4.1. Payroll and Benefits

In 2Q10 payroll and benefits decreased by R\$ 1.6 million or 0.4%, from R\$ 360.9 million to R\$ 359.3 million, due to the following:

The Company's workforce reduction relating to the lay-offs from April/09 to June/10 (TAC + 2% of the workforce) with a dismissal of 2,387 employees; and

This reduction was partially offset by the 6.69% wages adjustment as of May 2009 and 5.05% as of May 2010.

In 1H10 this item decreased R\$ 167.4 million, due to 1Q09 provision made, which did not occur in 2010. Excluding the non-recurring TAC effect of R\$ 146.6 million, there was a reduction of R\$ 20.8 million or 3.0% decrease.

4.2. Supplies

In 2Q10, expenses with Supplies decreased by R\$ 4.5 million or 12.2%, when compared to the same period 2009, from R\$ 36.8 million to R\$ 32.3 million. The main factors for this variation were: i) the lower expenses with materials for the maintenance of the aqueduct systems, water and sewage treatment station, and the lifts in the Metropolitan Region of São Paulo (RMSP) in the amount of R\$ 3.1 million; and ii) expenses with vehicle fuel and lubricants amounting to R\$ 1.2 million, resulting from the lower fuel consumption on account of the allocation of new vehicles and the higher demand for outsourced services, such as Global R and Global Sourcing.

4.3. Treatment supplies

Treatment supplies expenses in 2Q10 were R\$ 2.0 million, or 6.0% lower than in 2Q09, from R\$ 33.1 million to R\$ 31.1 million. The main factors were:

R\$ 4.5 million reduction, due to the lower consumption of aluminum polychloride of approximately 45% and aluminum sulphate replacement. The aluminum sulphate consumption grew around 30%, however the product average cost decreased 54%, which contributed significantly in the expenses reduction of the period; and

Increase of R\$ 2.6 million, due to the adjustment in the price of chlorine and ferric chloride in November 2009 and the increase in the consumption of a few products, such as: i) activated carbon, due to the water reserves and climatic conditions, as well as the proliferation of algae in the Dams that serve the Alto Tietê Production System; ii) start of the use of hydrogen peroxide in Santos, Praia Grande and São Vicente;

iii) polyelectrolytes, due to the commencement of operation of the centrifuges in the Barueri system.

Hiring of consultancy, advisory and specialized services for diverse purposes in the amount of R\$ 4,1 million covering: supply of information and water forecasts in real time, study of the flora and fauna to obtain the environmental license for the Rio Taiapuê basin, call center in the municipalities belonging to the Regional Systems - Contact Center R, development of the new virtual branch office and accounts management system, update of the technical register of the geographic information system SIGNOS (inventory of the distribution networks, supply, collection and treatment), among others;

Tariff adjustment, which had a 5.6% impact in the average tariff in the captive market, which represents 77% of the installed capacity, impacting the weighted average increase between the captive market and free market by around 5.8%; and

Weighted average cost increase of 6.7% between the markets.
