Eaton Vance

Senior Income Trust (EVF)

Annual Report

June 30, 2013

**Commodity Futures Trading Commission Registration.** Effective December 31, 2012, the Commodity Futures Trading Commission ( CFTC ) adopted certain regulatory changes that subject registered investment companies and advisers to regulation by the CFTC if a fund invests more than a prescribed level of its assets in certain CFTC-regulated instruments (including futures, certain options and swap agreements) or markets itself as providing investment exposure to such instruments. The Fund has claimed an exclusion from the definition of the term commodity pool operator under the Commodity Exchange Act and is not subject to the CFTC regulation. Because of its management of other strategies, the Fund s adviser is registered with the CFTC as a commodity pool operator.

**Fund shares are not insured by the FDIC and are not deposits or other obligations of, or guaranteed by, any depository institution. Shares are subject to investment risks, including possible loss of principal invested.**

#### Management's Discussion of Fund Performance

##### Economic and Market Conditions

The U.S. floating-rate loan market performed solidly during the Fund's fiscal year. Following a strong performance in 2012, momentum continued in the asset class during the first five months of 2013.

In late May 2013, however, U.S. Federal Reserve (the Fed) Chairman Ben Bernanke surprised the markets by indicating that quantitative easing—the Fed's monthly purchase of about \$85 billion in U.S. Treasuries and agency mortgage-backed securities—could slow down and end sooner than many market participants had expected. The negative effect on the bond market was swift and dramatic, but the short duration<sup>8</sup> of floating-rate loans helped minimize the effect in that asset class. Loan yields were high enough to offset spread widening and price declines late in the period. For the 12 months ended June 30, 2013, the S&P/LSTA Leveraged Loan Index (the Index)<sup>2</sup>—a broad barometer for the loan market—advanced 7.32%.

With fundamentals in check for the most part and the default rate low, loan returns for most of the period were driven primarily by favorable technical conditions. Inflows into the asset class remained robust, with institutional demand and retail fund subscriptions outstripping the net supply of new loans issued. Investors' search for yield and—until late in the period—strong appetite for risk kept loans in demand, due to their near-par valuations, zero-like duration and floating income stream.

With the global economy continuing what appears to be its gradual recovery during the period, improving corporate fundamentals were also a key driver of loan performance. Loan market default rates, a measure of corporate health and credit risk in the market, ended the period at 1.4% on a trailing 12-month basis, well below the market's 10-year average of approximately 2.4%, according to Standard & Poor's Leveraged Commentary & Data. With many of the weakest issuers having been winnowed out of the market in the recent recession, surviving firms tended to be operating in a leaner manner, cutting expenses and generating higher operating margins. This helped produce generally strong EBITDA (earnings before interest, taxes, depreciation and amortization) growth rates for those issuers, another positive factor for loan market fundamentals.

##### Fund Performance

For the fiscal year ended June 30, 2013, Eaton Vance Senior Income Trust (the Fund) shares at net asset value (NAV) had a total return of 9.49%, outperforming the 7.32% return of the Index. The predominant factors driving relative performance versus the Index during the period were quality positioning, investment leverage, high-yield bond exposure and beneficial credit selection.

Under normal market conditions, the Fund invests at least 80% of its total assets in senior, secured floating-rate loans (senior loans). In keeping with the Fund's secondary goal of preservation of capital, management tends to overweight higher-rated loans relative to the Index—a strategy that may help the Fund experience limited credit losses over time but may detract from relative results versus the Index in times of market exuberance, such as that experienced for most of the period ended June 30, 2013.

For the fiscal year, BB-rated<sup>7</sup> loans in the Index returned 5.18%, B-rated loans in the Index returned 6.98% and CCC-rated loans in the Index returned 19.31%. Across these ratings tiers, the Fund had overweight exposure to BB-rated loans and underweight exposure to B-rated and CCC-rated loans. As a result, the Fund's higher-quality positioning generally served as a relative detractor from performance versus the Index during the period.

## Edgar Filing: EATON VANCE SENIOR INCOME TRUST - Form N-CSR

While the Fund's quality positioning acted as a headwind, several factors drove overall favorable results relative to the Index. The Fund's employment of investment leverage was a contributor to relative performance versus the Index, as leverage enhanced the performance of the Fund's underlying portfolio. The Fund's exposure to high-yield bonds, which markedly outperformed the loan market during the period and were not represented in the Index, aided relative results versus the Index as well. Finally, credit selection was broadly beneficial across the Fund's many sectors.

On a sector-level basis, the Fund's underweight to retailers (except food and drug) and telecommunications contributed to relative results versus the Index, as those market segments underperformed the broader Index. In contrast, the Fund's underweight to lower-rated credit-heavy sectors, such as utilities, publishing, and radio and television, detracted from relative results versus the Index, as those areas outperformed the overall Index. Similarly, the Fund's overweight to historically less volatile sectors, such as food products and food/drug retailers, detracted from relative performance versus the Index, as those sectors trailed the overall market.

*See Endnotes and Additional Disclosures in this report.*

*Past performance is no guarantee of future results. Returns are historical and are calculated by determining the percentage change in net asset value (NAV) or market price (as applicable) with all distributions reinvested. Fund performance at market price will differ from its results at NAV due to factors such as changing perceptions about the Fund, market conditions, fluctuations in supply and demand for Fund shares, or changes in Fund distributions. Investment return and principal value will fluctuate so that shares, when sold, may be worth more or less than their original cost. Performance less than one year is cumulative. Performance is for the stated time period only; due to market volatility, current Fund performance may be lower or higher than the quoted return. For performance as of the most recent month end, please refer to [www.eatonvance.com](http://www.eatonvance.com).*

### Senior Income Trust

June 30, 2013

#### Endnotes and Additional Disclosures

- <sup>1</sup> The views expressed in this report are those of the portfolio manager(s) and are current only through the date stated at the top of this page. These views are subject to change at any time based upon market or other conditions, and Eaton Vance and the Fund(s) disclaim any responsibility to update such views. These views may not be relied upon as investment advice and, because investment decisions are based on many factors, may not be relied upon as an indication of trading intent on behalf of any Eaton Vance fund. This commentary may contain statements that are not historical facts, referred to as forward looking statements. The Fund's actual future results may differ significantly from those stated in any forward looking statement, depending on factors such as changes in securities or financial markets or general economic conditions, the volume of sales and purchases of Fund shares, the continuation of investment advisory, administrative and service contracts, and other risks discussed from time to time in the Fund's filings with the Securities and Exchange Commission.
- <sup>2</sup> S&P/LSTA Leveraged Loan Index is an unmanaged index of the institutional leveraged loan market. Unless otherwise stated, index returns do not reflect the effect of any applicable sales charges, commissions, expenses, taxes or leverage, as applicable. It is not possible to invest directly in an index.
- <sup>3</sup> Performance results reflect the effects of leverage.
- <sup>4</sup> The Distribution Rate is based on the Fund's last regular distribution per share in the period (annualized) divided by the Fund's NAV or market price at the end of the period. The Fund's distributions may be composed of ordinary income, tax-exempt income, net realized capital gains and return of capital. The Fund's distributions are determined by the investment adviser based on its current assessment of the Fund's long-term return potential. As portfolio and market conditions change, the rate of distributions paid by the Fund could change.
- <sup>5</sup> Leverage represents the liquidation value of the Fund's APS and borrowings outstanding as a percentage of Fund net assets applicable to common shares plus APS and borrowings outstanding. Use of leverage creates an opportunity for income, but creates risks including greater price volatility. The cost of leverage rises and falls with changes in short-term interest rates. The Fund may be required to maintain prescribed asset coverage for its leverage and may be required to reduce its leverage at an inopportune time.
- <sup>6</sup> Excludes cash and cash equivalents.
- <sup>7</sup> Ratings are based on Moody's, S&P or Fitch, as applicable. Ratings, which are subject to change, apply to the creditworthiness of the issuers of the underlying securities and not to the Fund or its shares. Credit ratings measure the quality of a bond based on the issuer's creditworthiness, with ratings ranging from AAA, being the highest, to D, being the lowest based on S&P's measures. Ratings of BBB or higher by Standard and Poor's or Fitch (Baa or higher by Moody's) are considered to be investment grade quality. Credit ratings are based largely on the rating agency's analysis at the time of rating. The rating assigned to any particular security is not necessarily a reflection of the issuer's current financial condition and does not necessarily reflect its assessment of the volatility of a security's market value or of the liquidity of an investment in the security. If securities are rated differently by the rating agencies, the higher rating is applied. Holdings designated as Not Rated are not rated by the national rating agencies stated above.
- <sup>8</sup> Duration is a measure of the expected change in price of a bond in percentage terms given a one percent change in interest rates, all else being constant. Securities with lower durations tend to be less sensitive to interest-rate changes.
