Annual Report

October 31, 2018

Commodity Futures Trading Commission Registration. Effective December 31, 2012, the Commodity Futures Trading Commission (CFTC) adopted certain regulatory changes that subject registered investment companies and advisers to regulation by the CFTC if a fund invests more than a prescribed level of its assets in certain CFTC-regulated instruments (including futures, certain options and swap agreements) or markets itself as providing investment exposure to such instruments. The Fund has claimed an exclusion from the definition of the term—commodity pool operator—under the Commodity Exchange Act. Accordingly, neither the Fund nor the adviser with respect to the operation of the Fund is subject to CFTC regulation. Because of its management of other strategies, the Fund s adviser is registered with the CFTC as a commodity pool operator and a commodity trading advisor.

Fund shares are not insured by the FDIC and are not deposits or other obligations of, or guaranteed by, any depository institution. Shares are subject to investment risks, including possible loss of principal invested.

Management s Discussion of Fund Performance

Economic and Market Conditions

The world s financial markets delivered mixed results during the 12-month period ended October 31, 2018. U.S. equities generated healthy gains, and higher-yielding sectors of the U.S. income market advanced. However, a global trend of rising bond yields and widening credit spreads culminated in losses for major U.S. investment-grade and international bond indexes during the period. International equity markets were also generally weak, while the U.S. dollar strengthened against most foreign currencies.

Growth in the U.S. economy and corporate earnings accelerated during the period, boosted by tax reform. With the economy on solid ground and inflation under control, the U.S. Federal Reserve (the Fed) gradually raised interest rates and reduced the size of its balance sheet. Overseas, the European Central Bank (ECB) tapered its monthly bond purchases and announced it would end them entirely by December 2018. Nonetheless, the ECB held interest rates at record lows amid softening economic growth and heightened political uncertainty in the region. Rising populism and anti-immigration sentiment permeated eurozone politics, as illustrated by a budget standoff between the newly elected Italian government and the European Union. In Japan, the central bank remained highly accommodative in an effort to revive inflation, but allowed 10-year government bond yields to edge higher.

Over the course of the period, the backdrop for emerging markets deteriorated as global liquidity tightened. The eurozone economy lost momentum and China s already-slowing economy began to feel the effects of U.S. trade tariffs. Developments in a handful of larger emerging markets exacerbated these broad headwinds, including U.S. sanctions against Russia, a currency crisis in Argentina, and escalating political tensions between Turkey and the U.S. A strong rally in oil prices was an additional challenge for oil-importing countries like China and India, and a boost for exporters during the period.

Fund Performance

For the fiscal year ended October 31, 2018, Eaton Vance Short Duration Diversified Income Fund (the Fund) had a total return of 2.56% at net asset value (NAV).

Floating-rate loans were the leading driver of the Fund s performance during the period. Historically, the Fund has normally maintained underweight exposures to lower-credit⁷ segments of the senior-secured loan market namely the CCC and D (defaulted) rating tiers. This strategy may help the Fund experience limited credit losses over the long run, but it may detract from relative performance in times when lower-quality loans perform well.

During the period, the Fund s underweight to CCC-rated loans, which returned 8.82%, detracted from performance. However,

the Fund s underweight to D-rated loans, which returned 8.43%, contributed to results. On the sector level, the period was notable for strong performance in the retail sector of the loan market excluding food and drugs which rallied back after suffering negative returns during the previous one-year period ended October 31, 2017. The Fund s underweight exposure to retail was a detractor from relative results. Security selection was also a driver of performance, with rebounding loan picks in the brokerage/securities dealer and oil and gas sectors aiding performance.

Investments in mortgage-backed securities (MBS) had a positive contribution to the Fund s performance during the one-year period ended October 31, 2018. Spreads in the agency MBS market widened over the course of the year as the Fed continued its balance sheet normalization, which left a supply-demand imbalance that led to wider spreads. Despite widening spreads in generic agency MBS and negative returns in the

agency MBS Index, the Fund had a positive return in its agency MBS investments. The Fund benefited from its focus in parts of the agency MBS collateralized mortgage obligation market that would benefit from rising interest rates primarily negative duration interest-only agency MBS strips.

Rising interest rates led to slower prepayment speeds, which translated to lower refinancing activity and higher prices across the interest-only agency MBS universe. The Fund also benefited from its position in floating-rate agency MBS, which outperformed fixed-rate agency MBS and U.S. Treasurys over the course of the year. As the short end of the yield curve⁹ rose on the back of the Fed s interest rate hikes, the coupons in floating-rate agency MBS reset higher, providing more yield to buyers going forward. The Fund s exposure to non-U.S. instruments detracted slightly from Fund performance during the period. Positive contributions to performance of the Fund s foreign portfolio came across various credit positions in the governments of Cyprus, Bahamas, Ecuador, Rwanda, and Macedonia. Significant detractors came from credit positions in the governments of Barbados, Turkey, and Argentina. In general, emerging markets suffered a difficult year Barbados announced a default in June 2018, and Turkey and Argentina s local and external markets came under significant pressure shortly thereafter. However, many countries with idiosyncratic fundamental improvement stories like those that contributed to positive performance were able to generate positive returns.

Elsewhere, the Fund s smaller allocations to high-yield bonds and commercial MBS aided performance during the period. On the other hand, the Fund s minimal exposure to investment-grade corporate bonds hurt performance, as this area of the market had negative returns during the period.

See Endnotes and Additional Disclosures in this report.

Past performance is no guarantee of future results. Returns are historical and are calculated by determining the percentage change in net asset value (NAV) or market price (as applicable) with all distributions reinvested and include management fees and other expenses. Fund performance at market price will differ from its results at NAV due to factors such as changing perceptions about the Fund, market conditions, fluctuations in supply and demand for Fund shares, or changes in Fund distributions. Investment return and principal value will fluctuate so that shares, when sold, may be worth more or less than their original cost. Performance less than or equal to one year is cumulative. Performance is for the stated time period only; due to market volatility, current Fund performance may be lower or higher than the quoted return. For performance as of the most recent month-end, please refer to eatonvance.com.

Short Duration Diversified Income Fund

October 31, 2018

Endnotes and Additional Disclosures

- The views expressed in this report are those of the portfolio manager(s) and are current only through the date stated at the top of this page. These views are subject to change at any time based upon market or other conditions, and Eaton Vance and the Fund(s) disclaim any responsibility to update such views. These views may not be relied upon as investment advice and, because investment decisions are based on many factors, may not be relied upon as an indication of trading intent on behalf of any Eaton Vance fund. This commentary may contain statements that are not historical facts, referred to as forward looking statements. The Fund s actual future results may differ significantly from those stated in any forward looking statement, depending on factors such as changes in securities or financial markets or general economic conditions, the volume of sales and purchases of Fund shares, the continuation of investment advisory, administrative and service contracts, and other risks discussed from time to time in the Fund s filings with the Securities and Exchange Commission.
- ² Performance results reflect the effects of leverage. Absent an expense waiver by the investment adviser, if applicable, the returns would be lower.
- ³ The shares of the Fund often trade at a discount or premium from their net asset value. The discount or premium of the Fund may vary over time and may be higher or lower than what is quoted in this report. For up-to-date premium/discount information, please refer to http://eatonvance.com/closedend.
- ⁴ The Distribution Rate is based on the Fund s last regular distribution per share in the period (annualized) divided by the Fund s NAV or market price at the end of the period. The Fund s distributions may be comprised of amounts characterized for federal income tax purposes as qualified and non-qualified ordinary dividends, capital gains and nondividend distributions, also known as return of capital. For additional information about nondividend distributions, please refer to Eaton Vance Closed-End Fund Distribution Notices (19a) posted on our website, eatonvance.com. The Fund will determine the federal income tax character of distributions paid to a shareholder after the end of the calendar year. This is reported on the IRS form 1099-DIV and provided to the shareholder shortly after each year-end. For information about the tax character of distributions made in prior calendar years, please refer to Performance-Tax Character of Distributions on the Fund s webpage available at eatonvance.com. The Fund s distributions are determined by the investment adviser based on its current assessment of the Fund s long-term return potential. Fund distributions may be affected by numerous factors including changes in Fund performance, the cost of financing for leverage, portfolio holdings, realized and projected returns, and other factors. As portfolio and market conditions change, the rate of distributions paid by the Fund could change.
- ⁵ The Fund employs leverage through derivatives and borrowings. Total leverage is shown as a percentage of the Fund s aggregate net assets plus the absolute notional value of long and short derivatives and borrowings outstanding. Use of leverage creates an opportunity for income, but creates risks including greater price volatility. The cost of borrowings rises and falls with changes in short-term interest rates. The Fund may be required to maintain prescribed asset coverage for its leverage and may be required to reduce its leverage at an inopportune time.
- ⁶ Total leveraged assets include all assets of the Fund (including those acquired with financial leverage) and derivatives held by the Fund. Asset Allocation as a percentage of the Fund s net assets amounted to 162.1%. Please refer to the definition of total leveraged assets within the Notes to Financial Statements included herein.
- ⁷ Credit ratings are categorized using S&P Global Ratings (S&P). Ratings, which are subject to change, apply to the creditworthiness of the issuers of the underlying securities and not to the Fund or its shares. Credit ratings measure the quality of a bond based on the issuer s creditworthiness, with ratings ranging from AAA, being the highest, to D, being the lowest based on S&P s measures. Ratings of BBB or higher by S&P are considered to be investment-grade quality. Credit ratings are based largely on the ratings agency s analysis at the time of rating. The rating assigned to any particular security is not necessarily a reflection of the issuer s current financial condition and does not necessarily reflect its assessment of the volatility of a security s market value or of the liquidity of an investment in the security.

- ⁸ Duration is a measure of the expected change in price of a bond in percentage terms given a one percent change in interest rates, all else being constant. Securities with lower durations tend to be less sensitive to interest rate changes.
- ⁹ Yield curve is a graphical representation of the yields offered by bonds of various maturities. The yield curve flattens when long-term rates fall and/or short-term rates increase, and the yield curve steepens when long-term rates increase and/or short-term rates fall.

Fund profile subject to change due to active management.
