(1)		Senior floating-rate interests (Senior Loans) often require prepayments from excess cash flows or permit the borrowers to repay at their election. The degree to which borrowers repay, whether as a contractual requirement or at their election, cannot be predicted with accuracy. As a result, the actual remaining maturity may be substantially less than the stated maturities shown. However, Senior Loans will have an expected average life of approximately two to four years. The stated interest rate represents the weighted average interest rate of all contracts within the senior loan facility and includes commitment fees on unfunded loan commitments, if any. Senior Loans typically have rates of interest which are redetermined either daily, monthly, quarterly or semi-annually by reference to a base lending rate, plus a premium. These base lending rates are primarily the London Interbank Offered Rate (LIBOR) and secondarily, the prime rate offered by one or more major United States banks (the Prime Rate) and the certificate of deposit (CD) rate or other base lending rates used by commercial lenders.
(2)		This Senior Loan will settle after January 31, 2015, at which time the interest rate will be determined.
(3)		Amount is less than 0.05%.
(4)		Unfunded or partially unfunded loan commitments. The Fund may enter into certain loan agreements all or a portion of which may be unfunded. The Fund is obligated to fund these commitments at the borrower s discretion.
(5)		For fair value measurement disclosure purposes, security is categorized as Level 3.
(6)		Currently the issuer is in default with respect to interest and/or principal payments or has filed for bankruptcy. For a variable rate security, interest rate has been adjusted to reflect non-accrual status.
(7)		Interest only security that entitles the holder to receive only interest payments on the underlying mortgages. Principal amount shown is the notional amount of the underlying mortgages on which coupon interest is calculated.
(8)		Inverse floating-rate security whose coupon varies inversely with changes in the interest rate index. The stated interest rate represents the coupon rate in effect at January 31, 2015.

Principal only security that entitles the holder to receive only principal payments on the underlying mortgages. (9) (10)Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933. These securities may be sold in certain transactions (normally to qualified institutional buyers) and remain exempt from registration. At January 31, 2015, the aggregate value of these securities is \$38,316,417 or 12.9% of the Fund s net assets. Variable rate security. The stated interest rate represents the rate in effect at January 31, 2015. (11)(12)Weighted average fixed-rate coupon that changes/updates monthly. Rate shown is the rate at January 31, 2015. (13)Adjustable rate mortgage security. Rate shown is the rate at January 31, 2015. (14)When-issued security. (15)Inflation-linked security whose principal is adjusted for inflation based on changes in a designated inflation index or inflation rate for the applicable country. Interest is calculated based on the inflation-adjusted principal. (16)Security exempt from registration under Regulation S of the Securities Act of 1933, which exempts from registration securities offered

and sold outside the United States. Security may not be offered or sold in the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act of 1933. At January 31, 2015, the aggregate value of

26

these securities is \$1,830,970 or 0.6% of the Fund s net assets.

- (17) Security (or a portion thereof) has been pledged to cover collateral requirements on open derivative contracts.
- (18) Non-income producing.
- (19) Security was acquired in connection with a restructuring of a Senior Loan and may be subject to restrictions on resale.
- (20) Affiliated investment company, available to Eaton Vance portfolios and funds, which invests in high quality, U.S. dollar denominated money market instruments. The rate shown is the annualized seven-day yield as of January 31, 2015. Net income allocated from the investment in Eaton Vance Cash Reserves Fund, LLC for the fiscal year to date ended January 31, 2015 was \$2,724.

Basis for Consolidation

The Fund seeks to gain exposure to the commodity markets, in whole or in part, through investments in Eaton Vance EVG Commodity Subsidiary, Ltd. (the Subsidiary), a wholly-owned subsidiary of the Fund organized under the laws of the Cayman Islands with the same objective and investment policies and restrictions as the Fund. The Fund may invest up to 25% of its total assets in the Subsidiary. The net assets of the Subsidiary at January 31, 2015 were \$1,411,298 or 0.5% of the Fund s consolidated net assets. The Consolidated Portfolio of Investments includes positions of the Fund and the Subsidiary.

(1) Upfront payment is exchanged with the counterparty as a result of the standardized trading coupon. At January 31, 2015, the Fund had sufficient cash and/or securities to cover commitments under these contracts.

In the normal course of pursuing its investment objectives, the Fund is subject to the following risks:

Credit Risk: The Fund enters into credit default swap contracts to manage certain investment risks and/or to enhance total return.

Foreign Exchange Risk: The Fund engages in forward foreign currency exchange contracts to enhance total return, to seek to hedge against fluctuations in currency exchange rates and/or as a substitute for the purchase or sale of securities or currencies.

Interest Rate Risk: The Fund utilizes various interest rate derivatives including interest rate swaps to enhance total return and to seek to hedge against fluctuations in interest rates.

The fair value of open derivative instruments (not considered to be hedging instruments for accounting disclosure purposes) by risk exposure at January 31, 2015 was as follows:

		Fair	r Value	
Risk	Derivative	Asset	,	Liability Derivative
		Derivative		
Credit	Credit Default Swaps	\$ 420,444	\$	(35,827)
		\$ 420,444	\$	(35,827)
Foreign Exchange	Forward Foreign Currency Exchange Contracts	\$ 3,593,173	\$	(2,369,859)
		\$ 3,593,173	\$	(2,369,859)
Interest Rate	Interest Rate Swaps (Centrally Cleared)	\$ 18,282	\$	(32,519)
Interest Rate	Interest Rate Swaps	353,579		(344,397)
		\$ 371,861	\$	(376,916)
Total		\$ 4,385,478	\$	(2,782,602)

^{*} The contract annual fixed rate represents the fixed rate of interest received by the Fund (as a seller of protection) or paid by the Fund (as a buyer of protection) annually on the notional amount of the credit default swap contract.

The cost and unrealized appreciation (depreciation) of investments of the Fund, including the Fund s investment in the Subsidiary, at January 31, 2015, as determined on a federal income tax basis, were as follows:

Aggregate cost	\$ 424,251,796
Gross unrealized appreciation	\$ 9,471,808
Gross unrealized depreciation	(16,307,864)
Net unrealized depreciation	\$ (6,836,056)

Under generally accepted accounting principles for fair value measurements, a three-tier hierarchy to prioritize the assumptions, referred to as inputs, is used in valuation techniques to measure fair value. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including a fund s own assumptions in determining the fair value of investments)

In cases where the inputs used to measure fair value fall in different levels of the fair value hierarchy, the level disclosed is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

At January 31, 2015, the hierarchy of inputs used in valuing the Fund s investments and open derivative instruments, which are carried at value, were as follows:

^{*} None of the unobservable inputs for Level 3 assets, individually or collectively, had a material impact on the Fund.

Level 3 investments at the beginning and/or end of the period in relation to net assets were not significant and accordingly, a reconciliation of Level 3 assets for the fiscal year to date ended January 31, 2015 is not presented. At January 31, 2015, there were no investments transferred between Level 1 and Level 2 during the fiscal year to date then ended.

For information on the Fund s policy regarding the valuation of investments and other significant accounting policies, please refer to the Fund s most recent financial statements included in its semiannual or annual report to shareholders.
