**Table of Contents****Performance Summary** (unaudited)**WisdomTree Dreyfus Brazilian Real Fund (BZF)****Investment Breakdown** as of 2/29/12

The Fund's investment breakdown is expressed as a percentage of total investments and may change over time. It does not include derivatives.

**Top Holdings\*** as of 2/29/12

Description	% of Net Assets
U.S. Treasury Bill, 0.01%, 3/08/12	34.4%
U.S. Treasury Bill, 0.00%, 3/22/12	26.5%
Citigroup, Inc. tri-party repurchase agreement, 0.19%, 3/01/12	26.3%
U.S. Treasury Bill, 0.10%, 4/19/12	7.4%
Invesco Treasury Fund Private Class, 0.02%	0.5%

\*The holdings are subject to change, and there are no guarantees the Fund will remain invested in any particular security.

Fully collateralized by a U.S. Government security.

The WisdomTree Dreyfus Brazilian Real Fund (the Fund) seeks to achieve total returns reflective of both money market rates in Brazil available to foreign investors and changes in value of the Brazilian real relative to the U.S. dollar. The Brazilian real is a developing market currency, which can experience periods of significant volatility. Although the Fund invests in short-term, investment grade instruments, the Fund is not a money market fund and it is not the objective of the Fund to maintain a constant share price.

The Fund returned -4.37% on net asset value (NAV) for the six-month period ended February 29, 2012 (for more complete performance information please see the chart below). The Fund outperformed the change in the spot currency rate by 3.13% for the six-month period. This was largely due to the Fund's investments in U.S. money market instruments and forward currency contracts.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of the Fund's total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for fund shares and investors' assessments of the underlying value of a fund's portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore index returns do not reflect deductions for fees or expenses and are not available for direct investment. In comparison, the Fund's performance is negatively impacted by these deductions. Fund returns also do not reflect brokerage

## Edgar Filing: WisdomTree Trust - Form N-CSRS

commissions or taxes a shareholder would pay on the sale of Fund shares or on Fund distributions. **The annual expense ratio of the Fund during the period was 0.45%.**

**Performance** as of 2/29/12

	Average Annual Total Return			Since Inception <sup>1</sup>
	6-Month*	1 Year	3 Year	
Fund NAV Returns	-4.37%	2.98%	19.63%	7.19%
Fund Market Price Returns	-4.39%	3.08%	20.12%	6.75%
<i>Brazilian real</i>	-7.50%	-3.42%	11.43%	-0.92%
<i>JPMorgan Emerging Local Markets Index Plus (ELMI+) Brazil</i>	-4.09%	4.21%	20.99%	8.82%

\* Returns of less than one year are cumulative.

<sup>1</sup> Total returns are calculated based on the commencement of Fund trading on the NYSE Arca, Inc. on May 14, 2008.

**Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and the principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at [www.wisdomtree.com](http://www.wisdomtree.com). WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Fund NAV returns are calculated using the Fund's daily 4:00 p.m. NAV. Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times. The returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Total returns for a period of less than one year are cumulative.**

WisdomTree Currency, Fixed Income and Alternative Funds 1

**Table of Contents****Performance Summary** (unaudited)**WisdomTree Dreyfus Chinese Yuan Fund (CYB)****Investment Breakdown** as of 2/29/12

The Fund's investment breakdown is expressed as a percentage of total investments and may change over time. It does not include derivatives.

**Top Ten Holdings\*** as of 2/29/12

Description	% of Net Assets
U.S. Treasury Bill, 0.01%, 4/05/12	23.0%
Citigroup, Inc. tri-party repurchase agreement, 0.19%, 3/01/12	18.6%
U.S. Treasury Bill, 0.03%, 3/22/12	16.0%
U.S. Treasury Bill, 0.02%, 3/15/12	11.4%
U.S. Treasury Bill, 0.01%, 3/08/12	9.2%
Barclays Bank PLC, 0.65%, 3/16/12	4.0%

Invesco Treasury Fund Private Class, 0.02%	0.5%

\*The ten largest holdings are subject to change, and there are no guarantees the Fund will remain invested in any particular security.

Fully collateralized by U.S. Government securities.

The WisdomTree Dreyfus Chinese Yuan Fund (the "Fund") seeks to achieve total returns reflective of both money market rates in China available to foreign investors and changes in value of the Chinese yuan relative to the U.S. dollar. The Chinese yuan is a developing market currency, which can experience periods of significant volatility. Although the Fund invests in short-term, investment grade instruments, the Fund is not a money market fund and it is not the objective of the Fund to maintain a constant share price.

The Fund returned 0.88% on net asset value (NAV) for the six-month period ended February 29, 2012 (for more complete performance information please see the chart below). The Fund underperformed the change in the spot currency rate by 0.45% for the six-month period. This was primarily due to two factors. First, expectations of future currency appreciation diminished over the six-month period prompting movements in currency forwards to lag movements in spot returns. Additionally, because of the extraordinarily low levels for short-term interest rates in the U.S., the rates on the Fund's investments in U.S. money market instruments did not fully offset Fund expenses.

## Edgar Filing: WisdomTree Trust - Form N-CSRS

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of the Fund's total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. 2 WisdomTree Currency, Fixed Income and Alternative Funds

**Table of Contents**

**Performance Summary** (unaudited)

**WisdomTree Dreyfus Commodity Currency Fund (CCX)**

**Investment Breakdown** as of 2/29/12

The Fund's investment breakdown is expressed as a percentage of total investments and may change over time. It does not include derivatives.

**Top Holdings\*** as of 2/29/12

Description	% of Net Assets
U.S. Treasury Bill, 0.02%, 3/15/12	57.0%
U.S. Treasury Bill, 0.03%, 3/22/12	31.3%
Citigroup, Inc. tri-party repurchase agreement, 0.19%, 3/01/12	2.4%
Invesco Treasury Fund Private Class, 0.02%	0.1%

\*The holdings are subject to change, and there are no guarantees the Fund will remain invested in any particular security.

Fully collateralized by a U.S. Government security.

The WisdomTree Dreyfus Commodity Currency Fund (the Fund) seeks to achieve total returns reflective of money market rates in selected commodity-producing countries and changes in value of such countries' currencies relative to the U.S. dollar. The term commodity currency generally is used to describe the currency of a country whose economic success is commonly identified with the production and export of commodities (such as precious metals, oil, agricultural products or other raw materials) and whose value is closely linked to the value of such commodities. The Fund may invest in the currencies of commodity-producing countries, such as Australia, Brazil, Canada, Chile, Colombia, Indonesia, Malaysia, New Zealand, Norway, Peru, Russia and South Africa. Although this Fund invests in short-term, investment grade instruments, the Fund is not a money market fund and it is not the objective of the Fund to maintain a constant share price.

The Fund returned -1.07% on net asset value (NAV) for the six-month period ended February 29, 2012 (for more complete performance information please see the chart below). The Fund underperformed its benchmark, the Equal-Weighted Commodity Currency Composite, by 0.35% for the six-month period. This underperformance was largely the result of deductions for Fund expenses.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of the Fund's total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for fund shares and investors' assessments of the underlying value of a fund's portfolio securities.

The WisdomTree Dreyfus Emerging Currency Fund (the Fund) seeks to achieve total returns reflective of both money market rates in selected emerging market countries available to foreign investors and changes in value of these currencies relative to the U.S. dollar. Emerging market currencies can experience periods of significant volatility. Although the Fund invests in short-term, investment grade instruments, the Fund is not a money market fund and it is not the objective of the Fund to maintain a constant share price.

The Fund returned -1.89% on net asset value (NAV) for the six-month period ended February 29, 2012 (for more complete performance information please see the chart below). The Fund outperformed its industry benchmark, the JPMorgan Emerging Local Markets Index Plus (ELMI+), by 0.49%. This was largely due to its higher strategic concentration in Asian and Latin American currencies, which outperformed Eastern European currencies over the period.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of the Fund's total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. \*The holdings are subject to change, and there are no guarantees the Fund will remain invested in any particular security.

Fully collateralized by a Japanese Government Bond.

The WisdomTree Dreyfus Japanese Yen Fund (the "Fund") seeks to earn current income reflective of money market rates in Japan available to foreign investors. The Fund also seeks to maintain liquidity and preserve capital measured in Japanese yen. The yen is a developed market currency, which can experience periods of significant volatility. Although the Fund invests in short-term, investment grade instruments, the Fund is not a money market fund and it is not the objective of the Fund to maintain a constant share price.

The Fund returned -5.66% on net asset value (NAV) for the six-month period ended February 29, 2012 (for more complete performance information please see the chart below). The Fund underperformed the change in the spot currency rate by 0.14% for the six-month period. This was due to the low level of interest rates available from the yen-denominated money market instruments combined with the impact of Fund expenses.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of the Fund's total assets less total liabilities by the number of shares outstanding.

## Edgar Filing: WisdomTree Trust - Form N-CSRS

The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for fund shares and investors' assessments of the underlying value of a fund's portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore index returns do not reflect deductions for fees or expenses and are not available for direct investment. In comparison, the Fund's performance is negatively impacted by these deductions. Fund returns also do not reflect brokerage commissions or taxes a shareholder would pay on the sale of Fund shares or on Fund distributions. **The annual expense ratio of the Fund during the period was 0.35%.**

**Performance** as of 2/29/12

	Average Annual Total Return			Since Inception <sup>1</sup>
	6-Month*	1 Year	3 Year	
Fund NAV Returns	-5.66%	0.91%	6.24%	6.46%
Fund Market Price Returns	-6.87%	-1.00%	5.74%	6.03%
<i>Japanese yen</i>	-5.52%	1.22%	6.53%	6.65%
<i>BofA Merrill Lynch Japanese Yen One-Month LIBID Constant Maturity Index</i>	-5.49%	1.30%	6.63%	6.87%

\* Returns of less than one year are cumulative.

<sup>1</sup> Total returns are calculated based on the commencement of Fund trading on the NYSE Arca, Inc. on May 21, 2008.

**Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and the principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at [www.wisdomtree.com](http://www.wisdomtree.com). WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Fund NAV returns are calculated using the Fund's daily 4:00 p.m. NAV. Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times. The returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Total returns for a period of less than one year are cumulative.**

\*The holdings are subject to change, and there are no guarantees the Fund will remain invested in any particular security.

Fully collateralized by U.S. Government security.

The WisdomTree Dreyfus South African Rand Fund (the Fund) seeks to achieve total returns reflective of both money market rates in South Africa available to foreign investors and changes in value of the South African rand relative to the U.S. dollar. The South African rand is a developing market currency, which can experience periods of significant volatility. Although the Fund invests in short-term, investment grade instruments, the Fund is not a money market fund and it is not the objective of the Fund to maintain a constant share price.

The Fund returned -3.75% on net asset value (NAV) for the six-month period ended February 29, 2012 (for more complete performance information please see the chart below). The Fund outperformed the change in the spot currency rate by 2.31% for the six-month period. This was the result of the Fund's investments in U.S. money market instruments and forward currency contracts.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of the Fund's total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. The Fund returned -0.50% on net asset value (NAV) for the six-month period ended February 29, 2012 (for more complete performance information please see the chart below). The WisdomTree Dreyfus New Zealand Dollar Fund converted into the WisdomTree Australia & New

## Edgar Filing: WisdomTree Trust - Form N-CSRS

Zealand Debt Fund on October 25, 2011. The Fund underperformed a Spliced Australia & New Zealand Debt Composite by 1.31% over the period. The Fund's underperformance can be attributed to the strong performance of corporate bonds within the Citigroup Australian Broad Investment-Grade Index, as investors were more aggressive in adding risk in early 2012. The Fund's strategy invests in government, semi-government and supranational agencies, currently excluding corporate bonds.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of the Fund's total assets less total liabilities by the number of shares outstanding. The WisdomTree Euro Debt Fund (the Fund) seeks a high level of total return consisting of both income and capital appreciation. The Fund attempts to achieve its objective through investments in fixed income instruments denominated in euros.

The Fund returned -4.47% on net asset value (NAV) for the six-month period ended February 29, 2012 (for more complete performance information please see the chart below). The WisdomTree Dreyfus Euro Fund converted into the WisdomTree Euro Debt Fund on October 19, 2011. The Fund underperformed the Spliced Euro Debt Composite by 2.16% and the Spliced Euro Debt ex-Greece, Ireland, Italy, Portugal & Spain Composite by 0.57% over the period. The Fund underperformed these benchmarks largely due to the underperformance of the Fund's allocation to supranational bonds relative to the Composites allocation to sovereign debt.

\*The ten largest holdings are subject to change, and there are no guarantees the Fund will remain invested in any particular security.

The WisdomTree Global Real Return Fund (the Fund) seeks total returns (capital appreciation plus income) that exceed the rate of inflation over long-term investment horizons.

The Fund returned -2.01% on net asset value (NAV) for the six-month period ended February 29, 2012 (for more complete performance information please see the chart below). The Fund underperformed its industry benchmark, the BofA Merrill Lynch Global Diversified Inflation-Linked Index, by 4.24% for the six-month period. This was the result of the negative performance of its allocation to commodity strategies.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of the Fund's total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange

## Edgar Filing: WisdomTree Trust - Form N-CSRS

where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for fund shares and investors' assessments of the underlying value of a fund's portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore index returns do not reflect deductions for fees or expenses and are not available for direct investment. In comparison, the Fund's performance is negatively impacted by these deductions. Fund returns also do not reflect brokerage commissions or taxes a shareholder would pay on the sale of Fund shares or on Fund distributions. **The annual expense ratio of the Fund during the period was 0.60%.**

**Performance** as of 2/29/12

	Cumulative Total Return	
	6-Month	Since Inception <sup>1</sup>
Fund NAV Returns	-2.01%	-0.69%
Fund Market Price Returns	-4.59%	-3.42%
<i>BofA Merrill Lynch Global Diversified Inflation-Linked Index</i>	2.23%	5.04%

<sup>1</sup> Total returns are calculated based on the commencement of Fund trading on the NYSE Arca, Inc. on July 14, 2011.

**Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and the principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at [www.wisdomtree.com](http://www.wisdomtree.com). WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Fund NAV returns are calculated using the Fund's daily 4:00 p.m. NAV. Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times. The returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Total returns for a period of less than one year are cumulative.**

The WisdomTree Managed Futures Strategy Fund (the Fund) seeks to provide investors with positive total returns in rising or falling markets.

The Fund returned -11.29% on net asset value (NAV) for the six-month period ended February 29, 2012 (for more complete performance information please see the chart below). The Fund underperformed its industry benchmark, the Diversified Trends Indicator, by 0.56% during the period. This was primarily due to deductions for Fund expenses.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund's per share NAV is the value of one share of the Fund and is calculated by dividing the value of the Fund's total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for fund shares and investors' assessments of the underlying value of a fund's portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore index returns do not reflect deductions for fees or expenses and are not available for direct investment. In comparison, the Fund's performance is negatively impacted by these deductions. Fund returns also do not reflect brokerage commissions or taxes a shareholder would pay on the sale of Fund shares or on Fund distributions. **The annual expense ratio of the Fund during the period was 0.95%.**

Performance as of 2/29/12

	Average Annual Total Return		
	6-Month*	1 Year	Since Inception <sup>1</sup>
Fund NAV Returns	-11.29%	-13.85%	-10.35%
Fund Market Price Returns	-11.22%	-13.97%	-10.51%
<i>Diversified Trends Indicator</i>	-10.73%	-12.81%	-9.21%

\* Returns of less than one year are cumulative.

<sup>1</sup> Total returns are calculated based on the commencement of Fund trading on the NYSE Arca, Inc. on January 5, 2011.

## **Table of Contents**

### **Description of Terms and Indexes** (unaudited)

Below are descriptions of certain terms and of each index referenced in this report.

#### **Euro Area:**

The area encompassing the European Union Member States whose currency is the euro and in which there is a single monetary policy. It currently comprises Belgium, Germany, Greece, Spain, Estonia, Ireland, France, Italy, Cyprus, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovenia, Slovakia and Finland.

#### **Forward Contracts:**

A forward currency contract is an agreement to buy or sell a specific currency at a future date at a price set at the time of the contract. A forward contract may either be deliverable or non-deliverable. A **deliverable forward currency contract** is an agreement by two parties to transact in currencies at a specific rate on a future date upon which each party delivers the promised currency. A **non-deliverable forward currency contract** is an agreement by two parties to transact in currencies at a specific rate on a future date and then cash settle the agreement with a simple exchange of the market value difference between the current market rate and the initial agreed-upon rate.

#### **Spot Rate:**

A spot rate is the foreign exchange market price at which a currency will be delivered on the settlement date. Spot rate is the starting point for all foreign exchange transactions. The spot return rate is the rate of return percentage difference between the end of period spot rate and the beginning of period spot rate.

#### **Swap:**

A swap is an agreement between two parties to exchange payments based on a reference asset, which may be a currency or interest rate, but also may be a single asset, a pool of assets or an index of assets.

#### **Asia Pacific ex-Japan Local Debt Composite:**

The composite tracks an equal-weighted exposure to the local currency sovereign bond markets of the Fund's constituent countries. Currently, the composite tracks the returns from the following sovereign bond markets: Australia, China, Hong Kong, Indonesia, India, Malaysia, New Zealand, Philippines, Singapore, South Korea, Taiwan, and Thailand. Performance for South Korean, Taiwanese, and Philippine government bonds is proxied by the total returns of the respective Bank of America Merrill Lynch Global Sovereign country subindex. Performance for the remaining bond markets is proxied by the JPMorgan Government Bond Index for each country. Country exposures are rebalanced back to equal-weighting quarterly. Constituent changes are made at the end of the month following the annual review unless otherwise noted.

#### **BofA Merrill Lynch Euro Currency One-Month LIBID Constant Maturity Index:**

The BofA Merrill Lynch Euro Currency One-Month LIBID Constant Maturity Index tracks a consistent investment in one-month euro-denominated bank deposits.

#### **BofA Merrill Lynch Euro Government ex-Greece, Ireland, Italy, Portugal & Spain Index:**

The BofA Merrill Lynch Euro Government ex-Greece, Ireland, Italy, Portugal & Spain Index is a subset of the BofA Merrill Lynch Euro Government Index. It is a market capitalization-weighted index that tracks the performance of euro-denominated sovereign debt publicly issued by Euro member countries excluding Greece, Ireland, Italy, Portugal and Spain as the country of risk.

**Table of Contents****Description of Terms and Indexes** (unaudited) (continued)**BofA Merrill Lynch Euro Government Index:**

The BofA Merrill Lynch Euro Government Index is a market capitalization-weighted index that tracks the performance of euro-denominated sovereign debt publicly issued by Euro member countries.

**BofA Merrill Lynch Global Diversified Inflation-Linked Index:**

The BofA Merrill Lynch Global Diversified Inflation-Linked Index is a broad, market value-weighted, capped total return index designed to measure the performance of inflation-linked sovereign debt that is publicly issued and denominated in the issuer's own domestic market and currency.

**BofA Merrill Lynch Japanese Yen One-Month LIBID Constant Maturity Index:**

The BofA Merrill Lynch Japanese Yen One-Month LIBID Constant Maturity Index tracks a consistent investment in one-month Japanese yen-denominated bank deposits.

**BofA Merrill Lynch New Zealand Dollar One-Month LIBID Constant Maturity Index:**

The BofA Merrill Lynch New Zealand Dollar One-Month LIBID Constant Maturity Index tracks a consistent investment in one-month New Zealand dollar-denominated bank deposits.

**Citigroup Australian Broad Investment-Grade Index:**

The Citigroup Australian Broad Investment-Grade Index is a market capitalization weighted index designed to represent the Australian fixed-coupon bond market, including government, semigovernment, and investment grade credit markets (including supranational issuers).

**Diversified Trends Indicator:**

The Diversified Trends Indicator ( DTI ) is a long/short rules-based index constructed of 24 liquid commodity and financial futures contracts comprised of 10 sectors. Each month the DTI index sector exposure is rebalanced back to the fixed weights, 50% physical commodities and 50% financials (when energy is long) and approximately 39.5% commodities and 60.5% financials (when energy is flat). The sectors are positioned either long or short depending on the current market environment. The DTI Index individual market components, sectors and related weightings, as well as other aspects of the calculation of the DTI Index, are subject to change at any time.

**Equal-Weighted Commodity Currency Composite:**

A composite incorporating equal-weighted exposures to the currencies within the Commodity Currency Fund was constructed as a benchmark for Fund performance. Returns for the individual emerging market currencies are represented by the return of the country subindices of the JPMorgan Emerging Local Markets Index Plus (ELMI+). Returns for the individual developed market countries are represented by the returns of the BofA Merrill Lynch One-Month Constant Maturity LIBID index for each country. The JPMorgan indices use a weighted basket of one-month, two-month and three-month currency forwards collateralized with U.S. money market rates to proxy the returns for emerging currency positions. The BofA Merrill Lynch indices track a consistent investment in one-month bank deposits denominated in the specified currency. Within the composite, currency exposures are rebalanced back to equal-weight at the end of the month in which the Fund rebalances its portfolio. Changes to currencies within the Fund are reflected in the composite at the end of the month they are added to, or deleted from, the Fund.

**Table of Contents****Description of Terms and Indexes** (unaudited) (continued)**Equal-Weighted Emerging Currency Composite:**

A composite incorporating equal-weighted exposure to the currencies within the Emerging Currency Fund was constructed as an additional gauge of Emerging Currency Fund performance. Currently, the composite tracks the returns for the currencies of the following countries: Brazil, Chile, Mexico, Poland, Indonesia, South Africa, Turkey, India, China, Russia and South Korea, using the total returns of the country subindices of the JPMorgan Emerging Local Markets Index Plus (ELMI+). Each subindex uses a weighted basket of one-month, two-month and three-month currency forwards (deliverable or nondeliverable) collateralized with U.S. money market rates to proxy the total returns of an investment in local-currency money market instruments. Currency exposures are rebalanced back to equal-weighting at the end of the month in which the Emerging Currency Fund intends to rebalance, and currency changes are reflected in the composite at the end of the month they are reflected in the Fund.

**HSBC Asian Local Bond Index Unhedged USD:**

The HSBC Asian Local Bond Index Unhedged USD ( ALBI ) tracks the total return performance of a bond portfolio which consists of local currency denominated, high quality and liquid bonds in Asia ex-Japan. The ALBI includes bonds from the following countries/regions: Korea, Hong Kong, India, Singapore, Taiwan, Malaysia, Thailand, the Philippines, Indonesia and China.

**JPMorgan Emerging Local Markets Index Plus (ELMI+):**

The JPMorgan Emerging Local Markets Index Plus (ELMI+) and its underlying country and regional subindices track the total returns for local-currency denominated money market instruments in emerging market countries.

**JPMorgan Emerging Local Markets Index Plus (ELMI+) Brazil:**

The Brazil subindex uses a weighted basket of one-month, two-month and three-month currency forwards collateralized with U.S. money market rates to proxy the total returns of an investment in Brazilian real money market instruments. The returns are reported in U.S. dollar terms.

**JPMorgan Emerging Local Markets Index Plus (ELMI+) China:**

The China subindex uses a weighted basket of one-month, two-month and three-month currency forwards collateralized with U.S. money market rates to proxy the total returns of an investment in Chinese yuan money market instruments. The returns are reported in U.S. dollar terms.

**JPMorgan Emerging Local Markets Index Plus (ELMI+) India:**

The India subindex uses a weighted basket of one-month, two-month and three-month currency forwards collateralized with U.S. money market rates to proxy the total returns of an investment in Indian rupee money market instruments. The returns are reported in U.S. dollar terms.

**JPMorgan Emerging Local Markets Index Plus (ELMI+) South Africa:**

The South Africa subindex uses a weighted basket of one-month, two-month and three-month currency forwards collateralized with U.S. money market rates to proxy the total returns of an investment in South African rand money market instruments. The returns are reported in U.S. dollar terms.

**JPMorgan Government Bond Index-Emerging Markets (GBI-EM) Global Diversified Composite Unhedged USD:**

The JPMorgan Government Bond Index-Emerging Markets (GBI-EM) Global Diversified Composite Unhedged USD tracks the performance of local currency debt issued by

16 WisdomTree Currency, Fixed Income and Alternative Funds

**Table of Contents**

**Description of Terms and Indexes** (unaudited) (concluded)

emerging market governments, whose debt is accessible by most of the international investor base. The index incorporates a constrained market-capitalization methodology in which individual issuer exposures are capped at 10% (with the excess distributed to smaller issuers) for greater diversification among issuing governments. The returns are reported in U.S. dollar terms.

**JPMorgan New Zealand Government Bond Index:**

The JPMorgan New Zealand Government Bond Index is a market capitalization weighted index of locally denominated, fixed rate government debt.

**LIBID:**

London Interbank Bid Rate or the rate at which banks are willing to borrow for a discrete period of time.

**Spliced Australia & New Zealand Debt Composite:**

A spliced index which tracks the BofA Merrill Lynch New Zealand Dollar One-Month LIBID Constant Maturity Index through October 24, 2011. Thereafter, the composite tracks an 80% / 20% weighted exposure to the local currency bond markets of Australia and New Zealand, respectively. Performance for Australia is proxied by the total returns of the Citigroup Australian Broad Investment-Grade Index. Performance for the New Zealand bond market is proxied by the JPMorgan New Zealand Government Bond Index. Country exposures are rebalanced back to target weighting quarterly.

**Spliced Euro Debt Composite:**

A spliced index which tracks the BofA Merrill Lynch Euro Currency One-Month LIBID Constant Maturity Index through October 18, 2011. Thereafter, the composite tracks the BofA Merrill Lynch Euro Government Index.

**Spliced Euro Debt ex-Greece, Ireland, Italy, Portugal & Spain Composite:**

A spliced index which tracks the BofA Merrill Lynch Euro Currency One-Month LIBID Constant Maturity Index through October 18, 2011. Thereafter, the composite tracks the BofA Merrill Lynch Euro Government ex-Greece, Ireland, Italy, Portugal & Spain Index.

*Index returns do not reflect expenses paid by the Funds. Index returns assume reinvestment of distributions. It is not possible to invest directly in an index.*

**Shareholder Expense Examples** (unaudited)

As a shareholder of a WisdomTree Fund, you incur two types of costs: (1) transaction costs, including brokerage commissions on purchases and sales of your Fund shares and (2) ongoing costs, including management fees and other Fund expenses. The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in a Fund and to compare these costs with the ongoing costs of investing in other funds.

The example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period from September 1, 2011 to February 29, 2012.

**Actual expenses**

The first line under each Fund in the table on the next page provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line for your Fund under the heading entitled Expenses Paid During the Period 9/01/11 to 2/29/12 to estimate the expenses you paid on your account during this period.

**Hypothetical example for comparison purposes**

The second line under each Fund in the table on the next page provides information about hypothetical account values and hypothetical expenses based on each Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Fund shares. Therefore, the second line under each Fund in the table is useful in comparing ongoing Fund costs only and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

**Table of Contents****Notes to Financial Statements** (unaudited)**1. ORGANIZATION**

WisdomTree Trust (the Trust) is registered under the Investment Company Act of 1940, as amended (the 1940 Act), as an open-end management investment company. The Trust was established as a Delaware statutory trust pursuant to a Trust Instrument dated December 15, 2005. As of February 29, 2012, the Trust offered 47 investment funds (each a Fund, collectively the Funds). These notes relate only to Funds listed in the table below.

<b>Fund Name</b>	<b>Commencement of Operations</b>
WisdomTree Dreyfus Brazilian Real Fund ( Brazilian Real Fund )	May 14, 2008
WisdomTree Dreyfus Chinese Yuan Fund ( Chinese Yuan Fund )	May 14, 2008
WisdomTree Dreyfus Commodity Currency Fund ( Commodity Currency Fund )	September 24, 2010
WisdomTree Dreyfus Emerging Currency Fund ( Emerging Currency Fund )	May 6, 2009
WisdomTree Dreyfus Indian Rupee Fund ( Indian Rupee Fund )	May 14, 2008
WisdomTree Dreyfus Japanese Yen Fund ( Japanese Yen Fund )	May 21, 2008
WisdomTree Dreyfus South African Rand Fund ( South African Rand Fund )	June 25, 2008
WisdomTree Asia Local Debt Fund ( Asia Local Debt Fund )	March 17, 2011
WisdomTree Australia & New Zealand Debt Fund ( Australia & New Zealand Debt Fund )	June 25, 2008
WisdomTree Emerging Markets Local Debt Fund ( Emerging Markets Local Debt Fund )	August 9, 2010
WisdomTree Euro Debt Fund ( Euro Debt Fund )	May 14, 2008
WisdomTree Global Real Return Fund ( Global Real Return Fund ) (consolidated)	May 14, 2008
WisdomTree Managed Futures Strategy Fund ( Managed Futures Strategy Fund ) (consolidated)	January 5, 2011

**CONSOLIDATION OF SUBSIDIARIES**

The financial statements of the Managed Futures Strategy Fund and Global Real Return Fund are consolidated and each includes the accounts of a wholly-owned and controlled Cayman Islands subsidiary (each, a Subsidiary, together, the Subsidiaries). For the Managed Futures Strategy Fund and Global Real Return Fund, the accompanying financial statements reflect the financial position and results of operations of each Fund on a consolidated basis with its respective Subsidiary. All intercompany accounts and transactions have been eliminated in consolidation. Each Fund seeks to gain exposure to commodity markets, in whole or in part, through investments in its Subsidiary. Each Fund's investment in its Subsidiary may not exceed 25% of the Fund's total assets at the end of each fiscal quarter.

**2. SIGNIFICANT ACCOUNTING POLICIES**

The Financial Accounting Standards Board ( FASB ) Accounting Standards Codification (the Codification) has become the exclusive reference of authoritative U.S. generally accepted accounting principles ( GAAP ) recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the Securities and Exchange Commission ( SEC ) under authority of federal laws are also sources of authoritative GAAP for SEC registrants.

The following is a summary of significant accounting policies followed by the Funds.

**Guarantees** In the normal course of business the Funds may enter into contracts that contain a variety of representations or that provide indemnification for certain liabilities. The Funds' maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts and expect the risk of loss to be remote. Therefore, no liabilities have been recorded in connection with these indemnifications.

**Use of Estimates** The preparation of financial statements in conformity with GAAP requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in the net assets from operations during the reporting period. Actual results could differ from those estimates.

## Edgar Filing: WisdomTree Trust - Form N-CSRS

**Investment Valuation** The net asset value ( NAV ) of each Fund 's shares is calculated each day the national securities exchanges are open for trading as of the close of regular trading on the New York Stock Exchange, generally 4:00 p.m. New York time. NAV per share is calculated by dividing a Fund 's net assets by the number of Fund shares outstanding. In calculating a Fund 's NAV, Fund investments are valued under policies approved by the Board of Trustees. Fixed income securities generally are valued at current market quotations or mean prices obtained from dealers or independent pricing services. Dealers or independent pricing services, in determining the value of securities may consider such factors as recent transactions, indications from dealers, yields and prices on similar securities, and market sentiment for the type of security. Futures contracts generally are valued at the settlement price on the

**Table of Contents****Notes to Financial Statements** (unaudited) (continued)

primary exchange on which they trade. Swaps are generally valued on the basis of broker dealer quotations or independent pricing services. Short-term debt securities with remaining maturities of 60 days or less generally are valued on the basis of amortized cost which approximates fair value. U.S. fixed income assets may be valued as of the announced closing time for such securities on any day that the Securities Industry and Financial Markets Association announces an early closing time.

Forward foreign currency contracts generally are valued daily using WM/Reuters closing spot and forward rates as of 4:00 p.m. London time for Europe and the Americas, and Tullett Prebon closing spot and forward rates as of 2:00 p.m. Singapore time for Asia. In certain instances, such as when reliable market valuations are not readily available or are not deemed to reflect current market values, a Fund's investments will be valued at fair value in accordance with the Fund's pricing policy and procedures approved by the Board of Trustees. For these purposes, a price based on amortized cost is considered a market valuation. In addition, securities may be valued using fair value pricing and may include, but are not limited to, securities for which there are no current market quotations or whose issuer is in default or bankruptcy, securities subject to corporate actions (such as mergers or reorganizations), securities subject to non-U.S. investment limits or currency controls, and securities affected by significant events. An example of a significant event is an event occurring after the close of the market in which a security trades but before a Fund's next NAV calculation time that may materially affect the value of a Fund's investment (e.g., government action, natural disaster, or significant market fluctuation). When fair value pricing is employed, the prices of securities used by a Fund to calculate its NAV may differ from quoted or published prices for the same securities. Each Fund may invest in money market funds which are valued at such money market fund's net asset value per share.

**Fair Value Measurement** In accordance with Codification Topic 820 (ASC 820), Fair Value Measurements and Disclosures, fair value is defined as the price that each Fund would receive upon selling an investment in an orderly transaction to an independent buyer in the principal or most advantageous market of the investment. ASC 820 established a three-tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classifications of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk—for example, the risk inherent in a particular valuation technique used to measure fair value (such as a pricing model) and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability. Observable inputs are based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability. Unobservable inputs are based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad levels listed below:

Level 1 quoted prices in active markets for identical securities

Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including each Fund's assumptions in determining the fair value of investments)

Investments that use Level 2 or Level 3 inputs may include, but are not limited to: (i) an unlisted security related to corporate actions; (ii) a restricted security (e.g., one that may not be publicly sold without registration under the Securities Act of 1933, as amended); (iii) a security whose trading has been suspended or which has been de-listed from its primary trading exchange; (iv) a security that is thinly traded; (v) a security in default or bankruptcy proceedings for which there is no current market quotation; (vi) a security affected by currency controls or restrictions; and (vii) a security affected by a significant event (e.g., an event that occurs after the close of the markets on which the security is traded but before the time as of which a Fund's NAV is computed and that may materially affect the value of the Fund's investments).

The inputs or methodology used for valuation are not necessarily an indication of the risk associated with investing in those investments.

The valuation techniques and significant inputs used in determining the fair market values of financial instruments are as follows:

Fixed income securities are normally valued by pricing service providers that use broker dealer quotations, reported trades or valuation estimates from their internal pricing models. The service providers' internal models use inputs that are observable such as issuer details, interest rates, yield curves, prepayment speeds, credit risks/spreads, default rates and quoted prices for similar assets. Securities that use similar valuation techniques and inputs as described above are categorized as Level 2 of the value hierarchy. Short-term investments having a maturity of 60 days or less are generally valued at amortized cost which approximates fair market value. These investments are categorized as Level 2 of the fair value

## Edgar Filing: WisdomTree Trust - Form N-CSRS

hierarchy. Over-the-counter financial derivative instruments, such as foreign currency contracts or swaps agreements, derive their value from underlying asset prices, indices, reference rates, and other inputs or a combination of these factors. These contracts are normally valued on the basis of broker dealer quotations or pricing service providers. Depending on the product and the terms of the transaction, the value of the financial derivative contracts can be estimated by a pricing service provider using a series of techniques, including simulation pricing models. The pricing models use

54 WisdomTree Currency, Fixed Income and Alternative Funds

**Table of Contents****Notes to Financial Statements** (unaudited) (continued)

inputs that are observed from actively quoted markets such as issuer details, indices, spreads, interest rates, curves, dividends and exchange rates. Financial derivatives that use similar valuation techniques and inputs as described above are categorized as Level 2 of the fair value hierarchy.

The following is a summary of the inputs used as of February 29, 2012 in valuing each Fund's assets carried at fair value:

<b>Brazilian Real Fund</b>	<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>

Change in unrealized appreciation (depreciation)*	(716,639)
Sales	(7,414,622)
Transfers in and/or out of Level 3	
<b>Balance as of February 29, 2012</b>	<b>\$ 3,869,633</b>

\* Net change in unrealized appreciation/depreciation from investments still held as of February 29, 2012 is \$ (363,163).

<b>Emerging Markets Local Debt Fund</b>	<b>Supranational Bonds</b>
<b>Balance as of September 1, 2011</b>	<b>\$ 2,241,272</b>
Premium/discount amortization (accretion)	13,955
Realized gain (loss)	(132,138)
Change in unrealized appreciation (depreciation)	(67,999)
Sales	(2,055,090)
Transfers in and/or out of Level 3	
<b>Balance as of February 29, 2012</b>	<b>\$</b>

In January 2010, FASB issued Accounting Standards Update No. 2010-06 Improving Disclosures about Fair Value Measurements (ASU 2010-06). ASU 2010-06 will require reporting entities to make new disclosures about amounts and reasons for significant transfers in and out of Level 1 and Level 2 fair value measurements, as well as inputs and valuation techniques used to measure fair value for both recurring and nonrecurring fair value measurements that fall in either Level 2 or Level 3. ASU 2010-06 will also require information on purchases and sales, issuances and settlements on a gross basis in the reconciliation of activity in Level 3 fair value measurements. The new and revised disclosures are required to be implemented for fiscal years beginning after December 15, 2009, except for the disclosures surrounding purchases, sales, issuances and settlements on a gross basis in the reconciliation of Level 3 fair value measurements, which are effective for fiscal years beginning after December 15, 2010. Management has implemented the applicable portion of ASU 2010-06 for the six months ended February 29, 2012 and the impact of such adoption is limited to additional disclosure in the fair value measurement footnote. No significant transfers between Level 1 or Level 2 fair value measurements occurred during the period end February 29, 2012.

**Derivative and Hedging Disclosure** Codification Topic 815 (ASC 815), Derivatives and Hedging, requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. The Funds have invested in derivatives, specifically forward foreign currency contracts, swaps contracts and futures contracts for the six months ended February 29, 2012 which are detailed in the tables herein. The Funds' derivative agreements contain credit-risk related contingent features which include, but are not limited to, a percentage decline in the Funds' NAV or net assets over a specified time period. If an event occurred that triggered a contingent feature, the counterparty to the agreement may require the Funds to post additional collateral or terminate the derivative positions and demand payment. Any collateral posted with respect to the derivative positions would be used to offset or reduce the payment. The maximum exposure to derivative agreements with credit-risk related contingent features would be the total value of derivatives in net liability positions for each Fund.

The Funds listed below have invested in derivatives, specifically forward foreign currency contracts, swap contracts and futures contracts for the six months ended February 29, 2012, which are detailed in the tables herein. All of the derivative instruments disclosed and described herein are subject to credit risk. Credit risk is where the financial condition of an issuer of a security or instrument may cause it to default or become unable to pay interest or principal due on the security. The counterparty to a derivative contract might default on its obligations. The effect of such derivative instruments on each Fund's financial position and financial performance as reflected in the Statements of Assets and Liabilities and Statements of Operations are presented in the summary below.

**Investment Transactions and Investment Income** Investment transactions are recorded as of the date that the securities are purchased or sold (trade date). Realized gains and losses on sales of portfolio securities are calculated using the identified-cost method. Interest income including amortization of premiums and discounts is accrued daily.

**Foreign Currency Translation** The accounting records of the Funds are maintained in U.S. dollars. Foreign currencies, as well as investment securities and other assets and liabilities denominated in foreign currencies, are translated into U.S. dollars using exchange rates prevailing on the respective dates of such transactions that are deemed appropriate by the investment adviser. Realized and unrealized foreign exchange gains and losses on investments are included as a component of net realized and unrealized gain or loss on foreign currency transactions in the Statements of Operations. Certain foreign exchange gains and losses included in realized and unrealized gains or losses are included in, or are a reduction of ordinary income in accordance with U.S. Federal income tax regulations.

**Expenses** WisdomTree Asset Management, Inc. ( WTAM ), the Funds' investment adviser, has agreed to pay all expenses of the Funds, except for: (i) brokerage expenses and other expenses (such as stamp taxes) connected with the execution of portfolio transactions or in connection with creation and redemption transactions; (ii) legal fees or expenses in connection with any arbitration, litigation or pending or threatened arbitration or litigation, including any settlements in connection therewith; (iii) compensation and expenses of each Independent Trustee; (iv) compensation and expenses of counsel to the Independent Trustees; (v) compensation and expenses of the Trust's chief compliance officer; (vi) extraordinary expenses; (vii) distribution fees and expenses paid by the Trust under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act; and (viii) the advisory fee payable to WTAM.

Pursuant to a separate contractual arrangement, WTAM has arranged for the provision of chief compliance officer ( CCO ) services to the Funds, and is liable and responsible for, and administers, payments to the CCO, the Independent Trustees and counsel to the Independent Trustees, in

## Edgar Filing: WisdomTree Trust - Form N-CSRS

exchange for a service fee paid by each Fund, of up to 0.0044% of each Fund's average daily net assets. Trustees fees, which are included in Service Fees on the Statements of Operations, of \$69,798 have been paid on behalf of the Funds of the Trust to the Independent Trustees for the six months ended February 29, 2012. The Subsidiaries do not pay service fees. Expenses in excess of 0.0044% were paid by WTAM.

WisdomTree Currency, Fixed Income and Alternative Funds 61

**Table of Contents****Notes to Financial Statements** (unaudited) (continued)

**Repurchase Agreements** Each Fund's custodian or a third party custodian under tri-party repurchase agreements may take possession of the collateral pledged for investments in repurchase agreements. The underlying collateral is valued on a daily basis at fair value to ensure that the value, including accrued interest, is at least equal to the repurchase price. In the event of default of the obligation to repurchase, a Fund has the right to liquidate the collateral and apply the proceeds in satisfaction of the obligations. Under certain circumstances, in the event of default or bankruptcy by the other party to the agreement, realization and/or retention of the collateral may be subject to legal proceedings.

**Forward Foreign Currency Contracts** A forward foreign currency contract ( Forward Contract ) involves an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. These contracts are principally traded in the inter-bank market conducted directly between currency traders (usually large, commercial banks) and their customers. A forward contract generally has no margin deposit requirement, and no commissions are charged at any stage for trades.

Risks may arise upon entering into forward contracts from the potential inability of counterparties to meet the terms of their contracts and from unanticipated movements in the value of foreign currencies relative to the U.S. dollar or each other.

Fluctuations in the value of open forward contracts are recorded for book purposes as unrealized gains or losses on forward contracts by the Funds. Realized gains and losses on forward contracts include net gains or losses recognized by the Funds on contracts which have matured. Each Fund may enter into forward contracts to manage its foreign currency exposure or to facilitate settlement of foreign currency denominated portfolio transactions. A Fund may invest in both forward currency contracts and U.S. dollar denominated money market securities in an attempt to create a synthetic investment in a foreign currency denominated instrument.

The following forward contracts were open at February 29, 2012:

<b>Fund Name</b>	<b>Settlement Date</b>		<b>Contracts To Deliver</b>		<b>In Exchange For</b>	<b>Unrealized Gain (Loss)</b>

**Currency, Interest Rate and Total Return Swaps** Each Fund may enter into swap agreements, including interest rate swaps, currency swaps and total return swaps. A typical interest rate swap involves the exchange of a floating interest rate payment for a fixed interest payment. A typical foreign currency swap involves the exchange of cash flows based on the notional difference among two or more currencies (e.g., the U.S. dollar and the Brazilian real). A typical total return swap involves the payment of the total return on a reference asset in return for payments equal to a rate of interest on another reference asset. The total return typically includes appreciation or depreciation on the reference asset, plus any interest or dividend payments. Swap agreements may be used to achieve exposure to, for example, currencies, interest rates, indexes and money market securities without actually purchasing such currencies or securities. The Managed Futures Strategy Fund and the Global Real Return Fund may enter into swaps transactions based on commodities or commodity indexes. Each Fund may use swap agreements to invest in a market without owning or taking physical custody of the underlying securities in circumstances in which direct investment is restricted for legal reasons or is otherwise impracticable. Swap agreements will tend to shift a Fund's investment exposure from one type of investment to another or from one payment stream to another. Depending on their structure, swap agreements may increase or decrease a Fund's exposure to long- or short-term interest rates (in the United States or abroad), foreign currencies, corporate borrowing rates, or other factors, and may increase or decrease the overall volatility of a Fund's investments and its share price.

68 WisdomTree Currency, Fixed Income and Alternative Funds

**Table of Contents****Notes to Financial Statements** (unaudited) (continued)

Detailed below are the interest rate swap agreements outstanding as of February 29, 2012:

<b>Fund</b>	<b>Counterparty</b>	<b>Termination Date</b>	<b>Notional Amount (000)</b>	<b>Fund Receives Fixed Rate (per annum)</b>	<b>Fund Pays Floating Rate (per annum)</b>	<b>Unrealized Appreciation</b>
Global Real Return Fund (consolidated)	UBS AG	7/14/16	\$ 220	1.89%	6-Month LIBOR	\$ 5,029

Detailed below are total return swap agreements outstanding as of February 29, 2012:

<b>Fund</b>	<b>Counterparty</b>	<b>Termination Date</b>	<b>Notional Amount (000)</b>	<b>Fund Pays Fixed Rate (per annum)</b>	<b>Fund Receives Total Return of Reference Entity</b>	<b>Unrealized Depreciation</b>
Global Real Return Fund (consolidated)	JPMorgan Chase Bank, N.A.	7/16/12	\$ 485	0.30%	Credit Suisse Commodity Benchmark Excess Return Index	\$
	UBS AG	12/14/12	807	3-Month U.S. Treasury Bill Index + 0.80%	AFT CTI Modified Index	(10,117)
Managed Futures Strategy Fund (consolidated)	UBS AG	12/14/12	30,000	3-Month U.S. Treasury Bill Index + 0.45%	AFT CTI Modified Index	
	UBS AG	12/14/12	64,055	3-Month U.S. Treasury Bill Index + 0.45%	AFT CTI Modified Index	(794,583)

**Abbreviations:**

AFT CTI The Alpha Financial Technologies Commodity Trends Indicator

LIBOR London Interbank Offered Rate

**Futures Contracts** Each Fund may transact in currency futures contracts and U.S. Treasury futures contracts. The Managed Futures Strategy Fund and Global Real Return Fund may transact in commodity, currency and U.S. Treasury futures contracts. When a Fund purchases a listed futures contract, it agrees to purchase a specified reference asset (e.g., commodity, currency or Treasury security) at a specified future date. When a Fund sells a listed futures contract, it agrees to sell a specified reference asset (e.g., commodity, currency or Treasury security) at a specified future date. The price at which the purchase and sale will take place is fixed when the Fund enters into the contract. The exchange clearing corporation is the ultimate counterparty for all exchange-listed contracts, so credit risk is limited to the creditworthiness of the exchange's clearing corporation. Margin deposits are posted as performance bonds with the clearing broker and, in turn, with the exchange clearing corporation.

Each Fund may buy and sell index futures contracts. An index futures contract is a bilateral agreement pursuant to which two parties agree to take or make delivery of an amount of cash equal to a specified dollar amount times the difference between the index value at the close of trading of the contract and the price at which the futures contract is originally struck. No physical delivery of the securities comprising the index is made. Instead, settlement in cash must occur upon the termination of the contract, with the settlement being the difference between the contract price, and the actual level of the index at the expiration of the contract. Generally, contracts are closed out prior to the expiration date of the contract.

When a Fund purchases or sells a futures contract, the Fund is required to cover its position in order to limit the risk associated with the use of leverage and other related risks. To cover its position, a Fund will maintain with its custodian bank (and mark-to-market on a daily basis) a segregated account consisting of cash or liquid securities that, when added to any amounts deposited with a futures commission merchant as margin, are equal to the market value of the futures contract or otherwise cover its position in a manner consistent with the 1940 Act or the rules

## Edgar Filing: WisdomTree Trust - Form N-CSRS

and SEC interpretations thereunder. If a Fund continues to engage in the described securities trading practices and properly segregates assets, the segregated account will function as a practical limit on the amount of leverage which a Fund may undertake and on the potential increase in the speculative character of a Fund's outstanding portfolio securities. Additionally, such segregated accounts will generally ensure the availability of adequate funds to meet the obligations of a Fund arising from such investment activities.

**Table of Contents****Notes to Financial Statements** (unaudited) (continued)

At February 29, 2012 the Funds had the following open futures contracts:

Fund		Number of Contracts	Notional Value	Expiration Date	Unrealized Appreciation/ (Depreciation)

	Total				<b>\$ (172,621)</b>

**Securities Lending** Each Fund may lend portfolio securities to certain creditworthy borrowers, including the Funds' securities lending agent. It is the Fund's policy that, at origination, all loans are secured by collateral of at least 102% of the value of U.S. securities loaned and 105% of the value of foreign securities loaned. Collateral in the form of cash and/or high-grade debt obligations, equivalent to at least 100% of the market value of securities, is maintained at all times. The collateral can be invested in certain money market mutual funds which also have exposure to the fluctuations of the market. Each Fund receives compensation for lending its securities from interest or dividends earned on the cash or U.S. government securities held as collateral, net of fee rebates paid to the borrower plus reasonable administrative and custody fees. The dividend and interest income earned on the securities loaned is accounted for in the same manner as other dividend and interest income. The borrower pays to the Funds an amount equal to any dividends or interest received on loaned securities. The Funds retain all or a portion of the interest received on investment of cash collateral or receives a fee from the borrower. Lending portfolio securities could result in a loss or delay in recovering each Fund's securities if the borrower defaults.

The securities lending income earned by the Funds is disclosed on the Statements of Operations.

**Short-Term Investments** Each Fund may invest a portion of its assets in high-quality money market instruments on an ongoing basis to provide liquidity or for other reasons. The instruments include short-term obligations issued by the U.S. Government, its agencies, non-U.S. Government agencies, negotiable certificates of deposit (CDs), fixed time deposits and bankers' acceptances of U.S. and foreign banks and similar institutions, commercial papers, repurchase agreements and money market funds. CDs are short-term negotiable obligations of commercial banks. Time deposits are non-negotiable deposits maintained in banking institutions for specified periods of time at stated interest

## Edgar Filing: WisdomTree Trust - Form N-CSRS

rates. Banker's acceptances are time drafts drawn on commercial banks by borrowers, usually in connection with international transactions.

**Table of Contents****Notes to Financial Statements** (unaudited) (continued)

**Tax Information and Dividends and Distributions to Shareholders** It is each Fund's policy to comply with all requirements of the Internal Revenue Code of 1986, as amended (the "Code"). Each Fund intends to qualify for and to elect treatment as a separate Regulated Investment Company ("RIC") under Subchapter M of the Code. It is the policy of each Fund to pay out dividends, if any, to investors at least annually. There can be no guarantee that a Fund will pay dividends. Taxable net realized gains from investment transactions, reduced by capital loss carryforwards, if any, are declared and distributed to shareholders at least annually. The capital loss carryforward amount, if any, is available to offset future net capital gains. The Funds may occasionally be required to make supplemental distributions at some other time during the year. The Trust reserves the right to declare special distributions if, in its reasonable discretion, such action is necessary or advisable to preserve the status of each Fund as a RIC or to avoid imposition of income or excise taxes on undistributed income. Dividends and distributions to shareholders are recorded on the ex-dividend date. The amount of dividends and distributions from net investment income and net realized capital gains are determined in accordance with the requirements of the Code and the U.S. Treasury regulations which may differ from GAAP. These book/tax differences are either considered temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the components of net assets based on their Federal tax basis treatment; temporary differences do not require reclassification. Dividends and distributions that exceed earnings and profit for tax purposes are reported for tax purposes as a return of capital to the extent of a shareholder's tax basis, and thereafter as capital gain.

**3. ADVISER FEES AND TRANSACTIONS**

WTAM provides investment management services to each Fund pursuant to an Investment Advisory Agreement. As compensation for services rendered, facilities furnished, and expenses borne by WTAM, each Fund pays WTAM a fee, as listed below, which is accrued daily and paid monthly, based on the average daily net assets of the Fund. Included in the expenses borne by WTAM are fees paid to the Sub-Advisers, Mellon Capital Management Corporation (for the Asia Local Debt Fund, Australia & New Zealand Debt Fund, Emerging Markets Local Debt Fund, Euro Debt Fund, Global Real Return Fund, and Managed Futures Strategy Fund) and The Dreyfus Corporation (for the Currency Income Funds), all accounting, administration, custody, transfer agent fees to The Bank of New York Mellon Corporation, tax and audit services, as well as printing and postage.

<b>Fund</b>	<b>Fee Rate</b>
Brazilian Real Fund	0.45%
Chinese Yuan Fund	0.45%
Commodity Currency Fund	0.55%
Emerging Currency Fund	0.55%
Indian Rupee Fund	0.45%
Japanese Yen Fund	0.35%
South African Rand Fund	0.45%
Asia Local Debt Fund	0.55%
Australia & New Zealand Debt Fund	0.45%
Emerging Markets Local Debt Fund	0.55%
Euro Debt Fund	0.35%
Global Real Return Fund ( <i>consolidated</i> )	0.60%
Managed Futures Strategy Fund ( <i>consolidated</i> )	0.95%

Each Fund may purchase shares of affiliated exchanged traded funds ("ETF") in secondary market transactions. For the six months ended February 29, 2012, there were no transactions in affiliated ETFs.

**4. CAPITAL SHARE TRANSACTIONS**

As of February 29, 2012, there was an unlimited number of \$0.001 par value shares of beneficial interest authorized by the Trust. Shares are issued and redeemed by each Fund only in Creation Units or multiples thereof. Except when aggregated in Creation Units, shares of each Fund are not redeemable. Transactions in shares for each Fund are disclosed in detail in the Statements of Changes in Net Assets. Funds issue and redeem shares on a cash basis only. Investors purchasing and redeeming Creation Units may be charged a purchase transaction fee and a redemption transaction fee to offset transfer and other transaction costs associated with the issuance and redemption of Creation Units.

**Table of Contents****Notes to Financial Statements** (unaudited) (continued)**5. INVESTMENT PORTFOLIO TRANSACTIONS**

Purchases and sales of investments (excluding short-term investments) for the six months ended February 29, 2012 were as follows:

<b>Fund</b>	<b>Purchases</b>	<b>Sales</b>
Brazilian Real Fund	\$	\$
Chinese Yuan Fund		
Commodity Currency Fund		
Emerging Currency Fund		
Indian Rupee Fund		
Japanese Yen Fund		
South African Rand Fund

Emerging Markets Local Debt Fund	285,298,377	395,930,452
Euro Debt Fund	4,940,202	134,392
Global Real Return Fund ( <i>consolidated</i> )	40,742	199,515
Managed Futures Strategy Fund ( <i>consolidated</i> )		

**6. FEDERAL INCOME TAXES**

At February 29, 2012, the cost of investments (including securities on loan) for Federal income tax purposes was substantially the same as for book purposes, as indicated below:

<b>Fund</b>	<b>Tax Cost</b>	<b>Gross Unrealized Appreciation</b>	<b>Gross Unrealized Depreciation</b>	<b>Net Unrealized Appreciation/ (Depreciation)</b>
Brazilian Real Fund	\$ 89,755,192	\$ 401	\$ (440)	\$ (39)
Chinese Yuan Fund	393,849,724	10,486	(4,172)	6,314
Commodity Currency Fund	31,910,918		(12)	(12)
Emerging Currency Fund	341,624,826		(2,739)	(2,739)
Indian Rupee Fund	16,650,520		(22)	(22)
Japanese Yen Fund	18,986,430		(156,648)	(156,648)
South African Rand Fund	4,853,521		(19)	(19)
Asia Local Debt Fund	418,851,278	5,203,058	(4,621,600)	581,458
Australia & New Zealand Debt Fund	32,062,879	1,290,578		1,290,578
Emerging Markets Local Debt Fund	1,244,829,917	17,875,292	(14,933,010)	2,942,282
Euro Debt Fund	4,785,751	8,183	(56,765)	(48,582)
Global Real Return Fund ( <i>consolidated</i> )	4,635,527	172,631	(47,402)	125,229
Managed Futures Strategy Fund ( <i>consolidated</i> )	244,681,108	1,225	(379)	846

GAAP provides guidance on tax provisions that prescribe a minimum threshold for financial statement recognition of the benefit of a tax position taken or expected to be taken in a tax return. Foreign taxes are provided for based on each Fund's understanding of the tax rules and rates that exist in the foreign markets in which it invests. Taxes are accrued and applied to net investment income, net realized capital gains and net unrealized appreciation, as applicable, as the income is earned or capital gains are recorded. As of and during the six months ended February 29, 2012, the Funds did not have any liabilities for unrecognized tax benefits relating to uncertain income tax positions they have taken or expect to take in the future. If applicable, the Funds will recognize interest accrued related to unrecognized tax benefits in interest expense and penalties in Other expenses on the Statements of Operations. The Funds file tax returns with the Internal Revenue Service, the State of New York, and various other states. Generally, each of the tax years in the four-year period ended August 31, 2011, remains subject to examination by taxing authorities.

**7. NEW ACCOUNTING PRONOUNCEMENTS**

## Edgar Filing: WisdomTree Trust - Form N-CSRS

In April 2011, the FASB issued Accounting Standards Update ( ASU ) No. 2011-03 Reconsideration of Effective control for Repurchase Agreements ( ASU 2011-03 ). The objective of ASU 2011-03 is to improve the accounting for repurchase agreements and similar agreements that both entitle and obligate a transferor to repurchase or redeem financial assets before their maturity. This guidance is effective prospectively for interim and annual reporting periods beginning on or after December 15, 2011. ASU 2011-03 modifies the criteria for determining effective control of transferred assets and as a result certain agreements may now be accounted for as secured borrowings. ASU 2011-03 is effective prospectively for new transfers and existing transactions that are

72 WisdomTree Currency, Fixed Income and Alternative Funds

**Table of Contents****Notes to Financial Statements** (unaudited) (concluded)

modified in the first interim or annual period beginning on or after December 15, 2011. Management is currently evaluating the implications of this change and its impact on the financial statements.

In May 2011, the FASB issued ASU No. 2011-04 Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs (ASU 2011-04). ASU 2011-04 includes common requirements for measurement of and disclosure about fair value between U.S. GAAP and IFRS. ASU 2011-04 will require reporting entities to disclose the following information for fair value measurements categorized within Level 3 of the fair value hierarchy: quantitative information about the unobservable inputs used in the fair value measurement, the valuation processes used by the reporting entity and a narrative description of the sensitivity of the fair value measurement to changes in unobservable inputs and the interrelationships between those unobservable inputs. In addition, ASU 2011-04 will require reporting entities to make disclosures about amounts and reasons for all transfers in and out of Level 1 and Level 2 fair value measurements. The new and revised disclosures are effective for interim and annual reporting periods beginning after December 15, 2011. At this time, management is evaluating the implications of ASU No. 2011-04 and its impact on the financial statements.

**8. LEGAL MATTER**

On December 1, 2011, Research Affiliates, LLC filed a complaint in the United States District Court for the Central District of California, naming the Trust, its adviser, WisdomTree Asset Management, Inc., and its affiliates, along with other parties, as defendants. The complaint alleges that the fundamentally weighted investment methodology developed by WisdomTree Investments, Inc. ( WisdomTree Investments ) and employed by the Trust infringes three of plaintiff's patents. The complaint seeks both unspecified monetary damages to be determined and an injunction to prevent further infringement. The Trust filed its answer to the complaint on January 17, 2012. The Trust believes it has strong defenses to this lawsuit based on its belief that (i) the Trust's Funds do not practice the indexing methods as claimed in the asserted patents; and (ii) the patents should be declared invalid because, among other reasons, there is ample evidence that the concept of fundamentals based indexing was widely known and in commercial use by asset managers and index providers well before the patent applications at issue were filed by plaintiff. Specifically, the Currency Income, Fixed Income and Alternative Funds described herein, do not infringe upon plaintiff's patents since they are not managed using a fundamentally weighted investment methodology.

While at this early stage of the proceedings it is not possible to determine the probability of any outcome or the probability or amount of any loss, the Trust is confident in the merits of its position. WisdomTree Asset Management and WisdomTree Investments have contractually agreed to indemnify the Trust and pay any losses, claims and damages (including legal fees) incurred by the Trust or a Fund in connection with the complaint. The Trust intends to vigorously defend against plaintiff's claims.

WisdomTree Investments, its affiliates and their independent providers are not liable for any informational errors, incompleteness, or delays, or for any actions taken in reliance on information contained herein.

**Investors should consider the investment objectives, risks, charges and expenses of the Funds carefully before investing. A prospectus, containing this and other information, is available at [www.wisdomtree.com](http://www.wisdomtree.com), or by calling 1-866-909-WISE (9473). Investors should read the prospectus carefully before investing. There are risks associated with investing, including possible loss of principal. Past performance does not guarantee future results. Indexes are unmanaged and you can not invest directly in an index.**

There are risks associated with investing including possible loss of principal. Foreign investing involves special risks, such as risk of loss from currency fluctuation or political or economic uncertainty. Investments in real estate involve additional special risks, such as credit risk, interest rate fluctuations and the effect of varied economic conditions. Funds that focus their investments in one country or region may be significantly impacted by events and developments associated with the region which can adversely affect performance. Funds focusing on a single sector and/or smaller companies generally experience greater price volatility. Investments in emerging, offshore or frontier markets are generally less liquid and less efficient than investments in developed markets and are subject to additional risks, such as risks of adverse governmental regulation and intervention or political developments. Inflation protected securities do not eliminate risks associated with inflation or deflation. Investments in currency involve additional special risks, such as credit risk and interest rate fluctuations. Derivative investments can be volatile and these investments may be less liquid than other securities, and more sensitive to the effect of varied economic conditions. As these Funds can have a high concentration in some issuers the Funds can be adversely impacted by changes affecting such issuers.

Fixed income investments are subject to interest rate risk; their value will normally decline as interest rates rise. In addition when interest rates fall income may decline. Fixed income investments are also subject to credit risk, the risk that the issuer of a bond will fail to pay interest and principal in a timely manner, or that negative perceptions of the issuers ability to make such payments will cause the price of that bond to decline. One of the risks associated with the Managed Futures Strategy Fund (WDTI) and the Global Real Return Fund (RRF) is the complexity of the different factors which contribute to each Fund s performance, as well as their correlation (or non-correlation) to other asset classes. These factors include use of long and short positions in commodity futures contracts, currency forward contracts, swaps and other derivatives. An investment in WDTI is speculative and involves a substantial degree of risk. WDTI should not be used as a proxy for taking long only (or short only) positions in commodities or currencies. In markets without sustained price trends or markets that quickly reverse or whipsaw WDTI may suffer significant losses. Unlike typical exchange-traded funds, there are no indexes that the Currency Funds, Fixed Income Funds, WDTI or RRF attempt to track or replicate. Thus, the ability of these Funds to achieve their objectives will depend on the effectiveness of the portfolio manager. Please read the Fund s prospectus for specific details regarding the Fund s risk profile.

Transactions in Fund shares will result in brokerage commissions and will generate tax consequences. Shares may be sold through brokerage accounts, but may be redeemed from the Funds only in large amounts of 50,000 shares or more.

Rule 30a-2(a) CERTIFICATIONS

I, Jonathan L. Steinberg, certify that:

1. I have reviewed this report on Form N-CSR of WisdomTree Trust;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations, changes in net assets, and cash flows (if the financial statements are required to include a statement of cash flows) of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940) and internal control over financial reporting (as defined in Rule 30a-3(d) under the Investment Company Act of 1940) for the registrant and have:
  - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of a date within 90 days prior to the filing date of this report based on such evaluation; and
  - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the second fiscal quarter of the period covered by this report that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize, and report financial information; and
  - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
