Notes to the Condensed consolidated interim financial statements

Amounts in EUR millions, unless otherwise stated

Aegon N.V., incorporated and domiciled in the Netherlands, is a public limited liability company organized under Dutch law and recorded in the Commercial Register of The Hague under number 27076669 and with its registered address at Aegonplein 50, 2591 TV, The Hague, the Netherlands. Aegon N.V. serves as the holding company for the Aegon Group and has listings of its common shares in Amsterdam and New York.

Aegon N.V. (or the Company) and its subsidiaries (Aegon or the Group) have life insurance and pensions operations in more than 20 countries in the Americas, Europe and Asia and are also active in savings and asset management operations, accident and health insurance, general insurance and to a limited extent banking operations. Headquarters are located in The Hague, the Netherlands. The Group employs over 29,000 people worldwide.

1. Basis of presentation

The condensed consolidated interim financial statements as at and for the period ended, June 30, 2017, have been prepared in accordance with IAS 34 Interim Financial Reporting, as adopted by the European Union (hereafter IFRS). They do not include all of the information required for a full set of financial statements prepared in accordance with IFRS and should therefore be read together with the 2016 consolidated financial statements of Aegon N.V. as included in Aegon's Annual Report for 2016. Aegon's Annual Report for 2016 is available on its website (aegon.com).

The condensed consolidated interim financial statements have been prepared in accordance with the historical cost convention as modified by the revaluation of investment properties and those financial instruments (including derivatives) and financial liabilities that have been measured at fair value. Certain amounts in prior periods may have been reclassified to conform to the current year presentation. These reclassifications had no effect on net income, shareholders' equity or earnings per share. The condensed consolidated interim financial statements as at, and for the period ended June 30, 2017, were approved by the Executive Board on August 9, 2017.

The condensed consolidated interim financial statements are presented in euro (EUR) and all values are rounded to the nearest million unless otherwise stated. The consequence is that the rounded amounts may not add up to the rounded total in all cases.

The published figures in these condensed consolidated interim financial statements are unaudited.

Unaudited

2. Significant accounting policies

All accounting policies and methods of computation applied in the condensed consolidated interim financial statements are the same as those applied in the 2016 consolidated financial statements.

New IFRS accounting standards effective

The following standards, interpretations, amendments to standards and interpretations became effective in 2017, but have not yet been endorsed by the European Union:

IAS 7 Amendment Disclosure Initiative;

IAS 12 Recognition of Deferred Tax Assets for Unrealised Losses; and

Annual improvements 2014-2016 Cycle.

None of these revised standards and interpretations will significantly impact the financial position or the condensed consolidated interim financial statements.

For a complete overview of IFRS standards, published before January 1, 2017, that will be applied in future years, and were not early adopted by the Group, please refer to Aegon's Annual Report for 2016.

Future adoption of IFRS accounting standards

The IASB has issued IFRS 17 Insurance Contracts. IFRS 17 will be mandatorily effective for annual reporting periods beginning on or after January 1, 2021. It aims to provide a more consistent accounting model for insurance contracts among entities issuing insurance contracts globally. IFRS 17, together with IFRS 9 Financial Instruments, will fundamentally change the accounting in IFRS financial statements of insurance companies. Aegon has started its implementation project on both standards. Aegon expects the impact of the standards to be significant.

The endorsement process of the European Union of the new standard is expected to start in 2017. A final endorsement decision is not expected to be made in 2017.

Taxes

Taxes on income for the three month period, ended June 30, 2017, are calculated using the tax rate that is estimated to be applicable to total annual earnings.

Judgments and critical accounting estimates

Preparing the condensed consolidated interim financial statements requires management to make judgments, estimates and assumptions, including the likelihood, timing or amount of future transactions or events, that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from the estimates made.

In preparing the condensed consolidated interim financial statements, significant judgments made by management in applying the Group's accounting policies and the key sources of estimating uncertainty were not significantly different than those that were applied to the consolidated financial statements as at and for the year ended December 31, 2016.

Unaudited

Exchange rates

Assets and liabilities are translated at the closing rates on the reporting date. Income, expenses and capital transactions (such as dividends) are translated at average exchange rates or at the prevailing rates on the transaction date, if more appropriate. The following exchange rates are applied for the condensed consolidated interim financial statements:

Closing exchange rates

			USD	GBP
June 30, 2017	1	EUR	1.1406	0.8781
December 31, 2016	1	EUR	1.0548	0.8536

Weighted average exchange rates

			USD	GBP
Six months ended June 30, 2017	1	EUR	1.0822	0.8596
Six months ended June 30, 2016	1	EUR	1.1160	0.7784

3.2 Performance measure

Aegon's segment information is prepared by consolidating on a proportionate basis Aegon's joint ventures and associated companies.

Performance measure

A non-IFRS performance measure of reporting segments utilized by the Company is underlying earnings before tax. Underlying earnings before tax reflects Aegon's profit from underlying business operations and excludes components that relate to accounting mismatches that are dependent on market volatility, updates to best estimate actuarial and economic assumptions and model updates or events that are considered outside the normal course of business. Note that, as disclosed in the 2016 Annual Report, Aegon changed the measurement of underlying earnings before tax to exclude the impact of actuarial assumption updates. In addition, updates to economic assumptions previously recorded in fair value items, are recorded in Other income / (charges). These changes resulted in a shift of EUR 20 million (negative) in The Netherlands from Fair value items to Other income/charges in the 2Q 2016 numbers.

Aegon believes that its non-IFRS performance measure, underlying earnings before tax, provides meaningful supplemental information about the underlying results of Aegon's business, including insight into the financial measures that Aegon's senior management uses in managing the business. Among other things, Aegon's senior management is compensated based in part on Aegon's results against targets using underlying earnings before tax. While many other insurers in Aegon's peer group present substantially similar performance measures, the performance measures presented in this document may nevertheless differ from the performance measures presented by other insurers. There is no standardized meaning to these measures under IFRS or any other recognized set of accounting standards.

Unaudited

The reconciliation from underlying earnings before tax to income before tax, being the most comparable IFRS measure, is presented in the tables in this note.

The items that are excluded from underlying earnings before tax as described further below are: fair value items, realized gain or losses on investments, impairment charges/reversals, other income or charges, run-off businesses and share in earnings of joint ventures and associates.

Fair value items

Fair value items include the over- or underperformance of investments and guarantees held at fair value for which the expected long-term return is included in underlying earnings before tax.

In addition, hedge ineffectiveness on hedge transactions, fair value changes on economic hedges without natural offset in earnings and for which no hedge accounting is applied and fair value movements on real estate are included under fair value items.

Certain assets held by Aegon are carried at fair value and managed on a total return basis, with no offsetting changes in the valuation of related liabilities. These include assets such as investments in hedge funds, private equities, real estate (limited partnerships), convertible bonds and structured products. Underlying earnings before tax exclude any over- or underperformance compared to management's long-term expected return on assets. Based on current holdings and asset returns, the long-term expected return on an annual basis is 8-10%, depending on asset class, including cash income and market value changes. The expected earnings from these asset classes are net of deferred policy acquisition costs (DPAC) where applicable.

In addition, certain products offered by Aegon Americas contain guarantees and are reported on a fair value basis and the total return annuities and guarantees on variable annuities. The earnings on these products are impacted by movements in equity markets and risk-free interest rates. Short-term developments in the financial markets may therefore cause volatility in earnings. Included in underlying earnings before tax is a long-term expected return on these products and excluded is any over- or underperformance compared to management's expected return.

The fair value movements of certain guarantees and the fair value change of derivatives that hedge certain risks on these guarantees of Aegon the Netherlands, VA Europe (included in United Kingdom) and Japan are excluded from underlying earnings before tax, and the long-term expected return for these guarantees is set at zero. In addition, fair value items include market related results on our loyalty bonus reserves in the United Kingdom. The value of these reserves are directly related to policyholder investments which value is directly impacted by movements in equity and bond markets.

Holding and other activities include certain issued bonds that are held at fair value through profit or loss (FVTPL). The interest rate risk on these bonds is hedged using swaps. The fair value movement resulting from changes in Aegon's credit spread used in the valuation of these bonds are excluded from underlying earnings before tax and reported under fair value items.

Realized gains or losses on investments

Includes realized gains and losses on available-for-sale investments, mortgage loans and other loan portfolios.

Unaudited

Impairment charges/reversals

Impairment charges include impairments on available-for-sale debt securities, shares including the effect of deferred policyholder acquisition costs, mortgage loans and other loan portfolios at amortized cost, joint ventures and associates. Impairment reversals include reversals on available-for-sale debt securities.

Other income or charges

Other income or charges includes: a) items which cannot be directly allocated to a specific line of business; b) the impact of actuarial and economic assumption and model updates used to support calculations of our liabilities for insurance and investment contracts sold to policyholders and related assets; and c) items that are outside the normal course of business, including restructuring charges. In the condensed consolidated interim financial statements, these restructuring charges are included in operating expenses. Actuarial assumption and model updates are recorded in Claims and Benefits in the IFRS income statement.

Run-off businesses

Includes underlying results of business units where management has decided to exit the market and to run-off the existing block of business. Currently, this line includes results related to the run-off of the institutional spread-based business, structured settlements blocks of business, bank-owned and corporate-owned life insurance (BOLI/COLI) business (until April 1, 2017, please refer to note 26 Acquisitions/divestments for more information on the divestment of this business), and the sale of the life reinsurance business in the United States. Aegon has other blocks of business for which sales have been discontinued and of which the earnings are included in underlying earnings before tax.

Share in earnings of joint ventures and associates

Earnings from Aegon's joint ventures in the Netherlands, Mexico, Spain, Portugal, China and Japan and Aegon's associates in India, Brazil, the Netherlands, United Kingdom, Mexico and France are reported on an underlying earnings before tax basis.

Total	2,002	2,073	3,866	4,008
6. Income from reinsurance ceded				

The income from reinsurance ceded increased by EUR 1.0 billion in 2Q 2017 compared to 2Q 2016. This is mainly the result of the new reinsurance transaction related to the pay out annuity business and BOLI/COLI. Due to the transaction the liabilities for insurance contracts increased by EUR 0.9 billion resulting from loss recognition and then were ceded to a reinsurance company. The loss recognition is reflected in the benefits and expenses line (within claims and benefits) and is offset by an equal increase in the income from reinsurance ceded. As a result there is a nil net impact in the income statement. For more details on the divestment of these businesses refer to note 26 Acquisitions/divestments.

Net fair value change on borrowings and other financial liabilities	(4)	6	-	(3)
Realized gains /(losses) on repurchased debt	(1)	1	(1)	1
Total	2,637	4,817	9,332	6,867

The decrease of the net fair value change on for account of policyholder financial assets at FVTPL in 2Q 2017 compared to 2Q 2016 is mainly driven by equity markets and interest rate movements.

Net fair value change on for accounts of policyholder financial assets at FVTPL is offset by amounts in the Claims and benefits line reported in note 9 - Benefits and expenses.

8. Other income

Other income of EUR 318 million in the second quarter of 2017 mainly related to a book gain of EUR 231 million (USD 250 million) related to the divestment of the payout annuity business and the Bank Owned Life Insurance / Corporate Owned Life Insurance business (BOLI/COLI) in the US. For more details on the divestment of these businesses refer to note 26 Acquisitions/divestments. Furthermore, a release of an expense reserve of EUR 82 million (GBP 71 million) was recorded that was embedded in the liabilities for insurance contracts following the completion of the Part VII transfer to Rothesay Life. For more details on the completion of the Part VII transfer to Rothesay Life refer to note 24 Assets and Liabilities held for sale and note 26 Acquisitions/divestments.

9. Benefits and expenses

The lines change in valuation of liabilities for insurance contracts and change in valuation of liabilities for investment contracts reflect changes in technical provisions resulting from net fair value changes on for account of policyholder financial assets at fair value through P&L included in Results from financial transactions (note 7) of EUR 3,269 million (2Q 2016: EUR 4,865 million). In addition, the line change in valuation of liabilities for insurance contracts includes a decrease of technical provisions for life insurance contracts of EUR 161 million (2Q 2016: increase of EUR 1,163 million).

Investment in real estate	669	686
Total investments for account of policyholders	198,278	203,610

13. Reinsurance assets

Reinsurance assets increased by EUR 8.7 billion compared to December 31, 2016 mainly due to the divestment of the payout annuity business and the Bank Owned Life Insurance / Corporate Owned Life Insurance business (BOLI/COLI) in the US. For more details on the divestment of these businesses refer to note 26

Acquisitions/divestments.

14. Derivatives

The movements in fair value of derivatives on both the asset and liability side of the condensed consolidated statement of financial position mainly result from changes in interest rates and other market movements during the period, as well as purchases, disposals and maturities. The divestment of the payout annuity business and Bank Owned Life Insurance / Corporate Owned Life Insurance (BOLI/COLI) business in the Americas contributed to the decrease of derivative assets with EUR 259 million compared to December 31, 2016.

¹ Includes impairments and movements related to fair value hedges. Gains and losses are recorded in the line item results from financial transactions of the income statement.

² Total gains and losses are recorded in line items Gains/ (losses) on revaluation of available-for-sale investments and (Gains)/ losses transferred to the income statement on disposal and impairment of available-for-sale investment of the statement of other comprehensive income.

³ Total gains / (losses) for the period during which the financial instrument was in Level III.

Unaudited

During the first six months of 2017, Aegon transferred certain financial instruments from Level I and II to Level III of the fair value hierarchy. The reason for the change in level was that the market liquidity for these securities decreased, which led to a change in market observability of prices. Prior to transfer, the fair value for the Level II securities was determined using observable market transactions or corroborated broker quotes respectively for the same or similar instruments. The amount of assets and liabilities transferred to Level III was EUR 229 million (full year 2016: EUR 1,077 million). Since the transfer, all such assets have been valued using valuation models incorporating significant non market-observable inputs or uncorroborated broker quotes.

Similarly, during the first six months of 2017, Aegon transferred EUR 264 million (full year 2016: EUR 3,266 million) of financial instruments from Level III to other levels of the fair value hierarchy. The change in level was mainly the result of a return of activity in the market for these securities and that for these securities the fair value could be determined using observable market transactions or corroborated broker quotes for the same or similar instruments.

The following table presents information about the significant unobservable inputs used for recurring fair value measurements for certain Level III financial instruments.

Overview of significant unobservable inputs

<i>EUR millions</i>	Carrying amount June 30, 2017	Valuation technique ¹	Significant unobservable input ²	Range (weighted average)

Total financial liabilities at fair value	2,092			

1 Other in the table above (column Valuation technique) includes investments for which the fair value is uncorroborated and no broker quote is received.

2 Not applicable (n.a.) has been included when no significant unobservable assumption has been identified.

3 Investments for account of policyholders are excluded from the table above and from the disclosure regarding reasonably possible alternative assumptions. Policyholder assets, and their returns, belong to policyholders and do not impact Aegon's net income or equity. The effect on total assets is offset by the effect on total liabilities. Derivatives exclude derivatives for account of policyholders amounting to EUR 2 million.

4 Net asset value is considered the best approximation to the fair value of these financial instruments.

Unaudited

The description of Aegon's methods of determining fair value is included in the consolidated financial statements for 2016. For reference purposes, the valuation techniques included in the table above are described in more detail on the following pages.

Shares

When available, Aegon uses quoted market prices in active markets to determine the fair value of its investments in shares. Fair values for unquoted shares are estimated using observations of the price/earnings or price/cash flow ratios of quoted companies considered comparable to the companies being valued. Valuations are adjusted to account for company-specific issues and the lack of liquidity inherent in an unquoted investment. Adjustments for illiquidity are generally based on available market evidence. In addition, a variety of other factors are reviewed by management, including, but not limited to, current operating performance, changes in market outlook and the third-party financing environment.

Available-for-sale shares include shares in a Federal Home Loan Bank (FHLB) for an amount of EUR 218 million (December 31, 2016: EUR 237 million) that are measured at par, which are reported as part of Other in the column Valuation technique. A FHLB has implicit financial support from the United States government. The redemption value of the shares is fixed at par and they can only be redeemed by the FHLB.

Debt securities

Aegon's portfolio of debt securities can be subdivided in Residential mortgage-backed securities (RMBS), Commercial mortgage-backed securities (CMBS), Asset-backed securities (ABS), Corporate bonds and Government debt. Below relevant details in the valuation methodology for these specific types of debt securities are described.

Valuations of RMBS, CMBS and ABS are monitored and reviewed on a monthly basis. Valuations per asset type are based on a pricing hierarchy which uses a waterfall approach that starts with market prices from indices and follows with third-party pricing services or brokers. The pricing hierarchy is dependent on the possibilities of corroboration of the market prices. If no market prices are available, Aegon uses internal models to determine fair value. Significant inputs included in the internal models are generally determined based on relative value analyses, which incorporate comparisons to instruments with similar collateral and risk profiles. Market standard models may be used to model the specific collateral composition and cash flow structure of each transaction.

Valuations of corporate bonds are monitored and reviewed on a monthly basis. The pricing hierarchy is dependent on the possibility of corroboration of market prices when available. If no market prices are available, valuations are determined by a discounted cash flow methodology using an internally calculated yield. The yield is comprised of a credit spread over a given benchmark. In all cases, the benchmark is an observable input. The credit spread contains both observable and unobservable inputs. Aegon starts by taking an observable credit spread from a similar bond of the given issuer, and then adjusts this spread based on unobservable inputs. These unobservable inputs may include subordination, liquidity and maturity differences. The weighted average credit spread used in valuation of corporate bonds has decreased to 1.4% (December 31, 2016: 3.1%).

If available, Aegon uses quoted market prices in active markets to determine the fair value of its Government debt investments. If Aegon cannot make use of quoted market prices, market prices from indices or quotes from third-party pricing services or brokers are used.

Tax credit investments

The fair value of tax credit investments is determined by using a discounted cash flow valuation technique. This valuation technique takes into consideration projections of future capital contributions and distributions, as well as future tax credits and the tax benefits of future operating losses. The present value of these cash flows is calculated by applying a discount rate. In general, the discount rate is determined based on the cash outflows for the investments and the cash inflows from the tax credits/tax benefits (and the timing of those cash flows). These inputs are unobservable in the market place. The discount rate used in valuation of tax credit investments has decreased to 5.5% (December 31, 2016: 5.6%).

Unaudited

Investment funds

Investment funds include real estate funds, private equity funds and hedge funds. The fair values of investments held in non-quoted investment funds are determined by management after taking into consideration information provided by the fund managers. Aegon reviews the valuations each month and performs analytical procedures and trending analyses to ensure the fair values are appropriate.

Derivatives

Where quoted market prices are not available, other valuation techniques, such as option pricing or stochastic modeling, are applied. The valuation techniques incorporate all factors that a typical market participant would consider and are based on observable market data when available. Models are validated before they are used and calibrated to ensure that outputs reflect actual experience and comparable market prices.

Fair values for exchange-traded derivatives, principally futures and certain options, are based on quoted market prices in active markets. Fair values for over-the-counter (OTC) derivatives represent amounts estimated to be received from or paid to a third party in settlement of these instruments. These derivatives are valued using pricing models based on the net present value of estimated future cash flows, directly observed prices from exchange-traded derivatives, other OTC trades, or external pricing services. Most valuations are derived from swap and volatility matrices, which are constructed for applicable indices and currencies using current market data from many industry standard sources. Option pricing is based on industry standard valuation models and current market levels, where applicable. The pricing of complex or illiquid instruments is based on internal models or an independent third party. For long-dated illiquid contracts, extrapolation methods are applied to observed market data in order to estimate inputs and assumptions that are not directly observable. To value OTC derivatives, management uses observed market information, other trades in the market and dealer prices.

Some OTC derivatives are so-called longevity derivatives. The payout of longevity derivatives is linked to publicly available mortality tables. The derivatives are measured using the present value of the best estimate of expected payouts of the derivative plus a risk margin. The best estimate of expected payouts is determined using best estimate of mortality developments. Aegon determined the risk margin by stressing the best estimate mortality developments to quantify the risk and applying a cost-of-capital methodology. The most significant unobservable input for these derivatives is the (projected) mortality development.

Aegon normally mitigates counterparty credit risk in derivative contracts by entering into collateral agreements where practical and in ISDA (International Swaps and Derivatives Association) master netting agreements for each of the Group's legal entities to facilitate Aegon's right to offset credit risk exposure. Changes in the fair value of derivatives attributable to changes in counterparty credit risk were not significant.

Embedded derivatives in insurance contracts including guarantees

All bifurcated guarantees for minimum benefits in insurance and investment contracts are carried at fair value. These guarantees include guaranteed minimum withdrawal benefits (GMWB) in the United States, United Kingdom and Japan which are offered on some variable annuity products and are also assumed from a ceding company; minimum

investment return guarantees on insurance products offered in the Netherlands, including group pension and traditional products; variable annuities sold in Europe and Japan.

Since the price of these guarantees is not quoted in any market, the fair values of these guarantees are based on discounted cash flows calculated as the present value of future expected payments to policyholders less the present value of assessed rider fees attributable to the guarantees. Given the complexity and long-term nature of these guarantees which are unlike instruments available in financial markets, their fair values are determined by using stochastic models under a variety of market return scenarios. A variety of factors are considered including credit spread, expected market rates of return, equity and interest rate volatility, correlations of market returns, discount rates and actuarial assumptions. The most significant unobservable factor is discount rate. The credit spread used in the valuations of embedded derivatives in insurance contracts has decreased to 0.3% (December 31, 2016: 0.4%).

Unaudited

The expected returns are based on risk-free rates. Aegon added a premium to reflect the credit spread as required. The credit spread is set by using the credit default swap (CDS) spreads of a reference portfolio of life insurance companies (including Aegon), adjusted to reflect the subordination of senior debt holders at the holding company level to the position of policyholders at the operating company level (who have priority in payments to other creditors). Aegon's assumptions are set by region to reflect differences in the valuation of the guarantee embedded in the insurance contracts.

Since many of the assumptions are unobservable and are considered to be significant inputs to the liability valuation, the liability included in future policy benefits has been reflected within Level III of the fair value hierarchy.

Effect of reasonably possible alternative assumptions

The effect of changes in unobservable inputs on fair value measurement were not significantly different than those that were applied to the consolidated financial statements as at and for the year ended December 31, 2016.

Fair value information about financial instruments not measured at fair value

The following table presents the carrying values and estimated fair values of financial assets and liabilities, excluding financial instruments which are carried at fair value on a recurring basis.

Fair value information about financial instruments not measured at fair value

<i>EUR millions</i>	Carrying amount		Carrying amount December 31, 2016	Total estimated fair value December 31, 2016
	June 30, 2017	June 30, 2017		
Assets				
Mortgage loans - held at amortized cost	33,258	37,366	34,206	38,499
Private loans - held at amortized cost	3,285	3,636	3,166	3,569
Other loans - held at amortized cost	2,237	2,237	2,441	2,441
Liabilities				
Subordinated borrowings - held at amortized cost	765	883	767	844
	143	137	156	141

Trust pass-through securities - held at amortized cost				
Borrowings - held at amortized cost	14,297	14,663	12,543	12,935
Investment contracts - held at amortized cost	17,261	17,622	19,217	19,748
Financial instruments for which carrying value approximates fair value				

Certain financial instruments that are not carried at fair value are carried at amounts that approximate fair value, due to their short-term nature and generally negligible credit risk. These instruments include cash and cash equivalents, short-term receivables and accrued interest receivable, short-term liabilities, and accrued liabilities. These instruments are not included in the table above.

16. Deferred expenses

<i>EUR millions</i>	June 30, 2017	Dec. 31, 2016
Deferred policy acquisition costs (DPAC) for insurance contracts and investment contracts with discretionary participation features	10,060	10,882
Deferred cost of reinsurance	50	60
Deferred transaction costs for investment management services	456	481
Total deferred expenses	10,565	11,423

The divestment of the payout annuity business and Bank Owned Life Insurance / Corporate Owned Life Insurance business (BOLI/COLI) in the Americas resulted in a write off regarding deferred policy acquisition costs of EUR 205 million. In addition, deferred policy acquisition costs are predominantly impacted by unfavorable currency translation adjustments.

Unaudited

17. Intangible assets

<i>EUR millions</i>	June 30, 2017	Dec. 31, 2016
Goodwill	332	294
VOBA	1,213	1,399
Future servicing rights	57	64
Software	47	50
Other	39	12
Total intangible assets	1,688	1,820

Intangible assets, except for goodwill, are predominantly impacted by periodic amortization of balances and changes in foreign exchange rates. The acquisition of Cofunds Ltd. in January 2017 resulted in the addition of customer intangibles (included in the line Other) amounting to EUR 29 million and goodwill amounting to EUR 56 million. The divestment of the payout annuity business and Bank Owned Life Insurance / Corporate Owned Life Insurance business (BOLI/COLI) in the Americas resulted in a write off of VOBA of EUR 18 million.

18. Share capital

Unaudited

Final dividend 2016

It was decided in the Annual General Meeting of Shareholders on May 19, 2017, to pay a final dividend for the year 2016 of EUR 0.13 per common share. After taking into account the interim dividend 2016 of EUR 0.13 per common share, this resulted in a total 2016 dividend of EUR 0.26 per common share. Final dividend for the year and total 2016 dividend per common share B amounted to 1/40th of the dividend paid on common shares.

The final dividend 2016 is paid in cash or in stock at the election of the shareholder. The value of the stock dividend and the cash dividend are approximately equal in value and 46% of shareholders elected to receive the stock dividend. Those who elected to receive a stock dividend will receive one Aegon common share for every 35 common shares held. The stock fraction is based on Aegon's average share price as quoted on Euronext Amsterdam, using the high and low of each of the five trading days from June 12 up to and including June 16, 2017. The average share price calculated on this basis amounted to EUR 4.5254. The dividend was paid as of June 23, 2017.

19. Insurance contracts

Insurance contracts decreased by EUR 6.7 billion to EUR 112.9 billion compared to December 31, 2016 mainly due to changes in foreign exchange rates.

20. Insurance contracts for account of policyholders

Insurance contracts for account of policyholders decreased by EUR 958 million to 120.0 billion compared to December 31, 2016. An increase in insurance liabilities driven by received gross premiums and deposits, and by an increase in the market value of underlying assets, was more than offset by changes in foreign exchange rates and insurance liabilities released.

21. Investment contracts

Investment contracts decreased by EUR 2.0 billion to EUR 17.6 billion compared to December 31, 2016 mainly due to an accelerated reduction of runoff balances in March 2017.

22. Investment contracts for account of policyholders

Investment contracts for account of policyholders decreased by EUR 3.9 billion to 80.9 billion compared to December 31, 2016 mainly due to changes in foreign exchange rates.

23. Borrowings

EUR millions

June 30, 2017 Dec. 31, 2016

Capital funding	2,325	2,386
Operational funding	12,542	10,766
Total borrowings	14,867	13,153

Included in borrowings is EUR 570 million relating to borrowings measured at fair value (December 31, 2016: EUR 610 million).

During the first six months of 2017, the operational funding increased EUR 1.8 billion due to new FHLB advances.

24. Assets and Liabilities held for sale

In 2016, Aegon reclassified certain assets and liabilities to the assets and liabilities held for sale line, following the sale of its UK annuity portfolio. In 2017, following court approval on the Part VII¹ transfer, the sale of the annuity portfolio to Rothesay Life has been completed. As a consequence the assets held for sale reduced by EUR 6,381 million (GBP 5,489 million) and the liabilities held for sale reduced by EUR 6,472 million (GBP 5,568 million). Also refer to note 26 Acquisitions/divestments.

1 A Part VII transfer is a court-sanctioned legal transfer of some or all of the policies of one company to another governed by Part VII of the Financial Services and Markets Act 2000.

Unaudited

25. Commitments and contingencies

The U.S. Securities and Exchange Commission is conducting a formal investigation related to certain investment strategies offered through mutual funds, variable products and separately managed accounts. These strategies used quantitative models developed by one of the former portfolio managers of Aegon's US investment management business unit. Among other things, the investigation relates to the operation of and/or the existence of errors in the quantitative models in question and related disclosures. The funds and strategies under review were sub-advised, advised or marketed by Aegon's US group companies. The models are no longer being used, although some of the funds are still being offered. The money management strategies are no longer being offered. Aegon is cooperating fully with the investigation.

Government investigations, including this one, may result in the institution of administrative, injunctive or other proceedings and/or the imposition of monetary fines, penalties and/or disgorgement, as well as other remedies, sanctions, damages and restitutionary amounts. While Aegon is unable to predict what action, if any, the SEC might take and is unable to predict the costs to or other impact on Aegon of any such action, there can be no assurances that this matter or other government investigations will not have a material and adverse effect on Aegon's reputation, financial position, results of operations or liquidity.

26. Acquisitions / divestments

On January 1, 2017 Aegon completed the acquisition of Cofunds Ltd., following regulatory approval. The purchase of the Cofunds Ltd. business was done through a sale and purchase agreement to acquire all the shares and platform assets. The total consideration of the acquisition amounted to GBP 147 million (EUR 171 million). The fair value of the net assets amounted to GBP 99 million (EUR 116 million), of which GBP 25 million (EUR 29 million) related to customer intangibles, resulting in goodwill of GBP 48 million (EUR 56 million). The value of the transferred customer investments as per January 1, 2017 amounted to approximately GBP 82 billion (EUR 96 billion) and are not recognized on Aegon's balance sheet.

On June 28, 2017 Aegon completed its transaction to divest its two largest US run-off businesses, the payout annuity business and Bank Owned Life Insurance/ Corporate Owned Life Insurance business (BOLI/COLI). Under the terms of the agreement, Aegon's Transamerica life subsidiaries will reinsure USD 14 billion of liabilities. The transaction resulted in a book gain of USD 250 million (EUR 231 million), reported in the line other income in the condensed consolidated income statement. The book gain consisted of a loss on the reinsurance transaction which is more than offset by the reclassification of gains from Other Comprehensive Income following the disposal of assets to fund the transaction.

The loss on the reinsurance transaction amounted to USD 1,813 million (EUR 1,675 million) being the difference of the reinsurance premium paid and the reinsurance asset received related to the insurance liabilities. Upon disposal an amount of USD 979 million (EUR 905 million) and USD 1,018 million (EUR 941 million) respectively related to revaluation reserves and cash flow hedging reserves has been reclassified from Other Comprehensive Income into the income statement. Gains on sale of certain assets carried at amortized cost backing the insurance liabilities amount to USD 94 million (EUR 87 million). Other expenses related to the transaction, including cost of sale, amounted to USD 28 million (EUR 26 million).

On June 30, 2017, following court approval on the Part VII transfer, the sale of the annuity portfolio to Rothesay Life has been completed. The UK annuity portfolio was included in the United Kingdom operating segment. For more details related to the sale of the UK annuity portfolio, refer to the Annual Report 2016.

Unaudited

27. Post reporting date events

Capital management and solvency

On August 8, 2017, Aegon received a confirmation from the Dutch Central Bank (DNB) to apply a revised method to calculate the Solvency II contribution of the Aegon US Insurance entities under Deduction & Aggregation (D&A), affecting Aegon's tiering of capital, retrospectively as of Q2, 2017. It includes lowering of the conversion factor from 250% to 150% RBC Company Action Level and reducing own funds by a 100% RBC Company Action Level requirement to reflect transferability restrictions. The methodology is subject to annual review. This methodology is consistent with EIOPA's guidance on group solvency calculation in the context of equivalence, and in line with methods applied by other European peer companies. As a consequence, this adjustment improves the comparability of capital positions of European insurance groups with substantial insurance activities in the US. The impact on Tiering is included in the table in the Capital quality section below. Aegon will manage its available capital on the new basis.

Capital adequacy

The capitalization of the Aegon Group and its operating units is managed in relation to the most stringent of local regulatory requirements, rating agency requirements and self-imposed criteria. Aegon manages its Solvency II capital in relation to the required capital. Under Aegon's updated capital management framework the own funds are managed in such a way that the Group Solvency II ratio remains within the target range of 150% - 200%.

This target range has recently been updated (previous target range: 140% - 170%) with the update of Aegon's group capital management policy. Together with this capital policy update, the calculation method for the Group solvency ratio has been adjusted after agreement of Aegon's group regulator.

Capital quality

Aegon's capital consists of 3 Tiers that indicate its quality of the capital. It is noted that the Group own funds do not include any contingent liability potentially arising from unit-linked products sold, issued or advised on by Aegon in the Netherlands in the past as the potential liability cannot be reliably quantified at this point.

The revised method does not have a financial impact on IFRS shareholders' equity as at June 30, 2017. In August 2017 this revised method was confirmed by DNB. The revised methodology will be the basis for managing capital in the future.

The table below shows the tiers in which Aegon's capital is divided:

June 30, 2017 ²⁾	June 30, 2017 (old method)	December 31, 2016 (old method)
	Available own	Available own

Edgar Filing: AEGON NV - Form 6-K

	Available own funds	funds	funds
Tier 1 - unrestricted	10,529	11,102	10,656
Tier 1 - restricted	3,646	3,647	3,817
Tier 2	1,226	1,226	1,291
Tier 3	787	2,111	2,355
Total Tiers	16,188	18,085	18,119

1 The information as at June 30, 2017, both on the old method and the revised method has not been reviewed by the auditor.

2 The June 30, 2017 tiering information is based on the revised method which was confirmed by DNB on August 8, 2017.

Under the revised methodology Aegon's own funds reduced by EUR 1.9 billion. This is reflected through a reduction in Tier 3 by EUR 1.3 billion (eliminating deferred tax balances) and Tier 1 unrestricted by EUR 0.6 billion.

Unaudited

Divestments

On August 8, 2017, Aegon agreed to sell Unirobe MeeÛs Groep (UMG), an independent financial advisory group, for EUR 295 million. The transaction is consistent with the company's stated strategic objective to optimize its portfolio. The divestment will lead to a book gain of approximately EUR 180 million, which will be reported in Other Income at the time of closing. As a consequence of this transaction annual income before tax and underlying earnings before tax will decrease by approximately EUR 20 million going forward.

The transaction is subject to works council advice and normal regulatory approvals and is expected to close in the fourth quarter of 2017.

On August 9, 2017 Aegon agreed to sell Aegon Ireland plc. The sales price will amount to 81% of the Solvency II Own Funds of Aegon Ireland at the end of 2017. This transaction further optimizes its portfolio of businesses. As the transaction is contingent on certain closing and market conditions until closing of the transaction, the book loss is uncertain. This divestment is expected to have an immaterial impact on income before tax and underlying earnings before tax going forward. The transaction is subject to normal regulatory approvals and is expected to close in the first quarter of 2018.

Management statement

The interim report for the six months ended June 30, 2017, consists of the condensed consolidated interim financial statements, the 2Q 2017 results release and this responsibility statement by the Company's Executive Board. The information in this interim report is unaudited.

The Executive Board is responsible for preparing the condensed consolidated interim financial statements in accordance with Dutch law and IAS 34, Interim Financial Reporting, as adopted by the European Union.

The Executive Board declares that, to the best of its knowledge, the condensed consolidated interim financial statements which have been prepared in accordance with IAS 34, Interim Financial Reporting, as adopted by the European Union, give a true and fair view of the assets, liabilities, financial condition and profit or loss of Aegon N.V. and the undertakings included in the consolidation as a whole and that the 2Q 2017 results release includes a fair review of the information required pursuant to section 5:2Sd, subsections 8 and 9 of the Dutch Act on Financial Supervision (Wet op het financieel toezicht).

Review report

Introduction

We have reviewed the accompanying condensed consolidated interim financial statements for the six-month period ended June 30, 2017, of Aegon N.V., The Hague, as set out on pages 2 to 28, which comprises the condensed consolidated statement of financial position as at June 30, 2017, the condensed consolidated income statement, the condensed consolidated statement of comprehensive income, the condensed consolidated statement of changes in equity, the condensed consolidated cash flow statement and the selected explanatory notes for the six-month period then ended. We have not reviewed the condensed consolidated income statement and the condensed consolidated statement of comprehensive income for the three-month period ended as at June 30, 2017. Management is responsible for the preparation and presentation of these condensed consolidated interim financial statements in accordance with IAS 34, *Interim Financial Reporting* as adopted by the European Union. Our responsibility is to express a conclusion on these condensed consolidated interim financial statements based on our review.

Scope

We conducted our review in accordance with Dutch law including standard 2410, *Review of Interim Financial Information Performed by the Independent Auditor of the Entity*. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Dutch auditing standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

On August 8, 2017 the company has obtained approval from the regulator to apply retrospectively as of Q2, 2017 a revised method to calculate the Solvency II contribution of the Aegon US Insurance entities under Deduction & Aggregation (D&A), affecting Aegon's tiering of capital. Due to the recent timing of the regulator's approval, we were not able to perform review procedures on the available own funds and tiering of capital as of June 30, 2017 as disclosed in Note 27 *Post reporting date events* to the Interim Financial Statements.

Conclusion

Based on our review performed and within the limits of the restricted scope described in the *Scope* paragraph, nothing has come to our attention that causes us to believe that the accompanying condensed consolidated interim financial statements as at and for the six-month period ended June 30, 2017, are not prepared, in all material respects, in accordance with IAS 34, *Interim Financial Reporting* as adopted by the European Union.

Amsterdam, August 9, 2017

Disclaimers

Cautionary note regarding non-IFRS-EU measures

This document includes the following non-IFRS-EU financial measures: underlying earnings before tax, income tax and income before tax. These non-IFRS-EU measures are calculated by consolidating on a proportionate basis Aegon's joint ventures and associated companies. The reconciliation of these measures to the most comparable IFRS-EU measure is provided in note 3 Segment information of Aegon's Condensed Consolidated Interim Financial Statements. Aegon believes that these non-IFRS-EU measures, together with the IFRS-EU information, provide meaningful information about the underlying operating results of Aegon's business including insight into the financial measures that senior management uses in managing the business.

Forward-looking statements

The statements contained in this document that are not historical facts are forward-looking statements as defined in the US Private Securities Litigation Reform Act of 1995. The following are words that identify such forward-looking statements: aim, believe, estimate, target, intend, may, expect, anticipate, predict, project, counting on, plan, continue, want, forecast, goal, should, would, is confident, will, and similar expressions as they relate to Aegon. These statements are not guarantees of future performance and involve risks, uncertainties and assumptions that are difficult to predict. Aegon undertakes no obligation to publicly update or revise any forward-looking statements. Readers are cautioned not to place undue reliance on these forward-looking statements, which merely reflect company expectations at the time of writing. Actual results may differ materially from expectations conveyed in forward-looking statements due to changes caused by various risks and uncertainties. Such risks and uncertainties include but are not limited to the following:

- Changes in general economic conditions, particularly in the United States, the Netherlands and the United Kingdom;
- Changes in the performance of financial markets, including emerging markets, such as with regard to:
 - The frequency and severity of defaults by issuers in Aegon's fixed income investment portfolios;
 - The effects of corporate bankruptcies and/or accounting restatements on the financial markets and the resulting decline in the value of equity and debt securities Aegon holds; and
 - The effects of declining creditworthiness of certain public sector securities and the resulting decline in the value of government exposure that Aegon holds;
- Changes in the performance of Aegon's investment portfolio and decline in ratings of Aegon's counterparties;
- Consequences of a potential (partial) break-up of the euro;
- Consequences of the anticipated exit of the United Kingdom from the European Union;
- The frequency and severity of insured loss events;
- Changes affecting longevity, mortality, morbidity, persistence and other factors that may impact the profitability of Aegon's insurance products;
- Reinsurers to whom Aegon has ceded significant underwriting risks may fail to meet their obligations;
- Changes affecting interest rate levels and continuing low or rapidly changing interest rate levels;

Changes affecting currency exchange rates, in particular the EUR/USD and EUR/GBP exchange rates;
Changes in the availability of, and costs associated with, liquidity sources such as bank and capital markets funding, as well as conditions in the credit markets in general such as changes in borrower and counterparty creditworthiness;

Increasing levels of competition in the United States, the Netherlands, the United Kingdom and emerging markets;
Changes in laws and regulations, particularly those affecting Aegon's operations' ability to hire and retain key personnel, taxation of Aegon companies, the products Aegon sells, and the attractiveness of certain products to its consumers;

Regulatory changes relating to the pensions, investment, and insurance industries in the jurisdictions in which Aegon operates;

Standard setting initiatives of supranational standard setting bodies such as the Financial Stability Board and the International Association of Insurance Supervisors or changes to such standards that may have an impact on regional (such as EU), national or US federal or state level financial regulation or the application thereof to Aegon, including the designation of Aegon by the Financial Stability Board as a Global Systemically Important Insurer (G-SII);

Changes in customer behavior and public opinion in general related to, among other things, the type of products Aegon sells, including legal, regulatory or commercial necessity to meet changing customer expectations;

Acts of God, acts of terrorism, acts of war and pandemics;

Changes in the policies of central banks and/or governments;

Lowering of one or more of Aegon's debt ratings issued by recognized rating organizations and the adverse impact such action may have on Aegon's ability to raise capital and on its liquidity and financial condition;

Lowering of one or more of insurer financial strength ratings of Aegon's insurance subsidiaries and the adverse impact such action may have on the premium writings, policy retention, profitability and liquidity of its insurance subsidiaries;

The effect of the European Union's Solvency II requirements and other regulations in other jurisdictions affecting the capital Aegon is required to maintain;

Litigation or regulatory action that could require Aegon to pay significant damages or change the way Aegon does business;

As Aegon's operations support complex transactions and are highly dependent on the proper functioning of information technology, a computer system failure or security breach may disrupt Aegon's business, damage its reputation and adversely affect its results of operations, financial condition and cash flows;

Customer responsiveness to both new products and distribution channels;

Competitive, legal, regulatory, or tax changes that affect profitability, the distribution cost of or demand for Aegon's products;

Changes in accounting regulations and policies or a change by Aegon in applying such regulations and policies, voluntarily or otherwise, which may affect Aegon's reported results and shareholders' equity;

Aegon's projected results are highly sensitive to complex mathematical models of financial markets, mortality, longevity, and other dynamic systems subject to shocks and unpredictable volatility. Should assumptions to these models later prove incorrect, or should errors in those models escape the controls in place to detect them, future performance will vary from projected results;

The impact of acquisitions and divestitures, restructurings, product withdrawals and other unusual items, including Aegon's ability to integrate acquisitions and to obtain the anticipated results and synergies from acquisitions;

Catastrophic events, either manmade or by nature, could result in material losses and significantly interrupt Aegon's business;

Aegon's failure to achieve anticipated levels of earnings or operational efficiencies as well as other cost saving and excess capital and leverage ratio management initiatives; and

This press release contains information that qualifies, or may qualify, as inside information within the meaning of Article 7(1) of the EU Market Abuse Regulation.

Further details of potential risks and uncertainties affecting Aegon are described in its filings with the Netherlands Authority for the Financial Markets and the US Securities and Exchange Commission, including the Annual Report. These forward-looking statements speak only as of the date of this document. Except as required by any applicable

law or regulation, Aegon expressly disclaims any obligation or undertaking to release publicly any updates or revisions to any forward-looking statements contained herein to reflect any change in Aegon's expectations with regard thereto or any change in events, conditions or circumstances on which any such statement is based.

About Aegon

Aegon's roots go back more than 170 years to the first half of the nineteenth century. Since then, Aegon has grown into an international company, with businesses in more than 20 countries in the Americas, Europe and Asia. Today, Aegon is one of the world's leading financial services organizations, providing life insurance, pensions and asset management. Aegon's purpose is to help people achieve a lifetime of financial security. More information: aegon.com.
