Key Financial and Performance Indicators for the First Three Quarters of 2017

In the first three quarters of 2017, the Group comprehensively deepened the implementation of Focus Strategy and centred on scale and profitable development through growth promotion, cost control and mechanism reform. Overall development momentum remained robust. Innovation in business model posted initial success, and underpinned revenue and profit growth. The key unaudited financial data in the period were as follows:

Service revenue^{note 1} amounted to RMB 187,880 million, up by 4.1% year-on-year, which showed continuous improvement from the 3.2% increase year-on-year in the first half of this year.

Mobile service revenue amounted to RMB 117,038 million, up by 6.7% year-on-year, which showed continuous improvement from the 5.2% increase year-on-year in the first half of this year.

EBITDA amounted to RMB 65,383 million, up by 5.9% year-on-year, which showed continuous improvement from the 5.5% increase year-on-year in the first half of this year.

The profit attributable to the equity shareholders of the Company amounted to RMB 4,054 million, up significantly by 155.3% year-on-year.

Given that the Group ceased to charge mobile domestic long-distance and roaming fees from 1 September 2017, and market competition is expected to intensify cyclically, the Group expects that its financial performance will face increasing pressure in the fourth quarter of this year. Going forward, the Group will actively address challenges, continue to deepen Focus Strategy and earnestly capitalise on the implementation of mixed-ownership reform to raise efficiency and returns.

To enable shareholders, investors and the general public to better appraise the operational performance of the Group, the board of directors (the Board) of China Unicom (Hong Kong) Limited (the Company , together with its subsidiaries, the Group) announces certain selected unaudited key financial and performance indicators of the Group for the first three quarters of 2017.

In the first three quarters of 2017, the Group comprehensively deepened the implementation of Focus Strategy and centred on scale and profitable development through growth promotion, cost control and mechanism reform. Overall development momentum remained robust. Innovation in business model posted initial success, and underpinned revenue and profit growth. The Group transformed the development model of its mobile service by stepping up online sales efforts via 2I2C, 2B2C, etc. in order to enhance the quality of new subscribers. With a low customer acquisition cost and subsidies model, the Group's mobile service growth accelerated. In the first three quarters of 2017, the Group's mobile billing subscribers registered a net addition of 13.04 million, reaching a total of 277 million. Mobile billing subscriber ARPU was RMB 48.4, up meaningfully as compared to the 2016 full-year average of RMB 46.4. Within that, 4G subscribers registered a net addition of 55.73 million, reaching a total of 160 million. 4G subscriber ARPU was RMB 65.6. For the single month of September, the net additions of mobile billing subscribers and 4G subscribers both reached record high of this year, standing at 3.82 million and 7.56 million respectively. In the first three quarters of 2017, mobile service revenue amounted to RMB 117,038 million, up by 6.7% year-on-year, which showed continuous improvement from the 5.2% increase year-on-year in the first half of this year.

In the first three quarters of 2017, the Group actively promoted the scale development of innovative businesses, which offset the decline in fixed-line voice revenue and the pressure from the competition in the broadband market. Facing exceptionally fierce broadband competition, the Group promoted video-oriented high-bandwidth content and application products and optimised the end-to-end customer service in an effort to drive user consumption upgrade and integrated development. The number of fixed-line broadband subscribers reached 77.41 million, representing a net addition of 2.17 million as compared to the end of last year, but the fixed-line broadband access ARPU decreased year-on-year. Fixed-line service revenue was RMB 69,618 million, which remained stable as compared to the same period of last year. Overall service revenue amounted to RMB 187,880 million, up by 4.1% year-on-year, which showed continuous improvement from the 3.2% increase year-on-year in the first half of this year.

Table of Contents

In the first three quarters of 2017, the Group fully embraced new business models such as 2I2C, 2B2C, etc. to drive scale and profitable business development with low incremental costs. Selling and marketing expenses amounted to RMB 24,400 million in the period, down by 4.1% year-on-year. Network, operation and support expenses increased by 3.2% year-on-year mainly due to the increase in tower-related expenses associated with a larger network scale year-on-year. Employee benefit expenses increased by 13.1% year-on-year because the Group deepened the reform in employment and distribution systems, and at the same time appropriately increased the compensation for front-line staff. During the period, the costs of telecommunications products sold decreased substantially by 36.0% year-on-year mainly due to the significant year-on-year decrease in sales of telecommunication products. Finance costs increased by 25.4% year-on-year during the period as a result of increase in interest-bearing debts and higher market interest rates. EBITDA amounted to RMB 65,383 million, up by 5.9% year-on-year, which showed continuous improvement from the 5.5% increase year-on-year in the first half of this year. EBITDA as a percentage of service revenue was 34.8%. In the first three quarters of 2017, the profit attributable to the equity shareholders of the Company amounted to RMB 4,054 million, up significantly by 155.3% year-on-year.

Given that the Group ceased to charge mobile domestic long-distance and roaming fees from 1 September 2017, and market competition is expected to intensify cyclically, the Group expects that its financial performance will face increasing pressure in the fourth quarter of this year. The Group will actively address challenges, insist on scale and profitable development, continue to deepen Focus Strategy, deeply propel its business transformation, maintain the rapid development of 4G business, and accelerate the turnaround of the unfavourable situation of its broadband business. The Group will speed up the improvement of its innovation capability, strengthen integrated development with enterprises along the value chain, and tap into the Blue Ocean of the innovative fields to foster new growth engines. The Group will speed up Internet-based transformation of operations leveraging focusing, cooperation and precision operation, so as to continually enhance the utilisation efficiency of resources and assets. The Group will earnestly capitalise on the implementation of mixed-ownership reform and create a powerful alliance with strategic investors to accelerate business development. At the same time, the Group will enhance corporate governance and incentive systems on a market-oriented basis to lift vibrancy and raise efficiency and returns.

Caution Statement

The Board wishes to remind shareholders of the Company and investors that the above financial and business data are based on the Group's internal records and management accounts and have not been reviewed or audited by the auditors. The Company's shareholders and investors are cautioned not to unduly rely on such data. In the meantime, the Company's shareholders and investors are advised to exercise caution in dealing in the securities of the Company.
