FOR IMMEDIATE RELEASE - São Paulo, March 28th, 2011 Gafisa S.A.

(Bovespa: GFSA3; NYSE: GFA), Brazil's leading diversified national homebuilder, today reported financial results for 2010 full year and fourth quarter ended December 31, 2010.

Commenting on results, Wilson Amaral, CEO of Gafisa, said, "We are pleased to report strong full year and quarterly results led by record launches and pre-sales in the last quarter of the year enabling us to achieve full year launches of R\$ 4.5 billion, close to the higher end of our guidance. Similarly, the operating performance resulted in a full year adjusted EBITDA margin of 20.1%, 60 bps higher than the mid-range of our guidance, with a full year net margin of 11.2%.

However, we are not yet satisfied with our operating margins and expect that we will see some pressure on EBITDA during the first half of 2011 due to lower expected revenues, as accounted for under the POC method, and in line with lower launch activity during 2009, as well as the delivery of the last of both higher cost legacy Tenda projects and lower margin Gafisa projects from our geographic expansionary period and from Rio de Janeiro. During the second half, we expect margins to recover resulting in what we believe will be a full year 2011 Adjusted EBITDA in a range of 18% - 22%, impacted by lower first half results.

Amaral added, "Gafisa has been able to keep pace with the extraordinary growth of the Brazilian economy and seize the unprecedented opportunities that exist in the homebuilding sector. With our highly respected brands that serve all sectors of the home-buying population, we are well positioned to continue to keep pace with the demand for new homes. While our cash burn rate has been impacted by the need to finance some of Tenda's legacy units, we still maintained a cash and cash equivalent amount of R\$ 1.2 billion at the end of 2010. As we move into a positive cash flow position at the second half of 2011,

we expect to be able to improve our capital structure and reduce net debt/equity by the end of the year to a very comfortable level below 60%, setting the stage for continued robust expansion into the future.

4Q10 - Operating & Financial Highlights

Consolidated launches totaled a record of R\$ 1.5 billion for the quarter, a 54% increase over 4Q09. Tenders reached R\$ 528 million in the quarter, and R\$ 1.6 billion in 2010, 159% higher than 2009.

Pre-sales reached R\$ 1.2 billion in the quarter, an 18% increase as compared to 4Q09 or 23% increase when comparing 2010 with 2009.

Net operating revenues, recognized by the Percentage of Completion (PoC) method, rose 3.5% to R\$ 928.7 million from R\$ 897.5 million in the 4Q09, reflecting continued pace of execution.

Adjusted Gross Profit (w/o capitalized interest) reached R\$ 335.6 million, 8% higher than the same period of 2009, with 36.1% Adjusted Gross Margin.

Adjusted EBITDA reached R\$ 197.8 million with a 21.3% margin, a 17.8% increase when compared to the R\$ 167.8 million reached in the 4Q09, mainly due to improved performance. Accumulated 2010 EBITDA of R\$ 747.5 million (20.1% Margin) grew 41% when compared to 2009.

Net Income was R\$ 137.4 million for the 4Q10 (16% Adj. Net Margin) and R\$ 416.1 for the full year of 2010 (12.8% Adj. Net Margin), an increase of 189% and 309%, when compared to 2009.

As expected, Net Debt/Equity reached 65% at the end of the year. We expect it to increase to around 70% in the 1H11, before it reverts, given positive cash flow generation in the 2H11 resulting in a Net Debt/Equity ratio below 60% by 2011 year end (Please refer to the Outlook section).

2011 Launch Guidance's range is from R\$ 5.0 to 5.6 billion with an expected adjusted EBITDA Margin in the range of 18% - 22%.

CEO Comments and Corporate Highlights for 4Q10 and 2010

The Brazilian macroeconomic scenario remained extremely positive throughout 2010, with GDP growth of 7.5%. Other notable features were a gradual decline in the unemployment rate - to an historical low of 6% - and increased working class real income, credit supply and consumer confidence, as well as the renewal of tax incentives for the real estate sector and other factors that benefited, and should continue to benefit, the company and the sector.

Although the impact of the rapid economic growth threatened to undermine the government's inflation control, with prices expected to rise by 5% to 6% in 2011, the Brazilian Central Bank has taken firm action to prevent any upsets that could significantly affect the country's economic stability. It is expected that the Central Bank's base rate, the SELIC, will reach 12.25% p.a. by the end of this year, which is a level that we do not believe will have an impact on housing demand. Surveys conducted by Data Popular at the end of 2010 indicate a purchase demand of 9.1 million homes over the next 12 months, almost double the buying intent registered in the survey at the end of 2008.

We understand that the federal government remains strongly committed to extending the MCMV program until 2014. The recent announcement of a reduction in the 2011 budget for MCMV2 was merely the postponing of some of the program's disbursements to subsequent years, given that the total budget has not been altered.

The CEF (Caixa Economica Federal) continues to perform strongly as the country's main provider of real estate financing, exceeding by R\$ 6 billion its original plan to provide financing of R\$ 70 billion in 2010, well above the R\$ 47 billion in 2009. The balance of financing using the FGTS exceeded R\$ 83 billion in 2010, an increase of 67% over the previous year. At the same time, financing using the resources of the poupança (basic savings accounts) increased by 65% in relation to 2009, reaching R\$ 56 billion. We also noted the growing involvement of other financial institutions, such as Banco do Brasil, which has been authorized to join the MCMV program and had accumulated a credit portfolio of R\$ 3 billion by the end of December 2010. It should be pointed out that financing indexed to the TR (referential interest rate) has a low correlation to increases in the SELIC rate and therefore do not have a significant impact on the sector or on the monetary correction of loan installments.

All these factors, together, contributed towards a significant improvement in demand within the sector, following the recovery that began in 2009, enabling Gafisa to launch R\$ 4.5 billion worth of properties in 2010, 95% more than in

the previous year, while sales amounted to R\$ 4 billion and net revenue came to R\$ 3.7 billion, both of which were 23% up on the 2009 amounts. The adjusted EBITDA margin rose from 17.5% in 2009 to 20.1% in 2010, and the net profit for the year was R\$ 416.1 million, 309% more than in the previous year. As a result, in 2010 were declared R\$ 98.8 million in dividends to be paid out during 2011, following GSM approval, representing a growth of 95% over the previous year, or R\$ 0.229 per common share.

In recent years, the company has been consolidating its position in the country's most important regions, following the process of geographical expansion that took place mainly between 2005 and 2008, and we now have a presence in 136 towns and cities in 22 of the nation's 26 states, in addition to the Federal District. We have also learned a lot from this process and believe we are now well placed to continue reaping the benefits of the growth potential inherent in the entire Brazilian real estate market.

Gafisa will continue to develop all three of its brands (Gafisa, AlphaVille and Tenda) in the markets where it has a footing, maximizing the sales from its distinctive portfolio, which ranges from low-income developments to undertakings of the highest standard. The Gafisa brand, which serves the middle and high income segments, made a strong contribution to the 2010 results, launching R\$ 2.2 billion worth of properties (70% more than in 2009) and accounting for almost half the total sales for the year. Gafisa reached an important milestone, with the delivery of development number 1,000, confirmation of its experience and execution capacity.

AlphaVille, which focuses on the development and sale of residential lots, launched 15 new projects in 2010 and expanded its presence into new metropolitan areas. As a result, the brand is already present in 64 towns and cities in 22 states, and the rapid pace of sales continues to be the norm for all its launches. The company expects this segment to represent an ever more significant portion of its portfolio, given that residential condominiums are likely to become increasingly prevalent throughout the country. In April 2010, Gafisa increased its stake in Alphaville from 60% to 80%, and we expect to complete the acquisition of the remaining 20% between late 2011 and early 2012.

Tenda, our brand serving the lower income segment and whose selling prices are amongst the lowest in the market, remains well positioned to help meet the Brazilian housing deficit, through the My House, My Life (MCMV) program which, in its second phase, aims to deliver another 2 million low-income residences by 2014. During 2010, Tenda almost quadrupled the number of units contracted through financing by the CEF, the financial institution that is leading the MCMV program, to over 22,000 units, which also enabled it to nearly double the number of transferred units to nearly 10,000 units during the year. The good relationship that Tenda enjoys with the CEF, which places us amongst the companies with the best performances under the MCMV program, has only been possible due to the improvements made in the internal processes of the two organizations. It should be pointed out that, over the first half of 2011 and beginning of the second half of the year, we expect to deliver most of the units relating to old Tenda projects, which have lower margins and are financed with the company's own capital. Add to this the introduction of new building technology, such as the use of aluminum moldings, and the continued efforts to optimize the key business procedures, and we can expect to see an improvement in the operational and financial results of this operation.

With the successful issuing of debt instruments and shares in 2010, which brought in funding of R\$ 1.4 billion, which will be supplemented by the positive cash flow generation that is expected as of the third quarter of 2011, the company is very well placed to expand the volume of its business, while, at the same time, we intend to develop a healthy capital structure, bringing the Net Debt/Net Equity ratio down to below 60% at the end of this year.

Our guidance for launches in 2011, of between R\$ 5 billion and R\$ 5.6 billion, reflects the expectation of an increased volume of business. With regard to profitability, we expect an adjusted EBTIDA margin for the full year of between 18% and 22%, with a first half figure of between 13% and 17%, compared to 20% to 24% for the second half of the year. This difference between the margins is due to: i) lower revenue resulting from fewer launches in 2009, compared to 2008 (2009: R\$2.3 billion; 2008 R\$4.2 billion), with lower recognition of revenue in respect of work in progress, resulting impact on the diluting of fixed costs; ii) delivery of lower margin products by Tenda, due to a lack of standardization among the older products, and by Gafisa, due to cost over-run associated with geographical expansion and projects in Rio de Janeiro; and iii) possible discounts on units that are ready but unsold, relating to launches in 2008 and earlier years.

As we can see, 2010 was a very positive year, both for Gafisa and for Brazil as a whole. However, the country suffered a major tragedy in January 2011, when abnormally heavy rain provoked much devastation in the mountain region of Rio de Janeiro state. We are pleased to be able to join other leading builders to

help construct new homes for those who have suffered such terrible losses. We look upon this event as a reminder of our social responsibility towards society.

We thank all our clients, shareholders, suppliers, employees and other stakeholders and wish you all an excellent 2011.

Wilson Amaral, CEO -- Gafisa S.A.

Recent Developments and 2010 Highlights

Wilson Amaral to Retire from the Company by the End of 2011

Today, the Company announced that Chief Executive Officer Wilson Amaral advised the Board of Directors that he currently plans to retire from the Company towards the end of 2011. Mr. Amaral has served Gafisa for more than five years, taking it from a privately held company to one of the few fully public corporations, and the only NYSE-listed Brazilian real estate company, in Brazil. Mr. Amaral will remain on the Board of Directors of Gafisa and expect to play a more active role in the future. He will work together with the Board to identify his successor and insure a smooth transition. (Please see more details on page 19).

Successful Fundraising

Gafisa's successful fundraising during 2010, via a primary share offering on March 23rd, and a debt offering on October 5th, once again underscored the Company's strong relationship with financial markets, leading market position and favorable growth prospects. These transactions permitted Gafisa to fortify its balance sheet in 2010, ahead of 2011 in which operating cash flows are expected to increase. Proceeds of the equity and debt offerings, which totaled approximately R\$1.06 billion and R\$300 million respectively, are being used for working capital, new developments, land acquisition, strategic joint ventures and acquisitions, allowing Gafisa to execute a robust business plan in 2011 and beyond.

Tenda Advances under Federal Housing Program

Tenda almost quadrupled the number of units it contracted with Caixa Economica Federal (Caixa), reaching over 22,000 units in 2010 as compared to 6,000 in 2009. The Company understands that it is among the top performing companies in the sector in this regard under the program. Tenda also almost doubled the number of mortgages transferred under the program (*repassé*) from 5,000 in 2009 to approximately 10,000 in 2010, another result that points to greater efficiency within Tenda and a streamlined working relationship with Caixa.

AlphaVille

Gafisa continues to pioneer innovative concepts in the homebuilding sector and a leading example of this is residential community living offered through its AlphaVille unit, which launched 15 new projects in 2010, extending its footprint

to northern and northeastern Brazil. Now present in 22 cities and 64 states, AlphaVille accounted for 16.5% of Gafisa's launches and 14.9% of pre-sales in 2010. With demographics changing and significant investments in the country's infrastructure, high quality suburban living is expected to become more common and the unit is expected to make a greater contribution to the Company's overall business in future periods.

Delivery of the 1000th Project

On October 19th, the Gafisa brand delivered its 1000th project, Terraças Alto do Lapa, a twenty-four story, 192-unit apartment building located in São Paulo. The reaching of this milestone is a testament to the deep real estate experience, execution capacity and dedication of Gafisa's organization.

Supporting Greater Access to Ownership of Gafisa Shares

Gafisa's management is committed to facilitating public access to the Company's shares and, as a measure toward achieving that goal, implemented a 2-for-1 stock split on February 23rd. The Company remains the only publicly-traded Brazilian homebuilder to list its shares on the New York Stock Exchange, which has helped it to remain among the most liquid stocks in the sector. In October, Gafisa also hired a market maker, ITAUVEST DTVM S.A., to further increase the liquidity of common shares issued by the Company on Bovespa, another measure which should facilitate public ownership of Gafisa stock.

2011 Guidance

For 2011, we are providing additional leverage metric under guidance given the expected positive evolution in cash flow between the first and second half of 2011. We expect launches of between R\$ 5.0 - R\$ 5.6 billion, an EBITDA margin of between 18% - 22%, and Net Debt/Equity target below 60% by year end.

Launches

In 4Q10, launches totaled R\$ 1.54 billion, an increase of 54% compared to 4Q09, represented by 50 projects/phases, located in 28 cities.

63% of Gafisa launches represented a price per unit below R\$ 500 thousand, while nearly 53% of Tenda's launches had prices per unit below R\$ 130 thousand. FIT, a unit of Tenda, launched 5 projects with an average price per unit of R\$ 188 thousand. These projects represented a PSV of R\$ 101 million or 19% of Tenda's launches in the quarter. Excluding these projects, the average price per unit of Tenda was R\$ 114 thousand, among the lowest average price for homebuilders listed on the Bovespa.

In the quarter, the Gafisa segment was responsible for 53% of launches, Tenda accounted for 34% and AlphaVille for the remaining 13%.

The tables below detail new projects launched during the 4Q and full year 2010:

Pre-Sales

Pre-sales in the quarter increased by 17.7% to R\$ 1.24 billion when compared to 4Q09.

The Gafisa segment was responsible for 50% of total pre-sales, while Tenda and AlphaVille accounted for approximately 34% and 16% respectively. Among Gafisa's pre-sales, 67% corresponded to units priced below R\$ 500 thousand, while 55% of Tenda's pre-sales came from units priced below R\$ 130 thousand.

The tables below illustrate a detailed breakdown of our pre-sales for the 4Q and full year 2010:

Sales Velocity

On a consolidated basis, the Company attained a sales velocity of 27.4% in the 4Q10, compared to a velocity of 25.7% in 3Q10. Sales velocity increased when compared to the previous period, mainly due to improved performance of Tenda and AlphaVille during the quarter. Sales velocity in the fourth quarter and 2010 full year launches were 44% and 59%, respectively; this continues to be consistent with our strategy to optimize the equilibrium between sales velocity and margins/return, compensating for cost pressure driven mainly from labor. When compared to 4Q09, the sales velocity was 120 bps lower, since in the 4Q10 there was a much higher concentration of projects launched in December when compared to 2009. 65% of the total launch volume was concentrated in the last month of the year, compared to 29% in the same period of 2009.

Table 6 - Sales velocity per company

Operations

Gafisa's geographic reach and execution capacity is substantial. The Company was present in 22 different states plus the Federal District, with 204 projects under development at the end of the fourth quarter. This diversified platform also helps to mitigate execution risk, since each region of the country has a different dynamic of growth, supply and costs. Some 460 engineers and architects were in the field, in addition to 460 intern engineers in training.

Gafisa and its subsidiaries continue to selectively launch successful projects in new regions and in multiple market segments, maximizing returns in accordance with market demand. Through the end of December, Tenda contracted 22,288 units with CEF, being 79% under the MCMV program.

Delivered Projects

During the fourth quarter, Gafisa delivered 18 projects with 2,899 units equivalent to an approximate PSV of R\$ 436 million; the Gafisa segment delivered 5 projects; Tenda and AlphaVille delivered the remaining 11 and 2 projects/phases, respectively. The delivery date is based on the delivery meeting that takes place with customers, and not upon the physical completion which is prior to the delivery meeting.

For the 2010 full year, Gafisa completed 83 projects which includes 12,894 units and represents approximately R\$ 1.7 billion in PSV. In 2011, we expect to almost double this number, to 25,000 units, mainly due to the delivery of older Tenda units along with some of Gafisa's leveraged 2007 launches.

The tables below list the products delivered in the 4Q and full year 2010:

Table 8 - Delivered projects

Land Bank

The Company's land bank of approximately R\$ 18.1 billion is composed of 177 different projects in 22 states, equivalent to more than 93 thousand units. In line with our strategy, 38.5% of our land bank was acquired through swaps which require no cash obligations.

During the 4Q10 we recorded a gross increase of R\$ 3.05 billion in the land bank, reflecting acquisitions that more than compensate for R\$ 1.54 billion launches in the quarter.

The table below shows a detailed breakdown of our current land bank:

Table 9 - Landbank per company per unit price

Land Bank - EoP (4Q10)	8,245	5,223	4,586	18,054

4Q10 - Revenues

On the strength of solid sales in the 4Q10 of both newly launched projects and units from inventory as well as an accelerated pace of construction, the Company continued to recognize substantial net operating revenue for 4Q10, closing with R\$ 928.6 million compared to R\$ 897.5 million in the 4Q09, with Tenda contributing 38% of the consolidated full year revenues.

Revenues for the industry are recognized based on actual cost versus total budgeted costs of land and construction (Percentage of Completion method or PoC method).

The table below presents detailed information about pre-sales and recognized revenues by launch year:

Table 11 - Sales vs. Recognized revenues

R\$ 000		4Q10				4Q09			
		Sales	%Sales	Revenues	%Revenues	Sales	%Sales	Revenues	%Revenues

Total		1,240,818		928,637		1,053,810		897,540	

4Q10 - Gross Profits

On a consolidated basis, gross profit for 4Q10 totaled R\$ 278.2 million and R\$ 1.1 billion for 2010, an increase of 23.6% over 2009. The gross margin for 4Q10 reached 30% (36.1% w/o capitalized interest).

In this quarter we had a non-recurring effect of taxes reconciliations (PIS/Cofins) of R\$ 38.1 million, between revenues deductions and cost. Excluding this effect, our gross margin was in line with the previous quarter (32.0% w/o capitalized interest).

Table 12 - Capitalized interest

(R\$000)		4Q10	4Q09	3Q10
Consolidated	Opening balance	115,323	96,511	101,897
	Capitalized interest	88,591	28,763	47,105
	Interest transfered to COGS	(57,370)	(33,707)	(33,680)
	Closing balance	146,544	91,568	115,323

4Q10 - Selling, General, and Administrative Expenses (SG&A)

In the fourth quarter 2010, SG&A expenses totaled R\$ 141.1 million, 6% above the same period of 2009. When compared to 3Q10, SG&A increased from R\$ 113.2 million to R\$ 141.1 million. This was mainly due to an increase of selling expenses, which is in line with accelerated launches of new projects concentrated in the last quarter of 2010 as well as higher bonus expenses in the G&A.

When compared to 4Q09, the SG&A/Net Revenue ratio increased 32 bps and the SG&A/Sales ratio decreased 130 bps, also reflecting the gains in operating efficiency at Tenda and the synergy gains related to the merger of Tenda into Gafisa such as the integration of all the support and business development areas. With the reduction in launches during 2009, revenue growth will be less in 2011 when compared to the expected launch and sales growth amounts. Due to this factor, we don't expect further SG&A dilution during 2011, rather we expect it to maintain at similar annual SG&A ratios.

While we are in a comfortable level of SG&A/net revenues, we do foresee additional improvements in the long-term.

4Q10 - Other Operating Results

In 4Q10, our results reflected a negative impact of R\$0.8 million, compared to R\$ 13.9 million in 4Q09 mainly due to higher contingency provisions in the 4Q09.

Table 13 - Sales and G&A Expenses

13

4Q10 - Adjusted EBITDA

Our Adjusted EBITDA for the 4Q10 totaled R\$ 197.8 million, 17.8% higher than the R\$ 167.8 million for 4Q09, with a consolidated adjusted margin of 21.3%, compared to 18.7% in 4Q09.

For the 2H11 we continue to expect an improved EBITDA margin. However, given the delivery of Tenda's older-low margin projects, along with some of Gafisa's lower margin projects (related to the learning curve of geographic diversification and certain Rio de Janeiro projects coming in over budget) being delivered during the 1H11/beginning of 2H11, we expect a negative impact on our first half operating results. On the other hand, we expect to see Gafisa delivering normalized operating margins in the 2H11, after this delivery of lower-margin projects is completed (please check the Outlook section).

We adjusted our EBITDA for expenses associated with stock option plans, as it represents a non-cash expense.

Table 14 - Adjusted EBITDA

(1) Non cash provisions

4Q10 - Depreciation and Amortization

Depreciation and amortization in the 4Q10 was R\$ 6.5 million, a decrease of R\$ 3.5 million when compared to the R\$ 10.0 million recorded in 4Q09, and a decrease of R\$ 1.8 million when compared to the previous quarter, mainly due to lower showroom amortizations.

4Q10 Financial Result

Net financial expenses totaled R\$ 28.4 million in 4Q10, compared to net financial expenses of R\$ 57.6 million in 4Q09, mainly due to a higher amount of capitalized interest, related to capitalization of land investments.

4Q10 - Taxes

Income taxes, social contribution and deferred taxes for the 4Q10 amounted to a gain of R\$ 16.1 million, compared to an expense of R\$ 26.5 million in 4Q09. This result is due to optimization of tax planning that maximizes the reduction of tax liabilities, resulting in a reduction of net deferred tax accrued in the Company's balance sheet. Considering this, we reversed the excessive amount, which resulted in a positive 4Q10 deferred income tax provision of R\$ 25.6 million. On the future, we expect income tax to represent approximately 2% of net revenue.

4Q10 - Adjusted Net Income

Net income in 4Q10 was R\$ 137.4 million compared to R\$ 47.6 million in the 4Q09 (already considering the IFRS impact over 2009 net income). However, net income on an adjusted basis (before deduction of expenses related to minority shareholders and stock options), reached R\$ 148.5 million, with an adjusted net margin of 16%, representing growth of 154% when compared to R\$ 58.3 million in 4Q09, mostly due to the income tax reversal and higher capitalized interest.

4Q10 - Earnings per Share

Earnings per share already adjusted for the 2:1 stock split in all comparable periods was R\$ 0.32/share in the 4Q10 compared to R\$ 0.14/share in 4Q09, a 123.3% increase. Shares outstanding at the end of the period were 430.9 million (ex. Treasury shares) and 333.6 million in the 4Q09.

Backlog of Revenues and Results

The backlog of results to be recognized under the PoC method reached R\$ 1.54 billion in 4Q10, R\$ 474 million higher than in 4Q09. The consolidated margin in 4Q10 was 38.9%, 363 bps higher than in 4Q09 and 69 bps higher than 3Q10, reflecting the fact that recent projects are having a greater impact on the company's results to be recognized while the impact of our older-lower margin projects are beginning to diminish.

The table below shows our revenues, costs and results to be recognized, as well as the expected margin:

Table 15 - Results to be recognized (REF)

(R\$ million)	4Q10	4Q09	3Q10	4Q10 x 4Q09	4Q10 x 3Q10
Consolidated Revenues to be recognized	3,963	3,025	3,429	31.0%	15.6%
Costs to be recognized	-2,423	-1,959	-2,120	23.7%	14.3%
Results to be recognized (REF)	1,540	1,066	1,309	44.5%	17.6%
REF margin	38.9%	35.2%	38.2%	363 bps	69 bps

Note: Revenues to be recognized are net of PIS/Cofins (3.65%); excludes the AVP method introduced by Law nº 11,638

Balance Sheet

Cash and Cash Equivalents

On December 31, 2010, cash and cash equivalents reached R\$ 1.2 billion, in line with the 3Q10, and 16% lower than the R\$ 1.4 billion recorded at the end of 4Q09, reflecting cash burn in the period plus debt amortization that more than compensated for the R\$ 1.1 billion equity offering in 1Q10.

Accounts Receivable

At the end of 4Q10, total accounts receivable increased by 8% to R\$ 9.4 billion, compared to R\$ 8.7 billion in 3Q10, and increased 36% as compared to the R\$ 6.9 billion balance in 4Q09, reflecting increased sales activity.

Table 16 - Total receivables

(R\$ million)		4Q10	4Q09	3Q10	4Q10 x 4Q09	4Q10 x 3Q10
Consolidated	Receivables from developments - ST	2,465.8	1,556.5	1,742.1	58%	42%

Receivables from developments: accounts receivable not yet recognized according to PoC and BRGAAP

Receivables from PoC: accounts receivable already recognized according do PoC and BRGAP

Inventory (Properties for Sale)

Inventory at market value totaled R\$ 3.3 billion in 4Q10, an increase of 25% when compared to the R\$ 2.6 billion registered in the 4Q09. On a consolidated basis, our inventory is at a comfortable level of 10 months of sales based on LTM sales figures.

Finished units of inventory at market value represented 12.7% by the end of the quarter, while 53% of the total inventory reflects units where construction is up to 30% complete.

Liquidity

On December 31, 2010, Gafisa had a cash position of R\$ 1.2 billion. On the same date, Gafisa's debt and obligations to investors totaled R\$ 3.7 billion, resulting in a net debt and obligations of R\$ 2.5 billion. The net debt and investor obligation to equity and minorities ratio was 65.3% compared to 55.6% in 3Q10, mainly due to the R\$ 342 million cash burn in the fourth quarter (R\$ 393 million net debt change minus R\$ 50.7 million dividends payment). When excluding Project Finance, this ratio reached only 13.5% net debt/equity, a comfortable leverage level with a competitive cost that

is equivalent to the Selic rate.

Our 4Q10 cash burn was mainly explained by the over R\$ 790 million in expenditures in construction and development payments and R\$ 79 million in land acquisition payments. We expect cash burn to continue to reduce, reaching approximately 70% Net Debt/Equity in the 1H11. During the 2H11, this ratio should start to diminish, following expected positive cash flow generation, and is expected to close the year with a Net Debt/Equity below 60% (please refer to Outlook section). With the expected positive cash flow for full year 2011, we will be able to deleverage the Company, which together with a greater use of the Associative Credit - requiring no working capital - for Tenda's MCMV units, should contribute to our ability to meet our higher launch volume targets and, at the same time, reduce current leverage and keep it at a comfortable level going forward.

In 4Q10, the company increased project finance debt by R\$ 138 million, reflecting our ability to finance ongoing projects. Total project finance now represents 55% of the total debt. Currently we have access to a total of R\$ 3.8 billion in construction finance lines of credit provided by all of the major banks in Brazil. At this time we have R\$ 2.0 billion in signed contracts and R\$ 802 million of contracts in process, giving us additional availability of R\$ 1.0 billion.

We also have receivables (from units already delivered) of over R\$ 200 million available for securitization. The following tables set forth information on our debt position as of December 31, 2010.

Table 20 - Indebtedness and Investor obligations

Type of obligation (R\$000)	4Q10	4Q09	3Q10	4Q10 x 4Q09	4Q10 x 3Q10

Outlook 2010 vs Actual

In 2010, Gafisa achieved operating results within the previously stated guidance of launches (R\$ 4.2 billion to R\$ 4.6 billion) and an Adjusted EBITDA margin of 18.5% to 20.5%.

In full year 2010, Gafisa launches amounted to R\$ 4.49 billion, equivalent to 2% over of the mid-range of launch's guidance. Gafisa also delivered a 20.1% EBITDA margin in 2010, well within the previously stated guidance range and 60 bps over the mid-range.

Launches (R\$ million)		Guidance 2010	4Q10	%	2010	%
Gafisa	Min.	4,200		37%		107%
(consolidated)	Average	4,400	1,543	35%	4,492	102%
	Max.	4,600		34%		98%

EBITDA Margin (%)		Guidance 2010	4Q10	%	2010	%
Gafisa	Min.	18.5%		280 bps		160 bps
(consolidated)	Average	19.5%	21.3%	180 bps	20.1%	60 bps
	Max.	20.5%		80 bps		-40 bps

Outlook 2011

Our guidance for launches in 2011, of between R\$ 5.0 billion and R\$ 5.6 billion, reflects the expectation of an increased volume of business. With regard to profitability, we expect an adjusted EBITDA margin for the full year of between 18% and 22%, with a first half figure of between 13% and 17%, compared to 20% to 24% for the second half of the year. This difference between the margins is due to: i) lower revenue resulting from fewer launches in 2009, compared to 2008 (2009: R\$2.3 billion; 2008 R\$4.2 billion), with lower recognition of revenue in respect of work in progress and ensuing impact on the diluting of fixed costs; ii) delivery of lower margin products by Tenda, due to a lack of standardization among the older products, and by Gafisa, due to cost reallocation associated with geographical expansion and projects in Rio de Janeiro; and iii) possible discounts on units that are ready but unsold, relating to launches in 2008 and earlier years.

Exceptionally, this year, Gafisa is providing guidance for its Net Debt/Net Equity ratio. We think it is important to provide this additional guidance for the market at this time, principally in view of the company's favorable operational cash flow generation over

the course of the year, which should be positive as of the second half of 2011. We expect that the company's leverage will reach a peak of around 70% during the 1H11, followed by a positive cash flow in the 2H11 that will bring the Net Debt/Net Equity ratio down below 60% at the end of the year.

As previously mentioned, we have a negative impact from old Tenda's projects being delivered during the first 1H11 and beginning of 3Q11, is the negative impact on our operating results mainly for the 1H11. The margins are lower, due to the resolving of pending issues in relation to certain projects (water and sewage connections, questions of infrastructure, etc.). Once this process has been completed, during the 1H11 and early 3Q11, we expect to see Gafisa returning normalized margins over the course of the 2H11.

Considering the aforementioned, the guidance figures for 2011 are as follows:

Guidance 2011	Launches (R\$ million)	EBITDA Margin (%)	Net Debt/Equity (%) - EoP
Minimum	5,000	18.0%	
Average	5,300	20.0%	
Maximum	5,600	22.0%	< 60%

EBITDA Margin (%) Guidance 2011	1H11	2H11	2011
Minimum	13.0%	20.0%	18.0%
Average	15.0%	22.0%	20.0%
Maximum	17.0%	24.0%	22.0%

Subsequent Event

Gafisa CEO Announces Intention to Depart by End of 2011

Wilson Amaral to Remain on the Board of Directors and Expected to Play a More Active Role in the Future

Gafisa announced today that as part of its management transition plan, Chief Executive Officer Wilson Amaral de Oliveira, 58, plans to retire from the company by the end of 2011.

Wilson Amaral has spent more than five years at Gafisa, taking it from a privately held company to one of the few fully public corporations in Brazil, and the only NYSE-listed Brazilian real estate company. Under his leadership, the Company increased its net revenue from R\$ 457 million in 2005 to over R\$3.7 billion in 2010. He will remain on the Board of Directors of Gafisa and will work with the Board to identify his successor and ensure a smooth transition.

Caio Racy Mattar, Chairman of Gafisa said, "On behalf of Gafisa's Board of Directors, we would like to thank Wilson for his invaluable leadership over the last five years in building a leading platform for growth and long-term success. He played a pivotal role in our transition to a public company.

We believe in our team and see a good future ahead, given that the company is operating in a very promising market that holds excellent prospect for the years to come, and that we are well placed to take advantage of the opportunities in all segments of the Brazilian residential market, due to our full and balanced platform."

Wilson said, "My five years as CEO of Gafisa have been both challenging and rewarding. Our team can be extremely proud of the accomplishments that we have achieved and I am confident that they will capitalize on the tremendous growth opportunity presented in the Brazilian homebuilding sector. I am committed to a smooth transition for the company and look forward to continuing in my role as an active member of the Board of Directors.

An executive search firm will be hired to conduct a thorough evaluation of potential internal and external candidates to succeed Mr. Amaral that will remain at the head of the Executive Officers until the end of this process.

New Board Members

Gafisa also announced today that it intends to complement its Board of Directors with the appointment of three new members. This reflects the

constant evolution of our corporate governance, adding to the team three more experienced independent members. The new members are:

- Henri Phillippe Reichstul, 62: Graduated in economics from the University of São Paulo (USP) and a post-graduate in economics at Oxford University's Hertford College, Mr. Reichstul is a senior executive whose career includes both the public and private sector, as well as an extensive background as an independent board member. His professional background includes terms as CEO of Petrobras (1999-2001), Globopar (2002) and Brenco (2008-2010) and as a board member at the Pão de Açúcar Group, Vivo, TAM and Petrobras, among others. He is currently on the boards of companies such as Credit Agricole Group, Repsol YPF, Peugeot-Citroen do Brasil and Ashmore Energy International.

- Guilherme Affonso Ferreira, 59: Graduated in production engineering from the University of São Paulo (USP) a post-graduate in economics and politics at Macalester College, Mr. Ferreira is the CEO of Bahema Participações, an investment holding company that has been in the business for over 15 years, and has accumulated considerable experience as an independent board member at companies that have a history of success and are considered models of corporate governance. He has been on the board of several companies, including Unibanco, Submarino and B2W, and is currently on the boards of the Pão de Açúcar Group, Sul América, Eternit and Arezzo.

Leticia Costa, 51: Graduated in production engineering from the University of São Paulo (USP) and with an MBA from Cornell University, Leticia Costa has a career background in strategic consulting, having worked for 24 years at Booz Allen, first as senior consultant at their London office, then as vice-president and subsequently partner at their São Paulo office, and finally as president of Booz Allen Brasil. In 2010, Leticia Costa left Booz Allen and opened her own consulting firm Prada Assessoria, and she is also on the boards of Localiza, Sadia and Technip.

Glossary

Affordable Entry Level

Residential units targeted to the mid-low and low income segments with prices below R\$200 thousand per unit.

Backlog of Results

As a result of the Percentage of Completion Method of recognizing revenues, we recognize revenues and expenses over a multi-year period for each residential unit we sell. Our backlog of results represents revenues minus costs that will be incurred in future periods from past sales.

Backlog of Revenues

As a result of the Percentage of Completion Method of recognizing revenues, we recognize revenues over a multi-year period for each residential unit we sell. Our backlog represents revenues that will be incurred in future periods from past sales.

Backlog Margin

Equals to $\text{Backlog of Results} \div \text{Backlog of Revenues}$ to be recognized in future periods.

Land Bank

Land that Gafisa holds for future development paid either in Cash or through swap agreements. Each decision to acquire land is analyzed by our investment committee and approved by our Board of Directors.

LOT (Urbanized Lots)

Land subdivisions, or lots, with prices ranging from R\$ 150 to R\$ 600 per square meter

PoC Method

Under Brazilian GAAP, real estate development revenues, costs and related expenses are recognized using the percentage-of-completion (PoC) method of accounting by measuring progress towards completion in terms of actual

costs incurred versus total budgeted expenditures for each stage of a development.

Pre-sales

Contracted pre-sales are the aggregate amount of sales resulting from all agreements for the sale of units entered into during a certain period, including new units and units in inventory. Contracted pre-sales will be recorded as revenue as construction progresses (PoC method). There is no definition of "contracted pre-sales" under Brazilian GAAP.

PSV

Potential Sales Value.

SFH Funds

Funds from SFH are originated from the Governance Severance Indemnity Fund for Employees (FGTS) and from savings accounts deposits. Banks are required to invest 65% of the total savings accounts balance in the housing sector, either to final customers or developers, at lower interest rates than the private market.

Swap Agreements

A system in which we grant the land-owner a certain number of units to be built on the land or a percentage of the proceeds from the sale of units in such development in exchange for the land. By acquiring land through this system, we intend to reduce our cash requirements and increase our returns.

About Gafisa

Gafisa is a leading diversified national homebuilder serving all demographic segments of the Brazilian market. Established over 56 years ago, we have completed and sold more than 1,000 developments and built more than 12 million square meters of housing only under Gafisa's brand, more than any other residential development company in Brazil. Recognized as one of the foremost professionally managed homebuilders, "Gafisa" is also one of the most respected and best-known brands in the real estate market, recognized among potential homebuyers, brokers, lenders, landowners, competitors, and investors for its quality, consistency, and professionalism. Our pre-eminent brands include Tenda, serving the affordable/entry level housing segment, and Gafisa and AlphaVille, which offer a variety of residential options to the mid to higher-income segments. Gafisa S.A. is traded on the Novo Mercado of the BM&FBOVESPA (BOVESPA:GFSA3) and on the New York Stock Exchange (NYSE:GFA).

This release contains forward-looking statements relating to the prospects of the business, estimates for operating and financial results, and those related to growth prospects of Gafisa. These are merely projections and, as such, are based exclusively on the expectations of management concerning the future of the business and its continued access to capital to fund the Company's business plan. Such forward-looking statements depend, substantially, on changes in market conditions, government regulations, competitive pressures, the performance of the Brazilian economy and the industry, among other factors; therefore, they are subject to change without prior notice.

Edgar Filing: Gafisa S.A. - Form 6-K

The fourth quarter financial statements were prepared and are being presented in accordance with the accounting practices adopted in Brazil (Brazilian GAAP), required for the years ended December 31, 2009. Therefore, they do not consider the early adoption of the technical pronouncements issued by CPC in 2009, approved by the Federal Accounting Council (CFC), required beginning on January 1, 2010. On November 10, 2009 the CVM, issued the deliberation nº 603 changed by deliberation nº 626, which provides the option for listed Companies to present 2010 quarterly information based on accounting practices in force at December 31, 2009.

The following table sets projects launched during 2010:
