PROSPECTUS SUPPLEMENT

(to Prospectus dated August 17, 2018)

\$109,000,000

4,360,000 Shares

AllianzGI Convertible & Income Fund II

5.50% Series A Cumulative Preferred Shares

Liquidation Preference \$25.00 per share

AllianzGI Convertible & Income Fund II (the "Fund") is offering for sale 4,360,000 shares of 5.50% Series A Cumulative Preferred Shares, par value \$0.00001 per share, liquidation preference \$25.00 per share (the "Series A Preferred Shares"). Investors in Series A Preferred Shares will be entitled to receive, when, as and if declared by, or under authority granted by, the Fund's Board of Trustees (the "Board"), out of funds legally available therefor, cumulative cash dividends and distributions at the rate of 5.50% per annum of the \$25.00 per share liquidation preference on the Series A Preferred Shares. Dividends and distributions on Series A Preferred Shares will be payable quarterly on March 31, June 30, September 30 and December 31 in each year (or, if any such day is not a Business Day, then on the next succeeding Business Day) (each a "Dividend Payment Date") commencing on October 1, 2018, with the first payment pro-rated from the date of issuance. The Series A Preferred Shares will rank on parity with the Fund's outstanding Auction Rate Preferred Shares ("ARPS") and, together with the Series A Preferred Shares and any future preferred shares issued by the Fund, Preferred Shares) and any future preferred shares and senior to the Fund's common shares of beneficial interest (the "Common Shares") with respect to dividend and distribution rights and rights upon the Fund's liquidation.

The Fund is a diversified, closed-end management investment company that commenced operations on July 31, 2003, following the initial public offering of its Common Shares. The Fund's investment objective is to provide total return through a combination of capital appreciation and high current income. The Fund cannot assure you that it will achieve its investment objective, and you could lose all of your investment in the Series A Preferred Shares.

The Series A Preferred Shares have no history of public trading. The Fund has applied to list the Series A Preferred Shares on the New York Stock Exchange ("NYSE"). If the application is approved, the Series A Preferred Shares are expected to commence trading on the NYSE under the symbol "NCZ PR A" within thirty days of the date of issuance.

Investing in the Series A Preferred Shares involves risks associated with the Fund's portfolio investments and certain special risks, including, without limitation, redemption risk, subordination risk, credit rating risk, distribution risk, secondary market risk and interest rate risk. See "Special Risks of the Cumulative Preferred Shares" for details. Before investing in the Series A Preferred Shares, you should read the discussion of the principal risks of investing in the Fund, including the risks of leverage and of investing in below investment grade/high yield securities, in "Principal Risks of the Fund" in the accompanying prospectus.

The Securities and Exchange Commission has not approved or disapproved of these securities or determined that this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

Edgar Filing: AllianzGI Convertible & Income Fund II - Form 497

	Per Share	Total⁽¹⁾

ABOUT THIS PROSPECTUS SUPPLEMENT

You should rely only on the information contained or incorporated by reference in this prospectus supplement and the accompanying prospectus. The Fund has not authorized any other person to provide you with inconsistent information. If anyone provides you with inconsistent information, you should not assume that the Fund has authorized or verified it. The Fund is not making an offer to sell these securities in any jurisdiction where the offer or sale is not permitted. You should not assume that the information contained in this prospectus supplement or the accompanying prospectus is accurate as of any date other than the dates on their respective front covers. The Fund's business, financial condition, results of operations and prospects may have changed since the date of this prospectus.

This document has two parts. The first part is this prospectus supplement, which describes the terms of this offering of Series A Preferred Shares and also adds to and updates information contained in the accompanying prospectus. The second part is the accompanying prospectus, which gives more general information and disclosure. To the extent the information contained in this prospectus supplement differs from or is additional to the information contained in the accompanying prospectus, you should rely only on the information contained in this prospectus supplement. You should read this prospectus supplement and the accompanying prospectus before investing in the Series A Preferred Shares.

Table of Contents

SUMMARY OF TERMS OF THE SERIES A PREFERRED SHARES

This prospectus supplement sets forth certain terms of the Series A Preferred Shares that the Fund is offering pursuant to this prospectus supplement and the accompanying prospectus. Capitalized terms used in this prospectus supplement and not otherwise defined shall have the meanings ascribed to them in the accompanying prospectus or in the Statement of Preferences (as defined herein) governing and establishing the terms of the Series A Preferred Shares.

The Fund

The Fund is a diversified, closed-end management investment company. The Fund commenced operations on July 31, 2003, following the initial public offering of the Common Shares.

The Fund's investment objective is to provide total return through a combination of capital appreciation and high current income. The Fund cannot assure you that it will achieve its investment objective, and you could lose all of your investment in the Series A Preferred Shares.

Under normal circumstances, the Fund will invest at least 80% of its total assets in a diversified portfolio of convertible securities and non-convertible income-producing securities. The portion of the Fund's assets invested in convertible securities, on the one hand, and non-convertible income-producing securities, on the other, will vary from time to time consistent with the Fund's investment objective, although the Fund will normally invest at least 50% of its total assets in convertible securities. In making allocation decisions, Allianz Global Investors U.S. LLC (AllianzGI U.S. or the Investment Manager), the Fund's adviser, will consider factors such as changes in equity prices, changes in interest rates and other economic and market factors. The Fund may invest without limit in convertible securities and non-convertible income-producing securities that are rated below investment grade (below Baa3 by Moody's Investors Service, Inc. (Moody's)) or below BBB- by either S&P Global Rating Services (S&P) or Fitch, Inc. (Fitch)) or that are unrated but judged by AllianzGI U.S. to be of comparable quality, and expects that ordinarily AllianzGI U.S.'s portfolio strategies will result in the Fund investing primarily in these securities. The Fund may invest without limit in securities of any rating. The Fund typically invests in securities with a broad range of maturities.

Securities Offered

The Fund is offering an aggregate of 4,360,000 shares of 5.50% Series A Cumulative Preferred Shares, par value \$0.00001 per share, liquidation preference \$25.00 per share (previously defined as the Series A Preferred Shares). The Series A Preferred Shares will rank on parity with the ARPS and any future preferred shares and senior to the Common Shares with respect to dividend and distribution rights and rights upon liquidation.

Liquidation Preference

\$25.00 per share.

Dividend Rate

Dividends and distributions on the Series A Preferred Shares are cumulative from their original issue date at the annual rate of 5.50% of the \$25.00 per share liquidation preference.

Table of Contents

Dividend Payment Dates

Holders of Series A Preferred Shares will be entitled to receive, when, as and if declared by, or under authority granted by, the Board, out of funds legally available therefor, cumulative cash dividends and distributions, paid quarterly on March 31, June 30, September 30 and December 31 each year, commencing on October 1, 2018, with the first payment pro-rated from the date of issuance.

Non-Call Period/Optional Redemption

The Series A Preferred Shares generally may not be called for redemption at the option of the Fund prior to September 11, 2023. The Fund reserves the right, however, to redeem the Series A Preferred Shares at any time if it is necessary, in the judgment of the Board, to maintain its status as a regulated investment company (a "RIC") under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code"). The Fund may also be required under certain circumstances to redeem Series A Preferred Shares before or after September 11, 2023, in order to meet certain regulatory or rating agency asset coverage requirements.

Commencing September 11, 2023, and thereafter, to the extent permitted by the Investment Company Act of 1940, as amended (the "1940 Act"), and Massachusetts law, the Fund may at any time, upon notice of redemption, redeem the Series A Preferred Shares in whole or in part at the liquidation preference per share plus accumulated unpaid dividends through the date of redemption.

Asset Coverage/Mandatory Redemption

Under the Statement Establishing and Fixing the Rights and Preferences of Cumulative Preferred Shares (including all appendices and exhibits thereto, the "Statement of Preferences"), which governs the Series A Preferred Shares, the Series A Preferred Shares will be subject to mandatory redemption if the Fund fails to satisfy certain asset coverage tests, subject to applicable cure periods and other terms and conditions.

Use of Proceeds

The net proceeds of the offering will be used to refinance outstanding indebtedness or other forms of leverage, potentially including amounts outstanding under the Fund's liquidity facility with State Street Bank and Trust Company and/or the Fund's existing ARPS, and/or to purchase additional portfolio securities in accordance with the Fund's investment objective and policies as set forth below. To the extent offering proceeds are used to refinance existing leverage, it is presently anticipated that the Fund will be able to deploy such net proceeds promptly after receipt by the Fund. To the extent offering proceeds are used to purchase additional portfolio securities, it is presently anticipated that the Fund will be able to deploy substantially all such net proceeds within 30 days after receipt by the Fund. The Fund anticipates using all or substantially all of the proceeds from any offering of Cumulative Preferred Shares to refinance existing leverage. See "Use of Proceeds."

Rating

The offering of the Series A Preferred Shares is conditioned on the Series A Preferred Shares receiving an initial rating of AAA from Fitch.

Table of Contents

Stock Exchange Listing

Application has been made to list the Series A Preferred Shares on the NYSE. Prior to this offering, there has been no public market for Series A Preferred Shares. If the application is approved, the Series A Preferred Shares are expected to commence trading on the NYSE under the symbol "NCZ PR A" within thirty days of the date of issuance.

Tax Considerations

The distributions with respect to the Series A Preferred Shares (other than distributions in redemption of Series A Preferred Shares subject to Section 302(b) of the Code) will constitute dividends to the extent of the Fund's current or accumulated earnings and profits, as calculated for federal income tax purposes. Such dividends generally will be taxable as ordinary income to holders. Distributions of net capital gains (*i.e.*, the excess of net long-term capital gains over net short-term capital losses) that are properly reported by the Fund as capital gain dividends will be treated as long-term capital gains in the hands of holders receiving such distributions. The Internal Revenue Service (the "IRS") currently requires that a RIC that has two or more classes of stock allocate to each such class proportionate amounts of each type of the RIC's income (such as ordinary income and capital gains) based upon the percentage of total dividends distributed to each class for the tax year. Accordingly, the Fund intends each year to allocate capital gain dividends between and among its Common Shares and each series of its Preferred Shares, including the Series A Preferred Shares, in proportion to the total dividends paid to each class during or with respect to such year. Ordinary income dividends and dividends qualifying for the dividends received deduction, if any, will similarly be allocated between and among such share classes. For additional information, see "Tax Matters" in the accompanying prospectus.

Dividend Disbursing Agent

American Stock Transfer & Trust Company, LLC.

Table of Contents

DESCRIPTION OF THE SERIES A PREFERRED SHARES

The following is a brief description of the terms of the Series A Preferred Shares. This is not a complete description and will be subject to and entirely qualified by reference to the Statement of Preferences as in effect from time to time. The Statement of Preferences will be attached as an exhibit to a post-effective amendment to the Fund's registration statement. **Any capitalized terms in this section that are not defined have the meaning assigned to them in the Statement of Preferences.**

Pursuant to the Fund's Second Amended and Restated Agreement and Declaration of Trust (the Declaration), as amended from time to time, the Fund's Board may, without shareholder approval, authorize one or more classes of shares (which classes may be divided into multiple series) having such par value and such preferences, voting powers, terms of redemption, if any, and special or relative rights or privileges (including conversion rights, if any) as the Board may determine, subject to various terms and conditions. An unlimited number of the Fund's shares are available for classification by the Board as preferred shares. All Series A Preferred Shares will have a liquidation preference of \$25.00 per share plus accumulated and unpaid dividends. Holders of Series A Preferred Shares shall be entitled to receive, when, as and if declared by, or under authority granted by the Board, out of funds legally available therefor, cumulative cash dividends and distributions at a fixed rate per annum of 5.50% (computed on the basis of a 360 day year consisting of twelve 30 day months) of the \$25.00 per share liquidation preference. Dividends and distributions on the Series A Preferred Shares will accumulate from the date of their original issue and shall be pro-rated for the period from the date they were issued.

The Series A Preferred Shares, when issued by the Fund and paid for pursuant to the terms of this prospectus supplement and the accompanying prospectus, will be fully paid and non-assessable and will have no preemptive, exchange or conversion rights, subject to matters discussed in Anti-Takeover Provisions in the Declaration of Trust in the accompanying prospectus.

Any dividend payment made on the Series A Preferred Shares will first be credited against the dividends and distributions accumulated with respect to the earliest dividend period for which dividends and distributions have not been paid.

The 1940 Act requires that the holders of Cumulative Preferred Shares, together with holders of any other Preferred Shares then outstanding voting as a separate class, have the right to elect at least two Trustees at all times and to elect a majority of the Trustees at any time when two years' dividends and distributions on any Preferred Shares are unpaid. The holders of the Cumulative Preferred Shares and any other Preferred Shares, or series thereof, will vote as a separate class on certain other matters as required under the Fund's Declaration and Eighth Amended and Restated Bylaws and under the 1940 Act. When holders of Preferred Shares vote separately from the Common Shares as a class, or one or more series of Preferred Shares votes separately, each Preferred Shareholder is entitled to one vote per \$25.00 of liquidation preference held. As a result, for matters that are voted on by Preferred Shareholders as a separate class, voting authority is allocated among Preferred Shareholders in proportion to the liquidation preference of their holdings, as opposed to the number of their Preferred Shares.

The Statement of Preferences requires redemption of Cumulative Preferred Shares (and, under certain circumstances, other Preferred Shares) if the Fund fails to maintain certain asset coverage ratios, subject to cure periods and other terms and conditions specified in the Statement of Preferences. The Cumulative Preferred Shares are also subject to redemption without premium or penalty following the expiration of a non-call period (five years from the date of issuance in the case of the Series A Preferred Shares).

The disclosure set forth in this Description of the Series A Preferred Shares and under the heading Characteristics of the Series A Preferred Shares is intended to be a summary of the material provisions of the Series A Preferred Shares. Since this Description of the Series A Preferred Shares is only a summary, you should refer to the Statement of Preferences for a complete description of the obligations of the Fund and your rights. The disclosure set forth in this Description of the Series A Preferred Shares and under the heading Characteristics of the Series A Preferred Shares supplements the description of the disclosure regarding the

Table of Contents

Cumulative Preferred Shares, par value \$0.00001 per share (the Cumulative Preferred Shares) in the accompanying Prospectus, and in the event that any provision described in the disclosure set forth in this Description of the Series A Preferred Shares and under the heading Characteristics of the Series A Preferred Shares is inconsistent with any description contained in the accompanying prospectus, the disclosure set forth in this Description of the Series A Preferred Shares and under the heading Characteristics of the Series A Preferred Shares will apply and supersede the description in the accompanying Prospectus.

S-5

Table of Contents

USE OF PROCEEDS

The net proceeds of the offering of the Series A Preferred Shares will be approximately \$105,018,500 after payment of the estimated offering costs. The net proceeds of the offering will be used to refinance outstanding indebtedness or other forms of leverage, potentially including amounts outstanding under the Fund's liquidity facility with State Street Bank and Trust Company and/or the Fund's existing ARPS, and/or to purchase additional portfolio securities in accordance with the Fund's investment objective and policies as set forth below. The Fund anticipates using all or substantially all of the proceeds from the offering of Series A Preferred Shares to refinance existing leverage. The Fund will be able to deploy substantially all net proceeds within 30 days after receipt by the Fund. Pending such use of proceeds, it is anticipated that the proceeds of the offering will be invested in cash and cash equivalents or high grade, short-term securities, credit-linked trust certificates and/or high yield securities index futures contracts or similar derivative instruments designed to give the Fund exposure to the securities and markets in which it typically invests.

S-6

Table of Contents**CAPITALIZATION**

The following table sets forth the capitalization of the Fund as of August 3, 2018, and as adjusted to give effect to the issuance of the Series A Preferred Shares offered hereby, assuming the Fund issues 4,360,000 Series A Preferred Shares (including estimated offering expenses of \$548,000 and an aggregate sales load of \$3,433,500).

	Actual as of August 3, 2018	As Adjusted as of August 3, 2018
ARPS (\$0.00001 par value and \$25,000 liquidation preference per share; aggregate of 6,501 shares issued and outstanding)	\$ 162,525,000	\$ 162,525,000
Series A Preferred Shares (\$0.00001 par value and \$25.00 liquidation preference per share; no shares outstanding as of August 3, 2018 and 4,360,000 shares estimated issued and outstanding as adjusted)	\$ 0	\$ 109,000,000
Total Preferred Shares	\$ 162,525,000	\$ 271,525,000
Composition of Net Assets Applicable to Common Shareholders:		
Common Shares:		
Par value \$0.00001 per share, unlimited shares authorized (75,220,257 shares outstanding as of August 3, 2018)	\$ 752	\$ 752
Paid-in-capital in excess of par	\$ 614,427,099	\$ 610,445,599

Net Assets Applicable to Common Shareholders	\$ 433,138,288	\$ 429,156,788
Total Capitalization	\$ 595,663,288	\$ 700,681,788

Table of Contents

REGULATORY ASSET COVERAGE RATIOS

As provided in the 1940 Act and subject to certain exceptions, the Fund may issue debt and/or preferred shares with the condition that immediately after issuance the value of its total assets, less certain ordinary course liabilities, exceed 300% of the amount of the debt outstanding and exceed 200% of the sum of the amount of debt and preferred shares outstanding. The Fund's Preferred Shares and any other forms of senior securities issued by the Fund, in aggregate, are expected to have an initial asset coverage on the date of issuance of approximately 259%, assuming that the Fund's net assets on the date of issuance equal the Fund's net assets on August 21, 2018 and that the SSB Facility is not outstanding at that point.

In addition to the 1940 Act asset coverage Requirement, the Fund is expected to be subject to certain restrictions on investments imposed by guidelines of one or more rating agencies that are expected to issue ratings for the Series A Preferred Shares. See "Characteristics of the Series A Preferred Shares Rating Agency Guidelines" in this Prospectus Supplement. The offering of the Series A Preferred Shares is conditioned on the Series A Preferred Shares receiving an initial rating of AAA from Fitch.

Table of Contents

CHARACTERISTICS OF THE SERIES A PREFERRED SHARES

Dividends

Dividends and distributions will be payable quarterly on March 31, June 30, September 30 and December 31 in each year (or, if any such day is not a business day, then on the next succeeding business day) (each, as previously defined, a Dividend Payment Date) commencing on October 1, 2018, to holders of record of Series A Preferred Shares as they appear on the share register of the Fund at the close of business on the fifth preceding business day. Dividends and distributions on Series A Preferred Shares that were originally issued on the Date of Original Issue (*i.e.*, the Series A Preferred Shares to be issued in this offering) shall accumulate from the Date of Original Issue. Dividends and distributions on any other Series A Preferred Shares shall accumulate from the date of issuance. Each period beginning on and including a Dividend Payment Date (or the date of original issue, in the case of the first dividend period after the first issuance of the Series A Preferred Shares) and ending on but excluding the next succeeding Dividend Payment Date is referred to herein as a Dividend Period. Dividends and distributions on account of arrears for any past Dividend Period or in connection with the redemption of Series A Preferred Shares may be declared and paid at any time, without reference to any Dividend Payment Date, to holders of record on such date as shall be fixed by the Board that is not more than 30 days before the Dividend Payment Date.

No full dividends or distributions will be declared or paid on Series A Preferred Shares for any Dividend Period or part thereof unless full cumulative dividends and distributions due through the most recent Dividend Payment Dates therefor on all outstanding shares of any series of preferred shares of the Fund ranking on a parity with the Series A Preferred Shares as to the payment of dividends and distributions have been or contemporaneously are declared and paid through the most recent Dividend Payment Dates therefor. If full cumulative dividends and distributions due have not been paid on all of the Fund's outstanding preferred shares, any dividends and distributions being paid on such preferred shares (including the Series A Preferred Shares) will be paid as nearly pro rata as possible in proportion to the respective amounts of dividends and distributions accumulated but unpaid on each such series of preferred shares on the relevant Dividend Payment Date.

Restrictions on Issuance, Dividend, Redemption and Other Payments

Under the 1940 Act, the Fund is not permitted to issue preferred shares (such as the Series A Preferred Shares) unless immediately after such issuance the Fund will have an asset coverage of at least 200% (or such other percentage as may in the future be specified in or under the 1940 Act as the minimum asset coverage for senior securities representing stock of a closed-end investment company as a condition of declaring distributions, purchases or redemptions of its stock). In general, the term asset coverage for this purpose means the ratio which the value of the total assets of the Fund, less all liabilities and indebtedness not represented by senior securities, bears to the aggregate amount of senior securities representing indebtedness of the Fund plus the aggregate of the involuntary liquidation preference of the preferred shares. The involuntary liquidation preference refers to the amount to which the preferred shares would be entitled on the involuntary liquidation of the Fund in preference to a security junior to them. The Fund also is not permitted to declare any cash dividend or other distribution on its common shares or purchase its common shares unless, at the time of such declaration or purchase, the Fund satisfies this 200% asset coverage requirement after deducting the amount of the dividend, distribution or purchase price, as applicable.

In addition, the Fund may be limited in its ability to declare any cash distribution on its shares (including the Series A Preferred Shares) or purchase its capital stock (including the Series A Preferred Shares) unless, at the time of such declaration or purchase, the Fund has an asset coverage on its indebtedness, if any, of at least 300% after deducting the amount of such distribution or purchase price, as applicable. The 1940 Act contains an exception, however, that permits dividends to be declared upon any preferred shares issued by the Fund (including the Series A Preferred Shares) if the Fund's indebtedness has an asset coverage of at least 200% at the time of declaration after deducting the amount of the dividend. In general, the term asset coverage for this purpose means the ratio which the value of the total assets of the Fund, less all liabilities and indebtedness not represented by senior securities, bears to the aggregate amount of senior securities representing indebtedness of the Fund.

Table of Contents

So long as any Cumulative Preferred Shares are outstanding, the Fund may not pay any dividend or distribution (other than a dividend or distribution paid in Common Shares or in options, warrants or rights to subscribe for or purchase Common Shares) in respect of the Common Shares or call for redemption, redeem, purchase or otherwise acquire for consideration any Common Shares (except by conversion into or exchange for shares of the Fund ranking junior to the Preferred Shares as to the payment of dividends or distributions and the distribution of assets upon liquidation), unless: (i) immediately thereafter, the Fund shall have be in compliance with the asset coverage requirements of any rating agency that is then rating any Cumulative Preferred Shares at the Fund's request, and the Fund shall have 1940 Act asset coverage, (ii) all cumulative dividends and distributions on all Cumulative Preferred Shares due on or prior to the date of the transaction have been declared and paid (or shall have been declared and sufficient funds for the payment thereof deposited with the applicable dividend disbursing agent) and (iii) the Fund has redeemed the full number of Cumulative Preferred Shares to be redeemed mandatorily pursuant to any provision contained herein for mandatory redemption.

Voting Rights

The 1940 Act requires that the holders of Cumulative Preferred Shares, together with holders of any other Preferred Shares then outstanding voting as a separate class, have the right to elect at least two Trustees at all times and to elect a majority of the Trustees at any time when two years' dividends and distributions on any Preferred Shares are unpaid. The holders of the Cumulative Preferred Shares and any other Preferred Shares, or series thereof, will vote as a separate class on certain other matters as required under the Fund's Declaration and Eighth Amended and Restated Bylaws and under the 1940 Act. When holders of Preferred Shares vote separately from the Common Shares as a class, or one or more series of Preferred Shares votes separately, each Preferred Shareholder is entitled to one vote per \$25.00 of liquidation preference held. As a result, for matters that are voted on by Preferred Shareholders as a separate class, voting authority is allocated among Preferred Shareholders in proportion to the liquidation preference of their holdings, as opposed to the number of their Preferred Shares. For more information about the voting rights of holders of Cumulative Preferred Shares, including Series A Preferred Shares, see "Description of Capital Structure" in the accompanying prospectus.

Rating Agency Guidelines

As a condition of issuance, the Series A Preferred Shares must be initially rated by Fitch. Under the Statement of Preferences, for as long as Fitch or any other rating agency is rating the Series A Preferred Shares at the Fund's request, the Fund is required to maintain asset coverage at certain levels ("Rating Agency Asset Coverage") consistent with the then-current ratings of the Series A Preferred Shares. At least initially, Rating Agency Asset Coverage will require the Fund's compliance with two asset coverage tests that are described in the current Fitch ratings criteria. One test, the "Fitch Total OC" test, requires the Fund to have sufficient assets, once adjusted for certain discount factors, to cover its financial obligations. The other test, the "Fitch Net OC" test, is substantively similar to the Fitch Total OC test, but gives effect to the position of the rated security in the Fund's capital structure. An agency rating the Series A Preferred Shares may also impose diversification, industry concentration and/or other constraints on the Fund to the extent that the Series A Preferred Shares maintain a rating. Insofar as a rating agency rating the Series A Preferred Shares were to modify its ratings criteria after initially rating the Series A Preferred Shares, the Fund expects that it would be permitted, but not required, to adopt any such modifications to the rating agency guidelines into the Statement of Preferences. Failure to adopt any such modifications could result in a change in the relevant rating agency's ratings or a withdrawal of such ratings altogether. A rating agency providing a rating for the Series A Preferred Shares could, at any time, change or withdraw any such rating. The Statement of Preferences requires maintenance of Rating Agency Asset Coverage as of the last business day of each month, as long as a rating agency is rating the Series A Preferred Shares at the request of the Fund. The Fund is not required to maintain a rating for the Series A Preferred Shares.

The Board, without further action by shareholders, retains the ability to amend, alter, add to or repeal any provision of the Statement of Preferences adopted pursuant to rating agency guidelines or add covenants and other obligations to the Statement of Preferences if the applicable rating agency confirms that such amendments

Table of Contents

or modifications are necessary to prevent a reduction in, or the withdrawal of, a rating of any series of Cumulative Preferred Shares and such amendments and modifications do not adversely affect the rights and preferences of the holders of the Cumulative Preferred Shares. Additionally, the Board, without further action by the shareholders, retains the authority to amend, alter, add to or repeal any provision of the Statement of Preferences if such amendments or modifications will not in the aggregate adversely affect the rights and preferences of the holders of any series of Cumulative Preferred Shares, provided that the Fund has received confirmation from each applicable rating agency that such amendment or modification would not adversely affect such rating agency's then-current rating of such series of Cumulative Preferred Shares.

Asset Maintenance Requirements

The Fund is required under the Statement of Preferences to determine whether it has asset coverage, as determined in accordance with Section 18(h) of the 1940 Act, of at least 200% with respect to all outstanding senior securities constituting stock, including Cumulative Preferred Shares, ARPS and any other Preferred Shares (Asset Coverage). This test applies quarterly.

Mandatory Redemption

Under certain circumstances, the Series A Preferred Shares may be subject to mandatory redemption by the Fund out of funds legally available therefor in accordance with the Statement of Preferences and applicable law. If the Fund fails to have Asset Coverage as of the last Business Day of March, June, September and December of each year in which any Cumulative Preferred Shares are outstanding, and such failure is not cured as of the cure date specified in the Statement of Preferences (49 days following such Business Day), (i) the Fund shall give a notice of redemption with respect to the redemption of a sufficient number of its Preferred Shares to restore Asset Coverage (assuming such redemption had occurred immediately prior to the opening of business on the applicable cure date) and, at the Fund's discretion, such additional number of Cumulative Preferred Shares or any other series of Preferred Shares in order for the Fund to have Asset Coverage as great as (but not more than) 220%, and (ii) deposit an amount with American Stock Transfer & Trust Company, and its successors or any other dividend-disbursing agent appointed by the Fund, having an initial combined value sufficient to effect the redemption of the Cumulative Preferred Shares or other series of preferred shares to be redeemed.

If the Fund is required to redeem any Preferred Shares (including Series A Preferred Shares) as a result of a failure to maintain Asset Coverage as of an applicable cure date, then the Fund shall, to the extent permitted by the 1940 Act and Massachusetts law, by the close of business on such cure date fix a redemption date that is on or before the 30th Business Day after such cure date and proceed to redeem the Preferred Shares, including any Series A Preferred Shares. On such redemption date, the Fund shall redeem, out of funds legally available therefor, (i) Preferred Shares, pursuant to the procedures below, with an aggregate liquidation preference that is equal to the minimum aggregate liquidation preference such that, if such redemption had occurred immediately prior to the opening of business on such cure date, the Fund would have had Asset Coverage or (ii) if Asset Coverage cannot be so restored, all of the outstanding Cumulative Preferred Shares, in each case at the applicable liquidation preference plus accumulated but unpaid dividends and distributions (whether or not earned or declared by the Fund) through and including the date of redemption. In addition, as reflected above, the Fund may, but is not required to, redeem an additional number of Preferred Shares that permits the Fund to have Asset Coverage as great as 220%.

At any time ARPS are outstanding, if the Fund is required to mandatorily redeem Preferred Shares (including Series A Preferred Shares) for a failure to maintain Asset Coverage, such redemption shall be allocated in accordance with the following: (i) the portion of the redemption allocated to the outstanding series of ARPS, in aggregate, shall be proportionate to the aggregate liquidation preference of the outstanding ARPS relative to the aggregate liquidation preference of the outstanding Preferred Shares, while the portion of the redemption allocated to the outstanding Series of Cumulative Preferred Shares, in aggregate, shall be proportionate to the aggregate liquidation preference of the outstanding Cumulative Preferred Shares relative to the aggregate liquidation preference of the outstanding Preferred Shares, (ii) the redemption proceeds applied to the ARPS pursuant to the foregoing shall be allocated among the series of outstanding ARPS pro rata based on the proportion that the aggregate liquidation preference of each series of outstanding ARPS represents of the aggregate liquidation preference of all outstanding ARPS and (iii) the redemption proceeds applied to the Cumulative Preferred Shares pursuant to the foregoing shall be allocated among the Series of outstanding

Table of Contents

Cumulative Preferred Shares in any proportion in the discretion of the Fund. If no ARPS are outstanding and the Fund is required to mandatorily redeem Preferred Shares for a failure to maintain Asset Coverage, such redemption shall be allocated among the outstanding Series of Cumulative Preferred Shares and series of other outstanding Preferred Shares in any proportion at the discretion of the Fund.

So long as Fitch or another rating agency is rating the Fund's Cumulative Preferred Shares at the request of the Fund, the Fund will be required to maintain, on the last Business Day of each month, assets sufficient for Rating Agency Asset Coverage. If the Fund does not have Rating Agency Asset Coverage as of the last Business Day of any month, and such failure is not cured as of the cure date specified in the Statement of Preferences (10 Business Days following such Business Day), the Fund shall similarly follow the redemption protocol summarized above to restore compliance with Rating Agency Asset Coverage, and the Fund may, but is not required to, redeem an additional number of Preferred Shares sufficient for the Fund to have assets as great as 110% of the minimum amount required for Rating Agency Asset Coverage. If the Fund is required to mandatorily redeem Preferred Shares for a failure to maintain Rating Agency Asset Coverage, such redemption shall be allocated among the outstanding Series of Cumulative Preferred Shares and series of other outstanding Preferred Shares in any proportion at the discretion of the Fund.

Optional Redemption

Prior to September 11, 2023, the Series A Preferred Shares are not subject to optional redemption by the Fund unless the redemption is necessary, in the judgment of the Board, to maintain the Fund's status as a RIC under Subchapter M of the Code. Commencing September 11, 2023, and thereafter, to the extent permitted by the 1940 Act and Massachusetts law, the Fund may at any time upon notice in the manner provided in the Statement of Preferences redeem the Series A Preferred Shares in whole or in part at a price equal to the liquidation preference per share plus accumulated but unpaid dividends and distributions through and including the date of redemption. A notice of redemption with respect to an optional redemption will be given to the holders of record of Series A Preferred Shares selected for redemption not less than 15 days (subject to NYSE requirements), nor more than 40 days prior to the date fixed for redemption. Holders of Series A Preferred Shares may receive shorter notice in the event of a mandatory redemption.

Liquidation

In the event of any liquidation, dissolution or winding up of the affairs of the Fund, whether voluntary or involuntary, the holders of Cumulative Preferred Shares shall be entitled to receive out of the assets of the Fund available for distribution to shareholders, after satisfying claims of creditors but before any distribution or payment shall be made in respect of the Fund's Common Shares or any other shares of the Fund ranking junior to the Cumulative Preferred Shares as to liquidation payments, a liquidation distribution in the amount of \$25.00 per share (the Liquidation Preference), plus an amount equal to all unpaid dividends and distributions accumulated to and including the date fixed for such distribution or payment (whether or not earned or declared by the Fund, but excluding interest thereon), and such holders shall be entitled to no further participation in any distribution or payment in connection with any such liquidation, dissolution or winding up of the Fund.

If, upon any liquidation, dissolution or winding up of the affairs of the Fund, whether voluntary or involuntary, the assets of the Fund available for distribution among the holders of all outstanding Cumulative Preferred Shares and all outstanding shares of any other series of the Fund's Preferred Shares ranking on a parity with the Cumulative Preferred Shares as to payment upon liquidation shall be insufficient to permit the payment in full to such holders of Cumulative Preferred Shares of the Liquidation Preference plus accumulated and unpaid dividends and distributions and the amounts due upon liquidation with respect to all outstanding shares of such other series of Preferred Shares of the Fund, then such available assets shall be distributed among the holders of Cumulative Preferred Shares and such other series of Preferred Shares of the Fund ratably in proportion to the respective preferential liquidation amounts to which they are entitled. Unless and until the Liquidation Preference plus accumulated and unpaid dividends and distributions has been paid in full to the holders of Cumulative Preferred Shares, no dividends or distributions will be made to holders of the Fund's Common Shares or any other shares of the Fund ranking junior to the Cumulative Preferred Shares as to liquidation.

Table of Contents

SPECIAL RISKS OF THE SERIES A PREFERRED SHARES

Primary risks associated with an investment in the Series A Preferred Shares include:

Redemption Risk

The Fund may at any time redeem Series A Preferred Shares to the extent necessary to meet regulatory asset coverage requirements or requirements imposed by credit rating agencies. For example, if the value of the Fund's investment portfolio declines, thereby reducing the asset coverage for the Series A Preferred Shares, the Fund may be obligated under the terms of the Series A Preferred Shares and/or the 1940 Act to redeem some or all of the Series A Preferred Shares. In addition, commencing September 11, 2023, the Fund will be able to call the Series A Preferred Shares at the option of the Fund. Investors may not be able to reinvest the proceeds of any redemption in an investment providing the same or a higher dividend rate than that of the Series A Preferred Shares. Precipitous declines in the value of the Fund's assets could result in the Fund having insufficient assets to redeem all of the Series A Preferred Shares for the full redemption price.

Credit Rating Risk

The offering of the Series A Preferred Shares is conditioned on the Series A Preferred Shares receiving an initial rating of AAA from Fitch. Any credit rating that is issued on the Series A Preferred Shares could be reduced or withdrawn while an investor holds Series A Preferred Shares. A reduction or withdrawal of the credit rating would likely have an adverse effect on the market value of the Series A Preferred Shares. In addition, a credit rating does not eliminate or mitigate the risks of investing in the Series A Preferred Shares.

For additional information regarding the risks of the Series A Preferred Shares, including Subordination Risk, Distribution Risk and Secondary Market Risk, see "Special Risks of the Cumulative Preferred Shares" in the accompanying prospectus.

Table of Contents

TAXATION

The distributions with respect to the Series A Preferred Shares (other than distributions in redemption of Series A Preferred Shares subject to Section 302(b) of the Code) will constitute dividends to the extent of the Fund's current or accumulated earnings and profits, as calculated for federal income tax purposes. Such dividends generally will be taxable as ordinary income to holders. Distributions of net capital gains (*i.e.*, the excess of net long-term capital gains over net short-term capital losses) that are properly reported by the Fund as capital gain dividends will be treated as long-term capital gains in the hands of holders receiving such distributions. The IRS currently requires that a RIC that has two or more classes of stock allocate to each such class proportionate amounts of each type of the RIC's income (such as ordinary income and capital gains) based upon the percentage of total dividends distributed to each class for the tax year. Accordingly, the Fund intends each year to allocate capital gain dividends between and among its Common Shares and each series of its Preferred Shares, including the Series A Preferred Shares, in proportion to the total dividends paid to each class during or with respect to such year. Ordinary income dividends and dividends qualifying for the dividends received deduction, if any, will similarly be allocated between and among such share classes. For additional information, see "Tax Matters" in the accompanying prospectus.

Table of Contents

UNDERWRITING

Wells Fargo Securities, LLC and RBC Capital Markets, LLC are acting as representatives of each of the underwriters named below. Subject to the terms and conditions set forth in an underwriting agreement among the Fund, the Investment Manager and the underwriters, the Fund has agreed to sell to the underwriters, and each of the underwriters has agreed, severally and not jointly, to purchase from the Fund, the number of Series A Preferred Shares set forth opposite its name below.

Underwriter	Number of Series A Preferred Shares
Wells Fargo Securities, LLC	3,270,000
RBC Capital Markets, LLC	1,090,000
Total	4,360,000

Subject to the terms and conditions set forth in the underwriting agreement, the underwriters have agreed, severally and not jointly, to purchase all of the Series A Preferred Shares sold pursuant to the underwriting agreement if any of the Series A Preferred Shares are purchased. If an underwriter defaults, the underwriting agreement provides that the purchase commitments of the nondefaulting underwriters may be increased or the underwriting agreement may be terminated.

The Fund and the Investment Manager have each agreed to indemnify the underwriters and their controlling persons against certain liabilities in connection with this offering, including liabilities under the Securities Act of 1933, as amended, or to contribute to payments the underwriters may be required to make in respect of those liabilities.

The underwriters are offering the Series A Preferred Shares, subject to prior sale, when, as and if issued to and accepted by them, subject to approval of legal matters by their counsel, including the validity of the Series A Preferred Shares, and other conditions contained in the underwriting agreement, such as the receipt by the underwriters of officer's certificates and legal opinions. The underwriters reserve the right to withdraw, cancel or modify offers to the public and to reject orders in whole or in part.

The Fund expects that delivery of the Series A Preferred Shares will be made against payment therefor on or about the 5th business day following the date of confirmation of orders with respect to the Series A Preferred Shares (this settlement cycle being referred to as "T+5"). Under Rule 15c6-1 of the Securities Exchange Act of 1934, as amended, trades in the secondary market generally are required to settle in two business days, unless the parties to any such trade expressly agree otherwise. Accordingly, purchasers who wish to trade prior to the delivery of the Series A Preferred Shares hereunder on the date hereof will be required, by virtue of the fact that the Series A Preferred Shares initially settle in T+5, to specify an alternative settlement arrangement at the time of any such trade to prevent a failed settlement. Purchasers of Series A Preferred Shares who wish to trade the Series A Preferred Shares prior to their date of delivery hereunder should consult their own advisors.

Commissions and Discounts

The representative has advised us that the underwriters propose initially to offer the Series A Preferred Shares to the public at the public offering price set forth on the cover page of this Prospectus Supplement and to certain dealers at such price less a concession not in excess of \$0.50 per share. Any underwriter may allow, and such dealers may reallow, a concession not in excess of \$0.45 per share to other underwriters or to certain dealers. After the initial offering, the public offering price, concession or any other term of the offering may be changed. The expenses of the offering, not including the underwriting discount, are estimated at \$548,000 and are payable by the Fund.

No Sales of Similar Securities

The Fund and the Investment Manager have agreed that the Fund will not, for a period of 180 days from the date of this Prospectus Supplement, without the prior written consent of Wells Fargo Securities, LLC, directly or

Table of Contents

indirectly, issue, sell, offer to contract or grant any option to sell, pledge, transfer or otherwise dispose of, any of its preferred shares or securities exchangeable for or convertible into its preferred shares, except for the Series A Preferred Shares sold to the underwriters pursuant to the underwriting agreement.

NYSE

Application has been made to list the Series A Preferred Shares on the NYSE. Prior to the offering, there has been no public market for the Series A Preferred Shares or any other series of preferred shares of the Fund. If the application is approved, the Series A Preferred Shares are expected to commence trading on the NYSE under the symbol `NCZ PR A` within thirty days of the date of issuance. Before the Series A Preferred Shares are listed on the NYSE, the underwriters may, but are not obligated to, make a market in the Series A Preferred Shares. Consequently, it is anticipated that, prior to the commencement of trading on the NYSE, an investment in Series A Preferred Shares will be illiquid.

If a secondary trading market develops prior to the commencement of trading on the NYSE, holders of the Series A Preferred Shares may be able to sell such shares, however, such shares may trade at discounts from the liquidation preference of the Series A Preferred Shares.

Price Stabilization, Short Positions

Until the distribution of the Series A Preferred Shares is completed, SEC rules may limit underwriters and selling group members from bidding for and purchasing the Series A Preferred Shares. However, the representatives may engage in transactions that have the effect of stabilizing the price of the Series A Preferred Shares, such as purchases and other activities that peg, fix or maintain that price.

In connection with the offering, the underwriters may purchase and sell Series A Preferred Shares in the open market. These transactions may include short sales and purchases on the open market to cover positions created by short sales. Short sales involve the sale by the underwriters of a greater number of Series A Preferred Shares than they are required to purchase in the offering. The underwriters must close out any short position by purchasing Series A Preferred Shares in the open market. A short position is more likely to be created if the underwriters are concerned that there may be downward pressure on the price of the Series A Preferred Shares in the open market after pricing that could adversely affect investors who purchase in the offering.

The underwriters may impose a penalty bid. Penalty bids permit the underwriters to reclaim a selling concession from a syndicate member when the representative repurchases Series A Preferred Shares originally sold by that syndicate member in order to cover syndicate short positions or make stabilizing purchases.

Similar to other purchase transactions, the underwriters' purchases to cover the syndicate short sales may have the effect of raising or maintaining the market price of the Series A Preferred Shares or preventing or retarding a decline in the market price of the Series A Preferred Shares. As a result, the price of the Series A Preferred Shares may be higher than the price that might otherwise exist in the open market.

None of the Fund, the Investment Manager or any of the underwriters makes any representation or prediction as to the direction or magnitude of any effect that the transactions described above may have on the price of the Series A Preferred Shares. In addition, none of the Fund, the Investment Manager or any of the underwriters makes any representation that the representative will engage in these transactions or that these transactions, once commenced, will not be discontinued without notice.

Electronic Distribution

In connection with this offering, certain of the underwriters or securities dealers may distribute prospectuses by electronic means, such as e-mail.

Table of Contents

Other Relationships

Some of the underwriters and their affiliates have engaged in, and may in the future engage in, investment banking and other commercial dealings in the ordinary course of business with the Fund, the Investment Manager or their respective affiliates. They have received, or may in the future receive, customary fees and commissions for these transactions.

In addition, in the ordinary course of their business activities, the underwriters and their affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers. Such investments and securities activities may involve securities and/or instruments of the Fund, the Investment Manager or their respective affiliates. The underwriters and their affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

The Fund anticipates that, from time to time, certain underwriters may act as brokers or dealers in connection with the execution of the Fund's portfolio transactions after they have ceased to be underwriters and, subject to certain restrictions, may act as brokers while they are underwriters.

The principal business address of Wells Fargo Securities, LLC is 550 South Tryon Street, 5th Floor, Charlotte, North Carolina 28202. The principal business address of RBC Capital Markets, LLC is 200 Vesey Street, 9th Floor, New York, New York 10281.

LEGAL MATTERS

Certain legal matters will be passed on for the Fund by Ropes & Gray LLP, Boston, Massachusetts. Certain legal matters will be passed upon for the underwriters by Skadden, Arps, Slate, Meagher & Flom LLP.

Table of Contents

BASE PROSPECTUS DATED AUGUST 17, 2018

Up to \$254,000,000

AllianzGI Convertible & Income Fund II

Cumulative Preferred Shares

Liquidation Preference \$25.00 Per Share

Offering. AllianzGI Convertible & Income Fund II (the Fund) may offer, from time to time, in one or more offerings, cumulative preferred shares of beneficial interest, par value \$0.00001 per share (the Cumulative Preferred Shares). The Cumulative Preferred Shares may be offered in multiple series at prices and on terms to be set forth in one or more supplements to this prospectus. The Cumulative Preferred Shares will rank on parity with the Fund's outstanding auction rate preferred shares of beneficial interest (the ARPS) and any future preferred shares issued by the Fund (collectively, with the Cumulative Preferred Shares and the ARPS, the Preferred Shares) and senior to the Fund's common shares (the Common Shares) with respect to dividend and distribution rights and rights upon Fund liquidation. Investors should read this prospectus and the applicable prospectus supplement carefully before investing in our securities.

Investment Objective. The Fund is a diversified, closed-end management investment company that commenced operations on July 31, 2003, following the initial public offering of its Common Shares. The Fund's investment objective is to provide total return through a combination of capital appreciation and high current income. The Fund cannot assure you that it will achieve its investment objective, and you could lose all of your investment in the Cumulative Preferred Shares.

The Cumulative Preferred Shares have no history of public trading. The Fund anticipates that its Cumulative Preferred Shares will be listed on the New York Stock Exchange (NYSE).

The Common Shares are listed on the NYSE under the symbol NCZ. The last reported sale price of the Common Shares, as reported by the NYSE on August 3, 2018, was \$6.08 per Common Share. The net asset value of the Common Shares at the close of business on August 3, 2018, was \$5.76 per Common Share.

Investing in the Cumulative Preferred Shares involves risks associated with the Fund's portfolio investments and certain special risks, including, without limitation, redemption risk, subordination risk, credit rating risk, distribution risk and secondary market risk. See Special Risks of the Cumulative Preferred Shares for details. Before investing in the Cumulative Preferred Shares, you also should read the discussion of the principal risks of investing in the Fund, including the risks of leverage and of investing in below investment grade/high yield securities, in Principal Risks of the Fund. Certain of these risks are summarized in Prospectus Summary Principal Risks of the Fund.

The Securities and Exchange Commission has not approved or disapproved of these securities or determined that this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

Portfolio Contents. Under normal circumstances, the Fund will invest at least 80% of its total assets in a diversified portfolio of convertible securities and non-convertible income-producing securities. The portion of the Fund's assets invested in convertible securities, on the one hand, and non-convertible income-producing securities, on the other, will vary from time to time consistent with the Fund's investment objective, although the Fund will normally invest at least 50% of its total assets in convertible securities. In making allocation decisions, Allianz Global Investors U.S. LLC (AllianzGI U.S. or the Investment Manager), the Fund's adviser, will consider factors such as changes in equity prices, changes in interest rates and other economic and market factors. The Fund may invest without limit in convertible securities and non-convertible income-producing securities that are rated below investment grade (below Baa3 by Moody's Investors Service, Inc. (Moody's) or below BBB- by either S&P Global Rating Services (S&P) or Fitch, Inc. (Fitch)) or that are unrated but judged by AllianzGI U.S. to be of comparable quality, and expects that ordinarily AllianzGI U.S.'s portfolio strategies will result in the Fund investing primarily in these securities. The Fund may invest without limit in securities of any rating. The Fund typically invests in securities with a broad range of maturities.

Table of Contents

The Fund may invest up to 20% of its total assets in securities other than convertible securities and non-convertible income-producing securities. The Fund may invest up to 5% of its total assets in illiquid securities (*i.e.*, securities that cannot be disposed of within seven days in the ordinary course of business at approximately the value at which the Fund has valued the securities). The Fund may hold or have exposure to equity securities. The Fund may invest in securities of other open- or closed-end investment companies, including, but not limited to, exchange-traded funds. The Fund may invest in securities of companies with small and medium market capitalizations.

The Fund may also invest in non-convertible income-producing securities, including, but not limited to, corporate bonds, debentures, notes and other similar types of corporate debt instruments of U.S. and foreign corporate and other issuers, including commercial paper, as well as non-convertible preferred stocks; bank loans (including, among others, senior loans, delayed funding loans, revolving credit facilities and loan participations and assignments); real estate investment trusts and commercial and other mortgage-related and asset-backed securities issued on a public or private basis; payment-in-kind securities; credit-linked trust certificates and other securities issued by special purpose or structured vehicles; zero-coupon bonds; bank certificates of deposit, fixed time deposits and bankers' acceptances; U.S. Government securities; and income-producing securities of distressed companies, including senior obligations issued in connection with restructurings (commonly known as debtor-in-possession or DIP financings) and other securities issued in connection with restructurings or bankruptcy proceedings. The Fund's investments in non-convertible income-producing securities may have fixed or variable principal payments and all types of interest rate and dividend payment and reset terms, including fixed rate, adjustable rate, zero-coupon, contingent, deferred, payment-in-kind and auction-rate features.

The Fund may utilize various derivative strategies (both long and short positions) involving the purchase or sale of futures and forward contracts, call and put options, credit default swaps, total return swaps, basis swaps and other swap agreements and other derivative instruments for investment purposes, leveraging purposes or in an attempt to hedge against market, credit, interest rate, currency and other risks in the portfolio. The Fund may purchase and sell securities on a when-issued, delayed delivery or forward commitment basis and may engage in short sales.

The Fund may invest up to 20% of its total assets in U.S. dollar-denominated securities of foreign issuers based in developed countries. For this purpose, foreign securities include, but are not limited to, foreign convertible securities and non-convertible income-producing securities, foreign equity securities (including preferred securities of foreign issuers), foreign bank obligations, and obligations of foreign governments or their subdivisions, agencies and instrumentalities, international agencies and supranational entities. For this purpose, foreign securities do not include American Depositary Receipts or securities guaranteed by a United States person, but may include foreign securities in the form of Global Depositary Receipts or other securities representing underlying shares of foreign issuers. See [Portfolio Contents Foreign \(Non-U.S.\) Investments](#).

The Fund may invest without limit in securities that have not been registered for public sale in the U.S. or relevant non-U.S. jurisdiction, including, without limitation, securities eligible for purchase and sale pursuant to Rule 144A under the Securities Act of 1933, as amended (the Securities Act), or relevant provisions of applicable non-U.S. law, and other securities issued in private placements.

Leverage. The Fund currently utilizes leverage through (i) its outstanding ARPS and (ii) a liquidity facility provided to the Fund by State Street Bank and Trust Company (the SSB Facility). The Fund expects to issue Cumulative Preferred Shares in one or more offerings and in one or more series and, in the future, may also issue additional Preferred Shares to further add leverage to its portfolio. Although the Fund currently expects to maintain approximately the same amount of leverage (as a percentage of its total assets) prior to and following any issuance of Cumulative Preferred Shares, it may increase or reduce leverage depending on market conditions and other factors. The Fund utilizes leverage opportunistically and may choose to increase or decrease, or eliminate entirely, its use of leverage over time and from time to time based on AllianzGI U.S.'s assessment of the yield curve environment, interest rate trends, market conditions and other factors. The Fund may also add leverage to its portfolio by utilizing securities loans, reverse repurchase agreements, dollar rolls or other forms of borrowings, such as bank loans or commercial paper or other credit facilities. The Fund may also enter into transactions other than those noted above that may give rise to a form of leverage including, among others, futures and forward contracts,

Table of Contents

credit default swaps, total return swaps and other derivative transactions, short sales and when-issued, delayed delivery and forward commitment transactions. Leveraging is a speculative technique and there are special risks and costs involved. There can be no assurance that a leveraging strategy will be used or that it will be successful during any period in which it is employed. See **Use of Leverage** and **Principal Risks of the Fund Leverage Risk**. The Fund and the Investment Manager continuously evaluate market conditions and the Fund's capital structure, and the Fund retains the flexibility to increase, decrease or refinance its leverage facilities, subject to applicable regulations. The Fund may conduct multiple offerings of Preferred Shares, potentially at different price points, and may use the proceeds of these offerings to refinance then-existing leverage. Because the Investment Manager earns fees based on managed assets, the Investment Manager has a financial incentive for the Fund to use certain forms of leverage, such as borrowings, debt securities or preferred shares, which may create a conflict of interest between the Investment Manager, on the one hand, and the Common Shareholders, on the other hand.

This prospectus is part of a registration statement that the Fund has filed with the Securities and Exchange Commission in connection with an offering that may take place on a delayed or continuous basis. The Fund may offer, from time to time, in one or more offerings, including through rights offerings, up to \$254,000,000 in aggregate liquidation preference of the Cumulative Preferred Shares on terms to be determined at the time of the offering. This prospectus provides a general description of the Fund and the Cumulative Preferred Shares. Each time the Fund uses this prospectus to offer Cumulative Preferred Shares, the Fund will provide a prospectus supplement that will contain specific information about the terms of that offering. The prospectus supplement may also add, update or change information contained in this prospectus. You should read this prospectus and the applicable prospectus supplement, which contains important information about the Fund, carefully before you invest in the Cumulative Preferred Shares. Cumulative Preferred Shares may be offered directly to one or more purchasers, through agents designated from time to time by the Fund, or to or through underwriters or dealers. The prospectus supplement relating to an offering will identify any agents, underwriters or dealers involved in the sale of Cumulative Preferred Shares, and will set forth any applicable purchase price, fee, commission or discount arrangement between the Fund and its agents or underwriters, or among the Fund's underwriters, or the basis upon which such amount may be calculated. The Fund may not sell any Cumulative Preferred Shares through agents, underwriters or dealers without delivery of a prospectus supplement describing the method and terms of the particular offering of the Cumulative Preferred Shares.

You should read this prospectus and the applicable prospectus supplement, which concisely set forth information about the Fund and the Cumulative Preferred Shares, before deciding whether to invest in the Cumulative Preferred Shares and retain them for future reference. A Statement of Additional Information, dated August 17, 2018, containing additional information about the Fund has been filed with the Securities and Exchange Commission and is incorporated by reference in its entirety into this prospectus. You can review the table of contents of the Statement of Additional Information on page 95 of this prospectus. You may request a free copy of the Statement of Additional Information, request the Fund's most recent annual and semiannual reports, request information about the Fund and make shareholder inquiries by calling toll-free (800) 254-5197 or by writing to the Fund at 1633 Broadway, New York, New York 10019. You may also obtain a copy of the Statement of Additional Information (and other information regarding the Fund) from the Securities and Exchange Commission's Public Reference Room in Washington, D.C. by calling (202) 551-8090. The Securities and Exchange Commission charges a fee for copies. The Fund's Statement of Additional Information and most recent annual and semiannual reports are available, free of charge, on the Fund's website (us.allianzgi.com). You can obtain the same information, free of charge, from the Securities and Exchange Commission's web site (<http://www.sec.gov>).

The Cumulative Preferred Shares do not represent a deposit or obligation of, and are not guaranteed or endorsed by, any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other government agency.

PROSPECTUS SUMMARY

This is only a summary. This summary may not contain all of the information that you should consider before investing in the Fund's Cumulative Preferred Shares, par value \$0.00001 per share (the Cumulative Preferred Shares). You should review the more detailed information contained in this prospectus and in any related prospectus supplement and in the Statement of Additional Information, especially the information set forth under the headings Special Risks of the Cumulative Preferred Shares and Principal Risks of the Fund.

The Fund

AllianzGI Convertible & Income Fund II (the Fund) is a diversified, closed-end management investment company. The Fund commenced operations on July 31, 2003, following the initial public offering of its common shares (the Common Shares).

The Common Shares are listed on the New York Stock Exchange (NYSE) under the symbol NCZ. As of August 3, 2018, the net assets of the Fund attributable to Common Shares were \$433,138,288 and the Fund had outstanding 75,220,257 Common Shares and 6,501 auction rate preferred shares of beneficial interest (ARPS) and, together with the Cumulative Preferred Shares and any future preferred shares issued by the Fund, Preferred Shares). The last reported sale price of the Common Shares, as reported by the NYSE on August 3, 2018 was \$6.08 per Common Share. The net asset value of the Common Shares at the close of business on August 3, 2018 was \$5.76 per Common Share. See Description of Capital Structure.

Offering of Cumulative Preferred Shares

The Fund may offer, from time to time, in one or more offerings, including through rights offerings, up to \$254,000,000 in aggregate liquidation preference of the Cumulative Preferred Shares on terms to be determined at the time of the offering. The Cumulative Preferred Shares may be offered in multiple series at prices and on terms to be set forth in one or more prospectus supplements. The Cumulative Preferred Shares will rank on parity with the Fund's outstanding ARPS and any future Preferred Shares issued by the Fund and senior to the Common Shares with respect to dividend and distribution rights and rights upon our liquidation. You should read this prospectus and the applicable prospectus supplement carefully before you invest in the Cumulative Preferred Shares. Cumulative Preferred Shares may be offered directly to one or more purchasers, through agents designated from time to time by the Fund, or to or through underwriters or dealers. The prospectus supplement relating to an offering will identify any agents, underwriters or dealers involved in the sale of Cumulative Preferred Shares, and will set forth any applicable purchase price, fee, commission or discount arrangement between the Fund and its agents or underwriters, or among the Fund's underwriters, or the basis upon which such amount may be calculated. The Fund may not sell any Cumulative Preferred Shares through agents, underwriters or dealers without delivery or deemed delivery of a prospectus supplement describing the method and terms of the particular offering of the Cumulative Preferred Shares.

Liquidation Preference

\$25.00 per share.

Table of Contents

Non-Call Period/Optional Redemption

A series of Cumulative Preferred Shares generally may not be called for redemption at the option of the Fund prior to the date that is five years from initial issuance.

Following the end of the initial non-call period, to the extent permitted by the Investment Company Act of 1940, as amended (the "1940 Act") and Massachusetts law, the Fund may at any time, upon notice of redemption, redeem the Cumulative Preferred Shares in whole or in part at the liquidation preference per share plus accumulated unpaid dividends and distributions through the date of redemption.

Voting Rights

The 1940 Act requires that the holders of Cumulative Preferred Shares, together with holders of any other Preferred Shares then outstanding voting as a separate class, have the right to elect at least two Trustees at all times and to elect a majority of the Trustees at any time when two years' dividends and distributions on any Preferred Shares are unpaid. The holders of the Cumulative Preferred Shares and any other Preferred Shares, or series thereof, will vote as a separate class on certain other matters as required under the Fund's Second Amended and Restated Agreement and Declaration of Trust (the "Declaration") and Eighth Amended and Restated Bylaws and under the 1940 Act. When holders of Preferred Shares vote separately from the Common Shares as a class, or one or more series of Preferred Shares votes separately, each Preferred Shareholder is entitled to one vote per \$25.00 of liquidation preference held. As a result, for matters that are voted on by Preferred Shareholders as a separate class, voting authority is allocated among Preferred Shareholders in proportion to the liquidation preference of their holdings, as opposed to the number of their Preferred Shares.

Use of Proceeds

The net proceeds of the offering will be used to refinance outstanding indebtedness or other forms of leverage, potentially including amounts outstanding under the Fund's liquidity facility with State Street Bank and Trust Company (the "SSB Facility") and/or the Fund's existing ARPS, and/or to purchase additional portfolio securities in accordance with the Fund's investment objective and policies as set forth below. To the extent offering proceeds are used to refinance existing leverage, it is presently anticipated that the Fund will be able to deploy such net proceeds promptly after receipt by the Fund. To the extent offering proceeds are used to purchase additional portfolio securities, it is presently anticipated that the Fund will be able to deploy substantially all such net proceeds within 30 days after receipt by the Fund. The Fund anticipates using all or substantially all of the proceeds from any offering of Cumulative Preferred Shares to refinance existing leverage. See "Use of Proceeds."

Investment Objective

The Fund's investment objective is to provide total return through a combination of capital appreciation and high current income. The Fund attempts to achieve this objective by investing in a diversified portfolio of convertible securities and non-convertible income-producing securities described under "Portfolio Contents" below. As described below, in

Table of Contents

seeking to achieve its investment objective, the Fund expects ordinarily to invest primarily in high yield securities or junk bonds. The Fund cannot assure you that it will achieve its investment objective.

Portfolio Management Strategies

In selecting investments for the Fund, the Investment Manager attempts to identify issuers that successfully adapt to change. AllianzGI U.S. uses traditional credit analysis combined with a disciplined, fundamental bottom-up research process that facilitates the early identification of issuers demonstrating an ability to improve their fundamental characteristics. See Independent Credit Analysis below. AllianzGI U.S. attempts to identify potential investments that it expects will exceed minimum credit statistics and exhibit the highest visibility of future expected operating performance. AllianzGI U.S.'s sell discipline is clearly defined and designed to drive the Fund's portfolio continually toward strength, taking into account factors such as a change in credit fundamentals, a decline in attractiveness relative to other securities and a decline in industry fundamentals.

In selecting convertible securities for investment by the Fund, AllianzGI U.S. evaluates each convertible security's investment characteristics as an income-producing security, using the techniques described above, as well as its potential for capital appreciation, using techniques that focus on the security's equity characteristics. AllianzGI U.S. seeks to capture approximately 60-80% of any increase in the market price of the underlying equities (upside potential) and 50% or less of any decrease in the market price of the underlying equities (downside exposure). In analyzing specific companies for possible investment, AllianzGI U.S. ordinarily looks for several of the following characteristics: above-average per share earnings growth; high return on invested capital; a healthy balance sheet; sound financial and accounting policies and overall financial strength; strong competitive advantages; effective research and product development and marketing; development of new technologies; efficient service; pricing flexibility; strong management; and general operating characteristics that will enable the companies to compete successfully in their respective markets. AllianzGI U.S. will consider selling a particular convertible security when any of those factors materially changes.

Independent Credit Analysis

AllianzGI U.S. relies heavily on its own analysis of the credit quality and risks associated with individual securities considered for the Fund, rather than relying exclusively on rating agencies or third-party research. The Fund's portfolio managers utilize this information in an attempt to minimize credit risk and identify issuers, industries or sectors that are undervalued or that offer attractive capital appreciation potential or high current income relative to AllianzGI U.S.'s assessment of their credit characteristics. This aspect of AllianzGI U.S.'s capabilities will be particularly important to the extent that the Fund invests in high yield securities.

Portfolio Contents

Under normal circumstances, the Fund will invest at least 80% of its total assets in a diversified portfolio of convertible securities and non-convertible income-producing securities (the 80% Policy). The portion of the Fund's assets invested in convertible securities, on the one

Table of Contents

hand, and non-convertible income-producing securities, on the other, will vary from time to time consistent with the Fund's investment objective, although the Fund will normally invest at least 50% of its total assets in convertible securities (the 50% Policy). The Fund's investments in derivatives and other synthetic instruments that have economic characteristics similar to convertible securities or non-convertible income-producing securities will be counted toward satisfaction of the Fund's 80% Policy and 50% Policy. For purposes of the Fund's 80% Policy and 50% Policy, the Fund generally values its derivative instruments based on their market value. In making allocation decisions, AllianzGI U.S. will consider factors such as changes in equity prices, changes in interest rates and other economic and market factors. The Fund may invest without limit in convertible securities and non-convertible income-producing securities that are below investment grade quality, and expects that ordinarily AllianzGI U.S.'s portfolio strategies will result in the Fund investing primarily in these securities. The Fund typically invests in securities with a broad range of maturities.

The Fund may invest up to 20% of its total assets in securities other than convertible securities and non-convertible income-producing securities. The Fund may invest up to 5% of its total assets in illiquid securities (*i.e.*, securities that cannot be disposed of within seven days in the ordinary course of business at approximately the value at which the Fund has valued the securities). The Fund may hold or have exposure to equity securities. The Fund may invest in securities of other open- or closed-end investment companies, including, but not limited to, exchange-traded funds (ETFs). The Fund may invest in securities of companies with small and medium market capitalizations.

The Fund may utilize various derivative strategies (both long and short positions) involving the purchase or sale of futures and forward contracts, call and put options, credit default swaps, total return swaps, basis swaps and other swap agreements and other derivative instruments for investment purposes, leveraging purposes or in an attempt to hedge against market, credit, interest rate, currency and other risks in the portfolio. The Fund may purchase and sell securities on a when-issued, delayed delivery or forward commitment basis and may engage in short sales.

Convertible Securities

The Fund may invest without limit in convertible securities, and these securities will ordinarily constitute a principal component of the Fund's investment program. Under normal circumstances, the Fund will invest at least 50% of its total assets in convertible securities. Convertible securities are bonds, debentures, notes, preferred stocks or other securities that may be converted or exchanged at either a stated price or stated rate into underlying shares of common stock. Convertible securities have general characteristics similar to both debt securities and equity securities. Although to a lesser extent than with debt obligations, the market value of convertible securities tends to decline as interest rates increase and, conversely, tends to increase as interest rates decline. In addition, because of the conversion feature, the market value of convertible securities tends to vary with fluctuations in the market value of the underlying common stocks

Table of Contents

and, therefore, also will react to variations in the general market for equity securities. Convertible securities are investments that provide for a stable stream of income with generally higher yields than common stocks. There can be no assurance of current income because the issuers of the convertible securities may default on their obligations. Convertible securities, however, generally offer lower interest or dividend yields than non-convertible debt securities of similar credit quality because of the potential for equity-related capital appreciation. A convertible security, in addition to providing current income, offers the potential for capital appreciation through the conversion feature, which enables the holder to benefit from increases in the market price of the underlying common stock. See [Portfolio Contents](#) [Convertible Securities](#). The Fund may invest in contingent convertible securities ([CoCos](#)). The term [contingent convertible securities](#) refers solely to convertible securities that are generally convertible at the option of the security holder and not convertible securities that convert upon the occurrence of an external trigger event, such as the failure of the issuer to satisfy certain capitalization criteria.

Synthetic Convertible Securities

The Fund also may invest without limit in [synthetic convertible securities](#), which will be selected based on the similarity of their economic characteristics to those of a traditional convertible security due to the combination of separate securities that possess the two principal characteristics of a traditional convertible security, *i.e.*, an income-producing security ([income-producing component](#)) and the right to acquire an equity security ([convertible component](#)). The income-producing component is achieved by investing in non-convertible, income-producing securities such as bonds, preferred stocks and money market instruments. The convertible component is achieved by purchasing warrants or options to buy common stock at a certain exercise price, or options on a stock index. The Fund may also purchase synthetic securities created by other parties, typically investment banks, including convertible structured notes. The income-producing and convertible components of a synthetic convertible security may be issued separately by different issuers and at different times. The values of synthetic convertible securities will respond differently to market fluctuations than a traditional convertible security because a synthetic convertible is composed of two or more separate securities or instruments, each with its own market value. Synthetic convertible securities are also subject to the risks associated with derivatives. See [Principal Risks of the Fund](#) [Derivatives Risk](#). In addition, if the value of the underlying common stock or the level of the index involved in the convertible element falls below the strike price of the warrant or option, the warrant or option may lose all value. The Fund's holdings of synthetic convertible securities are considered convertible securities for purposes of the Fund's policy to normally invest at least 50% of its total assets in convertible securities and 80% of its total assets in a diversified portfolio of convertible securities and non-convertible income-producing securities. See [Portfolio Contents](#) [Synthetic Convertible Securities](#).

Table of Contents

Non-Convertible Income-Producing Securities

The Fund may also invest in non-convertible income-producing securities, including, but not limited to, corporate bonds, debentures, notes and other similar types of corporate debt instruments of U.S. and foreign corporate and other issuers, including commercial paper, as well as non-convertible preferred stocks; bank loans (including, among others, senior loans, delayed funding loans, revolving credit facilities and loan participations and assignments); real estate investment trusts (REITs) and commercial and other mortgage-related and asset-backed securities issued on a public or private basis; payment-in-kind securities; credit-linked trust certificates and other securities issued by special purpose or structured vehicles; zero-coupon bonds; bank certificates of deposit, fixed time deposits and bankers' acceptances; U.S. Government securities; and income-producing securities of distressed companies, including senior obligations issued in connection with restructurings (commonly known as debtor-in-possession or DIP financings) and other securities issued in connection with restructurings or bankruptcy proceedings. The Fund's investments in non-convertible income-producing securities may have fixed or variable principal payments and all types of interest rate and dividend payment and reset terms, including fixed rate, adjustable rate, zero-coupon, contingent, deferred, payment-in-kind and auction-rate features. See Portfolio Contents Non-Convertible Income-Producing Securities.

High Yield Securities (Junk Bonds)

The Fund may invest without limit in convertible securities and non-convertible income producing securities that are rated below investment grade (below Baa3 by Moody's Investors Service, Inc. (Moody's)) or below BBB- by either S&P Global Rating Services (S&P) or Fitch, Inc. (Fitch) or that are unrated but determined by AllianzGI U.S. to be of comparable quality, and expects that normally AllianzGI U.S.'s portfolio strategies will result in the Fund investing primarily in those securities. Below investment grade securities are commonly referred to as high yield securities or junk bonds. The Fund may invest in high yield securities of any rating, including securities given the lowest non-default rating (Caa by Moody's or C by S&P or Fitch, as described in Appendix A) or unrated securities judged to be of comparable quality by AllianzGI U.S. The Fund may purchase distressed securities that are in default or the issuers of which are in bankruptcy. High yield securities involve a greater degree of risk (in particular, a greater risk of default) than, and special risks in addition to the risks associated with, investment grade debt obligations. While offering a greater potential opportunity for capital appreciation and higher yields, high yield securities typically entail greater potential price volatility and may be less liquid than higher-rated securities. High yield securities may be regarded as predominantly speculative with respect to the issuer's continuing ability to make timely principal and interest payments. They also may be more susceptible to real or perceived adverse economic and competitive industry conditions than higher-rated securities. Debt

Table of Contents

securities in the lowest investment grade category also may be considered to possess some speculative characteristics by certain ratings agencies. See Portfolio Contents High Yield Securities.

Foreign (Non-U.S.) Investments

The Fund may invest up to 20% of its total assets in U.S. dollar-denominated securities of foreign issuers based in developed countries. For this purpose, foreign securities include, but are not limited to, foreign convertible securities and non-convertible income-producing securities, foreign equity securities (including preferred securities of foreign issuers), foreign bank obligations, and obligations of foreign governments or their subdivisions, agencies and instrumentalities, international agencies and supranational entities. For this purpose, foreign securities do not include American Depository Receipts (ADRs) or securities guaranteed by a United States person (*i.e.*, the Fund does not count these securities for purposes of the 20% limitation noted above), but may include foreign securities in the form of Global Depository Receipts (GDRs) or other securities representing underlying shares of foreign issuers. See Portfolio Contents Foreign (Non-U.S.) Investments.

Restricted Securities

The Fund may invest without limit in securities that have not been registered for public sale in the U.S. or relevant non-U.S. jurisdiction, including, without limitation, securities eligible for purchase and sale pursuant to Rule 144A under the Securities Act of 1933, as amended (the Securities Act), or relevant provisions of applicable non-U.S. law, and other securities issued in private placements. Rule 144A under the Securities Act provides a non-exclusive safe harbor exemption from the registration requirements of the Securities Act for the resale of certain restricted securities to certain qualified institutional buyers, such as the Fund. Restricted securities and other private placement securities may be deemed illiquid and thus may be subject to the Fund's limit on investments in illiquid securities, although the Fund may determine that certain restricted securities are liquid in accordance with procedures adopted by the Fund's Board.

Use of Leverage

The Fund currently utilizes leverage through (i) its outstanding ARPS and (ii) the SSB Facility. As of August 3, 2018, the aggregate dollar amount (*i.e.*, liquidation preference) of the Fund's outstanding ARPS was \$162,525,000, which then represented approximately 23.2% of the Fund's total assets (including assets attributable to the Fund's leverage), while the amount outstanding under the SSB Facility was \$104,786,500, which then represented approximately 15.0% of the Fund's total assets (including assets attributable to the Fund's leverage). As of August 3, 2018, the Fund's outstanding ARPS and the amount outstanding under the SSB Facility, combined, represented approximately 38.2% of the Fund's total assets (including assets attributable to the Fund's leverage). On July 31, 2018, the Fund completed a tender offer for up to 100% of its outstanding ARPS, immediately prior to which the Fund had ARPS outstanding with an aggregate liquidation preference of \$274,000,000 (representing 38.9% of the Fund's total assets, including assets attributable to leverage) and no amount outstanding under the SSB Facility.

Table of Contents

The Fund expects to issue Cumulative Preferred Shares in one or more offerings and in one or more series and, in the future, may also issue additional Preferred Shares to further add leverage to its portfolio. Although the Fund currently expects to maintain approximately the same amount of leverage (as a percentage of its total assets) prior to and following any issuance of Cumulative Preferred Shares, it may increase or reduce leverage depending on market conditions and other factors. The Fund utilizes leverage opportunistically and may choose to increase or decrease, or eliminate entirely, its use of leverage over time and from time to time based on AllianzGI U.S.'s assessment of the yield curve environment, interest rate trends, market conditions and other factors. The Fund may also add leverage to its portfolio by utilizing securities loans, reverse repurchase agreements, dollar rolls or other forms of borrowings, such as bank loans or commercial paper or other credit facilities. The Fund may also enter into transactions other than those noted above that may give rise to a form of leverage including, among others, futures and forward contracts, credit default swaps, total return swaps and other derivative transactions, short sales and when-issued, delayed delivery and forward commitment transactions.

The Fund's net assets attributable to its Preferred Shares and the net proceeds the Fund obtains under the SSB Facility or from other forms of leverage utilized, if any, will be invested in accordance with the Fund's investment objective and policies as described in this prospectus. So long as the rate of return, net of applicable Fund expenses, on the debt obligations and other investments purchased by the Fund exceeds the dividend rates payable on the Preferred Shares together with the costs to the Fund of other leverage it utilizes, the investment of the Fund's net assets attributable to leverage will generate more income than will be needed to pay the costs of the leverage.

The Cumulative Preferred Shares will pay cash dividends at a rate to be determined at the time of issuance. Other key terms of the Cumulative Preferred Shares are described under "Description of Capital Structure" and/or will be described in a prospectus supplement prior to issuance.

The dividends payable and other terms of the ARPS are summarized in this prospectus. The terms of the ARPS provide that they would ordinarily pay dividends at a rate set at auctions held every seven days, subject to a maximum applicable rate calculated as a function of the ARPS' then-current rating and a reference interest rate. However, the weekly auctions for the ARPS, as well as auctions for similar preferred shares of other closed-end funds in the U.S., have failed since February 2008, and the dividend rates on the ARPS since that time have been paid at the maximum applicable rate (*i.e.* a multiple of a reference rate, which is the applicable AA Financial Composite Commercial Paper Rate (for a dividend period of fewer than 184 days) or the applicable Treasury Index Rate (for a dividend period of 184 days or more)). As of the date hereof, the Fund's ARPS have a Moody's rating of Aa3 and a Fitch rating of AAA, meaning

Table of Contents

the multiple used to calculate the maximum applicable rate is 150%, subject to upward adjustment in the event of downgrade. See [Use of Leverage](#) and [Description of Capital Structure](#). The Fund expects that the ARPS will continue to pay dividends at the maximum applicable rate for the foreseeable future and cannot predict whether or when the auction markets for the ARPS may resume normal functioning. See [Principal Risks of the Fund](#) [Leverage Risk](#), [Principal Risks of the Fund](#) [Risks Associated with the ARPS](#) and [Description of Capital Structure](#) for more information.

The SSB Facility permits the Fund to borrow up to \$210,000,000 on a revolving basis. Key terms of the SSB Facility are described under [Description of Capital Structure](#) [Additional Information Regarding the SSB Facility](#). Amounts drawn under the facility are subject to a floating interest rate based on the three-month LIBOR rate plus a spread of 0.55%, subject to upward adjustment during continuations of event of default, if and when interest payments are past due and under certain other conditions.

Leveraging is a speculative technique and there are special risks and costs involved. The Fund cannot assure you that its Preferred Shares and use of the SSB Facility or any other forms of leverage (such as the use of bank borrowings, securities loans, reverse repurchase agreements or derivatives strategies), if any, will result in increases to the Fund's net asset value. Dividend, interest and other expenses borne by the Fund in connection with leverage may reduce the Fund's ability to pay dividends to holders of Preferred Shares, including the Cumulative Preferred Shares. See [Principal Risks of the Fund](#) [Leverage Risk](#). In addition, because the fees received by the Investment Manager are based on the total managed assets of the Fund (including any assets attributable to any preferred shares or other forms of leverage of the Fund that may be outstanding), the Investment Manager has a financial incentive for the Fund to maintain high levels of leverage, potentially increasing the risk that the Fund may not be able to service its indebtedness, pay dividends to holders of Preferred Shares or satisfy ongoing financial maintenance tests associated with the ARPS and Cumulative Preferred Shares.

Under the 1940 Act, the Fund is not permitted to issue new preferred shares unless immediately after such issuance the value of the Fund's total net assets (as defined below) is at least 200% of the liquidation value of the outstanding Preferred Shares and the newly issued preferred shares plus the aggregate amount of any senior securities of the Fund representing indebtedness (*i.e.*, such liquidation value plus the aggregate amount of senior securities representing indebtedness may not exceed 50% of the Fund's total net assets). In addition, the Fund is not permitted to declare any cash dividend or other distribution on its Common Shares unless, at the time of such declaration, the value of the Fund's total net assets satisfies the above-referenced 200% coverage requirement.

The 1940 Act also generally prohibits the Fund from engaging in most forms of leverage representing indebtedness (including the use of bank

Table of Contents

loans, commercial paper or other credit facilities, reverse repurchase agreements, dollar rolls, credit default swaps and other derivative transactions, loans of portfolio securities, short sales and when-issued, delayed delivery and forward commitment transactions, to the extent that these instruments are not covered as described below) unless immediately after the issuance of the leverage the Fund has satisfied the asset coverage test with respect to senior securities representing indebtedness prescribed by the 1940 Act; that is, the value of the Fund's total assets less all liabilities and indebtedness not represented by senior securities (for these purposes, total net assets) is at least 300% of the senior securities representing indebtedness (effectively limiting the use of leverage through senior securities representing indebtedness to 33 1/3% of the Fund's total net assets, including assets attributable to such leverage). The Fund is not permitted to declare any cash dividend or other distribution on its Common Shares unless, at the time of such declaration, the 300% asset coverage requirement described above is satisfied, while 200% asset coverage of senior securities representing indebtedness is required for distributions on Preferred Shares. The Fund may (but is not required to) cover its commitments under reverse repurchase agreements, dollar rolls, derivatives and certain other instruments by the segregation of liquid assets, or, for certain instruments, by entering into offsetting transactions or owning positions covering its obligations. For instance, the Fund may cover its position in a reverse repurchase agreement by segregating liquid assets at least equal in amount to its forward purchase commitment (assuming such reverse repurchase agreement has a specified repurchase price). To the extent that instruments involving contractual obligations to pay are so covered (either through segregation of liquid assets, or, for certain instruments, entry into an offsetting position), they will not be considered senior securities under the 1940 Act and therefore will not be subject to the 300% asset coverage requirement otherwise applicable to forms of leverage used by the Fund. To the extent that reverse repurchase agreements, dollar rolls, derivatives and other instruments involving contractual payment obligations are not covered, they may be deemed to be senior securities under the 1940 Act and would, in that circumstance, be subject to the asset coverage requirements in Section 18 of the 1940 Act. However, reverse repurchase agreements and other such instruments, even if covered, may represent a form of economic leverage and create special risks. The use of these forms of leverage increases the volatility of the Fund's investment portfolio and places holders of Cumulative Preferred Shares at greater risk of loss than if these strategies were not used. See Principal Risks of the Fund Leverage Risk. Failure to maintain certain asset coverage requirements could result in an event of default under certain borrowings that may be used by the Fund.

The Fund's ability to utilize leverage is also limited by asset coverage requirements and other guidelines imposed by rating agencies that provide ratings for the ARPS (currently Moody's and Fitch) and, if

Table of Contents

applicable, the Cumulative Preferred Shares at the request of the Fund, which may be more restrictive than the limitations imposed by the 1940 Act noted above. See Description of Capital Structure for more information.

The Fund also may borrow money in order to repurchase its shares or as a temporary measure for extraordinary or emergency purposes, including for the payment of dividends or the settlement of securities transactions which otherwise might require untimely dispositions of portfolio securities held by the Fund.

Investment Manager

Allianz Global Investors U.S. LLC serves as the Investment Manager of the Fund. Organized as a Delaware limited liability company in 2000, the Investment Manager is registered as an investment adviser with the Securities and Exchange Commission (SEC). Subject to the supervision of the Fund's Board, the Investment Manager is responsible for managing, either directly or through others selected by it, the investment activities of the Fund and the Fund's business affairs and other administrative matters. The Investment Manager receives an annual fee from the Fund, payable monthly, in an amount equal to 0.70% of the Fund's average daily total managed assets. Total managed assets means the total assets of the Fund (including any assets attributable to any preferred shares or other forms of leverage of the Fund that may be outstanding) minus accrued liabilities (other than liabilities representing leverage).

The Investment Manager provides investment management and advisory services to open-end mutual funds and closed-end funds. The Investment Manager is a wholly-owned indirect subsidiary of Allianz Asset Management of America L.P. and of Allianz SE, a publicly-traded European insurance and financial services company. As of June 30, 2018, the Investment Manager had approximately \$115.7 billion in assets under management. The Investment Manager is located at 1633 Broadway, New York, NY 10019 and also has offices at 600 West Broadway, San Diego, CA 92101, 2100 Ross Avenue, Suite 700, Dallas, TX 75201 and 555 Mission Street, Suite 1700, San Francisco, CA 94105. The portfolio management team for the Fund is based in AllianzGI U.S.'s San Diego office.

Custodian, Transfer Agent and Dividend Paying Agent

State Street Bank & Trust Co. serves as custodian of the Fund's assets and also provides certain fund accounting, sub-administrative and compliance services to the Investment Manager on behalf of the Fund. With respect to the Cumulative Preferred Shares, American Stock Transfer & Trust Company, LLC serves as the Fund's transfer agent and dividend paying agent. See Shareholder Servicing Agent, Custodian and Transfer Agent.

Special Risks of the Cumulative Preferred Shares

Primary risks associated with an investment in the Cumulative Preferred Shares include:

Redemption Risk. The Fund may redeem Cumulative Preferred Shares to the extent necessary to meet regulatory asset coverage

Table of Contents

requirements or requirements imposed by credit rating agencies. For example, if the value of the Fund's investment portfolio declines, thereby reducing the asset coverage for the Cumulative Preferred Shares, the Fund may be obligated under the terms of the Cumulative Preferred Shares and/or the 1940 Act to redeem some or all of the Cumulative Preferred Shares. In addition, after the end of a non-call period, the Fund will be able to call the Cumulative Preferred Shares at the option of the Fund. Investors may not be able to reinvest the proceeds of any redemption in an investment providing the same or a higher dividend rate than that of the Cumulative Preferred Shares. Precipitous declines in the value of the Fund's assets could result in the Fund having insufficient assets to redeem all of the Cumulative Preferred Shares for the full redemption price.

Subordination Risk. The Cumulative Preferred Shares are not a debt obligation of the Fund. The Cumulative Preferred Shares are junior in respect of distributions and liquidation preference to any indebtedness incurred by the Fund, and will have the same priority with respect to payment of dividends and distributions and liquidation preference as the ARPS and any other Preferred Shares that the Fund may issue. The Cumulative Preferred Shares are subject to greater credit risk than any of the Fund's debt instruments, which would be of higher priority in the Fund's capital structure.

Credit Rating Risk. Each series of Cumulative Preferred Shares is expected to receive a credit rating at the time of issuance. Any credit rating that is so issued could be reduced or withdrawn while an investor holds Cumulative Preferred Shares. A reduction or withdrawal of the credit rating would likely have an adverse effect on the market value of the Cumulative Preferred Shares. In addition, a credit rating does not eliminate or mitigate the risks of investing in the Cumulative Preferred Shares.

Distribution Risk. The Fund may not earn sufficient income from its investments to make distributions on the Cumulative Preferred Shares. However, because income from the Fund's entire investment portfolio is available to pay Preferred Shares dividends (not just the portion of the portfolio associated with proceeds from Preferred Shares offerings), the dividend rates with respect to the Cumulative Preferred Shares and ARPS would have to greatly exceed the Fund's net portfolio income before the Fund's ability to pay Preferred Shares dividends would be jeopardized. Any failure by the Fund to meet asset coverage requirements with respect to senior indebtedness could prohibit the Fund from making distributions on the Cumulative Preferred Shares. The Cumulative Preferred Shares are also junior to the Fund's indebtedness in right of distributions.

Secondary Market Risk. The market price for the Cumulative Preferred Shares will be influenced by changes in interest rates, the perceived credit quality of the Cumulative Preferred Shares and other factors, and may be higher or lower than the liquidation preference of

Table of Contents

the Cumulative Preferred Shares. Cumulative Preferred Shares are designed for long-term investors and the Fund should not be treated as a trading vehicle.

The Cumulative Preferred Shares will pay dividends at a fixed rate. Prices of fixed income investments tend to vary inversely with changes in market yields. The market yields on securities comparable to the Cumulative Preferred Shares may increase, which would likely result in a decline in the market value of the Cumulative Preferred Shares. Additionally, if interest rates rise, securities comparable to the Cumulative Preferred Shares may pay higher dividend rates and the market value of Cumulative Preferred Shares may be adversely affected. Market interest rates recently have been significantly below historical average rates, which may increase the risk that these rates will rise in the future.

Interest Rate Risk Related to Cumulative Preferred Shares. Generally, when market interest rates rise, the prices of debt obligations fall, and vice versa. As noted above, because the Cumulative Preferred Shares have a fixed dividend, they may behave similarly to debt instruments in response to changes in market interest rates.

Principal Risks of the Fund

The following is a summary of the principal risks associated with an investment in the Fund. Investors should also refer to **Principal Risks of the Fund** in this prospectus and **Investment Objective and Policies** in the Statement of Additional Information for a more detailed explanation of these and other risks associated with investing in the Fund and the Cumulative Preferred Shares.

Market Risk. The market price of securities owned by the Fund may go up or down, sometimes rapidly or unpredictably. Securities may decline in value due to factors affecting securities markets generally or particular industries represented in the securities markets. The value of a security may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. They may also decline due to factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry. During a general downturn in the securities markets, multiple asset classes may decline in value simultaneously.

Issuer Risk. The value of securities may decline for a number of reasons that directly relate to the issuer, such as its financial strength, management performance, financial leverage and reduced demand for the issuer's goods and services, as well as the historical and prospective earnings of the issuer and the value of its assets. These risks can apply to the Cumulative Preferred Shares and to the issuers of securities and other instruments in which the Fund invests.

Convertible Securities Risk. The Fund may invest without limit in convertible securities, which may include, among others, bonds,

Table of Contents

debentures, notes, preferred stocks or other securities. Convertible securities will ordinarily constitute a principal component of the Fund's investment program. Under normal circumstances, the Fund will invest at least 50% of its total assets in convertible securities. Convertible securities generally offer lower interest or dividend yields than non-convertible debt securities of similar quality. The market values of convertible securities tend to decline as interest rates increase and, conversely, to increase as interest rates decline. However, a convertible security's market value tends to reflect the market price of the common stock of the issuing company when that stock price approaches or is greater than the convertible security's conversion price. The conversion price is defined as the predetermined price at which the convertible security could be exchanged for the associated stock. As the market price of the underlying common stock declines, the price of the convertible security tends to be influenced more by the yield of the convertible security. Thus, it may not decline in price to the same extent as the underlying common stock. In the event of a liquidation of the issuing company, holders of convertible securities would be paid before the company's common stockholders but after holders of any senior debt obligations of the company. Consequently, the issuer's convertible securities generally entail less risk than its common stock but more risk than its debt obligations. Convertible securities are often rated below investment grade or not rated because they fall below debt obligations and just above common equity in order of preference or priority on the issuer's balance sheet. See **High Yield Securities Risk**.

Synthetic Convertible Securities Risk. The Fund may invest without limit in synthetic convertible securities, which are created through a combination of separate securities that possess the two principal characteristics of a traditional convertible security, *i.e.*, an income-producing security (income-producing component) and the right to acquire an equity security (convertible component). The income-producing component is achieved by investing in non-convertible, income-producing securities such as bonds, preferred stocks and money market instruments. The convertible component is achieved by purchasing warrants or options to buy common stock at a certain exercise price, or options on a stock index. The values of synthetic convertible securities will respond differently to market fluctuations than a traditional convertible security because a synthetic convertible is composed of two or more separate securities or instruments, each with its own market value. Synthetic convertible securities are also subject to the risks associated with derivatives. See **Principal Risks of the Fund Derivatives Risk**. In addition, if the value of the underlying common stock or the level of the index involved in the convertible element falls below the strike price of the warrant or option, the warrant or option may lose all value.

Credit Risk. Credit risk is the risk that one or more of the Fund's investments in debt securities or other instruments will decline in price, or fail to pay interest, liquidation value or principal when due,

Table of Contents

because the issuer of the obligation or the issuer of a reference security experiences an actual or perceived decline in its financial status.

High Yield Securities Risk. The Fund may invest without limit in debt instruments that are, at the time of purchase, rated below investment grade or unrated but determined by AllianzGI U.S. to be of comparable quality, and may invest without limit in securities of any rating.

In general, lower rated debt securities carry a greater degree of risk that the issuer will lose its ability to make interest and principal payments, which could have a negative effect on the Fund's ability to pay dividends on the Cumulative Preferred Shares. Securities of below investment grade quality are regarded as having predominantly speculative characteristics with respect to capacity to pay interest and repay principal, and are commonly referred to as high yield securities or junk bonds. High yield securities involve a greater risk of default and their prices are generally more volatile and sensitive to actual or perceived negative developments, such as a decline in the issuer's revenues or revenues of underlying borrowers or a general economic downturn, than are the prices of higher grade securities. Debt securities in the lowest investment grade category also may be considered to possess some speculative characteristics by certain rating agencies. The Fund may purchase distressed securities that are in default or the issuers of which are in bankruptcy, which involve heightened risks. See Principal Risks of the Fund Distressed and Defaulted Securities Risk. An economic downturn could severely affect the ability of issuers (particularly those that are highly leveraged) to service their debt obligations or to repay their obligations upon maturity. Lower-rated securities are generally less liquid than higher-rated securities, which may have an adverse effect on the Fund's ability to dispose of a particular security. For example, under adverse market or economic conditions, the secondary market for below investment grade securities could contract further, independent of any specific adverse changes in the condition of a particular issuer, and certain securities in the Fund's portfolio may become illiquid or less liquid. As a result, the Fund could find it more difficult to sell these securities or may be able to sell these securities only at prices lower than if such securities were widely traded. See Principal Risks of the Fund Liquidity Risk. To the extent the Fund invests in below investment grade debt obligations, AllianzGI U.S.'s capabilities in analyzing credit quality and associated risks will be particularly important, and there can be no assurance that AllianzGI U.S. will be successful in this regard. See Portfolio Contents High Yield Securities (Junk Bonds) for additional information. Due to the risks involved in investing in high yield securities, an investment in the Fund should be considered speculative. The debt instruments of many non-U.S. governments, including their agencies, sub-divisions and instrumentalities, are below investment grade, and are therefore considered high yield instruments.

Table of Contents

The Fund's credit quality policies, if any, apply only at the time of investment, and the Fund is not required to dispose of a security in the event that a rating agency or AllianzGI U.S. downgrades its assessment of the credit characteristics of a particular issue. In determining whether to retain or sell a security that has experienced a change in credit rating, AllianzGI U.S. may consider factors including, but not limited to, AllianzGI U.S.'s assessment of the credit quality of the issuer of such security, the price at which such security could be sold and the rating, if any, assigned to such security by other rating agencies. Analysis of creditworthiness may be more complex for issuers of high yield securities than for issuers of higher quality debt securities. For purposes of applying the Fund's credit-quality policies, in the case of securities with split ratings (*i.e.*, a security receiving two different ratings from two different rating agencies), the Fund will apply the higher of the applicable ratings.

Distressed and Defaulted Securities Risk. The Fund may invest in the debt securities of financially distressed issuers, including those that are in default or the issuers of which are in bankruptcy. Investments in the securities of financially distressed issuers involve substantial risks. These securities may present a substantial risk of default or may be in default at the time of investment. The Fund may incur additional expenses to the extent it is required to seek recovery upon a default in the payment of principal or interest on its portfolio holdings. In any reorganization or liquidation proceeding relating to an investment, the Fund may lose its entire investment or may be required to accept cash or securities with a value substantially less than its original investment. Among the risks inherent in investments in a troubled issuer is that it frequently may be difficult to obtain information as to the true financial condition of such issuer. AllianzGI U.S.'s judgments about the credit quality of a financially distressed issuer and the relative value of its securities may prove to be wrong.

Interest Rate Risk. Generally, when market interest rates rise, the prices of debt obligations fall, and vice versa. Interest rate risk is the risk that debt obligations and other instruments in the Fund's portfolio will decline in value because of increases in market interest rates. The prices of long-term debt obligations generally fluctuate more than prices of short-term debt obligations as interest rates change. During periods of rising interest rates, the average life of certain types of securities may be extended due to lower than expected rates of prepayments, which could cause the securities' durations to extend and expose the securities to more price volatility. This may lock in a below market yield, increase the security's duration and reduce the security's value. In addition to directly affecting debt securities, rising interest rates may also have an adverse effect on the value of any equity securities held by the Fund. The Fund's use of leverage will tend to increase interest rate risk. AllianzGI U.S. may utilize certain strategies, including without limitation investments in structured notes or interest rate futures contracts or swap, cap, floor or collar transactions, for the purpose of reducing the interest rate sensitivity of

Table of Contents

the Fund's portfolio, although there is no assurance that it will do so or that, if used, such strategies will be successful.

The Fund may invest in variable- and floating-rate debt instruments, which generally are less sensitive to interest rate changes than longer duration fixed-rate instruments, but may decline in value in response to rising interest rates if, for example, the rates at which they pay interest do not rise as much, or as quickly, as market interest rates in general. Conversely, variable- and floating-rate instruments generally will not increase in value if interest rates decline. The Fund also may invest in inverse floating-rate debt securities, which may decrease in value if interest rates increase, and which also may exhibit greater price volatility than fixed-rate debt obligations with similar credit quality. To the extent the Fund holds variable- or floating-rate instruments, a decrease (or, in the case of inverse floating-rate securities, an increase) in market interest rates will adversely affect the income received from such securities and may have a negative effect on the Fund's ability to pay dividends on the Cumulative Preferred Shares.

Equity Securities and Related Market Risk. The Fund will often have substantial exposure to equity securities by virtue of the equity component of the convertible securities in which the Fund invests. The Fund may also hold equity securities in its portfolio upon conversion of a convertible security or through direct investments in preferred stocks. The market price of common stocks and other equity securities may go up or down, sometimes rapidly or unpredictably. Equity securities may decline in value due to factors affecting equity securities markets generally, particular industries represented in those markets, or the issuer itself. See *Principal Risks of the Fund - Issuer Risk*. The values of equity securities may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. They may also decline due to factors which affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry. Equity securities generally have greater price volatility than bonds and other debt securities.

Preferred Securities Risk. In addition to equity securities risk (see *Principal Risks of the Fund - Equity Securities and Related Market Risk*), credit risk (see *Principal Risks of the Fund - Credit Risk*) and possibly high yield risk (see *Principal Risks of the Fund - High Yield Securities Risk*), investment in preferred securities involves certain other risks. Certain preferred securities contain provisions that allow an issuer under certain conditions to skip or defer distributions. If the Fund owns a preferred security that is deferring its distribution, the Fund may be required to include the amount of the deferred distribution in its taxable income for tax purposes despite the fact that it does not

Table of Contents

currently receive such amount. In order to receive the special treatment accorded to regulated investment companies (RICs) and their shareholders under the Internal Revenue Code of 1986, as amended (the Code), and to avoid U.S. federal income and/or excise taxes at the Fund level, the Fund may be required to distribute this income to shareholders in the tax year in which the income is recognized (without a corresponding receipt of cash). Therefore, the Fund may be required to pay out as an income distribution in any such tax year an amount greater than the total amount of cash income the Fund actually received, and to sell portfolio securities, including at potentially disadvantageous times or prices, to obtain cash needed for these income distributions. Preferred securities often are subject to legal provisions that allow for redemption in the event of certain tax or legal changes or at the issuer's call. In the event of redemption, the Fund may not be able to reinvest the proceeds at comparable rates of return. Preferred securities are subordinated to bonds and other debt securities in an issuer's capital structure in terms of priority for corporate income and liquidation payments, and therefore will be subject to greater credit risk than those debt securities. Preferred securities may trade less frequently and in a more limited volume and may be subject to more abrupt or erratic price movements than many other securities, such as common stocks, corporate debt securities and U.S. Government securities. The Fund may invest in convertible preferred securities, which are subject to the same risks as convertible securities generally. See *Principal Risks of the Fund* Convertible Securities Risk. In addition, convertible preferred securities may generate lower rates of income than other preferred securities, and the conversion option of a convertible preferred security may cause it to trade more like an equity security than a typical debt instrument.

Some preferred securities allow holders to convert the preferred securities into common stock of the issuer causing their market price to be sensitive to changes in the value of the issuer's common stock and, therefore, declining common stock values may also cause the value of a Fund's investments to decline. Preferred securities often have call features which allow the issuer to redeem the security at its discretion. The redemption of a preferred security having a higher than average yield may cause a decrease in the Fund's yield. Certain preferred securities may be substantially less liquid than many other securities, such as common stocks or U.S. Government securities.

Leverage Risk. The Fund's use of leverage (as described under *Use of Leverage* in the body of this prospectus) creates special risks. To the extent used, there is no assurance that the Fund's Preferred Shares or any other leverage strategies will be successful. Leverage is a speculative technique that may expose the Fund to greater risk and increased costs. The Fund's assets attributable to Cumulative Preferred Shares, its outstanding ARPS, any future Preferred Shares that are issued or the net proceeds the Fund obtains from its use of securities loans, reverse repurchase agreements, dollar rolls and/or borrowings, if any, will be invested in accordance with the Fund's

Table of Contents

investment objective and policies as described in this prospectus. Dividends payable with respect to the ARPS and interest expense payable by the Fund with respect to any reverse repurchase agreements, dollar rolls and borrowings will generally be based on shorter-term interest rates that would be periodically reset. So long as the Fund's portfolio investments provide a higher rate of return (net of applicable Fund expenses) than the dividend rates on the Preferred Shares and the interest expenses and other costs to the Fund of such other leverage, the investment of the proceeds thereof will generate more income than will be needed to pay the costs of the leverage. If, however, the dividends, interest and/or other costs to the Fund of leverage (including the dividend rates on the Preferred Shares and interest expenses on any reverse repurchase agreements, dollar rolls and borrowings) exceed the rate of return on the debt obligations and other investments held by the Fund, the Fund's net asset value will be adversely affected. Therefore, there can be no assurance that the Fund's use of leverage will result in a higher net asset value than if the Fund did not use leverage. In addition, the Preferred Shares pay cumulative dividends, which may tend to increase leverage risk. All other things being equal, extensive use of leverage by the Fund tends to increase the risk that the Fund may not be able to service its indebtedness, pay dividends to holders of Preferred Shares or satisfy ongoing financial maintenance tests associated with the ARPS and Cumulative Preferred Shares.

In addition, bank borrowings and similar forms of indebtedness generally have priority of payment over the Preferred Shares.

The use by the Fund of securities loans, reverse repurchase agreements and dollar rolls, if any, to obtain leverage also involves special risks. For instance, the market value of the securities that the Fund is obligated to repurchase under a reverse repurchase agreement or dollar roll may decline below the repurchase price. See [Portfolio Contents](#) Reverse Repurchase Agreements and Dollar Rolls.

In addition to the Preferred Shares, securities loans, reverse repurchase agreements, dollar rolls and/or borrowings (or a future issuance of preferred shares), the Fund may engage in other transactions that may give rise to a form of leverage including, among others, futures and forward contracts, credit default swaps, total return swaps and other derivative transactions, short sales and when-issued, delayed delivery and forward commitment transactions). The Fund's use of such transactions give rise to associated leverage risks described above, and may adversely affect the Fund's income, net asset value and ability to pay dividends on its Preferred Shares. The Fund manages some of its derivative positions by segregating an amount of cash or liquid securities equal to the face value or the market value, as applicable, of those positions. The Fund may also offset derivatives positions against one another or against other assets to manage effective market exposure resulting from derivatives in its portfolio. To the extent that any offsetting positions do not behave in relation to one another as

Table of Contents

expected, the Fund may perform as if it is leveraged through use of these derivative strategies. See Use of Leverage.

Among other negative consequences, any decline in the net asset value of the Fund's investments could result in the Fund being in danger of failing to meet its asset coverage requirements or of the Cumulative Preferred Shares being downgraded by the rating agency then rating the Cumulative Preferred Shares. In an extreme case, the Fund's current investment income might not be sufficient to meet the dividend requirements on the Cumulative Preferred Shares. In order to address these types of events, the Fund might need to liquidate investments in order to fund a redemption of some or all of the Cumulative Preferred Shares. Liquidation at times of adverse economic conditions may result in a loss to the Fund.

Because the fees received by the Investment Manager are based on the total managed assets of the Fund (including any assets attributable to any preferred shares or other forms of leverage of the Fund that may be outstanding), the Investment Manager has a financial incentive for the Fund to use certain forms of leverage (e.g., preferred shares, securities loans, reverse repurchase agreements and other borrowings), potentially increasing the risk that the Fund may not be able to service its indebtedness, pay dividends to holders of Preferred Shares or satisfy ongoing financial maintenance tests associated with the ARPS and Cumulative Preferred Shares.

Risks Associated with the ARPS. Although the Fund's ARPS ordinarily would pay dividends at rates set at periodic auctions, the weekly auctions for the ARPS (and auctions for similar preferred shares issued by closed-end funds in the U.S.) have failed since February 2008. The dividend rates on the ARPS since that time have been paid, and the Fund expects that they will continue to be paid for the foreseeable future, at the maximum applicable rate under the Fund's Bylaws (i.e., a multiple of a reference rate, which is the applicable AA Financial Composite Commercial Paper Rate (for a dividend period of fewer than 184 days) or the applicable Treasury Index Rate (for a dividend period of 184 days or more)). An increase in market interest rates generally, therefore, could increase substantially the dividend rate required to be paid by the Fund to the holders of ARPS, which would increase the expenses associated with the Fund's leverage and increase the risk that the Fund would be unable to pay dividends on its Preferred Shares or satisfy ongoing financial maintenance tests associated with the ARPS and Cumulative Preferred Shares.

In addition, the multiple used to calculate the maximum applicable rate is based in part on the credit rating assigned to the ARPS by the applicable rating agency (currently, Moody's and Fitch), with the multiple generally increasing as the ratings decline. As of the date hereof, the Fund's ARPS have a Moody's rating of Aa3 and a Fitch rating of AAA, meaning the multiple used to calculate the maximum applicable rate is 150%, subject to upward adjustment in the event of

Table of Contents

downgrade. See Use of Leverage and Description of Capital Structure. The ARPS could be subject to ratings downgrades in the future, possibly resulting in further increases to the maximum applicable rate.

Therefore, it is possible that a substantial rise in market interest rates and/or ratings downgrades of the ARPS could make the Fund's continued use of Preferred Shares for leverage purposes less attractive than such use is currently considered to be. In such case, the Fund may elect to redeem some or all of the Preferred Shares outstanding, which may require it to dispose of investments at inopportune times and to incur losses on such dispositions. Such dispositions may adversely affect the Fund's investment performance generally.

The Fund is also subject to certain asset coverage tests associated with the rating agencies that rate the ARPS currently Moody's and Fitch. Failure by the Fund to maintain the asset coverages (or to cure such failure in a timely manner) may require the Fund to redeem ARPS. See Description of Capital Structure. Failure to satisfy ratings agency asset coverage tests or other guidelines could also result in the applicable ratings agencies downgrading their then-current ratings on the ARPS, as described above. Moreover, the rating agency guidelines impose restrictions or limitations on the Fund's use of certain financial instruments or investment techniques that the Fund might otherwise utilize in order to achieve its investment objective, which may adversely affect the Fund's investment performance. Rating agency guidelines may be modified by the rating agencies in the future and, if adopted by the Fund, such modifications may make such guidelines substantially more restrictive, which could further negatively affect the Fund's investment performance.

Liquidity Risk. The Fund may invest up to 5% of its total assets in securities which are illiquid at the time of investment (*i.e.*, securities that cannot be disposed of within seven days in the ordinary course of business at approximately the value at which the Fund has valued the securities). Illiquid securities may trade at a discount from comparable, more liquid investments, and may be subject to wide fluctuations in market value. Illiquid securities may be subject to legal or contractual restrictions on disposition or may lack an established secondary trading market. The sale of restricted and illiquid securities often requires more time and results in higher brokerage charges or dealer discounts and other selling expenses than does the sale of securities eligible for trading on national securities exchanges or in the over-the-counter markets. The Fund may not be able to dispose readily of illiquid securities when that would be beneficial at a favorable time or price or at prices approximating those at which the Fund then values them. Further, the lack of an established secondary market for illiquid securities may make it more difficult to value such securities, which may negatively affect the price the Fund would receive upon disposition of such securities. See Principal Risks of the Fund Valuation Risk. In addition, certain

Table of Contents

derivative instruments, especially when traded in large amounts, may not be liquid in all circumstances, so that in volatile markets the Fund may not be able to close out a position without incurring a loss.

Foreign (Non-U.S.) Investment Risk. The Fund may invest up to 20% of its total assets in U.S. dollar-denominated securities of foreign issuers based in developed countries. The Fund's investments in and exposure to foreign securities involve special risks. For example, the value of these investments may decline in response to unfavorable political and legal developments, unreliable or untimely information or economic and financial instability. Foreign securities may experience more rapid and extreme changes in value than investments in securities of U.S. issuers. The securities markets of many foreign countries are relatively small, with a limited number of companies representing a small number of industries. Issuers of foreign securities are usually not subject to the same degree of regulation as U.S. issuers. Reporting, accounting, auditing and custody standards of foreign countries differ, in some cases significantly, from U.S. standards. Also, nationalization, expropriation or other confiscation, currency blockage, political changes or diplomatic developments could adversely affect the Fund's investments in foreign securities. In the event of nationalization, expropriation or other confiscation, the Fund could lose its entire investment in foreign securities. To the extent that the Fund invests a significant portion of its assets in a particular foreign country or a concentrated geographic area (such as Asia or South America), the Fund will generally have more exposure to regional economic risks associated with foreign investments. Also, adverse conditions in a certain region can adversely affect securities from other countries whose economies appear to be unrelated. The costs of investing in foreign countries frequently are higher than the costs of investing in the United States. Foreign countries may impose taxes on income from or transactions in foreign securities, thereby reducing the Fund's return on such securities. The increased expense of investing in foreign markets reduces the amount the Fund can earn on its investments and typically results in a higher operating expense ratio for the Fund than for investment companies invested only in the United States.

Smaller Company Risk. The general risks associated with debt instruments or equity securities are particularly pronounced for securities issued by companies with small market capitalizations. Small capitalization companies involve certain special risks. They are more likely than larger companies to have limited product lines, markets or financial resources, or to depend on a small, inexperienced management group. Securities of smaller companies may trade less frequently and in lesser volume than more widely held securities and their values may fluctuate more sharply than other securities. They may also have limited liquidity. These securities may therefore be more vulnerable to adverse developments than securities of larger companies, and the Fund may have difficulty purchasing or selling securities positions in smaller companies at prevailing market prices.

Table of Contents

Also, there may be less publicly available information about smaller companies or less market interest in their securities as compared to larger companies. Companies with medium-sized market capitalizations may have risks similar to those of smaller companies.

Derivatives Risk. The Fund may utilize various derivative strategies (both long and short positions) for investment or risk management purposes, as well as to leverage its portfolio. These may include derivatives used as a component of a synthetic convertible security or to gain exposure to high yield securities and other securities in which the Fund may invest (*e.g.*, pending investment of the proceeds of an offering). See Principal Risks of the Fund Leverage Risk. Derivatives transactions that the Fund may utilize include, but are not limited to, purchases or sales of futures and forward contracts, call and put options, credit default swaps, total return swaps, basis swaps and other swap agreements. The Fund may also have exposure to derivatives, such as interest rate or credit-default swaps, through investment in credit-linked trust certificates and other securities issued by special purpose or structured vehicles. The Fund's use of derivative instruments involves risks different from, and possibly greater than, the risks associated with investing directly in securities and other traditional investments. Derivatives are subject to a number of risks described elsewhere in this prospectus, such as liquidity risk, interest rate risk, issuer risk, credit risk, leveraging risk, counterparty risk, management risk and, if applicable, smaller company risk. They also involve the risk of mispricing or improper valuation, the risk of unfavorable or ambiguous documentation and the risk that changes in the value of the derivative may not correlate perfectly with the underlying asset, rate or index. If the Fund invests in a derivative instrument, it could lose more than the principal amount invested. Also, suitable derivative transactions may not be available in all circumstances and there can be no assurance that the Fund will engage in these transactions to reduce exposure to other risks when that would be beneficial.

Counterparty Risk. The Fund will be subject to credit risk with respect to the counterparties to the derivative contracts and other instruments entered into by the Fund or held by special purpose or structured vehicles in which the Fund invests. In the event that the Fund enters into a derivative transaction with a counterparty that subsequently becomes insolvent or becomes the subject of a bankruptcy case, the derivative transaction may be terminated in accordance with its terms and the Fund's ability to realize its rights under the derivative instrument and its ability to distribute the proceeds could be adversely affected. If a counterparty becomes bankrupt or otherwise fails to perform its obligations under a derivative contract due to financial difficulties, the Fund may experience significant delays in obtaining any recovery (including recovery of any collateral it has provided to the counterparty) in a dissolution, assignment for the benefit of creditors, liquidation, winding-up, bankruptcy, or other analogous proceeding. In addition,

Table of Contents

in the event of the insolvency of a counterparty to a derivative transaction, the derivative transaction would typically be terminated at its fair market value. If the Fund is owed this fair market value in the termination of the derivative transaction and its claim is unsecured, the Fund will be treated as a general creditor of such counterparty, and will not have any claim with respect to any underlying security or asset. The Fund may obtain only a limited recovery or may obtain no recovery in such circumstances.

Reinvestment Risk. Income from the Fund's portfolio will decline if and when the Fund invests the proceeds from matured, traded or called debt obligations at market interest rates that are below the portfolio's current earnings rate. For instance, during periods of declining interest rates, an issuer of debt obligations may exercise an option to redeem securities prior to maturity, forcing the Fund to invest in lower-yielding securities. The Fund also may choose to sell higher yielding portfolio securities and to purchase lower yielding securities to achieve greater portfolio diversification, because the portfolio managers believe the current holdings are overvalued or for other investment-related reasons.

Real Estate Risk. To the extent that the Fund invests in real estate related investments, including REITs or real-estate linked derivative instruments, it will be subject to the risks associated with owning real estate and with the real estate industry generally. These include difficulties in valuing and disposing of real estate, the possibility of declines in the value of real estate, risks related to general and local economic conditions, the possibility of adverse changes in the climate for real estate, environmental liability risks, the risk of increases in property taxes and operating expenses, possible adverse changes in zoning laws, the risk of casualty or condemnation losses, limitations on rents, the possibility of adverse changes in interest rates and in the credit markets and the possibility of borrowers paying off mortgages sooner than expected, which may lead to reinvestment of assets at lower prevailing interest rates. The value of investments in the real estate sector also may be affected by macroeconomic developments, and social and economic trends. To the extent that the Fund invests in REITs, it will also be subject to the risk that a REIT may default on its obligations or go bankrupt.

Mortgage-Related and Other Asset-Backed Securities Risk. The Fund may invest in a variety of mortgage-related and other asset-backed securities issued by government agencies or other governmental entities or by private originators or issuers. Generally, rising interest rates tend to extend the duration of fixed-rate mortgage-related securities, making them more sensitive to changes in interest rates. As a result, in a period of rising interest rates, the Fund may exhibit additional volatility. This is known as extension risk. In addition, adjustable and fixed-rate mortgage-related securities may involve special risks relating to unanticipated rates of prepayment on the mortgages underlying the securities. This is known as prepayment risk. When interest rates decline, borrowers may pay off their

Table of Contents

mortgages sooner than expected. This can reduce the returns of the Fund because the Fund may have to reinvest that money at the lower prevailing interest rates. The Fund's investments in other asset-backed securities are subject to risks similar to those associated with mortgage-related securities, as well as additional risks associated with the nature of the assets and the servicing of those assets.

Inflation/Deflation Risk. Inflation risk is the risk that the value of assets or income from the Fund's investments will be worth less in the future as inflation decreases the value of payments at future dates. As inflation increases, the real value of the Fund's portfolio could decline. Deflation risk is the risk that prices throughout the economy decline over time. Deflation may have an adverse effect on the creditworthiness of issuers and may make issuer default more likely, which may result in a decline in the value of the Fund's portfolio.

Management Risk. The Fund is subject to management risk because it is an actively managed portfolio. AllianzGI U.S. and the portfolio managers will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these decisions will produce the desired results.

Loan Participations and Assignments Risk. The Fund may invest in fixed and floating rate loans arranged through private negotiations between an issuer and one or more financial institutions, which may be in the form of participations in loans or assignments of all or a portion of loans from third parties. In connection with purchasing loan participations, the Fund generally will have no right to enforce compliance by the borrower with the terms of the loan agreement relating to the loan, nor any rights of set-off against the borrower, and the Fund may not directly benefit from any collateral supporting the loan in which it has purchased the loan participation. As a result, the Fund may be subject to the credit risk of both the borrower and the lender that is selling the participation. In the event of the insolvency of the lender selling a participation, the Fund may be treated as a general creditor of the lender and may not benefit from any set-off between the lender and the borrower. Certain loan participations may be structured in a manner designed to prevent purchasers of participations from being subject to the credit risk of the lender with respect to the participation, but even under such a structure, in the event of the lender's insolvency, the lender's servicing of the participation may be delayed and the assignability of the participation impaired.

The Fund may have difficulty disposing of loans and loan participations because to do so it will have to assign or sell such securities to a third party. Because there is no liquid market for many such securities, the Fund anticipates that such securities could be sold only to a limited number of institutional investors. The lack of a liquid secondary market may have an adverse impact on the value of such securities and the Fund's ability to dispose of particular loans and loan participations when that would be desirable, including in response to a specific economic event such as a deterioration in the

Table of Contents

creditworthiness of the borrower. The lack of a liquid secondary market for loans and loan participations also may make it more difficult for the Fund to assign a value to these securities for purposes of valuing the Fund's portfolio.

U.S. Government Securities Risk. The Fund may invest in debt securities issued or guaranteed by agencies, instrumentalities and sponsored enterprises of the U.S. Government. Some U.S. Government securities, such as U.S. Treasury bills, notes and bonds, and mortgage-related securities guaranteed by the Government National Mortgage Association (GNMA), are supported by the full faith and credit of the United States; others, such as those of the Federal Home Loan Banks or the Federal Home Loan Mortgage Corporation (FHLMC), are supported by the right of the issuer to borrow from the U.S. Treasury; others, such as those of the Federal National Mortgage Association (FNMA), are supported by the discretionary authority of the U.S. Government to purchase the agency's obligations; and still others, such as those of the Student Loan Marketing Association, are supported only by the credit of the issuing agency, instrumentality or enterprise. Although U.S. Government-sponsored enterprises, such as the Federal Home Loan Banks, FHLMC, FNMA and the Student Loan Marketing Association, may be chartered or sponsored by Congress, they are not funded by Congressional appropriations, and their securities are not issued by the U.S. Treasury or supported by the full faith and credit of the U.S. Government and involve increased credit risks. Although legislation has been enacted to support certain government sponsored entities, including the Federal Home Loan Banks, FHLMC and FNMA, there is no assurance that the obligations of such entities will be satisfied in full, or that such obligations will not decrease in value or default. It is difficult, if not impossible, to predict the future political, regulatory or economic changes that could impact the government sponsored entities and the values of their related securities or obligations. In addition, certain governmental entities, including FNMA and FHLMC, have been subject to regulatory scrutiny regarding their accounting policies and practices and other concerns that may result in legislation, changes in regulatory oversight and/or other consequences that could adversely affect the credit quality, availability or investment character of securities issued by these entities. See "Investment Objective and Policies - Mortgage-Related and Other Asset-Backed Securities" in the Statement of Additional Information.

U.S. Government debt securities generally involve lower levels of credit risk than other types of debt securities of similar maturities, although, as a result, the yields available from U.S. Government debt securities are generally lower than the yields available from such other securities. Like other debt securities, the values of U.S. Government securities change as interest rates fluctuate. Fluctuations in the value of portfolio securities will not affect interest income on existing portfolio securities but will be reflected in the Fund's net asset value.

Table of Contents

Foreign (non-U.S.) Government Securities Risk. The Fund's investments in debt obligations of foreign (non-U.S.) governments or their sub-divisions, agencies and government sponsored enterprises and obligations of international agencies and supranational entities (together Foreign Government Securities) can involve a high degree of risk. The foreign governmental entity that controls the repayment of debt may not be able or willing to repay the principal and/or interest when due in accordance with the terms of such debt. A governmental entity's willingness or ability to repay principal and interest due in a timely manner may be affected by, among other factors, its cash flow situation, the extent of its foreign reserves, the availability of sufficient foreign exchange on the date a payment is due, the relative size of the debt service burden to the economy as a whole, the governmental entity's policy towards the International Monetary Fund and the political constraints to which a governmental entity may be subject. Foreign governmental entities also may be dependent on expected disbursements from other governments, multilateral agencies and others abroad to reduce principal and interest arrearages on their debt. The commitment on the part of these governments, agencies and others to make such disbursements may be conditioned on the implementation of economic reforms and/or economic performance and the timely service of such debtor's obligations. Failure to implement such reforms, achieve such levels of economic performance or repay principal or interest when due may result in the cancellation of such third parties' commitments to lend funds to the foreign governmental entity, which may further impair such debtor's ability or willingness to timely service its debts. Consequently, foreign governmental entities may default on their debt. Holders of Foreign Government Securities may be requested to participate in the rescheduling of such debt and to extend further loans to governmental entities. In the event of a default by a governmental entity, there may be few or no effective legal remedies for collecting on such debt.

Other Investment Companies Risk. The Fund may invest in securities of other open- or closed-end investment companies, including without limitation ETFs, to the extent that such investments are consistent with the Fund's investment objective and policies and permissible under the 1940 Act. As a shareholder in an investment company, the Fund will bear its ratable share of that investment company's expenses, and would remain subject to payment of the Fund's investment management fees with respect to the assets so invested. In addition, these other investment companies may utilize leverage, in which case an investment would subject the Fund to additional risks associated with leverage. See Principal Risks of the Fund Leverage Risk.

Private Placements Risk. A private placement involves the sale of securities that have not been registered under the Securities Act, or relevant provisions of applicable non-U.S. law, to certain institutional and qualified individual purchasers, such as the Fund. In addition to the general risks to which all securities are subject, securities received

Table of Contents

in a private placement generally are subject to strict restrictions on resale, and there may be no liquid secondary market or ready purchaser for such securities, and a liquid secondary market may never develop. See *Principal Risks of the Fund Liquidity Risk*. Therefore, the Fund may be unable to dispose of such securities when it desires to do so, or at the most favorable time or price. Private placements may also raise valuation risks. See *Principal Risks of the Fund Valuation Risk*.

Senior Debt Risk. Because it may invest in below-investment grade senior debt, the Fund may be subject to greater levels of credit risk than funds that do not invest in such debt. The Fund may also be subject to greater levels of liquidity risk than funds that do not invest in senior debt. Restrictions on transfers in loan agreements, a lack of publicly available information and other factors may, in certain instances, make senior debt more difficult to sell at an advantageous time or price than other types of securities or instruments. Additionally, if the issuer of senior debt prepays, the Fund will have to consider reinvesting the proceeds in other senior debt or similar instruments that may pay lower interest rates.

Valuation Risk. When market quotations are not readily available or are deemed to be unreliable, the Fund values its investments at fair value as determined in good faith pursuant to policies and procedures approved by the Board of Trustees of the Fund. See *Net Asset Value*. Fair value pricing may require subjective determinations about the value of a security or other asset. As a result, there can be no assurance that fair value pricing will result in adjustments to the prices of securities or other assets, or that fair value pricing will reflect actual market value, and it is possible that the fair value determined for a security or other asset will be materially different from quoted or published prices, from the prices used by others for the same security or other asset and/or from the value that actually could be or is realized upon the sale of that security or other asset.

Confidential Information Access Risk. In managing the Fund, AllianzGI U.S. may from time to time have the opportunity to receive material, non-public information (*Confidential Information*) about the issuers of certain investments, including, without limitation, senior floating rate loans, other bank loans and related investments being considered for acquisition by the Fund or held in the Fund's portfolio. For example, a bank issuer of privately placed senior floating rate loans considered by the Fund may offer to provide AllianzGI U.S. with financial information and related documentation regarding the bank issuer that is not publicly available. Pursuant to applicable policies and procedures, AllianzGI U.S. may (but is not required to) seek to avoid receipt of Confidential Information from the issuer so as to avoid possible restrictions on its ability to purchase and sell investments on behalf of the Fund and other clients to which such Confidential Information relates (e.g., other securities issued by the bank used in the example above). In such circumstances, the Fund

Table of Contents

(and other AllianzGI U.S. clients) may be disadvantaged in comparison to other investors, including with respect to the price the Fund pays or receives when it buys or sells an investment. Further, AllianzGI U.S. and the Fund's abilities to assess the desirability of proposed consents, waivers or amendments with respect to certain investments may be compromised if they are not privy to available Confidential Information. AllianzGI U.S. may also determine to receive such Confidential Information in certain circumstances under its applicable policies and procedures. If AllianzGI U.S. intentionally or unintentionally comes into possession of Confidential Information, it may be unable, potentially for a substantial period of time, to purchase or sell investments to which such Confidential Information relates.

Risk of Regulatory Changes. To the extent that legislation or national or sub-national bank or other regulators in the U.S. or relevant foreign jurisdiction impose additional requirements or restrictions on the ability of certain financial institutions to make loans, particularly in connection with highly leveraged transactions, the availability of investments sought after by the Fund may be reduced. Further, such legislation or regulation could depress the market value of investments held by the Fund. Additionally, legislative, regulatory or tax developments may affect the investment techniques available to the Investment Manager and the portfolio managers in connection with managing the Fund and may also adversely affect the ability of the Fund to achieve its investment objective. The SEC has also proposed a new rule related to certain aspects of derivatives use. As of the date for this prospectus, whether, when and in what form this proposed rule will be adopted and its potential effects on the Fund are unclear.

Regulatory Risk - Commodity Pool Operator. The CFTC has adopted certain regulatory changes that subject registered investment companies and their investment advisers to regulation by the CFTC if the registered investment company invests more than a prescribed level of its liquidation value in commodity futures, options on commodities or commodity futures, swaps, or other financial instruments (commodity interests) regulated under the Commodity Exchange Act of 1936, as amended (the CEA), or if the fund markets itself as providing investment exposure to such instruments. In connection with these regulatory changes, the Investment Manager has registered with the National Futures Association as a commodity pool operator (CPO) under the CEA with respect to certain funds it manages and has also registered as a commodity trading adviser (CTA). The Investment Manager has claimed an exclusion from CPO registration pursuant to CFTC Rule 4.5 with respect to the Fund. To remain eligible for this exclusion, the Fund must comply with certain limitations, including limits on its ability to use any commodity interests and limits on the manner in which the Fund holds out its use of such commodity interests. These limitations may restrict the Fund's ability to pursue its investment objective and

Table of Contents

strategies, increase the costs of implementing its strategies, result in higher expenses for the Fund, and/or adversely affect the Fund's investment returns. Further, in the event the Investment Manager becomes unable to rely on the exclusion in Rule 4.5 with respect to the Fund, the Fund will be subject to additional regulation and its expenses may increase.

Risk of Adverse Economic Conditions. The debt and equity capital markets in the United States and in foreign countries in the recent past were negatively affected by significant write-offs in the banking and financial services sectors relating to subprime mortgages and the re-pricing of credit risk in the broadly syndicated market, among other things. These events, along with the deterioration of housing markets, the failure of banking and other major financial institutions and resulting governmental actions led to worsening general economic conditions, which materially and adversely affected the broader financial and credit markets and reduced the availability of debt and equity capital for the market as a whole and financial firms in particular. These developments may have increased the volatility of the value of securities owned by the Fund, and also may have made it more difficult for the Fund to accurately value securities or to sell securities on a timely basis. These developments adversely affected the broader global economy, and, if repeated, would continue to do so, which in turn may adversely affect the ability of issuers of securities owned by the Fund to make payments of principal and interest when due, lead to lower credit ratings and increase the rate of defaults. In turn, this could make it more difficult for the Fund to make dividend payments with respect to the Cumulative Preferred Shares.

The instability in the financial markets discussed above led the U.S. and certain foreign governments to take a number of unprecedented actions designed to support certain banking and other financial institutions and segments of the financial markets that have experienced extreme volatility, and in some cases a lack of liquidity. Federal, state and other governments and their regulatory agencies or self-regulatory organizations may take actions that affect the regulation of the instruments in which the Fund invests, or the issuers of such instruments, in ways that are unforeseeable or not fully understood or anticipated. See *Principal Risks of the Fund* *Risk of Regulatory Changes*.

The implications of government ownership and disposition of these assets are unclear, and such programs may have positive or negative effects on the liquidity, valuation and performance of the Fund's portfolio holdings. Governments or their agencies have and may in the future acquire distressed assets from financial institutions and acquire ownership interests in those institutions.

U.S. legislation or regulation may also change the way in which the Fund itself is regulated. Such legislation or regulation could limit or

Table of Contents

preclude the Fund's ability to achieve its investment objective. See Principal Risks of the Fund Risk of Regulatory Changes.

Potential Conflicts of Interest Risk Allocation of Investment Opportunities. The Investment Manager is involved worldwide with a broad spectrum of financial services and asset management activities and may engage in the ordinary course of business in activities in which their interests or the interests of their clients may conflict with those of the Fund. The Investment Manager may provide investment management services to other funds and discretionary managed accounts that follow an investment program similar to that of the Fund. Subject to the requirements of the 1940 Act, the Investment Manager intends to engage in such activities and may receive compensation from third parties for their services. The results of the Fund's investment activities may differ from those of the Fund's affiliates, or another account managed by the Fund's affiliates, and it is possible that the Fund could sustain losses during periods in which one or more of the Fund's affiliates and/or other accounts achieve profits on their trading for proprietary or other accounts.

Market Disruption and Geopolitical Risk. The wars with Iraq and Afghanistan and similar conflicts and geopolitical developments, their aftermath and substantial military presence in Afghanistan, along with instability in Pakistan, Egypt, Libya, Syria, Russia, Ukraine, Yemen and the Middle East, possible terrorist attacks in the United States and around the world, social and political discord in the United States, the European debt crisis, the response of the international community through economic sanctions and otherwise to Russia's annexation of the Crimea region of Ukraine and posture vis-a-vis Ukraine, downgrade of U.S. Government securities, the outbreak of infectious diseases such as Ebola and other similar events may have long-term effects on the U.S. and worldwide financial markets and may cause further economic uncertainties in the United States and worldwide. The potential costs of rebuilding infrastructure cannot be predicted with any certainty. Terrorist attacks on the World Trade Center and the Pentagon on September 11, 2001 closed some of the U.S. securities markets for a four-day period and similar future events cannot be ruled out. The uncertainty surrounding the sovereign debt of a significant number of European Union countries, as well as the status of the Euro, the European Monetary Union and the European Union itself, has disrupted and may continue to disrupt markets in the U.S. and around the world. The risks associated with investments in Europe may be heightened due to the approval by citizens of the United Kingdom, in June 2016, of a referendum to leave the European Union. Significant uncertainty remains in the market regarding the ramifications of that development, and the range and potential implications of possible political, regulatory, economic and market outcomes are difficult to predict. If the United Kingdom's exit from the European Union is consummated, or if one or more additional countries leave the European Union, or the European Union partially or completely dissolves, the world's securities

Table of Contents

markets may be significantly disrupted and adversely affected. Substantial government interventions (e.g., currency controls) also could negatively impact the Fund. War, terrorism, economic uncertainty, and related geopolitical events have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on U.S. and world economies and markets generally. Likewise, natural and environmental disasters, such as the earthquake and tsunami in Japan in early 2011, and systemic market dislocations of the kind surrounding the insolvency of Lehman Brothers in 2008, if repeated, could be highly disruptive to economies and markets, adversely affecting individual companies and industries, securities markets, interest rates, credit ratings, inflation, investor sentiment, and other factors affecting the value of the Fund's investments. Market disruptions, including sudden government interventions, can also prevent the Fund from implementing its investment program for a period of time and achieving its investment objectives. For example, a market disruption may adversely affect the orderly functioning of the securities markets and may cause the Fund's derivatives counterparties to discontinue offering derivatives on some underlying commodities, securities, reference rates, or indices, or to offer them on a more limited basis. Those events, as well as other changes in foreign and domestic economic and political conditions also could have an acute effect on individual issuers or related groups of issuers. These risks also could adversely affect individual issuers and securities markets, interest rates, secondary trading, ratings, credit risk, inflation, deflation and other factors relating to the Fund's investments.

Certain Affiliations. Certain broker-dealers may be considered to be affiliated persons of the Fund or the Investment Manager due to their possible affiliations with Allianz SE, the ultimate parent of the Investment Manager. Absent an exemption from the SEC or other regulatory relief, the Fund is generally precluded from effecting certain principal transactions with affiliated brokers, and its ability to purchase securities being underwritten by an affiliated broker or a syndicate including an affiliated broker, or to utilize affiliated brokers for agency transactions, is subject to restrictions. This could limit the Fund's ability to engage in securities transactions and take advantage of market opportunities.

Anti-Takeover Provisions. The Fund's Declaration includes provisions that could limit the ability of other entities or persons to acquire control of the Fund or to convert the Fund to open-end status. Preferred Shareholders will have voting rights in addition to and separate from the voting rights of the Common Shareholders in certain situations. Preferred Shareholders, on the one hand, and Common Shareholders, on the other, may have interests that conflict in these situations. See Anti-Takeover Provisions in the Declaration of Trust.

Table of Contents

Tax Considerations

The distributions with respect to the Cumulative Preferred Shares (other than distributions in redemption of Cumulative Preferred Shares subject to Section 302(b) of the Code) will constitute dividends to the extent of the Fund's current or accumulated earnings and profits, as calculated for federal income tax purposes. Such dividends generally will be taxable as ordinary income to holders. Distributions of net capital gains (*i.e.*, the excess of net long-term capital gains over net short-term capital losses) that are properly reported by the Fund as capital gain dividends will be treated as long-term capital gains in the hands of holders receiving such distributions. The Internal Revenue Service (the "IRS") currently requires that a regulated investment company ("RIC") that has two or more classes of stock allocate to each such class proportionate amounts of each type of the RIC's income (such as ordinary income and capital gains) based upon the percentage of total dividends distributed to each class for the tax year. Accordingly, the Fund intends each year to allocate capital gain dividends between and among its Common Shares and each series of its Preferred Shares, including the Cumulative Preferred Shares, in proportion to the total dividends paid to each class during or with respect to such year. Ordinary income dividends and dividends qualifying for the dividends received deduction, if any, will similarly be allocated between and among such share classes.

Table of Contents**FINANCIAL HIGHLIGHTS**

The information in the table below for the fiscal years ended February 28, 2018, 2017, 2015 and 2014, and February 29, 2016 is derived from the Fund's financial statements for the fiscal year ended February 28, 2018 audited by PricewaterhouseCoopers LLP, whose report on such financial statements is contained in the Fund's February 28, 2018 Annual Report and is incorporated by reference into the Statement of Additional Information.

	February 28, 2018	February 28, 2017	Year ended February 29, 2016	February 28, 2015	February 28, 2014
Net asset value, beginning of year	\$ 6.14	\$ 4.89	\$ 7.56	\$ 8.53	\$ 7.97
Investment Operations:
