- Note: The Portfolio of investments is listed by the issuer's country of origin.
- 1 Step Bonds - Coupon rate increases in increments to maturity. Rate disclosed is as of January 31, 2007. Maturity date disclosed is the ultimate maturity date.
 - 2 Floating rate securities - the interest rates shown are the current rates as of January 31, 2007.
 - 3 Bond interest in default.
 - 4 Security is being fair valued by a valuation committee under the direction of the Board of Directors. At January 31, 2007, the value of this security amounted to \$829,500 or 0.26% of net assets.
 - 5 Non-income producing security.
 - 6 Reflects annualized yield at January 31, 2007 on zero coupon bonds.
 - 7 Security, or portion thereof, was on loan at January 31, 2007.
 - 8 Rights do not currently accrue income. Quarterly income, if any, will vary based on several factors including oil exports, prices and inflation.
 - 9 Security represents an equity claim linked to Argentina's Gross Domestic Product.
 - 10 Security is issued by a fund that is advised by the same advisor as the Fund. The Advisor does not earn a management fee from the Trust.
 - 11 Rate shown reflects yield at January 31, 2007.
 - 12 These securities were delivered to futures contracts merchant to cover margin requirements for future contracts.
 - 13 Investment in affiliated issuer. The Advisor does earn a management fee from UBS Private Money Market Fund.
 - 14 The Fund calculates its net asset value based on the current market value, where available, for its portfolio securities. The Fund normally obtains market values for its securities from independent pricing sources and broker-dealers. Independent pricing sources may use reported last sale prices, current market quotations or valuations from computerized "matrix" systems that derive values based on comparable securities. A matrix system incorporates parameters such as security quality, maturity and coupon, and/or research and evaluations by its staff, including review of broker-dealer market price quotations, if available, in determining the valuation of the portfolio securities. Securities traded in the over-the-counter ("OTC") market and listed on The Nasdaq Stock Market, Inc. ("NASDAQ") normally are valued at the NASDAQ Official Closing Price. Other OTC securities are valued at the last bid price on the valuation date available prior to valuation. Securities which are listed on US and foreign stock exchanges normally are valued at the last sale price on the day the securities are valued or, lacking any sales on such day, at the last available bid price. In cases where securities are traded on more than one exchange, the securities are valued on the exchange designated as the primary market by UBS Global Asset Management (Americas) Inc., the investment advisor of the Fund. If a market value is not available from an independent pricing source for a particular security, that security is valued at fair value as determined in good faith by or under the direction of the Fund's Board of Directors (the "Board"). All investments quoted in foreign currencies will be valued weekly in US dollars on the basis of the foreign currency exchange rates. Foreign currency exchange rates are generally determined as of the close of the New York Stock Exchange ("NYSE"). Occasionally, events affecting the value of foreign investments occur between the time at which they are determined and the close of the NYSE, which will not be reflected in the computation of the Fund's net asset value. If events materially affecting the value of such securities occur during such time periods, the securities will be valued at their fair value as determined in good faith by or under the direction of the Board. The amortized cost method of valuation, which approximates market value, generally is used to value short-term debt instruments with sixty days or less remaining to maturity, unless the Board determines that this does not represent fair value.
- 144A Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities are considered liquid and may be resold in transactions exempt from registration, normally to qualified institutional buyers. At January 31, 2007, the value of these securities amounted to \$20,656,302 or 6.37% of net assets.

Private Money Market Fund is a money market fund managed by UBS Global Asset Management (Americas) Inc., an affiliate of UBS Global AM and is offered as a cash management option only to mutual funds and certain other accounts. The Fund invests in Private Money Market Fund as a short term investment of cash collateral from securities loaned. Amounts relating to those investments at January 31, 2007 and for the period ended are summarized as follows:

Fund	Purchases	Sale proceeds	Security lending income	Value	% of net assets
UBS Private Money Market Fund LLC	\$4,428,231	\$20,000	\$98	\$4,408,231	1.36%

2) Swap agreements

Total return swaps

Total return swap agreements involve commitments to pay interest in exchange for a market-linked return based on a notional amount. To the extent the total return of the security or index underlying the transaction exceeds or falls short of the offsetting interest rate obligation, the Fund will receive a payment from or make a payment to the counterparty, respectively. Total return swaps are marked-to-market daily, and the change, if any, is recorded as unrealized appreciation or depreciation. Periodic payments received or made at the end of each measurement period, but prior to termination, are recorded as realized gains or losses.

At January 31, 2007, the Fund had outstanding total return swap contracts with the following terms:

Notional amount	Termination dates	Payments made by the Fund	Payments received by the Fund	Unrealized appreciation
USD 4,480,000	07/27/07	5.27375%*	11.75%	\$ 127,445
EUR 4,110,000	07/27/07	2.06975%**	11.00%	861,540
RUB 34,500,000	10/09/07	\$1,396,580^	7.58%#	92,415
				<u>\$ 1,081,400</u>

* Rate based on 6 month LIBOR (USD - BBA)

** Rate based on 12 month LIBOR (EUR - BBA) plus 29 basis points.

Rate is equal to the interest amounts, if any, paid to holders of record of Government of Jamaica bond, due 05/15/11.

Rate is equal to the interest amounts, if any, paid to holders of record of Government of Jamaica bond, due 07/27/12.

^ Payment made on 09/27/05 to fully fund the swap.

Credit default swaps

Credit default swap agreements involve commitments to pay interest and principal in the event of a default of a security. As a buyer, the Fund makes periodic payments to the counterparty, and the Fund would receive payments only upon the occurrence of a credit event. Credit default swaps are marked-to-market daily, and the change, if any, is recorded as unrealized appreciation or depreciation. Periodic payments received or made at the end of each measurement period, but prior to termination, are recorded as realized gains or losses. If no credit event occurs, the Fund will lose its periodic stream of payments over the term of the contract. However, if a credit event occurs, the Fund typically receives full notional value for a reference obligation that may have little or no value. Credit default swaps may involve greater risk than if the Fund had invested in the reference obligation directly. Credit default swaps are subject to general market risk, liquidity risk and credit risk.

3) Securities lending

The Fund may lend securities up to 33 1/3% of its total assets to qualified broker-dealers or institutional investors. The loans are secured at all times by cash, cash equivalents or US government securities in an amount at least equal to the market value of the securities loaned, plus accrued interest and dividends, determined on a daily basis and adjusted accordingly. The Fund will regain ownership of loaned securities to exercise certain beneficial rights; however, the Fund may bear the risk of delay in recovery of, or even loss of rights in, the securities loaned should the borrower fail financially. The Fund receives compensation for lending its securities from interest or dividends earned on the cash, cash equivalents or US government securities held as collateral, net of fee rebates paid to the borrower plus reasonable administrative and custody fees. UBS Financial Services Inc., an indirect wholly owned subsidiary of UBS AG, and other affiliated broker-dealers have been approved as borrowers under the Fund's securities lending program. UBS Securities LLC is the Fund's lending agent. For the three months ended January 31, 2007, UBS Securities LLC earned \$33 in compensation as the Fund's lending agent. At January 31, 2007, the Fund owed UBS Securities LLC \$33 in compensation as the Fund's lending agent. The value of loaned security and related collateral outstanding at January 31, 2007, were as follows:

Market value of security loaned	Collateral received for security loaned	Market value of investments of cash collateral received
\$4,260,000	\$4,408,231	\$4,408,231
