the Securities Exchange Act of 1934.

Yes No

If "Yes" is marked, indicated below the file number assigned to the
registrant in connection with Rule 12g3-2(b):

GOL Implements New Ticket Sales System

São Paulo, August 12, 2008 GOL Linhas Aéreas Inteligentes S.A. (NYSE: GOL and Bovespa: GOLL4), the parent company of Brazilian airlines GOL Transportes Aéreos S.A. (GTA) and VRG Linhas Aéreas S.A. (VRG), announces that it implemented at GTA a new ticket sales system, New Skies, developed by Navitaire. The platform will replace GTA's current system, Open Skies, and will improve the performance and quality of customer service, in addition to maximizing the Company's distribution channels, particularly its Internet sales platform.

GOL has always been committed to offering its customers innovative solutions. With New Skies, we will have the necessary technology to keep costs low while expanding services and continuing to grow the Company, explains Wilson Maciel Ramos, GOL's vice-president of planning and IT.

New Skies is a next generation system of distribution and sale and was specially designed for fast-growing airline companies that operate in the low-cost model. With this tool, the Company's website (www.voegol.com.br) will offer more options for GTA's customers, including a more functional ticket sales interface. For example, with the new system, after selecting a departure and arrival city, customers can now also refine the search by fare or date.

New Skies also offers additional features for GTA's authorized travel agencies. Unlike the previous system, which provided one password per agency, the new platform allows individual profiles for each travel agent. GTA has trained over 7,000 travel agents on the New Skies system. Each agency can also designate an administrator, which allows the agency to manage all tickets issued by its registered agents. This ensures increased security of information submitted through the site.

In addition to benefitting our customers, New Skies will also allow the Company to integrate its organization and planning areas, adds Ramos.

Among New Skies' benefits for GTA is its unlimited processing capacity due to the system's architecture and data processing infrastructure.

Although this new system is based on the ticketless concept, it is able to process code-share and interline agreements with airlines that issue e-tickets.

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
