in Hong Kong, the Court of Appeal was unlikely to disturb the findings of the District Court. Therefore, NTTC decided not to pursue an appeal against the decision of the District Court.

(c) Furthermore, from May to November 2010, the HKIRD issued three separate writs against NTTC claiming taxes and interests on unpaid taxes, in the amount of approximately \$900, \$1,100 and \$120 for the taxable years from 1996/1997 to 2003/2004, from 1996/1997, 1998/1999 and 1999/2000, and from 1996/1997 to 1999/2000, respectively. NTTC did not contest these proceedings, judgments were thus entered against NTTC.

(d) As a result of the proceedings stated in paragraphs (b) - (c) above, the HKIRD petitioned to the High Court of Hong Kong for a winding-up order against NTTC for the overdue judgment sums on June 10, 2011. The petition is fixed to be heard in the High Court of Hong Kong on March 13, 2012. NTTC shall ask for an adjournment of the hearing of the petition pending the determination of the HKIRD on whether to assess additional tax against the former directors of NTTC (see paragraph 5 herein below for details) since such determination is related to the arguments raised in the winding-up proceedings.

(2) NTGM

(a) The HKIRD has also made estimated assessments against Nam Tai Group Management Limited (NTGM), another wholly-owned subsidiary of Nam Tai, which has been inactive since 2005. This assessment, which relates to the tax years of 2001 and 2002, is in the amount of approximately \$172, including interest allegedly due thereon. On December 17, 2008, the Hong Kong tax authorities issued a Writ of Summons through the District Court in Hong Kong claiming against NTGM the amount of \$172 as taxes allegedly due and payable, together with interest, to the Hong Kong tax authorities for the fiscal years 2001 to 2002. NTGM filed its defense on January 29, 2009, but on February 17, 2009, HKIRD filed papers seeking to strike out NTGM's defense. As NTGM's defense was similar to the defense of NTTC and Senior Counsel had

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

advised that NTTC's defense was not arguable before the Court, NTGM accordingly agreed with HKIRD to allow Judgment to be entered against NTGM by consent.

F-20

Table of Contents

12. Income Taxes continued

(b) On February 8, 2011, HKIRD issued a writ against NTGM claiming taxes in the amount of approximately \$855 for the taxable years 2001/2002 to 2003/2004. NTGM filed a Defense to this action. The hearing of the action took place on September 6, 2011. The judgment was handed down on September 29, 2011 with the Defense being struck out and judgment was thus entered against NTGM.

(c) The HKIRD has commenced taxation by filing and serving its bill of costs together with a Notice of Commencement of Taxation both dated December 23, 2011. NTGM did not file any list of objections since it has no funds at hand. The taxing master of the District Court in Hong Kong has directed that the bill of costs filed by the HKIRD be set down for provisional taxation by a Chief Judicial Clerk on March 22, 2012.

(3) NTT

(a) On September 14, 2009, the HKIRD issued a writ against Nam Tai Telecom (Hong Kong) Company Limited (NTT), a dormant company of the Company, claiming taxes in the amount of approximately \$337 for the taxable year 2002/2003. Judgment has been entered against NTT.

(b) On February 17, 2011, HKIRD issued a writ against NTT claiming taxes in the amount of approximately \$34 for the taxable year 2002/2003. NTT filed a Defense to this action. The hearing of this action was heard together with the case of NTGM as discussed in paragraph (2)(b) above on September 6, 2011. Similarly, the judgment was handed down on September 29, 2011 with the Defense being struck out and judgment was thus entered against NTT.

(c) The HKIRD has commenced taxation by filing and serving its bill of costs together with a Notice of Commencement of Taxation both dated December 23, 2011. NTT did not file any list of objections since it has no funds at hand. The taxing master of the District Court in Hong Kong has directed that the bill of costs filed by the HKIRD be set down for provisional taxation by a Chief Judicial Clerk on March 12, 2012.

Table of Contents**12. Income Taxes continued****(4) Expected Dispositions of Tax Disputes with Inactive or Dormant Subsidiaries**

HKIRD has not accepted the explanations that it was necessary for these subsidiaries to perform their individual functions for the whole Nam Tai group and therefore the management fees paid by the Company by contract to support and finance all the necessary overhead expenses of these subsidiaries (not located in Hong Kong) to contribute to the businesses representing the administration and finance departmental functions from Vancouver, Canada for the whole group under the corporate structure at that time were not regarded as necessary expenses by HKIRD.

Since it is believed that it will be difficult for these subsidiaries to continue cooperating with HKIRD in the future, if the Company discontinues financing these subsidiaries, they will be forced to liquidate in due course. As these subsidiaries do not conduct any business and have been inactive or dormant for some time, and have either assets of limited book-value or no assets, Nam Tai believes that there should be no material impact from these proceeding on the Company's financial condition, liquidity or results of operations. Accordingly, no provision has been made regarding these assessments in Nam Tai's consolidated financial statements.

(5) Notices of Alleged Personal Liability for Additional Taxes Against Former Directors and Officers for Signing NTTC's Tax Returns

In addition to the legal cases against the inactive or dormant subsidiaries of the Company discussed above, in January 2011, the HKIRD issued two Notices of intention to assess additional taxes separately and personally against two former directors and officers of NTTC in the amounts of approximately \$1,540 for the taxable years 1996/1997 and 1999/2000 and \$667 for the taxable year 1997/1998. The taxable years involved in the controversy date from 13 to 15 years ago and initial advice received from the Company's tax advisor is that it is very rare for tax authorities to seek to attach personal liability on directors in this situation.

The former directors and officers to whom the Notices have been directed signed the tax returns for and on behalf of NTTC and the HKIRD has by its Notices sought to hold them personally liable for additional taxes purportedly on the basis that the relevant tax returns of NTTC were incorrect and contained omissions and understatements in violation of the Inland Revenue Ordinance, the governing tax law of Hong Kong.

The Company denies that any of NTTC's tax return filings were incorrect or contained omissions and understatements in violation of the Inland Revenue Ordinance and believes that no incorrect tax return was ever filed.

The two former directors submitted written representations in opposition to the issuance of the Notices, through their tax advisors, to the HKIRD on February 16, 2011, February 25, 2011, May 13, 2011 and June 30, 2011 respectively. The matter is pending the HKIRD's further reply. One of these former directors has commenced an action in the High Court of Hong Kong in November 2011 to seek an order from the Court that, inter alia, the Notice be withdrawn by the HKIRD.

At this time, Nam Tai is unable to assess the potential impact of these proceedings on the Company. However, the Company may be required to indemnify and defend this matter for the former directors and officers. If forced to defend, the Company plans to do so vigorously.

Nam Tai maintains directors' and officers' liability insurance against certain claims or liabilities that may arise by reason of the status or service of its directors and officers as such. We have informed Nam Tai's directors' and officers' liability insurance carrier of the HKIRD's Notices of assessment against NTTC's former directors and they have confirmed that the HKIRD's Notices constitute a claim under the coverage of the directors' and officers' liability insurance policy. Details of the reimbursement of the relevant costs are still in the process of being sorted out.

Accordingly, no provision has been made regarding these assessments in Nam Tai's consolidated financial statements.

The current and deferred components of the income tax expense appearing in the consolidated statements of income are as follows:

Year ended December 31,	2009	2010	2011
Current tax	\$ (2,087)	\$ (7,828)	\$ (3,070)
Deferred tax	804	2,577	2,538
	\$ (1,283)	\$ (5,251)	\$ (532)

Table of Contents**12. Income Taxes continued**

The Company's deferred tax assets and liabilities as of December 31, 2010 and 2011 are attributable to the following:

December 31,	2010	2011
Net operating losses	\$ 3,585	\$ 6,199
Obsolete inventories	23	42
Allowance for doubtful accounts	3	2
Property, plant and equipment	5,832	6,438
Pre-operating expenses	272	
Total deferred tax assets	9,715	12,681
Less: valuation allowance	(916)	(1,344)
Deferred tax assets	8,799	11,337
Deferred tax liability arising from withholding tax on undistributed earnings of PRC subsidiaries	(1,379)	(1,379)
Net deferred tax asset	\$ 7,420	\$ 9,958

Movement of valuation allowance:

December 31,	2009	2010	2011
At beginning of the year	\$ 1,831	\$ 1,588	\$ 916
Current year (reduction) addition	(276)	(672)	428
Change in tax law	33		
At end of the year	\$ 1,588	\$ 916	\$ 1,344

The valuation allowance as of December 31, 2009, 2010 and 2011 was related to net operating losses carried forward that, in the judgment of management, are more likely than not that the assets will not be realized. In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will be realized. The ultimate realization of deferred tax assets depends on the generation of future taxable income in which those temporary differences become deductible.

As of December 31, 2009, 2010 and 2011, the Company had net operating losses of \$3,326, \$5,549 and \$8,147 respectively, which may be carried forward indefinitely. As of December 31, 2011, the Company had net operating losses of \$1,341, \$10,107 and \$20,330, which will expire in the year ending December 31, 2014, 2015 and 2016, respectively.

A reconciliation of the income tax expense to the amount computed by applying the current tax rate to the income before income taxes in the consolidated statements of income is as follows:

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

Year ended December 31,	2009	2010	2011
Income before income taxes	\$ 748	\$ 20,257	\$ 1,037
PRC tax rate	20%	22%	24%
Income tax expense at PRC tax rate on income before income tax	\$ (150)	\$ (4,457)	\$ (249)
Effect of difference between Hong Kong and PRC tax rates applied to Hong Kong income	(485)	(134)	(221)
Effect of tax exemption			(1,526)
Effect of change in tax law	364	134	155
Change in valuation allowance	276	672	(428)
Deferred tax liability on withholding tax on undistributed profits of PRC subsidiaries	(363)	(276)	
Tax benefit (expense) arising from items which are not assessable (deductible) for tax purposes:			
Non-deductible impairment loss on goodwill			(708)
Non-deductible and non-taxable items	(766)	(777)	1,738
(Under) over-provision of income tax expense in prior years	(46)	(69)	1,369
Others	(113)	(344)	(662)
Income tax expense	\$ (1,283)	\$ (5,251)	\$ (532)

No income tax arose in the United States of America in any of the periods presented.

Table of Contents

13. Financial Instruments

The Company's financial instruments that are exposed to concentrations of credit risk consist primarily of its cash and cash equivalents and accounts receivable. As at December 31, 2011, the largest two customers' trade receivables accounted for 62% and 14% of total accounts receivable.

The Company's cash and cash equivalents are uninsured and they are placed at banks with high credit ratings. This investment policy limits the Company's exposure to credit risk.

The accounts receivable balances largely represent amounts due from the Company's principal customers who are international organizations with high credit ratings. Letters of credit are the principal security obtained to support lines of credit or negotiated contracts from a customer. As a consequence, credit risk is limited. Allowance for doubtful debts were \$13 and \$18 as of December 31, 2010 and 2011, respectively.

14. Commitments and Contingencies

(a) Commitments

Our contractual obligations, including capital expenditures and future minimum lease payments under non-cancelable operating lease arrangements and purchase commitments under non-cancelable arrangements as of December 31, 2011, are summarized below. We do not participate in, or secure financing for, any unconsolidated limited purpose entities.

Contractual Obligation	Payments (in thousands) due by period			
	Total	2012	2013	2014
Operating leases ⁽¹⁾	\$ 517	\$ 392	\$ 125	\$ ⁽²⁾
Capital commitments	27,871	27,871		
Other purchase obligations	46,525	46,525		
Total	\$ 74,913	\$ 74,788	\$ 125	\$

(1) The Company leases the staff quarters in Wuxi, the LCD facilities in Shenzhen and director's quarter in Hong Kong under operating leases expiring from 2012 to 2014. The rental expenses charged for the years ended December 31, 2009, 2010 and 2011 amounted to \$1,849, \$2,022 and \$2,133, respectively.

(2) The lease expiring in 2014 is cancelable upon three months notice.

(b) Significant legal proceedings

Save as disclosed in Note 12, there is no other significant legal proceeding as of December 31, 2011.

15. Segment Information

The Chief Operating Decision Maker is identified as the Chief Executive Officer and Chief Financial Officer. They review these segment results when making decisions about allocating resources and assessing the performance of the Company.

Prior to fiscal year 2010, the Company operated in three reportable segments: telecommunication components assembly (TCA), consumer electronics and communication products (CECP), and LCD products (LCDP). In 2010 the Company's business was consolidated into two segments, TCA and CECP, following the merger of the Company's LCDP and TCA segments. The management reviews the segment results of TCA and CECP when allocating resources and assessing performance. The change in segment reporting was due to the following:

Edgar Filing: NAM TAI ELECTRONICS INC - Form 20-F

Most of the LCDP business has been LCD module assembly for telecommunication products since 2010, which is similar to the business operated by TCA; and

Since the merger, the combined segments can now be run by a single management team.

In view of the similarity of the products, the Company has merged the LCDP segment into the TCA segment. The results of the former LCDP segment were included in the TCA segment since 2010. In addition, the Company's FPCB business was too small to be designated as a separate business segment in 2011.

Management continue to evaluate their segmentation on an ongoing basis. In reviewing their segmentation, they note that the Company discontinued CECP production for Bluetooth headsets and calculators with two major box-built customers in the fourth quarter of 2010. If the CECP segment falls below the threshold prescribed under FASB ASC 280-10-50-12, they will combine this segment with the TCA segment and will not disclose separate CECP segment information starting in the first quarter of 2012.

There were no material inter-segment sales for the years ended December 31, 2009, 2010 and 2011. Intercompany sales arise from the transfer of finished goods between subsidiaries operating in different areas. These sales are generally at prices consistent with what the Company would charge third parties for similar goods.

SCHEDULE 1

NAM TAI ELECTRONICS, INC.

NOTE TO SCHEDULE 1

(in thousands of U.S. dollars)

Schedule 1 has been provided pursuant to the requirements of Rule 12-04(a) and 4-08(e)(3) of Regulation S-X, which require condensed financial information as to financial position, changes in financial position and results and operations of a parent company as of the same dates and for the same periods for which audited consolidated financial statements have been presented when the restricted net assets of the consolidated and unconsolidated subsidiaries together exceed 25% of consolidated net assets as of end of the most recently completed fiscal year. As of December 31, 2011, \$327,697 of the restricted capital and reserves are not available for distribution, and as such, the condensed financial information of the Company has been presented for the years ended December 31, 2009, 2010 and 2011.

During the years ended December 31, 2009, 2010 and 2011, no cash dividend was declared and paid by subsidiaries of the Company.
