NOTE ON PRESENTATION

Unless the context otherwise requires, the terms we, us, our, Registrant, Company and Honda as used in this Annual Report each refer to Motor Co., Ltd. and its consolidated subsidiaries.

The consolidated financial statements of the Company in this Annual Report have been prepared in accordance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). The term IFRS also includes International Accounting Standards (IASs) and the related interpretations of the interpretations committees (SIC and IFRIC). As such, we make an explicit and unreserved statement of compliance with IFRS, as issued by the IASB, with respect to our consolidated financial statements as of and for the fiscal years ended March 31, 2014 and 2015 included in this Annual Report.

In accordance with rule amendments adopted by the United States Securities and Exchange Commission (SEC), which became effective on March 4, 2008, we are not required to provide reconciliations to U.S. generally accepted accounting principles (U.S. GAAP).

The consolidated financial statements included in this Annual Report are our first consolidated financial statements prepared in accordance with IFRS. In preparing these financial statements, the opening statement of financial position as of April 1, 2013, which is the date of transition to IFRS, and the comparative financial statements as of and for the fiscal year ended March 31, 2014 have been prepared in accordance with IFRS. In addition to the consolidated financial statements included in this Annual Report, other disclosure in this Annual Report has also been updated to correspond to the transition to IFRS.

The consolidated financial statements included in our Annual Reports on Form 20-F previously filed with the SEC were prepared in accordance with U.S. GAAP and the most recent consolidated financial statements prepared in accordance with U.S. GAAP are those as of and for the fiscal year ended March 31, 2014. IFRS differs in certain respects from U.S. GAAP. An explanation of how the transition to IFRS has affected our consolidated financial statements is provided in note (31) Explanation of Transition to IFRS to the accompanying consolidated financial statements.

Table of Contents**PART I****Item 1. Identity of Directors, Senior Management and Advisers**

Not applicable.

Item 2. Offer Statistics and Expected Timetable

Not applicable.

Item 3. Key Information**A. Selected Financial Data**

In the fiscal year ended March 31, 2015, we changed the basis of the accounting principles used to prepare our consolidated financial statements from U.S. GAAP to IFRS. Accordingly, the consolidated financial statements of the Company in this Annual Report have been prepared in accordance with IFRS, as issued by IASB. An explanation of how the transition to IFRS has affected our consolidated financial statements is provided in note (31) Explanation of Transition to IFRS to the accompanying consolidated financial statements.

The selected consolidated financial data set out below for each of the two fiscal years ended March 31, 2015 have been derived from our consolidated financial statements that were prepared in accordance with IFRS.

You should read the IFRS selected consolidated financial data set out below together with Item 5. Operating and Financial Review and Prospects and our consolidated financial statements contained in this Annual Report.

	Fiscal years ended March 31, Yen (millions, except Per Share Data)	
	2014	2015
Consolidated Statement of Income Data:		
Sales revenue	¥ 12,506,091	¥ 13,328,099
Operating profit	823,864	670,603
Share of profit of investments accounted for using the equity method	130,916	96,097
Profit before income taxes	933,903	806,237
Profit for the year	665,911	561,098

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

Profit for the year attributable to owners of the parent	624,703	509,435
Consolidated Statement of Financial Position Data:		
Total assets	16,048,438	18,425,837
Financing liabilities, including current and non-current	5,846,948	6,759,839
Equity attributable to owners of the parent	6,335,534	7,108,627
Total equity	6,558,928	7,382,821
Common stock	86,067	86,067
Per Share Data:		
Weighted average number of common shares outstanding		
Basic and diluted (thousands of shares)	1,802,294	1,802,289
Earnings per share attributable to owners of the parent *1		
Basic and diluted	¥ 346.62	¥ 282.66
Dividends declared during the period per common share *2	79.00	88.00
	(US\$ 0.77)	(US\$ 0.73)

*1 Earnings per share has been calculated by dividing profit for the year attributable to owners of the parent available to common shareholders by the weighted average number of common shares outstanding during the period.

Table of Contents

*2 A year-end dividend of ¥22 (\$0.18) per common share aggregating ¥39.6 billion (\$330 million) relating to fiscal 2015 was determined by our Board of Directors in April 2015 and approved by our shareholders in June 2015. This dividend will be paid in June 2015. U.S. dollar amounts for dividends per share are translated from yen at the year-end exchange rate of each period.

The following table sets out information regarding the noon buying rates for yen in New York City as certified for customs purposes by the Federal Reserve Bank of New York expressed in yen per \$1.00 during the periods shown. On May 29, 2015, the noon buying rate was ¥123.98=\$1.00. The average exchange rate for the period shown is the average of the month-end rates during the period.

Years ended or ending March 31,	Average	Noon Buying Rate		
		Period end	High	Low
		(Yen per \$1.00)		
2011	85.00	82.76	94.68	78.74
2012	78.86	82.41	85.26	75.72
2013	83.26	94.16	96.16	77.41
2014	100.46	102.98	105.25	92.96
2015	110.78	119.96	121.50	101.26
2016 (through May 29, 2015)	121.92	123.98	124.18	118.80

Month,	High	Low
	(Yen per \$1.00)	
December 2014	121.38	117.28
January 2015	120.20	116.78
February 2015	120.38	117.33
March 2015	121.50	119.01
April 2015	120.36	118.80
May 2015	124.18	119.09

C. Reason for the Offer and Use of Proceeds

Not applicable.

D. Risk Factors

You should carefully consider the risks described below before making an investment decision. If any of the risks described below actually occurs, Honda's business, financial condition or results of operations could be adversely affected. In that event, the trading prices of Honda's common stock and American Depositary Shares could decline, and you may lose all or part of your investment. Additional risks not currently known to Honda or that Honda now deems immaterial may also harm Honda and affect your investment.

Risks Relating to Honda's Industry

Honda may be adversely affected by market conditions

Honda conducts its operations in Japan and throughout the world, including North America, Europe and Asia. A sustained loss of consumer confidence in these markets, which may be caused by an extended economic slowdown, recession, changes in consumer preferences, rising fuel prices, financial crisis or other factors could trigger a decline in demand for motorcycles, automobiles and power products that may adversely affect Honda's results.

Table of Contents

Prices for products may fluctuate

Prices for motorcycles, automobiles and power products in certain markets may experience sharp changes over short periods of time. This volatility may be caused by various factors, including fierce competition, short-term fluctuations in demand caused by instability in underlying economic conditions, changes in tariffs, import regulations and other taxes, shortages of certain materials and parts, a steep rise in material prices and sales incentives. There is no guarantee that such price volatility will not continue for an extended period of time or that price volatility will not occur in markets that to date have not experienced such volatility.

Overcapacity within the industry has increased and will likely continue to increase if the economic downturn continues in Honda's major markets, leading, potentially, to further increased price volatility. Price volatility in any of Honda's markets could adversely affect Honda's results.

Risks Relating to Honda's Business in General

Currency and Interest Rate Risks

Honda's operations are subject to currency fluctuations

Honda has manufacturing operations throughout the world, including Japan, and exports products and components to various countries.

Honda purchases materials and components and sells its products and components in foreign currencies. Therefore, currency fluctuations could affect Honda's pricing of materials purchased and products sold. Accordingly, currency fluctuations have an effect on Honda's results and financial condition, as well as Honda's competitiveness, which will over time affect its results.

Legal and Regulatory Risks

Honda is subject to various governmental regulations

Honda conducts business operations in countries worldwide. As such, changes in regulations in these countries related to the environment, safety, quality, labor, taxes, currency, exports and imports or other factors could adversely affect Honda's business, financial condition, or results.

Honda is reliant on the protection and preservation of its intellectual property

Honda owns or otherwise has rights in a number of patents and trademarks relating to the products it manufactures, which have been obtained over a period of years. These patents and trademarks have been of value in the growth of Honda's business and will continue to be of value in the future. Honda does not regard any of its business operations as being dependent upon any single patent or related group of patents. However, an inability to protect this intellectual property generally, or the illegal infringement of some or a large group of Honda's intellectual property rights, could have an adverse effect on Honda's operations.

Honda may be subject to legal proceedings

Honda could be subject to suits, investigations and proceedings under relevant laws and regulations of various jurisdictions. A negative outcome in any such legal proceedings brought against Honda could adversely affect Honda's business, financial condition or results.

Risks Relating to Honda's Operations

Honda's Financial services business conducts business under highly competitive conditions in an industry with inherent risks

Honda's Financial services business offers various financing plans to its customers designed to increase the opportunity for sales of its products. However, customers can also obtain financing for the lease or purchase of

Table of Contents

Honda's products through a variety of other sources that compete with our financing services, including commercial banks and finance and leasing companies. The financial services offered by Honda involve credit risk as well as risks relating to lease residual values, cost of capital and access to funding. Competition for customers and/or these risks may affect Honda's results.

Honda relies on external suppliers for the provision of certain raw materials and parts

Honda purchases raw materials and parts from numerous external suppliers, and relies on certain suppliers for some of the raw materials and parts which it uses in the manufacture of its products. Honda's ability to continue to obtain these supplies in an efficient and cost-effective manner is subject to a number of factors, some of which are outside of Honda's control. These factors include the ability of its suppliers to provide a continued source of raw materials and parts and Honda's ability to compete with other users in obtaining the supplies. In particular, the loss of a key supplier could affect our production and increase our costs.

Honda relies on business alliances and joint ventures with other companies

Honda engages in business operations through alliances and joint ventures with other companies in expectation of synergy effects and increased efficiency, or in accordance with requirements from the countries in which Honda conducts its businesses. However, if disagreements occur between the parties to an alliance or joint venture, or if an alliance or joint venture is changed or cancelled, it may have an adverse effect on Honda's business, financial condition, or results.

Honda may be adversely affected by wars, terrorism, political uncertainty and labor strikes

Honda conducts business operations in countries worldwide and is exposed to risks including wars, terrorism, political uncertainty and labor strikes in those countries or neighboring regions. If such unforeseeable events occur, and operations are delayed or suspended, Honda's business, financial condition, or results could be adversely affected.

Honda may be adversely affected by natural disasters

In order to minimize the impact on its business operations when events such as large-scale natural disasters, accidents, or the outbreak of infectious diseases occur, Honda conducts a risk evaluation of these events and constructs business continuity plans (BCPs) in each region. However, if operations are delayed or suspended due to the occurrence of disasters, accidents, or the outbreak of infectious diseases that exceed assumptions, Honda's business, financial condition or results could be adversely affected.

Honda may be adversely affected by inadvertent disclosure of confidential information

Although Honda maintains internal controls through established procedures to protect confidential information, including personal information of its customers and related parties, such information could be inadvertently disclosed. If this occurs, Honda could be subject to, and could be adversely affected by, claims for damages from the customers or parties affected. Also, inadvertent disclosure of confidential business or technical information to third parties could also result in a loss of Honda's competitiveness.

Honda is subject to risks relating to its obligations to provide post-employment benefits

Honda has various pension plans and provides other post-employment benefits, in which the amount of benefits is basically determined based on the level of salary, service years, and other factors. Contributions are also regularly reviewed and adjusted as necessary to the extent permitted by laws and regulations. Defined benefit obligations and defined benefit costs are based on assumptions of many factors, including the discount rate and the rate of salary increase. Changes in assumptions could affect Honda's defined benefit costs and obligations, including Honda's cash requirements to fund such obligations in the future, which could materially affect Honda's financial condition and results.

Table of Contents

Honda's success depends in part on the value of its brand image, which could be diminished by product defects

One of the important factors behind corporate sustainability is trust and support for the Honda brand from our customers, society and the communities in which Honda conducts business operations. With respect to the quality of our products, which serves as the pillar of our brand image, we recognize that our mainstay products provide personal mobility and touch human lives, so we place top priority on the safety and security of our customers and constantly strive to further enhance the quality of our development, production and service-related activities. However, if for some unforeseeable reason a product defect does occur, from the standpoint of assuring the safety and security of our customers, it is possible that Honda will issue a recall or take some other action considered to be appropriate. In such an event, the Honda brand image could be damaged and this could adversely impact Honda's business operations as well as our results.

A holder of ADSs will have fewer rights than a shareholder has and such holder will have to act through the depositary to exercise those rights

The rights of shareholders under Japanese law to take various actions, including exercising voting rights inherent in their shares, receiving dividends and distributions, bringing derivative actions, examining a company's accounting books and records, and exercising appraisal rights, are available only to holders of record. Because the depositary, through its custodian agents, is the record holder of the Shares underlying the ADSs, only the depositary can exercise those rights in connection with the deposited Shares. The depositary will make efforts to exercise votes regarding the Shares underlying the ADSs as instructed by the holders and will pay to the holders the dividends and distributions collected from the Company. However, in the capacity as an ADS holder, such holder will not be able to bring a derivative action, examine our accounting books or records or exercise appraisal rights through the depositary.

Rights of shareholders under Japanese law may be more limited than under the laws of other jurisdictions

The Company's Articles of Incorporation, Regulations of the Board of Directors, Regulations of the Board of Corporate Auditors and the Company Law of Japan (the "Company Law") govern corporate affairs of the Company. Legal principles relating to such matters as the validity of corporate procedures, directors' and officers' fiduciary duties, and shareholders' rights may be different from those that would apply if the Company were a U.S. company. Shareholders' rights under Japanese law may not be as extensive as shareholders' rights under the laws of the United States. An ADS holder may have more difficulty in asserting his/her rights as a shareholder than such an ADS holder would as a shareholder of a U.S. corporation. In addition, Japanese courts may not be willing to enforce liabilities against the Company in actions brought in Japan that are based upon the securities laws of the United States or any U.S. state.

Because of daily price range limitations under Japanese stock exchange rules, a holder of ADSs may not be able to sell his/her shares of the Company's Common Stock at a particular price on any particular trading day, or at all

Stock prices on Japanese stock exchanges are determined on a real-time basis by the equilibrium between bids and offers. These exchanges are order-driven markets without specialists or market makers to guide price formation. To prevent excessive volatility, these exchanges set daily upward and downward price fluctuation limits for each stock, based on the previous day's closing price. Although transactions may continue at the upward or downward limit price if the limit price is reached on a particular trading day, no transactions may take place outside these limits. Consequently, an investor wishing to sell at a price above or below the relevant daily limit may not be able to sell his or her shares at such price on a particular trading day, or at all.

Table of Contents

U.S. investors may have difficulty in serving process or enforcing a judgment against the Company or its directors, executive officers or corporate auditors

The Company is a limited liability, joint stock corporation incorporated under the laws of Japan. Most of its directors, executive officers and corporate auditors reside in Japan. All or substantially all of the Company's assets and the assets of these persons are located in Japan and elsewhere outside the United States. It may not be possible, therefore, for U.S. investors to effect service of process within the United States upon the Company or these persons or to enforce against the Company or these persons judgments obtained in U.S. courts predicated upon the civil liability provisions of the Federal securities laws of the United States. There is doubt as to the enforceability in Japan, in original actions or in actions for enforcement of judgment of U.S. courts, of liabilities predicated solely upon the federal securities laws of the United States.

The Company's shareholders of record on a record date may not receive the dividend they anticipate

The customary dividend payout practice and relevant regulatory regime of publicly listed companies in Japan may differ from that followed in foreign markets. The Company's dividend payout practice is no exception. While the Company may announce forecasts of year-end and quarterly dividends prior to the record date, these forecasts are not legally binding. The actual payment of year-end dividends requires a resolution of the Company's shareholders. If the shareholders adopt such a resolution, the year-end dividend payment is made to shareholders as of the applicable record date, which is currently specified as March 31 by the Company's Articles of Incorporation. However, such a resolution of the shareholders is usually made at an ordinary general meeting of shareholders held in June. The payment of quarterly dividends requires a resolution of the Company's Board of Directors. If the board adopts such a resolution, the dividend payment is made to shareholders as of the applicable record dates, which are currently specified as June 30, September 30 and December 31 by the Articles of Incorporation. However, the board usually does not adopt a resolution with respect to a quarterly dividend until after the respective record dates.

Shareholders of record as of an applicable record date may sell shares after the record date in anticipation of receiving a certain dividend payment based on the previously announced forecasts. However, since these forecasts are not legally binding and resolutions to pay dividends are usually not adopted until after the record date, our shareholders of record on record dates for year-end and quarterly dividends may not receive the dividend they anticipate.

Cautionary statement with respect to forward looking statements in this Annual Report

This Annual Report includes forward looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. The forward looking statements included in this Annual Report are based on the current assumptions and beliefs of Honda in light of the information currently available to it, and involve known and unknown risks, uncertainties, and other factors. Such risks, uncertainties and other factors may cause Honda's actual results, performance, achievements or financial position to be materially different from any future results, performance, achievements or financial position expressed or implied by such forward-looking statements. Such risks, uncertainties and other factors are generally set forth in Item 3.D Risk Factors and include, without limitation:

the political, economic and social conditions in Japan and throughout the world including North America, Europe and Asia, including economic slowdowns, recessions, changes in consumer preferences, rising fuel prices, financial crises and other factors, as well as the relevant governments' specific policies with respect to economic growth, inflation, taxation, currency conversion, imports and sources of supplies and the availability of credit, particularly to the extent such current or future conditions and policies affect the automobile, motorcycle and power product industries and markets in Japan and other markets throughout the world in which Honda conducts its

business, and the demand, sales volume and sales prices for Honda's automobiles, motorcycles and power products;

Table of Contents

the effects of competition in the automobile, motorcycle and power product markets on the demand, sales volume and sales prices for Honda's automobiles, motorcycles and power products;

Honda's ability to finance its working capital and capital expenditure requirements, including obtaining any required external debt or other financing;

the effects of economic stagnation or recession in Honda's principal markets and of exchange rate and interest rate fluctuations on Honda's results of operations; and

the effects of environmental and other governmental regulations and legal proceedings.

Honda undertakes no obligation and has no intention to publicly update any forward looking statement after the date of this Annual Report. Investors are advised to consult any further disclosures by Honda in its subsequent filings pursuant to the Securities and Exchange Act of 1934.

Item 4. Information on the Company

A. History and Development of the Company

Honda Motor Co., Ltd. is a limited liability, joint stock corporation incorporated on September 24, 1948 under the Commercial Code of Japan as Honda Giken Kogyo Kabushiki Kaisha. It was formed as a successor to the unincorporated enterprise established in 1946 by the late Soichiro Honda to manufacture motors for motorized bicycles.

Honda develops, produces, and manufactures a variety of motor products, ranging from small general-purpose engines and scooters to specialty sports cars that incorporate Honda's highly efficient internal combustion engine technology.

Honda's principal executive office is located at 1-1, Minami-Aoyama 2-chome, Minato-ku, Tokyo, 107-8556, Japan. Its telephone number is +81-3-3423-1111.

Principal Capital Investments

In the fiscal years ended March 31, 2014 and 2015, Honda's capital expenditures were ¥2,168.3 billion and ¥2,579.2 billion, respectively, on an accrual basis. Also, capital expenditures excluding those with respect to equipment on operating leases were ¥957.6 billion and ¥898.0 billion, respectively, on an accrual basis. For further details of Honda's capital expenditures during fiscal 2015, see Item 4.D Property, Plants and Equipment of this Annual Report.

B. Business Overview

General

Honda's business segments are the Motorcycle business operations, Automobile business operations, Financial services business operations, and Power product and other businesses operations.

Table of Contents

The following tables show the breakdown of Honda's revenue from external customers by category of business and by geographical markets based on the location of the customer for the fiscal years ended March 31, 2014 and 2015:

	Fiscal years ended March 31,	
	2014	2015
	Yen (billions)	
Motorcycle Business	¥ 1,689.2	¥ 1,846.6
Automobile Business	9,178.7	9,603.3

Motorcycle Business

In 1949, Honda began mass production of motorcycles with the *Dream D-Type*, followed by other models such as the *Benly* and the *Cub F-Type*. By 1957, Honda became the top Japanese manufacturer in terms of motorcycle production volume. Honda expanded its business overseas by establishing American Honda Motor Co., Inc. in the United States in 1959. Honda first started overseas production in Belgium in 1963.

Honda produces a wide range of motorcycles, with engine displacement ranging from the 50cc class to the 1800cc class. Honda's motorcycles use internal combustion engines developed by Honda that are air- or water-cooled, four-cycle, and are in single, two, four or six-cylinder configurations. Honda's motorcycle line consists of sports (including trial and moto-cross racing), business and commuter models. Honda has also produced all-terrain vehicles (ATVs) since 1984 and multi utility vehicles (MUVs) since 2008.

Table of Contents

The following table sets out unit sales for Honda's Motorcycle business, including motorcycles, and all-terrain vehicles (ATVs) and revenue from Motorcycle business, and the breakdown by geographical markets based on the location of the customer for the fiscal years ended March 31, 2014 and 2015:

	Fiscal years ended March 31,

* Honda Group Unit Sales is the total unit sales of completed products of Honda, its consolidated subsidiaries and its affiliates and joint ventures accounted for using the equity method. Consolidated Unit Sales is the total unit sales of completed products corresponding to consolidated sales revenue to external customers, which consists of unit sales of completed products of Honda and its consolidated subsidiaries.

Motorcycles are produced by Honda in Japan at its Kumamoto Factory. Honda's motorcycles are also produced by subsidiaries in countries around the world including Thailand, Vietnam, India, Brazil and Argentina.

For further information on recent operations and a financial review of the Motorcycle business, see Operating Results in Item 5. Operating and Financial Review and Prospects.

Automobile Business

Honda started Automobile business operations in 1963 with the *T360* mini truck and the *S500* small sports car models. Honda subsequently launched a series of mass-production models including the *Civic* in 1972 and the *Accord* in 1976, which established a base for its Automobile business. In 1969, production of the mini vehicles *N600* and *TN600* began in Taiwan using component parts sets. In 1982, Honda became the first Japanese automaker to begin local automobile production in the United States (with the *Accord* model).

Honda's automobiles use gasoline engines of three, four or six-cylinder configurations, diesel engines, gasoline-electric hybrid systems and gasoline-electric plug-in hybrid systems. Honda also offers alternative fuel-powered vehicles such as natural gas, ethanol, electric and fuel cell vehicles.

Table of Contents

Honda's principal automobile products include the following vehicle models:

Passenger cars:

Accord, Accord Hybrid, Amaze, Brio, Brio Amaze, Brio Satya, City, Civic, Civic Tourer, CRIDER, CR-Z, Fit/Jazz, Fit/Jazz Hybrid, Fit Shuttle, Fit Shuttle Hybrid, FREED, FREED Hybrid, FREED SPIKE, FREED SPIKE Hybrid, GRACE Hybrid, Honda MOBILIO, Insight, JADE, JADE Hybrid, LEGEND Hybrid, Spirior, Stream, Acura ILX, Acura RLX, Acura TLX

Light trucks:

Crosstour, CR-V, Elysion, Odyssey, Pilot, Ridgeline, Step WGN, VEZEL/HR-V, VEZEL Hybrid, XR-V, Acura MDX, Acura RDX

Mini vehicles:

Acty, Life, N-BOX, N-BOX +, N-BOX SLASH, N-ONE, N-WGN, Vamos

The following table sets out Honda's unit sales of automobiles and revenue from Automobile business and the breakdown by geographical markets based on the location of the customer for the fiscal years ended March 31, 2014 and 2015:

	Fiscal years ended March 31,			Fiscal years ended March 31,

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

* Honda Group Unit Sales is the total unit sales of completed products of Honda, its consolidated subsidiaries and its affiliates and joint ventures accounted for using the equity method. Consolidated Unit Sales is the total unit sales of completed products corresponding to consolidated sales revenue to external customers, which consists of unit sales of completed products of Honda and its consolidated subsidiaries. Certain sales of automobiles that are financed with residual value type auto loans by our Japanese finance subsidiaries and sold through our consolidated subsidiaries are accounted for as operating leases in conformity with IFRS and are not included in consolidated sales revenue to the external customers in our Automobile business. Accordingly, they are not included in Consolidated Unit Sales, but are included in Honda Group Unit Sales of our Automobile business.

Automobiles are mainly produced by Honda at two factories located at three sites in Japan: the Saitama Factory (at the Sayama Plant and the Yorii Plant) and the Suzuka Factory. Our major production sites overseas include those located in the United States (Ohio, Alabama and Indiana), Canada (Alliston), Mexico (Celaya and El Salto), the United Kingdom (Swindon), Thailand (Ayutthaya), India (Greater Noida and Alwar), Indonesia (Karawang) and Brazil (Sumare).

For further information on recent operations and a financial review of the Automobile business, see [Operating Results](#) in [Item 5. Operating and Financial Review and Prospects](#) .

Table of Contents**Financial Services Business**

We offer a variety of financial services to our customers and dealers through finance subsidiaries in countries including Japan, the United States, Canada, the United Kingdom, Germany, Brazil and Thailand, with the aim of providing sales support for our products. The services of these subsidiaries include retail lending, leasing to customers and other financial services, such as wholesale financing to dealers.

The following table sets out Honda's revenue from Financial services business and the breakdown by geographical markets based on the location of the customer for the fiscal years ended March 31, 2014 and 2015:

	Fiscal years ended March 31,	
	2014	2015
	Yen (billions)	
Japan	¥ 77.1	¥ 119.7

Financial Services revenue as a percentage of total sales revenue	11%	12%

For further information on recent operations and a financial review of the Financial services business, see *Operating Results* in *Item 5. Operating and Financial Review and Prospects*.

Power Product and Other Businesses

Honda's Power product business began in 1953 with the introduction of the model the *H*, its first general purpose engine. Since then, Honda has manufactured a variety of power products including tillers, portable generators, general-purpose engines, grass cutters, outboard marine engines, water pumps, snow throwers, power carriers, power sprayers, lawn mowers and lawn tractors (riding lawn mowers). In 2003, Honda introduced a compact home-use cogeneration* unit.

* Cogeneration refers to the multiple applications of energy derived from a single source, such as using the heat supplied during the combustion process that drives an engine for other heating or cooling purposes.

Table of Contents

The following table sets out Honda's revenue from Power product and other businesses and the breakdown by geographical markets based on the location of the customer for the fiscal years ended March 31, 2014 and 2015:

	Fiscal years ended March 31, 2014		2015	
	Honda Group Unit Sales / Consolidated Unit Sales* Units (thousands)	Revenue Yen (billions)	Honda Group Unit Sales / Consolidated Unit Sales* Units (thousands)	Revenue Yen (billions)
Japan	314	¥ 85.8	338	¥ 82.1

Europe	1,031	64.1	1,091	67.5
Asia	1,485	40.3	1,382	40.6
Other Regions	469	24.4	467	24.5
Total	6,018	¥ 312.0	5,983	¥ 322.5
Power Product and Other businesses revenue as a percentage of total sales revenue		2%		2%

* Honda Group Unit Sales is the total unit sales of completed products of Honda, its consolidated subsidiaries and its affiliates and joint ventures accounted for using the equity method. Consolidated Unit Sales is the total unit sales of completed products corresponding to consolidated sales revenue to external customers, which consists of unit sales of completed products of Honda and its consolidated subsidiaries. In Power product business, there is no discrepancy between Honda Group Unit Sales and Consolidated Unit Sales since no affiliate and joint venture accounted for using the equity method was involved in the sale of Honda power products.

For further information on recent operations and a financial review of the Power product and other businesses, see **Operating Results** in **Item 5. Operating and Financial Review and Prospects**.

Marketing and Distribution

Most of Honda's products are distributed under the Honda trademarks in Japan and/or in overseas markets.

Sales in Japan

Sales of Honda motorcycles, automobiles, and power products in Japan are made through different distribution networks. Honda's products are sold to consumers primarily by independent retail dealers throughout Japan.

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

Motorcycles are distributed through approximately 5,900 outlets, including approximately 600 PRO S shops and approximately 110 Honda Dream authorized dealerships.

As for the automobile distribution network, at present, approximately 720 retail dealers operate approximately 2,210 shops and sell models including the *Accord Hybrid*, *Accord Plug-in Hybrid*, *CR-Z*, *GRACE Hybrid*, *Fit*, *Fit Hybrid*, *Fit Shuttle*, *Fit Shuttle Hybrid*, *FREED*, *FREED Hybrid*, *FREED SPIKE*, *FREED SPIKE Hybrid*, *JADE Hybrid*, *LEGEND Hybrid*, *Stream*, *CR-V*, *Odyssey*, *Step WGN*, *VEZEL*, *VEZEL Hybrid*, *Acty*, *Life*, *N-BOX*, *N-BOX +*, *N-BOX SLASH*, *N-ONE*, *N-WGN*, and *Vamos*.

Power products are distributed in Japan to approximately 1,000 retail dealers throughout Japan, including affiliates of Honda. A number of small engines are also sold to other manufacturers for use in their products.

Table of Contents

Service and Parts Related Operations in Japan

Sales of spare parts and after sales services are mainly provided through retail dealers. Training programs on automobile service technicians are provided for dealers regularly by Regional Operations (Japan).

Overseas Sales

In fiscal 2015, approximately 97% of Honda's overseas sales were made through its principal foreign sales subsidiaries, which distribute Honda's products to local wholesalers and retail dealers.

In the United States, Honda markets its products through a sales network of approximately 1,040 independent local dealers for motorcycles, approximately 1,310 for automobiles and approximately 8,200 for power products. Many of the motorcycle dealers and some of the automobile dealers also sell Honda's power products. In 1986, Honda opened the first Acura automobile dealerships in the United States. The Acura network in the United States totaled approximately 270 dealerships at the end of fiscal 2015. The Acura network offers *ILX*, *MDX*, *RDX*, *RLX* and *TLX* models.

With regard to exports from North America, Honda is currently exporting such North American-built models as the *Accord*, *Civic*, *CR-V*, *Crosstour*, *Fit*, *Odyssey*, *Pilot*, *Ridgeline*, *Acura ILX*, *Acura MDX*, *Acura RDX* and *Acura TLX* to other markets. In fiscal 2015, Honda exported approximately 52,000 units from North America to 49 countries throughout the world.

In Europe, Honda's products are distributed through approximately 1,450 independent local dealers for motorcycles, approximately 1,200 for automobiles and approximately 2,770* for power products.

* Total number represents dealers in 13 countries which fall under the management of Honda foreign sales subsidiaries in the region.

In Asia, Honda's products are distributed through approximately 14,780 independent local dealers for motorcycles, approximately 1,710 for automobiles and approximately 3,900* for power products.

* Total number represents dealers in seven countries where Honda has foreign sales subsidiaries.

The Company exports motorcycle components to 13 countries, including Thailand, Indonesia and Brazil, where motorcycles are manufactured by its subsidiaries, joint venture firms and licensees. Some of the components used in the production of these vehicles are supplied locally.

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

The Company exports automobile components to 15 countries, including China, the United States and India, where automobiles are manufactured by its subsidiaries, joint venture firms and licensees. Some of the components used in the production of these vehicles are supplied locally.

The Company also exports power product components to four countries, including India, China and France, where power products are manufactured by its subsidiaries, joint venture firms and licensees. Some of the components used in the production of these products are supplied locally.

Service and Parts Related Operations Overseas

Honda provides its overseas operations, joint venture firms, independent distributors and licensees with spare parts and necessary technical information, which they in turn supply to wholesale or retail dealers, either directly or through one or more spare parts distributors.

Components and Parts, Raw Materials and Sources of Supply

Honda manufactures the major components and parts used in its products, including engines, frames and transmissions. Other components and parts, such as shock absorbers, electrical equipment and tires, are

Table of Contents

purchased from numerous suppliers. The principal raw materials used by Honda are steel plate, aluminum, special steels, steel tubes, paints, plastics and zinc, which are purchased from several suppliers. The most important raw material purchased is steel plate, accounting for approximately 42% of Honda's total purchases of raw materials.

No single supplier accounted for more than 5% of the Company's purchases of major components and parts and principal raw materials during the fiscal year ended March 31, 2015.

Ordinarily, Honda does not have and does not anticipate having any difficulty in obtaining its required materials from suppliers and considers its contracts and business relations with the suppliers to be satisfactory. The Company does not believe any of its Japanese domestic suppliers are substantially more dependent on foreign suppliers than Japanese suppliers generally. However, it should be noted that Japanese industry in general is heavily dependent on foreign suppliers for substantially all of its raw materials.

Seasonality

Honda's Motorcycle and Power product businesses have historically experienced some seasonality. However, this seasonality has not generally been material to our financial results.

Environmental and Safety Regulation

Honda is subject to various government regulations, including environmental and safety regulations for automobiles, motorcycles and power products. Such regulations relate to items such as emissions, fuel economy, recycling and safety and have had, and are expected to continue to have, material effects on Honda's business. Honda has incurred significant compliance and other costs in connection with such regulations and will incur future compliance and other costs for new and upcoming regulations. Relevant environmental and safety regulations are described below.

Outline of Environmental and Safety Regulation for Automobiles

1. Emissions

Japan

In March 2008, to strengthen the enforcement of laws, the 2009 Exhaust Emission Standards were created after the passage of long-term regulation. Long-term targets for gasoline vehicles remained unchanged except those for direct injection gasoline vehicles, which were also required to meet the particulate matter (PM) standard. New long-term emissions targets for diesel vehicles were lowered by more than 60% from the 2005 level of nitrogen oxides (NOx) and PM standards.

In 2010, the Central Environmental Council in the Ministry of Environment reviewed the current JC08 mode for emission testing and began to consider the introduction of the Worldwide harmonized Light vehicle Test Procedure (WLTP). In 2015, the Central Environmental Council of Ministry of Environment decided to introduce WLTP.

The United States

Increasingly stringent emission regulations under the Clean Air Act have been enacted since the 1990s by the U.S. federal government.

Under the Clean Air Act, the State of California is permitted to establish its own emission control standards to the extent they are more stringent than federal standards. Pursuant to this authority, the California Air Resources Board (CARB) adopted the California Low Emission Vehicle Program in 1990, aiming to establish the strictest emission regulation in the world.

Table of Contents

In March 2009, the CARB finalized the Zero Emission Vehicle (ZEV) regulation to require 7,500 Fuel Cell Vehicles (FCV) in the entire industry instead of the previous requirement of 2,500 FCV. In addition, manufacturers were required to sell a significant number of Enhanced Advanced Technology Partial Zero Emission Vehicles (Enhanced AT-PZEV) in the market after the 2012 model year.

In August 2012, the CARB issued the Advanced Clean Car package of regulations, which included amendments to the California Low Emission Vehicle Program III (LEV III) and ZEV regulations. The LEV III regulation, which applies to 2015 and subsequent model years, tightened limits on emissions and evaporative emissions. The ZEV regulation was revised so that requirements could be satisfied by TZEV (formerly, Enhanced AT-PZEV) and ZEV alone for 2018 and subsequent model years. Also, for 2018 and subsequent model years, the credit value eligible for each ZEV category was decreased drastically, which consequently increases the required sales volume dramatically. The BEVx category, which includes battery electric vehicles with auxiliary power units, was also added as a ZEV category. Currently, many states have adopted California LEV III and ZEV regulations.

In March 2014, the Environmental Protection Agency (EPA) finalized Tier 3 regulation, the federal emission and fuel standards. Tier 3 requires gasoline fuels at pump to have an average sulfur content of 10 parts-per-million, which is already implemented in Europe and Japan. It also sets exhaust and evaporative emission standards equivalent to California LEV III. In other words, it enables auto manufacturers to sell some of the same vehicles they sell in California in states that have not adopted LEV III.

In September 2014, the CARB issued an Initial Statement Of Reasons for rulemaking (ISOR), proposing to amend the current LEV III regulation in order to align its standards further with the finalized federal Tier 3 regulation.

Europe

In 2005, the European Union created new emission standards (Euro 5 and Euro 6) and comprehensive requirements for gasoline vehicles and diesel vehicles. Euro 5 was implemented in September 2009. Emission limits for gasoline vehicles and diesel vehicles were further lowered compared to the Euro 4 level for hydro-carbons (HC), NOx and PM. PM mass emission standards shall apply only to vehicles with direct injection engines.

Additionally, Euro 5 required limits on particle number emissions from diesel vehicles, and implemented new test measurements for PM mass emissions from gasoline vehicles with direct injection engines and diesel vehicles on and after September 2011.

The Euro 6 regulation was implemented in September 2014. Emission limits for diesel vehicles will be lowered even more than the Euro 5 levels for NOx and THC plus NOx. Additionally, Euro 6 required limits on particle numbers from gasoline vehicles with direct injection engines. The required ethanol density of test fuel will also be increased, starting from September 2016.

The European Commission proposed the implementation of new WLTP in September 2017.

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

The European Commission also proposed the implementation of the Real Driving Emissions (RDE) monitoring phase to be starting from January 2016.

Russia

The Euro 4 regulation has been in effect from January 2010. Additionally, the Euro 5 regulation was implemented in January 2014.

Table of Contents

China

China adopted Step 3 and Step 4 emission regulations for light-duty vehicles in 2005. These regulations are similar to European regulations (such as Euro 3 and Euro 4). Step 3 was implemented in 2007 and Step 4 was implemented in July 2010. In addition, China has promulgated rules to implement Step 5 emission regulations in 2018, based on Euro 5.

In the city of Beijing, Step 4 was implemented in March 2008 and Step 5 was implemented in February 2013. In addition, the city of Beijing is considering the introduction of Step 6 emission regulations in 2017.

Other Regions

Several other Asian countries have adopted regulations which are similar to the European regulations (such as Euro 2 and Euro 3). Some of these countries are considering the introduction of Euro 4, Euro 5 and Euro 6.

Australia implemented Euro 5-equivalent regulations in November 2013. In addition, Australia introduced Euro 6-equivalent regulations from July 2017.

2. Fuel Economy / CO₂

Japan

In 2005, discussions about the POST-2010 standard took place among the applicable ministries and industries. In February 2007, the final POST-2010 target, or the 2015 standard, was announced. Fuel consumption will be reduced by 29.2% compared to the 2010 target for passenger cars.

In June 2010, the Ministry of Land, Infrastructure and Transport (MLIT) and the Ministry of Economy, Trade and Industry (METI) set out a committee, respectively, and jointly commenced a study to formulate new fuel economy standards for passenger motor vehicles for 2020. The new standards were announced in March 2013. The next term fuel economy standards improve the 2015 standards by 19.6% and adopt the Corporate Average Fuel Economy (CAFE) calculation method.

Fuel specifications for E10 fuel, which is gasoline blended with 10% ethanol, were revised and included in the April 2012 announcement setting forth the details of safety standards under the Road Transport Vehicle Law. Ethanol blended fuel is a biomass fuel. Biomass fuel is regarded as an effective countermeasure for CO₂ reduction. CO₂ emissions after burning ethanol fuel produced with biomass resources (such as plants or wood) are not counted as CO₂ emissions under the Kyoto Protocol.

In 2015, MLIT and METI are examining the new fuel economy standards for small commercial vehicles.

The United States

The Federal Motor Vehicle Information and Cost Savings Act requires automobile manufacturers to comply with the CAFE standards. Under the CAFE standards, manufacturers are subject to substantial penalties if automobiles produced by them in any model year do not meet the average standards for each category.

In March 2009, the National Highway Traffic Safety Administration (NHTSA) issued the CAFE regulation standard for passenger cars and light trucks for the 2011 model year. The CAFE standard calculation of passenger cars and light trucks for the 2011 model year use a footprint prescribed in the CAFE regulation issued in 2006. The industry-wide combined average for the 2011 model year was estimated to be 27.3 mpg.

The EPA and the NHTSA jointly finalized the U.S. federal Green House Gas (GHG) regulation from the 2012 model year in accordance with President Obama's announcement. The standard for the 2016 model year is 250 g-CO₂/mile, or a 35.5 mpg industry average. In addition, a manufacturer is also deemed to comply with CARB GHG regulation if the manufacturer complies with EPA-GHG, based on an agreement among the White House, the CARB and the industry.

Table of Contents

In March 2008, the EPA denied California's GHG regulation waiver request. On January 26, 2009, President Obama announced that he had directed the EPA to review California's waiver request. The EPA approved the waiver on July 8, 2009 because the CARB promised that a manufacturer was also deemed to comply with CARB GHG regulation if the manufacturer complied with EPA-GHG from the 2012 through 2016 model years.

On May 21, 2010, President Obama ordered the NHTSA and the EPA to extend the National Program for cars and light-duty trucks to the 2017 model year and beyond with the support of the CARB. On October 1, 2010, the NHTSA, the EPA, and the CARB gave the notice of their intent to conduct joint rulemaking to establish 2017 and later model year fuel economy and greenhouse gas standards. The NHTSA and EPA issued a regulation on August 2012 regarding GHG / CAFE regulations from the 2017 through 2025 model years. The standard for the 2025 model year is 163 g-CO₂/mile or a 54.5 mpg industry average. The CARB also issued a regulation that is almost equivalent to the EPA's GHG regulations on August 2012. On December 2012, the CARB amended its GHG regulation so that a manufacturer is also deemed to comply with CARB GHG regulations if it complies with EPA-GHG from the 2017 through 2025 model years.

Europe

In 2008, the European parliament adopted CO₂ regulations in response to concerns related to possible global climate changes. The adopted CO₂ regulations were published by the Official Journal in June 2009.

Pursuant to the CO₂ regulations, the European Commission set a more stringent target of 130 grams of carbon dioxide per kilometer for new passenger cars offered for sale in the EU from 2012. In addition, the CO₂ regulations provided manufacturers with the necessary incentive to reduce the CO₂ emissions of their vehicles by imposing an excess emissions premium if their average emission levels are above the limit value curve. This premium is based on the number of grams per kilometer (g/km) that an average vehicle sold by the manufacturer exceeding the limit imposed by the curve, multiplied by the number of vehicles sold by the manufacturer.

In 2014, a new regulation was issued, requiring more stringent regulation that targets 95 g/km of CO₂ for 2020.

The European Commission is planning to replace the current European type-approval procedure for fuel consumption and CO₂ emissions of cars based on NEDC with new World Light duty Test Cycle (WLTC) and WLTP in 2017.

China

China adopted a fuel consumption regulation for passenger vehicles in 2004. Step 1 of this regulation was implemented in 2005, Step 2 was implemented in 2008 and Step 3 was implemented in 2012. In addition, China will implement Step 4 in 2016.

Other Regions

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

India has promulgated rules to introduce fuel economy / CO₂ regulations in 2015 and 2020 in a phased manner.

Australia is considering introducing fuel economy / CO₂ regulations.

Taiwan introduced corporate average fuel consumption regulations.

Mexico finalized rules in June 2013 to introduce fuel economy / CO₂ regulations for the 2014 through 2016 model years.

Table of Contents

3. Recycling / End-of-Life Vehicles (ELV) / REACH

Japan

Japan enacted the Automobile Recycling Law in July 2002, which required manufacturers to take back air bags, fluorocarbon and shredder residue derived from end-of-life vehicles (ELV), which became effective on January 1, 2005. ELV processing costs are collected from owners of cars currently in use and purchasers of new cars.

Europe

On December 30, 2006, the European Union adopted the Regulation concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH), which became effective on June 1, 2007. From June 1, 2008, any manufacturer or importer of chemical substances is required to submit a registration to the European Chemicals Agency, based on annual production or import quantity levels. Submitting a pre-registration between June 1 and December 1, 2008 will allow the manufacturer or importer to extend the deadline for submitting the registration for existing chemical substances. The list of Substances of Very High Concern (SVHC) is amended periodically to include new substances. Currently, 73 substances are in the SVHC list. Upon a request by a consumer, a supplier of a product containing SVHC must provide the consumer with sufficient information, including at least the name of the substance, within 45 days.

On February 18, 2011, the first set of substances which require authorization for use after specified dates were announced. Manufacturers using these substances in Europe must either be authorized for use after submitting an application or use substitute substances. Substances which require authorization will be added periodically. Currently, 14 substances require authorization.

Other Regions

Taiwan and Korea implemented automobile recycling laws on January 1, 2008, following the regulations established by the European Union and Japan. Turkey also implemented automobile recycling laws on December 12, 2010, following the regulations established by the European Union. In addition, China, Vietnam, India and Russia each have a plan to implement automobile recycling laws in the near future.

4. Safety

Japan

In November 2007, the MLIT issued safety standards, which are applicable from July 1, 2012, for vehicles which use high voltage electric power such as electric vehicles or hybrid electric vehicles, to avoid electric shocks during normal operations and post-crash. Furthermore, in 2011, they have adopted Economic Commission for Europe (ECE) R100, which was amended to incorporate the Japanese electrical safety

standard.

Japan Automobile Standards Internationalization Center (JASIC), which is organized by the MLIT and Japan Automobile Manufacturers Association (JAMA), among others, has started to review a proposal for the unification of Safety/Environment Standards, vehicle categories and certification in order to promote further internationalization of standards and certifications. JASIC made the proposal to other contracting parties of the 58 / 98 Agreement in 2009 and aims at reaching an agreement among the contracting parties by 2015.

In January 2010, the MLIT started preparing a guideline for noise measurements regarding the danger of hybrid vehicles remaining silent and also started studying how to regulate this.

In March 2010, in a session of the World Forum for Harmonization of Vehicle Regulations (WP29) of the United Nations Economic Commission for Europe, Japan proposed the establishment of a mutual certification system of international vehicle type certifications, which was agreed upon.

Table of Contents

In March 2010, an accident in the United States caused by sudden unintended acceleration prompted the MLIT to consider introducing a brake-override system .

In May 2011, the MLIT introduced a pedestrian leg protection standard, adopting, for the first time in the world, a flexible leg impactor that features an improved biomechanism. The impactor has been made to match more similarly to the human body structure and its characteristics.

In August 2013, the MLIT adopted UN ECE R121, which regulates the location and identification of controls, tell-tales and indicators.

In November 2013, the MLIT adopted UN ECE R125, which regulates the front visibility of the motor vehicle driver.

In January 2015, the MLIT adopted UN ECE R21, which regulates the interior fittings.

In January 2015, the MLIT adopted UN ECE R127, which regulates the pedestrian safety performance.

The United States

In June 2008, the NHTSA issued a final rule to revise some performance requirements and phase-in compliance schedules in upgraded side impact occupant protection standards. For both the moving deformable barrier test and the oblique side pole impact test, manufacturers had to comply with the revised requirements for 20% of all vehicles produced by 2010, 40% by 2011, 60% by 2012, 80% by 2013 and 100% by 2014.

In May 2009, the NHTSA issued a final rule to upgrade the vehicle roof crush standard. The rule newly introduces the Two-sided Roof Test, which imposes strength tests for both sides of the vehicle roof and increases the maximum applied load. For vehicles with a gross vehicle weight rating (GVWR) of 2,722 kg or less, manufacturers must comply with the upgraded requirements for 25% of all vehicles produced by 2012, 50% by 2013, 75% by 2014, and 100% by 2015. For heavier vehicles, manufacturers must comply with the standards on and after September 2016.

In January 2011, the NHTSA issued a final rule to prevent the ejection of occupants in rollover accidents. The rule requires ejection mitigation countermeasure (e.g. advanced glazing or head protection side airbag) equipment which meet with performance requirements. Manufacturers must comply with the new requirements for 25% of all vehicles produced by 2013, 50% by 2014, 75% by 2015, 100% (with carryover credit) by 2016, and all vehicles by 2017.

In April 2012, the NHTSA issued a proposed regulation that mandates installation of a brake-throttle override system. This rule was proposed to take proper measures against the following problem: a vehicle cannot be effectively decelerated/stopped in the event that the accelerator pedal cannot return to its stationary position even after the foot is taken off the accelerator pedal, because of the floor mat being caught in the accelerator pedal or any failure in the accelerator pedal. Manufacturers must comply with the new requirements within two years from September 1 of the date of publication of the final rule.

In December 2012, the NHTSA issued a proposed regulation that mandates installation of an event data recorder (EDR) in vehicles. The purpose of this regulation is to allow for effective collision research as well as to share important data for the performance analysis of safety devices (e.g. advanced restraint devices) through the mandatory installation of EDRs. On or after September 2014, the NHTSA plans to require manufacturers to install EDRs which comply with specified performance requirements.

In January 2013, the NHTSA issued a proposed regulation that mandates installation of an approaching vehicle audible system. This regulation was established to reduce the number of collision accidents by letting pedestrians and bicycle riders be aware of approaching hybrid vehicles on electric drive or electric vehicles by sound. Manufacturers must comply with the new requirements for 30% of all vehicles produced by 2015, 60% by 2016, 90% by 2017, and all vehicles by 2018.

Table of Contents

In April, 2013, the NHTSA issued the first phase of these guidelines. The Phase 1 Guidelines cover original equipment (OE) in-vehicle (i.e., integrated) electronic devices that are operated by the driver through visual-manual means (i.e., the driver looks at a device, manipulates a device-related control with his or her hand, and/or watches for visual feedback from the device). The Phase 2 Guidelines will apply to portable and aftermarket devices that are operated through visual-manual means and will be based on the same general principles as the Phase 1 Guidelines.

In March 2014, the NHTSA issued a final rule for FMVSS No. 111, which requires that rear visibility technology be installed in all new vehicles weighing under 10,000 pounds. The purpose is to reduce death and injury resulting from incidents when the driver is backing up. Manufacturers must comply with the new requirements for 10% of all vehicles produced from May 2016 to April 2017, 40% from May 2017 to April 2018, and all vehicles on and after May 2018.

Europe

In February 2011, the United Nations issued a revised ECE regulation relating to the installation of lighting devices, requiring automatic switching of dipped-beam headlamps. For M1 and N1 vehicles, the dipped-beam headlamps shall be switched on and off automatically relative to the ambient light conditions, if a vehicle is equipped with daytime running lamps on and after January 30, 2015.

Legislation regarding a new system called eCall is under consideration in the EU and already implemented in the Customs Union, which is organized by Russia, Kazakhstan and Belarus. eCall is a system that can automatically transmit vehicle status (e.g., Supplemental Restraint System (SRS) deployment, location, direction and other information) to conventional infrastructures simultaneously with voice messages when accidents occur. Some relevant draft standards have been published in the EU. The effective date of the EU eCall for new vehicle types is scheduled for March 31, 2018. Final standards have already been published in the Customs Union. The effective date of eCall for the Customs Union (ERA-GLONASS) is on and after January 1, 2015 for new vehicle types and on and after January 1, 2017 for all vehicles.

China

Vehicle safety regulations in China were drafted with reference to the UNECE standards and cover almost the same matters as the UNECE standards. However, these regulations also include unique provisions which take into account the distinctive characteristics of the Chinese market environment and the rules differ from the latest UNECE standards. Future safety regulations are described as follows:

Newly published GB standards (Chinese national standards issued by the Standardization Administration of China) in 2014:

> General safety:

+ Identification for passenger cars and their parts

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

+ Requirements and measurement methods for forward visibility for drivers of motor vehicles

> Passive safety:

+ The protection of the occupants in the event of a frontal collision for motor vehicles

Newly established GB standards (not yet published);

+ Amendment to Prescription for installation of the external lighting and light-signaling devices for motor vehicles and their trailers

+ Amendment to Rear-marking plates for vehicles and their trailers

+ Photometric characteristics of front fog lamps for motor vehicles

+ Photometric characteristics of headlamps emitting symmetric passing beam and/or driving beam for motor vehicles

Table of Contents

+ Photometric characteristics of devices for the illumination of rear registration plates of motor vehicles and their trailers

+ Symbols for controls, indicators and tell-tales on motor vehicles

+ Light-duty vehicles-towing attachments

GB standards under development;

+ Test methods and requirements for the misuse of automotive airbag systems

+ Performance requirements and test methods of tire pressure monitoring systems for passenger cars

5. New Car Assessment Program (NCAP)

Programs that provide customers with assessments of car safety functions and promote the development of car safety by automobile manufacturers are conducted in countries such as the United States, Japan, Australia, the EU, Korea, China and Malaysia. The principal items assessed in these programs are passenger protection and braking power, which are typically assessed with stricter standards or criteria than those required by statute.

Outline of Environmental and Safety Regulation for Motorcycles

1. Emissions

Japan

Japan has emissions regulations for motorcycles applicable to all classes of engine displacement. Some aspects of these requirements, such as standards for hydro-carbon levels and durability, are stricter than the current European regulations, namely the Euro 3 regulations.

Japan is planning to implement Phase 3 emission requirements, which are similar to current standards because standards for hydro-carbon level are stricter than the next European regulations, namely the Euro 4 regulations. The Phase 3 emission will be issued by October 2016, and

introduce simultaneous application of the fuel evaporative gas regulation as well as mandatory installation of the On-Board Diagnostics (OBD) system.

The United States

Emissions regulations regarding off-road motorcycles and ATVs were introduced in 2006. In addition, the EPA adopted the current California emissions standards regarding on-road motorcycles on a national basis, two years behind the schedule of California. The EPA regulations include fuel permeation requirements rather than traditional evaporative emission standards. California issued new evaporative emission standards for off-road highway vehicle (ORHV) involving diurnal test and tip test. It will apply from the 2018 model year.

The EPA emission standard has strengthened the class III HC + NOx limit value to 0.8 g/km as of 2010 model year vehicles. As for greenhouse gases, reporting is mandated for each emission gas (CO₂ from 2011 model year, CH₄ from 2012 model year and N₂O from 2013 model year, respectively).

Europe

The EU has issued regulations to reform the Whole Vehicle Type Approval (WVTA) scheme in order to further enforce exhaust emissions following the Euro 4 and Euro 5 steps. Euro 4 requirements will apply to new type approved vehicles from January 2016 and will apply to all vehicles registered from January 2017. Euro 5 requirements will apply to new type approved vehicles from January 2020 and will apply to all vehicles registered from January 2021. The new requirements introduce not only mode emission gas restrictions but also evaporative emission, durability and OBD requirements. As for L1e category vehicles (mopeds), the Euro 4 requirements will apply to new type approved vehicles from 2017 and will apply to all vehicles registered from 2018 based on the WVTA amendment.

Table of Contents

Other Regions

Other countries, mainly in Asia, have implemented tighter emissions regulations based on European regulations.

Japan, China, Korea, and Singapore are considering new exhaust emission standards based on the next European WVTA.

In Brazil, the Worldwide-harmonized Motorcycle Test Cycle (WMTC) was introduced. The WMTC became effective from the beginning of 2014. Brazil introduced the WMTC durability requirement as of January 2014 and will introduce stricter emission limit and evaporative gas restrictions as of January 2016.

India has issued a new emission regulation called Bharat Stage IV (BS IV). It will apply to new motorcycles from April 2016, and will apply to all motorcycles registered from April 2017. India is also considering a BS V regulation, which will apply from 2020.

2. Recycling / REACH

Europe

The same REACH compliance required for motor vehicles is required for motorcycles.

Other Regions

Vietnam and India each have a plan to implement motorcycle recycling laws in the near future.

3. Safety

Japan

In November 2007, the MLIT issued safety standards which are applicable from July 1, 2012, for vehicles which use high voltage electric power such as electric vehicles or hybrid electric vehicles, to avoid electric shocks during normal operations and accidents. Further, in 2011, it adopted ECE R100, which was amended to incorporate the Japanese electrical safety standard.

The Japan Automobile Standards Internationalization Center (JASIC), which is organized by the MLIT and JAMA, among others, has started to review a proposal for the unification of Safety/Environment Standards, vehicle categories and certification in order to promote further internationalization of standards and certifications. JASIC made the proposal to other contracting parties of the 58 / 98 Agreement in 2009 and aims to reach an agreement among the contracting parties by 2015.

In February 2013, the MLIT established a homologation system for ultra-compact mobility vehicles. These are vehicles which are easy to maneuver in a small space compared to automobiles, have superior environmental performance and can be utilized as a means of simple mobility for 1 or 2 passengers in a regional area. The system permits ultra-compact mobility vehicles to be run on public roads by adding features pertaining to such vehicles and relaxing certain standards without degrading the safety or environmental performances of the vehicles.

Japan has implemented the EMC requirement (UNECE R10) as of August 1, 2011. The amended version (R10.04) will become applicable to new type vehicles from August 1, 2016 and to all vehicles from October 28, 2016.

Japan is also planning to adopt requirements for lighting devices (UN ECE R50) and symmetry front beams (UNECE R113) in 2015 and issued new standards for control/tell-tales (UNECE R60) applying to all motorcycles from July 1, 2017, and also issued new standards for advanced brake system (Anti-lock Brake System/Combined Brake System) applying to new type motorcycles from October 1, 2018, and to all motorcycles from October 1, 2021.

Table of Contents

The United States

The NHTSA adopted the global technical regulation for braking systems (GTR 3) into the federal standard (FMVSS 122) as part of standard harmonization activities. The new standard will be applicable to the vehicles produced on and after September 1, 2014.

The NHTSA amended the federal standard for lighting devices (FMVSS 108) to change visibility and other requirements, which became effective as of December 2012.

Europe

The EU has issued regulations to change the WVTA scheme in order to further enforce safety. The new safety regulations require advanced brake systems and functional safety and electrical safety requirements. The new EU WVTA (EU Regulation No. 168/2013) was published on March 2, 2013. This new system will become applicable to new type motorcycles from January 2016 and new type mopeds from January 2017.

The EU Commission finalized Delegated Regulations concerning environmental and propulsion unit performance (EU Regulation No. 134/2014), vehicle functional safety (EU Regulation No. 3/2014), vehicle construction and general requirements (EU Regulation No. 44/2014). The Implementing Regulation (EU Regulation No. 901/2014) was published on July 18, 2014 and the regulations established the new EU WVTA system.

The new WVTA system requires motorcycle manufacturers to make vehicle repair and maintenance information available through their websites.

Other regions

The Brazilian government issued a new regulation regarding anti-theft devices, which requires installations of an immobilizer and a vehicle tracking system on vehicles and motorcycles sold or registered from August 1, 2009. However, this regulation has not been implemented yet because the Prosecutors Office claimed it was unconstitutional and asked the courts to overturn it. Several amendments are scheduled to go into effect on the effective date (currently set for March 2016) in accordance with the phase-in application schedule, but the date of the actual implementation of this regulation is still unclear because of a court decision holding this regulation to be unconstitutional. Brazil issued a new standard concerning motorcycle braking based on the UN ECE Brake regulation (R78.03) as well as a new regulation mandating ABS/CBS installation.

The Gulf Cooperation Council (GCC) started the operation of a motorcycle certification system in July 2014.

Many Asian countries, such as India, Thailand, Indonesia, Malaysia, Korea and Vietnam, are introducing various regulations, regarding lighting, braking, and anti-theft, based on UN R (ECE) regulations.

Outline of Environmental and Safety Regulation for Power Products

1. Emissions

The United States

The EPA introduced more stringent exhaust standards and new evaporative emission standards for fuel tanks and fuel lines used in small non-road engines. The regulations applied starting in the 2011 model year for Class II engines (above 225 cc), in the 2012 model year for Class I engines (less than 225 cc and used in non-handheld applications) and generally in 2010 for handheld products. The EPA also adopted a more stringent level of emission standards for outboard and personal watercraft engines starting with the 2010 model year. This new regulation includes standards to control evaporative emissions for all vessels using marine spark-ignition engines.

Table of Contents

Canada

The Canadian federal government has introduced emissions regulations generally equivalent to the U.S. EPA regulations for outboard and personal watercraft engines from the 2012 model year. New regulations plan to include controls for evaporative emissions aligned with the EPA regulations.

China

An exhaust emission standard was introduced in China on March 1, 2011. Its requirements are based on the European exhaust emission regulations and are applicable to small spark-ignition engines for non-road mobile machinery with 19 kW or less. The phase 2 regulation with durability requirement has started from January 1, 2014. The phase 3 regulation is under discussion.

Europe

European Committee started to consider the stage 3 regulation. Its requirement will follow U.S. EPA phase 3 and the effective date will be 2018 or 2019.

Japan

The Japan Land Engine Manufacturers Association (LEMA) has implemented Phase 3 voluntary exhaust emission regulation from January 1, 2014. The requirements are consistent with U.S. EPA Phase 3 regulation.

India

The Ministry of Environment issued a revised regulation for emission/noise standards applicable to gasoline/kerosene engine generators. The exhaust emission limits are very stringent. In particular, the CO level limit is less than half the limit allowed by U.S. EPA Phase 3. The effective date is June 2015.

2. Recycling /RoHS / WEEE / REACH

Europe

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

The same REACH compliance required for motor vehicles is required for power products. In June 2011, the European Union Directive on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS) was wholly revised and most power products will be within its scope after 2019.

Other regions

Turkey and several Asian countries have adopted regulations which are similar to the European regulations (such as RoHS and WEEE).

3. Safety

Japan

The Institute of Agricultural Machinery amended the safety standard of backward speed requirements for walk-behind equipment from 3.6 km/h to 1.8 km/h, and the interpretation of splash protection guard requirements for brush cutters. New models have had to comply with the standard from April 2010 and all models will need to comply with it from April 2015.

The United States

Based on the Consumer Product Safety Improvement Act of 2008, walk-behind lawn mowers have had to comply with certificate requirements from November 11, 2008. The CPSC has enhanced the recall system by this Act.

Europe

The Machinery Directive was changed and a new directive has been effective from December 29, 2009. The main changes were to clarify the scope of the directive (for example, whether it covered partly completed

Table of Contents

machinery, such as engine units), add a concrete description of market surveys and create an obligation to establish a penalty description for member states.

China

The General Administration of Quality Supervision, Inspection and Quarantine (AQSIQ) has issued a draft safety regulation for spark-ignition engines including a wide variety of requirements such as machinery safety, thermal protection, electrical safety, and others. It is expected to come into force in 2014.

Preparing for the Future

Honda aims to achieve global growth by further encouraging and strengthening innovation as well as creating quality products that please the customers and exceed their expectations.

Honda will focus all its energies on the tasks set out below as it pursues the vision toward 2020 of providing good products to customers with speed, affordability and low CO₂ emissions .

1. Product Quality

Honda will strive to improve its product quality by verification within each development, purchasing, production, sales and service department, along with integrated verification through coordination among those departments.

2. Research and Development

Honda will continue to be innovative in advanced technology and products, aiming to create and introduce new value-added products to quickly respond to specific needs in various markets around the world, in addition to its efforts to develop the most effective safety and environmental technologies. Honda will also continue its efforts to conduct research on experimental technologies for the future.

3. Production Efficiency

Honda will strengthen its production systems at its global production bases and supply high-quality products flexibly and efficiently, with the aim of meeting the needs of its customers in each region. Honda will work at improving its global supply chain by devising more effective business continuity plans in order to respond to various risks including but not limited to natural disasters.

4. Sales Efficiency

Honda will remain proactive in its efforts to expand product lines and the innovative use of IT to show its continued commitment to different customers throughout the world by upgrading its sales and service structure.

5. Safety Technologies

Honda is working to develop safety technologies that enhance accident prediction and prevention, technologies to help reduce the risk of injuries to passengers and pedestrians from car accidents and technologies that enhance compatibility between large and small vehicles, as well as expand its lineup of products incorporating such technologies. Honda will reinforce and continue to advance its contribution to traffic safety in Japan and motorized societies abroad. Honda also intends to remain active in a variety of traffic safety programs, including advanced driving and motorcycling training programs provided by local dealerships.

6. The Environment

Honda will step up its efforts to create better, cleaner and more fuel-efficient engine technologies and to further improve recyclables throughout its product lines as well as further promote the development of fuel cells. Honda has now set a target to reduce CO₂ emissions from its global products by 30% by 2020 compared to year

Table of Contents

2000 levels. Honda will strengthen its efforts to realize reductions in CO₂ emissions through its entire corporate activities including production and its supply chain. Furthermore, Honda will strengthen its efforts in advancing technologies in the area of total energy management, to reduce CO₂ emissions related to mobility and people's everyday lives.

7. Continuing to Enhance Honda's Social Reputation and Communication with the Community

In addition to continuing to provide products incorporating Honda's advanced safety and environmental technologies, Honda will continue striving to enhance its social reputation by, among other things, strengthening its corporate governance, compliance and risk management as well as participating in community activities and making philanthropic contributions.

Through these company-wide activities, Honda will strive to be a company that its shareholders, investors, customers and society want it to exist.

C. Organizational Structure

As of March 31, 2015, the Company had 91 Japanese subsidiaries and 281 overseas subsidiaries. The following table sets out for each of the Company's principal subsidiaries, the country of incorporation, function and percentage ownership and voting interest held by Honda.

Company	Country of Incorporation	Function	Percentage Ownership and Voting Interest
Honda R&D Co., Ltd.	Japan	Research & Development	100.0
Honda Engineering Co., Ltd.	Japan	Manufacturing and Sales of machine tools, equipment and production techniques	100.0
Yachiyo Industry Co., Ltd.	Japan	Manufacturing	50.5

D. Property, Plants and Equipment

The following table sets out information, as of March 31, 2015, with respect to Honda's principal manufacturing facilities, all of which are owned by Honda:

Location	Number of Employees	Principal Products Manufactured
Sayama, Saitama, Japan	4,911	Automobiles
Naka-ku, Hamamatsu, Shizuoka, Japan	2,233	Power products and transmissions
Suzuka, Mie, Japan	6,275	Automobiles
Ozu-machi, Kikuchi-gun, Kumamoto, Japan	2,569	Motorcycles, all-terrain vehicles, power products and engines
Yokkaichi, Mie, Japan	626	Automobiles
Burlington, North Carolina, U.S.A.	69	Aero engines
Marysville, Ohio, U.S.A.	4,920	Automobiles
Anna, Ohio, U.S.A.	2,478	Engines
East Liberty, Ohio, U.S.A.	2,060	Automobiles
Lincoln, Alabama, U.S.A.	4,869	Automobiles and engines
Greensburg, Indiana, U.S.A.	2,208	Automobiles
Alliston, Canada	4,100	Automobiles and engines
El Salto, Mexico	2,472	Motorcycles and automobiles
Celaya, Mexico	3,644	Automobiles
Swindon, U.K.	2,760	Automobiles and engines
Gebze, Turkey	746	Motorcycles and automobiles
Guangzhou, China	932	Automobiles
Gurgaon, India	3,436	Motorcycles
Greater Noida, India	2,305	Automobiles

Table of Contents

Location	Number of Employees	Principal Products Manufactured
Alwar, India	2,223	Motorcycles and automobiles
Narasapura, India	1,355	Motorcycles
Karawang, Indonesia	2,305	Automobiles and engines
Melaka, Malaysia	2,353	Automobiles
Ayutthaya, Thailand	3,928	Automobiles
Bangkok, Thailand	3,581	Motorcycles and power products
Phuc Yen, Vietnam	4,005	Motorcycles and automobiles
Duy Tien, Vietnam	233	Motorcycles
Buenos Aires, Argentina	1,184	Motorcycles and automobiles
Sumare, Brazil	3,343	Automobiles
Manaus, Brazil	7,149	Motorcycles and power products

In addition to its manufacturing facilities, the Company's properties in Japan include sales offices and other sales facilities in major cities, repair service facilities, and R&D facilities.

As of March 31, 2015, the Company's property, with a net book value of approximately ¥76.0 billion, was subject to specific mortgages securing indebtedness.

Capital Expenditures

Capital expenditures in the fiscal year ended March 31, 2015 were applied to the introduction of new models, as well as the improvement, streamlining and modernization of production facilities, and improvement of sales and R&D facilities.

Total capital expenditures for the year amounted to ¥2,334.9 billion, increased by ¥378.2 billion from the previous year. Also, total capital expenditures, excluding equipment on operating leases, for the year amounted to ¥653.8 billion, decreased by ¥92.2 billion from the previous year. Spending by business segment is shown below.

	Fiscal years ended March 31,		
	2014	2015	Increase (Decrease)
	Yen (millions)		
Motorcycle Business	¥ 55,394	¥ 68,171	¥ 12,777
Automobile Business	673,038	573,312	(99,726)
Financial Services Business	1,211,152	1,681,610	470,458
Financial Services Business (Excluding Equipment on Operating Leases)	473	432	(41)
Power Product and Other Businesses	17,146	11,896	(5,250)
Total	¥ 1,956,730	¥ 2,334,989	¥ 378,259
Total (Excluding Equipment on Operating Leases)	¥ 746,051	¥ 653,811	¥ (92,240)

Intangible assets are not included in the table above.

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

In Motorcycle business, we made capital expenditures of ¥68,171 million in the fiscal year ended March 31, 2015. Funds were allocated to the introduction of new models, as well as the improvement, streamlining and modernization of production facilities, and improvement of sales and R&D facilities.

In Automobile business, we made capital expenditures of ¥573,312 million in the fiscal year ended March 31, 2015. Funds were allocated to the introduction of new models, as well as the improvement, streamlining and modernization of production facilities, and improvement of sales and R&D facilities.

Table of Contents

In Financial services business, capital expenditures excluding equipment on operating leases amounted to ¥432 million in the fiscal year ended March 31, 2015, while capital expenditures for equipment on operating leases were ¥1,681,178 million. Capital expenditures in Power products and other businesses in the fiscal year ended March 31, 2015, totaling ¥11,896 million, were deployed to upgrade, streamline, and modernize manufacturing facilities for power products, and to improve R&D facilities for power products.

Plans after fiscal 2015

Our management mainly considers economic trends of each region, demand trends, situation of competitors and our business strategy such as introduction plans of new models in determining the future of projects.

The estimated amounts of capital expenditures for the fiscal year ending March 31, 2016 are shown below.

	Fiscal year ending March 31, 2016 Yen (millions)
Motorcycle Business	¥ 68,900
Automobile Business	585,400
Financial Services Business	500
Power Product and Other Businesses	15,200
Total	¥ 670,000

The estimated amount of capital expenditures for Financial services business in the above table does not include equipment on operating leases.

Intangible assets are not included in the table above.

Item 4A. Unresolved Staff Comments

We do not have any unresolved written comments provided by the staff of the SEC regarding our periodic reports under the Securities and Exchange Act of 1934.

Item 5. Operating and Financial Review and Prospects

You should read the following discussion of our critical accounting policies and our financial positions and operating results together with our consolidated financial statements included in this Annual Report.

In the fiscal year ended March 31, 2015, we changed the basis of the accounting principles used to prepare our consolidated financial statements from U.S. GAAP to IFRS. Accordingly, the consolidated financial statements of the Company in this Annual Report have been prepared in accordance with IFRS, as issued by IASB. An explanation of how the transition to IFRS has affected our consolidated financial statements is provided in note (31) Explanation of Transition to IFRS to the accompanying consolidated financial statements.

A. Operating Results

Overview

Business Environment

With respect to the economic environment, the United States experienced a gradual recovery in business conditions, mainly due to an improving jobs market, along with firm growth in housing investment and personal consumption. In Europe, economic activity returned to a recovery path, mainly due to gradual improvement in

Table of Contents

employment conditions. In the Asian economies, India saw an economic upturn, while China grew at a more gradual pace. Indonesia experienced a slower pace of expansion, while Thailand's economy weakened. In Japan, economic performance was sluggish, mainly due to weak personal consumption, despite an improving employment picture.

The trends, uncertainties, demands, commitments and events identified below may continue or recur, impacting the Company's future financial results.

Overview of Fiscal Year 2015 Operating Performance

Honda's consolidated sales revenue for the fiscal year ended March 31, 2015 increased from the fiscal year ended March 31, 2014, due mainly to increased sales revenue in Motorcycle business operations as well as favorable foreign currency translation effects. Operating profit decreased from the previous fiscal year, due mainly to an increase in selling, general and administrative expenses including product warranty expenses, which was partially offset by continuing cost reduction as well as positive foreign currency translation effects.

Motorcycle Business

Honda's consolidated unit sales of motorcycles and all-terrain vehicles (ATVs) in fiscal year 2015 totaled 10,725 thousand units, up 3.8% from the previous fiscal year, largely influenced by an increase in consolidated unit sales in India and Vietnam.

Automobile Business

Honda's consolidated unit sales of automobiles totaled 3,513 thousand units in fiscal year 2015, down 0.5% from the previous fiscal year, due mainly to a unit sales decline in Japan and Thailand, where market conditions were unfavorable. This was despite an increase in unit sales, primarily in Indonesia and India, due to the launch of new automobile models.

Power Product and Other Businesses

Honda's consolidated unit sales of power products totaled 5,983 thousand units in fiscal year 2015, down 0.6% from the previous fiscal year, due mainly to a decrease in sales, primarily in Asia.

Fiscal Year 2015 Compared with Fiscal Year 2014

Sales Revenue

Honda's consolidated sales revenue for the fiscal year ended March 31, 2015, increased by ¥822.0 billion, or 6.6%, to ¥13,328.0 billion from the fiscal year ended March 31, 2014, due mainly to increased sales revenue in the Motorcycle business operations as well as positive foreign currency translation effects. Honda estimates that by applying Japanese yen exchange rates of the previous fiscal year to the current fiscal year, sales revenue for the year would have increased by approximately ¥67.3 billion, or 0.5%, compared to the increase as reported of ¥822.0 billion, which includes positive foreign currency translation effects.

Operating Costs and Expenses

Operating costs and expenses increased by ¥975.2 billion, or 8.3%, to ¥12,657.4 billion from the previous fiscal year. Cost of sales increased by ¥740.2 billion, or 7.7%, to ¥10,330.7 billion from the previous fiscal year, due mainly to an increase in costs attributable to increased consolidated unit sales in the Motorcycle business, and negative foreign currency effects. Selling, general and administrative expenses increased by ¥227.2 billion, or 15.2%, to ¥1,720.5 billion from the previous fiscal year, due mainly to increased product warranty expenses. Product warranty expenses include expenses related to airbag inflators. Research and development expenses increased by ¥7.7 billion, or 1.3%, to ¥606.1 billion from the previous fiscal year.

Table of Contents

Operating Profit

Operating profit decreased by ¥153.2 billion, or 18.6%, to ¥670.6 billion from the previous fiscal year, due mainly to an increase in selling, general and administrative expenses including product warranty expenses, which was partially offset by continuing cost reduction as well as positive foreign currency translation effects. Honda estimates that by excluding positive foreign currency effects of approximately ¥80.5 billion, operating profit would have decreased by approximately ¥233.7 billion.

With respect to the discussion above of the changes, management identified factors and used what it believes to be a reasonable method to analyze the respective changes in such factors. Management analyzed changes in these factors at the levels of the Company and its material consolidated subsidiaries. Foreign currency effects consist of translation adjustments, which come from the translation of the currency of foreign subsidiaries financial statements into Japanese yen, and foreign currency adjustments, which result from foreign-currency-denominated sales. With respect to foreign currency adjustments, management analyzed foreign currency adjustments primarily related to the following currencies: U.S. dollar, Euro, Japanese yen and others at the level of the Company and its material consolidated subsidiaries.

Profit before Income Taxes

Profit before income taxes decreased by ¥127.6 billion, or 13.7%, to ¥806.2 billion. The main factors behind this decrease, except factors relating to operating profit, are as follows:

Share of profit of investments accounted for using the equity method had a negative impact of ¥34.8 billion, due mainly to a recognition of impairment loss on certain investments in affiliates and a decrease in profit attributable to decreased sales revenue at affiliates and joint ventures in Asia.

Finance income and finance costs had a positive impact of ¥60.4 billion, due mainly to an increase in gains on foreign exchange. For further details, see note (22) Finance Income and Finance Costs to the accompanying consolidated financial statements.

Income Tax Expense

Income tax expense decreased by ¥22.8 billion, or 8.5%, to ¥245.1 billion from the previous fiscal year. The average effective tax rate increased 1.7 percentage points to 30.4% from the previous fiscal year. For further details, see (a) Income Tax Expense of note (23) Income Taxes to the accompanying consolidated financial statements.

Profit for the Year

Profit for the year decreased by ¥104.8 billion, or 15.7%, to ¥561.0 billion from the previous fiscal year.

Profit for the Year Attributable to Owners of the Parent

Profit for the year attributable to owners of the parent decreased by ¥115.2 billion, or 18.5%, to ¥509.4 billion from the previous fiscal year.

Profit for the Year Attributable to Non-controlling Interests

Profit for the year attributable to non-controlling interests increased by ¥10.4 billion, or 25.4%, to ¥51.6 billion from the previous fiscal year, due mainly to an increase in profit for the year of the subsidiaries in Asia which have non-controlling interests.

Table of Contents

Business Segments

Motorcycle Business

Honda's consolidated unit sales of motorcycles and all-terrain vehicles (ATVs) totaled 10,725 thousand units, increased by 3.8% from the previous fiscal year, due mainly to an increase in consolidated unit sales in Asia.

Sales revenue from external customers increased by ¥157.4 billion, or 9.3%, to ¥1,846.6 billion from the previous fiscal year, due mainly to increased consolidated unit sales and positive foreign currency translation effects. The impact of price changes was immaterial. Honda estimates that by applying Japanese yen exchange rates of the previous fiscal year to the current fiscal year, sales revenue for the year would have increased by approximately ¥70.8 billion, or 4.2%, compared to the increase as reported of ¥157.4 billion, which includes positive foreign currency translation effects.

Operating costs and expenses increased by ¥142.1 billion, or 9.4%, to ¥1,654.5 billion from the previous fiscal year. Cost of sales increased by ¥114.4 billion, or 9.3%, to ¥1,342.8 billion, due mainly to an increase in costs attributable to increased consolidated unit sales and negative foreign currency effects. Selling, general and administrative expenses increased by ¥20.3 billion, or 9.5%, to ¥233.8 billion, due mainly to an increase in selling expenses attributable to increased consolidated unit sales and negative foreign currency effects. Research and development expenses increased by ¥7.3 billion, or 10.5%, to ¥77.7 billion.

Operating profit increased by ¥15.2 billion, or 8.6%, to ¥192.1 billion from the previous fiscal year, due mainly to an increase in profit attributable to increased sales revenue and positive foreign currency effects, which was partially offset by increased selling, general and administrative expenses.

Japan

Total industry demand for motorcycles in Japan* was approximately 420 thousand units in fiscal year 2015, a decrease of approximately 12% from the previous fiscal year.

Honda's consolidated unit sales in Japan in fiscal year 2015 totaled 199 thousand units, down 11.9% from the previous fiscal year, despite the positive effects derived from the launch of the *TACT* 50cc scooter and other models, which was more than offset by a decline in unit sales of other scooter models.

* Source: JAMA (Japan Automobile Manufacturers Association)

North America

Total demand for motorcycles and all-terrain vehicles (ATVs) in the United States*, the principal market within North America, increased around 3% from the previous year to approximately 710 thousand units in calendar year 2014.

Honda's consolidated unit sales in North America increased 2.9% from the previous fiscal year to 286 thousand units in fiscal year 2015. This was mainly due to steady sales of the *GROM* sports motorcycle, along with the introduction of the *CBR650F*, *CB300* and *CBR300*, primarily in the United States.

* Source: MIC (Motorcycle Industry Council)

Europe

Total demand for motorcycles in Europe* increased around 7% from the previous year to approximately 740 thousand units in calendar year 2014.

Table of Contents

Honda's consolidated unit sales in Europe increased 15.1% from the previous fiscal year to 191 thousand units in fiscal year 2015, mostly as a result of the introduction of the *CB650F*, *CBR650F* and full model changes of the *NC* series.

* Based on Honda research. Only includes the following 10 countries: the United Kingdom, Germany, France, Italy, Spain, Switzerland, Portugal, the Netherlands, Belgium and Austria.

Asia

Total demand for motorcycles in Asia* increased around 1% from the previous year to approximately 41,600 thousand units in calendar year 2014.

Looking at market conditions by country, in calendar year 2014, demand in India increased about 12% from the previous year to approximately 16,020 thousand units, due mainly to an expansion of the scooter category. Demand in China decreased around 8% from the previous year to approximately 10,650 thousand units. Demand in Indonesia increased around 2% from the previous year to approximately 7,860 thousand units. Vietnam saw demand decline around 3% from the previous year to approximately 2,710 thousand units. Demand in Thailand declined around 15% from the previous year to approximately 1,700 thousand units.

Honda's consolidated unit sales in Asia increased 7.9% from the previous fiscal year to 8,478 thousand units in fiscal year 2015. This was due in part to increased sales of scooter models centered on the *ACTIVA* scooter along with brisk sales of the *CB Shine* and *DREAM Yuga* small motorcycles in India. Another contributing factor was strong sales of the *Wave* series in Vietnam.

Honda's consolidated unit sales do not include sales by P.T. Astra Honda Motor in Indonesia, which is a joint venture accounted for using the equity method. P.T. Astra Honda Motor's unit sales for fiscal year 2015 increased around 3% from the previous fiscal year to approximately 4,890 thousand units. This was due mainly to strong sales of scooter models amid lackluster market conditions.

* Based on Honda research. Only includes the following 8 countries: Thailand, Indonesia, Malaysia, the Philippines, Vietnam, India, Pakistan and China.

Other Regions

Total demand for motorcycles in Brazil*, the principal market within Other Regions, declined about 10% from the previous year to approximately 1,430 thousand units in calendar year 2014, mainly due to a continuation of stricter lending standards for retail loans and a decline in consumer sentiment in line with deteriorating economic conditions.

In Other Regions (including South America, the Middle East, Africa, Oceania and other areas), Honda's consolidated unit sales decreased 12.9% from the previous fiscal year to 1,571 thousand units in fiscal year 2015. This was largely attributable to lower unit sales in Brazil and Argentina, primarily due to a decline in consumer sentiment reflecting harsh economic conditions.

* Source: ABRACICLO (the Brazilian Association of Motorcycle, Moped, and Bicycle Manufacturers)

Automobile Business

Honda's consolidated unit sales of automobiles totaled 3,513 thousand units, decreased by 0.5% from the previous fiscal year, due mainly to a decrease in consolidated unit sales in Japan, which was partially offset by increase in Asia.

Sales revenue from external customers increased by ¥424.5 billion, or 4.6%, to ¥9,603.3 billion from the previous fiscal year, due mainly to positive foreign currency translation effects. The impact of price changes was

Table of Contents

immaterial. Honda estimates that by applying Japanese yen exchange rates of the previous fiscal year to the current fiscal year, sales revenue for the year would have decreased by approximately ¥107.9 billion, or 1.2%, compared to the increase as reported of ¥424.5 billion, which includes positive foreign currency translation effects. Sales revenue including intersegment sales increased by ¥508.5 billion, or 5.5%, to ¥9,757.8 billion from the previous fiscal year.

Operating costs and expenses increased by ¥689.9 billion, or 7.9%, to ¥9,478.1 billion from the previous fiscal year. Cost of sales increased by ¥491.9 billion, or 6.9%, to ¥7,641.8 billion, due mainly to negative foreign currency effects. Selling, general and administrative expenses increased by ¥197.4 billion, or 17.3%, to ¥1,337.7 billion, due mainly to increased product warranty expenses and negative foreign currency effects. Product warranty expenses include expenses related to airbag inflators. Research and development expenses totaled to ¥498.4 billion basically unchanged from the previous fiscal year.

Operating profit decreased by ¥181.4 billion, or 39.3%, to ¥279.7 billion from the previous fiscal year, due mainly to increased selling, general and administrative expenses including product warranty expenses, which was partially offset by continuing cost reduction and positive foreign currency effect.

Proportion of retail unit sales by vehicle category:

	Fiscal year ended March 31,	
	2014	2015
Passenger cars: <i>Accord, Accord Hybrid, Amaze, Brio, Brio Amaze, Brio Satya, City, Civic, Civic Tourer, CRIDER, CR-Z, Fit/Jazz, Fit/Jazz Hybrid, Fit Shuttle, Fit Shuttle Hybrid, FREED, FREED Hybrid, FREED SPIKE, FREED SPIKE Hybrid, GRACE Hybrid, Honda MOBILIO, Insight, JADE, JADE Hybrid, LEGEND Hybrid, Spirior, Stream,</i>	58%	58%
<i>Acura ILX, Acura RLX, Acura TLX</i>		
Light trucks: <i>Crosstour, CR-V, Elysion, Odyssey, Pilot, Ridgeline, Step WGN, VEZEL/HR-V, VEZEL Hybrid, XR-V, Acura MDX, Acura RDX</i>	32%	33%
Mini vehicles: <i>Acty, Life, N-Box, N-Box +, N-Box SLASH, N-ONE, N-WGN, Vamos</i>	10%	9%

Although there are various factors that affect the profitability of each vehicle category, sales price is an important factor in determining profitability. In general, the weighted average sales price in the light trucks category is higher relative to the total average sales price, while the weighted average sales price in the mini vehicles category, which is unique to the Japanese market, is relatively lower, although sales price varies from model to model.

In general, the contribution margin of the light trucks category tends to be higher relative to the total weighted average contribution margin because the sales price is higher, while the contribution margin of the mini vehicles category tends to be relatively lower because the sales price is lower, although the level of contribution margin varies from model to model. For example, in Japan and the United States, which are the main sales markets for our automobiles, the contribution margin of our light trucks category was approximately 40% higher, our passenger cars category was approximately 10% lower and our mini vehicles category was approximately 50% lower than total weighted average contribution margin for the fiscal year ended March 31, 2015. It should be noted that we define contribution margin as an amount per unit of net sales minus material cost, which is thought to increase in almost direct proportion to net sales volume.

Table of Contents

Japan

Total demand for automobiles in Japan^{*1} decreased around 7% from the previous fiscal year to approximately 5,290 thousand units in fiscal year 2015. This was greatly influenced by the impact of an increase in Japan's consumption tax rate in April 2014 and a fall-back from a spike in demand prior to the increase.

Honda's consolidated unit sales in Japan decreased 11.7% from the previous fiscal year to 696 thousand units^{*2} in fiscal year 2015. The main reasons for the decline were weak demand due to Japan's consumption tax rate increase and the fall-back from a spike in demand prior to the increase, along with intensified competition in the mini-vehicle segment. This was despite the introduction of new automobile models such as *GRACE* and solid sales of the *VEZEL* and *N-WGN* models.

Honda's unit production of automobiles in fiscal year 2015 decreased 7.4% from the previous fiscal year to 868 thousand units. This was mainly due to the negative effects of a decline in unit sales.

*1 Source: JAMA (Japan Automobile Manufacturers Association), as measured by the number of regular vehicle registrations (661cc or higher) and mini vehicles (660cc or lower)

*2 Certain sales of automobiles that are financed with residual value type auto loans by our Japanese finance subsidiaries and sold through our consolidated subsidiaries are accounted for as operating leases in conformity with IFRS and are not included in consolidated sales revenue to external customers in the Automobile business. Accordingly, they are not included in consolidated unit sales.

North America

Total industry demand for automobiles in the United States*, the principal market within North America, rose around 6% from the previous year to approximately 16,520 thousand units in calendar year 2014. This was mainly attributable to stable economic conditions including the positive effects of an improvement in employment conditions and a continued increase in personal consumption, as well as an increase in light truck sales as a result of lower gasoline prices.

Under these conditions, Honda's consolidated unit sales in North America decreased 0.2% from the previous fiscal year to 1,750 thousand units in fiscal year 2015. This decline was mainly caused by the negative effects of intensified competition in the passenger car segment and the U.S. West Coast port strikes, which more than offset the positive impact of the *Acura TLX* launch and a full model change of the *Fit* model.

Honda manufactured 1,810 thousand units in fiscal year 2015, up 1.8% from the previous fiscal year. This increase mainly reflected an increase in unit production at Honda's new Celaya plant in Mexico, despite the negative effect from the U.S. West Coast port strikes.

* Source: Autodata

Europe

Total demand for automobiles in Europe* increased about 5% from the previous year to approximately 13,000 thousand units in calendar year 2014. Expansion in the market as a whole was driven by an upturn in economic conditions.

Honda's consolidated unit sales in Europe decreased 5.8% from the previous fiscal year to 161 thousand units in fiscal year 2015. This was mainly due to a decline in unit sales of the *JAZZ*.

Unit output at Honda's U.K. plant in fiscal year 2015 declined 14.2% from the previous fiscal year to 115 thousand units.

* Source: ACEA (Association des Constructeurs Europeens d'Automobiles (the European Automobile Manufacturer's Association)) New passenger car registrations cover 28 EU countries and three EFTA countries, excluding Russia.

Table of Contents

Asia

Total demand for automobiles in Asia decreased around 4% from the previous year to approximately 6,860 thousand units*¹ in calendar year 2014. This was mainly caused by a weak economy in Thailand, despite a recovery in demand in India due to improving economic conditions in the country. Total demand for automobiles in China increased about 7% from the previous year to approximately 23,490 thousand units*² in calendar year 2014.

Honda's consolidated unit sales in Asia outside Japan increased 20.0% from the previous fiscal year to 637 thousand units in fiscal year 2015. This increase was mainly attributable to the launch of the *Honda MOBILIO* and *HR-V* in Indonesia, along with the full model change of the *CITY* model, the addition of a diesel engine model to the *CITY* and the introduction of the *Honda MOBILIO* in India.

Honda's consolidated unit sales do not include unit sales of Dongfeng Honda Automobile Co., Ltd. and Guangqi Honda Automobile Co., Ltd., both of which are joint ventures accounted for using the equity method in China. Unit sales in China increased 1.1% from the previous fiscal year to 789 thousand units in fiscal year 2015. The increase was mainly attributable to a full model change of the *Fit* and introduction of the *VEZEL* and *XR-V* models.

Honda's unit production by consolidated subsidiaries in Asia increased 18.5% from the previous fiscal year to 697 thousand units*³ in fiscal year 2015.

Meanwhile, unit production by Chinese joint ventures Dongfeng Honda Automobile Co., Ltd. and Guangqi Honda Automobile Co., Ltd. increased 0.2% from the previous fiscal year to 810 thousand units in fiscal year 2015.

*¹ The total is based on Honda research and includes the following eight countries: Thailand, Indonesia, Malaysia, the Philippines, Vietnam, Taiwan, India and Pakistan.

*² Source: CAAM (China Association of Automobile Manufacturers)

*³ The total includes the following nine countries: China, Thailand, Indonesia, Malaysia, the Philippines, Vietnam, Taiwan, India and Pakistan.

Other Regions

Total industry demand for automobiles in Brazil*, the principal market within Other Regions, decreased around 7% from the previous year to approximately 3,330 thousand units in calendar year 2014.

In Other Regions (including South America, the Middle East, Africa, Oceania and other areas), Honda's consolidated unit sales decreased 5.9% from the previous fiscal year to 269 thousand units in fiscal year 2015. This result was due to a decrease in sales mainly in Argentina, which was partly offset by increased sales in Brazil due to the introduction of the *HR-V*.

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

Unit production at Honda's plant in Brazil increased 1.0% from the previous fiscal year to 134 thousand units in fiscal year 2015.

* Source: ANFAVEA (Associação Nacional dos Fabricantes de Veículos Automotores (the Brazilian Automobile Association)) Includes passenger cars and light commercial vehicles.

Financial Services Business

To support the sale of its products, Honda provides retail lending and leasing to customers and wholesale financing to dealers through its finance subsidiaries in Japan, the United States, Canada, the United Kingdom, Germany, Brazil, Thailand and other countries.

Table of Contents

Total amount of receivables from financial services and equipment on operating leases of finance subsidiaries on March 31, 2015 increased by ¥1,240.3 billion, or 15.9%, to ¥9,018.9 billion from the March 31, 2014. Honda estimates that by applying Japanese yen exchange rates of the previous fiscal year to the current fiscal year, total amount of receivables from financial services and equipment on operating leases of finance subsidiaries as of March 31, 2015 would have increased by approximately ¥257.8 billion, or 3.3%, compared to the increase as reported of ¥1,240.3 billion, which includes positive foreign currency translation effects.

Sales revenue from external customers increased by ¥229.5 billion, or 17.3%, to ¥1,555.5 billion from the previous fiscal year, due mainly to an increase in operating lease revenues and positive foreign currency translation effects. Honda estimates that by applying Japanese yen exchange rates of the previous fiscal year to the current fiscal year, sales revenue for the year would have increased by approximately ¥106.5 billion, or 8.0%, compared to the increase as reported of ¥229.5 billion, which includes positive foreign currency translation effects. Sales revenue including intersegment sales increased by ¥230.1 billion, or 17.2%, to ¥1,567.9 billion from the previous fiscal year.

Operating costs and expenses increased by ¥210.3 billion, or 18.2%, to ¥1,365.3 billion from the previous fiscal year. Cost of sales increased by ¥203.0 billion, or 19.0%, to ¥1,271.8 billion from the previous fiscal year, due mainly to an increase in costs attributable to increased operating lease revenues and negative foreign currency effects. Selling, general and administrative expenses increased by ¥7.2 billion, or 8.4%, to ¥93.4 billion from the previous fiscal year.

Operating profit increased by ¥19.8 billion, or 10.9%, to ¥202.5 billion from the previous fiscal year, due mainly to increased sales revenue and positive foreign currency effects.

Power Product and Other Businesses

Honda's consolidated unit sales of power products totaled 5,983 thousand units, decreased by 0.6% from the previous fiscal year, due mainly to a decrease in consolidated unit sales in Asia, which was partially offset by an increase in Europe.

Sales revenue from external customers increased by ¥10.4 billion, or 3.4%, to ¥322.5 billion from the previous fiscal year, due mainly to positive foreign currency translation effects, which was partially offset by a decreased consolidated unit sales in Power product business. Honda estimates that by applying Japanese yen exchange rates of the previous fiscal year to the current fiscal year, sales revenue for the year would have decreased by approximately ¥2.0 billion, or 0.7%, compared to the increase as reported of ¥10.4 billion, which includes positive foreign currency translation effects. Sales revenue including intersegment sales increased by ¥9.0 billion, or 2.7%, to ¥346.9 billion from the previous fiscal year.

Operating costs and expenses increased by ¥16.0 billion, or 4.8%, to ¥350.7 billion from the previous fiscal year. Cost of sales increased by ¥13.9 billion, or 5.5%, to ¥265.4 billion, due mainly to negative foreign currency effects. Selling, general and administrative expenses increased by ¥2.1 billion, or 4.1%, to ¥55.4 billion. Research and development expenses totaled to ¥29.9 billion basically unchanged from the previous fiscal year.

Operating loss was ¥3.8 billion, a decrease of ¥6.9 billion from the previous fiscal year, due mainly to an increase in operating costs and expenses in Other businesses and negative foreign currency effects.

Japan

Honda's consolidated unit sales in Power product business in Japan increased 7.6% from the previous fiscal year to 338 thousand units in fiscal year 2015. This was mainly due to an increase in sales of OEM* engines which outweighed a decline in sales of portable power generators.

* OEM (Original Equipment Manufacturer): refers to the manufacturers of products and components sold under a third-party brand.

Table of Contents

North America

Honda's consolidated unit sales in North America in fiscal year 2015 decreased 0.5% from the previous fiscal year to 2,705 thousand units. This was mainly attributable to a decrease in sales of OEM engines and portable power generators, despite an increase in sales of snow throwers.

Europe

Honda's consolidated unit sales in Europe increased 5.8% from the previous fiscal year to 1,091 thousand units in fiscal year 2015. This was mostly due to an increase in sales of OEM engines and lawn mowers.

Asia

Honda's consolidated unit sales in Asia decreased 6.9% from the previous fiscal year to 1,382 thousand units in fiscal year 2015. The main reasons were a decrease in sales of OEM engines and water pumps.

Other Regions

Honda's consolidated unit sales in Other Regions (including South America, the Middle East, Africa, Oceania and other areas) decreased 0.4% from the previous fiscal year to 467 thousand units in fiscal year 2015. This was mainly due to a decrease in sales of water pumps and OEM engines in South America.

Geographical Information

Japan

In Japan, sales revenue from domestic and export sales decreased by ¥282.7 billion, or 6.7%, to ¥3,930.9 billion from the previous fiscal year, due mainly to a decrease in sales revenue in the Automobile business. Operating profit decreased by ¥35.6 billion, or 14.5%, to ¥210.1 billion from the previous fiscal year, due mainly to increased selling, general and administrative expenses including product warranty expenses and a decrease in profit attributable to decreased sales revenue and model mix, which was partially offset by positive foreign currency effects.

North America

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

In North America, which mainly consists of the United States, sales revenue increased by ¥638.4 billion, or 9.7%, to ¥7,200.8 billion from the previous fiscal year, due mainly to positive foreign currency translation effects, which was partially offset by a decrease in sales revenue in the Automobile business. Operating profit decreased by ¥154.1 billion, or 45.9%, to ¥181.5 billion from the previous fiscal year, due mainly to increased selling, general and administrative expenses including product warranty expenses and a decrease in profit attributable to decreased sales revenue and model mix, which was partially offset by continuing cost reduction and positive foreign currency effects.

Europe

In Europe, sales revenue decreased by ¥57.6 billion, or 7.4%, to ¥723.9 billion from the previous fiscal year, due mainly to a decrease in sales revenue in the Automobile business, which was partially offset by an increase in sales revenue in the Motorcycle business and positive foreign currency translation effects. Operating loss was ¥22.6 billion, an improvement of ¥11.2 billion from the previous fiscal year, due mainly to effect of impairment loss recognized in the previous fiscal year, which was partially offset by negative foreign currency effects.

Asia

In Asia, sales revenue increased by ¥438.1 billion, or 15.2%, to ¥3,328.5 billion from the previous fiscal year, due mainly to an increase in sales revenue in the Automobile business and Motorcycle business and

Table of Contents

positive foreign currency translation effects. Operating profit increased by ¥46.8 billion, or 20.2%, to ¥278.8 billion from the previous fiscal year, due mainly to an increase in profit attributable to increased sales revenue and model mix, continuing cost reduction and positive foreign currency effects, which was partially offset by increased selling, general and administrative expenses.

Other Regions

In Other Regions, sales revenue decreased by ¥62.1 billion, or 6.1%, to ¥950.3 billion from the previous fiscal year, due mainly to a decrease in sales revenue in the Automobile business and Motorcycle business and negative foreign currency translation effects. Operating profit increased by ¥2.0 billion, or 5.5%, to ¥40.1 billion from the previous fiscal year, due mainly to continuing cost reduction, which was partially offset by increased selling, general and administrative expenses and negative foreign currency effects.

Significant Factors Affecting Our Results of Operations

Loss related to airbag inflators

Honda provides warranty programs mainly in North America and Japan, with regard to the product recalls and SIC (Safety Improvement Campaign) related to airbag inflators. Provisions made for the above warranty programs issued are ¥120.0 billion during the fiscal year ended March 31, 2015. The main market actions are explained below.

In June 2014, Honda recalled and conducted a SIC on certain vehicles due to a problem where the internal pressure of the inflator rises abnormally at the time of airbag deployment on the driver's side and passenger's side, causing damage to the container and spraying metal fragments inside of the cars. In December 2014, Honda expanded the scope of the recalls, and also decided to expand the scope of these market actions based on an agreement between our supplier and the U.S. National Highway Traffic Safety Administration since May 2015, which is reflected in the fiscal year ended March 31, 2015. The vehicle models involved are *Accord, City, Civic, CR-V, Element, Fit/Jazz, Honda Mobilio, Odyssey, Pilot, Ridgeline, Stream, Acura MDX, Acura TL/CL* and others. The number of vehicles subject to the recalls is approximately 9,050 thousand units for the driver's side and approximately 9,190 thousand units for the passenger's side.

Application of Critical Accounting Policies

Critical accounting policies are those which require us to apply the most difficult, subjective or complex judgments, often requiring us to make estimates about the effect of matters that are inherently uncertain and which may change in subsequent periods, or for which the use of different estimates that could have reasonably been used in the current period would have had a material impact on the presentation of our financial position and results of operations. Further changes in the economic environment surrounding us, effects by market conditions, effects of currency fluctuations or other factors have combined to increase the uncertainty inherent in such estimates and assumptions.

The following is not intended to be a comprehensive list of all our accounting policies. Our significant accounting policies are more described in note (3) Significant Accounting Policies to the accompanying consolidated financial statements.

We have identified the following critical accounting policies with respect to our financial presentation.

Product Warranty

We warrant our products for specific periods of time. We also provide specific warranty programs, including product recalls, as needed. Product warranties vary depending upon the nature of the product, the geographic location of their sales and other factors.

Table of Contents

We recognize costs for general warranties on products we sell and for specific warranty programs, including product recalls. We provide for general estimated warranty costs at the time products are sold to customers. We also provide for specific estimated warranty program costs when it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. Estimated warranty costs are provided based on historical warranty claim experience with consideration given to the expected level of future warranty costs, including current sales trends, the expected number of units to be affected and the estimated average repair cost per unit for warranty claims. Our products contain certain parts manufactured by third party suppliers that typically warrant these parts.

We believe our provision for product warranties is a critical accounting estimate because changes in the calculation can materially affect profit for the year attributable to owners of the parent, and require us to estimate the frequency and amounts of future claims, which are inherently uncertain.

Our policy is to continuously monitor warranty cost accruals to determine the adequacy of the accrual. Therefore, warranty expense accruals are maintained at an amount we deem adequate to cover estimated warranty expenses.

Actual claims incurred in the future may differ from the original estimates, which may result in material revisions to the warranty expense accruals.

The changes in the provision for those product warranties and sales revenue for the years ended March 31, 2014 and 2015 are as follows:

	Yen (millions)	
	2014	2015
Provisions for product warranties		
Balance at beginning of year	¥ 212,824	¥ 274,231
Provision*	168,994	295,035
Charge-offs	(104,396)	(156,787)
Reversal	(13,210)	(12,171)
Exchange differences on translating foreign operations	10,019	21,215
Balance at end of year	¥ 274,231	¥ 421,523
Sales revenue	¥ 12,506,091	¥ 13,328,099

* Provisions for product warranties issued during the period for the years ended March 31, 2014 and 2015 are ¥168.9 billion and ¥295.0 billion, respectively, due mainly to the future warranty costs for product recalls in the Automobile business.

Credit Losses

Our finance subsidiaries provide retail lending and leasing to customers and wholesale financing to dealers primarily to support sales of our products. Honda includes retail and finance lease receivables (consumer finance receivables) derived from those services in receivables from financial services, and operating leases are classified as equipment on operating leases. Honda also includes wholesale receivables in receivables from financial services.

Credit losses are an expected cost of extending credit. The majority of the credit risk is with consumer financing and to a lesser extent with dealer financing. Credit risk on consumer finance receivables can be affected by general economic conditions. Adverse changes such as a rise in unemployment rates can increase the likelihood of defaults. Declines in used vehicle prices can reduce the amount of recoveries on repossessed collateral. Exposure to credit risk on consumer finance receivables is managed by monitoring and adjusting underwriting standards, which affect the level of credit risk that is assumed, pricing contracts for expected losses, and focusing collection efforts to minimize losses.

Table of Contents

Our finance subsidiaries are also exposed to credit risk on equipment on operating leases. A portion of our finance subsidiaries' operating leases are expected to terminate prior to their scheduled maturities when lessees default on their contractual obligations. Losses are generally realized upon the disposition of the repossessed operating lease vehicles. The factors affecting credit risk on operating leases and management of the risk are similar to that of consumer finance receivables.

Credit risk on dealer finance receivables is affected primarily by the financial strength of the dealers within the portfolio, the value of collateral securing the financings, and economic factors that could affect the creditworthiness of dealers. Exposure to credit risk in dealer financing is managed by performing comprehensive reviews of dealers prior to establishing financing arrangements and continuously monitoring the payment performance and creditworthiness of dealers with existing financing arrangements.

The allowance for credit losses is management's estimate of probable losses incurred on receivables from financial services. Estimated losses on past due operating lease rental payments are also recognized with an allowance for credit losses. Our finance subsidiaries evaluate these estimates, at minimum, on a quarterly basis.

Consumer finance receivables are collectively evaluated for impairment. Delinquencies and losses are continuously monitored and this historical experience provides the primary basis for estimating the allowance. Various methodologies are utilized when estimating the allowance for credit losses including models that incorporate vintage loss and delinquency migration analysis. The models take into consideration attributes of the portfolio including loan-to-value ratios, internal and external credit scores, and collateral types. Economic factors such as used vehicle prices, unemployment rates, and consumer debt service burdens are also incorporated when estimating losses. Estimated losses on operating leases expected to terminate early due to lessee defaults are also determined collectively, consistent with the methodologies used for consumer finance receivables.

Dealer finance receivables are individually evaluated for impairment when specifically identified as impaired. Dealer finance receivables are considered to be impaired when it is probable that our finance subsidiaries will be unable to collect all amounts due according to the original terms of the loan. The determination of whether dealer finance receivables are impaired is based on evaluations of dealerships' payment history, financial condition and cash flows, and their ability to perform under the terms of the loans. Dealer finance receivables that have not been specifically identified as impaired are collectively evaluated for impairment.

We believe our allowance for credit losses and impairment losses on operating leases is a critical accounting estimate because it requires significant judgment about inherently uncertain items. Our finance subsidiaries regularly review the adequacy of the allowance for credit losses and impairment losses on operating leases. The estimates are based on information available at the end of each reporting period. However actual losses may differ from the original estimates as a result of actual results varying from those assumed in our estimates.

As an example of the sensitivity of the allowance calculation, the following scenario demonstrates the impact that a deviation in one of the primary factors estimated as a part of our allowance calculation would have on the provision and allowance for credit losses. If we had experienced a 10% increase in net charge-offs during fiscal year 2015, the provision for fiscal year 2015 and the allowance balance at the end of fiscal year 2015 would have increased by approximately ¥4.3 billion and ¥2.5 billion, respectively. Note that this sensitivity analysis may be asymmetric and is specific to the base conditions in fiscal year 2015.

Table of Contents*Additional Narrative of the Change in Credit Loss*

The following tables summarize our allowance for credit losses on receivables from financial services:

For the year ended March 31, 2014	Yen (millions)			
	Retail	Finance lease	Wholesale	Total
Allowance for credit losses				
Balance at beginning of year	¥ 18,528	¥ 788	¥ 1,278	¥ 20,594
Provision	18,688	311	1,165	20,164
Charge-offs	(25,610)	(574)	(112)	(26,296)
Recoveries	9,681	94	11	9,786
Exchange differences on translating foreign operations	683	17	252	952
Balance at end of year	¥ 21,970	¥ 636	¥ 2,594	¥ 25,200
Ending balance of receivables from financial services	¥ 4,563,700	¥ 330,087	¥ 496,899	¥ 5,390,686
Average balance of receivables from financial services	¥ 4,180,635	¥ 347,768	¥ 465,456	¥ 4,993,859
Net charge-offs as a % of average balance of receivables from financial services	0.38%	0.14%	0.02%	0.33%
Allowance as a % of ending balance of receivables from financial services	0.48%	0.19%	0.52%	0.47%

For the year ended March 31, 2015	Yen (millions)			
	Retail	Finance lease	Wholesale	Total
Allowance for credit losses				
Balance at beginning of year	¥ 21,970	¥ 636	¥ 2,594	¥ 25,200
Provision	18,213	349	(202)	18,360
Charge-offs	(26,673)	(620)	(385)	(27,678)
Recoveries	9,101	131	27	9,259
Exchange differences on translating foreign operations	38	3	(144)	(103)
Balance at end of year	¥ 22,649	¥ 499	¥ 1,890	¥ 25,038
Ending balance of receivables from financial services	¥ 4,901,918	¥ 260,543	¥ 556,735	¥ 5,719,196
Average balance of receivables from financial services	¥ 4,732,809	¥ 295,315	¥ 526,817	¥ 5,554,941
Net charge-offs as a % of average balance of receivables from financial services	0.37%	0.17%	0.07%	0.33%
Allowance as a % of ending balance of receivables from financial services	0.46%	0.19%	0.34%	0.44%

The following table provides information related to losses on operating leases due to customer defaults:

	Yen (millions)	
	2014	2015
Provision for credit losses on past due lease payments under operating leases	¥ 1,704	¥ 1,869
Impairment losses on operating leases due to early termination	¥ 3,304	¥ 4,077

Fiscal Year 2015 Compared with Fiscal Year 2014

The provision for credit losses on receivables from financial services for the fiscal year ended March 31, 2015 decreased by ¥1.8 billion, or 8.9%, from the fiscal year ended March 31, 2014. This decline was primarily attributable to the decline in retail loan acquisition volumes during the fiscal year 2015 in our North American

Table of Contents

finance subsidiaries. The increase in net charge-offs of receivables from financial services for the fiscal year ended March 31, 2015 of ¥1.9 billion, or 11.6%, from the fiscal year ended March 31, 2014 was primarily due to foreign currency translation effects. Impairment losses on operating leases due to early termination for the fiscal year ended March 31, 2015 increased by ¥0.7 billion, or 23.4%, from the fiscal year ended March 31, 2014 due to the growth in equipment on operating leases in our North American finance subsidiaries and foreign currency translation effects.

Losses on Lease Residual Values

Our finance subsidiaries in North America determine contractual residual values of lease vehicles at lease inception based on expectations of end of term used vehicle values, taking into consideration external industry data and our own historical experience. Lease customers have the option at the end of the lease term to return the vehicle to the dealer or to buy the vehicle for the contractual residual value (or if purchased prior to lease maturity, for the outstanding contractual balance). Returned lease vehicles can be purchased by the grounding dealer for the contractual residual value (or if purchased prior to lease maturity, for the outstanding contractual balance) or a market based price. Returned lease vehicles that are not purchased by the grounding dealers are sold through online and physical auctions. We are exposed to risk of loss on the disposition of returned lease vehicles when the proceeds from the sale of the vehicles are less than the contractual residual values at the end of the lease term.

We assess our estimates for end of term market values of lease vehicles, at minimum, on a quarterly basis. The primary factors affecting the estimates are the percentage of leased vehicles that we expect to be returned by the lessee at the end of lease term and the expected loss severity. Factors considered in this evaluation include, among other factors, economic conditions, historical trends, and market information on new and used vehicles. For operating leases, adjustments to estimated residual values are made on a straight-line basis over the remaining term of the lease and are included as depreciation expense. For finance leases, if there is an objective evidence that recognition of losses on lease residual values is needed, downward adjustments for declines in estimated residual values are recognized as a loss on lease residual values in the period in which the estimate changed.

We also review our equipment on operating leases for impairment whenever events or changes in circumstances indicate that their carrying values may not be recoverable. If impairment conditions are met, impairment losses are measured by the amount carrying values exceed their recoverable amounts. There were no events or circumstances that indicated that the carrying values of our operating leases would not be recoverable during the fiscal years ended March 31, 2014 and 2015.

We believe that our estimated losses on lease residual values and impairment losses are a critical accounting estimate because it is highly susceptible to market volatility and requires us to make assumptions about future economic trends and lease residual values, which are inherently uncertain. We believe that the assumptions used are appropriate. However actual losses incurred may differ from original estimates as a result of actual results varying from those assumed in our estimates.

If future auction values for all Honda and Acura vehicles in our North American operating lease portfolio as of March 31, 2015 were to decrease by approximately ¥10,000 per unit from our present estimates, holding all other assumptions constant, the total impact would be an increase in depreciation expense by approximately ¥5.0 billion, which would be recognized over the remaining lease terms. Similarly, if future return rates for our existing portfolio of all Honda and Acura vehicles were to increase by one percentage point from our present estimates, the total impact would be an increase in depreciation expense by approximately ¥0.7 billion, which would be recognized over the remaining lease terms. With the same prerequisites shown above, if future auction values in our North American finance lease portfolio were to decrease by approximately ¥10,000 per unit from our present estimates, the total impact would be an increase in losses on lease residual values by approximately ¥0.1 billion, and if future return rates were to increase by one percentage point from our present estimates, the

Table of Contents

total impact would be slight. Note that this sensitivity analysis may be asymmetric and is specific to the base conditions in fiscal year 2015. Also, declines in auction values are likely to have a negative effect on return rates which could affect the sensitivities.

Post-employment Benefits

We have various pension plans covering substantially all of our employees in Japan and certain employees in foreign countries. Defined benefit obligations and defined benefit costs are based on assumptions of many factors, including the discount rate and the rate of salary increase. The discount rate is determined by reference to market yields at the end of the reporting period on high quality corporate bonds that is consistent with the currency and estimated term of the post-employment benefit obligations. The rate of salary increase reflects our actual experience as well as near-term outlook. Our assumed discount rate and rate of salary increase for Japanese plans as of March 31, 2015 were 1.0% and 2.1%, respectively. Our assumed discount rate and rate of salary increase for foreign plans as of March 31, 2015 were 3.4 - 3.9% and 2.5 - 3.6%, respectively.

We believe that the accounting estimates related to our pension plans are a critical accounting estimate because changes in these estimates can materially affect our financial position and results of operations.

We believe that the assumptions currently used are appropriate. However, changes in assumptions could affect our defined benefit costs and obligations, including our cash requirements to fund such obligations in the future. Actual results may differ from our assumptions, and the difference is recognized in other comprehensive income when it is incurred and reclassified immediately to retained earnings.

For information on the effect of change in the assumed discount rate on our defined benefit obligations, see 4) Sensitivity analysis of note (18) Employee Benefits to the accompanying consolidated financial statements.

Deferred Tax Assets

We consider the probability that a portion of or all of the deductible temporary differences, carryforward of unused tax losses and carryforward of unused tax credit can be utilized against future taxable profits in the recognition of deferred tax assets. In assessing recoverability of deferred tax assets, we consider the scheduled reversal of deferred tax liabilities, projected future taxable profit and tax planning strategies.

We believe that our accounting for the deferred tax assets is a critical accounting estimate because it requires us to evaluate and assess the probability of future taxable profit and our business plan, which are inherently uncertain.

Based upon the level of historical taxable profit and projections for future taxable profit over the periods for which the deferred tax assets are deductible, we believe it is probable that we will utilize the benefits of these deferred tax assets as of April 1, 2013 and March 31, 2014 and 2015. Uncertainty of estimates of future taxable profit could increase due to changes in the economic environment surrounding us, effects by market conditions, effects of currency fluctuations or other factors.

New Accounting Pronouncements Not Yet Adopted

For a description of new accounting pronouncements not yet adopted, see (e) New Accounting Standards and Interpretations Not Yet Adopted of note (2) Basis of Preparation to the accompanying consolidated financial statements.

Table of Contents

B. Liquidity and Capital Resources

Overview of Capital Requirements, Sources and Uses

The policy of Honda is to support its business activities by maintaining sufficient capital resources, a sufficient level of liquidity and a sound balance sheet.

Honda's main business is the manufacturing and sale of motorcycles, automobiles and power products. To support this business, Honda also funds financial programs for customers and dealers.

Honda requires working capital mainly to purchase parts and raw materials required for production, as well as to maintain inventory of finished products and cover receivables from dealers and for providing financial services. Honda also requires funds for capital expenditures, mainly to introduce new models, upgrade, rationalize and renew production facilities, as well as to expand and reinforce sales and R&D facilities.

Honda meets its working capital requirements primarily through cash generated by operations and bank loans. Honda believes that its working capital is sufficient for the Company's present requirements. The year-end balance of liabilities associated with the Company and its subsidiaries funding for non-financial services businesses was ¥592.6 billion as of March 31, 2015. In addition, the Company's finance subsidiaries fund financial programs for customers and dealers primarily from medium-term notes, bank loans, securitization of finance receivables, commercial paper and corporate bonds. The year-end balance of liabilities associated with these finance subsidiaries' funding for financial services business was ¥6,649.8 billion as of March 31, 2015.

There are no material seasonal variations in Honda's borrowing requirements.

Cash Flows

Fiscal Year 2015 Compared with Fiscal Year 2014

Consolidated cash and cash equivalents on March 31, 2015 increased by ¥278.1 billion from March 31, 2014, to ¥1,471.7 billion. The reasons for the increases or decreases for each cash flow activity, when compared with the previous fiscal year, are as follows:

Net cash provided by operating activities amounted to ¥1,020.4 billion of cash inflows. Cash inflows from operating activities increased by ¥571.2 billion compared with the previous fiscal year, due mainly to an increase in cash received due to increased unit sales in Motorcycle business and increase in collections of receivables from financial services, which was partially offset by increased payments for parts, raw materials and equipment on operating leases.

Net cash used in investing activities amounted to ¥840.4 billion of cash outflows. Cash outflows from investing activities decreased by ¥80.5 billion compared with the previous fiscal year, due mainly to a decrease in payments for additions to property, plant and equipment.

Net cash provided by financing activities amounted to ¥12.4 billion of cash inflows. Cash inflows from financing activities decreased by ¥342.9 billion compared with the previous fiscal year, due mainly to a decrease in cash inflows from financing liabilities and an increase in dividends paid.

Liquidity

The ¥1,471.7 billion in cash and cash equivalents as of March 31, 2015 is mainly denominated in U.S. dollars and in Japanese yen, with the remainder denominated in other currencies.

Honda's cash and cash equivalents as of March 31, 2015 corresponds to approximately 1.3 months of sales revenue, and Honda believes it has sufficient liquidity for its business operations.

Table of Contents

At the same time, Honda is aware of the possibility that various factors, such as recession-induced market contraction and financial and foreign exchange market volatility, may adversely affect liquidity. For this reason, finance subsidiaries that carry total short-term borrowings of ¥1,690.9 billion have committed lines of credit equivalent to ¥1,166.5 billion that serve as alternative liquidity for the commercial paper issued regularly to replace debt. Honda believes it currently has sufficient credit limits, extended by prominent international banks, as of the date of the filing of Honda's Form 20-F.

Honda's financing liabilities as of March 31, 2015 are mainly denominated in U.S. dollars, with the remainder denominated in Japanese yen and in other currencies. For further information regarding financing liabilities, see note (15) Financing Liabilities and (25) Financial Risk Management to the accompanying consolidated financial statements.

Honda's short- and long-term debt securities are rated by credit rating agencies, such as Moody's Investors Service, Inc., Standard & Poor's Rating Services, and Rating and Investment Information, Inc. The following table shows the ratings of Honda's unsecured debt securities by Moody's, Standard & Poor's and Rating and Investment Information as of March 31, 2015.

	Credit ratings for	
	Short-term unsecured debt securities	Long-term unsecured debt securities
Moody's Investors Service	P-1	A1
Standard & Poor's Rating Services	A-1	A+
Rating and Investment Information	a-1+	AA

The above ratings are based on information provided by Honda and other information deemed credible by the rating agencies. They are also based on the agencies' assessment of credit risk associated with designated securities issued by Honda. Each rating agency may use different standards for calculating Honda's credit rating, and also makes its own assessment. Ratings can be revised or nullified by agencies at any time. These ratings are not meant to serve as a recommendation for trading in or holding Honda's unsecured debt securities.

C. Research and Development

The Company and its consolidated subsidiaries use the most-advanced technologies and conduct R&D activities with the goal of creating distinctive products that are internationally competitive. To attain this goal, Honda's main R&D divisions operate independently as subsidiaries, allowing engineers to pursue their tasks with significant freedom. Product-related R&D is spearheaded by Honda R&D Co., Ltd. in Japan; Honda R&D Americas, Inc. in the United States; and Honda R&D Asia Pacific Co., Ltd. in Thailand. R&D on production technologies centers around Honda Engineering Co., Ltd. in Japan and Honda Engineering North America, Inc. in the United States. All of these entities work in close associations with our other entities and businesses in their respective regions.

Total consolidated R&D expenditures incurred during the fiscal year 2014 and 2015 were ¥625.6 billion and ¥670.3 billion, respectively.

In addition, due to the adoption of IFRS, a portion of the R&D expenditures at the Company and its consolidated subsidiaries has been capitalized, and recorded as intangible assets. For details regarding R&D expenses recognized in the consolidated statements of income, see note (21) Research and Development to the accompanying consolidated financial statements.

R&D activities by segment are as follows.

Table of Contents

Motorcycle Business

In the Motorcycle business segment, Honda is aiming to deliver appealing products in a timely manner that offer outstanding environmental performance and that will enable customers to experience the joy of ownership. To this end, we prioritized initiatives designed to bolster product appeal, strengthen cost competitiveness, quicken the pace of product and technology development, and respond to the demands of a low-carbon society.

Among major technological achievements, the *CB UNICORN160*, equipped with a single-cylinder 160cc air-cooled engine to realize enhanced fuel economy and power output, was launched in India. In Brazil, the *NXR160Bros* was launched, equipped with this engine.

In addition, the *eSP* engine series, a global engine for scooters that combines high fuel economy and a refreshing driving experience, was launched by mounting the 50cc water-cooled *eSP* engine on *Tact*, and the 110cc air-cooled *eSP* engine on *Dio110* for launch in Japan and *VISION* for launch in Vietnam.

Furthermore, the *Forza125* was launched with greater power output while maintaining high fuel economy by transforming the 125cc water-cooled *eSP* engine into a four-valve engine.

The *VFR800X* equipped with a DOHC V4 800cc water-cooled four-stroke engine, aimed to provide enjoyable handling and comfortable driving for both around town and long-distance touring, as well as the *GOLDWING F6C*, equipped with a horizontally-opposed six-cylinder 1800cc engine to add greater impact and presence to its design, were also launched.

R&D expenditures in this segment incurred during the fiscal year 2014 and 2015 were ¥72.3 billion and ¥73.7 billion, respectively.

In terms of major race results, Honda won the rider, constructor and team divisions to become a triple-crown champion in MotoGP-class motorcycle racing for the second consecutive year.

Automobile Business

In the automobile business segment, Honda's aim is to become the premier manufacturer of interesting, cleverly designed cars that enable customers to experience the joy of driving. The overall strategic direction is to create products that maximize the joy of customers, with speed, affordability and low CO₂.

Among major technological achievements, Honda launched the *LEGEND* which features a V6 direct injection engine and three electric motors to deliver a combination of a refined and comfortable ride and outstanding environmental performance, equipped with the advanced driver-assistive system *Honda SENSING*, which can help the driver prevent or effectively respond to dangerous driving situations.

Furthermore, Honda launched the *GRACE*, which features the easy handling and excellent fuel economy of a compact vehicle in 5-number size category and spacious cabin within the compact body. Honda also launched the sport car, the *S660*, which adopts the mid-ship engine/rear-wheel drive layout and realizes a low center-of-gravity as well as the optimal front-rear weight balance, in order to realize the joy of driving that only Honda can create.

In North America, the *ACURA TLX* was launched equipped with a 2.4L engine mated to a new 8-speed dual-clutch transmission with torque converter and a 3.5L engine mated to a new 9-speed automatic transmission to realize high power output and fuel economy.

Honda announced the *Honda FCV CONCEPT*, which is a successor model to the *FCX Clarity*, with which Honda strives to achieve further improvement in performance and reduction in cost. This FCV can function as a small-sized mobile power plant that generates and provides electricity to the community in times of disaster or other events when combined with an external power feeding device, *Honda Power Exporter CONCEPT*.

Table of Contents

R&D expenditures in this segment incurred during the fiscal year 2014 and 2015 were ¥524.3 billion and ¥567.3 billion, respectively.

Power Product and Other Businesses

Under the slogan of proposing new and useful ideas that will bring joy to customers worldwide, the power product business pursues initiatives focused primarily on (1) creating new products and technologies for developed countries, and (2) developing products for expanding markets in the emerging countries.

Among major technological achievements, Honda launched the *Yukios e*, an electric-powered snow thrower with outstanding quietness and ease of use which are pursued through the adoption of a rechargeable battery and DC brushless motor for the power unit.

In addition, Honda released the *EU55is* electrical generator equipped with an electronic fuel injector and a large-capacity fuel tank that has achieved the longest continuous operating time among its class. The *EU55is* has improved its fuel efficiency by approximately 15% compared to previous models.

With regard to engine-powered water pump, Honda launched the *WL20XH* and *WL30XH*, equipped with a new power product engine, with four impeller wings that give improved performance in a wide range of uses such as water suction and discharge operations at a light load power output.

In the aviation engine business, one of Other businesses, for the *HF120* small jet engine, Honda received a Type Certification (TC) from the United States Federal Aviation Administration (FAA) in December 2013, and received a Production Certification (PC) in March 2015.

Furthermore, Honda received Provisional Type Certification (PTC) for the *HondaJet* equipped with the *HF120* engine in March 2015.

R&D expenditures in this segment incurred during the fiscal year 2014 and 2015 were ¥28.9 billion and ¥29.2 billion, respectively.

Patents and Licenses

As of March 31, 2015, Honda owned more than 21,000 patents in Japan and more than 25,000 patents abroad. Honda also had applications pending for more than 7,600 patents in Japan and for more than 15,200 patents abroad. While Honda considers that, in the aggregate, Honda's patents are important, it does not consider any one of such patents, or any related group of them, to be of such importance that the expiration or termination thereof would materially affect Honda's business.

D. Trend Information

See Item 5.A Operating and Financial Review and Prospects for information required by this item.

Table of Contents*E. Off-Balance Sheet Arrangements***Loan commitments**

Honda maintains unused balances on committed lines to dealers based on loan commitment contracts. The undiscounted maximum amount of this obligation as of March 31, 2015 was ¥138.9 billion. Although committed lines have been extended, they will not necessarily be withdrawn, as certain contracts contain terms and conditions of withdrawal that require screening of the obligor's credit standing.

Guarantee of employee loans

As of March 31, 2015, we guaranteed ¥22.1 billion of employee bank loans for their housing costs. If an employee defaults on his/her loan payments, we are required to perform under the guarantee. The undiscounted maximum amount of our obligation to make future payments in the event of defaults is ¥22.1 billion. As of March 31, 2015, no amount has been accrued for any estimated losses under the obligations, as it was probable that the employees would be able to make all scheduled payments.

F. Tabular Disclosure of Contractual Obligations

The following table shows our contractual obligations as of March 31, 2015:

Contractual Obligations

	As of March 31, 2015 Yen (millions)				
	Total	Payments due by period			
		Within 1 year	1-3 years	3-5 years	Thereafter
Financing liabilities	¥ 6,988,633	¥ 2,910,762	¥ 2,747,498	¥ 1,159,255	¥ 171,118
Other financial liabilities	181,407	97,779	35,381	33,092	15,155
Future minimum lease payments under non-cancelable operating leases	93,538	21,178	26,808	14,104	31,448
Purchase and other commitments ^{*1}	131,843	87,185	28,915	14,922	821
Contributions to defined benefit pension plans ^{*2}	77,181	77,181			
Total	¥ 7,472,602	¥ 3,194,085	¥ 2,838,602	¥ 1,221,373	¥ 218,542

^{*1} Honda had commitments for purchases of property, plant and equipment as of March 31, 2015.

^{*2}

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

Since contributions beyond the next fiscal year are not currently determinable, contributions to defined benefit pension plans reflect only contributions expected for the next fiscal year.

G. Safe Harbor

All information disclosed under Item 5. E and F contains forward-looking statements as defined in Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

Such statements are based on management's assumptions and beliefs taking into account information currently available to it. Therefore, please be advised that Honda's actual results could differ materially from those described in these forward-looking statements as a result of numerous factors, including general economic conditions in Honda's principal markets and foreign exchange rates between the Japanese yen and the U.S. dollar, the Euro and other major currencies, as well as other factors detailed from time to time.

Item 6. Directors, Senior Management and Employees

A. Directors and Senior Management

Honda's articles of incorporation provide for a Board of Directors of not more than 15 Directors and for a Board of Corporate Auditors of not more than seven Corporate Auditors. Directors and Corporate Auditors are elected by resolutions of the general meetings of shareholders. The Corporate Auditors are nominated by the Board of Directors as candidates for election with approval by the Board of Corporate Auditors. The normal term of office of a Director is one year and that of a Corporate Auditor is four years. Directors and Corporate Auditors may serve any number of consecutive terms.

The Board of Directors appoints one President and Director and may appoint one Chairman of the Board of Directors and several Executive Vice Presidents and Directors, Senior Managing Directors and Managing Directors from among its members. The President represents the Company. In addition, the Board of Directors may appoint, pursuant to its resolutions, Directors who shall each represent the Company. Under the Company Law, a representative director individually has authority to represent the Company generally in the conduct of its affairs. The Board of Directors has the ultimate responsibility for the administration of the affairs of the Company.

Under the Company Law, the Corporate Auditors of the Company have the duty to audit the Director's execution of their duties. Corporate Auditors are not required to be certified public accountants, and may not at the same time be directors or employees of the Company or any of its subsidiaries. They are required to attend at meetings of the Board of Directors but are not entitled to vote. Corporate Auditors of the Company form the Board of Corporate Auditors, which must consist of at least three Corporate Auditors. Not less than half of the members of the Board of Corporate Auditors must be outside Corporate Auditors, each of whom meets all of the following independence requirements: (1) a person who has not been a director, accounting councilor, executive officer, manager or any other employee of the Company or any of its subsidiaries for ten years prior to the assumption of office; (2) if the relevant person assumed an office of corporate auditor of the Company or any of its subsidiaries during the ten years mentioned in (1) above, a person who had not been a director, accounting councilor, executive officer, manager or any other employee of the Company or any of its subsidiaries for further ten years prior to the assumption of such office; (3) a person who is not a director, corporate auditor, executive officer, manager or any other employee of the parent company or who is not a natural person controlling the Company; (4) a person who is not an executive director, executive officer, manager or any other employee of a company which is controlled by the parent company or by the natural person controlling the Company; and (5) a person who is not a spouse or a certain relative of (a) a director, manager or any other important employee of the Company or (b) the natural person controlling the Company. Corporate Auditors are required to elect from among themselves at least one Full-time Corporate Auditor. Corporate Auditors also have a statutory duty to provide their report to the Board of Corporate Auditors, which must submit its audit report to the Representative Director each year. A Corporate Auditor may note his or her opinion in the audit report if his or her opinion is different from the opinion expressed in the audit report. The Board of Corporate Auditors is empowered to establish audit principles, methods of investigation by Corporate Auditors of the status of the corporate affairs and assets of the Company and other matters concerning the performance of the Corporate Auditors' duties. In addition, the Company is required to appoint independent certified public accountants as accounting auditor. Such independent certified public accountants have as their primary statutory duties to audit the consolidated and non-consolidated financial statements of the Company prepared in accordance with the Company Law to be submitted by the Representative Director to general meetings of shareholders and to prepare an accounting audit report thereon and to notify the contents of such report to the specified Corporate Auditor and the specified Director in charge.

Table of Contents*B. Compensation*

Directors and Corporate Auditors receive remuneration, the aggregate maximum amount of which is approved at the annual general meeting of shareholders. The amounts of the remuneration approved to pay to Directors and Corporate Auditors are allocated among them at meeting of the Board of Directors and Corporate Auditors. Also, Directors receive bonuses, the aggregate amount of which is approved at the annual general meeting of shareholders. The amounts of the bonuses approved to pay to Directors are allocated among them at meeting of the Board of Directors. It is based on the Company's performance for each fiscal year, Director's bonuses in the past and other factors. All the Directors and Corporate Auditors contribute a portion of their remuneration to the officer shareholders' association, purchase shares of the Company's Common Stock and keep holding those shares during their services.

The total amount of remuneration paid to the Company's Directors and Corporate Auditors during the fiscal year ended March 31, 2015 was ¥836 million. This amount includes remuneration paid to two Directors who retired during the fiscal year. The amount of remuneration paid to the Directors includes amount of wages paid to those Directors who were also Directors of subsidiaries of the Company.

The total amount of bonuses paid to the Company's Directors during the fiscal year ended March 31, 2015 was ¥283 million.

The amounts of remuneration and bonuses that were paid during the year ended March 31, 2015 are as follows:

	Directors excluding outside Directors		Outside Directors		Yen (millions) Corporate Auditors excluding outside Corporate Auditors		Outside Corporate Auditors		Total	
	number	amount	number	amount	number	amount	number	amount	number	amount
Remuneration	12	¥ 629	3	¥ 23	2	¥ 135	3	¥ 47	20	¥ 836
Bonus	11	275	2	8					13	283
Total		¥ 904		¥ 31		¥ 135		¥ 47		¥ 1,119

The amount of remuneration paid to Fumihiko Ike during the fiscal year ended March 31, 2015 was ¥72 million. The amount of bonus for Fumihiko Ike accrued for the fiscal year ended March 31, 2015 was ¥30 million.

The amount of remuneration paid to Takanobu Ito during the fiscal year ended March 31, 2015 was ¥96 million. The amount of bonus for Takanobu Ito accrued for the fiscal year ended March 31, 2015 was ¥43 million.

C. Board Practices

See Item 6.A Directors and Senior Management for information concerning the Company's Directors and Corporate Auditors required by this item.

Table of Contents*D. Employees*

The following tables list the number of Honda full-time employees as of March 31, 2014 and 2015.

As of March 31, 2014

Total	Motorcycle Business	Automobile Business	Financial Services Business	Power Product and Other Businesses
199,368	42,582	145,609	2,160	9,017

As of March 31, 2014, Honda had 199,368 full-time employees, including 132,620 local nationals employed in its overseas operations.

As of March 31, 2015

Total	Motorcycle Business	Automobile Business	Financial Services Business	Power Product and Other Businesses
204,730	42,163	150,850	2,241	9,476

As of March 31, 2015, Honda had 204,730 full-time employees, including 138,942 local nationals employed in its overseas operations.

Most of the Company's regular employees in Japan, except management personnel, are required by the terms of the Company's collective bargaining agreement with its labor union to become members of the Federation of All Honda Workers' Union (AHWU), which is affiliated with the Japan Council of the International Metalworkers' Federation. Approximately 86% of the employees of the Company and its Japanese subsidiaries were members of AHWU as of March 31, 2015.

In Japan, basic wages are negotiated annually and the average increases in wages of the Company's employees in the fiscal year ended March 31, 2013, 2014 and 2015 were 1.7%, 2.6% and 2.9%, respectively. In addition, in accordance with Japanese custom, each employee is paid a semi-annual bonus. Bonuses are negotiated during wage negotiations and are based on the overall performance of the Company or the applicable subsidiary in the previous year, the outlook for the current year and other factors.

The Company has had labor contracts with its labor union in Japan since 1970. These contracts are renegotiated with respect to basic wages and other working conditions. The regular employees of the Company's Japanese subsidiaries are covered by similar contracts. Since 1957, neither the Company nor any of its subsidiaries has experienced any strikes or other labor disputes that materially affected its business activities. The Company considers labor relations with its employees to be very good.

E. Share Ownership

The total amount of the Company's voting securities owned by its Directors and Corporate Auditors as a group as of June 17, 2015 is as follows.

Title of Class	Amount Owned	% of Class
Common Stock	328,600 shares	0.018%

The Company's full-time employees are eligible to participate in the Honda Employee Shareholders' Association, whereby participating employees contribute a portion of their salaries to the Association and the Association purchases shares of the Company's Common Stock on their behalf. As of March 31, 2015, the Association owned 5,476,809 shares of the Company's common stock.

Table of Contents***Item 7. Major Shareholders and Related Party Transactions******A. Major Shareholders***

As of March 31, 2015, 1,811,428,430 shares of Honda's Common Stock were issued and 1,802,286,926 shares were outstanding.

The following table shows the shareholders that owned of record 5% or more of the issued shares of Honda's Common Stock as of March 31, 2015:

Name	Shares owned (thousands)	Ownership (%)
Japan Trustee Services Bank, Ltd. (trust account)	104,755	5.78

According to a statement on Schedule 13G (Amendment No. 11) filed by Mitsubishi UFJ Financial Group, Inc. with the SEC on February 12, 2015, Mitsubishi UFJ Financial Group, Inc. directly and indirectly held, as of December 31, 2014, 124,481,407 shares, or 6.9% of the then issued shares, of Honda's Common Stock. According to a statement on Schedule 13G filed by BlackRock Inc. with the SEC on January 12, 2015, BlackRock Inc. directly and indirectly held, as of December 31, 2014, 93,082,056 shares, or 5.1% of the then issued shares, of Honda's Common Stock.

None of the above shareholders has voting rights that are different from those of our other shareholders.

ADSs representing American Depositary Shares are issued by JPMorgan Chase Bank, N.A., as Depository. The normal trading unit is 100 American Depositary Shares. Total issued shares of Honda as of the close of business on March 31, 2015 were 1,811,428,430 shares of Common Stock, of which 83,945,355 shares represented by ADSs and 324,947,281 shares not represented by ADSs were owned by residents of the United States. The number of holders of record of the Company's shares of Common Stock in the United States was 248 at March 31, 2015.

To the knowledge of Honda, it is not directly or indirectly owned or controlled by any other corporation, by any government, or by any other natural or legal person or persons severally or jointly. As far as is known to the Company, there are no arrangements, the operation of which may at a subsequent date, result in a change in control of the Company.

B. Related Party Transactions

Honda purchases materials, supplies and services from numerous suppliers throughout the world in the ordinary course of business, including firms with which Honda is affiliated.

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

During the fiscal year ended March 31, 2015, Honda had sales of ¥616.3 billion and purchases of ¥1,289.6 billion with affiliates and joint ventures accounted for using the equity method. As of March 31, 2015, Honda had receivables of ¥227.7 billion from affiliates and joint ventures, and had payables of ¥152.0 billion to affiliates and joint ventures.

Honda does not consider the amounts involved in such transactions to be material to its business.

C. Interests of Experts and Counsel

Not applicable.

Table of Contents

Item 8. Financial Information

A. Consolidated Statements and Other Financial Information

1 3. Consolidated Financial Statements

Honda's audited consolidated financial statements are included under Item 18 Financial Statements .

4. Not applicable.

5. Not applicable.

6. Export Sales

See Item 4 Information on the Company Marketing and Distribution Overseas Sales .

7. Legal Proceedings

Various legal proceedings are pending against us. We believe that such proceedings constitute ordinary routine litigation incidental to our business.

Honda is subject to potential liability under other various lawsuits and claims. Honda recognizes a provision for loss contingencies when it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. Honda reviews these pending lawsuits and claims periodically and adjusts the amounts recognized for these contingent liabilities, if necessary, by considering the nature of lawsuits and claims, the progress of the case and the opinions of legal counsel.

With respect to product liability, personal injury claims or lawsuits, Honda believes that any judgment that may be recovered by any plaintiff for general and special damages and court costs will be adequately covered by Honda's insurance and provision. Punitive damages are claimed in certain of these lawsuits.

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

After consultation with legal counsel, and taking into account all known factors pertaining to existing lawsuits and claims, Honda believes that the ultimate outcome of such lawsuits and pending claims should not result in liability to Honda that would be likely to have an adverse material effect on its consolidated financial position or results of operations.

Class actions related to airbag inflators

Honda provides warranty programs with regard to the product recalls and SIC (Safety Improvement Campaign) related to airbag inflators. Honda recognizes a provision for loss contingencies when it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

In North America, various class actions related to the above mentioned product recalls and SIC have been filed against Honda since October 2014. The plaintiffs have claimed for properly functioning airbag inflators, compensation of economic losses including for incurred costs and the decline in the value of vehicles, as well as punitive damages. Most of the cases in the United States were transferred to the United States District Court for the Southern District of Florida and consolidated into a multidistrict litigation.

Regarding the above matter, Honda did not recognize a provision for loss contingencies because the conditions for a provision have not been met as of the date of this report. Also, it is not possible for Honda to reasonably estimate the amount and timing of potential future losses as of the date of this report because there is uncertainty regarding the period when these lawsuits will be concluded.

Table of Contents**8. Profit Redistribution Policy**

The Company strives to carry out its operations from a global perspective and to increase its corporate value. With respect to the redistribution of profits to its shareholders, which it considers to be one of the most important management issues, its basic policy for dividends is to make distributions after taking into account its long-term consolidated earnings performance.

In addition, the Company's basic policy for dividends is to make quarterly distributions. The Company may determine dividends from surplus by a resolution of the Board of Directors. Annual dividends for the fiscal year ended March 31 of each year require a resolution at the general meeting of shareholders.

The Company may also acquire its own shares at a timing that it deems optimal, with the goal of improving efficiency of the Company's capital structure and implementing a flexible capital structure policy. The present goal is to maintain a shareholders' return ratio (i.e. the ratio of the total of the dividend payment and the repurchase of the Company's own shares to consolidated profit for the year attributable to owners of the parent) of approximately 30%. Retained earnings will be allocated toward financing R&D activities that are essential for the future growth of the Company and capital expenditures and investment programs that will expand its operations for the purpose of improving business results and strengthening the Company's financial condition.

The Company determined year-end dividends of ¥22 per share for the year ended March 31, 2015. As a result, total dividends for the year ended March 31, 2015, together with the first quarter dividends of ¥22, the second quarter dividends of ¥22 and the third quarter dividends of ¥22, were ¥88 per share, an increase of ¥6 from the annual dividends paid for the year ended March 31, 2014.

Details of Distribution of Surplus (Record dates of the fiscal year ended March 31, 2015)

	Resolution of the Board of Directors July 29, 2014	Resolution of the Board of Directors October 28, 2014	Resolution of the Board of Directors January 30, 2015	Resolution at General Meeting of Shareholders June 17, 2015
Dividend per Share of Common Stock (yen)	22.00	22.00	22.00	22.00
Total Amount of Dividends (millions of yen)	39,650	39,650	39,650	39,650

B. Significant Changes

Except otherwise disclosed in this Annual Report on Form 20-F, no significant change has occurred since the date of the annual financial statements.

Item 9. The Offer and Listing

A. Offer and Listing Details

Honda's shares have traded on the Tokyo Stock Exchange (TSE) since its shares were first listed on the TSE in 1957.

Since February 11, 1977, American Depositary Shares (each representing one share of Common Stock and evidenced by American Depositary Receipts (ADRs)) have been listed and traded on the New York Stock Exchange (the NYSE), having been traded on the over-the-counter markets in the United States since 1962.

The monthly average turnover of Honda's shares of Common Stock and American Depositary Shares for the fiscal year ended March 31, 2015 was approximately 118,904,608 shares of Common Stock on the TSE and approximately 21,015,662 American Depositary Shares on the NYSE.

Table of Contents

The following table sets out, for the periods indicated, the reported high and low sales prices of Honda's shares on the TSE in yen and its American Depositary Shares on the NYSE in the U.S. dollars.

Fiscal year	Yen per share of Common Stock on the TSE		U.S. dollars per American Depositary Share on the NYSE	
	High	Low	High	Low

Item 10. Additional Information

A. Share Capital

Not applicable.

B. Memorandum and Articles of Association

Set forth below is information relating to Honda's Common Stock, including brief summaries of the relevant provisions of Honda's articles of incorporation and share handling regulations as currently in effect, and of the Company Law of Japan and related legislation.

General

Honda's authorized share capital as of the date of the filing of this Form 20-F is 7,086,000,000 shares of Common Stock, of which 1,811,428,430 shares were issued.

The current central clearing system for shares of Japanese listed companies was established in 2009 pursuant to the Law Concerning Book-Entry Transfer of Corporate Bonds, Shares, Etc. of Japan (including the cabinet order and ministerial ordinances promulgated thereunder; the Book-Entry Law). The shares of all Japanese companies listed on any Japanese financial instruments exchange, including Honda's shares, are subject to the system. Under the Book-Entry Law, all shares are dematerialized and all share certificates for such shares are null and void. At present, the Japan Securities Depository Center, Inc. (JASDEC) is the sole institution that is designated by the relevant authorities as a book-entry transfer institution which is permitted to engage in the clearing operations of shares of Japanese listed companies under the Book-Entry Law. Under the clearing system, in order for any person to hold, sell or otherwise dispose of shares of Japanese listed companies, such person must have an account at an account management institution unless such person has an account directly at JASDEC. Account management institutions are, in general, financial instruments firms engaged in type 1 financial instruments business (i.e., securities brokers/dealers), banks, trust companies and certain other financial institutions which meet the requirements prescribed by the Book-Entry Law.

Under the Book-Entry Law, any transfer of shares of Japanese listed companies is effected through book entry, and title to the shares passes to the transferee at the time when the transferred number of the shares is by an application for book entry recorded in the transferee's account at an account management institution. The holder of an account at an account management institution is presumed to be the legal owner of the shares recorded in such account.

A registered shareholder is generally entitled to exercise its rights as a shareholder, such as voting rights and to receive dividends (if any). Under the Company Law and the Book-Entry Law, in order to assert shareholders' rights against Honda, a shareholder must have its name and address registered in the register of shareholders, except in limited circumstances. Although, in general, holders of an account with shares recorded are to be registered in the register of shareholders on the basis of an all-shareholders notice from JASDEC to Honda at certain prescribed times, in order to exercise minority shareholders' rights (other than those the record dates for which are fixed) against Honda, a holder of an account with

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

shares needs to (a) make an application through an account management institution to JASDEC, which will then give a notice of the name and address of such holder, the number of shares held by such holder and other requisite information to Honda, and (b) exercise the rights within four weeks from such notice.

Non-resident shareholders are required to appoint a standing proxy in Japan or provide a mailing address in Japan. Each such shareholder must give notice of such standing proxy or mailing address to the relevant account management institution. Such notice will be forwarded to Honda through JASDEC. Japanese financial instruments firms and commercial banks customarily act as standing proxies and provide related services for standard fees. Notices from Honda to non-resident shareholders are delivered to such standing proxies or mailing addresses.

Table of Contents

Objects and Purposes

Article 2 of the articles of incorporation of Honda states that its purpose is to engage in the following businesses:

Manufacture, sale, lease and repair of motor vehicles, ships and vessels, aircrafts and other transportation machinery and equipment.

Manufacture, sale, lease and repair of prime movers, agricultural machinery and appliances, generators, processing machinery and other general machinery and apparatus, electric machinery and apparatus and precision machinery and apparatus.

Manufacture and sale of fiber products, paper products, leather products, lumber products, rubber products, chemical industry products, ceramic products, metal products and other products.

Overland transportation business, marine transportation business, air transportation business, warehousing business, travel business and other transport business and communication business.

Sale of sporting goods, articles of clothing, stationary, daily sundries, pharmaceuticals, drink and foodstuffs and other goods.

Financial business, nonlife insurance agency business, life insurance agency business, construction business including building construction work and real estate business, including real estate brokerage.

Publishing business, advertising business, translation business, interpretation business, management consultancy business, information services including information processing, information and communication and information provision, industrial planning and design, comprehensive security business and labor dispatch services.

Management of parking garages, driving schools, training and education facilities, racecourses, recreation grounds, sporting facilities, marina facilities, hotels, restaurants and other facilities.

Electricity generation and supply and sale of electricity.

Manufacture, sale and licensing of equipment, parts and supplies and all other relevant business activities and investments relating to each of the foregoing items.

Provisions Regarding Directors

There is no provision in Honda's articles of incorporation as to a director's power to vote on a proposal, arrangement or contract in which the director is materially interested, but the Company Law and Honda's regulations of the board of directors provide that such director is required to refrain from voting on such matters at the Board of Director's meetings.

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

The Company Law provides that compensation for directors is determined at a general meeting of shareholders of a company. Within the upper limit approved by the shareholders' meeting, the Board of Directors will determine the amount of compensation for each director. The Board of Directors may, by its resolution, leave such decision to the president's discretion.

The Company Law and Honda's regulations of the board of directors provide that a significant loan from a third party to a company should be approved by the Board of Directors.

There is no mandatory retirement age for directors under the Company Law or Honda's articles of incorporation.

The Company Law provides that any articles of incorporation of a company having no restriction on a transfer of its shares, including Honda, may not provide any requirement concerning the number of shares one individual must hold in order to qualify him or her as a director.

Table of Contents

Dividends

Under its articles of incorporation, Honda's financial accounts will be closed on March 31 of each year. The record dates for dividends are June 30, September 30, December 31 and March 31 of each year. In addition, Honda may distribute dividends from surplus by determining any record date.

Under the Company Law, a company is permitted to make distributions of surplus to the shareholders any number of times per fiscal year pursuant to resolutions of a general meeting of shareholders, subject to certain limitations provided by the Company Law and the Ordinances of the Ministry of Justice thereunder. Distributions of surplus are required, in principle, to be authorized by a resolution of a general meeting of shareholders. However, if the articles of incorporation so provide and certain other requirements under the Company Law are met, distributions of surplus may be made pursuant to a board resolution. Pursuant to the provisions of the Company Law and its articles of incorporation, the Board of Directors of Honda may determine distributions of its surplus.

Distributions of surplus may be made in cash or in-kind in proportion to the number of shares held by each shareholder. If a distribution of surplus is to be made in-kind, a special resolution of a general meeting of shareholders is required, except in the case that a right to receive cash distribution instead of distribution in-kind is granted to shareholders. If such right is granted, distributions in-kind may be made pursuant to an ordinary resolution of a general meeting of shareholders or, as the case may be, a board resolution.

Under the Company Law, Honda is permitted to prepare non-consolidated extraordinary financial statements consisting of a balance sheet as of any date subsequent to the end of the previous fiscal year and an income statement for the period from the first day of the current fiscal year to the date of such balance sheet. If such extraordinary financial statements are prepared and approved in accordance with the provisions of the Company Law and the Ordinances of the Ministry of Justice thereunder, the results of such extraordinary financial statements may be considered in the calculation of distributable amount.

Under its articles of incorporation, Honda is not obligated to pay any dividends which are left unclaimed for a period of three full years after the date on which they first became payable.

Capital and Reserves

The entire amount of the issue price of the shares to be issued in the future will generally be required to be accounted for as stated capital. However, Honda may account for an amount not exceeding one-half of such issue price as additional paid-in capital by resolution of the Board of Directors in accordance with the Company Law. Honda may at any time reduce the whole or any part of its additional paid-in capital or transfer them to stated capital by resolution of a general meeting of shareholders. The whole or any part of surplus may also be transferred to stated capital, additional paid-in capital or legal reserve by resolution of a general meeting of shareholders.

Stock Splits

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

Honda may at any time split its shares into a greater number of shares by resolution of the Board of Directors. When the Board of Directors approves a stock split, it may also amend the articles of incorporation of Honda without approval of shareholders to increase the number of its authorized shares to such number as it determines, provided such number is equal to or less than the then-current number multiplied by the ratio of the stock split, so long as Honda does not issue more than one class of shares.

Under the Book-Entry Law, Honda must give notice to JASDEC regarding a stock split at least two weeks prior to the relevant effective date. On the effective date of the stock split, the numbers of shares recorded in all accounts held by its shareholders at account management institutions or at JASDEC will be increased in accordance with the applicable ratio.

Table of Contents

Consolidation of Shares

Honda may at any time consolidate its shares into a smaller number of shares by a special resolution of the general meeting of shareholders. A representative director of Honda must disclose the reason for the consolidation of the shares at the general meeting of shareholders. If the consolidation of shares effected by Honda produces any fractional shares, any dissenting shareholder of such fractional shares may request that Honda purchase all of such fractional shares by such holder, at a fair price.

Under the Book-Entry Law, Honda must give notice to JASDEC regarding a consolidation of shares at least two weeks prior to the relevant effective date. On the effective date of the consolidation of shares, the numbers of shares recorded in all accounts held by its shareholders at account management institutions or at JASDEC will be decreased in accordance with the applicable ratio.

Japanese Unit Share System

Consistent with the requirements of the Company Law, the articles of incorporation of Honda adopts a unit share system called *tan-gen-kabu*, under which 100 shares constitute one voting unit of shares. The Board of Directors of Honda by itself may reduce, but not increase, the number of shares that constitute one voting unit or abolish the unit share system entirely by amendments to the articles of incorporation by a board resolution without approval of shareholders. An increase in the number of shares that constitute one voting unit requires an amendment to the articles of incorporation by a special resolution of a general shareholders' meeting. In any case, the number of shares constituting one voting unit may not exceed 1,000 shares or 0.5% of the total issued shares.

Under the Book-Entry Law, shares constituting less than one voting unit are transferable. Under the rules of the Japanese financial instruments exchanges, however, shares constituting less than one voting unit do not comprise a trading unit, except in limited circumstances, and accordingly may not be sold on the Japanese financial instruments exchanges.

The holder of shares constituting less than one voting unit may at any time require Honda to purchase or sell such shares to constitute one voting unit at the market price in accordance with Honda's share handling regulations (see below). Because the transfer of ADRs does not require changes in the ownership of the underlying shares, holders of ADRs evidencing ADSs that constitute less than one voting unit of shares are not affected by these restrictions in their ability to transfer the ADRs. However, because transfers of less than one voting unit of the underlying shares are normally prohibited under the unit share system, under the Deposit Agreement, the right of ADR holders to surrender their ADRs and withdraw the underlying shares for sale in Japan may only be exercised as to whole voting units.

Right of a Holder of Shares Representing Less Than One Voting Unit to Require Honda to Purchase or Sell Its Shares

A holder of Honda's shares representing less than one voting unit may at any time require Honda to purchase its shares. These shares will be purchased at (a) the closing price of the shares reported by the Tokyo Stock Exchange on the day when the request for purchase reaches the share handling agent, or (b) if no sale takes place on the Tokyo Stock Exchange on that day, then the price at which the first sale of shares is effected on the Tokyo Stock Exchange thereafter. In each case, Honda will request the payment of an amount determined by Honda as an amount equal to the brokerage commission required for the sale and purchase of the shares. A holder of shares representing less than one voting unit may, in accordance with the provisions of Honda's share handling regulations, also make a request to the effect that such number of shares should be sold to it that will, when added to the shares less than one voting unit already held by that shareholder, constitute one voting unit.

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

However, because holders of ADSs representing less than one unit are not able to withdraw the underlying shares from deposit, these holders will not be able to exercise many shareholder rights as a practical matter.

Table of Contents

Other Rights of a Holder of Shares Representing Less Than One Voting Unit

In addition to the rights described in the preceding paragraph, a holder of shares representing less than one voting unit also has the rights including the followings and these rights may not be restricted by the articles of incorporation:

rights to receive any consideration for acquisition by a corporation of special shares all of which may be acquired by such corporation (*zembu shutoku joukou tsuki shurui kabushiki*) as provided by Article 171, paragraph 1, item 1 of the Company Law,

rights to receive any cash or other consideration for acquisition by a corporation of shares which may be acquired by such corporation on occurrence of certain event (*shutoku joukou tsuki shurui kabushiki*) as provided by Article 107, paragraph 1, item 3 of the Company Law,

rights to be allocated any shares without consideration as provided by Article 185 of the Company Law,

rights to receive distribution of any residual assets of a corporation, and

any other rights provided in the relevant Ordinance of the Ministry of Justice, including rights to receive cash or other distribution derived from consolidation of shares, stock split, allocation of stock acquisition rights without consideration, distribution of surplus or reorganization of a corporation.

Other rights of a holder of shares constituting less than one voting unit may be restricted if the articles of incorporation so provide.

Voting rights under the unit share system

Under the unit share system, the shareholders shall have one voting right for each voting unit of shares that they hold. A shareholder who owns shares representing less than one voting unit will not be able to exercise voting rights and any other rights relating thereto.

Voting Rights

Honda holds its ordinary general meeting of shareholders in June of each year. In addition, Honda may hold an extraordinary general meeting of shareholders whenever necessary by giving at least two weeks advance notice. Under the Company Law, notice of any shareholders meeting must be given to each shareholder having voting rights or, in the case of a non-resident shareholder, to his resident proxy or mailing address in Japan in accordance with Honda's share handling regulations, at least two weeks prior to the date of the meeting. The record date for an ordinary shareholders meeting is March 31 of each year.

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

A shareholder of Honda is generally entitled to one vote per voting unit of shares as described in this paragraph and under Japanese Unit Share System above. In general, under the Company Law and the articles of incorporation of Honda, a resolution may be adopted at a meeting of shareholders by a majority of the shares having voting rights represented at the meeting. The Company Law and Honda's articles of incorporation require a quorum for the election of Directors and Corporate Auditors of not less than one-third of the total number of voting rights of all shareholders and the resolution shall be adopted by majority voting. Honda's shareholders are not entitled to cumulative voting in the election of directors. A corporate shareholder whose voting rights are in turn more than one-quarter directly or indirectly owned by Honda does not have voting rights. Also, Honda does not have voting rights with respect to its own shares.

Shareholders may exercise their voting rights through proxies, provided that those proxies are also shareholders who have voting rights. Shareholders who intend to be absent from a general meeting of shareholders may exercise their voting rights in writing. In addition, they may exercise their voting rights by electronic means if the Board of Directors decides to accept such means.

Table of Contents

Under the Company Law, in order to approve certain significant matters of a corporation, more strict requirement for the quorum or the number of voting rights to approve is provided. The articles of incorporation of Honda provide that such resolution may be adopted at a meeting of shareholders by two thirds of the voting rights of the shareholders present at the meeting representing at least one third of all the shareholders having voting rights. Such significant matters include, but are not limited to:

acquisition of its own shares by Honda from a specific shareholder other than its subsidiary,

acquisition of special shares all of which may be acquired by Honda (*zembu shutoku joukou tsuki shurui kabushiki*),

consolidation of the shares,

reduction of stated capital (with certain exceptions),

issuance or transfer of new shares or existing shares held by Honda as treasury stock to persons other than the shareholders at a specially favorable price,

issuance of stock acquisition rights (including those incorporated in bonds with stock acquisition rights) to persons other than the shareholders under specially favorable conditions,

discharge of a part of responsibilities of Directors, Corporate Auditors or accounting auditors,

distribution of surplus by property other than cash (only in the case that no cash distribution is allowed to shareholders),

amendments to the articles of incorporation,

transfer of whole or important part of business,

dissolution of a corporation,

reorganization of a corporation.

Pursuant to the terms of the Deposit Agreement, upon receipt of notice of any meeting of holders of Common Stock of the Registrant, the Depositary will mail to the record holders of ADRs and publish a notice which will contain the information in the notice of the meeting. The record holders of ADRs at the close of business on a date specified by the Depositary will be entitled to instruct the Depositary as to the exercise of the voting rights pertaining to the amount of Common Stock of the Registrant represented by their respective Depositary Receipts. The Depositary will endeavor, in so far as practicable, to vote the amount of Common Stock of the Registrant represented by such Depositary Receipts in accordance with such instructions, and the Registrant has agreed to take all action which may at any time be deemed necessary by the Depositary in order to enable the Depositary to so vote such Common Stock. In the absence of such instructions, the Depositary has agreed to use its best efforts to give a discretionary proxy to a person designated by the Registrant. However, such proxy may not be given with respect to any proposition of which the Depositary has knowledge regarding any contest related to the action to be taken at the meeting, or the purpose of which is to authorize a merger, consolidation or any other matter which may substantially affect the rights or privileges of the Common Stock

of the Registrant or other securities, property or cash received by the Depository or the Custodian in respect thereof.

Subscription Rights and Stock Acquisition Rights

Holders of Honda's shares have no preemptive rights under Honda's articles of incorporation. Under the Company Law, the Board of Directors may, however, determine that shareholders be given subscription rights in connection with a particular issue of new shares. In this case, such rights must be given to all shareholders as of a specified record date by at least two weeks' prior public notice to shareholders of the record date. In addition, individual notice must be given to each of these shareholders at least two weeks prior to the date of expiration of the subscription rights.

Table of Contents

Honda also may decide to grant the stock acquisition rights (*shinkabu-yoyakuken*), with or without bonds, to any person including its shareholders, by resolution of its Board of Directors unless issued under specially favorable conditions. The holder of such rights may exercise its rights within the exercise period by paying subscription moneys all as prescribed in the terms of such rights.

Liquidation Rights

In the event of a liquidation of Honda, the assets remaining after payment of all debts, liquidation expenses and taxes will be distributed among the shareholders in proportion to the number of shares they own.

Liability to Further Calls or Assessments

All of Honda's currently issued shares, including shares represented by the ADSs, are fully paid and nonassessable.

Holdings of Shares by Foreign Investors

There are no limitations on the rights of non-residents or foreign shareholders to hold or exercise voting rights on Honda's shares imposed by the laws of Japan or Honda's articles of incorporation or other constituent documents.

Shareholders' Register Manager

Sumitomo Mitsui Trust Bank, Limited is the Shareholders' Register Manager for the shares. Sumitomo Mitsui Trust Bank's office is located at 4-1, Marunouchi 1-chome, Chiyoda-ku, Tokyo, 100-8233, Japan. Sumitomo Mitsui Trust Bank maintains Honda's register of shareholders and records the names and addresses of its shareholders and other relevant information in its register of shareholders upon notice thereof from JASDEC, as described in "Record Date" below.

Record Date

As mentioned above, the record dates for Honda's dividends are June 30, September 30, December 31 and March 31, if paid. A holder of shares constituting one or more whole voting units who is registered as a holder on Honda's register of shareholders at the close of business as of March 31 is entitled to exercise its voting rights at the ordinary general meeting of shareholders with respect to the fiscal year ended on March 31. In addition, Honda may set a record date for determining the shareholders entitled to other rights and for other purposes by giving at least two weeks' prior public notice.

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

Under the Book-Entry Law, Honda is required to give notice of each record date to JASDEC at least two weeks prior to such record date. JASDEC is required to promptly give notice to Honda of the names and addresses of all of its shareholders of record, the numbers of shares held by them and other relevant information as of such record date.

The shares generally trade ex-dividend or ex-rights on the Japanese financial instruments exchanges on the second business day prior to a record date (or if the record date is not a business day, the third business day prior thereto).

Acquisition by Honda of Shares

Under the Company Law, Honda is generally required to obtain authorization for any acquisition of its own shares by means of:

- (i) a resolution at a general meeting of shareholders, which may be effective for one year at the most from the date thereof;

Table of Contents

(ii) a resolution of the Board of Directors if the acquisition is in accordance with its articles of incorporation; or

(iii) a resolution of the Board of Directors if the acquisition is to purchase its shares from a subsidiary.

Honda may only dispose of shares so acquired in accordance with the procedures applicable to a new share issuance under the Company Law.

Upon due authorization, Honda may acquire its own shares:

in the case of (i) and (ii) above, from stock markets or by way of tender offer;

in the case of (i) above, from a specific person, but only if its shareholders approve such acquisition by special resolution; and

in the case of (iii) above, from such subsidiary.

In the event Honda is to acquire its own shares from a specific person other than its subsidiary at a price which is higher than the higher of (x) the final market price on the market trading such shares as of the date immediately preceding the date of the required resolution or (y) in the event that such shares are subject to a tender offer, etc., the price set in the contract regarding such tender offer, any shareholder may request that Honda includes such shareholder's shares in the proposed purchase.

Acquisitions described in (i) through (iii) above must satisfy certain other requirements, including the restriction of the source of consideration in which the total amount of the purchase price of such own shares may not exceed the distributable amount of the corporation.

Reports to Shareholders

Honda currently furnishes shareholders with notices of shareholders' meetings, business reports, including financial statements, and notices of resolutions adopted at the shareholders' meetings, all of which are in Japanese. Such notices as described above may be furnished by electronic means to those shareholders who have approved such way of furnishing notices. Pursuant to its articles of incorporation, upon convening a general meeting of shareholders, Honda may deem that the information required to be described or indicated in the reference documents for the general meeting of shareholders, business reports, financial statements and consolidated financial statements shall have been provided to the shareholders when such information is disclosed, pursuant to laws or regulations, through a method that uses the Internet. Further, pursuant to its articles of incorporation, Honda's public notices to shareholders shall be given in Japanese by way of electronic public notice; provided, however, that if any public notice is unable to be given by electronic method due to any accident or for any other unavoidable reason, such public notice shall be given by publication in the Nihon Keizai Shimbun, a Japanese newspaper of general circulation.

Report of Substantial Shareholdings

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

The Financial Instruments and Exchange Law of Japan and regulations under such law require any person other than the relevant corporation who has become a holder (together with its related persons) of more than 5% of the total issued shares of a corporation listed on any Japanese financial instruments exchange or whose shares are traded on the over-the-counter market (including ADSs representing such shares) to file with the Director of a competent Local Finance Bureau, within five business days, in general, a report concerning those shareholdings. A similar report must also be filed to reflect any change of 1% or more in any shareholding or any change in material matters set out in reports previously filed. As of April 1, 2014, any person who filed a report on or after that date to reflect a change in holding of 5% or less of the total issued shares is not required to file any further report for a change of 1% or more in shareholding (unless the holding exceeds 5%) or any change in material matters previously reported. Copies of any report must also be furnished to all Japanese financial instruments exchanges on which the corporation's shares are listed or in the case of shares traded on the over-the-counter

Table of Contents

market, the Japan Securities Dealers Association. For this purpose, shares issuable or transferable to such person upon exercise of exchangeable securities, conversion of convertible securities or exercise of warrants or stock acquisition rights are taken into account in determining both the number of shares held by that holder and the corporation's total issued share capital.

Daily Price Limits under Japanese Financial Instruments Exchange Rules

Share prices on Japanese financial instruments exchanges are determined on a real-time basis by the equilibrium between bids and offers. These exchanges set daily price limits, which limit the maximum range of fluctuation within a single trading day. Daily price limits are set in absolute yen according to the previous day's closing price or special quote. Although transactions may continue at the upward or downward limit price if the limit price is reached on a particular trading day, no transactions may take place outside these limits. Consequently, an investor wishing to sell at a price above or below the relevant daily limit may not be able to sell its shares at such price on a particular trading day, or at all.

C. Material Contracts

All contracts concluded by Honda during the two years preceding this filing were entered into in the ordinary course of business.

D. Exchange Controls

There are no laws, decrees, regulations or other legislation of Japan which materially affect our ability to import or export capital for our use or our ability to pay dividends or other payments to non-resident holders of our shares.

E. Taxation

Japanese Taxes

The following is a summary of the principal Japanese tax consequences as of the date of filing of this Form 20-F to owners of Honda's shares or ADSs who are non-resident individuals or non-Japanese corporations without a permanent establishment in Japan to which income from Honda's shares is attributable. The tax treatment is subject to possible changes in the applicable Japanese laws or double taxation conventions occurring after that date. This summary is not exhaustive of all possible tax considerations that may apply to a particular investor. Potential investors should consult their own tax advisers as to:

the overall tax consequences of the acquisition, ownership and disposition of shares or ADSs, including specifically the tax consequences under Japanese law;

the laws of the jurisdiction of which they are resident; and

any tax treaty between Japan and their country of residence.

Generally, a non-resident of Japan or a non-Japanese corporation is subject to Japanese withholding tax on dividends paid by Japanese corporations.

In the absence of any applicable tax treaty, convention or agreement reducing the maximum rate of withholding tax, the rate of Japanese withholding tax applicable to dividends paid by Japanese corporations to a non-resident of Japan or a non-Japanese corporation is (a) 20.42% for dividends to be paid on or before December 31, 2037, and (b) 20% for dividends to be paid thereafter. With respect to dividends paid on listed shares issued by Japanese corporations (such as Honda's shares) to a non-resident of Japan or a non-Japanese corporation, the aforementioned 20.42% or 20% withholding tax rate is reduced to (i) 15.315% for dividends to be paid on or before December 31, 2037, and (ii) 15% for dividends to be paid thereafter, except for dividends paid to any individual shareholder who holds 3% or more of the issued shares of that corporation. Japan has entered into income tax treaties, conventions or agreements, whereby the maximum withholding tax rate is

Table of Contents

generally set at 15% or 10% for portfolio investors (15% under the income tax treaties with, among others, Belgium, Canada, Denmark, Finland, Germany, Ireland, Italy, Luxembourg, New Zealand, Norway, Singapore, and Spain, and 10% under the income tax treaties with, among others, Australia, France, the Netherlands, Portugal, Sweden, Switzerland, the United Kingdom, and the United States).

Pursuant to the Convention Between the United States of America and Japan for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with Respect to Taxes on Income (the U.S.-Japan Tax Treaty), a portfolio investor that is a U.S. holder is generally subject to Japanese withholding tax on dividends on shares at a rate of 10%. Under Japanese tax law, the maximum rate applicable under the tax treaties, conventions or agreements shall be applicable except when such maximum rate is more than the Japanese statutory rate.

Gains derived from the sale outside Japan of common stock or Depositary Receipts by a non-resident of Japan or a non-Japanese corporation, or from the sale of common stock within Japan by a non-resident of Japan or by a non-Japanese corporation not having a permanent establishment in Japan, are in general not subject to Japanese income or corporation taxes. Japanese inheritance and gift taxes at progressive rates may be payable by an individual who has acquired common stock or Depositary Receipt as a legatee, heir or donee, even if the individual is not a Japanese resident.

United States Taxes

This section describes the material U.S. federal income tax consequences of the ownership of shares or ADSs by U.S. holders, as defined below. It applies only to persons who hold shares or ADSs as capital assets for tax purposes.

This section is based on the Internal Revenue Code of 1986, as amended (the Code), its legislative history, existing and proposed regulations, published rulings and court decisions, all as currently in effect, as well as on the U.S.-Japan Tax Treaty. These laws are subject to change, possibly on a retroactive basis. In addition, this section is based in part upon the representations of the Depositary and the assumption that each obligation in the Deposit Agreement and any related agreement will be performed in accordance with its terms.

For purposes of the U.S.-Japan Tax Treaty and the Code, U.S. holders of ADRs evidencing ADSs will be treated as the owners of the shares represented by those ADRs. Exchanges of shares for ADRs and ADRs for shares generally will not be subject to U.S. federal income tax. For purposes of this discussion, a U.S. holder is a beneficial owner of shares or ADSs that is, for U.S. federal income tax purposes, (i) a citizen or resident individual of the United States, (ii) a domestic corporation, (iii) an estate whose income is subject to United States federal income tax regardless of its source, or (iv) a trust if a United States court can exercise primary supervision over the trust's administration and one or more United States persons are authorized to control all substantial decisions of the trust; and that, for purposes of the U.S.-Japan Tax Treaty, is not ineligible for benefits under the U.S.-Japan Tax Treaty with respect to income and gain from the shares or ADSs.

This section does not apply to a person who is a member of a special class of holders subject to special rules, including a dealer in securities, a trader in securities that elects to use a mark-to-market method of accounting for its securities holdings, a tax-exempt organization, a life insurance company, a person liable for alternative minimum tax, a person that actually or constructively owns 10% or more of the voting stock of Honda, a person that holds shares or ADSs as part of a straddle or a hedging or conversion transaction, a person that purchases or sells shares or ADSs as part of a wash sale for tax purposes, or a person whose functional currency is not the U.S. dollar.

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

If a partnership holds the shares or ADSs, the U.S. federal income tax treatment of a partner will generally depend on the status of the partner and the tax treatment of the partnership. A partner in a partnership holding the shares or ADSs should consult its tax advisor with regard to the U.S. federal income tax treatment of an investment in the shares or ADSs.

Table of Contents

This summary is not a comprehensive description of all the tax considerations that may be relevant with respect to a U.S. holder's shares or ADSs. Each beneficial owner of shares or ADSs should consult its own tax advisor regarding the U.S. federal, state and local and other tax consequences of owning and disposing of shares and ADSs in its particular circumstances.

Taxation of Dividends

Under the U.S. federal income tax laws, and subject to the passive foreign investment company, or PFIC, rules discussed below, the gross amount of any dividend paid by Honda out of its current or accumulated earnings and profits (as determined for U.S. federal income tax purposes) to a U.S. holder is subject to U.S. federal income taxation. A U.S. holder must include any Japanese tax withheld from the dividend payment in this gross amount even though it does not in fact receive it.

Dividends paid to a noncorporate U.S. holder that constitute qualified dividend income will be taxable to such holder at the preferential rates applicable to long term capital gains provided that the noncorporate U.S. holder holds the shares or ADSs with respect to which the dividends are paid for more than 60 days during the 121 day period beginning 60 days before the ex-dividend date and meets other holding period requirements. Dividends that Honda pays with respect to the shares or ADSs generally will be qualified dividend income. A U.S. holder must include the dividend in its taxable income when the holder, in the case of shares, or the Depositary, in the case of ADSs, receives the dividend, actually or constructively. The dividend will not be eligible for the dividends-received deduction generally allowed to U.S. corporations in respect of dividends received from other U.S. corporations. The amount of the dividend distribution that a U.S. holder must include in its income will be the U.S. dollar value of the Japanese yen payments made, determined at the spot Japanese yen/U.S. dollar rate on the date of the dividend distribution, regardless of whether the payment is in fact converted into U.S. dollars. Generally, any gain or loss resulting from currency exchange fluctuations during the period from the date the U.S. holder includes the dividend payment in income to the date it converts the payment into U.S. dollars will be treated as ordinary income or loss and will not be eligible for the special tax rate applicable to qualified dividend income. The gain or loss generally will be income or loss from sources within the U.S. for foreign tax credit limitation purposes. Distributions in excess of current and accumulated earnings and profits, as determined for U.S. federal income tax purposes, will be treated as a non-taxable return of capital to the extent of U.S. holder's basis in the shares or ADSs and thereafter as capital gain. However, Honda does not expect to calculate earnings and profits in accordance with U.S. federal income tax principles. Accordingly, a U.S. holder should expect to generally treat distributions that Honda makes as dividends.

Subject to certain limitations, the Japanese tax withheld in accordance with the U.S.-Japan Tax Treaty and paid over to Japan will be creditable or deductible against a U.S. holder's United States federal income tax liability. Special rules apply in determining the foreign tax credit limitation with respect to dividends that are subject to the preferential rates. To the extent a refund of the tax withheld is available to a U.S. holder under Japanese law or under the U.S.-Japan Tax Treaty, the amount of tax withheld that is refundable will not be eligible for credit against the U.S. holder's United States federal income tax liability.

Dividends will generally be income from sources outside the United States and will, depending on a U.S. holder's circumstances, be either passive or general income for purposes of computing the foreign tax credit allowable to such U.S. holder.

Taxation of Capital Gains

Subject to the PFIC rules discussed below, if a U.S. holder sells or otherwise disposes of its shares or ADSs, it will recognize capital gain or loss for U.S. federal income tax purposes equal to the difference between the U.S. dollar value of the amount that it realizes and its tax basis, determined in U.S. dollars, in its shares or ADSs. Capital gain of a noncorporate U.S. holder is generally taxed at preferential rates where the

property is held for more than one year. The gain or loss will generally be income or loss from sources within the U.S. for foreign tax credit limitation purposes.

Table of Contents

Passive Foreign Investment Company (PFIC) Rules

Honda believes its shares and ADSs should not be treated as stock of a PFIC for United States federal income tax purposes. This conclusion is a factual determination that is made annually and thus may be subject to change.

In general, Honda will be a PFIC with respect to a U.S. holder if for any taxable year in which such holder held shares or ADSs of Honda:

at least 75% of Honda's gross income for the taxable year is passive income; or

at least 50% of the value, determined on the basis of a quarterly average, of Honda's assets is attributable to assets that produce or are held for the production of passive income.

Passive income generally includes dividends, interest, royalties, rents (other than certain rents and royalties derived in the active conduct of a trade or business), annuities and gains from assets that produce passive income. If a foreign corporation owns at least 25% by value of the stock of another corporation, the foreign corporation is treated for purposes of the PFIC tests as owning its proportionate share of the assets of the other corporation, and as receiving directly its proportionate share of the other corporation's income.

If Honda is treated as a PFIC, and a U.S. holder does not make a mark-to-market election, as described below, that U.S. holder will be subject to special rules with respect to:

any gain it realizes on the sale or other disposition of its shares or ADSs; and

any excess distribution that Honda makes to the U.S. holder (generally, any distributions to it during a single taxable year that are greater than 125% of the average annual distributions received by it in respect of the shares or ADSs during the three preceding taxable years or, if shorter, its holding period for the shares or ADSs).

Under these rules:

the gain or excess distribution will be allocated ratably over the U.S. holder's holding period for the shares or ADSs,

the amount allocated to the taxable year in which it realized the gain or excess distribution will be taxed as ordinary income,

the amount allocated to each prior year, with certain exceptions, will be taxed at the highest tax rate in effect for that year, and

the interest charge generally applicable to underpayments of tax will be imposed in respect of the tax attributable to each such year.

Special rules apply for calculating the amount of the foreign tax credit with respect to excess distributions by a PFIC.

If a U.S. holder owns shares or ADSs in a PFIC that are treated as marketable stock, such holder may make a mark-to-market election. If a U.S. holder makes this election, it will not be subject to the PFIC rules described above. Instead, in general, a U.S. holder will include as ordinary income each year the excess, if any, of the fair market value of its shares or ADSs at the end of the taxable year over its adjusted basis in its shares or ADSs. These amounts of ordinary income will not be eligible for the favorable tax rates applicable to qualified dividend income or long-term capital gains. A U.S. holder will also be allowed to take an ordinary loss in respect of the excess, if any, of the adjusted basis of its shares or ADSs over their fair market value at the end of the taxable year (but only to the extent of the net amount of previously included income as a result of the mark-to-market election). The U.S. holder's basis in the shares or ADSs will be adjusted to reflect any such income or loss amount.

Table of Contents

In addition, notwithstanding any election that a U.S. holder makes with regard to the shares or ADSs, dividends that a U.S. holder receives from Honda will not constitute qualified dividend income to such holder if Honda is a PFIC either in the taxable year of the distribution or the preceding taxable year. Moreover, shares or ADSs held by a U.S. holder will be treated as stock in a PFIC if Honda was a PFIC at any time during the U.S. holder's holding period in its shares or ADSs, even if Honda is not currently a PFIC, unless a U.S. holder has made a mark-to-market election with respect to its shares or ADSs or the U.S. holder has otherwise made a "purging election" with respect to its shares or ADSs. Dividends that a U.S. holder receives that do not constitute qualified dividend income are not eligible for taxation at the 15% maximum rate applicable to qualified dividend income. Instead, the U.S. holder must include the gross amount of any such dividend paid by Honda out of Honda's accumulated earnings and profits (as determined for United States federal income tax purposes) in the U.S. holder's gross income, and it will be subject to tax at rates applicable to ordinary income.

If a U.S. holder owns shares or ADSs during any year that Honda is a PFIC with respect to such U.S. holder, it must file Internal Revenue Service Form 8621, subject to certain applicable exceptions set forth in Internal Revenue Service regulations. U.S. holders should consult their own tax advisors regarding the PFIC rules and potential filing and other requirements.

F. Dividends and Paying Agents

Not applicable.

G. Statement by Experts

Not applicable.

H. Documents on Display

Honda is subject to the information requirements of the Securities Exchange Act of 1934 and, in accordance therewith, it will file annual reports on Form 20-F within six months of its fiscal year-end and furnish other reports and information on Form 6-K with the Securities and Exchange Commission. These reports and other information can be inspected without charge at the public reference room at the Securities and Exchange Commission at 100 F Street, N.E., Washington, D.C. 20549. You can also obtain copies of such material by mail from the public reference room of the Securities and Exchange Commission at prescribed fees. You may obtain information on the operation of the Securities and Exchange public reference room by calling the Securities and Exchange Commission in the United States at 1-800-SEC-0330. The Securities and Exchange Commission also maintains a web site at www.sec.gov that contains reports, proxy statements and other information regarding registrants that file electronically with the Securities and Exchange Commission. Also, as a foreign private issuer, Honda is exempt from the rules under the Securities Exchange Act of 1934 prescribing the furnishing and content of proxy statements to shareholders.

I. Subsidiary Information

Not applicable.

Item 11. Quantitative and Qualitative Disclosure about Market Risk

We have changed our disclosure method for reporting quantitative information about market risk from a tabular presentation to a sensitivity analysis in line with the IFRS requirement to report such information using a sensitivity analysis. The information required under this Item 11 is set forth in (b) Market Risk of note (25) Financial Risk Management to the accompanying consolidated financial statements.

3. Fees and charges

JPMorgan Chase Bank, N.A., as ADR depository, collects fees for delivery and surrender of ADSs directly from investors, or from intermediaries acting for them, depositing ordinary shares or surrendering ADSs for the purpose of withdrawal. The ADR depository collects fees for making distributions to investors by deducting those fees from the amounts distributed or by selling a portion of the distributable property to pay the fees.

The charges of the ADR depository payable by investors are as follows:

Category (as defined by SEC)	Depository Actions	Associated Fee
(a) Depositing or substituting the underlying shares	Each person to whom ADRs are issued against deposits of Shares, including deposits and issuances in respect of:	USD 5.00 for each 100 ADSs (or portion thereof) evidenced by the new ADRs delivered
	Share distributions, stock split, rights, merger	

Exchange of securities or any other transaction or event or other distribution affecting the ADSs or the deposited securities

(b) Receiving or distributing dividends	Not applicable	
(c) Selling or exercising rights	Distribution or sale of securities, the fee being in an amount equal to the fee for the execution and delivery of ADSs which would have been charged as a result of the deposit of such securities	USD 5.00 for each 100 ADSs (or portion thereof)
(d) Withdrawing an underlying security	Acceptance of ADRs surrendered for withdrawal of deposited securities	USD 5.00 for each 100 ADSs (or portion thereof) evidenced by the ADRs surrendered
(e) Transferring, splitting or grouping receipts	Transfers, combining or grouping of depositary receipts	USD 2.50 per ADS certificate
(f) General depositary services, particularly those charged on an annual basis	Not applicable	

Table of Contents

Category	Depository Actions	Associated Fee
(g) Expenses of the depositary	Expenses incurred on behalf of holders in connection with	Expenses payable at the sole discretion of the depositary by billing holders or by deducting charges from one or more dividends or other cash distributions
	Compliance with foreign exchange control regulations or any law or regulation relating to foreign investment	
	The depositary's or its custodian's compliance with applicable law, rule or regulation	
	Stock transfer or other taxes and other governmental charges	
	Cable, telex, facsimile transmission/delivery	
	Expenses of the depositary in connection with the conversion of foreign currency into U.S. dollars (which are paid out of such foreign currency)	
	Any other charge payable by the depositary or its agents	

4. Direct / Indirect Payment Disclosure

Honda does not receive any reimbursement from the depositary bank. JPMorgan Chase Bank, N.A. agreed to waive an out-of-pocket expense of \$50,000 associated with the administration of the ADR program. The out-of-pocket expenses relate to depositary service administration, including but not limited to, dividend disbursement and proxy process.

PART II

Item 13. Defaults, Dividend Arrearages and Delinquencies

None.

Item 14. Material Modifications to the Rights of Security Holders and Use of Proceeds

None.

Item 15. Controls and Procedures

Disclosure Controls and Procedures

Under the supervision and participation of our management, including our Chief Executive Officer and Chief Operating Officer for Business Management Operations (who is our Chief Financial Officer), we performed an evaluation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the U.S. Securities Exchange Act of 1934) as of March 31, 2015. Based on that evaluation, our Chief Executive Officer and Chief Operating Officer for Business Management Operations concluded that our disclosure controls and procedures were effective as of that date.

Management's Report on Internal Control over Financial Reporting

The management of Honda is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the U.S. Securities Exchange Act of 1934).

Table of Contents

The Company's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles, and includes those policies and procedures that (1) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions or because the degree of compliance with policies or procedures may deteriorate.

Our management assessed the effectiveness of internal control over financial reporting as of March 31, 2015 based on the criteria established in Internal Control-Integrated Framework (2013) published by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on that assessment, our management concluded that our internal control over financial reporting was effective as of March 31, 2015.

The Company's independent registered public accounting firm has audited the effectiveness of the Company's internal control over financial reporting, as stated in their report which is included herein.

Changes in Internal Control over Financial Reporting

No significant changes were made in our internal control over financial reporting for the fiscal year ended March 31, 2015 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 16A. Audit Committee Financial Expert

Honda's Board of Corporate Auditors has determined that Mr. Kunio Endo and Mr. Hideo Takaura are each qualified as an audit committee financial expert as defined by the rules of the SEC. Mr. Endo and Mr. Takaura were each elected to become one of Honda's Corporate Auditors at the general meeting of shareholders held on June 19, 2013 and June 17, 2015, respectively. See Item 6.A Directors and Senior Management for additional information regarding them. They meet the independence requirements imposed on Corporate Auditors under the Company Law of Japan. See Item 6.C Board Practices for an explanation of such independence requirements.

Item 16B. Code of Ethics

Honda has adopted a code of ethics that applies to its principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions. A copy of Honda's code of ethics is attached as an exhibit to this Annual Report on Form

20-F.

Item 16C. Principal Accountant Fees and Services

KPMG AZSA LLC has served as Honda's independent registered public accounting firm for each of the fiscal years in the three-year period ended March 31, 2015, for which audited financial statements appear in this Annual Report on Form 20-F.

Table of Contents

The following table presents the aggregate fees for professional services and other services rendered by KPMG AZSA LLC and the various member firms of KPMG International to Honda in fiscal year 2014 and 2015:

	Yen (millions)	
	2014	2015
Audit Fees	¥ 3,674	¥ 4,180
Audit-Related Fees	89	130
All Other Fees	31	28
Total	¥ 3,794	¥ 4,338

Audit Fees means fees for audit services, which are professional services provided by independent auditors for the audit of our annual financial statements or for services that are normally provided by independent auditors with respect to any submissions required under applicable laws and regulations.

Audit-Related Fees means fees for audit-related services, which are assurance services provided by independent auditors that are reasonably related to the carrying out of auditing or reviewing of our financial reports and other related services. This category includes fees for agreed-upon or expanded audit procedures related to accounting and/or other records.

All Other Fees mainly includes fees for services rendered with respect to advisory services.

Pre-approval policies and procedures of the Board of Corporate Auditors

Under applicable SEC rules, our Board of Corporate Auditors must pre-approve audit services, audit-related services, tax services and other services to be provided by the principal accountant to ensure that the independence of the principal accountant under such rules is not impaired as a result of the provision of any of these services.

While, as a general rule, specific pre-approval must be obtained for these services to be provided, our Board of Corporate Auditors has adopted pre-approval policies and procedures which list particular audit and non-audit services that may be provided without specific pre-approval. Our Board of Corporate Auditors reviews this list of services on an annual basis, and is informed of each such service that is actually provided.

All services to be provided to us by the principal accountant and its affiliates which are not specifically set forth in this list must be specifically pre-approved by our Board of Corporate Auditors.

None of the services described above in this Item 16C. were waived from the pre-approval requirements pursuant to Rule 2-01(c)(7)(i)(C) of Regulation S-X.

Item 16D. Exemptions from the Listing Standards for Audit Committees

With respect to the requirements of Rule 10A-3 under the Securities Exchange Act of 1934 relating to listed company audit committees, which apply to us through Section 303A.06 of the New York Stock Exchange's Listed Company Manual, we rely on an exemption provided by paragraph (c)(3) of that Rule available to foreign private issuers with Boards of Corporate Auditors meeting certain requirements. For a New York Stock Exchange-listed Japanese company with a Board of Corporate Auditors, the requirements for relying on paragraph (c)(3) of Rule 10A-3 are as follows:

The Board of Corporate Auditors must be established, and its members must be selected, pursuant to Japanese law expressly requiring such a board for Japanese companies that elect to have a corporate governance system with Corporate Auditors.

Table of Contents

Japanese law must and does require the Board of Corporate Auditors to be separate from the Board of Directors.

None of the members of the Board of Corporate Auditors may be elected by management, and none of the listed company's executive officers may be a member of the Board of Corporate Auditors.

Japanese law must and does set forth standards for the independence of the members of the Board of Corporate Auditors from the listed company or its management.

The Board of Corporate Auditors, in accordance with Japanese law or the listed company's governing documents, must be responsible, to the extent permitted by Japanese law, for the appointment, retention and oversight of the work of any registered public accounting firm engaged (including, to the extent permitted by Japanese law, the resolution of disagreements between our management and the auditor regarding financial reporting) for the purpose of preparing or issuing an audit report or performing other audit, review or attest services for the listed company, including its independent registered public accounting firm that audits its consolidated financial statements included in its Annual Reports on Form 20-F.

To the extent permitted by Japanese law:

the Board of Corporate Auditors must establish procedures for (i) the receipt, retention and treatment of complaints received by us regarding accounting, internal accounting controls, or auditing matters, and (ii) the confidential, anonymous submission by our employees of concerns regarding questionable accounting or auditing matters;

the Board of Corporate Auditors must have the authority to engage independent counsel and other advisers, as it determines necessary to carry out its duties; and

the listed company must provide for appropriate funding, as determined by its Board of Corporate Auditors, for payment of (i) compensation to any registered public accounting firm engaged for the purpose of preparing or issuing an audit report or performing other audit, review or attest services for us, (ii) compensation to any advisers employed by the Board of Corporate Auditors, and (iii) ordinary administrative expenses of the Board of Corporate Auditors that are necessary or appropriate in carrying out its duties.

In our assessment, our Board of Corporate Auditors, which meets the requirements for reliance on the exemption in paragraph (c)(3) of Rule 10A-3 as described above, is not materially less effective than an audit committee meeting all the requirements of paragraph (b) of Rule 10A-3 (without relying on any exemption provided by that Rule) at acting independently of management and performing the functions of an audit committee as contemplated therein.

Table of Contents**Item 16E. Purchases of Equity Securities by the Issuer and Affiliated Purchasers**

The following table sets forth certain information with respect to purchases by Honda of its own shares during the year ended March 31, 2015. There were no purchases of Honda's shares by its affiliated purchasers during that year.

Period	(a) Total Number of Shares Purchased ^(*)	(b) Average Price Paid per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Yen Amount of Shares that May Yet Be Purchased Under the Plans or Programs
April 1 to April 30, 2014	193	¥ 3,986		
May 1 to May 31, 2014	102	¥ 3,360		
June 1 to June 30, 2014	302	¥ 3,589		
July 1 to July 31, 2014	574	¥ 3,630		
August 1 to August 31, 2014	420	¥ 3,585		
September 1 to September 30, 2014	395	¥ 3,635		
October 1 to October 31, 2014	163	¥ 3,461		
November 1 to November 30, 2014	451	¥ 3,572		
December 1 to December 31, 2014	292	¥ 3,619		
January 1 to January 31, 2015	154	¥ 3,587		
February 1 to February 28, 2015	543	¥ 3,843		
March 1 to March 31, 2015	681	¥ 4,233		
Total	4,270	¥ 3,741		

* For each month, the number of shares shown in column (a) in excess of the number of shares shown in column (c) represents the aggregate number of shares representing less than one unit that Honda purchased from the holders thereof upon their request. For an explanation of the right of such holders, see "Japanese Unit Share System" Right of a Holder of Shares Representing Less Than One Voting Unit to Require Honda to Purchase or Sell Its Shares under Item 10.B of this Annual Report.

Item 16F. Change in Registrant's Certifying Accountant

Not applicable.

Item 16G. Corporate Governance

Companies listed on the New York Stock Exchange (the "NYSE") must comply with certain standards regarding corporate governance under Section 303A of the NYSE Listed Company Manual.

However, listed companies that are foreign private issuers, such as Honda, are permitted to follow home country practice in lieu of certain provisions of Section 303A.

Table of Contents

The following table shows the significant differences between the corporate governance practices followed by U.S. listed companies under Section 303A of the NYSE Listed Company Manual and those followed by Honda.

Corporate Governance Practices Followed by

NYSE-listed U.S. Companies

A NYSE-listed U.S. company must have a majority of directors meeting the independence requirements under Section 303A of the NYSE Listed Company Manual.

Corporate Governance Practices Followed by Honda

For certain large-scale Japanese companies, which employ a corporate governance system based on a Board of Corporate Auditors (the Board of Corporate Auditors system), including Honda, Japan's Company Law (to which amendments were effected as of May 1, 2015) requires that, if a company does not have any outside director at the end of a fiscal year, the company shall explain and disclose the reason why it is not appropriate to have an outside director at the annual general meeting of shareholders as well as in its convocation documents and business report.

Outside director is defined as a director who meets all of the following independence requirements: (1) a person who is not an executive director, executive officer, manager or any other employee of the company or its subsidiaries and has not been in such position for ten years prior to the assumption of office; (2) if the relevant person assumed an office of a non-executive director, accounting councilor or corporate auditor of the company or any of its subsidiaries during the ten years mentioned in (1) above, a person who had not been an executive director, executive officer, manager or any other employee of the company or any of its subsidiaries for further ten years prior to the assumption of such office; (3) a person who is not a director, corporate auditor, executive officer, manager or any other employee of the parent company or who is not a natural person controlling the company; (4) a person who is not an executive director, executive officer, manager or any other employee of a company which is controlled by the parent company or by the natural person controlling the company; and (5) a person who is not a spouse or a certain relative of (a) a director, executive officer, manager or any other important employee of the company or (b) the natural person controlling the company.

The responsibility of overseeing management and outside directors is assigned to the corporate auditors who also work with the accounting audit firm to oversee accounting. Corporate auditors are separate from the company's management and meet certain independence requirements under Japan's Company Law.

Table of Contents

Corporate Governance Practices Followed by

NYSE-listed U.S. Companies

Corporate Governance Practices Followed by Honda

In the case of Japanese companies which employ the Board of Corporate Auditors system, including Honda, at least half of the corporate auditors must be outside corporate auditors who must meet additional independence requirements under Japan's Company Law.

Outside corporate auditor is defined as a corporate auditor who meets all of the following independence requirements: (1) a person who has not been a director, accounting councilor, executive officer, manager or any other employee of the company or any of its subsidiaries for ten years prior to the assumption of office; (2) if the relevant person assumed an office of corporate auditor of the company or any of its subsidiaries during the ten years mentioned in (1) above, a person who had not been a director, accounting councilor, executive officer, manager or any other employee of the company or any of its subsidiaries for further ten years prior to the assumption of such office; (3) a person who is not a director, corporate auditor, executive officer, manager or any other employee of the parent company or who is not a natural person controlling the company; (4) a person who is not an executive director, executive officer, manager or any other employee of a company which is controlled by the parent company or by the natural person controlling the company; and (5) a person who is not a spouse or a certain relative of (a) a director, manager or any other important employee of the company or (b) the natural person controlling the company.

In addition, the listing rules of the Tokyo Stock Exchange, which Honda is subject to, require listed companies to have at least one independent director or corporate auditor, and to make efforts to have at least one independent director. Requirements for an independent director/corporate auditor are more stringent than those for outside directors or outside corporate auditors. Unlike an outside director/corporate auditor, an independent director/corporate auditor may not be (a) a person who is, or has been until recently, a major business counterparty or an executive director, executive officer, manager or employee of the major business counterparties, (b) a person who is, or has been until recently, a professional advisor receiving significant remuneration from the company, (c) a person who has been until recently a director, executive officer,

Table of Contents

Corporate Governance Practices Followed by

NYSE-listed U.S. Companies

A NYSE-listed U.S. company must have an audit committee composed entirely of independent directors, and the audit committee must have at least three members.

A NYSE-listed U.S. company must have a nominating/corporate governance committee entirely of independent directors.

Corporate Governance Practices Followed by Honda

corporate auditor, manager or employee of the parent company or a director, executive officer, manager or employee of the parent company's subsidiaries, or (d) a relative of persons mentioned in (a), (b) and (c) or a relative of certain scope of persons such as directors of the parent company or its subsidiaries. Now Honda has one independent Director out of two outside Directors and three independent Corporate Auditors out of three outside Corporate Auditors.

Like a majority of Japanese companies, Honda employs the Board of Corporate Auditors system as described above. Under this system, the Board of Corporate Auditors is a legally separate and independent body from the Board of Directors. The main function of the Board of Corporate Auditors is similar to that of independent directors, including those who are members of the audit committee, of a U.S. company: to monitor the performance of the directors, and review and express opinions on the method of auditing by the company's accounting audit firm and on such accounting audit firm's audit reports, for the protection of the company's shareholders.

Japanese companies which employ the Board of Corporate Auditors system, including Honda, are required to have at least three corporate auditors. Currently, Honda has five Corporate Auditors. Each Corporate Auditor has a four-year term. In contrast, the term of each Director of Honda is one year.

With respect to the requirements of Rule 10A-3 under the U.S. Securities Exchange Act of 1934 relating to listed company audit committees, Honda relies on an exemption under that rule which is available to foreign private issuers with Board of Corporate Auditors meeting certain criteria.

Honda's Directors are elected at a meeting of shareholders. Its Board of Directors does not have the power to fill vacancies thereon.

Honda's Corporate Auditors are also elected at a meeting of shareholders. A proposal by Honda's Board of Directors to elect a Corporate Auditor must be approved by a resolution of its Board of Corporate Auditors. The Board of Corporate Auditors is empowered to request that Honda's Directors submit a proposal for election of a Corporate Auditor to a meeting of shareholders. The Corporate Auditors have the right to state their opinion concerning election of a Corporate Auditor at the meeting of shareholders.

Table of Contents

Corporate Governance Practices Followed by

NYSE-listed U.S. Companies

A NYSE-listed U.S. company must have a compensation committee composed entirely of independent directors. Compensation committee members must satisfy the additional independence requirements under Section 303A.02(a)(ii) of the NYSE Listed Company Manual. A compensation committee must also have authority to retain or obtain the advice of compensation and other advisers, subject to prescribed independence criteria that the committee must consider prior to engaging any such adviser.

A NYSE-listed U.S. company must generally obtain shareholder approval with respect to any equity compensation plan.

Corporate Governance Practices Followed by Honda

Maximum total amounts of compensation for Honda's Directors and Corporate Auditors are proposed to, and voted on, by a meeting of shareholders. Once the proposals for such maximum total amounts of compensation are approved at the meeting of shareholders, each of the Board of Directors and Board of Corporate Auditors determines the compensation amount for each member within the respective maximum total amounts.

Currently, Honda does not adopt stock option compensation plans. If Honda were to adopt such a plan, Honda must obtain shareholder approval with respect to compensation for the Directors in the form of stock options, but the conditions of the stock options may be determined by the Board of Directors unless they are issued with specifically favorable conditions or price concerning the issuance and exercise of the stock options.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

Honda Motor Co., Ltd.:

We have audited the accompanying consolidated statements of financial position of Honda Motor Co., Ltd. and subsidiaries as of March 31, 2015 and 2014, and April 1, 2013, and the related consolidated statements of income, comprehensive income, changes in equity, and cash flows for each of the years in the two-year period ended March 31, 2015. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Honda Motor Co., Ltd. and subsidiaries as of March 31, 2015 and 2014, and April 1, 2013, and the results of their operations and their cash flows for each of the years in the two-year period ended March 31, 2015, in conformity with International Financial Reporting Standards as issued by the International Accounting Standards Board.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Honda Motor Co., Ltd.'s internal control over financial reporting as of March 31, 2015, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated June 26, 2015 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Table of Contents

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

Honda Motor Co., Ltd.:

We have audited Honda Motor Co., Ltd.'s internal control over financial reporting as of March 31, 2015, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Honda Motor Co., Ltd.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Honda Motor Co., Ltd. maintained, in all material respects, effective internal control over financial reporting as of March 31, 2015, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated statements of financial position of Honda Motor Co., Ltd. and subsidiaries as of March 31, 2015 and 2014, and April 1, 2013, and the related consolidated statements of income, comprehensive income, changes in equity, and cash flows for each of the years in the two-year period ended March 31, 2015, and our report dated June 26, 2015 expressed an unqualified opinion on those consolidated financial statements.

Table of Contents

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(1) Reporting Entity

Honda Motor Co., Ltd. (the Company) is a public company domiciled in Japan. The Company and its subsidiaries (collectively Honda) develop, manufacture and distribute motorcycles, automobiles, power products and others throughout the world, and also provide financial services to customers and dealers for the sale of those products. Principal manufacturing facilities are located in Japan, the United States of America, Canada, Mexico, the United Kingdom, Turkey, Italy, France, China, India, Indonesia, Malaysia, Thailand, Vietnam, Argentina and Brazil.

(2) Basis of Preparation

(a) Compliance with International Financial Reporting Standards

The Company's consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). The term IFRS also includes International Accounting Standards (IASs) and the related interpretations of the interpretations committees (SIC and IFRIC).

These are the first consolidated financial statements that the Company has prepared in accordance with IFRS. The date of transition to IFRS (the date of transition) was April 1, 2013, and the Company has applied IFRS 1 First-time Adoption of International Financial Reporting Standards (IFRS 1). An explanation of how the transition to IFRS has affected Honda's financial position, results of operations and cash flows is provided in note 31.

(b) Basis of Measurement

The consolidated financial statements have been prepared on the historical cost basis, except for certain assets and liabilities separately stated in note 3.

(c) Functional Currency and Presentation Currency

The consolidated financial statements are presented in Japanese yen, which is the functional currency of the Company. All financial information presented in Japanese yen has been rounded to the nearest million Japanese yen, except when otherwise indicated.

(d) Early Adoption of New Accounting Standards and Interpretations

Honda has early adopted IFRS 9 Financial Instruments (issued in November 2009, amended in October 2010 and November 2013).

(e) New Accounting Standards and Interpretations Not Yet Adopted

New or amended standards and interpretations that have been issued as of the date of approval of the consolidated financial statements but are not effective and have not yet been adopted by Honda as of March 31, 2015 are as follows.

F-10

Table of Contents**HONDA MOTOR CO., LTD. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

Honda is currently evaluating the impact of adoption of these standards and interpretations on the Company's consolidated financial statements.

		Mandatory adoption	Reporting periods in which the Company is scheduled to adopt the	Overview of new or amended
		(from fiscal years beginning on or after)	standards	standards and interpretations
Standards and interpretations				
IFRS 15	Revenue from Contracts with Customers	January 1, 2017	Fiscal year ending March 31, 2018	New standard applied in accounting and disclosure for revenue recognition, which supersedes current standards of revenue recognition
IFRS 9	Financial Instruments (issued in 2014)	January 1, 2018	Fiscal year ending March 31, 2019	Amendment regarding the requirements for classifying and measuring financial assets and liabilities, and accounting for impairment of financial assets

(f) Use of Estimates and Judgments

The preparation of consolidated financial statements in accordance with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies, the reported amount of assets, liabilities, revenues and expenses, and the disclosure of contingent assets and liabilities. Actual results could differ from these estimates.

These estimates and underlying assumptions are reviewed on a continuous basis. Changes in these accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

Information about judgments that have been made in the process of applying accounting policies and that have significant effects on the amounts reported in the consolidated financial statements is as follows:

Scope of subsidiaries, affiliates and joint ventures (notes 3(a) and 3(b))

Recognition of intangible assets arising from development (note 3(h))

Accounting for contracts including lease (note 3(i))

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

Information about accounting estimates and assumptions that have significant effects on the amounts reported in the consolidated financial statements is as follows:

Valuation of financial assets measured at amortized cost (notes 6, 7 and 8)

Fair value of financial instruments (note 26)

Net realizable value of inventories (note 9)

Recoverable amount of non-financial assets (notes 11, 12 and 13)

Measurement of provisions (note 17)

Measurement of net defined benefit liabilities (assets) (note 18)

Recoverability of deferred tax assets (note 23)

Likelihood and magnitude of outflows of resources embodying economic benefits required to settle contingent liabilities (note 28)

F-11

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

(3) Significant Accounting Policies

(a) Basis of Consolidation

The consolidated financial statements include the accounts of the Company, its subsidiaries which are directly or indirectly controlled by the Company, and those structured entities which are controlled by Honda. All significant intercompany balances and transactions have been eliminated in consolidation.

Honda controls an entity when Honda is exposed or has rights to variable returns from involvement with the entity, and has the ability to affect those returns by using its power, which is the current ability to direct the relevant activities, over the entity. To determine whether or not Honda controls an entity, status of voting rights or similar rights, contractual agreements and other specific factors are taken into consideration.

Structured entities are entities designed so that voting or similar rights are not the dominant factor in deciding who controls the entity. Honda consolidates structured entities over which it has control, by comprehensively determining whether its control over the entity exists based on any contractual arrangements with such entity as well as the percentage of its voting or similar rights in the entity.

The financial statements of subsidiaries are included in the consolidated financial statements from the date when the control is obtained until the date when the control is lost. The financial statements of subsidiaries have been adjusted in order to ensure consistency with the accounting policies adopted by the Company as necessary.

Changes in the Company's ownership interests in subsidiaries that do not result in a loss of control are accounted for as equity transactions. When control over a subsidiary is lost, the investment retained after the loss of control is remeasured at fair value as of the date of the loss of control, and any gain or loss on such remeasurement and disposal of the interest sold is recognized in profit or loss.

(b) Investments in Affiliates and Joint Ventures (Investments Accounted for Using the Equity Method)

Affiliates are entities over which Honda has a significant influence over the decisions on financial and operating policies, but does not have control or joint control.

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

Joint ventures are joint arrangements whereby the parties including Honda that have joint control have rights to the net assets of the arrangement. Joint arrangements are arrangements of which two or more parties have joint control, and joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require the unanimous consent of the parties sharing control.

Investments in affiliates and joint ventures are accounted for using the equity method from the date when the investees are determined to be affiliates or joint ventures until the date when they ceased to be classified as affiliates or joint ventures. Under the equity method, the investment is initially recognized at cost, and the carrying amount is subsequently increased or decreased, to recognize Honda's share of profit or loss and other comprehensive income of the affiliate or the joint venture after the date of initial recognition. The financial statements of affiliates and joint ventures have been adjusted in order to ensure consistency with the accounting policies adopted by the Company in applying the equity method, as necessary.

The use of the equity method is discontinued from the date when the investees are determined to be no longer affiliates or joint ventures. Unless the investee becomes a subsidiary, the investment retained after cessation of the equity method is remeasured at fair value, and any gain or loss on such remeasurement and disposal of the investment is recognized in profit or loss.

Table of Contents

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

(c) Foreign Currency Translations

1) Foreign currency transactions

Foreign currency transactions are translated into the respective functional currencies at the exchange rates prevailing when such transactions occur. All foreign currency receivables and payables are translated into the respective functional currencies at the applicable exchange rates at the end of the reporting period. Gains or losses on exchange differences arising on settlement of foreign currency receivables and payables or on their translations at the end of the reporting date are recognized in profit or loss and they are included in finance income and finance costs-other, net in the consolidated statements of income, unless any gains or losses are recognized in other comprehensive income.

2) Foreign operations

All assets and liabilities of foreign subsidiaries, affiliates and joint ventures (collectively *foreign operation*), which use a functional currency other than Japanese yen, are translated into Japanese yen at the exchange rates at the end of the reporting period. All revenues and expenses of foreign operation are translated into Japanese yen at the average exchange rate for the period. Exchange differences arising from translation are recognized in other comprehensive income and accumulated in other components of equity in the consolidated statements of financial position. When a foreign operation is disposed of, and control, significant influence or joint control over the foreign operation is lost, the cumulative amount of exchange differences relating to the foreign operation is reclassified from equity to profit or loss.

(d) Financial Instruments

A financial instrument is a contract that gives rise to a financial asset of one entity and a financial liability or equity security of another entity. When Honda becomes party to the contractual provision of a financial instrument, the financial instrument is recognized either as a financial asset or as a financial liability. When Honda purchases or sells a financial asset, the financial asset is recognized or derecognized at the trade date.

1) Non-derivative financial assets

Honda classifies financial assets other than derivatives into *financial assets measured at amortized cost*, *financial assets measured at fair value through other comprehensive income* or *financial assets measured at fair value through profit or loss*. Honda determines the classification of financial assets upon initial recognition.

Financial assets measured at amortized cost

A financial asset is classified into financial assets measured at amortized cost when the asset is held within a business model whose objective is to hold the asset in order to collect the contractual cash flows, and the contractual term of the financial asset gives rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. Financial assets measured at amortized cost are initially measured at their fair value, and are subsequently measured at amortized cost using the effective interest method.

F-13

Table of Contents

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

Financial assets measured at fair value

A financial asset other than a financial asset measured at amortized cost is classified into financial assets measured at fair value. The financial assets measured at fair value are further classified into the following categories, according to their holding purposes:

Financial assets measured at fair value through other comprehensive income

Honda elects to designate investments in equity securities such as shares, held for maintaining and strengthening the trade relationship as financial assets measured at fair value through other comprehensive income.

Financial assets measured at fair value through other comprehensive income are initially measured at their fair value, and subsequent changes in fair value of the investment are presented in other comprehensive income. However, dividends from the investment are principally recognized in profit or loss.

Financial assets measured at fair value through profit or loss

Financial assets measured at fair value other than financial assets measured at fair value through other comprehensive income are classified into financial assets measured at fair value through profit or loss.

Financial assets measured at fair value through profit or loss are initially measured at their fair value, and subsequent changes in fair value are recognized in profit or loss.

Financial assets are derecognized when the contractual rights to cash flows from the financial assets expire, or when the contractual rights to receive the cash flows from the financial assets are transferred and all risks and rewards of ownership of the financial assets are substantially transferred.

When a financial asset measured at fair value through other comprehensive income is sold, an amount of accumulated other comprehensive income recognized in other components of equity in the consolidated statements of financial position is directly reclassified to retained earnings.

(Cash and cash equivalents)

Cash and cash equivalents consist of cash on hand, demand deposits, and short-term highly liquid investments that are readily convertible to known amounts of cash and are subject to insignificant risk of changes in value. Honda includes all highly liquid debt instruments with original maturities of three months or less in cash equivalents.

2) Non-derivative financial liabilities

Financial liabilities other than derivatives are initially measured at their fair value, and are subsequently measured at amortized cost using the effective interest method.

Financial liabilities are derecognized, when the obligations specified in the contract are discharged, canceled or expire.

3) Derivatives

Honda has entered into foreign exchange and interest rate agreements to manage currency and interest rate exposures. These agreements include foreign currency forward contracts, currency option contracts, currency swap agreements and interest rate swap agreements.

Table of Contents

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

All these derivatives are initially recognized as assets or liabilities and measured at fair value, when Honda becomes a party to the contractual provision of the derivatives. Subsequent changes in fair value of derivatives are recognized in profit or loss in the period of the changes.

Honda has not held any derivatives designated as hedges and no amount has been recognized in other comprehensive income for the years ended March 31, 2014 and 2015.

4) Offsetting of financial assets and financial liabilities

Financial assets and financial liabilities are offset and the net amount is presented in the consolidated statements of financial position, only when Honda currently has a legally enforceable right to offset the recognized amounts, and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

(e) Inventories

Inventories are measured at the lower of cost and net realizable value. The cost of inventories includes purchase costs and conversion costs, and it is determined principally by using the first-in first-out method. Conversion cost includes an appropriate share of production overheads on the normal operation capacity. Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

(f) Equipment on Operating Leases

Equipment on operating leases is measured based on the cost model and carried at its cost less accumulated depreciation and impairment losses.

A vehicle subject to operating lease is initially measured at its cost. Depreciation of equipment on operating leases is calculated on the straight-line method over the lease term. The depreciable amount is the cost of the vehicle less its residual value which is estimated by using the estimate of future used vehicle value, taking into consideration external industry data and Honda's historical experience.

(g) Property, Plant and Equipment

Property, plant and equipment is measured based on the cost model and carried at its cost less accumulated depreciation and impairment losses.

Property, plant and equipment is initially measured at its cost. Subsequent expenditures on an item of property, plant and equipment acquired, are recognized in the carrying amount of the item, only when it is probable that the expenditure will generate a future economic benefit.

Depreciation of property, plant and equipment, except for land that is not subject to depreciation, is calculated on the straight-line method over the estimated useful life. The depreciable amount is the cost of the asset less the respective estimated residual values.

The estimated useful lives used in calculating depreciation of property, plant and equipment are mainly as follows:

Buildings and structures: 3 to 50 years

Machinery and equipment: 2 to 20 years

Table of Contents

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

The depreciation method, useful lives and residual values of property, plant and equipment are reviewed annually at each fiscal year end, and adjusted prospectively, if appropriate.

(h) Intangible Assets

Intangible assets are measured based on the cost model and carried at their cost less accumulated amortization and impairment losses.

(Research and development)

Development expenditure for a product is capitalized only when there is a technical and commercial feasibility of completing the development, Honda has intention, ability and sufficient resources to use the outcome of the development, it is probable that the outcome will generate a future economic benefit, and the cost can be measured reliably.

Capitalized development cost is measured at the sum of expenditures for development incurred between when the foregoing conditions for capitalization are initially met and when the development is completed, and includes all directly attributable costs to the development process. Capitalized development cost is amortized using the straight-line method over the expected product life cycle of the developed product ranging mainly from 2 to 6 years.

Expenditures on research and other development expenditures which do not meet the foregoing conditions are expensed as incurred.

(Other intangible asset)

Other intangible assets are initially measured at cost and principally amortized using the straight-line method over their estimated useful lives. Other intangible assets are mainly comprised of software for internal use whose estimated useful life ranges from 3 to 5 years.

The amortization method and useful lives of intangible assets are reviewed annually at each fiscal year end, and adjusted prospectively, if appropriate.

(i) Lease

An arrangement that is or contains a lease is determined based on the substance of the arrangement by assessment of whether the fulfillment of that arrangement depends on use of a specific asset or group of assets, and whether a right to use the asset is transferred under the arrangement.

When an arrangement is or contains a lease, the lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to the ownership, based on the substance of the arrangement. Leases other than finance lease are classified as operating lease.

1) Lease as a lessee

A leased asset and liability for the future lease payment under a finance lease are initially recognized at the lower of fair value of the leased asset or the present value of the minimum lease payments, each determined at inception of the lease. After the initial recognition, the leased asset is accounted for according to the accounting policies applied to the asset. Lease payments under a finance lease are apportioned between the finance cost and the reduction in the carrying amount of the liability. Lease payments under an operating lease are recognized as an expense on a straight-line basis over the lease term.

Table of Contents

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

2) Lease as a lessor

The finance subsidiaries of the Company engage in the business of leasing vehicles as a lessor. A receivable from customer held under a finance lease is initially recognized at the amount of net investment in the lease which is the gross investment in the lease discounted at the interest rate implicit in the lease, and included in receivables from financial services in the consolidated statements of financial position. After the initial recognition, the receivable under finance lease is accounted for in accordance with the accounting policies applied to financial assets. Vehicles subject to operating leases are presented as equipment on operating leases in the consolidated statements of financial position.

(j) Impairment

1) Financial assets measured at amortized cost

At the end of each reporting period, based on individual assets or assets grouped according to credit risk characteristics, financial assets measured at amortized cost are assessed to determine whether there is objective evidence that a financial asset or group of financial assets is impaired. Objective evidence of impairment includes significant financial difficulty of the issuer or the borrowers, a default or delinquency in interest or principal payments, an increase in the probability of bankruptcy or other financial restructuring of the issuer, and disappearance of an active market for the security.

If there is an objective evidence that financial assets measured at amortized cost is impaired, the amount of impairment loss is measured as the difference between the carrying amount of the assets and its present value which is calculated by discounting estimated future cash flows using the asset's original effective interest rate. The impairment loss is recognized in profit or loss, by deducting the carrying amount of the financial assets directly or through an allowance account.

Further, if, in a subsequent period, the amount of impairment loss decreases and the decrease can be related objectively to an event occurring after impairment was recognized, the impairment loss which was recorded in prior periods is reversed and recognized in profit or loss.

Receivables from financial services Allowance for credit losses

The allowance for credit losses is management's estimate of probable losses incurred on receivables from financial services. Estimated losses on past due operating lease rental payments are also recognized through an allowance for credit losses.

Consumer finance receivables are collectively evaluated for impairment. Delinquencies and losses are continuously monitored and this historical experience provides the primary basis for estimating the allowance. Various methodologies are utilized when estimating the allowance for credit losses including models that incorporate vintage loss and delinquency migration analysis. The models take into consideration attributes of the portfolio including loan-to-value ratios, internal and external credit scores, and collateral types. Economic factors such as used vehicle prices, unemployment rates, and consumer debt service burdens are also incorporated when estimating losses.

Dealer finance receivables are individually evaluated for impairment when specifically identified as impaired. Dealer finance receivables are considered to be impaired when it is probable that the finance subsidiaries of the Company will be unable to collect all amounts due according to the original terms of the loan. The determination of whether dealer loans are impaired is based on evaluations of dealerships' payment history, financial condition and cash flows, and their ability to perform under the terms of the loans. Dealer loans that have not been specifically identified as impaired are collectively evaluated for impairment.

Table of Contents

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

Receivables from financial services Allowance for losses on lease residual values

The allowance for losses on lease residual values is management's estimate of probable losses arising from declines in the estimated lease residual values incurred on receivables from finance leases.

The finance subsidiaries of the Company purchase insurance to cover a substantial amount of the estimated residual value of vehicles leased as finance leases to customers. The allowance for losses on lease residual values are maintained at an amount management deems adequate to cover estimated losses on the uninsured portion of the vehicles' lease residual values. The allowance is also based on management's evaluation of many factors, including current economic conditions, industry experience and the finance subsidiaries' historical experience with residual value losses.

2) Non-financial assets and investments accounted for using the equity method

At the end of the reporting period, the carrying amount of non-financial assets other than inventories and deferred tax assets (which are comprised mainly of equipment on operating leases, property, plant and equipment, and intangible assets) and investments accounted for using the equity method are assessed to determine whether or not there is any indication of impairment. If there is such an indication, the recoverable amount of such asset is estimated and compared with the carrying amount of the asset, as test of impairment.

For investments accounted for using the equity method, the entire carrying amount of each investment in affiliates and joint ventures is tested for impairment as a single asset, when there is objective evidence that the investments accounted for using the equity method may be impaired.

The recoverable amount of an individual asset or cash-generating units is the higher of fair value less costs to sell and value in use. Value in use is determined as the present value of future cash flows expected to be derived from an asset or a cash-generating unit. A cash-generating unit is determined as the smallest identifiable group of assets that generate cash inflows which are largely independent of cash inflows from other assets or a group of assets. When it is not possible to estimate the recoverable amount of the individual asset, the recoverable amount of the cash-generating unit to which the asset belongs is estimated.

When the carrying amount of an asset or a cash-generating unit exceeds the recoverable amount, the carrying amount is reduced to the recoverable amount and an impairment loss is recognized in profit or loss. An impairment loss for a cash-generating unit is allocated to the assets on the basis of the relative carrying amount of each asset in the unit.

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

An impairment loss recognized for an asset or a cash-generating unit in prior period is reversed, if there is any indication that the impairment loss may have decreased or may no longer exist, and when the recoverable amount of the asset exceeds the carrying amount. If this is the case, the carrying amount of the asset is increased to its recoverable amount, but the increased carrying amount does not exceed the carrying amount (net of depreciation or amortization) calculated on the basis that no impairment loss had occurred in the prior period.

(k) Provisions

Provisions are recognized when Honda has present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

Provisions are measured based on the best estimate of expenditure required to settle the present obligation at the end of the reporting period. Where the effect of the time value of money is material, a provision is measured

Table of Contents

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

at the present value of the expenditures required to settle the obligation. In calculating the present value, a pre-tax rate that reflects current market assessment of the time value of money and the risks specific to the liability is used as the discount rate.

(1) Employee Benefits

1) Short-term employee benefits

For short-term employee benefits including salaries, bonuses and paid annual leave, when the employees render related services, the amounts expected to be paid in exchange for those services are recognized as expenses.

2) Post-employment benefits

Honda has various post-employment benefit plans including defined benefit plans and defined contribution plans.

Defined benefit plans

For defined benefit plans, the present value of defined benefit obligations less the fair value of plan assets is recognized as either liability or asset in the consolidated statements of financial position.

The present value of defined benefit obligations and service cost are principally determined for each plan using the projected unit credit method. The discount rate is determined by reference to market yields at the end of the reporting period on high quality corporate bonds that is consistent with the currency and estimated term of the post-employment benefit obligation. Net interest on the net defined benefit liability (asset) for the reporting period is determined by multiplying the net defined benefit liability (asset) by the discount rate.

Past service cost defined as the change in the present value of the defined benefit obligation resulting from a plan amendment or curtailment is recognized in profit or loss upon occurrence of the plan amendment or curtailment.

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

Honda recognizes the difference arising from remeasurement of present value of the defined benefit obligation and the fair value of the plan asset in other comprehensive income when it is incurred, and reclassifies it immediately to retained earnings.

Defined contribution plans

For defined contribution plans, when the employees render related services, the contribution payables to defined contribution plan are recognized as expenses.

(m) Equity

1) Common share

Common share issued by the Company is classified as equity, and the proceeds from issuance of common share are included in common stock and capital surplus.

2) Treasury stock

Treasury stock acquired by Honda is recognized at cost and deducted from equity. When treasury stock is sold, the consideration received is recognized as equity with the difference between the carrying amount and the consideration received included in capital surplus.

Table of Contents

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

(n) Revenue Recognition

Sales revenue is measured at the fair value of consideration received or receivable. Amounts collected from customers and remitted to governmental authorities such as sales taxes are accounted for on a net basis and, therefore, are deducted from sales revenue.

The specific criteria for revenue recognition for each type of transactions are as follows:

1) Sale of products

Revenue from sale of products is recognized when the significant risks and rewards of ownership of products are transferred to the customer, Honda retains neither continuous involvement nor effective control over the product, the amount of revenue and the corresponding cost can be measured reliably and collection of the relevant receivable is reasonably assured. This generally corresponds to the date of delivery of products to customers.

Honda provides dealer incentives retained by the dealer, which generally represent discounts provided from Honda to the dealer. Honda also provides incentive programs generally in the form of below-market interest rate loans or lease programs for the retail customers to enhance dealer's sales activities. The amount incurred for these programs is calculated based on the difference between the interest or lease rate offered to retail customers and the market-based interest or lease rate. These incentives are estimated and recognized at the time the product is sold to the dealer, and are deducted from sales revenue in the consolidated statements of income.

2) Rendering of financial services

Interest income from receivables from financial services is recognized using the effective interest method. Finance receivable origination fees and certain direct origination costs are included in the calculation of the effective interest rate, and the net fee or cost is amortized using the effective interest method over the contractual term of the finance receivables.

The finance subsidiaries of the Company offer financial services that contain a lease. Interest income from receivables held under a finance lease is recognized using the effective interest method. When Honda is the manufacturer or dealer lessor, sales revenue and the corresponding cost for a portion identified as sale of products is recognized in profit or loss in accordance with the policy on revenue recognition for sale of products. Revenue from operating leases is recognized on a straight-line basis over the term of the lease.

(o) Income Taxes

Income tax expenses are presented as the aggregate amount of current taxes and deferred taxes. Current taxes and deferred taxes are recognized in profit or loss, except for the tax arising from a transaction which is recognized either in other comprehensive income or directly in equity.

Current taxes are measured at the amount expected to be paid to (or recovered from) the taxation authorities in respect of the taxable profit (or tax loss) for the reporting period, using the tax rates and tax laws enacted or substantively enacted at the end of the reporting period.

Deferred tax assets and liabilities are recognized for future tax consequences attributable to temporary differences between the carrying amount of assets or liabilities in the consolidated statements of financial position and the tax base of the assets or liabilities and carryforward of unused tax losses and tax credits. Deferred tax assets are recognized to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, unused tax losses, and unused tax credits can be utilized.

Table of Contents

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

Deferred tax liabilities for taxable temporary differences related to investments in subsidiaries and affiliates, and interest in joint ventures are not recognized to the extent that Honda is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future. Deferred tax assets for deductible temporary differences arising from investments in subsidiaries and affiliates, and interest in joint ventures are recognized to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which they can be utilized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the assets are realized or the liabilities are settled, based on the tax rates and tax laws enacted or substantively enacted at the end of the reporting period. The measurement of deferred tax assets and liabilities reflects the tax consequences that would follow from the manner in which Honda expects, at the end of reporting period, to recover or settle the carrying amount of its assets and liabilities.

Honda reviews the carrying amount of deferred tax assets at the end of each reporting period, and reduces the carrying amount of deferred tax assets to the extent that it is no longer probable that sufficient taxable profit will be available to allow the benefit of part or all of that deferred tax assets to be utilized.

Deferred tax assets and deferred tax liabilities are offset, only when Honda has a legally enforceable right to set off current tax assets against current tax liabilities, and the same taxation authority levies income taxes either on the same taxable entity or on different taxable entity which intends either to settle current tax liabilities and assets on a net basis or to realize the assets and settle the liabilities simultaneously.

Honda recognizes the impact of tax positions in the consolidated financial statements, if any, based on Honda's assessment of various factors including interpretations of tax law and prior experiences, when it is probable that the positions will be sustained upon examination by the taxation authorities.

(p) Earnings per Share

Basic earnings per share is calculated by dividing profit for the year attributable to owners of the parent by the weighted average number of common shares outstanding during the period.

Table of Contents**HONDA MOTOR CO., LTD. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****(4) Segment Information**

Honda has four reportable segments: Motorcycle business, Automobile business, Financial services business and Power product and other businesses, which are based on Honda's organizational structure and characteristics of products and services. Operating segments are defined as the components of Honda for which separate financial information is available that is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing performance. The accounting policies used for these reportable segments are consistent with the accounting policies used in the Company's consolidated financial statements.

Principal products and services, and functions of each segment are as follows:

Segment	Principal products and services	Functions
Motorcycle Business	Motorcycles, all-terrain vehicles (ATVs) and relevant parts	Research and development Manufacturing Sales and related services
Automobile Business	Automobiles and relevant parts	Research and development Manufacturing
Financial Services Business	Financial services	Sales and related services Retail loan and lease related to Honda products
Power Product and Other Businesses	Power products and relevant parts, and others	Others Research and development Manufacturing Sales and related services Others

(a) Segment Information

Segment information as of April 1, 2013 and as of and for the years ended March 31, 2014 and 2015 is as follows:

Explanatory notes:

1. Segment profit (loss) of each segment is measured in a consistent manner with consolidated operating profit, which is profit before income taxes before share of profit of investments accounted for using the equity method and finance income and finance costs. Expenses not directly associated with specific segments are allocated based on the most reasonable measures applicable.
2. Segment assets of each segment are defined as total assets including investments accounted for using the equity method, derivatives, and deferred tax assets. Segment assets are based on those directly associated with each segment and those not directly associated with specific segments are allocated based on the most reasonable measures applicable except for the corporate assets described below.
3. Intersegment sales revenues are generally made at values that approximate arm's-length prices.
4. Reconciling items include elimination of intersegment transactions and balances as well as unallocated corporate assets. Unallocated corporate assets, included in reconciling items as of April 1, 2013 and March 31, 2014 and 2015 amounted to ¥298,601 million, ¥299,742 million and ¥345,266 million, respectively, which consist primarily of the Company's cash and cash equivalents and financial assets measured at fair value through other comprehensive income.
5. Provisions for product warranties issued for the years ended March 31, 2014 and 2015 are ¥168,994 million and ¥295,035 million, respectively. These are mainly included in Automobile business.

(7) Receivables from Financial Services

The finance subsidiaries of the Company provide various financial services to customers and dealers in order to support the sale of our products. These receivables from financial services are categorized as follows:

Consumer finance receivables:

Retail receivables primarily consist of receivables from installment contracts with customers.

Finance lease receivables primarily consist of receivables from non-cancelable auto leases with customers.

Table of Contents**HONDA MOTOR CO., LTD. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

Dealer finance receivables:

Wholesale receivables primarily consist of financing receivables from dealers for the purchase of inventories and dealer loans.

Receivables from financial services are classified into financial assets measured at amortized cost.

Receivables from financial services as of April 1, 2013 and March 31, 2014 and 2015 consist of the following:

	2013	Yen (millions) 2014	2015
Consumer finance receivables:			
Retail	¥ 3,797,570	¥ 4,563,700	¥ 4,901,918
Finance lease	365,448	330,087	260,543
Dealer finance receivables:			
Wholesale	434,013	496,899	556,735
Subtotal	¥ 4,597,031	¥ 5,390,686	¥ 5,719,196

(Pledged assets)

Pledged assets for financing liabilities as of April 1, 2013 and March 31, 2014 and 2015 are as follows:

	Yen (millions)		
	2013	2014	2015
Trade receivables	¥ 15,314	¥ 20,749	¥ 19,259
Receivables from financial services	724,399	883,776	946,891
Inventories	11,154	12,908	12,631
Property, plant and equipment	10,989	65,559	76,009
Total	¥ 761,856	¥ 982,992	¥ 1,054,790

Receivables from financial services are pledged as collateral for liabilities related to asset-backed securities transactions. Other items are mainly pledged as collateral for secured bank loans.

As is customary in Japan, bank loans are extended under general agreements which provide that security and guarantees for present and future indebtedness will be given upon request of the bank, and that the bank shall have the right to offset cash deposits against obligations that have become due or, in the event of default, against all obligations due to the bank.

(16) Other Financial Liabilities

Other financial liabilities as of April 1, 2013 and March 31, 2014 and 2015 consist of the following:

	2013	Yen (millions)

Reversal	(12,171)	(3,993)	(16,164)
Exchange differences on translating foreign operations	21,215	228	21,443
Other		536	536
Balance as of March 31, 2015	¥ 421,523	¥ 55,419	¥ 476,942

Current liabilities and non-current liabilities of provisions as of March 31, 2014 and 2015 are as follows:

	Yen (millions)	
	2014	2015
Current liabilities	¥ 185,375	¥ 294,281
Non-current liabilities	140,103	182,661
Total	¥ 325,478	¥ 476,942

Explanatory note:

* Honda recognizes provisions for product warranties to cover future product warranty expenses. Honda recognizes costs for general warranties on products Honda sells and for specific warranty programs, including product recalls. Honda provides for general estimated warranty costs at the time products are sold to customers. Honda also provides for specific estimated warranty program costs when it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. These provisions are estimated based on historical warranty claim experience with consideration given to the expected level of future warranty costs as well as current information on repair costs. Provision for product warranties are used for expenditures based on the demand from customers and dealers. Expected reimbursement related to product warranties from third party suppliers is ¥24,049 million as of

March 31, 2015.

(18) Employee Benefits

(a) Post-employment Benefits

Honda has various pension plans covering substantially all of their employees in Japan and certain employees in foreign countries. The Company and its Japanese subsidiaries provide plans similar to a cash balance pension plans or other defined benefit pension plans in accordance with the Defined-Benefit Corporate Pension Act of Japan. The Company and some of its subsidiaries have retirement benefit plans as well as lump-sum retirement benefit plans, in which the amount of benefits is basically determined based on the level of salary, service years, and other factors.

The Company's pension plans are administered by the Honda Pension Fund (the Fund) which is legally independent of the Company. The Director of the Fund has the fiduciary duty to comply with laws, the directives

Table of Contents

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

by the Minister of Health, Labour and Welfare, and the Director-Generals of Regional Bureaus of Health and Welfare made pursuant to those laws, and the by-laws of the Fund and the decisions made by the Board of Representatives of the Fund. The Company is required to make contributions to the Fund and obligated to make contributions in the amount stipulated by the Fund. Contributions are also regularly reviewed and adjusted as necessary to the extent permitted by laws and regulations.

In September 2013, certain consolidated subsidiaries in North America amended their defined benefit pension plans, effective January 1, 2014, to reduce the benefits in future periods for their employees on and after January 1, 2014.

This plan amendment resulted in a reduction of the defined benefit obligation and recognition of the past service cost in a credit to profit or loss at the date of the plan amendment for the consolidated subsidiaries. Due to this plan amendment, Honda recognized ¥62,493 million of past service cost in a credit to profit or loss, of which ¥43,563 million is included in cost of sales and ¥18,930 million is included in selling, general and administrative expense in the consolidated statement of income for the year ended March 31, 2014. Defined benefit obligation and plan asset of defined benefit pension plan have also been remeasured.

Table of Contents**HONDA MOTOR CO., LTD. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)***1) Defined benefit obligations and plan assets*

The changes in present value of defined benefit obligations and fair value of plan assets of the Company and certain of its consolidated subsidiaries for the years ended March 31, 2014 and 2015 are as follows:

2) Fair value of plan assets

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

Honda's investment policies for the Japanese and foreign pension plan assets are designed to maximize total medium-to-long term returns that are available to provide future payments of pension benefits to eligible participants under accepted risks. Plan assets are invested in well-diversified Japanese and foreign individual equity and debt securities using target asset allocations, consistent with accepted tolerance for risks. Honda sets target asset allocations for each asset category with future anticipated performance over medium-to-long term periods based on the expected returns, long-term risks and historical returns. Target asset allocations are adjusted as necessary when there are significant changes in the investment environment of plan assets.

F-41

Table of Contents**HONDA MOTOR CO., LTD. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

The fair value of the Japanese and foreign pension plan assets by asset category as of April 1, 2013 and March 31, 2014 and 2015 is as follows:

F-43

Table of Contents**HONDA MOTOR CO., LTD. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

This sensitivity analysis shows changes in defined benefit obligations as of March 31, 2014 and 2015, as a result of changes in actuarial assumptions that the Company can reasonably assume. This analysis is based on provisional calculations, and thus actual results may differ from the analysis. In addition, changes in the rate of salary increase are not expected.

5) Cash flows

The amount of contributions to plan assets made by the Company and certain of its consolidated subsidiaries are determined based on various factors such as the level of salary and service years of employees, status of plan asset reserve, and actuarial calculations. In accordance with the provisions of the Defined Benefit Corporate Pension Act, the Honda Pension Fund also recalculates the amount of contributions every five years at the end of the reporting period as a base date, in an effort to ensure balanced finances in the future. The Company and certain of its consolidated subsidiaries may make contributions of a necessary amount if the amount of reserve falls below the minimum base amount.

The Company and certain of its consolidated subsidiaries expect to contribute ¥54,292 million to its Japanese pension plans and ¥22,889 million to its foreign pension plans in the year ending March 31, 2016.

The weighted average duration of defined benefit obligations as of March 31, 2014 and 2015 are as follows:

	2014		2015	
	Japanese plans	Foreign plans	Japanese plans	Foreign plans
Weighted average duration of defined benefit obligations	15 years	19 years	15 years	19 years

Certain of the Company's subsidiaries in North America provide mainly health care and life insurance benefits to retired employees. Such benefits have no material effect on Honda's financial position and result of operations.

(b) Personnel Expenses

Personnel expenses included in the consolidated statements of income for the years ended March 31, 2014 and 2015 are as follows:

Yen (millions)	
2014	2015

Personnel expenses	¥ 1,310,624	¥ 1,451,506
--------------------	-------------	-------------

Personnel expenses include salaries, bonuses, social security expenses and expenses relating to post-employment benefits.

(19) Equity

(a) Management of Capital

Honda makes investments in capital and research and development to improve corporate value through growth on a global basis. In order to meet these funding needs, Honda makes capital management through consideration of the balance between financing liabilities and equity.

Table of Contents**HONDA MOTOR CO., LTD. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

Financing liabilities and equity of Honda as of April 1, 2013 and March 31, 2014 and 2015 are as follows:

		Yen (millions)	
	2013	2014	2015
Financing liabilities	¥ 4,897,249	¥ 5,846,948	¥ 6,759,839
Equity	5,728,305	6,558,928	7,382,821

(b) Common Stock

The Company's total number of shares authorized and issued for the years ended March 31, 2014 and 2015 are as follows:

	Shares	
	2014	2015
Total number of authorized shares		
Balance at end of year		
Common shares, no par value	7,086,000,000	7,086,000,000
Total number of issued shares		
Balance at beginning of year	1,811,428,430	1,811,428,430
Changes during the year		
Balance at end of year	1,811,428,430	1,811,428,430

All of the issued shares as of April 1, 2013 and March 31, 2014 and 2015 have been paid in full.

(c) Capital Surplus and Retained Earnings

Capital surplus consists of surplus that is derived from equity transactions and not recorded in common stock, and its primary component is capital reserves. The Companies Act of Japan provides that no less than 50% of the paid-in amount or proceeds of issuance of shares shall be incorporated in common stock, and that the remaining shall be incorporated in capital reserves. Capital reserves may be incorporated in common stock upon approval of the General Meeting of Shareholders.

Retained earnings consist of legal reserves and accumulated earnings. The Companies Act of Japan provides that earnings in an amount equal to 10% of cash dividends from retained earnings shall be appropriated as a capital reserve or a legal reserve on the date of distribution of retained earnings until an aggregated amount of capital reserve and legal reserve equals 25% of common stock. Legal reserves may be used upon approval of the General Meeting of Shareholders. Certain foreign consolidated subsidiaries are also required to appropriate their earnings under

the laws of respective countries.

(d) Treasury Stock

The total number of the Company's treasury stock held by Honda as of April 1, 2013 and March 31, 2014 and 2015 is as follows:

	2013	Shares 2014	2015
Common shares	9,131,140	9,137,234	9,141,504

F-45

Table of Contents**HONDA MOTOR CO., LTD. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

Under the Companies Act of Japan, the number of shares and total value of treasury stock acquisition may be determined, upon approval of the General Meeting of Shareholders, within the amount available for distribution. Furthermore, treasury stock may be acquired through market transactions or tender offers in accordance with the articles of incorporation within the conditions set forth in the Companies Act, upon approval of the Board of Directors.

(e) Other Components of Equity

The changes in the components of accumulated other components of equity for the years ended March 31, 2014 and 2015 are as follows:

	Yen (millions)

Total	¥ 51,015	¥ 216,977	¥ 267,992	¥ 43,512	¥ 201,627	¥ 245,139

Table of Contents**HONDA MOTOR CO., LTD. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

The statutory income tax rate in Japan for the years ended March 31, 2014 and 2015 was 37.9% and 35.1%, respectively. The foreign subsidiaries are subject to taxes based on income at rates ranging from 16.0% to 38.0%.

The Japanese statutory income tax rate for the years ended March 31, 2014 and 2015 differs from the average effective tax rate for the following reasons:

	2014	2015
Statutory income tax rate* ¹	37.9%	35.1%
Difference in statutory income tax rates of foreign subsidiaries	(6.4)	(2.6)
Effects of investments accounted for using the equity method	(5.3)	(4.2)
Effects of undistributed earnings	5.1	3.1
Changes in unrecognized deferred tax assets	0.4	3.0
Effects of income and expense not taxable and deductible for tax purpose	(0.1)	0.8
Effects of tax credit	(1.4)	(5.6)
Other adjustments relating to prior years	0.4	(0.4)
Adjustments for the uncertain tax positions on income taxes* ²	(3.2)	0.2
Adjustments for the changes in income tax laws	0.4	(0.1)
Other	0.9	1.1
 Average effective tax rate	 28.7%	 30.4%

Explanatory notes:

*1 On March 20, 2014, the National Diet of Japan approved amendments to existing income tax laws and the Special Reconstruction Corporation Tax imposed on companies was abolished for fiscal years beginning on or after April 1, 2014. Upon the change in the laws, the statutory income tax rate in Japan for fiscal years beginning on or after April 1, 2014 was changed to approximately 35%. On March 31, 2015, the National Diet of Japan approved amendments to existing income tax laws. Upon the change in the laws, the statutory income tax rate in Japan was changed to approximately 33% for fiscal years beginning on or after April 1, 2015 and will be changed to approximately 32% for fiscal years beginning on or after April 1, 2016.

*2 Due to the Company's remeasurement based on technical merits regarding transfer pricing matters of overseas transactions between the Company and foreign joint ventures, the Company decreased a liability relating to a portion of uncertain tax positions for the year ended March 31, 2014.

Honda considers the probability that a portion of, or all of, the deductible temporary differences, carryforward of unused tax losses and carryforward of unused tax credit can be utilized against future taxable

Table of Contents**HONDA MOTOR CO., LTD. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

profits in the recognition of deferred tax assets. In assessing recoverability of deferred tax assets, management considers the scheduled reversal of deferred tax liabilities, projected future taxable profit and tax planning strategies. Based upon the level of historical taxable profit and projections for future taxable profit over the periods for which the deferred tax assets are deductible, management believes it is probable that Honda will utilize the benefits of these deferred tax assets as of April 1, 2013 and March 31, 2014 and 2015. Uncertainty of estimates of future taxable profit could increase due to changes in the economic environment surrounding Honda, effects by market conditions, effects of currency fluctuations or other factors.

Deductible temporary differences, carryforward of unused tax losses and carryforward of unused tax credit for which deferred tax assets are not recognized as of April 1, 2013 and March 31, 2014 and 2015 are as follows:

	Yen (millions)		
	2013	2014	2015
Deductible temporary differences	¥ 153,246	¥ 213,329	¥ 281,560
Carryforward of unused tax losses	155,499	171,048	199,204
Carryforward of unused tax credit	3,728	4,478	24,632

The components by expiry of the carryforward of unused tax losses for which deferred tax assets are not recognized as of April 1, 2013 and March 31, 2014 and 2015 are as follows:

	Yen (millions)		
	2013	2014	2015
Within 1 year	¥	¥	¥
Between 1 and 5 years	170	2,925	25,571
Between 5 and 20 years	59,152	59,697	56,609
Indefinite periods	96,177	108,426	117,024
Total	¥ 155,499	¥ 171,048	¥ 199,204

The components by expiry of the carryforward of unused tax credits for which deferred tax assets are not recognized as of April 1, 2013 and March 31, 2014 and 2015 are as follows:

	Yen (millions)		
	2013	2014	2015
Within 1 year	¥	¥	¥
Between 1 and 5 years			15,242
Between 5 and 20 years	3,728	4,478	9,390
Indefinite periods			

Total	¥ 3,728	¥ 4,478	¥ 24,632
-------	---------	---------	----------

The aggregate amounts of temporary differences relating to investments in subsidiaries and interests in joint ventures for which deferred tax liabilities are not recognized as of April 1, 2013 and March 31, 2014 and 2015 are ¥3,062,847 million, ¥3,619,309 million and ¥4,164,009 million, respectively.

Table of Contents**HONDA MOTOR CO., LTD. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****(24) Earnings Per Share**

Earnings per share attributable to owners of the parent for the years ended March 31, 2014 and 2015 are calculated based on the following information. There were no potentially dilutive common shares outstanding for the years ended March 31, 2014 and 2015.

	2014	2015
Profit for the year attributable to owners of the parent (millions of yen)	¥ 624,703	¥ 509,435
Weighted average number of common shares outstanding, basic (shares)	1,802,294,383	1,802,289,321
Basic earnings per share attributable to owners of the parent (yen)	¥ 346.62	¥ 282.66

(25) Financial Risk Management*(a) Risk Management*

Honda has manufacturing operations throughout the world and sells products and components to various countries. In the course of these activities, Honda holds trade receivables arising from business activities, receivables from financial services, trade payables and financing liabilities, and is thus exposed to market risk, credit risk and liquidity risk associated with the holding of such financial instruments.

These risks are evaluated by Honda through periodic monitoring.

(b) Market Risk

Honda is exposed to the risk that the fair value or future cash flows of a financial instrument fluctuates because of changes in foreign currency exchange rates and interest rates.

Honda uses derivatives that consist mainly of foreign currency forward exchange contracts, foreign currency option contracts, currency swap agreements and interest rate swap agreements to reduce primarily the risk that future cash flows of a financial instrument fluctuates because of changes in foreign currency exchange rates and interest rates.

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

Derivatives are used within the scope of actual demand, in accordance with risk management policies. In addition, Honda does not hold any derivatives for trading purpose.

1) Foreign currency exchange rate risk

Honda has manufacturing operations throughout the world and exports products and components to various countries. Honda purchases materials and components and sells its products and components in foreign currencies. Therefore, currency fluctuations may affect Honda's profit and the value of the financial instruments it holds.

Foreign currency forward exchange contracts and purchased option contracts are used to hedge currency risk of sale commitments denominated in foreign currencies (principally U.S. dollars).

(Foreign currency exchange rate risk sensitivity analysis)

Sensitivity analysis of Honda's foreign currency exchange rate risk associated with holding financial instruments as of March 31, 2014 and 2015 is as follows.

F-55

Table of Contents**HONDA MOTOR CO., LTD. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

The following scenario demonstrates the impact of a 1% appreciation of the Japanese yen against the U.S. dollar on profit before income taxes, holding all variables other than the foreign currency exchange rate constant.

	Yen (millions)	
	2014	2015
Impact on profit before income taxes	¥ (565)	¥ (895)

2) Interest rate risk

Honda is exposed to market risk for changes in interest rates related primarily to its debt obligations and receivables from financial services. In addition to short-term financing such as commercial paper, Honda has long-term debt with both fixed and floating rates. Honda's receivables from financial services primarily use fixed rates. Interest rate swap agreements are mainly used to manage interest rate risk exposure of receivables from financial services and to match finance costs with finance income. Currency swap agreements used among different currencies, also serve to hedge foreign currency exchange risk as well as interest rate risk.

(Interest rate risk sensitivity analysis)

Sensitivity analysis of Honda's interest rate risk associated with holding financial instruments as of March 31, 2014 and 2015 is as follows.

The following scenario demonstrates the impact of a 100 basis point rise in interest rates on profit before income taxes, holding all variables other than interest rates constant.

	Yen (millions)	
	2014	2015
Impact on profit before income taxes	¥ 5,381	¥ 3,781

3) Equity Price Risk

Honda is exposed to equity price risk as a result of its holdings of marketable equity securities. Marketable equity securities are held for purposes other than trading, and are mainly classified into financial assets measured at fair value through other comprehensive income.

(c) Credit Risk

Honda is exposed to the risk that one party to a financial instrument causes a financial loss for the other party by failing to discharge an obligation. Honda reduces the risk of financial assets other than derivatives in accordance with credit administration rules. Honda reduces the risk of derivatives by limiting the counterparties to major international banks and financial institutions that meet the internally established credit guidelines.

The credit risk is mainly in receivables from financial services. Credit risk of the portfolio of consumer finance receivables can be affected by general economic conditions. Adverse changes such as a rise in unemployment rates can increase the likelihood of defaults. Declines in used vehicle prices can reduce the amount of recoveries on repossessed collaterals. The finance subsidiaries of the Company manage exposures to credit risk in consumer finance receivables by monitoring and adjusting underwriting standards, which affect the level of credit risk that Honda assumes, pricing contracts for expected losses, and focusing collection efforts to minimize losses.

Table of Contents**HONDA MOTOR CO., LTD. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

Credit risk on dealer finance receivables is affected primarily by the financial strength of the dealers within the portfolio, the value of collateral securing the financings, and economic and market factors that could affect the creditworthiness of dealers. The finance subsidiaries of the Company manage exposures to credit risk in dealer finance receivables by performing comprehensive reviews of dealers prior to establishing financing arrangements and continuously monitoring the payment performance and creditworthiness of these dealers.

At the finance subsidiaries of the Company in North America, consumer finance receivables are charged off when they become 120 days past due or earlier if they have been specifically identified as uncollectible. Dealer finance receivables are charged off when they have been individually identified as uncollectible. At the finance subsidiaries of the Company in other areas except for North America, finance receivables are charged off when they have been identified as substantially uncollectible according to the internal standards of each subsidiary.

1) Aging analysis of receivables from financial services

At the finance subsidiaries of the Company in North America, consumer finance receivables are considered delinquent if more than 10% of a monthly scheduled payment is contractually past due on a cumulative basis. Dealer finance receivables are considered delinquent when any principal payments are past due. At the finance subsidiaries of the Company in other areas except for North America, finance receivables are considered delinquent when any principal payments are past due.

The analysis of the age of receivables from financial services that are past due as of April 1, 2013 and March 31, 2014 and 2015 is as follows:

	Yen (millions)				Total
	Less than 30 days past due	30-59 days past due	60-89 days past due	90 days and greater past due	
As of April 1, 2013					
Consumer finance receivables:					
Retail	¥ 160,696	¥ 19,232	¥ 2,912	¥ 4,122	¥ 186,962
Finance lease	2,509	966	161	1,644	5,280
Dealer finance receivables:					
Wholesale	10,511	205	67	311	11,094
Total	¥ 173,716	¥ 20,403	¥ 3,140	¥ 6,077	¥ 203,336

	Yen (millions)				Total
	Less than 30 days past due	30-59 days past due	60-89 days past due	90 days and greater past due	
As of March 31, 2014					
Consumer finance receivables:					

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

Retail	¥ 168,456	¥ 22,611	¥ 3,281	¥ 4,359	¥ 198,707
Finance lease	3,251	1,106	214	384	4,955
Dealer finance receivables:					
Wholesale	13,854	76	250	784	14,964
Total	¥ 185,561	¥ 23,793	¥ 3,745	¥ 5,527	¥ 218,626

F-57

Table of Contents**HONDA MOTOR CO., LTD. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

As of March 31, 2015	Yen (millions)				Total
	Less than 30 days past due	30-59 days past due	60-89 days past due	90 days and greater past due	
Consumer finance receivables:					
Retail	¥ 182,205	¥ 26,100	¥ 3,717	¥ 4,433	¥ 216,455
Finance lease	3,402	1,039	183	340	4,964
Dealer finance receivables:					
Wholesale	17,776	61	39	236	18,112
Total	¥ 203,383	¥ 27,200	¥ 3,939	¥ 5,009	¥ 239,531

2) Credit quality indicators

The collection experience of consumer finance receivables provides an indication of the credit quality of consumer finance receivables. The likelihood of accounts being charged off becomes significantly higher once an account becomes 60 days delinquent. Accordingly, the finance subsidiaries of the Company classify their portfolios of consumer finance receivables into groups the finance subsidiaries of the Company consider to be performing and nonperforming. Accounts that are delinquent for 60 days or greater are included in the nonperforming group and all other accounts are considered to be performing.

A credit quality indicator for dealer finance receivables is the internal risk ratings for the dealerships. Dealerships are assigned an internal risk rating based primarily on their financial condition. At a minimum, risk ratings for dealerships are updated annually and more frequently for dealerships with weaker risk ratings.

3) Maximum exposure to credit risk

The maximum exposure to credit risk at the end of each reporting period, with the exception of the guarantees stated in note 28 is the carrying amount of Honda's financial assets.

(d) Liquidity Risk

Honda raises funds by commercial paper, bank loans, medium-term notes, corporate bonds and securitization of finance receivables. Honda is exposed to the liquidity risk that Honda would not be able to repay liabilities on the due date due to the deterioration of the financing

environment.

Exposure to liquidity risk is managed by maintaining sufficient capital resources, a sufficient level of liquidity and a sound balance sheet. Honda meets its working capital targets primarily through cash generated by business operations and bank loans. Honda funds financial programs for customers and dealers primarily from commercial paper, bank loans, medium-term notes, corporate bonds and securitization of finance receivables.

The unused portions of the credit facility of Honda's commercial paper and medium-term note programs as of April 1, 2013 and March 31, 2014 and 2015 are as follows:

	2013	Yen (millions) 2014	2015
Commercial paper	¥ 518,334	¥ 727,803	¥ 730,641
Medium-term notes	1,761,213	1,991,166	2,320,077
Total	¥ 2,279,547	¥ 2,718,969	¥ 3,050,718

Table of Contents**HONDA MOTOR CO., LTD. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

Honda is authorized to obtain financing at prevailing interest rates under these programs.

Honda is aware of the possibility that various factors, such as recession-induced market contraction and financial and foreign exchange market volatility may adversely affect liquidity. For this reason, Honda has sufficient committed lines of credit that serve as alternative liquidity for the commercial paper issued regularly to replace debt.

The unused portions of the committed lines of credit extended by financial institutions to Honda as of April 1, 2013 and March 31, 2014 and 2015 are as follows:

	2013	Yen (millions)	
		2014	2015
Commercial paper programs	¥ 805,610	¥ 965,066	¥ 1,166,509
Other	8,451	59,208	63,151
Total	¥ 814,061	¥ 1,024,274	¥ 1,229,660

Borrowings under those committed lines of credit generally are available at the prime interest rate.

*Maturity analysis of financial liabilities**1) Non-derivative financial liabilities*

Non-derivative financial liabilities by maturity as of March 31, 2014 and 2015 are as follows:

	Yen (millions)				Total contractual
As of March 31, 2014	Carrying amount	Within 1 year	Between 1 and 5 years	Later than 5 years	cash flows
Trade payables	¥ 1,079,318	¥ 1,079,318	¥	¥	¥ 1,079,318

F-59

Table of Contents**HONDA MOTOR CO., LTD. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)***2) Derivative financial liabilities*

Derivative financial liabilities by maturity as of March 31, 2014 and 2015 are as follows:

As of March 31, 2014	Yen (millions)			Total contractual cash flows
	Within 1 year	Between 1 and 5 years	Later than 5 years	
Derivative financial liabilities	¥ 14,857	¥ 9,594	¥ 2,208	¥ 26,659

As of March 31, 2015	Yen (millions)			Total contractual cash flows
	Within 1 year	Between 1 and 5 years	Later than 5 years	
Derivative financial liabilities	¥ 29,581	¥ 26,547	¥ 1	¥ 56,129

(26) Fair Value*(a) Definition of Fair Value Hierarchy*

Honda uses a three-level hierarchy when measuring fair value. The following is a description of the three hierarchy levels:

- Level 1 Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access as of the measurement date
- Level 2 Inputs other than quoted prices included within Level 1 that are observable for the assets or liabilities, either directly or indirectly
- Level 3 Unobservable inputs for the assets or liabilities

The level in the fair value hierarchy within which a fair value measurement in its entirety falls is based on the lowest input that is significant to the fair value measurement in its entirety. Honda recognizes the transfers between the levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

(b) Method of Fair Value Measurement

The fair values of assets and liabilities are determined based on relevant market information and through the use of an appropriate valuation method.

The measurement methods and assumptions used in the measurement of assets and liabilities are as follows:

(Cash and cash equivalents, trade receivables and trade payables)

The fair values approximate their carrying amounts due to their short-term maturities.

(Receivables from financial services)

The fair value of receivables from financial services is measured primarily by discounting future cash flows using the current interest rates applicable for these receivables of similar remaining maturities. Fair value measurement for receivables from financial services is classified as Level 3.

Table of Contents

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

(Debt securities)

Debt securities consist mainly of mutual funds, corporate bonds, local bonds and auction rate securities.

The fair value of mutual funds with an active market is measured by using quoted market prices. Fair value measurement for mutual funds with an active market is classified as Level 1.

The fair values of corporate bonds and local bonds are measured based on proprietary pricing models provided by specialists and/or market makers and the models obtain a wide array of market observable inputs such as credit ratings and discount rates. Fair value measurements for corporate bonds and local bonds are classified as Level 2.

The subsidiary's auction rate securities are AAA rated and are insured by qualified guarantee agencies, and reinsured by the Secretary of Education and United States government, and guaranteed at approximately 95% by the United States government. To measure fair value of auction rate securities, Honda uses a third-party-developed valuation model which obtains a wide array of market observable inputs, as well as unobservable inputs including probability of passing or failing auction at each auction. Fair value measurement for auction rate securities is classified as Level 3.

(Equity securities)

The fair value of equity securities with an active market is measured by using quoted market prices. Fair value measurement for equity securities with an active market is classified as Level 1.

The fair value of equity securities with no active market is measured mainly by using the comparable company valuation method and other appropriate valuation methods. Fair value measurement for equity securities with no active market is classified as Level 3.

Price book-value ratio (PBR) of a comparable company are used as a significant unobservable input in the fair value measurement of equity securities classified as Level 3. The fair value increases (decreases) as PBR of a comparable company rise (decline). Such fair value measurements are conducted in accordance with the group accounting policy approved by the appropriate person of authority and based upon valuation methods determined by a valuator.

(Derivatives)

Derivatives consist mainly of foreign currency forward exchange contracts, foreign currency option contracts, currency swap agreements and interest rate swap agreements.

The fair values of foreign currency forward exchange contracts and foreign currency option contracts are measured by using market observable inputs such as spot exchange rates, discount rates and implied volatility. The fair values of currency swap agreements and interest rate swap agreements are measured by discounting future cash flows using market observable inputs such as LIBOR rates, swap rates, and foreign exchange rates. Fair value measurements for these derivatives are classified as Level 2.

The credit risk of the counterparties is considered in the valuation of derivatives.

Table of Contents**HONDA MOTOR CO., LTD. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)***(Financing liabilities)*

The fair value of financing liabilities is measured by discounting future cash flows using interest rates currently available for liabilities of similar terms and remaining maturities. Fair value measurement of financing liabilities is mainly classified as Level 2.

(c) Assets and Liabilities Measured at Fair Value on a recurring basis

Assets and liabilities measured at fair value on a recurring basis as of April 1, 2013 and March 31, 2014 and 2015 consist of the following:

F-65

Table of Contents**HONDA MOTOR CO., LTD. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

Generally, the set-off rights on financial instruments that do not meet the offsetting criteria for offsetting financial assets and financial liabilities become enforceable only under special circumstances, such as when the counterparty can no longer fulfill its obligations due to bankruptcy and other reasons.

(28) Commitments and Contingent Liabilities*(a) Commitments**1) Purchase commitments*

Commitments for purchases of property, plant and equipment and other commitments as of March 31, 2014 and 2015 are as follows:

	Yen (millions)	
	2014	2015
Commitments for purchases of property, plant and equipment and other commitments	¥ 131,238	¥ 131,843

2) Non-cancellable lease commitments

Honda is the lessee under several operating leases, primarily for office and other facilities, and certain office equipment.

Future minimum lease payments under non-cancelable operating leases that have initial or remaining lease terms in excess of one year as of March 31, 2014 and 2015 are as follows:

	Yen (millions)	
	2014	2015
Within 1 year	¥ 17,475	¥ 21,178
Between 1 and 5 years	38,033	40,912
Later than 5 years	29,006	31,448
Total	¥ 84,514	¥ 93,538

Lease payments under operating leases recognized as expenses for the years ended March 31, 2014 and 2015 are as follows:

	Yen (millions)	
	2014	2015
Lease payments under operating leases recognized as expenses	¥ 33,681	¥ 37,163

(b) Guarantees

Honda has entered into various guarantee agreements, which mainly consist of loan commitments to dealers and guarantees of bank loans of employees for their housing costs. The undiscounted maximum amount of payment for Honda's major guarantee obligations as of March 31, 2014 and 2015 is as follows:

	Yen (millions)	
	2014	2015
Loan commitments	¥ 103,406	¥ 138,995
Guarantee of employee loans	¥ 25,368	¥ 22,157

Table of Contents

Notes to Consolidated Financial Statements (Continued)

1) Loan commitments

Honda maintains unused balances on committed lines to dealers based on loan commitment contracts. Although committed lines have been extended, they will not necessarily be withdrawn, as certain contracts contain terms and conditions of withdrawal that require screening of the obligor's credit standing.

2) Guarantee of employee loans

Honda guarantees the bank loans of employees for their housing costs. If an employee defaults on his/her loan payments, Honda is required to perform under the guarantee. As of March 31, 2015, no amount has been accrued for any estimated losses under the obligations, as it is probable that the employees will be able to make all scheduled payments.

(c) Claims and Lawsuits

Honda is subject to potential liability under other various lawsuits and claims. Honda recognizes a provision for loss contingencies when it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. Honda reviews these pending lawsuits and claims periodically and adjusts the amounts recognized for these contingent liabilities, if necessary, by considering the nature of lawsuits and claims, the progress of the case and the opinions of legal counsel.

With respect to product liability, personal injury claims or lawsuits, Honda believes that any judgment that may be recovered by any plaintiff for general and special damages and court costs will be adequately covered by Honda's insurance and provision. Punitive damages are claimed in certain of these lawsuits.

After consultation with legal counsel, and taking into account all known factors pertaining to existing lawsuits and claims, Honda believes that the ultimate outcome of such lawsuits and pending claims should not result in liability to Honda that would be likely to have an adverse material effect on its consolidated financial position or results of operations.

Loss related to airbag inflators

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

Honda provides warranty programs with regard to the product recalls and SIC (Safety Improvement Campaign) related to airbag inflators. Honda recognizes a provision for specific warranty costs when it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. There is a possibility that Honda will need to recognize additional provisions when new evidence related to product recalls arise, however, it is not possible for Honda to reasonably estimate the amount and timing of potential future losses as of the date of this report.

In North America, various class actions related to the above mentioned product recalls and SIC have been filed against Honda since October 2014. The plaintiffs have claimed for properly functioning airbag inflators, compensation of economic losses including for incurred costs and the decline in the value of vehicles, as well as punitive damages. Most of the cases in the United States were transferred to the United States District Court for the Southern District of Florida and consolidated into a multidistrict litigation.

Regarding the above matter, Honda did not recognize a provision for loss contingencies because the conditions for a provision have not been met as of the date of this report. Also, it is not possible for Honda to reasonably estimate the amount and timing of potential future losses as of the date of this report because there is uncertainty regarding the period when these lawsuits will be concluded.

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

(29) Structured Entities

Honda considers whether its control over structured entities exists under IFRS 10 Consolidated Financial Statements . Honda consolidates structured entities over which it has control, by comprehensively determining whether its control over the entity exists based on any contractual arrangements with such entity as well as the percentage of its voting or similar rights in the entity.

The finance subsidiaries of the Company periodically securitize finance receivables for liquidity and funding purposes and transfer finance receivables to the trust which is newly established to issue asset-backed securities. The finance subsidiaries of the Company are deemed to have the power to direct the activities of these trusts that most significantly impact the trusts economic performance, as they retain servicing rights in all securitizations, and manage delinquencies and defaults of the underlying receivables. Furthermore, the finance subsidiaries of the Company are deemed to have the obligation to absorb losses of these trusts that could potentially be significant to these trusts, as they would absorb the majority of the expected losses of these trusts by retaining certain subordinated interests of these trusts. Therefore, the Company is deemed to have substantial control over these trusts and has consolidated them, as structured entities over which it has control.

The creditors of these trusts do not have recourse to the finance subsidiaries general credit with the exception of representations and warranties customary in the industry provided by the finance subsidiaries to these trusts.

There were no significant unconsolidated structured entities as of March 31, 2014 and 2015.

(30) Related Parties

(a) Related Party Transactions

Honda mainly purchases materials, supplies and services from affiliates and joint ventures, and sells finished goods, parts used in its products, equipment and services to them in the ordinary course of business. Transactions with affiliates and joint ventures are generally made at values that approximate arm s-length prices.

The balances of receivables and payables with affiliates and joint ventures as of April 1, 2013 and March 31, 2014 and 2015 are as follows:

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

(31) Explanation of Transition to IFRS

(a) First-time adoption in accordance with IFRS 1

The consolidated financial statements presented herein have been prepared by the Company for the first time in accordance with IFRS.

IFRS 1 requires full retrospective application of IFRS for the first-time adopters. However, it provides some voluntary and mandatory exemptions from full retrospective applications. Adjustments as a result of the first-time adoption of IFRS and these exemptions are recognized through retained earnings or other components of equity at the date of transition.

Major voluntary exemptions adopted by the Company are as follows:

1) Business combinations

Under IFRS 1, a first-time adopter may elect not to apply IFRS 3 Business Combination retrospectively to past business combinations that occurred before the date of transition to IFRS. The Company has elected to apply IFRS 3 prospectively from the date of transition. Accordingly, business combinations completed prior to the transition date have not been restated, thus any goodwill arising from business combinations which took place before the date of transition is recognized at the carrying amount based on U.S. generally accepted accounting principles (U.S. GAAP).

2) Use of deemed cost

Under IFRS 1, a first-time adopter may elect to use fair value at the date of transition as deemed cost at the date of transition for an item of property, plant and equipment. The Company has elected to use fair value at the date of transition as deemed cost for certain items of property, plant and equipment.

3) Exchange differences on translating foreign operations

Under IFRS 1, a first-time adopter may elect to deem the cumulative translation adjustments for foreign operations to be zero at the date of transition. The Company has deemed the cumulative amount of exchange differences on translating foreign operations at the date of transition to be zero.

4) Designation of previously recognized financial instruments

Under IFRS 1, equity securities may be designated as financial assets measured at fair value through other comprehensive income, based on facts and circumstances existing at the date of transition. The Company has elected to designate equity securities as financial assets measured at fair value through other comprehensive income, based on facts and circumstances existing at the date of transition.

(b) Reconciliation of U.S. GAAP to IFRS

Upon transition to IFRS, the Company has adjusted amounts previously reported in its consolidated financial statements prepared in accordance with U.S. GAAP. The effects of the transition from U.S. GAAP to IFRS on Honda's financial position, results of operations and cash flows are stated in the following reconciliations and their notes.

Items that do not affect retained earnings and comprehensive income are included in Reclassification, and items that affect retained earnings and comprehensive income are included in Recognition and measurement differences of the reconciliation tables.

Table of Contents**HONDA MOTOR CO., LTD. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)***(c) Notes to Reconciliation of Equity and comprehensive income**1) Intangible assets*

Under U.S. GAAP, research and development expense is expensed as incurred unless other individual accounting standards are applied.

Under IFRS, cost incurred for development of product is capitalized only when there is a technical and commercial feasibility of completing the development, Honda has intention, ability and sufficient resources to use the outcome of the development, it is probable that the outcome will generate a future economic benefit, and the cost can be measured reliably. Capitalized development cost is measured at the sum of expenditures for development incurred between when the recognition criteria are initially met and when the development is completed. Capitalized development cost is amortized using the straight-line method over the expected product life cycle of the developed product ranging mainly from 2 to 6 years.

The effects of this change are as follows:

	Yen (millions)	
	As of the date of transition (April 1, 2013)	As of March 31, 2014
Consolidated statements of financial position		
Intangible assets	¥ 497,097	¥ 524,718
Deferred tax liabilities	179,134	184,005
Adjustment to retained earnings	¥ 317,963	¥ 340,713

	Yen (millions) For the year ended March 31, 2014
Consolidated statements of income	
Research and development	¥ 27,621
Adjustment to profit before income taxes	¥ 27,621

2) Employee benefits

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

Under U.S. GAAP, for defined benefit plans, service cost, interest cost and expected return on plan assets are recognized in profit or loss. Actuarial gains and losses and past service cost which were incurred during reporting period but not recognized in profit or loss as component of pension costs, are recognized in accumulated other comprehensive income and amortized from accumulated other comprehensive income into profit or loss over a certain period of future years.

Under IFRS, for defined benefit plans, current and past service cost is recognized in profit or loss, and net interest expense which is determined by multiplying net defined benefit liability (asset) by discount rate is recognized in profit or loss. Remeasurements arising from defined benefit plans are recognized in other comprehensive income and reclassified directly from other components of equity to retained earnings when they are incurred. These remeasurements consist of actuarial gains and losses related to defined benefit plan obligations, return on plan assets (excluding the amount of interest income on plan assets) and others.

F-78

Table of Contents**HONDA MOTOR CO., LTD. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

The effects of this change are as follows:

	Yen (millions)	
	As of the date of transition (April 1, 2013)	As of March 31, 2014
Consolidated statements of financial position		
Other components of equity	310,922	201,520
Adjustment to retained earnings	¥ (310,922)	¥ (201,520)

	Yen (millions)	
	For the year ended March 31, 2014	
Consolidated statements of income		
Cost of sales		¥ 18,617
Selling, general and administrative		7,500
Research and development		7,883
Adjustment to profit before income taxes		¥ 34,000

3) *Exchange differences on translating foreign operations*

The Company has deemed the cumulative amount of exchange differences on translating foreign operations at the date of transition to be zero.

The effects of this change are as follows:

	Yen (millions)	
	As of the date of transition (April 1, 2013)	As of March 31, 2014
Consolidated statements of financial position		
Other components of equity	¥ 889,649	¥ 889,649
Adjustment to retained earnings	¥ (889,649)	¥ (889,649)

4) Sales revenue and cost of sales

Under U.S. GAAP, when property, plant and equipment held for lease to others is sold, it is treated as disposal of the assets and is presented on a net basis in the consolidated statements of income.

Under IFRS, when property, plant and equipment held for lease to others is routinely sold in the course of the ordinary activities, the carrying amount of the asset is reclassified from property, plant and equipment to inventories when such asset ceases to be leased and become held for sale. Upon its subsequent sale, proceed from the sale is recognized as revenue, and the carrying amount of inventories is recognized to cost of sales.

The effects of this change are as follows:

	Yen (millions)	
	As of the date of transition (April 1, 2013)	As of March 31, 2014
Consolidated statements of financial position		
Inventories	¥ 8,999	¥ 10,385
Other current assets	(8,999)	(10,385)
Adjustment to retained earnings	¥	¥

Table of Contents**HONDA MOTOR CO., LTD. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

Consolidated statements of income	
Sales revenue	¥ 601,602
Cost of sales	(601,602)
Adjustment to profit before income taxes	¥

5) Distribution expenses

Under U.S. GAAP, a portion of the distribution expenses are recognized as selling, general and administrative expenses.

Under IFRS, distribution expenses related to sales are all recognized in cost of sales.

The effects of this change are as follows:

	Yen (millions) For the year ended March 31, 2014
Consolidated statements of income	
Cost of sales	¥ (202,183)
Selling, general and administrative	202,183
Adjustment to profit before income taxes	¥

6) Income taxes

Under U.S. GAAP, deferred tax liabilities recognized for taxable temporary differences associated with investments in affiliates are measured based on the future reversal of the taxable temporary difference resulting from the sale of investments.

Under IFRS, deferred tax liabilities recognized for taxable temporary differences associated with investments in affiliates are measured based on the most likely manner of future reversal, such as the distribution of dividends.

The effects of this change are as follows:

	Yen (millions)	
	As of the date of transition (April 1, 2013)	As of March 31, 2014
Consolidated statements of financial position		
Deferred tax liabilities	¥ (67,624)	¥ (72,568)
Adjustment to retained earnings	¥ 67,624	¥ 72,568

A major reconciling item in equity and comprehensive income other than 1) to 6) above is as follows:

Under U.S. GAAP, when financial statements of some subsidiaries and equity method affiliates are prepared as of the end of the reporting period different from that of the parent company's financial statements, the effect of intervening events that materially affect the financial position or results of operations, is reflected in the consolidated financial statements by disclosure or otherwise.

Table of Contents

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

Under IFRS, when financial statements of some subsidiaries, affiliates and joint ventures are prepared as of the end of the reporting period different from that of the parent company's financial statements, the end of the reporting period should be unified or supplementary financial statements should be prepared for the parent company, unless it is impracticable to do so. In addition, when it is impracticable to unify the end of the reporting period or to prepare supplementary financial statements, adjustments must be made for the effects of significant events or transactions that occur between the end date of the different reporting period and the end of the reporting period

As a result of unification of reporting period, retained earnings increased by ¥45,826 million and ¥57,909 million as of the date of transition and as of March 31, 2014, respectively.

(d) Notes to Changes in Presentations of Consolidated Statements of Financial Position

1) Presentation of deferred tax assets and liabilities

Under U.S. GAAP, deferred tax assets and liabilities are presented as current assets and liabilities or non-current assets and liabilities. Under IFRS, it is not permitted to present deferred tax assets and liabilities as current assets and liabilities. Accordingly, deferred tax assets and liabilities are all presented as non-current assets and liabilities.

2) Presentation of financial assets and liabilities

Under IFRS, financial assets and financial liabilities are presented separately based on the presentation rules. Financial assets are included in cash and cash equivalents, trade receivables, receivables from financial services, and other financial assets, under current assets or non-current assets; financial liabilities are included in trade payables, financing liabilities, accrued expenses and other financial liabilities, under current liabilities or non-current liabilities. Additionally, under U.S. GAAP, of wholesales finance receivables and retail or direct financing lease receivables held by the finance subsidiaries of the Company, certain amounts related to sales of inventories are included in trade accounts or other assets and remaining amounts are presented as finance subsidiaries-receivables in the consolidated balance sheets. Under IFRS, these finance receivables are collectively presented as receivables from financial services in the consolidated statements of financial position.

3) Offsetting of financial assets and financial liabilities

Under U.S. GAAP, financial assets and financial liabilities are presented on a net basis when there is an existing enforceable master netting arrangement on net settlements at the occurrence of future events, such as a default. Under IFRS, financial assets and financial liabilities are

Edgar Filing: HONDA MOTOR CO LTD - Form 20-F

presented on a net basis only when an entity has a legally enforceable right to set off the recognized amounts at the end of the reporting period, and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

(e) Significant Adjustment Items of Consolidated Statements of Cash Flows for the Year Ended March 31, 2014

In the consolidated statements of cash flows prepared in accordance with IFRS, cash inflows from operating activities decreased by ¥780,083 million and cash outflows from investing activities decreased by ¥787,721 million compared with the statements prepared in accordance with U.S. GAAP. Significant adjustment items are as follows:

Acquisitions and collections of receivables from financial services and proceeds from sales and purchases of equipment on operating leases which were classified as cash flows from investing activities under U.S. GAAP

F-81

Table of Contents

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

are classified as cash flows from operating activities under IFRS. These adjustments decreased cash inflows from operating activities and decreased cash outflows from investing activities by ¥955,268 million.

Of research and development expenditures classified as cash flows from operating activities under U.S. GAAP, those for development activities that meet IFRS recognition requirements for assets are classified as cash flows from investing activities under IFRS. This adjustment increased cash inflows from operating activities and increased cash outflows from investing activities by ¥150,202 million.

(32) Approval of Release of Consolidated Financial Statements

The release of the consolidated financial statements was approved by Takahiro Hachigo, President, Chief Executive Officer and Representative Director and Kohei Takeuchi, Director and Chief Operating Officer for Business Management Operations on June 26, 2015.
