

DANAHER CORP /DE/  
Form 425  
October 14, 2014  
Filed by Danaher Corporation

pursuant to Rule 425 under the

Securities Act of 1933

Subject Company: Danaher Corporation

Commission File Number: 1-8089

The following document was distributed to certain investors of, and other investment professionals who follow, Danaher Corporation.

## **Transaction Overview**

### **1. Why are you doing this transaction? What is the strategic rationale?**

Culmination of a multi-year discussion between us and NetScout

This transaction will create a company with superb global scale and best-in-class solutions to deploy, manage and secure the networks of both telecommunication service providers and high performance enterprises Better together with greater opportunity for growth through expanded sales coverage and enhanced R&D capabilities; able to provide better solutions to customers

An unique and attractive way to create shareholder value

### **2. What are the details of this transaction?**

It is a tax-free transaction called a Reverse Morris Trust, involving 3 steps:

- 1) Danaher spins/splits off the Communications business to Danaher shareholders
- 2) The spin/split is followed by a merger of the spin/split-co with NetScout
- 3) After close, Danaher shareholders will own ~60% of NetScout (62.5M shares) and NetScout shareholders will own ~40% of NetScout

At NetScout's closing price of \$41.91 on October 10, 2014, the transaction values Danaher's Communications business at \$2.6 billion

Determination of a spin or split will be made based on market conditions before close

Expected close in 2015

### **3. What is the market size? What are the growth drivers?**

The combined served market is >\$6B and growing at a mid-single digit rate

Attractive growth drivers cut across all served markets

- i To businesses, it is more important than ever that applications and networks are always accessible driving increased monitoring
- i Growth and consolidation in enterprise data centers
- i Growth in bandwidth consumption among enterprise and telecommunication customers

- i Increased cyber security concerns globally

**4. What is the impact to EPS as a result of the transaction?**

A spin-off would result in ~2-3% EPS dilution on an annual basis which would likely be more than offset by the value from NetScout stock provided as consideration for the merger

In a split-off transaction there will likely be an immaterial impact to EPS (and could potentially be accretive)

**5. Who will run the business?**

The current NetScout management team will continue running the combined company, including Anil Singhal, co-founder and CEO of NetScout

Jim Lico will remain a DHR leader but will join the Board of Directors of the new NetScout upon closing to provide support going forward

**6. What does this all look like? What market segments will NetScout have a presence in?**

Danaher plans to combine its Communications business (including Tektronix Communications, Arbor Networks, and Fluke Networks) with NetScout

The data cabling tools business and carrier service provider tools business of Fluke Networks will be retained by Danaher.

## **Market Segment Breakdown**

### **Company Overview    Communications business**

#### **7. What is Danaher's Communications business?**

A leading, global provider of monitoring, management and optimization tools and services for communications and enterprise networks

Danaher's products and services are used in the design, development, installation, deployment and operation of communications networks

#### **8. What are the Communication businesses' products?**

*Tektronix Communications* sells solutions primarily to service providers, including wireless carriers/telecommunication companies, to troubleshoot subscriber problems and monitor their networks

*Fluke Networks* offers solutions for network installation/deployment, network performance management and troubleshooting, and security and performance monitoring

*Arbor Networks* sells network security solutions for large enterprises and service providers

#### **9. What businesses are going to be merged with Netscout?**

Danaher's entire Communications business with the exception of the data cabling tools business (DCI) and carrier service provider (CSP) tools business of Fluke Networks

Fluke Networks DCI and CSP overview:

- i These products assist installers in testing and certifying copper and fiber optic cable installations within data centers and buildings (offices, shopping centers, homes, etc.)

- i This business had ~\$170M in revenue during 2013

**10. Who does Danaher's Communication business sell to? What is geographic breakdown?**

## **Company Overview    Netscout**

### **11. Who is Netscout?**

A market leader in network performance management solutions for organizations with high performance networks

NetScout is a premier brand in the communications market and its products are used by 92 percent of the fortune 100 and by more than 165 service providers worldwide

FY 14 (March fiscal year ending) Revenue of ~\$0.4B

### **12. What do NetScout s products do?**

NetScout s products helps networks run better

Their solutions are analogous to what the check engine light is to a car and driver but for networks and network operators

Allows network operators to see how well network services are performing and how data is moving around the network infrastructure

These operators can then make decisions to optimize performance

### **13. Who does Netscout sell to? What is geographic breakdown?**

**14. How are these products different from what Danaher's Communications business provides?**

Telecommunications

- i NetScout's core products deal primarily with the service level performance of the network at macro level
- i Danaher's Tektronix Communication's core products deal with troubleshooting at a more granular, subscriber level
- i NetScout's products are typically distributed, meaning they are used at a regional/local level, while Tektronix Communication's products are used by centralized help desks at a national level

Enterprise

- i NetScout has very limited presence in the smaller/mid-sized business segment where Fluke Network's products are primarily used
- i NetScout does not currently offer products in network security where Arbor Network's products are used

**ADDITIONAL INFORMATION**

This communication does not constitute an offer to buy, or a solicitation of an offer to sell, any securities of NetScout, Danaher's Communications business or Danaher. In connection with the proposed transaction, NetScout and Danaher's Communications subsidiary will file registration statements with the SEC registering shares of NetScout common stock and Danaher's Communications subsidiary common units in connection with the proposed transaction. NetScout's registration statement will also include a proxy statement and prospectus of NetScout relating to the proposed transaction.
