CurrencyShares are subject to risks similar to those of stocks and may not be suitable for all investors. The value of the shares of each CurrencyShares Trust relates directly to the value of the foreign currency held by the particular Trust. This creates a concentration risk associated with fluctuations in the price of the applicable foreign currency. Accordingly, a decline in the price of that currency will have an adverse effect on the value of the shares of the particular CurrencyShares Trust. Factors that may have the effect of causing a decline in the price of a foreign currency include national debt levels and trade deficits,
