Tenda Segment Pre-Sales

Second quarter gross pre-sales increased 38% Q-o-Q to R\$344.8 million, compared to R\$249.1 million in 1Q12. Since 1Q12, pre-sales recognition and the remuneration of the Tenda sales force have been contingent upon the ability to pass mortgages onto financial institutions. Second quarter net pre-sales

(gross pre-sales less dissolutions) were R\$15.7 million compared with negative R\$90.4 million in 1Q12.

The second quarter net pre-sales results reflect the dissolution of contracts with potential homeowners who no longer qualify for bank mortgages of R\$329.1 million versus R\$339.6 million in the previous quarter. Despite ongoing dissolutions expected in 2012, the Gafisa Group is experiencing good demand for these units. Of the 4,957 units returned to inventory, 62% have already been resold at a premium to qualified customers within 1H12. Also, it's worth mentioning that 1,278 units were cancelled during 1H12, meaning that those units did not return to inventory.

Note: 1 PoC – Percentage of completion method. Negative numbers are related to dissolutions

Tenda Segment Operations

Since June 2011 the number of units contracted by financial institutions has accelerated, which in part reflects the addition of a new CEF unit dedicated to major homebuilders. At the end of the 3Q11, 11,490 units or 35% of units sold by Tenda were not contracted with financial institutions. Today, all remaining units, of Tenda segment, have already been contracted with banks. In 1H12, Tenda transferred 6,300 units to financial institutions, equaling 53% of the mid-range of guidance provided for the full year of 10,000-14,000 customers. The transfers contributed to the positive operational cash flow achieved in the period.

Tenda Segment Delivered Projects

The Tenda segment is expected to represent 50% of Gafisa Group's planned deliveries of between 22,000 to 26,000 units in 2012. During the 1H12, Tenda delivered 39 projects/phases and 6,534 units, reaching 54% of the mid-range of full-year delivery guidance for the brand. The tables below list the products delivered in 1H12:

Currently we have access to a total of R\$1.8 billion in construction finance lines contracted with banks and R\$0.9 billion of construction credit lines in the process of being approved. Also, Gafisa has R\$2.5 billion available in construction finance lines of credit for future developments. The following tables provide information on our debt position:

OUTLOOK

With the introduction of a new strategy and organizational structure, Gafisa is making progress toward achieving its 2012 guidance. Launches for 2012 are expected to be between R\$2.7 and R\$3.3 billion, reflecting a new, more targeted regional focus and the deliberate slowdown of the Tenda business. Gafisa should represent 50%, Tenda 10% and AlphaVille 40% of launches. In the first half of 2012, the Group launched Gafisa \$ 1 billion. Gafisa was able to launch 45% of the mid-range of 2012 guidance of R\$1.5 billion for the segment. AlphaVille's launches, were in line with the internal planning, representing 1/3 of the guidance for the year. Reflecting remedial actions at Tenda and a focus on execution and delivery, no projects were launched in the 1H12. We want to re-launching the Tenda operations under a profitable business model.

As of June 30, 2012, the Company had R\$1 billion in cash and cash equivalents. During 1H12 operational consolidated cash flow reached approximately R\$361 million, representing 60% of the mid-range guidance of R\$500 – R\$700 million for the full year of 2012. The key drivers of cash flow generation include: (1) our ability to deliver units at Gafisa; (2) the transfer of Tenda units to financial institutions; (3) the sale of inventory and new projects launched; (4) the securitization of receivables and; (5) the sale of non-strategic land, that had a minor contribution to the results posted in the period.

During the first-half of 2012, the Gafisa Group delivered 12,197 units and transferred 6,300 Tenda customers to financial institutions, achieving 50% of the mid-range of the guidance for both figures.

- Establishment of a new organizational structure divided into brands, with indication of the professionals responsible for the respective structures;
- Temporary reduction of the activities of the Tenda brand, until the Company is able to operate efficiently based on the fundamentals of this segment, that is, production at competitive costs (using the technology of steel structures) and immediate transfer, soon after the sale, of clients to a financial institution;

- Increase in investments in the Alphaville brand, as it is the most profitable segment of the product portfolio; and
- Focus the Gafisa brand on the markets of São Paulo and Rio de Janeiro.

1. Operations --Continued

As a consequence of this review and of the newly established structure, a series of measures were taken:

- Extensive review of all budgets of the costs of works in progress;
- Review of all portfolio of Tenda customers in order to confirm whether they fulfill the requirements of financial institutions; and
- Analysis of the recoverability of lands located in non-priority regions.

Because of these changes and reviews made, the Company recognized adjustments and provisions amounting to approximately R\$639,482 for 2011, of which R\$113,952 for the six-month period ended June 30, 2011 (Note 2.3). Such adjustments and provisions did not produce an impact on the capital flow of the Company neither shall impact its capacity to fulfill commitments, as mentioned in Note 1 to the financial statements as of December 31, 2011.

2. Presentation of interim financial information and summary of significant accounting policies

The Board of Directors of the Company has power to amend the individual and consolidated interim financial information (“quarterly information”) of the Company after they are issued. On August 08, 2012, the Company’s Board of Directors approved the individual and consolidated quarterly information of the Company and authorized their issuance.

The individual and consolidated quarterly information were prepared and presented according to the same accounting practices adopted in the presentation and preparation, as mentioned in Note 2.1, of the financial statements for the year ended December 31, 2011, which shall be read together with this Quarterly Information.

Pursuant to CVM/SNC/SEP Circular Letter No. 03/2011, the Company states that the significant accounting judgments, estimates and assumptions, as well as the significant accounting practices are the same as those disclosed in the annual financial statements for 2011, and continue valid for the quarterly information hereof. Therefore, the corresponding information shall be read in Notes 2.1 and 2.2 of those financial statements.

In order to enhance the information described in Note 2.2, as of December 31, 2011, particularly in relation to the determination of fair value for recognition of revenue from units sold and under construction, which is appropriated to income throughout the construction period, the following criteria is adopted by the Company:

- The fair value of the revenue from units sold is stated at present value based on the discount rate which its fundamentals and assumption are the average rate of the financing obtained by the Company, net of adjustment for inflation, between the contract signature date and the estimated date to handover the

keys of the completed property to the buyer (from the handover of keys, an interest of 12% p.a. plus adjustment for inflation is applied to the accounts receivable);

- The discount rate adopted by the Company and its subsidiaries is 3.23% for the period ended June 30, 2012 (4.18% as of December 31, 2011), net of INCC;
- Subsequently, interests accrue over time on the new fair value to calculate the revenue to be appropriated, on which the percentage of completion will be applied; and,

- In compliance with the provisions of item 9 of CPC 30, items 33 and 34 of OCPC01, and item 33 of CPC 12, the Company, in relation to installment sale of unfinished units, recognizes receivables adjusted for inflation, including the portion related to the handover of keys, without interest charges, and are discounted to present value, once the agreed-upon inflation indexes do not include the interest component. The reversal of the present value adjustment, considering that an important part of the Company operations consists of financing its clients, was carried out as contra-entry to the group of real estate development revenue, consistently with interest incurred on the portion of receivables balance related to period subsequent to the handover of keys. The discount rate adopted is based on fundamentals and assumption of an average rate of loans and financing obtained by the Company, net of the inflation effect, as mentioned in Note 2.2.20 to the financial statements as of December 31, 2011.

In order to determine the most significant risks and benefits inherent in the ownership of real estate units sold that are transferred to real estate buyers, the Company follows the Technical Orientation OCPC 04. It requires significant judgment, and in this context, the Management considered all discussions on the theme that were held in the scope of the Task Group coordinated by the Securities Exchange Commission (CVM) in which the Company was represented by the Brazilian Association of Publicly-Held Companies (ABRASCA), which led to a presentation to the CPC of the minutes of the OCPC 04, which it approved and guided the Technical Interpretation ICPC 02 to Brazilian real estate entities.

Certain matters related to the meaning and application of the continuous transfer of the risks, benefits and control over the real estate unit sales have been analyzed by the International Financial Reporting Interpretation Committee (IFRIC), at the request of some countries, including Brazil. However, in view of the project for issuing a revised standard relating to revenue recognition, IFRIC has been discussing this topic in its agenda, understanding that the concept for recognizing revenue is included in the standard that is currently under discussion. Accordingly, this issue is expected to be resolved only after the revised standard relating to revenue recognition is issued.

The individual and consolidated quarterly information was prepared based on historical cost basis, except if otherwise stated. The historical cost is usually based on the considerations paid in exchange for assets.

All amounts reported in this quarterly information are in thousands of Reais, except as otherwise stated.

The non-financial data included in this quarterly information, such as sales volume, contractual data, revenue and costs not recognized in units sold, economic projections, insurance and environment, were not reviewed.

Except for the loss for the period, the Company does not have other comprehensive loss or income.

The explanatory notes that did not undergo significant changes in relation to the individual and consolidated statements as of December 31, 2011 were not included in the accompanying quarterly information.

2.1. Functional currency

The individual and consolidated quarterly information are presented in Reais (presentation currency), which is also the functional currency of the Company and its subsidiaries.

2.3. Restatement of consolidated quarterly information at June 30, 2011

As mentioned in Note 1, in line with the new strategic direction of the Company, during the fourth quarter of 2011, the executives who assumed the management of the operations of Gafisa and its subsidiaries Tenda and AUSA, conducted an extensive review of the budgets of construction works while reviewing the short and long-term business plan of the Company, and estimated the costs necessary for their completion. In the review process, adjustments to budgets that should have been recorded in the six-month period ended June 30, 2011 were identified and that were not identified through the internal controls operating at that period.

We highlight that the adjustments to costs that were identified are mainly from the operational problems in the performance of construction works by franchise partners and contractors, renegotiation of supplier's contracts and project changes.

The Company's management, with the objective of identifying the retroactive effects, reviewed the costs of earth moving construction and brickwork stages; contracts for the replacement of contractors and franchise partners and additional costs of completed units.

The retrospective effects of adjustments to the budgets of costs for period ended June 30, 2011, disclosed and accounted for in accordance with CPC 23 – Accounting Practices, Changes in Accounting Estimates and Errors (equivalent to IAS 8), are as follows:

(a) As of June 30, 2012, Bank Deposit Certificates (CDBs) include interest earned varying from 90% to 103.5% (from 75% to 110% as of December 31, 2011) of Interbank Deposit Certificates (CDI). The CDBs in which the Company invests earn interest that is usually above 98% of CDI. However, we invest in short term (up to 20 working days) through securities purchased under agreement to resell which interest is lower (from 75% of CDI). On the other hand, these investments are exempt from the tax on financial transactions (IOF), which is not the case of CDBs.

(b) Restricted cash in guarantee to loans are investments in fixed-income funds, whose shares represent investments only in federal government bonds, indexed to fixed or price indexes, and inflation variation, and

made available when the ratio of restricted receivables in guarantee to debentures reach 120% of the debt balance (Note 12). R\$43,383 of total refers to financial investments, with fixed interest at 101% of CDI, with grace period of 90 days, related to the assignment of receivables described in Note 5(v). See Notes 12(v) and 16(b).

(c) Restricted credits are represented by onlending of the funds from associate credit (“*crédito associativo*”), a type of government real estate financing, which are in process of approval at the Caixa Econômica Federal (a Federally owned Brazilian bank used for real estate financing). These approvals are made to the extent the contracts signed with clients at the financial institutions are regularized, which the Company expect to be in up to 90 days.

(d) Additional Construction Potential Certificates (CEPACs). In fiscal year 2010, the Company acquired 22,000 Additional Construction Potential Certificates (CEPACs) in Seventh Session of the Fourth Public Auction conducted by the Municipal Government of São Paulo, related to the consortium of Água Espraiada urban operation, totaling R\$16,500. At June 30, 2012 and December 31, 2011, the CEPACs, recorded in the account “Other”, in the amount of R\$10,799, have liquidity, the estimated fair value approximates cost, and shall not be used in ventures to be launched in the future. During 2011, the Company allocated a portion of CEPACs to new ventures. Such issue was registered with the CVM under the No. CVM/SER/TIC/2008/002, and according to CVM Rule No. 401/2003, CEPACs are put up for public auction having as intermediary the institutions that take part in the securities distribution system.

As of June 30, 2012 and December 31, 2011, the amount recognized amount relating to open-end assets and exclusive consolidated investment funds are classified as “held for trading” at fair value, as contra-entry to income for the period or year.

14. Payables to venture partners--Continued

(a) In relation to the individual financial statements, in January 2008, the Company formed an unincorporated venture (SCP), the main objective of which is to hold interest in other real estate development companies, as mentioned in Note 9 (i) (a). As of June 30, 2012, the SCP received contributions of R\$213,084 (represented by 13,084,000 Class A units of interest fully paid-in by the Company and 200,000,000 Class B units of interest from the other venture partners). The SCP will preferably use these funds to acquire equity investments and increase the capital of its investees. As a result of this operation, due to the prudence and considering that the decision to invest or not is made jointly by all members, thus independent from Company management decision, as of June 30, 2012 payables to venture partners were recognized in the amount of R\$200,000, maturing on January 31, 2014. The venture partners receive an annual declared dividend substantially equivalent to the variation in the Interbank Deposit Certificate (CDI) rate; as of June 30, 2012, the amount accrued totaled R\$7,855. The SCP's charter provides for the compliance with certain covenants by the Company, in its capacity as lead partner, which include the maintenance of minimum indices of net debt and receivables. At a meeting of the venture partners held on February 2, 2012, they decided to reduce the SCP capital by 100,000,000 Class B units and, as consequence of this resolution, the SCP paid R\$100,000 to the partners that held such units. As of June 30, 2012, the SCP and the Company is in compliance with these clauses.

In the consolidated financial statements, in April 2010, the subsidiary Alphaville Urbanismo S.A. paid-in the capital of an entity, the main objective is the holding of interest in other companies, which shall have as main objective the development and carrying out of real estate ventures. As of June 30, 2012, this entity subscribed capital and paid-in capital reserve amounting to R\$161,720 (comprising 81,719,641 common shares held by the Company and 80,000,000 preferred shares held by other shareholders). As a result of this transaction, due to prudence and taking into consideration the rights to which the holders of preferred shares are entitled, such as payment of fixed dividends and redemption, as of June 30, 2012, payables to investors/venture partners are recognized at R\$53,333 (net of the payment mentioned below), with final maturity on March 31, 2014. The preferred shares shall pay cumulative fixed dividends, substantially equivalent to the variation of the General Market Prices Index (IGP-M) plus 7.25% p.a. As of June 30, 2012, the balance accrued amounts to R\$2,283. The Company's articles of incorporation sets out that certain matters shall be submitted for approval from preferred shareholders through vote, such as the rights conferred by such shares, increase or reduction in capital, use of profits, set up and use of any profit reserve, and disposal of assets. On April 2, 2012, the Company paid R\$26,667 to partners who hold

preferred shares. As of June 30, 2012, the Company is in compliance with the above-described clauses.

Dividends are reclassified as financial expenses in the financial statements.

(b) As part of the funding through issuance of Certificates of Bank Credit— CCB, described in Note 11, the Company and subsidiary AUSA entered into a paid usufruct agreement in connection with 100% of the preferred shares in SPE-89 Empreendimentos Imobiliários S.A. and Alphaville Ribeirão Preto Empreendimentos Imobiliários S.A., for a period of six years, having raised R\$45,000 and R\$35,000, respectively, recorded based on effective interest method of amortization in the statement of operations. As of June 30, 2012, the total amount of dividends paid to partners who hold preferred shares was R\$13,400 and R\$8,600, respectively.

16. Provisions for legal claims and commitments--Continued

(a) Civil, tax and labor claims--Continued

The Company is filing appeals against all decisions, as it considers that the inclusion of Gafisa in the claims is legally unreasonable; these appeals aim at releasing amounts and obtaining the recognition that it cannot be held liable for the debt of a company that does not have any relationship with Gafisa. The final decision on the Company's appeal, however, cannot be predicted at present.

(i) The subsidiary AUSA is a party to legal and administrative claims related to Excise Tax (IPI) and State VAT (ICMS) on two imports of aircraft in 2001 and 2005, respectively, under leasing agreements without purchase option. The likelihood of loss in the ICMS case is rated by legal counsel as (i) Probable in regard to the principal and interest, and (ii) Remote in regard to the fine for noncompliance with accessory liabilities. The amount of contingency, rated by legal counsel as a probable loss, amounts to R\$12,094 and is provisioned at June 30, 2012.

(ii) As of June 30, 2012, the Company was subject to labor lawsuits, which had the most varied characteristics and at various court levels and is awaiting judgment. These claims corresponded to a total maximum risk of R\$150,211. Based on the opinion of the Company's legal counsel and the expected favorable outcome, and on the negotiation that shall be made, the provisioned amount is considered sufficient by management to cover expected losses.

As of June 30, 2012, the Company and its subsidiaries have judicially deposited the amount of R\$95,833 (R\$85,702 as of December 31, 2011) in the Company's interim financial information, and R\$123,087 (R\$108,436 as of December 31, 2011) in the consolidated interim financial information (Note 7) in connection with the aforementioned legal claims.

(iii) Environmental risk

There are various environmental laws at the federal, state and municipal levels. These environmental laws may result in delays for the Company in connection with adjustments for compliance and other costs, and impede or restrict ventures. Before acquiring a land, the Company assesses all necessary and applicable environmental issues, including the possible existence of hazardous or toxic materials, residual substance, trees, vegetation and the proximity of the land to permanent preservation areas. Therefore, before acquiring land, the Company obtains all governmental approvals, including environmental licenses and construction permits.

In addition, the environmental legislation establishes criminal, civil and administrative sanctions to individuals and legal entities for activities considered as environmental infringements or offense. The penalties include the stop of development activities, loss of tax benefits, confinement and fines.

(iv) Lawsuits in which likelihood of loss is rated as possible

In addition, as of June 30, 2012, the Company and its subsidiaries are aware of other claims and civil, labor and tax risks. According to the opinion of the legal counsel, the likelihood of loss is rated as possible, in the amount of R\$629,844 (R\$489,549 as of December 31, 2011), based on average past outcomes adjusted to current estimates, for which the Company's Management believes it is not necessary to recognize a provision for occasional losses. The change in the period was caused by the higher volume of lawsuits and

review of the involved amounts.

(b) Payables related to the completion of real estate ventures

The Company and its subsidiaries are committed to deliver real estate units that will be built in exchange for the acquired land, and to guarantee the release of financing, in addition to guaranteeing the installments of the financing to clients over the construction period.

The Company is also committed to completing units sold and to comply with the Laws regulating the civil construction sector, including the obtainment of licenses from the proper authorities, and compliance with the terms for starting and delivering the ventures, being subject to legal and contractual penalties.

As described in Note 4.2, at June 30, 2012, the Company and its subsidiaries have restricted financial investments which will be released at the extent the guarantee indexes described in Note 4.2 are met, which include the receivables pledged in guarantee of 120% of the debt outstanding.

(c) Commitments

In addition to the commitments mentioned in Notes 6, 9, 11 and 12, the Company has the following other commitments:

(i) The Company has contracts for the rental of 28 properties real estates where its facilities are located, the monthly cost amounting to R\$1,123 adjusted by the IGP-M/FGV variation. The rental term is from 1 to

(iii) As mentioned in Note 9, the Company informs that the amount negotiated to acquire the remaining 20% interest in the capital stock of AUSA amounts to R\$359 million, which will be settled through the issuance of Gafisa (parent company) shares estimated at 70,251,551 common shares. The number of shares that shall be issued to settle this transaction is being decided at an arbitration process initiated by the non-controlling shareholders of AUSA.

(i) Gafisa

The Company's Management uses the Binomial and Monte Carlo models for pricing the options granted because of its understanding that these models are capable of including and calculating with a wider range the variables and assumptions comprising the plans of the Company.

A total of six stock option plans are offered by the Company. The first plan was launched in 2000 and is managed by a committee that periodically creates new stock option plans, determining their terms, which, among other things: (i) define the length of service that is required for employees to be eligible to the benefits of the plans, (ii) select the employees that will be entitled to participate, and (iii) establish the purchase prices of the shares to be exercised under the plans.

The Company and its subsidiaries record the amounts received from employees in an account of advances in liabilities. No advances were received in the period ended June 30, 2012 and in the year ended December 31, 2011.

As of June 30, 2012 and December 31, 2011, the changes in the number of stock options and corresponding weighted average exercise prices are as follows:

	06/30/2012		12/31/2011

extent the taxable profit is likely to be available for offsetting temporary differences, based on the assumptions and conditions established in the business model of the Company.

The initial recognition and subsequent estimates of deferred income tax are carried out when it is probable that a taxable profit for the following years will be available to be used to offset the deferred tax asset, based on projections of results prepared and on internal assumptions and future economic scenarios that enable its total or partial use should a full credit be recognized. As of June 30, 2012 and December 31, 2011, the Company did not recognize any deferred tax assets calculated on the tax loss. In the period ended June 30, 2012, there was no change in the retained earnings scenario.

(i) Risk considerations

a) *Credit risk*

The Company and its subsidiaries restrict their exposure to credit risks associated with cash and cash equivalents, investing in financial institutions considered highly rated and in short-term securities.

With regards to account receivable, the Company restricts its exposure to credit risks through sales to a broad base of customers and ongoing credit analysis. Additionally, there is no history of losses due to the existence of liens for the recovery of its products in the cases of default during the construction period. As of June 30, 2012 and December 31, 2011, there was no significant credit risk concentration associated with clients.

b) *Derivative financial instruments*

The Company adopts the policy of participating in operations involving derivative financial instruments with the objective of mitigating or eliminating currency, index and interest rate risks to its operations, when considered necessary.

The Company holds derivative instruments to mitigate its exposure to index and interest volatility recognized at their fair value directly as part of the year income. Pursuant to its treasury policies, the Company does not own or issue derivative financial instruments other than for hedging purposes.

(i) Risk considerations --Continued

c) *Interest rate risk*

It arises from the possibility that the Company and its subsidiaries earn gains or incur losses because of fluctuations in the interest rates of its financial assets and liabilities. Aiming to mitigating this kind of risk, the Company and its subsidiaries seek to diversify funding in terms of fixed and floating rates. The interest rates on loans, financing and debentures are disclosed in Notes 11 and 12. The interest rates contracted on financial investments are disclosed in Note 4. Accounts receivable from real estate units delivered (Note 5), are subject to annual interest rate of 12%, appropriated on a pro rata basis.

d) *Liquidity risk*

The liquidity risk consists of the possibility that the Company and its subsidiaries do not have sufficient funds to meet their commitments in view of settlement terms of their rights and obligations.

To mitigate the liquidity risks, and the optimization of the weighted average cost of capital, the Company and its subsidiaries permanently monitor the indebtedness levels according to the market standards and the fulfillment of covenants provided for in loan, financing and debenture agreements, in order to guarantee that the operating-cash generation and the advance funding, when necessary, are sufficient to maintain the schedule of commitments, not posing liquidity risk to the Company or its subsidiaries (Note 12).

The maturities of financial instruments, loans, financing, suppliers and debentures are as follows:

(ii) Fair value of financial instrumentsa) *Fair value measurement*

The following estimate fair values were determined using available market information and proper measurement methodologies. However, a considerable amount of judgment is necessary to interpret market information and estimate fair value. Accordingly, the estimates presented in this document are not necessarily indicative of amounts that the Company could realize in the current market. The use of different market assumptions and/or estimates methodology may have a significant effect on estimated fair values.

The following methods and assumptions were used in order to estimate the fair value for each financial instrument type for which the estimate of values is practicable.

(i) The amounts of cash and cash equivalents, short-term investments, accounts receivable and other receivables, suppliers, and other current liabilities approximate to their fair values, recorded in the financial statements.

(ii) The fair value of bank loans and other financial debts is estimated through future cash flows discounted using rates that are annually available for similar and outstanding debts or terms.

Thus, the lead partner ensures that the investments of the necessary funds are made and allocated as planned. The sources and use of resources of the venture are reflected in these balances, observing the respective interest of each investor, which are not subject to indexation or financial charges and do not have a fixed maturity date. Such transactions aim at simplifying business relations that demand the joint management of amounts reciprocally owed by the involved parties and, consequently, the control over the change of amounts reciprocally granted which offset against each other at the time the current account is closed. Comments on Company's Business projections****OUTLOOK**

With the introduction of a new strategy and organizational structure, Gafisa is making progress toward achieving its 2012 guidance. Launches for 2012 are expected to be between R\$2.7 and R\$3.3 billion, reflecting a new, more targeted regional focus and the deliberate slowdown of the Tenda business. Gafisa should represent 50%, Tenda 10% and AlphaVille 40% of launches. In the first half of 2012, the Group launched Gafisa \$ 1 billion. Gafisa was able to launch 45% of the mid-range of 2012 guidance of R\$1.5 billion for the segment. AlphaVille's launches, were in line with the internal planning, representing 1/3 of the guidance for the year. Reflecting remedial actions at Tenda and a focus on execution and delivery, no projects were launched in the 1H12. We want to re-launching the Tenda operations under a profitable business model.

Table 1. Launche Guidance – 2012 Estimates versus Actual figures 1H12

Consolidated Launches (R\$2.70 – R\$3.30bn)	R\$3.00bn	R\$1.01bn	34%

Launches Tenda (R\$270 – R\$330mn)	R\$300 mn	R\$0	0%

As of June 30, 2012, the Company had R\$1 billion in cash and cash equivalents. During 1H12 operational consolidated cash flow reached approximately R\$361 million, representing 60% of the mid-range guidance of R\$500 – R\$700 million for the full year of 2012. The key drivers of cash flow generation include: (1) our ability to deliver units at Gafisa; (2) the transfer of Tenda units to financial institutions; (3) the sale of inventory and new projects launched; (4) the securitization of receivables and; (5) the sale of non-strategic land, that had a minor contribution to the results posted in the period.
